~ Optional ~

Please consider completing this optional section, which will give the Board a sense of why this review has been requested.

NOTE: When conducting a health impact review, the Washington State Board of Health will consider various ways that a proposal might exacerbate or ameliorate health disparities. Completing this section will give the Board a head start by helping it understand the reasons why a review is being requested.

Briefly describe how you think the proposal might impact health disparities and whether you believe the impact will be in a positive or negative direction.

We worry about the impact on transportation safety and think this could be detrimental to our state's work toward Target Zero. We could certainly be mistaken though or bringing our own biases and would appreciate an impartial voice such as the DOH to take a look at this proposal.

Are there specific organizations or community groups you would like the Board to contact as part of this review if time allows?

No specific requests would appreciate casting as wide of a net as is appropriate within the time limitations.
