I guess all I can say is that there are hills to die on, and this would be one of those hills for someone like me. If a despotic and authoritarian government wishes to force a vaccine upon me without my consent, the die has been set, the fates cast, and the hill will be defended at any cost. Should the government come at me with a needle, regardless of what they think they have the right to do under this so-called "emergency power" situation, there will be dire and immediate consequences. Neither I nor my family will be forced to take a vaccine which is ineffective, unproven, unsafe and unnecessary.

I pray it never comes to that, but I for one will not be pushed around by an overbearing and tyrannical government. I alone will decide what I need for medical care. No health official, nor any other government lackey will decide that for me. Make some reasonable decisions for once. Step back. Reinstate personal responsibility rather than government dependence. This alleged "pandemic" is not a big deal, stop fear-mongering. Let people decide for themselves, set aside your ego and realize this is still America and we neither want nor need your authoritarian dictates running our lives.

Clayton Stewart  
Sic Semper Tyrannis  
Born and raised in WA but leaving as soon as possible, thanks to the recently horrid government.

Applying 246-100-040 WAC to 246-105-030 WAC after COVID is added is a scary thought. For that reason alone, COVID should be left off the list.

Much of the reaction over the past year or so seems to be driven by fear. And much of the administrative action by the governor seems to be driven by desire for control. Now is the time for a well thought out approach with more science supporting the conclusion.

I am wondering if discussions about updating WAC 246-100-040 include a provision for testing for antibodies? My understanding from what I've been reading is that unvaccinated individuals who have had COVID and have antibodies are not an imminent threat to public health.

Thank you for your consideration of my question. I look forward to hearing from someone.

Cynthia Johnston

Dear Washington State Board of Health,

Our state government should NOT enforce emergency orders to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, or vaccination.

This is an over reach by our local government. Medical decisions should be made between a person and their local medical provider!

Sincerely, Dr Paul Reed

Members of the Board,

I am deeply concerned with a proposed amendment to Chapter 246-100 WAC that would include COVID-19 as a disease which a health officer could involuntarily detain someone for a period of up to 10 days.

Nearly two years since COVID-19 was first detected in Everett, the disease is so widespread that we recorded a new record of 750,000 cases on Thursday, January 6, 2022. Why would we have waited two years to enact such measures, when such measures will have no discernible impact on cases?

I urge to board to reject any amendment to Chapter 246-100 WAC because this WILL be abused by officials to arbitrarily detain individuals. We have seen a concerting rise of authoritarianism in the wake of COVID-19, particularly in countries in Australia where COVID-19 cases and close contacts are sent to quarantine facilities in the Northern Territory. Quarantine facilities have failed in the Northern Territory, as they have seen record cases.

In our history as a country, and broader as a global civilization, there have been near countless examples where laws like these are used as pretexts to usurp the rights of individuals. Freedom of movement under our Constitution is not revoked when one is infected with COVID-19.

We cannot prevent COVID-19 infections as a state and society, but we can prevent an erosion of civil liberty. Every historical atrocity started with a slow encroachment of civil liberties under a noble pretext; if we are to learn from history, we must prevent the possibility from occurring.

Respectfully,  
Charles Streeter

To whom it may concern,

I am strongly opposed to the legislation WAC 246-100-040  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2Fwac%2Fdefault%2F100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf847cc0cf8dd444542f408d9d46f01de%7C11d0e2172>>  
. It is a gross violation of constitutional rights, and I will vote against any state representative who votes in favor of this.

Of particular concern is Section 1.4 of the Ex Parte Order, which allows for Quarantine and Confinement in an undisclosed location. That alone should raise enormous red flags. I want Washingtonians to stay safe and use caution for their own health and the health of others in the community. But, this subjective process needs better transparency and checks and balances. If a person is a true threat, have an open hearing with notice to get all the facts, from both sides, before a judicial officer enters an order.

I read in a statement released to Station KHQ two days ago that was meant to calm the fears that you were not discussing arresting people who refuse to test. The article further states the rules you were going to discuss affected ESHB-1551 and that it didn't involve involuntary detention of a suspected infected individual or group. However WAC 246-100-040 clearly states that a person may be arrested for failure to be vaccinated, which is the specific concern that people had.  
Please explain how this is in any way misinformation.

Washington State Board of Health Representatives,

Let this email correspondence serve as my opposition to this proposal. I am 100% against it as it clearly violates any law of the United States of America and infringes on

the liberty of the people. This clearly violates due process and it's an over reach of power and jurisdiction.

Consider all positions and not simply move forward because you are pushing an agenda or claim to be "doing your job." Many people could be hurt, killed, unable to pay for representation or legal counsel and be without money to pay for their necessities, let alone be able to provide for others that depend on them if they are kidnapped.

Sincerely,  
O. Morales

I believe I have found that meeting is to continue and there for is not been canceled either is open for public discussion of vaccines and isolation/quarantine. Let's still make it clear that there is to be no change of current recommended vaccines and isolation and quarantine. No need for enforcement officers for isolation or quarantine and most definitely no need for WAC 246-100-040 and others related to. Look forward to the meeting and the official minutes.

The WAC 246-100-040 on COVID-19

I find this extremely disturbing one that the comments are due before the material is layed out. I am completely in disagreement with this proposal

Secondly on medical freedom and ability to choose what is right for each individual and family. The fact that people citizens vaccinated or not can spread this virus.

Therefore who exactly are they involuntary committing to these "facilities" whose family and who would decide?

Have we forgotten internment camps?

In fact this would open the state to Lawsuits, we know for a fact that DSHS and The Prison system has violated so many rights of citizens, if you look at the lawsuits.

The money that would be wasted on taking constitutional rights of our citizens, Could be used on more appropriate things

I have seen this coming for a long time. Before you pass more laws maybe take it to a vote of the people the citizens who should be making the decision.

P Lorenz

This comment is being made in regards to the proposed WAC 246-100-040.

This concept and idea goes against the nature and culture of being a Pacific Northwest liberal and goes against the very freedom of being American. As descendants of World War Two survivors, I oppose any government official or agency to force remove people from their home and place them in a government-monitored camp.

This proposal is unnecessary and is overstepping it's purpose that potentially affects all type of Washington residents including minorities, immigrants, religious believers, Lgbt community members and other diverse community members.

Thank you,  
Elizabeth K

I would like to comment on WAC 246-100-040.

As a citizen of Washington and Snohomish county, I am totally against giving the local health officers the amount of power and control this would allow. Putting this much power in one person can only lead to abuse and misunderstandings. I am sure the health officials are all honorable people and this is not to cast dispersions on these folks. With as much power as this gives them, there is bound to be some mistakes and people's lives will be affected greatly.

This is America and we citizens are allowed to disagree with our government, peacefully. If this goes into effect, one person will have the power to incarcerate anybody in their area of influence. I know police officers can arrest people, etc. but there is a whole system set up to make sure the person is guilty. That would not be the case if this new law is enacted. One person could ruin lives of not just one person but whole families.

I am not sure how this got this far. I believe the last time America did this was with people of Japanese descent. I am saddened beyond expression reading the proposed legislature. Please do not pass this into law.

Thank you,

Paul McIntosh

Dear Board and who it may concern,

Seeing the meeting agenda for 1/12/22, I was shocked to see Covid 19 and ESHB 1551 mentioned together. ESHB 1551 is specifically addressing purposefully and willing spreading HIV. The timing and suggestion feels extremely concerning. Please object to the association and cease persuading a connection in any way.

Please contact me to let me know why this is even on the agenda? I look forward to hearing from you.

Thank you,

From: Carolyn Winters, Poulsbo WA

SUBJ: STRONGLY OPPOSE ANY ACTION TO INCLUDE COVID 19 PROVISIONS in WAC 246-100 Public Comments for WSBOH Members from March EH Committee Special Meeting

Dear WABOH,

I am strongly OPPOSED to any further action by the WA BOH that includes COVID 19 into the rules contained in WAC 246-100 and any actions to provide the BOH, local health boards and law enforcement with authority to harrass, discriminate against, violate the civil liberties or WA Constitution and US Constitution rights of any individual, group or by enforce involuntary detainment, isolation and quarantine due to any concern related to COVID19.

Freedom loving residents of WA see what you are attempting to do ....you are following the tyrannical foot steps of the State of New York, and many other countries across the world (e.g. Canada, Australia, etc) that either are attempting to or have implemented similar Nazi/facist-like so called "health" polices regarding COVID19. Already the State of WA is one of only four states across the nation that still has the ridiculous, non-science based mask mandate. Now, you also want to provide authority for local health boards and law enforcement to harass, involuntarily detain and/or force quarantine of residents and visitors of our State for refusing medical examination, testing, treatment, counseling, or vaccinations!

While your public web site acknowledges that the BOH was established by the WA State Constitution, there is another, more important section of the WA State Constitution that the WABOH must acknowledge:

- Article I Section 3 PERSONAL RIGHTS. No person shall be deprived of life liberty or property without due process of law.

This proposed rulemaking violates this Section in whole!

As such, all actions supporting this rule making should cease and any action include CORONA19 as a reason to violate citizens' constitutional rights should not be adopted.

Respectfully,

Carolyn Winters

Re: WAC 246-100

I am sending this to voice my disappointment that you are considering these proposed actions.

USE LAW ENFORCEMENT TO FORCE A PERSON/GROUP/FAMILIES TO ISOLATE IN A FACILITY.???

Really. We have a Constitution and a document called the Bill Of Rights. We are not Nazi Germany. Please look up the individuals, corporations that are EXEMPT from taking this vaccine that is still under Emergency Use (EUA)

As a government agency, I hope you will reconsider and take a more positive approach, like building up a persons immune system and concentrate more on preventive health care. Lock ups have proven to be disastrous to everyone. Locking up people in facilities by force sounds dystopian.

There are many options to consider, other than the direction you are taking. I am seriously thinking of moving out of the State of Wasington. If this passes, I will leave!

Subject: 1-12 meeting

Good afternoon  
As a resident of Washington, I am in complete opposition of adding covid-19 to the 246-100 codes. With minorities as more hesitant to vaccinate from historical atrocities this is a racist action and a overstep. This action would also validate the message from groups that are spreading what to this point has been dismissed as conspiracy theories. To concentrate people in government facilities against their will if they do not comply is far to similar to what occurred in Germany 80 years ago, a vote for is blood on ones hands. Please vote against,  
Thank you

Hello

The premise of this law is unconstitutional! As a decorated disabled veteran, I have fought for freedom and this blatantly goes against the rights of Americans. The constitution and our bill of rights states no law can be made that violates the constitution. There is no foot note or side clause regarding public health. This needs to be pulled from any debate and not considered again.

I appreciate your consideration of my request and ask you really evaluate what it means to be an American where you are free because of the brave.

Thank you

Subject: Notice of maladministration

External Email

Dear public servants of the Washington State Board of Health.

As one of The People, I speak in authority and I urge you to take notice and turn to serve The People and protect our rights and freedoms.

You have lied to The People regarding WAC 246-100 and have committed criminal misconduct and maladministration. Because of this, any duties you perform cannot be trusted and thus you do not have consent.

There is an underlying concern to this January 12th meeting regarding implied consent. By the Board proposing changes to Chapter WAC 246-100, you have put the Chapter as a whole before the public and can claim implied consent by silence even if it's more concerning section (WAC 246-100-040) regarding involuntary detention is not edited (the section allows for involuntary detention upon refusal of vaccine compliance). You can claim consent because WAC 246-100-040 is included in the chapter (which is the agenda item) and if the chapter is edited and accepted you can claim both public notice and consent of the chapter as a whole. The portions you have chosen to edit may be publicly acceptable. This is irrelevant without trust. You have lied to the public about what else is in the chapter " nor does it suggest law enforcement be used to enforce any vaccination requirements", and by doing so, You can position yourselves to activate the most grotesque and lied about portions under the guise of consent.

I do not mean to suggest that WAC 246-100-040 is new. I understand this overreach was put in place back in 2003 (<https://app.leg.wa.gov/wac/registerfiling.aspx?cite=246-100-040>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2Fwac%2Fregist100-040&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11> ).

By placing "Chapter 246-100 WAC" on your agenda (item 9 - WSBOH-Agenda-2022-01-12-Final.pdf (wa.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FAgenda-2022-01-12-Final.pdf%3Fver%3D2022-01-05-175008-690&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11> , you technicality (and by definition) include the whole "chapter", making Chapter 246-100 > Section 246-100-040 an agenda item. By listing "possible action" underneath the agenda item, you can claim public notice for any changes made to this chapter and it's sections.

WAC, at next week's meeting (agenda item 8). The Board will not take action on this agenda item at the meeting."

If we look back at your agenda; item 8 is listed as a briefing by TAG with no action listed. If you look at item 11 you will find the code mentioned above regarding TAG's briefing "Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry —Possible Action" . This allows you to claim public notice for any changes made to this chapter and it's sections.

- WSBOH-Agenda-2022-01-12-Final.pdf (wa.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FAgenda-2022-01-12-Final.pdf%3Fver%3D2022-01-05-175008-690&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11>

The Washington State Board of Health is both obscuring information (246-105 WAC) and directly misinforming the public (246-100 WAC) regarding this January 12th meeting. This is no less than criminal. We The People can not trust a Board that lies to us. You have lied and have placed yourselves in a position to claim that public notice has been given regarding changes to the above chapters which include; involuntary detention for non compliance with vaccination (a code that does in fact include the use of law enforcement) and Immunization Criteria for Child Care and School Entry (a code that is on the agenda for possible action).

Without question I have shown at a minimum that we The People have reason to be concerned with the criminal misconduct and maladministration of our Washington State Board of Health regarding the January 12th meeting.

Some of you will lock into place reading this (although I hope none of you do) but all of you are called in your humanity (just as I am) to love one another and care for the concerns of other people. Turn with The People and protect our rights and freedoms.

Thank you,

Michael Loutsis

WAC 246-100-040 is certainly against the constitution. What does this mean: "local health officer may issue an emergency detention order". What about warrant? Office will enter my home without it? What about habeas corpus? I and only i own my body - have a body "habeas corpus". What about 5 Amendment to Constitution: "No person shall ... be deprived of life, liberty, or property, without due process of law." My body is my property. Due process means court. This is a fascist proposal. This is tyranny! Very sad that we have this in WA state. Repeal immediately!

>

Good afternoon and happy new year.

Thank you for taking the time to review the links attached.

The first is the new law that will enable the state to incarcerate individuals for refusing government oversight concerning their medical privacy. The second is disturbing but not surprising global news concerning hastily enacted laws in some cases brutally enforced. The first appears to be the precursor to the T-4 program used in Germany in the 1930's - 40's. I did not include any links to China. I think their atrocities speak for themselves.

In the state of Washington we still have rights to choose. Since our current governor took office there were 120,664 legal abortions performed between 2013-2019.

Media and political agendas have separated society, pitting generations, races, neighbors, coworkers, and families against each other. This new law will do more damage to an already fragile institution. Separating people only brings more questions and hate. This law can't pass.

Thank you again for your time.

Shawn.

Subject: COVID-19 inclusion into WAC 246-105 (Board Meeting, January 12, 2022)

External Email

Board Members,

The consideration of COVID-19 for inclusion into WAC 246-105 is premature at this time. Currently, there are no vaccines that have made it past the Emergency Use Authorization (EUA), therefore, these current vaccines can only be used if the patient is given informed consent. These injections are strictly voluntary at this time and by placing these experimental drugs into WAC 246-105 would bypass current health guidelines in elevating the requirement by the State in making these mandatory. Mandating an experimental drug is illegal and in accordance to federal law this would be considered domestic terrorism.

V/r,  
Gary Simmons

USE LAW ENFORCEMENT TO FORCE A PERSON/GROUP/FAMILIES TO ISOLATE IN A FACILITY.???

Really. We have a Constitution and a document called the Bill Of Rights. We are not Nazi Germany. Please look up the individuals, corporations that are EXEMPT from taking this vaccine that is still under Emergency Use (EUA)

As a government agency, I hope you will reconsider and take a more positive approach, like building up a persons immune system and concentrate more on preventive health care. Lock ups have proven to be disastrous to everyone. Locking up people in facilities by force sounds dystopian.

There are many options to consider, other than the direction you are taking.  
I am seriously thinking of moving out of the State of Wasington. If this passes, I will leave!

Allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following a refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

I would very respectfully ask that you vote against the proposed legislation. The proposal is too heavy handed and counter-productive.

To whom it may concern,

I am writing to voice my concern for the new proposed covid policies WAC 246-100-045, WAC 246-100-940, WAC 246-100, WAC 246-105. I believe these proposed policies a vast over reach, violate our rights as American citizens and go against medical freedom.

There are proven models of success in how to handle Covid-19 in other states and other countries with lower covid deaths.

Also, the vaccine has not been approved by the FDA yet.

This state needs to recognize natural immunity and medical freedom.

Thank you for your time.

I heard that there is a hearing scheduled to consider application of WAC 246-100-040. This law is unconstitutional. Arresting people for their sincerely held religious beliefs without a fair trial and holding them against their will sounds eerily similar to Nazi Germany.

Forced vaccinations violate the Nuremberg code and our civil rights.

I can not believe that this is being considered in America and Washington state. Your board has a responsibility to protect us from government over reach. In case you think I am some ignorant rube from up in the hills and should just be ignored, I want to assure you that I have researched what is happening with the "pandemic", and having had Covid twice, and knowing people who have had it who were both vaccinated and unvaccinated,( some who died and some who recovered) and seeing cruise ships with fully vaccinated crew and passengers having a out break of Covid-19, and a navy ship with fully vaccinated crew having a outbreak of Covid. The "vaccines" do not work. Forcing the experimental immune system booster shot on people is immoral. Please respond to my email.

□Washington State Board of Health Representatives,

Let this email correspondence serve as my opposition to this proposal. I am 100% against it as it clearly violates any law of the United States of America and infringes on the liberty of the people. This clearly violates due process and it's an over reach of power and jurisdiction.

Consider all positions and not simply move forward because you are pushing an agenda or claim to be "doing your job." Many people could be hurt, killed, unable to pay for representation or legal counsel and be without money to pay for their necessities, let alone be able to provide for others that depend on them if they are kidnapped.

Sincerely,  
O. Morales

Subject: Changes to Washington Code to incorporate covid-19

External Email

All,

I do not agree with the revisions to incorporate Covid-19 into WAC 246-100. First off, all efforts that are utilized for this pandemic have violated the people's constitutional rights. Secondly they violate people's God given rights.

In no way should any part of what illegal actions the Governor or Washington State Board of Health be written into law.

To date, the mandates for lockdowns, masks, and the "vaccines" all violate Nuremberg code 6.3. The "vaccines" are experimental and therefore cannot be mandated. Any person or agency trying to enforce citizens to take these experimental shots are violating constitutional and God given rights.

Any further action to continue violating my freedoms by revising state laws to incorporate these violations will not be tolerated.

I do not agree and strongly suggest this effort to change the laws to add Covid-19 stopped immediately.

Thank you for your time,  
Allyssa Edlund

TO THE WA Board of Health,

WHO DO YOU THINK YOU ARE ?

Actually, Im giving you the benefit of the doubt, and hoping that what Im seeing is a mistake. That the WA BoH would even consider enforcing ( WA 246-100-040) detaining a person(s) for refusing to comply with requests for medical exams, testing, vax, treatment, etc etc., and/or to ISOLATE IN A QUARANTINE FACILITY ? PLEASE tell me this is a joke of some sort, however this is not one bit funny.

I would think there are MANY more important issues to be focusing on these days in the state of Washington.

Constitution of the US 14TH Amend', Sec 1: ... " No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the US; nor shall any state deprive any person of life, liberty or property without due process of the law; nor deny to any person ..... equal protection of the laws.. "

As I said, I truly hope this is a made-up story.

P.S. and how would something like this be enforced,,,, they could put out another job announcement for that 'STRIKE FORCE' ?

Subject: Lying Government Officials

External Email

To whomever it may concern,

I recently submitted a 'public comment' in regards to WAC 246-100 and how detaining individuals based on their covid positivity/vaccination status is egregiously corrupt.

It has come to my attention (from a Fox 28 article) that the WSBOH has now changed what the meeting will entail. So-called "government officials" seemed to have leaked the wrong email and are now backtracking on the original meeting plan. I would like the record to show that this happened AFTER all of the public comments were submitted. What does this mean? It means that the bureaucrats in charge have decided to change course due to a lack of support for their agenda.

The individuals on the board of WSBOH should resign immediately and be held accountable in court for their corrupt behavior during the COVID-19 pandemic.

Regards,

Anthony Porcaro

Dear UNELECTED Board of Health EMPLOYEES,

Why is the chat on the zoom call today disabled? Why can we NOT ask questions of the EMPLOYEES?

I want an answer as to WHY the WAC 246-100-040 is even on the books? You have NO right to detain Washingtonians or Citizens of the United States in such a way, and without DUE PROCESS.

This is a tyrannical law.... and do not tell us that just because your meeting isn't covering this WAC, that it will not be enforced at some point. If not today.... then you WILL use it later. History cannot be ignored. The Nazi's were following the "LAW" when they were putting Jews into concentration camps.... This needs to be REMOVED from the WAC books, immediately.

Remember JFK's quote: "Those who make peaceful revolution impossible will make violent revolution inevitable."

Keep this in mind.

To whom it may concern,

I am responding to the proposals of preserving and /or adding to WAC 246-100. This is certainly a reckless overreach that is and will be subject to abuse and harm based upon the nature of government and the humans that derive power from it. As a responsible life-long citizen of this State, I do not require the government to oversee at this level of accountability. The role of the Health Department may have some powers of enforcement but it must be based upon specific, local, and immediate-based needs. While Covid has introduced us to the obvious needs for communities to care for each other, the State's version of care has so far produced dysfunction, decisions made with bad science, and reckless disregard for actual protocols that work. There is little confidence that those in authority in the state can oversee effectively and to give them more unaccountable power is abusive and irresponsible.

The WAC 246.100. should be deleted, it is outdated, unconstitutional and a violation of human rights to involuntarily detain people by use of force at the sole discretion of one person. I saw the vague agenda with "possible action" so saying the rumors are completely false is gaslighting. Also being that there is a hotel reserved for quarantining the public in Chehalis backs up the justified public outrage and concern.

It is atrocious that there is no live chat and the suppression and limiting of the First Amendment of Free Speech. Also leaving a comment gets chosen by the moderator/gatekeeper, Christy, to which to publish in the Q&A where it would be seen by the public or not. And of course the overarching issue is that the public is restricted from attending in person.

Do better.

Rachel

To whom it may concern and members of the Washington Board of Health,

The proposed update to Chapter 246-100 WAC to add COVID to the list of infectious diseases is wrong. CDC data as well as state numbers and data from other countries shows that COVID-19 has a recovery rate of between 97% and 99.75%. Majority of people who contract the virus do not even realize they have it ( asymptomatic) or experience a slight cold. This addition will also include those who are vaccinated as the CDC has publically acknowledged that you are still able to get and transmit the COVID virus after being fully vaccinated. Detaining someone against their will for an illness less deadly than the annual flu is an overreach of power by the state and the health officer appointed by the state and county. Compare the data of COVID to the other diseases and viruses that are currently on the list ( HIV, TB, Rabies) and compare survival and recovery rates and you will see that they are vastly different.

As someone who was in the past the county appointed mental health evaluator for RCW 71.05 ( mental health) I will point out that these laws are a vast overreach of personal liberties and freedoms set forth by the Constitution of the United States. It is unlawfully detaining a person who has not committed a crime and forcing treatment and a possibly a vaccine that is still under EUA ( as Biontrch and Pfizer has acknowledged that Comirnaty is not in production yet and the EUA and the FDA approved ones are legally different) onto them before they are able to fight and plead their case in a court of law to an elected and appointed judge. On that topic, will we hold law enforcement to the same standard for RCW 70.05 (infectious disease) as we do for mental health cases under RCW 71.05?

Greetings,

The text below is from the Board of Health website.

"Agenda item 9, while related to rulemaking on chapter 246-100 WAC, is scoped only to the implementation of ESHB 1551

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fawfilesext.leg.wa.gov%2Fbienniu20%2FPdf%2FBill%2520Reports%2FHouse%2F1551-S.E%2520HBR%2520FBR%252020.pdf%3Fq&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9447b908d>

(Chapter 76, Laws of 2020) and does not include changes to isolation and quarantine policies nor does it suggest law enforcement be used to enforce any vaccination requirements." -sboh.wa.gov

Yet this is from the leg.wa.gov website

"(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section,

(2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

(3) If a local health officer orders the immediate involuntary detention of a person or group of persons for purposes of isolation or quarantine:

(a) The emergency detention order shall be for a period not to exceed ten days.

(b) The local health officer shall issue a written emergency detention order as soon as reasonably possible and in all cases within twelve hours of detention that shall specify the following:"

Your sboh article seems to be a direct contradiction to what is on the leg.wa.gov site. Can you clear this up?

Yours,

Taxpayer

External Email

Dear Washington State Board of Health,

I am submitting this in regards to the upcoming meeting of your board. Our state government should NOT enforce emergency orders to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, or vaccination.

This is a gross over reach by our state and local government and is not acceptable. Medical decisions should be made between an individual and their medical provider, not our state or local government officials.

Sincerely,

Dr. Randy Baze

Hello:

I ask the Board to hold off on seeking any changes to Chapter 246-100 WAC. Given the alarming move in Australia, most notably, to take suspected Covid carriers from their homes and place them in detention camps, this is not a wise time to make any changes to any sections of the legal code that deal with forcible removal and quarantine. Changes would further erode public trust in the Board and the state government at large.

To Whom It May Concern:

I urge you not to add COVID-19 to the already existing Chapter 246-100 WAC. Currently, the world is in a global clinical trial. As time progresses and we are learning more, SARS-CoV-2 should be in the same category as the flu and/or common cold. Naturally acquired herd immunity appears to be the most successful way to deal with this.

Thank you for your time.

Sincerely,  
Brittany Bridges

Hi,

I am writing to voice my frustration that it is even being considered in the United States to forcibly detain those who refuse vaccines. It is unconstitutional and is not supported by the majority of Americans. Why then would our state do such a polarizing thing? Let's allow people the freedom to look after their own health rather than forcing something on them that they are either afraid of or do not agree with. We are going to lose a lot of good people in our state if we continue down this road.

Thanks,

Ben Schouten

To whom it may concern:

I firmly disagree with this WAC, which addresses "Procedures for isolation or quarantine".

Local health departments should assess risk and recommend procedures issues related to viral diseases, etc. I am watching police arrest and detain people in other countries for not complying with draconian Covid restrictions and I do not want to see that happen here in the US.

God forbid this WAC is implemented in the state of Washington, which will be met with a huge amount of push back.

Sincerely,

Theresa White

I am opposed to your proposal 246-100 et al due to verbage that is vague thereby left to the discretion of the health department.

I question that this proposal may violate the protection afforded citizens under the constitutions of WA State & the USA.

I object to the involuntary nature of quarantine and administration of emergency testing, health exams & treatment especially when a specific medical condition has not been identified by a doctor with the option of a second opinion.

I will be listening to the discussion on Jan.12th and will be pursuing legal recourse if this is put into the WAC Code Laws.

Thank you for your consideration of my concerns.

Respectfully,

T. R. Yri and family

Greetings,

The text below is from the Board of Health website.

"Agenda item 9, while related to rulemaking on chapter 246-100 WAC, is scoped only to the implementation of ESHB 1551

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fawfilesex.leg.wa.gov%2Fbienniu20%2FPdf%2FBill%2520Reports%2FHouse%2F1551-S.E%2520HBR%2520FBR%25202020.pdf%3Fq&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C83822d>

(Chapter 76, Laws of 2020) and does not include changes to isolation and quarantine policies nor does it suggest law enforcement be used to enforce any vaccination requirements." -sboh.wa.gov

Yet this is from the leg.wa.gov website

"(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with

subsection (4) of this section,

(2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

(3) If a local health officer orders the immediate involuntary detention of a person or group of persons for purposes of isolation or quarantine:

(a) The emergency detention order shall be for a period not to exceed ten days.

(b) The local health officer shall issue a written emergency detention order as soon as reasonably possible and in all cases within twelve hours of detention that shall specify the following:"

Your sboh article seems to be a direct contradiction to what is on the leg.wa.gov site.  
Can you clear this up?

Yours,

Taxpayer

To whom it concerns,

I am urging you to not put into effect these WAC codes. Allowing health officers and law enforcement to force people to be involuntarily be detained because of not complying with forced injections is an over reach of power and these mandates dictated by those in power is unconstitutional.

I strongly urge you to reject this and allow people the freedoms afforded to us by the US Constitution. You are overstepping any boundaries you may think you have.

These codes remind me of the horrible Japanese interment camps and abhorrent Nazi Germany.

You have no moral authority to enforce these and I hope that some common sense and the US Constitution guides you to say no to these horrible rules.

If you actually follow the science like you claim to, you will see that forced immunizations are actually killing and harming people and any deaths or illnesses caused by these injections will then be on you.

No immunizations should be mandatory, and if you actually read the literature you would know that these are not approved immunizations. These shots do not stop this illness.

You can see that in the spread of this illness today.

Let people make up their own minds after consultation with their doctors.

Thank you,  
Rebecca Mayer

WSBOH,

I am against your proposal for isolation or quarantine. Whom is to decide what is a "serious risk"? The "voluntary compliance" is another way of the WSBOH passing laws taking away people's freedom of choice; making the governments non scientific based risks into mandatory laws.

Please reconsider the manifestations this law could have on the people of Washington. It would be detrimental to our personal body autonomy and rights as citizens of the United States.

Thank you,  
Susan Anderson  
Deer Park, WA

(WAC 246-100-040: Procedures for isolation or quarantine.)

" Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with requests for medical examination, testing, treatment, counseling, vaccination, decontamination of persons or animals, isolation, quarantine, and inspection and closure of facilities, or has determined in his or her professional judgment that seeking voluntary compliance would create a risk of serious harm;"

To whom it may concern,

I would like to voice my concern with your proposal to add/include COVID-19 to WAC 246-100.

First point: Adding COVID-19 would be the same as adding influenza or the common cold.

Second point: We are now at a point with good therapeutics, monoclonal antibodies, Pfizer COVID pill..etc.

Third and final point: This is boarding on draconian, dictatorship when it comes to removing the decision of one's personal doctor and patient medical decisions and forcing a one size fits all program which has failed every time it has been tried.

Thanks for your time,

-Concerned citizen

To the Washington State Board of Health,

That you are even considering requiring medical examination,testing,treatment,counseling or injection to people who refuse the above mentioned is outrageous!

You are entertaining trampling on peoples Human rights and Constitutional rights.

In this time of polarized opinion this will only exacerbate a volatile society in the state of Washington. This is barbaric, mimicking Nazi Germany! Back off and let individuals choose for themselves what is best for them and their families.

Appalled Washington Voter!

From: Mary Geiselman  
Sent: 1/11/2022 10:39:55 PM  
To: Thai, Nathaniel J (SBOH)  
Cc:  
Subject: Covid Meeting January 12, 2022

External Email

Dear Nathaniel Thai,

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education dollars and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx%2F246-100-040>>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx%2F246-100-040>>

.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated may require regular booster shots, forever, which is not sustainable.

The course of this virus is becoming quite known, and the health impact of Omicron seems to be much closer to the common cold than to the Alpha or Delta variants. However, the long term impacts of repeated doses of the experimental mRNA vaccine is unknown. Therefore, do not move forward with this unwarranted and unconstitutional plan.

Subject: WA Board of Health - Monday Agenda Item 9

External Email

Hello,

In regards to your upcoming meeting on January 12, 2022, I would like to comment on agenda item 9 regarding Chapter 246-100 WAC amendments. I am deeply opposed to each of these proposed changes. I believe they are unethical, violate multiple human rights, and I believe this is a very dangerous direction for Washington State. I do not support these amendments. Do not let an "emergency" erode rights of the people to liberty.

I need it to be explicitly understood that the proposition stated in WAC 246-100-040 absolutely cannot happen. Implementing involuntary detention of innocent citizens is bafflingly criminal and disguising it under an emergency order should not fool anybody. We cannot keep using emergency orders to implement tyrannical policies. I'm equally shocked and disappointed that this even has to be fought for.

This virus is no longer novel. We understand what we are dealing with now. We are on our way out of this. Please don't let us go backwards.

According to his biography, Keith Grellner and I live in the same city—considering it's Seabeck we're actually probably neighbors. I would be honored to take him out to lunch and discuss this in person as two professionals!

External Email

Dear board members:

I understand that you are considering making COVID subject to the provisions of 246-100 WAC.

I have reprinted a portion of the WAC.

C 246-100-040 Procedures for isolation or quarantine. (1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she: (a) Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with requests for medical examination, testing, treatment, counseling, vaccination, decontamination of persons or animals, isolation, quarantine, and inspection and closure of facilities, or has determined in his or her professional judgment that seeking voluntary compliance would create a risk of serious harm; and (b) Has reason to believe that the person or group of persons is, or is suspected to be, infected with, exposed to, or contaminated with a communicable disease or chemical, biological, or radiological agent that could spread to or contaminate others if remedial action is not taken; and (c) Has reason to believe that the person or group of persons would pose a serious and imminent risk to the health and safety of others if not detained for purposes of isolation or quarantine. (2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in a

If this is truly something that you are considering I think that it is absolutely and totally inappropriate.

Just the other day there were a series of articles published in the New England Journal of Medicine.

Here is a link to these articles - the articles I refer to are the ones on the January 6 notes.

<https://jamanetwork.com/journals/jama/newonline>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F>

Recently, there appears to be an emerging consensus among medical professionals in the United States that we are going to have to learn to live with Covid just like we live with the flu and other contagious diseases. These articles appear to support that position.

Recent advances in treatments after someone is infected with Covid and the dampening of the effects of Covid if you are vaccinated is moving Covid into the category of the flu.

Reasonable people can argue both sides of this last statement.

What we do not need is a draconian government enforcement action.

As a citizen of the state of Washington, I do not intend to be subject to the provisions of the WAC is reprinted above.

Covid does not rise to the level of the plague, smallpox, biologicals and radiological contamination which were the type of drastic emergencies the WAC was intended to address.

I do not live in a police state nor do I want to live in one.

I do not trust government officials with this type of power over Covid.

If you pass this type of administrative action, you are inviting civil disobedience.

One last thought, taking a step as drastic as this should require your agency to publish this January 12 meeting on the front page of every newspaper in the state of Washington and be discussed on the nightly news of our local news stations. You can't pass something like this with limited public exposure. I am sure you would be afraid to have that type of exposure regarding the purpose of this meeting.

Sincerely,

Owen Hoskinson

Subject: Public Comments for WSBOH Members RE: Rules hearing WAC 246-100

External Email

To whom it concerns:

I am deeply concerned to learn that anyone affiliated with the State Board of Health & these meetings is even considering invoking the applicable WACs under 246-100 for COVID-19. Of all the ways this illness has been politicized over the past two years, this move is truly beyond the pale; especially at this particular juncture.

It is unconscionable to consider even for a moment the involuntary detainment of Washington citizens and/families for a virus that has always had a survival rate of over 99.97% in the general population, has now been around for 2 years and the majority of Washington citizens having either natural immunity or the vaccine or both. The actual data is also showing the most current strain affecting us this cold & flu season is so mild in symptoms that both hospitalizations and deaths remain as flat as they were over the summer. For most, it is simply a cold. This is good news and will afford people an easy way to gain the benefits from natural immunity if they should catch it this winter, while many won't catch it at all. So why on earth are we discussing adding endemic Covid 19 to this extreme WAC ?

I can also say that our public safety communities continue to have zero interest in being used to enforce mandates from state government regarding people's personal health choices. I can say with absolute confidence you will find mass refusal by Washington Law Enforcement agencies/officers across the state to be a party to enforcing the kind of edict you are considering on their fellow citizens. It would be a gross abuse of power and a violation of their oaths to uphold the Constitution. They will not do it.

Washington state residents & our fellow citizens across the Nation are finding out on a near daily basis from both Public Health officials, Corporate Media and Medical professionals that we have been lied to repeatedly about the illness itself, relevant data points, effectiveness of mitigation measures/vaccines and government interference in availability of therapeutics and preventative treatments. There is far less tolerance for extreme moves like this by government and public health officials now than at any point over the past 2 years of this ordeal.

Finally, our state specifically has a shameful and unjust past history with regard to detaining large groups of specific people involuntarily and out of fear. Prior to 2020, we still held the absolute resolution that we would NEVER do that again...yet here we are and our state's public health representatives are considering enacting Rules that would again forcefully put American Citizens in camps on American soil in the state of Washington. History does indeed repeat itself.

Sincerely,  
A concerned Washington Citizen

Subject: WAC 246-100-040

External Email

Dear Washington State Legislature Representatives,

My hope is that at least one individual that either helped write WAC 246-100-040 or approves of it would read my email. Part of me thinks this is futile writing this, as our society refuses to really listen to the opposing side, let alone, seek to understand the other side's position. However, I'm willing to write this email in efforts to convey the opposing side's viewpoint as best as I can. I've read WAC 246-100-040, and I see that this is wanting to be put in place to prevent any potential further harm of spreading Covid-19 variants as well as any new disease in the future. Putting a safeguard in place to protect citizens. There is always this power shift from governing to the People with the amount of freedom the People get. Obviously, we need our government, or an authority, to hold the People accountable when someone or a group harm society and to give appropriate parameters.

Some governments, with initial well meaning, set up laws that a few years down the line, become morphed and corrupted. WAC 246-100-040 has high potential to become one of those laws. Australia being a prime example currently. I believe that if any of you who created WAC 246-100-040 were asked to live in Australia present day, you'd refuse. Yet this very law you approve of, is a stepping stone to the very same problem that Australia is currently facing. Unable to go outside for long periods of time, constantly having government officials checking vaccine cards, and if refusing, going to a better named concentration camp. Sounds extreme? How interesting that India's numbers of Covid-19 have flat lined and yet Australia continues with Covid-19.

Why wouldn't someone who has an infectious disease be able to do this in their own home? I know that WAC 246-100-040 states that you could stay in your own home, but this becomes a slippery slope. After passing this law, all you would need is a big enough group of people resisting when another variant or another disease comes along and this law gets rewritten into where Australia is at.

I wonder then, with all of the information on Covid-19 and the constant updates from the CDC, are we not able to use the information given to us? Or do we need a law to help us govern what gets put into our body and where we choose to come and go? Covid-19 is a new phenomenon on so many levels.

Never has a society defeated a new disease or virus through vaccines in the initial phase. It is usually years later after the virus has swept through, that a vaccine is made to prevent it happening in a wave again. Sometimes I think of a virus like agriculture, to prevent crops from being fed on, pesticides are sprayed. Then the bugs and pests become immune. Then another harsher pesticides is made and in turn, the pests become what's called as Super Bugs. The agriculture receiving the pesticides have a raised level of toxicity. Then GMO came into the picture because of the accumulating problem caused by amping-up the pesticides, and yet we don't know the long-term effects of playing that move either. This is just about what we put into our body, not even changing molecular

parts of our body.

Do I have a Doctorate's in Microbiology? No, but sometimes I wonder if the vaccine approach was actually the best one. Did you know that there are no protocols in place treating medicinally early stages of Covid-19? It is only when an individual is already in the hospital when their lungs are fighting for their lives that they are given serious treatment. Why did we fall off the bandwagon, having many research facilities look into how to treat Covid-19 besides vaccinations? It's eerie and seems a little suspicious. When there's a problem, you would cultivate many different approaches into facing said problem. Having a singularity solution lacks tact. Unification comes from integrity, trust, and having common ground. Unification does not come out of many sources promoting one solution, that's called propaganda.

And so, WAC 246-100-040 meant for taking part of our freedom for our safety doesn't seem trustworthy. When the People don't trust a legislative, pause before continuing. Are what they are spouting-off just conspiracy? Or are we approaching how to help fight against diseases wrongly? When a government shows integrity, transparency, and strength, the citizens will trust when legislatives are put into place. Better yet, redacting what was originally thought of as a solid plan and changing course to a different approach altogether. That will not be seen as weak, but wise. And wisdom right now, is much needed. You all have a hard job and lots of opinions thrown at you, I wish you well.

Sincerely,

Paige

To all members of the Washington state board of health:  
I am writing to voice my concerns over the proposed policies WAC 246-100 and 105. I, as well as many other concerned citizens, am completely against such policies and strongly believe them to be an over reach on the part of our government. The long term effects will be detrimental to the families of our state. Please consider the voices of the people you work for and do not pass these policies, which infringe on our basic human rights. Imposing these policies on the people will be a terrible mistake. Let freedom ring!

Re: WAC 246-100-010 Incarceration of the unvaccinated

Ladies and gentlemen::

You are in the process of violating the basic constitutional rights of free citizens in an effort to intimidate all.

According to the Nuremberg agreement a free person is protected by most basic law and ethical standards from involuntary subjection to medication and injection with untested, experimental materials that, by now, have been amply demonstrated to cause premature death and health impairments to a large percentage of recipients, worldwide, while demonstrably not able to prevent infection, symptom mitigation, or the spreading to others.

You derive whatever governing power you possess from the people and by consent of the people, not by your own arbitrary authority. In attempting to force people to be injected with materials that alter one's genetic makeup you are violating that person's religious beliefs and sovereignty, and I reject such action and will not submit to any of it. The materials being injected bring about genetic modification that is irreversible, and totally against the genetic structure and commandments of the supreme authority, our Creator. You are subject to that authority. You, as the lesser magistrates are depended on to interpose between higher authority and the people over whom you currently have some power. You are not to be a conduit for a corrupt higher authority to impose its arbitrary desire for power and control upon your fellow citizens. We depend on you for such righteous and correct governing attitude.

Truth always triumphs over deception and righteousness over unrighteousness. When that comes to be, you will be held accountable by us, the free citizens and if not, certainly by your Creator.

Man is created in the image of God, and altering the genetic structure of man is an arrogant over-reach, beyond any authority that you possess, especially when done against the will of the individual.

Under the pretense of concern for the public health you propose to violate the very basic rights provided by the U.S. Constitution to life, liberty, and pursuit of happiness.

Please consider the effect of your proposed action on the citizenry, your own offspring,

and the future of the State of Washington and the country.

Respectfully,

Peter Stellas  
Bellevue

To Whom It May Concern on the WA State Board of Health,

The very fact that you are having a hearing on this gross overreach of government is absolutely unacceptable. There has never been nor could there ever be any public health crisis so great as to plan to detain people, remove them from their homes, isolate them against their will, or to force ANYTHING on their person, including your plans for medical examination, testing of any kind, treatment of any form, counseling for any reason, or vaccination of any kind, which is MEDICAL RAPE. It is disgusting that you are even considering this whatever the circumstances, but especially for a virus that has a survival rate of OVER 99%. This is what NAZI GERMANY would do. Is that where you would choose to align yourself?! Is this having any positive impact in Australia? It is not benefitting them, nor would it benefit us here. This is not serving the people of Washington State well, which is your job. This needs to stop here and now. Do not choose to fall on the wrong side of history.

Thank you for choosing to do what is RIGHT.

To all members of the Washington state board of health:  
I am writing to voice my concerns over the proposed policies WAC 246-100 and 105. I, as well as many other concerned citizens, am completely against such policies and strongly believe them to be an over reach on the part of our government. The long term effects will be detrimental to the families of our state. Please consider the voices of the people you work for and do not pass these policies, which infringe on our basic human rights. Imposing these policies on the people will be a terrible mistake. Let freedom ring!

This is unconstitutional! Let people decide if they want to be vaccinated or not. If people get sick let them be in charge of caring for themselves. Stay out of peoples personal lives.

Mr. Patton

Subject: Comments for Board of Health meeting January 12

External Email

To whom it may concern and members of the Washington Board of Health,

The proposed update to Chapter 246-100 WAC to add COVID to the list of infectious diseases is wrong. CDC data as well as state numbers and data from other countries shows that COVID-19 has a recovery rate of between 97% and 99.75%. Majority of people who contract the virus do not even realize they have it ( asymptomatic) or experience a slight cold. This addition will also include those who are vaccinated as the CDC has publically acknowledged that you are still able to get and transmit the COVID virus after being fully vaccinated. Detaining someone against their will for an illness less deadly than the annual flu is an overreach of power by the state and the health officer appointed by the state and county. Compare the data of COVID to the other diseases and viruses that are currently on the list ( HIV, TB, Rabies) and compare survival and recovery rates and you will see that they are vastly different.

As someone who was in the past the county appointed mental health evaluator for RCW 71.05 ( mental health) I will point out that these laws are a vast overreach of personal liberties and freedoms set forth by the Constitution of the United States. It is unlawfully detaining a person who has not committed a crime and forcing treatment and a possibly a vaccine that is still under EUA ( as Biontrch and Pfizer has acknowledged that Comirnaty is not in production yet and the EUA and the FDA approved ones are legally different) onto them before they are able to fight and plead their case in a court of law to an elected and appointed judge. On that topic, will we hold law enforcement to the same standard for RCW 70.05 (infectious disease) as we do for mental health cases under RCW 71.05?

--

Sincerely,

Dustin Guentner

The Board of Health agenda for its January 12

Chapter 246-100 WAC

Chapter 246-105 WAC

Be mindful during your discussions and negotiations on revisions to Washington Administrative Code where the rights of Washingtonians are thrown aside.

The potential to enter into and repeat some of history's more tragic lessons may become a reality during and following the meeting of The Board of Health this January 12th, 2022. As a concerned citizen who believes in proper vaccinations but also in the right of those persons to choose appropriately I ask you to consider carefully the words and actions you make as they will have grave consequences to Washington and to the United States as a whole.

I've included 2 references and can provide a host of historical references upon request. (there are many)

See References

[https://en.wikipedia.org/wiki/Article\\_58\\_\(RSFSR\\_Penal\\_Code\)](https://en.wikipedia.org/wiki/Article_58_(RSFSR_Penal_Code))

. Potential Anti Soviet conditions of any kind were met with brutality and formed the makings of Gulag Archipelago.

Executive Order 9066 , US, February 19, 1942 ...internment camps themselves deprived residents of liberty, as they were rounded by barbed wire fence and heavily guarded and the Japanese lost much of their property and land as they returned home after the camps. This violated the clause in constitutional amendments stating that no law shall deprive any person of life, liberty, or property.

Very Respectfully Yours,  
Donald Smithhisler

I understand in your opinion there is false information spreading. The truth is, we don't trust you. We absolutely believe you will take vague wording in an existing law and spin it for your benefit. You say it is an "update" for HIV. Why now? More likely, you want to make sure the law is current so you can use anything in it- including the isolation and use of law enforcement. That's why people are listening and commenting. The people have lost faith in you. Same for the vaccine. No one would be surprised if an unexpected vote was taken. You want us to be caught off guard. Inslee and those of you that support him have lost all our trust. This is a perfect example of how the masses feel about your overreach.

Washington State Board of Health Representatives,

Let this email correspondence serve as my opposition to this proposal. I am 100% against it as it clearly violates any law of the unites States of America and infringes on the liberty of the people. This clearly violates due process and it's an over reach of power and jurisdiction.

Consider all positions and not simply move forward because you are pushing an agenda or claim to be "doing your job." Many people could be hurt, killed, unable to pay for representation or legal counsel and be without money to pay for their necessities, let alone be able to provide for others that depend on them if they are kidnapped.

Sincerely,  
O. Morales

WAC 246-100-040, a proposed revision to include COVID protocol under the state's Communicable and Certain Other Diseases act, outlines "Procedures for isolation or quarantine," according to a report by The Gateway Pundit. The measure would allow local health officers "at his or her sole discretion" to "issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine." We THE PEOPLE are against this as it is Against THE CONSTITUTION OF THE UNITED STATE AND THE PEOPLE!

Subject: Keeping of animals

External Email

The small farmers in our state love and care for our animals. The mass producers are generally the ones with questionable practices. The law as its written is already comprehensive in how to deal with animals and their waste. The expansion of the keeping of animals law is not necessary. It is simply more regulation and over reach. The dept of health should be encouraging the small farmers and help pave the way for them. This would help to localize our food supplies, cut down on greenhouse emissions from trucking our food in from all over the country, and make us less susceptible to supply chain issues. The expansion of the keeping of animals law only hinders our states ability to support itself.

Please let us continue to provide for our families without the threat of the dept of health.

Jessica Holcomb

I am submitting comment on the following:  
I am opposed to the proposed policy changes to involuntarily detain anyone in a quarantine facility that would have anything to do with COVID. Also I am opposed to including COVID vaccinations as part of school vaccination requirements. You MUST consider the 99.9% recovery rate from COVID when contemplating government mandates. You MUST also consider the poor performance of the current vaccinations.

Subject: Comments for January 12th Meeting

External Email

Dear Department of Health for WA State,

I write to you not only as a citizen of the United State of America, not only as a resident of WA state for my entire life, not only as an active member within my community, and not only as a mother; I write to you as a daughter of Jesus Christ, the One who created my child and every other human being for we were all "fearfully and wonderfully made"~Psalm 139:14.

I have always had a passion for history and the Law as it was written, but the fact that this email is even necessary parades irrefutable evidence that we have fallen so astonishingly far from the Law and its origination and now have a complete disregard for history and true science.

The history of the Law tells us that We The People have certain unalienable rights, "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are LIFE, LIBERTY and the PURSUIT OF HAPPINESS." Dear Board Members, this comes from our very own constitution. If we are all to take our constitution at its foundation, your meeting to vote and decide how the American Republic is to live their lives is fraudulent. Science tells us that we were created with an innate and remarkable immune system. It also tells us that these "vaccines" have not warded off Covid from those who have received them, nor do masks do anything but harbor the very bacilli that our bodies are trying to expel, forcing our immune systems into overdrive, all while vastly imposing on our right to life and personal liberties. Additionally, quarantines have done nothing but impune a person's unalienable right to Life, Liberty and Pursuit of Happiness.

I really could continue but I will keep this letter short, as I am confident that you have an innumerable volume of others to sift through, so I'll close with my request.

My plea is not for you to simply vote "no" on the proposed bills, as I imagine that none of you would be so inclined to acquiesce the petition of a single citizen or even a group of citizens who presently hold no real threat to your official positions in our strange new world. My hope is to simply appeal to your humanity, to your conscience; we were not created to live in fear. If you are present today and you are hosting fear in your heart, mind, and soul, I ask that you rebuke the demon of fear from your soul and do so with authority, the only real authority any human being has, and that is in Jesus Christ. My prayer is for your souls for we will all be held responsible for the choices we make in the end, myself included.

May God Bless each of you & God Bless America!  
Jacquelynn Dalton  
Chelan County

For God did not give us a spirit of timidity or cowardice or fear, but He has given us a spirit of power and of love and of sound judgment and personal discipline, abilities that result in a calm, well-balanced mind and self-control.

2 Timothy 1:7

External Email

Dear Dept. of Health,

Comments for the Jan 12th meeting.

Please oppose using law enforcement to detain people in quarantine facilities. We are a free people. This would be a gross overreach of power. Our medical decisions are private. No school child should be forced to get a COVID vaccine. Please rethink this. Those who have the vaccine shots and boosters are still getting COVID. The vaccines are not protecting citizens from getting sick.

Please abandon this tyrannical agenda.

Sincerely,  
Elani Moody

I oppose.

These measures are way past what is good for the people. This is tyrannical force. If America is a free country we must include medical freedom and freedom of choice. The CDC wants 55 years to release data on the vax. Thats 55 years to long while continuing to force people. It is a personal responsibility to look out for ones health each and every day. Not government. We as a society hear the word "unity" well forcing people to do something that they dont want to do is not unity its actually quite they opposite. We dont quarantine people for the flu virus and on average 74k people die every year from that. Of course that was before covid became a thing and completely "eliminated" the flu virus across the entire country.

I oppose.

Or you can make an appointment for next week at <https://uwb.campus.eab.com/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fuwb.campus.eab.com%2F&data=>

FAQs:

S/NS grading:

Important Update: The deadline for undergraduates to change the grading option for a course between numeric and satisfactory/non-satisfactory (S/NS) grading is now the last day of each quarter. This change, which replaces a previous policy with an earlier date, applies to autumn 2021 and to future quarters.

You can switch S/NS grading option by MYUW Autumn registration page. As a reminder, the deadline to make the change is December 17th at 11:59 PM.

Then, link to your tuition statement and pay the 20.00.

You can read more about S/NS grades here

External Email

I have read that the state board of health is considering invoking a police state to force people to be vaccinated for Covid. This cannot be!  
There is no cause for this because people who have been vaccinated still get sick with Covid.ellipn  
To involuntary confine people is against the law and our constitution.  
Such a stance would only create rebellion.  
Please don't do this!

To whom it may concern:

As a constituent of Washington state I wanted my opinion to be clearly presented to those making unconstitutional policies in our state. I am completely against all the new proposed Covid policies including but not limited to: allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. I also am against requiring COVID-19 injections as part of school immunization.

The government was never created to be able to tell us what to do and decide the course of our life for us; rather it is the people (which is me) that have the right to tell the government (you) what I want done, and the government is to carry those deeds out. There has been enough overstep, cheating, lying, and deceit from our government in Washington state. Stand for right, truth, and freedom!

Subject: My Public Comments

#### External Email

Beyond the fact that "mandates" are not law, the latter being bills which are passed in legislatures, and signed into law by Executive, here are a few facts to consider with regard to the state's handling of covid:

1). SARS-CoV-2 is an enveloped virus  $\approx 0.1 \mu\text{m}$  in diameter,  
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7224694/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2F7224694/>>

2) Cloth masks have gaps in the weave between 90 and 300  $\mu\text{m}$  in diameter, and are essentially worthless in preventing the transmission of airborne viruses. Even were the layers of cloth to catch virions attached to a droplet, once that droplet evaporates, the virion does not simply adhere to the weave of the mask. N-95 masks are reasonable effective, but with a survival rate of 99.75, one ponders why masking is necessary. (And if quarantine is necessary, the vulnerable should be quarantined - not the healthy - as "herd immunity" is impossible when the healthy are quarantined.)  
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7185834/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2F7185834/>>

3) Israel and other highly vaxxed nations are proof these vaccines do not provide sterilizing immunity, as the bulk of patients in hospitals are vaccinated, and surges in variants can be traced back to initiation of mis vaccination. Statements declaring "vaccination prevents severe symptoms" are largely anecdotal, and as everyone's immune system responds individually, one would need to compare the illness of one person, in both a vaccinated and unvaccinated state, which is impossible.  
<https://www.deseret.com/coronavirus/2021/7/20/22584134/whats-going-on-in-israels-outbreak-among-vaccinated-people>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.deseret.com%2Fcoronavirus%2F2021%2F07%2F22584134%2Fwhats-going-on-in-israels-outbreak-among-vaccinated-people&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C66ac469dacbb4f639db008d9d197f280%7C11d0e217>>

4) Forced vaccination of anyone, but particularly the young, is contraindicated when the risk of myocarditis and pericarditis outweighs the extraordinarily remote possibility of severe illness from covid. Never in the history of the world have tens of thousands of deaths from an experimental shot been deemed "acceptable." The Swine flu vax resulted in the deaths of 32 people, and was pulled from the market. To date (6 Jan, 2022) VAERS details that over 21,000 people in the United States and others reporting into VAERS have died. VAERS is notoriously underreported by a factor of 20. Do the math.  
<https://openvaers.com/covid-data>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C66ac469dacbb4f639db008d9d197f280%7C11d0e217>>

5) There are many Second and Third World nations (Togo, Ghana, Mexico, India, Guinea Bissau, Chad, Liberia, and so on, have FAR fewer deaths than the theoretical world leader in medicine. This may be because they are actually TREATING the disease.

<https://www.worldometers.info/coronavirus/#countries>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoron>

6) There is no excuse to push vaccination of children, who neither spread nor get particularly ill from covid, the exception being those with severe co morbidities.

<https://www.wsj.com/articles/cdc-covid-19-coronavirus-vaccine-side-effects-hospitalization-kids-11626706868>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wsj.com%2Farticles%2Fcdc-covid-19-coronavirus-vaccine-side-effects-hospitalization-kids-11626706868&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C66ac469dacbb4f639db008d9d197f280%7C>

7) These shots are experimental, regardless of the media narrative. The Pfizer "approval" reads thus:

"On August 23, 2021, having concluded that revising this EUA is appropriate to protect the public health or safety under section 564(g)(2) of the Act, FDA is reissuing the August 12, 2021 letter of authorization in its entirety with revisions incorporated to clarify that the EUA will remain in place for the Pfizer-BioNTech COVID-19 vaccine for the previously-authorized indication and uses, and to authorize use of COMIRNATY (COVID-19 Vaccine, mRNA) under this EUA for certain uses that are not included in the approved BLA. In addition, the Fact Sheet for Healthcare Providers Administering Vaccine (Vaccination Providers) was revised to provide updates on expiration dating of the authorized Pfizer-BioNTech COVID-19 Vaccine and to update language regarding warnings and precautions related to myocarditis and pericarditis. The Fact Sheet for Recipients and Caregivers was updated as the Vaccine Information Fact Sheet for Recipients and Caregivers, which comprises the Fact Sheet for the authorized Pfizer-BioNTech COVID-19 Vaccine and information about the FDA-licensed vaccine, COMIRNATY (COVID-19 Vaccine, mRNA)."

Comirnaty is not only unavailable, it is not identical, and therefore, Pfizer's shot is nothing other than experimental.

If Washington State actually wants to beat this virus, the powers that be ought to be encouraging the use of Vitamin D as there are direct inverse correlations in negative covid outcomes and vitamin D levels. Zinc and Vitamin K2 are also beneficial.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8541492/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2>

Finally, a personal anecdote: After sitting in a mask at work for 5.5 hours, and then driving maskless to a doctor appointment, my oxygen sats were 96%. My typical sats are 99%. Masks are ineffective, and detrimental to worker health and well being.

Regards,  
Peggy Luffred

I am writing to you to urge you to vote no on changing the Washington state codes for quarantining. It is absolutely ridiculous to give powers to allow them to forcefully quarantine people for something that is no more than a tough flu. I am immuno compromised and have lung disease and had no problem surviving Covid with therapeutics. It has a high survival rate and if it was truly a pandemic, all of the homeless folks in Seattle and Spokane would be dropping dead in droves, given their poor health.

It is time to stop all of this government overreach and draw a line in the sand. We are counting on you to do just that. Let's not have history repeat itself and be smarter than that.

Thank you.

The use of law enforcement to force quarantine, covid-19 tests and vaccines is a gross over-reach of government, and tramples on the civil liberties of every Washingtonian. With the dismissal of law enforcement officers due to the vaccine mandate in October, and the rise in traffic (traffic fatalities) and violent crime in Washington state, law enforcement does not have the time or resources to facilitate this effort, nor is it ethical or moral for law enforcement officers to violate the freedoms of their public in this manner.

\*

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated

from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Ethelette Kent

*attachments\95C373FEDCCC4697\_image002.png*

External Email

Hi There,

I am a reporter at The Daily Beast — I am working on a story about how the Washington State Health Board is dealing with recent rumors about its Jan 12 meeting and was hoping to reach Keith Grellner about a statement he made that appeared in KREM on this topic: (<https://www.krem.com/article/news/verify/washington-forcibly-quarantine-covid-19-unvaccinated/293-9a911740-657a-4ff8-b245-75a5c09932f1>)

What is the nature of the 25,000 emails you've received and do you have a sense of who they are coming from? Have you been able to identify the source of the misunderstanding or rumors? Have people also been calling about the rumors? What sorts of threats have been made and how are you handling that? What sorts of precautions will be taken tomorrow?

I am on deadline, but if someone can get back to me in the next hour or so that would be really helpful.

Thanks,

Zoe

Subject: Applying Covid 19 to current WAC codes.

External Email

I have been informed of your attempt to add Covid 19 to your current infections disease WAC codes. Just when I thought nothing new could shock me, the Washington State Board of Health has done just that.

Let me make clear, I am a democrat. And I know many other democrats who are as upset about vaccine mandates as any Republican. Vaccines are not for everyone. They can and do cause harm, including death. Therefore, you've got to provide informed consent. Let us decide what is best for ourselves and our family. Where there is risk, there has to be choice.

I am unvaccinated. I made the decision years ago to avoid any and all pharmaceuticals due to their side effects. All you have to do is listen to drug commercials and the long list of side effects to wake up. I have chosen to eat healthy, exercise, take appropriate supplements, get plenty of sleep in order to stay healthy. I take Covid seriously and do more than most to keep my immune system strong, so if I ever to get Covid, I won't get a serious case. I have a supplement kit I keep on hand just in case I have the slightest symptom, and should I get as much as a tickle in my throat, I'm on it. To date, I have yet to get Covid, and I have not spread Covid to anyone I know.

Your attempt to add Covid 19 to current WAC Codes, appears to be an attempt to make criminals out of people who have chosen not to get vaccinated. Our police no longer have the power to chase down real criminals, but instead will have the power to hunt down the unvaccinated, yank them from their homes and throw them into quarantine facilities, force them to have a medical examination, counseling and forced vaccination? What is Washington State becoming? This all sounds like Nazi Germany!

If you want to keep peace in this state, I strongly suggest you drop this attempt to add Covid 19 to the WAC code. If you don't, there will be a huge uproar. This is so wrong on so many levels. I am livid. Why don't you put some effort into teaching people how to experience good health. Teach them how to eat healthy, avoid fast food and processed foods. Exercise, get plenty of sleep. And take basic supplements that support our immune system. Your answer has always been mask up, stay 6 feet apart, and get vaccinated over and over again with a vaccine that can potentially cause your body harm. Do your job and teach people how to have real health. Dependency on pharmaceuticals is NOT the answer.

Stop this madness!!! The Omicron variant is proving to be far less severe and still a 99 percent survival rate. This extreme measure you'll be voting on is draconian and unnecessary and will only cause chaos. Do not put Covid 19 in the WAC Codes.

Washington State Board of Health;

I am shocked by the proposed items under consideration. These are measures I would expect to see employed in communist countries or Nazi Germany. Forcible quarantine and/or removal of citizens from their own homes are characteristic of a government out of control and completely ignoring the Constitution of the United States and basic human rights. You are considering tyranny. No government or individual can in good conscience support such actions.

As a citizen supporting the Constitution and mindful of the fact this country was founded to escape tyranny I trust you will adopt NONE of these measures. These are beyond the pale and an indication that our government has truly left the people and the framework from which it is to operate.

Sincerely,

Alan Rushing

We just moved to WA State in September and we just learned that there's a possibility about health officers to use law enforcement to force an emergency order to involuntarily detail a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for any kind of situations (including Covid-19 injections). We are a free country and have the right to do what is best for our individual situations.

Any such mandated policies are over reaching our God-given rights and are immoral.

Please, do not give any government entity the authority to quarantine or in any other way remove people from society based on Covid. We are nearly two years into this pandemic, you're too late. To mandatorily lock people up is an obvious display of power. The variants are wreaking on their own. The population has long past the 70% vaccination rate, which Fauci promised was the magic number for public safety. You've released thousands of unvaccinated and untested immigrants into our communities, now you plan on locking up Washington tax payers?

Stop the insanity!

The powers that be are USING YOU AS PUPPETS. You are doing their dirty work! Do you really want to be instrumental in the United States of America becoming communistic. Do you even care about you children and grandchildren living under communism? This is what you are doing if you support these camps and mandates. You know how many people have died or permanently injured from these experimental jabs. Think for yourself. Don't let these powers think for you. You are in your employment positions to protect America from communism. Are you doing your part keeping Washingtonian free? When you face God on your judgment day will God say "Well done, good and faithful servant?"

You are in my prayers to do what is right for America.

Thank you,

Debbie Baril

To whom it may concern,

I do understand that it is after noon for the deadline which is utterly impossible for you to ask the residents of Washington to meet when you released this information for us to place "our input" even though we all do understand you truly do not care to hear. So I will be sending this anyway.

It is illegal for you to ask our law enforcement to detain, remove, restrict, or relocate based off this covid-19 plandemic that you all have corrupted for more power and money. It is our constitutional right to be able to move freely in the United States of America regardless of what your corporations leader says.

I advise you to think very clearly before you make tyranny choices against We The People. At the end of the day we hold the power and not you. If Australia has managed to arrest all of their corrupted leaders I know we can as well. There is not enough evidence or will there ever be to have these concentration camps throughout Washington State. There has been enough evidence time and time again against the tyranny that you leaders have done to the people worldwide and we have had enough. You have already lost so many First Responders that you are asking to lose more because they are here to serve us and protect the constitutional rights not be your service dogs to commit illegal activities.

As it sits you have gotten away with so much corruption with Governor Inslee. We have the Constitution for a reason to protect us of your Nazi ways! This is not a Hail Inslee nor you.

Subject: Severe Overreach by the Washington State Board of Health

External Email

Good Afternoon, Ladies and Gentlemen.

I and many of my friends, who are also concerned and active citizens of the State of Washington, are very concerned with the proposals you will be considering on January 12, 2022. We are concerned that each of you as individuals are not considering the wide-ranging consequences of your actions to yourselves, your families, and the other almost eight million people who live in our great State.

It is hard to believe that you are even debating proposals which include the power to "involuntarily detain a person or group of persons (FAMILIES {emphasis mine}) to be isolated in a quarantine facility following refusal to voluntary (sic) comply with requests for medical examination, testing, treatment, counseling, vaccination." This particular proposal makes our discomfiture with school immunization requirements seem like small potatoes. You are proposing incarcerating citizens of the State of Washington for practicing their right to their own Medical Freedom and choices. It's bad enough to detain one person for their opinions and beliefs, but you are including their entire family units in these punitive measures.

Does this mean if I simply do not agree with the "counseling" or advice from any medical personnel that I and my family can be summarily dumped into a quarantine facility? To what end? Until I change my mind? Will these be re-education camps, much like the Communist Party has used so effectively over the years? If my only "violation" is one of conscience, at what point might I be released from quarantine? Will I have to sign a statement of "A Change of Mind"? Will there be some form of punishment put upon anyone who finds themselves in one of these quarantine facilities? Ostensibly, we must be kept from infecting the rest of the population with what... our opinions?? This is a very dangerous proposal, and I beg of you to shut it down. This should never have reached this point of discussion or debate.

If the Board of Health oversteps its authority, it is possible that the State Board will be sued and that it will cost the State of Washington more money than it can afford. I'm not sure if there is a possibility to sue you each as individuals, but it would certainly give me pause if I were in your place. A decision to strip people of their rights as citizens of the State of Washington, by ignoring Section 1 and Section 2, and disregarding Section 3, 4, 7, and 11 would be catastrophic in the long run, as the citizens of the State of Washington have not voted on the measures proposed, so there is no valid legislation in place.

We are very confused and concerned about the discussion planned at the Washington State Board of Health.  
Is the WSBOH a legislative body?

Are the legislators in the process of making a law here?  
Is there a law that subjects our State Constitution to the Washington State Board of Health?

Do you all need to be reminded that WAC's are subject to the State Constitution, and when challenged can be found invalid?

If you are unfamiliar with the Sections referred to, we have included them in this email. Constitutional and Washington State Law researched and interpreted by Constitutional Scholar and Educator KrisAnne Hall.

Signed,

a Sincerely Concerned Citizen,

Cynthia J. ReaLynch

Director Davis and colleagues,

I cannot believe I am writing this email in America. I live in North Carolina and am absolutely HORRIFIED that the Washington Department of Health would even begin to think that violating someone's rights and throwing them in a quarantine facility. That it would even be remotely accepted in our country is the most egregious abuse of power we have seen yet during this Covid SCAM (which is a common cold/seasonal flu and everyone knows it).

You are DECLARING WAR on us and we will NOT cower away. I urge you and your colleges to trash this murderous plan and understand there is a line where we the citizens will not allow you, the governing bodies to advance. This is that line.

We as a country are so tired of all the lies regarding covid, the prevention of cheap treatments, and this complete takeover of our life, liberty, and pursuit of happiness.

I don't know who funds you but it must have connections with Bill Gates and his cronies.

I request that you throw out the vote as in, don't even bother voting on this idea because we will NOT COMPLY and you will likely be the people responsible to innocent blood being split.

I demand this corruption leave the office you hold! May God have mercy on your souls.

Olivia Anderson BSN, RN

Subject: Jan 12th WAC CODES COVID 19

External Email

Hello,

I am writing in concern about the upcoming WA state Board of Health meeting – applying current infectious disease WAC codes to include COVID 19.

This is a huge over step in government outreach. Being able to force someone to involuntarily quarantine when they have not tested positive for COVID, have sincere religious or philosophical exemptions, is unconstitutional.

Forcefully injecting someone or anyone else unwilling, WITHOUT being able to exercise informed consent with longterm safety data is a sincere violation of health, HIPA, and other health rights.

DO NOT move forward with this.

Do we still live in the United States of America? The country that was founded upon the ideals of freedom? And now you are proposing to use Nazi tactics against American citizens and forcing them to be detained and quarantined? If we don't have medical freedom as a citizen of the United States of America, then we have no freedom at all. My body my choice. The Nuremberg Code states that the voluntary consent of the human subject is ABSOLUTELY ESSENTIAL!!! What you are proposing strips us of our voluntary consent and our freedom to choose. Remember who you work for. By the people for the people.

Subject: opposition to state quarantine facility

External Email

I am writing to state my strong opposition to state's power to put people into quarantine facility just because they are thought to be a risk of transmission of a disease. If anything, the last year's events have taught us that any emergency power given to the state administration tends to be abused, and almost always lead to detrimental consequences both in terms of loss of personal liberties guaranteed by our constitution, and poorer outcome of the public's well-being – because one person simply doesn't have the wisdom to know what's best for the health and well-being of everyone in a big state, and has often too much ambition.

Blessings

I oppose medical detention centers because:

1. The fully vaccinated spread covid, as well as get sick from covid
2. To require unvaccinated to be absent from work is punitive and defies science

3. To detain the unvaccinated is a crime against humanity since they are no more contagious than the vaccinated
4. Detention centers promote two classes of citizens and creates the detestable "other"
5. Detention centers violate the principles of social justice

Thank you,

Elizabeth Etter

Subject: My Public Comments

External Email

Good morning Community Board Members of Washington State:

As a homeowner in this beautiful state, and as an East Coast transplant, I moved here in 2015, from the sunny state of FL to escape the heat, crowds, smog, and to be more in tune with nature.

My family has thus far, experienced nothing but warmth and kindness from our fellow Washingtonians.

We have reached a precipice it seems, where one must choose which side of right they are on, and especially in reference to forcing sovereign humans to participate in an experimental vaccination.

This is just not right.

Just as every other risky endeavor we humans choose to engage in, we must be allowed to decide for ourselves whether the risk of being injected with an experimental substance, outweighs the risk of potentially being exposed to, and/or being infected with a virus, with a very high probability of surviving.

I believe it is our human, God given right to make these decisions for ourselves and our families.

It is with much sadness that if indeed it is decided by this board to implement such drastic measures unto the citizens of this state, that I will swiftly and without a second thought, move to a state where sovereignty is respected and honored, as it should be.

Please see below, an excerpt from our United States Constitution, which grants us, by God Almighty, our Creator, the right to pursue life, LIBERTY and happiness.

Forcing citizens to inject experimental substances or face possible removal from our homes, families and lives, is the absolute antithesis of Liberty.

In Congress, July 4, 1776

The unanimous Declaration of the thirteen united States of America, When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.--That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed,

Best wishes to all, fervently praying this board stands on the right side of these principles.

Sincerely,

Cristina Maria Salgado  
Spokane, WA

External Email

To the WA State Board of Health,

Vote NO on the mandates below. I am appalled and frightened that you are even considering these actions.

RE: ALLOWING LOCAL HEALTH OFFICERS TO USE ENFORCEMENT TO FORCE AN EMERGENCY ORDER TO INVOLUNTARILY DETAIN A PERSON, OR GROUP OF PERSONS, TO BE ISOLATED IN A QUARANTINE FACILITY FOLLOWING REFUSAL TO VOLUNTARILY COMPLY WITH REQUESTS FOR MEDICAL EXAMINATION, TESTING, TREATMENT, COUNSELING, VACCINATION.

and

INCLUDE THE COVID-19 INJECTIONS AS PART OF SCHOOL IMMUNIZATION REQUIREMENTS

These kinds of actions are unacceptable, uncalled for and totally out of line. You have no right to do such things. We do not live in a Dictator/Totalitarian State. The Nuremburg Code forbids the forced immunization and involuntary detainment/confinement of people for refusing such things as the experimental Covid injection..

You are wildly & illegally overstepping your authority!!

The United States (note we are independent states united in one country) is a country based on independent freedoms.

Forcing a vaccine on people that does not even stop the spread of the virus is communistic. Especially when it causes harm. Maybe you should read up on the science (not funded by the government so the scientists say what the government wants so they are funded) and VARES reporting.

Who told you that you can play god? What about the health and death from you playing god?

How do you think you can determine the livelihood of a family or business. These internment camps are communistic. This shouldn't even be a thought. You are allowing the "higher ups" to have you do their dirty work! Think with your own brain, don't let them do the thinking for you.

Thank you from someone who pays your wages,

Subject: Upcoming Covid Legislation

External Email

I am writing to offer my strong opinion regarding the upcoming discussion and vote to "quarantine" individuals and families who choose medical freedom and decide against the Covid-19 vaccination.

As I'm sure you are aware, Covid is weakening. Each strain is becoming less virulent and deadly with most deaths occurring due to comorbidities. There are many options for treatment should you actually get Covid. And, most people recover from the virus without even being admitted to the hospital.

Law enforcement has much, much bigger problems on their hands than to go door-to-door to "round up" dissidents. Crime rate in our area is skyrocketing, drug use is out of control, and the homeless are taking over every open spot. Military cannot be used to enforce a law such as this due to posse comitatus.

The VAERS reporting should be thoroughly addressed. The vaccine should be much safer and effective for a much longer time before being considered an option. It should also go through FDA approval. Currently, the only approved FDA vaccine is Comirnaty. And, as I'm sure you know, that will not even be available to the public for at least another year. So, all of the vaccines being pushed are experimental. Experimental medical treatment forced on the public is against the Nuremberg Code.

The massive amounts of tax dollars being used to force vaccines would be much better spent for prevention and education. Honestly, this should have happened from the very beginning.

Covid is expected to be an endemic - just like a cold or the flu. At no other time in history have we taken such draconian steps for any illness outbreak.

Most importantly, every member of society should have the option of what they inject into their bodies. If you are vaccinated and your vaccine works, it should not matter if I choose not to be injected. I am willing to accept the risks that I might get ill and may even die. It is not up to you to "save" me. I trust my God-given immune system over anything man-made every time.

I'm sure you won't even read this. And, I'm also sure that your mind is made up and you don't care anyway. Remember that you were elected to serve the people and represent their wishes. Not shove your agenda down everyone's throat. Most people just want to be left alone. Do your job. Take care of the homeless, the crime rate, the astronomical taxes....stay out of my health decisions.

Christina Allenberg

1. We do not consent to be governed by Authoritarians who are rushing to forcibly inject, corral, and imprison Washingtonians in internment camps.
2. By passing such a rule, it will just discourage people from taking COVID tests because they don't want to go to COVID jail.
3. The Vaccinations are killing people, yet the statistics are flawed because anyone who has a bad reaction or death is considered "unvaccinated" for 2 WEEKS after injection. This alone counts as FRAUD and deserves legal punishment of all involved.
4. Fauci belongs IN JAIL for funding the Wuhan Lab and giving technological secrets to the Communist Chinese Party with which they released a known biowarfare agent onto the world. Please note the WHO reports only 6,000 COVID deaths in China while we are approaching 800,000 in the USA. That is because this is a biowarfare agent that was released upon the USA.
5. Who are the people on this board who will be deciding the fate of Washingtonians? Why was this meeting not more widely publicized? Why didn't every Washingtonian get an email or cell phone alert that such a meeting was happening beforehand so they could respond? Dictators deserve no respect or compliance from the People.
6. WE DEMAND THE IMMEDIATELY APPROVAL OF USE OF Ivermectin and Hydroxychloroquine and all other possible therapeutics and all alternatives to the HIV spike protein shot be made legal and available to doctors and their patients without the interference of the FDA, AMA, the State of Washington or any other party that interferes with the relationship between a patient and their doctor. Doctors need to be free to speak their own opinions, and patients should decide which course of action they want to pursue in their own health.

Please for the love of our children don't do this. Our schools will crumble, children will lack education and our world will fall even more apart.

I speak from the heart of a mother who has been fighting childhood cancer since January 2019. As you should know, cancer patients and patients in hematology and oncology cannot be vaxxed. Its a downfall for their immuno compromised bodies but it is the biggest factor in my why I am emailing you all. He relapsed June 2021 after winning our initial battle June 2020 and was additionally diagnosed with Li Fraumeni syndrome which means his cancer fight gene doesn't work. Please don't make my life any harder than we already have it.

I have a 1st grader and kinder and my cancer boy will start kinder this fall. Please dont take that away from him, it is hard enough this school year having to tell him no to his preschool and friend because he has chemotherapy weekly, dont make us take school away from them all completely.

I know COVID is serious, i do. We had it in October and i watched numerous kids between Seattle children hematology/oncology and Spokane Sacret Heart Childrens get it and make it through. One kid even laughed it off with a receptionist at Seattle childrens at the long quarantine being away from everyone. Please consider the risks and implications and burdens you are putting on parents to even navigate the right decision, dont force us into this please.

Thank you for your time, happy new year.

Danica Gatlin

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

My representative has notified me of a planned meeting regarding new policies, including the involuntary detention of individuals using law enforcement to force a quarantine regarding COVID 19. Me and my family are all fully vaccinated for covid, but if this is true I will tell you I cannot be any more strongly opposed to this measure.

I will also note that I have a master of science degree in Operations Analysis. My opinion as to the response to this pandemic has seriously raised concerns with your actions thus far for the pandemic. Lockdowns were never going to work and that was obvious from the start. We should have always started with protecting the vulnerable instead of blanket measures assuming everyone at equal risk.

Mask mandates may have worked somewhat if everyone is able to have an N95 mask they can change daily. That still is not the case. If you take a simple trip to any grocery store, the vast majority of masks are doing nothing. Either due to quality of mask or how they're worn, masks have simply become a placebo letting people think they can have some control but the mandates are doing more harm than good.

Finally I hope you take one step back and look at society. The goalposts have moved so much and situation has changed it's become a political crisis more than a public health crisis. I see people screaming and fighting over masks and distance, and honestly I feel we've gotten to the point the health experts are afraid to say "sorry we were wrong" and risk the loss of credibility. I've seen the data on homicide rates, increase in obesity, not to mention the harmful effects my child has suffered on measures for a virus he is statistically at zero risk from. If you want to salvage any faith people have in you, please take a real world look at what your doing. If you are still trying for "zero covid", you are failing. If the vaccines work, then allow those without to do as they wish. The vaccinated are safe and everyone has made their choice. We must learn to live with this and stop implementing, and in fact repeal, the draconian measures imposed on us.

Subject: Jan 12 Public Hearing on proposed Covid Policy

External Email

Good morning everyone.

My name is Doug Knighton. I live in Kennewick. I'm writing to you today out of my sincere desire that you will hear my concerns and recognize them as valid. I assume that most of you have families of your own and concerns of your own regarding all sorts of issues. I hope you will search your hearts and view my comments through the eyes of family and the importance of being able to protect those you love.

We have seen a great deal of control exercised over the citizenry of our state and our country since early 2020 when the pandemic first started. Like most people I accepted for a time, in good faith, that those making the decisions were doing the best they could with the limited knowledge they had at that time. We are now two years into the pandemic. The power exercised by government officials has been high at times and has relaxed at times. What I'm hearing today is that our state is proposing that the law be utilized to potentially force people to receive Covid shots and face mandatory, forced quarantines. That is alarming to me. If this is indeed the proposal, what is the rationale for such a policy?

I try to do the best I can to inform myself and to think critically. I think that's something we should all do. There's been a lot of discussion about "following the Science" but I am being told who the scientists are and who to follow. When I see a wide and varied field of experts and no consensus among them I'm left to decide for myself who to follow, am I not? Aren't we all? After all, what is freedom if not the right to decide when a consensus is absent?

I subscribe to the notion that Covid in all of its variants has not been handled well by our politicians nor by our medical community. We've focused so much on late treatment and on prevention via vaccination that we've overlooked early treatment and the huge benefit to well being that could have been received by our people. The vaccines were touted as the means to getting back to normal but we now know that even the vaccinated regularly contract Covid and that they also are spreaders of Covid. THAT KNOWLEDGE ALONE should be enough to stop any vaccine mandates in its tracks but it doesn't seem to be the case. Why? Why the force and coercion? Why?

There's so much more to discuss but this email has gone long enough I think to get my point across.

I hope we can all agree that the freedom to choose is of utmost importance and that we should be very careful when discussing policy related to that freedom.

Thank you for your time.

Doug

Subject: 12 January discussion and vote of your board

#### External Email

I have received an email which I assume to be an internet hype mail because it suggest an unbelievably un-American government action, but just in case it is not "hype" and is somehow amazingly true, I am writing this note to get yu to block it.

The context of the email I received is about an alleged group of actions proposed by your board for implementation upon the state of Washington public . The email identifies some incredulous actions such as state camps (let's call them as they should be classified: "concentration camps") to house non-"vaccinated" people. The individuals who would be, it is reported, arrested and placed in these camps, to be forcibly taken in a "door to door" campaign by state "law enforcement" (a poor use of the term in this instance): better classified as a "Kristallnacht", if you will.

As a tax payer and law abiding citizen, who is somewhat versed in the constitution, I demand that if such illegal, unconstitutional and invasive nonsense proposals arise, that you have the fortitude, common sense, and moral compass to denounce and reject it and any other like actions. Proposals such as these could quite possibly create a dangerous precedent with the likelihood of inciting civil unrest. Obviously such a proposal is not at all about "health" but is about "power" of the government to manipulate people's lives.

Thank you in advance for doing the right thing by not supporting these ideas.

---

I was in law enforcement for 33 years. I also conducted law enforcement operations in the military. I have read this WAC, and it is one of the most reprehensible policies I've ever seen. The biggest problem I see is that it's not being decided by the people or their elected representatives. Next, the law WILL be abused. I don't agree with it in any way, but if I did, it would be because bodies are piling up on the streets from disease. I'm sure this is being discussed of COVID. Certain individuals and groups are trying to create a crisis where there is none. It's a health issue that deserves our serious attention. It's not an emergency. If I were still Sheriff, I would never let this happen in my county. Finally, if it were ever abused, you could expect serious push back from the public. Please seriously consider my words and don't allow this WAC become law. Thank you for your time.

Subject: Concerning the Jan 12th meeting

#### External Email

Among many objections to using law enforcement to gather any one up related to illnesses or vaccination status, Washington has already gone down an ugly road of interment camps that is now an ugly, disgraceful time in our history. Do you really want to go down in history as violating basic human rights. When history is written, you will be listed among the worst.

Aside from the objection above, I have a list below.

1. Not one medical procedure or medicine is ok for 100% of the population. This is general knowledge and doesn't take a medical degree or special knowledge to know this. The Covid shots should not be imposed/forced on anyone. Any decision to get a shot/vaccine should be left between a patient's doctor and the patient. The final decision to get or not to get a shot/vaccine or any other medical treatment should be left with the individual who is receiving it and no one else because the individual is the one who will bare the consequences of it. As time has shown us, the Covid shots do not prevent infection or spread of Covid, period. This has been proven and admitted to by the CDC and other authorities. Therefore, forcing someone to get the Covid shots is equivalent to just a medical treatment and should be a choice of the individual as the Covid shots do not protect the community.

2. Liability- if the state forces people to get a medical treatment, vaccine or the Covid shots, either by coercion or forced confinement/imprisonment/quarantine, the state and any individual who participated in the coercion or forced confinement/imprisonment/quarantine should be held professionally and personally liable for ANY death, injury or dismemberment inflicted on the individual who is coerced or forced confinement/imprisonment/quarantine. The state should also be held liable for any loss of employment, income or defamation as a result of coercion, forced confinement/imprisonment/quarantine. Any loss of property should be returned in whole and any debt incurred should be paid by the state. The injured party should be made whole again by the state. If injured party dies as a result of the state's action, the state should be held liable for wrongful death and the families should be compensated for the loss and all the deceased patients property should be given to the surviving family. Any independent autopsy, not connected or influenced by the state should be preformed on anyone who dies in custody of the state.

3. False claims by the Washington state health department- there is insufficient evidence to prove that the Covid shots don't affect fertility. The Washington state health department has been advertising that the Covid shots don't affect fertility and this is simply false. The Covid shots have only been used for a year and were not sufficiently tested on its affects on fertility. There is no way to know if the Covid shots are safe in relation to fertility. Washington state health department must stop falsely claiming its safety in relation to fertility, period.

4. Any drug, medicine, vaccine or treatment that is under EUA(emergency use authorization) should not be forced on any one. Any choice to take any EUA product must be voluntary, not forced in any way, not even if someone is confined, imprisoned or quarantined. If there is a licensed product, the actual licensed product must be given, not the legal EUA product, even if it is reportedly the same. This is an issue of liability.

5. Public health has been damaged because of the heavy-handedness of the government, media and tech. To force anyone into a confinement situation would further damage trust in any public health or government agency. This will alienate citizens entirely.

6. I have personally been negatively affected by medications and was not told of the risks before hand. People are in a similar situation today. They are not allowed to know the risks or complete lists of side effects or adverse reactions to make informed decisions related to the EUA Covid shots. This is medically unethical and is wrong on all levels. With every other medication advertised, there is always a list of side effects or adverse reactions. This is not the case with the EUA Covid shots. The supposed concern is that it will cause vaccine hesitation. I would argue that hiding this information is what is causing vaccine hesitation. If the Covid shots are so great, then why hide the side effects or adverse reactions. The hiding and suppression of information is what's causing vaccine hesitation.

7. People have the right to determine what goes into their body as they are not slaves.

Debra Wells

I am writing to inform you of my strong opposition to the proposal to give local health officers authority to involuntarily place Washington residents in quarantine camps for refusal to comply with COVID-19 testing, medical exams, or vaccination. This is gross overreach and dangerous infringement on our American and human rights for medical choice, religious and personal freedoms, and the pursuit of life and liberty. Consideration of such tyranny in our state is shocking, disturbing, and downright embarrassing. It is the epitome of oppression, discrimination, and inequity that so many of you tout fighting against. The power to make these decisions belongs in the hands of the individual people, not governing officials or anyone else. Power given to government is not willingly returned to the people - do NOT be a part of this brazenly unconstitutional act.

Thank you,

Erin Palmer

I disagree with the use of police to enforce an unconstitutional law. First it's my body my choice, as it is for abortion and it is the same it is a medical procedure. The facts show covid has run its course it will always be here just like the Flu, cold, etc. Second is discrimination is running rampant and your all ok with that? Why is it ok to discriminate to me or others for a vaccine that doesn't work. Discrimination is Illegal so hold your values on the same scale as my vaccine choice as someone's choice to identify as a female who are born male. I identify as unvaccinated can you respect me for that. Third making people get a vaccine is also grounds for racism. You are denying me the right to be free as I choose based on my appearance inside and out, whether I am of color or not. Fourth is that police can not be used to detain people on a choice for a medical procedure. Police are only to uphold law and order like robbery, rape, assault, etc.

Good morning,

The current policies being discussed are truly quite concerning and disgusting. The fact that public health officials in WA state are even discussing the option of taking people out of their homes to put them into a "quarantine site" has a grave resemblance to Nazi Germany. Not only has Jay Inslee & Jesse Johnson negatively impacted law enforcement in our state by not letting them actually police and putting us all in danger. But now the BOH wants to use them as political pawns and have them remove people from their own homes?

If masks and vaccines truly worked, we would clearly see the proof by now. Instead, we have surging cases breaking records, more than ever before. We had more deaths in 2021 WITH the vaccine, than we had before the vaccine was created in 2020. It's very evident this is nothing but a tyrannical power play, of people in power trying to control the general public.

The people of WA will not stand for this.

Absolute opposition to ANY vaccine mandates or forced quarantines.

This is unacceptable in the United States. We are free men and women and any forced vaccination requirements, quarantines or medical counseling is against the law. Every law being discussed should be illegal. And we., the citizens of WA state say no to any medical mandates.

Dear Washington State Board of Health

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Sincerely,

Elizabeth Laird  
Snohomish County, WA

My husband and i are citizens of WA state! We have learned of extremely unconstitutional action being planned for your January 12th meeting. We wish to inform you of our utter disgust of the violation of our freedoms!  
How dare the local health officials be given authority to use local law enforcement to enforce covid vaccinations on any citizen- or bring such citizens to a Quarantine Camp!  
This is so outrageous! This is NOT Communist China!  
We always vote!  
We pray you reconsider!

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Covid is a highly treatable disease with a documented record of highly effective treatments that greatly reduce the risk of hospitalization and death from this disease. Furthermore, even without outpatient treatment the overall survival rate for the population is over 97%. This would strongly indicate that draconian measures to force quarantine individuals are not only completely unjustified under any emergency declaration (ie, since there is no emergency), these measures are unconstitutional with or without an emergency declaration. The constitution of the United States cannot be waived under any emergency. I am confident that the citizens of Washington, including myself, do not support such actions.

I find it abhorrent that we as a State would even consider forcibly removing individuals and families from their homes. This is no better than our shameful history of putting Japanese Americans in camps during WW2. Isn't it bad enough that people have lost their jobs over exercising their rights as American citizens! This is another step in our downhill slide into dictatorship, instead of being proud of America ~~and~~ being an American. You should be ashamed of yourselves for even considering taking this step!

Board Members,

Subject: Communicable and Other Certain Diseases rules hearing

There are many reasons, most all based in science, which will and have been presented to you that cannot be ignored. The right to choose is also one that is not negotiable.

I am opposed to any laws applied to the citizens of our State (I am born and raised in Washington) that create:

1. Restriction and coercion in employment relative to vaccine status
2. Restriction of movement within society relative to vaccine status
3. Restriction of access to healthcare relative to vaccine status
4. Restriction of any kind based on vaccination status

There is history that this country is not to be a dictatorship, but a free society. Please hold to those truths and do not implement laws and regulations that turns Washington State into the equivalent of a forced labor camp or worse based on vaccine status.

Thank you for your time and thoughtful consideration.

Christy White

Date: Fri, Jan 7, 2022, 11:58 AM  
Subject: Quarantine Camps.  
To: <wsnoh@sbog.wa.gov <mailto:wsnoh@sbog.wa.gov> >

I am writing to voice my opposition to the quarantine camps.

1. Nothing has been done to allow for natural immunity, despite medical journal publication by esteemed doctors stating that it provides better safety and protection than vaccines, has almost zero 2nd cases and less than 0.04% transmittal once the person has recovered.
2. The fact Omicron shares DNA with the common cold shows the virus is waning. Each variant getting weaker, which is the usual course of viruses, proven by science. Therefore there is no need for these draconian restrictions and actions.
3. Covid has become about politics. Not public safety. If it were about the safety and the actual science, there wouldn't be these restrictions, let alone adding worse ones.
4. The virus is on its way out. We should go back to normal. Further restrictions are not the answer. Camps, at this juncture, is overkill.

Thank you.  
Catherine Brumaugh

Please for the love of our children don't do this. Our schools will crumble, children will lack education and our world will fall even more apart.

I speak from the heart of a mother who has been fighting childhood cancer since January 2019. As you should know, cancer patients and patients in hematology and oncology cannot be vaxxed. Its a downfall for their immuno compromised bodies but it is the biggest factor in my why I am emailing you all. He relapsed June 2021 after winning our initial battle June 2020 and was additionally diagnosed with Li Fraumeni syndrome which means his cancer fight gene doesn't work. Please don't make my life any harder than we already have it.

I have a 1st grader and kinder and my cancer boy will start kinder this fall. Please dont take that away from him, it is hard enough this school year having to tell him no to his preschool and friend because he has chemotherapy weekly, dont make us take school away from them all completely.

I know COVID is serious, i do. We had it in October and i watched numerous kids between Seattle children hematology/oncology and Spokane Sacret Heart Childrens get it and make it through. One kid even laughed it off with a receptionist at Seattle childrens at the long quarantine being away from everyone. Please consider the risks and implications and burdens you are putting on parents to even navigate the right decision, dont force us into this please.

Thank you for your time, happy new year.

Danica Gatlin

Subject: Weaponizing Covid fears

External Email

Covid is a problem, I won't Deny that. However, our government has failed to show that quarantine, vaccinations and shut downs have helped in anyway. In fact, they continue to force them even going against facts and science! Enactment of interment camps is unconstitutional! It was horrendous when the Nazi did it to the Jews and how the Japanese treated our military men! It was wrong and a dark time in our history when we interned whole families of Japanese Americans and it is still wrong for our government to intern Americans living their lives instead of cowering in their homes. There is no stopping this virus. Common sense and science tell us this is here to stay just like the flu. Congratulations Fauci and all the other scientists who thought it was such a great idea to weaponize this virus. It now is going to spread continually. It is time to let Americans do what we do best: live boldly! We all now need to choose how we want to live and die. We will risk the experimental vaccine or our natural immune response. My body, my choice. Life, Liberty and the pursuit of happiness. Our government works for us! Give me Liberty or give me death!(Patrick Henry) What is life if we are all enslaved?! Stand up and stop the madness before it is too late and we have started another slaughter. Only this time, it will be Americans, on American soil by Americans!  
Stand up for freedom and our Constitution!

Aimee Brown

Subject: Forced Inoculations and Quarantine

External Email

It's my understanding that the Washington State Board of Health is meeting next week to decide whether to give the state power to forcibly quarantine and inoculate Washington Citizens. This is unbelievable to me. Please tell me the reports are NOT true and you are not even considering such a move.

On the other hand I must consider that during these crazy times of government overreach (and secrecy), it is entirely possible, even likely that the reports are true. Accordingly, I have indicated below my feelings in the matter.

It is my position that forced quarantine and injections of the still unapproved Covid-19 virus upon what you term the "unvaccinated" citizens of Washington is immoral, illogical, illegal, impractical, unethical and unnecessary. It will cause an even deeper distrust of government authority and bureaucratic elites. It will divide our citizenry and lead to future actions of control by unelected, unaccountable government authorities eager for power and control. It will harm our economy and our societal freedoms.

These are the issues I believe should be a consideration:

1) The vaccines don't work. They don't keep individuals from getting the virus, and they don't provide herd immunity as we were promised by the "authorities" at the beginning of this seemingly contrived pandemic of panic. If they are effective in lessening symptoms, let's get that out to the public as a possible effective treatment, not an ineffective vaccination.

2) The government authorities have lost all legitimacy in this matter of the Covid-19 illness in America. They have misinformed, erred, lied, withheld information, overreacted, and sought to silence dissenting positions from concerned citizens and from qualified subject matter experts. The chief aim of the government now seems to be fear, conformity and compliance, not protection of life, liberty and the pursuit of happiness.

3) The proposed forced actions of the government will harm our state economy. How is it going to help to have truck drivers, longshoremen, tradespeople, and health care workers lose their jobs and discontinue their service to our communities and their contributions to our economy?

4) It is immoral for the government to force one group of people to undergo a medical procedure for the (supposed) benefit of another group of people. What next, a One Child Policy with forced abortions? Or, maybe forced organ harvesting? Imprisoning those with dissenting views without benefit of charges or trial? These are not the values, nor the mechanisms for a free society. Are you really going to ask my friends in police work to arrest me and their family members? Are you going to demand that my son in the military arrest his mother and father, brother and sister for supporting reason and liberty instead of fear mongering and tyrannical government? Please consider, this proposal is an unprecedented use of force against legal citizens of our country and will inevitably

lead to a forceful resistance, however ineffectual. How on earth could that be considered a good thing?

5) The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is illegal and a violation of federal law. Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. The proposal will also violate WA State Constitution, Article 1 Section 7 - right to privacy regarding a citizen's medical condition and procedures.

6) The proposed use of force is unnecessary. Our health care facilities are far from overwhelmed. The mortality rate for the virus is low by any and all standards and precedent. There are already effective treatments for those that are infected and it is only the government that is keeping the populace from implementing personal actions to prevent infections and/or initiating early treatments to mitigate the symptoms of Covid and prevent worsening symptoms. The doctors and researchers that have proposed treatment protocols have been ridiculed, canceled, and threatened by the government, even though they were educated and trained in the same universities with the same degrees and certifications as the government "experts".

7) It is illogical to single out the unvaccinated for government sanction and persecution against their conscience. In an open, complex environment like our free society, it is hubris to suppose we can definitively conclude cause and effect relationships. We now know (despite the early promises of government authorities), that both the vaccinated and the unvaccinated can become infected with the virus and transmit it to others. So, why do we single out the unvaccinated for forceful actions?

