1/3/2022 6:59 PM

I feel strongly about not having my children vaccinated. If the state mandates them for children, we will seek another form of education.

1/3/2022 6:59 PM

There is no way to speak to the long term safety of these vaccines. Children are not at risk, and being vaccinated does not prevent ability of an individual to contract and spread COVID. If it did... this might make sense, but it doesn't. There is not reason you should even be considering. We know more than we did when this started, and we should no longer be so trigger happy. This is gross. For the record I am NOT and anti vaxxer. My kids have been fully vaccinated from the very beginning.

1/3/2022 6:59 PM

As I am typing this on January 3rd, 2022, according to the Spokane County Regional Health District's website under COVID-19 case data, there have been 4 recorded deaths related to COVID in anyone under the age of 19, which is all of the students in Mead School District in the entire Spokane County, SINCE MARCH OF 2020. ALMOST TWO YEARS. Does this statistic mean anything? Does this one statistic alone not prove that pushing this vaccine, let alone mandating it, for K-12 aged kids IS NOT NECESSARY? My goodness, it's difficult to find that low of a number for any type of death like auto accidents, suicide, flu, pneumonia, etc., etc over an almost two year span for a particular age group. And yet, amazingly, a mandate is being discussed for an age group that is clearly not at risk. Let parents and kids decide for themselves. If people want to go and get their kids

vaccinated, great. Let them do that. If they don't, fine. Freedom of choice is paramount on an issue like this. Especially when you look at the data of how COVID affects this age group of kids and find the numbers are SHOCKINGLY LOW.

1/3/2022 6:59 PM

My family has had COVID-19 and recovered from it with no lasting effects. There is no reason to take on the risks of the vaccine side effects in children when we already have more effective natural antibodies.

1/3/2022 6:59 PM

Will absolutely not vaccinate the children no matter what

1/3/2022 6:58 PM

I support vaccination requirements in order to protect the most vulnerable in our communities, both students and their families. I also support reasonable exemptions.

1/3/2022 6:57 PM

I do believe there should be an exemption process even though I will not be wanting it for myself.

1/3/2022 6:57 PM

I am in favor of a vaccine mandate.

1/3/2022 6:57 PM

Stand up and get with the parents of your school district. This is a decision held at the family level and doesn't need to be any of your business. You mandate this policy, you will lose a significant amount of your students.

1/3/2022 6:56 PM

If there can be an exemption for all other vaccines for school age children then an exemption must be offered for the COVID-19 vaccination, otherwise you are telling us what to do with our children and that would be a dictatorship and not a choice!! Also, if the Washington State Governor believes that the COVID-19 vaccination must be required for all school aged children then it should be required for his grandchildren at their private school and not just my kids at their public school!!!!

1/3/2022 6:56 PM

A vaccine mandate is unconstitutional. It would be outrageous to force our children to get a vaccine that has more negative effects than positive. If the vaccine worked then the vaccinated wouldn't be getting, spreading it and carrying it. This vaccine will not touch my child.

1/3/2022 6:56 PM

There is a small fraction of 1% of school age children who will have a severe adverse reaction even if they get Covid. All the people I personally know who are getting Covid are fully vaccinated and boosted and are getting it from others who are vaccinated. My 13-year-old will NOT get vaccinated at this time!

1/3/2022 6:56 PM

Science is clear about kids. These vaccines do not benefit them. They are not at risk from covid and at more risk from side defects from the vaccine. NO!

1/3/2022 6:55 PM

I will NOT under any circumstances vaccinate my children for Covid. There are NO approved vaccines and my children will not be used as a social experiment. I will withdraw my children (and all future support in the form of voting for any funding for schools) from public school.

1/3/2022 6:55 PM

This vaccine hasn't proven to be effective. Mandating an experimental vaccine on anyone, let alone children, is bizarre. Children are still growing, the long term effects are unknown with experiments. This could create chaos, and kids don't need any extra stress at school. This pandemic has done enough damage. Many parents will withdraw their kids from schools, therefore, could change education budgets. How will that change the future of education? Being forced leaves a sad, strange, and scary feeling over parents. Kids sense these feelings from their parents, teachers, and peers. Some will get the vaccine for their kids, not because they want to, but because they have no alternative education options for their kids. What a horrible thing to do people. As I type this out, I am still in disbelief this is even something that needs expressed.

1/3/2022 6:55 PM

This is an absolutely reprehensible idea to enforce taking this drug on our children in order to get an education from a publicly funded institution. The benefits do NOT outweigh the risks, which is a reason in itself not to give any drug, let alone force it upon children. The officials trying to unconstitutionally force this on our most innocent population are truly evil people and should immediately step down. We will not comply.

1/3/2022 6:55 PM

We will not vaccinate our children with any Covid vaccine. We will, without a doubt, pull our children from the Mead School District and homeschool or send them to private school.

1/3/2022 6:55 PM

I don't care what mandate comes down. You will not inject my child with anything. And my child will not be forced from school regardless of vaccination status. I will not take on the economic burden of paying for alternative education when the state takes my money no matter what to pay for public education. It is not the school districts, the Governor, or the health boards job to decide what is best for my child's medical procedures. That is between us and my child's doctor. We will not comply.

1/3/2022 6:55 PM

The vaccine for COVID should not be required for children to attend school. The vaccine does not stop or prevent a person from getting COVID. The same way the flu shot is just a guess at what strain may be out. This is not like the polio or MMR vaccine which prevents them from contracting those viruses. Also, the long term impact on children receiving the COVID vaccine is unknown no one knows how this will impact our children in 10-15 years. Also, the children are at a much lower risk for serious illness. Dr. Fauci even came out and state that the hospitalization numbers for children are over stated because they don't know how many were in the hospital because of COVID vs a child breaking his/her arm and testing positive and counting towards the numbers when they had no symptoms. Children have the right to attend school without being forced to be injected with a vaccine the world doesn't know long term impacts and doesn't even stop someone from contracting the virus.

1/3/2022 6:55 PM

meeting, do it. Mandating an experimental shot for children (or anyone for that matter) is reckless, unconstitutional, against any and all scientific facts presented showing that our children have nearly zero risk from this virus, against the Nuremberg code and should result in termination of any and all

duties for our government officials, teachers, school administrators, doctors and whoever else is trying their best to advocate for this shot. You should be ashamed of yourselves for promoting this entire idea and educate yourselves from the actual doctors who are being censored while trying to relay how unbelievably immoral it is to give this unapproved, unknown consequence, money-driven substance.

1/3/2022 6:55 PM

I just hope our board keeps the health of our students and following the guidelines that have been proven to keep them safe as the main priority and not choose to cater to those parents who are willing to risk their and their children's (as well as other people's children) health.

1/3/2022 6:55 PM

Vaccine mandates with exemptions seems a likely fallback position. Given that breakthrough infections can still occur in vaxxed persons (vax, to my knowledge, reduces both risk of contracting and risk of severe illness, but isn't a guarantee of immunity) outbreak policy may not be able to vary meaningfully for vaxxed/unvaxxed, so continuing a sane policy of masking, quarantine days, close contact analysis, and allowing folks to return with a verifiably legit negative test (possibly takeable at school?) make sense. Our kids and extended family are already vaccinated. This was a "mandate" to us when we saw this sweeping through the world, so no skin off of our nose if this becomes the expectation. At the same time, I know there are other positions and legitimate reasons for exemptions, so I believe that it is reasonable to allow for that. Thank you for your efforts to take this seriously, involve scientific authority, react to the dynamic situations, and find a tricky balance between reflecting our community representation to the state government and still keep our kids and community safe in a pandemic.

1/3/2022 6:55 PM

Vaccine mandates are against the law and breaks the Nuremberg Code. Absolutely unacceptable!

1/3/2022 6:54 PM

Vaccines are a personal choice and should not be a requirement.

1/3/2022 6:54 PM

This is not a decision that should be made for us. It is a parental decision. This has not been proven to be safe in the long term. Do not take away our freedom of choice.

1/3/2022 6:54 PM

Please explain the need to vaccinate children.

1/3/2022 6:54 PM

The idea of mandating a shot that 1. does not stop you from getting the virus and 2. Doesn't stop you from spreading the virus and 3. Is a personal family health choice is ridiculous. My daughter had CoVid and she has never gotten it again. At some point you will have to look to other things other than vaccine as the answer. (natural immunity and preventative vitamins and medicines. I know many fully vaccinated adults and children that have gotten CoVid several times over. The vaccine might decrease symptoms but does not stop you from getting it or spreading it. I will pull my kids from all public Washington schools systems the second a mandate is made. There is so much data out there from other states and other countries that we refuse to look at. Public school is supposed to be available to everyone as an American right. To force medical procedures that are still new onto children in order to access their right to an education is absolutely unconstitutional. There are many online options for people that still fear CoVid and families should take advantage of that for students

that are still fearful of going to school. For those that are not living in fear, let them be kids and go to school in person.

1/3/2022 6:53 PM

Already vaccinated at our house

1/3/2022 6:53 PM

Submitting again as I received an email with updated links. Absolutely not will I give my kids this shot! If a medical exemption works and is accepted by the district we will stay, but if my kids are made to feel like outcasts because they are not vaccinated I will yank all 3 kids from the public school system. I have a home school backup plan in place should this mandate go through.

1/3/2022 6:52 PM

Do NOT mandate this vaccine!

1/3/2022 6:52 PM

Never should there be mandates to attend public school!

1/3/2022 6:51 PM

No

1/3/2022 6:51 PM

I will absolutely not be vaccinating my children

1/3/2022 6:51 PM

The Mead School District and School Board are publicly financed employees, much like I was for 30 years while working in public service. As a public employee it is the expectation of the tax payer that the employees will seek to ensure the will of the taxpayer is met. Based on research and published scientific studies I believe this experimental MRNA vaccine has had no long term testing on humans and zero published reports on potential long term effects. The FDA has indicated the companies involved have up to 55 years before they are required to release the data in question, yet no entity or person can be held responsible in court for injury to a child from a vaccine. This is a direct violation of the rights of the individual and I will treat it as a violation of God given rights should the vaccine be forced upon my children. I will withdraw my students, I will begin lobbying to stop all levies and taxes associated with the school, I will lobby to discontinue all sports and other activities, I will lobby to enforce that hiring practices include drug and psychological and polygraph testing with no grandfather clause. This is the hill which I will stand upon and refuse to leave.

1/3/2022 6:50 PM

This is madness. There is no justification for vaccinating children. "Actual science" says "no" as does common sense. The vaccines clearly do not protect against contracting Covid nor do vaccinated people not transmit the virus. There are known side effects and to mandate them to children whos risk for severe illness, hospitalization or death is almost zero is malpractice.

1/3/2022 6:50 PM

WA's own power point presentation by Scott Lindquist, MD demonstrates precisely the reason why mandatory vaccinations of children to attend school are unnecessary, unethical, and blatantly unconstitutional. Specifically pages 21-24 demonstrate that 3 out of 100,000 ages 11-19, and 2 out of 100,000 were hospitalized for 7 days due to Covid, however, the power point is deafeningly silent as to whether other factors were also involved in said hospitalizations. Regardless, this is a .002%

and .003% risk factor, meaning that 99% of the time children will overcome the illness and have natural immunity against future infections, a natural immunity which we now KNOW to be better than artificial man made ineffective vaccines. Yes ineffective in that those infected have the same viral load, can spread the virus, and the vaccinated can become sick with the virus. What then is the point, other than to line Big Pharma's pockets? And don't forget the recent study by the CDC where November 29, 2021 CDC Study — No Significant Difference in COVID-19 Transmission Between Vaccinated and Unvaccinated In this investigation, we found no statistically significant difference in transmission potential between vaccinated persons and persons who were not fully vaccinated. Therefore, our findings indicate that prevention and mitigation measures should be applied without regard to vaccination status for persons in high-risk settings or those with significant exposures. In congregate settings, and correctional and detention facilities in particular, post-exposure testing and quarantine remain essential tools to limit transmission when cases are identified, in addition to other recommended prevention measures. Our data add to a growing body of evidence characterizing transmission potential from vaccinated persons. Future studies of transmission potential from vaccinated persons with infection, incorporating similar laboratory-based markers as well as evidence of transmission from secondary attack rates and network analysis, may help to further describe the contributions of vaccinated persons in chains of transmission as the pandemic evolves and new variants emerge.

[https://www.scribd.com/document/543120628/Transmission-potential-of-vaccinated-and-unvaccinated-persons-infected-with-the-SARS-CoV-2-Delta-variant-in-a-federal-prison-July-August-2021#from\\_embed](https://www.scribd.com/document/543120628/Transmission-potential-of-vaccinated-and-unvaccinated-persons-infected-with-the-SARS-CoV-2-Delta-variant-in-a-federal-prison-July-August-2021#from_embed). Also, although white people may wish to take the vaccine, it is clear from Dr. Lindquist's presentation (pg 14) that people of color do not wish to, which would harm and cause increased discrimination against said communities of color. If we truly wish to be equitable, then we should not force people of color out of the systems we claim to want to include them in, by forcing them out with mandatory vaccine requirements. Does WA truly want to be inclusive, or is it merely something politicians say to make themselves feel better. Finally, although vaccines provided benefit for older people, and unnecessary (possibly harmful) protection for younger individuals AGAINST DELTA, said vaccines provide no protection against the Omicron variant, which is infecting the vaccinated and unvaccinated alike at equal rates. As such any mandate to vaccinate people for protection has become a moot issue and is not warranted at this time. Should said mandate be implemented on public school children, I will take my children out of the system. Should such mandate be required in a private school setting, I will take my children out of the State of WA. The lies and misinformation by government, the media, Big Pharma with regards to the one dimensional solution, totally disregarding therapeutics is unconscionable, lacks integrity, and is incredibly disgusting and sad. And again demonstrates the ethnocentric and truly white supremacist attitude of the West. Heaven forbid India, Peru, Mexico and many other countries of color come up with a solution that acts as a prophylaxis that could eliminate Covid (as they did in a province in India AND the WHO acknowledged). Or maybe it has nothing to do with color, and money is truly the root of all evil as these same treatments cost pennies compared to the 32 billion that Big Pharma made last year. I hope whoever reads this has the intellectual honesty, and spiritual fortitude to do the right thing and do everything they can to prevent children from being forced to take part in such a sick twisted experiment on society - which Pfizer admits in it's paperwork that it is still in an emergency use phase, and they can not tell you whether any reproductive toxicity exists due to the lack of time for said study. Yet you want to mandate all children be vaccinated?

1/3/2022 6:50 PM

Absolutely, Unequivocally NO!

1/3/2022 6:50 PM

The best protection we can offer our children is vaccination. This virus is unpredictable and potentially deadly. I feel more secure knowing my child has been vaccinated, I would feel more secure if I also knew that his school district based their policies on science and backed up measures that save lives.

1/3/2022 6:50 PM

This is unconstitutional and absurd, NO my daughter will never get vaccinated, I not oppose to other parents doing what they think is right and vaccinating their child, but there needs to be a choice not an unlawful mandate. The risk for children especially under the age of 25 is less than .0089 % of getting sick from Covid, but the dangers with the vaccine are terrifying. This is serious and If princess inslee does a mandate I will remove my daughter from mead school. And choose private school, I love mead schools and grew up in them but this mandate is crossing the line.

1/3/2022 6:50 PM

The long-term risks of the vaccine do not seem all that well known. The research studies are relatively short in duration, based on small sample sizes, and/or reliant on international samples/studies of a similar nature. The trends/findings reported do not indicate major issues, but we're all still operating on information from shots in arms less than 18 months ago. It'll be some time before I'm comfortable that the findings are valid over an extended timeframe. The risk we're attempting to mitigate among children seem very minor when compared to other diseases we have vaccinated our kids for (polio, MMR, etc). The impact of those diseases on an individual is tremendous. For kids, I don't think that's the case with C-19 and not worth any long term risks and all the boosters. Our school district has successfully been operating in-person with amazingly little impact on our two kids and their classrooms' attendance for almost 1.5 school years. We seem more than capable of continuing on in-person as we have been and leave the decision on whether to vaccinate for C-19, specifically, in the hands of parents and their medical providers.

1/3/2022 6:50 PM

I do not believe there is enough evidence that kids need this vaccine

1/3/2022 6:50 PM

Vaccinations for children are not a new thing to attend school and this particular one should not be treated differently than the others. It should be a requirement to help facilitate a safe environment for all students and staff alike!

1/3/2022 6:49 PM

No mask. No vaccine

1/3/2022 6:49 PM

No

1/3/2022 6:49 PM

I do not believe in or trust this vaccine at this time. Both vaccinated and unvaccinated alike are still getting and spreading the virus, being required to wear masks, quarantine, and test 3x a week for sports. It remains a choice, just like flu vaccine, and I would like to free choice to decide if and when it's appropriate and needed. It's not a government concern.

1/3/2022 6:49 PM

Please vaccinate the children

1/3/2022 6:48 PM

Why on earth would we vaccinate children with an experimental vaccine with unknown long term side effects.. all for a virus that does NOT effect them any more than any other seasonal viral infection?

1/3/2022 6:48 PM

Please, we are begging you to stand up for our right to chose what is best for the health of our children. This is absolutely terrifying and causing a lot of anxiety amongst us parents. Our children have a RIGHT to a public education and we should not be forced to chose between the safety of our children or giving them an education. As a parent with two children, they will no longer be enrolled in Mead Schools if you do not stand up for what is right. We are already exploring alternative forms of education and will pull our child at the first opportunity to ensure his safety.

1/3/2022 6:48 PM

Let parents decide what is best for kids.

1/3/2022 6:48 PM

Due to lack of actual long term testing I rather pull my child from school then be forced to put something I don't trust into my child

1/3/2022 6:47 PM

My kids are already vaccinated. But they don't seem to be working anyway. My daughter for Covid twice

1/3/2022 6:47 PM

No

1/3/2022 6:47 PM

Hands off our kids. Let parents decide.

