~ Optional ~

Please consider completing this optional section, which will give the Board a sense of why this review has been requested.

NOTE: When conducting a health impact review, the Washington State Board of Health will consider various ways that a proposal might exacerbate or ameliorate health disparities. Completing this section will give the Board a head start by helping it understand the reasons why a review is being requested.

Briefly describe how you think the proposal might impact health disparities and whether you believe the impact will be in a positive or negative direction.

My only assumption is that it will reveal that people's health is impacted by rent increases because it impacts their ability stay housed and/or find housing. Looking forward to seeing what is revealed in terms of severity.

Are there specific organizations or community groups you would like the Board to contact as part of this review if time allows?

Low income housing alliance or any other groups that work directly with impacted populations in the bill.