I am asking the BOH to please shift its consideration away from forceful actions against the citizens of Washington, and instead work on developing trust among the citizenry through transparency, compassion, humility and fairness, with liberty for all. For myself, I am not an "anti-vaxxer" as some would pejoratively label me. Over the years I have had all the recommended vaccinations except for the flu shots which of course are not really vaccinations and for me had significant adverse reactions after the jab. For me, I would be much more likely to get the Covid shot if I trusted the government and they could show me that it was an effective TREATMENT for Covid that lessens the symptoms and increases survivability. Unfortunately, this whole pandemic has been so mishandled by the government that I cannot trust the bureaucrats anymore.

Please do NOT take the unprecedented step in government of forcibly quarantining and inoculating our legal citizens in this great country of ours.

Thank you for your consideration.

Respectfully Submitted,  
Chuck Ashley

Subject: Involuntary Detention for Infectious Disease

External Email

To whom it may concern:

As a resident of the state of Washington I am emailing you to ask that you please not try to detain any person or persons involuntarily for quarantine purposes. I hope and pray a law allowing local health officials to impose quarantine against a persons' will is not actually being considered. Especially for the SARS CoV2 pandemic.

Our country, our state, our cities and our communities are incredibly fractured over this virus. I ask you to please not help cause further divide. Please don't try to detain mother, fathers, daughters, sons, grandparents, etc.. to be held captive away from their loved ones. We need now more than ever to work together, to support one another and to help everyone heal. From the left to the right we can all agree that human life is valuable and in order to be fulfilled individuals we need each other. Please don't make it harder for one another to support each other.

I ask from the stance of a firefighter and as a proud Washington resident that we consider humanity and let feelings of good will and integrity guide our decisions. You, as an official of the state, are my voice and dictate my future and the future of my daughter. Please make it one I'm proud to raise my daughter in. Let me tell her how good people made the right decisions despite whatever biases they brought to the table. Let me tell her how good will, collaboration and hard work brought people some solace and hope through this pandemic; that we trusted the right people. Thank you for your time and I hope you and your family are safe and healthy

Alex McNealley  
Father

Hello,

I am calling in regards to Agenda (item 9) with regards to the 12th of January meeting.

Is it correct that the WA State Board of Health will discuss applying current infectious disease WAC codes to include COVID-19 for all WA State residents? Such measures could include involuntary detention and relocation / isolation in a quarantine facility.

Best,

Dean Cannon  
(206) 574-8657

Dear Washington State Board of Health,  
Hello. I, like many others, are aware of your attempts to give discretionary authority to government officials to involuntarily confine families that refuse tests, treatments, exams, and your so called " covid vaccinations."  
Rest assured, if you attempt any actions towards myself, my family, or any other family to lock them up in one of your "quarantine centers" , you will be met with a force beyond reckoning. I do not say this lightly.  
Millions of Americans will oppose you, en masse. We oppose your Nazi tactics. We oppose your tyrannical regime. We stand for FREEDOM, and FREEDOM of CHOICE. I strongly suggest you reconsider your life choices and stop with the fear mongering and despotism.  
Frederick Daniel Cardenas

Agenda 9

External Email

I am greatly concerned about this new law taking effect and the language within the law which allows a "Health Officer" to incarcerate/detain/intern anyone who refuses to follow Health orders and the provision to have law enforcement or even the National Guard involved in the process of rounding up such individuals or non-compliant groups. This is unconstitutional and violates the freedoms included in the Supreme Law of the Land. Washington State went down the Internment Camp road with WWII. Please remember that mistake.

Dear Washington State Board of Health

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons. Or anyone for that matter.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Sincerely,  
Abby Kolbeck  
Snohomish County, WA.

Subject: your discussions on January 12

External Email

We have received information that, on January 12, you will discuss what should be the government response to what you see as a Covid-19 emergency. This could involve forced vaccination and forced removing of individuals or families to a quarantine facility. As long as this is a free country that must never become a law in Washington for 2 reasons.

1. (the primary reason) It is against our constitution which gives us personal freedom over what is done to our bodies. We cannot be coerced into doing or having done to us what we feel is wrong for us.
2. The present research and math shows Omicron variant (which is almost 100% of the new cases of Covid-19) to be very contagious but very mild, so it is an annoyance but not a threat for most people.

Please do not even consider the draconian loss of freedom measures that will be before you on January 12.

Pierre and Anne-Louise Ferverda

To whom it may concern,

I strongly disagree with using Law Enforcement to place/ detain people who do comply with WA Health Orders into a facility. This should not happen due to people having the choice of what they would like to do with their own body. Forcing someone into detainment and using Law Enforcement who already has their hands tied within this state to force this is repulsive and disgusting. I am a person who has been vaccinated but still believes in the choice of one's own body. This country is about freedom and I believe this state has forgotten this. To quote JFK " The cost of freedom is always high, but Americans have always paid it. And one path we shall never choose, and that is the path of surrender, or submission.

Thank you for reading this.

Respectfully,

Alex Watkins

Subject: Vaccine Requirements - STOP IT

External Email

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: Newly proposed rules regarding Child vaccines and Quarantine Camps

External Email

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

Signed,

A Concerned Citizen

Dear Board Members and All Concerned with Covid Awareness:

Having read about a proposal to be able to forcibly detain persons unvaccinated or their entire families to a quarantine facility, I am frightfully reminded of the internment of Japanese families during World War II. All we have left from that hasty, harsh treatment of fellow Americans is regret and remorse.

Our law enforcement is currently not able to forcibly detain criminals in the act, yet you want to use physical force on people with differing health care issues than yourselves. Hospitals are not allowed to force people to stay for unwanted treatment, yet you want to "isolate" people in a place of your choosing under undetermined rules and limits and authority.

This is outrageously extreme. As a state, we would be greatly shamed with this kind of an idea under a "health" or "safety" banner. This plan is from a fear-mongering mob-think mindset. Please learn from our own history and make respectable freedom honoring plans.

To my Washington State board of health member: I am writing to plea against the upcoming vote to strip away my civil liberties and mandate vaccinations which is unconstitutional. Also I do not agree with enforcing vaccines in schools or the confinement and isolation of families or groups not willing to vaccinate or quarantine. This is still America correct?? How in the world are we being so blinded to the corruption of the government and pharmaceutical companies that we don't even remember civil liberties and why America is great!?! Please do not be swayed by pressures from higher up to make these long term injustices legal. I am in health care and I do not think this is a just enforcement of power and personal rights being ignored and powers being stripped away. What's next I ask? Give an inch and the mile comes next... I would like to maintain my rights to life (unimpeded by Vaccine side effects), liberty ( free will and choice to respect my body), and the pursuit of happiness (not enforcement camps and government illegal mandates that I do not agree to).

Thank you for representing me and my rights with a vote against these proceedings and mandates on Jan 12th.

Sincerely and confidently,

Erica Black

I know you said that you are not discussing the internment camps in the Jan. 12th meeting, but I am very worried that you specifically stressed, "today", you didn't say, "ever". So I want to know if such internment camps for unvaccinated people are being considered as a viable option in the future? Where did all those post suddenly come from? Why?

Also, there is a vaccine called Corbevax developed in Texas using safe old technology. Apparently it is being sent to India. What about the US? What if this is the vaccine I want, because I dont believe that the Moderna/Pfizer vaccines are safe? How do I go about getting it?

thank you for replying

Rita

Subject: Questionable Policy Making Impending Upcoming Jan 12th Meeting

External Email

Good Evening,

I am a concerned citizen who heard the BOH is contemplating using WA code to give the board emergency law enforcement powers to forcefully place people into quarantine facilities. As well as requiring covid vaccines to attend both public and private schools.

I am not sure where in your daily duties it came across as this being either reasonable or the "responsible" method to proceed forward, but you are wrong. Whomever in the agency came up with these policy ideas and is pursuing them is overstepping their reach and duties to WA state, it's Citizens, and the nation as a whole.

This should not be a matter of state's rights vs federal, this seems like a gross abuse of the Constitution, and the Rights we were all born with from God. Look back in history at the moments when "forcing" any person or group into "facilities" (camps you might call them) to keep them separated from the public has resulted in. I imagine you will see that this isn't a wise practice in general. History tends to frown upon individuals that discriminate, segregate, and quite frankly alienate members of society against their will.

Not all of you are responsible for this idea being pushed forward, but if ALL of you don't stand up against it, you will be equally responsible for the horrifying results that will occur thereafter. The unconstitutional abuse and misuse of "power" you may hold today, is not guaranteed forever. And your communities will not forget your actions or lack thereof.

Being vaccinated doesn't mean you can't spread the virus, and being unvaccinated doesn't mean you are INFECTED ALREADY. Have some common sense, repeal/vote against this asinine idea, and leave the personal decisions to those that have to make them - the individual CITIZEN, NOT the government or bureaucratic agencies that help make it up in the state they happen to live in currently.

Hello

I am a tax payer, job holder and home owner in WA!

I believe that is over reaching with the new Covid laws! Having law enforcement detain or forcing them into Quarantine because they choose to not have the vaccination. What ever happened to my body my decision... Why is that not taken into consideration! I think that the state needs to take a step back and really look at what they're doing and why they are doing it. I think that the state is completely overstepping and Is control hungry!

Why is there not ONE place to go online to find WHERE to get a covid test????????? It makes NO SENSE that the State of Washington SAYS that it cares about stopping covid but does not provide adequate testing. Have YOU actually tried to find a place to get a test? I have now spent over 6 hours in the past 2 days trying to no avail. What is lacking is this: ONE place online to put your zip code and ALL, I repeat ALL providers pop up. ALL providers listed in ONE place!!! As it is citizens are forced to be a sleuth, try to find places, put your info in, put your insurance info in and at the end of all that time your told that there are no available appointments. Washington State Department of Health: you need to provide ACCESS to covid testing. Are you not aware that people need tests????? Do I have covid? Do I not? Does my son? Who knows? We can't get tested. We work, so do we stay home and quarantine even after we start feeling better??? Without actually knowing if we have covid we are at a loss to make such decisions that, oh, by the way, affect PUBLIC health. HELP.

Please do not use and take out of law the use of concentration camps .

Also do not require the Covid vaccine for school or anything else that hinders our freedom.

I believe the herd immunity is the only way we will get through this.

Yes , I know people have died from Covid and people have died from the vaccine.

And people will die from 1000's of other things every day.

It's my personal choice the amount of exposure I am willing to accept for me and my family.

I assume everyone has it, just like I assume that every driver is going to come across the line or blow the stop sign. You are responsible for yourself.

Thanks for reading

Subject: January 12, 2022 proposal for quarantining in the state of Washington

External Email

\* You are either completely delusional or an absolute liar if you believe these vaccines are 100% safe and have 100% efficacy and should be FORCED upon the citizens of the state of Washington. (<https://stevekirsch.substack.com/p/milestone-over-1m-adverse-event-reports>)

Inslee is a maniacal psychopath with a God complex, to whom you have given absolute power. Every one of you are culpable for ALL measures of loss our state has experienced in the past 1 3/4 years and will continue to experience if change is not made now!

If you do not revoke Inslee's emergency powers immediately, our state will become a modern day Nazi Germany. The implementation of the most recently proposed vaccine/quarantine measures by Inslee, 100% resemble the onset of the Holocaust.

The Nuremberg trials and later codes were set forth in (1946) to punish those who knowingly harmed and those who knew and did nothing to stop them from harming and/or killing innocent people.  
<http://www.rememberravensbruck.com/>

As there was in Nuremberg, Germany in 1946, there will be a reckoning of the great travesties that have happened and are continuing to happen in our state.

As it should be known( by each of you) you are "elected" by US (we the people). You are NOT GODS ! You DO NOT have authority over our bodies!!!! How can you possibly live with yourselves knowing you are destroying the very fabric of what makes our state and our country so great. The constitution of the great United States of America and the freedoms by which it affords us. You should be ashamed of yourselves for your lack of effort to uphold our constitutional rights (that is your JOB)  
You will be held accountable for the actions you have either taken or have lacked in taking.

You have the power to Stop this insanity now! Remove the emergency powers to the Govenor of the state of WA immediately and say no to his recently proposed "Nazi" plan!

In the words of a great Congressman:  
"Do what you said you would do!"  
(Jim Jordan)

You guys better not try to go into Australia mode. You're not our overlords and you're not in Australia. We're still free here, and no law you pass will change that. You're certainly not going to have us rounded up into "quarantine camps." Too many hints of Nazi Germany there. So you can kindly stuff your proposals before you kick start something that you won't enjoy the fruits of.

Subject: Quarantine Camps?

External Email

Washington State Board of Health,  
I'm really hoping that quarantine camps aren't really being considered. It seems too mind blowing and so extreme to even be putting something like this up to vote. This would be a HORRIBLE thing to do to people. WRONG on so many levels. I can't imagine no matter where you fall on vaccinations or politically(which really should have nothing to do with this) that anyone would ever want something like this. All I can say is NO. Thank you for your time and consideration

Subject: Newly proposed rules regarding Child vaccines and Quarantine Camps

External Email

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

Signed,  
A concerned citizen

Subject: Re: January 12th Meeting - Covid-19 WAC Codes

External Email

Dear Mr. Glasoe:

I am alarmed to learn that the Washington State Board of Health is considering applying current infectious disease WAC codes to include Covid-18 for all Washington State individuals.

It is amazing that after all of this time, it is not understood that people with Covid-19 are contagious for roughly three days. How do you expect to get them tested, results back and forcing them to quarantine within 72 hours? This sounds like an impossibility!

More concerning is our constitutional rights. Covid-19 is not a dangerous disease and most who have it, don't even know that they have it because the symptoms are similar to a cold or flu.

Washington State is one of six states that still requires masking. Many medical professionals are now finally admitting that masks don't work. We are also finding that vaccinated individuals are still getting Covid-19. I know some personally!

Covid-19 does not fall into the same category as other infectious diseases. I would put it in the same category as the flu after two years of Covid-19 . I implore you to make the right decision and not apply current infectious disease WAC codes to include Covid-19.

Sincerely,

Azaleen Gonzalez

I want to voice my opposition to all considered Covid restrictions including—but not limited to—forceful quarantining or isolation of any individuals against their will.

I WHOLEHEARTEDLY object to any requirement for Covid vaccination. The “vaccine” has been proven to be ineffective (in some cases negatively effective at stopping transmission) AND has a massive amount of adverse effects including deaths. And this vaccine is still experimental with long term effects still unknown.

Vaccine passports are an absurd violation of freedom of movement and are absolutely pointless. (If the vaccine works, the vaccinated don't need to worry about others. If the vaccine doesn't work, then keeping track of the vaccinated tells you NOTHING.)

Subject: Proposals

External Email

To Whom It May Concern:

Immediately put a halt to the proposal that would give Washington State the right to detain the unvaccinated until they have received a vaccination.

Per the U.S. Vaccine Adverse Events Reporting System (VAERS), the COVID jabs now account for 983,756 adverse event reports as of December 17, 2021, including 20,622 deaths.

This doesn't include the underreporting factor, which is significant and ranges from 5 to 40 times higher than reported.

Most doctors and nurses don't know what VAERS is and even if they do, they choose not to report the incidents.

The list goes on.

Respectfully,

Amy Williams & Family

Dear Michelle Davis. Regarding the proposed actions of force quarantine of all persons in camps for the crime of not being sick or not being in compliance of getting sick with covid 19. This is the first time in the history of Washington State where healthy people are punished for being healthy. Even this in Michigan State has a valid question regarding covid 19.

Subject: NO! to the COVID policies being introduced!

External Email

To whom it may concern:

As a constituent of Washington state I wanted my opinion to be clearly presented to those making unconstitutional policies in our state. I am completely against all the new proposed Covid policies including but not limited to: allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. I also am against requiring COVID-19 injections as part of school immunization.

The government was never created to be able to tell us what to do and decide the course of our life for us; rather it is the people (which is me) that have the right to tell the government (you) what I want done, and the government is to carry those deeds out. There has been enough overstep, cheating, lying, and deceit from our government in Washington state. Stand for right, truth, and freedom!

Charity Bauder

Subject: Opposition to medical policy being considered - January 12th agenda

External Email

Washington State Board of Health

Members,

I am strongly opposed to the policy which would "provide law enforcement the capability to physically and forcibly impose an emergency order by involuntarily detaining a person or group of persons by arresting them or involuntarily moving them into quarantine or and isolation facility following a refusal to voluntarily comply with a request for medical examination or testing. Actions like these are a threat to individual rights and our state's and our country's democracy.

Every American has the right to choose which medical procedures he or she will submit to.

Requiring citizens to undergo compulsory medical procedures and isolation are tactics reminiscent of 1930's and 1940's Nazi Germany. You would be adopting policies by which the infamous Joseph Mengele operated.

Mandates from state executives and their subcommittees should not be allowed. Any proposed restriction of individual civil liberty should be debated in the Legislature, not by health boards. Medical decisions are PRIVATE and protected by HIPPA LAWS.

Daily, vaccines are shown to be less effective in stopping the virus. I personally know many vaccinated people which have contracted COVID after being vaccinated. Further it is becoming clear it is anti-science to say this is a "Pandemic of the Unvaccinated". Please include a wide breath of scientific opinion not just the sycophantic "experts" which fit your desired narrative.

Moving forward with a policy such as the one being considered is dangerous, un-American and make No sense in terms of public health. You must be aware of the Washington State exodus perpetrated by the draconian and tyrannical liberal policies being forced on everyday Washingtonians.

I implore you to Not Pass this policy.

Sincerely, Al Spaterna

Hello!

After reading about the current agenda for the Washington State DOH, I am extremely troubled. I have seen video testimony of individuals in Australia who are suffering under freedom-crushing conditions, and now it seems that our own elected officials seek to bring those tactics here. Stop! There are many of us who have been infected with COVID-19 in the past two years, and we are NOT a danger to our community. Studies out of Israel and elsewhere show definitively that our immunity to this virus is robust, and that it exceeds that of those who have been vaccinated. The idea that anyone should be forcibly quarantined, injected, or detained by the state is an anathema to the American way, and it is shameful that it's even being considered—especially when this latest variant has proven itself to be far less virulent than previous strains. There are many states NOT pursuing such freedom crushing measures, and they do not have crises of death and destruction in their borders. Ironically, our state is having crises, but these are in areas affected by the already existing mandates. Our passes our closed and travelers are trapped because our governor has forced DOT workers to compromise their bodily integrity in order to keep their jobs. Where is the outrage and policy proposals over this?

Finally, I have people in my own family who have had life-changing injuries due to vaccines. The government should not have the power to force an injection on each person, regardless of his or her health history, vaccine tolerance, or immunity status. My own adult son is a survivor of open-heart surgery as an infant. And my state government continues to press us to give him a shot which has a very real risk of cardiac inflammation as a side effect. That risk is one that could take my son's life. The risk of a viral infection for someone his age is NOT commensurate to the risk posed by this shot. He is an honor student who graduated with his AA in hand from Running Start last year, and we sent him to Idaho to attend college and run track because our state's universities were pushing a shot on their students that could wreck our son's repaired heart permanently. Stop the proselytizing of false fear and protect the freedom of our citizens to live their lives as they see fit. I never thought I would consider leaving the state that my family has called home since the 1800s. But this kind of un-American policy proposal, if passed, will cause us to follow my extended family to Idaho. Stand up for your citizens and abandon these policy proposals, for the freedom and well-being of ALL Washington citizens,

Respectfully,  
Tara Westrich  
Lynden, WA

Hello,

We the citizens of Washington State are fully capable making our own informed decisions. We do not need an official forcing anyone into quarantine and/or requiring a shot to be in society. It has already been found the shot does not stop the spread, so there is no need to require it or segregate people for choosing not to have it. The shot is a product from a pharmaceutical company that works marginally. Please work for the people and vote to keep individual self sovereignty.  
Thank you.

Dear Board Members,

Here we are two weeks to flatten the curve has evolved into concentration camps. This proposed action against The People to forcibly remove people from their homes, separate and segregate into "camps" to educated, into taking a product into their own body that is gene therapy. There are no long term studies an to help the people get over their fears the FDA requested from 55 years to release all documents of the approval of stated therapeutics to 77 years. Nothing sells trust, confidence and transparency like 77 years to release documents. Thank goodness a federal judge declared it unreasonable and will require the release of 55,000 documents per month. What exactly is being held from the public and why? Those of us who believe in the Constitution of the United States of American and the Bill of Rights are having a hard time figuring out where the government has the legal authority to carry out these Communist tactics within this free state. Speaking of rights we the people are innocent until proven guilty in a court of law. In order to be found guilty there must be evidence of such crime existing. I personally sent a freedom of information act request to Thurston County Public Health Department, requesting the documentation showing the "gold standard" of identifying viruses. The "Gold Standard" is the sample must be taken from and infected person, cannot be produced in a lab, cannot be contaminated, for the isolation and purification of said virus. My response back was exactly what every single FOIA has been from other individuals and organizations that did the same thing as me, There are no such documents available or on file just kept at a lab. They never stated what lab but all mandates and actions were because of this novel virus yet Not One Single government agency can produce the documentation of the virus existing. On Dec 31, 2021 the FDA has recalled all PCR Tests with a class 1, which happens to be the highest level recall available. The recall is of false positives and false negatives dealing the tests to be inaccurate. All the reporting on the news has been about the case numbers and they stopped reporting the deaths, why? For what has been called the most deadly pandemic why was it that most all people who died where in, hospitals, nursing homes, state run medical facilities? What was there such a rush to get ventilators out then all of a sudden they stopped using them? Why were the deaths higher of those who went on a ventilator than those who didn't? The case numbers show high infection numbers without hospitalization or further medical treatment give us a very good percent of those who safely recovered. This novel virus has a survival of over 99% across most age ranges. How can you say it's the most deadly virus but as I go about my day looking around trying to find people dying all over yet I haven't seen that, where's all the dead people? When I look at the most at risk people, the elderly with preexisting medical conditions and the homelessness. The homelessness for whatever their own circumstances maybe that led them down that path are poor in wealth is poor in health. I never saw any homelessness dying in masses, oh no we saw the exact opposite. We saw the government kick out those people near the courthouse in Seattle, parks and near the Capitol. Most deadly virus in the world that seems to defy logic and the great barrier of a restaurant table. Now, it's being reported that cloth and surgical masks are useless even by the Communist News Network aka CNN. The masks are useless as the micron level of the virus is so small it will go straight through all. Nothing can stop this virus. As for these Covid 19 shots, are time and time again proving they are invective at 1) Preventing the infection, 2) Preventing Death, 3) Preventing Spreading thus rendering not even legally a vaccine. If the medical treatment doesn't work why is it being forced when both vaccinated and non vaccinated gettin sick.

New reports from Israel, the country who's most injected with 3 and working on 4, have increasingly more Covid cases and hospitalizations than in 2020.

My last point shall we say save the best for last.

I am not advocating for any violence or directing any threat to anybody.

You want to use law enforcement with public health to enter in private property to forcibly remove them and detain them for whatever time. I will tell you good luck. People will revolt. Shots will be fired and real people will die from bullets all because "our safety".

We will not give up our most personal freedoms which is our own right to our body. This government bought this product from drug companies but it's not a one size fits all.

You're going to have to justify violating medical, and religious freedoms it required, because two weeks to flatten the curve is now concentration camps.

Those who would give up essential Liberty, to purchase a little temporary Safety deserve neither Liberty or Safety.

President Ronald Reagan said, "The nine most terrifying words are I'm from the government and I'm here to help."

Respectfully,

Brian Willard

Covid 19 injections should NOT be mandatory for anyone!

It should not be part of the school requirement Immunizations!

Law enforcement should not be involved! It is ludicrous that this is even being considered!!

Unlawfully detaining anyone in a "Quarantine Facility" is beyond outrageous and appalling!!

As someone whom, for medical reasons, can not get any of these "vaccines" !!

I should not have to Risk MY Life, or lose my job, just to make just to make someone else "comfortable".

There are ZERO reasons why I, or others like me, should be forced to have any of those injections!!

This is by far the biggest government over reach yet in Washington state.

Shut this down before it gets further out of control!!

Sincerely,

Crystal Baker

Subject: Comments on January 12th Meeting

External Email

Washington State Board of Health:

I am writing out of concern regarding the topics that will be discussed in the January 12th meeting. These concerns are in regards to the vaccine mandate for children as well as the involuntary quarantining of citizens via 'emergency measures.' These are both huge topics that need to be addressed with sound judgment as well as common sense.

Considering the two years of experience we have behind us, it's safe to say there are many well known facts about this vaccine. Not only does it not prevent illness, but vaccinated individuals can still spread the illness to others. The CDC and others have stated this, not to mention that there are countless studies which show these facts as well. Setting all the facts aside, even if this was a miracle vaccine, that doesn't, and never will, justify the loss of Constitutional Freedoms, for one's own self as well as their children. Do you desire to have a say in the raising of your children? Then you should allow each parent to make that decision in their own children's lives.

Regarding involuntary quarantines, and the quarantine sites that are known to exist in this state; while I wasn't alive in the 1940's, this reminds me of the Japanese

internment camps. Are we moving along those lines, and depriving citizens of our rights, just as we did with the Japanese-American community of World War 2?

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons to isolation camps or covered medical interventions, Washington board of health is playing with medical tyranny. This is a violation of the Washington State and United States constitutions, as well as the Nuremberg code. No government can mandate or force medical treatment without individual consent.

Please let us not become another Germany, or China. People have rights to govern their body and raise their children in freedom. Stand up for this freedom.

Sincerely,

Sofia Contreras

Dear Washington State Board of Health:

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

David Harsh

Hello, this email is in regard to the proposal the information that is in the attached picture. I wanted to express my own as well as thousands of hard working Washington tax payers and residents distress at the thought of this proposal being passed/enacted. I wanted to personally set a reminder and president, as a Washington state citizen, as well as an American citizen, I am as well as all the constituents of a state civil servant are FREE and have inalienable rights granted to me by God and are protected by both the Washington state constitution as well as the constitution of the United States of America that cannot be violated. We are also protected by the Nuremberg code, and I would like to remind all of you that there os not 'vaccine' that has a full FDA approval, an EAU is not the same as a full FDA approval and does not hold the manufacturers of these vaccines liable for the harm they could have one the taxpayers this state's government is trying to force upon them through fear and coercion.

As a statement that I will stand by, my body, and what I decide to put into will forever be my choice, and my choice alone. Our bodies, our health, and our medical decisions are sovereign. Sovereign. This state government has no right to make decisions on the medical decisions of ots constituents. If there is an attempt to detain us and forcibly lock is in a quarantine camp for our RIGHT to choose what goes in our bodies, you will be meet by force. There is and never will be any kind of state of emergency nor pandemic that gives a government a right to strip the livelihoods and rights away from those taxpayers, whom pay your salary, for their right to keep their bodies sovereignty.

I sincerely hope this has expressed my disapproval as well as my passion and the passion of those like minded that we will not be coerced into taking experimental gene therapy. I hope that our rights will be respected and that sanity may resume.

Thank you very much for your time.

Director Davis and colleagues,

I cannot believe I am writing this email in America. I live in North Carolina and am absolutely HORRIFIED that the Washington Department of Health would even begin to think that violating someone's rights and throwing them in a quarantine facility. That it would even be remotely accepted in our country is the most egregious abuse of power we have seen yet during this Covid SCAM (which is a common cold/seasonal flu and everyone knows it).

You are DECLARING WAR on us and we will NOT cower away. I urge you and your colleges to trash this murderous plan and understand there is a line where we the citizens will not allow you, the governing bodies to advance. This is that line.

We as a country are so tired of all the lies regarding covid, the prevention of cheap treatments, and this complete takeover of our life, liberty, and pursuit of happiness.

I don't know who funds you but it must have connections with Bill Gates and his cronies.

I request that you throw out the vote as in, don't even bother voting on this idea because we will NOT COMPLY and you will likely be the people responsible to innocent blood being split.

I demand this corruption leave the office you hold! May God have mercy on your souls.

Olivia Anderson BSN, RN

---

Two matters have come to my attention - making the claims publicly and in print that WA is racist in healthcare evidenced by darker skinned individuals harder hit by flu. This is nonsense and undermines your whole agency credibility. We have a N hemisphere bituminous D deficiency epidemic and that is known to impact darker skinned individuals. This is common knowledge. Why is it not commonly known in your esteemed circles! Laws/regulations giving your office power to imprison individual based on nothing more than an unelected persons concern is unconstitutional and dangerous and undermines the peoples faith in government and rule of law. You may claim - of we would not do that - or we have to document why - regardless. Its unconstitutional and unAmerican. But fundamentally - what huge problem are you claiming to solve? Real one of one of your own conjuring? You make up a fictitious problem and now you have authority to arrest and detain individuals for a month at a time ...and then again... and again. There seems to be no end to the despite authority conjured by a 51% vote or your Overlords in Olympia. This has to be set aside and denounced and authority your department refuses to accept. You need to say that and publicly and demand that it be removed from the books.

I wish to voice my adamant opposition to the proposed policies of Washington health officers using law-enforcement to detain a person, family or group of people, isolating them and quarantining them if not complying with exams, testing, treatments or vaccines. This is completely against our human rights we've fought so hard for over the last 250 years. The fact that this is even up for discussion both saddens me and angers me. Please please, think about what you are doing, and DO NOT approve this.

I'm also completely opposed to COVID-19 vaccines being required in schools. It's shameful that this could be a requirement. Our bodies, our choice.

These issues do not warrant use of an emergency order, and taking these actions. Please note my resounding opposition.

Cathy

Subject: Washington Covid Containment Emergency

External Email

I am writing to oppose the action being considered by the Board of Health. Despite all of the masking and lockdowns and high vaccination rates in Washington State over the past two years, our outcomes are at best, the same or worse than other states in the country that have not taken these measures. Forcing people against their will into quarantine containment camps is a severe overreach by our government and violates our constitutional rights. This Covid strain has shown to be a version of a bad cold or a flu. As a doctor, I am familiar with many patients and friends who have recently contracted Covid and experienced mild to moderate flu like symptoms. I am asking the Board of Health to abandon the idea of forced quarantines and mandatory vaccines for schools.

Thank you for your consideration.

Sincerely,

Douglas Long, DC

I am writing to you to urge you to vote no on changing the Washington state codes for quarantining. It is absolutely ridiculous to give powers to allow them to forcefully quarantine people for something that is no more than a tough flu. I am immuno compromised and have lung disease and had no problem surviving Covid with therapeutics. It has a high survival rate and if it was truly a pandemic, all of the homeless folks in Seattle and Spokane would be dropping dead in droves, given their poor health.

It is time to stop all of this government overreach and draw a line in the sand. We are counting on you to do just that. Let's not have history repeat itself and be smarter than that.

Thank you.

Attempting to quarantine or detain me, my loved ones or anyone else in our community based on the lies and deceit of the federal and state government over covid is surely a bad idea. You may be able to keep scaring the sheep for a while longer, however the people whom you have never fooled will not tolerate your overreach. Please recall the intention of our founding fathers for the right to keep and bare arms. It is to fight back against a tyrannical government if needed. Inslee and the rest of the left are prime candidates to see this come to fruition and will reap the fruits of their tyranny.

Screw you Inslee you Jack Ass

Let's go Brandon

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Becky Bosarge

Please do not approve any proposal to add COVID vaccinations to required childhood vaccinations. It is still an experimental drug and approved for emergency use only. Children are at very low risk for Covid 19.

We also want to voice our opposition to any idea for moving anyone to quarantine camps. That is beyond unreasonable and unnecessary.

Thank you.

Rich and Laurie Hundven

Dear Board of Health members,

I am writing to voice my deep opposition to the two vaccination related policy proposals you are to be considering.

I am a senior, a mother of 2 adult children, grandmother of 6, and great grandmother of 3.

I oppose the first, related to requiring the still experimental vaccine for toddlers and very young children for several reasons.

1. Factual tracking data from the governments of countries coping with the omicron variant who are 3-5 weeks ahead of us show a decline of delta with the sharp increase of omicron. Factual data from them also document, while more virulent than delta, it is more mild and of shorter duration (as anticipated even now by the new reduction of the quarantine period by our own CDC).

This wave will pass before this ruling has even begun to be implemented!

2. It does not make sense to force a segment of our population to participate in an experiment of unknown long-term sequelae with a product that is proving in real-time to be less and less effective against its intended target!! Please remember the wise adage...more of the same generally does not solve the problem it didn't solve.

3. Since the majority of children are healthy...common sense realizes they have not yet spent as much time in our toxic world as our now frail and health compromised seniors age 60 and older...their immune systems are agile and able to respond appropriately. This has been born out by lowest case cohort numbers and mildest symptomatic expression in those who do test positive.

For those unhealthy and immune compromised children, their parents (in concert with their child's health providers) would of course be free to choose what may be best in their difficult realities.

4. Parents are still the persons, so far, with the responsibility for their children in our country...legally, morally and financially.

What is chosen for their children has always been the sacred arena of parents in our culture to date, and our cultural values have honored that on many many levels.

The state always makes a poor authoritative parent.

The second policy being considered is horrifying! Isolating, for whatever rational, has always created a stain and shame in our history as on other cultures as well.

This action defies all the USA has stood for. This is not who we are as modern people of America.

Initially marketed as a service/solution for the homeless, unsheltered and travelers, it has morphed and grown into something quite different and sinister.

The actual implementation of this segregation defies comprehension on so many levels!

From the freedoms we hold as foundational values...down to...what is the point of sequestering/ punishing people until they have been 'deprogrammed' to submit to the experimental agent (for which no one accepts any liability remember!) which is now being shown as rapidly losing effectiveness to omicron?

And this policy does not in any way acknowledge the, at minimal, equal but actually more effective, long term natural immunity than a vaccine? Review basic biology and physiology please. People who have recovered from Covid don't need vaccinated without consent, coerced or not!

Please reject these proposals out of hand if you still have the freedom to! They are ill conceived in the face of reality and it's unfolding confirmation.

Thank you,

Patty Steele

To the board,

I could not find a way to send in comment any other way on short notice and could not attend the zoom meeting due to work.

I find the proposed policies disturbing to say the least. To detain otherwise healthy people for not receiving medical procedures that they may disagree with is an affront to personal Liberty. Specifically to bodily autonomy, religious freedom and the right to one's conscience.

We live in a very divided time in our civil discourse and with people pushing Misinformation, half truths and outright lies ( both intentionally and not) this will only push people in the fringes towards extremism not away from it.

In light of the falling mortality rate if Covid-19 ( not less than 2%) I do not believe this set of actions to be warranted or necessary. Please reject these measures.

Sincerely,

Pat Macken

As long as we have HIPPA laws that give every single individual the right to privacy about their medical conditions you have no leg to stand on to try and imprison and indoctrinate anyone.

This is no longer about the rights of the citizens of this country, but the power grabbing individuals that want complete control of anyone who does not have the same opinions as our current corrupt government in this statement.

I urge you with all sincerity to reassess the reasoning why this is even on the docket. The flu or any other disease except for one that had maybe has a 50% death rate is not a good enough reason to enslave citizens in concentration camps for propaganda education.

Keep America Free!!!

I do not agree with anyone being required to take the C-19 vaccine nor involuntary quarantines. Washington state has set a very alarming example with the handling of C-19 and the path that WA is on seems destructive to the freedom that the United States stands for. I am an educator and I refuse to live in nor teach my students to fear C-19. The way this has been handled hurts our students the most and it's time to move on from the mandates and let the citizens of WA have their freedom back.

Iv been informed by family that this meeting or this subject matter of forced vaccines and forced quarantine camps has been canceled for the January 12, 2022 meeting. Is this true?

So far I have not been able to find the notice of such cancellation. I'll will continue to look for such notice and if I am unable to locate such notice I will consider this as a lie, and that you have done no such cancellation and you are reducing anyone from public to respond to this matter of vaccines and quarantine camps.

If you are able do send me official link that has informed we the people of such cancellation. I will inform you of my findings as well.

I was appalled, however not surprised, when I saw the policy discussion regarding getting law enforcement involved with people to enforce the quarantine of individuals and families who refuse to "comply" with various medical situations.

This looks like an actual proposal one would expect in Nazi Germany. Are you seriously considering this proposal?

Have you forgotten this is a free country, this is unconstitutional, and there are huge numbers of citizens in this state who are willing to fight this with every resource we have? If you proceed with this mind numbing, totalitarian, draconian measure you will be met with every legal battle possible.

It's time for blue states to wake up and follow the facts. The current vaccines are NOT stopping the spread, the virus is weakening which is a good sign, this is NOT a pandemic of the unvaxed population as the evidence is showing, so learn to live with it and STOP these insane measures.

Seriously, this and so many other reasons are why good people are leaving this state. My family will be doing the same.

To all the members of the Washington State Board of Health,

It has come to my attention that one of the agenda items for your January 12th, 2022 meeting is to consider "allowing law enforcement to forcibly enforce an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with request for:

medical examination,  
testing,  
treatment,  
counseling,  
vaccination."

I want to express IN THE STRONGEST POSSIBLE LANGUAGE MY ABSOLUTE OPPOSITION TO SUCH A POLICY!!!!

Here are some of my reasons for opposition to this proposed policy:

Every American has the right to determine what medical procedures he or she will or will not take. We have the right to Life, Liberty and the Pursuit of happiness. This has been a pillar of American life since the revolution of 1776!

Mandates from state executives and their subcommittees should not be allowed. The LEGISLATURE should debate such all-encompassing rules, not "health boards"!

Under HIPPA rules, my medical decisions are PRIVATE

Unvaccinated people pose no more of a danger to the public than vaccinated people. This has been proven over and over!

Supposedly, the vaccinated are safe...so leave the unvaccinated alone!

If more vaccinated people actually do end up in the hospital (doubtful), it would be the result of their own private CHOICE about their own health

The current vaccinations are not effective against the current virus strains, anyway. The original strain and Delta (and soon Omicron) will be history...but the vaccination has not changed. This is like taking the same flu shot every year, even though every year's flu variant is different!

This is AMERICA...not Communist China where women have been forced to get abortions against their will, or Saudi Arabia where women are forcefully sexually mutilated because the Muslim leaders say so. For the BOH to pass such a rule would violate everything that is good about American Freedom!

Every American has a RIGHT to choose what healthcare they will or will not take.

This policy will drive more good people to leave this state because of its liberal and extremely harmful policies regarding Covid.

It is DANGEROUS! If this policy is adopted and enforced, there will, without doubt, be violence. Both law enforcement and civilian Americans, my fellow Washingtonians will be injured or killed.

I beseech you to NOT pass this policy. It is dangerous, unAmerican and makes no sense in terms of public health. I believe that the ONLY reason any state government would pass such policies would be to control their people for nefarious purposes.

Sincerely,  
Ronald and Cathy Reese  
Residents of Kitsap County, Washington

Greetings,

I would like to voice my extreme opposition to the Board of Health even considering the following policies: WAC246-100-070, WAC246-100-045, WAC246-100-040 and WAC246-105.

Every one of these measures are an extreme over reach, they are illegal and unconstitutional. I grew up during the Cold War, I am knowledgeable about Soviet Russia and Stalin, Nazi Germany and Hitler, and I am well read regarding totalitarian regimens of the world. I am appalled by the hubris, or the ignorance of our State government and our Governor in wanting to take us into the horrors of socialism, which is the forerunner of communism, or Nazi Germany, just in my lifetime. Please, be courageous and allow your eyes and hearts to be open to the diabolical ideologies that are at our doorstep. And be informed, that if these things pass and are implemented, once YOU have fulfilled your role, they'll come after you next. Do NOT be deceived.

Respectfully and with prayers,

Glenda J Miller

I am sending this to the WA board of health to oppose giving health dept authority to involuntarily place WA residents refusing COVID-19 testing, medical assessment, or vaccinations in quarantine camps. have we not learned our lesson about segregating people into camps because of their status or their culture or their beliefs? This can't be true...nobody has the right to quarantine and imprison me based on my own personal choice. this is no different than the Nazis putting Jews and anybody they thought to be less than and unworthy into concentration camps. The health department should not have or be given this kind of authority. Who is deciding this...who thought this up??

Dear Health Board,

Thank you for accepting open comments. Please consider that COVID19 is a zoonotic virus that will continue to run through all animals & people alike. There will not be an end. Thankfully the virus will degrade as it has with Omicron which is not deadly to the majority.

It's is unconstitutional to use a health concern to quarantine or force vaccinate anyone. This is not a third world country where the various agencies can do whatever they want to the populous.

The best thing you can do at maximum is possible require weekly testing. Even that is

excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

To: WA State Board of Health Members:

Date: January 10, 2022

I am gravely opposed to the proposed legislation before you that would authorize 9 members, all appointed by Governor Insley, to make independent decisions that would force health quarantines on to citizens. People can be arrested and/or confined against their will, in violation of their civil rights, with absolutely no due process, except the decision of the Board.

This is government overreach without ANY RESTRICTIONS, making laws independently that will impact the citizens of this state without any authority given them, except by the governor's appointment. It is not bipartisan, it is not lawful, has not gone before a vote of the people, or even the legislature. It is a direct violation of our constitutional laws and the rights as citizens of WA State. It is tantamount to establishing a Marshall Law.

I am contacting WA government representatives regarding this matter and am appalled that legislation of this kind has even been proposed. Covid 19 is NOT THE PLAGUE!!!

I encourage each of you to use your common sense and reject this proposed legislation in any shape or form that is presented to you.

Sincerely,

Susan M. Henry

To the Board,

I would like to relay my absolute disgust that you are even considering adding Covid 19 to WAC Codes that would allow for law enforcement to be used on people who refuse education, testing, vaccination and the ability to put them in quarantine centers, for refusing to comply.

The vaccines do not stop the spread or the ability to get the disease.

Covid 19 has over 98 % survival rate, especially in children who really don't need this vaccine.

No reason to put unknown substance in a child without having information on long term affects for over 30 years. For a survivable disease .

I'm pleading with you all to use common sense and do the right thing. To let people decide for themselves if they want this vaccine.

Thank you for your time .

Cindy Burns

Subject: Objection to looming c19 policies

External Email

To whom this may involve!

I am not a current Washington state resident. I do have family that live in the state of Washington whom I care deeply for.

I am in objection to allowing the policies of a foreign country to cross over American borders.

This is against our constitutional rights! When will this insanity over the job stop??

We, as American citizens, are given the freedoms (basic human rights) to make decisions regarding OUR HEALTH!

WE HAVE THE FREEDOM AND RIGHT TO CHOOSE HOW WE LIVE AND DIE!

YOU forcing this on all Americans will lead to the government's in each state being scrutinized and martial law could take place.

Then were will you be? It could lead to the capital of each state being taken over...why would you want this kind of blood shed on your watch. Do you have a heart? Conscience? Brain?

Tell the ppl who are sick to go quarantine! They are the ones spreading this virus! I know ppl including myself that have been exposed several times and have yet to get the so called c19 virus.

Explain that? Why now are they only quarantine for 5 days? You are the ones who are causing the spread by changing the requirements/expectations every other month.

Dig deep in that brilliant brain, think real hard and pray on how God can fix this...NOT HUMANS! GOD, is the only one who we can rely on to take care of our needs.

Have you hot down on your knees and asked for forgiveness? If not, I suggest you do so. Because if evil, which it is, is involved...God will sort that out in the end.

Sleep well, if you can,

Concerned ex resident

Subject: Response to WA state DOH proposed changes to WAC to include COVID-19

External Email

I am writing this is in direct opposition to the WA state DOH proposal to modify WAC to use Law Enforcement to involuntarily detain individuals and families into quarantine for failure to comply with requests for medical exemption, testing, treatment, counseling, and/or vaccination and also I am staunchly opposed to the DOH proposal to require COVID vaccines as part of school immunization requirements.

This is an unscrupulous action by the DOH and I expect more from public officials.

As a concerned citizen, I AM NOT IN SUPPORT OF THE DOH ACTION TO MODIFY WASHINGTON LEGISLATION TO INCLUDE COVID-19 FOR ILLEGAL DETENTION AND MANDATORY VACCINATIONS. Not only is this immoral, it is a complete abuse of law enforcement action and outside the reach of the DOH.

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: My Public Comments

External Email

People must continue to have the right to refuse medical examination, testing, treatment, counseling, and vaccination. No one should be forced to quarantine or involuntarily taken to a facility for any length of time. Each person must do what is right for them and be able to obtain medical advice from their trusted sources. This is interfering with the doctor to patient relationship and takes away ones right to make decisions regarding what is best for them. Public health should be a service and provide education while respecting each individual's freedom and liberty.

Subject: No to all mandates

External Email

To whom it may concern,

I am not comfortable with government mandates on what should be put inside of my own body. I am not comfortable with government mandated quarantines, wearing masks or curfews. I am a strong believer that it is our God given right, and what so many men and women died for is my right and my freedom to say no! No is a complete sentence, and I shouldn't have to explain myself. But hear we go...the world is so big in equality for all. Well I am for equality too, and because of that I have a right to choose to be vaccinated. I too should choose to stay quarantined or wear a mask. It's completely demoralizing to force mandates on anyone. I answer to God in the end and not the government or man. I will stand against all mandates, and continue to fight for my freedom and my God given free will! This country is taking a sour turn towards communism and dictatorship. So many people died fighting Hitler in World War II, for the same reasons. Let's not let history repeat itself. That's all I have to say!

Subject: Concerns over Applying Infectious Disease Protocols to COVID-19

External Email

To the WA State Board of Health,

As a citizen of WA State I am writing to express my concerns over expanding local health department/law enforcement power to include the ability to involuntarily detain individuals who may have been infected/contacted an individual with Covid-19.

There is little evidence to support such a drastic measure as we now know that the vaccines while being helpful in preventing serious illness and death - do not prevent individuals from contracting or spreading Covid-19. This is now more true with the spread of Omnicron than with Delta. Omnicron thankfully so far has shown to be less virulent than Delta (though more transmissible) which could possibly transfer a more easily obtained natural immunity to both vaccinated & unvaccinated individuals.

The lack of longitudinal data on long term affects of the Covid Vaccine on youth means that requiring a vaccine and possible boosters runs a possible long term health risk for an entire generation. While again it is true that the vaccines provide protection against serious illness and hospitalization (until a booster is required) - the same is true that general health (not being overweight) and age (particularly under 18) also prevents serious hospitalization & death. Why risk the unknown when there is no statistically significant benefit?

Thank you for taking the time to read over my concerns.

-Ellis

Dear Health Board,

Thank you for accepting open comments. Please consider that COVID19 is a zoonotic virus that will continue to run through all animals & people alike. There will not be an end. Thankfully the virus will degrade as it has with Omicron which is not deadly to the majority.

It's is unconstitutional to use a health concern to quarantine or force vaccinate anyone. This is not a third world country where the various agencies can do whatever they want to the populous.

The best thing you can do at maximum is possible require weekly testing. Even that is excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

I was appalled, however not surprised, when I saw the policy discussion regarding getting law enforcement involved with people to enforce the quarantine of individuals and families who refuse to "comply" with various medical situations.

This looks like an actual proposal one would expect in Nazi Germany. Are you seriously considering this proposal?

Have you forgotten this is a free country, this is unconstitutional, and there are huge numbers of citizens in this state who are willing to fight this with every resource we have? If you proceed with this mind numbing, totalitarian, draconian measure you will be met with every legal battle possible.

It's time for blue states to wake up and follow the facts. The current vaccines are NOT stopping the spread, the virus is weakening which is a good sign, this is NOT a pandemic of the unvaxed population as the evidence is showing. Stop these insane measures. Seriously, this and so many other reasons are why good people are leaving this state.

Dear WA Dept. of Health staff,

My name is Stephen Piggott and I am a program analyst & trainer/organizer at Western States Center, a 30 year old organization that works for inclusive democracy. I work on a team that equips communities and institutions with tools to respond to white nationalist and anti-democracy organizing.

I'm reaching out to share information about a protest organized by Congressional candidate Joe Kent, dubbed, "Resist Covid Tyranny: Rally Against Forced Quarantine." The rally is set to take place from 9am-3pm today outside of the Washington State Department of Health office in Tumwater.

Kent has made a concerted effort to work with a number of anti-democracy groups during his campaign and many of these groups, including Joe Gibson's Patriot Prayer, have promoted this protest. In fact, information regarding the protest is being circulated on several different social media platforms.

If it would be helpful, I would be happy to be in touch to share more information about this protest, contextualize it among other similar activity from authoritarian-leaning social movements, and discuss potential security and other responses. Please feel free to reach out.

Best,

Stephen

Responding to the meeting of 1:12 about covid issues

Number one parental rights should be the deciding factor on immunization of their children

Number two there should be no involuntary quarantine outside the home and designated areas by Washington State

Number three I do not believe it should be the sole discretion of the sboh to enforce wac codes discussed at your meeting and require law enforcement to do it when you have defunded the police or any reason

I believe this is against HIPAA laws and I also believe that it is against the constitutional rights of washingtonians

Subject: forced quarantine/isolation and forced vaccines for children

#### External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State and ANY forced vaccine requirements for any person. Additionally, forcing anyone to quarantine or isolate against their will is a direct violation of their basic human rights. Asking to use local law enforcement to conduct such vile, inhumane and illegal acts is preposterous at best.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit

analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. Who is going to pay for any death or disabilities that arise from these mandates? Are YOU?

These rules are totally unacceptable. Its a clear violation of our constitutional rights. According to the VARES system at the CDC, Covid 19 has a survival rate equal or lower than Influenzas A and B yet we never locked anyone up for that even though it killed 60,000+ people in 2017. The vaccines are still experimental and should never be enforced on anyone since it has killed over 20000 people and is responsible for over 1,000,000 adverse reactions in the USA alone according to the VARES system. These rules are totally irresponsible and should be withdrawn from consideration

Stuart,

You are ripping our state and companies apart. We are a democracy! Not an authoritarian government. Cease and desist this activity.

No Child vaccine mandates

No Employee vaccine mandates

No quarantine facilities

You are ruining our beautiful state and government. This kind of extreme grab for power is only destructive and full of corruption.

Hello, I would like to submit a comment for the upcoming meeting on January 12th.

It has been brought to my attention that certain laws are being considered to take advantage of our personal lives.

Washington State shouldn't have the authority to make it's citizens comply to vaccination, counseling, medical treatment, ect.

Or use law enforcement to uphold such intrusions.

This is something that goes against the 4th amendment of the constitution.

Thank you for reading and taking my concerns into consideration.

Abby

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Name added here

External Email

I am completely against the proposed Covid 19 vaccine mandate and proposed quarantine for the unvaccinated as well as law enforcement being involved to arrest and force people to quarantine ..... who are entitled to their own health choices. It is our right to make health choices for our bodies and family, not the governments. Trying to enforce their power over people is unconstitutional. Quarantine camps??? Disgusting. God help us.

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions,

and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

Subject: Feedback on Jan 12th Public Meeting regarding "use law enforcement to detain unvaccinated"

External Email

Dear SBOH members:

I read your public policy and it totally shocked me you as "public health" is push such a egregious assault on our Constitution. You want to use "law enforcement to detain an unvaccinated" in the disguise of quarantine?

First of all, it is totally Anti-Constitutional, regardless of your narrative of COVID19 and infection. Law enforcement is for crimes, not peaceful and lawful citizens simply because of executing their own right of not accepting the vaccines due to health, religious and whatever reasons. You, as a gov agency, has ZERO authority to commit such anti-Constitutional act. Such an act is true threat to the public health.

Second, almost 2 years of pushing vaccination to prevent COVID19, according to the data and fact, completely failed. Although you have pushed hard on such narrative that vaccine prevents infection (proved false), then changed narrative to prevent sever disease (proved false again), the infection, per the CDC data, reached over 1M per day. If vaccine can not prevent Covid19, Delta, Omicron, why do you enforce people to get vaccination? WE know it is because of the corruption from Big Pharma, and collusion with

gov agencies. The fact is Vaccine can not prevent any of COVID variant, then why you enforce vaccination?!

Third, if you admit #2, please answer me why you spread lies that "unvaccinated" is public health threat?! What's the science evidence on that? Where is the peer-2-peer review on this conclusion? Where is the clinical research on this conclusion? You and CDC have ZERO science evidence on this. In fact, the death number of the vaccinated population reached 946000, per OAN report yesterday. Your public health policies should be based on true science, not on political agenda. But unfortunately, WA Health Board is notorious to be known as a political organization. If this is the case, how does that related to Public Health?

Fourth, please disregard such egregious assault on our Law and Constitution- use Law enforcement on the unvaccinated. Such policy is pure evil and WRONG. I just want to tell you if anyone of you push such evil policy to the public, your name will forever be remembered as "medical Nazi" agency. As a WA resident who has lived her for over 20 years, I want to tell you this is not going to work and people like me will fight like a hell.

We know most of the truth on Covid19, and vaccine. Your agenda to push vaccination is failing the public health. Actually, as an ordinary person, I know natural immunity and early treatment is the best. The past years of performance of politicians taught me none of the gov agency has ANY CREDIBILITY on public health. They are just part of political agenda promoter and I will not trust any word from you, as a public threat agency.

Thank you!

Rudolph West

Subject: Re: January 12th Meeting - Covid-19 WAC Codes

External Email

Dear Washington State Board of Health Members:

I am alarmed to learn that the Washington State Board of Health is considering applying current infectious disease WAC codes to include Covid-19 for all Washington State individuals.

It is amazing that after all of this time, it is not understood that people with Covid-19 are contagious for roughly three days. How do you expect to get them tested, results back and forcing them to quarantine within 72 hours? This sounds like an impossibility!

More concerning is our constitutional rights. Covid-19 is not a dangerous disease and most who have it, don't even know that they have it because the symptoms are similar to a cold or flu.

Washington State is one of six states that still requires masking. Many medical professionals are now finally admitting that masks don't work. We are also finding that vaccinated individuals are still getting Covid-19. I know some personally!

Covid-19 does not fall into the same category as other infectious diseases. I would put it in the same category as the flu after two years of Covid-19. I implore you to make the right decision and not apply current infectious disease WAC codes to include Covid-19.

Sincerely,

Azaleen Gonzalez

Subject: Mandates

External Email

I vehemently oppose all Covid vaccine and mask mandates and passport. It is now clear that the vaccinated can still get it and spread it and that the limited protection the vaccine offers disappears over time. Plus there are significant adverse effects of the vaccine for a significant number of people as reported by the CDC in VAERS and the long term effects are unknown.

I am also opposed to the state being granted the authority to force people into internment camps and/or being vaccinated against their will. This is not Nazi Germany!  
My body, my choice.

Subject: OBJECT TO VACCINE AGENDA

External Email

Attention: Washington State Board of Health

I object to your terrible plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is available and started early. Moreover, it is survivable by more than 90 percent of the people – that includes me. I did not need a doctor when I contracted Covid 19. I did not spread it because I stayed home at first symptoms. Those of us who are naturally immune because we have survived the Covid virus are the least people to worry about – we are immune for life. We will not spread it and we didn't spread it because we stayed home. We had no need for a shot and we will never have a need for a shot, ever.

The Covid vaccines have little effect on the Omicron variant as evidenced by many people; my sister and many other adults that I know who have been vaccinated AND boosted and they got Covid anyway. Even my niece who works in health care and is fully vaccinated, is currently recovering from Covid. They experienced the same symptoms and virus progression as I did without the shot.

In America, health officers have no right to quarantine a person or family for refusing the Covid vaccine. This is unconstitutional.

Best regards,

Darcy Welch

Subject: Proposed quarantine measures

External Email

To Whom It May Concern,

As a constituent of this state I am advising those holding public office that are involved in trying to push through the proposed measure that would require officers of the law to enforce quarantine at state facilities and forced vaccinations that if they ever want to be elected again they should stand against it. This measure is unlawful and in opposition of not only Washington state's constitution, but the constitution of the United States. If you think that the people will stand for this, you are absolutely wrong. We are ready to have lawyers start preparing for massive lawsuits against the state. And currently the state is under-staffed with law enforcement officers who can barely keep up with real crime, do you really think they will waste their time rounding up law-abiding citizens who have a cold? I'm not sure that you will get much compliance with police officers anyway, especially in the more conservative areas of the state that actually still believe in the constitution. This state has been a serious disappointment to me, my family and friends in the last several years and this is the last straw. Most of the people I know in my area already want to move out of the state or get new state boundaries to get out. I have grown up here and would like to stay, but I am no longer being represented here and this measure takes away my basic human rights. You should be ashamed for even thinking of doing this.

Sincerely,  
Dana Holle

Please do not take Washington State down the road to totalitarianism. Forcibly quarantining people in camps or other government facilities is just what the Nazis did to people they didn't like. Japanese interned were in our state. Was that an honorable thing to do?

Covid is not the danger to health that it has been made out to be. False positives on PCR tests, exaggerated hospitalization stats, and a media that fanned the flames of fear have made the crisis.

Be like Sweden, or Florida, South Dakota, and Texas.. Please don't let partisan tendencies blind your judgement. Reduce the fear instead.

Sincerely,  
Brian Miller  
WA resident since 1989.

To whom it may concern,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! This is enough! COVID is a flu or a cold that is highly contagious, I get that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week, but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

Adrianna Salazar

Pasco, WA Resident

External Email

To Whom it May Concern,

I am writing this comment for Jan 12 meeting

Ref item #8 - I strongly oppose forming a tech advisory group. This is taking steps considering adding the covid shot to the schedule. This is still under EUA and at this time the risks far outweigh the benefits. A decision to form this advisory group would be premature and ill-advised. Our job is to protect our children, not vice versa.

Ref item # 11 - I absolutely support this item and believe it is a petition filed by informed choice washington.

And finally, I strongly disagree with the consideration of extending quarantine camp authority/emergency use procedures. A reactionary response that impedes upon an individual's bodily autonomy and individual freedom should be sobering to us all. This is NOT the "right side of history".

Thank you for your time!

Angela Parris

I am deeply concerned that those in our state government are even entertaining the idea of imprisoning WA citizens in camps because of anything related to Covid. This is a disease with a 99+% survival rate for all, but the very elderly with multiple comorbidities.

I'm guessing those behind this proposal are either too young to remember or don't really care, but maybe you should take a moment to consider what our government did to 120,000 Asian Americans (including U.S. citizens) during World War II. It is a stain on the history of this great country. I'm not sure my family will continue to make our home in the State of Washington if this proposal is implemented. Also guessing many of those fleeing Californians moving to Washington, will also relocate to a state that remembers we have a constitution and civil rights.

The irrational response of both federal and state governments to Covid and the use of fear to manipulate its citizens will go down in history as being as shameful as anything our government has ever done. It is clear to millions of US citizens that the government response to Covid has been about money, not concern for its citizens. During 2020 and 2021, we have experienced historical transfer of wealth from millions of poor and middle class Americans to a small number of wealthy and powerful individuals. We need our government to step up and stop this concentration of power in the hands of a few elites, not take steps to create more fear and increase the power of a few in violation of our constitutional rights.

If our government wants to help prevent the spread of Covid, why not try distributing D3, zinc, vitamin C and quercetin to all its citizens. Given that nearly 85% of those that end up hospitalized with Covid have low levels of D3, would this not save lives – as opposed to arresting and placing citizens in a “prison” camp without due process. Those poor countries that could not afford all the expensive “help” our government handed out in the US, choose to the above supplements and save Covid fatalities that were a fraction of the U.S.

I am praying that God will touch your hearts and remove the curtain from your eyes. It would be wonderful if this proposal was dropped and this board sought practical and respectful ways to help the citizens of this wonderful state.

To whom it may concern:

As a constituent of Washington state I wanted my opinion to be clearly presented to those making unconstitutional policies in our state. I am completely against all the new proposed Covid policies including but not limited to: allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. I also am against requiring COVID-19 injections as part of school immunization.

The government was never created to be able to tell us what to do and decide the course of our life for us; rather it is the people (which is me) that have the right to tell the government (you) what I want done, and the government is to carry those deeds out. There has been enough overstep, cheating, lying, and deceit from our government in Washington state. Stand for right, truth, and freedom!

Subject: rrent infectious disease WAC codes to include Covid-19 for all WA State residents.

External Email

I'm a concerned citizen of Washington state with the direction our state is going in regards to Covid and the new regulations that will be discussed for vaccines, mandates, "quarantine camps" which let's call those what they are, concentration camps, ect..

The data and evidence is out on these vaccines and this virus. The vaccines do not work, they are in line with a flu shot, they do not prevent a person from getting Covid and they do not prevent a vaccinated person from spreading covid. We are all in the same boat with this virus vaccinated or unvaccinated and I believe at this point the majority of the population has Covid this out.

If this regulation were to pass it would be tyranny and unconstitutional.

TO WHOM IT CONCERNS:

Regarding the Rulemaking Petition on January 12, 2022 for Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry, I wholeheartedly support the initiative to prohibit (for school attendance) any Emergency Use Authorized products or licensed products that lack completed Phase 3 trial studies.

We MUST protect our children. There is substantial, peer-reviewed science proving that the risk of vaccine injury to children is far greater than their risk of a Covid fatality.

Follow the science please.

Regards,

Dan Edwards

Forcing vaccinations of children for COVID is wrong. It is improperly aimed and improperly timed.

A question to ask is how many booster shots are going to be needed? Do you then intend to apply the rule to the flu annually?

Subject: Objection to Mandatory Medical Treatment

External Email

Dear Board of Members,  
No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.  
Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law. You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."
2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.
3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." 4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.
5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved

for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation.

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it."

Lisette

Lisette Caire

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children

and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of Gods Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all men and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of Gods Holy Laws, of which the

protection of my body is one of those spiritual laws that supersedes all manmade laws in my religious conscience."

Warm Regards,

Eric Cooper Chief Warrant Officer 3 (Retired)

Lakewood, WA Resident

Hello Mr. Glasoe,

I, Danielle Loft, oppose the use of law enforcement to be used to detain those who are unvaccinated. There are so many reasons one would choose not to get this medical procedure for their own personal reason, for instance previous injury from other vaccines (many of my friends and family have experienced, look into VAERS to see how much money has been paid out to victims) religious reasons, natural immunity, wanting more studies to be done before making that decision, all of which are legitimate reasons and shouldn't be questioned. It is our own right to refuse and to be punished and detained for those valid reasons is unacceptable on every level. This is America, we have a constitution, we have rights to choose what is best for ourselves, but seems for some that's been forgotten.

I do not support adding the C vaccine to the childrens school schedule. There have not been enough studies on it, we don't know the effects it will have on fertility and their bodies. All the science says children are not a threat and are likely to not be harmed by the virus as much as adults, so why mandate it? It doesn't make sense. Leave the

children alone.

Please do what you know is right and oppose these WACs from being added as a law.

To whom it may concern,

I am writing you as not only a resident of Washington, but also a mother of 3 young children who is very concerned with the mandate of the covid vaccine for our innocent children.

My children are 8,9 and 3. Just recently our family was exposed to covid and soon after found out that we tested positive for the virus.

Having gone through this experience with the schools, doctors and health department it's apparent that there are still so many questions and uncertainty of what this virus is and how to overcome it. Both my husband and I are fully vaccinated, my husband suffered the worst- unable to get out of bed for 3 days, high fever and the scariest was when he couldn't move his neck, seemed almost paralyzed. This was very scary for our family to watch and pray that he recovered from the effects of the vaccine.

This is why I beg you to not mandate the vaccine. Our children are still growing, still developing and are still trying to fully articulate how to even explain when they have a simple stomach ache. Our family is not against vaccines, in fact our family is up to date on all the others. We believe that the studies of both the virus and the vaccine still need to undergo further research.

Please take my email into consideration. These children of ours are our nation's future. These children of ours are my entire world. Let them be kids, let them get germs, let's let them live a simple life without the stress of mandates. Please.

Thank you,

Bonnie Ferraiuolo

Subject: Public Comment on applying WAC to COVID-19

External Email

To whom it may concern,

I am submitting my public comment for the January 12th WSBOH meeting, specifically, Item 9 of the agenda dealing with WAC 246.100 as it relates to COVID-19.

It is terribly misguided to forcibly quarantine or isolate individuals against their will for this disease (COVID-19). We are now 2 years into this pandemic, and with estimates that over half of the population has already been infected and recovered, thus now having a strong, lasting natural immunity, we are approaching herd immunity. Therefore, the need for dramatic action wanes with each passing day. The mortality rate is quite low, there are a number of effective therapeutics available, and a large percentage of Washingtonians have voluntarily chosen to accept the experimental vaccines that have been offered. Simply put, this is no longer an emergency; we have a handle on it, and we need to return to normal.

I would also like to point out that there is increasing evidence that vaccinated and unvaccinated individuals alike are capable of becoming infected and transmitting to others. Why, then, should vaccinated individuals be treated as a lesser risk to the general public than unvaccinated, if both are potential super-spreaders? And, if the vaccines lower the severity of presented symptoms, and we believe asymptomatic transmission to be a concern, do the vaccinated not pose a greater risk of being asymptomatic spreaders as compared to the unvaccinated? We need to stop this division and segregation of individuals based upon their health choices. It is morally and ethically wrong.

Furthermore, I strongly oppose the requirement of minor children to accept these experimental vaccines as a condition of entering school, or any other public or social event/activity. COVID-19 poses almost no risk to young children; the vaccine appears to pose a greater risk than the virus. This blanket approach of demanding that everyone be vaccinated is a lazy approach to public policy, and carries with it inherent danger. It should always be a personal choice between patient and doctor, based upon each individual's circumstance, and should never be mandated - especially now that we know COVID-19 is a manageable disease with decreasing mortality.

I urge all decision makers within WSBOH to oppose applying the relevant WACs to mandatory vaccination, quarantining, or isolation of any individuals due to their COVID-19 status, regardless of what it is. It would be a gross overreaction with numerous unintended (and harmful) consequences.

Sincerely,

Curtis McCullough  
Edmonds, WA

Subject: Opposition to changes to WAC 246-100-040

External Email

To whom it may concern,

I strongly oppose WAC 246-100 rule making that would expand any authority to involuntary quarantine individuals. The proposed rules allow abuse of power by unelected officials with rule of law behind them and are so vague they would allow for a possible quarantine of over 40 days without scientific cause. The potential for abuse is too high.

I also strongly oppose adding covid 19 vaccines to the WAC schedule of required vaccines for children to attend school. I fully support vaccines for childhood diseases that are dangerous for children, but Covid 19 has proven even less deadly for healthy children than the flu and mandating the vaccine is a drastic overreach of government power. If the SDBOH intends to make this vaccine mandatory, they need to show data why such a mandate is necessary for the health and safety of the children.

Thank you,

Subject: WAC 246-100

External Email

Good morning,

I am reaching out because I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Children's healthcare and medical decisions are for the child's parents to make, NO ONE else's. What is right for one person may not be right for the next else especially when it's proven that this "vaccine" (when the definition of something has to be changed multiple times to fit an adgenda you can guarantee that it's not what you're being told it is) isn't effective and the risks to children (and probably adults we just haven't seen the affects yet) outweigh the benefits. This is unconstitutional and wrong.

Subject: WAC 246-100 & WAC 246-105

External Email

Dear WA Board of Health Staff,

I would like you to know that I have become very concerned with the losses of the freedoms that I and other military persons over the years have fought hard to maintain for every individual in this wonderful and blessed country.

I believe that WAC 246-100 is one such rule that expands the authority of the government beyond those a free country should allow. The government quarantining individuals involuntarily reeks of the methods used by socialist and totalitarian governments. Please, do not allow this to pass.

In addition, the WAC 246-105 schedule of required vaccines for children to attend schools is another over-reach, notably since children are at very low risk for Covid, the shots have not had sufficient time to prove their lack of harm in the long term (especially against children), and it has been proven and is obvious that the vaccines do not prevent transmission of this disease. Please, do not allow this to pass.

Thank you for considering what I have said.

To: DOH WSBOH  
Cc:  
Subject: WAC 246-100-040, mandatory school age vaccination

External Email

Good Afternoon,

I am writing to let you know that I do not support Washington State Health Board approving an emergency order to add Covid 19 to the WAC 246-100-040 code. I do not support setting up isolation and quarantine camps. For most people, Omicron is proving to be a mild infection. People can isolate and recover in their own homes. I personally know many people who have recently had Covid and isolated in their own homes. All are fully recovered. None of them required hospitalization. For most of them the symptoms were very mild. Many of these people are vaccinated. Covid does not give you the authority to infringe upon the civil rights of the Washington State Citizen.

I also do not support mandatory vaccination of our school age children. Our healthy children have almost a 100% survival rate for Covid and in general have mild symptoms. Why would we risk their health to protect the vulnerable? The majority of vulnerable citizens in our state are vaccinated. The forcing of school age children to get an emergency use authorized vaccine that has no health benefit to them defies logic.

CDC states that if you are vaccinated not only can you get Covid, you can also give it to others. CDC states if you are vaccinated you should have a milder illness and avoid hospitalization. School age children have almost a 100% chance of surviving Covid so what would the vaccine protect them from?

Thank you for your time and consideration.

I am writing this letter regarding the proposed policies concerning Covid-19 that will be on your agenda on Wednesday, January 12, 2022.

I am not a "covid denier" nor an "anti-vaxxer" - I have had both. However, I personally strongly disagree with giving this vaccine to children and young people. I am a well-educate, informed patriotic American who believes in fighting for the freedoms that my father, my uncles, and generations of Americans all fought to maintain. Politicians are currently trying to deny the American people their freedoms and their rights to make their own choices. You do not have the right to force the Covid-19 vaccination on our children or anyone else.

There are many pros and cons in regards to this vaccine. I personally know two people who have suffered serious, irreversible health conditions after receiving the vaccine. The vaccine is not totally safe for everyone, therefore, it should not be forced upon everyone. It needs to be an individual choice. The long term side effects of this vaccine are not known by anybody. Do any of you remember the "Thalidomide babies" of the 1950s? That was supposedly a safe drug, too - until it was not, and babies suffered severe deformities. There are other numerous drugs that have been approved and deemed safe, until time passes and it is discovered that they have caused serious medical conditions e.g. heart disease and cancers. Then the drugs are taken off the market, and lawsuits begin. Since there is no history regarding the Covid-19 vaccine, no one knows what the future holds. Therefore, it needs to be the right of the individual to choose whether or not to accept the experimentation.

Also, the efficacy of this vaccine and its boosters is questionable. As we all know, many people who received both are becoming infected with this virus. Therefore, you truly do not have the right to force this experimental, and sometimes dangerous, vaccine upon our children in order for them to receive the education that they are entitled to as American citizens. Your bad policies have already had adverse affects upon our children.

As you closed schools in 2020-2021, children suffered greatly, and it did not stop transmission of the virus. However, closures did cause many mental conditions in our children - depression, fear, anxiety, isolation, no socialization. Our children will, unfortunately, be dealing with these mental conditions far into the future. More unfortunately, some will not. The saw no future and committed suicide. Now, our legislators are considering denying an education to our children, unless they agree to a forced, experimental vaccine. This is unconscionable. You do not have the right, nor the knowledge, to force this medical decision upon our children.

This is the first time in our American democracy where we have overlooked the welfare of our children. Our policy makers have chosen to sacrifice the welfare of our children in order to be autocrats and power mongers. It is truly disgraceful.

Since you are politicians and at this time many of you are fighting to retain the freedoms of the American people, you are still concerned about finances. If you force this vaccination upon our children in order for them to remain in school, many parents will not comply. They will remove their children from the public schools in order to keep them safe from this questionable vaccine. In all case scenarios, the children will suffer. And

financially so will the schools, because parents, grandparents and community members will no longer be voting to approve any school levies that appear on future ballots. You will have created a nightmare scenario that will affect the future of everyone for decades. Uneducated children. Children with mental health conditions. Deteriorating school buildings and properties. Divided communities. Not a very good legacy to put on your resume.

Regards,  
Portia Pauli

To whom it may concern

I fervently oppose WAC 246-100 rulemaking that would expand authority to involuntarily quarantine individuals. This is an egregious overreach of power of our state government and health officials. The Nuremberg Code, our state constitution, and our national constitution cannot and should not be attempted to be circumvented. This ruling is immoral and unethical to basic human rights. In regards to WAC 246-105 the requirement to vaccinate children for Covid-19 to attend public school or daycare is scientifically unsound and the data shows that the danger for that age group simply does not warrant such an action and that the side effects from these vaccines for these children is greater than contracting covid and since vaccinating children does not protect the adults or prevent transmission per the CDC, it simply does not warrant the addition. I vehemently oppose both of these proposals. Thank you for your consideration and time.

Dear Sir or Madam;

I oppose changes to the above codes;

Allowing local health officers to use law enforcement (WAC 246--100) to force an emergency order to involuntary detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246--045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 ). These specifics come from WAC 246-100.

Subject: Please OPPOSE involuntary isolation/quarantine in parts of WAC 246.100 and COVID mandates for children in K-12 schools

External Email

Hello,

As a concerned citizen of WA state, I respectfully write to ask that you OPPOSE these two items below. Can you please site in the constitution where these items are even allowed? You are employees of the people of this state and not the other way around.

- 1) any involuntary isolation/quarantine of people as described in parts of WAC 246.100 AND
- 2) any mandate on COVID shots for children as a requirement to attend K-12 public schools.

I want to see a time for public comment on these topics as well.

Thank you in advance.

Hello,  
I've been sitting in zoom for an hour at this point. I'm wondering what's going on with the Board of Health meeting? I've submitted 2 separate emails on my stance regarding today's topics and wanted to attend today's meeting since it involves my children's future schooling and rights. I certainly hope we weren't given the wrong zoom link on purpose? Considering the lack of information on these topics though it wouldn't surprise me.  
Please respond as soon as possible as this is a very time sensitive matter,

Subject: No thank you!

External Email

I am writing to inform the Board of Health that I oppose any expansion of WAC 246-100, I oppose adding COVID-19 to the WAC 246-105-030 list of vaccinations required for children, and I oppose the proposed modification to Local Boards of Health, as proposed in WAC 246-90.

Specifically on the Opposition to Expansion or Enforcement of WAC 246-100; I oppose any Board's strengthening or expansion of WAC 246-100, specifically WAC 246-100-040, Procedures for Isolation or Quarantine as such restraints violate the US and State of Washington Constitutions and violate personal liberties. The fact that you are even contemplating changes that are not constitutional in our state, in our country, is incomprehensible; that should be obvious, right?

Even more strongly I oppose adding COVID-19 to WAC 246-105. Vaccinating against an endemic flu-like virus is an individual and parental decision - it is a personal liberty to say 'yes' or 'no'. Especially given that the current EUA'ed vaccines' effectiveness remains questionable, at best, with clear evidence of risk with vaccinating children. For instance, VAERS data indicates nearly 28,000 adverse events for children aged 0-17, (<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

including 55 deaths in that age group  
(<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

In context the United States has experienced 823 deaths within the 0-18 year old category in US since the onset of the pandemic  
(<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2F...%2FProvisional-COVID-19...%2Fnr4s-juj3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c903abc98084d08171a08d9d2270a10%7C11d>

There is no clear indication that the EUA'ed COVID-19 vaccines will do more good than harm for the children of Washington. Further, this proposed Rule raises the question that if minors are harmed from the COVID-19 vaccine, who will take responsibility? Are you willing to be personally liable for any injured minors? Are you willing to bet the hard-earned money of the constituents of Washington to fund liability/compensation funds? I oppose adding COVID-19 to WAC 246-105-030 (or any other section of WAC 296-105) or requiring COVID-19 vaccine for children.

Dear Washington State Board of Health,

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools

Thankfully there is mounting evidence that this rise in cases due to the Omicron Variant is also seeing a massive decline in hospitalizations or even serious illness as noted in several medical papers, including this pre-print study [Comparison of outcomes from COVID infection in pediatric and adult patients before and after the emergence of Omicron](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2022.01.06.22010001) | medRxiv

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2022.01.06.22010001>>

This is INCREDIBLY good news. This study funded by several national health agencies/organizations found that this variant is indeed milder and attenuating when compared to Delta. Those age 17 and younger were 4-5 times LESS likely to require ER visits or hospitalizations. This is cause for celebration and means that a mandated vaccine would not be beneficial for under the age of 18, and should be left to the medical discretion of the parents and their doctors.

Additionally, the history of mandated vaccines to attend school have also come with the ability to allow parents and doctors to exempt the child from any vaccine, for religious or medical reasons. And any of those vaccines that are now in place to attend school, underwent vigorous and longterm trails before being recommend for children. There has not been the bare minimum of a 2 year retrospective study done on any covid vaccine. That has been the ethical standard for the last 50 years. Typically it takes from 6-16 years to approve a vaccine for children.

With the Delta variant, children statistically had a zero percent chance of death or serious illness, according to CDC's own experts, therefore it would be ethically wrong to mandate a vaccine for children with the new updated studies showing a 4-5 times less hospitalizations for this omicron variant.

Thank you for your time and consideration,

Charmaine Eppler

Written Notice of Liability for Washington State Board of Health

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents

Good Day,

I would like to emphasize that I am your neighbor. I bear you no ill will and presume you are all decent, well-intentioned people.

Every policy that you have enacted or enabled under the guise of COVID-19 that denies people - living men, women, boy and girls - equal access to public accommodations unless they submit to long-term wearing of masks, invasive diagnostic testing, or injections of gene-modification therapies is unlawful.

First, people are divine creations and are only bound by divine law, not by man's law. The first sentence of the first law of this country, the Declaration of Independence, states this clearly: "Men [and women] are endowed by their Creator with unalienable rights."

These are absolute and unconditional. What is given by our Creator cannot be taken away by you. The supreme court has upheld this countless times. Your coercive policies violate our unalienable rights under the pretense of law.

Second, all three of these policies involve medical procedures. In 1947 civilized society declared in Article 1 of the Nuremberg Code that this type of coercion is everywhere and always a crime against humanity.

Policies relating to COVID-19 and Pierce County Resolution No. R2021-224 are violations of the 1st, 4th, 5th, and 9th Articles of the Bill of Rights and are by definition Rape, Bodily Invasion, Abduction, Abuse, Molestation and Maltreatment at the very least.

This is a betrayal of your allegiance to the Constitution for the united States of America, and thus to us, it's beneficiaries. Your polices, therefore, are a breach of fiduciary duty and treason.

You have not been granted permission to pass such mandates as proposed.

I do not grant you permission to proceed with passing such mandates.

If you do not comply with this cease and desist direction, I will hold each and every one of you accountable for these deprivations of rights, crimes against humanity, and treason.

Please understand that I have every remedy available to me.

Your individual liability is unlimited.

You have now been offered lawful Notice of due process.

Dear whomever reads this,

My hope is that this finds an audience open to not just looking at facts presented, but also at looking within for the answer to whether or not the a Covid-19 vaccine should be made mandatory for children in grades K-12th and the adults of Washington state. I feel this is an issue I could present a lot of research and data on regarding lack of vaccine testing and huge adverse reactions, as well as the low prevalence of covid complications in children, but I want to focus instead on how this issue feels at a highest truth level. I know I won't appeal to everyone with this approach, yet I feel it is so important to each also look within at this larger issue. I want to only leave you with some questions to ponder.

Do you feel it is right for anyone outside of yourself to have control over what you put in your body or your child's body?

Is allowing governance over your body a path you want this world to proceed on? As a way for the future generation to live?

What are the implications for handing over this right?

I'm sure these are questions already being considered by many in some form or another, but I thought it important to highlight them. I hope this decision is made in complete confidence that it is the best choice for us and our children now and in the future.

Thank you so much for your time,

Kayla Wilson

Sars-Cov-2 has never been isolated - no proof exists, 25 countries, 139 institutions+  
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fluoridefreepeel.ca%2Ffois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cd1e86ef4fbd14bd6481308d9d21b4149%7C>>  
/

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will. Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Lynn Landstrom

To whom it may concern and those that care about our freedom and our children,

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Please do your job and stand against this violation of parent, religious, and child rights.

Thank you,

To whom it may concern:

I am a mother of 5 and the wife of a firefighter. I teach for a home education program and I have battled autoimmune illness for most of my life, very severely in the last 7 years. All of these experiences give me significant interest in the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;

There is NO evidence that those with natural immunity to Covid-19 or those who are unvaccinated are of greater threat to their communities. In fact, both those who are vaccinated and those who are unvaccinated can still transmit the virus, as evidenced in the very high number of vaccinated firefighters who are currently sick with Covid. Any type of mandatory quarantine would not only be unnecessary and illogical, but an egregious affront to citizens' civil liberties.

2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

There are currently NO vaccines available for use in the United States that are not still under emergency use authorization. Covid-19 poses less than 1% risk of mortality to children and there are no long-term studies done on risks due to the vaccine. Please do not jeopardize our children's health and futures.

Sincerely,  
Cutzi Jobes

I oppose Agenda Item #8

I support Agenda Item #11

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies.

As a parent in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery. In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge.

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is one of the side effects affecting people who have received the Covid Vaccine. Heart muscle does not regenerate. How many are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen?

Most children by now have been exposed to the virus and have developed immunity without difficulty.

Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,

Maureen Said

To Whom It May Concern:

I strongly oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. The first line of your proposal states, "At his or her sole discretion". This is very dangerous, especially in the politically charged environment we are now facing. The government overreach that we are experiencing is a direct result of doctors, leaders, and the people not holding our "experts" accountable for their decisions and actions. This proposal would only further the lack of accountability and strengthen the hierarchy, not to mention hypocrisy of our leaders. Horrific things are happening in other countries that have adopted this policy and the U.S. is well on the way to follow suit. As President Biden's own former advisors have openly stated, this virus is here to stay and a top down approach has not worked. It won't work. Accept it. If you continue on this path, it will never end. Just a couple weeks of shut down. Just a couple of months to wear a mask. Just one shot. No, now two. Now three. Next year, three more. But then again, if control is your end game, I guess you got what you wanted.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. ALL the evidence shows; "the science", the studies, the doctrinal mainstream media, and even so-called quack doctors are in consensus; that children are at little to no risk for this virus. If you took the time to, again, ask questions and think as an individual, you will find that much of this proposal is coming from the teacher's union. Children and parents should not have to choose between education, their beliefs, and quite frankly, in some cases, their lives. By bowing to the union's requests you will further strengthen that hierarchy, too. If nothing else, consider the amount of injuries children have thus far experienced from these shots (permanent heart damaged and inflammation especially). The benefits do not outweigh the risks, no matter what your experts receiving funding from the vaccine manufacturers tell you. If this is not the case, then why are schools now employing nurses and medical consultants on sudden cardiac arrest?

Ask questions. Speak up. Do not do this.

Catherine Mangis

Subject: Public Comment on Proposed WAC Amendments

External Email

Thank you so much for taking the time to read comments from your constituents regarding Chapter 246-100 WAC referring to quarantine camps and Chapter 246-105 WAC referring to mandatory Covid 19 vaccines for all school children. Please allow me to make comments on both.

Recent statements from Federal health officials:

CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission."

Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated."

In a recent federal court case against OSHA: "these injections are merely "treatments" that, for some people, may reduce symptoms."

In regards to WACs in general--these codes are well below the rights stated in both the state and federal Constitutions. They may not be intended to usurp any individual freedoms or put undue pressure on the citizens of the state or the US especially in light of the above statements.

Chapter 246-100 WAC is a "day late and a dollar short". Case rates may be up due to a mild variant but hospitalizations and death. Why would we allow history to repeat itself (please look at how the Germans were allowed to put the Jewish populations in ghettos over a small typhus outbreak). Also, why, with all the other places money needs to be spent in this state, would we dedicate funding to something that truly is at the "endemic stage" and most people are self-isotating when they deem it necessary? One would think the actions of the Health Department would be to frighten families needlessly (see above comments).

As for our children: There are no longitudinal studies that demonstrate long term efficacy or issues with this experimental Covid 19 vaccine (it is still under the FDA EAU as experimental and therefore may be refused with no consequences). Why would we mandate a vaccine that we have no idea of the outcomes down the road? Other mandated vaccines on a child's schedule have been around at least 10 year (except Gardasil which is shown to have long-term negative effects on children and is under investigation). Perhaps we should look at the mental health issues and lack of education our state's children have undergone over the past three years instead of perhaps injuring them with an unstudied vaccine?

The quoted statements from the Federal government agencies should help solidify an emphatic "NO" vote for these unnecessary changes to public policy. Again, thank you so much for your time and attention on this matter.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Kaitlyn,

I am a resident of Kitsap county. And have been for 22 years. I have worked in the public school setting for almost 10. I am a mother of four children and I am against any requirement for Covid-19 injection/vaccination/immunization/booster/shot for school attendance, entry, or other form of participation based on C-19 injection status. It is not and should not be the responsibility of this group, the department of health, the office of the governor, or any other public group or office to determine what is a matter of personal health and certainly is a gross misuse and abuse of power to consider usurping the parents roles and responsibilities in deciding what is prudent, health or otherwise, in the lives of THEIR children. Shame on this group for taking this unethical and abhorrent attempt! Shame on this group for assuming to make health decisions for parents and for their children! Shame on this group for considering a Covid-19 shot requirement for schools!

Sincerely,  
Stephanie Newcomb

To Whom it May Concern: It has been brought to my attention that your group will be meeting to vote on " mandatory injections " for these "trial vaccines", on our children. This virus is mild and not even a danger to children and adults. Colds and flu's will always be here! Please, consider the effects of the unknown ingredients in these "shots" that won't be disclosed until 2076, that may potentially cause death or life long issues that have only begun to be brought to light. These "mandates" are being driven by a Governor that has over-stepped his authority! I pray, that God intervene on behalf of His children. I ask you to seriously understand that you will be standing before Him one day and held accountable for what you do to the Children and Adults of Washington State.  
T Jordan

Sent from my iPhone

Jackson Health System on Twitter: "Jackson Health System hospitals currently have 516 patients who have tested positive for COVID-19. Of those, 255 patients - or 49% - are admitted to the hospital primarily for non-COVID reasons. Of the 516, 123 are vaccinated, 63 of whom are immunocompromised transplant patients." / Twitter If a vaccine is going to be mandated, we need to base that decision on sound data and, as you can see, COVID hospitalization data are not very accurate. Our state requires that the illness prevented by a vaccine must cause significant morbidity and mortality in the population in question. If children have incidental COVID diagnoses upon admission to the hospital, it's apparent that that is not the case.

While the majority of vaccine recipients suffer no adverse effects, there have been reports of issues such as post-vaccine myocarditis that must weigh heavily on the decision to mandate this vaccine. More and more data indicate that the risk of myocarditis is far higher than we previously realized.

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F021-01630-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F021-01630-0.pdf&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C88393258ff7044ecf97308d9d1485fc0%7C)

0.pdf&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C88393258ff7044ecf97308d9d1485fc0%7C

Risks of myocarditis, pericarditis, and cardiac arrhythmias associated with COVID-19 vaccination or SARS-CoV-2 infection (nature.com) The benefits of the vaccine must outweigh the risks and we don't have enough data to show benefits to healthy children. I have seen multiple other adverse effects in the clinical setting besides myocarditis. Patients have presented with menstrual issues, neurologic problems, severe abdominal pain and diarrhea, headaches, and blood clots. I can tell you from my personal experience after 18 years in practice that I have never seen a vaccine cause side effects to the extent that this one does. We also do not have long term safety data available for this vaccine.

28.1% of children between the ages of 5-11 in Washington have initiated vaccination. Only about 20.0% of children in this group are fully vaccinated as of today. 51.2% of children 12-15 are fully vaccinated and 59.2 of 16-17 year olds are fully vaccinated. I think this demonstrates that this vaccine is not accepted by the public, especially to parents of younger children.

Many, many parents (including my husband and I) will withdraw our children from the public school system if this vaccine is mandated. You need to consider the impact that a mandate will have on our educational infrastructure from that point as well.

Thank you for your time and I hope you take parents' comments about this topic very seriously. All of us want the best for our children. Please do the right thing and do not mandate this vaccine at this time. We can revisit the issue in a few years after we have more data.

Sincerely,

Sarah Hiam, DO

Subject: Covid-19 Mandate for Children

External Email

Hello,

I am a parent writing to you in regards of the Covid-19 mandate for children. I would ask that you please consider voting against this mandate. I am not an anti-vaxxer, we do have our child vaccinated for most things. However I do not feel comfortable with the Covid-19 vaccine for my child yet and would hope I am the one who will get to make that choice for them and not a mandate, much like the flu vaccine. Since children do not seem to be affected as much by the virus I believe it should fully be up to the parent on whether they will have their child get it or not. Adults have had plenty of time to get vaccinated if they wanted to and it should not rest on my child's shoulders to get vaccinated "for others sake". Please consider everyone's voice in this decision and the repercussions it may have. Thank you.

Rebecca Winkler

To whom it may concern:

I am strongly opposed to the Covid vaccine drugs being mandated for school attendees. Vaccination is not a decision for politicians, but should be decided by the individual or their parents. Should there be long-term side effects, from these vaccine drugs, or from the virus itself, it falls on the parents to carry the burden of those health issues. The government can educate parents about this decision, but should not make the decision for them, nor coerce them into choosing against what they feel is best for their children. Please do not mandate these drugs.

Sincerely,

Mary Brooks

(Citizen of WA state and parent of 6 grown children and 5 grandchildren)

Subject: Comments related to quarantines and coronavirus injections for public school children

Hello SBOH,

I would like to submit a comment concerning the WAC 246-100 series (5) and also requirements or 'recommendations' related to public school children receiving the coronavirus 19 shot as a requirement to attend school.

The 'Covid -19 "vaccine" as it is being called is Experimental and Under Emergency Use Authorization, is an mRNA gene therapy (all iterations including Janssen which is more traditional) and is in its third stage of trial, of we, the public citizens being the third stage test subjects. As such, every person who is eligible to receive such injections must be made aware of the potential side effects, adverse reactions and/or death that can occur, and cannot be coerced against their will to take such injections, since they are/would be participating in an \*experiment\* of which we do not know the long term outcomes.

Therefore, children should not be required to have the shots for school entry nor should any citizen be detained against their will for not taking said injection if that is the mindset of the State Board of Health, the Washington State Dept of Health or any County boards of health.

Nor should any citizen or individual of Washington State be detained against their will. Education about self isolation and self care (staying home when sick) is much more effective and the best way to go (ads by the Ad Council in public places?). All of this just comes down to grandma's basic common sense.

At present, the outdated injections are completely ineffective for the current strain of coronavirus - Omicron;  
Have a \*HUGE\* amount of adverse events including deaths associated with them;  
Are now well known to cause myocarditis and pericarditis in young adults, particularly males;  
Don't stop people from catching the virus because the injection fails after three months;  
Don't stop people from spreading the virus;

Cause those injected to develop antibody dependent enhancement making them more prone to the coronavirus  
As mentioned at the top of the list, the injections are obsolete.

Thank you for considering this matter, please feel free to forward my comments to any concerned parties.

Subject: Concerning COVID-19 vaccination to school admission requirements.

External Email

Letter From A Concerned Person to WA BOH

On the 29th day of December 2021, a notification by way of the email was received that the Washington Board of Health Technical Advisory Group (BOH) is exploring adding COVID-19 vaccination to school admission requirements.

#### CLARIFICATION OF THE ISSUES

Any physical and/or tangible evidence that a medical pandemic as legally and medically defined has occurred anywhere around the world over the past two years (December 2019 to December 2021).

To allow the students of State of Washington to make an educated decision on this matter, it is hereby requested that the Washington Board of Health Technical Advisory Group (BOH) provide copies of any and all official and supporting documents in the BOH possession of:

1. Any physical and/or tangible evidence of medical isolation of the purported COVID-19 virus pursuant to the CDC and/or W.H.O. vaccine isolation protocols.
2. Any physical and/or tangible evidence that a "Medical Emergency" exists by statutory definition in the state of Washington.
3. Any physical and/or tangible evidence that any COVID-19 vaccine prevents infection by the COVID-19 virus and that any COVID-19 vaccine prevents the COVID-19 virus from spreading.

Please provide the exact legal and lawfully promulgated OFFICIAL procedure enacted by the legislature within the limits set by the Washington State Constitution and Washington State Law (enacting clause, statutes, session laws, legislative certification and Common Law Rules) that authorizes the BOH to administer medical advice and treatment and/or have any say on a student's medical health care choices.

This correspondence is seeking "validation" that is competent evidence and strict proof that the Washington Board of Health Technical Advisory Group (BOH) has a legal liability and lawful authority in relation to any "medical drug use injections" and/or medical health care choices and are truly acting within the scope of their fiduciary relationship to the students of Washington State concerting this matter.

Sincerely,

Tina McCorkle - Pastor and Grandparent

Subject: I oppose forced vaccination and quarantine

External Email

Kaitlyn,

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Informed Consent is required by law.

There are 95000 videos about vaccines, but here is one...

More Harm Than Good

The Pfizer Inoculations For Covid-19

Canadian Covid Care Alliance

<https://www.bitchute.com/video/RaQkNEzpAdQo/>

Sars-Cov-2 has never been isolated - no proof exists, 25 countries, 139 institutions+  
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will. Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10

Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Thankyou for serving on the board.

People who are "fully vaccinated" get sick and spread germs, just like others. I'm 60 and work in two large rooms with five other adults and ten students total. The five have been "fully vaccinated" for several months, while I have an exemption. I always wear a KN-95 mask and a cloth mask at work. Two of my co-workers tested positive for Covid in November and were sick three weeks. My co-workers who are "fully vaccinated" are NOT excluded from their jobs if "exposed" to Covid. If people can get sick and spread germs regardless of vaccination status, should we ALL be excluded whenever we are "exposed [the term is too broadly interpreted]?"

I am excluded from my job for over a week whenever one of the 15 people with whom I work tests positive, although I'm not sick and probably have been exposed many times over. I'm by far the eldest at work but have been keeping my immune system strong. One of the "fully vaccinated" adults already had Covid last year but went for testing recently when she came down with sniffles and a mild sore throat. She received a positive Covid test result!

This situation (I'm excluded although not sick, while others who are also "exposed" can become infected and spread germs) can repeat itself endlessly, since adults and students can receive a positive Covid test result ad infinitum.

I have almost a 99% probability of surviving Covid, as do others. It has become like a flu or a cold: anyone can get it, and almost everyone will survive if they have a strong immune system.

If the board mandates that all residents receive mRNA "vaccines" or be "involuntarily detained for isolation," it must allow for exemptions, and it must allow time for people to flee the state. Many will move rather than comply.

Discriminating against people based on whether they've received a Covid mRNA "vaccine" is to be "vaxist," like being bigoted, sexist, racist, anti-Catholic, or anti-Semitic. Some people insist that the "unvaxxed" are subhuman and must be denied basic human rights. We've been down this road before. Don't make Washington continue to be a laughingstock.

Subject: URGENT! READ NOW!

External Email

Good afternoon,

The fact that nobody can reach you or your colleagues through phone or email is concerning. It appears that you and your colleagues do not want to hear from the public.

I want you to consider the consequences of your actions and decisions. Mainly, the meeting today where I understand you and your colleagues will consider imposing forced isolation for individuals and families. It is my understanding you and your colleagues will be deciding whether to demand all public school students are vaccinated.

I want you to consider the consequences of your actions. Do you know the public school attendance is on a steady decline? Citizens are losing trust in public schools. Sit down and critically think what problems this may cause to the safety and well being of children.

Furthermore, if you or your colleagues vote for any type of forced isolation, you will be voting against the Constitution. Have you read that lately? It seems that if you have, you would not consider any thing that is on your agenda.

Speaking of agendas, the public has lost faith in you as well for considering these unconstitutional demands. WE ARE NOT against science. WE ARE AGAINST AGENDA SCIENCE. We are not against vaccines. We are against FORCED VACCINES, especially when the data does not support them as a common good. Insurance companies are reporting a spike in deaths, not after Covid came but after vaccines came. The vaccine doesn't stop you from contracting "Covid" or spreading "Covid".

Consider the actions of YOUR INDIVIDUAL decisions and actions. The public is not happy with the tyranny being imposed in WASHINGTON state. We are fed up with all the dead small businesses, the suicide and the agenda science.

The public is fed up. It's up to you to do the right thing and think critically, not under an agenda. These two topics you consider imposing, consider how the public will react. The public trust is teetering, legal action will be brought forth against you and your board, you will sever any lasting threads of trust in the public schools and you will infuriate many parents and citizens. We see outrageous suicides, even of one entire family. This doesn't need to happen. Look at all science, not just agenda science. Follow the Constitution, not money.

Thank you,

Tatyana S.

Subject: Vaccine Mandate

External Email

Dear Kaitlyn,

My name is Stacey Simon, I'm writing to you about the possibility of mandating the Covid-19 vaccine in our schools.

I want to advocate for my children and for the children of Washington State. This isn't about anti-vax, but for everyone's right to choose what goes into their bodies.

This vaccine is still new, and there aren't any long term studies on its effects. It should be left up to the parents and their physician whether or not to get the vaccine, not the government. No one should be forced to take anything in order to attend school, hold a job, or continue to be a member in society. Studies have shown that our kids are not at risk for serious illness, and to date, Covid-19 still has over a 99% survival rate.

Clearly the vaccine isn't working to keep this virus at bay, and those that are vaccinated are still getting sick and spreading the virus. So why at this point would mandating this for our students be necessary or make any logical sense?

I can appreciate the fact that the world's attention is currently hyper-focused on Covid 19. Health and Public Safety organizations feel the need to show some sort of response, warranted or not. Please keep in mind the flawed logic of the vaccines and our children's well-being and health when making these policy decisions.