1/3/2022 6:46 PM

Follow Florida's lead and be done with the nonsense!!

1/3/2022 6:46 PM

I believe that this is a decision that parents should be able to make for their own families, not something that the school requires. While we love the Mead school district, we are 100% committed to removing our children if Covid vaccines are required.

1/3/2022 6:46 PM

Do not take this freedom away from our children! Countless people will leave the school district and/or Washington state if this mandate is passed!

1/3/2022 6:46 PM

Thank you!

1/3/2022 6:46 PM

None

1/3/2022 6:45 PM

We are NOT in favor of any mandates as we believe a person's health (including children) should be at the sole discretion of the individual and their medical providers.

1/3/2022 6:45 PM

Once fully approved, the covid vaccine should be required just like all other vaccinations that currently provide children with protection from illness.

1/3/2022 6:45 PM

This vaccine is unnecessary and potentially dangerous for children. It is a political vaccine. Look to states not mandating anything... they are better off than Washington.

1/3/2022 6:45 PM

The vaccine is not "one size fits all" it's just like a peanut allergy. You do not know who it will effect adversely, and that is not a risk that we should be taking on our children.

1/3/2022 6:45 PM

This vaccine should not be required for anyone. It should be my body my choice and we shouldn't have to choose between educating our children and or putting food on the table. Mandating this is ridiculous. I live in this area for your schools but I will withdrawal if mandates for my children become part of meads requirements

1/3/2022 6:45 PM

Do not force this on our kids. My kids have remained healthy over the last 2 years. They are not Shahid of getting covid, but they are afraid of getting the vaccine.

1/3/2022 6:44 PM

Of course it is important to hear from parents and patrons, but the wishes and desires of educators in buildings is very important as well. Please remember that. Parents speak on this issue from a distance so to speak, while staff in buildings are the true frontline workers in this critical and challenging situation. We must consider staff health in our decision-making.

1/3/2022 6:44 PM

I will not vaccinate my kids under any circumstances!

1/3/2022 6:44 PM

There is nothing good that can come from vaccinating our children that don't have any underlying medical conditions. I'm all for choice to vaccinate or not, but won't have my child be a part of the district if the district requires a mandate.

1/3/2022 6:44 PM

Continue doing a great job keeping kids and staff safe by requiring masks. COVID vaccine requirements would also be great and generally well accepted throughout the MEAD District.

1/3/2022 6:44 PM

The fastest way to get back to normal, including not having to wear masks in school, is to have everyone get vaccinated. I'm not sure what the point of these surveys is. Stop catering to the small minority of crazies that don't care about COVID. Do what is right to protect all students. Vaccine mandates work. There is always a lot of commotion at the beginning and in the end 95% of people get vaccinated. Getting vaccinated is the best thing for schools and the community.

1/3/2022 6:44 PM

Vaccination requirements for kids ages 5 to 12 is absolutely ludicrous. The statistics have shown that for kids in this age range, the risk of severe illness or death is extremely low. The risk of

complications from getting the vaccine are more concerning in my opinion. Moreover, a vaccination requirement ignores the fact that a high percentage of the population in this country has already had covid and has therefore acquired natural immunity, which is arguably better protection than the vaccine offers.

1/3/2022 6:44 PM

Trust the science!

1/3/2022 6:43 PM

The vaccine has continually been proven not to work, dangerous to children, unnecessary for children, and a political stunt... ie check out SD, FL, TX.

1/3/2022 6:43 PM

Many courts have already struck down vaccine mandates — why is this still being considered for those who do not have a voice!

1/3/2022 6:43 PM

MESSAGE TO INSLEE: This is BS. STOP TAKING OUR RIGHTS FROM US!!!!!! This is the United States of America where FREEDOM TO CHOOSE is what this country is built on.

1/3/2022 6:43 PM

This is ridiculous!

1/3/2022 6:43 PM

It's not too late to ensure our children, teachers, and staff can learn, teach and work in relative safety. Other vaccines are required for safety reasons, this is no different.

1/3/2022 6:43 PM

Need to be vaccinated so Covid will end

1/3/2022 6:43 PM

If this mandate is required for students, we have lost our freedom of choice and knowing what's best for our own families

1/3/2022 6:42 PM

No vaccine mandate for kids. They are not the problem. It is too new and not something to mess with for our kids.

1/3/2022 6:42 PM

This isn't a vaccine. Vaccines prevent the vaccinated individual from acquiring a certain disease. This shot does not prevent acquiring or spreading of the virus. Requiring a flu shot to attend school isn't the way to go. The NHL and NBA are almost 99.99% fully vaccinated, and the league has canceled or rescheduled games due to FULLY VACCINATED PLAYERS still acquiring and spreading COVID-19. The shot isn't a vaccine, it doesn't work as a vaccine. I do not support mandatory shots for students.

1/3/2022 6:42 PM

The vaccine has not been tested widely enough to conclude it is safe. I would like natural immunity to be a consideration also.

1/3/2022 6:42 PM

I think its a gross use of power to take away any human right in order to push any drug that has proven ineffective and has possible dangerous side effects which can not be reversed if said person were to be one of the unlucky people to have a bad reaction. I also feel that after nearly two years of my child being in person schooling and had yet to test positive for a virus that she would in fact recover from only to try and push something that i disagree with due to my strongly held religious beliefs would be directly against our rights to freedoms given to us directly from the God of all creation. I will not allow it and I will answer to God and God alone. Governor inslee and many many many other people in power are over strong and will be held accountable for these actions over the past two years. May God bless them all, you all, us all. Whatever the decision is, I pray it is made in sincere repentance for using our community.

1/3/2022 6:42 PM

Kids and young adults recovering from covid virus much easier then older people. Every year more kids drowning in the pools then dying from covid . They do not need vaccine. They have Immunity!

1/3/2022 6:42 PM

If it's about the Governor I have nothing positive to say.

1/3/2022 6:42 PM

I have 3 children, all girls, we do not yet know the long term side affects on girls and we will not vaccinate our children.

1/3/2022 6:42 PM

What gives Mead School district or Dictator Inslee the right to tell me how to care for my children. The fact that Mead has no backbone and won't stand up for our medical freedom is a disgrace! I will not be forced or coerced into vaccinating my children. Maybe the district should read the Nuremberg Code. It's time to be Lions not a sheep!!

1/3/2022 6:42 PM

We need to mandate vaccines for all individuals that are able to receive it, including children. It is the key to getting us out of this pandemic. Masks should continue to be mandated to protect our kids and staff, AND mitigate the spread of the virus.

1/3/2022 6:41 PM

My kids are vaccinated to protect others as well their self.

1/3/2022 6:41 PM

We are still unsure how this vaccine hurts or helps children at this time. It does not prevent anything. Why put something we are so unsure of in the bodies of our young developing children when it doesn't even keep them from getting sick.

1/3/2022 6:41 PM

This is not a virus that affects children in any capacity severely. Kids are mildly affected by it. Just like any sickness. Do not force parents to have to make the difficult decision to pull their kids out of school because of something like this. It will affect children and their learning, it will affect teachers and administration employees, it will affect parents and how they can find means to educate their children while also being able to make sure they're doing the right thing for them. Do what's right. Do NOT make this mandatory.

1/3/2022 6:40 PM

I strongly support mandatory vaccination.

1/3/2022 6:40 PM

Wait until the vaccine has been around a few years and we know the full effectiveness and side effects of the vaccine before mandating it for our children.

1/3/2022 6:40 PM

Show me the detailed short term and long term data on the risk/benefit analysis for vaccinating my kids. Until that happens, I'll assume Inslee wants to force experimental poison on our kids. If the board complies with the governor if this is pushed through, then the district and the board members should be held personally liable for any injuries that occur throughout the children's lifetimes that can be tied to the vaccines. A forced experimental vaccine for a disease that statistically does not cause severe illness in children is a crime against humanity.

1/3/2022 6:40 PM

You will destroy public education in WA if this is required.

1/3/2022 6:40 PM

There is specific criteria that the school board is using to implement this vaccine for children it is based on 8 criteria being met, of those criteria multiple have not/ will not be met thus this should NOT be implemented. I will list those criteria below. The last thing I will say is this should not even be a question and should be a parental and doctor choice, please do not do this to our children! Criteria not met: The vaccine prevents disease. (It DOES NOT PREVENT DISEASE) The vaccine will help reduce transmission. (The vaccine has been proven to be ineffective to preventing transmission)

1/3/2022 6:40 PM

Follow the science

1/3/2022 6:40 PM

With the low rate of hospitalization or death in children from Covid why would we even be considering this?

1/3/2022 6:39 PM

My body my choice! As parents we decide what goes into our childrens body NOT YOU! Vaccinated individuals can still spread this illness it is not a cure. How many boosters are going to be required to take No thanks natural immunity works great! We will pull our kids if no exemption is accepted!

1/3/2022 6:39 PM

Mandates have been struck down in so many courts already. Why is this even a conversation?

1/3/2022 6:39 PM

If covid vaccines become a requirement in WA state schools we will immediately pull our children from public school. We will not file for exemption, and we will make every attempt to move out of state.

1/3/2022 6:39 PM

With a risk of 1 in 2900 to teenage boys (I have three of them) of myocarditis/pericarditis and the fact that the drug companies are exempt from liability (due to EUA), is the School District or the Governor's office willing to accept legal responsibility if my child had an adverse effect from the

vaccine (now or at any point in the future)? Any entity that is using coercion for a medical treatment on another group is in violation of the Nuremberg Accord. Which would open up the Mead School District to multiple wrongful death and or personal injury lawsuits (now or in the future).

1/3/2022 6:39 PM

We do NOT know the effects on our children's health of this vaccine. We do not know if we are about to eradicate the next generation by sterilizing our children. There have been too many of us women that have had massive side effects on our menstrual cycles to force children to have this vaccine. If they have had covid they especially should not be required to have the vaccine.

1/3/2022 6:39 PM

Nothing can replace the element needed of TIME to create data that shows the long term effects that this vaccine will have on our children. Forcing parents to subject their children to this vaccination and face so many unknowns without any pharma and government accountability is unethical, egregious and quite frankly Cabal activity.

1/3/2022 6:39 PM

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement. My hope is that parents don't have to pull their children from public schools because of these mandates.

1/3/2022 6:39 PM

Don't mandate. Have we not learned from the other mandates and loss of employees? Let's not make it harder for our children to earn an education. This is NOT a vaccine it is a seasonal shot. It will NOT keep you from getting it. That should make it optional.

1/3/2022 6:39 PM

My child has been fully vaccinated and boosted. Children need to be in school and the revolving door of covid needs to stop

1/3/2022 6:38 PM

While being very much pro-vaccination, I cannot in good conscience abide by such a mandate until longer term studies verify the efficacy and safety of these novel COVID vaccines!for children. Any such mandate at this time would be highly unethical since it would be based on rushed, half-baked science.

1/3/2022 6:38 PM

We do not need vaccines for a virus that shows asymptomatic in this age group. It should be choice of families.

1/3/2022 6:38 PM

This is freaking RIDICULOUS!!! I will immediately pull my children from this rapidly declining (once wonderful) school district and home school. The fact that the aggressively restrictive governor is now coming after my children is the LAST STRAW!! Bye bye funding! Hello homeschool !! Grow a backbone MSD!! LISTEN to the parents!!

1/3/2022 6:38 PM

Pro choice!

1/3/2022 6:38 PM

My child will never get the covid vaccine period.

1/3/2022 6:37 PM

I will never vaccinate my children with a vaccine that has been out less than 2 years. I consider the state of Wa and Governor Inslee to be fully responsible for any vaccine injury received by any of children Wa state, if this mandate were to pass. Shame of Washington politicians, "Doctors" and Inslee for even considering forcing this. My children's medical care is the responsibility of my spouse and I. We will never put them at risk for strokes and heart inflammation. Consider the long lasting side effects of Gardasil. You have no idea what the long term effects are for any of the Covid vaccines.

1/3/2022 6:37 PM

This is ridiculous! The idea that you would mandate children to be vaccinated is crazy. This is completely unnecessary and will hurt our children in more ways then known at this time. Tell the "governor" where he can stick his mandates!

1/3/2022 6:37 PM

Why are you trying to make this political?

1/3/2022 6:37 PM

No

1/3/2022 6:37 PM

Let our kids build their own immunity. Don't put medication in them that is not needed. They don't get very sick from this and this vaccine is still not approved.

1/3/2022 6:37 PM

It has been proven that vaccine mandates work. It is the only way to ensure our children are safe. It is not political!

1/3/2022 6:37 PM

It might be useful for your survey to include how many have already vaccinated their children. We have; even without the mandate.

1/3/2022 6:37 PM

Thank you for taking the time to hear from the parents directly with respect to this important subject regarding our children's personal health choices. My opinion is that this decision must remain a personal choice for each family. Having my child vaccinated does not decrease the exposure of Covid to other children at the school. Without getting into all of the science behind vaccinations relative to Covid, my child is in an age demographic which has a very minor threat of serious health conditions due to infection. In fact, my child has already been exposed to and overcome Covid,

therefore has natural immunity. The risk/reward of the vaccine at this point is not something I am a proponent of at this time. We appreciate the continued support of allowing families to make their own medical decisions with respect to their children. Thank you for taking this into consideration as you present considerations to the board.

1/3/2022 6:37 PM

It's a shame that state is thinking about this mandate, for kids 5 and up. The ACTUAL science shows, there is a larger risk for our children to get vaccinated, vs NOT being vaccinated! It's not an effective vaccine and the risk are SUBSTANTIALLY HIGHER to get the vaccine. It should be the choice of the parents to vaccinate or not! If a parent believes it is in the best interest for their child to get the vaccine, they should proceed with that decision. Under no circumstances, should our government mandate an issue like this. It is in the BEST interest in ALL of our kids to be in-person, at the school buildings. Segregating families from school, due to a false narrative, should not be entertained for a second! Our officials in Olympia are letting our young family down.

1/3/2022 6:37 PM

Stop the mandates. We don't know what this is doing to our kids

1/3/2022 6:36 PM

Vaccines save lives! I support required vaccination for COVID.

1/3/2022 6:36 PM

My child has already had COVID and until there is clear guidance (and research to back it up!) on prior infection and immunity, we will abstain. We will also not be giving a vaccine that has any risk for a virus that has a minuscule risk. I homeschooled last year for bad choices made by District 81 in relation to COVID-19. I have faith that Mead SD will do right by my children if they are able, but I have no hesitation in pulling my children out of public education again, if I am not given exemption as an option (like it is for every other vaccine.)

1/3/2022 6:36 PM

We already require vaccines for many other diseases. I see no difference between those vaccines and this vaccine.

1/3/2022 6:36 PM

I will not be vaccinating ANY of my children. How dare you even consider forcing this vaccine and risk taking their only free education they are offered, away from them.

1/3/2022 6:36 PM

My child has already received her first vaccine

1/3/2022 6:36 PM

PLEASE require COVID vaccination for school enrollment. This vaccine will save many lives, as well as preventing the unnecessary suffering from long-term COVID impacts on the body.

1/3/2022 6:35 PM

This is unconstitutional and the 5th court of appeals has stepped in and agreed. There is no room for politics in medicine and in the education of our children. It isn't tolerated for racism or comments on sexual preferences or what gender a child chooses to be one day to the other so how is it ok to weigh in on our families decisions to not vaccinate. CDC has claimed that the vaccine is not safe and

causes heart problems in youth. We will pull as will a large number of people our children out of Mead.

1/3/2022 6:35 PM

No vaccine mandate.

1/3/2022 6:35 PM

Ridiculous

1/3/2022 6:35 PM

Personally, I would feel much safer for myself and my child knowing that she is around a (mostly) vaccinated population.

1/3/2022 6:35 PM

Do whatever is needed to keep schools 'in person' please.

1/3/2022 6:35 PM

My children will be leaving the school district if there is a mandate passed.

1/3/2022 6:35 PM

I do not believe that this personal medical decision should be mandated. This is a choice for parents to make regarding their children and should not involve the government.

1/3/2022 6:35 PM

I can't believe this is even being considered. KEEP OUR CHILDREN OUT OF THIS

1/3/2022 6:34 PM

Children are not in a high risk group. There are so many other viruses that actually send children to the hospital and we do not require vaccines for these. Do not put my child's life and health at risk for a political agenda! Risk vs Benefit analysis and it confirms to not vaccinate children!!! Personal choice. Also recognition and equal treatment of natural immunity is being ignored.

1/3/2022 6:34 PM

The flu vaccine is not mandated and neither should the Covid "vaccine". Speaking of the flu does it even exist anymore?? Or is it all Covid?? Rhetorical question I know that answer. These kids have had enough of this terrible social experiment, it is affecting them daily and so unfair for them. Kids get sick. This isn't new news. The survival rate is high for Covid. Our children are not science experiments for the politics of this state and I will not allow our children to be used for as such. Respectfully let kids be kids. Quit with the limitations that harm their social and emotional development. I have watched children meltdown and cry because they forgot a mask and feel they are in trouble or toxic without one. Witnessed many kids chewing on their masks. Eww. The mask is preventing nothing and from what I've seen neither is this "vaccine" This is beyond ridiculous and it needs to stop being blown out of proportion. Our family has had Covid and fully recovered. Why would we accept a vaccine that is against our beliefs, with no evidence base when our bodies do a job to make our own antibodies.

1/3/2022 6:34 PM

My 11 and 8 yr olds are vaccinated already.

1/3/2022 6:34 PM

Vaccine does not guarantee you won't get covid. You shouldn't be able to make me give my child it.