Thank you,

Stacey Simon

Subject: Vaccine requirements

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Washington State Board member:

Please do not vote to enforce Covid vaccines for children at school. Children have a strong immune system and very high success rate. This goes against our constitution and parents desires for their children. For those that want it for their kids it's an option now. This should  
Never be forced on anyone. You will see people pulling their kids out of school so fast if this passes.

Also please vote no for allowing local health officers to use law enforcement to force an emergency order to involuntarily a person or group of people to be isolated in quarantine facility if refuse vaccine, or testing, treatment etc. we are human beings with free will. We live in a free country. We should not be forced to put anything in our bodies.

This needs to move to endemic status as this isn't going away. Vaccines aren't stopping this as people can still get Covid if vaccinated. Many from who I have seen are having a worse Covid experience after vaccination then the unvaccinated. Vaccines are not the answer. We need to learn to live with this. Our economy is affected enough, our mental health is affected enough, and our livelihood and health. Please vote no.

Michelle

Dear Mrs. Donahoe,

I Erin Kranzlet oppse the use of law enforcement to be used to detain those who are unvaccinated.

We are not second class citizens. Many of us have natural immunity by now. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and over all health. You will be held accountable if it comes out in yeaes to come that the vaccine is not safe.

There has been a filing in the International Crimes Court the ICC by dr Michael Yerdon and others for crimes against humanity bt pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus.

Please so the right thing and oppose these WACs from being added to laws.

To: Donahoe, Kaitlyn N (SBOH)  
Cc:  
Subject: Jan 12th meeting

External Email

Dear Kaitlyn,

I am a Washington state citizen and a parent. I STRONGLY OPPOSE the use of police officers and health officials for taking persons to detainment facilities who do not comply with quarantine, face masks, testing, and vaccination. WE ARE UNITED STATES CITIZENS WITH A CONSTITUTION. WE HAVE INDIVIDUAL RIGHTS AND LIBERTIES. WE DO NOT LIVE IN WORLD WAR II, NAZI GERMANY. NO COVID QUARANTINE CAMPS!!! I strongly oppose adding covid to list of diseases. Please show studies where covid has been isolated.

I STRONGLY OPPOSE required covid vaccination for children and adolescents. Recent information coming out shows that these covid vaccines, are not vaccines, they are gene modification therapies. These gene modification therapies are not safe. See VAERS report: VAERS through 12/24,21: 1,000,227 adverse events reported. 21,002 deaths, 110,609 hospitalizations, 109,245 urgent care, 156,456 doctor office visits, 8,673 anaphylaxis, 12,532 Bell's palsy, 22,117 3,435 miscarriages, 10,640 heart attacks, 22,117 myocarditis/pericarditis, 35,650 permanently disabled, 5,011 Thrombocytopenia/low Platelet, 23,892 life threatening, 36,492 severe allergic reaction, and 11,462 shingles. <https://openvaers.com/covid-data>. There has not been full disclosure as to what are in these injections. The vaccine box insert is blank. The current offered covid gene modification injections are under EUA, thus they are not FDA approved.. only Cominarty is FDA approved and it is currently not being offered. Children and adolescents are at much higher risk of vaccine damage than covid.

I strongly oppose proposed WACS:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

These proposals are violations of Nuremberg Code: "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

- Katrina Mason

Subject: Comment on vax requirement for school age children.

External Email

To whomever it may concern,

We The People/Parents will not tolerate any covid shot requirements for school age children. We will consent to medical treatment to our children IF we so desire, once we have had ample time to gather all pertinent information and make a wise and informed decision, which many of us do not feel have we had time for.

And many of us feel that much more time and information is needed re: safety, and efficacy, and long term studies from this new product.

Furthermore, it's proven the Covid shots do not work against variants. Celebrities and public figures are tweeting/talking about testing positive for Covid, within the last couple weeks, even though being triple vaxxed(in fact, today, on The View, it was Whoopi Goldberg).

This, (and many more reasons) and firstly, the fact that you are not our children's parents, and secondly, children are not at high risk for Covid, makes this whole decision mute.

We encourage you to stand for freedom and support the parents in making the best informed decision for their children.

Let Freedom Ring,

E. Meyers

P.s.

Well-Structured German Study Shows No Deaths among Healthy German Kids Ages 5 to

Here is what we find for healthy kids with Covid-19:

- For healthy kids, the risk of going to the hospital is 51 per 100,000
- For healthy kids, the risk of going to the ICU is 8 per 100,000
- For healthy kids, the risk of death is 3 per 1,000,000
- There were no deaths reported in healthy kids older than 5
- Kids 5 to 11 have a lower risk than kids <5 and adolescents 12 to 17
- Kids 5 to 11 have a risk of going to the ICU of 2 in 100,000; 0 died
- Among kids who died of COVID19, 38% were already on palliative/ hospice care

The Germany study shows that risks to healthy kids are very low.

So why the school closures, mask mandates, and vaccinations for children who are not at risk□

Washington State Board of Health Members,

Regarding the Rulemaking Petition on January 12, 2022 for Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry, I oppose adding a COVID -19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Thank you for your time.

Subject: Public Comment, from Mead School Board Director

External Email

Washington State Board of Health,

As a mother, a healthcare provider and a School Board Director, I am alarmed and dismayed at the discussion of the Covid -19 vaccine to be included in Chapter 246-105 WAC.

First, forcing parents and families to make a healthcare choice that they are not comfortable with is a significant and unnecessary overreach by the state government. Including a vaccine so very new to approval in the 5 – 11-year-old age range, as a requirement to attend school is irresponsible and shortsighted. Especially given that data shows the very population being forced to take the vaccine is so insignificantly affected by the virus.

Second, Washington is a very diverse state. As you know, the issues that public schools face are different in each region and it has been more evident than ever in the case of the Covid-19 pandemic. The state mandates and regulations have already caused a significant burden on school staff, administrators, and Board of Directors. These unmet burdens have led to a lack of trust. Our goal is to educate students in an environment where they feel safe and welcome. I am confident that the inclusion of the Covid-19 vaccine as a required vaccine would elevate the animosity and distrust to unforeseen levels.

Third, the purpose of public education is to provide individuals with an opportunity to grow, develop and achieve their potential so they may become active, self-sustaining members of society capable of critically thinking. We lose sight of our purpose when we create yet another barrier for parents to enroll their students.

It is no secret that Washington public schools have already lost over 55,000 students this academic year. How can we justify this new barrier when we know it is extremely politically charged and that it provides minimal medical protection for this sub-set of the population?

Mead School District sent a survey to parents regarding the inclusion of Covid-19 vaccine as a required immunization, the results below are compelling.

- \* 71% of parents are NOT in favor of the vaccine being required to attend school.
- \* 61% of parents said they would NOT vaccinate their child even if it was required.
- \* 38% of the parents would NOT seek an exemption for their student if the vaccine was required.
- \* 51% of parents said they will withdraw their student if no exemption is offered
- \* Over 3,000 parents responded to this survey
- \* 2,100 parents submitted feedback to this survey, these results were submitted to the SBOH for review.

For these reasons and for the basic fact that this rushed, top-down approach from the state government is not appropriate in public education - I strongly implore this board to not include the Covid19 vaccine in Chapter 246-105 WAC.

BrieAnne Gray

Mead School Board Director

I ask myself how in the world these laws will ever unify anyone. These will only divide us!

I oppose any thoughts or laws suggested by WAC-100 that would expand any authority to involuntary quarantine individuals. It's a disaster in Australia now!

Furthermore, I also oppose adding Covid-19 vaccines to the WAC 246-105 schedule of required vaccines for children to attend schools.

Do not approve of these!

Subject: Input Regarding COVID Vaccination in Schools

External Email

Hello board members,

Thank you for the opportunity to comment on the upcoming discussion concerning mandating the COVID-19 vaccine for Washington school children. I am a mother of 2 school aged children, ages 10 and 12. I am grateful for vaccines, and my children have received all vaccines on the schedules. When it comes to the COVID-19 vaccine, I am cautiously optimistic. I have heard through the DOH and federal health authorities that the vaccines appear safe with respect to the short-term safety data, but there simply has not been enough time to study and determine the long-term safety of the vaccines. I also understand that the vaccines may not prevent transmission of the virus but perhaps they are effective at preventing severe illness and death. In review of the COVID-19 data and impacts/effects on children, it does not appear that children are at a particular risk of severe illness and death, especially healthy children who do not have underlying disease or health conditions. My personal preference is that these vaccines should not be mandatory at least until such time as long-term safety data are available. I felt similarly about the HPV vaccine, and once long-term data was available, I opted to vaccinate my oldest child in consultation with her physician even though that vaccine is not mandatory.

To be frank, if this vaccine is mandated without long-term safety data, I would still not vaccinate my children until I could review long-term safety data. At this point, the risk from the disease to my healthy children is minimal and the long-term risk of the vaccine is unknown. That is not a gamble that I am willing to take.

I also share the opinions of many others that have been expressed publicly that the vaccines for COVID 19 do not meet the requirements outlined in WAC 246-105-030 and when reviewing the SBOH Criteria for Reviewing Antigens for Potential Inclusion in WAC 246-105-030, dated 11/8/17.

Thank you for your consideration.

I STRONGLY oppose WA 246-100 rule making that would expand any authority to involuntarily quarantine individuals. Families have the right to choose what's the best way and how they're capable to quarantine. Not to mention the cdc has now shortened the quarantine time and said you can go to work with Asystematic symptoms.

There is no more need for panic and to traumatize families.

I also strongly oppose adding c-19 vaccine to the WAC 246-105 schedule of required vaccinations for children.

Children have a less than 0.03% chance of dying from Covid and the adverse effects in young kids and teens has been proven to be more harmful than good. The vaccine does not slow or stop the spread of Covid. The natural antibodies are stronger than the vaccine which is why I strongly oppose putting more people at risk by forcing a vaccine on children!!!!!!!

Hello,

I oppose WAC-246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-29 vaccine to the WAC-246-205 schedule of required vaccines for children to attend schools.

The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion. (Nuremberg Code Rule 1 from the Nazi Trials 1947).

Please let lessons learned from the Nuremberg Trials be part of your guide.

Zane E.

Subject: Covid mandate

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=0>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

## III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>> )
- Less than 40% of kids 12-17 are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>> )
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>> )

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can

easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Mr Glasoe,

I Erin Kranzlet oppse the use of law enforcement to be used to detain those who are unvaccinated.

We are not second class citizens. Many of us have natural immunity by now. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and over all health. You will be held accountable if it comes out in yeaes to come that the vaccine is not safe.

There has been a filing in the International Crimes Court the ICC by dr Michael Yerdon and others for crimes against humanity bt pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus.

Please so the right thing and oppose these WACs from being added to laws.

To whom this may concern,

I understand that the board of health will convene on January 12, 2022 to discuss several items of importance. For this purpose I want to be sure that the board is able to fairly assess the great points of agenda item number 11, and conversely the great lack of good points in agenda item number 8. This should be a no-brainer to adopt #11 and put #8 either on hold or in the dust bin, where it belongs until relevant in line with what is detailed in #11.

Thank you for taking time out of your busy day to look at these important items, and hopefully you are able to do take the correct action accordingly.

A concerned parent in the Federal Way school district.

Subject: Vote Against Vaccine Mandates

External Email

To: Washington State Board of Health

As a father of two young children who have been attending daycare/school in person with other children in Washington State for the past two years without mishap,

1. I fully oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.
2. I support the petition agenda item #11 completed by Xavier Figueroa, PhD, which asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.
3. I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

In particular, I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to free and informed consent for medical interventions. Also, mandates do not take into consideration natural immunity.

1. Children's survival rate from a Sars-CoV-2 infection is 99.99995%. There is no evidence of an extreme mortality or injury risk warranted to mandate a vaccine. Out of 1.9 million infections in 5-11 year olds, 94 cases resulted in death as of October 16, 2021.

2. Although the news has reported the Relative Risk Reduction (RRR) of 95%, which is the comparison between the group who took the vaccine versus the group that did not take the vaccine (note, the studies were of only a couple hundred kids, reporting on an app, who were possibly, but not required to be, exposed to infection in the general population for 2 months). However, the more meaningful Absolute Risk Reduction (ARR), which is the risk difference of an outcome of a given treatment in relation to a comparison of no treatment. The ARR for the Pfizer vaccine was 0.7%. Taking the

vaccine is 95% reliable to provide less than 1% greater protection than not taking it.

<https://pubmed.ncbi.nlm.nih.gov/33652582/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F33652582/>>

3. Data suggests vaccinated people have 251 times the viral load than unvaccinated people.

[https://www.thelancet.com/journals/eclinm/article/PIIS2589-5370\(21\)00423-5/fulltext](https://www.thelancet.com/journals/eclinm/article/PIIS2589-5370(21)00423-5/fulltext)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2FPIIS2589-5370\(21\)00423-5%2Ffulltext&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C5b67fdfe9124447eceb708d9d1ee0510%7C1](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2FPIIS2589-5370(21)00423-5%2Ffulltext&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C5b67fdfe9124447eceb708d9d1ee0510%7C1)>

4. Increases in COVID-19 are unrelated to levels of vaccination across 68 countries and 2947 counties in the United States.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8481107/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticles%2FPMC8481107/>>

5. There are no long term side effect studies, unlike all other vaccines previously available.

6. Under the Pfizer EUA for use in children, linked below, it states every child MUST have the ability to refuse it. To mandate this experimental vaccine would violate Federal Law and the Nuremberg Code.

Fact Sheet for Recipients - Pfizer-BioNTech COVID-19 Vaccine for 5 - 11 Years of Age

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15371>

“Under the EUA, there is an option to accept or refuse receiving the vaccine. Should you decide for your child not to receive it, it will not change your child’s standard medical care.”

7. There is emerging data of severe increased risk of myocarditis and pericarditis in children after vaccination. Pfizer has expanded its study to look into this more closely. For now, it is a “black box” warning, along with anaphylactic shock, which means it is significant enough to sound the alarm.

8. The severely underreported Vaccine Adverse Reaction System (VAERS) as of December 24, 2021 has now reported 1,000,227 covid vaccine reports, 21,002 deaths within 3 days of injection, 110,609 hospitalizations, 109,245 urgent care visits, 36,492 severe allergic reactions, 35,650 permanently disabled, 22,117 myocarditis/pericarditis,, 12,532 bell’s palsy,10,640 heart attacks, 8,673 anaphylaxis, and 3,435 miscarriages due to the covid vaccines. This is just one of many reporting systems, and the news is grim on many of these reporting sites across the world. How many reports were missed or not filed? What events happened further away from the injection date that we have yet to connect to the vaccines? Would you take that risk with your child, who has a 0.015% risk of severe injury from the virus?

<https://openvaers.com/covid-data>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F covid-data&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C5b67fdfe9124447eceb708d9d1ee0510%7C11d0e217>

To summarize, children are not in grave danger from COVID infection. The vaccine does not prevent infection or transmission, as proven by the statistically insignificant ARR of 0.7%. Vaccinated people may be more infectious by 251 times than unvaccinated people. There is no discernible benefit of vaccination in a review of 68 countries and 2947 counties in the USA. There are no long term studies on how these impact children. There are growing data to suggest these vaccines may cause more harm than the disease does

in children.

Thank you for taking the time to review the links and do your own research. I request you do NOT approve a vaccine mandate, rather, leave the student medical decisions in the hands of their parents and medical providers.

Thank you,

Andrew D. Ettinger

I oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will. I also oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school. The fully vaccinated + booster are getting COVID, going to the hospital, dying, and spreading it as well. Makes no logical sense to punish the unvaxxed considering the above. The data does not support our kids having a high risk of hospitalization and death from COVID nor giving it to others.

Thank you.

Subject: Opposition for V Requirments for Children

External Email

I am writing to voice my strong opposition for requiring the COVID Vax for children as a requirement for school (or any other place for entry). Children are not at an extreme risk and it should be up to parents if they want to inject their child with an experimental vaccine. This should not be something anyone in government mandates!

I also am opposed to WAC 246-100-040, Procedures for isolation or quarantine. It should be up to the individual to self-quarantine if they are sick. This should in no way be forced upon people.

It's time to let our citizens start making choices for their own health and own family. The government has done what it can to mitigate the spread of this virus, the power now needs to go back to the individual to manage their own health. If you all want something positive to do to help us get healthy, why not actually create and promote a health campaign? Challenge citizens to get more exercise, eat healthier and take their vitamins. If everyone did this, our bodies would be healthier and less susceptible to sickness. Thank you!

Brooke Huffman

Subject: Public Comments regarding January 12th Meeting

External Email

Hello!

Wishing you well in this season. I am writing today in regards to two proposed policies and some concerns I have.

Regarding WAC 246-105:

It has come to my attention that the Board has convened a Technical Advisory Group (TAG) to consider adding the COVID-19 shots to the required list of immunizations for kids to attend school. This is something I strongly disagree with and vehemently oppose. Firstly, children are not the primary spreaders of the Covid virus. In fact, most children are the best apt to get us to herd immunity, being that they are at their healthiest. In fact, true herd immunity theory (only ever accomplished through natural infection) was first introduced when a Johns Hopkins researcher named Arthur Hedrich was observing the waxing & waning of MeasIes in the early 1930s. He saw that Measles epidemics were only a problem when the number of naturally immune people in the population dropped below a certain %. If 55% of kids were catching it & becoming immune, the rest of the population didn't. This was before the measles vaccine was introduced in 1960, which scientists proposed would require the same uptake rate, 55%. It was never enough and outbreaks continued. A good example of this in current day times is China, who has a 99% uptake rate and still has outbreaks. Therefore, it's not only NOT the children's fault the disease is spreading, it is secondly, the most important immunity they could naturally receive to save their families, if not the world, from this virus. Children have the least complications from Covid, so mandating that they take a vaccine to better their already amazing odds, is for what? For adults who are worried? Children are not the protectors of society. We are.

Lastly, MRNA technology is new. This is an experiment. The trials are incomplete. We do not have long term data on the effects on children, or adults even. The companies are not liable for any damage or injury to our children, and you expect us to make them take this new vaccine just so that they are allowed to LEARN? Absolutely not. In addition, as stated by Dr. Robert Malone, the child (EUA only) approved vaccine injects a viral gene into the child's cells. The gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including their brain and nervous system, their heart and blood vessels, including blood clots, and their reproductive system. This type of damage is irreversible, not a "manageable side effect better than getting Covid itself." This vaccine can also make fundamental changes to their immune system. We need at least 5 years of testing and research before we can understand the risks we are putting children through. Harm and risks are most often not revealed until years later.

I vehemently oppose the mandating of these liability-free vaccines in order for children to

learn and encourage all parents to withdraw their children from school should these mandates be enforced.

I, however, COMPLETELY support Informed Choice Washington's Petition for Rulemaking with the State Board of Health. This petition asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorization (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Regarding WAC 246-100:

I vehemently oppose the proposition of involuntarily detaining people or families to be isolated in a quarantine facility following refusal of medical examination, treatment, testing, counseling or vaccination. Individuals are responsible for their own health and any and ALL medical interventions are to be given with informed consent. If an individual does not consent to their body being tested, treated, or vaccinated, etc, they are prepared to deal with and assume the risks and benefits of their choice. It is their body alone and they are the only ones liable for what happens to it. They MUST be treated like human beings capable of making their own choices, not forced into some insane internment camp. Individuals with anxiety and depressive disorders do much worse with Covid infection, so apart from separating individuals and discriminating against them for their medical choices by force quarantining them, it can do so much harm to their Covid outcomes.

The idea is to preserve public health. We must focus on wellness, whether that be informed consent to be vaccinated, to choose natural immunity, or whatever else an individual decides, it must be that. Their own choice, for they are the ones liable for their choices. Not the vaccine manufacturers, not doctors, not law enforcement. It is about personal responsibility and promoting health so that people can successfully gain immunity and we can move past these last few years. A rise in Covid cases does NOT mean a rise in deaths, so we must not focus on that. The goal should be herd immunity however it comes. If that's not the goal, then what are we doing?

Thank you for your time.

To Our Alleged Health Leaders,

I strongly oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also strongly oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Instead, it would be most refreshing to see an official health entity make recommendations that would truly improve the health of the populations they are entrusted with protecting and informing, such as getting regular exercise, vitamin D supplementation, and an evolutionarily proper diet that is not full of sugar, dyes, pesticides, refined grains and highly processed seed oils.

Sincerely,

Darryn DeLine

Subject: Opposition for V Requirments for Children

External Email

I am writing to voice my strong opposition for requiring the COVID Vax for children as a requirement for school (or any other place for entry). Children are not at an extreme risk and it should be up to parents if they want to inject their child with an experimental vaccine. This should not be something anyone in government mandates!

I also am opposed to WAC 246-100-040, Procedures for isolation or quarantine. It should be up to the individual to self-quarantine if they are sick. This should in no way be forced upon people.

It's time to let our citizens start making choices for their own health and own family. The government has done what it can to mitigate the spread of this virus, the power now needs to go back to the individual to manage their own health. If you all want something positive to do to help us get healthy, why not actually create and promote a health campaign? Challenge citizens to get more exercise, eat healthier and take their vitamins. If everyone did this, our bodies would be healthier and less susceptible to sickness. Thank you!

Subject: Washington school Vaccine requirement

External Email

Hi,

I am greatly opposed to any Covid Vaccine requirement for Washington school children. All studies have shown the health risk Covid poses to school aged children is extremely low. There are however dangerous side effects from taking the Vaccine that are known however infrequent they occur. Not to mention the myriad of mental and social health issues that have been plaguing these kids due to lockdown that are not recommended by the CDC. Do no harm. Making a Vaccine Mandate will inevitably lead to more vaccine hesitant parents pulling their kids out of schools and that will also adversely affect children. Please do not impose this mandate.

Thanks,

Daniel Collier  
Lower Queen Anne, Seattle, WA

Subject: January 12 Meeting

External Email

To whom it may concern,

On Wednesday, January 12th there is a meeting to discuss the vaccine requirements for school aged children. This decision should be a parental choice. It is an abuse of power and government overreach for anyone elected to office by the people to decide what is best for our children.

I am opposing ANY vaccine requirement for children.

This is the time to stand up, advocate, and protect the children of Washington.

Sincerely,

Cassidy

Subject: Oppose WAC 246-100 to include COVID-19

External Email

To whom it may concern,

I am writing to share my opposition to WAC 246-100 to include the COVID-19 vaccine. Individuals also have the right to bodily autonomy. No one medical treatment is right for every individual. Where there is risk there must be choice! Are you going to take liability for mandating vaccines? The manufacturers won't.

Science has proven that children are least at risk for the virus and the long-term effects of these vaccines are still unknown. We are seeing the vaccine and boosters are not protecting the vaccinated and vaccine injuries are extremely underreported on VAERS. The vaccine has also proven not to protect against others. There is no reason any child should be forced to receive this vaccine as part of the routine childhood vaccine requirements to attend school.

Thank you for your time,

Subject: NO vaccination requirement for school aged children

External Email

Hello,

I am writing to strongly demand that WA State NOT impose mandatory covid-19 vaccinations for school aged children. I'm actually baffled that I even have to write you this email, and that this topic is even on the agenda for your next meeting. The ignorance of such a proposal is actually jarring.

- 1) A mandate is not the law. To force people to comply with a mandate is criminal.
- 2) The vaccines are STILL (all of them) experimental drugs under emergency order. You cannot mandate this for schools or detain persons or families involuntarily who do not wish to comply. This is illegal and unethical.
- 3) Mass-vaccinating children for covid-19 is not a clinical necessity, as the real science has clearly shown! More injuries and adverse reactions (even just the small percentage of reported ones in the VAERS system) come from the vaccine than covid itself. The miniscule number of reported children who struggled with covid had other comorbidities that affected their outcome.
- 4) There is currently a 99.9% survival rate of covid-19 infections in the United States and the survival rate is even higher for school-aged children, who RARELY have problems, or even symptoms, of this infection. To mandate vaccinations on a populace with a greater than 99.9% survival rate shows a complete lack of common sense and critical thinking prowess.
- 5) If the goal of mass-vaccination of children is to reduce transmission to others, I strongly urge this "Board of Health" to look at the data and observe how an alarming amount of current covid infections are in fully vaccinated individuals, who, believing they were protected, got infected and have been spreading it to others. This Board should be focused on THAT alarming trend, not on mass-vaccination of children who don't need it.

I look forward to the January 12th meeting!

Warmly,

JDW

Subject: Covid Vaccine Requirement for kids

External Email

Dear Ms. Donahoe,

I am writing to voice my concern regarding the consideration of covid vaccine requirements for school-aged children beginning next Fall.

Our four children span elementary to high school. They have all had covid, and thankfully, all had mild symptoms and recovered quickly with no long-haul symptoms. We are aware and acknowledge that some children are not as fortunate and that MISC is a risk factor for infection.

Having worked as an inpatient physical therapist at Seattle Children's Hospital, I recall young patients coming onto my unit who suffered similar complications (MISC, others with Guillan-Barre syndrome) that resulted from initial infection with flu or other illness. These were always regarded as RARE and unfortunate effects of otherwise non-life threatening viruses. Not once did I ever hear suggestion among medical or social work staff for a blanket requirement to flu vaccine as a solution. In fact, some of my patients who came in with Guillan Barre syndrome had received the flu vaccine that same year.

While mainstream media and CDC continues to promote covid vaccines and boosters, their efforts cannot negate tens of thousands of parents' personal experiences and direct word-of-mouth testimonies that covid is, for the vast majority of school-aged children, NOT a life-threatening illness, and NOT a significant, measurable, traceable cause of severe spread or threat to the larger community.

It is destructive to our state and tone-deaf to think that parents who do not want the vaccine for their children will reverse course simply because it's required or recommended. As time goes on, studies continue to show actual risk to children associated with the vaccine. A primary argument from health officials is that these risks are also associated with covid; however, they refuse to acknowledge that millions of children have HAD covid and did not experience any lasting or dangerous side effects or complications, and that any subsequent infection from a virus almost always results in milder symptoms.

Attempting to require the covid vaccine for school entry in the fall WILL result in a mass exodus of students from our state's schools. Increased requirements to crack down on homeschooling or private school communities WILL result in a mass exodus of families and citizens from our state period.

We, born and raised here, have always had a strong desire to raise our kids in this beautiful place, but when freedom of choice and trust in our parenting is available to us in so many other states, the decision to leave has begun to hinge on decisions like these.

Please consider listening.

Thank you for all you are doing to serve,

Kathy Day

Kaitlyn,

Your auto reply announced the good news.  
I have three children naturally and then one more by adoption all grown and on their own in my thoughts and prayers daily.

Please consider your part, which is all we can do and will be accountable to for generations to come, in preserving the unique American form of government that has been more successful than any.

Why change to a socialist model which has never come close to the success of the American experiment for individualism?

Thank you for reading this to the end, so that you may be a leader into the future.

Respectfully,  
Robert

Robert Cushing, MHSA, NHA

Kaitlyn,

First Amendment and constitutional rights always need to be maintained in America even if the individual exercise using those protected rights is wrong, a danger to themselves and others.

Do not be apart of changing this country to other than what was intended by our clear and brilliant founders.

We have gotten this far because of them and will go no further without them.

Robert Cushing, MHSA

Please vote no on this, leave our children alone! The risk is not worth using a vax that is doing more harm then good to our children.

This is NOT necessary, please vote no! this is NOT politics this is our children's health.

Thank you

Cindy Byers

Buckley, WA

Subject: No vaccine for my Tribe of 5, EVER

External Email

Good morning,  
I am writing this, in the hope that you'll take a minute to understand the value of personal medical choice. I hope to be heard, as I am NOT in favor of mandatory vaccines.

I work in the 2nd busiest Emergency Room in Washington State. When Covid struck, I witnessed some of the bravest acts of kindness that I've ever seen. Vaccines weren't available, so gowns, 2 masks, face shields and gloves were our only defense from this terrifying new virus. As the months went on, our ER was empty! The public was afraid to come in, and "get it" from the hospital. We were often sent home early. It was the calm before the storm.

As vaccines became available, we began to once again see "regular" patients. The toe pain, the finger cuts, vomiting. All part of the normal course of work in an ER. Talk about "mandatory vaccines" began, and a division between staff started happening. Loud, opinionated conversations were had in every break room. Those who had high hopes in the vaccine, and those who didn't believe that it would be the answer. You could not discuss your thoughts, or you risked being chastised.

When the time came, I chose not to get vaccinated. Mid-September, I contracted Covid from a patient I cared for at work. She passed. I quarantined for 14 days in my bedroom, and none of my 5 children contracted the virus. Quarantine works.

The shift happened about 6 months ago. We began seeing breakthrough cases. Patients and staff who felt that they had "done the right thing" by getting fully vaccinated, still suffering effects and contracting Covid. The vaccine wasn't working. Doctors considered the option of discontinuing CPR on Covid positive ICU patients, to avoid exposure. We began being short staffed. FEMA nurses were brought in to relieve overworked staff.

Today, we are 250+ patients over capacity. To put that into perspective, that means 250 patients don't have a hospital room. They are in makeshift locations. We are literally holding PCU-admitted hospital patients in the waiting room of the ER. We have beds and recliners in the hallways. We have beds in closets. And we cannot isolate the positive Covid patients from the non-Covid patients, because they are everywhere.

We have a ratio of 1 nurse to 4 patients, on normal days. Today, we're doing 1 nurse to 6 patients. We don't have monitors to see what these patients vitals are. On Monday, we ran out of portable oxygen tanks. The hospital can not divert patients away, but there is nowhere for them to go. I STRONGLY urge you and ALL of your family members to avoid the ER! Take care of your health, come in for emergencies, but do not come in for trivial reasons.

As a full-time staff member, my protection lies in the mask on my face, proper hand washing, and masks on my patients. When I contracted Covid, my patient was not wearing a mask. Masks and quarantine work!

I have 5 children in the Bethel School District. None of them are vaccinated. My boyfriend

works as a full-time Firefighter. He is not vaccinated. We use precautions to protect ourselves, and masks work. Hand washing works.

If I can choose to opt-out, and emergency responder's can choose to opt-out, then our children should be able to opt-out of a vaccine that:

- 1) does not prevent them from getting Covid.
- 2) does not prevent them from spreading Covid.

I can firmly and truthfully tell you that the vaccine doesn't work, and you divide your community by creating a policy that doesn't allow for individual choices. You have the opportunity to create a safe-space for your families. Here's a school district that respects individual rights! That could be us! Home school has always been an option for families who don't want to expose their children to the public school environment. You cannot make schools Covid-free with mandatory vaccines!

The First Amendment guarantees freedoms concerning religion. My body is my temple. Created by God, whole and complete as it is. If God wants me or my children to get Covid, so be it. We will treat the symptoms, and quarantine. The long-term effects of this vaccine are unknown, and might alter my children from the way God made them, and I will not support you in creating a mandatory vaccine policy.

Thank you for your thoughtful understanding.

Erika McInnis

Subject: Opposition to mandates

External Email

I am a resident of Olalla, WA, and a veteran, and a mom of 2 little kids, and a Christian woman. I am completely opposed to forced quarantines or allowing health officials to use the power of law enforcement to force people to isolate or quarantine. I am also fully opposed to Covid vaccine requirements for schools, the vaccine needs to be a personal decision made based on personal health concerns, religious beliefs and family values, not enforced by the government.

Thanks,

Subject: upcoming meeting about vaccine mandate for school children

#### External Email

I am an informed citizen and grandparent to children of various ages. It has taken a considerable amount of time and ongoing research for me to come to the decision relevant to your proposal to create a COVID Vaccine mandate for school-aged children.

It is difficult to try to think of all the ways that such a mandate would be wrong.

1. It usurps / overrides the power that a parent has to protect his/ her child and to make life-altering decisions for the child.
2. The Constitution provides for freedom of choice - always - not only when a parent is in agreement with the governing bodies.
3. The vaccines in question are not proven to be safe, and on the contrary have shown to be very dangerous, even life-threatening themselves. This applies to adults as well as children. Many children who have received the vaccine have become extremely sick - they have developed neurological conditions, heart conditions, many have died from pulmonary embolisms. These were healthy children before the vaccine, but shortly after getting it they became ill and/ or died. The statistics are overwhelming. It is incomprehensible that anyone on the Board of Health is not aware of the number of severe adverse reactions and the enormous increase in deaths across the United States and other countries following Covid vaccine injections. The Truth is Out There .... if you want to look beyond the usual media news broadcasts and beyond the facebook, twitter comments.
4. These Covid vaccines are not typical vaccines that either protect a person against a virus, or lessen the effects of infection by the virus. They do not prevent a person from carrying the virus and spreading it to others.
5. There are protocols that are VERY effective in preventing and treating the virus and its variants. However, the government via Dr. Fauci has deemed it best to withhold the preventatives and treatments that work, in favor of vaccines and treatments that don't work. At some point there will be trails for Crimes Against Humanity and those who purposefully, or willfully went along with the 'killing mandates' will be tried and justice will be served. But until then, WE who are the parents and grandparents of these children that this mandate will affect, are at your mercy. I HOPE you are informed. I HOPE you have children too. I HOPE you are not afraid to stand up for all these children who cannot stand up for themselves. I HOPE you are independent and don't need the approval of your peers in order to feel good. I HOPE you are willing to be a champion, to stand alone. To do what is morally and ethically right. God be with you. And if you can't do this, God help you. There will be justice, either in this world or the next.
6. You should know that ALL the Covid vaccines do have graphene oxide nano-particles in them. Spanish research team's analysis of the impacts of graphene oxide nano-particles contained in the vial of the mRNA vaccine. The results of their analysis by electron microscopy and spectroscopy = Graphene oxide is a toxin which triggers thrombi and blood coagulation. It also has an impact on the immune system. Graphene oxide accumulated in the lungs can have devastating impacts. These are nanoparticles that get into the bloodstream and into every cell in your body, medical expert Jane Ruby explained. "These particles damage the cell membrane, the protective barrier of a cell. That's very dangerous," she warned. "We know about the pulmonary toxicity of engineered nanoparticles," says Andrew Maynard. Graphene also has electromagnetic properties which have been detected in people who have been vaccinated. These effects

have been amply documented and confirmed. (See the study conducted by the European Forum for Vaccine Vigilance) The graphene oxide nano-particles respond to the G-5 cell towers being erected all over the world. The effect is two-fold. At one frequency, the vaccinated person exhibits flu-like symptoms. The other G-5 frequency acts like a microwave on the particles (which are in every cell of the body after the vaccine is given) ... Not a pleasant thought. The Spanish research team's conclusion = we call upon the national health authorities of the 193 member states of the UN which are currently vaccinating their people, to conduct their own study and analysis of the vaccine vial. And if graphene-oxide is detected, the vaccination program should immediately be discontinued.

7. Last, on a parting note, if you aren't informed on Dr. Fauci, Bill Gates, and Klaus Schwab - please use the next few days/ hours to at least have some idea of the people you are supporting if you choose to vote yes to a vaccine mandate. Bill Gates - verbally stated he wants to reduce the world population by 2/3. Dr. Fauci had much more to do with developing the virus than your regular news media ever presented. Klaus Schwab has an agenda for the world where no one owns anything, but everyone is happy because they have medication for tranquility, people eat insects not meat, and vegetables are hybrids grown with Monsanto roundup providing the means for limited crop damage.

Thank you for your heartfelt consideration in this matter. Dona Cox

External Email

I strongly oppose COVID-19 vaccinations for children. It has been shown that COVID-19 vaccines cause myocarditis in male children and other serious side effects up to death. COVID-19 vaccination have shown to be in effective in the prevention of COVID-19 or the spread of it. There is no benefit and the potential for harm is too great to use an emergency use authorization vaccine and mandate it.

Subject: Vax in schools

External Email

Hello,

I'm sending you this email because I hear a vote will be casted, to implement a mandate for all children to be vaccinated against Covid, to attend school. As a parent, I do not agree with such a law, and nor do many families I have spoken with. While vaccination is right for some it is not right for all. To take away people's freedom to choose is unethical, and goes against the constitution. I believe each person has the right to their own body autonomy. Furthermore, healthcare should be a private matter that is between a person and their doctor. Government has no place in this area, and the precedent that this would set is very troubling. For all those reasons, I implore you to vote no on mandating a Covid vaccine to attend school.

Thank you,  
Natalie

Subject: Covid-19 Vaccination Mandate Proposal for Jan 12 Discussion

External Email

Dear Kaitlyn,

Please do not mandate the Covid-19 vaccine for K-12 school attendance! The newest variant of Covid-19 is milder, children aren't as affected by the virus, and the steps you have already taken (masks, social distancing, applying hand sanitizer 12 times per day (not an exaggeration for my daughter), etc) have done well to keep everyone safe and healthy while permitting in person school to continue.

Please do not make the Covid-19 vaccine a requirement for school attendance.

Sincerely,  
Nora Sedgwick

Subject: Leave our children alone!

External Email

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age.

Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters.

Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate.

Because children are not as effected from this virus (any variant) they are the answer to this so called pandemic. They probably all have natural immunity already and will pass that on to younger generations. Problem solved. LEAVE OUR CHILDREN ALONE!!!

Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

\*

HALT Immunization Criteria for Children of Washington State

\*

Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Sincerely,

Charlotte Pros

Subject: HELP

External Email

I would like to write our family's story in hopes that it crosses the desks and eyes of anyone who can be a catalyst in making changes to the current and possibly coming Covid related restrictions.

The restrictions, including but not limited to... mask mandates, vaccination discrimination, testing, etc... have greatly impacted all of us but most significantly have negatively affected my 4 children. What is sad and particularly disturbing about this is that they are the ones who are at the least risk of both contracting and being adversely reacted by the Covid virus itself, yet they are the ones who are paying the high price of being forced to comply with the restrictions at the most rigid level. This is beyond maddening and it needs to change!

I am angered by the unbelievable overreach those in public offices of authority in this State have been able to get away with on MY/OUR children. Never before in history has the government had the ability to override the choice of the parent for their children regarding how they are treated and what is required of them like it is now. As much as I'm angered, I am also terribly saddened by the anguish my kids have had to endure as a result of this overreach and mistreatment.

My oldest son was a 2020 graduate. Or should I say NON graduate (as he did not even have a ceremony) and that is supposed to be a momentous occasion in every young persons life that he/we will never get back. The impact that had on him was immense. The fact that he could not finish his Senior year with his classmates and participate in all that goes along with that, including sports seasons and social activities was devastating. He lost all drive and momentum and has not succeeded with online school (which was his only option here in WA after graduation.) He was never a candidate for online learning because of his learning disabilities and this took away his options. He has struggled to regain vision and purpose for his future, as many of his classmates have also reported, because they were so abruptly thrown into an uncertain future with rigid restrictions and fear being all they heard about.

Now, that being said, because so much was "unknown" in the year 2020, I can almost swallow those losses and choose to see how being "careful" was understandable, however much I completely disagreed with how it was handled.

However, here we are in 2022 and my other kids are being just as affected, only in different ways. I believe we deserve explanation for this and the realization that IT IS TIME TO STOP!

My second oldest son is a 2022 graduate. While it looks as though he MAY have a ceremony, although we all know by now not to count on anything because Covid is the end all-be all of excuses to cancel any event at any time, he has still been greatly impacted by these restrictions. He is a 4 sport athlete and his sports are his life. Having his Sophmore and part of his Junior years of sports either all together taken away or very limited and not at all as they were supposed to be as he knew it, has been devastating.

He has struggled with depression and needed counseling to help him recover. The insanity that is the "covid rules" for school sports, make absolutely no sense and have no consistency whatsoever. The anxiety over whether someone is going to "test" positive with completely unreliable rapid tests, whether a game or 2 games or several games will be cancelled, whether a runny nose could end his chances to go to State to compete, whether his teammates will be angry with him for getting sick, and the lists goes on and on...has been his reality for 2 years. It has taken him out at times and made him want to give up at times and if you knew him at all you would know that is NOT his nature. He has dealt with asthma his whole life and wearing a mask exacerbates breathing issues for him so you can just imagine how painful, frustrating and maddening it has been for him to constantly be made to wear one, especially WHILE PLAYING soccer and football his Junior year. Who in their right mind would continue to let politicians make such heinous, unhealthy decisions on behalf of our kids? Where is the common sense?

Next is my oldest daughter. She is currently a Sophomore and has yet to attend our districts high school for full time instruction. She has suffered from sever anxiety and the thought of masks all day every day made her decide to homeschool both last year and this one. She has been so distraught over this issue that for a while she wouldn't leave the house. She quit her beloved sport basketball after playing it for 5 years competitively on leagues with her goal of playing in high school because of the anxiety she had of re entering the Covid world at school and in sports. All the uncertainty and stress it brought completely took her out for a time and she isn't fully recovered yet. She has also received counseling and had thoughts of suicide. School should be considered a safe place for children. That's all we've been hearing about for 2 years. "Keep our schools safe." And yet BECAUSE of the restrictions and the prejudice that reigns supreme toward the unvaccinated at our high school, and most in the state of Washington, she does not feel safe there at all.

My last child, another daughter has also been negatively affected by this madness. She has a passion for the stage and performing arts and for over a year that avenue was cut off for her entirely and now that it is reinstated, the rules and mandates make it very unenjoyable. And again, the discrimination against the unvaxed to be forced to be masked while ACTING ??? is ridiculous. How can a child act without facial expressions or the ability for their voice to carry? She has chosen to be homeschooled as well until the stops.

As far as forced vaccinations are concerned, there is no way that this Mama, nor thousands of others, will allow that to EVER happen to our children to satisfy the sick need of the Governor and his co-horts to feel empowered. WE ARE THE PARENTS! WE get to decide what goes in our childrens bodies. And the fact that we would even have to defend this right is absurd.

You may think that because things have "improved" in the last year and the rules have "lessened slightly" that we should be grateful, however I'm here to tell you that "better" and "less restrictive" is no longer good enough. WE ARE DONE! We will not concede to tyranny any longer and we are fighting for our kids with everything we've got because they are worth it.

I will not go into the insanity of the ever changing Covid rules. They are ridiculous and everyone knows it. They have been proved faulty and outrageously counter productive for too long now.

One last thing in closing, our school, and I would go so far as to say every school in Washington, has some kind of anti-bullying policy in place. Ours it quite extensive. The fight against bullying and racism, prejudice and discrimination is supposedly as huge concern for most public schools. And yet, here we are with all the Covid restrictions causing more discrimination and bullying between students and teachers that EVER

before. The unvaxed kids are so discriminated against it's sickening. The lack of anonymity in knowing ones vaccine status is blatant. Every kid and every teacher knows which kids are unvaxed as they are sent to nurses offices to be tested several times a week to be able to participate in sports and other activities and are made to do things that make them uncomfortable on a regular basis for absolutely no good reason. Especially now that the CDC is admitting what we've known all along... EVERYONE call still spread it. So the blatant disregard for discretion in this area is mind boggling. These policies and restrictions that have been put in place by our governor and our public school officials are a threat to the mental, physical and psychological health of our youth. The threat is real and rising daily. Kids are worse off, not better, for the way this has all been handled.

Sincerely,

Bethany Grasley

As the father of 2 and grandfather of 7 let it be known that a vaccine mandate for children is equal to child abuse. The risk of adverse reaction is far greater than their risk from covid. We will pull our children from school before letting you touch our children. We the people will know who you are and will vote you out at our first chance. Stop with this insane AGENDA of yours and leave our children alone.

Kaitlyn,

Addressing concerns about COVID policies

I would like to address a myriad of issues related to COVID policies. In particular, I would like to address the extreme negative effects of prolonged compulsory masking, PCR testing, forced quarantining of nonsymptomatic students, and possible upcoming addition of the COVID gene therapy injections being added to the list of required immunizations to attend school. Students have been severely negatively impacted by covid policies. There is a lot of evidence of the negative psychological impact of covid measures.

Prolonged quarantine: Having a student quarantine for a prolonged period of time because of an exposure to another person who has tested positive for covid has been severely disruptive and created unnecessary distress. Social isolation and loneliness from prolonged quarantining of asymptomatic students has led to increased mental health issues of helplessness, worry, fear, irritability, anxiety, and depression. Chronic stress from prolonged quarantines can lead to physiological damage and disturbance. Students are now more susceptible to developing psychiatric disorders. "It was recently proposed that dysregulated neuroendocrine-immune interactions can be behind psychiatric manifestations observed in quarantined people" (Raony et al., 2020). Chronic stress can lead to responses in immune, endocrine, and nervous systems that increase inflammation in the brain which can predispose people to psychopathological conditions. Stress can trigger inflammation in the brain, leading to imbalance which leads to disorders that can include aggression, depression, anxiety, and psychosis (Jaing et al., 2018, Calcia et al., 2016; Ibi et al., 2008; Veenema, 2009).  
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7657035/>.

According to a large Israeli study, natural covid immunity is far better than immunity from the covid injection. <https://alethonews.com/2021/12/14/a-huge-israeli-study-shows-natural-covid-immunity-is-far-superior-to-the-vaccine-generated-kind/>. ; Never in my wildest dreams did I ever imagine one of my teens would experience discrimination by school staff.

There has also been a significant increase in adolescent drug abuse/overdoses, suicide risk/suicide due to distress from covid policies.  
<https://kart.com/story/3404009/adolescents-at-risk-in-drug-overdose-rise-during-covid-19-pandemic>. ; <https://pubmed.ncbi.nlm.nih.gov/34140390/>. ; I respectfully request that prolonged quarantining of asymptomatic students come to an end.

Masks: Currently all students and staff required to wear a mask to attend school may be struggling from a multitude of mental, emotional, and physical harms that result from compulsory mask wearing. People who have disabilities and past trauma can significantly struggle with wearing masks. Many who are subjected to compulsory mask wearing feel tormented and experience real suffering. Face masks are a severe burden for many people. Mask wearing can result in emotional harm and can severely impair communication. People rely heavily on facial expression to gain understanding, which is significantly lost when a mask is worn. The quality of social interactions can become impaired. Mask wearing can increase feelings of sadness, stress, and other negative emotions for many people. Compulsive masking can be emotionally abusive. Many people

feel deprived of personal autonomy. Many people feel demeaned. Forced masking violates many people's morality and values and free will. Forced masking can create a sense of helplessness. "Being at the mercy of the arbitrary and capricious whims of others can make a person feel a sense of helplessness, which is extremely stressful and grueling, and can eventually break a person mentally and emotionally, and is therefore a favored tactic used by tyrants to break the will of the population so that they are too broken to revolt (see Stalin's reign of terror). Masking is a form of bullying and forced coercion, and no one likes feeling bullied or having someone else's will forced on them. Students' mental and emotional health is being trampled on by forced masking. Forced masking breeds a sense of fear and increases a sense of instability, and is destructive to young people's sense of reality. Forced masking is extremely damaging psychologically, and is eroding a sense of confidence that there is a "baseline rationality in society-something that provides people with a sense of stability and security in life generally." Forced masking is destructive to young people's sense of humanity and dignity because people are being forced to act irrationally. Forced masking is completely dehumanizing. <https://brownstone.org/articles/facemasks-are-not-a-mere-inconvenience/>. ;

When a student wears a mask all day it can lead to many detrimental physical health issues, including alterations in blood chemistry, which if severe can lead to changes in level of consciousness according to Amesh A. Adelja, MD, and senior scholar at Johns Hopkins Center for Health Security in Maryland. Dr. Margarite Griesz-Brisson, MD, PhD in pharmacology, who specializes in neurotoxicology and environmental medicine, has warned that wearing a mask for a prolonged period of time leads to oxygen deprivation and can cause permanent neurological damage. "Masks can cause up to 5%-20% loss of oxygen which leads to hypercapnia excessive carbon dioxide in the bloodstream typically caused by inadequate respiration, panic attacks, vertigo, double vision, tinnitus, concentration issues, headaches, slowed reactions, seizures, alterations in blood chemistry, and suffocation due to air displacement. Senior scholar at John Hopkins Center for Health Security says wearing a mask for a prolonged period of time can alter blood chemistry. Breathing in too much exhaled carbon dioxide (CO<sub>2</sub>) may be life-threatening, according to experts at the National Institutes of Health (NIH). Symptoms of prolonged mask wearing can include headaches, drowsiness, dizziness, poor concentration, slower reaction time. The reason mask wearers don't recognize chronic damage occurring is because once a person has experienced chronic oxygen deprivation, symptoms tend to disappear as a person becomes accustomed to an oxygen deprived state. However, long term permanent neurological damage is still occurring. Children are at low risk for contracting and spreading COVID, thus it is completely ridiculous for students to be required to wear masks in school. The cost benefit ratio does not justify this ongoing policy. Long term negative effects to children's brains are at stake. <https://www.globalresearch.ca/odms-oxygen-deprivation-mask-syndrome-sweeping-across-globe/5764285>. Please do what is right for the kids and their young brains and unmask them immediately.

PCR testing: The policy of requiring healthy students to take a PCR test if exposed to someone with covid makes little sense and subjects students to unnecessary and potentially risky medical procedures. Some healthy athletes were required to test 2 times a week in order to participate in sports if they are not "vaccinated" this fall even though evidence shows "vaccinated students transmit covid too. Required testing of healthy asymptomatic "un-covid-vaccinated" athletes is the definition of madness and discriminatory. Recently the policy changed to testing healthy wrestlers 3 times a week regardless of "vaccination status," which eliminated the discrimination that was going on, however, the number of times my teens are being subjected to a risky medical procedure is of big concern. The PCR test does not determine if a person is sick. Symptoms of illness indicate that a person is ill with something. The PCR test doesn't demonstrate that the thing that you have is going to harm a person or that a person is going to become sick. Dr. Kary Mullis, inventor of the PCR test, argued against the use of PCR testing as a diagnostic tool for infectious diseases. <https://undercoverdc.com/2020/04/07/was-the-covid-19-test-meant-to-detect-a-virus?/>. ; It is quite likely that these PCR tests have been arbitrarily set at a number of cycles that rendered a large number of false positives, inflating the numbers which promoted

fear. When in our lifetime have we labeled healthy people sick? Where is the evidence and studies demonstrating that healthy people are spreading illness? On December 31st, 2021, the CDC withdrew PCR testing for Covid admitting there is no way to differentiate between flu and COVID. This explains the mysterious disappearance of the flu in 2020. These tests were recalled 6 months ago, yet the schools continued using them. The PCR test amplifies genetic material. "What they do is they take some kind of a continuum and they arbitrarily say this point is the difference between positive and negative. If it is tested at 20 cycles, everyone is negative, if 50 cycles, everyone is positive, so the cycles can be changed and manipulated by the labs doing the testing" Dr. Kary Mullis, biochemist, PCR test inventor, who passed away in August of 2019, said "you can find anything in anybody... if you can amplify one single molecule up to something, you can really measure, which PCR can do, there is just very few molecules that you can have one of in your body so that can be thought of as a misuse of it to claim that it is meaningful." <https://m.youtube.com/watch?v=rXm9kA>. ; Now there will be a switch to several new EUA tests. And we are expected to believe these are going to be effective... Sorry, I personally am just not that gullible. For two years this pandemic has been PCR test driven and the data was falsified by faulty PCR testing. It makes zero sense to continue to trust the powers that be, to believe that now they have a reliable way of testing for COVID when they have just admitted the past two years have been driven by faulty PCR testing. <https://thetruedefender.com/CDC> ; There has been widespread concern that PCT tests have ethylene oxide on the swabs, which can cause cancer. <https://www.cancer.gov/about-cancer/causes-prevention/risk/substances/ethylene-oxide>

An analysis of the test swabs of COVID PCR tests by a hospital in Slovakia resulted in some disturbing evidence of the presence of Hydrogel, and Lithium, and hollow nylon fibers on the swabs. Hydrogel balls at the back of the nasal cavity mix form rectangular crystal structures that grow and multiply, damage red blood cells, and form blood clots. <https://truth11.com/2021/04/30/an-analysis-of-test-sticks-from-covid-pcr-test-by-a-hospital-in-slovakia-confirms-genocide-pdf/>. ; I respectfully request an end to COVID testing requirements.

Experimental COVID gene therapy injections: I have recently been made aware that currently an advisory committee has been created to vote on a recommendation to add COVID injections to the required list of immunizations for school attendance in Washington state. I attended the first committee meeting, and to my dismay, the committee was not taking comments from the public. After attending the meeting, and seeing the "VaccinateWA, COVID vaccination" sign next to one of the men, and listening to several comments from the others, it was apparent these committee members lean in favor of requiring students to receive the COVID injections. I fully expect this committee to vote in favor of a recommendation to the SBOH requiring COVID injections for school attendance.

All three current COVID injections are experimental gene therapies, not vaccines. The COVID gene modification injections permanently change human genetic material, cause infertility, cancer, birth defects, and more. VAERS through 12/24,21: 1,000,227 adverse events reported. 21,002 deaths, 110,609 hospitalizations, 109,245 urgent care, 156,456 doctor office visits, 8,673 anaphylaxis, 12,532 Bell's palsy, 22,117 3,435 miscarriages, 10,640 heart attacks, 22,117 myocarditis/pericarditis, 35,650 permanently disabled, 5,011 Thrombocytopenia/low Platelet, 23,892 life threatening, 36,492 severe allergic reaction, and 11,462 shingles. <https://openvaers.com/covid-data>. ; Based on these numbers, the COVID injection roll out should have been stopped a long time ago. And these are just the adverse events reported, under-reporting is a major issue. Additionally I have seen many alarming videos of athletes dropping suddenly with heart symptoms in the past year. Athletes that were required to receive the COVID injection in order to participate. Check out a link to VAERS to view individual VAERS records which include the recorded deaths of children following COVID injections.

<https://medalerts.org/vaersdb/findfield.php?medalerts.org/vaersdb/findfield.php?IDNUMBER=1576798> . I have watched numerous videos of athletes collapsing during sporting events. One article reported counting 395 athletes collapsing, 231 dead, last year around the world.

All athletes were required to get the COVID injection to participate. <https://goodsciencing.com/covid/athletes-suffer-cardiac-arrest-die-after-covid-shot/>. According to Dr. Jane Ruby, ( Dr. Jane Ruby's sworn affidavit) the COVID gene modification injections are under EUA, not approved by the FDA, therefore consent should not be coerced or required. The only recently approved injection is Cominarty, and it is currently not available in the US. The COVID shots are considered "genetic vaccines" which should be under a fifteen-year regulatory cycle with annual visits for safety evaluation by the researchers according to the FDA. We do not know the long term effects of these gene therapies, and it will take a long time before we do. Additionally, these gene modification injections should not be offered without proper consent and proper follow up. Unfortunately the FDA and CDC are not offering follow up methods to assess risk of serious adverse side effects. No one should be pressured or coerced to receive these COVID injections. <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/long-term-follow-up-after-administration-human-gene-therapy-products>. ; Informed consent to be injected with these gene modification therapies must be attained, however the package insert is blank, and there has not been full disclosure as to what is in the injections. The manufacturers do not include study results for safety that would adequately inform persons being injected (again, package insert is blank). Those who have been injected with the COVID gene modification injections have essentially become part of the world's largest experiment. Phase trials are being run concurrently rather than consecutively which is a questionable procedure. On June 24, 2021 the CDC announced there might be a link between the COVID vaccines and myocarditis. <https://www.advisory.com/daily-briefing/2021/06/24/heart-inflammation>. ; On July 12, 2021, the FDA warned about Guillain-Barre Syndrome or ascending paralysis for J&J vaccine. <https://www.fda.gov/media/150723/download>. ; The FDA issued a warning for teenagers, particularly boys experiencing higher rates of heart inflammation and heart failure. It is of concern that the reported rates of heart injury, blood clots, strokes, teen heart attacks, paralysis, permanent motor impairment are not listed as possible side effects on the label. Dr. Philippe VanWelbergen, Dr. Barbel Ghitalla, and others have reported on "COVID injection side effects, and yet this information is not disclosed on the label. Dr. Robert Young recently discovered evidence of nanoparticles of bismuth, titanium, vanadium, iron, copper, silicon, aluminum, steel aggregations, graphene oxide, and lethal parasites embedded in vials of Pfizer, Moderna, Johnsons & Johnson, and AstraZeneca when he put the contents of the vials under visual microscopy. <https://www.drrobertyoung.com/post/transmission-electron-microscopy-reveals-graphene-oxide-in-covid-19-vaccines>. ; Dr. Jane Ruby points out that the COVID shots are particularly risky for 12-29 year olds. "Heart failure has a five-year 50% survival and would markedly reduce the lifespan of a child or young adult who develops this complication after vaccine-induced myocarditis" (McCullough PA, Philbin EF, Spertus JA, Kaatz A, Sandberg KR, Weaver WD; Resource Utilization Among Congestive Heart Failure (REACH) study).

A quote from the American Heart Association: "We conclude that the mRNA vaccines dramatically increase inflammation on the endothelium and T Cell infiltration of cardiac muscle and may account for the observations of increased thrombosis. Cardiomyopathy, and other vascular events following vaccination."

[https://www.ahajournals.org/doi/10.1161/circ.144suppl\\_1.10712](https://www.ahajournals.org/doi/10.1161/circ.144suppl_1.10712). ;

A viral gene is injected into the cells which forces the body to make toxic spike proteins. These proteins often cause permanent damage in organs. Damage can occur to the brain, nervous system, heart and blood vessels, reproductive system, and immune system. Blood clots are a common adverse effect. Damages that occur are irreparable and irreversible. Children are not a danger to their parents or grandparents. The risk-benefit analysis shows these shots are high risk with low benefit. ADE (antibody dependent enhancement) is a concerning side effect of the covid injections. Sycharit Bhakdi, MD and Arne Burkardt, MD presented at the Doctors for COVID Ethics symposium on 12/10/21, calling for an immediate stop of the use of gene-based COVID-19 injections. They demonstrate that the COVID injections do not protect against COVID infection, and there are no positive effects, instead, the "vaccines can then trigger self-destructive processes that lead to debilitating illness and death." They say the

breakthrough infections among covid injected persons are confirmation of the problems with the covid injections. They describe how the covid injections cause cells to express a spike protein, then the cell comes under attack by the immune system, occurring in major organs in the body, which can lead to myocarditis, cardiac arrest, and death. They reported evidence of vaccine-induced autoimmune-like pathology in multiple organs of persons who passed away as a result of vaccine injuries.

<https://doctors4covidethics.org/on-covid-vaccines-why-they-cannot-work-and-irrefutable-evidence-of-their-causative-role-in-deaths-after-vaccination/>. ;

Many scientists and doctors around the world are currently, speaking out about the dangers of these COVID injections at great risk to their reputations, livelihoods, and licenses. These doctors and scientists are being censored for raising concerns about the COVID injections. In short, msm has been promoting these COVID injections as "safe and effective" at nauseum, however, I am of the belief that in actuality, these COVID injections are unnecessarily risky for students and provide low benefit. Those who receive a covid injection have become part of the largest experiment in world history, and I believe that should remain a personal choice. Students should be allowed to choose whether or not to subject themselves to a gene modification therapy that appears to be high risk for many severe adverse reactions, including death. I would like to request Mead school district resist and refuse to comply with requiring COVID injections.

In conclusion, I am observing a lack of regard for the health and well being for students under current covid guidelines recommended by the CDC and local health departments. Current covid policies are causing students more harm than good, and I fear the psychological and physical damage will have long term lasting negative effects. It is time to do what is right by students and stop these coercive dehumanizing measures. To continue these measures is to be complicit in the harm of children and adolescents. There are many doctors who have found successful treatments for covid. Covid is treatable. Children and adolescents are at low risk. These coercive, dehumanizing, and discriminatory policies are not necessary and need to be stopped immediately.

- Katrina Mason

Subject: NO vax mandate for K-12

External Email

To whom it may concern, from one whom it concerns greatly --

Please do not mandate COVID vaccinations for students in WA state K-12.

- \* Children are not the demographic that suffers from concerningly severe illness generally.
- \* Unvaccinated children are at lower risk than even vaccinated adults from severe illness or death.
- \* Vaccinated adults do not stop the spread of the disease. Covid mRNA Vaccines are not a tool for decreasing transmission in any way: Vaccinated and non-vaccinated infected individuals have the "same amount of viral load" detected in the nasopharynx -- that's from Dr. Fauci.
- \* The illness is diminishing in severity anyway, as omicron spreads mildly and quickly. We should not make permanent policy for a temporary issue that is changing rapidly.
- \* Children, boys specifically, are at greater risk of health and heart complications FROM the vaccine and subsequent injections than from the actual covid illness. My son should not have to wonder if his heart can handle such an injection.
- \* There are NO long-term studies on this vaccine therapy for children and so we should not be hasty in playing medical guessing games with an entire generation of people. It is criminal to use the bodies of our youth for such an experiment by way of mandates.
- \* Many many families have already experienced COVID and have naturally occurring antibodies that have as good or better protection, possibly lifetime protection against reinfection [better than the vax track record] or else protection against severe disease subsequently.
- \* Anyone who wants to be vaccinated and protected can be -- they will not lose any benefit of their vaccine therapy by being around any other sort of person, assuming the vaccine is as effective as advertised initially in lowering risk of severe illness and death.
- \* If the vaccine is demonstrably effective and beneficial, let families and doctors decide which individuals benefit from added protection. Voluntary and personal and private.
- \* AND IF the vaccine IS NOT EFFECTIVE enough, why would we mandate a faulty product?
- \* If there is any risk of injuring an otherwise healthy youth, WHY would we mandate it? Will the state assume all risk of injury or death, and compensate accordingly? No. All the risk falls to the individual, in body or in lifestyle, to absorb the consequences of someone else's decision to force a medical procedure that is unnecessary for this age group's risk, and ineffective, socially, at inhibiting viral spread.

Respectfully, these are some of many reasons why it is unwise, unnecessary, ineffective, and morally dubious to institute a covid vaccine requirement for students.

Subject: Medical freedom to choose

External Email

Hello,

I am a dedicated elementary teacher and mom of two school aged kids who looks at the hard data and current research regarding children, how naturally acquired Covid affects them.

I believe that the School District, School Boards, Superintendent of Public Instruction, and our own Washington State Governor do not have the right give medical advise or make medical treatments mandatory to receive an education in the Public School System. I also believe (agencies listed above) do not have the right to tell parents how to medically treat or not treat their own children. I believe in medical freedom, freedom to choose what we put into our own bodies and into our children's bodies.

I work with children every day and work to keep them safe and healthy by following the safety protocols that have been put into place, we are seeing COVID numbers but they are not getting it from each other and have robust immune system's.

I am asking you to honor your position and uphold the oath that you took to serve and do what is right and allow people to make their own medical decisions for themselves and their children. Please do NOT vote in mandating the Covid 19 vaccination for children to attend school. Whether or not children get this vaccination should be a decision made between the parents and the pediatricians that are serving the children.

Respectfully,  
A concerned Citizen

External Email

I am writing this to ask you to please not mandate the Covid-19 vaccinations for school-age children, up through high school. It is clear that anyone, vaccinated or not, can catch and spread Covid-19. Because of this, it should be up to parents to decide if their children will be vaccinated or not. I also have extreme concern about the occurrence of myocardial issues, especially in teenage boys/young men. There is health risk whether you get the vaccinations or not. Please let parents and children maintain their current rights to decide what medical treatments they do or do not get.

Thank you,

Melaine Minson

To everyone involved in the discussion of vaccine for school age children

I strongly oppose requiring the coronavirus vaccine for school age children. This should be a parent's choice, not forced. Children have strong immune systems and science shows that children are very low risk for serious illness and death if infected.

Please vote NO on this vaccine for children.

Thank you

Subject: Vaccine Requirement For School Age Children

External Email

To put it simply:

1. It is illegal to require an experimental vaccine.
2. Children are being damaged or killed by the Covid vaccine
3. You will be held personally liable and accountable for each and every child adversely affected by this vaccine.
4. The FDA is not willing to release their findings on the Covid Vaccine for 75 years – any guess why that would be?

I could fill this page with links to supporting statistics and data available proving the Covid 'vaccine' is not safe. You should be aware of all of this information. If not, you need to immediately step down from your position.

Sincerely,  
Nancie Thorne

Subject: Please DO NOT Require COVID 19 Vaccination for School Aged Children

External Email

To Whom It May Concern,

I Understand that you may have a meeting this week in which you will discuss making the Covid Vaccine a requirement for school aged children. I urge you to consider that parents are and have been making very informed decisions about their children's health and well being well being for many years. I am one of these parents. I have done a lot of research related to a number of medical choices for my 4 children over the 8 years of being a parent. I am their mother and I take my job very seriously. I do NOT make decisions lightly when it involves anything about my children – I respect other parents and their decisions and what is right for their children. I will not and do not respect forced medical decisions on any person let alone on young children. I will not be giving my children the Covid vaccine until there is long term (minimum 5 years) studies on the effects it may have on their systems. I will pull them from public school and will consider moving out of state if this is the direction that the Washington school system decides to go. I urge you to give our children the option and respect that parents like me are doing the best for our children, keeping them safe and healthy. We are protecting them and that is our job – now do yours! Your job is NOT to make medical decisions for my child. If a parent wants to choose this route for their children let them and both vaccinated and unvaccinated children can attend school happily together.

Thank you for considering. I pray you make a very educated and heartfelt decision when considering the number of children that will be pulled from programs as a result of this decision. Mine included. I know my kiddos will be fine regardless of the decision you make, but that is not the same for all the kids. They deserve the right to a good public education and should not have to risk their medical freedom for that.

Sincerely,

Amanda Cardwell

I write to strongly oppose the contemplated vaccine mandates for school-age children. This experimental gene-therapy is being pushed out by the pharmaceutical companies and given approval, because "how can we find out if is safe unless we try it out?" Instead of carefully collecting reports of adverse events, these drugs are being discounted and disregarded, because we are told the vaccine is "safe and effective." There is little risk of danger of COVID in this population, and documented risks from the vaccine. This is clear governmental overreach and must stop.

Washington State Board of Health Members,

Thank you for the opportunity to allow me to share my concerns regarding the COVID 19 vaccine requirement for school aged children.

By now I am sure you have heard all the arguments and opinions from other parents and concerned citizens, as well as those from the medical field.

The main issue is that younger children do not have any where near the risk factor of adults if they contract Covid, and recovering naturally from being sick will benefit the natural immune system. Also the fact that the VACCINE HAS COMPLETELY FAILED to stop people from getting sick or transmitting, should be the #1 factor from making this a mandatory requirement.

There is no doubt that the vaccine is a profiteering venture, and a political tool. DO NOT USE OUR CHILDREN AS POLITICAL TOOLS!

This is a slippery slope, and will push many people to a point of doing things they would otherwise not do, because it violates so many fundamental rights and beliefs of individuals.

Forcing a mandate for children will only further create stress and division amongst the people of this state.

On the other hand, not making it required will hurt nobody! If a family or individual wants it, they can get it.

America is based on freedom of choice, and that should remain a fundamental right!

Subject: Don't Support Vax Mandate for Kids

External Email

Good Evening,

I am writing to you tonight to let you know my family and I oppose a vaccination mandate on our children. This should be a choice until the vaccine has been proven to be successful and not harmful with proper testing in due time. It is much too soon to make this call. I am a mom to three girls, 7, 5, and 1 and struggled with infertility. With the data coming in that shows this vaccine attacks the ovaries and could cause infertility I would NEVER in my right mind willing give this to them. I would never willing risk causing them harm and will NOT be vaccinating them until more time has passed in the testing. I am not anti-vax as we have all the others. I am against any form of a mandate and will be tuning in via zoom on Friday to hear from you.

Thank you for listening.

Thank you for taking the time to hear my plea. Please reconsider any COVID vaccine requirements for school aged children. If you've been paying any attention to the truth, the children are at less risk getting it and you're willing to subject them to a trial vaccine that everyday is being found less effective than promised. The side effects from these so called vaccines are a greater risk than actually being infected. We are in a world-wide vaccine trial. Don't be on the wrong side of history. Don't compromise the health and future of these children. I can't imagine any amount of funding is worth it. Reconsider!!!  
Sincerely,

A concerned mother.

Subject: Covid-19 Vaccination Requirement for School Children

External Email

Dear Ms. Donahoe:

I wanted to take the time to let you know my thoughts and feelings regarding the Board's consideration of the Covid shot requirement for school-aged children. It is baffling to me what has been happening to our rights in regard to the medical field since Covid has arisen. I am truly shocked that the medical field is allowed to be so "pushy" (which is putting it lightly) into individuals' lives in the name of medical safety. These decisions should be left between the patient and their doctor without any monetary incentive to "vaccinate" or encourage one to "vaccinate for Covid" from outside sources (the government). Money corrupts people. There has been much controversial information from the beginning, namely the fact that this "vaccine" is the only answer to Covid when in the beginning Hydroxychloroquine and recently Ivermectin have been shown to reduce hospitalization due to Covid-19. However, this information is being suppressed while the "vaccine" is being touted as the only answer to Covid. Meanwhile "vaccinated" people are STILL getting Covid...and spreading it, and creating mutations. It seems that the CDC, WHO, and FDA are leading medical doctors off the bridge, and the doctors are following. Covid is known to be 99% plus survivable, and the risk or death in children is minimal if at all. A lot of children have probably already had Covid-19 by now. And, why is no one even recognizing natural immunity? In regard to the "vaccine," I am not aware of any long term studies that have been done on children, and if there are, they are at best less than 2 years old, so how would anyone know if the "vaccine" is safe for children? I hope you do not put this vaccination on the schedule of immunizations required for school children. If you do, please email me a link to the studies that were used in making this decision. We are depending on you to make the right decision for our children at this time. Remember, Covid-19 is not life-threatening to children. This decision should not be made by an agency, but by parents and their children's doctors. Thank you for what you do, but we do not need the Governor, OSPI, the BOH, the CDC, the FDA, or the WHO to save our lives. Frankly, I have lost faith in much of the medical community. Thank you for your time.

Sincerely,

Kim Yant

How many deaths are too many for Covid vaccines to continue? Is there a threshold? That answer appears to be no. Most new drugs have a limit. 5 unexplained deaths = black box warning. 50 unexplained deaths the drug is pulled. Not so with these experimental vaccines. Unprecedented THOUSANDS OF DEATHS yet the Covid vaccines continue, not only continue but are pushed by government 'for the good of the people'.

Now you are tasked with mandating this experimental gene engineering non biologic shot for our children with absolutely no long term safety data and ignored evidence of harm in the short term. You cannot possibly know it is "safe". You can know it is NOT that effective as many people who accepted vaccination seem to have Covid19 right now. So you are considering a failed vaccine which may cause harm for students who are not at risk due to Covid19? What am I missing? Why would you do this?

This shot cannot be mandatory for school. Fully vaccinated military ships and cruise ships still have Covid infections. The shot does NOT stop transmission. The shot does NOT stop infection. So now it's marketed as lessening symptoms WHICH CHILDREN ALREADY ENJOY. Children do not get very ill. The only Covid deaths in kids have been associated with serious chronic conditions.

There is far too much unknown about these novel therapies. Its much too soon to be declaring them safe for our precious children who are our future. Please. Please stand up and declare our children off limits. NO COVID VACCINE MANDATE FOR OUR CHILDREN.

Subject: Covid Shots for kids & Forced Isolation and Quarantine

External Email

Hello,

These two policies are UNCONSTITUTIONAL .

It is a parent's choice as to whether their child should get the shot or not.

Forced isolation and quarantine is so wrong on many levels, the world is trying to move away from the era of Adolf Hitler. Please allow people to exercise their God given freedom.

Thank you,

Serah N

Subject: (public comment) to the WA State health Board about considering requiring the COVID vaccines for school age children

External Email

I am writing to you to state that you should NOT consider mandating any of the COVID vaccines to our school age children.

All of these "vaccines" are still under Emergency use authorization - so you can't and shall not mandate it. I believe the state can and would be held liable if they mandate these vaccines and then it resulted in a serious health issue(s) or death - because you would be requiring it. As you know, under EUA, you can't sue the vaccine manufacturer, so the schools/state are therefore incurring all the risk.

NOTE the vaccinations aren't working like other vaccinations do. People are still getting COVID, including the boosted, so it's basically stupid to even try to mandate it. Covid isn't a threat to Kids' health and never has been. The vaccine however, does show that there is a very real threat to kids and their hearts (myocardium) at an alarming rate.

You will just see many students and families leaving the area, which will result in less funding, less teaching jobs, etc. It's not a smart move. Also, note, if you are paying attention the variants are getting more transmissible and less dangerous, so the current variant of "Omicron" is playing out to be a bad cold, which is very easy to recover from.

My husband and I are totally against the covid vaccine, and booster for a requirement for children to attend school. We have grandchildren, and great grandchildren in school even with the vaccines children are still get the Covid, and variants. This should be a parent's decision, not the Government. No one can tell you what the long term affects will be.

As a mother of 5 school aged children, I do not support mandating vaccines that have not gone through all phases of testing. A vaccine authorized for emergency use that poses a higher risk to children than the disease itself should not be required to attend public school. If the vaccine is required, I will have no other choice but to remove my children from the WA state public school system.

Respectfully,  
Felicia McNew

I do not support adding Covid 19 to Chapter 246-105.

The long term effects of the EUA Covid vaccines are unknown. We know the risk of the virus to our kids is extremely low. The risk analysis is simple. The risk to Use the EUA vaccines on my kids is unknown, and the risk of Covid to them is minuscule.

Without trials being completed and the risk analysis showing an advantage to my kids, I won't be allowing my children to receive a Covid vaccine.

Additionally, it is extremely disconcerting to learn that federal regulators were able to approve EUAs within months, but are saying they need over a half century (50 years?!?!) to share the trial data publicly. Seriously? How could they move to approve an EUA so swiftly and then say they can't produce the same info they reviewed to make that decision in less than 50 years? This is ridiculous and I can't imagine the WSBOH wanting to force so many unknowns on our youth.

Thank You,  
Andy

Written Notice of Liability for Washington State Board of Health

Notice to Agents is Notice to Principals; Notice to Principals is Notice to Agents

Good Day,

I would like to emphasize that I am your neighbor. I bear you no ill will and presume you are all decent, well-intentioned people.

Every policy that you have enacted or enabled under the guise of COVID-19 that denies people - living men, women, boy and girls - equal access to public accommodations unless they submit to long-term wearing of masks, invasive diagnostic testing, or injections of gene-modification therapies is unlawful.

First, people are divine creations and are only bound by divine law, not by man's law. The first sentence of the first law of this country, the Declaration of Independence, states this clearly: "Men [and women] are endowed by their Creator with unalienable rights." These are absolute and unconditional. What is given by our Creator cannot be taken away by you. The supreme court has upheld this countless times. Your coercive policies violate our unalienable rights under the pretense of law.

Second, all three of these policies involve medical procedures. In 1947 civilized society declared in Article 1 of the Nuremberg Code that this type of coercion is everywhere and always a crime against humanity.

Policies relating to COVID-19 and Pierce County Resolution No. R2021-224 are violations of the 1st, 4th, 5th, and 9th Articles of the Bill of Rights and are by definition Rape, Bodily Invasion, Abduction, Abuse, Molestation and Maltreatment at the very least.

This is a betrayal of your allegiance to the Constitution for the united States of America, and thus to us, it's beneficiaries. Your polices, therefore, are a breach of fiduciary duty and treason.

You have not been granted permission to pass such mandates as proposed.

I do not grant you permission to proceed with passing such mandates.

If you do not comply with this cease and desist direction, I will hold each and every one of you accountable for these deprivations of rights, crimes against humanity, and treason.

Please understand that I have every remedy available to me.

Your individual liability is unlimited.

You have now been offered lawful Notice of due process.

alissa-karin:ray-keough, sui juris

Subject: Opposition to vaccine mandates for children

External Email

I am writing to inform the Board of Health that I oppose any expansion of WAC 246-100, I oppose adding COVID-19 to the WAC 246-105-030 list of vaccinations required for children, and I oppose the proposed modification to Local Boards of Health, as proposed in WAC 246-90.

Specifically on the Opposition to Expansion or Enforcement of WAC 246-100; I oppose any Board's strengthening or expansion of WAC 246-100, specifically WAC 246-100-040, Procedures for Isolation or Quarantine as such restraints violate the US and State of Washington Constitutions and violate personal liberties. The fact that you are even contemplating changes that are not constitutional in our state, in our country, is incomprehensible; that should be obvious, right?

Even more strongly I oppose adding COVID-19 to WAC 246-105. Vaccinating against an endemic flu-like virus is an individual and parental decision - it is a personal liberty to say 'yes' or 'no'. Especially given that the current EUA'ed vaccines' effectiveness remains questionable, at best, with clear evidence of risk with vaccinating children. For instance, VAERS data indicates nearly 28,000 adverse events for children aged 0-17, (<https://medalerts.org/vaersdb/findfield.php?TABLE=ON...>), including 55 deaths in that age group (<https://medalerts.org/vaersdb/findfield.php?TABLE=ON...>).

In context the United States has experienced 823 deaths within the 0-18 year old category in US since the onset of the pandemic (<https://data.cdc.gov/.../Provisional-COVID-19.../nr4s-juj3>).

There is no clear indication that the EUA'ed COVID-19 vaccines will do more good than harm for the children of Washington. Further, this proposed Rule raises the question that if minors are harmed from the COVID-19 vaccine, who will take responsibility? Are you willing to be personally liable for any injured minors? Are you willing to bet the hard-earned money of the constituents of Washington to fund liability/compensation funds? I oppose adding COVID-19 to WAC 246-105-030 (or any other section of WAC 296-105) or requiring COVID-19 vaccine for children.

Please reconsider making this mandatory for our children.

Sincerely,  
Amy VanWerven

I am strongly opposed to adding covid vaccine for children to the WAC-246-105-030

Covid vaccines remain under emergency use authorization and the rules that apply to that status Children under 18 yr have extremely low clinical risk from covid infection Children have a much higher risk of adverse event to the vaccine- including life long health issues Research supporting child vaccinations safety is flawed by the methods used to collect it Covid vaccines do NOT prevent getting it or transmitting it

DO NOT subject our children's health to a failed vaccine and the future unknown risks it may cause

Informed Consent is required by law.

There are 95000 videos about vaccines, but here is one...

More Harm Than Good

The Pfizer Inoculations For Covid-19

Canadian Covid Care Alliance

<https://www.bitchute.com/video/RaQkNEzpAdQo/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bitchute.com%2Fvideo%2FRaQkNEzpAdQo/>>

Sars-Cov-2 has never been isolated - no proof exists, 25 countries, 139 institutions+  
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fluoridefreepeel.ca%2Ffois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cef3da66d81904fbe2e0708d9d20ccc42>>

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will.  
Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Russell Green

Hello,

I am a Washington State resident and have been made aware of the proposed policies to be presented on January 12th.

I am writing to register my horror and emphatic opposition to both mandated vaccines for school attendance and involuntary placement in quarantine camps for those who resist complying with unconstitutional medical interventions which are experimental in nature.

The loss of bodily autonomy is a very serious thing and to this point has been relegated to communist, socialist and Marxist regimes, not free republics.

I strongly urge you to consider what the enforcement of these WAC codes would mean for our free society. Because Covid-19 is a treatable and low risk illness for most individuals - especially children, these actions would be absolutely unnecessary and contrary to our state and federal constitutions, resulting in the loss of freedom for countless individuals.

Please think carefully about what this would mean for you and your family should these be enacted. This could potentially be the beginning of more severe measures - think involuntary sterilization, and involuntary experimentation on humans, all of which is prohibited by the Nuremberg Code. Bodily autonomy is guaranteed by said Code, and these WAC codes take away that God-given right, also guaranteed to us by our constitutions.

Respectfully submitted,

Cassie Townsend

First, I would like to point out that mandating EUA vaccines is against the EUA approval which specifically required individuals to have "available alternatives and option to refuse vaccination". Refer to the slide from the Pfizer FDA Vaccination and Related Biological Products Advisory Committee slide show presentation from December of 2020. What's most concerning about this is the Washington State Department of Health Secretary did not inform the Governor of Washington State of this when he mandated back in August of 2021. This leads me to believe that that Umair Shah and his staff are negligent in their professional transgressions and is a cause for worry of governmental corruption. If I'm able to logically deduce this violation, THEY sure should have as well, which means if they did, they CHOSE not to say anything and if they didn't, they aren't that great at their job, which calls for impeachment and recall. A pandemic cannot be used to usher in certain protocols, while ignoring others. A pandemic is a pandemic; it's either ALL pandemic or NO pandemic, you don't pick and choose what's best for government and globalist entities during a pandemic, while ignoring what's best for the people during a pandemic.

Second, the issuance of an EUA can be revoked for the following reasons. What applies in this situation is the fact that the "criteria for issuance is no longer being met", i.e. you cannot mandate EUA approved biologics because that means the criteria for the EUA, "available alternatives and option to refuse vaccination" is no longer being met. Additionally, other circumstances that warrant changes necessary to protect public health or safety, i.e. "vaccine safety or effectiveness", "vaccine manufacturing or quality" are also being questioned. The problem is, the Washington State Department of Health is being really vague and frankly, really sketchy, on safety, effectiveness and manufacturing quality, considering the FDA just got ORDERED to release 55,000 pages of data per month starting in March, on top of the 35,000 pages they have to submit by the end of this month. Now Washington State Department of Health has the nerve to attempt to mandate these biological agents on our children, and no one will be liable for any damages and/or injuries caused by the biological agent.

The fact that the Washington State Department of Health think it's so omnipotent in its governing that it can disregarding FDA guidelines and standards is an incredulous attempt at government overreach and to impose that incredulous government overreach upon our children is beyond any level of tyranny that even James Madison could have

envisioned.

Third, I had to submit a FOIA request for adverse events and deaths data from the Washington State Department of Health (WSDH) because when I took Sue Birch's advice to "Find a trusted person, talk to people, get the latest data, the research, the facts...", however, upon consulting physicians, I found that physicians don't know anything about the biological agent; in fact, Dr. Dan Getz,, Chief Medical Officer for Providence Health and Services in Washington State didn't even know Pfizer put Methylpseudourine in their biological agent. This is actually rather worrisome that physicians, during a state of emergency and a pandemic, are depending on a new technological biological agent manufactured and distributed by corporations who have paid out billions in damages for harming individuals and they didn't think it was necessary to read the trial information???? Great job at fostering trust in the medical community. Despite that, apparently its socially unacceptable by the government and medical licensing agencies to have physicians speak ill on the biological agent. How are we to get accurate information if the doctors won't even go over adverse effects and deaths. That sounds like the opposite of informed consent and a lot like tyrannical collusion.

Also, for some reason, not one single individual in the entire WSDH thought it was a great idea to notify the public of adverse event and death information. In all the press conferences and other vaccine videos on the WSDH YouTube website, there is no mention of any adverse events, deaths nor anything that could even hint there might be an issue with any of the biological agents and to be completely frank, the YouTube account video's appear as if the pharmaceutical companies have bought out our Health Department and it's agents and have created one of the biggest marketing and propaganda sites I've ever seen.

To quote John McCain "excessive administrative secrecy...feeds conspiracy theories and reduces the public's confidence in the government." The WSDH has done an amazing and stellar job of feeding conspiracy theories and reducing confidence in the government, while doing a horrible and deplorable job of advising the citizenry on "health". The sad part is, I'm not finished yet.

Fourth, The CDC defines immunity as "protection from an infectious disease. If you are immune to disease, you can be exposed to it without being infected." The WHO defines immunity as "A simple, safe and effective way of protecting you against harmful diseases, before you come into contact with them." Rachel Walensky has specifically stated these biological agents don't prevent you from being infected and the vaccinated are asymptomatic spreaders. Are we just going to pretend we don't see this as an effort to get the pharmaceutical company as much profit as possible? Or am I the only logically deductive individual in this state? If it doesn't protect me and I can still spread it and I can still even be hospitalized and die, why would I inject a new biological agent into my body when the FDA says it "still remains investigational" throughout the EUA. We won't go into the Great American Privilege of "It didn't affect me, so it can't be true" motto that Americans feel entitled to.

Fifth, Lets discuss the fact that not one person who has a medical degree in this entire nation can say they know for a fact these vaccines are absolutely, unequivocally safe and

effective, while they talk out of the other side of their mouth saying there are expected side effects. Let's be perfectly clear; there is no DRUG that is safe and effective and saying that repeatedly is pathetically naive. Additionally, the fact that not one person from WSDH has not mentioned anything regarding adverse events and deaths is a serious misrepresentation of the biological agent. I had to submit a FOIA because I scheduled an appointment to get the vaccine and that same day, I just so happened to review the propaganda on WSDH YouTube site and found a video with Sue Birch, on August 26, 2021, saying "...It's a small sacrifice to make sure we all stay healthy and get back to our normal lives...". I immediately questioned what the "sacrifice" was, but a logical, intellectual, self-thinking individual knows this statement clearly indicates the WSHD knows that taking this vaccine may give you serious adverse reactions and death, and as individuals, we need to decide to make that "sacrifice" in order to "stay healthy and get back to normal lives". Sure, we'll pretend that makes sense because that's what the "experts" say. This kind of information makes the experts look like they are bought and paid for by those who are profiting from the biological agent.

Sixth, why is the WSDH official medical advice on what to do when you have Covid-19, no advice at all. There is ZERO information on what to do if you have Covid-19. Lots and lots of propaganda on getting vaccinated but not one single video on the steps to take after you've been infected. I had Covid-19 on September 22, 2021, and immediately went to the WSDH website to find out what I should do to prevent hospitalization. I had to refer to the Canadian Covid Care Alliance to find suggestions. This speaks volumes to the public and any individual who is paying attention. Our very own Department of Health is more concerned with vaccination than preventing deaths. Actions speak louder than propaganda, every day, all day.

This is a guide from the Canadian Covid Care Alliance, and this is what it looks like when the people have uncorrupted individuals working their government health agencies:

In reviewing the WSDH website for early treatment guidelines there is nothing. Zip, zero, zilch, nothing, Nathan, nada. The fact that this board is even attempting to require mandatory vaccination for school children is the most insane and unethical thing I have ever read of, or heard of, in the history of nefarious governmental actions, and I can assure you, I make it my business to know nefarious governmental actions, so I can recognize them when I see them.

Seventh, we should be concerned about the fact that Pfizer is reported a "Relative Risk Reduction" in their efficacy data and not an ABSOLUTE risk reduction. We need the WSDH to elaborate on this. Because if I elaborate on this, it's only going to add to the mounting pile of information that presents a medical con job that is going on at this very moment.

Let's unpackage what I've just presented here. 1. The WSHD kept their mouths shut while the Governor violated the FDA EUA criteria for approval by preventing individuals from refusing vaccination, 2. Now WSHD is willfully and wantonly violating FDA guidelines of the EUA approval by attempting to mandate to school children, 3. Taking the "medical advice" from the WSDH to talk to people and get the latest data is a great way to find out physicians have no idea what they are talking about and a great way to show which

How is the COVID 19 vaccine able to be listed as a recommended vaccine for children?  
What is the criteria needed to be able to do that? Especially being that it is not even FDA approved yet?

What is the longest and shortest timeframe to get a vaccine on the CIS as a requirement?

After the TAG meetings, what are the next steps from the BOH to add a vaccine to the CIS?

Thank you for your help.

Dear Public Servants of The State of Washington,

I would first like to point out that you are employed by a private, for profit corporation who is masquerading as a government agency. Please see the Dun & Bradstreet link provided below showing your corporate overview.

[https://www.dnb.com/business-directory/company-profiles.washington\\_state\\_board\\_of\\_health.e30b640365a4495f559a921684604c27.html#contact-anchor](https://www.dnb.com/business-directory/company-profiles.washington_state_board_of_health.e30b640365a4495f559a921684604c27.html#contact-anchor)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dnb.com%2Fbusiness-directory%2Fcompany-profiles.washington\\_state\\_board\\_of\\_health.e30b640365a4495f559a921684604c27.html%23contact-anchor&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C54acd4cd96ac4095140308d9d194357d%7C11d0e](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dnb.com%2Fbusiness-directory%2Fcompany-profiles.washington_state_board_of_health.e30b640365a4495f559a921684604c27.html%23contact-anchor&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C54acd4cd96ac4095140308d9d194357d%7C11d0e)>

That being said, you are all in a position that requires critical thinking. You must carefully balance the severity of what we are collectively faced with against the liberty you propose you have the authority to revoke. Perhaps it is time that each of you educate yourselves further in what the founding principles of our shared republic spelled out for each of us. You, acting as a public servant, have a duty to ask questions that may give you answers that are uncomfortable. You have to be willing to be wrong, to potentially have been deceived and then to have the courage to do what is right. Infectious courage is what our country needs right now; not infectious fear.

I have attached a proposed Indictment that is currently being sent to Attorney Generals across our country. There is mounting evidence that something is very wrong with the official story. Beginning with research to make corona virus more virulent, spending millions amplifying its toxicity, silencing all legitimate debate then releasing a gene therapy injection that has not had proper trials we are all in a strange new world. I suggest you all read the attached proposal and consider how comfortable you are trampling the rights of your fellow citizens with the threat of internment in light of these details. What if you are wrong?

I, and my domestic partner, private property owners in the state of Washington, both strongly disagree with what is proposed in the WAC 246-100 & 246-105. We are writing to inform you that should you move forward with this quarantine camp agenda and adding the Corona Virus injection to the vaccine list for children, we and many of our fellow citizens will hold each and every one of you publicly as well as personally responsible for any and all harm that comes to the citizens of Washington because of your decision.

Love is of the Essence

Sincerely,

Amy White

**Count 7. 15 U.S.C. § 19 – interlocking directorates**

**Count 8. 18 U.S. Code § 2384 - Seditious conspiracy**

### The Proposed Indictment

Throughout the decade of the 90s Pfizer sought to research, develop and patent a coronavirus (CoV) vaccine. Their first patent filing specifically recognizing the S-protein as the immunologic target for vaccines was filed on November 14, 1990 (U.S. Patent 6,372,224). With a focus on swine and canine gastroenteritis, these efforts showed little commercial promise and the patent was abandoned in April of 2000. During the same period, the National Institute for Allergy and Infectious Disease (NIAID) under the vaccine obsession of Dr. Anthony Fauci, funded Professor Ralph Baric at the University of North Carolina Chapel Hill. This program designed to commercially weaponize a naturally occurring toxin is the beginning of the criminal conspiracy and **violates 18 USC § 175, 15 USC § 1-3, and 15 USC § 8** Dr. Baric's expertise was understanding how to modify components of the coronavirus associated with cardiomyopathy. NIAID Grants AI 23946 and GM63228 (leading to patent U.S. 7,279,327 "Methods for Producing Recombinant Coronavirus") was the NIH's first Gain-of-Function (GOF) project in which Dr. Baric created an "infectious, replication defective" clone of recombinant coronavirus. This work clearly defined a means of making a natural pathogen more harmful to humans by manipulating the Spike Protein and other receptor targets. A year after filing a patent on this GOF CoV, the world experienced the first outbreak of Severe Acute Respiratory Syndrome (SARS).

Under the guise of responding to a public health emergency, the United States Centers for Disease Control and Prevention (CDC) filed a patent application on the genome of SARS CoV on April 25, 2003. Accessing and manipulating the genomic data (which came from China making an “invention” claim by a U.S. entity illegal **violating 35 USC §101, 103**), Dr. Baric, Dr. Fauci, and the CDC **violated 18 USC § 175** (a felony). One year earlier, Dr. Baric and his team had already filed a patent which clearly the pathogen CDC claimed as novel in 2003. Three days after filing a patent on the genome, NIH-funded Sequoia Pharmaceuticals filed a patent for the vaccine on the virus invented a mere three days earlier. At the same time, in **violation of 15 USC § 19** Dr. Fauci was appointed to a board position with the Bill and Melinda Gates Foundation (a competitor in vaccine manufacturing) thereby beginning the interlocking directorate<sup>1</sup> anti-trust crime.

In 2005, the DARPA and MITRE hosted a conference in which the intentions of the U.S. Department of Defense was explicit. In a presentation focused on “Synthetic Coronaviruses Biohacking: Biological Warfare Enabling Technologies”, Dr. Baric presented the malleability of CoV as a biological warfare agent. **Violating 18 USC § 175** and inducing the non-competitive market allocation (**violating 15 USC § 8**) for years to follow, Dr. Baric and the U.S. Department of Defense spent over \$45 million in amplifying the toxicity of CoV and its chimeric derivatives.

From 2011 until the alleged COVID-19 pandemic, Dr. Fauci has routinely lamented about the inadequacy of public funding for his vaccine programs and the public’s general unwillingness to succumb to his insistence that everyone MUST be vaccinated against influenza. Despite repeated appropriations to advance vaccine dependency, his efforts have been largely unsuccessful. NIAID – under Dr. Fauci’s direct authorization – encouraged UNC Chapel Hill and Dr. Baric’s lab to ignore the GoF moratorium in a letter dated October 21, 2014. At that time, Drs. Fauci, Baric and EcoHealthAlliance’s Peter Daszak were in possession of an extremely dangerous Chinese pathogen identified a year earlier in Wuhan.<sup>2</sup>

While many illegal acts were committed by the conspirators leading up to 2015, the domestic terrorism program (**in violation of 18 USC § 2339**) was announced by NIAID-funded Daszak at the National Academy of Sciences. Here, he announced what was to become the domestic and global terrorism event branded COVID-19.

---

<sup>1</sup> We note that gain-of-function specialist, Dr. Ralph Baric, was both the recipient of millions of dollars of U.S. research grants from several federal agencies and sat on the World Health Organization’s International Committee on Taxonomy of Viruses (ICTV) and the *Coronaviridae* Study Group (CSG). In this capacity, he was both responsible for determining “novelty” of clades of virus species but directly benefitted from determining declarations of novelty in the form of new research funding authorizations and associated patenting and commercial collaboration. Together with CDC, NIAID, WHO, academic and commercial parties (including Johnson & Johnson; Sanofi and their several coronavirus patent-holding biotech companies; Moderna; Pfizer; Merck; BioNTech; AstraZeneca; Janssen; Ridgeback; Gilead (Dr. Baric’s alter ego); Sherlock Biosciences; and others), a powerful group of interests constituted what are “interlocking directorates” under U.S. anti-trust laws. Further, most of these entities, including the Federal Government ones **violated 35 USC § 200-206** by failing to disclose Federal Government interest in the remedies proposed.

These entities were affiliated with the WHO’s Global Preparedness Monitoring Board (GPMB) whose members were instrumental in the Open Philanthropy-funded global coronavirus pandemic “desk-top” exercise EVENT 201 in October 2019. This event, funded by the principal investor in Sherlock Biosciences (a beneficiary of the SARS CoV-2 EUA for CRISPR technology) and linking interlocking funding partner, the Bill and Melinda Gates Foundation into the GPMB mandated a respiratory disease global preparedness exercise to be completed by September 2020 and alerted us to anticipate an “epidemic” scenario. We expected to see such a scenario emerge from Wuhan or Guangdong China, northern Italy, Seattle, New York or a combination thereof, as Dr. Zhengli Shi and Dr. Baric’s work on zoonotic transmission of coronavirus identified overlapping mutations in coronavirus in bat populations located in these areas.

<sup>2</sup> By October 2013, the Wuhan Institute of Virology 1 coronavirus S1 spike protein was described in NIAID’s funded work in China. This work involved NIAID, USAID, and Peter Daszak, the head of EcoHealth Alliance. This work, funded under R01AI079231, was pivotal in isolating and manipulating viral fragments selected from sites across China which contained high risk for severe human response. (Ge, XY., Li, JL., Yang, XL. *et al.* Isolation and characterization of a bat SARS-like coronavirus that uses the ACE2 receptor. *Nature* **503**, 535–538 (2013).) The GoF work NIAID allowed to persist in the face of the moratorium was Dr. Baric’s work with this pathogen

***“...until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated.”<sup>3</sup>***

It is not surprising that one year later NIAID’s funding paid off with Dr. Baric’s lab announcing that the Wuhan-derived pathogen was “poised for human emergence”.<sup>4</sup>

Knowing that the U.S. Department of Health and Human Services (through CDC, NIH, NIAID, and their funded laboratories and commercial partners) had patents on each proposed element of medical counter measures and their funding, Dr. Fauci, Dr. Gao (China CDC), and Dr. Elias (Bill and Melinda Gates Foundation) conspired to commit acts of terror on the global population – including the citizens of the United States – when, in September 2019, they published the following mandate in **A World At Risk**:

*“Countries, donors and multilateral institutions must be prepared for the worst. A rapidly spreading pandemic due to a lethal respiratory pathogen (whether naturally emergent or accidentally or deliberately released) poses additional preparedness requirements. Donors and multilateral institutions must ensure adequate investment in developing innovative vaccines and therapeutics, surge manufacturing capacity, broad-spectrum antivirals and appropriate non-pharmaceutical interventions. All countries must develop a system for immediately sharing genome sequences of any new pathogen for public health purposes along with the means to share limited medical countermeasures across countries.*

*Progress indicator(s) by September 2020*

- *Donors and countries commit and identify timelines for: financing and development of a universal influenza vaccine, broad spectrum antivirals, and targeted therapeutics. WHO and its Member States develop options for standard procedures and timelines for sharing of sequence data, specimens, and medical countermeasures for pathogens other than influenza.*
- *Donors, countries and multilateral institutions develop a multi-year plan and approach for strengthening R&D research capacity, in advance of and during an epidemic.*
- *WHO, the United Nations Children’s Fund, the International Federation of Red Cross and Red Crescent Societies, academic and other partners identify strategies for increasing capacity and integration of social science approaches and researchers across the entire preparedness/response continuum.”<sup>5</sup>*

As if to confirm the utility of the September 2019 demand for “financing and development of” vaccine and the fortuitous SARS CoV-2 alleged outbreak in December of 2019, Dr. Fauci began gloating that his fortunes for

Washington (DC): National Academies Press (US); 2016 Feb 12. 6, Developing MCMs for Coronaviruses. Available from: <https://www.ncbi.nlm.nih.gov/books/NBK349040/>

<sup>4</sup> Menachery VD, Yount BL Jr, Sims AC, Debbink K, Agnihothram SS, Gralinski LE, Graham RL, Scobey T, Plante JA, Royal SR, Swanstrom J, Sheahan TP, Pickles RJ, Corti D, Randell SH, Lanzavecchia A, Marasco WA, **Baric RS**. 2016. SARS-like WIV1-CoV poised for human emergence. **Proc Natl Acad Sci U S A**. 2016 Mar 14. pii: 201517719

<sup>5</sup> [https://apps.who.int/gpmb/assets/annual\\_report/GPMB\\_annualreport\\_2019.pdf](https://apps.who.int/gpmb/assets/annual_report/GPMB_annualreport_2019.pdf) (page 8)

additional funding were likely changing for the better. In a February 2020 interview in **STAT**, he was quoted as follows:

*“The emergence of the new virus is going to change that figure, likely considerably, Fauci said. “I don’t know how much it’s going to be. But I think it’s going to generate more sustained interest in coronaviruses because it’s very clear that coronaviruses can do really interesting things.”<sup>6</sup>*

In November 2019 – one month before the alleged “outbreak” in Wuhan, Moderna entered into a material transfer agreement – brokered by the Vaccine Research Center at NIAID (at which UNC Chapel Hill alum Dr. Kizzy Corbett worked) – to access Dr. Baric’s Spike Protein data to commence vaccine development. In his own written statement obtained by the **Financial Times**, he refers to this agreement as being the foundation for the mRNA Moderna vaccine.<sup>7</sup>

To finalize the nature of the racketeering and anti-trust criminal conspiracy, when it came time to commercialize the NIH and DARPA owned spike protein and pass it off as a “vaccine” (in conflict with the standard for vaccines in statutory and scientific application), the Operation Warp Speed contract was awarded to DoD contraction ATI, a subsidiary of ANSER. In a graph reminiscent of the anti-trust hearings at the formation of the Clayton Act in the early 20<sup>th</sup> century, the identity of the interlocking conflicts of interests are presented in graphic relief. It is with no surprise that the result of this price-fixing conspiracy was the enrichment of the conspiring parties and the harm of consumers.

<sup>6</sup> <https://www.statnews.com/2020/02/10/fluctuating-funding-and-flagging-interest-hurt-coronavirus-research/>

<sup>7</sup> <https://pubmed.ncbi.nlm.nih.gov/32756549/>

Indeed, *the money followed the hype* and they *used the hype to get to the real issues*. *Investors follow where they see profit at the end of the process*.

And real Americans are dying each day because a criminal organization unleashed terror resulting in the deaths of Americans.

**18 U.S.C. § 2331 §§ 802 – Acts of Domestic Terrorism resulting in death of American Citizens**

**Pub. L. No. 107-52 expanded the definition of terrorism to cover "domestic," as opposed to international, terrorism. A person engages in domestic terrorism if they do an act "dangerous to human life" that is a violation of the criminal laws of a state or the United States, if the act appears to be intended to: (i) intimidate or coerce a civilian population; (ii) influence the policy of a government by intimidation or coercion;**

Every single Act, the declaration of the State of Emergency, the Emergency Use Authorization, the fraudulent face masks, the business closures, and the OSHA and CMS vaccine mandates are ALL admitted by the conspirators to be acts to coerce the population into taking a vaccine. Further, these acts disrupted the democracy of the United States of American and resulted in the violation of 18 USC § 2384. The conspirators announced it in 2015, then prepared the pathogen in 2016, and laid out the terror campaign in September 2019. And now they profit from the death of Americans.

- >  My name is Elizabeth Foster, I am a Pierce County Realtor member and mother of 3..
- >
- > I am strongly opposed to required immunizations for COVID for children.. This is immoral and wrong. This is gene therapy disguised to most who think, " it's the same thing as the polio vaccine," which it is NOT. It is still in emergency use, because our government will not allow treatment to keep this vaccine as THE ONLY SOLUTION which clearly isn't working. Mass testing with 50% accuracy on PCR tests which were actually recalled back in July but continued to be used until now to keep those numbers high to give power and spread fear. This has to stop! The vaccinated still spread, still have severe illness.
- >
- > My family had Covid 4/2021, recovered and tested antibodies. We have been healthy and exposed to many since that had Covid and WE ARE NATURALLY PROTECTED no matter what the governing bodies want to say, naturally immunity needs to be realized, it's better than these injections.
- >
- > Manufacturers not releasing data for 50 years is laughable, & we are expected to bend over and offer our children to this alter "for the good of others." This is tyranny. It's about profit, not health.
- >
- > Drs' are being forced to follow CDC guidelines, therefore cannot speak their truth. We know this first hand as my best friends daughters cardiologist shared his uptick in myocarditis pediatric patients after their vaccine. Regardless of her conditions and what vaccine injury could do to her, his hands are tied and can not offer medical exemption due to policy of Multicare. This is the case everywhere. Tyranny at every. Single. Level.
- >
- > Our children are not lab rats. With the vaccine manufacturers taking zero responsibility for injuries, and Drs being afraid to mention vaccine injury when patients come to a clinic, who's protecting our children?
- >
- > Regarding any discussion on WAC 246-100, or any changes to isolation and quarantine procedures for COVID: I am against any increased forceable measures that would require law enforcement or health officers to involuntarily detain / isolate / quarantine a human being because of COVID. This is history repeating itself, & with the hate coming from those who think unvaccinated should all die, this is to close of a resemblance to concentration camps, and could quickly turn into a place that is targeted by those who want unvaccinated dead.
- >
- > I urge you to consider the moral and ethical precedent this would create, and has already created. Additionally, this virus' current variant is spreading through both vaccinated and unvaccinated. There should be NO SEPARATION or distinction between the two in consideration for any forceable measures.

Subject: AGAINST FASCIST POLICIES WAC 246-100 AND WAC 246-105  
Importance: High

External Email

Hello,

I am writing this email to demand the fascist policies WAC 246-105 and WAC 246-100 to be ceased from existence.

Whoever decided to create them, as well as to propose them to the public is cruel and evil in their nature just like the policies themselves.

History shows that whenever government officers were allowed to affect people's lives in such a manner these policies allow them, there were millions of people who were denied their basic human rights of choice and freedom. Because of the same in their nature policies, 6 million Jews were brutally killed, and millions more of different were traumatized and suffering. And if we are to give these policies even a chance for existence, we will be repeating the same mistake here in the United States, the country of the free.

We CANNOT and SHOULD NOT allow policies like that to exist. It is against human rights, rights given to us by God himself, the rights protected by the constitution. The constitution is designed to limit the government because absolute power corrupts absolutely, and our leaders are already corrupted. However, these proposed policies override the constitution and provide health officers absolute power, which makes these policies UNCONSTITUTIONAL.

It is clear that the pandemic, mainly created as a political tool to place power in the hand

of just a few cruel people, has nothing to do with the proposed policies that cease human freedom. We all saw that somehow states like Florida, where people continued their normal lives, and somehow had even fewer cases of COVID compared to the Marxist states like California. It is not a question of protecting people's health because it is to be taken care of by each person individually by each individual, not by the government. That is, I am raising my voice AGAINST these UNCONSTITUTIONAL, UNHUMAN, IMMORAL, EVIL IN THEIR NATURE policies. I am raising my voice as my God-given constitutional right for the sake of the future of this generation, the generation of my future children and their children, and for the sake of this country.

I expect to hear a personal reply to this email, as it is my right and your obligation to read it thoroughly to take action upon the people you represent and whose constitutional rights you are to protect.

Best Regards,

Aleksandra Ankuda

Subject: Washington State Board of Health: Comment

attachments\EF10C5EA0A054467\_image001.gif

External Email

Board of Health:

I have been a member of the Washington State Bar association for 30 years. I am writing in response to the Notice of Public Meeting "Final Agenda" to be held on Wednesday, January 12, 2022.

If one of the purposes of this meeting is to add "Covid-19" to the list of "Vaccine-preventable diseases children must be protected against for full immunization" set forth in WAC 246-105-030, then I am opposed to this inclusion.

As a grandparent, I am concerned for my grandchildren's current and future health and well-being.

I am opposed for the following reasons:

First, the Covid-19 vaccines are experimental and authorized under the Emergency Use Authorization by the federal government. It is unlawful to mandate an experimental vaccine on any U.S. citizen.

Second, the Covid-19 vaccine DOES NOT offer "full immunization" against the Covid-19 virus as required by WAC 246-105-030. It merely offers temporary protection from severe disease. Currently, that protection is about 4 months, apparently to be followed by endless vaccine boosters.

Third, the Covid-19 vaccine DOES NOT confer immunity against the Covid-19 virus. This is the reason that the federally recognized definition of a "vaccine" was recently changed whereby the word "immunity" was removed and replaced with the phrase "protection from" a specific disease.

Fourth, the Covid-19 vaccine IS NOT a "vaccine preventable disease" as required by WAC 246-105-040(1) referring to the disease list in WAC 246-105-030.

Fifth, the Covid-19 vaccine is NOT a vaccine, but a novel and unproven form of "gene therapy".

Sixth, there is NO information associated with the manufacturer's typical "informed consent" vaccine insert disclosure. Therefore, informed consent is IMPOSSIBLE. Children under the age of 18 cannot consent to medical intervention particularly when there is no information about this novel genetic vaccine. Historically, parents and or lawful guardians are charged with this obligation and duty of protection.

Respectfully,

Gregory M. Wilson

Subject: Comments Regarding - Agenda Items 8 & 11

External Email

To Whom It May Concern,

Agenda Item #8 Technical Advisory Group: I oppose any mandated immunization. Any medical procedure for a child needs to be determined by the child's parent's and doctor who know the child's health history as well as determine the risk to benefit of receiving a vaccine or any medical procedure. Mandating anything that is not proven 100% harmful is just foolishness and negligent and all parties involved in the forcing of something that can be harmful for someone should be held liable for all harm inflicted on the forced individual for the duration of time that the effects of the harm exist. Please keep this in mind in your decision making.

Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care & School Entry: The only objection I have to Chapter 246-105 WAC is that it does not take into consideration natural immunity due to prior exposure to any of the 11 listed diseases. I also support Informed Choice WA's petition asking for a new rule to prohibit the BOH from requiring for school attendance any Emergency Use Authorized products, or licensed products that lack completed Phase 3 trial studies. This is needed to improve clarity of the Chapter 246-105 WAC. Please keep this in mind in your decision making.

Kimberley Lackey

Dear WSBOH,

Hello, I do not approve of the mandatory Covid Vaccinations for childcare and school admission.

Hoping you will refuse this type of action for the following reasons:

Covid vaccination is still under emergency use authorization, children under the age of 18 have a 99.995% of survival rate, and they have a higher chance of death or adverse reaction to covid vaccine than covid-19 itself.

Thank you for your time and consideration, it's VERY appreciated! We CAN make the right decisions☐

Subject: Vaccine

External Email

Hello,

Our kids will be pulled out of public school if the covid vaccine becomes a requirement or they are discriminated against for not having it.

1- The risk of severe illness or death to children is still very low, considerably lower than influenza. There is a higher risk of adverse reactions to the vaccine. It is not our children's responsibility to protect the vulnerable at their own risk. Any vulnerable teachers and staff are welcome to vaccinate themselves to mitigate their own risk.

2- Vaccinated are still becoming infected and are spreading it the same as unvaccinated, posing the same risk to the vulnerable. Again, the vulnerable all have access to the vaccine to mitigate their own risk as they see fit.

3- While adverse reactions to the vaccine may be fairly low in the short term, they do happen. there are literally zero long-term studies in humans to know if there will be any impacts to health down the road. History is full of products once deemed to be safe by the FDA that are now banned. Let's see how this looks in 5 to ten years.

4- I would also like to add that as long as "any cloth or paper" mask is deemed sufficient, I will consider the source of the requirement to be of questionable intent. ALL ACTUAL SCIENCE has consistently shown an actual surgical mask to have marginal effectiveness against a virus, with a K95 or N95 to be the only mask to make much difference. The flimsy cloth or paper that the majority of children are wearing is less than effective. I would like the data on how many staff and children are out of WA schools with other viral/respiratory illnesses/asthma compared to the 2018/2019 school year. Our circle of children have been continually struggling with this since the beginning of school. Please see The University of Michigan website for info on their influenza outbreak that was severe enough that the CDC was called in. This university requires masks AND vaccines (and lets not forget that influenza particles are significantly larger than Covid particles). These are college students, capable of better mask hygiene than the younger children.

Subject: Emergency Order WAC 246-100-070

External Email

I am sending this email to urge you, as a member of the WA state Board of Health, to please vote AGAINST applying current infectious disease WAC codes to include Covid-19 for all WA state residents!

This is an outrageous abuse of power and every person in WA state and across the nation should strongly object to this invasion of our privacy and our liberties as freedom loving Americans!

To allow local health officers to use the law (WAC 246-109-070) to enforce these "Emergency Orders" (WAC 246-100-045 & WAC 246-100-040) is...to say the least...tyrannical! And of course it goes with saying that this is illegal and goes against the NUREMBURG CODE Article 6, Section 28!

No policy should disrespect the rights of all to make their own health care decisions  
Public health is important, but NOT at the expense of losing our GOD given freedoms.  
Please vote NO to these "Emergency Orders"!!!!

Thank you!

Judy Senkler

Subject: STOP

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense

([childrenshealthdefense.org](http://childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>

)  
Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: We The People are your bosses

External Email

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right

whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, " the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality:

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fvaccine-mandates-kids-legal&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7Cd322fa2c84d445fda3f208d9d1c90b8d%7Chttps://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the

CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these

experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against, or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all

inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

<http://www.cirp.org/library/ethics/nuremberg/>

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.cirp.org%2Flibrary%2Fethics/>

You are obliged to OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

You are obliged to OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

WE DO NOT CONSENT.

Subject: LEAVE OUR KIDS ALONE!!!!

External Email

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates, PERIOD. The science does NOT support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals. Children are statistically at ZERO risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. ([www.fda.gov/media/151710/download...the required studies on children will not even be completed until May 31, 2027!!!!!!](http://www.fda.gov/media/151710/download...) And that is only one of the required pediatric assessments!) There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed. STOP USING OUR CHILDREN AS TEST SUBJECTS!!!

Sincerely,  
Marie Sketchley

Subject: No vaccine requirement for school

External Email

Hello,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. Subject: Vaccine Mandate for Kids

External Email

To whom it may concern:

Please DONOT mandate the covid vaccine for school aged kids. Overall our kids have a very high survival rate if they did contact this virus. Parents have valid concerns about this and our poor children have suffered enough by not having in person learning and the changes they have to adapt to on a daily basis. Our kids have a high survival rate. They are not the issue and they are not where it is spreading!!! COVID is part of our world now, we need to just move on. Let it play out however it is going to play out. This is NOT the answer. I fear it will further shut down schools in our state, our children will suffer! Our state will suffer!!!!

Please, listen to us!!!

Thank you, a very concerned parent:

The current strain (Omicron) has been reported as causing 6 deaths in 100,000 cases which is roughly equal to the death rate of those who have had adverse reactions to the vaccine. More people die each year from the Flu than the current strain of Covid-19. This would be a major overreach by this board and do severe harm to the faith that people have in your judgement.

Subject: WA State Board of "Health" & Inslee's TYRANNICAL & UNCONSTITUTIONAL  
Quarentine Camps

External Email

It's come to our attention that the WA Board of Health & Dictator Inslee is considering passing UNCONSTITUTIONAL bills for Quarantine Camps & forced vaccines with:

- \*WAC 246-100-040
- \*WAC 246-100-105
- \*WAC 246-100-070
- \*WAC 246-100-045

If you pass these bills you WILL BE IN VIOLATION of the NUREMBERG CODE & YOU WILL BE INDICTED for CRIMES AGAINST HUMANITY for your participation. Currently there are Common Law juries being formed ALL around WA State which have the power to do this to YOU! If you have't heard about this, you ought to look it up before you vote. WE THE PEOPLE will hold you accountable for YOUR actions, & we will not let you get away with this CRIME!

These bills not only violate our precious & beloved Constitution but several other health laws including:

- \* PATIENT BILL OF RIGHTS
- \* HIPPA LAWS

- \* THE Supreme Court ALREADY RULED THAT NO EMERGENCY CAN ELIMINATE ANY RIGHTS GUARANTEED BY THE CONSTITUTION

If your "Health" Board & Inslee proceed to pass these bills after being warned of these facts you are KNOWINGLY VIOLATING, YOU will be considered to be intentionally committing TREASON against the Constitution & against We the People of the United States of AMERICA!

The covid Omicron variant is contagious HOWEVER, VERY MILD...HEALTHY PEOPLE ARE NOT DYING OF IT. Actually it will help us reach herd immunity quickly for anyone interested in REAL SCIENCE. However, our government officials don't seem to be interested in real science. Instead you all only use data that goes alongside of your AGENDA....& are fully focused on THE GREAT RESET & destroying our state & country for a virus with a 99.997% SURVIVAL RATE, so you'll be able to pass the Vaccine Passport to take over control our assets if we don't comply with your every whim. You are EVIL!!!!

We are actively ORGANIZING & WE THE PEOPLE will PEACEFULLY fight you on this. We are thankful for the 2nd Amendment during times like these when our government has become tyrannical — this is exactly WHY our founders made the 2nd amendment so we the people if need be could defend ourselves from governmental TYRANNY. \*\*\*Canada & Australia sure wished they hadn't surrendered their guns....they NOW have no defense against their tyrannical DICTATOR government officials & are now a communist police state. This is not a threat...it is a simple fact.

Never have I understood the importance of the 2nd Amendment UNTIL BIDEN & INSLEE

have gone CRAZY MAD & now our own Wa State Board of Health too over covid restrictions taking ALL OUR FREEDOMS AWAY .... Again for a very survivable virus for healthy people of all ages.

You act like we don't talk with friends from other states. ALL RED STATES ARE WIDE OPEN. Our daughter goes to college in Arizona, & they don't even mask up there! Dear friends moved to Florida & they said Covid is NON-EXISTENT there!!!

WE THE PEOPLE OF WASHINGTON STATE WILL NOT ALLOW YOU TO FORCE ANYTHING INTO OUR BODIES OR OUR CHILDREN'S THAT WE HAVEN'T FREELY CHOSEN FOR OURSELVES.

There are MILLIONS OF US IN WA STATE & only a few hundred or thousand of you. We are AWAKE to your tyranny & stomping all over our Constitutional Rights. WE WILL WIN THIS BATTLE....not you! We will rise up against you & protest every minute of everyday against this until you make the right decisions to OPPOSE THESE BILLS & any others in the future!

Subject: No mandate for covid vaccine in children

External Email

DO NOT enact a covid vaccine mandate for children of any age. If you do you will be responsible for the deaths and injury of hundreds to thousands of children. Don't be fooled by the federal government's propaganda. If you do your research, you'll understand that the covid vaccines are responsible for tens of thousands of deaths worldwide and over 1 million adverse effects. They are causing more harm than good. The vaccines have been proven to be ineffective. There are more people getting covid who have been "fully" vaccinated than those who are unvaccinated. There is no point other than for financial reasons for greedy pharmaceutical companies and state and local government agencies clambering for federal funds to get vaccinated.

Keep the government at all levels out of the family decision making process and out of the doctor patient relationship. Family decisions and medical decisions are personal and private.

What you should be spending your time on is enabling early treatment solutions that are widely available to all Washingtonians. The biggest crime of this century is that the government at all levels and medical administrations at all levels have failed to recognize that Covid can be treated early with existing medications that are already widely available.

DO NOT MANDATE VACCINES FOR CHILDREN OF ANY AGE.

Subject: Reg the upcoming health care board meeting

External Email

Hi Kaitlyn,

I want to express my opinion for your upcoming board meeting...

I think the most important thing is for people to have a choice about their own body and health. I think children should not be forced to be vaccinated .. their bodies are healthy with a great immune system that with proper food and care will protect them.

I had my boss die last year after taking the second shot of the Pfizer vaccine, my friend in the office got Bell's Palsy after her first vaccine shot and my other friend's son wife who was pregnant got a miscarriage right after the shot ... so I think with so many people having side effect and dying ... you as the health care department should absolutely not force people to get this vaccine and give people a choice of what each person wants to do.. the risk and consequences of this experimental drug are way too big to enforce it on people.

Why does being healthy not mean anything anymore.. having a healthy body with a good immune system should be the greatest thing. I'm from Switzerland originally and over there people who have had Covid and have anti-body .. that is good enough to live life and not have to get the vaccine. Why can we not do this hear. The healthy people should not be forced to be vaccinated.

So I would like that you

1. OPPOSE Agenda # 8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for children of ANY age
2. SUPPORT AGENDA # 11, Informed Choice Washington's Petition for Rulemaking -- this is item 11 on the agenda! This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Alice Bossart

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Kaitlyn,

I oppose this proposition. I am not opposed to the choice or availability of vaccinations, in fact I have received many vaccinations. But I am whole heartily against the covid-19 injections and the fear and bullying tactics being employed to coerce the public, "joints for jabs", free bus rides for a month, cups of coffee, and now this idea to forcibly detain those who do not wish to receive the covid-19 vaccination in a concentration camp, excuse me, in a "quarantine facility". This disease is real but it is also overwhelmingly mild and does not result in hospitalization for the vast majority of those who contract it. Those with risk factors including advanced age, immune deficiency, obesity, respiratory, and heart conditions should certainly make informed choices for themselves as should the rest of the public. This is a matter of bodily autonomy this is not a matter for bureaucracy and the WA State Board of Health. It is and should remain out of the scope of practice for this board to apply current infectious disease WAC codes to include Covid-19 for all WA State residents. Recommendations are one thing forced intervention is another. Our state has a very high percentage of vaccinated residents 75% (<https://usafacts.org/visualizations/covid-vaccine-tracker-states/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fusafacts.org%2Fvisualizations%2Fstates%2F&data=04%7C01%7CKaitlyn.donahoe%40sboh.wa.gov%7Cfab2e53504d44a807b6a08d9d1adef56> ) and herd immunity in this case is reported by the Cleveland Clinic to be achieved between 70-85% (<https://health.clevelandclinic.org/how-much-of-the-population-will-need-to-be-vaccinated-until-the-pandemic-is-over/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhealth.clevelandclinic.org%2Fhow-much-of-the-population-will-need-to-be-vaccinated-until-the-pandemic-is-over%2F&data=04%7C01%7CKaitlyn.donahoe%40sboh.wa.gov%7Cfab2e53504d44a807b6a08d9d1adef56> ). Further the 65 and older population, (unquestionably the most vulnerable population from the onset of this pandemic), has an even greater percentage of vaccinated individuals at nearly 100% nationwide (see the before mentioned [usafacts.org](https://usafacts.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fusafacts.org%2F&data=04%7C01%7CKaitlyn.donahoe%40sboh.wa.gov%7Cfab2e53504d44a807b6a08d9d1adef56> link).

I am very strongly opposed to these proposed policies being discussed.

**PROPOSED POLICIES:**

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Very Sincerely,  
Stephanie Newcomb

Subject: Forced Vaccines for children and Quarantine camps

External Email

Dear Kaitlyn,

has been brought to my attention that this board seeks to find a way to force children in Washington State to receive the experimental, emergency-use authorized mRNA vaccine in order to attend public school.

I am a paraeducator for the Lake Washington District. I have a degree in Nutrition and Food Science. I have 5 children. If this plan is implemented, I will quit my position and take my children from this district and return to home education, like so many other good, caring parents are doing now.

I'm sad to think that you aren't aware of the outcry in this state toward the governor's tyranny and his plans to bring force to bear along with quarantine camps.... This does not benefit America or honor our constitution, and I'm ashamed at the very suggestion of such segregation and discrimination.

Realize the fight is bigger than you know. You are joining the governor in destroying our economy, our well-being, and our way of life. Please reconsider your trajectory.

Sincerely,

Noelle Simms

Subject: Vote NO to Covid-19 Vaccination Requirements for schools!

External Email

Vaccines are NOT a one size fits all solution for all people, and children should never be forced to have it in order to attend school.

It has been Proven that getting the vaccine CAN protect the individual- it does NOT protect others around you NOR stop you from Spreading it to other people - whether they are vaccinated or not. Therefore, since it only benefits the person getting the vaccine, it wouldn't even make sense to require it. It should remain a personal choice - one that comes from weighing personal risk factors (which children are still by far at the lowest risk for hospitalizations and death) and talking to your dr, but ultimately, it is - and should remain- the individual's, or parent's right to choose.

The Covid-19 vaccine had not been studied for long term effects. You should not consider requiring a vaccine that has unknown long term effects. That would be incredibly irresponsible and dangerous. Parents should be free to make the choice that is best for their children - what they have always been allowed to do.

Please vote NO to vaccine requirements in schools.

If you read all the way to the end here, and you disagree (or agree), I'd love to hear why you are considering this, and your side of the argument.

Thanks,

Anne Heath

Subject: Please consider voting against the mandate for children's covid vaccine

External Email

Hello Kaitlyn,

I am writing as a concerned parent of two boys in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:  
\*\*\*Link to 1-hour highlights video here.

Advisors do not recommend healthy children get this vaccine  
Advisors do not recommend this vaccine be required to attend school  
Doctors do not expect the vaccine to prevent infection  
They have no data or expectations it will prevent transmission  
Based on current data and modeling, the risks of the vaccine to children outweigh the benefits  
Children's vaccine is based on the alpha variant and has little to no protection against Delta or Omnicron  
Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.  
Advisors very concerned about increase in myocarditis and pericarditis especially in young boys  
Approval was given based on the vaccine being available to immune compromised children only.

Thank you for your time,  
Kathy Wall

External Email

I am writing as a parent of five school-age children in Auburn, WA to express my concern that the Washington State Board of Health is considering mandating the COVID 19 inoculation for school children. Please do not impose this medical experiment on our children. It is not a vaccine like the others in the current childhood schedule. It does not confer immunity which basically makes it a therapy. The CDC, in fact, had to alter the definition of a vaccine in order to accommodate the COVID inoculation (and receive the legal impunity of a vaccine).

Significantly, it has not been proven safe and effective as it has been so thoroughly touted. An alarming number of young people have had adverse reactions, life-altering ones like myocarditis. A young person has a greater than 99.9% survival rate from COVID 19. In light of this, why would we put our children at any risk? Any mandated treatment should be bulletproof-safe, not experimental and flawed. The COVID inoculation does not even prevent transmission. Dr. Walensky of the CDC admitted this. Inoculating our children (at their risk) cannot "protect grandma".

Please consider viewing the attached links.

In the first link Dr. Malone, the inventor of the mRNA technology, addresses parents and warns them against the COVID inoculation.

Kaitlyn,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I'd strongly urge the members of the board in control of such an important decision to form their consensus based of the facts, logic and reasoning while using honesty, and fairness from an unbiased perspective to guide those decisions.

With great power comes great responsibility; Which is why it is crucial the members of the board make the right decision for the people and our children.

I understand that everyone has a different set of morals and values that guide how we each make our own decisions. Which is why it's important for you to really dive deep and ask yourself who you really are and determine if you are proud of who you are and what you as an individual are support and represent.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' Children's Health Defense (<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da> childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the

range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&americasfrontlinedoctors.org>).

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Hailey Unland

Subject: Mrs. Donahoe PLEASE I STRONGLY IMPLORE YOU TO OPPOSE MANDATED COVID VACCINATION FOR SCHOOL AGE CHILDREN.

External Email

Good Afternoon Mrs. Donahoe,

As a parent I have gathered and watched for information regarding the Covid vaccination and results on children and I implore you to STRONGLY OPPOSE any recommendation to require Covid vaccination for school aged children. Are you not aware that now there are now 16,000 physicians and medical scientist around the world who have signed a declaration publicly declaring that healthy children should NOT be vaccinated for COVID-19? Please read this declaration:

WE, THE PHYSICIANS OF THE WORLD, united and loyal to the Hippocratic Oath, recognizing the imminent threat to humanity brought forth by current Covid-19 policies, are compelled to declare the following:

WHEREAS, after 20 months of research, millions of patients treated, hundreds of clinical trials performed and scientific data shared, we have demonstrated and documented our success and understanding in combating COVID-19;

WHEREAS, in considering the risks vs. benefits of major policy decisions, thousands of physicians and medical scientists worldwide have reached consensus on three foundational principles;

NOW THEREFORE, IT IS:

RESOLVED, THAT HEALTHY CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23children&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C85fd7ec1a51848c698>  
)

\* Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

\* Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

\* Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

\* Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

RESOLVED, THAT NATURALLY IMMUNE PERSONS RECOVERED FROM SARS-CoV-2 SHALL NOT BE SUBJECT TO ANY RESTRICTIONS OR VACCINE MANDATES (view

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23recovered&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C85fd7ec1a51848c698>

supporting evidence)

- \* Natural immunity is the most protective, and longest-lasting solution against the development of COVID-19 disease and its more serious outcomes.
- \* Naturally immune persons are at the lowest risk of transmission, thus should not be subject to travel, professional, medical or social restrictions.
- \* Natural immunity provides the best source of herd immunity, a condition necessary for eradicating the Covid virus.

RESOLVED, THAT ALL HEALTH AGENCIES AND INSTITUTIONS SHALL CEASE INTERFERING WITH PHYSICIANS TREATING INDIVIDUAL PATIENTS (view supporting evidence

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C85fd7ec1a51848c6984408d9d1ab>  
)

- \* Early intervention with numerous, available agents has proven to be safe and effective, and has saved hundreds of thousands of lives.
- \* No medicine already given regulatory approval shall be restricted from “off-label” use, particularly during this global humanitarian crisis caused by a rapidly mutating virus, which requires quick to adopt treatment strategies.
- \* Health agencies shall be prohibited from interfering with physicians prescribing evidence-based treatments they deem necessary, and insurance companies must cease blocking payments for life-saving medicine prescribed by doctors.

RECOMMENDED LEGISLATIVE OR EXECUTIVE ACTION:

We believe that violating any of these three principles unnecessarily and directly risks death to our citizens. We hereby recommend the leaders of states, provinces and nations legislate or take executive action to prohibit the three practices described above.

And if that weren't compelling enough to STRONGLY OPPOSE Covid vaccination for children, please read this statement by Dr. Robert Malone who himself is even vaccinated for Covid and generally pro-vaccination! Dr. Malone is an internationally recognized scientist/physician and the original inventor of mRNA vaccination as a technology. I would believe that his statement should be a powerful insight and trusted source of information. Please read his very own statement below:

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct. I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases. After this, I will be posting the text of this statement so you can share it with your friends and family.

Before you inject your child - a decision that is irreversible - I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created:

There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including

- \* Their brain and nervous system
- \* Their heart and blood vessels, including blood clots

- \* Their reproductive system, and
- \* This vaccine can trigger fundamental changes to their immune system

The most alarming point about this is that once these damages have occurred, they are irreparable

- \* You can't fix the lesions within their brain
- \* You can't repair heart tissue scarring
- \* You can't repair a genetically reset immune system, and
- \* This vaccine can cause reproductive damage that could affect future generations of your family

The second thing you need to know about is the fact that this novel technology has not been adequately tested.

- \* We need at least 5 years of testing/research before we can really understand the risks
- \* Harms and risks from new medicines often become revealed many years later

Ask yourself if you want your own child to be part of the most radical medical experiment in human history

One final point: the reason they're giving you to vaccinate your child is a lie.

- \* Your children represent no danger to their parents or grandparents
- \* It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives. The risk/benefit analysis isn't even close.

Hello!

I'm writing to you to please stop forcing the mandates for the Covid virus shot. As a American we as a nation are going backwards with these mandates! As Abraham Lincoln said, That this nation, under God, shall have a new birth of FREEDOM - and that government of the people, for the people, shall not perish from the Earth. The people are standing up and saying we DO NOT WANT THE MANDATES ON OUR CHILDREN AND FOR US! Enough is enough, if a person wants to get the Covid shot, that's their CHOICE! But DON'T FORCE OR DISCRIMINATE a human for their God given personal choice for choosing not to get the Covid shot! Especially when they can lose their job!!! As a state you are discriminating many citizens and now there is segregation where many citizens can not go to places. If that doesn't show HATRED then you have no compassion. This is not the USA land of the FREE if you continue this nonsense. And now you the Board of Washington Health want to have ALL children take this Covid shot! You have no right to put your personal decision on other citizens children!! Shame on you.

Thank you for listening from a concerned Wa citizen,  
Gayle Morgan

I am adamantly against forced vaccines and forced quarantine for any person in the state of Washington!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- \* Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child's adverse effects from covid.
- \* Mandates are not laws and every parent has the right to make medical decisions for their children.
- \* These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.
- \* Covid is spread by vaccinated and unvaccinated.

There are no valid grounds for mass shots for children!!!

Sincerely,  
Kristine Farley

Subject: DO NOT SUPPORT MANDATORY COVID-19 VACCINATIONS

External Email

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue.

Enrollment is already on the decrease and continues to decrease due to, what in my opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,  
Katie Walsh

Kaitlyn,

You will not force a covid vaccination on children in this state. First of all, "Vaccination" is a loose term as it doesn't protect anyone from getting Covid or passing it to others. Also, the influenza vaccine is FAR more effective at doing what it was designed to do, and you don't even mandate that! You continue to add evidence to the fact that you're a worthless human being, and only care about your left-wing agenda. If you implement this, I will be forced to use whatever means necessary to protect my children.

Subject: I OPPOSE WAC 246-105

External Email

To The Board Members of the WA state Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual Prevention. No one can tell me what the effects may be on my child in 5 years or 10 Years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for themselves.

Thank you for your time.

Hello Ms. Davis,

I, Danielle Loft, oppose the use of law enforcement to be used to detain those who are unvaccinated. There are so many reasons one would choose not to get this medical procedure for their own personal reason, for instance previous injury from other vaccines (many of my friends and family have experienced, look into VAERS to see how much money has been paid out to victims) religious reasons, natural immunity, wanting more

studies to be done before making that decision, all of which are legitimate reasons and shouldn't be questioned. It is our own right to refuse and to be punished and detained for those valid reasons is unacceptable on every level. This is America, we have a constitution, we have rights to choose what is best for ourselves, but seems for some that's been forgotten.

I do not support adding the C vaccine to the childrens school schedule. There have not been enough studies on it, we don't know the effects it will have on fertility and their bodies. All the science says children are not a threat and are likely to not be harmed by the virus as much as adults, so why mandate it? It doesn't make sense. Leave the children alone.

Please do what you know is right and oppose these WACs from being added as a law.

To whom it may concern,

I do not agree with the efforts being made to allow local law enforcement to involuntarily detain someone or group of people to be isolated in a quarantine facility.

I do not agree that anyone should have to comply with enforced medical examinations, testing, treatment, counseling, or vaccinations regarding COVID-19.

I ESPECIALLY do not agree with including the Covid-19 injections as part of school immunization requirements.

I will not support these new efforts. I will not support this state.

Subject: Covid Vax Mandate for Children

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Amy Ralph

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health. There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19. Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

Subject: January 12th Meeting - FDA COVID 19 Vaccine - Nuremberg Code (1947)

External Email

Dear State Board of Health,

1. The FDA NEVER approved the COVID 19 vaccine being used today.
2. The Nuremberg Code (1947) clearly states that humanity cannot be experimented on.
3. If you approve these POLICIES (WAC 246-100-070) (WAC 246-100-045) (WAC-246-100-040) and you are challenged in court, THESE FACTS WILL COME OUT!!

SEN. RON JOHNSON: We do not have an FDA-approved vaccine being administered in the U.S. The FDA played a bait and switch. They approved the Comirnaty version of Pfizer drugs. It's not available in the U.S. They even admit it. I sent them a letter three days later going "What are you doing?" What they did is they extended the emergency use authorization for the Pfizer drug vaccine that's available in the U.S., here that's more than 30 days later, they haven't asked that very simple question. If you're saying that the Pfizer drug is the same as the Comirnaty, why didn't you provide FDA approval on that? So, there's not an FDA-approved drug and, of course, they announced it so they could push through these mandates so that people actually think, "Oh, OK now these things are FDA approved." They are not and again, maybe they should be, but the FDA isn't telling me why.

The judgment by the war crimes tribunal at Nuremberg laid down 10 standards to which physicians must conform when carrying out experiments on human subjects in a new code that is now accepted worldwide.

This judgment established a new standard of ethical medical behavior for the post World War II human rights era. Amongst other requirements, this document enunciates the requirement of voluntary informed consent of the human subject. The principle of voluntary informed consent protects the right of the individual to control his own body.

This code also recognizes that the risk must be weighed against the expected benefit, and that unnecessary pain and suffering must be avoided.

This code recognizes that doctors should avoid actions that injure human patients.

The principles established by this code for medical practice now have been extended into general codes of medical ethics.

---

The Nuremberg Code (1947)

THE NUREMBERG CODE

1. The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be

so situated as to be able to exercise free power of choice, without the intervention of any element

of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and

should have sufficient knowledge and comprehension of the elements of the subject matter

involved, as to enable him to make an understanding and enlightened decision. This latter

element requires that, before the acceptance of an affirmative decision by the experimental

subject, there should be made known to him the nature, duration, and purpose of the experiment;

the method and means by which it is to be conducted; all inconveniences and hazards reasonably

to be expected; and the effects upon his health or person, which may possibly come from his

participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society,

unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation

and a knowledge of the natural history of the disease or other problem under study, that the

anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental

suffering and injury.

5. No experiment should be conducted, where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the

experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian

importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest

degree of skill and care should be required through all stages of the experiment of those who

conduct or engage in the experiment.

9. During the course of the experiment, the human subject should be at liberty to bring the

experiment to an end, if he has reached the physical or mental state, where continuation of the

experiment seemed to him to be impossible.

10. During the course of the experiment, the scientist in charge must be prepared to terminate

the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith,

superior skill and careful judgement required of him, that a continuation of the experiment is

likely to result in injury, disability, or death to the experimental subject.

["Trials of War Criminals before the Nuremberg Military Tribunals under Control Council Law

No. 10", Vol. 2, pp. 181-182. Washington, D.C.: U.S. Government Printing Office, 1949

Honorable Board member,

I am asking you to OPPOSE any mandate on Covid shots for children as a requirement to attend K-12 public schools. Children are at extremely low risk for Covid. There are no long-term studies to document any history of safety. Studies do now document that vaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Thank you,  
Violina Pimonenko

I am aware that you are considering the vaccine requirement for school aged children next week.

I vehemently oppose this.

Children are at a VERY low risk from covid-19 and the vaccine is still too early to know the long term effects.

To make this requirement would CLEARLY be an abuse of power.

I am positive that hoards of parents would remove their children from public school if this were to move forward.

Please listen to parents and do not make this a mandatory requirement.

Thank you for your consideration,

Please know that I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105. If for no other reason, the potential risk of children being harmed by covid-19 is much less than the potential harm that may come from the "vaccine." We still have no idea what the long term risks are from such vaccination.

Thank you,

Robert O'Bannan

Subject: Immunization criteria

External Email

Washington State Board of Health member,

I believe the Covid vaccine should not be a requirement for children to attend school or childcare in this state.

The science and data show that children are at very low risk for contracting or transmitting Covid or any of its variants. CDC data shows that since Jan 2020, in the state of WA 10 children (age 0-17) have died with (not from) Covid. As unfortunate as that is, it is less than the number of WA children dying of the flu on an average year.

Deciding to vaccinate a child against a virus with a 99.7% overall survival rate is the parent's responsibility, not that of the State.

A vaccine requirement would also be an infringement upon the religious freedom of people of faith in WA State. Section 11 of our state constitution states "Absolute freedom of conscience in all matters of religious sentiment, belief and worship, shall be guaranteed to every individual, and no one shall be molested or disturbed in person or property on account of religion . . ."

Thank you.

Subject: OPPOSE AGENDA ITEM #8

External Email

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates, PERIOD. The science does NOT support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals. Children are statistically at ZERO risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. ([www.fda.gov/media/151710/download...the](http://www.fda.gov/media/151710/download...the) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710> required studies on children will not even be completed until May 31, 2027!!!!!! And that is only one of the required pediatric assessments!) There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed. STOP USING OUR CHILDREN AS TEST SUBJECTS!!!

Sincerely,

Amy Voges

Subject: Potential Vaccine Mandate for School Entry

External Email

Dear Members,

I am writing as a parent of school aged children that have burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why.

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extreme detrimental and profound on OUR children and our future.

Sincerely,

Sarah Karr

Subject: Mandatory vaccinations for school age children

External Email

Dear Ms. Donahoe

As I understand, the BOH is considering the issue of mandatory vaccination for school age children.

I, as a parent of 4, respectfully ask that you postpone any mandates till further studies have been done.

There are many scientists and researchers that have concerns about the efficacy and actual safety of these vaccines. The amount of VAERS data reporting is quite alarming and should be considered in any decision regarding forcibly injecting a vaccine into a population that shows such a lack of actually being at risk of serious illness.

Some of the voices asking questions include:

Dr. Peter McCullough- developed a protocol of early treatment to prevent the seriousness of Covid 19.

Dr. Judy Mikovitz- a leading researcher in the HIV/AIDS field.

Dr. Robert Malone- Chief architect of the mRNA platform technology that is being used for one of the experimental vaccines.

These researchers are highly regarded in their fields and their concerns have been silenced.

The rush to vaccinate the entire population of the United States and the silencing of dissenting opinions, causes me to question what actually is the agenda behind it.

To publicly mandate vaccination for any citizen of the US, is a violation of their civil rights. I do not intend to follow any mandate regarding these vaccines and respectfully ask the Board of Health table this mandate till there is further scientific review.

Thank you

Tony Kearns

Subject: COVID 19 schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thanks,  
John

Subject: Comment on upcoming presentation of proposed policies

External Email

Hello,

I am a Washington State resident and have been made aware of the proposed policies to be presented on January 12th.

I am writing to register my horror and emphatic opposition to both mandated Covid-19 vaccines for school attendance and involuntary placement in quarantine camps for those who resist complying with human medical experimentation which is unconstitutional and breaks the Nuremberg Code.

The loss of bodily autonomy is a very serious thing and to this point has been relegated to communist, socialist and Marxist regimes, not free republics.

I strongly urge you to consider what the enforcement of these WAC codes would mean for our free society. Because Covid-19 is a treatable and low risk illness for most individuals - especially children, these actions would be absolutely unnecessary and contrary to our state and federal constitutions, resulting in the loss of freedom for millions of individuals.

I would also ask you to consider the severity of breaking the Nuremberg Code. Because the Covid-19 injection is still an experimental drug, it falls under its jurisdiction. All human medical experimentation is to be conducted with voluntary informed consent. Those involved in forcing a person against his or her will to participate in medical experimentation are subject to the penalties of crimes against humanity. Please recognize that those seeking to enact these proposed WAC codes are culpable.

Respectfully submitted,

Debbie MacInnis

Subject: No! to new COVID policies

External Email

To whom it may concern:

As a constituent of Washington state I wanted my opinion to be clearly presented to those making unconstitutional policies in our state. I am completely against all the new proposed Covid policies including but not limited to: allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. I also am against requiring COVID-19 injections as part of school immunization. The government was never created to be able to tell us what to do and decide the course of our life for us; rather it is the people (which is me) that have the right to tell the government (you) what I want done, and the government is to carry those deeds out. There has been enough overstep, cheating, lying, and deceit from our government in Washington state. Stand for right, truth, and freedom!

To whom it may concern,  
I am a parent of two bright boys that love school! Unfortunately for them I don't allow them in public school with the mandates and have homeschooled the last two years. With the new vaccine mandate going to vote they may never get the chance to go to public school.  
It is a parents choice what goes into their childrens bodies and no one else's.  
Because of a flu you want to jeopardize so many young kids. Listen to the parents! Let it be a choice!!

Subject: I support Petition 11

External Email

To whom it may concern:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring that anyone take an EUA product or licensed product that has not yet completed phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shot mandates because each person needs to weigh their medical their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-7 it is 0.00002 (99.998% survival rate) which is statistically a zero percent death rate. Beyond that, when you consider that most that most hospitalizations for the young are with Covid-19 and not for Covid-19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of the Covid-19 vaccine adverse reactions than of serious Covid-19 illness. We must protect our young before we consider self-protection.

Sincerely,

Charyl Baziak

To Whom It May Concern;

As a mother, entrepreneur, and taxpaying citizen of the State of Washington, I am both disgusted and appalled that the upcoming discussion to remove a medical freedom of choice is even being considered. It seems the dominant party of the State would support the freedom of a woman's choice to abort (MURDER) an unborn fetus with no freedom inside the womb of it's own. So I'll keep my words brief... if it is required for children to get vaccinated for the COVID-19 virus, I WILL remove my children from public school, and homeschool my children. I refuse to inject my children with a poison, developed in haste to a virus no more deadly than the seasonal flu, and treatable with natural remedies. I have faith that I am making the most informed decision for my children and my family.

Sincerely,  
Concerned Voting and Taxpaying Citizen

Subject: "No!" To adding Covid-19 vaccine mandates to requirement list

External Email

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1.

The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.

2. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.

3. According to CDC & WHO data, their could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.

4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by dis-enrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family values.

Kathy Varela

Dan and Kathy

Wanted to express my disgust with even the THOUGHT of this proposition. These vaccines were meant to be VOLUNTARY from the start. Now, not only have they been FORCED on the majority of adults, you are trying to FORCE them on CHILDREN!!! The risks of this vaccine to children FAR outweigh the severity of the virus. They are no more at risk with this virus than the common flu. This is NOT smallpox, measles, polio, etc., that had a much higher risk of harm.

You might also want to think about how much money your schools are going to lose, because I GUARANTEE there will be a mass exodus from the public school system if this is implemented!

Thank you for your time,

I am strongly opposed to adding covid vaccine for children to the WAC-246-105-030

Covid vaccines remain under emergency use authorization and the rules that apply to that status

Children under 18 yr have extremely low clinical risk from covid infection

Children have a much higher risk of adverse event to the vaccine- including life long health issues

Research supporting child vaccinations safety is flawed by the methods used to collect it  
Covid vaccines do NOT prevent getting it or transmitting it

DO NOT subject our children's health to a failed vaccine and the future unknown risks it may cause

(This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Teresa Johnston

Subject: NO to mandatory vaccines for school age children

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Subject: No forced detention

External Email

Dear Health Officials,

As passionately as I can say it, no forced detention.

The delta between one dose and fully vaccinated is closing.

>70% is fully vaccinated

7 Day rolling average Jan 2021 was 34;

Dec 4 2021- 7 day rolling death average is down to 12

Washington State is winning this war.

Please do not authorize this draconian practice.

Sincerely,

John Shuffield

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I would also like to denounce involuntary detainment of people at quarantine sites, a completely draconian measure, and completely unnecessary.

Asking individuals to quarantine at home with COVID is perfectly understandable, and just as effective as putting people behind fences. We all know that there is something far more diabolical behind this measure than simply keeping others from COVID. I adjure you in the strong name of Jesus Christ to NOT follow through with this, because each one of you will be answering for this to the King of Kings and Lord of Lords, both in this life and the life to come.

Thank you for your kind attention to this email.

Ernest Quinn

Subject: AGAINST FASCIST POLICIES WAC 246-100 AND WAC 246-105  
Importance: High

External Email

Hello,

I am writing this email to demand the fascist policies WAC 246-105 and WAC 246-100 to be ceased from existence.

Whoever decided to create them, as well as to propose them to the public is cruel and evil in their nature just like the policies themselves.

History shows that whenever government officers were allowed to affect people's lives in such a manner these policies allow them, there were millions of people who were denied their basic human rights of choice and freedom. Because of the same in their nature policies, 6 million Jews were brutally killed, and millions more of different were traumatized and suffering. And if we are to give these policies even a chance for existence, we will be repeating the same mistake here in the United States, the country of the free.

We CANNOT and SHOULD NOT allow policies like that to exist. It is against human rights, rights given to us by God himself, the rights protected by the constitution. The constitution is designed to limit the government because absolute power corrupts absolutely, and our leaders are already corrupted. However, these proposed policies override the constitution and provide health officers absolute power, which makes these policies UNCONSTITUTIONAL.

It is clear that the pandemic, mainly created as a political tool to place power in the hand

of just a few cruel people, has nothing to do with the proposed policies that cease human freedom. We all saw that somehow states like Florida, where people continued their normal lives, and somehow had even fewer cases of COVID compared to the Marxist states like California. It is not a question of protecting people's health because it is to be taken care of by each person individually by each individual, not by the government. That is, I am raising my voice AGAINST these UNCONSTITUTIONAL, UNHUMAN, IMMORAL, EVIL IN THEIR NATURE policies. I am raising my voice as my God-given constitutional right for the sake of the future of this generation, the generation of my future children and their children, and for the sake of this country.

I expect to hear a personal reply to this email, as it is my right and your obligation to read it thoroughly to take action upon the people you represent and whose constitutional rights you are to protect.

Best Regards,

Aleksandra Ankuda

My husband and I both oppose WAC 246-100 rulemaking that would expand any authority to quarantine individuals/families involuntarily. We also oppose adding a Covid 19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The more we learn about Covid, the more we see that the emphasis should be on developing treatments for a virus that will always be with us rather than demanding vaccination with a substance that doesn't work to prevent/eradicate the virus.

Subject: Chapter 246-105 WAC

External Email

In response to automated email generated by Kaitlyn Donahoe's office due to maternity leave, I am forwarding my email to you.

Dear Washington State Health Board Member(s),

Regarding Chapter 246-105 WAC and the upcoming meeting scheduled for January 12, 2022, as a life-long citizen of Washington state and a parent, I am vehemently opposed to the requirement of the covid vaccination for school attendance for school-age children. Firstly, the covid vaccine(s) have not been subject to the years of testing and research normally applied to vaccinations; therefore any long term effects or reactions are unknown. This should bring extreme caution, especially when administered to young

children and their developing bodies. Children are not test subjects. Secondly, it is scientifically known that children are in a low-risk category from death and even contracting covid itself. Additionally, these vaccines do not prevent the spread of covid, also proven in testing and science. We the people are continually told to "follow the science." I am respectfully asking that you do the same. Lastly, it is imperative to acknowledge parental rights. Daily I make decisions for my children and have done so without the government. Medical treatment and health care is not one-size-fits-all. How one child may physically react to a vaccine or any medical treatment does not equate another child positively/adversely reacting the same. may/may not adversely react. As you also (should) know, the Against Medical Advice form is made available to all those refusing medical treatment after counsel from their care provider. This is one's right and the legality of the form cannot be ignored, either by medical professionals or those in government. Personal and religious exemptions must also be recognized and honored. It's called personal autonomy and being a competent parent, raising my child(ren), it is my duty and responsibility to them, not the government, to provide the utmost, best care to their individual, unique, personal health/interest and well-being.

To simplify and reiterate, I am categorically against the covid vaccination requirement for school attendance. I anticipate my voice being heard and represented well, and the decision(s) made regarding this subject to be corrected-NO to covid vaccines for children.

Subject: Public Comment for Jan. 12th meeting regarding Chapter 246- 100 and 246-105 WAC

External Email

I wonder if you are surprised by the outpouring of emails and comments concerning your January 12th meeting. I can explain.

I have been a Washington State resident for almost thirty years, a business owner and a parent. I voted solidly Democratic until I started to see "behind the curtain" during Obama's presidency. When Covid came, the floor I had thought solid -- the foundations of our democracy, free speech, bodily autonomy, informed consent, even liberty -- began to disintegrate.

And now here we are: pharmaceutical companies, big tech and massive investment firms solidly control the discourse on all tv stations, newspapers, and radio. (1) World renown doctors and scientists who were immensely respected in 2019 have been branded pariahs and quacks. (2) "Science" has been corrupted into a tool of powerful interests who care nothing about public health: why else ignore the many safe and effective treatments for COVID in favor of a dangerous and ineffective (but very lucrative) vaccine? (3) Actually that is a dangerous question: why are the vaccines so critical to the agenda being promoted so uniformly around the world?

The answer lies in the digital currencies that are being quickly brought on line in country after country, and tied into the vaccine passports/health passes/green pass -- it has many names, but the application is the same: connect your health data with your money, use 5G and AI to monitor everyone's social interactions and every financial transaction, and get rich off all the new data flowing into the system and exile the non-compliant from society altogether. (4)

It sounds insane. It *is* insane. But if you investigate -- if you actually read and listen to the scientists, doctors, the vaccine-injured, the philosophers and parents and so many others who are being censored by the mainstream media -- you will see that fact after fact show that we are already well down this trajectory.

You can help stop it. Remove WAC 246-100-040, 246-100-045, 246-100-050, and 246-100-055 from the Washington Administrative Code. The fact that almost every state in the Union has "relocation camps" standing by, staffed and ready to receive the unvaccinated or otherwise "problematic," shows that these codes are far too dangerous to be on the books. You, on the Washington Board of Health, can remove the legal underpinning of what may well otherwise be used to create another Auschwitz. (5)

I fully support the petition currently before the Board proposed by Xavier Figueroa and Informed Choice WA to ban any EUA product or any product which has not yet completed Phase 3 clinical trials. Further, I also say: all vaccines must be both optional and given

ONLY with full consent, which requires dissenting opinions be heard and considered.

As much as Washington State has been vaccinated, note that instead of getting more and more fully vaccinated citizens, we have reached the peak of the vaccination curve and will soon have fewer and fewer up-to-date residents. People are starting to realize that the vaccines are preventing neither transmission nor infection and fewer and fewer will choose boosters. Instead of clamping down ever harder, please read and watch some of the many articles and videos linked below.

Hi Kaitlyn,

Thank you for all you do to keep Washingtonians healthy. I am emailing you to urge you NOT to require the children of our state to receive the covid vaccine in order to attend school.

Thank you for your time.

Kandice

[https://www.thecentersquare.com/indiana/indiana-s-top-doc-more-people-hospitalized-now-than-before-the-vaccine/article\\_0516bc1a-696b-11ec-b1e9-73e279cd9b89.html#tncms-source=infinity-scroll-summary-sticky-siderail-latest](https://www.thecentersquare.com/indiana/indiana-s-top-doc-more-people-hospitalized-now-than-before-the-vaccine/article_0516bc1a-696b-11ec-b1e9-73e279cd9b89.html#tncms-source=infinity-scroll-summary-sticky-siderail-latest) Yes, this article ultimately pushes the Covid vaccine but can you read between the lines?

Hospitals are full. Certainly they have Covid pneumonia patients but that's not the story here. There is a significant increase in non Covid hospitalizations and we are told it is because of delayed care due to lockdowns. What if it's due to Covid vaccine injuries? The total number of hospitalizations in Indiana are the highest they've seen in 5 years. Some hospitals at 120% capacity. Way higher than last year when we had the virus and no vaccine. What if the vaccine is causing this rise in hospitalizations? I cannot prove it but also you cannot prove that this is an incorrect assumption. Only time and investigation will reveal the truth.

Meanwhile you are deciding whether or not to strip Americans of basic rights. Why? People are not dying in the streets. The Covid vaccine appears to not stop infection nor transmission, why insist-through law enforcement- that people comply with failed vaccine? If a person wants the vaccine then they can get one. If a person does not get the vaccine it's ok too. Perhaps the vaccine minimizes Covid infection so that's up to the individual. The Covid vaccine will never itself achieve herd immunity. It can't. It does not stop the virus.

The Covid vaccine has a huge risk ratio. Just look at the VAERS data knowing only a fraction of events are reported. You must take a step back. This tyrannical action is wrong and you should not play a part in it. No. Vote no on all of it.

LIBERTY FOR WASHINGTONIANS.

Please do not force our school children to be vaccinated. It already violates personal choice and is absolutely not necessary for that age group. Thanks for your consideration in this matter.

Subject: Requirements

External Email

I, Kati Spencer, a registered Voter and resident of Spokane WA wholeheartedly oppose any and all CoVID vaccine requirements for any minor child in WA state. I oppose any medical treatment, medical examination or counseling (WAC 246-100) without parental consent. I will not allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC-246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) This includes the requirement of the covid-19 injection as a part of school immunization requirements using WAC 246-105.

It is an infringement on our rights as citizens and our ability to do what is best for our children and ourselves. The government doesn't have the right to tell us as parents or US citizens what we can and cannot do with our own bodies. We have the right to medical autonomy and it needs to stay that way. The government needs to get out of our medical decisions.

This is an atrocious abuse of power and we will not stand for it.

Subject: No vaccine mandates for kids!

External Email

Kaitlyn,

As you probably surmise from the subject line of this message, I am writing to express my concern about the BOH meeting to discuss adding a vaccine requirement to attend public school. The evidence is increasingly clear that people under 40yrs old face greater risk of harm from the shots than from natural infection.

With the emergence of Omicron as a common cold-like infection for virtually everyone, this is the time when we need to be discussing the timeline of peeling away restrictions, mandates, and all of the things that we've been harming our kids with over these last two years, NOT adding more useless and potentially harmful mandates. No sane society uses their children as a shield to make adults feel safer.

The idea that parents are having to worry about making a decision whether to pull their child out of school or inject their child with a vaccine that might harm them is abhorrent. The very idea of mandating a vaccine for children that has no long-term data on possible negative effects (for any age group) is amoral on the face of it.

This isn't about being "anti-vax", the latest weapon word. This is a simple risk/benefit calculation.

Every other required vaccine for kids underwent a much longer approval process, and then an additional 6-16 years (depending on the vaccine) of use in the general population, before they were ever considered as a requirement to enter public schools. We have no long term safety data on these mRNA vaccines!

Now is the time to publicly speak up against this single-minded approach to dealing with the pandemic. I personally think that they are a marvel of technology and I am glad that they are available for those who stand to benefit from them. However, our Governor and those of you overseeing the Board of Health seem to have lost the script. You need to know that this is the wrong way to proceed. I worry that they will set back trust in all vaccines for a generation if too many kids are being harmed by these new shots. Trust in our public health agencies is already at an all-time low and that is dangerous.

Please, I am asking you to back away from this idea.

I also encourage you to read this post by Dr. Vinay Prasad. He has been a voice of moderation and reason throughout the pandemic and he is deeply concerned that we may be rushing into something that we might regret.

<https://vinayprasadmmpm.substack.com/p/uk-now-reports-myocarditis-stratified>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvinayprasadmmpm.substack.com/now-reports-myocarditis-stratified&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C1bbb79553a4b486e279608d9d16bb64>>

If you have 30 minutes of extra time then you might also listen to this interview between

Zuckerberg and Fauci from way back near the beginning of the pandemic. If you do, then pay particularly close attention to what Fauci says regarding the process by which the vaccine safety profiles need to be established. Then ask yourself if the science changed, or whether something else happened.

<https://m.facebook.com/zuck/videos/live-with-dr-anthony-fauci-the-uss-top-infectious-disease-expert-to-learn-about-/10111683294466031/>

I am hopeful that the madness and hysteria of the last two years is beginning to fall apart and that we might begin to work towards a healthier situation for our kids. They have been harmed enough by our pandemic policies. I just hope that Washington State isn't the last place to get the memo. Most of the country seems to have figured it out already and I am astonished that we still seem stuck in some weird fearful version of 2020.

What in the heck are you all thinking?? Enough is enough. It is time to learn to live with this virus, focus on protecting the most vulnerable, and leave the rest of our society alone.

Thank you,  
Erik

I am an expert in counterterrorism, having commanded multiple organizations defending against war actions from our nation's enemies. Globalist organizations have overtly stated the intent to use the pandemic to drive a socialist agenda and to cause indiscriminate harm to civilians in order to make the nation susceptible to a social agenda. This is a well known war plan called the Cloward Piven plan and has been studied by military officers for decades. The major objective of the Cloward Piven plan is to drive overwhelming demand on national infrastructure and welfare in order to collapse the system through bankruptcy. A quick glance at M1 money supply shows the US is on an unsustainable banking path. Even worse, indiscriminate harm to civilians (economic, psychological, physical) is a war crime. Importantly, aiding a war crime is also a war crime. Media orgs and government officials that aid war crimes in progress may be responsible for committing war crimes. Some elements of the government apparatus appear to have been co-opted by globalist orgs with the intent to cause instability in the United States. This means that the Covid situation, which is serious, is being exploited for an other than health objective, and the organizations are stating this objective in the open. The World Economic Forum is a primary nexus of both political organizations and corporations and the Executive Chairman has made overt statements indicating the desire to exploit the pandemic for social objectives. He has even written a book (The Great Reset), which I highly recommend for reading, since it specifies in great detail the rise of technocracy and social agendas surrounding the pandemic. This social impact economy appears to encompass a social credit score which has been pioneered in China, and even the prototype system has had significant abuses. The county and state are encouraged to distance themselves from this agenda as lawsuits and criminal investigations are actively underway.

"The pandemic represents a rare but narrow window of opportunity to reflect, reimagine, and reset our world" - Professor Klaus Schwab, Founder and Executive Chairman, World Economic Forum

<https://www.weforum.org/agenda/2020/06/now-is-the-time-for-a-great-reset/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.weforum.org%2Fagenda%2Fnow-is-the-time-for-a-great-reset%2F&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C6315c227737c427f3a9e08d9d16a390>

Social Credit Score in China. Highly encouraged to watch.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=evBzPwCdeHI>

I am happy to work with the state or county on research if there is any ambiguity on the above legality and data in particular. The unification of personal data and overt attempts to force participation in medical experiments is highly illegal and the county and state are encouraged to avoid participation in order to avoid being involved in possible criminal proceedings. Feel free to reach out to me at your convenience.

To the WA state superintendent of schools, WA state secretary of health and their boards,

I implore you as a mom of boys and a person who has worked with children for 32 years, do not make the experimental covid vaccine mandatory for school attendance. I am NOT anti-vaccine. My children and I are fully vaccinated with every tried and true vaccine. I am confident we will not get tetanus, whooping cough, measles, etc. These vaccines have been vetted and long term studies have been done to maximize effectiveness and minimize side effects.

There have been numerous studies around the world showing that the covid vaccine is much more harmful than covid itself to boys. At minimum, the UK found that boys are 6 times more likely to suffer myocarditis from the vaccine than covid itself. Since the vax has been approved for kids 5 to 11, 1 in 100 has a documented adverse reaction in VAERS. These numbers have never been seen and the drug still allowed to be used.

Please do not mandate the covid vaccine for all children. Children are at greater risk of harm from vax side effects than covid itself.

Thank you for your time and consideration,  
Patty Johanson

I want to thank you for all your efforts to keep everyone safe in our community. I know this pandemic has been hard on everyone. I am writing as a parent to plead with you not to mandate any Covid 19 vaccines for K-12 schools. Covid 19 vaccines are not a one size fits all. My son who is 15 had Covid 2x and had no symptoms either time. He has a blood clotting gene that causes blood clots. For him to take the Covid 19 vaccination its more of a risk to take the vaccine than not. It has already been proven that the survival rate for kids who get Covid are over 99% . They are the lowest at risk. their are so many side effects associated with this vaccination such as myocarditis in teenage boys. As a parent with his medical issues I know what's best for him. He is best off not taking the vaccine. I say this with no disrespect but the school board, the superintendent, the governor, and the Health department do not know what's best for my child with his medical issues. So once again this vaccine is not a one size fits all. Each parent should decide what's best for their child.

If this vaccine does get mandated for school aged kids are you willing to take the responsibility if the side effects reported to VAERS happen to our children? Are you willing to take the responsibility if any child dies as a result of this vaccine? I guarantee you that if anything happens to our children parents will tie you up in the court systems for life and make sure justice is served for their child if any thing happens as a result from the vaccine.

So in conclusion as a parent with my sons medical condition a vaccine would do more harm to him. I am begging you to please let vaccines be up to the parents .

Thank you Margo

Hello,

I am writing this email in hopes that I can reach the correct people who are making decisions out side of their rights. I DO NOT believe that it is ok for you to decide what I put into my child's body!!!

That is not your decision to make and parents should not have to decide between putting an experimental vaccine into their child or to send them to public school. To say we cannot send our children to school without the vaccine....the school by the way that MY TAXES pay for is illegal and horrible.

Our children are not guinea pigs to be tested on. If I cannot send my child to school then there should be a law put into place so I can get out of paying the taxes on something I am not utilizing.

Please do not take a parents right to decided what is best for their child unless you are willing to come into our home and pay the consequences for what may happen to them. Kids need to be in school but they should not be forced to get an experimental vaccine!!!!

Thank you for listening and I hope you guys make the right choice. Washington state used to be the best place to live and now I am afraid many will be forced to leave because lawmakers think they have the right to make choices for us in what is supposed to be a FREE land!

Sincerely,  
A concerned tax payer that pays your paycheck!

I am against this vaccination being required. First off children are at extremely low risk of for covid and the vaccines are still on emergency use authorization. My own grandchildren caught covid are were only sick 24-36 hours. Even being sick they had less worrisome symtoms then when they catch a cold.

Thank you, Virginia McManus

Subject: Oppose mandate of experimental gene therapy covid shots for our school age children!

External Email

I am very opposed to mandating the experimental gene therapy shot on our children!!! It has not been properly tested for adverse events and has show numerous prospective adverse effects on those who have taken it. I know more people who have died and had serious negative consequences from it than for the condition it is supposed to offer protection for.

I am horrified that this is even under consideration and will advise others to not support officials who back this overreach into a personal health decision.

Sincerely

Subject: WA BOH Meeting Jan 12 2022

External Email

Good Afternoon Representatives,

I am writing to OPPOSE proposed policies:

That allow local health officers to use law enforcement (WAc 246-100-070) that are aimed to force an emergency order to involuntary detain a person or group of persons (families) to be isolated in quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed policies:

that would include COVID-19 injections as part of school immunization requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

To whom it may concern,

I appreciate this opportunity to write and let my voice be heard about something I hold very true and serious with my family. I have two kids in the Mead school district and a third that will hopefully be attending. My family has already had and overcome Covid 19 Virus. For my kids it was very very minor. All three had one afternoon where they didn't feel good and the next day they all were symptomless and feeling good. It was a little bit more work for us parents to fight it off but we came through and are doing good. No hospitals, no urgent care needed. Just prayer and vitamins. We as a family stand firm in our natural immune systems gifted by God and will continue to stay with God and vitamins. I cannot and will not take something for myself NOR give something to my kids that has not had years of clinical trials and testing to prove it is safe with no side effects. It is proven children have over a 99% survival rate. It makes no sense to give our children something man made that has side effects when our kids have such strong immune systems. My wife and I will not give our kids this "vaccine." We will file for religious exemption and even pull our kids out of public school if needed.

Thank you for taking your time to read our concerns. I would like to remind you God sees all and knows all. He will not let attacks on His children go without His judgment. May we all seek truth and discernment for the days ahead. I am praying for you all.

Subject: Schools in the State of Washington

External Email

Hello, Ms. Donahoe,

I have a child in a middle school in Washington. I would like it to be made known that I am greatly concerned about the possibility of mandating that school-aged children be required to receive a COVID-19 shot in order to attend school.

First, as has been made abundantly clear, these COVID-19 shots have been completely ineffective in preventing the spread of the corona virus.

Second, the only available shots in the U.S. are those under experimental use authorization by the FDA. This means that there are no fully vetted vaccines for the COVID-19 virus available.

Third, there is evidence that these shots have created adverse reactions in many younger people who have received the inoculations. These adverse reactions, like myocarditis, cause irreparable damage to the heart of children which have these consequences.

Please do not approve any action which would mandate that school-aged children would be required to receive these COVID-19 shots. Doing so would, in my opinion, place the Washington State Board of Health in a place of enmity with myself and other citizens of the State of Washington.

Thank you for your time in reading this message.

Sincerely,

Neil Berry

To: Donahoe, Kaitlyn N (SBOH)  
Cc:  
Subject: VOTE NO FOR COVID VACCINE SCHOOL REQUIREMENT

External Email

To Whom It May Concern:

My name is Christina Hooge and I am the mother of 3 small children. As a parent, I am abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic spike proteins the injection causes, resulting in possible permanent damage to my child's critical organs, such as the brain, nervous system, heart and blood vessels, reproductive system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. We will homeschool or move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Christina Hooge

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

Working age people are dying in greater numbers. Not from Covid. What could it be? Occam's razor says entities should not be multiplied more than necessary. What new event happened last year? Oh yes, the experimental vaccines happened. This cannot be proven, yet. Still you are to determine whether school age children must accept the Covid vaccine to remain in school. Make no mistake, this is a heavy burden. I understand there are powerful forces which are full speed ahead for this requirement but this is short sighted! Too much unknown! Several factors look negative and this type of news is suppressed. Stand strong for our children. No requirement! It's just too soon to know about it's safety in a body with potentially 70 more years to live. PLEASE VOTE NO

These vaccines have an unproven safety record. Our governor can say they are "safe", is that enough for you to historically harm Washington's children with your decision? Sorry, no one can give 100% claim to safety and THE RISK DOES NOT EXCEED THE BENEFITS. No, the answer must be no.

The vaccines are only EUA, emergency use authorization, not FDA approved for permanent use

There are no long-term studies to document ANY history of safety

Studies DO now document that vaccinated and unvaccinated can both get and transmit Covid, therefore

The vaccine DOES NOT STOP the spread of the disease

Subject: covid vaccines

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest against recommending a vaccine for Covid for school aged children who attend school in Washington State. I am a 36-year veteran teacher. I am against imposing this vaccine on our children. I believe this to be a horrible abuse of power.

The available Covid vaccines are still of an experimental nature and have not been tested to prove their value and lack of long-term consequences. Never have we been forced to inject our children with a vaccine that has not undergone years of safety trials. Never have we forced children to receive a vaccine for a disease that primarily poses a risk for adults with comorbidities or are elderly.

School aged children have a 99.9998% survival rate from Covid. The vaccines do not provide protection against getting Covid as is seen by the number of "breakthrough" cases of those already vaccinated and boosted. Why require it?

The vaccines currently available are still only EUAs. Congress permitted the FDA to grant Experimental Use Authorization (EUAs) so that any American in a personal emergency can choose whether to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments.

It is irresponsible to impose covid vaccines on children when there are side effects as grave as myocarditis already being reported and no long-term tests have been done. Parents must be able to make this decision for their children. You must honor their right to choose what is best. You must not marginalize parents' rights to take care of their children.

I live in Spokane, and I believe my side of the state is certainly underrepresented on this panel. Please look long and hard at what long term consequences of this kind of recommendation could have on our children, our school system and our communities.

Sincerely,

Barbara Miller

Dear Ms Donahoe,

I am taking the time to write to respectfully implore you to protect the health of Washington children. What is the rush to make it mandatory to have children vaccinated against Covid - 19? This medical intervention has barely been marketed for a year. Can you please show us data demonstrating the long term safety of this vaccine and if this is such a good thing, why is it necessary to violate parental sovereignty and force this in the lives of children. Who do parents contact if their child suffers one of the, already known, side effects of these shots?

Recently, the only FDA approved version - the Cominarty product - was determined to "not be the same as the Pfizer" product that is available in the US. Resulting in the fact that none of these shots have received FDA approval. You are asking, yea, requiring all parents to subject their precious, innocent, children to an experimental medical product that has NO long term, safety data. This is brand new vaccine technology. I have never seen the first generation of any NEW technology "get it perfectly right." Why would we think this new technology is any different?

Recently both the CDC and Dr. Fauci both admitted that this vaccine does not prevent infection or prevent spread of Covid - what is the point then of requiring this, at the risk of experimenting on our society's most precious commodity - and our most precious future - our children? Did we as a society not learn anything from the WWII holocaust? Medical experiments were forcibly conducted on vulnerable people. Did we not learn anything from the 40 year long Tuskegee experiments? Again, medical experiments were forced on unsuspecting humans - to their dire harm.

Washington parents are smart, caring people who love their children. The vast majority of them will evaluate the options and do what they sincerely believe is in their child's best interest. Why would the Board of Health force this decision on these vulnerable children? How is this NOT discriminatory and unAmerican?

Respectfully submitted to you,

John Wolfe, PhD

External Email

Dear Kaitlyn,

Please do not mandate these experimental vaccines on our young healthy children. It has been proven that children are not at risk of dying from covid or even catching it (let alone spreading it). Vaccination is a personal choice that should be left to the parent/ guardian to decide for themselves. This is stated in the Nuremberg codes that were written to protect us from these very circumstances. There is not currently an emergency that gives our government the right to enforce these mandates.

Sincerely,  
Sonja Hild

Subject: Proposed policy to include covid-19 injections as part of school vaccination requirements

External Email

Dear Kaitlyn,

I am writing to ask you to take a stand against any legislation or policy containing language which would require covid-19 injections or any vaccination for children to be able to go to school. Mandates and requirements like these are physically, mentally and emotionally unhealthy. They are culturally insensitive, cause mental anguish to many, trample on families' religious rights as well as an individual's bodily autonomy from the government.

I ask you to consider that experimental Covid Injections currently available are not a "one size fits all" solution to end the spread of Covid or lessen its effects. Please look out for the Health of every Washingtonian as you consider that the proposed policy to include covid-19 injections as school immunization requirements is truly atrocious on all levels pertaining to health, and to put such policy in place is a complete abuse of the power you have been given.

I implore you to consider the science and the latest data as you read the following facts before you make such an egregious decision:

\* Pursuant to the CDC, the fatality rate for children from COVID-19 nationwide is .00003%.

\* Pursuant to the CDC, the CDC Director and Dr. Fauci in his New York Times November 12 interview, the COVID-19 vaccine will not prevent infection or transmission of the COVID-19 virus, nor will it prevent serious injury, hospitalization or death any longer. Therefore, the vaccine is no longer the best tool for prevention of transmission. It is now a medical treatment, at best, hence it cannot be mandated as treatments are a personal medical choice pursuant to the state and federal Constitutions.

\* Pursuant to the FDA, the vaccine manufacturers, and multiple scientists across the nation and the world, these vaccines pose grave risks of severe myocarditis, blood clotting, and neurological damage to name a few, predominantly prevalent in adolescents. As such, the risks of taking the vaccine strongly and significantly outweigh the benefits especially as it pertains to the pediatric community.

Thank you for your service to our state. I will be praying for the board's decision making process and for truth and wisdom to be your foundation.

Sincerely,

Nicole Shuts

#### External Email

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school. It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children. We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated. There are no covid-19 vaccines that have been fully FDA approved available in the United States. There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:  
What You Need to Know

\* Cases of myocarditis reported to the Vaccine Adverse <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=...>> Event Reporting System (VAERS) external icon have occurred:

\* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

- \* More often after the second dose
- \* Usually within a week of vaccination

\* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

\* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

- \* Chest pain
- \* Shortness of breath
- \* Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

External Email

Hello I am a parent of 4 children in the White River School District in Buckley WA. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. This is such a violation of parental rights. This decision should be left to the parents, not the government.

Here are just a few reasons why I'm against the vaccine...

1) No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F%3A%2F%2Fchildrenshealthdefense.org>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2) Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3) There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4) The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research

5) Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person

gets the shots, they may never be able to achieve full natural immunity in the future. Please read this for 5 studies that show children already have robust natural immunity to this virus. Hands-off, CDC and Pfizer: Children are to be considered already COVID 'vaccinated' – Opinion – America's Frontline Doctors (<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2Famericasfrontlinedoctors.org>)

6) No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

7) You may "enjoy" reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate (NNTV) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? ([substack.com](http://substack.com))

8) In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl ([rumble.com](http://rumble.com))

9) It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website. Adverse Reactions | Real Not Rare These are real people. Their stories are real. At a minimum, why are these being hidden and why isn't Pfizer investigating why people have these types of reactions? If you only have time to watch one of these, how about this one: Ernest Ramirez (17 yr old son) ([realnotrare.com](http://realnotrare.com)) Do you really want to force these injections on innocent children? Do you want to cause this kind of pain to parents?

I've listened to hours and hours of testimony and information from people on both sides of this issue and the only support I've heard from adults in support of COVID vaccines for children is that they will allow us to move past this pandemic and allow a return to normalcy.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Aside from all the research showing the risks and ineffectiveness of the vaccine, it really

boils down to this: the decision to vaccinate my children should lie with ME, their parent. The government Is overreaching again. The government should not be making decisions on what is best for my children. God entrusted my children to me when he created them, and he gave ME the responsibility to decide what is best for them.

I would really appreciate your support in this matter. Pls allow decision making for our children to rest with the parent.

Sincerely,

Michelle Kinney

Subject: Our Life Decisions, Not Yours

External Email

I am writing to express my extreme dissatisfaction in the required and mandated vaccinations that you are imposing on not only our children, but on the people in Washington State. Vaccinations should be tested and proved as safe; these are not. The long-term results and implications are still yet inconclusive. There is no documentation that having a covid vaccination prevents you from getting covid - in fact it is the opposite. Many, many, MANY people who are vaccinated continue to get covid, so clearly the vaccination is not doing it's job. A vaccination is supposed to PREVENT you from contracting a disease - this covid vaccination does not do that! This vaccination is weakening peoples' immune system and should not be required at a government level. This is a personal choice issue and governmental agencies have NO BUSINESS being involved with the (our, as parents) decision. Childrens' immune systems are strong. Their rate of infection with Covid is low and their hospitalization is lower. As this vaccination is still in its trial stages, please do not inject, or force our children to be injected, with an unknown long-term substance that we do not know, nor will we know the effects of the vaccination, for years to come. Stay out of our homes and the governing our children. It is our jobs to monitor our children, what they inject or ingest into their systems, and their beliefs. Please, do your jobs and not ours.

Subject: Please say NO to Covid shots for schoolchildren!

External Email

Dear Kaitlyn,

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

I am a concerned mother in Washington state and I strongly oppose any mandatory covid 19 vaccines for anyone including children in school (elementary-college). This coercion, pressure and force is a violation of the Nuremberg code and this needs to be taken seriously and people that don't should be held accountable. None of these shots are FDA approved and mass vaccinations and mass compliance is not the answer to the problems we face in our society. Stop assaulting our children and respect their bodies and their rights to live in a free country where they are respected and free to choose what is best for them. Our children do not need to grow up living in fear and being forced to inject anything into their bodies, especially against their will. This must stop immediately. Do better for our children. They are our future generation and we need to help prepare them and respect them and empower them through these difficult times not force them to inject substances into their bodies with unknown side effects that could harm them and violate their rights.

Sincerely,  
Brienne Alexie

Subject: Mandated Children Vaccinations

External Email

I absolutely oppose mandating school children vaccinations for these reasons:

- 1.) Need: Our children do not NEED this vaccine as they are in the lowest risk of death category with a 99.9% survival rate.
- 2.) Risk: The vaccinations are still under emergency use protocols, and have not been properly studied for long term effects. Data is showing our children are more likely to have an adverse reaction to the vaccine than be harmed from Covid.
- 2.) Efficaci: The data shows the vaccine does not prevent people or kids from getting Omicron, and Omicron is actually a better protector from the Delta variant than the vaccine.

Subject: Upcoming Board Decision

External Email

Greetings,

I am writing to have my statement included for in the upcoming board decision on requiring Covid vaccines for children attending public school.

I am in strong disapproval of the mandate for children under 18 to be required to receive the COVID vaccine. I believe children should have the right to access public education without being required to receive a vaccination that is still in emergency use standing, and does not have sufficient long term data to provide parent with adequate safety and efficacy information.

Please make the moral and right decision to allow parents to decide whether or not to provide their child with a COVID-19 vaccination.

Sincerely,  
Aimee Bloom

Subject: WA State Board of Health Voting to Add Covid 19 Vaccine requirement to schools.

External Email

Hello board members,

I am writing to you as I am a very concerned parent regarding the possibility of this Covid 19 vaccine becoming mandatory for my children to attend school. I live in Bellevue and have two children in the schools there. I know there is much controversy surrounding this topic, therefore, besides explaining my concern for my children's safety, there is the fact that myself as well as many, many other parents that would have to unenroll my children should be become a requirement.

I listen closely to the facts that are out there and respect and hold on to what was spoke on October 26th, 2021 at the FDA Advisory Board Meeting. It is my hope that you are familiar with the results of this board meeting as certainly it is not about making every child be vaccinated. They actually "do not" recommend this vaccine for healthy children, the approval for children was to make it available to those that have a compromised immune system and there is no proof that this vaccine will prevent transmission. If you have not seen this Board Meeting video, you should for sure watch it as thousands of parents have and are not comfortable having something put into their children's arm that has not been tested....and....the virus has mutated into mild cold like symptoms which only enrich our children's immune system making them stronger.

Please, please consider all the facts and what is best for our children. We all know that it is having them in school, learning, learning socialization and being kids.

I have always thought how great it would be if some of the zillion hours spent on TV on everything horrible about this virus would be spent on listing and talking about how we can help our immune become strong to be able to fight off any cold, flu etc...,zinc, Vitamin C etc. etc. etc. But nothing – to me that would be helping our children and the World.

Thank you for reading this.

I have my fingers crossed that you will make the right decision!

Thank you!

Subject: Prevent draconian measures!

External Email

Hi Kaitlyn,

Please stand up against the push to mandate vaccines for school children. There is just not enough data yet (length of time) to truly know if this vaccine can be safe for all children. We need longer to know if this vaccine poses any long term side effects. Please allow parents to make this very important decision based on what they think is best for their own children. Also the spread of covid is not suppressed by those who have been vaccinated so there is no need for people to vaccinate their children for other peoples benefit.

Please stand against any push to force vaccination and testing on the population of Washington. Enacting these kind of measures is unAmerican and violates the liberty people should have to make decisions regarding their own bodies.

Praying for you to have the wisdom of heaven, Elizabeth Hug

Subject: Mandatory Vaccination of Children

External Email

Dear Kaitlyn,

I am urging you to push back against the mandatory vaccination of children in order for them to attend public school. This is a decision that should be left up to the parents and the doctors of those who might be required to be vaccinated. There are concerns by medical experts that, in some cases, the vaccinations have actually caused harm to individuals. There are concerns that those who have already had Covid can have adverse affects from a booster. The data indicates that young, healthy children who have gotten Covid have not had any more problems than those who have come down with normal seasonal flues and colds.

Please do the right thing and vote no against this mandatory vaccination policy.

Anita Sieg

I would appreciate it if you would oppose this requirement. At this point and time there is not enough science to weigh against possible loss of life or health issues for children. The science shows that a vax for the elderly is more effective. Each child that is damaged or possibly dies will be upon the Wa State Board of Health and I myself would not want to carry that burden. Again, I urge you to look at both sides of the information and not to be pressured into voting for this. Renee Sweetman

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.  
Michelle in Bellingham, WA

Subject: Kaitlyn-Listen What the FDA Advisory Board Says About Mandating COVID Vaccine for Children

External Email

Hello Kaitlyn,

I am writing as a concerned parent of two children in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

\*\*\*Link to 1-hour highlights video

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=qdhoBVRM&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C721b431dc90146ac08ff08d9d14ba89>>  
here.

- \* Advisors do not recommend healthy children get this vaccine
- \* Advisors do not recommend this vaccine be required to attend school
- \* Doctors do not expect the vaccine to prevent infection
- \* They have no data or expectations it will prevent transmission
- \* Based on current data and modeling, the risks of the vaccine to children outweigh the benefits
- \* Children's vaccine is based on the alpha variant and has little to no protection against Delta or Omicron
- \* Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

\* Advisors very concerned about increase in myocarditis and pericarditis especially in young boys

\* Approval was given based on the vaccine being available to immune compromised children

I will leave you with a quote from Dr.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hsph.harvard.edu%2Feric-rubin%2F&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C721b431dc90146ac08ff08d9d14ba89>

Eric Rubin, an adjunct professor of immunology and infectious diseases at Harvard University and editor-in-chief of the New England Journal of Medicine. Referring to approving the Pfizer vaccine for 5-11 year olds, "We'll never know how safe it is until we start using it"

Thank you in advance,  
LaRena Archer

Subject: Re: January 12, 2022 meeting

External Email

Washington State Board of Health:

\* I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

COVID has had less than 1% fatality rate, and much lower now with the Omicron variant and with most people either being vaccinated, having natural immunity or both.

\* I also oppose adding a COVID-19 vaccination to the WAC 246-105 schedule of required vaccines for children to attend schools.

1. Minors have a risk from COVID that approaches zero for either fatalities or serious effects.

2. The COVID shots are still experimental and have no long-term safety studies. Do you really want to take the responsibility for the possibility of serious harm to children in the future?

3. COVID shots have been found to cause myocarditis in young men, much more than is caused by the disease itself.

4. COVID shots do not stop infection or transmission.

\* I support the Petition under Item 11 on the agenda, asking the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,  
Beth Daranciang, MPH

Subject: Please Oppose injections added to school age children

External Email

To whom it may concern,  
I Valentina Harris, oppose the use of law enforcement to be used to detain those who are unvaccinated for covid injections.  
We are not second class citizens. Many of us have natural immunity. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and overall health. These are experimental shots. They are not safe!! It is against the law to mandate them. You will all be held accountable when children will be having life-threatening injuries and side effects. You will be held responsible. All parents will make sure of it.

These vaccines are not safe. They have never been used on humans before. There has been a filing in the International Crimes Court the ICC by Dr Michael Yerdon and others for crimes against humanity by pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus. Vaccinated still get it and spread it. These do not work, they will only harm the children. Please Do the right thing and oppose these WACs from being added to laws.

I am writing to express concern Agenda Item 11 on the January 12 agenda (found at <https://sboh.wa.gov/Portals/7/Doc/Meetings/2022/Jan%2012/WSBOH-Agenda-2022-01-12-Final.pdf?ver=2022-01-05-175008-690>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FDoc%2FMeetings%2F2022%2FJan%2012%2FWSBOH-Agenda-2022-01-12-Final.pdf%3Fver%3D2022-01-05-175008-690&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbf47d8e3c949437168a408d9d21797e4%7C11d0e211>>

#### Agenda Item 9. Rule-Making Petition - Chapter 246.105.

As stated in WAC 246-105, "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers." Based on the stated purpose of this WAC, I'm concerned about the proposed rule change requiring students to receive a Covid-19 vaccine for several reasons:

1. The vaccine is not a perfect fix to this illness. Vaccinated persons are contracting and transmitting Covid-19; we are not looking at an illness or a vaccine that meets the purpose of the code since Covid-19 is not prevented by vaccination like polio, meningitis, or the myriad of other illnesses currently requiring a vaccine to attend public school. A vaccine mandate for this illness is not applicable under this WAC and should not be considered by the WA BOH.

2. Vaccination for Covid-19 is not a one-size-fits all solution for children, and the disease itself continues to be an incredibly low-risk illness for children. It has only recently come out of FDA testing with approval for children, and many families are still cautious and concerned about its long-term effects. When considering this, parents should have the authority to make educated decisions for their children while working with their child's healthcare provider, rather than a top-down authoritarian decision for all children in the state of Washington.

3. Similar to the seasonal flu, health experts in the US and around the world have shared that Covid-19 will shift from a pandemic illness to an endemic illness in the near future. Forcing vaccines for an illness that is rapidly shifting to look more like the common cold is unnecessary and an overreach of government authority.

4. Additionally, many in the community are concerned that a requirement of this nature could have unintended consequences for low-income and minority groups who are hesitant to vaccinate.

5. Finally, our state government continues to impede on the individual rights and liberties of the residents of the great state of Washington, which I love dearly. The Board of Health's consideration of this policy change is one more step towards removing choice. Please consider the long term effects that this may cause for all choices that our residents enjoy. Less regulation provides greater freedom. My hope is that we can swing back to a more moderate approach to the health and well-being of all Washingtonians, providing education and choice as the key ingredients to a healthy state.

Thank you for your consideration of these concerns,

To whom it may concern;

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. I do not think any of these things are okay. This is tyranny in my book and my health, the health of my children is not up to the government or up for debate.

January 7, 2022

To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, and teacher. I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to decide on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms and dads, as moms, we gave birth to these children that happen to

reside in WA state. As parents we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified teacher in the schools and if you mandate this, I would have to consider other alternatives, if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents, educators and school staff, they didn't sign up for what you are proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022: "What are civil rights?"

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination. The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

state and local social and health services agencies, hospitals, clinics, nursing homes, insurers who are participating in the Marketplaces and receiving premium tax credits, and other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was

In response to automated email generated by Kaitlyn Donahoe's office due to maternity leave, I am forwarding my email to you.

Dear Washington State Health Board Member(s),

Regarding Chapter 246-105 WAC and the upcoming meeting scheduled for January 12, 2022, as a life-long citizen of Washington state and a parent, I am vehemently opposed to the requirement of the covid vaccination for school attendance for school-age children. Firstly, the covid vaccine(s) have not been subject to the years of testing and research normally applied to vaccinations; therefore any long term effects or reactions are unknown. This should bring extreme caution, especially when administered to young children and their developing bodies. Children are not test subjects. Secondly, it is scientifically known that children are in a low-risk category from death and even contracting covid itself. Additionally, these vaccines do not prevent the spread of covid, also proven in testing and science. We the people are continually told to "follow the science." I am respectfully asking that you do the same. Lastly, it is imperative to acknowledge parental rights. Daily I make decisions for my children and have done so without the government. Medical treatment and health care is not one-size-fits-all. How one child may physically react to a vaccine or any medical treatment does not equate another child positively/adversely reacting the same. may/may not adversely react. As you also (should) know, the Against Medical Advice form is made available to all those refusing medical treatment after counsel from their care provider. This is one's right and the legality of the form cannot be ignored, either by medical professionals or those in

government. Personal and religious exemptions must also be recognized and honored. It's called personal autonomy and being a competent parent, raising my child(ren), it is my duty and responsibility to them, not the government, to provide the utmost, best care to their individual, unique, personal health/interest and well-being.

To simplify and reiterate, I am categorically against the covid vaccination requirement for school attendance. I anticipate my voice being heard and represented well, and the decision(s) made regarding this subject to be corrected-NO to covid vaccines for children.

Tammy Forslund

To whom it may concern,

Regarding WAC 246-105

I want to remind you that children are at an extremely low risk for Covid. The vaccines are still ONLY EUA! There are no long-term studies to document ANY history of safety. Studies do now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently DOES NOT stop the spread of the virus. In which case this would make no common sense to impose.

Regarding WAC 246-100

This is insane and stripping families of our rights. You have no authority to force any of this on us! If this happens my family will leave Washington state along with many others.

Please listen to the community!

Best Regards,

Lindsay Ghaderi

Hello,

I opposes WAC 246-100 Rule-making that would expand any authority to involuntarily quarantine individuals. I also oppose adding a COVID-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Note: These vaccines do not prevent getting or spreading COVID-19, are more of a health threat than COVID-19 ([openvaers.com](http://openvaers.com)), the CDC has even admitted the PCR test are not valid and should no longer be used and there is proof of alternative treatments that work. So this meeting the WSBOH is having makes no sense and is seriously insane!

Sincerely,  
Kimberly Melvin (98002 legal/tax payer)

To The Board Members of the WA state Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual prevention. No one can tell me what the effects may be on my child in 5 years or 10 years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for

themselves.

Thank you for your time.

Dear Washington State Board of Health,

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools

Thankfully there is mounting evidence that this rise in cases due to the Omicron Variant is also seeing a massive decline in hospitalizations or even serious illness as noted in several medical papers, including this pre-print study [Comparison of outcomes from COVID infection in pediatric and adult patients before and after the emergence of Omicron](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.01.06.22010001) | medRxiv

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.01.06.22010001>  
This is INCREDIBLY good news. This study funded by several national health agencies/organizations found that this variant is indeed milder and attenuating when compared to Delta. Those age 17 and younger were 4-5 times LESS likely to require ER visits or hospitalizations. This is cause for celebration and means that a mandated vaccine would not be beneficial for under the age of 18, and should be left to the medical discretion of the parents and their doctors.

Additionally, the history of mandated vaccines to attend school have also come with the ability to allow parents and doctors to exempt the child from any vaccine, for religious or medical reasons. And any of those vaccines that are now in place to attend school, underwent vigorous and longterm trails before being recommend for children. There has not been the bare minimum of a 2 year retrospective study done on any covid vaccine. That has been the ethical standard for the last 50 years. Typically it takes from 6-16 years to approve a vaccine for children.

With the Delta variant, children statistically had a zero percent chance of death or serious illness, according to CDC's own experts, therefore it would be ethically wrong to mandate a vaccine for children with the new updated studies showing a 4-5 times less hospitalizations for this omicron variant.

Thank you for your time and consideration,

Charmaine Eppler

□Iregards to the petition to add the Covid-19 "shot" to WAC 246-105, I am completely opposed to this action. First off, this is not a "vaccine" per it's origin definition of "preventing disease". As stated in WAC 246-105-010 <tel:246-105-010> , the rule is "to protect children and the public against certain vaccine-preventable diseases." Covid is not a "vaccine-preventable" disease and there is no "vaccine" or "shot" that prevents people from contracting Covid. Both vaccinated and unvaccinated alike can and do contract Covid-19. To make this a requirement when it does NOT prevent anyone from contacting Covid is completely ludicrous and frankly insane. It does not prevent the

spread of the virus. I have over 20 close contacts who have all contracted Covid after being fully vaccinated (and some boosted). What exactly are we "preventing"? Possible severe disease when they DO catch it? It is well known that children are less at risk of becoming seriously ill when they do contract it and it is well known that a big contributor to severe illness from Covid is due to obesity and co-morbidities. As a parent, it is my responsibility for the health and welfare of my child. If I believe there is more risk of LIFE LONG injuries from the Covid 19 shot than there is overcoming Covid, that is my decision to make for myself and my children. I know my child's health. Everyone has a right to choose for their own children whether the shot is right for them or not based on their own health factors. Same with the flu shot. The Covid shot has no more effect of preventing the spread of Covid than the flu shot does in preventing the spread of the flu. It doesn't! It is also complete insanity that we are only testing unvaccinated students in school in order to participate in school sports when it has been known for the better part of a year now that being "vaccinated" does not prevent you from contracting the virus. Why then are only unvaccinated athletes tested in school when both vaccinated and unvaccinated can both catch it and spread it? Further, why are we still masking our children when they are sitting at their desks in school? If it is ok for everyone to take off their masks after walking 5 feet to their table at a restaurant, why can students not take off their masks when seated at school? All of this is so incredibly non-sensical. OPPOSED OPPOSED OPPOSED!

January 12, 2022 Meeting -

#### 9. Rules Hearing Continuance-

Communicable and Other Certain

Diseases, Chapter 246-100 WAC

- Testimony Will Be Taken

- Possible Action

"The Median COVID-19 infection fatality rate was 0.27%."

In February 2020 the predictions of the Infection Fatality Rate (IFR), or "death rate" from COVID were estimated by the World Health Organization (WHO) to be 3.4%. We were told that COVID was much more deadly than the seasonal flu and we must "flatten the curve" to avoid overwhelming the hospitals. Seven months later, the WHO acknowledges in its own report that "infection fatality rates tended to be much lower than estimates made earlier in the pandemic". The WHO's report found the "median COVID infection fatality rate was 0.27%". Other studies support this finding with IFRs of between .32% - .01%. By comparison the flu has an IFR of .1% - .2%. The former Director of Israel's Health Ministry said, "You're not more at risk of dying of coronavirus than the flu."

With all the reports of COVID deaths, it is important to understand how that term is defined. At the start of the COVID outbreak, the WHO created a very broad

definition of what is considered to be a "COVID death", and this definition was adopted worldwide. According to their definition a COVID death is one where a person had a confirmed or suspected case of COVID at any time, prior to death. This means that what is reported as a COVID death may have another cause, like cancer, heart condition, or accident. Center for Disease Control (CDC) reported that only about 6% of COVID deaths had no comorbidity. This means that 94% of COVID deaths had additional contributing causes of death listed on the death certificate. So even the deaths that are reported as COVID death, are mostly deaths that occurred with COVID and not because of COVID .

The original predictions for infections, hospitalizations and deaths resulting from COVID that led numerous governments to lockdown and implement panic-driven policies, were made in a report from Imperial College led by Neil Ferguson. The report, presented in mid-March 2020, predicted that absent any controls there would be 510,000 deaths in Great Britain and 2.2 million in the U.S. within the next three months. In an appendix, issued days later, the report listed its predictions for other countries including Sweden.