1/3/2022 6:34 PM

"Rushed science is poor science," The rush of these vaccines has by-in-large proven of limited benefit to our children especially in light of the effects the virus has on them. I cannot in good conscience, as being stewards of my children's health, participate in rushed science for the very temporary and limited benefit of a vaccine in which no long term data exists.

1/3/2022 6:34 PM

There is no reason to mandate Covid Vaccinations for children. If people want to have their kids vaccinated that's their choice. Research shows Covid vaccines do not stop the spread of Covid nor does it keep you from getting Covid. Additionally the majority of the children are not at risk of Covid. If you mandate the vaccine we will move to Idaho

1/3/2022 6:34 PM

Screw WA state

1/3/2022 6:34 PM

Please do your homework as a board. There are so many adverse reactions to these vaccines. Don't look for your information on Google or MSM. They are lying to us.

1/3/2022 6:33 PM

Please leave this for each individual parent to decide for their own children what is best. Vaccinated and unvaccinated children can all coexist at school together as we know the virus has the least severe effect on children. Vaccination does NOT prevent contraction or spread of the virus, especially these new strains, so it seems absolutely criminal to mandate a failed vaccine onto our children. If it actually prevented disease (the purpose of vaccination) instead of merely diminishing symptoms, you would have a better case for a mandate. At this stage, being vaccinated does not offer much protection, and appears to act merely as a signal of compliance. A vaccine mandate on our children is completely devoid of logic as the risks do not outweigh any potential benefit. My kids in particular, have demonstrable immunity to the virus, so mandating they take a vaccine that is redundant to their system is bonkers---for lack of a better word.

1/3/2022 6:33 PM

No vaccination mandates for children ! Ridiculous

1/3/2022 6:32 PM

Thank you for keeping our Children and your Staff Safe.

1/3/2022 6:32 PM

Requiring a new vaccine with no research available for years to come on effects is absolutely disgusting and wrong. So inappropriate, YOU ARE NOT LOOKING OUT FOR OUR KIDS

1/3/2022 6:32 PM

There is not enough evidence or trials done to indicate this COVID vaccine is safe, especially for children. Let alone it's unconstitutional to mandate a newly produced vaccine without all of the necessary data to prove to be safe.

1/3/2022 6:32 PM

Covid should be a mandate.

1/3/2022 6:32 PM

I am currently seeking out vaccine, but I think personal choice should never be taken away.

1/3/2022 6:32 PM

I'm strongly against a vaccine mandate but will do what needs to be done for my daughter to continue attending school in person.

1/3/2022 6:31 PM

This madness needs to stop it's all about politics and bid pharma we the people have right to be in charge of our body and no one should force especially kids to do something against their will "our body our choice"

1/3/2022 6:31 PM

If parents wish to vaccinate their children, I am all for it. I am completely opposed to any mandate of anything. And I am vaccinated. But by choice, not by mandate.

1/3/2022 6:31 PM

This is still the USA, where we have freedom and individual liberty, not a communist nation. Mandating an experimental vaccine that obviously does not prevent getting or spreading the virus is beyond ridiculous and potential very dangerous. What we need is for everyone to look at the data and make the decision that is right for themselves and their families. Mandates are not the answer.

1/3/2022 6:31 PM

If it's mandated, we're homeschooling...or moving. We've had enough.

1/3/2022 6:31 PM

As an employee of a large pharmaceutical company that manufactures vaccines, I am aware of the entire process from R&D, Clinical Trials, approvals, "dock to stock", sales and distribution. I will touch on some of these topics below. As a fact, the current COVID-19 vaccines do not prevent the disease associated with the virus nor does it prevent transmission. The true primary purpose for a requirement of such a vaccine is to exponentially increase the profits of the pharma companies and in return pad the pockets of the crooked politicians pushing for such a requirement. Pfizer and Moderna produced an overabundance of their vaccines/ far too many batches that will need to be destroyed if they surpass their expiration dates; therefore, these vaccines need to find their way into arms fairly soon. I'm sure the state government already placed an enormous purchase order in advance which would mean the state has no intentions of listening to public opinion and already plan to implement the requirement regardless. The approval process for these vaccines was more than "fast tracked", the actual process of checks and balances were bypassed and many safety steps were ignored. It was anything but the standard approval process and didn't include the traditional stages of clinical trials. These vaccines have not undergone years of stability studies either. As a parent, grandparent, or a person that cares for your fellow human beings, I suggest you research "vaccine liability". Pharmaceutical companies that develop and manufacturer of vaccines cannot be held liable for their products if the patient receiving the vaccine sustains an allergic reaction, short or long term injury, or even death that is directly associated with said administration. They have complete immunity. You should ask yourself why these companies had to secure immunity with the federal government if their vaccines are so safe? Can you with good conscience, approve such a requirement for the children within this public school district? Will you feel any responsibility if even a single injury or death occurs when a child incurs a vaccine that they likely wouldn't have received without such a requirement in place? Do the right thing.

Ided-from-COVID-19-vaccine-liability

<https://www.newsweek.com/fact-check-are-pharmaceutical-companies-immune-covid-19-vaccine-lawsuits-1562793>

1/3/2022 6:31 PM

None

1/3/2022 6:31 PM

I vaccinate to protect my children at school, my children still at home and their classmate.

1/3/2022 6:30 PM

I will not allow my children to be guinea pigs for an experimental therapeutic. It is not a vaccine it has significantly dangerous documented side effects including myocarditis and the virus itself presents little to no danger to children. additionally the so called vaccine does not prevent transmission of the virus. We will remove our children from the district.

1/3/2022 6:30 PM

No

1/3/2022 6:30 PM

Moderna pulled their vaccine for 5 and up due to boys and the heart damage. Too unknown for small developing children at this time. 2023 Fall would be a much better time for the requirement when they have more time to work it out.

1/3/2022 6:30 PM

Tyrant

1/3/2022 6:29 PM

It is unconstitutional to force a vaccine, especially on our youth, without the appropriate time for testing. With the way our governor and his cabinet have chosen to run the state, especially the educational system, I see no other option but to withdraw my children.

1/3/2022 6:29 PM

Emperor Inslees attempt to override parents decision making regarding the health and well being of our children is absolutely disgusting and atrocious and he deserves to be bitch slapped into space!

1/3/2022 6:29 PM

I STRONGLY support a covid vaccine mandate for school age children.

1/3/2022 6:29 PM

Please let every family to have a right to choose what's best for their children.

1/3/2022 6:29 PM

No

1/3/2022 6:28 PM

We will not be vaccinating either of my children with the Covid 19 vaccine. We will fight this with every ounce of my being. This is NOT a true vaccine and has documented adverse reactions. What about natural immunity? Our whole family already had Covid 3 months ago!

1/3/2022 6:28 PM

We just aren't doing it.

1/3/2022 6:28 PM

The vaccine is largely ineffective at achieving its main goal, which is curbing or stopping the spread of Covid, Especially with the Omicron variant. I understand mandates for diseases like polio and MMR, because they actually accomplish their goal of virtually eradicating the disease in our population. Those vaccines have also been available to the public for decades, and underwent a development process that was easily ten times as long as this covid vaccine. This vaccine was rushed and out to the masses just for the sake of having a vaccine. Since my entire immediate family has already had covid, and came out completely unscathed, I will "trust the science" of my own body and an immune response system that has been evolving for tens of thousands of years, and not the "science" of a man made vaccine that was rushed into production without knowing the long term affects.

1/3/2022 6:28 PM

I am in favor of having students and staff vaccinated for all to provide protection to our children, staff as well as the community. I would like easier access to vaccinations as I have found it harder to find appointments and availability slots for my children.

1/3/2022 6:28 PM

I am very 100% pro-vaccine, however I believe this is an individual family's choice and should not be mandated.

1/3/2022 6:28 PM

Please continue to protect out children and community with vaccine requirements including a Covid vaccine.

1/3/2022 6:28 PM

Mandates are wrong

1/3/2022 6:28 PM

This is a disgusting attempt to create unnecessary fear and division in our children and our community and we as parents will not stand for it. Many of us have served our country and have children that have served our country to combat the theft of our freedom by foreign nations. It seems that the time may soon come that we will have to combat the same threat to our freedom domestically. I hope that these pathetic attempts to control the free men and women of this country fail as miserably as they began, for the sake of everyone who calls this great nation their home.

1/3/2022 6:27 PM

You have already required teachers to be vaccinated. So mandating the age group that still is not having high numbers of hospitalizations or deaths makes no sense.

1/3/2022 6:27 PM

Students should be vaccinated along with ALL school staff. Mandates like wearing masks should also be followed at Mead unlike what I hear and see actually happening.

1/3/2022 6:27 PM

There are studies coming out from countries finally showing what is happening to our kids the past 2 years with all these restrictions on them. And I have worked with doctors, fema workers,

pharmaceutical reps, nurses, emergency medical workers, all branches of government workers; there has not been ONE out of 100's that recommends our children should be the same as the adults.

1/3/2022 6:27 PM

Our body our choice!

1/3/2022 6:27 PM

No

1/3/2022 6:27 PM

This is ridiculous. I will not have my child taking a drug that has not been approved. Getting the vaccine doesn't mean they won't get covid.

1/3/2022 6:27 PM

Kids already vaccinated.

1/3/2022 6:27 PM

The COVID vaccine should be optional. Not mandatory. No where does it prove that getting the vaccine lowers your chances of getting COVID. Children are not as susceptible to COVID as adults are. Nationally high schoolers are 3 month's behind. We don't need children falling further behind because they can't attend school due to a mandatory vaccine. Many children would suffer academically because either their families can't afford private school or are not able to help them if they are home schooled. Children that come from poverty don't have the care or meals at home and look forward to attending school to be not only cared for but to have help and be fed decent meals. Too many abused children will fall under the radar.

1/3/2022 6:27 PM

Mandate should NOT be enacted.

1/3/2022 6:27 PM

My kids have already been vaccinated and as soon as CDC and WA DOH approves the FDA's recommendation on boosters for kids 12 - 15, I will have them boosted. I will continue to vaccinate my children as recommended.

1/3/2022 6:27 PM

vaccines work. Keep the schools open and keep employees and families safer.

1/3/2022 6:26 PM

Leave kid alone! After a few years I may think about vaccinating my children but we don't know enough about their side effects yet.

1/3/2022 6:26 PM

I do not believe there are nearly enough studies nor any studies on possible long term on side effects in children to require a new vaccine. Requiring something with minimum studies is irresponsible!

1/3/2022 6:26 PM

No

1/3/2022 6:26 PM

You're already damaging and ruining our children's childhoods. The data is clear that Covid is not a threat to children under the age of 18. This will also cause teachers to lose jobs because you will have about 2 kids per class. Mead School District will lose a majority of its students. This is outrageous and you should be ashamed of yourself. The people will stand up for what is right.

1/3/2022 6:26 PM

Need more research

1/3/2022 6:26 PM

Unnecessary medication for children is criminal

1/3/2022 6:26 PM

Our entire family is already vaccinated, and I vaccinated my kids as soon as they were available. We are also already scheduled for boosters.

1/3/2022 6:25 PM

The vaccine has Emergency Use Authorization....it's still experimental with no long term studies. And...our children are at a minuscule risk of death from Covid. THIS IS MADNESS

1/3/2022 6:25 PM

Some families are divided in this topic. I want to vaccinate my children and my ex does not. So this becomes less of a fight if mandated, but I could also see this being a challenge as my children are very much against being vaccinated.

1/3/2022 6:25 PM

I am very in favor of vaccine mandates. Every child deserves to attend school safely and vaccines reduce the ability of the virus to mutate and decreases transmission rates. Schools already require many vaccines for attendance and I think it's important to update those requirements as needed.

1/3/2022 6:25 PM

Yes! They need to insist on the FDA

1/3/2022 6:25 PM

My kids are vaccinated with the Covid vaccine and all other immunizations but I don't feel Covid should be a required immunization since the risk for serious illness/death is so small for children. I would encourage kids to get the vaccine but not mandate it.

1/3/2022 6:24 PM

Unimaginable this is even something that warrants a survey. Last I checked, I was responsible for myself and my children. Forcing the hand of parents at the threat of a child's chance of education is appalling. You should all be ashamed!

1/3/2022 6:24 PM

Until long term trials are available for the vax, I will not vaccinate my child. Requiring children to take an experimental drug as part of policy should be illegal. Most vaccines take 5 years or more of testing.

1/3/2022 6:24 PM

Vaccines should be voluntarily and not required for both students, family, and staff.

1/3/2022 6:24 PM

A mandatory vaccine requirement denies all parental and personal rights. No child (or person) should ever be mandated in order to stay in public school. Taking the choice out of the mix then takes the child out of what they have ever known: public schooling. Do not make this mandatory or you will lose many students.

1/3/2022 6:24 PM

It should not be mandated. The flu vaccine is not mandated. This vaccine is too new to require it for Students

1/3/2022 6:24 PM

This should be a choice not a mandate. If it is mandated we will be leaving Mead. I hope it doesn't come to that!

1/3/2022 6:24 PM

Flu shots are not mandated, neither should a covid SHOT. It is NOT a vaccine. Vaccines protect for years not months. I'm not going to jeopardize my kid's life 5-10 years from now because of a shot that isn't 100% effective or have enough testing on kids.

1/3/2022 6:24 PM

My body. My choice. That's all

1/3/2022 6:24 PM

Covid is not the threat they think it is. People should be able to govern themselves after the are informed, vaccines are available if wanted, and so are masks for those that want to wear them. IT IS NOT THE RESPONSIBILITY OF THE GOVERNMENT TO DICTATE OVER OUR LIVES!

1/3/2022 6:23 PM

None at this time.

1/3/2022 6:23 PM

Tell them to politely kiss my ass.

1/3/2022 6:23 PM

This is BS! We shouldn't make our 6 year old do something they don't need to do! People are always going to get sick and we shouldn't be forced to do something we don't want. It's freedom of speech! We should be able to make our own decisions on our own health. It's no one else's business!

1/3/2022 6:23 PM

Fuk Inslee and Go Brandon!

1/3/2022 6:23 PM

this is absolutely ridiculous to even consider a mandate for a vaccination for a flu virus.

1/3/2022 6:22 PM

None

1/3/2022 6:22 PM

Children that have to take certain medications already put them at a higher risk for heart problems. Why would one expect us to then put our children at a higher risk? It's a main side effect to have heart inflammation.

1/3/2022 6:22 PM

Needs to be families choice as are most other vaccines with exemption choices this vaccine is not even. Proven effective

1/3/2022 6:22 PM

The Covid will not be going away anytime soon. I believe it will be with us just like the flu, a cold, polio, chicken pox. It should be a requirement to attend public and private schools.

1/3/2022 6:22 PM

I will withdraw both of my children rather than vaccinate them. I also will do whatever is necessary to allow their continued education, including moving out of state.

1/3/2022 6:22 PM

If society decrees that the population no longer has a right to bodily integrity then the people become the slaves of that society. A society that advocates mandatory vaccinations equally advocates slavery. Those who advocate mandatory vaccination support slavery in principle. None of the justifications they offer negate this fact. The legal definition of ownership is the "exclusive legal right to possession." A vaccination mandate decrees that the individual no longer has legal possession of their own body. It removes the individual's legal right to ownership of their physical being and hands it over to the state. This constitutes slavery. Slavery is defined as: The condition of being legally owned by someone else and forced to work for or obey them" There are those who suggest that the "common good" warrants slavery. They state, based upon assumption and ignorance, that when a person refuses COVID-19 vaccination they are putting others at risk and behaving in a way that jeopardises the common good. They maintain that society should have the right to violate the bodily integrity of its slaves. As pointed out by many, a mandate differs from law. However, a government mandate is something the state uses to claim the non-existent right to force people to obey. Individuals can be punished—fined or even imprisoned—for failing to abide with a state mandate. The right to bodily integrity is denied by mandate and all citizens are made slaves by virtue of it. If the jabs are incapable of stopping infection and transmission and serve only to reduce natural immunity, there is no possible public health rationale for a jab mandate. An uninfected individual is no more likely to catch COVID-19 from an unjabbed person than they are from a jabbed citizen. According to the official definition of a COVID-19 case, the statistics show that the jabs don't make any difference whatsoever to the spread of disease. Those who believe in the concept of the common good, debating the point at which it overrides individual sovereignty, accept that some group they choose to empower has the right to force others to obey. Regardless of whatever rationale they claim, by ultimately insisting that no citizen has the right to bodily integrity, they promote slavery, including their own. Some people are a bit squeamish about admitting their support for slavery and prefer to pretend that forcing compliance through other means is not slavery. If the jabs are incapable of stopping infection and transmission and serve only to reduce natural immunity, there is no possible public health rationale for a jab mandate. An uninfected individual is no more likely to catch COVID-19 from an unjabbed person than they are from a jabbed citizen. According to the official definition of a COVID-19 case, the statistics show that the jabs don't make any difference whatsoever to the spread of disease. US researchers found a 19 fold increase in myocarditis (heart inflammation) among the 12 – 15 year olds which directly correlated with the jab roll-out. The study was peer reviewed and then published, before being withdrawn by journal editors without explanation. Myocarditis is extremely serious for young people and often requires a heart transplant in later life, significantly reducing their life expectancy. There is no evidence to substantiate any official or MSM claims about COVID-19 jab efficacy or safety. They are experimental drugs with unknown risk profiles that are being forced upon people without offering them any opportunity to

give their informed consent. The jab roll-outs breach numerous international conventions including the Nuremberg Code. What data does exist is alarming, to say the least, and all the indications are that the jabs are extremely dangerous. There is no doubt that they can kill. Those who support a jab mandate are advocating that people should be forced to take a potentially lethal injection. Those who are aware of this, understandably, do not wish to take them. For this they are being demonised by government, the MSM and a large percentage of those who have elected to be jabbed. If they try to raise any concerns they are dismissed by the same as ant-vaxxers, conspiracy theorists, covid-deniers or dangerous refuseniks and are accused of being selfish. Despite that fact that it is the jab obsession that is destroying public health and medical services. There is clear evidence of obfuscation and denial to hide the dangers of the jabs from the public. This seems to cross the threshold of criminality in nearly every nation state where the jabs are deployed. National populations are clearly under attack by their own governments and their partners. However, perhaps the most insidious aspect of the jabs is their central role within a new system of governmental authority that is enslaving humanity. Our jab status is the required license to participate in a technocratic, behavioural control and surveillance grid. Not only will our vaccine passport (app) monitor and report where we go, who we meet and what we are allowed to do, it will also determine what services we can access. Those who think the jabs are essential to protect themselves and others, against a low mortality respiratory virus, have either not been given, or choose to ignore, the information required to make this judgement. They believe that they are free because they can now register to use the services that hitherto were freely available to all. They have accepted that they need permission from the government simply to conduct normal, everyday activities. They are committed to take whatever drugs are given to them for the rest of their lives. If they wish to retain their societal permits, this is not negotiable. Their imaginary freedom is conditional upon their continued compliance. They do not own their own body and are no longer, in any sense, free. They are elective slaves and are seemingly content to condemn future generations, including their own children, to the same fate.