Sweden is significant, because it was the only western country not to lockdown in those initial 7 months, it was predicted that they would suffer a minimum of 66,000 deaths by June, when in fact they experienced only 5,900 by September. Here, in the only control group to test the validity of the model, we see it overestimated the number of deaths by a factor of 11. In June, Neil Ferguson of the Imperial College admitted that Sweden achieved similar results to the UK without imposing a lockdown.

The police power of quarantine only is possible against ill persons. *Jew Ho v. Williamson* 103 F. 10 (1900) and *Wong Wai v. Williamson* 103 F. 384 (1900)

Taking decisions out of the control of patients and handing it over to government bureaucrats is harmful and counter-productive. More choice in healthcare leads to greater numbers of empowered patients.

WAC, Immunization Criteria, Child Care  
and School Entry  
—Possible Action

“A team of Johns Hopkins researchers found a mortality rate of zero among children without a preexisting medical condition such as leukemia.”

Kids are significantly less affected by COVID compared to adults, and mortality from COVID is considered rare. The Infection Fatality Rate (IFR) is very low in younger children, only 0.002% at age 10 compared to 1.4% at age 65. This very low mortality rate is for all children, including those with pre-existing medical conditions. A team of Johns Hopkins researchers found a mortality rate of zero among children without a pre-existing medical condition such as leukemia. When comparing to the seasonal flu, children are at a much greater risk of hospitalization due to seasonal flu vs COVID.

While COVID itself is of very minimal risk to children’s health, some justify instituting restrictions on children because they are more likely to spread the virus to adults. However, after examining the data from U.S. schools, the infection rate among both children and school staff was significantly less than the infection rate in the broader community. Nor was there an increase of cases following the opening of schools. A study found that school teachers teaching in Swedish schools during COVID outbreaks were not hospitalized more than other professions. In a study of NC school districts with a total student population of around 90 thousand, 773 infections were traced to interactions outside of school, while only 32 infections from within and no instances of child to adult transmission in school were found at all.

Kids have been less affected by COVID itself, but did not escape the damage caused by the COVID regulations including isolation, mask mandates, and school closures. The evidence was coming in fairly strong even at the start of the lockdowns policies, in May of 2020 just a couple months into the restrictive measures, one of Canada’s top children’s hospitals reported a 100 percent increase in admissions due to suicide attempts and a 200 percent increase in admissions from drug abuse. This was not limited to Canada, similar reports were made in other countries and throughout the COVID restrictions. There are numerous linkages between social-distancing policies and deteriorating mental health in children, including domestic violence, reduced social interactions with friends, reduced physical activities, and the guilty feeling that results from being told you may kill someone you love. Some attention has focused on the virtual learning that replaced in-class learning. In MR4q53 for example, 60% of child suicides were linked to online learning. In California an 11 year old killed himself during a

virtual class meeting. The CDC published a report showing the proportion of emergency department visits related to mental health were up nationwide, 24% for children aged 5 to 11 and 31% for children aged 12 to 17 from April through October, compared with the same time period last year. By December of 2020 suicide was the number one cause of death in children aged 10 to 14 in the state of Ohio.

As the scale of the damage was becoming clear, some medical experts pleaded with policy-maker to change course, open the schools and leave the children out of the harsh restrictions. Most notably was the collection of medical experts that supported the Barrington Declaration which recommended the COVID response to be focused on the high-risk population, and freeing up of the low-risk population - the declaration was signed by over 48 000 medical professionals. Those recommendations largely fell on deaf ears with the early and courageous exception made by the Prime Minister of Norway who conceded that she made the decisions to close schools out of fear.

In places where schools were allowed to open between infection waves, numerous jurisdictions required children who have been in close proximity to an infected person to "self-isolate" for 14 days. This policy of solitary confinement is perhaps the harshest of the COVID restrictions. A doctor of infectious diseases wrote: "This is cruel punishment for a child, especially for younger children, 4-10 years old, shutting a child off from their parents and siblings for up to 14 days in this manner could produce significant and long-lasting emotional and psychological effects."

"I don't understand how any health-care professional has moved so far away from the fundamentals of public health and of doing no harm that they would think that basically incarcerating a child in a room for 14 days is in any way justified," said Dr. Martha Fulford, an infectious diseases physician at Hamilton Health Science who focuses on pediatrics.

Perhaps the most unnoticed damage to kids resulting from panic-driven COVID policies are to the ones who were never born. The U.S. experienced a 4% drop in births in 2020, numbering about 97,000 in fewer children being born, 2021 is expected to see an ever greater reduction estimated at 300,000. Israel with its overall rising birth rates, experienced a 2.5% decrease in births numbering 4709 fewer births in 2020 compared to the previous year. When compared to the 2609 increased deaths, a stunning conclusion is revealed - the panic resulted in almost twice as many fewer births than the virus may have caused in increased deaths.

“Reported deaths in connection to the COVID vaccines totaled more than all vaccines-related deaths over the past 31 years, combined.”

With the start of the mass vaccination in January 2021, numerous reports of serious adverse reactions following the injections were being reported from all over the world and still more were being cataloged.

The government acknowledged that there would be significant amounts of people with mild short-term side-effects but that it was better to take the shot anyway <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Famericasfrontlinedoctors.org%2Ffacts%2F%23footnote-137&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C53fefbb6e695438bfb6708d9d20bd837%7C11d0e217>>. The more serious adverse reactions around the new vaccines were dismissed as having no proven link to the vaccination.

All-cause mortality rates began to climb in several countries with the start of vaccinations. As time passed, concerned doctors began voicing their objections. Of particular concern were the adverse effects on younger people, since they are at a much lower risk from COVID. The Israeli Public Council of experts called for suspending vaccinations of people under 30, as did a group of physicians from Sweden, and America’s Frontline Doctors (AFLDS) in the U.S.

By September the VAERS system, whose function is to report on adverse reactions from all vaccines in the U.S., tallied over 15900 deaths associated with the COVID vaccines alone. Reported deaths in connection to the Covid vaccines totaled more than all vaccines-related deaths over the past 31 years, combined. A similar phenomenon was observed with the European reporting system, and in England. Not only deaths are being widely reported, but other serious adverse reactions that led to permanent disability, hospitalization, or threatened the patient’s life. Since these cases are self reported, and have not been confirmed as having been caused by the vaccination, it is difficult to say exactly how many are actually a result of the vaccine. However that is the case for all reports to the systems, and with the COVID vaccine there is a dramatic increase. It’s worthy to note that If these suspected vaccine deaths were cataloged using the same criteria as COVID deaths are cataloged, they would all be considered vaccine deaths.

Other vaccines with much safer profiles have been pulled from the market

in the past. For example, the Rotavirus vaccine was suspended by the US authorities in the late 1990s after 100 babies became ill, and one died - out of approximately one million doses. The vaccine was pulled from the market despite the fact that officials stated that "no firm link had been drawn between the vaccine and the children's illnesses". The 1976 swine flu vaccine was pulled from the market after 500 people contracted Guillain-Barre syndrome, and was associated with 25 deaths out of 43 million doses (1 in 17 million). There was no conclusive proof that these relatively few deaths were a result of the vaccine, yet the government halted the entire vaccination campaign. As of September 2021 there are over 18,000 deaths in question, yet the government still maintains the COVID vaccines are safe.

Please take this information into consideration before approving these policies.

Sincerely,

Amber Gallegos

External Email

Dear Mrs. Davis,

I Erin Kranzler oppose the use of law enforcement to be used to detain those who are unvaccinated.

We are not second class citizens. Many of us have natural immunity by now. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and over all health. You will be held accountable if it comes out in yeases to come that the vaccine is not safe.

There has been a filing in the International Crimes Court the ICC by dr Michael Yerdon and others for crimes against humanity bt pushing this vaccine and with holding life

saving treatments. The vaccine is not the only way to combat this virus.

Please do the right thing and oppose these WACs from being added to laws.

January 7, 2022

Washington State Board of Health

PO Box 47990

Olympia, WA 98504-7990

Dear Board Members,

It has been brought to our attention that Washington State Board of Health is proposing policies that concern our neighbors and communities statewide in regards to the SARS-CoV-2 virus that causes coronavirus 2019 disease, specifically quarantine and isolation regulations titled "WAC 246-100 Communicable and certain other diseases." Another policy discussed is to include another immunization to the requirements of children attending school. This policy is titled "WAC 246-105 Immunization of child care and school children against certain vaccine preventable diseases."

Use of quarantine and isolation regulations as well as school immunization requirement for SAR-CoV-2 is baseless and criminal under RCW 9A.40.040 Unlawful Imprisonment, which occurs when a person knowingly restrains another person, and 18 USC Section 1621, Perjury, False Statements and Obstruction Perjury, which is the intentional act of

swearing a false oath or falsifying an affirmation to tell the truth, whether spoken or in writing, concerning matters material to an official proceeding.

To elaborate, Washington State's Data Dashboard states Molecular testing was performed beginning February 2020 and Antigen testing began June 2020. The PCR test is now no longer used for testing purposes as stated by the CDC. The Emergency Use Authorization has been withdrawn. The PCR test instruction manual states that the test that was developed did not use a quantified virus isolate because it was not available. A cellular concoction to mimic clinical specimen was used.

According to Kary Mullis, biochemist and inventor of the PCR test, "PCR, simply put, is a thermal cycling method used to make up to billions of copies of a specific DNA sample, making it large enough to study. PCR is an indispensable technique with a broad variety of applications including biomedical research and criminal forensics. PCR basically takes a sample of your cells and amplifies any DNA to look for 'viral sequences', i.e. bits of non-human DNA that seem to match parts of a known viral genome. The problem is the test is known not to work. It uses 'amplification' which means taking a very, very tiny amount of DNA and growing it exponentially until it can be analyzed. Obviously any minute contaminations in the sample will also be amplified leading to potentially gross errors of discovery. Additionally, it's only looking for partial viral sequences, not whole genomes, so identifying a single pathogen is next to impossible even if you ignore the other issues. The idea these kits can isolate a specific virus like COVID-19 is nonsense."

Washington State has been using erroneous PCR Molecular testing procedures for 1 year and 11 months. This equates to all of the testing data collected is incorrect for 1 year and 11 months. In addition, the Antigen tests that have been used by Washington State since June of 2020 are just as inconsistent. The CDC advised Americans to take a PCR test to confirm if their Antigen test came back negative. The Antigen tests were used in comparison to the PCR to determine its accuracy. The erroneous Antigen test procedures have been used by Washington State now for 1 year and 7 months.

What test is left for Washington State to use to verify an individual has the SARS-CoV-2 strain (2019-nCoV/USA-WA1/2020)? The remaining test procedure that has been used is the Antibody Test, but this is to detect past infection, it is not used for detecting an active infection of SARS-CoV-2.

If the testing supplies provide erroneous results, how does Washington State intend to prove not only that a child has been infected with SARS-CoV-2 but also that the immunization has also prevented an infection? Washington State's policy on SARS-CoV-2 and coronavirus-19 disease is indisputably baseless. According to the regulations of the U.S. Department of Health & Human Services, the public health emergency and emergency use authorization of all SARS-CoV-2 and coronavirus-19 disease related medical products are on borrowed time. Based off of the Center for Disease Control and Federal Drug Administration, The Washington State Board of Health does not have a reliable test procedure to prove that anyone is actively infected with SARS-CoV-2.

As said by the great Martin Luther King, Jr, "You express a great deal of anxiety over our willingness to break laws. This is certainly a legitimate concern. Since we so diligently urge people to obey the Supreme Court's decision of 1954 outlawing segregation in the public schools, it is rather strange and paradoxical to find us consciously breaking laws. One may well ask, "How can you advocate breaking some laws and obeying others?" The answer is found in the fact that there are two types of laws: there are just laws, and there are unjust laws. I would agree with St. Augustine that "An unjust law is no law at all." Now, what is the difference between the two? How does one determine when a law is just or unjust? A just law is a man-made code that squares with the moral law, or the law of God. An unjust law is a code that is out of harmony with the moral law. To put it in the terms of St. Thomas Aquinas, an unjust law is a human law that is not rooted in eternal and natural law. Any law that uplifts human personality is just. Any law that degrades human personality is unjust. All segregation statutes are unjust because segregation distorts the soul and damages the personality. It gives the segregator a false sense of superiority and the segregated a false sense of inferiority. To use the words of Martin Buber, the great Jewish philosopher, segregation substitutes an "I - it" relationship for the "I - thou" relationship and ends up relegating persons to the status of things. So segregation is not only politically, economically, and sociologically unsound, but it is morally wrong and sinful. Paul Tillich has said that sin is separation. Isn't segregation an existential expression of man's tragic separation, an expression of his awful estrangement, his terrible sinfulness? So I can urge men to obey the 1954 decision of the Supreme Court because it is morally right, and I can urge them to disobey segregation ordinances because they are morally wrong."

## Intended Use

The CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel is a real-time RT-PCR test intended for the qualitative detection of nucleic acid from SARS-CoV-2 in upper and lower respiratory specimens (such as nasopharyngeal or oropharyngeal swabs, sputum, lower respiratory tract aspirates, bronchoalveolar lavage, and nasopharyngeal wash/aspirate or nasal aspirate) collected from individuals suspected of COVID-19 by their healthcare provider<sup>1</sup>.

This test is also for the qualitative detection of nucleic acid from the SARS-CoV-2 in pooled samples containing up to four of the individual upper respiratory swab specimens (nasopharyngeal (NP), oropharyngeal (OP), NP/OP combined, or nasal swabs) that were collected using individual vials containing transport media from individuals suspected of COVID-19 by their healthcare provider. Negative results from pooled testing should not be treated as definitive. If a patient's clinical signs and symptoms are inconsistent with a negative result or results are necessary for patient management, then the patient should be considered for individual testing. Specimens included in pools with a positive, inconclusive, or invalid result must be tested individually prior to reporting a result. Specimens with low viral loads may not be detected in sample pools due to the decreased sensitivity of pooled testing.

Testing is limited to laboratories certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, that meet the requirements to perform high complexity tests.

Results are for the identification of SARS-CoV-2 RNA. SARS-CoV-2 RNA is generally detectable in upper and lower respiratory specimens during infection. Positive results are indicative of active infection with SARS-CoV-2 but do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease. Laboratories within the United States and its territories are required to report all results to the appropriate public health authorities.

Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for treatment or other patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.

Testing with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel is intended for use by trained laboratory personnel who are proficient in performing real-time RT-PCR assays. The CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel is only for use under a Food and Drug Administration's Emergency Use Authorization.

---

<sup>1</sup> For this EUA, a healthcare provider includes, but is not limited to, physicians, nurses, pharmacists, technologists, laboratory directors, epidemiologists, or any other practitioners or allied health professionals.

## Summary and Explanation

An outbreak of pneumonia of unknown etiology in Wuhan City, Hubei Province, China was initially reported to WHO on December 31, 2019. Chinese authorities identified a novel coronavirus (2019-nCoV, also referred to as SARS-CoV-2), which has resulted in millions of confirmed human infections globally. Cases of asymptomatic infection, mild illness, severe illness, and deaths have been reported.

The CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel is a molecular *in vitro* diagnostic test that aids in the detection and diagnosis of SARS-CoV-2 infection and is based on widely used nucleic acid amplification technology. The product contains oligonucleotide primers and dual-labeled hydrolysis probes (TaqMan®) and control material used in rRT-PCR for the *in vitro* qualitative detection of 2019-nCoV RNA in respiratory specimens.

The term “qualified laboratories” refers to laboratories in which all users, analysts, and any person reporting results from use of this device should be trained to perform and interpret the results from this procedure by a competent instructor prior to use.

## Principles of the Procedure

The oligonucleotide primers and probes for detection of 2019-nCoV were selected from regions of the virus nucleocapsid (N) gene. The panel is designed for specific detection of SARS-CoV-2 (two primer/probe sets). An additional primer/probe set to detect the human RNase P gene (RP) in control samples and clinical specimens is also included in the panel.

RNA isolated and purified from upper and lower respiratory specimens is reverse transcribed to cDNA and subsequently amplified in the Applied Biosystems 7500 Fast Dx Real-Time PCR Instrument with SDS version 1.4 software. In the process, the probe anneals to a specific target sequence located between the forward and reverse primers. During the extension phase of the PCR cycle, the 5' nuclease activity of Taq polymerase degrades the probe, causing the reporter dye to separate from the quencher dye, generating a fluorescent signal. With each cycle, additional reporter dye molecules are cleaved from their respective probes, increasing the fluorescence intensity. Fluorescence intensity is monitored at each PCR cycle by Applied Biosystems 7500 Fast Dx Real-Time PCR System with SDS version 1.4 software.

Detection of viral RNA not only aids in the diagnosis of illness but also provides epidemiological and surveillance information.

## Summary of Preparation and Testing Process

## Materials Required (Provided)

Note: CDC will maintain on its website a list of commercially available lots of primer and probe sets and/or positive control materials that are acceptable alternatives to the CDC primer and probe set and/or positive control included in the Diagnostic Panel. Only material distributed through the CDC International Reagent Resource and specific lots of material posted to the CDC website are acceptable for use with this assay under CDC's Emergency Use Authorization.

This list of acceptable alternative lots of primer and probe materials and/or positive control materials will be available at:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab/virus-requests.html>

**Human Specimen Control (HSC)**

| <b>Description</b>                                                                                                                                                                                                                                                                                                               | <b>Quantity</b>   | <b>CDC Catalog No.</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|------------------------|
| Manufactured by CDC. For use as a nucleic acid extraction procedural control to demonstrate successful recovery of nucleic acid as well as extraction reagent integrity. The HSC consists of noninfectious (beta-Propiolactone treated) cultured human cell material supplied as a liquid suspended in 0.01 M PBS at pH 7.2-7.4. | 10 vials x 500 µL | KT0189                 |

Acceptable alternatives to HSC:

- Negative human specimen material: Laboratories may prepare a volume of human specimen material (e.g., human sera or pooled leftover negative respiratory specimens) to extract and run alongside clinical samples as an extraction control. This material should be prepared in sufficient volume to be used across multiple runs. Material should be tested prior to use as the extraction control to ensure it generates the expected results for the HSC listed in these instructions for use.
- Contrived human specimen material: Laboratories may prepare contrived human specimen materials by suspending any human cell line (e.g., A549, HeLa, or 293) in PBS. This material should be prepared in sufficient volume to be used across multiple runs. Material should be tested prior to use as the extraction control to ensure it generates the expected results for the HSC listed in these instructions for use.

CDC will maintain on its website a list of commercially alternative extraction controls, if applicable, that are acceptable for use with this assay under CDC’s Emergency Use Authorization, at:

<https://www.cdc.gov/coronavirus/2019-nCoV/lab/virus-requests.html>

<sup>1</sup>Equivalence and performance of these extraction platforms for extraction of viral RNA were demonstrated with the CDC Human Influenza Virus Real-Time RT-PCR Diagnostic Panel (K190302). Performance characteristics of these extraction platforms with 2019-nCoV (SARS CoV-2) have not been demonstrated.

<sup>2</sup> CDC has confirmed that the external lysis buffer used with this extraction method is effective for inactivation of SARS-CoV-2.

<sup>3</sup> CDC has compared the concentration of inactivating agent in the lysis buffer used with this extraction method and has determined the concentration to be within the range of concentrations found effective in inactivation of SARS-CoV-2.

#### Alternative to Extraction:

If a laboratory cannot access adequate extraction reagents to support testing demand due to the global shortage of reagents, CDC has evaluated a heat treatment procedure for upper respiratory specimens using the Quantabio UltraPlex 1-Step ToughMix (4X), CG. Though performance was comparable, this method has been evaluated with a limited number of clinical specimens and a potential reduction in sensitivity due to carryover of inhibitory substances or RNA degradation cannot be ruled out. It should only be used when a jurisdiction determines that the testing need is great enough to justify the risk of a potential loss of sensitivity. Heat-treated specimens generating inconclusive or invalid results should be extracted with an authorized extraction method prior to retesting. Details and procedure for the heat treatment alternative to extraction may be found in Appendix A.

### Equipment and Consumables Required (But Not Provided)

- Vortex mixer
- Microcentrifuge
- Micropipettes (2 or 10 µL, 200 µL and 1000 µL)

- Multichannel micropipettes (5-50 µL)
- Racks for 1.5 mL microcentrifuge tubes
- 2 x 96-well -20°C cold blocks
- 7500 Fast Dx Real-Time PCR Systems with SDS 1.4 software (Applied Biosystems; catalog #4406985 or #4406984)
- Extraction systems (instruments): QIAGEN EZ1 Advanced XL, QIAGEN QIAcube, Roche MagNA Pure 24, Roche MagNA Pure 96, Promega Maxwell® RSC 48, Roche MagNA Pure LC, Roche MagNA Pure Compact, bioMérieux easyMAG, and bioMérieux EMAG
- Molecular grade water, nuclease-free
- 10% bleach (1:10 dilution of commercial 5.25-6.0% hypochlorite bleach)
- DNAzap™ (Ambion, cat. #AM9890) or equivalent
- RNase AWAY™ (Fisher Scientific; cat. #21-236-21) or equivalent
- Disposable powder-free gloves and surgical gowns
- Aerosol barrier pipette tips
- 1.5 mL microcentrifuge tubes (DNase/RNase free)
- 0.2 mL PCR reaction plates (Applied Biosystems; catalog #4346906 or #4366932)
- MicroAmp Optical 8-cap Strips (Applied Biosystems; catalog #4323032)

#### Qualifying Alternative Components:

If a laboratory modifies this test by using unauthorized, alternative components (e.g., extraction methods or PCR instruments), the modified test is not authorized under this EUA. FDA's Policy for Diagnostic Tests for Coronavirus Disease-2019 during the Public Health Emergency, updated May 11, 2020, does not change this. As part of this policy, FDA does not intend to object when a laboratory modifies an EUA-authorized test, which could include using unauthorized components, without obtaining an EUA or EUA amendment, where the modified test is validated using a bridging study to the EUA-authorized test.

#### [Warnings and Precautions](#)

- For *in vitro* diagnostic use (IVD).
  - This test has not been FDA cleared or approved; this test has been authorized by FDA under an EUA for use by laboratories certified under CLIA, 42 U.S.C. § 263a, that meet requirements to perform high complexity tests.
  - This test has been authorized only for the detection of nucleic acid from SARS CoV-2, not for any other viruses or pathogens.
  - This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of *in vitro* diagnostic tests for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.
- Follow standard precautions. All patient specimens and positive controls should be considered potentially infectious and handled accordingly.
- Do not eat, drink, smoke, apply cosmetics or handle contact lenses in areas where reagents and human specimens are handled.

- Handle all specimens as if infectious using safe laboratory procedures. Refer to Interim Laboratory Biosafety Guidelines for Handling and Processing Specimens Associated with 2019-nCoV <https://www.cdc.gov/coronavirus/2019-nCoV/lab-biosafety-guidelines.html>.
- Specimen processing should be performed in accordance with national biological safety regulations.
- If infection with 2019-nCoV is suspected based on current clinical and epidemiological screening criteria recommended by public health authorities, specimens should be collected with appropriate infection control precautions.
- Performance characteristics have been determined with human upper respiratory specimens and lower respiratory tract specimens from human patients with signs and symptoms of respiratory infection.
- Perform all manipulations of live virus samples within a Class II (or higher) biological safety cabinet (BSC).
- Use personal protective equipment such as (but not limited to) gloves, eye protection, and lab coats when handling kit reagents while performing this assay and handling materials including samples, reagents, pipettes, and other equipment and reagents.
- Amplification technologies such as PCR are sensitive to accidental introduction of PCR product from previous amplifications reactions. Incorrect results could occur if either the clinical specimen or the real-time reagents used in the amplification step become contaminated by accidental introduction of amplification product (amplicon). Workflow in the laboratory should proceed in a unidirectional manner.
  - Maintain separate areas for assay setup and handling of nucleic acids.
  - Always check the expiration date prior to use. Do not use expired reagents. Do not substitute or mix reagents from different kit lots or from other manufacturers.
  - Change aerosol barrier pipette tips between all manual liquid transfers.
  - During preparation of samples, compliance with good laboratory techniques is essential to minimize the risk of cross-contamination between samples and the inadvertent introduction of nucleases into samples during and after the extraction procedure. Proper aseptic technique should always be used when working with nucleic acids.
  - Maintain separate, dedicated equipment (e.g., pipettes, microcentrifuges) and supplies (e.g., microcentrifuge tubes, pipette tips) for assay setup and handling of extracted nucleic acids.
  - Wear a clean lab coat and powder-free disposable gloves (not previously worn) when setting up assays.
  - Change gloves between samples and whenever contamination is suspected.
  - Keep reagent and reaction tubes capped or covered as much as possible.
  - Primers, probes (including aliquots), and enzyme master mix must be thawed and maintained on a cold block at all times during preparation and use.
  - Work surfaces, pipettes, and centrifuges should be cleaned and decontaminated with cleaning products such as 10% bleach, DNAzap™ and RNase AWAY™ to minimize risk of nucleic acid contamination. Residual bleach should be removed using 70% ethanol.
- RNA should be maintained on a cold block or on ice during preparation and use to ensure stability.
- Dispose of unused kit reagents and human specimens according to local, state, and federal regulations.

## Reagent Storage, Handling, and Stability

- Store all dried primers and probes and the positive control, nCoVPC, at 2-8°C until re-hydrated for use. Store liquid HSC control materials at ≤ -20°C.  
Note: Storage information is for CDC primer and probe materials obtained through the International Reagent Resource. If using commercial primers and probes, please refer to the manufacturer's instructions for storage and handling.
- Always check the expiration date prior to use. Do not use expired reagents.
- Protect fluorogenic probes from light.
- Primers, probes (including aliquots), and enzyme master mix must be thawed and kept on a cold block at all times during preparation and use.
- Do not refreeze probes.
- Controls and aliquots of controls must be thawed and kept on ice at all times during preparation and use.

## Specimen Collection, Handling, and Storage

Inadequate or inappropriate specimen collection, storage, and transport are likely to yield false test results. Training in specimen collection is highly recommended due to the importance of specimen quality. CLSI MM13-A may be referenced as an appropriate resource.

- Collecting the Specimen
  - Refer to Interim Guidelines for Collecting, Handling, and Testing Clinical Specimens for COVID-19 <https://www.cdc.gov/coronavirus/2019-nCoV/guidelines-clinical-specimens.html>
  - Follow specimen collection device manufacturer instructions for proper collection methods.
  - Swab specimens should be collected using only swabs with a synthetic tip, such as nylon or Dacron<sup>®</sup>, and an aluminum or plastic shaft. Calcium alginate swabs are unacceptable and cotton swabs with wooden shafts are not recommended. Place swabs immediately into sterile tubes containing 1-3 mL of appropriate transport media, such as viral transport media (VTM).
- Transporting Specimens
  - Specimens must be packaged, shipped, and transported according to the current edition of the International Air Transport Association (IATA) Dangerous Goods Regulation. Follow shipping regulations for UN 3373 Biological Substance, Category B when sending potential 2019-nCoV specimens. Store specimens at 2-8°C and ship overnight to CDC on ice pack. If a specimen is frozen at -70°C or lower, ship overnight to CDC on dry ice.
- Storing Specimens
  - Specimens can be stored at 2-8°C for up to 72 hours after collection.
  - If a delay in extraction is expected, store specimens at -70°C or lower.
  - Extracted nucleic acid should be stored at -70°C or lower.

## Specimen Referral to CDC

### For state and local public health laboratories:

- Ship all specimens overnight to CDC.
- Ship frozen specimens on dry ice and non-frozen specimens on cold packs.
- Refer to the International Air Transport Association (IATA - [www.iata.org](http://www.iata.org)) for requirements for shipment of human or potentially infectious biological specimens. Follow shipping regulations for UN 3373 Biological Substance, Category B when sending potential 2019-nCoV specimens.
- Prior to shipping, notify CDC Division of Viral Diseases (see contact information below) that you are sending specimens.
- Send all samples to the following recipient:

Centers for Disease Control and Prevention  
c/o STATT  
Attention: Unit 66  
1600 Clifton Rd., Atlanta, GA 30329-4027  
Phone: (404) 639-3931

**The emergency contact number for CDC Emergency Operations Center (EOC) is  
770-488-7100.**

## Reagent and Controls Preparation

NOTE: Storage information is for materials obtained through the CDC International Reagent Resource. If using commercial products for testing, please refer to the manufacturer's instructions for storage, handling, and preparation instructions.

### Primer and Probe Preparation:

- 1) Upon receipt, store dried primers and probes at 2-8°C.
- 2) Precautions: These reagents should only be handled in a clean area and stored at appropriate temperatures (see below) in the dark. Freeze-thaw cycles should be avoided. Maintain cold when thawed.
- 3) Using aseptic technique, suspend dried reagents in 1.5 mL of nuclease-free water and allow to rehydrate for 15 min at room temperature in the dark.
- 4) Mix gently and aliquot primers/probe in 300 µL volumes into 5 pre-labeled tubes. Store a single, working aliquot of primers/probes at 2-8°C in the dark. Store remaining aliquots at ≤ -20°C in a non-frost-free freezer. Do not refreeze thawed aliquots (stable for up to 4 months at 2-8°C).

### **2019-nCoV Positive Control (nCoVPC) Preparation:**

- 1) Precautions: This reagent should be handled with caution in a dedicated nucleic acid handling area to prevent possible contamination. Freeze-thaw cycles should be avoided. Maintain on ice when thawed.
- 2) Resuspend dried reagent in each tube in 1 mL of nuclease-free water to achieve the proper concentration. Make single use aliquots (approximately 30 µL) and store at ≤ -70°C.
- 3) Thaw a single aliquot of diluted positive control for each experiment and hold on ice until adding to plate. Discard any unused portion of the aliquot.

### **Human Specimen Control (HSC) (not provided):**

- 1) Human Specimen Control (HSC) or one of the listed acceptable alternative extraction controls must be extracted and processed with each specimen extraction run.
- 2) Refer to the Human Specimen Control (HSC) package insert for instructions for use.

### **No Template Control (NTC) (not provided):**

- 1) Sterile, nuclease-free water
- 2) Aliquot in small volumes
- 3) Used to check for contamination during specimen extraction and/or plate set-up

## **General Preparation**

### **Equipment Preparation**

Clean and decontaminate all work surfaces, pipettes, centrifuges, and other equipment prior to use. Decontamination agents should be used including 10% bleach, DNAzap™ and RNase AWAY™ to minimize the risk of nucleic acid contamination. Residual bleach should be removed using 70% ethanol.

## **Nucleic Acid Extraction**

**NOTE: The extraction instructions below are for use when testing individual specimens ONLY. When pooling specimens, refer to Appendix B for modified extraction instructions.**

Performance of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel is dependent upon the amount and quality of template RNA purified from human specimens. The following commercially available RNA extraction kits and procedures have been qualified and validated for recovery and purity of RNA for use with the panel:

### **Qiagen QIAamp® DSP Viral RNA Mini Kit or QIAamp® Viral RNA Mini Kit**

Recommendation(s): Utilize 100 µL of sample and elute with 100 µL of buffer or utilize 140 µL of sample and elute with 140 µL of buffer.

### **Qiagen EZ1 Advanced XL**

Kit: Qiagen EZ1 DSP Virus Kit and Buffer AVL (supplied separately) for offboard lysis

Card: EZ1 Advanced XL DSP Virus Card

Recommendation(s): Add 120 µL of sample to 280 µL of pre-aliquoted Buffer AVL (total input sample volume is 400 µL). Proceed with the extraction on the EZ1 Advanced XL. Elution volume is 120 µL.

Kit: Qiagen EZ1 Virus Mini Kit v2.0 and Buffer AVL (supplied separately) for offboard lysis

Card: EZ1 Advanced XL Virus Card v2.0

Recommendation(s): Add 120 µL of sample to 280 µL of pre-aliquoted Buffer AVL (total input sample volume is 400 µL). Proceed with the extraction on the EZ1 Advanced XL. Elution volume is 120 µL.

### **Roche MagNA Pure 96**

Kit: Roche MagNA Pure 96 DNA and Viral NA Small Volume Kit

Protocol: Viral NA Plasma Ext LysExt Lys SV 4.0 Protocol or Viral NA Plasma Ext Lys SV Protocol

Recommendation(s): Add 100 µL of sample to 350 µL of pre-aliquoted External Lysis Buffer (supplied separately) (total input sample volume is 450 µL). Proceed with the extraction on the MagNA Pure 96. **(Internal Control = None)**. Elution volume is 100 µL.

### **Roche MagNA Pure 24**

Kit: Roche MagNA Pure 24 Total NA Isolation Kit

Protocol: Pathogen 1000 2.0 Protocol

Recommendation(s): Add 100 µL of sample to 400 µL of pre-aliquoted External Lysis Buffer (supplied separately) (total input sample volume is 500 µL). Proceed with the extraction on the MagNA Pure 24. **(Internal Control = None)**. Elution volume is 100 µL.

### **Promega Maxwell® RSC 48 and Maxwell® CSC 48**

Kit: Promega Maxwell® Viral Total Nucleic Acid Purification Kit

Protocol: Viral Total Nucleic Acid

Recommendation(s): Add 120 µL of sample to 330 µL of pre-aliquoted External Lysis Buffer (300 µL Lysis Buffer plus 30 µL Proteinase K; supplied within the kit) (total input volume is 450 µL). Proceed with the extraction on the Maxwell® RSC 48. Elution volume is 75 µL.

Equivalence and performance of the following extraction platforms were demonstrated with the CDC Human Influenza Virus Real-Time RT-PCR Diagnostic Panel (K190302) and based on those data are acceptable for use with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel.

### **QIAGEN QIAcube**

Kit: QIAGEN QIAamp® DSP Viral RNA Mini Kit or QIAamp® Viral RNA Mini Kit  
Recommendations: Utilize 140 µL of sample and elute with 100 µL of buffer.

### **Roche MagNA Pure LC**

Kit: Roche MagNA Pure Total Nucleic Acid Kit  
Protocol: Total NA External\_ lysis  
Recommendation(s): Add 100 µL of sample to 300 µL of pre-aliquoted TNA isolation kit lysis buffer (total input sample volume is 400 µL). Elution volume is 100 µL.

### **Roche MagNA Pure Compact**

Kit: Roche MagNA Pure Nucleic Acid Isolation Kit I  
Protocol: Total\_NA\_Plasma100\_400  
Recommendation(s): Add 100 µL of sample to 300 µL of pre-aliquoted TNA isolation kit lysis buffer (total input sample volume is 400 µL). Elution volume is 100 µL.

### **bioMérieux NucliSENS® easyMAG® Instrument**

Protocol: General protocol (not for blood) using “Off-board Lysis” reagent settings.  
Recommendation(s): Add 100 µL of sample to 1000 µL of pre-aliquoted easyMAG lysis buffer (total input sample volume is 1100 µL). Incubate for 10 minutes at room temperature.  
Elution volume is 100 µL.

### **bioMérieux EMAG® Instrument**

Protocol: Custom protocol: **CDC Flu V1** using “Off-board Lysis” reagent settings.  
Recommendation(s): Add 100 µL of samples to 2000 µL of pre-aliquoted easyMAG lysis buffer (total input sample volume is 2100 µL). Incubate for 10 minutes at room temperature. Elution volume is 100 µL. The custom protocol, **CDC Flu V1**, is programmed on the bioMérieux EMAG® instrument with the assistance of a bioMérieux service representative. Installation verification is documented at the time of installation. Laboratories are recommended to retain a record of the step-by-step verification of the bioMérieux custom protocol installation procedure.

Manufacturer’s recommended procedures (except as noted in recommendations above) are to be followed for sample extraction. HSC must be included in each extraction batch.

***Disclaimer: Names of vendors or manufacturers are provided as examples of suitable product sources. Inclusion does not imply endorsement by the Centers for Disease Control and Prevention.***

## **Assay Set Up**

### **Reaction Master Mix and Plate Set Up**

Note: Plate set-up configuration can vary with the number of specimens and workday organization. NTCs and nCoVPCs must be included in each run.

- 1) In the reagent set-up room clean hood, place rRT-PCR buffer, enzyme, and primer/probes on ice or cold-block. Keep cold during preparation and use.

- 2) Mix buffer, enzyme, and primer/probes by inversion 5 times.
- 3) Centrifuge reagents and primers/probes for 5 seconds to collect contents at the bottom of the tube, and then place the tube in a cold rack.
- 4) Label one 1.5 mL microcentrifuge tube for each primer/probe set.
- 5) Determine the number of reactions (N) to set up per assay. It is necessary to make excess reaction mix for the NTC, nCoVPC, HSC (if included in the rRT-PCR run), and RP reactions and for pipetting error. Use the following guide to determine N:
  - If number of samples (n) including controls equals 1 through 14, then  $N = n + 1$
  - If number of samples (n) including controls is 15 or greater, then  $N = n + 2$
- 6) For each primer/probe set, calculate the amount of each reagent to be added for each reaction mixture ( $N = \#$  of reactions).

#### Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix

| Step # | Reagent                                 | Vol. of Reagent Added per Reaction            |
|--------|-----------------------------------------|-----------------------------------------------|
| 1      | Nuclease-free Water                     | $N \times 8.5 \mu\text{L}$                    |
| 2      | Combined Primer/Probe Mix               | $N \times 1.5 \mu\text{L}$                    |
| 3      | TaqPath™ 1-Step RT-qPCR Master Mix (4x) | $N \times 5.0 \mu\text{L}$                    |
|        | <b>Total Volume</b>                     | <b><math>N \times 15.0 \mu\text{L}</math></b> |

#### Promega GoTaq® Probe 1- Step RT-qPCR System

| Step # | Reagent                               | Vol. of Reagent Added per Reaction            |
|--------|---------------------------------------|-----------------------------------------------|
| 1      | Nuclease-free Water                   | $N \times 3.1 \mu\text{L}$                    |
| 2      | Combined Primer/Probe Mix             | $N \times 1.5 \mu\text{L}$                    |
| 3      | GoTaq Probe qPCR Master Mix with dUTP | $N \times 10.0 \mu\text{L}$                   |
| 4      | Go Script RT Mix for 1-Step RT-qPCR   | $N \times 0.4 \mu\text{L}$                    |
|        | <b>Total Volume</b>                   | <b><math>N \times 15.0 \mu\text{L}</math></b> |

#### Quantabio qScript XLT One-Step RT-qPCR ToughMix

| Step # | Reagent                                   | Vol. of Reagent Added per Reaction            |
|--------|-------------------------------------------|-----------------------------------------------|
| 1      | Nuclease-free Water                       | $N \times 3.5 \mu\text{L}$                    |
| 2      | Combined Primer/Probe Mix                 | $N \times 1.5 \mu\text{L}$                    |
| 3      | qScript XLT One-Step RT-qPCR ToughMix(2X) | $N \times 10.0 \mu\text{L}$                   |
|        | <b>Total Volume</b>                       | <b><math>N \times 15.0 \mu\text{L}</math></b> |

### Quantabio UltraPlex 1-Step ToughMix (4X)

| Step # | Reagent                        | Vol. of Reagent Added per Reaction |
|--------|--------------------------------|------------------------------------|
| 1      | Nuclease-free Water            | N x 8.5 µL                         |
| 2      | Combined Primer/Probe Mix      | N x 1.5 µL                         |
| 3      | UltraPlex 1-Step ToughMix (4X) | N x 5.0 µL                         |
|        | <b>Total Volume</b>            | <b>N x 15.0 µL</b>                 |

- 7) Dispense reagents into each respective labeled 1.5 mL microcentrifuge tube. After addition of the reagents, mix reaction mixtures by pipetting up and down. **Do not vortex.**
- 8) Centrifuge for 5 seconds to collect contents at the bottom of the tube, and then place the tube in a cold rack.
- 9) Set up reaction strip tubes or plates in a 96-well cooler rack.
- 10) Dispense 15 µL of each master mix into the appropriate wells going across the row as shown below (**Figure 1**):

**Figure 1: Example of Reaction Master Mix Plate Set-Up**

|   | 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 | 11 | 12 |
|---|----|----|----|----|----|----|----|----|----|----|----|----|
| A | N1 |
| B | N2 |
| C | RP |
| D |    |    |    |    |    |    |    |    |    |    |    |    |
| E |    |    |    |    |    |    |    |    |    |    |    |    |
| F |    |    |    |    |    |    |    |    |    |    |    |    |
| G |    |    |    |    |    |    |    |    |    |    |    |    |
| H |    |    |    |    |    |    |    |    |    |    |    |    |

- 11) Prior to moving to the nucleic acid handling area, prepare the No Template Control (NTC) reactions for column #1 in the assay preparation area.
- 12) Pipette 5 µL of nuclease-free water into the NTC sample wells (**Figure 2**, column 1). Securely cap NTC wells before proceeding.
- 13) Cover the entire reaction plate and move the reaction plate to the specimen nucleic acid handling area.

### **Nucleic Acid Template Addition**

- 1) Gently vortex nucleic acid sample tubes for approximately 5 seconds.
- 2) Centrifuge for 5 seconds to collect contents at the bottom of the tube.

- 3) After centrifugation, place extracted nucleic acid sample tubes in the cold rack.
- 4) Samples should be added to columns 2-11 (column 1 and 12 are for controls) to the specific assay that is being tested as illustrated in **Figure 2**. Carefully pipette 5.0 µL of the first sample into all the wells labeled for that sample (i.e. Sample "S1" down column #2). *Keep other sample wells covered during addition. Change tips after each addition.*
- 5) Securely cap the column to which the sample has been added to prevent cross contamination and to ensure sample tracking.
- 6) Change gloves often and when necessary to avoid contamination.
- 7) Repeat steps #4 and #5 for the remaining samples.
- 8) If necessary, add 5 µL of Human Specimen Control (HSC) extracted sample to the HSC wells (**Figure 2**, column 11). Securely cap wells after addition. NOTE: Per CLIA regulations, HSC must be tested at least once per day.
- 9) Cover the entire reaction plate and move the reaction plate to the positive template control handling area.

### **Assay Control Addition**

- 1) Pipette 5 µL of nCoVPC RNA to the sample wells of column 12 (**Figure 2**). Securely cap wells after addition of the control RNA.  
**NOTE: If using 8-tube strips, label the TAB of each strip to indicate sample position. DO NOT LABEL THE TOPS OF THE REACTION TUBES!**
- 2) Briefly centrifuge reaction tube strips for 10-15 seconds. After centrifugation return to cold rack.  
**NOTE: If using 96-well plates, centrifuge plates for 30 seconds at 500 x g, 4°C.**

**Figure 2. 2019-nCoV rRT-PCR Diagnostic Panel: Example of Sample and Control Set-up**

|   | 1   | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 | 11 <sup>a</sup> | 12      |
|---|-----|----|----|----|----|----|----|----|----|----|-----------------|---------|
| A | NTC | S1 | S2 | S3 | S4 | S5 | S6 | S7 | S8 | S9 | S10             | nCoV PC |
| B | NTC | S1 | S2 | S3 | S4 | S5 | S6 | S7 | S8 | S9 | S10             | nCoV PC |

| D |     |    |    |    |    |    |    |    |    |    |                 |         |
| E |     |    |    |    |    |    |    |    |    |    |                 |         |
| F |     |    |    |    |    |    |    |    |    |    |                 |         |
| G |     |    |    |    |    |    |    |    |    |    |                 |         |
| H |     |    |    |    |    |    |    |    |    |    |                 |         |

<sup>a</sup>Replace the sample in this column with extracted HSC if necessary

## Create a Run Template on the Applied Biosystems 7500 Fast Dx Real-time PCR Instrument (Required if no template exists)

If the template already exists on your instrument, please proceed to the **RUNNING A TEST** section.

- 1) Launch the Applied Biosystems 7500 Fast Dx Real-time PCR Instrument by double clicking on the Applied Biosystems 7500 Fast Dx System icon on the desktop.
- 2) A new window should appear, select **Create New Document** from the menu.

**Figure 3. New Document Wizard Window**

**New Document Wizard**

**Define Document**  
Select the assay, container, and template for the document, and enter the operator name and comments.

Assay: Standard Curve (Absolute Quantitation)

Container: 96-Well Clear

Template: Blank Document

Run Mode: Standard 7500

Operator: Training User

Comments: SDS v1.4

Plate Name: Training Plate

< Back

Make sure to change Run Mode to **STANDARD 7500**

- 3) The **New Document Wizard** screen in **Figure 3** will appear. Select:
  - a. Assay: **Standard Curve (Absolute Quantitation)**
  - b. Container: **96-Well Clear**
  - c. Template: **Blank Document**
  - d. Run Mode: **Standard 7500**
  - e. Operator: **Your Name**
  - f. Comments: **SDS v1.4**
  - g. Plate Name: **Your Choice**
- 4) After making selections click **Next** at the bottom of the window.

**Figure 4. Creating New Detectors**

NOTE: ROX is the default passive reference. This will be changed to “none” in step 12.

- 5) After selecting next, the **Select Detectors** screen (**Figure 4**) will appear.
- 6) Click the **New Detector** button (see **Figure 4**).
- 7) The **New Detector** window will appear (**Figure 5**). A new detector will need to be defined for each primer and probe set. Creating these detectors will enable you to analyze each primer and probe set individually at the end of the reaction.

**Figure 5. New Detector Window**

- 8) Start by creating the N1 Detector. Include the following:
  - a. Name: **N1**
  - b. Description: *leave blank*
  - c. Reporter Dye: **FAM**
  - d. Quencher Dye: **(none)**
  - e. Color: *to change the color of the detector indicator do the following:*
    - ⇒ Click on the color square to reveal the color chart
    - ⇒ Select a color by clicking on one of the squares
    - ⇒ After selecting a color click **OK** to return to the New Detector screen
  - f. Click the **OK** button of the New Detector screen to return to the screen shown in **Figure 4**.
- 9) Repeat step 6-8 for each target in the panel.

| Name | Reporter Dye | Quencher Dye |
|------|--------------|--------------|
| N1   | FAM          | (none)       |
| N2   | FAM          | (none)       |
| RP   | FAM          | (none)       |

- 10) After each Detector is added, the **Detector Name**, **Description**, **Reporter** and **Quencher** fields will become populated in the **Select Detectors** screen (Figure 6).
- 11) Before proceeding, the newly created detectors must be added to the document. To add the new detectors to the document, click **ADD** (see Figure 6). Detector names will appear on the right-hand side of the **Select Detectors** window (Figure 6).

**Figure 6. Adding New Detectors to Document**

- 12) Once all detectors have been added, select **(none)** for **Passive Reference** at the top right-hand drop-down menu (Figure 7).

**Figure 7. Select Passive Reference**

**Passive reference should be set to “(none)” as described above.**

- 13) Click **Next** at the bottom of the **Select Detectors** window to proceed to the **Set Up Sample Plate** window (**Figure 8**).
- 14) In the **Set Up Sample Plate** window (**Figure 8**), use your mouse to select row A from the lower portion of the window, in the spreadsheet (see **Figure 8**).
- 15) In the top portion of the window, select detector **N1**. A check will appear next to the detector you have selected (**Figure 8**). You will also notice the row in the spreadsheet will be populated with a colored "U" icon to indicate which detector you've selected.
- 16) Repeat step 14-15 for each detector that will be used in the assay.

**Figure 8. Sample Plate Set-up**

- 17) Select **Finish** after detectors have been assigned to their respective rows. (**Figure 9**).

**Figure 9. Finished Plate Set-up**

- 18) After clicking “Finish”, there will be a brief pause allowing the Applied Biosystems 7500 Fast Dx to initialize. This initialization is followed by a clicking noise. **Note: The machine must be turned on for initialization.**
- 19) After initialization, the **Plate** tab of the Setup (**Figure 10**) will appear.
- 20) Each well of the plate should contain colored U icons that correspond with the detector labels that were previously chosen. To confirm detector assignments, select **Tools** from the file menu, then select **Detector Manager**.

**Figure 10. Plate Set-up Window**

- 21) The Detector Manager window will appear (**Figure 11**).

**Figure 11. Detector Manager Window**

- 22) Confirm all detectors are included and that each target has a **Reporter** set to **FAM** and the **Quencher** is set to **(none)**.
- 23) If all detectors are present, select **Done**. The detector information has been created and assigned to wells on the plate.

### Defining the Instrument Settings

- 1) After detectors have been created and assigned, proceed to instrument set up.
- 2) Select the **Instrument** tab to define thermal cycling conditions.
- 3) Modify the thermal cycling conditions as follows (**Figure 12**):

#### **Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix, CG**

- a. In Stage 1, Set to 2 min at **25°C; 1 Rep.**
- b. In Stage 2, Set to 15 min at **50°C; 1 Rep.**
- c. In Stage 3, Set to 2 min at **95°C, 1 Rep.**
- d. In Stage 4, Step 1 set to **3 sec** at **95°C.**
- e. In Stage 4, Step 2 set to **30 sec** at **55.0°C.**
- f. In Stage 4, Reps should be set to **45.**
- g. Under **Settings (Figure 12)**, bottom left-hand box, change volume to 20 µL.
- h. Under **Settings, Run Mode** selection should be **Standard 7500.**
- i. Step 2 of Stage 4 should be highlighted in yellow to indicate data collection (see **Figure 12**).

**OR**

#### **Quantabio qScript™ XLT One-Step RT-qPCR ToughMix or UltraPlex 1-Step ToughMix (4X)**

- a. In Stage 1, Set to 10 min at **50°C; 1 Rep.**
- b. In Stage 2, Set to 3 min at **95°C, 1 Rep.**
- c. In Stage 3, Step 1 set to **3 sec** at **95°C.**
- d. In Stage 3, Step 2 set to **30 sec** at **55.0°C.**
- e. In Stage 3, Reps should be set to **45.**
- f. Under **Settings (Figure 12)**, bottom left-hand box, change volume to 20 µL.
- g. Under **Settings, Run Mode** selection should be **Standard 7500.**
- h. Step 2 of Stage 3 should be highlighted in yellow to indicate data collection (see **Figure 12**).

**OR**

#### **Promega GoTaq® Probe 1-Step RT-qPCR System**

- a. In Stage 1, Set to 15 min at **45°C; 1 Rep.**
- b. In Stage 2, Set to 2 min at **95°C, 1 Rep.**

- c. In Stage 3, Step 1 set to **3 sec** at **95°C**.
- d. In Stage 3, Step 2 set to **30 sec** at **55.0°C**.
- e. In Stage 3, Reps should be set to **45**.
- f. Under **Settings (Figure 12)**, bottom left-hand box, change volume to 20 µL.
- g. Under **Settings, Run Mode** selection should be **Standard 7500**.
- h. Step 2 of Stage 3 should be highlighted in yellow to indicate data collection (see **Figure 12**).

**Figure 12. Instrument Window**

- 4) After making changes to the **Instrument** tab, the template is ready to be saved. To save the template, select **File** from the top menu, then select **Save As**. Since the enzyme options have different instrument settings, it is recommended that the template be saved with a name indicating the enzyme option.
- 5) Save the template as **2019-nCoV Dx Panel TaqPath** or **2019-nCoV Dx Panel Quanta** or **2019-nCoV Dx Panel Promega** as appropriate in the desktop folder labeled **"ABI Run Templates"** (*you must create this folder*). Save as type should be SDS Templates (\*.sdt) (**Figure 13**).

**Figure 13. Saving Template**

### Running a Test

- 1) Turn on the ABI 7500 Fast Dx Real-Time PCR Instrument.
- 2) Launch the Applied Biosystems 7500 Fast Dx Real-time PCR System by double clicking on the 7500 Fast Dx System icon on the desktop.
- 3) A new window should appear, select **Open Existing Document** from the menu.
- 4) Navigate to select your ABI Run Template folder from the desktop.
- 5) Double click on the appropriate template file (**2019-nCoV Dx Panel TaqPath** or **2019-nCoV Dx Panel Quanta** or **2019-nCoV Dx Panel Promega**)
- 6) There will be a brief pause allowing the Applied Biosystems 7500 Fast Dx Real-Time PCR Instrument to initialize. This initialization is followed by a clicking noise. **Note: The machine must be turned on for initialization.**

**Figure 14. Plate Set-up Window**

- 7) After the instrument initializes, a plate map will appear (**Figure 14**). The detectors and controls should already be labeled as they were assigned in the original template.
- 8) Click the **Well Inspector** icon  from the top menu.
- 9) Highlight specimen wells of interest on the plate map.
- 10) Type sample identifiers to **Sample Name** box in the **Well Inspector** window (**Figure 15**).

**Figure 15. Labeling Wells**

- 11) Repeat steps 9-10 until all sample identifiers are added to the plate setup.
- 12) Once all specimen and control identifiers are added click the **Close** button on the **Well Inspector** window to return to the **Plate** set up tab.
- 13) Click the **Instrument** tab at the upper left corner.
- 14) The reaction conditions, volumes, and type of 7500 reaction should already be loaded (**Figure 16**).

**Figure 16. Instrument Settings**

- 15) Ensure settings are correct (refer to the *Defining Instrument Settings*).
- 16) Before proceeding, the run file must be saved; from the main menu, select **File**, then **Save As**. Save in appropriate run folder designation.
- 17) Load the plate into the plate holder in the instrument. Ensure that the plate is properly aligned in the holder.
- 18) Once the run file is saved, click the **Start** button. *Note: The run should take approximately 1 hour and 20 minutes to complete.*

## Data Analysis

- 1) After the run has completed, select the **Results** tab at the upper left corner of the software.
- 2) Select the **Amplification Plot** tab to view the raw data (**Figure 17**).

**Figure 17. Amplification Plot Window**

- 3) Start by highlighting all the samples from the run; to do this, click on the upper left-hand box (**a**) of the sample wells (**Figure 17**). All the growth curves should appear on the graph.
- 4) On the right-hand side of the window (**b**), the **Data** drop down selection should be set to **Delta Rn vs. Cycle**.
- 5) Select **N1** from (**c**), the **Detector** drop down menu, using the downward arrow.
  - a. Please note that each detector is analyzed individually to reflect different performance profiles of each primer and probe set.
- 6) In the **Line Color** drop down (**d**), **Detector Color** should be selected.
- 7) Under **Analysis Settings** select **Manual Ct** (**e**).
  - a. Do not change the **Manual Baseline** default numbers.
- 8) Using the mouse, click and drag the red threshold line until it lies within the exponential phase of the fluorescence curves and above any background signal (**Figure 18**).

**Figure 18. Amplification Plot**

- 9) Click the **Analyze** button in the lower right corner of the window. The red threshold line will turn to green, indicating the data has been analyzed.
- 10) Repeat steps 5-9 to analyze results generated for each set of markers (N1, N2, RP).
- 11) Save analysis file by selecting **File** then **Save As** from the main menu.
- 12) After completing analysis for each of the markers, select the **Report** tab above the graph to display the Ct values (**Figure 19**). To filter report by sample name in ascending or descending order, simply click on **Sample Name** in the table.

**Figure 19. Report**

| Well | Sample Name | Detector | Task    | Ct      | StdDev Ct | Quantity | Mean Qty | StdDev Qty | Filtered | Tm |

## Interpretation of Results and Reporting

### Extraction and Positive Control Results and Interpretation

#### No Template Control (NTC)

The NTC consists of using nuclease-free water in the rRT-PCR reactions instead of RNA. The NTC reactions for all primer and probe sets should not exhibit fluorescence growth curves that cross the threshold line. If any of the NTC reactions exhibit a growth curve that crosses the cycle threshold, sample contamination may have occurred. Invalidate the run and repeat the assay with strict adherence to the guidelines.

#### 2019-nCoV Positive Control (nCoVPC)

The nCoVPC consists of in vitro transcribed RNA. The nCoVPC will yield a positive result with the following primer and probe sets: N1, N2, and RP.

#### Human Specimen Control (HSC) (Extraction Control)

When HSC is run with the CDC 2019-nCoV rRT-PCR Diagnostic Panel (see previous section on Assay Set Up), the HSC is used as a nucleic acid extraction procedural control to demonstrate successful recovery of nucleic acid as well as extraction reagent integrity. The HSC control consists of noninfectious cultured human cell (A549) material. Purified nucleic acid from the HSC should yield a positive result with the RP primer and probe set and negative results with all 2019-nCoV markers.

### Expected Performance of Controls Included in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel

| Control Type | External Control Name | Used to Monitor                                                                      | 2019 nCoV_N1 | 2019 nCoV_N2 | RP | Expected Ct Values |
|--------------|-----------------------|--------------------------------------------------------------------------------------|--------------|--------------|----|--------------------|
| Positive     | nCoVPC                | Substantial reagent failure including primer and probe integrity                     | +            | +            | +  | < 40.00 Ct         |
| Negative     | NTC                   | Reagent and/or environmental contamination                                           | -            | -            | -  | None detected      |
| Extraction   | HSC                   | Failure in lysis and extraction procedure, potential contamination during extraction | -            | -            | +  | < 40.00 Ct         |

**If any of the above controls do not exhibit the expected performance as described, the assay may have been set up and/or executed improperly, or reagent or equipment malfunction could have occurred. Invalidate the run and re-test.**

### **RNase P (Extraction Control)**

- All clinical samples should exhibit fluorescence growth curves in the RNase P reaction that cross the threshold line within 40.00 cycles (< 40.00 Ct), thus indicating the presence of the human RNase P gene. Failure to detect RNase P in any clinical specimens may indicate:
  - Improper extraction of nucleic acid from clinical materials resulting in loss of RNA and/or RNA degradation.
  - Absence of sufficient human cellular material due to poor collection or loss of specimen integrity.
  - Improper assay set up and execution.
  - Reagent or equipment malfunction.
- If the RP assay does not produce a positive result for human clinical specimens, interpret as follows:
  - If the 2019-nCoV N1 and N2 are positive even in the absence of a positive RP, the result should be considered valid. It is possible, that some samples may fail to exhibit RNase P growth curves due to low cell numbers in the original clinical sample. A negative RP signal does not preclude the presence of 2019-nCoV virus RNA in a clinical specimen.
  - If all 2019-nCoV markers AND RNase P are negative for the specimen, the result should be considered invalid for the specimen. If residual specimen is available, repeat the extraction procedure and repeat the test. If all markers remain negative after re-test, report the results as invalid and a new specimen should be collected if possible.

### **2019-nCoV Markers (N1 and N2)**

- When all controls exhibit the expected performance, a specimen is considered negative if all 2019-nCoV marker (N1, N2) cycle threshold growth curves DO NOT cross the threshold line within 40.00 cycles (< 40.00 Ct) AND the RNase P growth curve DOES cross the threshold line within 40.00 cycles (< 40.00 Ct).
- When all controls exhibit the expected performance, a specimen is considered positive for 2019-nCoV if all 2019-nCoV marker (N1, N2) cycle threshold growth curves cross the threshold line within 40.00 cycles (< 40.00 Ct). The RNase P may or may not be positive as described above, but the 2019-nCoV result is still valid.
- When all controls exhibit the expected performance and the growth curves for the 2019-nCoV markers (N1, N2) AND the RNase P marker DO NOT cross the cycle threshold growth curve within 40.00 cycles (< 40.00 Ct), the result is invalid. The extracted RNA from the specimen should be re-tested. If residual RNA is not available, re-extract RNA from residual specimen and re-test. If the re-tested sample is negative for all markers and RNase P, the result is invalid and collection of a new specimen from the patient should be considered.
- When all controls exhibit the expected performance and the cycle threshold growth curve for any one marker (N1 or N2, but not both markers) crosses the threshold line within 40.00 cycles (< 40.00 Ct) the result is inconclusive. The extracted RNA should be retested. If residual RNA is not available, re-extract RNA from residual specimen and re-test. If the same result is obtained,

report the inconclusive result. Consult with your state public health laboratory or CDC, as appropriate, to request guidance and/or to coordinate transfer of the specimen for additional analysis.

- If HSC is positive for N1 or N2, then contamination may have occurred during extraction or sample processing. Invalidate all results for specimens extracted alongside the HSC. Re-extract specimens and HSC and re-test.

### [2019-nCoV rRT-PCR Diagnostic Panel Results Interpretation Guide](#)

The table below lists the expected results for the 2019-nCoV rRT-PCR Diagnostic Panel. If a laboratory obtains unexpected results for assay controls or if inconclusive or invalid results are obtained and cannot be resolved through the recommended re-testing, please contact CDC for consultation and possible specimen referral. See pages 13 and 53 for referral and contact information.

| 2019 nCoV_N1                               | 2019 nCoV_N2 | RP | Result Interpretation <sup>a</sup> | Report             | Actions                                                                                                                                                                                                                                 |
|--------------------------------------------|--------------|----|------------------------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| +                                          | +            | ±  | 2019-nCoV detected                 | Positive 2019-nCoV | Report results to CDC and sender.                                                                                                                                                                                                       |
| If only one of the two targets is positive |              | ±  | Inconclusive Result                | Inconclusive       | Repeat testing of nucleic acid and/or re-extract and repeat rRT-PCR. If the repeated result remains inconclusive, contact your State Public Health Laboratory or CDC for instructions for transfer of the specimen or further guidance. |
| -                                          | -            | +  | 2019-nCoV not detected             | Not Detected       | Report results to sender. Consider testing for other respiratory viruses. <sup>b</sup>                                                                                                                                                  |
| -                                          | -            | -  | Invalid Result                     | Invalid            | Repeat extraction and rRT-PCR. If the repeated result remains invalid, consider collecting a new specimen from the patient.                                                                                                             |

<sup>a</sup>Laboratories should report their diagnostic result as appropriate and in compliance with their specific reporting system.

<sup>b</sup>Optimum specimen types and timing for peak viral levels during infections caused by 2019-nCoV have not been determined. Collection of multiple specimens from the same patient may be necessary to detect the virus. The possibility of a false negative result should especially be considered if the patient's recent exposures or clinical presentation suggest that 2019-nCoV infection is possible, and diagnostic tests for other causes of illness (e.g., other respiratory illness) are negative. If 2019-nCoV infection is still suspected, re-testing should be considered in consultation with public health authorities.

## Quality Control

- Quality control requirements must be performed in conformance with local, state, and federal regulations or accreditation requirements and the user's laboratory's standard quality control procedures. For further guidance on appropriate quality control practices, refer to 42 CFR 493.1256.
- Quality control procedures are intended to monitor reagent and assay performance.
- Test all positive controls prior to running diagnostic samples with each new kit lot to ensure all reagents and kit components are working properly.
- Good laboratory practice (cGLP) recommends including a positive extraction control in each nucleic acid isolation batch.
- Although HSC is not included with the 2019-nCov rRT-PCR Diagnostic Panel, the HSC extraction control must proceed through nucleic acid isolation per batch of specimens to be tested.
- Always include a negative template control (NTC) and the appropriate positive control (nCoVPC) in each amplification and detection run. All clinical samples should be tested for human RNase P gene to control for specimen quality and extraction.

## Limitations

- All users, analysts, and any person reporting diagnostic results should be trained to perform this procedure by a competent instructor. They should demonstrate their ability to perform the test and interpret the results prior to performing the assay independently.
- Performance of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel has only been established in upper and lower respiratory specimens (such as nasopharyngeal or oropharyngeal swabs, sputum, lower respiratory tract aspirates, bronchoalveolar lavage, and nasopharyngeal wash/aspirate or nasal aspirate).
- Negative results do not preclude 2019-nCoV infection and should not be used as the sole basis for treatment or other patient management decisions. Optimum specimen types and timing for peak viral levels during infections caused by 2019-nCoV have not been determined. Collection of multiple specimens (types and time points) from the same patient may be necessary to detect the virus.
- A false-negative result may occur if a specimen is improperly collected, transported or handled. False-negative results may also occur if amplification inhibitors are present in the specimen or if inadequate numbers of organisms are present in the specimen.
- Positive and negative predictive values are highly dependent on prevalence. False-negative test results are more likely when prevalence of disease is high. False-positive test results are more likely when prevalence is moderate to low.
- Do not use any reagent past the expiration date.
- If the virus mutates in the rRT-PCR target region, 2019-nCoV may not be detected or may be detected less predictably. The clinical performance has not been established in all circulating variants but is anticipated to be reflective of the prevalent variants in circulation at the time and location of the clinical evaluation. Performance at the time of testing may vary depending on the variants circulating, including newly emerging strains of SARSCoV-2 and their prevalence, which change over time.

- Inhibitors or other types of interference may produce a false-negative result. An interference study evaluating the effect of common cold medications was not performed.
- Test performance can be affected because the epidemiology and clinical spectrum of infection caused by 2019-nCoV is not fully known. For example, clinicians and laboratories may not know the optimum types of specimens to collect, and, during the course of infection, when these specimens are most likely to contain levels of viral RNA that can be readily detected.
- Detection of viral RNA may not indicate the presence of infectious virus or that 2019-nCoV is the causative agent for clinical symptoms.
- The performance of this test has not been established for monitoring treatment of 2019-nCoV infection.
- The performance of this test has not been established for screening of blood or blood products for the presence of 2019-nCoV.
- This test cannot rule out diseases caused by other bacterial or viral pathogens.

### [Conditions of Authorization for the Laboratory](#)

The CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Letter of Authorization, along with the authorized Fact Sheet for Healthcare Providers, the authorized Fact Sheet for Patients, and authorized labeling are available on the FDA website: <https://www.fda.gov/medical-devices/coronavirus-disease-2019-covid-19-emergency-use-authorizations-medical-devices/in-vitro-diagnostics-euas>.

However, to assist clinical laboratories using the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel (“your product” in the conditions below), the relevant Conditions of Authorization are listed below:

- Authorized laboratories using your product will include with test result reports, all authorized Fact Sheets available on the CDC website. Under exigent circumstances, other appropriate methods for disseminating these Fact Sheets may be used, which may include mass media.
- Authorized laboratories using your product will use your product as outlined in the authorized labeling available on the CDC website. Deviations from the authorized procedures, including the authorized RT-PCR instruments, authorized extraction methods, authorized clinical specimen types, authorized control materials, authorized other ancillary reagents and authorized materials required to use your product are not permitted under this authorization.
- Authorized laboratories that receive the commercially manufactured and distributed primer and probe sets identified as acceptable on the CDC website for use with your product, and are not able to obtain the authorized Human Specimen Control and authorized Positive Control for 2019-nCoV (NCoVPC) materials described in your product’s authorized labeling, may use appropriate materials identified as acceptable materials on the CDC website for use with your product. Authorized laboratories that receive your product will notify the relevant public health authorities of their intent to run your product prior to initiating testing.
- Authorized laboratories using your product will have a process in place for reporting test results to healthcare providers and relevant public health authorities, as appropriate.

- Authorized laboratories will collect information on the performance of your product and report to DMD/OHT7-OIR/OPEQ/CDRH (via email: CDRH-EUA-Reporting@fda.hhs.gov) and CDC (respvirus@cdc.gov) any suspected occurrence of false positive or false negative results and significant deviations from the established performance characteristics of the test of which they become aware.
- Authorized laboratories using specimen pooling strategies when testing patient specimens with your product will include with negative test result reports for specific patients whose specimen(s) were the subject of pooling, a notice that pooling was used during testing and that “Patient specimens with low viral loads may not be detected in sample pools due to the decreased sensitivity of pooled testing.”
- Authorized laboratories implementing pooling strategies for testing patient specimens must use the “Implementation and Monitoring of Pooled Specimen Testing” available in the authorized labeling to evaluate the appropriateness of continuing to use such strategies based on the recommendations in the protocol.
- Authorized laboratories will keep records of specimen pooling strategies implemented including type of strategy, date implemented, and quantities tested, and test result data generated as part of the Protocol for Monitoring of Specimen Pooling Testing Strategies. For the first 12 months from the date of their creation, such records will be made available to FDA within 48 business hours (2 business days) for inspection upon request, and will be made available within a reasonable time after 12 months from the date of their creation.
- Authorized laboratories will report adverse events, including problems with your products performance or results, to MedWatch by submitting the online FDA Form 3500 (<https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home>) or by calling 1-800-FDA-1088.
- All laboratory personnel using the test must be appropriately trained in RT-PCR techniques and use appropriate laboratory and personal protective equipment when handling this kit and use the test in accordance with the authorized labeling.
- CDC, IRR, manufacturers and distributors of commercial materials identified as acceptable on the CDC website, and authorized laboratories using your product will ensure that any records associated with this EUA are maintained until otherwise notified by FDA. Such records will be made available to FDA for inspection upon request.

## Performance Characteristics

### **Analytical Performance:**

#### *Limit of Detection (LoD):*

LoD studies determine the lowest detectable concentration of 2019-nCoV at which approximately 95% of all (true positive) replicates test positive. The LoD was determined by limiting dilution studies using characterized samples.

The analytical sensitivity of the rRT-PCR assays contained in the CDC 2019 Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel were determined in Limit of Detection studies. Since no quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed and this study conducted, assays designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA (N gene; GenBank accession: MN908947.2) of known titer (RNA copies/ $\mu$ L) spiked into a diluent consisting of a suspension of human A549 cells and viral transport medium (VTM) to mimic clinical specimen. Samples were extracted using the QIAGEN EZ1 Advanced XL instrument and EZ1 DSP Virus Kit (Cat# 62724) and manually with the QIAGEN DSP Viral RNA Mini Kit (Cat# 61904). Real-Time RT-PCR assays were performed using the Thermo Fisher Scientific TaqPath™ 1-Step RT-qPCR Master Mix, CG (Cat# A15299) on the Applied Biosystems™ 7500 Fast Dx Real-Time PCR Instrument according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel instructions for use.

A preliminary LoD for each assay was determined testing triplicate samples of RNA purified using each extraction method. The approximate LoD was identified by extracting and testing 10-fold serial dilutions of characterized stocks of in vitro transcribed full-length RNA. A confirmation of the LoD was determined using 3-fold serial dilution RNA samples with 20 extracted replicates. The LoD was determined as the lowest concentration where  $\geq 95\%$  (19/20) of the replicates were positive.

**Table 4. Limit of Detection Confirmation of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel with QIAGEN EZ1 DSP**

FDA Sensitivity Evaluation: The analytical sensitivity of the test will be further assessed by evaluating an FDA-recommended reference material using an FDA developed protocol if applicable and/or when available.

*FDA SARS-CoV-2 Reference Panel Testing*

The evaluation of sensitivity and MERS-CoV cross-reactivity was performed using reference material (T1), blinded samples and a standard protocol provided by the FDA. The study included a range finding study and a confirmatory study for LoD. Blinded sample testing was used to establish specificity and to confirm the LoD. Samples were extracted using the QIAGEN EZ1 Advanced XL with the QIAGEN EZ1 DSP Virus Kit. Extracted samples were then tested using the 2019-nCoV Real-Time RT-PCR Diagnostic Panel on the Applied BioSystems 7500 Fast Dx Real-Time PCR Instrument using the ThermoFisher TaqPath™ 1-Step RT-qPCR Master Mix. The results are summarized in Table 7.

**Table 7: Summary of LoD Confirmation Result using the FDA SARS-CoV-2 Reference Panel**

### *In Silico Analysis of Primer and Probe Sequences:*

The oligonucleotide primer and probe sequences of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel were evaluated against 831,910 recent high-quality genome sequences available in Global Initiative on Sharing All Influenza Data (GISAID, <https://www.gisaid.org>) as of June 6, 2021 to demonstrate the predicted inclusivity of the 2019-nCoV real-time RT-PCR Diagnostic panel. In silico analysis monitoring for changes to the primer and probe binding regions are regularly conducted using a sliding window of the most recent 3 months of sequence data. The sliding window is employed to ensure that mismatches in newly reported sequences are easy to identify and their frequency among currently circulating strains and variants is emphasized. The analysis is conducted twice: once using the global GISAID database and again with U.S. sequences only.

Nucleotide mismatches in the primer/probe regions with frequency of >0.1% among currently circulating strains in the global and/or US strain analysis are shown in the Table 8 below. One thousand twenty-nine sequences out of 831,910 had two nucleotide mismatches within the same primer/probe sequence accounting for <1% of all global sequences deposited in GISAID in the past 3 months.

Two independent mismatches identified in an in-silico analysis performed on April 28, 2021 led CDC to further evaluate the impact on performance of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. The first mismatch of interest was the single nucleotide change from C to T at position 3 (5' > 3') of the N1 probe. The mismatch, associated with the B.1.526.2 variant, was found to be present in 2.84% of recent U.S sequences. As of June 6, 2021, the prevalence of this mutation is 3.69% of recent U.S. sequences. Though the likelihood of significant impact from this single mismatch was low, the increasing frequency of the mismatch coupled with its position close to the FAM fluorophore toward the 5' end of the probe led CDC to check for impact on performance. 5 RNA samples from 5 separate clinical specimens containing the B.1.526.2 SARS-CoV-2 variant were tested with the 2019-nCoV Real-Time RT-PCR Diagnostic Panel using both the BioSearch and the IDT builds of the CDC Diagnostic Panel primer and probe sets. The specimens selected had been sequenced and confirmed to contain the mismatch. All 5 specimens generated positive results with the assay (both builds). However, with both builds, the Ct values generated by the N1 primer and probe set were observed to be slightly higher than the Ct values observed for the N2 primer and probe set. The difference ranged from 0.55 cycles to 2.07 cycles, with an average difference of 1.35 cycles. Testing of a 5-fold dilution series prepared from one of the B.1.526.2 RNA samples demonstrated a possible 0 to 0.5 log difference in sensitivity of the N1 primer and probe set compared to the N2 primer and probe set with this mutation. The impact of this mutation on the performance of the N1 primer and probe set is minimal. Overall diagnostic performance of the CDC 2019-nCoV Real-Time Rt-PCR should not be significantly impacted. Current presence of this mutation can be found in Table 8, from the in-silico analysis performed on June 6, 2021.

The second mismatch of interest identified in the in-silico analysis performed on April 28, 2021 was the single nucleotide change from C to T at position 10 (5' > 3') of the N2 probe. The mismatch, associated with the B.1.1.519 variant, was found to be present in 4.20% of recent U.S sequences. As of June 6, 2021, the prevalence of this mutation is 3.04% of recent U.S. sequences. Though the likelihood of significant impact from this single mismatch was low, the increasing frequency of the mismatch coupled with its position adjacent to the internal quencher on the IDT version of the N2 probe led CDC to check for impact on performance. 5 RNA samples from 5 separate clinical specimens containing the B.1.1.519 SARS-CoV-2 variant were tested with the 2019-nCoV Real-Time RT-PCR Diagnostic Panel using both the BioSearch and the IDT builds of the CDC Diagnostic Panel primer and probe sets. The specimens had been sequenced and confirmed to contain the mismatch. All 5 specimens generated positive results with the assay using both the IDT build (with internal quencher) and with the BioSearch build (no internal quencher). The Ct values for the N1 and N2 primer and probe sets across both builds of the primer and probe set were very

similar. Thus, no performance impact was observed with this mismatch. Current presence of this mutation—can be found in Table 8, from the in-silico analysis performed on June 6, 2021.

In summary, the assessment of homology between available sequences of SARS CoV-2 as of June 6, 2021 and the CDC panel assay primers and probes shows that the risk of significant loss in reactivity and false negative results is very low due to the absence of significant numbers of mismatches. The design of the primers and probes, with melting temperatures of >60°C and an annealing temperature of 55°C, can tolerate up to two mismatches depending on location without significant loss in assay sensitivity.

**Table 8. In Silico Inclusivity Analysis of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Among 831,910 Global Genome Sequences and 295,775 U.S. Sequences Submitted to GISAID within three months of June 6, 2021.**

### *Specificity/Exclusivity Testing: In Silico Analysis*

BLASTn analysis queries of the 2019-nCoV rRT-PCR assays primers and probes were performed against public domain nucleotide sequences. The database search parameters were as follows: 1) The nucleotide collection consists of GenBank+EMBL+DDBJ+PDB+RefSeq sequences, but excludes EST, STS, GSS, WGS, TSA, patent sequences as well as phase 0, 1, and 2 HTGS sequences and sequences longer than 100Mb; 2) The database is non-redundant. Identical sequences have been merged into one entry, while preserving the accession, GI, title and taxonomy information for each entry; 3) Database was updated on 10/03/2019; 4) The search parameters automatically adjust for short input sequences and the expect threshold is 1000; 5) The match and mismatch scores are 1 and -3, respectively; 6) The penalty to create and extend a gap in an alignment is 5 and 2 respectively.

#### 2019-nCoV\_N1 Assay:

Probe sequence of 2019-nCoV rRT-PCR assay N1 showed high sequence homology with SARS coronavirus and Bat SARS-like coronavirus genome. However, forward and reverse primers showed no sequence homology with SARS coronavirus and Bat SARS-like coronavirus genome. Combining primers and probe, there is no significant homologies with human genome, other coronaviruses or human microflora that would predict potential false positive rRT-PCR results.

#### 2019-nCoV\_N2 Assay:

The forward primer sequence of 2019-nCoV rRT-PCR assay N2 showed high sequence homology to Bat SARS-like coronaviruses. The reverse primer and probe sequences showed no significant homology with human genome, other coronaviruses or human microflora. Combining primers and probe, there is no prediction of potential false positive rRT-PCR results.

In summary, the 2019-nCoV rRT-PCR assay N1 and N2, designed for the specific detection of 2019-nCoV, showed no significant combined homologies with human genome, other coronaviruses, or human microflora that would predict potential false positive rRT-PCR results.

In addition to the *in silico* analysis, several organisms were extracted and tested with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel to demonstrate analytical specificity and exclusivity. Studies were performed with nucleic acids extracted using the QIAGEN EZ1 Advanced XL instrument and EZ1 DSP Virus Kit. Nucleic acids were extracted from high titer preparations (typically  $\geq 10^5$  PFU/mL or  $\geq 10^6$  CFU/mL). Testing was performed using the Thermo Fisher Scientific TaqPath™ 1-Step RT-qPCR Master Mix, CG on the Applied Biosystems™ 7500 Fast Dx Real-Time PCR instrument. The data demonstrate that the expected results are obtained for each organism when tested with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel.

**Table 9. Specificity/Exclusivity of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel**

| Virus                        | Strain | Source            | 2019-nCoV_N1 | 2019-nCoV_N2 | Final Result |

***Endogenous Interference Substances Studies:***

The CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel uses conventional well-established nucleic acid extraction methods and based on our experience with CDC’s other EUA assays, including the CDC Novel Coronavirus 2012 Real-time RT-PCR Assay for the presumptive detection of Middle East Respiratory Syndrome Coronavirus (MERS-CoV) and the CDC Human Influenza Virus Real-Time RT-PCR Diagnostic Panel-Influenza A/H7 (Eurasian Lineage) Assay for the presumptive detection of novel influenza A (H7N9) virus that are both intended for use with a number of respiratory specimens, we do not anticipate interference from common endogenous substances.

***Specimen Stability and Fresh-frozen Testing:***

To increase the likelihood of detecting infection, CDC recommends collection of lower respiratory and upper respiratory specimens for testing. If possible, additional specimen types (e.g., stool, urine) should be collected and should be stored initially until decision is made by CDC whether additional specimen sources should be tested. Specimens should be collected as soon as possible once a PUI is identified regardless of symptom onset. Maintain proper infection control when collecting specimens. Store specimens at 2-8°C and ship overnight to CDC on ice pack. Label each specimen container with the patient’s ID number (e.g., medical record number), unique specimen ID (e.g., laboratory requisition number), specimen type (e.g., nasal swabs) and the date the sample was collected. Complete a CDC Form 50.34 for each specimen submitted.

### **Clinical Performance:**

As of February 22, 2020, CDC has tested 2071 respiratory specimens from persons under investigation (PUI) in the U.S. using the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. Specimen types include bronchial fluid/wash, buccal swab, nasal wash/aspirate, nasopharyngeal swab, nasopharyngeal/throat swab, oral swab, sputum, oropharyngeal (throat) swab, swab (unspecified), and throat swab.

**Table 10: Summary of CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel Data Generated by Testing Human Respiratory Specimens Collected from PUI Subjects in the U.S.**

| <b>Specimen Type</b>                   | <b>2019 nCoV Negative</b> | <b>2019 nCoV Positive</b> | <b>Inconclusive</b> | <b>Invalid</b> | <b>Total</b> |

| <b>Total</b>                           | 2021                      | 49                        | 0                   | 1              | 2071         |

<sup>1</sup>Actual swab type information was missing from these upper respiratory tract specimens.

Two thousand twenty-one (2021) respiratory specimens of the 2071 respiratory specimens tested negative by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. Forty-nine (49) of the 2071 respiratory specimens tested positive by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. Only one specimen (oropharyngeal (throat) swab) was invalid. Of the 49 respiratory specimens that tested positive by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel, seventeen (17) were confirmed by genetic sequencing and/or virus culture (positive percent agreement = 17/17, 95% CI: 81.6%-100%)

During the early phase of the testing, a total of 117 respiratory specimens collected from 46 PUI subjects were also tested with two analytically validated real-time RT-PCR assays that target separate and independent regions of the nucleocapsid protein gene of the 2019-nCoV, N4 and N5 assays. The nucleocapsid protein gene targets for the N4 and N5 assays are different and independent from the nucleocapsid protein gene targets for the two RT-PCR assays included in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel, N1 and N2. Any positive result from the N4 and/or the N5 assay was further investigated by genetic sequencing.

Performance of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel testing these 117 respiratory specimens was estimated against a composite comparator. A specimen was considered comparator negative if both the N4 and the N5 assays were negative. A specimen was considered comparator positive when the N4 and/or the N5 assay generated a positive result, and the comparator positive result(s) were further investigated and confirmed to be 2019-nCoV RNA positive by genetic sequencing.

**Table 11: Percent Agreement of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel with the Composite Comparator**

| CDC 2019-nCoV Panel Result | Composite Comparator Result |          |
|----------------------------|-----------------------------|----------|
|                            | Positive                    | Negative |
| Positive                   | 13 <sup>1</sup>             | 0        |
| Inconclusive               | 0                           | 0        |
| Negative                   | 0                           | 104      |

<sup>1</sup>Composite comparator results were available for 13 of 49 CDC 2019-nCoV Panel positive specimens only.

Positive percent agreement = 13/13 = 100% (95% CI: 77.2% - 100%)

Negative percent agreement = 104/104 = 100% (95% CI: 96.4% - 100%)

**Enzyme Master Mix Evaluation:**

The limit of detection equivalence between the Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix and the following enzyme master mixes was evaluated: Quantabio qScript XLT One-Step RT-qPCR ToughMix, Quantabio UltraPlex 1-Step ToughMix (4X), and Promega GoTaq® Probe 1- Step RT-qPCR System. Serial dilutions of 2019 novel coronavirus (SARS CoV-2) transcript were tested in triplicate with the CDC 2019-nCoV Real-time RT-PCR Diagnostic Panel using all four enzyme master mixes. Both manufactured versions of oligonucleotide probe, BHQ and ZEN, were used in the comparison. The lowest detectable concentration of transcript at which all replicates tested positive using the Quantabio qScript XLT One-Step RT-qPCR ToughMix and Quantabio UltraPlex 1-Step ToughMix (4X) was similar to that observed for the Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix. The lowest detectable concentration of transcript when using the Promega GoTaq® Probe 1- Step RT-qPCR System was one dilution above that observed for the other candidates when evaluated with the BHQ version of the CDC assays. The candidate master mixes all performed equivalently or at one dilution below the Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix when evaluated with the ZEN version of the CDC assays.

**Table 12: Limit of Detection Comparison for Enzyme Master Mixes – BHQ Probe Summary Results**

Retrospective positive (18) and negative (17) clinical respiratory specimens were extracted using the QIAGEN EZ1 Advanced XL instrument and EZ1 DSP Virus Kit and were tested with the CDC 2019-nCoV Real-time RT-PCR Diagnostic Panel using the Quantabio qScript XLT One-Step RT-qPCR ToughMix, Quantabio UltraPlex 1-Step ToughMix (4X), and Promega GoTaq® Probe 1- Step RT-qPCR System master mixes. All three enzyme master mixes performed equivalently, demonstrating 100% positive and 100% negative agreement with expected results and a 95% confidence interval of 82.4%-100% and 81.6%-100%, respectively.

**Table 14: Clinical Comparison – Retrospective Study Summary Results**

| CDC 2019-nCoV Real-time RT-PCR Diagnostic Panel Result | Quantabio qScript XLT One-Step RT-qPCR ToughMix |          | Quantabio UltraPlex 1-Step ToughMix (4X) |          | Promega GoTaq® Probe 1- Step RT-qPCR System |          |

**Roche MagNA Pure 24 and MagNA Pure 96 Extraction Platform Evaluation:**

Performance of the 2019-CoV Real-time RT-PCR Diagnostic Panel using the Roche MagNA Pure 24 and MagNA Pure 96 extraction platforms was compared to performance with an authorized extraction method. Serial dilutions of quantified inactivated SARS-CoV-2 virus (USA-WA1/2020; 100 RNA copies/ $\mu$ L) in lysis buffer were added to pooled negative upper respiratory tract specimen matrix. Five samples of each dilution were extracted in parallel with the QIAGEN EZ1 Advanced XL (EZ1 DSP Virus Kit Cat# 62724) and the Roche MagNA Pure 24 (MagNA Pure 24 Total NA Isolation Kit Cat# 07658036001) and Roche MagNA Pure 96 (MagNA Pure 96 DNA and Viral Nucleic Acid Small Volume Kit Cat# 06543588001) extraction platforms and evaluated using the 2019-nCoV Real-Time RT-PCR Diagnostic Panel and ThermoFisher TaqPath™ 1-Step RT-qPCR Master Mix. The observed LoD was defined as the lowest concentration at which 100% (5 out of 5 total) of all replicates tested positive for both primer/probe sets (N1 and N2) in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. The acceptance criteria for equivalence were defined as demonstrating an observed LoD either at the same endpoint or within a 3-fold dilution. The results showed that both the MagNA Pure 24 and MagNA Pure 96 extraction platforms performed equivalently or within one 3-fold dilution of the LoD observed when using the QIAGEN EZ1 Advanced XL extraction platform.

**Table 15. Limit of Detection Comparison between the QIAGEN EZ1 Advanced XL, Roche MagNA Pure 96, and Roche MagNA Pure 24 Extraction Platforms using the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel**

| Platform               | Parameter            | 2019-nCoV_N1 Assay |                   |                   | 2019-nCoV_N2 Assay |                   |                   | Observed LoD <sup>1</sup> |

<sup>1</sup>Concentration is presented in RNA copies/ $\mu$ L. The observed LoD is the lowest concentration where both assays showed 100% positive detection.

<sup>2</sup>Mean Ct reported for dilutions that show 100% positivity. Calculations only include positive results.

NA = not applicable

Previously characterized clinical remainder specimens (14 positive and 15 negative) were extracted using both the Roche MagNA Pure 96 and MagNA Pure 24 extraction platforms and evaluated using the 2019-nCoV Real-Time RT-PCR Diagnostic Panel and Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix. Acceptance criteria for clinical equivalence was defined as demonstrating 100% concurrence with qualitative results shown with the authorized comparator method (QIAGEN EZ1 Advanced XL). Results from this study showed 100% concurrence with the comparator method for both the Roche MagNA Pure

96 and Roche MagNA Pure 24 extraction platforms when used with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic panel.

***Promega Maxwell® RSC 48 Extraction Platform Evaluation:***

Performance of the 2019-CoV Real-time RT-PCR Diagnostic Panel using the Promega Maxwell® RSC 48 extraction platform was compared to performance with an authorized extraction method. Serial dilutions of quantified inactivated SARS-CoV-2 virus (USA-WA1/2020; 100 RNA copies/μL) in VTM were added to pooled negative upper respiratory tract specimen matrix. Five samples of each dilution were extracted in parallel with the QIAGEN EZ1® Advanced XL (EZ1 DSP Virus Kit Cat# 62724) and the Promega Maxwell® RSC 48 (Promega Maxwell® Viral Total Nucleic Acid Purification Kit Cat# AS1330) extraction platforms and evaluated using the 2019-nCoV Real-Time RT-PCR Diagnostic Panel and ThermoFisher TaqPath™ 1-Step RT-qPCR Master Mix. The observed LoD was defined as the lowest concentration at which 100% (5 out of 5 total) of all replicates tested positive for both primer/probe sets (N1 and N2) in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. The acceptance criteria for equivalence were defined as demonstrating an observed LoD either at the same endpoint or within a 3-fold dilution. The results showed that the performance of the Maxwell® RSC 48 extraction platform performed equivalently or within one 3-fold dilution of the LoD observed when using the QIAGEN EZ1® Advanced XL extraction platform.

**Table 17. Limit of Detection Comparison Between the QIAGEN EZ1® Advanced XL and Promega Maxwell® RSC 48 Extraction Platforms Using the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel**

| Platform                | Parameter            | 2019-nCoV_N1 Assay |                   |                    | 2019-nCoV_N2 Assay |                   |                    | Observed LoD <sup>1</sup> |

<sup>1</sup>Concentration is presented in RNA copies/μL. The observed LoD is the lowest concentration where both assays showed 100% positive detection.

<sup>2</sup>Mean cycle threshold (Ct) reported for dilutions that show 100% positivity. Calculations only include positive results. NA = not applicable

Previously characterized clinical remainder specimens (15 positive and 15 negative) were extracted using the Promega Maxwell® RSC 48 extraction platform alongside the currently authorized QIAGEN EZ1® Advanced XL extraction platform and evaluated using the 2019-nCoV Real-Time RT-PCR Diagnostic Panel and Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix. Results from the Maxwell® RSC 48 were compared with the QIAGEN EZ1® Advanced XL extraction performed in parallel showing 100% (15/15) qualitative concurrence on positive samples and 93.3% (14/15) qualitative concurrence on negative samples. This evaluation showed that two originally negative (QIAGEN QIAamp® DSP Viral RNA Mini Kit) specimens (Specimens 16 and 24) yielded an inconclusive result after extraction using the QIAGEN EZ1® Advanced XL. Repeat of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel resolved one of the two specimens (Specimen 24, negative result). The second specimen (Specimen 16) remained inconclusive. Both these specimens yielded a negative result on the Maxwell® RSC 48.

## **Contact Information, Ordering, and Product Support**

For technical and product support, contact the CDC Division of Viral Diseases directly.

Send email to: [respvirus@cdc.gov](mailto:respvirus@cdc.gov)

Note: If your laboratory is using reagents sourced from someone other than the CDC International Reagent Resource, please refer to the manufacturer's instructions provided with the commercial materials.

## [Appendix A: Heat Treatment Alternative to Extraction UltraPlex 1-Step ToughMix \(4X\)](#)

**This procedure is only for use by public health laboratories.**

### **Purpose:**

In response to a global shortage of nucleic acid extraction reagents causing significant delays in testing, the CDC has investigated the use of a heat treatment method requiring minimal reagents as a specimen processing alternative to nucleic acid extraction for use with the 2019-nCoV Real-Time RT-PCR Diagnostic Panel.

Where possible, laboratories should use qualified RNA or total nucleic acid extraction methods for processing of specimens for subsequent testing by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. Extraction removes inhibitory substances from specimens that could negatively impact PCR performance.

This procedure for use of heat treatment for specimen processing is only recommended when a shortage of qualified extraction reagents is a limiting factor in a laboratory's ability to meet urgent COVID-19 testing demand.

### **Precautions/Warnings/Limitations:**

- CDC has evaluated this heat treatment process and has determined that this process is effective for inactivation of SARS-CoV-2 in patient specimens.
- Performance was evaluated with only upper respiratory specimens. Heat treatment of lower respiratory specimens for subsequent testing by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel has not been evaluated.
- This procedure for heat treatment of specimens is only for use with the Quantabio UltraPlex 1-Step ToughMix (4X).
- Heat treatment should only be conducted when a lab is ready to test the specimens by PCR. Testing of heat-treated specimens must be conducted the same day.

### **Acceptable Specimens:**

- Upper respiratory specimens  
Note: Do not use heat treatment to process specimens that appear bloody or that contain particulate matter. Such specimens should be extracted using a qualified RNA or TNA extraction method prior to testing.

### **Materials Required (not provided):**

- 70% ethanol
- 10% bleach, freshly prepared
- 96-well PCR reaction plates (Applied Biosystems catalog # 4346906, 4366932, 4346907, or equivalent)
- Optical strip caps (Applied Biosystems 4323032, or equivalent)

- 1.5 mL Sarstedt tubes or equivalent
- Aerosol resistant micropipette tips
- Micropipettes
- 96-well cold block
- Cold blocks for 1.5 mL - 2.0 mL tubes
- Vortex mixer
- 96-well plate centrifuge or equivalent
- Thermal cycler or equivalent
- Class II Biological Safety Cabinet (BSC)

## **Procedure:**

### **Sample Preparation**

- 1) Decontaminate BSC with 10% bleach followed by 70% ethanol.
- 2) If samples are frozen, thaw on ice or at 4°C. Wipe the outside of the sample tube with 70% ethanol. Place thawed sample on cold rack or ice in BSC.
- 3) Pulse vortex each sample and briefly spin down in a centrifuge to collect the liquid at the bottom of the tube.

### **Heat Treatment**

- 1) Place a thermal cycler in the BSC, turn on, and program for 95°C for 1 min followed by 4°C hold.
- 2) Place a 96-well PCR plate onto a cold rack or ice in the BSC.
- 3) Transfer 100 µL of each sample to the 96-well PCR plate and securely cap each well using optical strip caps.  
NOTE: Ensure that an HSC extraction control is included in each batch run as required under CLIA.
- 4) Place this 96-well PCR plate on the pre-heated thermal cycler and start run. Leave plate on thermal cycler at 4°C, or place on ice or a cold block.
- 5) Remove plate and centrifuge for 1 minute at 500 x *g* to pellet cellular debris.
- 6) Place plate on a cold rack or ice and proceed to testing the supernatant by rRT-PCR.
- 7) Testing of heat-treated specimens must be conducted the same day heat treatment is performed. For long term storage, keep the original specimen at ≤-70°C.

## **Special Testing Considerations for Heat Treated Specimens:**

### **Enzyme Master Mix**

- Testing of specimens that have been processed with heat treatment should be conducted with the **Quantabio UltraPlex 1-Step ToughMix (4X)**, which demonstrated the best performance with heat treated specimens. PCR testing of heat-treated specimens should follow the instructions in the main body of this Instructions for Use document.

## Resolution of Inconclusive and Invalid Results

- Retesting of heat-treated specimens that generated an inconclusive or invalid result must include extraction of the original specimen with a qualified RNA or total nucleic acid (TNA) extraction method, if available. Do not re-test the heat-treated specimen material to resolve inconclusive or invalid test results.

## Verification:

CDC recommends performance of verification studies for the heat treatment method prior to diagnostic use that includes side-by-side preparation of a panel of positive and negative clinical specimens using a qualified extraction method and this heat treatment method with subsequent testing by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel.

## Performance Characteristics:

### Quantabio UltraPlex 1-Step ToughMix (4X)

#### Limit of Detection Comparison

Serial dilutions of inactivated SARS-CoV-2 [SARS-CoV-2 USA-WA1/2020] were prepared in simulated specimen material (human A549 cells suspended in viral transport medium). Each concentration was prepared side-by-side five times by both EZ1 extraction and by heat treatment. Each extracted or heat-treated sample was subsequently tested by the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel using the Quantabio UltraPlex 1-Step ToughMix (4X) on the Applied Biosystems 7500 Fast Dx instrument. Observed detection was similar between the two specimen preparation methods.

**Table 1: UltraPlex Limit of Detection Comparison between QIAGEN EZ1 Advanced XL extraction and heat treatment (95°C for 1 min) method – Summary Results**

<sup>1</sup>Concentration is presented in RNA copies/µL. The observed LoD is the lowest concentration where both assays showed 100% positive detection.

<sup>2</sup>Mean Ct reported for dilutions that show 100% positivity. Calculations only include positive results.

NA = not applicable

### *Clinical Comparison*

A panel of 39 upper respiratory specimens were tested side-by-side using extraction with the Qiagen EZ1 extraction instrument and heat treatment. Extracted and heat-treated specimens were subsequently tested with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel using the Quantabio UltraPlex 1-Step ToughMix (4X). Qualitative results were compared to demonstrate agreement.

**Table 2: Clinical Comparison Results Summary – Heat Treatment versus QIAGEN EZ1 Advanced XL**

### **Questions and Comments:**

If you have questions or comments about this procedure, please send by email to: [respvirus@cdc.gov](mailto:respvirus@cdc.gov)

## **Appendix B: Pooled Specimen Preparation and Processing**

### **Purpose:**

In response to strong demand for higher throughput testing approaches as well as a global shortage of nucleic acid extraction reagents causing significant delays in testing, the CDC has evaluated specimen pooling and determined that pooling of up to 4 specimens is suitable for use with the 2019-nCoV Real-Time RT-PCR Diagnostic Panel.

Specimen pooling may cause a slight reduction in test sensitivity and therefore may be most appropriate for screening or diagnostic testing when laboratory staff, equipment or reagents are insufficient to accommodate testing demand. Specimen pooling only presents a throughput advantage when the disease prevalence is low. Therefore, laboratories should monitor specimen positivity rates over time to determine if pooling of specimens continues to provide a test throughput advantage over individual specimen testing. Please see Appendix C for more detail on implementation considerations.

While this procedure describes the process to prepare, process and test a pool size of up to 4 specimens, specimen pool sizes from 2-4 are authorized for use with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel. When using a pool size of less than 4 specimens, please use the following instructions as a model. Pooled specimen input volume and the pooled specimen to lysis buffer volume ratios must remain as prescribed below (not a lower proportion of lysis buffer) to ensure inactivation of SARS-CoV-2 in patient specimens. An N-pool specimen approach should include equal volumes of each of the N specimens pooled together to create the total pooled specimen input volume required under the below pooled specimen extraction instructions.

### **Precautions/Warnings/Limitations:**

- Pooling of specimens has the potential to decrease sensitivity. The specimens in a pooled procedure are diluted, which could result in a low concentration of viral genetic material below the limit of detection of a given test.
- When pooling specimens, the laboratory cannot ensure the diagnostic integrity of an individual specimen because it is combined with other specimens before testing. Specimen integrity can be affected by the quality of swab specimen collection, which could result in some swabs having limited amounts of viral genetic material for detection. Inadequate individual specimens, including those with limited amounts of viral genetic material, might not be eliminated from the pooled specimen before testing and may be reported as negative through this process.
- Performance of this specimen pooling process was evaluated with nasopharyngeal (NP) swabs. Pooling of other types of specimens for subsequent testing with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel has not been evaluated, however evidence suggests the Ct value distribution for other upper respiratory swab specimens is similar to that observed for NP swab specimens.
- Pooling should only be implemented in laboratories with a minimum of 10 days experience using the CDC 2019-nCoV Real-time RT-PCR Diagnostic Panel for diagnostic testing in the population of specimens being considered for pooling.

- This procedure for pooling of specimens has only been evaluated for use with the QIAGEN EZ1 Advanced XL, Roche MagNA Pure 96, and the Promega Maxwell RSC 48 instruments. Pooling using other extraction methods is not authorized under this EUA.
- Sufficient volume of specimens must be available to allow subsequent extraction and testing of individual specimens should the specimen pool test positive, inconclusive or invalid.
- Appropriate interpretation, reporting and next steps may be different for surveillance testing and are not limited by the diagnostic interpretation instructions below.
- Laboratories are encouraged to revisit the question of whether pooling continues to make sense when testing demand no longer exceeds laboratory capacity and/or when testing reagents are no longer in short supply.

**Acceptable Specimen Types:**

- Upper respiratory swabs (e.g., nasopharyngeal (NP) swabs, oropharyngeal (OP) swabs, NP/OP swabs combined, nasal swabs)  
Note: Specimens must have adequate volume to support pooled specimen testing and any subsequent individual re-testing.

**Overview of Pooled Specimen Testing:**

This flow chart provides an overview of the steps involved in pooled specimen testing and location of the instructions for each step within the document. For those steps that are identical for both individual specimen testing and for pooled specimen testing, instructions are found in the main body of the instructions for use. For steps in which pooled specimen testing differs from individual specimen testing, instructions specific to pooled specimen testing are presented in this Appendix.

## **Procedure:**

### **Specimen Pool Preparation**

- 1) Decontaminate BSC with 10% bleach followed by 70% ethanol.
- 2) If specimens are frozen, thaw on ice or at 4°C. Wipe the outside of the specimen tube with 70% ethanol. Place thawed specimen on cold rack or ice in BSC.
- 3) Pulse vortex each specimen and briefly spin down in a centrifuge to collect the liquid at the bottom of the tube.
- 4) For each specimen pool, add an equal volume of each specimen (depending on total volume needed for extraction platform) to be included into the pool, into a sterile, nuclease-free tube.
- 5) Pulse vortex each specimen pool and briefly centrifuge to collect the liquid at the bottom of the tube.
- 6) Proceed to extraction using the modified extraction parameters below.

### **Extraction Instructions**

**NOTE: These pooled specimen extraction instructions have been modified to optimize recovery of nucleic acid when processing pooled specimens. When testing individual specimens, please follow the individual specimen extraction instructions (p. 14-16).**

#### **QIAGEN EZ1 Advanced XL**

- Kit: Qiagen EZ1 DSP Virus Kit and Buffer AVL (supplied separately) for offboard lysis
- Card: EZ1 Advanced XL DSP Virus Card
- Instructions: Add 200 µL of pooled specimen to 200 µL of pre-aliquoted Buffer AVL (total input sample volume is 400 µL). Proceed with the extraction on the EZ1 Advanced XL. Elution volume is 60 µL.

#### **Roche MagNA Pure 96**

- Kit: Roche MagNA Pure 96 DNA and Viral NA Small Volume Kit
- Protocol: Viral NA Plasma Ext LysExt Lys SV 4.0 Protocol or Viral NA Plasma Ext Lys SV Protocol
- Instructions: Add 225 µL of pooled specimen to 225 µL of pre-aliquoted MagNA Pure 96 External Lysis Buffer (supplied separately) for total input sample volume of 450 µL. Proceed with the extraction on the MagNA Pure 96. (Internal Control = none).
- Elution volume is 50 µL.

#### **Promega Maxwell RSC 48 or Maxwell CSC 48**

- Kit: Promega Maxwell® Viral Total Nucleic Acid Purification Kit
- Protocol: Viral Total Nucleic Acid
- Instructions: Add 240 µL of pooled specimen to 660 µL of pre-aliquoted External Lysis Buffer (600 µL Lysis Buffer plus 60 µL Proteinase K; supplied within the kit) (total input volume is 900 µL). Proceed with the extraction on the Maxwell® RSC 48 or Maxwell CSC 48.
- Elution volume is 50 µL.

## Testing, Interpretation, and Reporting Instructions

- 1) After extraction, continue PCR testing using the steps outlined in the following sections of the Instructions for Use: Assay Set Up (p. 16-20), Running a Test (p. 29-32) and Data Analysis (p. 33-34).
- 2) Interpret controls and PCR test results as outlined in the following sections of the Instructions for Use: Interpretation of Results and Reporting (p. 35-37), 2019-nCoV rRT-PCR Diagnostic Panel Results Interpretation Guide (p. 38). All extraction and PCR run controls must perform as expected.
  - A. If a specimen pool generates **negative** results, report “Not Detected” for each specimen included in the pool. The test result report should include a statement that the specimen was tested in a pooled format. No further testing is required.
  - B. If a specimen pool generates a **positive** result, do not report the result. Test each specimen included in the pool individually, according to the Instructions for Use. Report the individual result for each specimen.
  - C. If a specimen pool generates an **inconclusive** result, do not report the result. Test each specimen included in the pool individually, according to the Instructions for Use. Report the individual result for each specimen.
  - D. If a specimen pool generates an **invalid** result, do not report the result. Test each specimen within the pool individually, according to the Instructions for Use. Report the individual result for each specimen.

### **Verification:**

Verification should be conducted by all laboratories prior to implementing pooling for diagnostic testing. In addition to method verification studies, verification must include a validation of the accuracy and function of the laboratory’s process of specimen and pool labeling, tracking and reporting through the laboratory information management system(s).

### **Performance Characteristics:**

#### *Pooling Validation*

A panel of 20 positive, previously characterized nasopharyngeal (NP) specimens, with 25% (5) representing the weak positive range (Ct 36.00-39.99), were used for evaluation of specimen pooling with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel; 80 negative NP specimens were also included. These specimens were used to create twenty positive 4-specimen pools, by combining one positive specimen with three negative specimens. Twenty negative pools were also created by combining equal volumes of four negative specimens. These pools were tested and qualitative results from pooled-testing were compared with the results from individual-testing to determine the positive and negative percent agreement of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel for testing using 4-specimen pools. The performance of 4-specimen pooling was evaluated using the QIAGEN EZ1<sup>®</sup> Advanced XL, the Promega Maxwell RSC 48, or the Roche MagNA Pure 96 platforms. Modifications were made to the input and output volume for each extraction platform, for pooling patient specimen, to compensate for the dilution effect due to pooling.

*QIAGEN EZ1<sup>®</sup> Advanced XL*

Individual positive panel members and positive and negative pools were extracted using the QIAGEN EZ1® Advanced XL platform for subsequent testing on the Applied Biosystems 7500 Fast Dx with the Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix, CG. Results obtained for twenty, 4-specimen pools were compared with the results from individual testing. Pools containing a positive specimen were considered to be in agreement with results from individual testing if the pool generated positive or inconclusive results (i.e., at least one of the SARS-CoV-2-specific primer and probe sets generated a Ct value less than 40). Negative specimen pools were considered to be in agreement with expected results if the pooled specimen result was negative (i.e., neither SARS-CoV-2-specific primer and probe set generated positive results).

A comparison of qualitative test results from individual testing of panel members with pooled specimen testing is summarized below in Table 1, along with testing agreement with results from individual testing for positive and negative specimen pools. Of the five positive specimen panel members in the weak positive category (determined by original diagnostic results): one returned an inconclusive result when tested individually, but returned a positive result when tested in a 4-specimen pool; one returned a negative result when tested individually, but returned a positive result when tested in a 4-specimen pool; and three were in agreement when tested individually and in 4-specimen pools.

|                              | Inconclusive <sup>‡</sup> | 1                         | 0                         | 0        |                                                       |                                                       |
|                              | Negative                  | 0                         | 0                         | 20       |                                                       |                                                       |

<sup>‡</sup>CI = 95% confidence interval

<sup>†</sup>Inconclusive individually-tested results are not included in the final performance calculations.

<sup>‡</sup>Inconclusive pooled results are considered in agreement with the positive individually-tested results for the final performance calculations.

### *Promega Maxwell RSC 48*

Individual positive panel members and positive and negative pools were extracted using the Promega Maxwell RSC 48 platform for subsequent testing on the Applied Biosystems 7500 Fast Dx with the Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix, CG. Results obtained for twenty, 4-specimen pools were compared with the results from individual testing. Pools containing a positive specimen were considered to be in agreement with the results from individual testing if the pooled specimen generated positive or inconclusive results (i.e., at least one of the SARS-CoV-2-specific primer and probe sets generated a Ct value less than 40). Twenty negative specimen pools (made from 4 known negative specimens) were considered to be in agreement with expected results if the pooled specimen result was negative (i.e., neither SARS-CoV-2-specific primer and probe set generated positive results).

A comparison of qualitative test results from individual testing of panel members with pooled specimen testing is summarized below in Table 2, along with testing agreement with results from individual testing for positive and negative specimen pools. Of the five positive specimen panel members in the weak positive category (determined by original diagnostic results): one returned a positive result when tested

individually, but returned a negative result when tested in a 4-specimen pool; and four were in agreement when tested individually and in 4-specimen pools. Additionally, one moderate to high positive panel member returned an inconclusive result when tested individually but returned a positive result when tested in a 4-specimen pool.

**Table 2 -Summary of Pooled vs. Individual-testing Results – Promega Maxwell RSC 48**

|                              | Negative                  | 1                         | 0                         | 20       |                                                       |                                                       |

<sup>1</sup>CI = 95% confidence interval

<sup>†</sup>Inconclusive individually-tested results are not included in the final performance calculations.

<sup>‡</sup>Inconclusive pooled results are considered in agreement with the positive individually-tested results for the final performance calculations.

### *MagNA Pure 96*

Individual positive panel members and positive and negative pools were extracted on the MagNA Pure 96 platform for subsequent testing on the Applied Biosystems 7500 Fast Dx using the Thermo Fisher TaqPath™ 1-Step RT-qPCR Master Mix, CG. Results obtained for twenty, 4-specimen pools were compared with the results from individual testing. Pools containing a positive specimen were considered to be in agreement with the results from individual testing if the pooled specimen generated positive or inconclusive results (i.e., at least one of the SARS-CoV-2-specific primer and probe sets generated a Ct value less than 40). Twenty negative specimen pools (made from 4 known negative specimens) were considered to be in agreement with expected results if the pooled specimen result was negative (i.e., neither SARS-CoV-2-specific primer and probe set generated positive results).

A comparison of qualitative test results from individual testing of panel members with pooled specimen testing is summarized below in Table 3, along with testing agreement with results from individual testing for positive and negative specimen pools. Of the five positive specimen panel members in the weak positive category (determined by original diagnostic results): one returned an inconclusive result when tested individually, but returned a positive result when tested in a 4-specimen pool; and four were in agreement when tested individually and in 4-specimen pools.

**Table 3 -Summary of Pooled vs. Individual-testing Results – Roche MagNA Pure 96**

| Test Platform                | Result                    | Individual-testing result |                           |          | Positive Pools<br>Percent Agreement (CI) <sup>1</sup> | Negative Pools<br>Percent Agreement (CI) <sup>1</sup> |
|------------------------------|---------------------------|---------------------------|---------------------------|----------|-------------------------------------------------------|-------------------------------------------------------|
|                              |                           | Positive                  | Inconclusive <sup>†</sup> | Negative |                                                       |                                                       |

|                              | Inconclusive <sup>‡</sup> | 1                         | 0                         | 0        |                                                       |                                                       |
|                              | Negative                  | 0                         | 0                         | 20       |                                                       |                                                       |

<sup>1</sup>CI = 95% confidence interval

<sup>†</sup>Inconclusive individually-tested results are not included in the final performance calculations.

<sup>‡</sup>Inconclusive pooled results are considered in agreement with the positive individually-tested results for the final performance calculations.

**In Silico Sensitivity**

An *in silico* analysis was conducted to evaluate the effect of 4-sample pooling on the clinical sensitivity of the CDC 2019-Novel Coronavirus Real-Time RT-PCR Diagnostic Panel using the QIAGEN EZ1® Advanced XL extraction platform. This analysis was conducted by performing a Passing-Bablok regression using the “Pooling Validation” data to calculate the Ct shifts resulting from the dilution effect of 4-specimen pools (1 positive specimen combined with 3 negative specimens) for each target. In the regression analysis, the X-axis displayed individual Ct values for positive specimens and the Y-axis displayed Ct values for the corresponding pools with one positive specimen and 3 negative specimens. The regression analysis was used to calculate an interval of Ct values [X\*, 40] where individual specimens with Ct values within this interval would have negative results in 4-specimen pools (1 positive and 3 negative).

The results from individually-tested NP swab specimens processed at the CDC using the QIAGEN EZ1® Advanced XL extraction platform (n= 381), were analyzed to determine an *in silico* PPA for 4-specimen pooling. The number of individual specimens with Ct values ranging from [X\*, 40] was determined. The X\* value for the N1 target was 37.2 and the X\* value for the N2 target was 37.5. The results, summarized Table 4, show that 97.1% (370/381 95% CI 94.9-98.3%) of the specimens would not have negative results when combined into 4-specimen pools.

**Table 4. *in silico* Sensitivity for Pooled Specimens Extracted using the QIAGEN EZ1® Advanced XL**

| n   | N1 Interval [X*, 40] | Number of samples with N1 Ct values in the interval | N2 Interval [X*, 40] | Number of samples with N2 Ct values in the interval | Number of Samples with both target Ct values in intervals | Neg | Inc | Pos | % Positive Percent Agreement* |
|-----|----------------------|-----------------------------------------------------|----------------------|-----------------------------------------------------|-----------------------------------------------------------|-----|-----|-----|-------------------------------|
| 381 | [37.2, 40]           | 16                                                  | [37.5, 40]           | 63                                                  | 11                                                        | 11  | 57  | 313 | 97.1                          |

\*Since any pool that is not negative is re-tested as individual samples, the Positive Percent Agreement includes all pools that were not negative.

The specimens submitted to CDC for testing included many that had generated inconclusive results in the hands of public health laboratories and were forwarded to CDC for further testing. Thus, specimens received by CDC for testing overrepresent the weak positive category. The CDC also obtained the results of individually-tested NP swab specimens from three additional geographic locations: state lab 1 (n= 2217), state lab 2 (n= 6559), and state lab 3 (n= 2315). These data sets were analyzed with regard to the

percent of weak positives (Ct 36.00-39.99) collected at each site. The results, summarized in Table 5, suggest that the percent of weak positive NP specimens received at State Health Department laboratories is smaller than that obtained at CDC. Therefore, the *in silico* analysis, summarized in Table 4, presents a PPA in a scenario where 4-specimen pooling is applied to testing populations with a greater than average number of weak positive specimens.

**Table 5. Percent of Weak Positive Specimens at CDC Compared with Three Geographic Locations**

|         | n    | Ct < 36.0     |               | Ct 36.0 - 39.99 |              |
|---------|------|---------------|---------------|-----------------|--------------|
|         |      | N1            | N2            | N1              | N2           |
| CDC     | 381  | 314 (82.4 %)  | 254 (66.7 %)  | 67 (17.6 %)     | 127 (33.3 %) |
| State 1 | 2217 | 2121 (95.7 %) | 2021 (91.2 %) | 150 (6.8 %)     | 250 (11.3%)  |
| State 2 | 6559 | 6343 (96.7 %) | 5883 (89.7 %) | 216 (3.3%)      | 676 (10.3%)  |
| State 3 | 2315 | 2073 (89.5 %) | 1884 (81.4 %) | 242 (10.5 %)    | 431 (18.6 %) |

## Appendix C: Implementation and Monitoring of Pooled Specimen Testing

### Purpose:

These instructions are intended to assist laboratories and jurisdictions to implement and monitor the efficiency and effectiveness of pooled specimen testing over time. A laboratory should have a minimum of 10 days experience performing the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel for diagnostic testing within the intended population prior to implementation of a pooling strategy.

Laboratories should weigh the potential risks associated with pooling as described in Appendix B against the benefits of pooling for their laboratory and patient population. When pooling has been implemented to address overwhelming testing demands and/or scarcity of testing materials, laboratories should consider a return to individual specimen testing when laboratory capacity and resources permit.

### Prior to Implementation of a Specimen Pooling Strategy:

- Determine the individual specimen positivity rate ( $P_{\text{Individual}}$ ) for your testing population.  
 Before implementation of specimen pooling, evaluate test data from the testing population for the previous 7-10 days to estimate the positivity rate ( $P_{\text{Individual}}$ ) which is the number of positive results divided by the total number of specimens tested during these 7-10 days.  $P_{\text{Individual}}$  will be used to determine if pooling should be considered and will be used to monitor the performance of your pooling strategy.  
  
**Note:** To calculate the efficiency of 4-sample pooling, using  $P_{\text{Individual}}$ , apply the formula  $F=1/(1+1/n-(1-P_{\text{Individual}})^n)$ , where F is the efficiency and n is the pool size. For example, when  $P_{\text{Individual}}$  is 1%, the efficiency, F, is 3.46 for n = 4. This means that 1,000 tests can cover testing of 3,460 patients on average, which translates to a reduction in test volume of 71%. Using this formula, a pool size of n = 3 produces a greater efficiency than n = 4 at  $P_{\text{Individual}} \geq 13\%$ .
- Identify your positivity thresholds.

**Table 1: Association Between Individual Specimen Positivity Rates and Reduction in Test Volume with Pooling**

| Specimen Positivity Rate (P) | No. tests with 4 specimen pooling for 300 patients | Reduction in testing volume with 4 specimen pooling | No. tests with 3 specimen pooling for 300 patients | Reduction in testing volume with 3 specimen pooling | No. tests with 2 specimen pooling for 300 patients | Reduction in testing volume with 2 specimen pooling |
|------------------------------|----------------------------------------------------|-----------------------------------------------------|----------------------------------------------------|-----------------------------------------------------|----------------------------------------------------|-----------------------------------------------------|
| 1%                           | 87                                                 | 71%                                                 | 109                                                | 64%                                                 | 156                                                | 48%                                                 |

**Note:** Table 1 does not account for running the positive, negative, and extraction controls with each plate.

**Note:** Unshaded cells indicate the optimal reduction in testing volume compared to other the pool sizes.

Table 1 presents the estimated increase in efficiency achieved through pooling at different rates of specimen positivity. Laboratories are encouraged to use this table and factor in additional testing necessary to monitor the effectiveness of pooling to determine the specimen positivity thresholds ( $P_{\text{Threshold}}$ ) at which (1) four-specimen pooling is appropriate, (2) smaller specimen pools are appropriate, and (3) the threshold at which specimen pooling offers no testing capacity/reagent consumption advantages. These thresholds should be documented for your laboratory's pooling monitoring process.

Example: a laboratory might consider a 30% reduction in test volume as the minimum required reduction in test volume to be considered beneficial (this is subjective). Thus, the laboratory would set a positivity threshold ( $P_{\text{Threshold}}$ ) at 12%<sup>2</sup> for 4 specimen pooling, 14% for 3 specimen pooling, and 10% or less for 2 specimen pooling.

NOTE: It is recommended that  $P_{\text{Threshold}}$  should not be greater than 20% for any pool size. Moreover, laboratories may choose a threshold positivity rate lower than 20% for when to consider a pooling strategy.

- Define and document a specimen pooling strategy/process for your laboratory.
- Verify laboratory performance of pooled specimen testing (CLIA requirement).
- Establish and implement a pooling monitoring process appropriate to assure the quality of results generated through the laboratory's pooling strategy. The pooling monitoring process should document the laboratory's  $P_{\text{Threshold}}$  for each pool size,  $P_{\text{Individual}}$  and the laboratory's process to address the monitoring requirements below.
- Please note that information from the monitoring process described in this Appendix may not be the only information useful to monitor for pooling performance issues or to aid in decision-making for pooling strategy. Thus, laboratories are encouraged to monitor other sources of COVID-19 prevalence or test positivity rate information for their target population, comparing those trends to

<sup>2</sup>At  $P_{\text{Individual}} \geq 13\%$ ,  $n=3$  offers a greater efficiency than  $n=4$ , therefore it is recommended that  $P_{\text{Threshold}}$  should not be greater than 12% for  $n=4$ .

their pooling testing trends, as part of the laboratory’s pooling monitoring process in addition to the approach below.

Monitoring of the Pooling Strategy

At regular intervals (weekly at a minimum, continual analysis with a moving 7-10 day average preferred), laboratories must monitor the positivity rate of specimen pools as described below.

Figure 1: Overview of Pooling Monitoring Process to be Conducted at Defined Intervals

## Data Monitoring Steps to Be Conducted at Each Interval

1. Evaluate need for pooled specimen testing going forward.

Evaluate test demand and testing resource availability. When testing capacity and resource availability are sufficient to meet testing demand without the use of specimen pooling, consider whether the risks of reduced test sensitivity with pooling and extra effort of pooling outweigh the benefits of pooled specimen testing.

2. Calculate Pooled Percent Positive ( $P_{Pool}$ ) for the interval.

$$P_{Pool} = \frac{\text{Specimens tested under pooling strategy generating positive results}}{\text{Total specimens tested under pooling strategy}}$$

3. Check Interval  $P_{Pool}$  Against Positivity Threshold ( $P_{Threshold}$ ) for the pool size in use.

Compare the  $P_{Pool}$  for the current interval to the specimen positivity threshold established during pooling implementation.

- If  $P_{Pool}$  is greater than  $P_{Threshold}$  for the pool size in use, consider a reduction in pool size or discontinuation of specimen pooling until specimen positivity rates decrease in your testing population.
- If  $P_{Pool}$  is less than  $P_{Threshold}$ , proceed to step 4.

4. Check Interval  $P_{Pool}$  Against Re-assessment Criteria

Compare  $P_{Pool}$  to  $P_{Individual}$ .

- If  $P_{Pool}$  is equal to or greater than 85% of  $P_{Individual}$ . ( $P_{Pools} \geq 0.85 \times P_{Individual}$ ), then monitoring checks are complete for this interval. Proceed with the current pooling strategy.
- If  $P_{Pool}$  is less than 85% of  $P_{Individual}$ . ( $P_{Pools} < 0.85 \times P_{Individual}$ ), re-assessment is necessary to determine if pooled-specimen testing process is still acceptable. Please proceed to the Re-assessment of Pooling section below.

5. Update  $P_{Individual}$  if Indicated by Re-assessment.

If re-assessment is conducted and indicates n-specimen pooling is still acceptable, re-establish  $P_{Individual}$  in your laboratory using the data generated during re-assessment.

If 10 positive specimens were tested during re-assessment:

$$P_{Individual} = \frac{\text{10 positive specimens used for re-assessment}}{\text{The total number of specimens tested to reach 10 positive specimens}} \times \frac{10}{11}$$

If 20 positive specimens were tested during re-assessment:

$$P_{Individual} = \frac{\text{20 positive specimens used for re-assessment}}{\text{The total number of specimens tested to reach 20 positive specimens}} \times \frac{20}{21}$$

This updated new positivity rate should be used as  $P_{Individual}$  in the future monitoring.

Explanation: This calculation attempts to estimate the individual testing positivity rate in the population from which the 10 (or 20) individual positive samples were collected for re-assessment. Since the total number of samples ( $N^*$ ) that needed to be tested to obtain 10 (or 20) consecutive positive samples for re-assessment is stopped at the 10<sup>th</sup> (or 20<sup>th</sup>) positive sample, then the positivity rate of  $10/N^*$  (or  $20/N^*$ ) may be overestimated.  $P_{\text{Individual}}$  is corrected in the above calculations by including an appropriate multiplier: estimated positivity rate for 10 positive sample re-assessment data is  $(10/N^*) \times (10/11)$  and for 20 samples is  $(20/N^*) \times (20/21)$ .

### Re-assessment of Pooling:

Re-assessment of pooling should be conducted as indicated by monitoring activities. Two possible approaches are presented below.

#### *Option 1*

Incoming patient specimens should be tested individually until the collection contains 10 positive specimens.

- Using these specimens, 10  $n$ -specimen pools should be created and tested, each with 1 positive and  $(n-1)$  negative specimens.
- Calculate the PPA between individual testing results and pooled testing results.

**Note:** For the calculation of the PPA, all pools that generate positive or inconclusive result are considered in agreement with the individually-tested positive result.

#### *Option 2*

Incoming patient specimens can continue to be tested in pools.

- Re-assessment study should start from time  $T_0$  and should consist of individual sample testing in parallel with the pooled testing. However, since all non-negative sample pools require individual testing of all individual samples included in the pool as a part of the  $n$ -sample pooling and deconvoluting workflow, the re-assessment study essentially consists of testing individual samples from the negative  $n$ -sample pools.
- Re-assessment study may pause at time  $T_1$  when a minimum of 10 consecutive positive individual results are obtained, including both positive individual results generated from individual testing of samples from the non-negative sample pools following the  $n$ -sample pooling and deconvoluting workflow, and positive individual results obtained from individual testing of samples from the negative sample pools for the time period from  $T_0$  to  $T_1$  [ $T_0, T_1$ ].
- Considering that number of positive individual sample results among negative pools is  $K$ , PPA between testing  $n$ -sample pools and assaying single specimens using the candidate test should be calculated as  $\text{PPA (EUA Test pool vs. EUA Test individual)} = 100\% \times (10-K)/10$ . It is critical that all consecutive positive samples from time period [ $T_0, T_1$ ] are included in the PPA calculations. With regard to calculating the PPA, all non-negative results testing pooled samples should be counted as in agreement with positive individually tested results.

### *Re-assessment Acceptance Criteria for Option 1 and Option 2*

- If the PPA between pooled-testing results and individual-testing results is  $\geq 90\%$  (9 out of 10 or 10 out of 10), then continuation of testing using  $n$ -specimen pooling is acceptable.
- If the PPA between pooled-testing results and individual-testing results is less than 85%:
  - If  $PPA \leq 70\%$  (7 out of 10), reduce the pool size (consider  $n = 3$ ) and repeat the re-assessment testing with the new pool size until PPA of pooled compared to individual testing is  $\geq 90\%$  OR consider cessation of pooling patient specimens.
  - If PPA is 80% (8 out of 10), collect an additional 10 consecutive individually positive samples. Then, calculate the PPA from the combined data of 20 samples, between pooled testing results and individual testing results. If the PPA is  $\geq 85\%$ , then implementation of testing using  $n$ -sample pooling is acceptable. Or, to compensate for lost sensitivity, reduce the pool size (consider  $n = 3$ ) and repeat the re-assessment testing with the new pool size until PPA of pooled compared to individual testing is  $\geq 85\%$ .
- If PPA of at least 85% cannot be reached for any pool size, cease pooling patient specimens.
- If  $n$ -sample pooling is acceptable, return to step 5 in “Data Monitoring” to re-establish  $P_{\text{Individual}}$ .

## CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel – Verification Requirements

**\*\*\* DO NOT DISCARD: Important product-specific information \*\*\***

### CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel – Verification Requirements

Please consult the following guidance from the Centers for Medicare & Medicaid Services (CMS) regarding diagnostic tests under Emergency Use Authorization (EUA):

<https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/Policy-and-Memos-to-States-and-Regions-Items/QSO18-19-CLIA>

#### INTENDED USE

The CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel is a real-time RT-PCR test intended for the qualitative detection of nucleic acid from SARS-CoV-2 in upper and lower respiratory specimens (such as nasopharyngeal or oropharyngeal swabs, sputum, lower respiratory tract aspirates, bronchoalveolar lavage, and nasopharyngeal wash/aspirate or nasal aspirate) collected from individuals suspected of COVID-19 by their healthcare provider<sup>1</sup>.

This test is also for the qualitative detection of nucleic acid from the SARS-CoV-2 in pooled samples containing up to four of the individual upper respiratory swab specimens (nasopharyngeal (NP), oropharyngeal (OP), NP/OP combined, or nasal swabs) that were collected using individual vials containing transport media from individuals suspected of COVID-19 by their healthcare provider. Negative results from pooled testing should not be treated as definitive. If a patient's clinical signs and symptoms are inconsistent with a negative result or results are necessary for patient management, then the patient should be considered for individual testing. Specimens included in pools with a positive, inconclusive, or invalid result must be tested individually prior to reporting a result. Specimens with low viral loads may not be detected in sample pools due to the decreased sensitivity of pooled testing.

Testing is limited to laboratories certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA), 42 U.S.C. § 263a, that meet the requirements to perform high complexity tests.

Results are for the identification of SARS-CoV-2 RNA. SARS-CoV-2 RNA is generally detectable in upper and lower respiratory specimens during infection. Positive results are indicative of active infection with SARS-CoV-2 but do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease. Laboratories within the United States and its territories are required to report all results to the appropriate public health authorities.

Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for treatment or other patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.

Testing with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel is intended for use by trained laboratory personnel who are proficient in performing real-time RT-PCR assays. The CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel is only for use under a Food and Drug Administration's Emergency Use Authorization.

#### REQUIRED MATERIALS

The 2019 novel coronavirus positive control (nCoVPC) is provided with the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel and should be prepared according to the Instructions for

<sup>1</sup> For this EUA, a healthcare provider includes, but is not limited to, physicians, nurses, pharmacists, technologists, laboratory directors, epidemiologists, or any other practitioners or allied health professionals.

## CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel – Verification Requirements

### **\*\*\* DO NOT DISCARD: Important product-specific information \*\*\***

Use. The nCoVPC consists of an RNA transcript of the 2019-nCoV N gene as well as human RNase P gene segment. nCoVPC will yield a positive result with the following primer and probe sets: 2019-nCoV\_N1, 2019-nCoV\_N2, and RP.

Approximately 2 mL of an upper respiratory specimen (e.g. nasopharyngeal swab (NPS) in transport media) are needed for testing. Specimens may be pooled if less than 2 mL of one specimen is available.

Refer to CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel package insert (manufacturer instructions) for additional reagents, materials, and instructions.

### **PRECAUTIONS**

This reagent should be handled in an approved biosafety level 2 (BSL-2) handling area to avoid contamination of laboratory equipment and reagents that could cause false positive results. This product is an RNA transcript and is non-infectious. However, the nCoVPC should be handled in accordance with Good Laboratory Practices.

Store reagent at appropriate temperatures (see Instructions for Use) and hold on ice when thawed.

Please use standard precautions when handling respiratory specimens.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE QIAamp® DSP VIRAL RNA MINI KIT OR THE QIAamp® VIRAL RNA MINI KIT**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 560 µL of lysis buffer into each of nine tubes labeled 1-9.
- Add 140 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 14 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 14 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.
- To prepare negative samples, spike 14 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.
- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE QIAGEN EZ1® ADVANCED XL**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 280 µL of lysis buffer into each of nine tubes labeled 1-9.
- Add 120 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 12 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 12 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.
- To prepare negative samples, spike 12 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.

## CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel – Verification Requirements

**\*\*\* DO NOT DISCARD: Important product-specific information \*\*\***

- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE ROCHE MagNA PURE TOTAL NUCLEIC ACID KIT OR THE ROCHE MagNA PURE NUCLEIC ACID ISOLATION KIT I**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 300 µL of lysis buffer into each of nine tubes labeled 1-9.
- Add 100 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 12 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 12 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.
- To prepare negative samples, spike 12 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.
- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE ROCHE MagNA PURE 24 AND TOTAL NUCLEIC ACID ISOLATION KIT**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 400 µL of lysis buffer into each of nine tubes labeled 1-9.
- Add 100 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 12 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 12 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.
- To prepare negative samples, spike 12 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.
- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE ROCHE MagNA PURE 96 DNA AND VIRAL NA SMALL VOLUME KIT**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 350 µL of lysis buffer into each of nine tubes labeled 1-9.
- Add 100 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 12 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 12 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.

## CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel – Verification Requirements

**\*\*\* DO NOT DISCARD: Important product-specific information \*\*\***

- To prepare negative samples, spike 12 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.
- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE PROMEGA MAXWELL® RSC 48**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 330 µL of lysis buffer (300 µL of lysis buffer + 30 µL Proteinase K, included in the kit) into each of nine tubes labeled 1-9.
- Add 120 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 12 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 12 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.
- To prepare negative samples, spike 12 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.
- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **INSTRUCTIONS FOR PREPARING SAMPLES BEFORE EXTRACTION WITH THE BIOMÉRIEUX NucliSENS easyMAG OR THE BIOMÉRIEUX EMAG**

- Refer to the 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for reconstitution of the materials for use. RNA should be kept cold during preparation and use.
- Make a 1/10 dilution of nCoVPC by adding 5 µL of nCoVPC into 45 µL of nuclease-free water or 10 mM Tris.
- Aliquot 1000 µL or 2000 µL of pre-aliquoted easyMAG lysis buffer into each of nine tubes labeled 1-9 for the easyMAG or eMAG, respectively.
- Add 100 µL of upper respiratory specimen (e.g. NPS in viral transport media) into each of the nine labeled tubes with lysis buffer.
- To prepare samples at a moderate concentration, spike 12 µL of undiluted nCoVPC (rehydrated as described in the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use) into each tube labeled 1-3 containing lysis buffer and specimen.
- To prepare samples at a low concentration, spike 12 µL of 1/10 dilution of nCoVPC into each tube labeled 4-6 containing lysis buffer and specimen.
- To prepare negative samples, spike 12 µL of nuclease-free water into each tube labeled 7-9 containing lysis buffer and specimen.
- Perform extractions of all nine samples according to the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use.

### **PROCEDURE**

Follow the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel Instructions for Use for testing the nine extracted samples at least once.

### **EXPECTED RESULTS**

Moderate nCoVPC samples should be positive for 2019-nCoV.

Low nCoVPC samples should be positive for 2019-nCoV.

Negative upper respiratory samples should be negative for 2019-nCoV.

≥90% of test results should be in agreement with the expected results. If test results are <90% in agreement with expected results, contact CDC at [respvirus@cdc.gov](mailto:respvirus@cdc.gov).

## CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel – Verification Requirements

**\*\*\* DO NOT DISCARD: Important product-specific information \*\*\***

### LIMITATIONS

This test has not been FDA cleared or approved.

This test has been authorized by FDA under an EUA for use by authorized laboratories.

This test has been authorized only for the detection of nucleic acid from 2019-nCoV, not for any other viruses or pathogens.

This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of SARS-CoV-2 under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

### QUESTIONS

Please send questions or comments by email to [respvirus@cdc.gov](mailto:respvirus@cdc.gov).

### DISTRIBUTION

Distributed to qualified laboratories by Centers for Disease Control and Prevention, 1600 Clifton Road, Atlanta, GA, 30329 USA

\*\*\*DO NOT DISCARD: Important product-specific information\*\*\*

## Summary

### What is already known about this topic?

Antigen tests for SARS-CoV-2 are inexpensive and can return results within 15 minutes, but test performance data in asymptomatic and symptomatic persons are limited.

### What is added by this report?

Compared with real-time reverse transcription–polymerase chain reaction (RT-PCR) testing, the Sofia antigen test had a sensitivity of 80.0% and specificity of 98.9% among symptomatic persons; accuracy was lower (sensitivity 41.2% and specificity 98.4%) when used for screening of asymptomatic persons.

### What are the implications for public health practice?

To account for reduced antigen test accuracy, confirmatory testing with a nucleic acid amplification test (e.g., RT-PCR) should be considered after negative antigen test results in symptomatic persons and positive antigen test results in asymptomatic persons.

## COVID-19 rapid tests are inexpensive and fast but sometimes give incorrect results\*

1 in 5 patients with symptoms and confirmed COVID-19 received a negative rapid antigen test result

\* 1,098 paired nasal swabs collected at 2 universities in Wisconsin, September 28–October 9, were tested using Sofia SARS Antigen FIA and compared to RT-PCR/viral culture results.

People with **symptoms** and a **negative rapid test** should

Get a confirmation (RT-PCR) test

Wear a mask

Stay home in a separate room

Antigen-based tests for SARS-CoV-2, the virus that causes coronavirus disease 2019 (COVID-19), are inexpensive and can return results within 15 minutes (1). Antigen tests have received Food and Drug Administration (FDA) Emergency Use Authorization (EUA) for use in asymptomatic and symptomatic persons within the first 5–12 days after symptom onset (2). These tests have been used at U.S. colleges and universities and other congregate settings (e.g., nursing homes and correctional and detention facilities), where serial testing of asymptomatic persons might facilitate early case identification (3–5). However, test performance data from symptomatic and asymptomatic persons are limited. This investigation evaluated performance of the Sofia SARS Antigen Fluorescent Immunoassay (FIA) (Quidel Corporation) compared with real-time reverse transcription–polymerase chain reaction (RT-PCR)

for SARS-CoV-2 detection among asymptomatic and symptomatic persons at two universities in Wisconsin. During September 28–October 9, a total of 1,098 paired nasal swabs were tested using the Sofia SARS Antigen FIA and real-time RT-PCR. Virus culture was attempted on all antigen-positive or real-time RT-PCR–positive specimens. Among 871 (79%) paired swabs from asymptomatic participants, the antigen test sensitivity was 41.2%, specificity was 98.4%, and in this population the estimated positive predictive value (PPV) was 33.3%, and negative predictive value (NPV) was 98.8%. Antigen test performance was improved among 227 (21%) paired swabs from participants who reported one or more symptoms at specimen collection (sensitivity = 80.0%; specificity = 98.9%; PPV = 94.1%; NPV = 95.9%). Virus was isolated from 34 (46.6%) of 73 antigen-positive or real-time RT-PCR–positive nasal swab specimens, including two of 18 that were antigen-negative and real-time RT-PCR–positive (false-negatives). The advantages of antigen tests such as low cost and rapid turnaround might allow for rapid identification of infectious persons. However, these advantages need to be balanced against lower sensitivity and lower PPV, especially among asymptomatic persons. Confirmatory testing with an FDA-authorized nucleic acid amplification test (NAAT), such as RT-PCR, should be considered after negative antigen test results in symptomatic persons, and after positive antigen test results in asymptomatic persons (1).

Paired nasal swabs were collected from students, faculty, staff members, and other affiliates<sup>†</sup> at two Wisconsin university campuses during university-based testing programs. At university A, all persons tested (screening or diagnostic) at the university testing center during October 1–9 were eligible to participate. At university B, only students who were quarantined during September 28–October 6 after exposure to persons with COVID-19 could participate.

All participants completed a questionnaire and provided information on demographic characteristics, current and past (14 days) symptoms,<sup>§</sup> and recent exposure<sup>¶</sup> to persons with COVID-19. For each participant, two mid-turbinate nasal swabs were collected by health care personnel at university A and were self-collected under supervision at university B. Both nostrils were sampled with each of the two swabs. Swabs for antigen testing were analyzed according to the manufacturer's instructions.\*\* Swabs for real-time RT-PCR were stored in viral transport media at 39°F (4°C) and analyzed within 24–72 hours of collection. At university A, real-time RT-PCR was performed using the CDC 2019-nCoV real-time RT-PCR diagnostic panel (6), with cycle threshold (Ct) values reported for the N1 and N2 viral nucleocapsid protein gene regions. At university B, real-time RT-PCR was performed using the TaqPath COVID-19 Combo Kit (Thermo Fisher Scientific). Viral culture<sup>††</sup> (7) was attempted on residual RT-PCR specimens if the RT-PCR or antigen test result was positive.

Statistical analyses were performed using Stata (version 16.1; StataCorp). Sensitivity, specificity, PPV, and NPV were calculated for antigen testing compared with real-time RT-PCR results. Ninety-five percent confidence intervals (CIs) were calculated using the exact binomial method; t-tests were used for Ct value comparisons<sup>§§</sup>; p-values <0.05 were considered statistically significant. This investigation was reviewed by CDC and was conducted consistent with applicable federal law and CDC policy.<sup>¶¶</sup> Ethical review boards at both universities determined the activity to be nonresearch public health surveillance (2).

Among a total of 1,105 nasal swab pairs submitted, seven (0.6%) were excluded for having inconclusive antigen or real-time RT-PCR results. Test comparisons were performed on 1,098 paired nasal swabs (2,196 total swabs), including 1,051 pairs (95.7%) from university A and 47 pairs (4.3%) from university B (Table 1). Among the 1,098 pairs evaluated, 994 (90.5%) were provided by students aged 17–53 years (median = 19 years), 82 (7.5%) by university faculty or staff members aged 22–63 years (median = 38 years), and 22 (2.0%) by other university affiliates aged 15–64 years (median = 29 years). Fifty-seven persons participated more than once on different testing days. Overall, 453 (41.3%) participants were male, and 917 (83.5%) were non-Hispanic White. At specimen collection, 227 (20.7%) participants reported experiencing one or more COVID-19 symptoms, and 871 (79.3%) reported no symptoms.

Among 227 paired specimens from symptomatic participants, 34 (15.0%) were antigen-positive, and 40 (17.6%) were real-time RT-PCR–positive. The median interval from symptom onset to specimen collection was 3 days (interquartile range = 1–6 days; 7.5% missing). Among symptomatic participants, antigen testing sensitivity was 80.0% (32 of 40), specificity was 98.9% (185 of 187), PPV was 94.1% (32 of 34), and NPV was 95.9% (185 of 193) (Table 2). For specimens collected within 5 days of reported symptom onset (72.4%; 152 of 210), sensitivity was 74.2% (23 of 31), and specificity was 99.2% (120 of 121).

Among 871 paired specimens from asymptomatic participants, 21 (2.4%) were antigen-positive and 17 (2.0%) were real-time RT-PCR–positive. Antigen testing sensitivity was 41.2% (seven of 17), specificity was 98.4% (840 of 854), PPV was 33.3% (seven of 21), and NPV was 98.8% (840 of 850). Test performance was not significantly (p>0.05) different when excluding 53 (6.1%) of 871 participants who were asymptomatic at the time of testing but had reported one or more symptoms in the preceding 14 days.

Sixteen paired swabs were antigen-positive and real-time RT-PCR–negative (i.e., false-positive), including 14 (66.7%) of 21 positive antigen results from asymptomatic participants and two (5.9%) of 34 from symptomatic participants. Eight of the 16 false-positive results were recorded during a 1-hour period at university A. In this instance, a series of consecutive positive results in asymptomatic persons was noted, and investigators offered repeat antigen testing to the affected participants. Six of eight participants were reswabbed within 1 hour, and all six received negative test results on a second antigen test. All eight initial paired swabs from these participants were negative on real-time RT-PCR. Because no user errors could be identified, the false-positive results were included in analysis. Eighteen false-negative antigen test results were obtained, including 10 (58.8%) of 17 real-time RT-PCR–positive tests from asymptomatic participants, and eight (20.0%) of 40 from symptomatic participants. All false-negative results from symptomatic participants were from specimens collected <5 days after onset of symptoms (median = 2 days). Ct values for specimens with false-negative antigen results were significantly higher compared with antigen- and real-time RT-PCR–positive specimens (mean N1 Ct = 32.3 versus 23.7; p<0.01) (Figure).

higher compared with antigen- and real-time RT-PCR-positive specimens (mean NP Ct = 32.3 versus 23.7,  $p < 0.01$ ) (Figure).

Virus was recovered from 34 (46.6%) of 73 positive specimens, including 32 (82.1%) of 39 specimens with concordant positive results and two (11.1%) of 18 with false-negative antigen results; no virus was recovered from 16 specimens with false-positive antigen test results. The two specimens with false-negative antigen results that were culture-positive were from two symptomatic participants who had specimens collected at day 2 and day 4 after symptom onset.\*\*\*

## Discussion

The Sofia SARS Antigen FIA received FDA EUA on May 8, 2020, for use in symptomatic persons within 5 days of symptom onset (2). In this investigation, among persons reporting COVID-19-compatible symptoms at specimen collection, the test was less accurate (sensitivity = 80.0%; specificity = 98.9%) than reported in the FDA EUA (sensitivity = 96.7%; specificity = 100%) (2). Two of eight specimens from symptomatic persons that had false-negative antigen test results were positive by viral culture, indicating that potentially infectious persons might not be detected by antigen testing. To reduce the impact of false-negative antigen test results, confirmatory testing with an FDA-authorized NAAT, such as RT-PCR, should be considered following negative antigen test results in symptomatic persons (1).

Among asymptomatic participants, antigen test sensitivity was 41.2%, specificity was 98.4%, and PPV in this population was 33.3%. This low PPV was observed despite a relatively high prevalence of SARS-CoV-2 in this population (5.2% prevalence overall; 2.0% among asymptomatic persons), suggesting that PPV could be even lower when using this antigen test among populations with lower expected SARS-CoV-2 prevalence. To account for false-positive results when using antigen tests for asymptomatic screening, confirmatory NAAT testing should be considered following positive antigen test results in asymptomatic persons, particularly when pretest probability of SARS-CoV-2 infection is low (1). The NPV of antigen testing among asymptomatic participants was 98.8%, and virus was not cultured from asymptomatic participants with antigen-negative results, indicating that asymptomatic persons with negative antigen results are unlikely to be infected with SARS-CoV-2 and would not require confirmatory NAAT (1).

The findings in this report are subject to at least four limitations. First, participants were predominantly young adults in university settings where ongoing serial testing was being conducted. Antigen test performance might differ in other populations with different characteristics and testing schedules. Second, given the limitations of RT-PCR, some false-positive antigen test results might represent true infections not identified by RT-PCR. Third, the ability to recover infectious virus in culture is limited and decreases for specimens with higher Ct values (8); a lack of virus recovery by culture does not indicate that a person is not infectious. Finally, this investigation evaluated the Sofia SARS Antigen FIA, and cannot be generalized to other FDA-authorized SARS-CoV-2 antigen tests.

Serial testing of asymptomatic and symptomatic persons has been proposed for prevention and control of SARS-CoV-2 transmission (9,10) and is currently being implemented at U.S. colleges and universities and in other congregate settings (3–5). Despite reduced sensitivity compared with real-time RT-PCR, the use of antigen tests for serial testing in these settings, particularly when RT-PCR tests are not available or have a prolonged turnaround time, might still allow rapid identification of infectious persons and control of outbreaks (1). However, antigen-based testing strategies should account for the lower sensitivity and lower PPV when used for asymptomatic screening by considering confirmatory testing with an FDA-authorized NAAT, such as RT-PCR, after a positive antigen test result in an asymptomatic person. Confirmatory testing should also be considered following a negative antigen test result in a person experiencing COVID-19-compatible symptoms. All persons with negative antigen test results should continue to take measures to prevent SARS-CoV-2 transmission, including wearing a mask, reducing contact with nonhousehold members, and getting tested if they experience symptoms or have close contact with someone who has COVID-19.<sup>†††</sup> Symptomatic persons with negative antigen test results should continue to follow CDC guidance<sup>§§§</sup> for persons who might have COVID-19, including staying home except to get medical care and protecting household members by staying in a separate room, wearing a mask indoors, washing hands often, and frequently disinfecting surfaces.

<sup>§</sup> Symptom list was based on the interim position statement for COVID-19 case definitions from the Council of State and Territorial Epidemiologists, updated August 7, 2020. Clinical criteria for COVID-19 included fever, cough, shortness of breath, fatigue, sore throat, headache, muscle aches, chills, nasal congestion, difficulty breathing, diarrhea, nausea, vomiting, abdominal pain, rigors, loss of taste, and loss of smell. [https://cdn.ymaws.com/www.cste.org/resource/resmgr/ps/positionstatement2020/Interim-20-ID-02\\_COVID-19.pdf](https://cdn.ymaws.com/www.cste.org/resource/resmgr/ps/positionstatement2020/Interim-20-ID-02_COVID-19.pdf)  .

<sup>¶</sup> Recent exposure was defined as being within 6 feet of a person with a COVID-19 diagnosis for  $\geq 15$  minutes in the past 14 days.

\*\* <https://www.fda.gov/media/137885/download> .

<sup>††</sup> Specimens were used to perform a limiting-dilution inoculation of Vero CCL-81 cells, and cultures showing evidence of cytopathic effect (CPE) were tested by real-time RT-PCR for the presence of SARS-CoV-2 RNA. Viral recovery was defined as any culture in which the first passage had an N1 Ct at least twofold lower than the corresponding clinical specimen.

<sup>§§</sup> Ct values from real-time RT-PCR were only compared for specimens collected at university A that were analyzed with the CDC 2019-nCoV real-time RT-PCR diagnostic panel for detection of SARS-CoV-2.

\* Includes 57 participants who received multiple tests and were included more than once in the analysis.

† True positive = antigen-positive and real-time RT-PCR-positive; false negative = antigen-negative and real-time RT-PCR-positive; false positive = antigen-positive and real-time RT-PCR-negative; true negative = antigen-negative and real-time RT-PCR-negative; these definitions do not reflect results from viral culture.

§ At university A, real-time RT-PCR was performed using the CDC 2019-nCoV real-time RT-PCR diagnostic panel for detection of SARS-CoV-2.

¶ At university B, real-time RT-PCR was performed using Thermo Fisher Scientific's TaqPath COVID-19 Combo Kit for detection of SARS-CoV-2.

\*\* One university staff member's child aged 15 years. All other participants were aged ≥17 years.

†† Non-Hispanic ethnicity represented for all White, Black/African-American, Asian/Pacific Islander, American Indian/Alaska Native, Other/Unknown/Multiple races.

§§ Other affiliates were participants who did not mark "student" or "staff" on the questionnaire (they selected "other" or did not respond); the majority of these persons were family members of staff members.

¶¶ Ever in close contact was defined as within 6 feet for ≥15 minutes of a person with a diagnosis of COVID-19.

\*\*\* Other reported symptoms included allergies, cough that is not dry, and difficulty breathing from anxiety.

Abbreviation: CI = confidence interval.

\* One or more symptoms reported.

**FIGURE. Viral culture results among participants with positive Sofia SARS Antigen Fluorescent Immunoassay or positive SARS-CoV-2 real-time reverse transcription–polymerase chain reaction (RT-PCR) results (n = 69),\* by cycle threshold (Ct) value† and the interval between specimen collection and reported symptom onset or asymptomatic status — university A, Wisconsin, September–October 2020**

Top  
Return

\* n = 30 antigen- and culture-positive; n = 22 antigen-positive and culture-negative; n = 15 antigen- and culture-negative; n = two antigen-negative and culture-positive.

† Ct values represent cycle thresholds for the N1 target probe during SARS-CoV-2 real-time RT-PCR; Ct values are represented on the y-axis in descending order to indicate that lower Ct values represent higher levels of RNA in the specimen.

AUGUST 1963

## Letter from Birmingham Jail

by Martin Luther King, Jr.

*From the Birmingham jail, where he was imprisoned as a participant in nonviolent demonstrations against segregation, Dr. Martin Luther King, Jr., wrote in longhand the letter which follows. It was his response to a public statement of concern and caution issued by eight white religious leaders of the South. Dr. King, who was born in 1929, did his undergraduate work at Morehouse College; attended the integrated Crozer Theological Seminary in Chester, Pennsylvania, one of six black pupils among a hundred students, and the president of his class; and won a fellowship to Boston University for his Ph.D.*

WHILE confined here in the Birmingham city jail, I came across your recent statement calling our present activities "unwise and untimely." Seldom, if ever, do I pause to answer criticism of my work and ideas. If I sought to answer all of the criticisms that cross my desk, my secretaries would be engaged in little else in the course of the day, and I would have no time for constructive work. But since I feel that you are men of genuine good will and your criticisms are sincerely set forth, I would like to answer your statement in what I hope will be patient and reasonable terms.

I think I should give the reason for my being in Birmingham, since you have been influenced by the argument of "outsiders coming in." I have the honor of serving as president of the Southern Christian Leadership Conference, an organization operating in every Southern state, with headquarters in Atlanta, Georgia. We have some eighty-five affiliate organizations all across the South, one being the Alabama Christian Movement for Human Rights. Whenever necessary and possible, we share staff, educational and financial resources with our affiliates. Several months ago our local affiliate here in Birmingham invited us to be on call to engage in a nonviolent direct-action program if such were deemed necessary. We readily consented, and when the hour came we lived up to our promises. So I am here, along with several members of my staff, because we were invited here. I am here because I have basic organizational ties here.

Beyond this, I am in Birmingham because injustice is here. Just as the eighth-century prophets left their little villages and carried their "thus saith the Lord" far beyond the boundaries of their hometowns; and just as the Apostle Paul left his little village of Tarsus and carried the gospel of Jesus Christ to practically every hamlet and city of the Greco-Roman world, I too am compelled to carry the gospel of freedom beyond my particular hometown. Like Paul, I must constantly respond to the Macedonian call for aid.

Moreover, I am cognizant of the interrelatedness of all communities and states. I cannot sit idly by in Atlanta and not be concerned about what happens in Birmingham. Injustice anywhere is a threat to justice everywhere. We are caught in an inescapable network of mutuality, tied in a single garment of destiny. Whatever affects one directly affects all indirectly. Never again can we afford to live with the narrow, provincial "outside agitator" idea. Anyone who lives inside the United States can never be considered an outsider.

You deplore the demonstrations that are presently taking place in Birmingham. But I am sorry that your statement did not express a similar concern for the conditions that brought the demonstrations into being. I am sure that each of you would want to go beyond the superficial social analyst who looks merely at effects and does not grapple with underlying causes. I would not hesitate to say that it is unfortunate that so-called demonstrations are taking place in Birmingham at this time, but I would say in more emphatic terms that it is even more unfortunate that the white power structure of this city left the Negro community with no other alternative.

IN ANY nonviolent campaign there are four basic steps: collection of the facts to determine whether injustices are alive, negotiation, self-purification, and direct action. We have gone through all of these steps in Birmingham. There can be no gainsaying of the fact that racial injustice engulfs this community. Birmingham is probably the most thoroughly segregated city in the United States. Its ugly record of police brutality is known in every section of this country. Its unjust treatment of Negroes in the courts is a notorious reality. There have been more unsolved bombings of Negro homes and churches in Birmingham than in any other city in this nation. These are the hard, brutal, and unbelievable facts. On the basis of them, Negro leaders sought to negotiate with the city fathers. But the political leaders consistently refused to engage in good-faith negotiation.

Then came the opportunity last September to talk with some of the leaders of the economic community. In these negotiating sessions certain promises were made by the merchants, such as the promise to remove the humiliating racial signs from the stores. On the basis of these promises, Reverend Shuttlesworth and the leaders of the Alabama Christian Movement for Human Rights agreed to call a moratorium on any type of demonstration. As the weeks and months unfolded, we realized that we were the victims of a broken promise. The signs remained. As in so many experiences of the past, we were confronted with blasted hopes, and the dark shadow of a deep disappointment settled upon us. So we had no alternative except that of preparing for direct action, whereby we would present our very bodies as a means of laying our case before the conscience of the local and national community. We were not unmindful of the difficulties involved. So we decided to go through a process of self-purification. We

started having workshops on nonviolence and repeatedly asked ourselves the questions, "Are you able to accept blows without retaliating?" and "Are you able to endure the ordeals of jail?" We decided to set our direct-action program around the Easter season, realizing that, with exception of Christmas, this was the largest shopping period of the year. Knowing that a strong economic withdrawal program would be the by-product of direct action, we felt that this was the best time to bring pressure on the merchants for the needed changes. Then it occurred to us that the March election was ahead, and so we speedily decided to postpone action until after election day. When we discovered that Mr. Conner was in the runoff, we decided again to postpone action so that the demonstration could not be used to cloud the issues. At this time we agreed to begin our nonviolent witness the day after the runoff.

This reveals that we did not move irresponsibly into direct action. We, too, wanted to see Mr. Conner defeated, so we went through postponement after postponement to aid in this community need. After this we felt that direct action could be delayed no longer.

You may well ask, "Why direct action, why sit-ins, marches, and so forth? Isn't negotiation a better path?" You are exactly right in your call for negotiation. Indeed, this is the purpose of direct action. Nonviolent direct action seeks to create such a crisis and establish such creative tension that a community that has consistently refused to negotiate is forced to confront the issue. It seeks so to dramatize the issue that it can no longer be ignored. I just referred to the creation of tension as a part of the work of the nonviolent resister. This may sound rather shocking. But I must confess that I am not afraid of the word "tension." I have earnestly worked and preached against violent tension, but there is a type of constructive nonviolent tension that is necessary for growth. Just as Socrates felt that it was necessary to create a tension in the mind so that individuals could rise from the bondage of myths and half-truths to the unfettered realm of creative analysis and objective appraisal, we must see the need of having nonviolent gadflies to create the kind of tension in society that will help men to rise from the dark depths of prejudice and racism to the majestic heights of understanding and brotherhood. So, the purpose of direct action is to create a situation so crisis-packed that it will inevitably open the door to negotiation. We therefore concur with you in your call for negotiation. Too long has our beloved Southland been bogged down in the tragic attempt to live in monologue rather than dialogue.

One of the basic points in your statement is that our acts are untimely. Some have asked, "Why didn't you give the new administration time to act?" The only answer that I can give to this inquiry is that the new administration must be prodded about as much as the outgoing one before it acts. We will be sadly mistaken if we feel that the election of Mr. Boutwell will bring the millennium to Birmingham. While Mr. Boutwell is much more articulate and gentle than Mr. Conner, they are both segregationists, dedicated to the task of maintaining the status quo. The hope I see in Mr. Boutwell is that he will be reasonable enough to see the futility of massive resistance to desegregation. But he will not see this without pressure from the devotees of civil rights. My friends, I must say to you that we have not made a single gain in civil rights without determined legal and nonviolent pressure. History is the long and tragic story of the fact that privileged groups seldom give up their privileges voluntarily. Individuals may see the moral light and voluntarily give up their unjust posture; but, as Reinhold Niebuhr has reminded us, groups are more immoral than individuals.

We know through painful experience that freedom is never voluntarily given by the oppressor; it must be demanded by the oppressed. Frankly, I have never yet engaged in a direct-action movement that was "well timed" according to the timetable of those who have not suffered unduly from the disease of segregation. For years now I have heard the word "wait." It rings in the ear of every Negro with a piercing familiarity. This "wait" has almost always meant "never." It has been a tranquilizing thalidomide, relieving the emotional stress for a moment, only to give birth to an ill-formed infant of frustration. We must come to see with the distinguished jurist of yesterday that "justice too long delayed is justice denied." We have waited for more than three hundred and forty years for our God-given and constitutional rights. The nations of Asia and Africa are moving with jetlike speed toward the goal of political independence, and we still creep at horse-and-buggy pace toward the gaining of a cup of coffee at a lunch counter. I guess it is easy for those who have never felt the stinging darts of segregation to say "wait." But when you have seen vicious mobs lynch your mothers and fathers at will and drown your sisters and brothers at whim; when you have seen hate-filled policemen curse, kick, brutalize, and even kill your black brothers and sisters with impunity; when you see the vast majority of your twenty million Negro brothers smothering in an airtight cage of poverty in the midst of an affluent society; when you suddenly find your tongue twisted and your speech stammering as you seek to explain to your six-year-old daughter why she cannot go to the public amusement park that has just been advertised on television, and see tears welling up in her little eyes when she is told that Funtown is closed to colored children, and see the depressing clouds of inferiority begin to form in her little mental sky, and see her begin to distort her little personality by unconsciously developing a bitterness toward white people; when you have to concoct an answer for a five-year-old son asking in agonizing pathos, "Daddy, why do white people treat colored people so mean?"; when you take a cross-country drive and find it necessary to sleep night after night in the uncomfortable corners of your automobile because no motel will accept you; when you are humiliated day in and day out by nagging signs reading "white" and "colored"; when your first name becomes "nigger" and your middle name becomes "boy" (however old you are) and your last name becomes "John," and when your wife and mother are never given the respected title "Mrs."; when you are harried by day and haunted by night by the fact that you are a Negro, living constantly at tiptoe stance, never knowing what to expect next, and plagued with inner fears and outer resentments; when you are forever fighting a degenerating sense of "nobodyness" -- then you will understand why we find it difficult to wait. There comes a time when the cup of endurance runs over and men are no longer willing to be plunged into an abyss of injustice where they experience the bleakness of corroding despair. I hope, sirs, you can understand our legitimate and unavoidable impatience.

**Y**OU express a great deal of anxiety over our willingness to break laws. This is certainly a legitimate concern. Since we so diligently urge people to obey the Supreme Court's decision of 1954 outlawing segregation in the public schools, it is rather strange and paradoxical to find us consciously breaking laws. One may well ask, "How can you advocate breaking some laws and obeying others?" The answer is found in the fact that there are two types of laws: there are just laws, and there are unjust laws. I would agree with St. Augustine that "An unjust law is no law at all."

Now, what is the difference between the two? How does one determine when a law is just or unjust? A just law is a man-made code that squares with the moral law, or the law of God. An unjust law is a code that is out of harmony with the moral law. To put it in the terms of St. Thomas Aquinas, an unjust law is a human law that is not rooted in eternal and natural law. Any law that uplifts human personality is just. Any law that degrades human personality is unjust. All segregation statutes are unjust because segregation distorts the soul and damages the personality. It gives the segregator a false sense of superiority and the segregated a false sense of inferiority. To use the words of Martin Buber, the great Jewish philosopher, segregation substitutes an "I - it" relationship for the "I - thou" relationship and ends up relegating persons to the status of things. So segregation is not only politically, economically, and sociologically unsound, but it is morally wrong and sinful. Paul Tillich has said that sin is separation. Isn't segregation an existential expression of man's tragic separation, an expression of his awful estrangement, his terrible sinfulness? So I can urge men to obey the 1954 decision of the Supreme Court because it is morally right, and I can urge them to disobey segregation ordinances because they are morally wrong.

Let us turn to a more concrete example of just and unjust laws. An unjust law is a code that a majority inflicts on a minority that is not binding on itself. This is difference made legal. On the other hand, a just law is a code that a majority compels a minority to follow, and that it is willing to follow itself. This is sameness made legal.

Let me give another explanation. An unjust law is a code inflicted upon a minority which that minority had no part in enacting or creating because it did not have the unhampered right to vote. Who can say that the legislature of Alabama which set up the segregation laws was democratically elected? Throughout the state of Alabama all types of conniving methods are used to prevent Negroes from becoming registered voters, and there are some counties without a single Negro registered to vote, despite the fact that the Negroes constitute a majority of the population. Can any law set up in such a state be considered democratically structured?

These are just a few examples of unjust and just laws. There are some instances when a law is just on its face and unjust in its application. For instance, I was arrested Friday on a charge of parading without a permit. Now, there is nothing wrong with an ordinance which requires a permit for a parade, but when the ordinance is used to preserve segregation and to deny citizens the First Amendment privilege of peaceful assembly and peaceful protest, then it becomes unjust.

Of course, there is nothing new about this kind of civil disobedience. It was seen sublimely in the refusal of Shadrach, Meshach, and Abednego to obey the laws of Nebuchadnezzar because a higher moral law was involved. It was practiced superbly by the early Christians, who were willing to face hungry lions and the excruciating pain of chopping blocks before submitting to certain unjust laws of the Roman Empire. To a degree, academic freedom is a reality today because Socrates practiced civil disobedience.

We can never forget that everything Hitler did in Germany was "legal" and everything the Hungarian freedom fighters did in Hungary was "illegal." It was "illegal" to aid and comfort a Jew in Hitler's Germany. But I am sure that if I had lived in Germany during that time, I would have aided and comforted my Jewish brothers even though it was illegal. If I lived in a Communist country today where certain principles dear to the Christian faith are suppressed, I believe I would openly advocate disobeying these anti-religious laws.

**I**MUST make two honest confessions to you, my Christian and Jewish brothers. First, I must confess that over the last few years I have been gravely disappointed with the white moderate. I have almost reached the regrettable conclusion that the Negro's great stumbling block in the stride toward freedom is not the White Citizens Councillor or the Ku Klux Klanner but the white moderate who is more devoted to order than to justice; who prefers a negative peace which is the absence of tension to a positive peace which is the presence of justice; who constantly says, "I agree with you in the goal you seek, but I can't agree with your methods of direct action"; who paternalistically feels that he can set the timetable for another man's freedom; who lives by the myth of time; and who constantly advises the Negro to wait until a "more convenient season." Shallow understanding from people of good will is more frustrating than absolute misunderstanding from people of ill will. Lukewarm acceptance is much more bewildering than outright rejection.

In your statement you asserted that our actions, even though peaceful, must be condemned because they precipitate violence. But can this assertion be logically made? Isn't this like condemning the robbed man because his possession of money precipitated the evil act of robbery? Isn't this like condemning Socrates because his unswerving commitment to truth and his philosophical delvings precipitated the misguided popular mind to make him drink the hemlock? Isn't this like condemning Jesus because His unique God-consciousness and never-ceasing devotion to His will precipitated the evil act of crucifixion? We must come to see, as federal courts have consistently affirmed, that it is immoral to urge an individual to withdraw his efforts to gain his basic constitutional rights because the quest precipitates violence. Society must protect the robbed and punish the robber.

I had also hoped that the white moderate would reject the myth of time. I received a letter this morning from a white brother in Texas which said, "All Christians know that the colored people will receive equal rights eventually, but is it possible that you are in too great of a religious hurry? It has taken Christianity almost 2000 years to accomplish what it has. The teachings of Christ take time to come to earth." All that is said here grows out of a tragic misconception of time. It is the strangely irrational notion that there is something in the very flow of time that will inevitably cure all ills. Actually, time is neutral. It can be used either destructively or constructively. I am coming to feel that the people of ill will have used time much more effectively than the people of good will. We will have to repent in this generation not merely for the vitriolic words and actions of the bad people but for the appalling silence of the good people. We must come to see that human progress never rolls in on wheels of inevitability. It comes through the tireless efforts and persistent work of men willing to be coworkers with God, and without this hard work time itself becomes an ally of the forces of social stagnation.

YOU spoke of our activity in Birmingham as extreme. At first I was rather disappointed that fellow clergymen would see my nonviolent efforts as those of an extremist. I started thinking about the fact that I stand in the middle of two opposing forces in the Negro community. One is a force of complacency made up of Negroes who, as a result of long years of oppression, have been so completely drained of self-respect and a sense of "somebodiness" that they have adjusted to segregation, and, on the other hand, of a few Negroes in the middle class who, because of a degree of academic and economic security and because at points they profit by segregation, have unconsciously become insensitive to the problems of the masses. The other force is one of bitterness and hatred and comes perilously close to advocating violence. It is expressed in the various black nationalist groups that are springing up over the nation, the largest and best known being Elijah Muhammad's Muslim movement. This movement is nourished by the contemporary frustration over the continued existence of racial discrimination. It is made up of people who have lost faith in America, who have absolutely repudiated Christianity, and who have concluded that the white man is an incurable devil. I have tried to stand between these two forces, saying that we need not follow the do-nothingism of the complacent or the hatred and despair of the black nationalist. There is a more excellent way, of love and nonviolent protest. I'm grateful to God that, through the Negro church, the dimension of nonviolence entered our struggle. If this philosophy had not emerged, I am convinced that by now many streets of the South would be flowing with floods of blood. And I am further convinced that if our white brothers dismiss as "rabble-rousers" and "outside agitators" those of us who are working through the channels of nonviolent direct action and refuse to support our nonviolent efforts, millions of Negroes, out of frustration and despair, will seek solace and security in black nationalist ideologies, a development that will lead inevitably to a frightening racial nightmare.

Oppressed people cannot remain oppressed forever. The urge for freedom will eventually come. This is what has happened to the American Negro. Something within has reminded him of his birthright of freedom; something without has reminded him that he can gain it. Consciously and unconsciously, he has been swept in by what the Germans call the *Zeitgeist*, and with his black brothers of Africa and his brown and yellow brothers of Asia, South America, and the Caribbean, he is moving with a sense of cosmic urgency toward the promised land of racial justice. Recognizing this vital urge that has engulfed the Negro community, one should readily understand public demonstrations. The Negro has many pent-up resentments and latent frustrations. He has to get them out. So let him march sometime; let him have his prayer pilgrimages to the city hall; understand why he must have sit-ins and freedom rides. If his repressed emotions do not come out in these nonviolent ways, they will come out in ominous expressions of violence. This is not a threat; it is a fact of history. So I have not said to my people, "Get rid of your discontent." But I have tried to say that this normal and healthy discontent can be channeled through the creative outlet of nonviolent direct action. Now this approach is being dismissed as extremist. I must admit that I was initially disappointed in being so categorized.

But as I continued to think about the matter, I gradually gained a bit of satisfaction from being considered an extremist. Was not Jesus an extremist in love? -- "Love your enemies, bless them that curse you, pray for them that despitefully use you." Was not Amos an extremist for justice? -- "Let justice roll down like waters and righteousness like a mighty stream." Was not Paul an extremist for the gospel of Jesus Christ? -- "I bear in my body the marks of the Lord Jesus." Was not Martin Luther an extremist? -- "Here I stand; I can do no other so help me God." Was not John Bunyan an extremist? -- "I will stay in jail to the end of my days before I make a mockery of my conscience." Was not Abraham Lincoln an extremist? -- "This nation cannot survive half slave and half free." Was not Thomas Jefferson an extremist? -- "We hold these truths to be self-evident, that all men are created equal." So the question is not whether we will be extremist, but what kind of extremists we will be. Will we be extremists for hate, or will we be extremists for love? Will we be extremists for the preservation of injustice, or will we be extremists for the cause of justice?

I had hoped that the white moderate would see this. Maybe I was too optimistic. Maybe I expected too much. I guess I should have realized that few members of a race that has oppressed another race can understand or appreciate the deep groans and passionate yearnings of those that have been oppressed, and still fewer have the vision to see that injustice must be rooted out by strong, persistent, and determined action. I am thankful, however, that some of our white brothers have grasped the meaning of this social revolution and committed themselves to it. They are still all too small in quantity, but they are big in quality. Some, like Ralph McGill, Lillian Smith, Harry Golden, and James Dabbs, have written about our struggle in eloquent, prophetic, and understanding terms. Others have marched with us down nameless streets of the South. They sat in with us at lunch counters and rode in with us on the freedom rides. They have languished in filthy roach-infested jails, suffering the abuse and brutality of angry policemen who see them as "dirty nigger lovers." They, unlike many of their moderate brothers, have recognized the urgency of the moment and sensed the need for powerful "action" antidotes to combat the disease of segregation.

LET me rush on to mention my other disappointment. I have been disappointed with the white church and its leadership. Of course, there are some notable exceptions. I am not unmindful of the fact that each of you has taken some significant stands on this issue. I commend you, Reverend Stallings, for your Christian stand this past Sunday in welcoming Negroes to your Baptist Church worship service on a nonsegregated basis. I commend the Catholic leaders of this state for integrating Springhill College several years ago.

But despite these notable exceptions, I must honestly reiterate that I have been disappointed with the church. I do not say that as one of those negative critics who can always find something wrong with the church. I say it as a minister of the gospel who loves the church, who was nurtured in its bosom, who has been sustained by its Spiritual blessings, and who will remain true to it as long as the cord of life shall lengthen.

I had the strange feeling when I was suddenly catapulted into the leadership of the bus protest in Montgomery several years ago that we would have the support of the white church. I felt that the white ministers, priests, and rabbis of the South would be some of our strongest allies. Instead, some few have been outright opponents, refusing to understand the freedom movement and misrepresenting its leaders; all too many others have been more cautious than courageous and have remained silent behind the anesthetizing security of stained-glass windows.

In spite of my shattered dreams of the past, I came to Birmingham with the hope that the white religious leadership of this community would see the justice of our cause and with deep moral concern serve as the channel through which our just grievances could get to the power structure. I had hoped that each of you would understand. But again I have been disappointed.

I have heard numerous religious leaders of the South call upon their worshipers to comply with a desegregation decision because it is the law, but I have longed to hear white ministers say, follow this decree because integration is morally right and the Negro is your brother. In the midst of blatant injustices inflicted upon the Negro, I have watched white churches stand on the sidelines and merely mouth pious irrelevancies and sanctimonious trivialities. In the midst of a mighty struggle to rid our nation of racial and economic injustice, I have heard so many ministers say, "Those are social issues which the gospel has nothing to do with," and I have watched so many churches commit themselves to a completely otherworldly religion which made a strange distinction between bodies and souls, the sacred and the secular.

There was a time when the church was very powerful. It was during that period that the early Christians rejoiced when they were deemed worthy to suffer for what they believed. In those days the church was not merely a thermometer that recorded the ideas and principles of popular opinion; it was the thermostat that transformed the mores of society. Wherever the early Christians entered a town the power structure got disturbed and immediately sought to convict them for being "disturbers of the peace" and "outside agitators." But they went on with the conviction that they were "a colony of heaven" and had to obey God rather than man. They were small in number but big in commitment. They were too God-intoxicated to be "astronomically intimidated." They brought an end to such ancient evils as infanticide and gladiatorial contest.

Things are different now. The contemporary church is so often a weak, ineffectual voice with an uncertain sound. It is so often the arch supporter of the status quo. Far from being disturbed by the presence of the church, the power structure of the average community is consoled by the church's often vocal sanction of things as they are.

But the judgment of God is upon the church as never before. If the church of today does not recapture the sacrificial spirit of the early church, it will lose its authentic ring, forfeit the loyalty of millions, and be dismissed as an irrelevant social club with no meaning for the twentieth century. I meet young people every day whose disappointment with the church has risen to outright disgust.

I hope the church as a whole will meet the challenge of this decisive hour. But even if the church does not come to the aid of justice, I have no despair about the future. I have no fear about the outcome of our struggle in Birmingham, even if our motives are presently misunderstood. We will reach the goal of freedom in Birmingham and all over the nation, because the goal of America is freedom. Abused and scorned though we may be, our destiny is tied up with the destiny of America. Before the Pilgrims landed at Plymouth, we were here. Before the pen of Jefferson scratched across the pages of history the majestic word of the Declaration of Independence, we were here. For more than two centuries our foreparents labored here without wages; they made cotton king; and they built the homes of their masters in the midst of brutal injustice and shameful humiliation -- and yet out of a bottomless vitality our people continue to thrive and develop. If the inexpressible cruelties of slavery could not stop us, the opposition we now face will surely fail. We will win our freedom because the sacred heritage of our nation and the eternal will of God are embodied in our echoing demands.

I must close now. But before closing I am impelled to mention one other point in your statement that troubled me profoundly. You warmly commended the Birmingham police force for keeping "order" and "preventing violence." I don't believe you would have so warmly commended the police force if you had seen its angry violent dogs literally biting six unarmed, nonviolent Negroes. I don't believe you would so quickly commend the policemen if you would observe their ugly and inhuman treatment of Negroes here in the city jail; if you would watch them push and curse old Negro women and young Negro girls; if you would see them slap and kick old Negro men and young boys, if you would observe them, as they did on two occasions, refusing to give us food because we wanted to sing our grace together. I'm sorry that I can't join you in your praise for the police department.

It is true that they have been rather disciplined in their public handling of the demonstrators. In this sense they have been publicly "nonviolent." But for what purpose? To preserve the evil system of segregation. Over the last few years I have consistently preached that nonviolence demands that the means we use must be as pure as the ends we seek. So I have tried to make it clear that it is wrong to use immoral means to attain moral ends. But now I must affirm that it is just as wrong, or even more, to use moral means to preserve immoral ends.

I wish you had commended the Negro demonstrators of Birmingham for their sublime courage, their willingness to suffer, and their amazing discipline in the midst of the most inhuman provocation. One day the South will recognize its real heroes. They will be the James Merediths, courageously and with a majestic sense of purpose facing jeering and hostile mobs and the agonizing loneliness that characterizes the life of the pioneer. They will be old, oppressed, battered Negro women, symbolized in a seventy-two-year-old woman of Montgomery, Alabama, who rose up with a sense of dignity and with her people decided not to ride the segregated buses, and responded to one who inquired about her tiredness with ungrammatical profundity, "My feet is tired, but my soul is rested." They will be young high school and college students, young ministers of the gospel and a host of their elders courageously and nonviolently sitting in at lunch counters and willingly going to jail for conscience's sake. One day the South will know that when these disinherited children of God sat down at lunch counters they were in reality standing up for the best in the American dream and the most sacred values in our Judeo-Christian heritage.

Never before have I written a letter this long -- or should I say a book? I'm afraid that it is much too long to take your precious time. I can assure you that it would have been much shorter if I had been writing from a comfortable desk, but what else is there to do when you are alone for days in the dull monotony of a narrow jail cell other than write long letters, think strange thoughts, and pray long prayers?

If I have said anything in this letter that is an understatement of the truth and is indicative of an unreasonable impatience, I beg you to forgive me. If I have said anything in this letter that is an overstatement of the truth and is indicative of my having a patience that makes me patient with anything less than brotherhood, I beg God to forgive me.

*Yours for the cause of Peace and Brotherhood,*

# Emergency Use Authorization

FDA may issue an EUA for an unapproved drug, biological product, or device; or for an unapproved use of a drug, biological product or device following a Declaration by the Secretary of Health and Human Services that the circumstances justify such authorization based on one of the following:

A determination by the Secretary of Homeland Security that there is an actual or significant potential for a domestic emergency involving a heightened risk of attack with a biological, chemical, radiological, or nuclear agent(s);

A determination by the Secretary of Homeland Security of a material threat of a chemical, biological, radiological or nuclear agent sufficient to affect national security or the health and security of United States citizens living abroad;

A determination by the [Secretary](#) of Defense that there is a military emergency, or a significant potential for a military emergency, involving a heightened risk to [United States](#) military forces, including personnel operating under the authority of title 10 or title 50, of attack with (i) a biological, chemical, radiological, or nuclear agent or agents; or (ii) an agent or agents that may cause, or are otherwise associated with, an imminently life-threatening and specific risk to [United States](#) military forces; or

A determination by the Health and Human Services Secretary that there is a public health emergency or a significant potential for a public health emergency that affects, or has significant potential to affect, national security or the health and security of U.S. citizens living abroad and involves a biological, chemical, radiological, or nuclear agent(s) or disease or condition that may be attributable to such agent(s).

FDA may then issue an EUA for a product if FDA finds that:

the agent specified in the declaration of emergency can cause a serious or life-threatening disease or condition;

based on the totality of scientific evidence available, it is reasonable to believe that the product may be effective in diagnosing, treating, or preventing the serious or life-threatening disease or condition, or a serious or life-threatening disease or condition caused by a product authorized approved, cleared, or licensed by FDA for diagnosing, treating, or preventing the disease or condition;

the known and potential benefits of the product outweigh the known and potential risks of the product when used to diagnose, prevent, or treat the serious or life-threatening disease or condition, taking into consideration the material threat posed by the agent or agents identified in a declaration by the DHS Secretary, if applicable;

there is no adequate, approved, and available alternative to the product for diagnosing, preventing, or treating such serious or life-threatening disease or condition; and

in the case of a determination by the Secretary of Defense regarding risk to U.S. military forces from agents other than chemical, biological, radiological and nuclear agents, that the request for emergency use is made by the Secretary of Defense.

FDA will, in issuing the EUA, impose conditions on the emergency use that is authorized. For more information on the emergency use authority, please see [Emergency Preparedness and Response: Emergency Use Authorization](#).

**18 USC Ch. 79: PERJURY**

**From Title 18—CRIMES AND CRIMINAL PROCEDURE  
PART I—CRIMES**

**CHAPTER 79—PERJURY**

|       |                                                |
|-------|------------------------------------------------|
| Sec.  |                                                |
| 1621. | Perjury generally.                             |
| 1622. | Subornation of perjury.                        |
| 1623. | False declarations before grand jury or court. |

**EDITORIAL NOTES**

**AMENDMENTS**

**1970**—Pub. L. 91–452, title IV, §401(b), Oct. 15, 1970, 84 Stat. 933, added item 1623.

**§1621. Perjury generally**

Whoever—

(1) having taken an oath before a competent tribunal, officer, or person, in any case in which a law of the United States authorizes an oath to be administered, that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed, is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true; or

(2) in any declaration, certificate, verification, or statement under penalty of perjury as permitted under section 1746 of title 28, United States Code, willfully subscribes as true any material matter which he does not believe to be true;

is guilty of perjury and shall, except as otherwise expressly provided by law, be fined under this title or imprisoned not more than five years, or both. This section is applicable whether the statement or subscription is made within or without the United States.

(June 25, 1948, ch. 645, 62 Stat. 773; Pub. L. 88–619, §1, Oct. 3, 1964, 78 Stat. 995; Pub. L. 94–550, §2, Oct. 18, 1976, 90 Stat. 2534; Pub. L. 103–322, title XXXIII, §330016(1)(I), Sept. 13, 1994, 108 Stat. 2147.)

**HISTORICAL AND REVISION NOTES**

Based on title 18, U.S.C., 1940 ed., §§231, 629 (Mar. 4, 1909, ch. 321, §125, 35 Stat. 1111; June 15, 1917, ch. 30, title XI, §19, 40 Stat. 230).

Words "except as otherwise expressly provided by law" were inserted to avoid conflict with perjury provisions in other titles where the punishment and application vary.

More than 25 additional provisions are in the code. For construction and application of several such sections, see *Behrle v. United States* (App. D.C. 1938, 100 F. 2d 714), *United States v. Hammer* (D.C.N.Y., 1924, 299 F. 1011, affirmed, 6 F. 2d 786), *Rosenthal v. United States* (1918, 248 F. 684, 160 C.C.A. 584), cf. *Epstein v. United States* (1912, 196 F. 354, 116 C.C.A. 174, certiorari denied 32 S. Ct. 527, 223 U.S. 731, 56 L. ed. 634).

Mandatory punishment provisions were rephrased in the alternative.

Minor verbal changes were made.

**EDITORIAL NOTES**

**AMENDMENTS**

**1994**—Pub. L. 103–322 substituted "fined under this title" for "fined not more than \$2,000" in concluding provisions.

**1976**—Pub. L. 94–550 divided existing provisions into a single introductory word "Whoever", par. (1), and closing provisions following par. (2), and added par. (2).

**1964**—Pub. L. 88–619 inserted at end "This section is applicable whether the statement or subscription is made within or without the United States."

**§1622. Subornation of perjury**

Whoever procures another to commit any perjury is guilty of subornation of perjury, and shall be fined under this title or imprisoned not more than five years, or both.

(June 25, 1948, ch. 645, 62 Stat. 774; Pub. L. 103–322, title XXXIII, §330016(1)(I), Sept. 13, 1994, 108 Stat. 2147.)

**HISTORICAL AND REVISION NOTES**

Based on title 18, U.S.C., 1940 ed., §232 (Mar. 4, 1909, ch. 321, §126, 35 Stat. 1111).

The punishment prescribed in section 1621 of this title was substituted for the reference thereto.

Minor change was made in phraseology.

#### EDITORIAL NOTES

#### AMENDMENTS

**1994**—Pub. L. 103–322 substituted "fined under this title" for "fined not more than \$2,000".

### **§1623. False declarations before grand jury or court**

(a) Whoever under oath (or in any declaration, certificate, verification, or statement under penalty of perjury as permitted under section 1746 of title 28, United States Code) in any proceeding before or ancillary to any court or grand jury of the United States knowingly makes any false material declaration or makes or uses any other information, including any book, paper, document, record, recording, or other material, knowing the same to contain any false material declaration, shall be fined under this title or imprisoned not more than five years, or both.

(b) This section is applicable whether the conduct occurred within or without the United States.

(c) An indictment or information for violation of this section alleging that, in any proceedings before or ancillary to any court or grand jury of the United States, the defendant under oath has knowingly made two or more declarations, which are inconsistent to the degree that one of them is necessarily false, need not specify which declaration is false if—

(1) each declaration was material to the point in question, and

(2) each declaration was made within the period of the statute of limitations for the offense charged under this section.

In any prosecution under this section, the falsity of a declaration set forth in the indictment or information shall be established sufficient for conviction by proof that the defendant while under oath made irreconcilably contradictory declarations material to the point in question in any proceeding before or ancillary to any court or grand jury. It shall be a defense to an indictment or information made pursuant to the first sentence of this subsection that the defendant at the time he made each declaration believed the declaration was true.

(d) Where, in the same continuous court or grand jury proceeding in which a declaration is made, the person making the declaration admits such declaration to be false, such admission shall bar prosecution under this section if, at the time the admission is made, the declaration has not substantially affected the proceeding, or it has not become manifest that such falsity has been or will be exposed.

(e) Proof beyond a reasonable doubt under this section is sufficient for conviction. It shall not be necessary that such proof be made by any particular number of witnesses or by documentary or other type of evidence.

(Added Pub. L. 91–452, title IV, §401(a), Oct. 15, 1970, 84 Stat. 932; amended Pub. L. 94–550, §6, Oct. 18, 1976, 90 Stat. 2535; Pub. L. 103–322, title XXXIII, §330016(1)(L), Sept. 13, 1994, 108 Stat. 2147.)

#### EDITORIAL NOTES

#### AMENDMENTS

**1994**—Subsec. (a). Pub. L. 103–322 substituted "fined under this title" for "fined not more than \$10,000".

**1976**—Subsec. (a). Pub. L. 94–550 inserted "(or in any declaration, certificate, verification, or statement under penalty of perjury as permitted under section 1746 of title 28, United States Code)" after "under oath".

# 07/21/2021: Lab Alert: Changes to CDC RT-PCR for SARS-CoV-2 Testing

**Audience:** Individuals Performing COVID-19 Testing

**Level:** Laboratory Alert

After December 31, 2021, CDC will withdraw the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization (EUA) of the CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel, the assay first introduced in February 2020 for detection of SARS-CoV-2 only. CDC is providing this advance notice for clinical laboratories to have adequate time to select and implement one of the many FDA-authorized alternatives.

Visit the [FDA website](#) for a list of authorized COVID-19 diagnostic methods. For a summary of the performance of FDA-authorized molecular methods with an FDA reference panel, [visit this page](#).

In preparation for this change, CDC recommends clinical laboratories and testing sites that have been using the CDC 2019-nCoV RT-PCR assay select and begin their transition to another FDA-authorized COVID-19 test. CDC encourages laboratories to consider adoption of a multiplexed method that can facilitate detection and differentiation of SARS-CoV-2 and influenza viruses. Such assays can facilitate continued testing for both influenza and SARS-CoV-2 and can save both time and resources as we head into influenza season. Laboratories and testing sites should validate and verify their selected assay within their facility before beginning clinical testing.

## Coronavirus Disease 2019 Testing Basics

You've probably heard a lot about coronavirus disease (COVID-19) testing. If you think you have COVID-19 and need a test, contact your health care provider or [local health department](#) immediately. You can also find a [community testing site](#) in your state, or buy an FDA-authorized at-home test. Some FDA-authorized at-home tests give you results within minutes. Others require you to mail the sample to a lab for analysis.

There are two different types of tests – **diagnostic tests** and **antibody tests**.

**Diagnostic tests can show if you have an active Covid-19 infection** and need to take steps to quarantine or isolate yourself from others. **Molecular** and **antigen tests** are types of diagnostic tests that can detect if you have an active COVID-19 infection. Samples for diagnostic tests are typically collected with a nasal or throat swab, or saliva collected by spitting into a tube.

**Antibody tests look for antibodies in your immune system** produced in response to SARS-CoV-2, the virus that causes COVID-19. **Antibody tests should not be used to diagnose an active COVID-19 infection.** Antibodies can take several days or weeks to develop after you have an infection and may stay in your blood for several weeks or more after recovery. Samples for antibody tests are typically blood from a finger stick, or blood drawn by your doctor or other medical personnel.

|                                            | MOLECULAR TEST                                                                                                                                                                                                                             | ANTIGEN TEST                                                                                                                                                                                                                              | ANTIBODY TEST                                                                                   |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>Also known as...</b>                    | Diagnostic test, viral test, molecular test, nucleic acid amplification test (NAAT), RT-PCR test, LAMP test                                                                                                                                | Diagnostic test, viral test, rapid test                                                                                                                                                                                                   | Serological test, serology, blood test, serology test                                           |
| <b>How the sample is taken...</b>          | Nasal swabs, either shallow or deep (most tests).<br>Saliva (some tests)                                                                                                                                                                   | Nasal or nasopharyngeal swab (most tests)                                                                                                                                                                                                 | Blood from a fingerstick or vein                                                                |
| <b>How long it takes to get results...</b> | Less than an hour (at-home tests and some point-of-care locations), same day (some point-of-care locations) or 1-3 days (tests sent to a lab for processing). Some tests may take longer in some locations, depending on testing capacity. | Some may be very fast (15–30 minutes), depending on the test                                                                                                                                                                              | Same day (some point-of-care locations) or 1-3 days (tests sent to a laboratory for processing) |
| <b>Is another test needed...</b>           | Not usually. This type of test is typically highly accurate and usually does not need to be repeated. Some may indicate the need to re-test in certain circumstances.                                                                      | Maybe. Positive results are usually highly accurate, but false positives can happen, especially in areas where very few people have the virus. Negative results may need to be confirmed with a molecular test.                           | Sometimes a second antibody test is needed for accurate results.                                |
| <b>What it shows...</b>                    | Diagnoses active COVID-19 infection. (Some tests may also diagnose influenza or other respiratory viruses)                                                                                                                                 | Diagnoses active COVID-19 infection. (Some tests may also diagnose influenza or other respiratory viruses)                                                                                                                                | Shows if you've been infected by the virus that causes COVID-19 in the past                     |
| <b>What it can't do...</b>                 | It cannot show if you ever had COVID-19 or were infected with the virus that causes COVID-19 in the past                                                                                                                                   | It may not detect an early COVID-19 infection. Your health care provider may order a molecular test if your antigen test shows a negative result, but you have symptoms of COVID-19. It also cannot show if you ever had COVID-19 or were | It cannot diagnose COVID-19 at the time of the test or show that you do not have COVID-19       |

## Diagnostic Tests with Alternative Options

Diagnostic tests are now available with alternative methods and benefits.

- **Rapid, point-of-care** diagnostic tests use a mucus sample from the nose or throat but can be analyzed at the doctor's office or clinic where the sample is collected and results may be available in minutes. These may be molecular or antigen tests.

- **Combination tests** can test for the flu and the coronavirus at the same time. Some can test for many different types of respiratory viruses, including the one that causes COVID-19.

- **Home Collection Test:** sample is collected at home but analyzed in a laboratory

- **Direct to Consumer (DTC) Test:** home collection tests available without a prescription, but the sample is analyzed in a laboratory

- **At-home Testing:** consumer completes sample collection and testing at home

- **Over the Counter (OTC) Test:** consumer completes sample collection and testing at home, without a prescription

- **Saliva tests** allow a patient to spit into a tube rather than get their nose or throat swabbed. Saliva tests may be more comfortable for some people and may be safer

for health care workers who can be farther away during the sample collection.

### Ordering a Test

Many tests, including some home collection and at-home tests, require a prescription or order from a health care provider.

**Prescription Tests** – Health care providers can determine whether you need a test, and ensure you get the most appropriate test and that you know what the results mean. For example, certain tests are authorized only for people suspected of having COVID-19 or for people with COVID-19 symptoms that started within a certain number of days. A health care provider can help determine which test is best for your situation. Prescription-only home collection and at-home tests may require you to answer some questions online so that a health care provider can determine whether to prescribe or order a specific test.

**Non-Prescription Tests** – Some tests are available without a prescription. Home collection and at-home tests available without a prescription may be called “direct-to-consumer” (DTC) or “over-the-counter” (OTC). DTC and OTC tests may be available to purchase at a pharmacy or online, but they may not be available everywhere.

We do not know how long antibodies stay in the body following infection with the virus that causes COVID-19. We do not know if antibodies give you protective immunity against the virus, so results from a serology test should not be used to find out if you have immunity from the virus. The FDA cautions patients against using the results from any serology test as an indication that they can stop taking steps to protect themselves and others, such as stopping social distancing or discontinuing wearing masks.

### Report Adverse Events

The FDA encourages health care professionals and patients to report adverse events or side effects related to the use of COVID-19 tests or other medical products to the FDA's MedWatch Safety Information and Adverse Event Reporting Program:

- Complete and submit the [report online](#) through the FDA's MedWatch website.
- [Download the form](#) or call 1-800-332-1088 to request a form, then complete and return to the address on the form or submit by fax to 1-800-FDA-0178.

## **RCW 9A.40.040**

### **Unlawful imprisonment.**

- (1) A person is guilty of unlawful imprisonment if he or she knowingly restrains another person.
- (2) Unlawful imprisonment is a class C felony.

[ 2011 c 336 § 365; 1975 1st ex.s. c 260 § 9A.40.040.]

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

External Email

Dear Sir or Madam,

Thank you for your work on all the matters of health and safety on behalf of the people of Washington. May God bless you for all your effort and give you wisdom on the decisions you need to make.

I am not sure to what extent this next meeting will be, but if it's regarding Covid I would like to voice my opinion. There have not been any long term studies about COVID vaccines and their effects, so adding them to the child's school schedule is dangerous, as this is the future and next generation. It's in our best interest to protect them. This specific virus is not as dangerous to children as to the much older population. But the side effects of the vaccines are only now being known, which are unfortunately troubling, so it's better to err on the side of caution.

Also, it is each person's responsibility to take care of their health, and to make decisions to the best of their ability. Whatever theories are circulating about quarantine camps and involuntary detainment are in direct opposition of our liberty, and I hope our wonderful state will never come close to that concept regarding this specific virus.

With all due respect,  
Galina Adzhigirey

I oppose WAC 246 -100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a COVID-19 vaccination to WAC246 Dash 105 schedule of required vaccines for children to attend schools.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I believe that this is an infringement on our freedoms as Americans. We are losing liberty bit by bit and this is unjust and unconstitutional.

To whom it may concern:

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

For leading doctors who developed research that informed the vaccines and do NOT recommend such experimental vaccination on children (they have been largely silenced when it comes to this matter on network news) please refer to these two podcasts:

Good for you!  
Very accurate, intelligent, respectful and passionate !  
Thank You for standing up for the children!  
Hugs

On Fri, Jan 7, 2022 at 10:31 AM Jennifer Sanders <functionalhealthcoach@gmail.com <mailto:functionalhealthcoach@gmail.com> > wrote:

Hello WA Board of Health Members,

I am a parent of three children in WA public schools. I'm also a Functional Medicine professional, closely evaluating all of the science around Covid and the vaccines.

I oppose requiring these vaccines for students to attend school and ask that you DO NOT approve this policy.

First, I would like to address two points made by Ms. Samantha Pskowski in your December 29th meeting that I attended via Zoom.

1) Ms. Pskowski stated that Covid is a vaccine preventable disease. This is not true. Vaccinated children can get and are getting Covid. The vaccine does not prevent one from getting sick. It supposedly reduces severity of symptoms in the individual (and efficacy is waning with each new variant).

2) Ms. Pskowski also stated that the vaccine reduces transmissibility of the virus. We do not know this. I was on the call with FDA and VRBPAC committee for Emergency Use Authorization of these vaccines for children 5-11yo. One of the VRBPAC committee members asked the Pfizer doctor giving his presentation if they tracked for transmissibility in their clinical trial for 5-11yo. The Pfizer doctor responded that "THEY DID NOT."

I'd also like to point out the following for your consideration:

1) VRBPAC approved the EUA for these vaccines to have them available for high risk children. Neither the VRBPAC committee members, nor the ACIP committee members, as a whole, were in favor of mandating the vaccines for all children per both meetings that I attended. In the case of these particular vaccines, choosing to vaccinate a child should be left up to the parent and the child's healthcare practitioner, not a requirement to attend school.

2) Federal Emergency Use Authorization prohibits mandating EUA products that are not FDA approved. There is no FDA approved vaccine for children available.

3) Clinical trials are not yet complete for children and won't be until May 5, 2026 per <https://clinicaltrials.gov/ct2/show/NCT04816643>  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2F)

. Why would we mandate anything for all children when the clinical trial is still ongoing? That seems quite irresponsible to me.