1/3/2022 6:22 PM

I am a Registered Nurse and follow data, science, and epidemiology closely. The current Covid-19 vaccines are more dangerous to children than Covid-19, the current vaccines are outdated (designed for a strain of SARS-Cov-2 that is no longer circulating) and many children have already been exposed and or infected through vaccinated and unvaccinated adults (it is an undisputed fact of science and infectious disease that previously infected individuals of any viral process retain immunity). Until the safety data for this vaccine are transparent and public the proposal to mandate this vaccine should be rejected (it is also illegal as the Pfizer vaccine available in the US is still EUA and by definition EUA therapies cannot be mandatory)

1/3/2022 6:22 PM

My children are already vaccinated

1/3/2022 6:21 PM

There needs to be a clear way to provide the children not receiving vaccines for home schooling.

1/3/2022 6:21 PM

I think it's absolutely absurd and unnecessary and entirely out of our constitutional rights to force something that is not wanted, and has yet to prove any effectiveness on our children! Since this vaccine has become "mandated" we've seen a surplus of cases, and constant "new variants" being produced. At what point has being aware of everyday lifestyles (diet, exercise etc) been made

something that people should prioritize? Absolutely nuts that there has been no comments made but focus is set in areas that's yet to provide a solid resolution.

1/3/2022 6:21 PM

Please do not require this for any children

1/3/2022 6:21 PM

Covid is not a preventable disease and I find it disgusting that our state is even considering vaccinating 5-18 year olds as a condition of attending PUBLIC schools. The "vaccine" has no evidence of preventing the virus. It is not a disease. No matter what way you cut it, the "vaccine" is experimental with emergency authorization, and any "vaccine/booster" is treating a different strain. I am not going to allow my children to be a part of an experiment in a heavy handed state with absolutely no recourse if there is vaccine injury. We are talking about the least vulnerable population on the planet, and you want an experimental immunotherapy to be a requirement to attend public schools and no refund of tax dollars if I put my kids in private or home school? This will be my tipping point and the downfall of our great district. We stood up to the shutdown mandates. Less than 1/5th of states even require masks. Enough is enough. Stop it. Just stop it.

1/3/2022 6:20 PM

Covid vaccine is currently only under an EUA...has there ever been another drug or treatment forced upon all children that has not gone through full FDA approval?

1/3/2022 6:20 PM

Since y'all seem to forget history, look up the Nuremberg Code. This would a DIRECT VIOLATION, and you will be liable.

1/3/2022 6:20 PM

You must recognize natural immunity. Both my children have had the virus. Their chances of having an adverse reaction from the virus again is almost zero. There chance of feeling ill or having a reaction from the vaccine such as myocarditis is real. This is still not even an FDA approved vaccine. If my children had natural immunity from the chicken pox they wouldn't need to get the chicken pox vaccine. Let antibody testing suffice please. Let parents decide their own healthcare decisions for their children. The vaccines don't stop omicron but they help at risk people from being hospitalized or from dying. Don't make my children who have already had the virus take an experimental vaccine for no reason.

1/3/2022 6:20 PM

My child is already fully vaccinated and we will continue to follow the CDCs recommendations for vaccination schedule

1/3/2022 6:20 PM

Safe and effective vaccines are mandatory for a myriad of preventable but potentially deadly diseases. There are zero arguments that justify forgoing a COVID vaccine mandate. This is a simple decision to keep children safe, not a political discussion, and not a moral debate.

1/3/2022 6:20 PM

There is not enough long term data to justify a mandate for any age child. This shot could do more harm than good.

1/3/2022 6:19 PM

My wife and I are both health care workers. We are both vaccinated. I feel like adding a Vax mandate into the WAC is very premature at this point. Im not against vaccines for my children. I do however believe we need more time and research in this matter.

1/3/2022 6:19 PM

Mine is already vaccinated

1/3/2022 6:19 PM

The vaccine is already obsolete since it is based off a virus from 2019. Data shows the vaccine does not stop the spread of the virus so there is no need to mandate this on our children. Mead schools have shown that we are capable of keeping our kids healthy and safe without this mandate.

1/3/2022 6:19 PM

America=freedom. The forceful nature of this vaccine is un-American and un-Godly. We will homeschool before we are forced to vaccinate our kids with something proven to give children heart complications. I trust natural immunity over the governments overreach.

1/3/2022 6:19 PM

Thank the leaders for putting our children and teacher's health priority. It is understanding with the recent mass spread of covid we have to protect out kids, families and neighbors.

1/3/2022 6:19 PM

No

1/3/2022 6:18 PM

I am extremely against this idea.

1/3/2022 6:18 PM

No mandates.

1/3/2022 6:18 PM

I feel very strongly that children should not be made to get vaccinated against Covid-19. I will be pulling my children from school if a mandate is placed upon school age children. I want to impress on the governor's office that many other people will be pulling their children from school as well! Our children have missed out on so much as it is already with schools closing for 6 months, no sports, no extra curricular activities, online learning for 8 months. My children's well-being is so much more important than a vaccine mandate. We cannot wait to move out of Washington state! Our children are the future. It saddens me to my core that they have to live with the decisions of politicians and our governor.

1/3/2022 6:18 PM

As a parent and teacher, I would feel safer if everyone was vaccinated

1/3/2022 6:18 PM

My body My Choice. Stop trying to rule like Hilter Mr Inslee and MSD

1/3/2022 6:18 PM

What evidence exits to indicate effectiveness of any available 'vaccines?' Why do case rates continue to increase? How are the tests differentiating between flu and COVID? Why are VAERS

data points indicating risks being ignored? What risks do the children assume with the 'vaccine'? Why 75 years to hide data from the people? This is all suspicious behavior.

1/3/2022 6:18 PM

ABSOLUTELY NO TO COVID VAXXINE MANDATES FOR CHILDREN!! THE MANDATES FOR ADULTS IS ALREASY A GROSS OVERREACH OF GOVERNMENT POWER! This needs to stop!! The fact that the vaxxine is available for children is enough, give parents the CHOICE if they want to vax their kids or not!!

1/3/2022 6:18 PM

My child is already vaccinated (both rounds) and I think it's a great idea to keep the children safe! Please don't back down on this because people don't agree with it! This shows that you care for your students and I applaud this idea! Good for you!

1/3/2022 6:18 PM

Thank the Governor and the Washington Dept. of Health for keeping our children safe!

1/3/2022 6:17 PM

I will pull my child out of the distract and home school before exposing her to this vaccine. I have many family member in the healthcare field that all strongly oppose this vaccine. It's long term effect are unknown. We have considered leaving the state due to the governors forced medical beliefs.

1/3/2022 6:17 PM

Big, big, big mistake guys. Absolutely fucking not.

1/3/2022 6:17 PM

Considering the spread of Covid 19 is taking place amongst vaccinated and unvaccinated people within the world, I don't feel that vaccinating healthy children under the age of 20 with no comorbidities is a responsible practice. If the "mandate" goes through, we will consider pulling our children from public schools.

1/3/2022 6:17 PM

No

1/3/2022 6:17 PM

We chose to get vaccinated when it became available. I don't agree with mandates since it infringes on personal rights. I also encourage all to get vaccinated through educating on factual benefits to our communities.

1/3/2022 6:16 PM

I support vaccination requirements to create a healthy and safe learning environment for all children, especially to protect the health of those who are unable to receive vaccines due to health conditions.

1/3/2022 6:16 PM

We choose the best for the health choices for our families.

1/3/2022 6:16 PM

My children will no longer be apart of any district that requires a covid-19 vaccine.

1/3/2022 6:16 PM

I fully support this vaccine being included with the other mandated vaccines. Only those those students who don't already have mmr, tdap, etc vaccines that are mandatory should be granted any kind of exemption.

1/3/2022 6:15 PM

I am deeply saddened by the current state of our society. Natural immunity which brought society to 2020, has disappeared. My family has already survived Covid and we do not believe there is a need to be vaccinated. If you survive a virus, your body builds up what we use to call natural immunity. How quickly we forgot or choose to ignore history. What will be the end of this vaccination requirement. They are proposing including a booster as part of this vaccination to be considered vaccinated; you will be a rolling subscriber to the largest mandatory subscription. If anyone in government wanted to solve the issue of covid, they would start by looking at ways to prevent deaths (like diet and exercise) or fast food consumption mandates. Unfortunately, our government does not want a cure, they want a continual problem, propogated further by offering their "solutions". We will miss the Mead school district, but our constitution affords us the ability to make a choice. It is unfortunate that we must choose, but if we are forced into a corner, we will choose what we believe is best for our family.

1/3/2022 6:15 PM

Requiring the Covid-19 vaccine in schools is only going to help WA mitigate the harm principle, and without such a mandate/requirement all these bullet points will occur: • The state's obligation to protect the public's health and safety would be compromised. • An individual's decision could place others' health in jeopardy; • The state's economic interests could be threatened by the costs of care for vaccine preventable illness, related disability, or death, and by the cost of managing vaccine preventable disease outbreaks; • The state's duty to educate children could be compromised.

1/3/2022 6:15 PM

A vaccine is a choice not a mandate. Both my children will NOT attend Mead school District if an exemption is not offered and accepted

1/3/2022 6:15 PM

Vaccine requirements are not a new thing in schools in order to prioritize the health of the population. The Covid vaccine should be no different , especially considering the current situation.

1/3/2022 6:15 PM

Please keep the COVID vaccine decision at the parent/family level.

1/3/2022 6:15 PM

I am absolutely pulling my kids from school if there is a vaccine mandate, we are barely tolerating school with the current rules as it is. Adding a vaccine mandate would be moving things in the wrong direction for sure and we will not tolerate it!

1/3/2022 6:15 PM

There should absolutely be exemptions available, just as there is for adults.

1/3/2022 6:15 PM

I will not hesitate to protect my children's rights. They will not be forced to be injected with a vaccine that has been available to the public less than a year. I will definitely change districts if this is mandatory.

1/3/2022 6:15 PM

I'm in favor of keeping kids healthy and in school. Vaccinations have always been a part of this.

1/3/2022 6:15 PM

This is not the governors right to mandate I vaccinate my children with a new vaccine that hasn't had time to truly be studied in children. I vaccinate my children currently with vaccines that have been proven over the years to be safe and effective. It is my right as my Children's parent to choose to vaccinate or not to vaccinate.

1/3/2022 6:15 PM

Please fight for our families. Taking away a parents rights to decide how to raise their children is not the way to build healthier families. The statistics on kids and covid DO NOT support a mandate on our children.

1/3/2022 6:14 PM

If this happens then we will be homeschooling our children, not supporting levys/bonds for the schools and possibly be leaving the state.

1/3/2022 6:14 PM

The vaccine for children 12-18 became available 9n May 12th 2021 and for children 5-11 on October 29th 2021. The vaccine has been available for less than a year. There is way to little data to support the need to vaccinate our children. There is NO data regarding long term possible side effects. The so called vaccine doesn't work for the current strain of COVID. COVID is the new flu, a new strain will develop every 6 months to a year. Obviously one will never be FULLY VACCINATED when each strain will require a booster. Therefore the vaccine isn't a vaccine at all! I will not vaccinate my child nor give them boosters every 6 months. After 5 or so years when the science, data and possible long-term side effects are known I'll think about it. The vaccine is not a preventive in contracting COVID or passing COVID. It MIGHT prevent them from contracting COVID, It MIGHT minimize their symptoms those are not concrete reasons for me to vaccinate my children. The survival rate for children is 99.75%! We have survived COVID twice!! The force of a vaccine mandate is unacceptable and unconstitutional!

1/3/2022 6:13 PM

This is a violation of our constitutional rights. This vaccine is dangerous and we will not give it to our children. I, along with many concerned parents across this state, have major concerns about adding the C-19 vaccine to the list of required vaccinations for children. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases." This vaccine does not prevent on from getting the virus or spreading it, even with boosters. Children are not at a high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my children at risk by getting a vaccine that offers perceived safety rather than actual immunity is reason enough for me to pull my child from the public school system, which is what I will do if this becomes a requirement. Cathleen Plonske 757-207-0719, Mother of 3 children in Mead schools

1/3/2022 6:13 PM

I will pull my child from the public schools and join or start a co-op before vaccinating my child for covid. (We also don't vacinate for the flu and never had the flu for that matter.)

1/3/2022 6:13 PM

Words cannot even begin to explain the extent of the usurpation of powers that try to strip the FREEDOMS from the people to choose for their own benefit. Allow people to vaccinate if they so desire.....and if they believe it will help protect their dependent children. Equally, for those who choose to exercise their freedoms to not vaccinate, HONOR IT.

1/3/2022 6:13 PM

We will NOT be vaccinating our daughter. There is no long term studies on this experimental vaccine. Covid is not a threat to our children. STAND UP AND PROTECT OUR CHILDREN!

1/3/2022 6:12 PM

Stop forcing vaccines

1/3/2022 6:12 PM

Absolutely not the schools place to mandate a vaccine which is not proving to be effective nor has there been enough time to study long term effects. Should 100% be parents and students choice not schools

1/3/2022 6:12 PM

This is an unscientific and dangerous overreach by our state government. Enough is enough! Respect individual freedom!!!!!!

1/3/2022 6:12 PM

It's ridiculous to mandate a vaccine for students. My son had covid then got vaccinated and had a booster shot. He just tested positive for covid. I don't think the government knows what the heck they are doing. No student should be mandated to get a covid vaccine.

1/3/2022 6:12 PM

This is all so ridiculous. I'm okay with vaccination but I'm struggling to understand why.

1/3/2022 6:12 PM

Polio is an excellent case study. Vaccines work.

1/3/2022 6:12 PM

Keeping us healthy is a top priority. We already have a number of required vaccinations so adding the Covid vaccine seems a very reasonable expectation for keeping all healthy.

1/3/2022 6:12 PM

I will not force my child to get a new vaccine recently developed if he does not want it .

1/3/2022 6:12 PM

I hope if you gorce the vaccine on children that you will continue to have an online only option available for those who do not wish to vaccinate their children.

1/3/2022 6:11 PM

Thank you for considering a vaccine mandate.

1/3/2022 6:11 PM

No

1/3/2022 6:11 PM

No more mandates you leftists idiots.

1/3/2022 6:11 PM

We will not comply with any mandate and adamantly insist that all supposed covid measures be dropped immediately. Parents are the authority for Childrens' health, not the State.

1/3/2022 6:10 PM

My children are already vaccinated. I believe in the medical value of vaccines. I am unsure that vaccines should be mandatory for all.

1/3/2022 6:10 PM

We do not believe that an untested, experimental vaccine should be mandated for kids to attend school. All of our kids have had covid and got through it just fine. Vaccine mandates do not leave any room for natural immunity, which is far more effective than any vaccine. We have complied with mask mandates for school but we will not comply with this vaccine mandate. We value our kids' health and well-being too much.

1/3/2022 6:10 PM

The governor can shove the vaccine mandate up his ass.

1/3/2022 6:09 PM

Vaccinations are vital. Vaccinations are good. Vaccinations play an important role of society...only when they've been tested, studied, retested and worked through. The COVID vaccine is not one of those vaccines. It is still an emergency use only vaccine. It DOES NOT have full FDA approval. The group of children that they are trying to mandate this for are definitely having adverse reactions and are low on the sickness threshold and it is still only months after emergency approval. This is not a school decision. This is not a state decision. This is a parent decision.

1/3/2022 6:09 PM

I am in favor of vaccines, and I have received the COVID-19 vaccine. Please don't require the vaccine for our children this year. Please give us a little more time to evaluate the vaccine and its side effects, especially in our younger children.

1/3/2022 6:09 PM

None

1/3/2022 6:09 PM

Covid 19 has shown itself to go through various strains in the past 2 years and even vaccinated individuals find themselves contracting it. Because of the nature of the virus, I only support a viewpoint of it being optional like a flu shot is. Flu shots are currently not required at schools. Parents and staff do their best to mitigate spread other ways; at risk individuals have the opportunity to receive the flu shot or not. If Mead requires a covid vaccination for enrollment, we will pull our 4 children out.

1/3/2022 6:09 PM

No

1/3/2022 6:09 PM

I've already pulled one of my children out of public school and if this vaccine is required, I will pull my second child with no hesitation. This vaccine is not safe for children and should not be mandatory.

1/3/2022 6:09 PM

I fully support a COVID 19 vaccine mandate. It's a no brainer. Us logical, caring, and thoughtful parents and families shouldn't have our children's health put in danger by easily triggered right wing extremists, conspiracy theorists, and charlatans.