4) The formulation of the EUA product that is currently being administrated to children 5-11yo is not the same formula that they used in the clinical trial. This was stated by the Pfizer doctor in the VRBPAC meeting with FDA. They changed an ingredient. How are we to know the true effects of the vaccine in use if it's not even the same formula that they tested?

5) Children are at very low risk of severe Covid symptoms and least affected by this virus. Some are asymptomatic and most have mild illness akin to a cold. Around 40% of the children who have died in the pandemic died WITH Covid and not FROM Covid. As of 1/6/22, according to CDC, there have been 823 deaths relating to Covid in the 0-18yo age group. There are approximately 73 million children in the US, so that would be a death rate of .001%. Does this percentage of risk outweigh the unintended consequences of vaccine injury and the unknown long-term effects that these vaccines can have on millions of children?

6) Natural immunity must be considered. In reading code WA 246-105-030 for other required immunizations "proof of acquired immunity" is acceptable in lieu of the child having the immunization, the way I read it. I implore you to acknowledge and accept natural immunity as valid protection for the child. It is irresponsible and nonsensical to disregard natural immunity.

7) Are you considering the side effects such as tachycardia, myocarditis, blood clots, etc. in children that are reported in VAERS? If not, why? Don't these cases deserve to be completely investigated before mandating any product be injected into ALL Washington children?

8) What are you doing to promote a healthy lifestyle for Washington residents? Why is there no mention of the importance of adequate vitamin D levels? This preprint states that we can, theoretically, get to zero deaths if the individual has a Vitamin D level of 50ng/ml or higher:

<https://www.medrxiv.org/content/10.1101/2021.09.22.21263977v1.full?fbclid=IwAR22o3DoenTSQT3C9DU>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

I implore each of you to both think critically and act ethically here. Parents are watching and we will stand up for what we think is fair and just when it comes to our children's health. Our children have suffered greatly these past two years due to policies that were not backed by science. We have had enough. Having these vaccines available to children is one thing; mandating these vaccines is another and makes no sense.

I'd be happy to talk more in depth about any of the above should you be interested. If there is anything I stated that is inaccurate, I welcome you to correct me with backup data. My phone number is listed below.

Thank you for your time and your attention.

Sincerely,  
Jennifer

Re: Washington State Board of Health  
Comments to Public Meeting  
Agenda Item # 11 – Rulemaking Petition Chapter 246-105 WAC Immunization Criteria

To Whom it May Concern:

I have read the "Criteria for Reviewing Antigens for Potential Inclusion in WAC 246-105-030" (CRAPI). Based on the criteria and assumptions of CRAPI, I strongly oppose the vaccination of children 5 - 11 years old in childcare and school for reasons as outlined below:

- The Board has developed rationale and criteria that it believes is the "best method for protecting children and the community at large while balancing the interests of parents and families in Washington State."
  - By its own direction the Board must oppose or delay implementation of the Covid-19 "vaccine" on children until further evidence can be presented that the "vaccine" does not harm the child now or in the future. To date, no data nor evidence has been presented by any scientist or scientific body that this vaccine is **safe** for children now or in the future or that the "vaccine" is the "**best method**" for protecting children and the community at large". Especially when safe and effective therapeutic alternatives to the "vaccine" are available: <https://www.lifesitenews.com/news/miraculous-ivermectin-approved-for-use-in-the-us-for-the-treatment-of-covid-19/>
  - In addition, one must question the NEED to "vaccinate" children for COVID: According to the CDC, "Between January 1, 2020 and October 16, 2021, 94 children ages 5-11 have died of COVID, which is 0.00012 percent of the 723,880 total U.S. COVID deaths through the week ending Oct. 16, 2021": <https://www.cnsnews.com/article/national/susan-jones/cdc-94-children-ages-5-11-have-died-covid-000012-all-covid-deaths>.

**However!** Of that count, the CDC listed 66 suicides in children ages 5 – 11, as COVID! Removing the false tagging of suicide as COVID death in children ages 5-11 eliminates COVID completely from the top ten causes of children deaths in the U.S., ages 5-11.

**Leading Causes of Death in Children 5-11 Years of Age, NCHS, 2019**

| Causes of Death                                                      | Death (n) | Crude rate per 100,000 |
|----------------------------------------------------------------------|-----------|------------------------|
| Accidents (unintentional injuries)                                   | 969       | 3.4                    |
| Malignant neoplasms                                                  | 525       | 1.8                    |
| Congenital malformations, deformations and chromosomal abnormalities | 274       | 1.0                    |
| Assault (homicide)                                                   | 207       | 0.7                    |
| Diseases of the heart                                                | 115       | 0.4                    |
| Chronic lower respiratory diseases                                   | 107       | 0.4                    |
| Influenza and pneumonia                                              | 84        | 0.3                    |
| Intentional self-harm (suicide)                                      | 66        | 0.2                    |
| Cerebrovascular diseases                                             | 56        | 0.2                    |
| Septicemia                                                           | 48        | 0.2                    |

66 COVID-19 associated deaths in children 5-11 10/3/20-10/2/2021

Total population 5-17 years, 2019: 52,715,248  
CDC NCHS WONDER Online Database. Accessed at <http://wonder.cdc.gov/lead-cause.html> on May 9, 2021

<https://www.cnsnews.com/article/national/susan-jones/cdc-94-children-ages-5-11-have-died-covid-000012-all-covid-deaths>.

If the intention is to save children from death by “Suicide/COVID,” then open the schools and allow children to live their lives without COVID restrictions and without masks! In my opinion, Washington State Department of Health is doing more harm than good and doing so using distorted data to suit a greed driven agenda by Big Pharma under the direction of Anthony Fauci (FDA) as their spokesperson.

- FRAMEWORK: There is no justification for requiring the COVID "vaccine" since the "vaccine" does not prevent transmission, does not prevent the disease, and does not affect children to the same degree as it can adults. Therefore, the four (4) bullet points under the FRAMEWORK section of CRAPI are null and void.
- ASSUMPTIONS: There are two Assumptions as drafted by the Immunization Advisory Committee (IAC). However, it is Assumption #1 that I feel needs to be clarified. Given the many mandates that exist as a result of COVID, does the COVID “vaccine” that we are addressing today qualify for parents and caregivers “to opt out of immunization requirements by children attending either child care or school”? Or will the BOH make an exemption and declare the “vaccine” mandatory for children ages 5 - 11? That Assumption as to the process of opting out needs to be made irrefutably clear to the parents and caregivers.
- PROCESS FOR REVIEWING ANTIGENS FOR POTENTIAL INCLUSION IN WAC 246-105-030 (PRAPI):
  - It’s unfortunate that the Board did not include "consumers (parents); community members with diverse perspectives on immunizations; and representatives from the fields of school health, school administration, child care, child advocacy, immunization administration, and others important to the discussion and review." Had a broader public been involved, TAG and the Board may have come to a different conclusion, deeming it more prudent to postpone implementing yet another vaccine to the already long list of them (14 required vaccinations, not including the COVID “vaccine”).
  - The Technical Advisory Group (TAG) was charged with and had the responsibility to make their decision based on "the best available scientific evidence". That should have included data and research from outside the Department of Health, outside the CDC, outside the FDA, and outside the NIH. The FDA receives 45% of its annual budget from Big Pharma in the form of user fees (AKA kickbacks), which in any other business environment would be deemed to be conflict of interest if not outright corruption. <https://www.fda.gov/about-fda/fda-basics/fact-sheet-fda-glance>. Hopefully DOH and TAG are conducting your own deep dive research and are not relying on what is handed to you by Government agencies, and departments within those agencies, with an agenda that is not, in my opinion, “health” driven.

There are studies performed by reputable scientists and doctors from around the world from which to gather your data on the efficacy and safety criteria of the COVID “vaccines”. As well, there are effective preventive therapeutics to consider as a healthier alternative to an unproven, experimental, life threatening, DNA altering, bio “vaccine”. To discount alternatives to the COVID “vaccines” is to do a great disservice to the children and their parents: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8248252/>

<https://www.lifesitenews.com/news/miraculous-ivermectin-approved-for-use-in-the-us-for-the-treatment-of-covid-19/>

- NINE CRITERIA TO CONSIDER IN EVALUATING ANTIGENS (for purposes of brevity, I'll only remark on those items that are in direct contrast to the stated criteria.
  - Criteria on the effectiveness of the "vaccine"
    1. no comment
    2. *"The vaccine containing this antigen is effective as measured by immunogenicity..."* **False:** The COVID "vaccine" does not provide "prevention" to the disease," therefore it should not be considered a vaccine.
    3. no comment
    4. *"Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects."* **False:** The COVID "vaccines" have passed the one million mark for adverse effects. For the negative effects on children, see attached excel spreadsheet 'VAERS Report Children 5 - 11, which is an excerpt from the VAERS data report (<https://vaers.hhs.gov/data.html>) for 2021. The report is shocking and illuminating in that many "accidents" are reported as coming from the administration of the shot, thus making the jab almost as dangerous as the "vaccine".
  - Disease Burden Criteria
    5. *"The vaccine containing this antigen prevents disease(s)..."* **False:** The COVID "vaccine" Does NOT prevent anyone from getting COVID-19: <https://www.citizensjournal.us/new-studies-covid-vaccines-do-not-prevent-infection-spread-they-simply-do-not-work-as-claimed/>.
    6. *"Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority."* **False:**
      - COVID "vaccines" DO NOT PREVENT TRANSMISSION: [https://www.realclearpolitics.com/video/2021/08/06/cdc\\_director\\_vaccines\\_no\\_longer\\_prevent\\_you\\_from\\_spreading\\_covid.html#!](https://www.realclearpolitics.com/video/2021/08/06/cdc_director_vaccines_no_longer_prevent_you_from_spreading_covid.html#!) [https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00690-3/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00690-3/fulltext). And why is a school or child care setting given the highest priority when children are the lowest at risk? What is behind that rationale?
      - According to Priya Soni, MD, Cedars-Sinai Pediatric Infectious Disease specialist: "Not only are fewer children testing positive for COVID-19," said Soni, "but those who do test positive are likely to have milder cases.
      - "U.S. studies confirm COVID-19 data from China and Italy that show children represent only around 2% of total infections in the population." <https://www.cedars-sinai.org/newsroom/covid19-why-are-children-less-affected/>.

- CDC presentation <https://www.cnsnews.com/article/national/susan-iones/cdc-94-children-ages-5-11-have-died-covid-000012-all-covid-deaths>. As part of the daylong presentation, Fiona Havers, a member of the CDC's COVID-19 Response Team, gave an overview of COVID-19 in children ages 5–11, noting that children are at least as likely as adults to be infected with SARS-CoV-2, but they are far less likely to die: According to Havers:

- ✓ 94 Children Ages 5-11 Have Died of COVID; 0.00012% of All COVID Deaths. **Note: 66 suicides falsely listed as COVID death, see chart below.**
- ✓ There have been around 1.9 million COVID cases reported in the 5-11 age group.
- ✓ Between January 1, 2020, and October 16, 2021, only 94 children ages 5-11 have died of COVID, which is 0.00012 percent of the 723,880 total U.S. COVID deaths through the week ending Oct. 16, 2021; and it is 17.34 percent of the 542 children ages 0-17 who have died of COVID since the pandemic began.
- ✓ 8,300 children ages 5-11 have been hospitalized with COVID to date.
- ✓ Underlying risk factors in hospitalized children ages 5-11 include obesity, chronic metabolic disease, feeding tube dependence, cardiovascular disease, neurologic disorders, chronic lung disease, blood disorders, immunosuppressed conditions, and "other" conditions.
- ✓ During the 12-month period October 2, 2020, through October 3, 2021, there were 66 COVID-19 associated deaths

(please note that the CDC "COVID deaths" were suicides) in children 5-11, making COVID the eighth leading cause of death for this age group (eliminating suicide as COVID pushes COVID deaths from the chart entirely), behind accidents (969 deaths); malignant neoplasms (525); Congenital malformations, deformations and chromosomal abnormalities (274);

assault/homicide (207); heart disease (115); chronic lower respiratory diseases (107); influenza and pneumonia (84); intentional self-harm/suicide (also 66 deaths).

- Implementation of the Criteria

7. "The vaccine containing this antigen is acceptable to the medical community and the public." **False:**

- It has been estimated that as many as 40% of the population does not believe in the “vaccine” but comply, 30% think the vaccine is the greatest thing ever and that it will save lives, not take them, and 30% hate the very idea of the “vaccine” and the mandates that have come with it. It will take time and reliable data before the majority of the public sees these “vaccines” as lifesaving.
8. No comment
9. *“The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.*
- What is “reasonable”? Should a parent or caregiver be forced—either through intimidation, harassment, peer pressure or by law (illegal or otherwise), to have their child immunized by a vaccine that has not met the criteria set by WAC 246-105-030?
  - What are the options for parents/caregivers other than lawsuits or homeschooling vs. subjecting their children to perhaps a lifetime of ill health?
  - Will the State DOH honor Assumption #1 in which a parent/caregiver can “opt out” of immunization requirements? Does that assumption include the COVID “vaccine”?
  - Who bears the burden when a parent or caregiver must care for a child ill or injured by the COVID “vaccine”? Who bears the burden when a parent or caregiver watches as their child dies as a result of the “vaccine?”

Conclusion:

If, as reported, children have **less than 2% of total COVID infections** and those infections are mild, and if as reported COVID deaths are relatively rare in children ages 5-11, than it makes ZERO sense to add a vaccine that does not follow the Assumptions and Criteria set forth in WAC 246-105-030 as follows:

- Criteria No:
  2. The “vaccine” is **not affective** as measured by immunogenicity (multiple boosters required)
  4. The “vaccine” **has not proven to be safe,** is responsible for at least two deaths, and has an unacceptable level of side effects
  5. The “vaccine” **does not prevent the disease** in children,
  6. The “vaccine” **does not reduce the risk of person-to-person transmission** in children,
  7. The “vaccine” is **not acceptable to some in the medical community nor to some of the public**
  9. The **burden of compliance for the “vaccine” is unreasonable** for parent/caregiver.

Thank you for your attention to my concerns and opinions,

Gayle Baker

I respectfully Oppose WAC 246-100 rulemaking which would expand ANY authority to involuntarily quarantine individuals, and I oppose adding C-19 vaccine to the WAC 246-105 schedule for children to attend school.

Please consider the words of one of our most beloved founding fathers, Benjamin Franklin: Those who would give up essential liberty to purchase temporary safety deserve neither liberty nor safety.

Please make a copy for all Board members and put this on public record.

**I am quite disturbed that you would consider adding these experimental COVID19 vaccines to the school children's current vaccine schedule.** There should be NO mandates! The masks don't work! The PCR test doesn't work, too many false positives! The COVID-19 Vaccines don't work or only briefly!

1) **The COVID-19 vaccine experiment is not over.** We have yet to find out the long-term effects. It violates not only the **Nuremberg Code** but the **Constitution** as well. We are supposed to have the right to make our own medical decisions. **Coercion is a felony!**

2) **You can't prove these vaccines are safe.** Can you provide the safety data results? Doubtful since the experiment is not over. I don't believe these vaccines are safe judging by the **VAERS website**. **Most children survive the virus but the adverse effects from the COVID19 vaccines such as Myocarditis can create lifelong health problems or death.** You can't guarantee a child won't be vaccine injured, nor do you take on any liability if they are.

3) **Doctors take a Hippocratic oath to do no harm.** Your current policy of telling patients to come when they have difficulty breathing or dehydrated, then hospitalizing them putting them on a ventilator and giving Remdesivir does harm! Hospitals make a fortune with this protocol. (\$13,000 for admission and \$39,000 if placed on a ventilator for starters.)

**A serious side effect of Remdesivir is kidney disorders and can be potentially fatal.** Remdesivir was pulled from the Ebola trial shortly after because of the 4 trial drugs it had the highest death rate. Why would the FDA approve this for treatment? Was it because they could not push the EUA vaccines if there was an effective treatment?

4) Most people aren't aware that **Ivermectin is on the NIH Table 2f. Characteristics of Antiviral Agents.** It says that not approved by the FDA and not recommended by the panel for treatment of COVID-19 under investigation in clinical trials. Most people don't know about **the Right to Try Act**. **Why aren't people being treated early?** Many frontline doctors had great success using the **Zelenko Protocol**. India's cases peaked in May of 2021 and dropped significantly after administering **Ivermectin**. India has 4.2 times the population of the USA and 483,790 deaths from COVID-19 compared to the USA with 837,264 deaths. The USA has 63.27% fully vaccinated compared to India's 45.89%. Why aren't you looking at India's statistics? Different people have told me that the pharmacies won't fill Ivermectin prescriptions if it is for COVID-19. Aren't they liable if a doctor prescribes Ivermectin and the patient dies because the pharmacy refused to fill the prescription?

**The FDA, CDC, and WHO said not to use Hydroxychloroquine based on an article put in the Lancet and later retracted because they could not produce the data to support it, yet the FDA didn't give the ok to use it, why? Both Hydroxychloroquine and Ivermectin are FDA approved for other use.** Ivermectin is sold over the counter in many 3rd world countries. Its side effects are less dangerous than both aspirin

and Tylenol. Approximately 20-30% of prescription drugs are used **Off-Label** (repurposed) which is perfectly legal. People need to know their rights. **Attorney General Jeff Landry says "laws are in place that require doctors and pharmacists to fill prescriptions regardless of what they think of it. Same for doctors and nurses to treat people with COVID-19 who aren't vaccinated. It is in their Hippocratic Oath."** (Congressional Post 10/2/21)

5) **Masks don't work for the virus, why do you insist on them?** Even the doctor on CNN referred to them as facial decorations! They also deplete oxygen and increases the carbon dioxide, causing **headaches and difficulty breathing. Moisture trapped can cause bacteria to grow. This is not healthy!**

6) **CDC head Rochelle Walensky admitted the PCR test have too many false positives and can remain positive 12 weeks after an infection. She also shortened the isolation to 5 days.**

Right now, the CDC, FDA, NIH, NIAID, and HHS heads either looks like a bunch of liars or are completely incompetent. It is time to end all mandates! It is time for doctors and nurses to renew their Hippocratic Oath to do no harm! Hospitals should not be taking advantage of their patients. The more people that die from bad policies, the less income hospitals will receive in the future. It's time for the Medical Board to do what is best for the people in this state. If you don't, one day you will be held accountable. Gates, Fauci, and Big Pharma have a case against them filed before the International Criminal Court for Crimes Against Humanity.

## Remdesivir and Acute Renal Failure: A Potential Safety Signal From Disproportionality Analysis of the WHO Safety Database

Clin Pharmacol Ther. 2021 Apr;109(4):1021-1024. doi: 10.1002/cpt.2145. Epub 2021 Jan 16.

<https://pubmed.ncbi.nlm.nih.gov/33340409/>

### Abstract

Remdesivir is approved for emergency use by the US Food and Drug Administration (FDA) and authorized conditionally by the European Medicines Agency (EMA) for patients with coronavirus disease 2019 (COVID-19). Its benefit-risk ratio is still being explored because data in the field are rather scant. A decrease of the creatinine clearance associated with remdesivir has been inconstantly reported in clinical trials with unclear relevance. Despite these uncertainties, we searched for a potential signal of acute renal failure (ARF) in pharmacovigilance postmarketing data. An analysis of the international pharmacovigilance postmarketing databases (VigiBase) of **the World Health Organization (WHO) was performed, using two disproportionality methods. Reporting odds ratio (ROR) compared the number of ARF cases reported with remdesivir, with those reported with other drugs prescribed in comparable situations of COVID-19 (hydroxychloroquine, tocilizumab, and lopinavir/ritonavir). The combination of the terms "acute renal failure" and "remdesivir" yielded a statistically significant disproportionality signal with 138 observed cases instead of the 9 expected.** ROR of ARF with remdesivir was 20-fold (20.3; confidence interval 0.95 [15.7-26.3],  $P < 0.0001$ ) that of comparative drugs. Based on ARF cases reported in VigiBase, and despite the caveats inherent to COVID-19 circumstances, we detected a statistically significant pharmacovigilance signal of nephrotoxicity associated with remdesivir, deserving a thorough qualitative assessment of all available data. Meanwhile, as recommended in its Summary of Product Characteristics, assessment of patients with COVID-19 renal function should prevail before and during treatment with remdesivir in COVID-19.

### A cluster randomised trial of cloth masks compared with medical masks in healthcare workers

NIH National Library of Medicine April 22, 2015

C Raina MacIntyre 1, Holly Seale 1, Tham Chi Dung 2, Nguyen Tran Hien 2, Phan Thi Nga 2, Abrar Ahmad Chughtai 1, Bayzidur Rahman 1, Dominic E Dwyer 3, Quanyi Wang 4

<https://pubmed.ncbi.nlm.nih.gov/25903751/>

**Results:** The rates of all infection outcomes were highest in the cloth mask arm, with the rate of ILI statistically significantly higher in the cloth mask arm (relative risk (RR)=13.00, 95% CI 1.69 to 100.07) compared with the medical mask arm. Cloth masks also had significantly higher rates of ILI compared with the control arm. An analysis by mask use showed ILI (RR=6.64, 95% CI 1.45 to 28.65) and laboratory-confirmed virus (RR=1.72, 95% CI 1.01 to 2.94) were significantly higher in the cloth masks group compared with the medical masks group. Penetration of cloth masks by particles was almost 97% and medical masks 44%.

**Conclusions:** This study is the first RCT of cloth masks, and the results caution against the use of cloth masks. This is an important finding to inform occupational health and safety. Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection. Further research is needed to inform the widespread use of cloth masks globally. However, as a precautionary measure, cloth masks should not be recommended for HCWs, particularly in high-risk situations, and guidelines need to be updated.

### Effectiveness of N95 respirators versus surgical masks against influenza: A systematic review and meta-analysis

Youlin Long 1, Tengyue Hu 2, Liqin Liu 2, Rui Chen 3, Qiong Guo 1, Liu Yang 1, Yifan Cheng 1, Jin Huang 4, Liang Du 1

Pubmed PMID: 32167245 PMCID: PMC7228345 DOI: 10.1111/jebm.12381 March 3, 2020

<https://pubmed.ncbi.nlm.nih.gov/32167245/>

**Conclusion:** The use of N95 respirators compared with surgical masks is not associated with a lower risk of laboratory-confirmed influenza. It suggests that N95 respirators should not be recommended for general public and nonhigh-risk medical staff those are not in close contact with influenza patients or suspected patients.

## **CDC Head Admits PCR Tests Produce False Positives [Video]**

The Liberty Beacon Europe Reloaded by TLB Staff: Steve Watson Dec. 31, 2021

<https://www.thelibertybeacon.com/cdc-head-admits-pcr-tests-produce-false-positives-video/>

CDC head Rochelle Walensky admitted Wednesday that the agency has rejiggered its guidance, including cutting COVID isolation times in half, based on the fact that PCR tests are producing massive amounts of false positives.

Noting that PCR tests for COVID can stay positive for up to 12 weeks after infection, Walensky stated “we would have people in isolation for a very long time if we were relying on PCRs.”

## **Covid-19: Pharmaceutical giants, Gates, Fauci, UK officials accused of crimes against humanity in International Criminal Court complaint**

By The Rio Times December 19, 2021

<https://www.riotimesonline.com/brazil-news/modern-day-censorship/covid-19-pharmaceutical-giants-gates-fauci-uk-officials-accused-of-crimes-against-humanity-in-international-criminal-court-complaint/>

RIO DE JANEIRO, BRAZIL – UK officials and the most influential public health figures are accused of genocide, citing a series of statistics on the impact of “vaccines” and policies imposed under the guise of “mitigating COVID.”

A group including former Pfizer vice president Dr. Michael Yeadon filed a complaint with the International Criminal Court (ICC) (worth reading) on behalf of U.K. citizens against Boris Johnson and U.K. officials, Bill and Melinda Gates, CEOs of major pharmaceutical companies, World Economic Forum executive chairman Klaus Schwab, and others for crimes against humanity.

The ICC has acknowledged the case and has attributed the following reference number **OTP-CR-473/21.**

RE: Item 11 Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry – Possible Action

Dear WSBOH Members:

It is not entirely clear what this agenda item is since the meeting materials are not public prior to the recommended written public comment deadline. However, given the TAG meeting on December 29, 2021, it appears you may be considering including Covid-19 in Chapter 246-105.

As the parent of two students, currently compliant with Chapter 246-105, I am writing to ask you not to add Covid-19 to childcare and school immunization requirements. We have consulted with our healthcare providers and have decided not to have our children get any of the available Covid-19 vaccinations. We will reevaluate when Phase 3 data is available and the data is released from the trial phases is made public.

It is not acceptable to consider adding Covid 19 vaccinations to the mandatory list as the vaccines are still under EUA and have not completed trials. It is disconcerting that efforts to make trial data public is stalled, there should be no mandatory vaccinations without full transparency of all data related to what is being required.

More importantly, it is well established that generally kids are not at risk of death from any variant of Covid. Additionally, we now know that the vaccines do not prevent spread or infection in adults or children. There is some discussion about disease severity reduction, and hopefully at a minimum the data proves this out, but severity is also generally not an issue for kids.

Parents, in consultation with their healthcare providers, need to be able to assess each individual child's risk and decide whether or not the risk of participating in this phase of the vaccine trials outweighs the risk of not participating.

Please do not add Covid 19 to Chapter 246-105.

Thank you,  
Rachael Petro

To: DOH WSBOH  
Subject: Vaccination requirement for schools and

#### External Email

The Covid-19 vaccine should not be a required vaccine to attend school in Washington state. The vaccine itself does not pass the set required criteria set forth in WAC 246-105-030.

1 – The vaccine does not prevent contraction of the disease. This has been proven time and time again with fully vaccinated individuals. You can still contract the virus when fully vaccinated or 'up to date' on your shots. This has been proven even with mask mandates in our schools.

2 – The vaccine does not prevent transmission of the disease. Fully vaccinated individuals can still transmit the disease to others. This also has been proven time and time again. This has been proven even with mask mandates in our schools.

The virus is ever evolving and mutating, which is evident as a booster shot is now approved, and there is talk about a second booster. A total of four shots.

Mandating this vaccine will put an unnecessary burden on administrative staff at our schools. If a booster shot is recommended or mandated every 6 months, tracking will be extremely burdensome.

Proposing forced vaccination with a vaccine that doesn't prevent contraction or transmission in a demographic group with such a low rate of hospitalization or death and claiming it is to protect the more vulnerable groups is grossly misleading. The virus can still be transmitted to those vulnerable groups. And the more vulnerable groups have had access to the vaccine for far longer than our children. Those that wanted to get the vaccine (or were forced to get it to maintain employment), have received it.

The vaccine is easily obtainable for anyone that WANTS to get it. It should not be mandated or a requirement to get it as it does not do the two things that a true vaccine is supposed to do: provide immunity and prevent transmission.

If this vaccine is forced on our children, we will see a large rise in school withdrawals and more children will be homeschooled. As more children are removed from public schools, the amount of federal funding will also decrease.

As a parent with two children that this proposed mandate will affect, I implore you to reject this proposal. If is put in to effect, I will withdraw my children from public schools.

Thank you

Christina Maggs

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105

We do not agree with making Covid vaccines mandatory for children to enter schools or daycare due to many reasons including...

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. What we put in our bodies should not be the business of the government, but be freely decided by each individual and family.
4. There are many cases of adverse response to the covid vaccine and therefore should not be required in Children

Covid should not be applied to WAC 246-100-040 either. This is a disgusting over-reach that is reminiscent of tyrannical totalitarian regimes. Human lives are not property of the government to be forced into involuntary quarantine.

Thank you for reading these comments.

With sincerity,

Cassi Waters

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. This is still an experimental vaccine. That being said to enforce its use is in direct violation of the Nuremberg Code and a violation of the Civil Right's Act of 1964 Title VII.
2. There is no evidence that this vaccine is beneficial to children and there is growing evidence of the detrimental effects this vaccine is having on them. Specifically in regards to myocarditis and pericarditis. The risks simply do not outweigh the rewards.
3. We are a nation of laws, not mob rule or sentiment. An act such as this flies in direct contradiction to the spirit and intent of the Constitution of the United States of America.
4. With what we now know of this virus it is futile to continue with these measures that have not worked in slowing or stopping the spread of the virus anywhere on the planet.
5. The survival rate of healthy individuals to this virus is above 99% per CDC numbers. We should be taking a holistic approach to this which hasn't been tried yet. Spend the dollars on early treatment, healthy living programs, open up sports for the kids (and adults). We know this works for every other virus we have encountered. Instead of a knee jerk reaction to follow the "mob" let's apply some common sense, stick to the laws that protect ALL of OUR right's and return to a healthy society.

I am writing to express concern Agenda Item 11 on the January 12 agenda (found at <https://sboh.wa.gov/Portals/7/Doc/Meetings/2022/Jan%2012/WSBOH-Agenda-2022-01-12-Final.pdf?ver=2022-01-05-175008-690>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FWSBOH-Agenda-2022-01-12-Final.pdf%3Fver%3D2022-01-05-175008-690&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C07915ba308c04602f18e08d9d21803cf%7C11d0e217>

#### Agenda Item 11. Rule-Making Petition - Chapter 246.105.

As stated in WAC 246-105, "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers." Based on the stated purpose of this WAC, I'm concerned about the proposed rule change requiring students to receive a Covid-19 vaccine for several reasons:

1. The vaccine is not a perfect fix to this illness. Vaccinated persons are contracting and transmitting Covid-19; we are not looking at an illness or a vaccine that meets the purpose of the code since Covid-19 is not prevented by vaccination like polio, meningitis, or the myriad of other illnesses currently requiring a vaccine to attend public school. A vaccine mandate for this illness is not applicable under this WAC and should not be considered by the WA BOH.

2. Vaccination for Covid-19 is not a one-size-fits all solution for children, and the disease itself continues to be an incredibly low-risk illness for children. It has only recently come out of FDA testing with approval for children, and many families are still cautious and concerned about its long-term effects. When considering this, parents should have the authority to make educated decisions for their children while working with their child's healthcare provider, rather than a top-down authoritarian decision for all children in the state of Washington.

3. Similar to the seasonal flu, health experts in the US and around the world have shared that Covid-19 will shift from a pandemic illness to an endemic illness in the near future. Forcing vaccines for an illness that is rapidly shifting to look more like the common cold is unnecessary and an overreach of government authority.

4. Additionally, many in the community are concerned that a requirement of this nature could have unintended consequences for low-income and minority groups who are hesitant to vaccinate.

5. Finally, our state government continues to impede on the individual rights and liberties of the residents of the great state of Washington, which I love dearly. The Board of Health's consideration of this policy change is one more step towards removing choice. Please consider the long term effects that this may cause for all choices that our residents enjoy. Less regulation provides greater freedom. My hope is that we can swing back to a more moderate approach to the health and well-being of all Washingtonians, providing education and choice as the key ingredients to a healthy state.

Thank you for your consideration of these concerns,

I strongly oppose the proposed changes to the WAC 246 codes being brought forward related to covid-19 including use of detainment, and/or use of forced examination, testing, treatment, counseling and vaccination.

I also strongly oppose the proposed requirement for the covid vaccine for school aged children.

Please do not bring these changes forward, it is a huge government overreach.

Thank you,

Good morning,

Washington State Board of Health officials - Thank you for your service in strenuous time in public health. I understand these have been trying times, and you have pressure from many sources, yet you have a heavy moral and ethical obligation to uphold what is best for the health of Washingtonians, including our very precious future, our children.

As a mother, and highly educated health care professional, the health of my children and those in the community is of utmost importance to me:

1) I would like to express my Opposition to the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating shots for school.

- \* We know, the risk of severe complications or death from Covid-19 is extremely low for children.
- \* We now know there are very concerning adverse events being reported for the Covid-19 vaccines in children, and VAERs is extremely underreported (shown by Harvard Study). This should concern you.
- \* Are you going to require a child to place themselves at unnecessary risk of an adverse event and unknown long term sequelae, when they likely would have beat Covid-19 with their own immune system, and developed a form of durable immunity that may help end the pandemic?
- \* Prove that the benefit outweighs the risk -- without using data from pharmaceutical companies that have a major conflict of interest with their financial incentive.

2) I Support Informed Choice Washington's Petition for Rulemaking - To request you establish a new rule that prohibits adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

- \* It is Unethical to require an experimental product with lack of long term safety studies, for attendance in society - including public school. The main clinical trial in children and young adults will not be completed until the estimated date, May 5, 2026.
- \* Even moreso, we know children, due to their low viral loads and lack of ACE2 receptors, are the least likely to transmit Covid-19
- \* The entire premise for vaccinating children in school is to reduce the transmission of the virus yet,

Chief Medical Officer of Moderna Dr. Tal Zaks,

"There's no hard evidence that it stops [the Covid-19 vaccinated] from carrying the virus transiently and potentially infecting others who haven't been vaccinated."

WHO Chief Scientist Dr. Soumya Swaminathan,

"At the moment, I don't believe we have the evidence of any of the vaccines to be confident that it's going to prevent people from actually getting the infections and therefore being able to pass it on"

3) we need more solutions to help the general public, how about starting a public health campaign and offering courses in immune resilience! I would love to help with this. If any of you would like to improve your immune resiliency I will offer my services to each of you, for free.

4) Make very accessible to the public, nutrients that are known to be very effective in helping an individual's combat this virus. Let's work on getting people early treatment and prevention packs. We need more tools to fight this. Perhaps incentivize movement.

Wouldn't it be great to make Washington State the healthiest state in the union!

Thank you,

Dr. Chelsey Richardson, DNP, FNP-BC, ARNP  
Institute of Functional Medicine Candidate

Subject: Jan 12, 2022 BOH meeting

External Email

Dear Boardmember,

I am contacting you to express my concerns regarding the addition of the Covid-19 vaccine to the WAC-246-105 that aims to remove a parent's right to informed consent. I believe that the choice of if, when and how a child is to be vaccinated needs to remain between a family and their doctor. Where there is a risk of injury or death, no matter how small the perceived risk may be, there must be a choice. To mandate a medical procedure with known risks is medically unethical. I implore you to consider these critical reasons to oppose or dismiss this mandate:

The mandate violates a parent's right to informed consent: Vaccines are chemically synthesized biopharmaceuticals with known and documented side effects that include permanent injury and death. Forcing a medical procedure on a non-consenting individual that carries the risk of injury or death, no matter how small that chance may be, is medically unethical according to the American Medical Association's code of ethics, is inhumane and is a violation of our basic human right to possess autonomy over one's own body.

US ranks last for infant mortality, yet first for immunizations: Compared with other industrialized nations, the US administers the most pediatric vaccinations yet ranks the worst - 34th - for infant mortality rate.<sup>1</sup>

Pharmaceutical companies have no-liability with vaccine reactions: The National Childhood Vaccine Injury Act of 1986 established the National Vaccine Injury Compensation Program (VICP) as a federal no-fault system to compensate persons (or families of persons) who are injured by childhood vaccines, has paid out over \$2.8 billion to families whose children have died or suffered other adverse reactions. In the past 5 years, an average of \$221,000,000 has been paid out per year, which has nearly doubled from years before.<sup>2</sup>

It is worth noting that recipients of compensation are not allowed to speak of their case after it has been settled.

Big Pharma's fraudulent behavior: In just the past 5 years, drug makers have paid the U.S. Government \$19.2 billion in criminal and civil fraud penalties. Skepticism of the pharmaceutical industry is well deserved, and it doesn't imply skepticism of science. Furthermore, two former Merck virologists now whistleblowers have filed a lawsuit against Merck alleging that Merck falsified data with the MMR II vaccine in order to meet the required 95% efficacy rate.<sup>3</sup>

This suggests the possibility that vaccine failure, not only the unvaccinated, is key factor causing the annual outbreaks.

Adverse reactions are more common than widely perceived: Managed by the CDC and FDA, the Vaccine Adverse Event Reporting System (VAERS) reports more than 30,000 vaccine related injuries annually. In 2015 alone, \$94,982,000.93 has already been awarded to 217 claimants.<sup>4</sup>

As of December 14, 2014 there have been 6,962 serious adverse events reported to VAERS in connection with the measles vaccine since 1990. Over half of those occurring in children three years old and under. Of these events 329 were deaths, with over half of the deaths occurring in children under three years of age.<sup>5</sup> It is estimated that only 10% of adverse reactions are filed with VAERS as this form of passive surveillance is greatly limited by underreporting.<sup>6</sup>

In conclusion, when government makes decisions to take away parental rights relative to the health of their children it must only do so when all can agree it is in the best interests of every single child. Opinion 8.08 of the American Medical Association (AMA) states, "The physician has an ethical obligation to help the patient make choices from among the therapeutic alternatives consistent with good medical practice. Informed consent is a basic policy both in ethics and law that physicians must honor..."

This proposed action ignores and eliminates the fundamental American value of choice as well as a doctor's ethical obligation to provide their patients informed consent. If we are not free to make informed, voluntary decisions about which pharmaceutical products we are willing to take, then we are not free in any sense of the word. If this proposal passes it will set a very dangerous precedent and there will be no limit on which individual freedoms the State can remove in the name of the greater good.

For these reasons and many more, I urge you to view this action as inhumane and medically unethical.

Sincerely,

Chastity Comeau

A covid 19 vaccine mandate for children does not meet the nine criteria required for inclusion in WAC 246-105-030. We have children in the public school system. The vaccine has not had enough time to be proven safe for children with still-developing bodies, brains, and reproductive organs.

Forcing the vaccine on children is an unnecessary risk, and it is a violation of our right as parents to make informed health decisions for our children.

Thank you,

Subject: I oppose WAC 246-100 and oppose adding Covid 19 Vaccine to WAC 246-105 schedule

External Email

To whom it may concern;

I oppose the idea of WAC 246-100 allowing any authority to involuntarily quarantine individuals. Our Country and State was founded on liberty and freedom. The idea to detain someone over covid-19 is ridiculous and gives way too much power to Authority. This is a stepping stone to more severe actions that can be taken in the future. This is a very dangerous slope that has not ended well for any other country that has tried to unlawfully detain.

I oppose adding Covid-19 vaccine to the WAC 246-105 schedule for requiring vaccines for children who attend school. These vaccines are only authorized by the FDA for emergency use only. These have not gone through the 5-10 year studies to allow full authorization. You will jeopardize the safety of our children who have been the least susceptible to this virus with a vaccine that we know nothing about. We do not know long term side effects and are not willing to admit the short term side effects that this vaccine has. This is a danger to our children and needs to be the choice of the parent if their child will be vaccinated for Covid-19.

I hope you can put the people's needs before the power grab this government is trying to overreach on.

Thanks for your time!

RE: January 12, 2022 meeting

Opposition to Agenda Item #8, the Board's formation of a Technical Advisory Group

Support for Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC,  
Immunization Criteria, Child Care and School Entry

Ladies and Gentlemen,

I am sure others have provided you with sound research, properly conducted, to demonstrate why we should not be mandating vaccinations particularly in children. As such, there is no need for a Technical Advisory Group on this matter; thus Agenda item 8 pertaining to this should be voted down. To form such a group results in a very small number of people steering decisions for children and their extended families statewide. As of July 2021, the US Census Bureau indicates the state population over 7.7 million

with 21% being under age 18. You are making decisions on behalf of 1,625,125 children plus several million other family members, for that which affects one person affects the whole family.

Now what type of information would these decisions be based upon? What has been the quality and accuracy of public information given to the WA state government and citizens received these two years? It has been a rollercoaster of bait-and-switch actions. The issuers of official guidance—FDA, CDC, NIH, etc. referred to collectively as “Federal officials”—told us the vaccines would prevent people from becoming ill with Covid-19. Once enough vaccinated people caught Covid, they switched to saying it doesn’t prevent infection but prevents death, and that people will suffer much less if vaccinated prior to being infected. Meanwhile, they deny Covid deaths amongst the vaccinated, spreading for many months the soundbite that the vaccinated have a 1 in a million chance of dying from Covid. This is a rare outlier figure that cannot be substantiated and defies common sense. More realistically:

“[...] the exact definition of rare disease, or orphan disease, varies from country to country. The National Institute of Health classifies a rare or orphan disease as one with fewer than 200,000 cases in the country. The European Union defines it as any disease that affects five or fewer people out of every 10,000. Whichever definition you use, the answer is the same: Thousands of rare diseases affect millions of people every day.”

The guidance from the Federal Officials later dropped to 1 in 250,000. However, you can still see by the NIH own definition that this is an outlier figure, one that would not pertain to a general population. And the Federal Officials in collaboration with the media do not accurately depict the increasing rates of Covid deaths amongst the vaccinated. Meanwhile, the CDC still promotes adverse effects like Guillain-Barré Syndrome as rare when at the same time the American Neurological Association is following the significant occurrences of post-vaccine incidents . The lists could go on and on, as for two years we have had very specific messages intentionally aimed to conditioning the general public through collaboration with media outlets.

In spite of various legal actions nationwide against mandating vaccination, Washington state has chosen to expedite vaccinations, modeling for organizations statewide to terminate thousands of workers by accepting but not accommodating exemptions. While at the same time various officials speak of the ‘unknowns’, they advance controls with penalties to citizens at a rapid speed based on insufficient and even faulty science. For example, just this week, the National Comprehensive Cancer Network® updated their Pre-exposure Prophylaxis recommendations:

“research shows many immunocompromised people develop inadequate immune responses from vaccines. Thankfully, we now have additional tools to help people in active treatment for cancer, solid organ transplant recipients, engineered cellular therapy (e.g. CAR T-cell) or stem cell transplant recipients (a.k.a. hematopoietic stem cells), and those with other immunodeficiency-causing conditions (such as HIV, DiGeorge syndrome, or Wiskott-Aldrich syndrome).” [...] “The Food and Drug Administration (FDA) has issued an emergency use authorization for the monoclonal antibody combination of tixagevimab plus cilgavimab for pre-exposure protection from COVID-19 in adults and children starting at age 12 (weighing at least 40 kg) who have moderate to severe immune compromise and may not be responsive to vaccination. Patients with blood cancers (including those receiving stem cell transplantation or engineered cellular therapy) are more likely to have inadequate responses to COVID-19 vaccination” {...} “We have new agents to prevent and treat COVID-19 that will benefit patients with cancer”

Meanwhile, “the CDC Director Walensky herself stated, “What the vaccines can't do anymore is prevent transmission.” [...] Dr. Anthony Fauci says, “We know now as a fact

that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else." [...] Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated." In contrast to the narrative espoused in collusion with media outlets, vaccinated persons do carry the same, and sometimes higher, viral load as the unvaccinated, thus the unvaccinated are not the super-spreaders.

Now we face Omicron which is 95% of Covid-19 cases; experts agree it is milder than previous Delta and will not result in as many hospitalizations nor deaths. Yet the public remains conditioned to believe the deaths occur amongst the unvaccinated, and WA state government continues driving policies and taking actions with this presumption as well. In addition to VAERS data (which has been demonized in the narrative) and reports from many countries, an example of our government's own data would be the HHS' Countermeasures Injury Compensation Program (CICP) Data of the 4751 Covid injury claims. The program only has 5200 claims of which 4751 claims pertain to Covid-19 treatments. The Epoch Times earlier reported that out of this 4751, 2297 are claims of adverse effects from vaccination with over 600 deaths in these claims. Forbes reported that the HHS states there were only 1357 vaccine claims and 53 of these were deaths. That is 3.9% of the claims. The article also demonstrates how the government is not paying compensation for Covid vaccines and the new limitations it has placed upon them.

Adult Americans have been the human experiments for these vaccines for too long. Officials in the FDA and CDC have made statements that go without recourse such as males under age 40 have greater chance of suffering debilitating damage from the vaccine than from the Covid virus itself. There have been many studies substantiating that. Last month, a panel of advisers to the Centers for Disease Control and Prevention unanimously recommended people do not take the Johnson and Johnson vaccine due to adverse effects and deaths. Unfortunately, this came after 16 million Americans had already had J&J. Other countries had already banned the J&J vaccine and have banned mandates as well.

Now we suffer the move to experiment on our children despite that a systematic review of the research found:

"five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially"

Last October, FDA panelist and Editor in Chief of the New England Journal of Medicine Eric Rubin said "We're never gonna learn about how safe the vaccine is until we start giving it. That's just the way it goes." Given that the tweet had 1.8 million views, I assume you are already aware of this. Since last spring, the death rate associated with Covid-19 in Whatcom county has run at or just under 1% for all ages. Meanwhile, the obituaries and testimonials of vaccine survivors increase as tens of thousands of people, with all good intentions to serve their country, are maimed and killed by the vaccines. And who could ignore athletes in their prime, particularly soccer players, collapsing on the field? With 183 deaths so far and hundreds more injured, young adults have suffered.

You can now see the need not only to vote down item 8 Technical Advisory Group but also to approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

While it is a dearth of information, I ask that you take time to seriously review in detail the resources provided by me and others prior to Monday's meeting. Thank you in

advance for doing so.

Sincerely,

Lisa Dykstra

Subject: WAC 246-105 & WAC 246-100 - Letter from Camisha Pauli Hughbanks

External Email

Good morning, and thank you for your consideration in my letter of opinion regarding WAC 246-105 & WAC 246-100 with regard to the forced vaccination of the children of Washington state with regard to receiving an education and being able to participate in extracurricular activities.

Before I begin, let me be clear. I do not deny that Covid-19 is real and a legitimate concern. I know many who have been terribly sick, some hospitalized, and a few that have died. I am also not an anti-vaxxer; I have received all vaccinations, as have my children (with the exception of HPV). As a family, we do not receive annual flu shots, as we believe that our immune systems are adequate to support the flu, as well as obtain natural immunity from the flu. As we have seen throughout the past several months and year, the Covid-19 vaccine does not prevent Covid-19, it just lessens the severity of the virus in most people. Therefore, we can, by definition assert that the Covid-19 vaccine is actually not a definable vaccine because it does not prevent the disease with which is intended to prevent. And we can instead assimilate it to a flu shot...which I have only received a handful of times in the span of my life. Flu shots are not required to attend schools, sporting events, play in band or compete in competitive sports. Nor should the Covid-19 vaccine.

I am not an expert on Covid-19, but I am a highly educated woman, that has done tons of research on both sides of this issue, and am passionate about the health and safety of my children, and all children. As a mother, I have watched my children, and their friends and classmates, struggle for the past 20 months at the hands of our Washington State Government. And I strongly believe they have suffered enough. The mandate of the Covid-19 vaccinate is going too far...our families deserve a choice. Please allow me to expand further, to the multiple reasons that I strongly believe that the Covid-19 vaccine should not be required for our children to attend school, participate in extracurricular activities, etc. I am vehemently opposed to Covid-19 vaccine requirements for all individuals, especially children, because:

#1 - the covid-19 vaccine has known, and quite dangerous, side effects:  
The covid-19 vaccine currently has many known, and quite dangerous side effects. Events of myocarditis have been widespread throughout the inoculation process. Myocarditis can stay with you for the duration of your life, and be very inhibiting for any, and all, physical activity. Myocarditis can also kill you. For myself, and my children, we would much rather assume the risk of getting sick with Covid-19 and using our immune system to fight it than to take the risk of a lifelong illness that would inhibit us from doing everything we love: hiking, sports, running, etc. I know four people who have had serious side-effects...two of which are still unable to do everyday activities. I do not wish to take this risk on my children. Nor should you want to put children at risk.

#2 - nobody knows what the long-term side effects of the covid-19 vaccine will be:  
The covid-19 vaccine is less than two years old. Nobody knows what the long-term side effects may be. Nobody CAN know. It hasn't been around long enough. Please allow yourselves to look into, or remember, the "Thalidomide Babies" of the 1950's. It is a horrifying story of people using a drug that was deemed safe at the time, only to later learn that the Thalidomide drug frequently caused significant, and often severe, deformities. There have also been cancer-causing drugs that were once deemed safe,

and have since been removed from the market due to their cancer-causing effects. We do not know what the Covid-19 vaccine brings for long term safety of it's recipients. Accordingly, I do not wish to inject myself, or my children, with it at this time. Given the unknowns, NOBODY should be forced to receive this vaccine. It's still an experiment.

#3 - Efficacy - people who have received the covid-19 vaccine, and boosters, are still getting sick with covid:

It is now widely known, and agreed upon across all news avenues, that people who are vaccinated and boosted can still get sick with covid. This vaccine does NOT prevent the recipient from getting the virus. It makes no sense, then, to require a vaccine that doesn't even prevent the disease. Vaccinated individuals are still walking around with the virus, getting sick with the virus, and spreading the virus. In fact, it can be argued that vaccinated individuals (who are scientifically known) can carry the spike proteins for up to 15 months, whereas those that have gotten sick with covid are carrying the spike proteins for 3 months, can spread the virus for longer than unvaccinated sick people. Regardless of which "scientist/doctor" you follow or research or listen to, the fact is known: vaccinated & boosted people can still get sick. So why require the vaccine? It makes no sense!

#4 - The current Omicron variant is less severe:

With the new Omicron variant's lack of severity, it should shed bright a ray of light to the theory of natural immunity. If the Omicron variant is likened to a common cold (which even Fauci admits), then why the need for a vaccine? Just let nature run it's course. Let kids get the Covid cold, and let them build natural immunities within themselves. Those last a lifetime.

#5 - Mental health problems & suicide in children:

The past two years have already been horrific on our children. We have seen depression, fear, anxiety, isolation, separation, etc increase tremendously in our youth. Some of the most stable children have committed suicide (I personally know two - it has been heartbreaking on our small community). Some of the least stable children have turned to massive drug and alcohol use, as well as violence, to cope. No matter the stability of the children - they have all suffered. Kids are not meant to be separated and isolated from their peers...or to be so divided against one another. The mandate of this vaccine on our youth will surely add to the divide, the isolation, and the mental health problems. With the mandate, many parents will pull their kids from school for fear of the current & long-term side effects...and those kids will live an isolated, secluded life again. To force kids back into the situation that was forced upon them in March of 2020, through most the end of the school year in June of 2021 is unconscionable. I beg of you - do not force our kids into this situation again.

#6 - Public School funding & deterioration:

If you decide that children should be forced to receive this vaccine in order to attend school and participate in extracurricular events, you will likely see a mass exodus from the public school system. Funding will be pulled, children will suffer greatly, teachers will lose jobs, administrators will be stuck, and community members will stop supporting school systems: levies will fail and schools will become dilapidated and rundown. This is not a good scenario for anybody.

#7 - CHILDREN ARE NOT AT SERIOUS RISK - NOR ARE THEY THE SUPERSPREADERS THEY WERE ONCE DEEMED TO BE:

Children are NOT the problem - please stop treating them as the problem. They are our future, and should be cherished. Please give families the choice regarding this vaccination. As I have laid out before you...the risk of Covid-19 does not outweigh the risk of current side effects, long-term side effects, lack of efficacy, mental health & suicide problems, as well as the risk of public school deterioration. Please...give us a choice. Let kids be kids!

Thank you for your consideration,

Thank You,

Camisha Hughbanks

To Whom It May Concern,

I oppose WAC 246-100 rule making that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The CDC's own statistics show that children are NOT at great risk of becoming seriously ill from C-19. It has also been shown that those who have received the shot can contract C-19 as well as spread it to others. Long-term studies have not been done to determine potential side effects of the C-19 shot. Requiring that children receive the C-19 shot is unnecessary and unconscionable.

Respectfully,

Terrie Wilder

609 Cedar Tree Dr

Sedro-Woolley, WA 98284

withdraw our children from these tax payer funded hellholes before the ink dries on this atrocious decision. Our children have endured enough abuse and fed too many lies from the govt, especially the last 2 years. Let the parents do their jobs. I will make the decisions I feel are best for my family. There is new information coming out everyday. Now is not the time to mandate this vaccine for school attendance.

In conclusion, I oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Also, I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

Thank you for your time,

Cynthia Ives

Subject: No vaccine mandate for kids!

External Email

Stuart,

As you probably surmise from the subject line of this message, I am writing to express my concern about the BOH meeting to discuss adding a vaccine requirement to attend public school. The evidence is increasingly clear that people under 40yrs old face greater risk of harm from the shots than from natural infection.

With the emergence of Omicron as a common cold-like infection for virtually everyone, this is the time when we need to be discussing the timeline of peeling away restrictions, mandates, and all of the things that we've been harming our kids with over these last two years, NOT adding more useless and potentially harmful mandates. No sane society uses their children as a shield to make adults feel safer.

The idea that parents are having to worry about making a decision whether to pull their child out of school or inject their child with a vaccine that might harm them is abhorrent. The very idea of mandating a vaccine for children that has no long-term data on possible negative effects (for any age group) is amoral on the face of it.

This isn't about being "anti-vax", the latest weapon word. This is a simple risk/benefit calculation.

Every other required vaccine for kids underwent a much longer approval process, and then an additional 6-16 years (depending on the vaccine) of use in the general population, before they were ever considered as a requirement to enter public schools. We have no long term safety data on these mRNA vaccines!

Now is the time to publicly speak up against this single-minded approach to dealing with the pandemic. I personally think that they are a marvel of technology and I am glad that they are available for those who stand to benefit from them. However, our Governor and those of you overseeing the Board of Health seem to have lost the script. You need to know that this is the wrong way to proceed. I worry that they will set back trust in all vaccines for a generation if too many kids are being harmed by these new shots. Trust in our public health agencies is already at an all-time low and that is dangerous.

Please, I am asking you to back away from this idea.

I also encourage you to read this post by Dr. Vinay Prasad. He has been a voice of moderation and reason throughout the pandemic and he is deeply concerned that we may be rushing into something that we might regret.

<https://vinayprasadmmpm.substack.com/p/uk-now-reports-myocarditis-stratified>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvinayprasadmmpm.substack.com%2Fnow-reports-myocarditis-stratified&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C425361565e95462f246808d9d177ba7f%7C1>

If you have 30 minutes of extra time then you might also listen to this interview between Zuckerberg and Fauci from way back near the beginning of the pandemic. If you do, then pay particularly close attention to what Fauci says regarding the process by which the vaccine safety profiles need to be established. Then ask yourself if the science changed, or whether something else happened.

<https://m.facebook.com/zuck/videos/live-with-dr-anthony-fauci-the-uss-top-infectious-disease-expert-to-learn-about-/10111683294466031/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.facebook.com%2Fzuck%2Fvideos%2Fwith-dr-anthony-fauci-the-uss-top-infectious-disease-expert-to-learn-about-%2F10111683294466031%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C425361565e95462f246808d9d177ba7f%7C1>

I am hopeful that the madness and hysteria of the last two years is beginning to fall apart and that we might begin to work towards a healthier situation for our kids. They have been harmed enough by our pandemic policies. I just hope that Washington State isn't the last place to get the memo. Most of the country seems to have figured it out already and I am astonished that we still seem stuck in some weird fearful version of 2020.

What in the heck are you all thinking?? Enough is enough. It is time to learn to live with this virus, focus on protecting the most vulnerable, and leave the rest of our society alone.

Thank you,

Erik

Michelle,

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Informed Consent is required by law.

There are 95000 videos about vaccines, but here is one...

More Harm Than Good

The Pfizer Inoculations For Covid-19

Canadian Covid Care Alliance

<https://www.bitchute.com/video/RaQkNEzpAdQo>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bitchute.com%2Fvideo%2F/>

Sars-Cov-2 has never been isolated - no proof exists, 25 countries, 139 institutions+  
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fluoridefreepeel.ca%2Ffois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2f901608cd6e4d8f892208d9d234646b%7>

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will. Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Lynn Landstrom

I respectfully request NO as a decision on requiring the COVID-19 vaccine for school age children. Immunizations are meant to be preventative. Per WAC 246-105-020 item 13 immunizing agents are for vaccine-preventable diseases. The COVID-19 vaccine is NOT preventative. It does not prevent the infection of or the spread of the COVID-19 virus. The hospitalization & death rate for children because of COVID-19 is so small, the CDC isn't even reporting the numbers.

While I am not making light of what can be a very serious virus, I urge you to reconsider your recommendation of a new requirement and keep the COVID-19 vaccine optional, like the flu shot. It is a choice that a parent should be able to make for their child.

Thank you,  
Randi Najar

Subject: Oppose inclusion of Covid 19 in Chapter 246-100 WAC

External Email

Good morning,

Regarding the January 12th Board of Health meeting, please object to applying Chapter 246-100 WAC to include COVID-19. As many people are vaccinated and many more have recovered from COVID-19, it is unnecessary to include this virus among other communicable diseases that require involuntary detainment.

Please do not include COVID-19 vaccinations in those immunizations required of school children in Washington State. This vaccine has not been adequately safety tested to allow this requirement. The EUA is proof that we have insufficient data to be requiring this vaccine of our children. Please require the manufacturers to complete placebo controlled studies before we mandate receipt of this vaccine for public education.

Thank you for your time, and your service to our community.

Christina

To Whom It May Concern at Washington State Board of Health:

I oppose WAC 246-100 rule making that would expand any authority to involuntarily detain or quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Subject: No To COVID-19 Vaccine Mandate For Children

External Email

I am writing to inform the Board of Health that I oppose any expansion of WAC 246-100, I oppose adding COVID-19 to the WAC 246-105-030 list of vaccinations required for children, and I oppose the proposed modification to Local Boards of Health, as proposed in WAC 246-90.

Specifically on the Opposition to Expansion or Enforcement of WAC 246-100; I oppose any Board's strengthening or expansion of WAC 246-100, specifically WAC 246-100-040, Procedures for Isolation or Quarantine as such restraints violate the US and State of Washington Constitutions and violate personal liberties. The fact that you are even contemplating changes that are not constitutional in our state, in our country, is incomprehensible; that should be obvious, right?

Even more strongly I oppose adding COVID-19 to WAC 246-105. Vaccinating against an endemic flu-like virus is an individual and parental decision - it is a personal liberty to say 'yes' or 'no'. Especially given that the current EUA'ed vaccines' effectiveness remains questionable, at best, with clear evidence of risk with vaccinating children. For instance, VAERS data indicates nearly 28,000 adverse events for children aged 0-17, (<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

including 55 deaths in that age group  
(<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

In context the United States has experienced 823 deaths within the 0-18 year old category in US since the onset of the pandemic  
(<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2F...%2FProvisional-COVID-19...%2Fnr4s-juj3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C85ecd687f69e4262490708d9d22806cd%7C11d>

There is no clear indication that the EUA'ed COVID-19 vaccines will do more good than harm for the children of Washington. Further, this proposed Rule raises the question that if minors are harmed from the COVID-19 vaccine, who will take responsibility? Are you willing to be personally liable for any injured minors? Are you willing to bet the hard-earned money of the constituents of Washington to fund liability/compensation funds? I oppose adding COVID-19 to WAC 246-105-030 (or any other section of WAC 296-105) or requiring COVID-19 vaccine for children.

Thank-You, Angela

Subject: Covid 19 requirements for Schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools, or any person anywhere in Washington State. In your upcoming meeting, please consider the following:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3D-azbgD4ehPRE6EUqRZQm2OfvhHRhDRCg92VJGclUXiyJ7bqLksmCGt0aaoPL\\_CjbSHne5Eg%26\\_\\_tn\\_\\_%3D-UK-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2Ffacebook.com%2F.php%3Fu%3D-azbgD4ehPRE6EUqRZQm2OfvhHRhDRCg92VJGclUXiyJ7bqLksmCGt0aaoPL_CjbSHne5Eg%26__tn__%3D-UK-)

R%26c%5B0%5D%3DAT3XO4ScwtVTHM1qtm3m9NFtcjsaLeKE\_LtOSSNX\_NGRko06breuW3ANYvk19ITxj-oxWNHIA68akihNTGsVJ6dnImPrEyyf8JoxbeJwgayQ4cWmMOQvVvdHIKs-GXvgEkBWEFjfPOGvum0bsXUk6Sepd0Kpp9nB00v9NnrIViDDaAzOlhkIeoC7E194eEJ6d95KPSJYID7iYeCB6A& ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research

5. Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity in the future. Please read this for 5 studies that show children already have robust natural immunity to this virus. Hands-off, CDC and Pfizer: Children are to be considered already COVID 'vaccinated' - Opinion - America's Frontline Doctors (americasfrontlinedoctors.org <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3D-UK-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2Ffacebook.com%2F.php%3Fu%3D-UK-)

6. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to

learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <[7. You may "enjoy" reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate \(NNTV\) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? \(substack.com <\[8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl \\(rumble.com <\\[9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website. realnotrare.com <\\\[10. WAC 246-100-040 NEEDS TO BE ABOLISHED. it is unconstitutional, unnecessary and extreme. 11. Hello,

I'd like to submit this letter to specifically address WAC 246-100 & 246-100 involving potential Covid-19 vaccine inclusions/revisions. I'm not sure if this meeting is appropriate to address this. I see Item #11 deals with this issue. If my thoughts may be included for discussion for current or future changes in the codes related to Covid-19 vaccines, please let me know.

Subject: Opposition proposed policies other than HB1680  
To: <wsboh@sboh.wa.gov <mailto:wsboh@sboh.wa.gov> >

What is being proposed and already forced is as you know, unconstitutional, immoral, unethical, barbaric, power grabbing, irresponsible, and greedy as I'm sure the schools will get money for forcing poison into kids and already are making them sick slowly with suffocation of masks (YOUR decisions are doing this- bit can also save kids and families) which are scientifically unhealthy to wear and do no good only harm physically, psychologically, emotionally as certain teachers punish perfectly healthy kids that they are supposed to teach educate and protect because they exercise a sane, mindful healthy dare I say normal approach to live life and breathe oxygen at appropriate levels. According to OSHA a mask is a confined space, not meant to be habitated. Period. You need permits to enter confined spaces and constant monitoring of gases flammability etc. Gases such a CO2- what we exhale and O2 oxygen which we breathe. Oxygen levels below 19.5% are O2 deficient as is the area under a mask. Add stuffy nose and some anxiety, how does one breathe and function? Not well, not at their best. Increased fatigue, headaches, etc. Surely as parents and grandparents you want better fate and care and protection of your kids your and their rights and freedoms. Govt has overreached. They are out to take everyone down. All of you, your families, friends, people and anything you like enjoy or care about. Freedom gone. That is the issue. You all have not only a choice but an obligation in your capacities as professionals and sons, daughters, parents, grandparents to protect the future and stop what's happening now.

Have you seen Australia? Take a look. They want to remove all freedom all over the world. You mean nothing to the govt and you owe them nothing. The kids the parents yourselves. You have a duty to do what's right, not pressured, persuaded or threatened, or paid off. I implore you to do the right thing.

The only thing for tyranny to win is for good men/women to do nothing...or compitichulate/sell out. Don't continue to sell out one more moment. Literally the now immediate and near future and distant future of kids rests on your decisions. Do you love your paycheck or a sum of money from feds to sell these innocent kids down the river? I'm sure you teach them.to.do.whats right, even if it's unpopular. I'm pleading that you live by example and do the same.

This, whole thing, all.of it matters. More than anything has in your life til now. Will you protect these kids, give them a fighting chance and our city and push back for our nation or will you continue to cave? God knows and sees all, even if we don't. There's none to fear but Him.

We as Americans, people need to unite against tyranny. Proposed policies to kidnap kids,

families, innocent people bc they choose to not put Cancer causing and other poison in their bodies? Because they support freedom and real science that shows and proves masks and the EXPERIMENTAL jabs are harmful. More harmful. Detrimental than good? That they cause cancer [infertility miscarriages stillbirths (96%)] myocarditis- IN KIDS, Multiple sclerosis, paralysis, POTS, immnosupression through various diseases known like hiv/aids (yes in and from.jabs) and unknown. And on and on and on. THIS is what you want to FORCE into kids? Your families? Its murder plain and simple. It's genocide of all.peoples who are not elitists. They think we are all ants, not even people.

Go to America's frontline Doctors online and Dr Ryan Cole in Idaho and 15,000+ Drs who are starting to speak up and stand up for truths. Review the studies from Drs all over the world who have been fired, gag ordered, silenced threatened killed for speaking truth about dangers of this experimental experiment. Educate yourselves, make informed decisions. If you fail to do this, how hypocritical are you?

Thank you for your time. Do the right thing. The kids need you to, your families need you to, our city, state and nation needs you too.

Subject: Proposed COVID-19 policies

External Email

Good morning,

I am writing this e-mail regarding the proposed COVID-19 policies that would be a complete overreach of the government and are at best a threat to our freedoms as American citizens. This is besides the fact that the vaccine is more of a risk to children than actually getting COVID. It's absolutely senseless. It's not right - you know it and we know it. I, and my other 4 family members, stand in complete opposition of the following proposed WAC's:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

Sincerely,

Jana Bajema

Hello,

I am a mother of two children and I am legally within my God given rights to oppose the recommendation to require school age children to be vaccinated to attend school and I'm about to share with you why...

This is not right under any circumstances and to try and tamper with a child's rights under our Constitution to have access to education is absurd, wrong, and act of violating their rights.

The so called "vaccine" aka (experimental drug) has not been out long enough to prove enough of any good or effective results and injecting of a foreign object into children is not right and a violation to their rights and our rights as the parents regarding the well being of their health rights, not made by man, but by God when he created us. We have freedom of religion, freedom of speech and freedom to choose what goes into our bodies.

When the Polio vaccine was first thought of in the 1940's, funded by the March of Dimes Foundation, there seemed to be a good outcome of the vaccines that were created by Dr. Jonas Salk. It took them over a year, up to 10+ years to work out the ups and downs in the science before using it in people as a vaccine. The "Covid-19 shot" has only been out for a year and not been through it's own ups and downs to be pushed so hard to be injected into innocent children.

Dr. Salk used a chemical that was injected into people to try to kill the 125 strains of Polio. Yeah there was some hype about how good it was working but, in 1954 there were 200 cases of people becoming infected by a bad batch of the vaccines. I'm not surprised because, vaccines don't prevent contraction of disease or viruses, they minimize the possibility of bad symptoms once one has already contracted it, and it ultimately is based on each person's body, immune system and overall well being.

My overall point in saying all this, is that the "shot" that they are considering to be a vaccine and wanting so badly to be injected into children, is still under emergency use by the FDA and is not showing any proof of any good outcome for children, as it has not been studied long enough and has not been out long enough for it to be considered trustworthy. I don't trust their so called "statistics", and my children are not a statistic study, they are human beings and have the right to be educated, and have freedom. The freedom that we have today, that is being tampered and stomped on, was bought and paid for by the lives and blood shed of many who gave their lives for it; much like the same way Jesus Christ paid for our sins and died for us to have freedom from the bondage and slavery to sin.

This whole pandemic and the pushing and shoving of control, and all that is becoming of

it, is a form of segregation and in some ways, like the Holocaust, but in a different way involving vaccine status, herd immunity/herd mentality and so on. It's sick and our future generations don't deserve this kind of crap. Our kids deserve better and when the United States of America separated from King George, we became free from control, and all the tyranny and oppression that he caused. There is too much happening that mimics what he was doing and what our soldiers fought to free us from.   Please consider and try to understand what I am saying. This isn't personal towards any one person, this is a nationwide issue and our kids don't need to be subjected or be involved the political garbage that's happening around them. That's why they have parents to guide and protect them. If you have kids, I hope this reaches your heart in a good way.

Thank you and God Bless America,  
Jennifer Childs

Subject: Mandating Vaccines & Quarantine

External Email

Ms. Donahoe,

Please consider the federal law (and hear the people, the citizens of this nation) as you consider the rule that gives DOH power to involuntarily quarantine or inject citizens of the US, children on up. This rule is in direct violation of federal law under Title 21 CFR (Code of Federal Regulations), Section 50.23 & 50.24. It is illegal to coerce someone into compliance when giving an experimental medical treatment. It is a felony to do so, actually- UNLAWFUL- and constitutes an act of domestic terrorism (which, if passed, would legally make you a domestic terrorists).

That unlawful-by-definition rule will also violate the WA State Constitution, Article 1 Section 7, which speaks to the right to privacy.

This leaves only one option for your decision on this rule, and that is for you to reject it and to abolish all and any consideration of such a rule, or face criminal charges of Domestic Terrorism and/or Conspiracy to Commit Domestic Terrorism.

Thank you,

Kristen Cormick

Monroe, WA

Subject: Opposition to mandated vaccination of school-aged children

External Email

Dear Washington State Board of Health member,

With respect, I am vehemently opposed to the proposed mandates for vaccination of school-aged children. "Following the science" has become a mantra, but it is important to actually see the science, the data and the statistics, which all show that children and young people in general have a statistically zero chance of dying from Covid-19. Yes, a handful across the world have died with Covid-19, but this simply does not equate to a threat that deserves this type of response.

There must not be a "one-size-fits-all" remedy in health care. People are different, and their bodies react in different ways. It is unconscionable to force this experimental mRNA gene therapy, that has not been fully tested, on anyone ... as a condition for attending school, or participating in other activities in our free American society.

Please may I refer you to the VAERS (vaccine adverse effect reporting system) data at [openvaers.com](http://openvaers.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C>>  
here - the latest report shows over a million adverse reactions to the vaccines, and counting. This number is generally considered (by the CDC) as an under-reported statistic. It shows that over 21,000 deaths have occurred within 2 to 3 days after receiving a "vaccine", and well over 100,000 hospitalizations!

Please, respectfully, I implore you - vote NO on mandated vaccinations.

Thank you for your time and consideration,

James Gunn  
Milton, WA

Subject: Proposed Covid-19 Mandates

External Email

I am writing in regards to the extreme attempts of the Washington state government and health department to completely control the public due under the guise of Covid-19 as it has reached alarming levels. It smacks of the beginnings of what has been seen in other countries (ie, Germany and Hitler). Our liberties and freedoms are being removed piece by piece and it has been allowed and encouraged due to the fear mongering of the media and exploitation of the uneducated masses.

Doing the same thing over and over and expecting different results (ie the definition of insanity) is what is happening here. Masking isn't working, vaccines are not working or slowing the spread, the virus is becoming more contagious/stronger and the vaccines aren't preventing it, the side effects are frightening and damaging not only our adult population but our youth in ways that we have not yet been able to be measure.

What has happened to medical freedom? What has happened to the right to choose for your own body and your own children? This is not the United States of America that I grew up in and I am afraid of the progression towards control by the state of all of our freedoms and liberties, including our own bodies. The idea of quarantining people in a state run facility is terrifying, as well as forcing questionable vaccinations in children for the first time in my lifetime.

As a medical professional I find it suspicious that the FDA is requestingAs a medical professional I find it suspicious that the FDA is requesting 55 years to turn over clinical data... Never in history has this ever happened nor been allowed. This tells me that there is definitely information they do not want the public to have, and in 55 years it will be too late. There is not even a recourse for people who followed the mandates and have damaged their bodies permanently since the FDA/government is not holding the vaccine companies responsible for lifelong damages (pericarditis, myocarditis, neurological disorders, autoimmune and others). This is setting a precedence that the government knows better than the individual person what is right for their bodies and their children and their lives.

To summarize, my family and I are completely against any of the proposed Covid policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 2.

Sincerely,

What is being proposed is unbelievable.

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Local health officers' use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility (if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination) is a horrific precedent. This is not the type of history WA needs to be a part of, and it's completely unfathomable that it's on the table. We the people see this playbook move right out of WWII.

In addition, I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105. These injections are still experiments, and this should be unlawful.

I will be doing everything in my power to make known this agenda, and create obstacles to this should any aspect be agreed upon.

Hello,

It has come to my attention that WA Board of Health will be discussing COVID-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent and a citizen of the State of WA, I request that you abandon the plan of forming a technical advisory group to explore COVID-19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to the list of school requirements.

One definition of insanity is to repeat the same action over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now, it is quite apparent that the virus has mutated; as a result, SARS CoV2 has become more virulent (which is the nature of all viruses) but LESS FATAL. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, COVID-19 has managed to find a way to escape the vaccine per the evidence by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

I also hope that you, being members of the WA State Health Board, are well aware of what the #1 cause of death was (aside from abortions which came in at an astonishing 43 million, globally) in 2021. Last year, the disease that killed 8.2 million people globally was cancer. Cancer killed more people last year than COVID-19 has since the beginning of the pandemic. Death is tragic, yes, but I will not stand by as mandates and overreaches of personal medical freedoms are occurring, of which should only be between doctors and their patients should be handled; politicians and elected officials like yourselves have not earned nor have any say in the privacy of what medical choices my family or any Washingtonian family makes. Can you imagine what the United States could do if local officials like yourself across the nation put this much effort into cancer research and treatment as they did in pushing for COVID-19 vaccine creation? We'd probably find a cure within the next year.

I do not doubt that you all desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies. Giving "powers of police officers, sheriffs, constables, and all other officers" is an overreach of what the State Health Departments' responsibilities, an overreach of the people's freedoms, as well an effort to over-centralize general powers within the state, which is against what our Constitution stands for throughout the land.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a "vaccine" that the COVID-19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease. "Vaccine" means a preparation of killed or attenuated living

microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective <https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children!

Now I ask, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty since it has now been almost 2 YEARS. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,  
Hailey Eames

Subject: Vaccine requirements

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization.

The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense

(childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID.

Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you!

Please note that WE ARE OPPOSED TO THESE!!  
Thank you, Jeff and Emily Woods

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: Vaccine Mandate for school age children vote on January 12, 2021

External Email

Good Afternoon,

I am sending you what I and my associates have researched and need you to take into consideration when you are making a decision based on politics and not fully looking at the big picture as it relates to the health of our children not just now but for thier future. I EMPHATICALLY VOTE NO TO A VOTE THAT WOULD PROPOSE VACCINATION TO OUR SCHOOL AGED CHILDREN

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. • Under 51% of Spokane County residents are vaccinated. (srdc.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>> )• Less than 40% of kids 12-17 are vaccinated. (srdc.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>> )• Only 36% of the entire black community in Spokane County is vaccinated, and it is

reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>> )

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable

burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.--

Good afternoon,

I am writing as a resident and voting member in Washington State. I am voicing my strong opinion that current and proposed COVID regulations and mandates are unwarranted and a violation of our individual liberties.

**I ESPECIALLY AM ADAMANTLY OPPOSED TO ANY VACCINE MANDATE FOR ADULT OR CHILD IN ANY WAY SHAPE OR FORM!**

An individual should have autonomy over their body and their medical choices, for themselves and their children.

**DO NOT MOVE FORWARD WITH ANY ACTION THAT SUGGESTS, RECOMMENDS, SUPPORTS, OR PROPOSES ANYTHING ALONG THESE LINES. The state government is far over reaching their power and the state residents DO NOT WANT THIS as a whole. Anyone that CHOOSES to vaccinate can do just that, CHOOSE.**

Regards,

Tara Brown

Subject: Fwd: Changes to Washington Code to incorporate covid-19

External Email

Kaitlyn,

I do not agree with the revisions to incorporate Covid-19 into WAC 246-100. First off, all efforts that are utilized for this pandemic have violated the people's constitutional rights. Secondly they violate people's God given rights.

In no way should any part of what illegal actions the Governor or Washington State Board of Health be written into law.

To date, the mandates for lockdowns, masks, and the "vaccines" all violate Nuremberg code 6.3. The "vaccines" are experimental and therefore cannot be mandated. Any person or agency trying to enforce citizens to take these experimental shots are violating constitutional and God given rights.

Any further action to continue violating my freedoms by revising state laws to incorporate these violations will not be tolerated.

I do not agree and strongly suggest this effort to change the laws to add Covid-19 stopped immediately.

Thank you for your time,  
Allyssa Edlund

External Email

I am a K-12 School Psychologist in WA public schools and I strongly oppose:

1. Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
2. Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Isolation and vaccines have not been proven to be safe or effective. I have seen the impact on our children first hand in the schools. A healthy society does not take life from their children to briefly extend the life of elderly. It is time to learn to live with the virus, and focus on early treatment.

Sincerely,  
Julie Apeles

To: Donahoe, Kaitlyn N (SBOH)  
Cc:  
Subject: advisory board input

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to voice my concerns about the Board of Health proposing a policy change to WAC 246.

WAC 246-100 states: Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

This is a frightening idea that feels like it comes straight out of Nazi Germany. It would be the most discriminatory action taken by our nation to date. The very idea that the state could detain people for refusal to comply with vaccine mandates flies in the face of common sense. The Covid "vaccine" does not prevent transmission or protect one from getting Covid. It is also not considering the large percentage of the population that have already acquired natural immunity through having had Covid. Would you think it was ok to use law enforcement to involuntarily detain vaccinated individuals as well? Are we turning into a police state?

We must not usurp the rights of individuals' freedom to take care of themselves in a manner that reflects their religious and moral beliefs.

Please stand for our freedoms. Please consider that action to support the use of law enforcement in this way will most certainly create a divided population that will not stand together. I fear the negative ramifications will be far greater than any intended good it will have.

With respect,

Barbara Miller

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

External Email

Hello,

I am VERY STRONGLY OPPOSED to making the COVID-19 vaccine a required immunization for kids to attend school or daycare. I am very much opposed to it being required for anybody at all. It is still a very new "vaccine" and hasn't had time to be fully tested to see what any long-term effects it might have. Also it can affect different people differently and not always for good. Plus, unlike the older vaccines, the Covid one doesn't actually keep people from getting Covid or spreading it to others. Please, please do not allow this to become a requirement! I know for me, and many others I know, if it does become required we will be pulling our kids out of school altogether, rather than go against what we believe is best for our kids and inject them with the Covid vaccine.

Most sincerely,  
Israel Dehnert

From: Lilie R. Smal  
Sent: 1/7/2022 11:44:51 AM  
To: Donahoe, Kaitlyn N (SBOH)  
Cc:  
Subject: Proposed policies and reasons for my objection

External Email

Greetings Ms. Donahoe!

I hope this email finds you healthy and well.

I know several important conversations will be happening soon. I would like to weigh in on the matter and explain why.

I strongly object to the proposed policies:  
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Covid-19 was new and scary virus, but we've come a long way since it first appeared. Immunocompromised and those individuals strongly concerned have the option to get a vaccine. Majority have mild infections. Passing laws at this point is government overreach at best, especially since vaccines DO NOT prevent transmission, or provide much protection for the new variant.

But what is happening, is that people feel threatened by the government. I already do, when I see these proposed policies. And when Government institutions will try to pass good policies in the future, if need arises, there will be pushback because you're setting a precedent of government overreach. PICK YOUR BATTLES. The current proposed measures are unnecessary and the current situation does not warrant such strict policies. It is a serious virus, but please remember the death rate is still less than 1 percent (even that is generous). Most people are either vaccinated or have natural immunity. You want to strip away freedoms of people for the sake of what? People want to be free, and safe. But how can we feel safe knowing we can be voluntarily detained because we didn't consent to a medical procedure related to a virus with such a high survival rate?

Concerning vaccine requirements of children: Requiring children to get a vaccine that has a higher risk of an adverse reaction than the threat of the initial infection is wrong. If you must do something, then please put it in the "recommended" vaccine list, BUT NOT REQUIRED.

COVID-19 is NOT an infection that can be eradicated with vaccines like POLIO or MEASLES, then why treat them the same? Put it in the category of the flu, which is closer to reality. I'm begging you, LEAVE THE CHILDREN ALONE! They are not a threat to our society. COVID is not a large threat to the well-being of children. If someone WANTS their child vaccinated, they know how to do it, and they will do it.

Thank you for your time,  
Liliya Smal

P.S. I was going to provide articles to support my claims (although you have access to them), but I was afraid my e-mail will get flagged for containing links.

Subject: BOH Agenda

External Email

Hello,

I am writing today to tell you that I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period! As a country founded on the premise of freedom and the ability to choose with informed consent, this strikes at the very core of who we are. We are a diverse and unique people, and a one-size-fits-all narrative simply does not apply. Mandates of any kind effectively strip us all of these rights and freedoms we are inherently entitled to, and instead continue to divide us. United we stand, divided we fall.

In addition, I SUPPORT Informed Choice Washington's Petition for Rulemaking, which will be item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. This is crucial in fostering our trust with the board in regards to our most precious assets of all, our children. They are the true victims in all of this and are relying desperately on our protection and advocacy. We need to know more and cannot go about this blindly. It is in everyone's best interest to rely on the gift of time and better information before making a sweeping decision that could, and most certainly will, have detrimental and fatal results. We all deserve better, but most especially, our children and their futures.

It is our sole duty to protect our children and see to it that their chance of a better future is possible. This means working to ensure they are continually fought for, so that each generation is a little better than the last. They are the future of this country and the face of our nation. I plead with you to advocate for them and hold fast to protecting them by rejecting these mandates. If nothing else, this continued controversy has awakened lions. Our children will not be your victims or your science experiments.

Respectfully,

Elisabeth Stewart

Subject: No to Mandate for Covid19 Vaccination for All School Age children

External Email

Children are at extremely low risk for Covid 19. There are no long-term studies to document any history of safety. Studies do now document that vaccinated and unvaccinated can both transmit Covid. Therefore the vaccine apparently does not stop the spread of the disease.

Mandatory Covid 19 Vaccines will segregate many children from an equal education. This mandate does not support equity diversity and inclusion.

Thank you,

Alicia Villa

Subject: vaccines for children

External Email

Ms Donahoe:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

This vaccine is authorized for Emergency Use only. The approved Comirnaty is not available here, please be honest and thorough in your understanding of that as you evaluate.

More risk/reward testing, evaluation, and approval are needed on children.

WAIT. Please wait for ALL levels of testing to be completed before requiring this vaccine for our children and grandchildren.

I am NOT an anti-vax person. I am a supporter of vaccines that have been THOROUGHLY tested long-term and are approved safe, along with informed consent of all possible side effects. I have had many vaccines personally, as have my children and grandchildren. The LONG-TERM SAFETY of this particular vaccine is what is in question. There simply has not been enough passage of time yet to know. Please wait.

Respectfully,  
Ranita Goodin  
Federal Way, Wa

Subject: 95F9F12B-F33E-4682-BFC8-77708C404161

External Email

To Washington State Board of Health Members,

Mike and Sharon Fries strongly oppose these proposed policies:  
WAC 246-100-070, We do not agree for the use of law enforcement to force or involuntarily detain anyone to a quarantine facility.  
WAC 246-100-045, WAC 246-100-040, or WAC 246-105  
We believe vaccinated or unvaccinated, we as citizens of the United States have the constitutional right to make the decision of what we inject into our, or our children's bodies. If we have the right to abort our children, we certainly have the right to refuse a mandated vaccine for school requirements. For a child the health effects are like a flu virus and natural immunities are built, like the chicken pox years ago. We believe the covid vaccine is a personal choice not the Government's choice, we believe in Medical freedom!

Thank you,

Michael and Sharon Fries

Dear Kaitlyn,

I know your time is valuable and you are probably receiving numerous comments. I will keep this very short.

Any notion at this time of added Covid shots as mandatory for attending school is unprecedented and potentially extremely dangerous until we have some long term data on any adverse effects of these experimental drugs for our children. Moreover, evidence is mounting – with significant breakthrough cases, the need for boosters and new variants - that the drugs are not really working like originally claimed.

Thank you for considering these thoughts.

Subject: Forced Vaccination & Quarantine in WA?? PLEASE Do No Harm!

External Email

Dear Kaitlyn:

I understand that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent who has raised and nurtured my children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to a list of school requirements.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is going to continue regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) What is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) What is the rate of all COVID 19 caused mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) Provide me evidence of asymptomatic spread of SARS CoV2.
- 5) Provide me safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) Make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) Provide evidence that the vaccines prevent infection and transmission and that they

improve the health of individuals who receive them compared to those who do not.

8) Explain why there is so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time?

I believe that as members of the WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that will HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefa>

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you.

Subject: Washington State Board of Health Recommendation

External Email

We have been made aware that Washington State Board of Health will be discussing mandating the Covid-19 shots and recommending detaining 'by force' citizens who do not comply with a variety of actions deemed necessary regarding Covid-19 and/or other medical situations. We are the parents of 2 minor children and 2 adult children, born & raised in the State of Washington. WE STRONGLY ENCOURAGE YOU NOT MOVE FORWARD WITH THESE RECOMMENDATIONS.

We have personally been touched by this virus as we know so many others have been. We understand the seriousness of the virus. We also believe strongly in the fact that we must remain free to make medical decisions for ourselves and for our children, considering the unique circumstances of each individual in our family.

As Board members of Health in the State of Washington you are OBLIGATED to provide us with facts/evidence that support all guidelines and recommendations:

- 1) There needs to be transparency about current rates of mortality for Covid-19 with comorbidities and age groups represented;
- 2) There needs to be transparency about current rates of positive test results of those vaccinated and those vaccinated with a booster;
- 3) There needs to be transparency about the accuracy of testing available;
- 4) There needs to be transparency about how current mandates have consistently prevented the spread of Covid-19; and
- 5) Explain why there has been little focus on making the public aware of how Covid-19 is treatable and how hospitals are successfully treating patients.

It is our hope that as Washington State Health Board members, you still hold deeply the virtues and desires that led you into medicine and that you have not allowed yourself to become a political player. It is our hope that you truly do serve in your capacity with honesty and a desire to truly protect the citizens of Washington State, ALL Washington State citizens. We also hope you know that by recommending these actions, you will give countless citizens of Washington State no other choice, but to move out of the state. We personally have known 32 families who have moved out of state in the last 1.5 years and will see another 9 more move this year. We understand this is small, but exponential, given we are only one family. Passage of these recommendations into law will be where the line is drawn for our family when it comes to moving and many other families we know.

Do not continue this barrage of assaults on individual rights of your citizens, causing a mass exodus of this beautiful state that has been home to so many for so long! Be the person that stands up and truly protects your citizens, by giving them the inalienable rights and dignity they deserve as a citizen of this state and this country.

Concerned Citizens,  
Doug & Lauren Wozeniak

External Email

+  
Members of the WA State Board of Health,

During your January 12, 2022 meeting I urge you to oppose Agenda Item #8 which would allow for the formation of a Technical Advisory Group; a group which would then make decisions regarding vaccination enforcement for children, mandatory quarantines, etc. Please inform yourselves as to the nature of the corona virus, the impact of the mass vaccination policies, as well as the effect of the virus on the very young and the impact of another required vaccination on our children.

I ask you to support Agenda Item #11 which wisely prohibits additional use of EUA products until Phase III trial studies have been completed.

The State of WA has not the right nor the duty to impose upon its citizens mandatory medical procedures. It is particularly abhorrent that WA State is considering mandating children receive experimental injections, and for a virus whose impact on children is minimal.

Sincerely,

Laurel L Berger, BSN, RN

To The Board Members of the WA State Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual Prevention. No one can tell me what the effects may be on my child in 5 years or 10 Years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in US this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for themselves.

Thank you for your time.

Members of the Washington State Board of Health,

I oppose the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100—070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040. These specifics come from WA 246-100. Which includes the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am concerned for these policies as they go against our God given rights and freedom.

Respectfully,

Mandy Meier

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The CDC's own statistics show that children are NOT at great risk of becoming seriously ill from C-19. It has also been shown that those who have received the shot can contract C-19 as well as spread it to others. Long-term studies have not been done to determine potential side effects of the C-19 shot. Requiring that children receive the C-19 shot is unnecessary and unconscionable.

Kaitlyn,

I am extremely opposed to our WA state making Covid vaccination mandatory for child care and school admission. As a parent who researches all vaccines, even before Covid, I have always taken more than an interest in what is going into my child.

The vaccine is simply too new and experimental for me to feel comfortable putting it into my three healthy children. As parents our responsibility to our children is to make the best possible health decisions for them. I believe that a year old "emergency use" vaccine, that doesn't have 99-100% effectiveness, where we also do not yet understand the future health ramifications, is not the best for my children.

If vaccines are made mandatory in WA state, a state I have always loved and lived in, there is no doubt we will either homeschool our children, or move to a state that does not require such action.

Thank you for your time.

Leave our kids alone!

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

Hello!

I am writing concerning the upcoming State Board of Health meeting to discuss whether or not to mandate the Covid vaccine for school attendance in the 2022-2033 school year. I am deeply troubled about this and I want you to know that I vehemently oppose the vaccine for my child. I believe every person should have the right to choose for themselves and their children. I appreciate your time and I thank you for reading my email. I will be praying for each and every one of you in attendance at this upcoming meeting.

Sincerely,

Stacy Mares

External Email

Honorable Members of the Washington State Board of Health,

I would like to express my absolute opposition to implementation of a COVID-19 Vaccine requirement for schools and Forced Quarantine Detention for law-abiding citizens in the state of Washington.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable.'

· Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit. In addition, children who have already had the virus and recovered are now protected by natural immunity, which is by far the strongest protection against the virus.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it." According to Dr. Eric Ruben, Editor in Chief NEJM, the studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Look inside your soul and do the right thing.....DO NOT require these vaccinations for school age children.

In regard to allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040):

- This not only violates the Washington State Constitution, but the right to Religious Freedom protected by the 1st Amendment and the right to Privacy in 4th Amendment of the United States Constitution.

- Therefore 37 or 39 County Sheriff's have signed a letter, pledging not to enforce any involuntary removal of private law-abiding citizens to a quarantine facility.

Science does not support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals, nor do our laws permit us to segregate and discriminate against people for refusing a medical intervention.

- Equal Protection Clause of the 14th Amendment to the U.S. Constitution and the Civil Rights Act of 1964.

Masks, in the words of an FDA physician, are little more than "facial decorations" and have no impact on the spread; yet they are mandated for adults and children. This is not American in any way and the truth will come out.

Those who are hiding their heads in the sand from the facts and science of this so-called pandemic (In the Washington State Flu Season of 2017-18 the death rate was 11%, while the Covid death rate in the State of WA thus far is 1.1% according to government sources) will be held accountable for being on the wrong side of history.

No mandate can be followed that violates human rights of conscience and autonomy.

- There is zero evidence indicating that unvaccinated individuals or free breathing

individuals are a threat to the vaccinated and masked.

· And like children, when the 99% of adults who contract the virus, survive it and recover, they too have natural immunity which prevents us from contracting or transmitting the virus again.

There has been time enough to find out the truth about what is going on with Covid, and there is no excuse for these draconian measures to be inflicted on citizens anymore. Each of you have been entrusted with making important decisions about the Public Health of our state and each of your credentials qualify you to serve on this board. However, as Government employees, you are public servants who answer to the Sovereign Citizens of this state & this country, the taxpayers who fund your department & your salaries. You work for us.

I pray for each of you to do the right thing by rejecting these Unconstitutional Mandates and respect the Individual Liberties of every Washington State resident that are guaranteed by the Bill of Rights in the United States Constitution and the Washington State Constitution.

Sincerely,

Brady LaMotte

Subject: NO TO FORCED VACCINES ON SCHOOL CHILDREN

External Email

Dear Board Member,

I am sure you have had a lot of comments going both ways on view and opinions of what is best for the situation at hand. Never in the history has a vaccine been pushed like this and for what reason to curb the fear of others? We CAN NOT allow this emotion to cloud what is right to each of us and our choice to what we put in our bodies. We have been given that right to have the option to choose what is best for our own bodies and for what is best for our children. The depression, the drugs, the bullying in our children's schools are way more critical to address than a coerced vaccine that is not wanted. We have already survived and while many have not, they had underlining conditions. A healthy person does not need to take medicines and as already proven there is no way to isolate sickness that will obviously remain present. I choose to trust in natural immunity which is still a real proven science and allow each parent to choose what route works best for them.

I AM OPPOSED TO FORCED VACCINES

I Pray to the Lord daily for His Protection, guidance, Love and Justice in this situation.

I thank you for taking the time to read this letter.

Melissa Gilbert

External Email

Dear Kaitlyn,

To Whom It May Concern:

As you prepare to sit down with members of the Washington Board of Health members on January 12th, please consider the many words you have received from other concerned citizens of Washington State as well as my words. Please do not force people to be detained or forced into quarantine facilities if they choose, for their own health and safety, to not be vaccinated against COVID-19. What happened to the people having the freedom to make their own choices for their own bodies? By forcing something like this, you would be taking away the basic freedoms that our country is founded on and throw them down the drain. By doing this, you would force people like my parents who are in their upper 70's, who have already had COVID and fully recovered and now have antibodies and natural immunity, to forcibly be detained because they choose not to be vaccinated. **THEY DON'T NEED TO BE VACCINATED.** And neither does anyone who already has natural immunity. **SO DON'T FORCE THEM. OR ANYONE.**

And in the case of requiring kids to be vaccinated in order to go to school, well that's just utter and complete nonsense. Kids aren't dying right and left from COVID. Omicron is a cold. Kids get colds **ALL THE TIME.** With no studies in place **AT ALL** to show that vaccinating children is even helpful, why would you force parents to vaccinate their kids in order to go to school? It doesn't make any sense whatsoever. Let the kids be kids and not alter their DNA when there is **ABSOLUTELY NOTHING** to show that it will do them any good.

Again, I ask you as an American and a native Washingtonian, please do not force the people of Washington State to go against their given freedoms but allow them to make the best decisions that they can make for themselves and their families.

Thank you.

Sincerely,

Jacinta Rupprecht

Listen up Kaitlyn!

You people WORK FOR US, we are not your subjects! We will never allow you to require an experimental product to be FORCED on our children to attend the public schools THAT WE PAY FOR! THE PEOPLE OF THIS STATE OPPOSE AGENDA ITEM #8 AND WE ALWAYS WILL. You bastards will rot in hell if you try forcing this on our kids. The mothers WILL NOT STAND FOR IT!!!!

As for quarantine camps - SCREW YOU. Will will never comply and neither will the police force that you're trying to weaponize against American citizens. Do you really think you can pull off "Australia" on American soil? THINK AGAIN. The citizens of this country and state will NOT stand for it!!!

The Washington state has gone off the rails. We the people will not allow it any longer! You do not run our lives, you are there to SERVE US. Covid is essentially over, and we're all going to go back to normal, like it or not. You will NOT stand in our way.

We also support agenda item #11, establishing a rule the keep you bastards from requiring an EUA product for school attendance.

Lora B., mother of 3

Hello Ms. Donahoe,

I Danielle Loft oppose the use of law enforcement to be used to detain those who are unvaccinated. There are so many reasons one would choose not to get this medical procedure for their own personal reason, for instance previous injury from other vaccines (many of my friends and family have experienced, look into VAERS to see how much money has been paid out to victims) religious reasons, natural immunity, wanting more studies to be done before making that decision, all of which are legitimate reasons and shouldn't be questioned. It is our own right to refuse and to be punished and detained for those valid reasons is unacceptable on every level. This is America, we have a constitution, we have rights to choose what is best for ourselves, but seems for some that's been forgotten.

I do not support adding the C vaccine to the childrens school schedule. There have not been enough studies on it, we don't know the effects it will have on fertility and their bodies. All the science says children are not a threat and are likely to not be harmed by the virus as much as adults, so why mandate it? It doesn't make sense. Leave the children alone.

Please do what you know is right and oppose these WACs from being added as a law.

Subject: Consideration of covid vaccine for children to attend school

External Email

To Whom It May Concern,

I am absolutely against a decision to require the covid vaccine for in person learning. Not only would this be a detriment to our school, it would be to our entire community. If you were to recommend that children get the covid vaccine for school it would ultimately mean shutting down schools.

There are no long term studies saying the covid vaccine is safe for our children. Why aren't we discussing natural immunity? Why does that not matter anymore? Covid doesn't affect children the way it does adults and there is no reason to subject them to a shot that we just don't know enough about.

I urge you to really consider the small potential upside and the devastating downsides to this situation if you were to recommend the vaccine for children in order to attend school.

A Concerned Parent,  
Terry Larson

Subject: Vaccine Requirement for School Children

External Email

Dear Kaitlyn Donahoe,

Please don't make vaccinations mandatory for all school children. There are numerous sincerely held reasons parents don't want their children vaccinated that are VERY important to them. They will be forced to take their children out of school if the mandate is imposed. Children have suffered enough because of this pandemic. Please don't make it worse.

The National Vaccine Injury Compensation Program is in place for those who may be injured by a lot of vaccines and The Countermeasures Injury Compensation Program is in place to compensate people injured by the Covid-19 vaccine in particular (which is not a vaccine in the way all other vaccines that I have ever heard of are). Since Covid-19, especially the Omicron variant which is the main variant at this time, has such low incidence of injury to children; I believe the vaccine may well be more dangerous than the disease. Where there is a risk there should be a choice.

It makes me SHUDDER to think the federal government can force people to make medical decisions they don't believe are good for them. Being forced to wear a mask is bad enough but being forced to have your children injected with something that has a potential for harm is just too much. Where have our rights to make medical decisions gone? You can't see people's medical records because of HIPPA regulations but you can demand whether or not they have had an injection, and how many. It does not make sense, it seems to me it should be illegal.

Sincerely,

Rosina Robbins

Mother and grandmother

Subject: comments regarding covid vaccine requirement for public schools

External Email

Kaitlyn,

STOP! just stop what you are doing to our children.

I will pull my children from public school the minute that this or any further vaccines without full phase 3 testing is required. Do not subject them to "Test to Stay" either. Testing to prove they are healthy will have lasting psychological impacts. These children are not guilty of being unhealthy until proven innocent by a test...they are already innocent.

You have absolutely no standing to make these current vaccines a requirement.

This would be crossing a line you could never come back from. All public trust in you as an entity would be lost forever.

Using children to "save elderly" is an absolute disgrace. Subjecting young bodies to yet unknown side effects is beyond reprehensible.

Trading parental choice for education is absolutely a nonstarter.

I hope you have common sense enough to see what a slippery slope you are standing above with this decision.

Stand up for our parental choice to know what is best for our individual children and do not deprive our children of education for an untested vaccine with a small efficacy. Which side are you on? Pharma or children's education?

There are too many unanswered questions to trade my child's health for their education.

Sincerely,

Kbr Patrick

We, as constituents and community members of Washington state, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization and as such are experimental.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank you ,

Our United States of America is kept strong by evidence of its strong families.  
Please VOTE AGAINST proposed vaccine mandates, and any further denial of parental rights to decide all things for their minor children!

===

Current medical consensus on Covid-19 "vaccine" effectiveness is that they do not prevent the spread of SARS-CoV-2.

CDC's David Walensky, Dr. Anthony Fauci, and Moderna's Dr. Tai Zaks are all on record saying that essentially these injections are merely "treatments" that for some people may reduce symptoms.

It is my understanding that "treatments" -- and all others that do not meet the definition -- by definition are not vaccines -- and thus have no grounds for forced use.

Sincerely, very sincerely,

Good Morning,

I have major concerns!!!

I have lived in Washington over 60 years.

Worked in School districts for over 30 years.

I am writing you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following.

\* Any involuntary isolation/quarantine of the people as described in parts of WAC 246.100

\* Any mandate on COVID vaccines for children as a requirement to attend K-12 public or private school.

This reminds be of the Japan interment camps right here in the U.S.

Please have some common sense

Sincerely,

Karla Atwood

Subject: advisory meeting feedback

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest recommending a vaccine for Covid for school aged children who attend school in Washington State. I am against imposing this vaccine on our children. I believe this to be a horrible overreach of state government.

The Covid "vaccine" is experimental. There have been no studies on the long-term health side effects on children or even on adults. We have never required an untested drug to be used on our children. Making it required to attend public school is criminal and against our constitution.

If you decide to follow through with this abuse of state power, you will be held accountable for the consequences whether they are unintentional or not. You are taking the decision to monitor a child's health out of the hands of its parents. You must then face the repercussions that happen when this trial "vaccine" begins causing health problems way beyond the symptoms of Covid itself.

We do not need this requirement to protect our children or our communities. We need you to consider the constitutional rights we have been guaranteed by our founding fathers to stay free, to live and care for our families and our friends, and our communities based on our religious and moral beliefs.

With respect,

Ron Laycock

In regards to the public meeting being held on Wednesday, January 12th, I implore you to oppose the following proposals:

Please oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will. Also, please oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school.

Thank you for your time. I pray God's wisdom and protection over you and your family.

Sincerely,  
Beth Bower

Subject: Regarding Washington State Board of Health Meeting for January 12, 2022

External Email

Dear Kaitlyn Donahoe,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article where its stated that it is too soon to be requiring vaccinations for our children. Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 . The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,  
May Lindsay

Subject: Oppose vaccine mandates

External Email

Good morning,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. I take very seriously the health and care of my kids. I research and analyze the risks and benefits of any medication, vaccine or treatment. This is not something I take lightly.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe thie vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. I will not allow my children to be Guinea pigs. The benefits simply do not outweigh the risks.

4. The complete failure to acknowledge the roll natural immunity is another concern I have.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Christina Rulien

Dear Ms. Donahoe,

I am writing to express my grave concern about the forced quarantine and counseling for members of the public using their own free will not to participate in the experimental vaccines currently offered for Covid 19 and forced vaccinations for children. My concerns about rolling out such a draconian policy that violates the fabric of this country's founding principles are many.

One of my largest concerns is that in watching the vaccines be given out over the last year, it is clear that they are not working. Almost half of the infection rate of Covid patients are already vaccinated. States with higher vaccine rates do not experience lower Covid rates. People who are fully vaccinated are not stopping the transmission of Covid either. It is also not proven to be a safe vaccine. People suffer at a higher rate from complications from the vaccine than they do from Covid itself. Forcing people to get vaccinated is clearly about power and submission, not about preserving public health. Statistically, children have a higher chance of dying or having an adverse reaction to the experimental Covid vaccine than they do from contracting Covid itself. At this point in history, many of the children you propose to force vaccinate have already had Covid and have valuable antibodies. Allow parents to choose what is the best decision for the individual health of their children, not the state.

As a mother, I know my children more intimately and fully than any health care professional, and certainly more than the state. I have witnessed their growth and development since I first felt them in my womb. I choose to make decisions for my children's health with information and discussion from professionals, not by coercion and fear. Inform parents and respect their rights and their timing to make the decisions necessary for protecting their families. Protecting that sacred right of a parent is a paramount responsibility of an elected official and member of public education. I know this well as a former public elementary school teacher. Please protect children's health, respect the fiber of the Washington family and protect democracy by fighting against the proposal to force vaccinations on children and force quarantine on non complying families.

Subject: Comments for the Jan. 12 Public Meeting

External Email

Hello. Below is my input for the Jan. 12 WA State Board of Health Public Meeting.

I am a resident of Washington State and 100% opposed to implementation of a COVID 19 vaccine requirement for our schools for the following reasons:

- Children are statistically at minuscule risk of death or injury from COVID 19.
- The current COVID 19 vaccines have not been shown to be safe. It is a documented fact that current COVID 19 vaccines have racked up verified reports of death, injury, and other adverse reactions (as tabulated on the U.S. Government's VAERS system) that dwarfs all the effects of every vaccine dose (of all types) administered over the past few decades.
- The long-term implications of currently available COVID 19 vaccines are unknown, and we know from fiascos like Merck's Vioxx that it is very possible for poorly tested pharmaceuticals to cause the deaths of tens of thousands of people.
- The risk / benefit analysis decision should be left to parents, not the state.

Thank you for considering my comments.

Robert Horwitz

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Fwd: ♦♦ ♦♦ Emergency Action Alert! Unconstitutional Vaccine Agenda-- Act by JAN. 7, NOON

RED ALERT! On Jan. 12th starting at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents. Zoom meeting details below. Please attend and show them you are listening.

THESE ARE THE PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

YOU MUST LET YOUR VOICE BE HEARD! Click [HERE](#) to send an email to the WA State Board of Health. It must be received by Noon, Friday, January 7. If this link works with your email server, it will populate an email for you, with the board of health email address, the subject line and body of the email. All you would have to do is sign your name at the bottom of the email and include your address or city.\*\*

\*\*If for any reason the link does not work on your computer or phone, try another device. The link is written in HTML code and may not work on all mail servers or devices. If you still can't get the link to work properly, you can copy and paste the email address, the subject and the message below into one of your personal emails.

Subject: state health regarding the shot

External Email

Hello,

In so far as you touch upon the upcoming state health decisions, I am emailing to urge you to resist policies that restrict the rights of un-inoculated people or anyone due to COVID. I refer specifically to the board's scheduled discussion on the 12th, proposing to allow involuntary detention of people who refuse to get the shot (WAC 246-100) and proposing to require the shot for kids going to school. Let me refer you to our state constitution, Article I, Section I, which says that "all political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights." Consequently, an unelected board trying to dismantle the rights of people who do not consent to the shot is in violation of our Constitution, Article I, Section I. Additionally, you would be in violation of other sections, for example 2, 3, 4, 7, 10, and 11. These are in accordance with natural law and morality. The sooner all this overreach from state leaders ends, the better. The power is with the people, and we see what you are doing.

Best,  
Tova Forman

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Finally, as this is an experimental drug that you will be forcing on our children, I will close with the 10 points to the Nuremberg code. I strongly urge you to read over these as YOU will be the ones held responsible for these crimes if you push these mandates through.

The ten points of the code were given in the section of the judges' verdict entitled "Permissible Medical Experiments":[6]

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature,

duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

I am opposed to making COVID-19 vaccination mandatory for school admission or childcare in our State for the following reasons:

1. Kids are at extremely low risk to COVID 19
2. Many kids have had COVID 19 and have natural immunity, this needs to be discussed as a superior immunity
3. The Constitution and Nuremberg Code stops you from making this experiment mandatory.
4. Liberty supersedes fear
5. As a parent of 3 school age kids, I will not back down on this cause. There will be no mandates for my kids.
6. Where there is RISK there has to be choice.

Thank you,

Tricia Cyr

Subject: No Covid Vaccine Requirement for School Aged Children

External Email

Hello,

I was recently notified that your board is considering requiring the Covid Vaccine for school aged children.

As a concerned parent, I ask that you vote no on this requirement. The incoming reports of this vaccine on children have not been studied enough for not only long-term effects (i.e., 10-20 years) on children and their growing bodies, but also the side effects reported at this point for those who have taken the vaccine should be concerning for everyone. Incidents of myocarditis and sudden heart attack in children post vaccine is NOT normal. Also, to date, there have been more deaths from adverse events of the vaccine in children than there have been deaths due to the Covid virus in children.

This is concerning, at this point, and with the highest incidence of how infectious the recent Omicron Variant is, to require a vaccine that does not stop transmission of the virus. For example, my husband and I are fully vaccinated, continued to practice social distancing, and have been very limiting on who we have been seeing the past 2 years, and we still contracted the Omicron variant of Covid. Not only that, we inadvertently passed it on to others before we were aware we were infected. If the vaccine does not stop transmission, then why should this be a requirement to attend school?

Thank you for your time in reading this email. Once again, I implore you to vote no in consideration of making a Covid Vaccine Requirement for our children to attend school.

Regards,

Subject: Upcoming WA State BOH Meeting-January 12-2022

External Email

To Whom This May Concern:

It has been brought to my attention, as well as thousands of other concerned WA State citizens, that there will be a meeting with the BOH on January 12th, at 9am to discuss the following possible implementations:

- \* Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families)
- \* to be isolated in a quarantine facility (WAC 246-100-045)
- \* following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- \* Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I not only strongly oppose this proposal, but I will die on this hill fighting it. There is NO way my family, or myself, will not put up the fight of our lives to protect ourselves from this tyranny. You are asking for a civil war.

Bullet Point #1: You do not have the manpower to detain the amount of people that you are suggesting. The unrealistic idea that local law enforcement, which is already struggling to maintain active officers, is ridiculous. You are putting law enforcement at risk for endangering their own lives, as I know civilians will not comply. It will be ugly.

Bullet Point #2 and #3: Isolating persons/families in quarantine facilities. Are you joking? Washington State's population has outgrown this state and its services YEARS ago. Do you even know the percentage of people that are unvaccinated THAT ARE NOT GOING TO GET VACCINATED? If we haven't gotten vaccinated now, we won't EVER! There are so many personal reasons to not be vaccinated. I have a plethora of health issues that put me at high risk of dying or being permanently disabled from ANY vaccine, yet alone, an MRNA experimental one. I also have religious beliefs that I strongly hold, in which this completely goes against. You have NO RIGHT to force bias examinations, testing, treatment and counselling. So, in counselling, you mean brainwash? Propaganda? Do you hear what you are proposing?

Last Bullet Point #4: CHILDREN ARE NOT AT RISK OF DYING OR BEING INJURED by this

COVID virus! This virus has already mutated to hardly anything. We are at the herd immunity level in which all of this seems futile even more. If everyone has already gotten this virus, why are we having talks so late in the game? I feel there is something more nefarious going on since death rates are going down at an alarming rate.

My final thought. Be afraid. If this goes through, you will not only see the biggest mass exodus of this state's history, but you will be declaring WAR. You have been warned by the unvaccinated people of Washington State.

Sincerely,

Stacy Brebner

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

May God bless you abundantly today. Samantha

Subject: Health meeting today

External Email

I want to express how extremely opposed I am to the following proposed laws..

**PROPOSED POLICIES:**

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This is most definitely overreach of power by the government and takes away a human right to choose what's best for their body and their children. I'm not against vaccines but I am for the right to choose!  
Please vote NO on these!

Thank you

Subject: Proposed policy concerns

External Email

To whom it may concern,

Today I was informed by a fellow mother and friend that the Washington State Board of Health was meeting to discuss policies dealing with the current covid situation. These policies seem to basically amount to the government forcing people to give up their right to bodily autonomy.

Therefore, I have to express my deep concerns for the agenda and state that I DO NOT agree with the proposed policies. They infringe on the rights of a person and the rights of a parent to make the best decisions for THEIR children. Again, I'd like to state I am in full disagreement with the proposed policies. I can not support the agenda regarding COVID vaccinations requirements in school when there is no long term study on the effects of the vaccine especially on young children.

I feel the way I do for many reasons but the strongest reason, as a person and as a mother, is that the numbers and the studies do not support the decision of these policies. I implore you to think about what these policies would really look like if passed because, I for one, do not see a bright future for the state of Washington if the board of health passes this agenda during the meeting.

Respectfully,

K. Harmon

Subject: Upcoming Proposed Policies

External Email

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions, and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

Subject: Please Vote NO on MANDATORY VACCINES FOR ANYONE, LEAST OF ALL CHILDREN!

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA "vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

I oppose medical detention centers because:

1. The fully vaccinated spread covid, as well as get sick from covid
2. To require unvaccinated to be absent from work is punitive and defies science
3. To detain the unvaccinated is a crime against humanity since they are no more contagious than the vaccinated
4. Detention centers promote two classes of citizens and creates the detestable "other"
5. Detention centers violate the principles of social justice

Thank you,

Elizabeth Etter

External Email

This is an email to strongly encourage you to vote NO on any mandate for children regarding the covid vaccine. It has not been studied enough for children and children do not need this so-called vaccine to protect them. They have done quite well if they have tested positive.

Also, I would strongly encourage a NO vote for any mandate that would quarantine against someone's will! That is blatantly against our civil rights and our constitution! It will only encourage violence and increase the distrust in the government of this state. The recovery rate for someone who has contracted covid-19 or one of its variants is almost 100%! There is no reason to be so heavy-handed against the people of this state.

Thank you,  
Kim Spain

Subject: January 12th Meeting agenda - My Comments

External Email

Dear Board Members,

While the below letter may be copied and pasted, I fully agree with this individual and the information presented. I have done a lot of my own study on this topic these past two years. I have watched as this has progressed and the continued attempts to remove our basic individual rights as Americans in this state. Our basic rights have been under attack under the guise of public health. You are bordering on instigating communist rule in a nation of people that will not adhere to or accept it. If you do this, I expect you will be prosecuted and found liable when all is said and done. I don't think you can afford that.

The very thought that you would even consider a "police state" in the name of public health in WA is horrifying! To physically restrain and detain any individual because they are ill or have made a decision to take care of themselves as they see fit is not within your scope of responsibility, nor is this done in our nation. We are a free people. Period. Below you will find data on the vaccine, quarantine, testing. I think we have all found that people are going to get this virus no matter what they do. Vaccinated or not, you can get and give this virus. The chances of survival are great for most people in America. The policies over these past two years have not worked. I ask that you look past what you have been told, or directed and look into the facts of health and how people can work towards being healthy and work toward that.

Please allow common sense and cooler heads to prevail. Consider our constitutional rights and I ask that you also consider empathy in dealing with your fellow humans and do what is right, not continue to promote what is the ongoing narrative.

"Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100."

"Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with

our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation. Source: <https://www.fda.gov/media/153447/download>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: “. . . but we’re never going to learn about how safe this vaccine is unless we start giving it.”

Source: @6:52:33

[https://youtu.be/laaL0\\_xKmma](https://youtu.be/laaL0_xKmma)

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

“Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates.”

Source: <https://globalcovids Summit.org/.../thousands-of-physicians...>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to the full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of God's Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all men and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of God's Holy Laws, of which the protection of my body is one of those spiritual laws that supersedes all man made laws in my religious conscience. ``

Detainment with force for quarantining? Is this for real? I've read it's part of the proposal for the WAC being discussed on Monday. This is NOT acceptable! This is against the law! This must be stopped! Do NOT let this happen!  
We live in a free country and we must be given free choice! This is insanity!

Vote NO!!

Hello!

I am voicing my total opposition to mandating of the Covid vaccine for children of any age as well as adults. Please allow us to make medical decisions for our families.

Also, complete opposition for all the changes ton WAC that have to do with Covid. Tracing people, quarantining people by force or any kind of mandate of the vaccine.

Thanks for your time,  
Mom of 4 healthy youth,  
Ashia

Subject: Opposition to vaccine mandates

External Email

Dear health official,

I am writing to express my vehement opposition to any vaccine requirements for students in our state. Being a father of 2 school age boys, I am sincerely pleading for their safety. Please put your preconceived notions and politics aside and look at the facts.

The scientific evidence does not support the risk / benefit of COVID vaccine for males in this age group.

1. Risk of Myocarditis in young males is higher for vaccinated than for those who got COVID.

Ref. <https://www.nejm.org/doi/full/10.1056/NEJMc2115045>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056%2FNEJMc2115045>

2. Vaccination does not prevent the spread of COVID to people in their household. In fact it barely reduces transmission relative to unvaccinated.

"We found that the secondary attack rate in fully vaccinated household contacts was high at 25%, but this value was lower than that of unvaccinated contacts (38%)."

Ref. [https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2Flaninf%2Farticle%2FPIS1473-3099\(21\)00648-4%2Ffulltext&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C57f8fd483f6041c2889308d9d1a6b](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2Flaninf%2Farticle%2FPIS1473-3099(21)00648-4%2Ffulltext&data=04%7C01%7Ckaitlyn.donahoe%40sboh.wa.gov%7C57f8fd483f6041c2889308d9d1a6b)

3. Risk of severe illness in children is basically non-existent.

"A total of 815 articles were identified. Eighteen studies with 1065 participants (444 patients were younger than 10 years, and 553 were aged 10 to 19 years) with confirmed SARS-CoV-2 infection were included in the final analysis. All articles reflected research performed in China, except for 1 clinical case in Singapore. Children at any age were mostly reported to have mild respiratory symptoms, namely fever, dry cough, and fatigue, or were asymptomatic. Bronchial thickening and ground-glass opacities were the main radiologic features, and these findings were also reported in asymptomatic patients. Among the included articles, there was only 1 case of severe COVID-19 infection, which occurred in a 13-month-old infant. No deaths were reported in children aged 0 to 9 years."

Ref. <https://pubmed.ncbi.nlm.nih.gov/33262177/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F33262177/>

4. All available vaccines are for emergency use authorization. For goodness sake please recognize the rules of law!

"WHAT IF I DECIDE NOT TO HAVE MY CHILD GET THE PFIZER-BIONTECH COVID19 VACCINE?

Under the EUA, there is an option to accept or refuse receiving the vaccine. Should you decide for your child not to receive it, it will not change your child's standard medical care."

Ref. <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717>

I implore that you look at the facts objectively here and end this doom spiral of vaccine requirements. Eventually the courts will agree as well, and YOU will be held accountable. In conclusion, humans are not cell phones or windows software that need to be upgraded every 2 weeks to deal with the latest virus threat.

Thank you.

This is horrible and against our constitutional rights.

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thank you,  
MeLainee

Subject: No Vaccines for school age children

External Email

Please, do not consider requiring vaccines for school age children. Like all other decisions regarding their children parents should have the final say about what's best. It should be up to parents to choose.

As an educator, ministry leader and parent I whole heartedly disagree with enforcing mandates on citizens. I also believe that the masks and face covering requirements are doing more harm than good to school aged children and students and should be lifted immediately!

In service to my community,

Mrs. Laurice Warthan

Cc:  
Subject: Vaccine requirements for schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

External Email

To whom it may concern,

As a parent and a public school educator I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares, and any other mandates ordering citizens to go against their Constitutional rights to manage our own health care for themselves and their children.

This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). Again, I am speaking as one of "We the People" I am adamantly opposed to a covid vaccine requirement for any and all children!

Thank you for your time.

Subject: WA State Board of Health Agenda Items 01/12/22

External Email

Sir/Ma'am -

Please oppose the following WA State Board of Health agenda items. Per the Washington State Constitution, our legislative representatives are elected to make these types of decisions via our legislative process.

1. Agenda Item 9 – Continuance – Communicable and Other Certain Diseases – WAC 246-100.

Please vote against any changes or extensions to this WAC code especially the following:

\* WAC 246-100-079 – allowing local health officers to use law enforcement  
\*

WAC 246-100-045 - to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility

\*

WAC 246-100-040 - following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling and vaccination.

\*

2.

Agenda item 11 – Rulemaking Petition – Chapter 246-105 WAC – Immunization criteria for child care and school entry.

Please vote against any changes to this WAC Code.

\* Washington State Board of Health should be making no recommendations or requirements regarding immunizations for our Washington State children.

\* All decisions regarding children’s health care should be decided by the children’s legal parents/guardians.

\* It is irresponsible to suggest or require that our WA state children take a COVID

Vaccine that was only released a year ago and has no long term (multi-year) studies completed.

\* The COVID vaccinations for children are still under a EUA (Emergency Use Authorization) status. Following EUA rules, these parents and students should be given full disclosure of risks and allowed the legal right to decline.

Respectfully,

Tracy Harker

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

-Margo Dahl

Hello Kaitlyn,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am writing to let you know I strongly oppose the government overreach in the following proposed policies. Do not mask our children in school, do not require mandatory vaccinations for COVID for adults or children, and do not add COVID to the possible conditions for which detainment at quarantine facilities could be required.

>

> • I oppose allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

>

> • I oppose including the Covid-19 injections as part of school immunization requirements using WAC 246-100.

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?! That just doesn't make sense.

1. No COVID vaccine available in the United States has received FDA approval. Subject: Vaccine requirement

External Email

Kaitlyn Donahoe,

Please do not require mandatory vaccination of school age children in order to attend public school. The vaccines that are available are authorized under the emergency use authorization act. The vaccine that is approved is not available. Therefore, requiring students to be vaccinated forces them to participate by definition in a medical experiment. Furthermore, the CDC admits that the vaccines neither prevent one from catching Covid nor prevent one from passing it on to others.

Subject: Public Comment Regarding the WSBH January 12, 2022 meeting

External Email

I am a very concerned citizen writing you to urge you to refuse to push through the new proposed policies that include mandatory covid vaccinations, and that also permit health officers to use law enforcement power in forcing isolation, quarantine, and detainment of individuals and families. This is completely unconscionable, and Washington citizens have had enough. Not only do children have a 99.995% covid survival rate, but these vaccines are STILL in the early stages of development and testing, and any long-term side effects are still completely unknown. Weighing this risk MUST be one each individual freely does for themselves, and is not forced into, particularly for parents deciding what is best for their own child. Each person has the right to choose - and refuse - medical treatment, counseling, and testing without being forcibly detained for their choices. These policies not only vastly overstep the constitutional bounds of 'health care', but also seriously infringe on personal and parental rights.

We the people INSIST you vote to STOP these unconstitutional policies from moving forward, at once.

Sincerely,

Heidi Forslund

To Whom it May Concern,

I received information that the Board of Health in Washington is considering imposing a Covid-19 vaccine on children as a requirement for attending school.

This is unreasonable and foolish.

Please don't do this!

The vaccines are still experimental, children are largely unaffected by the virus, and the efficacy of the vaccine has severely diminished as new variants have come into play.

If you do this, it will prove to everyone that the Board of Health is only a political tool, and wholly unconcerned with the actual health of Washington residents. We already suspect that because of the ridiculous and harmful mask mandates.

If tyranny is the real goal here, then by all means lay aside science and reason, and stick it to the kids.

Sincerely,  
Elizabeth Thiede

Subject: STOP Vaccine Mandates for Washington School Children!

External Email

Dear Kaitlyn,

Today I am writing to you to express my express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

Mr. James Deady

I am here to voice my concerns taking place in this State in regard to COVID 19 shots. I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breast feed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level). Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven affective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since their will hardly be any children in school.

Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok...how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense.

There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution.

As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

Dear Ms. Donahoe,,

I'm writing in regards to your upcoming meeting which includes the following proposals:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid injections as part of school immunization requirements using WAC 246-105

I want to express my voice and concern over these proposals. To be honest, I am shocked that I even have to address these things in America, the land of the free.

I am 100% opposed to any forced Covid 19 mRNA shots on our children! This is absolute madness to even consider given that kids are at very little risk of harm from Covid and now that we have Omicron, which is proven to be mild, it shows that the pandemic is coming to an end. This is a virus that will always be around we simply need to learn to live with it. This is still an experimental shot and we have no way of knowing the long term effects on our kids. I am not willing for my kids to be an experiment and there is simply no need for this to happen. Dr. Fauci himself, stated that kids were at little risk from dying of Covid and that the hospitalizations were being overcounted because they are including kids in the hospital WITH Covid rather than BECAUSE of Covid, this is a HUGE difference and confirms there is no need to mandate this for kids.

I am also appalled at the thought that quarantine facilities would be even be considered, is this Nazi Germany?! It is complete insanity and there is absolutely no scientific basis for you to approve this. We live in America, the land of the free I am sure you are aware of all of the evidence against but for some reason are choosing to ignore it. Why? I ask? Why? This is madness and it needs to stop now.

I was recently in a free state with no mask mandate or vaccine requirements to move freely around the city. It made me that much more aware of the tyranny we are living

under here in WA. I love where I live and will fight to keep it free. Please don't make me leave the state because of irrational forced mandate.s

The proposals being considered are tyrannical, evil and a complete overreach of power. There is NOTHING anyone can say or do to make me give my children this experimental vaccine that is causing so much harm especially to kids. Each parent has the right to choose what they want for their kids and for themselves.

I, and many others will hold you responsible for any irreversible damage from unnecessary experimental mRNA treatment so please vote accordingly. Are you prepared to be responsible for the harm that will inevitably come if you move forward with these proposals?

May God be with you as you make this crucial vote.

Thank you,

Nora Berry

Subject: Critical data to consider regarding Covid vaccination and children

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low health risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term safety studies
- \* Several studies show kids have greater risk with the Covid inoculation than they do benefit
- \* Studies document vaccinated and unvaccinated can both transmit Covid
- \* The vaccine does not stop the spread of the disease
- \* Informed Consent is the law and the safety data is not adequate or even publicly available in full
- \* Myocarditis is a greater risk to adolescents than Covid health risk

<https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

Please see the following study titled

"Why are we vaccinating children against Covid-19?"

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscienc>

You are responsible to know the data if you are making recommendations that guide policy.

Children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to "protect" them. They were needlessly kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won't get back. They continue to be required to wear masks in school which is an undue burden given the lack of evidence to support this requirement. We are one of few states still imposing such needless measures, Washington needs to figure it out, and stop doing it at the expense of children and the those you are supposed to serve and protect.

Subject: Vaccine mandate voting

External Email

Hello board members and anyone else it may concern,

As parents in Washington state, we say please do not mandate a vaccine to go to school!

Children are at extremely low risk for Covid.

The vaccines are still only EUA.

There are no long term studies to document any history of safety.

Studies DO now document that vaccinated and unvaccinated can both transmit Covid.

The vaccine apparently does NOT stop the spread of Covid.

The risk of injury from the vaccine is not worth it when it doesn't even stop the spread to begin with.

A mandate doesn't make any sense!

Thank you,  
Katie and Josh McGuire

Subject: No to covid vax

External Email

I am writing to express my EXTREME opposition to requiring a COVID 19 vaccine requirement to attend any level of school in the State of Washington.

There is NO approved vaccine available in the US. Not ONE! Children are statistically at zero risk from death from Covid. There is NO long term data to support such a ridiculous requirement. The drug company is requesting 75 years to even publish data on the vaccines. The number of injuries and deaths reported in VAERS alone is staggering.

The thought that you would intentionally put our precious children at such a huge risk in the name of POLITICS is not only absurd, it is disgusting. Force vaccinating healthy children for a disease that does not statistically affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for ANY school age children.

External Email

I am strongly urging you to vote NO for vaccine mandates for our children and schools. Please resist the public hysteria and Big Pharma lobbying machines, look at the science and data for kids, and ask yourself why would we force such a thing on our precious children? FACT - zero kids 5-11 in the Pfizer clinical trial, either vaccinated or in the control group, had severe Covid symptoms. Zero. FACT - per the CDC data, less than 1/10th of 1 percent (<0.10%) of people hospitalized with (not because of) COVID were kids 0-17, and even fewer died. FACT - vaccinated people can spread the disease - look at what's happening now. FACT - we don't know the long-term side effects of this vaccine; it's just too early. FACT - the drug companies cannot be sued for any deaths or adverse reactions to their products; ask yourself why? Given all of this, how could you even consider mandating a vaccine on our children? Let the parents and their doctors decide!!!!

Also, consider also that the least vaccinated portion of our population are minorities. What message will this send if you vote yes?

Subject: AGAINST covid shot requirement for school kids

External Email

Dear Kaitlyn,

I'm writing to express my extreme concern, and opposition, over the proposal to inject our school age children with the experimental covid shots, as a requirement for school admission. This is a decision that should be left to the parents. We know that the risk to children birth to 17 years is so small as to be inconsequential. The shots are harming people's immune systems. To invade children's developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage. Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after the covid shots, particularly in adolescents and young adults. WHY are we putting our kids' hearts at risk?

Health officials are telling parents that children should be vaccinated for the sake of herd immunity. What is largely ignored are the studies that show children are not driving the pandemic and, in fact, are less likely to transmit the virus than adults. We also see clearly that "vaccination" status has nothing to do with stopping transmission of the virus. Covid outbreaks on "100% vaccinated" cruise ships are a stark example. Bottom line – children are not the risk factors for covid. Leave them alone! It's WAY too early to know potential long-term side effects. They do not need to be forced guinea pigs for these shots. If the parents want that for their kids – that should be THEIR decision. Let parents decide either for - or against – the shots. NOT the government! Please – do NOT make these covid shots required. It's simply not necessary.

Sincerely,

Vicki Gillette

Subject: Vaccine Mandate for Children

External Email

Dear Ms Donahoe

Please do not support vaccine mandate for children. Such a mandate has the potential and high likelihood of great harm to our children. Children are at very low risk for Covid. The few who do experience Covid, have very mild symptoms, and also, they then have natural immunity.

These children's health decisions should be left to their parents, not the government.

Sincerely,

Sara Gamache

Subject: Covid vaccine requirement for schools

External Email

The implementation of a COVID 19 vaccine requirement for schools in Washington State is absolutely insane.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Amyee McKnight

Subject: Vaccine Mandate Opposition

External Email

To Kaitlyn Donahoe,

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org))  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> ) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Educational Consultant

Subject: Re: January 12th Meeting - Covid-19 WAC Codes

External Email

Dear Ms. Donahoe:

I am alarmed to learn that the Washington State Board of Health is considering applying current infectious disease WAC codes to include Covid-19 for all Washington State individuals.

It is amazing that after all of this time, it is not understood that people with Covid-19 are contagious for roughly three days. How do you expect to get them tested, results back and forcing them to quarantine within 72 hours? This sounds like an impossibility!

More concerning is our constitutional rights. Covid-19 is not a dangerous disease and most who have it, don't even know that they have it because the symptoms are similar to a cold or flu.

Washington State is one of six states that still requires masking. Many medical professionals are now finally admitting that masks don't work. We are also finding that vaccinated individuals are still getting Covid-19. I know some personally!

Covid-19 does not fall into the same category as other infectious diseases. I would put it in the same category as the flu after two years of Covid-19 . I implore you to make the right decision and not apply current infectious disease WAC codes to include Covid-19.

Sincerely,

Azaleen Gonzalez

Cc:  
Subject: public comments

External Email

To members of the Washington State Board of Health

Before I present my comments, I like to start by wishing all of you a Happy and healthy New Year!

I think we all need that.

My name is Charlotte Lomholt. I am a Danish American citizen of Washington State. I am a Danish RN and also holds a Master within Public Health Promotion and Strategies as well as a Master in Communication from Roskilde University, Denmark. I am bilingual which have allowed me to follow the Covid situation closely, not only here in the US but in Denmark as well. As you may know, Denmark is one of the nations in the world that from the beginning of this pandemic were offering test to its population as part as the control of the pandemic. Their daily testing capacity is to perform 500.000 PCR test which equals test to 10% of the Danish population. They also offer the same amount of daily quick test. Vaccines are part of the strategy to control the virus, but it is voluntary for everyone in Denmark if they take it or not. There are no vaccines mandates in place in Denmark. Despite this fact, about 82.1% of the population has started the vaccinations and 78.8 % are now fully vaccinated. Children from age 5 can receive vaccination if the parents wish so. Everything is voluntary.

The virus spread with the Omicron Variant is high there as it is here. But as we see here in the US as well as in research, the Omicron variant is not causing hospitalizations to the same degree as previous variants. It is spreading quickly through the population because we now know that vaccination even if boosted, doesn't prevent infection with variant. Neither does vaccination prevent spread of the virus. What vaccinations do provide is a less severe disease should you catch the virus.

Most children who catch this virus will have a fast recovery unless they have underlying comorbidities. These children are probably already vaccinated. Some children might even not know that they are infected, but infection is caught due to frequent tests. For healthy children, their innate immune system will quickly identify and combat the invader. The result is that they after an infection will have a strong immunity towards future virus variants as well as spread of this virus. This will help build the herd immunity that our more fragile elderly and sick needs. As we know now, vaccines cannot provide protection for the spread of a virus that attach itself to the tissue in the throat.

We need the children to help us build the herd immunity that all members of our society can benefit from.

The Expert Committee advising the FDA in the approval of the vaccine to children said in their comments to the vote that they wished to recommend the vaccine for a more narrow group of children, but were asked to decide simply whether the benefits of a pediatric shot outweigh the risks. The question they were asked to answer didn't allow them to do so. Therefore, they voted in favor of making the vaccine available to parents who wished to vaccinate their children. Some of these experts expressed a concern for the limited data as well as the lack of research due to the possible long-term effects of vaccinating healthy children. The vote was done October 26th, 2021, a little more than 2

months ago. We still don't know if there will be any unforeseen consequences of this specific vaccination – only time will tell us.

A guiding principle when offering vaccines to children is that the possible benefits of the vaccine should outweigh the risks. So what do we know

- \* The majority of healthy children don't get severe disease if infected with the virus
- \* As for now, we know that individuals previously infected with the virus builds a strong immunity towards future variants
- \* The vaccines don't prevent the spread of the virus
- \* Vaccinated individuals, even if boosted, gets infected with the virus.

Another important factor that you need to consider in the decisions that you are about to make regarding adding the Covid-19 vaccines to the school immunization requirements is the impact you will meet from imposing vaccinations on kids. By doing so, you take away parents' rights to decide.

Having public trust and support for the work you do in the board and the decisions you make is important. By imposing mandates that might have parents withdrawing their students will impact not only funding, but also create a frustration among students and parents that it will take years to heal.

Based on all these considerations please don't add the Covid-19 vaccines to the school immunization requirements when voting on WAS 246-105.

Sincerely,

Charlotte Lomholt

Subject: Proposed COVID policy voting

External Email

To whom it may concern,

Please accept this letter as my formal way of rejecting the following proposed COVID polices:

WAC 246-100-045  
WAC 246-105

Voting these policies into place is a complete violation of basic human rights. By implementing these WAC's, the government is prohibiting medical freedom by isolating families from the public by force as a result of choosing not to be vaccinated (which is not only completely unconstitutional, but also causes further division in a country already so divided as we now have grouped an entire population of people as a consequence for their decision making), as well as strips the American right to choose.

Putting these laws in place will also be isolating an entire group of children and families from the right to public education as several people will not support subjecting their child to vaccinations that only have a limited amount of research conducted, not to mention the unknown long-lasting side effects that may result from the vaccines, therefore, having to pull them from school.

I would like to end this email by saying I work in public education and am vaccinated. It is hard to believe we are at a place in our country where we are having to advocate for medical freedom.

Thank you for your time and consideration.

Brenna

I am absolutely disgusted by the extreme over reach by you and our government. I am in fear of my family's safety everyday, but not because of covid, because our country is no longer free. This should all be illegal.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.  
Please share this information with your friends and family! This is where we work together to Save Our State.

Dear Michelle Davis,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R\\_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g)

where its stated that it is too soon to be requiring vaccinations for our children. Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 . The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,

May Lindsay

My name is Christy Cochran, I am a Pierce County Realtor member and mother of 2.

I am strongly opposed to required immunizations for COVID for children. My husband and I made the decision to pull our children from the public school system here and put them in private schooling anticipating that this would come to play, & here we are facing our worst nightmare. This is immoral and wrong. This is gene therapy disguised to most who think, "it's the same thing as the polio vaccine," which it is NOT. It is still in emergency use, because our government will not allow treatment to keep this vaccine as THE ONLY SOLUTION which clearly isn't working. Mass testing with 50% accuracy on PCR tests which were actually recalled back in July but continued to be used until now to keep those numbers high to give power and spread fear. This has to stop! The vaccinated still spread, still have severe illness.

My family had Covid 4/2021, recovered and tested antibodies. We have been healthy and exposed to many since that had Covid and WE ARE NATURALLY PROTECTED no matter what the governing bodies want to say, naturally immunity needs to be realized, it's better than these injections.

Manufacturers not releasing data for 50 years is laughable, & we are expected to bend over and offer our children to this alter "for the good of others." This is tyranny. It's about profit, not health.

Drs' are being forced to follow CDC guidelines, therefore cannot speak their truth. We know this first hand as my daughters cardiologist shared his uptick in myocarditis pediatric patients after their vaccine. Regardless of her conditions and what vaccine injury could do to her, his hands are tied and can not offer medical exemption due to policy of Multicare. This is the case everywhere. Tyranny at every. Single. Level.

Our children are not lab rats. With the vaccine manufacturers taking zero responsibility for injuries, and Drs being afraid to mention vaccine injury when patients come to a clinic, who's protecting our children?

Regarding any discussion on WAC 246-100, or any changes to isolation and quarantine procedures for COVID: I am against any increased forceable measures that would require law enforcement or health officers to involuntarily detain / isolate / quarantine a human being because of COVID. This is history repeating itself, & with the hate coming from those who think unvaccinated should all die, this is to close of a resemblance to concentration camps, and could quickly turn into a place that is targeted by those who want unvaccinated dead.

I urge you to consider the moral and ethical precedent this would create, and has already created. Additionally, this virus' current variant is spreading through both vaccinated and unvaccinated. There should be NO SEPARATION or distinction between the two in consideration for any forceable measures.

Thank you for your time,

REATOR

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

I am forwarding you an email sent to Kaitlyn Donahoe as she is on maternity leave.

Greetings,

I am emailing in regards to the newly proposed COVID-19 vaccine mandate for schools, and the quarantine (concentration) camps. I am greatly opposed to both of the previously stated mandates, and deeply concerned by the very notion of the ideas.

Medical freedom is simply that: medical freedom. The government cannot legally push these things into existence in the name of "stopping the spread," or whatever other labels they choose to for it. This is wrong to force upon everyone as each individual reacts differently to medical treatments. Medical decisions and treatments are to be held within the best interest of the patient, and are to be decided between the patient (if a minor, patient's parents), and their personal healthcare provider.

There is no "one size fits all" medical plan: it will never exist. Medical treatments are individualistic because not one person is the same. Some react positively to vaccines, while others negatively. With this particular COVID-19 vaccine, many hesitations arise. For one, it has not undergone the proper time to be tested/tried to ensure functionality

and safety. Secondly, we are constantly told to "follow the science" and science has proved this to be an inconsistent and potentially dangerous vaccination. No child should have this forced upon them. Our freedoms don't start where other people's worries begin. We are in America, and as such have medical freedom. Parents are in charge of raising their children and will make medical decisions for them in the child's best interest because they know their kids. For the government to say that they know what's best for other people's kids, kids they don't know, is so very wrong.

That being said, the notion of taking children away and separating families to put people with the coronavirus into camps is downright sickening. Families take care of one another; they don't need "experts" isolating them from loved ones that actually know how to care for them most beneficially and according to their best interest. We are founded on freedom and not finances for the government. We The People hold the power to decide things for ourselves: how best to care for our own sick, to receive desired medical care, to refuse skeptical medical care, and to remove or vote people into office.

I will again state the importance of medical freedom/choice in this great country. Strangers making healthcare decisions for other strangers is an extremely dangerous, and even communistic thing. Last I recall, setting my body on fire will not keep the person in the corner from freezing. To get or not to get the COVID-19 vaccination, and to go or not to go to these "care camps" is and ever should be one's own choice. It doesn't matter if people are left or right, black or white, tall or short, old or young; we all are entitled to our own personal choice for our own personal medical decisions. Not only are we entitled to it, but our rights to choice are protected by laws, and not only by laws, but by the United States Constitution as well; and last time I checked, the government is underneath both law and the U.S. Constitution.

Thank you for your time in reading this email. I stand for medical choice/freedom for We The People, therefore greatly oppose these newly proposed COVID mandates.

May God bless you, and may God bless America - land of the free.

Subject: Opposition for V Requirments for Children

External Email

I am writing to voice my strong opposition for requiring the COVID Vax for children as a requirement for school (or any other place for entry). Children are not at an extreme risk and it should be up to parents if they want to inject their child with an experimental vaccine. This should not be something anyone in government mandates!

I also am opposed to WAC 246-100-040, Procedures for isolation or quarantine. It should be up to the individual to self-quarantine if they are sick. This should in no way be forced upon people.

It's time to let our citizens start making choices for their own health and own family. The government has done what it can to mitigate the spread of this virus, the power now needs to go back to the individual to manage their own health. If you all want something positive to do to help us get healthy, why not actually create and promote a health campaign? Challenge citizens to get more exercise, eat healthier and take their vitamins. If everyone did this, our bodies would be healthier and less susceptible to sickness. Thank you!

Subject: Oppose WAC 246-100 & WAC 246-105

External Email

To the Washington State Board of Health and the Immunizations Technical Advisory Group:

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I have 3 children in the Puyallup School District and I am opposed to making COVID-19 shots mandatory for school admission or childcare in our state for the following reasons:

1. Children are at extremely low risk for Covid and at even lower risk for complications from Covid.
2. The vaccines are still only emergency use authorized.
3. There are no long-term studies to document any history of safety.
4. Studies now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine does not stop the spread of the disease.
5. Where there is risk there should be choice.

Here is additional information that supports the intense scrutiny and opposition of mandatory vaccines:

- Informed Consent is the law and the safety data is not adequate or even publicly available in full

- Myocarditis is a greater risk to adolescents than Covid health risks

<https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

Please also reference the following study titled  
"Why are we vaccinating children against Covid-19?"

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscienc>

As noted, children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to "protect" them. They have been kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won't get back. They continue to be required to wear masks in school which is an undue burden given the lack of evidence to support this requirement. We are one of few states in the country still imposing such needless measures. Washington needs to figure it out, and

stop doing it at the expense of children and those you are supposed to serve and protect.

We hope to be able to keep our children in the public school system but will consider withdrawing them if the vaccines are mandated for the Washington State Public School System.

Thank you for your time and consideration,

Rebecca Rucker,

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

We now know that the COVID19 vaccines do not stop the transmission of the disease nor do they ensure immunity to the recipient. Therefore, COVID19 is NOT a "vaccine-preventable disease" according to WAC 246-105-030 and no "vaccine" currently being offered should be considered to be "required" or "mandated" by WA State's own guidelines.

Additionally, it must be acknowledged that these "vaccines" ARE causing injuries. The risk/benefit ratio is deeply skewed toward higher risk vs benefit for young people. We have seen over and over again that young people ( under age 30) have statistically zero risk to death or adverse long term problems from COVID recovery. This is not the same statistically for the vaccine with these age groups. Not to mention, the added benefit of herd immunity in disease-recovered individuals.

It must be noted that SARS-COV2 is a HIGHLY MUTABLE disease. You cannot "vaccinate" out of this pandemic. We are risking lives by continuing this patently misguided direction of mass vaccination during an active pandemic.

Respectfully submitted,

Aidan Moeck

Subject: AGAINST FASCIST POLICIES WAC 246-100 AND WAC 246-105

External Email

Hello,

I am writing this email to demand the fascist policies WAC 246-105 and WAC 246-100 to be ceased from existence.

Whoever decided to create them, as well as to propose them to the public is cruel and evil in their nature just like the policies themselves.

History shows that whenever government officers were allowed to affect people's lives in such a manner these policies allow them, there were millions of people who were denied their basic human rights of choice and freedom. Because of the same in their nature policies, 6 million Jews were brutally killed, and millions more of different were traumatized and suffering. And if we are to give these policies even a chance for existence, we will be repeating the same mistake here in the United States, the country of the free.

We CANNOT and SHOULD NOT allow policies like that to exist. It is against human rights, rights given to us by God himself, the rights protected by the constitution. The constitution is designed to limit the government because absolute power corrupts absolutely, and our leaders are already corrupted. However, these proposed policies override the constitution and provide health officers absolute power, which makes these policies UNCONSTITUTIONAL.

It is clear that the pandemic, mainly created as a political tool to place power in the hand of just a few cruel people, has nothing to do with the proposed policies that cease human freedom. We all saw that somehow states like Florida, where people continued their normal lives, and somehow had even fewer cases of COVID compared to the Marxist states like California. It is not a question of protecting people's health because it is to be taken care of by each person individually by each individual, not by the government. That is, I am raising my voice AGAINST these UNCONSTITUTIONAL, UNHUMAN, IMMORAL, EVIL IN THEIR NATURE policies. I am raising my voice as my God-given constitutional right for the sake of the future of this generation, the generation of my future children and their children, and for the sake of this country.

I expect to hear a personal reply to this email, as it is my right and your obligation to read it thoroughly to take action upon the people you represent and whose constitutional rights you are to protect.

Best Regards,

Aleksandra Ankuda

Subject: No to mandated Covid vaccines!

External Email

Dear Boardmember,

I am contacting you to express my concerns regarding the addition of the Covid-19 vaccine to the WAC-246-105 that aims to remove a parent's right to informed consent. I believe that the choice of if, when and how a child is to be vaccinated needs to remain between a family and their doctor. Where there is a risk of injury or death, no matter how small the perceived risk may be, there must be a choice. To mandate a medical procedure with known risks is medically unethical. I implore you to consider these critical reasons to oppose or dismiss this mandate:

The mandate violates a parent's right to informed consent: Vaccines are chemically synthesized biopharmaceuticals with known and documented side effects that include permanent injury and death. Forcing a medical procedure on a non-consenting individual that carries the risk of injury or death, no matter how small that chance may be, is medically unethical according to the American Medical Association's code of ethics, is inhumane and is a violation of our basic human right to possess autonomy over one's own body.

US ranks last for infant mortality, yet first for immunizations: Compared with other industrialized nations, the US administers the most pediatric vaccinations yet ranks the worst - 34th - for infant mortality rate.<sup>1</sup>

Pharmaceutical companies have no-liability with vaccine reactions: The National Childhood Vaccine Injury Act of 1986 established the National Vaccine Injury Compensation Program (VICP) as a federal no-fault system to compensate persons (or families of persons) who are injured by childhood vaccines, has paid out over \$2.8 billion to families whose children have died or suffered other adverse reactions. In the past 5 years, an average of \$221,000,000 has been paid out per year, which has nearly doubled from years before.<sup>2</sup>

It is worth noting that recipients of compensation are not allowed to speak of their case after its been settled.

Big Pharma's fraudulent behavior: In just the past 5 years, drug makers have paid the U.S. Government \$19.2 billion in criminal and civil fraud penalties. Skepticism of the pharmaceutical industry is well deserved, and it doesn't imply skepticism of science. Furthermore, two former Merck virologists now whistleblowers have filed a lawsuit against Merck alleging that Merck falsified data with the MMR II vaccine in order to meet the required 95% efficacy rate.<sup>3</sup>

This suggests the possibility that vaccine failure, not only the unvaccinated, is key factor causing the annual outbreaks.

Adverse reactions are more common than widely perceived: Managed by the CDC and FDA, the Vaccine Adverse Event Reporting System (VAERS) reports more than 30,000

vaccine related injuries annually. In 2015 alone, \$94,982,000.93 has already been awarded to 217 claimants.<sup>4</sup>

As of December 14, 2014 there have been 6,962 serious adverse events reported to VAERS in connection with the measles vaccine since 1990. Over half of those occurring in children three years old and under. Of these events 329 were deaths, with over half of the deaths occurring in children under three years of age.<sup>5</sup> It is estimated that only 10% of adverse reactions are filed with VAERS as this form of passive surveillance is greatly limited by underreporting.<sup>6</sup>

In conclusion, when government makes decisions to take away parental rights relative to the health of their children it must only do so when all can agree it is in the best interests of every single child. Opinion 8.08 of the American Medical Association (AMA) states, "The physician has an ethical obligation to help the patient make choices from among the therapeutic alternatives consistent with good medical practice. Informed consent is a basic policy both in ethics and law that physicians must honor..."

This proposed action ignores and eliminates the fundamental American value of choice as well as a doctor's ethical obligation to provide their patients informed consent. If we are not free to make informed, voluntary decisions about which pharmaceutical products we are willing to take, then we are not free in any sense of the word. If this proposal passes it will set a very dangerous precedent and there will be no limit on which individual freedoms the State can remove in the name of the greater good.

For these reasons and many more, I urge you to view this action as inhumane and medically unethical.

Sincerely,  
Courtney Borden

Subject: Vaccine Mandates - OPPOSE

External Email

Dear Washington State Board of Health Members,

It is with great concern that I write to you today. The legislation that the Washington State Board of Health is currently considering implementing for both the mandatory COVID vaccination for school children WAC 246-105 and the draconian methods of handling health emergencies in WAC 246-100 is a vast government overreach that breaches our constitutional rights.

All of the proposed WAC Health Codes violate our constitutional rights they also violate our state constitution. In our state constitution Article 1 section 1 it states "All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights." Your job is not to revoke an individual's right to choose what is best for them or for their family but to maintain and protect those individual rights. Article 1 Section 7 also states that "No person shall be disturbed in his private affairs, or his home invaded, without authority of law". The state has no right to interfere in private affairs or to enter or withhold and individual in their homes without authority of law. That without authority of law does not mean that one can simply write health codes that invade people's homes and private affairs. Article 1 Section 12 states "Absolute freedom of conscience in all matters of religious sentiment, belief and worship, shall be guaranteed to every individual, and no one shall be molested or disturbed in person or property on account of religion; but the liberty of conscience hereby secured shall not be so construed as to excuse acts of licentiousness or justify practices inconsistent with the peace and safety of the state. No public money or property shall be appropriated for or applied to any religious worship, exercise or instruction, or the support of any religious establishment: PROVIDED, HOWEVER, That this article shall not be so construed as to forbid the employment by the state of a chaplain for such of the state custodial, correctional, and mental institutions, or by a county's or public hospital district's hospital, health care facility, or hospice, as in the discretion of the legislature may seem justified. No religious qualification shall be required for any public office or employment, nor shall any person be incompetent as a witness or juror, in consequence of his opinion on matters of religion, nor be questioned in any court of justice touching his religious belief to affect the weight of his testimony." By mandating COVID requirements you force people to violate their religious consciences which is against the law.

In addition to the constitutional violations there is no scientific reasoning for the health codes being proposed. In regards to the mandatory school vaccination children are at extremely low risk for COVID not only are there ample studies on this to date but the COVID data simply reflects this fact. The vaccines that are being administered to date are still under Emergency Use Authorization and are not approved. Male boys age 12-15 are more likely to receive myocarditis from receiving a shot than to have any serious side effects from contracting COVID. Statistically speaking kids are more likely to die from the

FLU that COVID-19 yet the FLU vaccine was never a mandate (and rightfully so). There are also no long term studies to document ANY history of safety. With the known minimal COVID risk why would we risk what is unknown for adults to "feel" safe. Finally the most pertinent point is that even if you have received a COVID shot you can still catch and transmit the disease the same as an unvaccinated person so what exactly is the purpose of requiring it be mandatory? Anyone who wants to receive the COVID shot should be allowed to receive it and anyone not wishing to obtain it should likewise be allowed to have that choice.

These draconian mandates, edicts and health codes also do not recognize any natural immunity or the various amounts of therapeutics that are now available to treat this disease. This is now no longer a pandemic and COVID will not be wiped from the face of the earth rather this is something that we as a society must learn to live with. And as time passes similarly with other viral diseases of the past our natural immunity to this will grow and the therapeutics and treatment options will grow but all options on how to treat should be left to the individual not NOT government.

Please thoughtfully and prayerfully consider these things.

Sincerely,

Christie Arnold

I Danielle Loft oppose the use of law enforcement to be used to detain those who are unvaccinated. There are so many reasons one would choose not to get this medical procedure for their own personal reason, for instance previous injury from other vaccines (many of my friends and family have experienced, look into VAERS to see how much money has been paid out to victims) religious reasons, natural immunity, wanting more studies to be done before making that decision, all of which are legitimate reasons and shouldn't be questioned. It is our own right to refuse and to be punished and detained for those valid reasons is unacceptable on every level. This is America, we have a constitution, we have rights to choose what is best for ourselves, but seems for some that's been forgotten.

I do not support adding the C vaccine to the childrens school schedule. There have not been enough studies on it, we don't know the effects it will have on fertility and their bodies. All the science says children are not a threat and are likely to not be harmed by the virus as much as adults, so why mandate it? It doesn't make sense. Leave the children alone.

Please do what you know is right and oppose these WACs from being added as a law.

Dear Sir or Madam;

I oppose changes to the above codes;

Allowing local health officers to use law enforcement (WAC 246--100) to force an emergency order to involuntary detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246--045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 ). These specifics come from WAC 246-100.

**INCLUDING THE COVID-19 INJECTIONS AS PART OF SCHOOL IMMUNIZATION REQUIREMENTS USING WAC 246-105**

Subject: Chapter 246-100 WAC Public Meeting—Comment of Dissent

External Email

Dear Washington State Board of Health and Staff,

My name is Bethany Harmon. I've lived in Washington all my life. I grew up in Moses Lake, attended college in Spokane, and now I am a mother and a public school teacher here in Monroe, Washington. I am personally fully vaccinated, and my children attend public school here in Washington and are up to date on all currently required vaccines (I am not an "anti-vaxxer!")

I am writing to you regarding the upcoming public meeting, scheduled for January 12, 2022 to discuss including COVID-19 vaccination as part of school immunization requirements.

This policy consideration is against reason. It is a violation of individual liberty. Additionally, it will disproportionately target Hispanic, Black, and Multiracial communities. I am writing to you to encourage you to take just and reasonable action by rejecting this policy.

None of the currently available COVID vaccines prevent infection or transmission of COVID-19. Studies have shown children ages 0-19 infected with COVID have a 99% survival rate, and the FDA advisory panel members openly admit to not having data necessary to make statements regarding long-term risks to children. Parents that would like to get their children vaccinated have the freedom and ability to do so. People like me who have chosen not to vaccinate their children are doing so due to the lack of long-term data.

Furthermore, data from the Washington State Department of Health (DOH), released in 2021, shows that vaccination rates are lowest among Hispanic, Black, and Multiracial people when compared to those groups' proportion of the state population—denying minority communities the right to public education, on the grounds of exercising their bodily autonomy, is unjust.

The Fourth Amendment of the US Constitution protects our bodily autonomy by stating “the right of the people to be secure in their persons”. Our constitution does not grant us rights, rather it acknowledges and secures the rights innate in personhood. Bodily autonomy is an innate human right, it is not given by state officials or members of a board.

Forced vaccination or vaccination under duress (the denial of access to a free education) violates the innate freedom of families in Washington to make their own decisions regarding their bodies and health.

I am not requesting this Board give my children bodily autonomy nor am I asking for the freedom to choose what medical treatment they receive—I am calling on you to respect the freedom I and my children innately possess as a human being and an American. I urge you to make a policy that reflects reality and acknowledges the humanity of children in Washington state.

Reject totally the inclusion of COVID-19 vaccination in school immunization requirements.

Thank you,

Bethany L. Harmon

To whom it may concern

I am sure I am late in writing this as I've been notified only an hour ago to this forum being held.

We were asked, as parents and voters to submit our thoughts about the possibility of making the Covid vaccine a part of school required immunizations. I wanted to be sure that this was clear from my own standpoint - if this passes and the immunization is required for my children to attend a public, tax payer funded school - they will all be homeschooled.

It has been medically proven that this virus does not manifest itself the same way in healthy children. And asking families to require this vaccine is ludicrous.

Amanda Romanoff

Subject: Public comments on January 12, 2022 Board Meeting

External Email

Washington State Board of Health  
P.O. Box 47990  
Olympia, WA 98507-7990

I am writing in regards to the proposal to be discussed January 12, 2022 for adding Covid-19 vaccinations to school immunization requirements (application of WAC 246-105). I strongly oppose making this a requirement, for numerous reasons listed below. (Footnotes with links to public data are indicated with [brackets].)

These vaccines are non-sterilizing, in other words they do not prevent the recipient from getting or spreading the disease, which is why after a short respite in early summer 2021 from masking requirements we all went back to using them again. This development was noted in August 2021 by the CDC. The vaccines do not result in herd immunity.

As of December 24, 2021, after just over a year since vaccine roll-out, we have just reached over one million Covid-19 vaccine adverse events in VAERS (Vaccine Adverse Event Reporting System), including over 20,000 deaths [OpenVAERS]. The typical annual report count for all other vaccines combined is less than 40,000 reports with death counts typically in the 300-500 range. These vaccines are very dangerous generally.

CDC surveillance data for ages 0-18 from January 2020 to January 2022 [CDC] indicate 823 deaths. VAERS (Vaccine Adverse Event Reporting System) reports of death from raw data since the introduction of vaccines for this age range [Wonder] with roll-out in August for the older kids and November for the younger kids total 71. Additionally, the same VAERS query shows 473 life-threatening events and 283 cases of permanent disability in vaccinated children, totaling 827. Remember these numbers are in just 2 or 5 months, and the counts continue to grow. This does not seem like a good balance of risk to benefit.

The current vaccines induce a large amount of Covid-19 Alpha strain Spike protein into the body. Alpha has long since been supplanted by the Delta variant and soon, likely, Omicron. The Spike is cytotoxic by itself [Pubmed], dangerous to heart, brain, and organs. The vaccines are chasing a changing landscape of virus variants and are not keeping up - and are not capable of keeping up. Additionally the Spike protein remains in the body for a long time (15 months per [Patterson]) which means vaccination followed by proposed boosters simply keep adding more and more toxic Spike to the body.

The vaccines are still experimental no matter the FDA authorization status. There have been no animal studies or long-term safety studies conducted. In other words by using the vaccines we are doing medical experimentation on our children. Many parents seem to be okay with this, given their eagerness to get their kids vaccinated, but many are not. Forcing vaccination on families without long-term safety studies with transparent, publicly available results is not ethical. And any attempt to argue that making vaccination a requirement for schools is not "forcing" ignores the fact that many parents do not have the financial ability both to pay taxes to support public schools while also homeschooling or finding a private school that does not have the vaccine requirement.

Children exposed to Covid-19 develop robust immunity [Nature], just as they have to endemic coronaviruses like SARS-CoV-1 and the common cold, and to influenza. We should allow existing natural immune responses to protect our children, not require an experimental set of vaccines lacking in long-term safety data.

Thank you for your consideration.

Sincerely,  
Erik Mavrinac

Ladies and Gentlemen,

I am writing to let you know that I am absolutely against WAC 246-100 rulemaking that would expand any authority to involuntary detain and/or quarantine! This is enough! COVID is a flu or a cold that is highly contagious, I get that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I am also expressly opposed to adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week, but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

To: Shannon Sauter  
Cc:  
Subject: No COVID 19 vaccine requirement for schools in Washington State

External Email

Hi,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Covid Mandate

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest

priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

### III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C> )
- Less than 40% of kids 12-17 are vaccinated. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C> )
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C> )

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: No to Covid Shots for Children!!

External Email

Dear Kaitlyn,

Please say NO to this terrible idea. Please add my name to the list of those pleading against this travesty. Please do NOT require Covid vaccines for children to attend school. Children are at extremely low risk for Covid. The risks hugely outweigh the benefits. Vaccines are STILL only authorized for EMERGENCY USE ONLY. They are not verified. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. There is a HUGE risk and no benefit. Please, consider the needs of the children. They do NOT need the vaccine! Please vote NO! No Covid shots for children!!!

Respectfully,  
Alex

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,

Subject: Childhood Covid-19 Vaccine Mandates

External Email

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group, with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.
2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.
3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

- 4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-

experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider such a step and, if you have considered it, to reconsider.

Thank you,

Subject: January 12th Meeting

External Email

Ms. Donahoe

I'm writing about my serious concerns regarding the Covid related policies which will be discussed at your January 12th meeting. I adamantly oppose involuntarily detaining an individual based solely on their Covid related medical decisions and compliance. The dominant variant Omicron is much milder, so these current proposed policies surrounding Covid bewilder me. Choosing not to take a vaccine, covid test, medical examination, or quarantine should not be considered a misdemeanor requiring law enforcement to get involved. These decisions should all be voluntary.

The Covid vaccines are proposed as the primary solution for our society, however they have been shown to be ineffective after just a few months. Washington State has a large percentage of vaccinated people and yet we still have many cases. Why is that? It is not just the unvaccinated spreading Covid. People who have taken the vaccine are also able to continue to transmit the disease to others. There are many documented Covid breakthrough cases (some high profile cases). This occurs even after people have taken both initial vaccines and the booster.

We actually do not even have any current FDA approved vaccinations for Covid being offered to the public. The Pfizer vaccine that is available on the market is not FDA approved. The FDA approved Corminaty, and for some reason people are actually still getting the Pfizer EUA injection. Does that explain why there are so many thousands of adverse effects from the Covid vaccines shown on the VAERS website at the CDC? I'm not against vaccinations in general. These Covid vaccinations need to be tested further and the public needs to be informed about the adverse reactions. There should be no mandates or coercion for any vaccinations and especially for a vaccination that has not even completed clinical trials. This brings me to my other serious concern. I think it is dangerous to mandate Covid Vaccines for school children in public and private schools. Parents need to be able to weigh the risks for each child and be free to make the decision that is best for them. Kids are at low risk for Covid but are at risk for a variety of adverse reactions.

All Covid related medical decisions need to be made with informed consent not coercion. As an American citizen we are allowed that right. I hope those of you making these important policy decisions will carefully consider the negative impact these policies will have to the community.

Sincerely,

Wendy Butzerin

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Subject: Writing in opposition

External Email

I am a K- 12 educator in WA State and have been instructing students for 40 years.  
I'm writing to you about the agenda for the January 12, 2022 meeting.  
I am in opposition to the following:

- 1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
- 2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Sincerely,

Leslie Drury

1042 Shaw Road

Ferndale, WA 98248

Subject: Oppose covid vaccine requirement

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. There are no long-term studies to document any history of safety
5. Studies do not document that vaccinated and unvaccinated can both transmit COVID, therefore,
6. The vaccine apparently does not stop the spread of the disease

Best Regards,

Lyudmila Ianosel

I am a WA state and Nationally Board Certified Teacher and have been teaching for 16 years. I love our schools and I love our kids! More dear to heart than my career in education, I'm a mom of two teenage children who are healthy and happy! I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It's a horrible idea for many reasons, such as:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.
3. No one knows the long term risks of these vaccines. Fwd: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Send an email to these people by tomorrow!! This is the one I sent. They are trying to use the WAC's to set up camps in WA to force people into and to require the vaccine for ALL WA schools.

Subject: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Hello,

I'm concerned about the WAC's being reviewed to possibly be revised and add to them. You don't have the right to decide if a child gets vaccinated or to decide if you can use law-enforcement to detain me and or my family if you choose to do so. The following proposed policies/WAC's are unconstitutional! .

**PROPOSED POLICIES:**

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC

This blatant abuse of power needs to stop. I am NOT in support and oppose these possible changes. Please don't do this.

Thank you,

Cc:  
Subject: No Covid Vaccine for School Kids

External Email

To Whom It May Concern:

My name is Nicholas Hooge and I am the father of 3 small children. As a parent, I am abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic spike proteins the injection causes, resulting in possible permanent damage to my child's critical organs, such as the brain, nervous system, heart and blood vessels, reproductive system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. My wife will homeschool or we will move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Nicholas Hooge

To whom it may concern,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! This is enough! COVID is a flu or a cold that is highly contagious, I get that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week, but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

Adrianna Salazar

Pasco, WA Resident

Subject: No covid 19 vaccine mandate for school age kids/students

External Email

Dear Kaitlyn Donahoe-

I am emailing the Washington State Board of Health to reject and plead with you to not mandate the covid vaccine for school age children and teens.

I have 4 kids and I am not an anti vaccine parent. I acknowledge that covid19 is real and has been horrible for the elderly and those with pre existing conditions.

These vaccines are not safe for our kids and may cause irrevocable injury and damage.

The viral gene injected into parent cells forces my child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs. These organs include the brain and nervous systems, heart and blood vessels(including blood clots), their reproductive system, and this vaccine can trigger fundamental changes to their immune system. Once these damages have occurred, they are irreparable and can not be reversed. You can not fix the lesions in their brain, you can't repair heart tissue scaring, you can't repair a genetically reset immune system, and this vaccine can cause reproductive damage that can affect future generations of our family.

Why would I want to risk all of the above for little or no benefit? Plus all of my kids and most of all their friends have had covid and they have a natural immunity.

The vaccines have not been properly tested. They are still experimental vaccines!

The harms and risks of new medicine are often revealed many years later.

I do not want my kids to be a part of this radical experiment.

There is no benefit to vaccinating my children against the small risk of the virus given the known health risks of the vaccine that we may have to live with for the rest of our lives.

We should be thinking about the well being of the kids and little ones who will soon grow up and need to run this country. It is not up to the government to make my kid get a experimental vaccine. We will not comply.

Thank you for your time

Ruthie Nicholson

Subject: Re: Decision about Recommending Covid-19 Vaccine for School Children

External Email

Each member of the Washington State Board of the Health has a grave responsibility to set practices and make policies that affect individual citizens and families of the State of Washington. Parents have the right and responsibility to make decisions for their children. A vaccine of any kind is putting a substance into a body that has either wanted efficacy against disease or unwanted short-term or long-term damage. I ask the board to rule against any recommendation of the Covid-19, Novel Coronavirus Vaccine for children in Washington State schools or anyone else.

As Americans we have sovereign jurisdiction over our bodies. Parents know their children best and should make ultimate medical decisions for their children. They can consult their doctors or faith leaders. Parents want to make informed choices about what goes into their children's bodies. Children are not at great risk of Covid-19 or of spreading it. I urge the Board to vote No or Against the Covid-19 vaccination recommendation for Washington's school children.

Sincerely,

Janet M. Young

Dear board members, these proposals should be opposed.

9. Rules Hearing Continuance - Communicable and Other Certain Diseases, Chapter 246-100 WAC

11. Rulemaking Petition - Immunization Criteria, Child Care and School Entry, Chapter 246-105 WAC

They are not based on the best (world wide available data and science), current information that we have about COVID risks for people--and especially for children. They perpetuate a hysteria over COVID risks that do not do individuals or the state at large enough good.

I oppose mandating the jab for anyone. The latest science from around the world is in and for those that have eyes to see. Please open your eyes. Consider also the Supreme Court findings and arguments.

It's very obvious scientifically that the first mandatory covid-19 vaccines do not work as many people are still able to get the covid and spread the covid , then we get the second dose that still doesn't protect us , we can still get the covid and still spread the covid . Then we are encouraged to get the booster which doesn't protect us either , and we can still spread the covid . Personally in my family my mother has had 3 vaccines ( moderne (2 shots , plus a booster) this Christmas she has been infected with the covid .

Until we see mass death and a real pandemic 99% of the people can agree IS a pandemic - there is nothing to see here. Please concentrate on solving some problems both sides of the isle agree are issues.

I have had the vaccinations growing up , they have been in use for over 60 years . But please listen to Fauci and the CDC . There is a .019 % . Chance you will die only if you are in senior citizen age range . That's less than 1/10 ( 1 Tenth ) of individuals that have preexisting conditions that are estimated 60 and older . The children are not at risk .

Even if we say the children will spread it to the adults , you add the fact the vaccines do not work , don't continue pushing the vaccines. Tell the truth , the truth is the vaccines are really only shots (medicines that hide the symptoms ) . And when you hide the symptoms it can spread even faster . Tell the truth , people will listen more and make good decisions .

And yes , these vaccines which don't stop the spread of covid , which just came into existence in the last two years . We have no idea of the long term effects .

I believe in vaccines , shots , Medicine should be free will ( many many will get it) but it should be wanted , not forced .

And personally I see this causing an uprising that can have many negative domino effects in the state of Washington . Please listen to the people .

Thanks,

Aaron Culver

Washington State Board of Health members,

\*I am opposing WAC 246-100 Rule making that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.\*

Let's think about what kind of world we are creating for our children.

Do we want them to have free choice as to what happens to their bodies?

Didn't our forefathers fight and die for those right and freedom?

Let's create a world for them in which we can leave it peace when our time comes.

Thank you for your consideration

Kind regards,

Fran

To whom it may concern,

Regarding WAC 246-105

I want to remind you that children are at an extremely low risk for Covid. The vaccines are still ONLY EUA! There are no long-term studies to document ANY history of safety. Studies do now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently DOES NOT stop the spread of the virus. In which case this would make no common sense to impose.

Regarding WAC 246-100

This is insane and stripping families of our rights. You have no authority to force any of this on us! If this happens my family will leave Washington state along with many others.

Please listen to the community!

From: Brent Hackney  
Sent: 1/7/2022 9:45:47 AM  
To: DOH WSBOH  
Cc:  
Subject: Mandatory Covid vaccinations of all WA students

External Email

Please consider not making Covid vaccinations mandatory for WA students for the following reasons:

- \* School aged children are at extreme low risk for Covid.
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety from the COVID vaccine.
- \* Studies do now document that covid vaccinated individuals can still transmit COVID, therefore, the vaccine does not stop the spread of the disease.
- \* Let the COVID vaccine be a choice and not a requirement for any student attending public schools in WA.

After seeing the ineffectiveness of the vaccine first hand, I question this push and what's behind it. The vaccine is NOT FDA approved because it has not gone through the rigorous testing necessary for approval. In addition, never in the history of vaccine approval has one been approved with less than a 50% effectiveness. Additionally, mandating unapproved vaccines to children K-12, who have a 99.9995% survival rate without having had the vaccine, is unthinkable and negligent.

Instead of creating new mandates and rules, please work to rebuild the trust of the citizens.

Thank You,

Brent Hackney

Subject: AGAINST FASCIST POLICIES WAC 246-100 AND WAC 246-105  
Importance: High

External Email

Hello,

I am writing this email to demand the fascist policies WAC 246-105 and WAC 246-100 to be ceased from existence.

Whoever decided to create them, as well as to propose them to the public is cruel and evil in their nature just like the policies themselves.

History shows that whenever government officers were allowed to affect people's lives in such a manner these policies allow them, there were millions of people who were denied their basic human rights of choice and freedom. Because of the same in their nature policies, 6 million Jews were brutally killed, and millions more of different were traumatized and suffering. And if we are to give these policies even a chance for existence, we will be repeating the same mistake here in the United States, the country of the free.

We CANNOT and SHOULD NOT allow policies like that to exist. It is against human rights, rights given to us by God himself, the rights protected by the constitution. The

constitution is designed to limit the government because absolute power corrupts absolutely, and our leaders are already corrupted. However, these proposed policies override the constitution and provide health officers absolute power, which makes these policies UNCONSTITUTIONAL.

It is clear that the pandemic, mainly created as a political tool to place power in the hand of just a few cruel people, has nothing to do with the proposed policies that cease human freedom. We all saw that somehow states like Florida, where people continued their normal lives, and somehow had even fewer cases of COVID compared to the Marxist states like California. It is not a question of protecting people's health because it is to be taken care of by each person individually by each individual, not by the government. That is, I am raising my voice AGAINST these UNCONSTITUTIONAL, UNHUMAN, IMMORAL, EVIL IN THEIR NATURE policies. I am raising my voice as my God-given constitutional right for the sake of the future of this generation, the generation of my future children and their children, and for the sake of this country.

I expect to hear a personal reply to this email, as it is my right and your obligation to read it thoroughly to take action upon the people you represent and whose constitutional rights you are to protect.

Best Regards,

Aleksandra Ankuda

Subject: Jan 12, 2022 meeting RE: inclusion of COVID-19 in infectious disease WAC codes

External Email

Please enter these comments into the official record of your meeting scheduled for Jan 12, 2022 concerning including COVID-19 in infectious disease in WAC codes.

RE: Including COVID-19 injections as part of school immunizations requirements using WAC 246-105, the purpose of this WAC is "to protect children and the public against certain vaccine-preventable diseases." Since it has been well documented across the nation and around the world that none of the COVID-19 injections neither prevent a person from getting nor spreading COVID-19, including this injection into the WAC does not meet the stated purpose of the WAC.

RE Including COVID-19 in the infectious disease WAC codes: The Governor Inslee administration has so badly abused its emergency powers involving COVID-19 that it is inconceivable that increasing His power would even be considered. Inslee has claimed that an event lasting 2 years falls under his emergency powers. Furthermore, the severity of COVID-19 has been exasperated by government actions that not only restricted access to early treatment therapeutics but attempted to restrict citizen's access to any information that conflicts with their edicts. The latest omicron variant, while more transmissible, appears to be less virulent. This being the case, it seems unadvisable to over-react by codifying something that may turn out to mutate into something no more than a bad case of the flu.

Hello,

I live in Centralia WA and have been made aware of the proposed policies to be presented on January 12th.

I am writing to register my opposition to both mandated vaccines for school attendance and involuntary placement in quarantine camps for those who resist complying with unconstitutional medical interventions.

Please seriously consider what the enforcement of these WAC codes would mean for our free society. Because Covid-19 is a treatable and low risk illness for most individuals - especially children, these actions would be absolutely unnecessary and contrary to our state and federal constitutions, resulting in the loss of freedom for countless individuals.

Respectfully submitted,

Cassie Townsend

/

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will.  
Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Lynn Landstrom

To Whom It May Concern,

As a citizen of Washington State and a parent. I ask that you oppose any revision to WAC 246-100 and WAC 246-105 as it relates to COVID-19 virus.

1. The vaccine is currently under emergency use authorization. Such vaccines should not be a requirement.
2. With the current omicron variant we see that the vaccine is not effective. It is unclear on the vaccine effectiveness moving forward because this virus is changing so quickly with new variants
3. Kids are low risk when it comes to COVID-19. From my own experience I have had COVID with symptoms and my three children that live in the same home were asymptomatic or did not get it at all.

Thank you for your consideration.

Subject: Re: Covid 19 injection requirement for school children

External Email

PS to below message: WAC 246-105-040 requires "the department's" guidelines for schools be consistent with national immunization guidelines. I do not believe we have a national immunization requirement for Covid 19. In fact, the attempt to implement a national requirement for Covid 19 injections has been struck down by the federal courts, so there is no national guideline for you to follow.

Chrystal Perrow, Winthrop, WA

On 1/7/2022 10:08 AM, Chrystal or Ron wrote:

According to the Proposed Policies you all will be considering during the next few days, you want to allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person ... following refusal to voluntarily comply with requests for vaccination. You also want to include the Covid 19 injection as part of school immunization requirements.

The Covid 19 "injections" (as identified by you above) are not vaccines. They do not prevent contracting Covid 19. We now know that many fully injected people are getting Covid 19.

Also children have an extremely low chance of getting Covid 19 and if exposed, their survival rates are over 95%! So where is the necessity for an Emergency Order to require all school children to have this shot? We are seeing too many children suffer from permanent heart damage after receiving this shot, and even dying.

Bottom line: You are considering passing an emergency order to require a shot that is not a vaccine to protect children from a disease they can easily survive, but which shot may cause them permanent heart/health issues.

I would not want to be you when the lawsuits begin by parents whose children become permanently injured by these injections. The information is out there and easily accessible. Please do your homework before you make this draconian decision for all school children.

Chrystal Perrow, Winthrop, WA

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Please for the love of Humanity and God stop this rulemaking.

Cheryl

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

To whom it may concern,

I'm contacting you all to express my sincere concern for these unconstitutional mandates. I vote NO on the following:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100-105

Most Sincerely,

Patricia Hines

Subject: COVID-19 vaccine requirement for schools in Washington State

External Email

Good morning,

I am writing to express my extreme opposition to the implementation of a COVID-19 vaccine requirement for schools in Washington State.

Here are the primary reasons why I oppose this requirement:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it." Since we do not know the long-term effects of the vaccines, it is irresponsible to inject so many growing and developing children with them.

Force vaccinating healthy children for a disease that is not dangerous to them to make adults feel safe is a new low for humanity. As a newlywed who is planning on having children soon, I am horrified by how Washington state is putting children at risk and wondering if it is safer to raise children elsewhere.

Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Robyn Antoine

Dear Board Member,

I am AGAINST mandating the shot for children to attend school. Children are at extremely low risk for Covid. The shots are still only EUA (emergency use authorization). The FDA approved drug is not being made or available in the US. This is an experimental drug and is covered by the Nuremberg Code.

Children are our most vulnerable and valuable asset. They should not be required to take an EXPERIMENTAL drug in order to attend school. The risk of lifetime damage from the drug during their formative years exceeds the risk of death from covid.

1. More children die of the flu than covid.
2. More children die in car accidents than from covid.
3. According to the CDC/VEARS reports, More children have died from the shot than from covid.

There are no long term studies to see the effects of this therapeutic on children. There have been cases of myocarditis ( a life shortening disease) that especially show up in children who participate in sports.

We need to protect them from possible life long damage.

AND the Shot/Therapeutic is NOT working for Omicron. It was made for Alpha.

The Health Department should NOT MANDATE a product with this FAILURE rate. The original claims for this product were WRONG. How many more problems may be on the horizon from this experimental drug??? What if myocarditis rates increase in children with time? What if neurological problems in children increase with time? How many other issues? Possibly fertility issues in both males and females?

Who will assume the liability for this mandated experiment for the damages to the children??? Are you were willing to pay for damages caused by a shot that doesn't work maybe even half of the time against a virus that kills less children than the flu or car accidents?

VOTE NO on the mandate to ensure the health and safety of our children.

Sincerely,  
Marilyn Bennett

Subject: Vaccine requirements

External Email

My family strongly opposes requiring the Covid-19 vaccine to attend school. All other required vaccines have had a MINIMUM of 10 years of studying for efficacy, and side-effects before becoming a required vaccine.

The small pox vaccine was first developed in the late 1700's, and was not mandated for almost 200 years later, in the mid 1900's.

Polio took nearly 50 years.

We simply do not know any longterm effects this vaccine will have on our children. I personally know a 14 year old girl who lives in Spokane, who days after receiving her second shot fell to her knees screaming in pain that her heart felt like it was going to explode, while she was playing basketball. She is now unable to play her favorite sport.

There are MANY reports of adverse reactions to the vaccine in children, including myocarditis, seizures, paralysis, etc.

More children have been harmed by the vaccine than have been by the virus itself.

If the vaccine becomes a requirement for school, we will pull all of our children out of the Peninsula School District.

Please do NOT vote to make this vaccine a requirement to attend school, and do not vote for the state to have the power to forcefully quarantine, separate families, and administer vaccinations against people's will.

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Washington State Board of Health Members,

I am a resident in Chelan, WA, and wish to STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The government has no right to force anyone to take anything into their bodies they do not choose to take. This idea is equal to the taking of God-given freedoms in Nazi Germany. It also is criminal to punish or detain anyone for their choice of medical freedom. Reference the NUREMBERG Code! A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and it's variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. Both me and my husband, age 65 and 75, (unvaccinated) with several comorbidities had Covid in June and July of 2021 (Delta variant) and survived. Our God-given natural immunity kicked in and we successfully navigated the disease and are now stronger for it. Allowing people's natural immunities to fight this virus is the ONLY way to reduce its strength. The mRNA vaccines are EXPERIMENTAL and should not be forced on anyone, period! These vaccines have been proven to carry more of a health risk than getting Covid! Look at the VAERS reports!

Also, we have the same opinion about not mandating children to be vaccinated against Covid. Almost ALL children survive the virus as easily as the common cold or flu virus. Again, these vaccines are EXPERIMENTAL and have not yet proven to be safe! Heart, nervous system, and other systems in the bodies of young people receiving these vaccines are being affected in atrocious ways! The risk FAR OUTWEIGHS any benefit! It is truly WRONG to mandate these vaccines when natural immunity is very effective against this virus!

Please accept our concerns and recommend AGAINST these proposals being presented.

Sincerely,  
Catherine Anderson

To Whom it may concern,

I am completely against any of the proposed Covid policies listed below. They are overreaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

There are numerous reasons why I feel that mandating such laws go against our Constitutional Freedoms and the wellbeing of not only American's but our world.

Thank you for taking time to review my email.

Respectfully,

Tamara Erstad

To:  
Subject: Comments for the Immunizations Technical Advisory Group

External Email

Good morning,

I am emailing to let you know that I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

To pass this mandate considering the above reasons is criminal and those kids that die or have major health complications due to the vaccine will be on you. To subject our kids to potential long term health issues for something that is not a major risk to them is beyond wrong. There is plenty of data and statistics proving that kids do not need to be vaccinated. You need to stand up and do what is right. Our kids need to be protected from this vaccine until further studies and longterm history can prove it is safe.

Please do your part in taking a stand against the mandate for our children.

Thank you,

Robynn Langley

Subject: Against Covid-19 vaccinate mandate for children to attend school

External Email

Hello,

I am currently an educator and parent of two students who attend public school. I have been a resident in Lynden, WA for over 13 years. I am strongly against mandating the Covid-19 vaccination for students to attend school. There are many reasons why. Here are just a few;

1. The vaccine has not proven to stop individuals from getting Covid-19
2. Covid-19's death rate (especially in children) is .01 percent (October 2021)
3. The vaccine has not been tested long enough, so we do not know the long-term negative side effects
4. Many of the negative side effects from the Covid-19 vaccination are worse than getting Covid-19 itself
5. There is no consideration to those that have had Covid-19 and have natural immunities

I am not an anti-vaccination person and believe in vaccinations. However, this is a horrible over reach of power. Long-term health is not being considered, if this mandate is pushed through. Individuals need to be able to make the best decisions for themselves and under aged children. Every situation is different. There is also no thought or consideration given to natural immunities.

Thank you for your time,  
Jacqueline Vanderpol (a concerned parent and educator)

Dear Board Member,

With headlines like this today, I do not think there is enough information for the board to be making a mandate for shots for covid! SAY NO TO ANY MANDATES. INFORMED CONSENT is required for medical decisions by the individuals and parents of minor children.

Judge Gives FDA Just Over 8 Months to Produce Pfizer's Safety Data

The decision rejects the FDA's request to release the data over what would be 75 years.  
Sincerely,

To whom it may concern:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring that anyone take an EUA product or licensed product that has not yet completed Phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating the shots for schools. I oppose any Covid-19 shot mandates because each person needs to weigh their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-17 it is at 0.00002 (99.998% survival rate) which is statistically a zero death rate. Beyond that, when you consider that most hospitalizations for the young are with Covid-19 and not for Covid-19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions than of a serious Covid-19 illness. We must protect our young before we consider self-protection.

Sincerely,

Tresa Baker

Subject: Comments regarding Covid-19 Vaccination Requirements for School Children

External Email

Good Morning,

I am not "anti-Vax", both my wife and I have been fully vaccinated however I do not support a mandate for all school age kids to be required to be vaccinated for a number of reasons.

1. Covid Vaccination, especially given the vaccines are still under EUA, should be a decision between patient and doctor and not a requirement of the schools. I understand that other vaccines are required, however they are all FDA approved while Covid vaccines are not approved by FDA.

2. Covid in children is generally mild and therefore the risk of Covid related infection does not necessitate requiring children to be vaccinated and exposing them to the risks of the vaccine. My kids have all had Covid and all of them responded well and thankfully had a very minor case.

3. At minimum natural immunity should be allowed as an alternative to vaccination when considering vaccination status and Covid risk in children. That's only common sense. There are a huge number of studies that demonstrate natural immunity is better than the vaccine especially against Delta and Omicron. Here's one out of Israel that demonstrates natural immunity is vastly superior to vaccination

(<https://www.medrxiv.org/content/10.1101/2021.08.24.21262415v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.24.21262415v1>> )

4. There are risks of cardiac adverse events in kids post vaccination which are well known and documented

(<https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.30.21262866v1>> ) which are pretty scary.

5. This same study indicates kids are 4-6 times more likely to develop myocarditis than end up in the hospital for any reason associated with Covid. Think about that for a second - 4-6x risk of a terrible heart disease versus being admitted to the hospital due to covid.

The bottom line is that requiring vaccination is trying to solve a problem that barely exists and exposes children to potential health challenges as a result of the vaccine. Parents and doctors should be allowed to make risk reward decisions for their children and schools are not a significant at risk environment for Covid 19 related illness.

January 6, 2021

RE: January 12, 2022 meeting

- Opposition to Agenda Item #8, the Board's formation of a Technical Advisory Group
- Support for Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

Ladies and Gentlemen,

I am sure others have provided you with sound research, properly conducted, to demonstrate why we should not be mandating vaccinations particularly in children. As such, there is no need for a Technical Advisory Group on this matter; thus Agenda item 8 pertaining to this should be voted down. To form such a group results in a very small number of people steering decisions for children and their extended families statewide. As of July 2021, the US Census Bureau indicates the state population over 7.7 million with 21% being under age 18. You are making decisions on behalf of 1,625,125 children plus several million other family members, for that which affects one person affects the whole family.

Now what type of information would these decisions be based upon? What has been the quality and accuracy of public information given to the WA state government and citizens received these two years? It has been a rollercoaster of bait-and-switch actions. The issuers of official guidance—FDA, CDC, NIH, etc. referred to collectively as “Federal officials”—told us the vaccines would prevent people from becoming ill with Covid-19. Once enough vaccinated people caught Covid, they switched to saying it doesn’t prevent infection but prevents death, and that people will suffer much less if vaccinated prior to being infected. Meanwhile, they deny Covid deaths amongst the vaccinated, spreading for many months the soundbite that the vaccinated have a 1 in a million chance of dying from Covid. This is a rare outlier figure that cannot be substantiated and defies common sense. More realistically:

“[...] the exact definition of rare disease, or orphan disease, varies from country to country. The National Institute of Health classifies a rare or orphan disease as one with fewer than 200,000 cases in the country. The European Union defines it as any disease that affects five or fewer people out of every 10,000. Whichever definition you use, the answer is the same: Thousands of rare diseases affect millions of people every day.”

The guidance from the Federal Officials later dropped to 1 in 250,000. However, you can still see by the NIH own definition that this is an outlier figure, one that would not pertain to a general population. And the Federal Officials in collaboration with the media do not accurately depict the increasing rates of Covid deaths amongst the vaccinated. Meanwhile, the CDC still promotes adverse effects like Guillain-Barré Syndrome as rare when at the same time the American Neurological Association is following the significant occurrences of post-vaccine incidents . The lists could go on and on, as for two years we have had very specific messages intentionally aimed to conditioning the general public

through collaboration with media outlets.

In spite of various legal actions nationwide against mandating vaccination, Washington state has chosen to expedite vaccinations, modeling for organizations statewide to terminate thousands of workers by accepting but not accommodating exemptions. While at the same time various officials speak of the 'unknowns', they advance controls with penalties to citizens at a rapid speed based on insufficient and even faulty science. For example, just this week, the National Comprehensive Cancer Network® updated their Pre-exposure Prophylaxis recommendations:

"research shows many immunocompromised people develop inadequate immune responses from vaccines. Thankfully, we now have additional tools to help people in active treatment for cancer, solid organ transplant recipients, engineered cellular therapy (e.g. CAR T-cell) or stem cell transplant recipients (a.k.a. hematopoietic stem cells), and those with other immunodeficiency-causing conditions (such as HIV, DiGeorge syndrome, or Wiskott-Aldrich syndrome)." [...] "The Food and Drug Administration (FDA) has issued an emergency use authorization for the monoclonal antibody combination of tixagevimab plus cilgavimab for pre-exposure protection from COVID-19 in adults and children starting at age 12 (weighing at least 40 kg) who have moderate to severe immune compromise and may not be responsive to vaccination. Patients with blood cancers (including those receiving stem cell transplantation or engineered cellular therapy) are more likely to have inadequate responses to COVID-19 vaccination" {...} "We have new agents to prevent and treat COVID-19 that will benefit patients with cancer"

Meanwhile, "the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission." [...] Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else." [...] Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated." In contrast to the narrative espoused in collusion with media outlets, vaccinated persons do carry the same, and sometimes higher, viral load as the unvaccinated, thus the unvaccinated are not the super-spreaders.

Now we face Omicron which is 95% of Covid-19 cases; experts agree it is milder than previous Delta and will not result in as many hospitalizations nor deaths. Yet the public remains conditioned to believe the deaths occur amongst the unvaccinated, and WA state government continues driving policies and taking actions with this presumption as well. In addition to VAERS data (which has been demonized in the narrative) and reports from many countries, an example of our government's own data would be the HHS' Countermeasures Injury Compensation Program (CICP) Data of the 4751 Covid injury claims. The program only has 5200 claims of which 4751 claims pertain to Covid-19 treatments. The Epoch Times earlier reported that out of this 4751, 2297 are claims of adverse effects from vaccination with over 600 deaths in these claims. Forbes reported that the HHS states there were only 1357 vaccine claims and 53 of these were deaths. That is 3.9% of the claims. The article also demonstrates how the government is not paying compensation for Covid vaccines and the new limitations it has placed upon them.

Adult Americans have been the human experiments for these vaccines for too long. Officials in the FDA and CDC have made statements that go without recourse such as males under age 40 have greater chance of suffering debilitating damage from the vaccine than from the Covid virus itself. There have been many studies substantiating that. Last month, a panel of advisers to the Centers for Disease Control and Prevention unanimously recommended people do not take the Johnson and Johnson vaccine due to adverse effects and deaths. Unfortunately, this came after 16 million Americans had already had J&J. Other countries had already banned the J&J vaccine and have banned

mandates as well.

Now we suffer the move to experiment on our children despite that a systematic review of the research found:

“five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially”

Last October, FDA panelist and Editor in Chief of the New England Journal of Medicine Eric Rubin said “We're never gonna learn about how safe the vaccine is until we start giving it. That's just the way it goes.” Given that the tweet had 1.8 million views, I assume you are already aware of this. Since last spring, the death rate associated with Covid-19 in Whatcom county has run at or just under 1% for all ages. Meanwhile, the obituaries and testimonials of vaccine survivors increase as tens of thousands of people, with all good intentions to serve their country, are maimed and killed by the vaccines. And who could ignore athletes in their prime, particularly soccer players, collapsing on the field? With 183 deaths so far and hundreds more injured, young adults have suffered.

You can now see the need not only to vote down item 8 Technical Advisory Group but also to approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

While it is a dearth of information, I ask that you take time to seriously review in detail the resources provided by me and others prior to Monday's meeting. Thank you in advance for doing so.

Sincerely,  
Renee M. Baranek

Vote NO on this policy. VOLUNTARY is not VOLUNTARY if this is implemented. ONLY if Illegally entered the country and are not US citizens.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Sincerely,  
Marilyn Bennett

Dear Mrs. Donahoe,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent to 6 children in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) provide evidence of asymptomatic spread of SARS CoV2.
- 5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.
- 8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board that you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for

which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! My college son's roommate suffered myocarditis shortly after his Pfizer booster and is now unable to resume an active lifestyle for the next 6 months and possibly longer! Heart muscle doesn't regenerate and unnecessary injury to a healthy 19 yo is a travesty he will suffer with for the rest of his life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on <x-apple-data-detectors://2> January 12.

Thank you,  
Therese Hendrix

\*I am able to provide evidence of any claims made in this letter, just let me know what you need substantiated.

Subject: Concerned Parent

External Email

Dear member of the Washington State Board of Health,

I am writing to you as a concerned parent regarding the upcoming decision as to whether the Covid vaccine should be required for school age children for the 2022-2023 school year. My husband and I have 3 children ages 12, 9 and 7 years, one boy and 2 girls. We have a close family member, who is fully vaccinated, that had vaccine related myocarditis a few months back and has still not fully recovered. Sadly, there are 22,117 cases of confirmed myocarditis/pericarditis in the US CDC VAERS system, as of December 24th, 2021.<sup>1</sup> With high rates of myocarditis being reported as an adverse side effect from the vaccine in boys ages 12-17, that is a serious concern of ours for our son. He is an active football player, and we are concerned about the long-term effects of myocarditis, especially since it has not been extensively researched in kids.

I believe consideration should be given for families who have had positive Covid cases, have fully recovered and now have antibodies. There seems to be a blatant disregard in our community, and Washington state as a whole, for anyone who has fully recovered from the virus and can prove they have antibodies. Someone I know personally had to jump through major hoops to be able to attend an event in Seattle. They were told they needed to present a negative covid test taken within 72 hours of the event OR an antibody test. This individual got the antibodies test done before the event and then double-checked with the organization a day before to ensure they would still accept the antibody test. They said they would not accept it and a negative covid test was required to attend. There are currently 140 studies available on the robust, durable protection of natural immunity from around the world by hundreds of scientists, researchers and doctors.<sup>2</sup> Why is this not a part of the conversation in our country and state??

Studies have shown that Covid affects children far less than it affects adults and over 16,000 physicians and medical scientists around the world are declaring that healthy children should NOT be vaccinated against Covid.<sup>3</sup> To require mass vaccination of school age children with a vaccine this is STILL under Emergency Use Authorization is wrong. We as parents still do not have clear lists of potential side effects and complications of the vaccine and we should have the right and freedom to weigh the pros and cons for our individual children based on their health history.

Our country was built on freedom and choice. Our state government and Board of Health are taking those freedoms away from parents by implementing mandates regarding the virus. Even at a national level the vaccine mandates have stopped. Why is our state continuing to push these mandates?? It is unnecessary. Let parents make decisions for our children, which we have been doing all their lives. Please take a step back and look

Subject: No to vaccine mandates

External Email

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects ([www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>> ) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Please stand behind and protect parents rights to choose what is best for their children. Please respect freedom of choice. Please respect bodily autonomy and informed consent by saying NO to mandating the Covid vaccine for our children.

Thank you for your time,

Nicole K

Subject: RE: Vaccine Mandates for Children

External Email

Good Morning,

These vaccines are ineffective and dangerous for our children. There is no upside, no "benefit" to experimenting our most vulnerable population. However, the costs of this overreach are innumerable. There is no doubt that even a cursory glance at the stacks and stack of data prove these vaccines and all other child-related mitigations are morally wrong, physically and emotionally dangerous and entirely unnecessary. Everyday, there is mounting evidence of fraud, bias and abuse in the process that brought us to this sad point in time. If you choose to mandate these vaccines or continue with ANY other Covid protocols, I will remove my children from school. You do not and will not control MY children.

Further and according to your own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so beyond the logical arguments made above, the vaccine does not meet Board of Health requirements. I demand the vaccine be removed from consideration until and unless it proves immunity to stop transmission like other common vaccines do- which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, I am certain these mandates are illegal.

Yours in deep sincerity,

Gar Hansen

Please vote no on any vaccine mandate of Covid 19. We do not know the long term effects of this vaccine. We also know that children are not at risk if they catch Covid 19. We know that the vaccine does not stop the spread of the virus (PER CDC AND FAUCI) and I may suggest that if a vaccinated person with light symptoms may not realize they have Covid and may be out in society spreading it. PLEASE DO NOT ALLOW ANY MANDATE.

To my Washington State board of health member: I am writing to plea against the upcoming vote to strip away my civil liberties and mandate vaccinations which is unconstitutional. Also I do not agree with enforcing vaccines in schools or the confinement and isolation of families or groups not willing to vaccinate or quarantine. This is still America correct?? How in the world are we being so blinded to the corruption of the government and pharmaceutical companies that we don't even remember civil liberties and why America is great!?! Please do not be swayed by pressures from higher up to make these long term injustices legal. I am in health care and I do not think this is a just enforcement of power and personal rights being ignored and powers being stripped away. What's next I ask? Give an inch and the mile comes next... I would like to maintain my rights to life (unimpeded by Vaccine side effects), liberty ( free will and choice to respect my body), and the pursuit of happiness (not enforcement camps and government illegal mandates that I do not agree to).

Thank you for representing me and my rights with a vote against these proceedings and mandates on Jan 12th.

Sincerely and confidently,  
Erica Black

Hello,

I am writing to you to ask you to not approve the mandate for covid vaccination. This vaccine does not prevent you from getting the covid virus, it will help with lessening the severity of symptoms. I believe in medical freedom for my family. If this passes the state will lose money from the federal government as many parents will pull their kids from schools. The vaccine is not even approved by the government. It is still in the EUA stages and not enough research has been done with the vaccine to prove it is safe.

PLEASE DO NOT APPROVE THE MANDATE!!!!!!!!!!

Subject: Upcoming Vote regarding mandates for vaccine

External Email

To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time, however, it is viewed correctly today as a human rights abuse. It was a decision made