1/3/2022 6:09 PM

Vaccine mandates are the only thing that make sense if we're going to ever be back to pre - covid normal. This is common sense and Mead Schools should absolutely support this requirement.

1/3/2022 6:08 PM

All of my children have gotten COVID and done great with recovery. All have natural antibodies. To subject them to a risky vaccine is dangerous and not needed. Morbidity rates in children are extremely low why would you force people to do something they choose not to put into their bodies?

1/3/2022 6:08 PM

My answers are solely for my own child and our specific situation. My child (7 yo) has already received her Covid vaccine.

1/3/2022 6:08 PM

I will never allow my children to get the covid vax. We will homeschool if it becomes a requirement.

1/3/2022 6:08 PM

My children are fully vaccinated.

1/3/2022 6:08 PM

Already have my son vaxxed, there should have been an option for that. Thank you for all you are doing to keep our kids safe.

1/3/2022 6:08 PM

Really upset that a couple board members continue to be anti bad and anti mask. Shameful. If you write a letter that goes against vaccines I will never vote for Mead levy again.

1/3/2022 6:08 PM

I encourage all decision makers to view this FDA advisory meeting in its entirety (8 hours): [https://www.youtube.com/watch?v=laaL0\\_xKmmA&t=7133s](https://www.youtube.com/watch?v=laaL0_xKmmA&t=7133s). You will see that there are categories of children that the risk outweighs the benefit. You will also see that the advisory committee members were VERY conflicted in this vote. Pfizer has not published any new data in the 5-11 year old range since this advisory committee. We need more data. I have a PhD and work in human clinical research. Drugs typically aren't rushed to mandated use based on such little data. Also, remember that this vaccine only has an EUA, not FDA approval. Both my husband and I are fully vaccinated against COVID-19 including the booster shot. I do not support COVID-19 vaccine mandates for children, especially for boys who are particular prone to risk of myocarditis. I have 2 boys who will not be vaccinated until more data is available.

1/3/2022 6:08 PM

Vaccination should be a choice not a mandate.

1/3/2022 6:08 PM

I'm unsure how a governor can mandate we inject something into our children's bodies, that is permanent and doesn't not have enough research on long term effects. It's required that the state provide our students with free and public education for all students. I think it's a dangerous precedent to allow a man to hold public education hostage depending if you don't follow his mandate or not.

1/3/2022 6:07 PM

This is absolutely ridiculous to force children into an understudied vaccine that is not even a defense against the new variant and those still to come. I know for myself, and many other parents we will be pulling our children and seeking private education instead.

1/3/2022 6:07 PM

My children can not have the vaccine for medical reasons. I will withdraw my students. I will not home school With any state school system.

1/3/2022 6:07 PM

COVID doesn't make children sick, it's run it's course, and is now purely political...enough

1/3/2022 6:07 PM

The choice for a family to vaccinate should never be dictated by a government entity. The vaccine can be useful, but there are other measures people can take to protect themselves & others.

1/3/2022 6:07 PM

My child. My choice.

1/3/2022 6:06 PM

Most children are very healthy!

1/3/2022 6:06 PM

Mandatory vaccines are not constitutional. Parents should be able to decide what's best for their children! Government needs to stay in their lane!

1/3/2022 6:06 PM

Don't make it a mandate.

1/3/2022 6:06 PM

There's already many immunizations kids need to begin kindergarten. This is not something new or crazy. It was like that when I entered kindergarten as a child. Measles, Mumps, Polio, Chicken Pox... all things my kids have never heard of because guess what, we have vaccinations for those to enter kindergarten and they aren't a regular thing to get anymore. Why is this vaccine any different than those to require?

1/3/2022 6:06 PM

That we appreciate all that is being done to protect are kids. more testing available and home tests.

1/3/2022 6:06 PM

I am vaccinated and my two children are. I teach the most vulnerable population-special needs preschoolers; therefore, in order to protect myself, my own children, my students, and my family, I chose to vaccinate to protect my health, my family and my community. Research and science shows

that vaccines are effective in protecting against covid and other illnesses. Schools should require vaccines to participate in school, just like they did when my own kids entered kindergarten. You choose not to vaccinate and protect others then your student shouldn't be able to participate in public school.

1/3/2022 6:05 PM

My children's health and welfare is my responsibility as their parent, not the State's. I and I alone get to decide what gets put into their bodies, not the State of Washington. I pay taxes in order to support public schools and my child should have every access to the schools regardless of their vaccination status. Where does this totalitarianism end? Why have we stopped believing in "My body, My right"? The media hyped mass hysteria over a virus that is 99% survivable for our children needs to end. This virus is not a killer for our kids. My entire family has had Covid and it was simply like having the flu. Those in the district that buy into the fear mongering of this "plandemic" need to stay home or find a different job. Our children should not be penalized educationally for choosing not to poison their bodies in order to attend public school. This jab should be a choice not a mandate. Please listen and stop the insanity. Let's be a district that finally says "Enough" to the stripping of our freedom and sovereignty over our bodies.

1/3/2022 6:05 PM

This vaccine is still being studied and we do not yet know long term effects. There is no way I will have my child be vaccinated in order to attend school, we will pull our children as will many others. My daughter already has had COVID and I trust her natural immunity to protect her well over putting a vaccine into her system.

1/3/2022 6:05 PM

I will not put this vaccine in my children's bodies. The Covid vaccine has not proven to be safe or effective.

1/3/2022 6:05 PM

We believe that students AND staff should not be allowed exclusions.

1/3/2022 6:05 PM

I am absolutely against the mandate for vaccines. We would strongly consider leaving WA if this is enforced

1/3/2022 6:05 PM

This is completely insane and unneeded. Will Mead school district be liable for any and all issues resulting from taking the COVID flu shot for the lifetime of my child? Probably not. When the doctor who help make the vaccine said it shouldn't be used in children, people should listen. If needed, we will move to a school choice state to make sure this overreach will be removed from our lives.

1/3/2022 6:05 PM

Other life saving vaccines are required. This should be no different.

1/3/2022 6:05 PM

My children have already received their COVID vaccines and are fully vaccinated.

1/3/2022 6:05 PM

This state and this school district should have no say on the status of my child's covid vaccine status. People are still getting the virus even if they are vaccinated. I should not be forced to decide

between my personal belief of what's healthy for my child if they get to continue there public education

1/3/2022 6:05 PM

Please do not mandate the vaccination of our children until due diligence is done. We need years of data before I will feel comfortable with experimental medicine in my children. I have been a nurse since 2008. I am vaccinated. Please allow exemption for children as this virus has proven to be safe in children.

1/3/2022 6:05 PM

Please respect parent's decisions to vaccinate their children or not. The protocols taken by the school district have proven to work and with everyone's help we can continue to allow families to choose what's best for them.

1/3/2022 6:04 PM

My student has been vaccinated, but that is the choice my family made. I would never presume to mandate that decision for anyone, let alone deny anyone right to a public, in-person education as a result to their decision. I actually can't even believe you are even talking about it.

1/3/2022 6:04 PM

My kids (7, 9, 11) are already vaccinated, so a mandate won't impact our vaccination status. I feel that the COVID vaccine is no different from other vaccines that children must have for school.

1/3/2022 6:04 PM

In requiring the Covid vaccine in order to attend school you'll see a drastic decrease in the number of children attending public schools. Because they're are so many people out there that either are unable to get the vaccine for medical reasons or families that feel like their right to choose for the sake of their own health is being ignored. Thus denying these children life lessons that they could never learn being homeschooled or online learning. Teamwork, working on public settings, problem solving social situations, navigating social situations with their peers or authority said so much more. The flu shot is not required in order to attend schools but it is recommended. COVID-19 is similar to a flu being a virus and is continuing to change. You'd have to check every year that the child was immunized rather than only when they apply. My son is fully vaccinated to date as am I and my husband, but we are not vaccinated for Covid. We are not anti-vaxers, we believe that vaccines do work and help the many as well as the one. But this vaccine is still way to new and untested not just in it's short term effects throughout many variables (gender, race, age, interactions with medical complications, pregnancies, etc.) But also in how it will effect us in the long term and on the next generation. I do not feel comfortable being a guinea pig nor do I feel comfortable asking my children to be one. Please keep the recommendation, please don't make it a requirement.

1/3/2022 6:04 PM

Every one has the right to bodily autonomy and no one should ever be forced to do something to their body they do not want. The vaccine only reduces the symptoms of the vaccinated person, it does not stop a vaccinated person from getting Covid or spreading it. Forcing other people's children to be injected with something that has been causing heart inflammation and heart conditions in young men and adolescents is immoral. Especially since the covid death rate for children is low, 0.4%. I personally do NOT want my healthy son to develop a heart condition from a vaccine for a flu that he has an extremely high chance of survival. I would think that people should have a choice in the matter of their own children.

1/3/2022 6:04 PM

If the Covid vaccine is required for attendance I will pull my kids from school and homeschool them. Covid doesn't effect children and the vaccines available ARE NOT APPROVED BY THE FDA. The Mead District has already lost much of the respect I had for it, having been a Mead Grad myself. Do not require this vaccine.

1/3/2022 6:04 PM

We WILL withdraw our child if this vaccine is mandated!! We WILL not vaccinate our child with only 2 years left of HS. This is our choice & our right as his parents. We WILL not conform to this dictatorship.

1/3/2022 6:04 PM

There is more negative than positive with the vaccine. This isn't ready for myself or my kid

1/3/2022 6:03 PM

Unconstitutional and absolutely will not be vaccinating either of my children I will take them out!!

1/3/2022 6:03 PM

Please do not do this to our children.

1/3/2022 6:03 PM

Every child and staff member should absolutely be vaccinated regardless of a state mandate. The exemption process should be stringent and not acquiesce to exemption requests made in bad faith.

1/3/2022 6:03 PM

No further comments

1/3/2022 6:03 PM

Myself and my family, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement. Thank you for your time. Brooke McGirr Parent of 2 @ Colbert Elementary 530-233-8472

1/3/2022 6:03 PM

Keep up the good work.

1/3/2022 6:03 PM

The Supreme Court has said the Presidential mandates are unconstitutional. Why would the Governor or the SBOH think their mandates are legal? Particularly for children.

1/3/2022 6:03 PM

Please follow the direct advice of medical professionals regarding anything related to maintaining the health of my child. I defer to my accountant to manage my taxes, I defer to my mechanic to fix my car, I defer to my hair stylist to color my hair, I defer to teachers to teach my children and doctors to provide medical advice.

1/3/2022 6:02 PM

Time to move to Idaho

1/3/2022 6:02 PM

Both of my children, 7th and 4th grade, are already vaccinated.

1/3/2022 6:02 PM

Mandates with no long term effects known for children seems extreme. We are adults are vaccinated, so I think it's different. also that fact that our 5 year old is on the youngest end of the spectrum. Who's to say his body is any different than a 4 year old who has nothing approved for them yet.

1/3/2022 6:02 PM

Absolutely wrong to mandate this for school age children!!!

1/3/2022 6:02 PM

Please help the stupid people get their children vaccinated.

1/3/2022 6:02 PM

As of Wednesday January 5th 2022 all 3 of my children will be fully vaccinated that attend midway elementary.

1/3/2022 6:02 PM

Children are less at risk. Also our bodies our choice

1/3/2022 6:02 PM

My children are already vaccinated and I feel like it should be required just like any other school vaccination

1/3/2022 6:02 PM

The scientific data does not support requiring students to be vaccinated.

1/3/2022 6:01 PM

Vaccines are required for other diseases and COVID should be treated the same by the schools! We fully support vaccine mandates.

1/3/2022 6:01 PM

NO TO COVID VACCINE MANDATES!

1/3/2022 6:01 PM

COVID is not and has never been a threat to kids. However, the vaccine has caused health issues with this demographic. What you should do instead is remove every member of the TAG group who votes to mandate vaccination for children from ever teaching or participating in any school or school district permanently. This is equivalent to child abuse and these people would not be qualified to instruct children.

1/3/2022 6:01 PM

I watched the entire 4 hour FDA advisory hearing prior to the emergency authorization of Covid vaccination for children. The support was tepid at best and concerns were raised that a vote for authorization would result in pediatric vaccination mandates, which the panelists were explicitly opposed to. The risk versus benefit for healthy children is simply not in favor of mass vaccination. At another point in the authorization hearing, the panel acknowledged that ICU admissions for myocarditis and pericarditis would cancel out the pediatric Covid hospitalizations avoided by vaccinating this population. Prior to having children, I worked as a pediatric nurse practitioner and have had experience overseeing a new to market vaccine, the HPV vaccination. The process I've observed regarding EUA of these vaccinations for children is so far outside the typical procedure for vaccine approval It is concerning. Our children are Covid recovered so the cost versus benefit analysis is simply not there for our family. We are fortunate that we've been successfully homeschooling with the MEPP program for a decade and therefore it'll be a seamless transition for us to withdraw our students. I feel great sadness for the families who are not so fortunate and may have to choose between the public education owed to their children and a vaccine their children truly don't need to be safe and healthy at school. This truly flies in the face of informed consent. I am deeply disappointed this is even on the table.

1/3/2022 6:00 PM

Covid is apart of our lives now. Just like measles and chicken pox. We were all vaccinated for these diseases. There is no difference.

1/3/2022 6:00 PM

The vaccine should be a choice as us the flu shot not a mandate.

1/3/2022 6:00 PM

No

1/3/2022 6:00 PM

No

1/3/2022 6:00 PM

I am not against vaccines, but I am against being forced to get a trial "vaccine". My COVID shot has made my life very uncomfortable at times with its side effects, and I will not put that on my young children.

1/3/2022 6:00 PM

This is not something parents should be forced to do without knowing the long term effects

1/3/2022 5:59 PM

My Student is vaccinated but I believe it should be up to the parents and students. I believe a mandate would only polarize our community and pit the school district and administrators against parents. Mandating this vaccine might also affect the vaccination rate for other required vaccinations.

1/3/2022 5:59 PM

Please stop this madness!

1/3/2022 5:59 PM

Mandating a vaccine for an illness that is not dangerous to children, even when many children have already had covid is unfair to our students and to families that deserve the right to make medical decisions privately. I will withdraw my kids from public education if there is no exemption process.

1/3/2022 5:59 PM

No reason the governors office won't listen to anyone who doesn't fit their views. If they actually followed the science we would not worry about the vaccine because it's still possible to spread the virus while vaccinated.

1/3/2022 5:59 PM

No

1/3/2022 5:59 PM

A immune booster that neither prevents, cures or makes you not contagious should never be required to go to school.

1/3/2022 5:58 PM

Dont vaccinate kids, it's not proven for long term issues and should be a choice

1/3/2022 5:58 PM

No

1/3/2022 5:58 PM

There is not enough studies to mandate this vaccine. The CDC keeps changing everything on it. I do not feel any vaccine should be mandatory.

1/3/2022 5:58 PM

My children are already vaccinated and will continue to receive all vaccines that will help ensure their health and safety.

1/3/2022 5:58 PM

If MSD joins the wrong side of this argument, you can kiss every single levy goodbye from here to eternity. We have the means and the money to pull our children and find another way to take care of their education. There will be backlash of unprecedented levels should MSD advocate for this. Our children have been through ENOUGH and the data to support a move like this is NOT there. We're tired of being treated like morons by school administrators and health boards. MSD parents will NOT stand for this.

1/3/2022 5:58 PM

Please have students be vaccinated!

1/3/2022 5:58 PM

My kids are already vaccinated. We want to be part of the solution not part of the problem. Use this as an example of teaching your kids to love their neighbors.

1/3/2022 5:58 PM

Bring back personal choice and stop all the mandates!

1/3/2022 5:58 PM

Mandates are not the answer to problem. Parents need the choice to vaccinate their children or not.

1/3/2022 5:57 PM

This has been going on for two years and we're still doing the same thing. Definition of insanity: doing the same thing over and over again, expecting a different outcome. This is the worst thing for young children who are not even mildly affected. I would support any parent who wants to pull out of the mead school district if this mandate is passed! 0 deaths of students, but how many suicides have we had?

1/3/2022 5:57 PM

No to covid shot!!

1/3/2022 5:57 PM

This is absolutely crazy to require a vaccine to go to school that is still emergency use only and experimental. Children have very low risk of having complications from covid and their survival rate is statistically 100%. I will pull my children from school and homeschool if this is a requirement with no exemption process. But it is absolutely asinine that this is even being considered. I really hope mead does not support this action.

1/3/2022 5:57 PM

I think it's incredibly important for the safety of the children and for our community at large for vaccinations to be required and I believe we have seen ample evidence that proves the validity/safety of the COVID vaccine. Therefore, COVID vaccines should be mandatory for school attendance.

1/3/2022 5:57 PM

We already have vaccination mandates in place for public health in k12 education. This is no different from the other mandated vaccinations that keep our kids and community safe.

1/3/2022 5:57 PM

I am already unhappy with the way Mead has handled COVID protocols this year. Last year you did an AMAZING job. This year protocols have been lax and I am disappointed that vaccinated teachers are not required to wear KN95 or N95 masks and have regular testing. If you are allowing accommodations, then its also your responsibility to put additional measures in place to protect others. These things have been very poorly communicated this year. Please go back to following guidelines and not trying to entice people not to comply with public health measures.

1/3/2022 5:57 PM

I have 4 elementary kids that will be pulled from school rather than get the vaccine. The vaccine is experimental, doesn't stop the spread of Covid-19 and is totally unnecessary in healthy kids. Listen to Dr Robert Malone. This is wrecking our kids! Mead School District - please fight for our right to make parental decisions. The government should not be making this decision! As a single mother, it is going to be very hard to homeschool and work full time but I feel that strongly that the current vaccine is unhealthy for kids.

1/3/2022 5:57 PM

Our rights our bodies our children. Our Coice

1/3/2022 5:57 PM

NO COVID19 VACCINATION MANDATES EVER!

1/3/2022 5:57 PM

No

1/3/2022 5:57 PM

No mandates!

1/3/2022 5:56 PM

I will not vaccinate my children. I will not let my children be lab rats nor will I ever be one.

1/3/2022 5:56 PM

more research is required in my mind before I vaccinate my child for something she has already had. an antibody test would be best

1/3/2022 5:56 PM

I have already fully vaccinated my child. Where is that answer on these questions? (meaning I was not compelled by any mandate to do so but chose to do so for the health of my student).

1/3/2022 5:56 PM

This "vaccine" should be compared to a flu shot and absolutely not a mandated "vaccine". My children have all required shots but will not receive this one that is approved for "emergency use". If they have the anti-bodies, why require a shot?

1/3/2022 5:56 PM

There are zero long term studies showing this vaccine is safe. In fact there are more and more studies showing it is not safe. There are also studies showing negative efficacy... meaning the more shots someone gets, the more likely they are to get infected. If this is implemented and one child has a serious adverse reaction or is killed... then it will be my personal mission to ensure Jay Inslee is put in prison.

1/3/2022 5:56 PM

I support science. Requiring a vaccine with little to no research to support efficacy or study of side effects is absurd and what I would consider child abuse. I will not vaccinate my children until there is sufficient evidence to support its efficacy and support its benefit over risks.

1/3/2022 5:56 PM

All three of my children are fully vaccinated for all available pediatric vaccinations, as per the guideline set out by the state and our pediatrician (meningitis, pertussis, seasonal flu, etc). I intend to get them COVID boosters when those are available as well. I think that the COVID vaccine should be treated like all other childhood vaccinations in public education: I think they should be required to attend school. Furthermore, those who choose exemption from vaccinations should be required to keep their unvaccinated child home during a school outbreak of that particular infection- similar to the standing policy for whooping cough, etc). Treat the COVID vaccine like all the other vaccines. Require it and offer options to stay home for those who choose not to meet the guidelines.

1/3/2022 5:56 PM

I am extremely uncomfortable with the thought of using Covid vaccinations on children. To me, it's shoddy, rushed science designed to meet our fearful wants. Adult vaccinations are one thing, I have zero interest in using practically experimental vaccines on children.

1/3/2022 5:56 PM

Mandating kids to get a COVID vaccination will ruin schools and cause a lot of people to do home schooling or online school, which will vastly harm a kids education!

1/3/2022 5:56 PM

This is absolutely unconstitutional and incredibly wrong. Mead sure know better.

1/3/2022 5:56 PM

The risk of complications to children as a result of this vaccine are greater than the risk posed by the illness.

1/3/2022 5:56 PM

My child will not attend any school where they are mandated to be vaccinated for covid

1/3/2022 5:56 PM

I feel our children should NOT be forced to wear masks at schools, or in general.

1/3/2022 5:56 PM

Children are not affected by Covid like the elderly and those with co-morbidities. Additionally the vaccine has already been proven to have a lackluster ability to actually prevent Covid from infecting the vaccinated, spreading to the the vaccinated, and also preventing death of the vaccinated from Covid. Additionally, when you examine the deleterious events that have been experienced by children under the age of 18, such as blood clotting, etc, it is unheard of that the use of this vaccine would not be stopped immediately. If you look back to the initial roll out of RSV, after just 2 deaths, that vaccine went back to be "re-worked" with additional studies. Thirdly, there are no safety studies, nor is this vaccine even approved by the FDA, an emergency use authorization is not FDA approval, nor should it be confused as such, and should a vaccine injury happen to children, there will be no assistance by the manufacturer nor the federal/state government. It should also be noted that many are recognizing that we will not be able to vaccinate or "Booster" our way out of Covid, the belief that we will is false. Our children's health should be at the centerpoint of this conversation and the fact that there have been no long term studies, and the anecdotal information that exists shows greater harm than good should give every parent in the state pause on the Covid vaccine. If this is mandated, I will simply pull my children out of public school and we will educate them from home.

1/3/2022 5:55 PM

The vaccination has not proved to be effective. Also it is completely ridiculous to consider mandating a viral vaccine.

1/3/2022 5:55 PM

All 5 of my kids, ages 7, 9, 10, 17, & 19, are ALL vaccinated and have been since they were first able to. They all wanted to be so that they wouldn't get sick or to help slow the spread of COVID. My husband & I are both in the medical field (husband is a provider) so we have done our research as well as seen what this virus is doing to people. My family is vaccinated and we will continue to stay that way regardless of any mandates.

1/3/2022 5:55 PM

No - the vaccines are a critical part of the solution to being free from the costs and burden of this disease. It is no different than the requirement for vaccines for polio, rubella or other infectious diseases, and needs to be viewed from an apolitical public health perspective. We favor an exemption for legitimate health reasons, but that should be rare as is for most other public health vaccines.

1/3/2022 5:55 PM

Please have the governor's office provide proof that all government employees are free from STDs, diabetes, asthma and gingivitis. That makes about as much sense as forcing a child to be injected with an experimental vaccine to protect them from a cold. We have already had Covid and it is a cold. Oh and mention maybe that they should leave our kids health to their parents. I don't remember ever signing anything about government control of my child when I took them home from the hospital. Holy cow can we all get back to work now!!!???? We would leave the state before injecting our kids.

1/3/2022 5:55 PM

I don't see how the Covid vaccination can be included in the WAC for Immunization of Child Care and School Children Against Certain Vaccine-Preventable Diseases. Based on science, we're seeing many breakthrough cases of Covid amongst the vaccinated population. Therefore, I do not believe this is a vaccine preventable disease.

1/3/2022 5:55 PM

My school-aged kids are vaccinated

1/3/2022 5:55 PM

Get inslee out of office! He is a dictator

1/3/2022 5:55 PM

This is a huge overreach from the government...this "vaccine" has not had proper studies done nor time given to accurately assess the risks. The risk to benefit to children does NOT warrant a mandate. I will NOT give this to my children. I am NOT anti-vax.

1/3/2022 5:55 PM

Mead school district has implemented effective covid procedures that have minimized the spread of covid while providing effective learning. There is absolutely no reason to mandate children to be receive a covid shot to attend school.

1/3/2022 5:55 PM

This vaccine is unnecessary for the protection of children. There are no dire side effects or disabilities that occur if contracted. Natural immunity is better for protecting against this particular virus.

1/3/2022 5:55 PM

I Do Not want my kids vaccinated. This is getting out of hand.

1/3/2022 5:55 PM

There is not enough research behind the Covid 19 Vaccine for children. Children are not in grave danger of Covid. I will rely on the 99.9% chance that my children would recover from Covid versus the 100% unknown effects of the vaccine.

1/3/2022 5:54 PM

Totally unacceptable and gross violation of parental rights and the rights of our children to a public education... According to Article IX of our state's constitution, it is the paramount duty of the state to provide education to our children... this SHOULD NOT be contingent on parents' private medical decisions.

1/3/2022 5:54 PM

Perhaps you should review the VAERS system to see that long list of adverse reactions that children have had to this vaccine. Covid does not pose a real threat to children, otherwise my child never would have been sent back to school. The threat of Covid is lower than the threat of flu to children. This is a tyrannical game that needs to end.

1/3/2022 5:54 PM

My family and I made the decision to vaccinate our children. We did our research, and decided that is what was best for our children. However, I do not think there should be a mandate for children. That decision should be left up to their parents.

1/3/2022 5:54 PM

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age. Requiring an injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in its delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children whose parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

1/3/2022 5:54 PM

I never really thought about where those trains were going.

1/3/2022 5:54 PM

My high school kids are vaccinated and became extremely sick from their second shot. My younger two both had Covid in August and had minimal symptoms and sailed through it. There is no reason for them to suffer potential illness from a vaccine meant to protect them from something they had and didn't get sick from. Parents need to choose what is best for each of their children, period.

1/3/2022 5:54 PM

This is no different than any other vaccine requirements to attend public school.

1/3/2022 5:54 PM

The science is in. Children have a one in one million chance of dying from COVID. They have a higher chance of dying on their car ride to school every day. I will not vaccinate my child as he does not need it. This vaccine mandate is a complete overreach of government in an attempt for a one size fits all approach. Freedom of choice is absolutely necessary when it comes to Covid vaccinations and to not get vaccinated should not result in discrimination.

1/3/2022 5:54 PM

Further safety studies needed before requiring COVID 19 vaccines in children.

1/3/2022 5:54 PM

There is absolutely no reason to mandate a vaccine for children. Please show us any data that backs up the need. There are vaccines and therapeutics for those high risk.

1/3/2022 5:54 PM

No one has the right to tell me to vaccinate my child especially with an experimental vaccine with unknown long term consequences. I will pull all my children from the district if this is mandated.

1/3/2022 5:54 PM

We are willing to sell our house and move out of mead school district if they require it.

1/3/2022 5:54 PM

Our child is high risk and it will make us far more comfortable sending him to school if vaccinations are required.

1/3/2022 5:53 PM

Its needed for our children's safety

1/3/2022 5:53 PM

I do not believe it should be a requirement as each person's health needs are different! However my child is already vaccinated because that was best for our family.

1/3/2022 5:53 PM

My children are already vaccinated. To me, this is no different from MMR, TDAP, Tetanus, or Flu. Perhaps beefing up scientific education standards would help people understand how to interpret scientific data and make good decisions.

1/3/2022 5:53 PM

If students are vaccinated then why the increase in testing for athletics? Also, not as comfortable with vaccinating elementary aged kids when the illness has not shown to be anymore harmful than a cold and even with the vaccine it can still be passed along.

1/3/2022 5:53 PM

It is time to move forward and have the Governor stop acting this way. Our children are the ones suffering from his handling of this entire Covid mandate in EVERY way. I am ashamed to call him governor

1/3/2022 5:53 PM

People who are vaccinated and boosted are getting COVID. Unvaccinated people must provide a negative test in order to attend certain events, but a vaccinated person can attend and be covid positive without knowing it and spread the disease. This goes against the scientific method which is taught as a standard throughout the science curriculum in the state of Washington and beyond.

1/3/2022 5:53 PM

Thank you for seeking feedback from parents, Mead.

1/3/2022 5:53 PM

The vaccine potentially poses a much higher risk to my children's health than the illness. This is catastrophic overreach by the government.

1/3/2022 5:53 PM

I fully support required vaccinations to protect the health and safety of our students and teachers.

1/3/2022 5:53 PM

Having kids vaccinated keeps all members in the community as safe as possible and helps reduce the severity of illness for vaccinated individuals. Let's protect vulnerable members of society with weakened immune systems by doing our part. It is a matter of public health, safety and science. Let's keep our kids, teachers and staff safe in schools by requiring the vaccine.

1/3/2022 5:52 PM

I believe it should be a choice made by your own family not the government.

1/3/2022 5:52 PM

Please institute a vaccine mandate for Covid

1/3/2022 5:52 PM

No

1/3/2022 5:52 PM

This is unconstitutional. You can not force vaccines on people.

1/3/2022 5:52 PM

This is incredibly frustrating, that there is the possibility of a mandate being put into place for children.

1/3/2022 5:52 PM

Freedom of Choice

1/3/2022 5:52 PM

Full vaccination of all eligible persons in the US is the only course we have for getting out from under the pandemic we are now experiencing. Given the fact that those vaccines have been fully vetted as safe by the FDA and CDC, we really need to be doing this for everybody. On a personal note, I have worked through the pandemic in a large hospital ICU, and have seen first hand this year, that those who lack vaccination are almost universally the ones who get sickest and then die from Covid-19, whereas the few cases who come in to see us who are fully vaccinated are much fewer in number, and live to discharge home alive. To skip this defense for our children and for their families, would be an insane course of action.

1/3/2022 5:52 PM

Follow Dr Peter McCulloch before doing anything to our children!!! It is not legal to force vaccination on an experimental drug!!!! Stop the madness!!!! We are all being forced to comply - this is like living in The Hunger Games and we are sacrificing our children!

1/3/2022 5:52 PM

My children are already fully vaccinated with both doses of Pfizer

1/3/2022 5:52 PM

Let the parents decide what we want to do with our children and their bodies.

1/3/2022 5:52 PM

I will immediately pull my children the the Mead School District and all no longer use the public school system if vaccine mandates are put in place.

1/3/2022 5:52 PM

Parental discretion for all vaccinations with exemptions in place should be the rule. My daughter is vaccinated, including COVID-19, but I don't agree with requiring it if a parent isn't comfortable. The covid vaccine has not been around as long as the other mandated vaccinations (which have exemptions in place), so it's premature to require it at this time.

1/3/2022 5:52 PM

Please don't force this vaccination on children. It is not safe and is killing millions.

1/3/2022 5:52 PM

This age group is at the lowest risk for serious illness. It is asinine to mandate a vaccine with no long term study data. This is still experimental no matter what the cdc and fda is paid to approve. Natural immunity is not being considered and it is irresponsible of the state and the schools to make such requirements

1/3/2022 5:52 PM

There are no long-term studies on the effects of the vaccine on young children. Young children are the age group least affected by Covid. This is madness.

1/3/2022 5:52 PM

Follow the numbers not the politics you power-hungry freedom-hating failed governor . School children are not in danger and socioeconomic impacts of further covid mandates that don't work will further suicides, emotional distress, mental health crises, lagging education, etc.

1/3/2022 5:52 PM

There is no exemption available with this current administration. I am a state employee and I was that there would be exemptions available. My exemption was approved, however I was told that I would not be able to do my job without the vaccine. I was told to get vaccinated or I would be fired. Even after receiving an approved accommodation it means nothing the governor will still force us to do something that I don't not feel comfortable with. I am not anti vaccine, I just do not have confidence in this vaccine yet and we should not be forced to put something in to our bodies if we don't want to.

1/3/2022 5:51 PM

This is getting a little out of hand!

1/3/2022 5:51 PM

Thank you for seeking feedback from parents.

1/3/2022 5:51 PM

This is not the role or job of government. People will move in large numbers. Idaho will love our tax dollars

1/3/2022 5:51 PM

There is absolutely no need to mandate a vaccine for our children! Our children show little to know symptoms and very low transmission rate. This vaccine has already shown to cause side effects to young teens. ! This is a respiratory virus similar to flu, with an extremely high survival rate, especially in children. Please do not force this upon our children!!

1/3/2022 5:51 PM

Vaccines are not harmful and leadership is not doing a good job articulating that fact. It is a public health issue and a failure on the part of experts allowing charlatans to overtake our communities. Board seats are being taken over by fascists and we need our leaders to stand up against it. They're winning from the bottom up and our children are losing because of it.

1/3/2022 5:51 PM

Let parents make the choice, not the government.

1/3/2022 5:51 PM

This is an informed consent issue. It is unnecessary for children to have this vaccine, as they do very well with COVID. I would never inject such a new drug into my child's body with such limited safety trials. I believe these mandates to be illegal and a violation of Constitutional rights. With so many young people having myocardial issues after receiving a vaccine I cannot believe it is even a consideration to require it. In doing much research, I have learned there is a much higher risk for adversely reacting to the vaccine if a person has already had COVID. Therefore if this is required I will absolutely pull my child from public school.

1/3/2022 5:51 PM

If there is no exemption for this vaccine then we will pull our children from public school and find another option for schooling that does not force us to do something to our children that we do not agree with. Like other vaccines, there has always been an exemption for those seeking religious, medical, and/or personal reasons and this should be the standard for ALL new vaccines if they are to be required. Forcing families to vaccinate their children just to keep them in school, regardless of their opinion, is an intimidation tactic and should be seen as such.

1/3/2022 5:51 PM

These questions did not take into account that our family has already opted to vaccinate our children.

1/3/2022 5:51 PM

All kids deserve an education regardless of being vaccinated against covid 19. This is not ok!

1/3/2022 5:51 PM

As a family that has met all other vaccine requirements and has always had strong pro vaccination feelings, mandating a vaccine with no long term systematic randomized evidence to support the use is unethical and has high potential to put many children at risk.

1/3/2022 5:51 PM

It should be a choice not a requirement! I will withdraw my child from public school if it is a requirement

1/3/2022 5:51 PM

Yeah I think it is unconstitutional and irresponsible for a district to require a vaccination mandate on a drug that has been study for less than 2 years and there are no guarantees that there will not be long term effects to our children. This is a slippery slope. The state and the district should be held liable for any adverse effects as a result of a mandated vaccine

1/3/2022 5:51 PM

It is our job as parents to choose what is best for our kids. I will not be bullied or coerced into giving my kids something that is not proven to be safe in the short term let alone long term. I am more then

happy to pull my kids out of anything and everything that mandates this vaccine and cut funding by my child not being enrolled. Everything to this state is about money and I am more than happy to take my money somewhere else.

1/3/2022 5:51 PM

My children - all 4 - have been vaccinated. Just working on getting them booster shots. It would be great if the school could hold a booster clinic to make it easier.

1/3/2022 5:50 PM

Please mandate it to keep schools open and kids safe.

1/3/2022 5:50 PM

Forcing a child to take a vaccine that they absolutely don't need is criminal and holding their education from them in exchange is unconscionable!

1/3/2022 5:50 PM

Until the vaccine has been studied over a lengthy period of time and all risks have been disclosed by the FDA, CDC etc, I refuse to vaccinate children that are at the lowest risk to suffer severely from COVID. If the state wants to mandate the elderly get vaccinated that is fine, because science has shown those that are vaccinated still carry and get COVID.

1/3/2022 5:49 PM

This is way too early. They have zero idea how many boosters are necessary. Kids are also low risk anyway. As a family, we \*might\* consider vaccinating when/if a fully formed vaccine protocol schedule is absolutely finalized across the board and booster amounts fully agreed upon and fully finalized, such as the MMR schedule is. I will not "vaccinate" my under 12 year old for COVID prior to this. Please stand up for us and our children and not enforce this this early. Wait until they know what's needed to be effective.

1/3/2022 5:49 PM

Because the vaccine is new and we do not know the long-term affects, we will not vaccinate our children when the COVID-19 risk to them is very minimal. This is an assault on our freedoms and is not something the governor should be deciding for me or my children.

1/3/2022 5:49 PM

You can add the loss of 2 students in your district from our household, if the COVID mRNA gene therapy is required. It is not a 'vaccine' and is also still under emergency authorization since Comirnaty is NOT available in the US. The benefit of taking a vaccine that has had long-term studies and effectiveness, as all of my children have done in the past, is to prevent an illness/disease. This mRNA gene therapy does neither. It is also a illegal to mandate an injection during an experimental phase when information is being purposely withheld. ALL of the risks and potential benefits should be disclosed. This has NOT been the case!

1/3/2022 5:49 PM

I believe vaccines are very important and they have been required to attend school for many years now.

1/3/2022 5:49 PM

Absolutely NO VACCINE MANATE is acceptabe. Masking is not acceptable, It is time for this to end!!!!!!

1/3/2022 5:49 PM

My family has all had Covid. My kids show they have antibodies for Covid.

1/3/2022 5:49 PM

There is no data or scientific evidence to support this type of mandate or requirement for elementary aged students. My child will not be a part of their test group. When they can provide actual scientific evidence showing any kind of benefit to kids in this age group, after years of testing as other required vaccinations have undergone, I would be willing to re-visit the issue.

1/3/2022 5:49 PM

This is a trial vaccine with unknown long term effects. My children are healthy and active and I will not have them being used as guinea pigs. There is no transparency with these pharmaceutical companies, the government pushing these vaccines AND boosters for small children is ridiculous. I will have two children in the Mead school district next year and if this vaccine is mandated I will pull my children out of the school district. The symptoms of covid do not warrant a mandate for any person. Dr. Fauci has stated masks do not work and yet here we are disrupting the lives of these poor children all to make the pharmaceutical companies billions of dollars richer. Enough is enough.

1/3/2022 5:49 PM

This is evil to do to children . Grow a brain .

1/3/2022 5:49 PM

Please allow this to be the family's choice. We are for vaccines, this one is just still so new. In a year or so we'd be more willing to do it, as long as children aren't having any serious side effects.

1/3/2022 5:48 PM

All students need to be protected. This is public school and students are required to be vaccinated. Require this to keep staff, students, and the public safe.

1/3/2022 5:48 PM

We personally have been granted an exemption and would hope to have the same option for our children

1/3/2022 5:48 PM

I strongly encourage the school district and Governor's Office to consider the short amount of time with which this vaccine has gotten approval and that we are not privy to long term side effects

1/3/2022 5:48 PM

There have been countless class action lawsuits across the country against organizations/employers that are mandating the vaccine to be employed @ these organizations. The employees are winning these lawsuits across the country. These vaccines are not proven safe for children and have nothing I do with their right to education that our taxes pay for.

1/3/2022 5:48 PM

You couldn't even get the staff to get vaccinations. I now work in direct contact with staff putting me and my family at risk. Start with your educators and supporting staff first!

1/3/2022 5:48 PM

Why the fuck would we allow anyone to dictate medical decisions that are personal and private??? If we don't push back on this regardless of how we all feel the mandates will keep coming with more consequences. America doesn't feel so free these days... let's go Brandon!

1/3/2022 5:48 PM

My child is fully vaccinated.

1/3/2022 5:48 PM

Until they have more proof that this vaccine is o.k. for children, they should not vaccinate them. So far we have heard in older adults that the vaccine can have serious negative side effects. Children's little bodies are still growing and we do not know fully yet if this vaccine is safe on their growing organs. Other vaccines that are mandated have been tested and had more research done on them so I am comfortable giving them to my children.

1/3/2022 5:48 PM

Our family looks to the scientific experts to determine the best way to keep our family and community safe as we continue into the 3rd year of the battle against this COVID-19 pandemic. Vaccines have been a public health tool for many decades, and public schools have supported the safety of our children by requiring vaccines in order to attend. Requiring a vaccine against Covid-19 is no different, and should be mandated the way other vaccines currently are.

1/3/2022 5:48 PM

I hope that everyone gets vaccinated for Covid just as everyone must have their mmr and other required vaccinations to attend school.

1/3/2022 5:48 PM

Both of my children are vaccinated. That was our choice. I do not think the vaccine should be required.

1/3/2022 5:47 PM

Historically, we know vaccines save lives, and reduce hospitalizations. We should choose to help each other be safe and healthy.

1/3/2022 5:47 PM

I don't think this should be a mandate. But I don't know how it would affect me sending my kids to school.

1/3/2022 5:47 PM

Please help keep our children safe with requiring this vaccine to prevent spread and serious illness.

1/3/2022 5:47 PM

If the vaccines were effective, we wouldn't be in the situation we're in. There should be an exemption process or acknowledgment of previous infection antibodies. I will not enslave my children with forever boosters of a flu shot that we do not have studies on long term effects and that does not prevent infection.

1/3/2022 5:47 PM

I want to be sure the vaccine is safe for my young child. Unfortunately It's still such a new product and I feel uneasy with the chance of possible long term side effects.

1/3/2022 5:47 PM

We have almost had the school year with grades K-12 with minimal covid outbreaks...this is not needed out kids are doing great wearing masks and following guidelines. It's one thing to get the vaccine for yourself as an adult and take the risk it's a whole different story when we really do NOT know the long term effects of this vaccine for our children. I say stop the control and mandates and let our kids be kids.

1/3/2022 5:47 PM

If I quit my job because of the school district requiring the Covid vaccine for enrollment then what happens to my employer and also other people's employers when most industries are under staffed-I can support my family by not working but then how does unenrollment of my students (3 in the district) multiplied by how many others effect the staffing in the school district—maybe the unneeded teachers can fill my healthcare position?! This isn't going to be pretty if the state moves forward with this...

1/3/2022 5:47 PM

I am a nurse who worked as a nurse manager at a local hospital and now I work as a school nurse. I feel that mandatory covid vaccine for children is not a way to get over covid. We do not mandate flu vaccine to attend school, therefore I feel that covid vaccine should not be mandated. We will lose children in many school districts if this mandate is enforced, along with Healthcare workers and other essential workers in order to try to teach our children through homeschooling...

1/3/2022 5:47 PM

Science and data is evolving and this makes it difficult to agree to vaccinating small children at this time.

1/3/2022 5:47 PM

Studies have shown that the Covid vaccine is more harmful to children than it is helpful. No parent should ever be put in the position of forcing a vaccine on their child for them to go to school. Allow parents to be parents and to know what is best for their child and family.

1/3/2022 5:47 PM

You are messing with freedom of putting things into our bodies we will withdrawal and Eliminate funding

1/3/2022 5:47 PM

Our children are already vaccinated with both primary doses. I answered the questions though, from the POV that we had not and are being asked to vaccinate them. To say this is a contentious issue is an understatement, but we understand every parent is doing their best to protect their children according to their own moral compass, and based on their chosen information sources. Regardless of political divide, I believe that as a matter of public safety our local, state, and federal representatives must make choices in the interest of the entire public to the best of their abilities. Never will everyone agree. That's the democratic process. I believe in the rights of the individual and I will stand by anyone who's rights according to the constitution and my own beliefs on human rights. It's doesn't matter who you are or if we hate each other's guts personally, I'll still stand with you to protect your rights. I do believe that government mandates can be a very slippery slope, but when it comes to the safety of my children and the children of my neighbors I choose the safest option. Public schools fall under the administration of our government and ideally make decisions for the good of the whole public. If I felt strongly that the government wasn't making our schools safe enough for our kids then we simply would not send our kids to public school. We are not well off, but

we would find a way to provide an education for our kids, whether that's private, virtual or home schooled. I may not like it but we have the choice. I won't choose to hate my neighbors for choosing differently. I will lean into the science, not just media focused science, but independent (not editorialized radio or TV personalities from ANY media source, but simple reporting of information without embellishment) scientific study and peer reviewed findings in order to make the best decision for my family and my neighbors. Even if we don't always agree. I hope that we can find ways to overcome our differences here because I believe we have far more in common to talk about. We all want to keep our families safe, for one. We all love our kids. Without a doubt. So let's start there, and carry that love to our community and let go of the anger for each other. Let's keep each other safe. God bless

1/3/2022 5:47 PM

The way covid affects kids for the majority of the population is like another cold/flu bug and once they have it they have better immunity from it then any vaccine can provide. This is another flu bug that will continue in year after year with different strains and variants every year and there is NO way it should be mandated for kids!

1/3/2022 5:47 PM

Please do not mandate this vaccine. Please.

1/3/2022 5:47 PM

None

1/3/2022 5:47 PM

No

1/3/2022 5:47 PM

I Need more info before I decide if benefits outweigh unknown risks to my otherwise healthy child.

1/3/2022 5:46 PM

Should be a choice for families to make.

1/3/2022 5:46 PM

I will absolutely not be vaccination my child. I feel very strongly and I will quit my job and home school them if this becomes a requirement.

1/3/2022 5:46 PM

The school board, and all other officials are violating their oath of office and to the constitution by mandating anything, including masks. This has to stop.

1/3/2022 5:46 PM

I dont think a mandate is necessary

1/3/2022 5:46 PM

As kids are not necessarily high risk for severe cases of covid and as the vaccine does not prevent getting or spreading the vaccine, a mandate for children does not make sense and should not be implemented

1/3/2022 5:46 PM

This is woefully premature. There are no studies on the long term effects of these medical treatments on children. In the absence of such, conditioning access to public education on mandates is reprehensible and violates equal protection and due process. Given that it is clear now that MRNA "vaccines" do not prevent infection or transmission, mandates are moot as they will not prevent further spread. These vaccines are forced medical treatment, not prophylactics, which means informed consent should be a predicate. Not to mention that you're forcing it on the least susceptible and least impacted population. Shame on you for forcing parents to choose between sparing their children from unknown lifetime medical consequences, or access to public education.

1/3/2022 5:46 PM

My student has never been vaccinated. I'll be filing an appeal or withdrawing to an online program if necessary.

1/3/2022 5:46 PM

Mead parents saw this coming. Mead School District knows that the vast majority of families are against Covid-19 mandates! The board needs to take the stance of the majority of parents and that is go against any form of Covid-19 mandate. Spokane Regional Health Department and Governor Jay Inslee are not following science. It's clear that kids are at more risk of adverse side effect from the vaccine than the Covid-19 virus!

1/3/2022 5:46 PM

What's it going to take for people to review the VAERS data to see that this so-called vaccine is a death shot? You all want to mandate a "vaccine" that is NOT FDA approved; it is under EMERGENCY USE AUTHORIZATION only. An EUA eliminates any and all liabilities to manufacturer from any adverse reactions and/or death - are you going to be held financially liable under these ridiculous mandates of our children??? I will pull my kid out of school so fast you won't have time to prepare. You will NOT touch my kid with that death shot.

1/3/2022 5:46 PM

The Governor has no Authority to declare a vaccine mandate. Tell me what law was passed by the legislature of the State of Washington. These vaccines have not been approved and do not prevent the disease or keep you from getting it either.

1/3/2022 5:46 PM

I would just be curious how easily it will be possible to get our children vaccinated if a mandate is in effect. I've already looked into bringing my child to get theirs, but it seems that appointments are very hard to come by at this time. Will there be a vaccine event set up through the district (similar to the ones that have been done in the past for other vaccines)?

1/3/2022 5:46 PM

Open your eyes people and listen to the other side. They are lying about the statistics, take a closer look at how they phrase the statistics. Watch Joe Rogan #1757 and listen to what the inventor of MRNA Robert Malone says about what is going on here. Stop the corruption you money hungry pigs, GOD has the ultimate judgment in the end and those who have done these horrible things to this world will pay. Normal every day kids and people are NOT dying, but people ARE going to die and come down with horrible shit because of what they are injecting us with. The ER's are filled with mental health and suicide not COVID, I'm working in it. If your afraid then stay in your homes and die, don't make the rest of the world suffer because your unwilling to do your own research.

1/3/2022 5:46 PM

There is no Flu vaccine requirement so there should be no Covid requirement. The covid vaccine fails to stop the spread or stop you from getting it, just severity of symptoms.

1/3/2022 5:46 PM

If the shot was an actual immunization like polio or mmr then I would consider this, but the Covid shot is just a shot like the flu shot. The government does not mandate flu shots so this shouldn't either.

1/3/2022 5:46 PM

I am 100% opposed to mandating vaccines for any human. I sincerely hope that the Board of Health will vote to allow parents to make the healthcare decisions they feel are best for their children. I know my kids and their health history. You don't.

1/3/2022 5:45 PM

Mandating vaccines for children is so sheepish. This is not even close to being a good idea.

1/3/2022 5:45 PM

Stop the mandates for everyone!

1/3/2022 5:45 PM

Thank you for working to make our children, teachers, and families safe while maintaining the privilege of public education.

1/3/2022 5:45 PM

Mandating a vaccine for children, or any other person for that matter, violates our freedoms. The governor nor the Washington department of health have no right to tell us what to put into our bodies. Especially something that is not fully approved by the FDA. No one knows any long term side effects of the vaccine at this time and cannot honestly tell us that it is completely safe for our children.

1/3/2022 5:45 PM

These vaccines are not tested long term on children and I do not promote, support or advocate for anything, in the United States of America, that takes agency, liberty, or the right to make up one's minds about personal health from a family.

1/3/2022 5:45 PM

Not at this time

1/3/2022 5:45 PM

We don't know long term affects from vaccine. Unsafe for our children.

1/3/2022 5:45 PM

It is extremely inappropriate for the governor and or school board to mandate this. The covid vaccine is new and we have no idea what long term hazards and health issues this could potentially cause. There have not been enough studies done yet on this matter to make it a requirement for anyone. There have already been a plethora of health problems for older people, I do not agree with children having to receive it.

1/3/2022 5:45 PM

This is no different than other vaccine requirements.

1/3/2022 5:45 PM

Mandating the Covid shot is against our rights as a citizen. We have the right to decide what is put into our body and our children's bodies.

1/3/2022 5:45 PM

We have already vaccinated, as it was our CHOICE to do so. It should not be mandated. It is a choice that needs to be made by each individual family. Everyone has beliefs and opinions that are independent of each other. A person's right to choose should not be taken away. There are unvaccinated children in schools now for many things other than Covid. Vaccinations need to remain a choice. Until herd immunity is reached it is ok to set up limitations. But not mandates.

1/3/2022 5:45 PM

This is a gross abuse of power to require parents to vaccinate their children because a democratic party says so.

1/3/2022 5:44 PM

No

1/3/2022 5:44 PM

The laws you are requiring for the WESTSIDE voters that elected you into office are NOT welcome or wanted in Eastern Washington!

1/3/2022 5:44 PM

My child has had covid and has natural immunity. This needs to be accounted for if a vaccine mandate is being considered.

1/3/2022 5:44 PM

The vaccines have not been out long enough to know long term potential problems, especially in children. Children have also shown to not have as severe symptoms from covid as adults. I do not feel comfortable vaccinating my children at this time, especially since masking and hand washing is shown to be effective.

1/3/2022 5:44 PM

The kids need to be vaccinated.

1/3/2022 5:44 PM

Stay in your own lane. EDUCATE students and prepare them for life as an adult-being able to function and think for themselves. It's NOT your job to be parent. Come beside and partner with the parents -not a dictator.

1/3/2022 5:44 PM

Messaging this a vaccination mandate is misleading. It should be that an additional vaccination has been added the already existing enrollment schedule in place.

1/3/2022 5:44 PM

My child is already vaccinated, voluntarily. A mandate to vaccinate would not affect myself or my child, since we have already chosen to vaccinate. I am very comfortable with the safety and efficacy of the immunization. I would be happy to have my child attend a school in which most peers, staff, and teachers are vaccinated against COVID-19 (just like all the other mandatory immunizations!). I see this as an extension to already existing rules for the school required immunizations, which are in

place to protect children from outbreaks of illnesses. However, I do realize not all families are as comfortable with this vaccination as I am. I do not think a school vaccine mandate would be well received in our community, and would probably cause more disruption and division. Perhaps a different approach that encourages and educates families about the benefits of the vaccination would be better received. Offer Free vaccination clinics or resources to make the process easier.

1/3/2022 5:44 PM

Yeah first tell inslee he's an idiot next tell them they are crossing a line they don't wanna cross pushing their Covid BS into our children's schools, this state is already going down hill don't make it worse by destroying our Childrens schools

1/3/2022 5:44 PM

Vaccines have been part of public education enrollment for several generations. They have shown to be effective and are in the interest of public safety for the masses. COVID-19 vaccination is no different than the other handful of vaccinations that the public has had to comply with to enter their student into public education. Please add vaccination for COVID-19 to the immunization list for public school enrollment.

1/3/2022 5:44 PM

Children are not at risk. This mandate in children is short sighted and is not supported by ANY science. It is individuals like our governor that are single handedly ruining our great state and country. If you implement this vaccine requirement, home schooling will become the NEW norm.

1/3/2022 5:43 PM

All this is doing is hurting children by forcing parents to pull their children from school which they need not only for academics but social learning as well. All of my children have already had covid, which they suffered little to no symptoms and have natural immunity from. I will not put an experimental drug into my child, when we do not know what long term affects it could have on them, and will not for quite some time. If this passes you are going to see a large number of parents pulling their children or a large number of parents protesting this, and bottom line is where does that leave the kids?

1/3/2022 5:43 PM

What happen to my body, my choice?

1/3/2022 5:43 PM

Children should not be required to get the vaccine. COVID is a virus and will continue to be around. The vaccine out only ensures you don't get COVID for 90 days after that it just lessens the symptoms but doesn't prevent anything. Vaccines don't actually build your immune system against the virus so it's pointless to get especially since all other vaccines are a choice not a requirement.

1/3/2022 5:43 PM

My children will be withdrawn from all Washington state schools if the governor places a vaccine mandate on kids 5 and older.

1/3/2022 5:43 PM

The kids are minors. The last 2 years at Mead has not seen any minor issues let alone anything major. The virus is now endemic, the statistics do not beak out those hospitalized because of Covid or simply they're in the hospital and happen to have Covid. Big difference. Most of all, no data is

being provided about long term impacts these vaccines may have or so not have on the these children.

1/3/2022 5:43 PM

As a health care worker, an individual who's had Covid twice, someone who's husband was hospitalized with Covid and nearly was intubated I am NOT in of mandating a vaccination for our children. If individuals wish to give their children the vaccination that's fine, that is their decision for their family. I know how it feels to be stripped of the right to decide what's best for myself, as a Healthcare worker I was mandated to get the vaccination or lose my job. As the sole provider for a family of 5 who's husband is also immunocompromised due to cancer and not working, this was not an option for my family. Covid 19 is a virus, it is mutating as we've seen to a less costly virus. It will continue to mutate therefore the vaccination will be less and less effective on the variants. Also, by vaccinating people believe they are free to not wear masks, that because they are vaccinated they cannot get Covid 19, and certainly not spread it. Which, is extremely false. It is this mentality due to the wide spread misinformation that gave my own family Covid. A Co worker of my brother in laws felt since she was vaccinated she didn't need to wear a mask, nor call out when she was ill. She in fact did have Covid 19, and she spread it to 9 members of my family and almost cost my husband his life. The vaccination should not replace precautions we've got in place. It should be mandated for our children.

1/3/2022 5:43 PM

No

1/3/2022 5:43 PM

The governor should allow each school district to decide what is best for its community. Mead school district should should not force a required mandate on its students.

1/3/2022 5:43 PM

No

1/3/2022 5:43 PM

This is ridiculous! The vaccine has shown to not prevent people from contracting COVID or spreading COVID. It should be an optional vaccine. If not, I will remove both of my children from school, which really sucks because it is hurting them to not have in person interactions with other children and their teachers. There is no need to make our children suffer any more than they already have over all of this. Why are our children being punished because Inslee is is trying to control our state?!

1/3/2022 5:43 PM

It is MY choice WHETHER MY CHILD RECEIVES THIS HIGHLY DEADLY VACCINE WHICH HAS NIT BEEN ACCURATELY APPROVED AND HAS NOT BEEN ACCURATELY DOCUMENTED FOR SIDE EFFECTS- I WILL NOR WILL MY CHILD RECEIVE THIS. IT DISGUSTS ME THAT MEAD SCHOOL DISTRICT HAS BROUGHT THIS POLITICAL ISSUE INTO OUR SCHOOL DISTRICT!!!!

1/3/2022 5:43 PM

Leave our kids alone. Maybe do your research regarding how covid does not affect children the same way it affects the elderly. Lord Inslee is not in charge of my kids.

1/3/2022 5:43 PM

My children will not be used for medical testing on a flu shot!!

1/3/2022 5:43 PM

There is absolutely no long term data on the effects of children, especially as young as age 5, on the potential side effects of this vaccine. This vaccine is different than all of the other required vaccines because of this important reason, and because our children's bodies are still growing and developing this is very concerning. This vaccine also is proven to not be effective against getting the virus, it has only shown to lessen the side effects once one does get the virus. Most children by now have most likely had the virus, even if they were never tested due to less severe symptoms, and have natural immunity. We built our house in the Mead school district specifically because they are reasonable about this issue and have not imposed the strict mandates that other school districts. We will absolutely withdraw our children from this school district if the child vaccine becomes a mandate.

1/3/2022 5:43 PM

We will not be vaccinating our children for Covid at this time as there is insufficient data on vaccine side effects in children. Our children have all had Covid and have natural immunity, thus there is no benefit to them for getting vaccinated. We are adamantly opposed to a vaccine mandate and will leave the public school system if it comes to that.

1/3/2022 5:43 PM

It's like any other vaccine that's required for children to attend school.

1/3/2022 5:42 PM

This vaccine is new and there are no long term studies on the affects to prepubescent children. Under no circumstances will I vaccinate my children with the Covid vaccine until there are long term studies on children.

1/3/2022 5:42 PM

Huge mistake

1/3/2022 5:42 PM

This "vaccine" isn't 100% effective let alone safe! We have no idea what this can do to our children in the long term and from what we've seen from the short term it's already causing problems! This is government overreach and our medical decisions should be our decisions not anyone else's. I will not support mandates and will pull my kids from school without hesitation if they mandate this. I am not against vaccines obviously because my kids are fully vaccinated, but this is different and I will always stand up for what I feel is right for my kids health, and this is not right!

1/3/2022 5:42 PM

I will pull my child out of Mead School district if the vaccine is mandated. I will not give up our personal rights as this is a personal choice not a government decision. Her body her choice. Just for future reference I will not allow a tattoo on the left forearm of my daughter identifying her as unvaccinated for the Washington State gestapo. I also will not allow the gestapo to mandate my daughter to show her "papers" to go to school. What I will mandate is that our government work for the people not against them.

1/3/2022 5:42 PM

Our children are fine, and need to be kept out of this political mess. Mask are helping keep the spread down. What if our children have bad reactions. I will hold someone accountable

1/3/2022 5:42 PM

These vaccines have not been proven safe for children. They haven't been proven safe for adults either

1/3/2022 5:42 PM

Please listen to us parents. Please vote in favor of NO mandate for the children. This is getting out of hand and unconstitutional what they're trying to do. Again please stand with us parents

1/3/2022 5:42 PM

My body- my choice! No vaccine should be mandated on any person especially undeveloped vaccines for Covid!!!

1/3/2022 5:42 PM

You can tell them to fuck off.

1/3/2022 5:42 PM

Parents should decide if their children get vaccinated, not the governor or anybody else.

1/3/2022 5:42 PM

Good luck pushing these politics on us. People are not going to vaccinate their kids, private schools will be booming.

1/3/2022 5:42 PM

No

1/3/2022 5:42 PM

Our children are vaccinated against Covid, just like they are against the flu and other illnesses. Let's keep our children as healthy as possible!

1/3/2022 5:42 PM

Vaccines are the best way to keep our children in school and get the economy back up and running. Best for staff, family members, and students and best for continuity of education. Please consider this vaccine mandate because mandates work.

1/3/2022 5:41 PM

This isn't Nazi Germany. Stop dictating to us like it is. Covid is very similar to Flu and no flu vaccine has been found to be effective enough to mandate. So why would this be treated differently?

1/3/2022 5:41 PM

1. Children and young people have a mostly mild or asymptomatic presentation when infected with SARS-CoV-2. They are at near-zero risk of death from COVID-19. 2. There is an unusually high rate of reported adverse events and deaths following the COVID-19 vaccines compared to other vaccines. Some adverse events are more common in the young, especially MYOCARDITIS. Where potential harm exists from an innovation and little is known about it, the precautionary principle dictates to first do no harm. Better safe than sorry. 3. Medium and long-term safety data about the COVID-19 vaccines are still lacking. Children and young people have a remaining life expectancy of 55 to 80 years. 4. Unknown harmful long-term effects are far more consequential for the young than for the elderly. Vaccination policies rely on expected benefits clearly outweighing the risk of adverse events from the vaccination. The risk-benefit analysis for the COVID-19 vaccines points to a high potential risk versus no benefit for children and young people. 5. Transmission of SARS-CoV-2 from children to adults is minimal and adults in contact with children do not have higher COVID-19

mortality. 6. It is unethical to put children and young people at risk to protect adults. Altruistic behaviors such as organ and blood donation are all voluntary. 7. Several prophylactic treatments as well as the COVID-19 vaccines are available to high-risk individuals so they can protect themselves. 8. Natural immunity from infection with SARS-CoV-2 is broad and robust and more effective than vaccine immunity, especially in combating variants. Children and young people are safer with natural immunity. 9. There are several prophylactic (preventive) protocols and effective treatments available to children and young people with comorbidities. 10. Vaccinating children and young people is not necessary for herd immunity. After a year and a half of the pandemic, most people either have pre-existing immunity from other coronaviruses, have recovered from COVID-19 or have been vaccinated. I will NOT be vaccinating my children for Covid under ANY circumstances. All of my children have had Covid this school year and had very very mild symptoms and recovered after ONE DAY of feeling ill. This is completely unethical and I do not and will not support any decision by Washington state or MEAD School District to force personal medical decisions on my family. I will absolutely withdraw my children from Mead School District regarding any Covid Vaccine mandate. I DO NOT SUPPORT.

1/3/2022 5:41 PM

My wife is a long tenured public school teacher and I am a college graduate and professionally employed parent of 2 Mead School District children that do NOT believe in the vaccine science nor will we have our children vaccinated. We strongly object to making the C19 vaccine a requirement for our children.

1/3/2022 5:41 PM

It is too early to deem the vaccine safe at this time. There is no way to know what long term health effects will result from these vaccines.

1/3/2022 5:41 PM

My kids already had their vaccine along with everyone in our family

1/3/2022 5:41 PM

If the DOH wishes to follow science as it has claimed, it would let our children resume normal attendance to school as much of the rest of the developed western nations have.

1/3/2022 5:41 PM

I have 4 children in the Mead School District and will absolutely not have them vaccinated for Covid and will withdraw them from school if it is required. The risk for school age children from Covid is very low and the potential side effects from an experimental mRNA shot are not worth the risk to my children at this time. In addition, the long term studies of the effects of the mRNA shots on school age children are not known and won't be published for numerous years according to the FDA. Also, as anyone can see from current data released by numerous global health agencies (including the CDC), the current shots do not prevent contracting or transmission of Covid-19. If a shot does not achieve either of these objectives, what scientific evidence would there be to require it? If the state mandates this shot for schools or even makes special requirements for kids to attend school if they choose not to take it (masks, additional testing, etc) my children will no longer attend Mead School district. The Mead School District needs to fight this push from the State with all its power or I believe there will be a huge drop in enrollment next year.

1/3/2022 5:41 PM

This is a patents choice not our state or anyone else. there will be a loss of students and sadly alot of students left behind and left at home. in some cases not safe environments at home. many

students in the mean School district rely on getting food from school as well unfortunately these students will most likely go hungry and go without because of trying to force parents and students to get a vaccine that should only be their choices

1/3/2022 5:41 PM

If it's a mandate from the governor and or from the state board of health, then Mead needs to follow it. How can we expect our children to follow guidelines, rules, requests, laws etc. if we as a district pick and choose what rules we want to follow. I would also be concerned with losing teachers if the Mead district does not follow the guidelines set forth from the health board. There's already a teaching shortage and other districts will follow the mandate making them more appealing for many staff members. If this becomes a guideline or mandate then public schools should follow. Parents that don't want to follow have the option homeschool or enroll in private school. I would also imagine huge financial cuts from the state if Mead doesn't comply with their guidelines. If Mead does not follow the guidelines then I would pull my students from Mead and enroll them in neighboring districts that are following the guidelines.

1/3/2022 5:41 PM

Keeping kids in school is very important and what we are doing now is working. I would rather children keep washing and wearing masks then telling me I have to vaccinate my child. This disease is like a flu to them and the flu shot is not mandated.

1/3/2022 5:41 PM

The COVID-19 vaccine mandate for children is not only ineffective but dangerous. We have no idea all the long-term effects of this vaccine and how it will effect children's health in the long-term. It is also completely ineffective. The number of break-through cases is rising daily and children have been largely unaffected by this virus and should not be vaccinated period. Our children's childhoods have been destroyed by the states handling of this virus. Do NOT make the unconscionable mistake to mandate this dangerous vaccine for our children.

1/3/2022 5:41 PM

We will remove our children from the school if mandates are enforced

1/3/2022 5:41 PM

This would be a terrible decision. The vaccine hasn't even been fully approved for children this young of age.

1/3/2022 5:41 PM

I have some children that are and a few that are not. I am as well. We've all gotten covid numerous times and it doesn't seem to matter if you are vaccinated or not.

1/3/2022 5:41 PM

No

1/3/2022 5:41 PM

please do not force this vaccine. how many child deaths have their been in the school district from covid??

1/3/2022 5:41 PM

It is not the right of the schools or the government to dictate to parents how to raise their children. I will home school needed. The quality of public education is quickly declining and has been for some

time. I have been considering different alternatives in schooling for my child and will soon withdraw my child from school if personal philosophies are not respected. The new age philosophies of gender and sex are respected. In turn, as a parent, I feel you must respect all perspectives equally. The medical risks to children are too high regarding the vaccine. Children are low risk; I don't see the logic in the requirement. Thank you.

1/3/2022 5:40 PM

This is unethical, it should be our/our families choice to get the shot or not and not be forced to get the shot to stay in school. There is not enough evidence that backs the shot being safe for our children to take and my kids will not be forced to take it. We still have freedom of rights and we should be allowed to exercise these rights.

1/3/2022 5:40 PM

No

1/3/2022 5:40 PM

I will under no circumstances have my children be vaccinated for Covid when it is not even FDA approved. In addition people that are getting vaccinated are still getting Covid. This is absolutely ridiculous!

1/3/2022 5:40 PM

Not to mandate it

1/3/2022 5:40 PM

No

1/3/2022 5:40 PM

The current research absolutely does not support child Covid vaccination. My child is allowed to attend public school without this vaccination as with other unvaccinated children. You (Governor's Office) are not the best decision maker for what is best for my child and my child's peers. My child is not harming anyone by not being Covid vaccinated.

1/3/2022 5:40 PM

My children are already vaccinated. This is a no brainer.

1/3/2022 5:40 PM

Please require vaccination just as we have for many other diseases for decades

1/3/2022 5:40 PM

There are no long term studies in the vaccinations for young children. Young children are the age group least affected by COVID.

1/3/2022 5:40 PM

No way in hell should young kids be forced to take a vaccine without further evidence that it is safe. Everything up to this point that has been said about the effectiveness and reliability of these vaccines has been false at best if not purposely misleading. Other countries are seeing the wisdom of not exposing young children to the covid vaccine why is the US behind the curve in this. Shame on the governor and the school district for even considering this!

1/3/2022 5:40 PM

The vaccine is not a cure like the previous child immunizations. The Covid vaccine will have to continually change to fit the new strain, thus our children will constantly be testers for the new strain. It's not healthy, nor morally responsible to mandate such an experiment. We are absolutely against the Covid vaccine as a mandated immunization.

1/3/2022 5:39 PM

Our family supports vaccines of any kind.

1/3/2022 5:39 PM

We can all do our part to keep kids healthy and keep schools open.

1/3/2022 5:39 PM

Covid is NOT like measles or polio. It is not a long lasting vaccine. Are you also going to mandate flue vaccines? Follow the science, kids are okay if they get covid. Not enough long term data.

1/3/2022 5:39 PM

Are kids are both fully vaccinated and will be boosted when eligible. We'd feel much more comfortable knowing the majority of their classmates were also vaccinated.

1/3/2022 5:39 PM

Do not take away our rights to make the choice to not vaccinate our children

1/3/2022 5:39 PM

My body my rights

1/3/2022 5:39 PM

Please note, I feel strongly against the covid 19 vaccines.

1/3/2022 5:39 PM

Mandatory Covid vaccines for children is reckless based on data not having a long history

1/3/2022 5:39 PM

Our family is very much pro science. We understand and appreciate the process in which vaccines are created, tested, and studied before administering to the public. Due to the fact this vaccine is so new, there is no way to know the long term affects it has on the public. We thoughtfully did a risk benefit analysis for each member of our family and confidently decided the risks far outweighed the benefits should we inject our kids with this vaccine at this time. The health and safety of our two children is our top priority, and for that reason, we will not hesitate to pull them from public school should this vaccine mandate pass. We have homeschooled in the past, and are ready to do so again should the need arise.

1/3/2022 5:39 PM

You forgot about the parents who have already chosen to vaccinate their children. My kids are fully vaccinated and we fully support a vaccine mandate.

1/3/2022 5:38 PM

I really don't feel like my voice matters in the this matter but you have it.

1/3/2022 5:38 PM

Student is currently vaccinated for Covid-19

1/3/2022 5:38 PM

For the protection of my own children, I am in favor of vaccination requirements. Science is science - if someone chooses not to vaccinate, then they can choose to educate their children in a manner that doesn't put my family at risk for an illness that is preventable.

1/3/2022 5:38 PM

This survey shouldn't be happening. It's a no-brainer that students should be vaccinated. Vaccinating students is not a new concept. I grew up in the Mead School District and don't remember a single person not being vaccinated.

1/3/2022 5:38 PM

No vaccine mandate.

1/3/2022 5:38 PM

Regardless of any mandates, my children will not receive this vaccine. Even if it means they don't graduate period.

1/3/2022 5:38 PM

We are strongly opposed to vaccine mandates imposed by the school district or state in order for children to attend school. We are opposed to segregation of our children based on vaccination status in the public sector. We have no plans to vaccinate our kids for Covid in the near future and if there is a mandate in the public school setting, we will be pulling our kids from the public school system.

1/3/2022 5:38 PM

No

1/3/2022 5:38 PM

Why bother commenting... It doesn't seem to matter anymore what parents think the government and schools just do what they want anyways

1/3/2022 5:38 PM

N/a

1/3/2022 5:38 PM

No

1/3/2022 5:38 PM

Since the mRNA does not technically or medically qualify as a vaccine and is still in the experimental stage these decisions should remain private conversations between the doctor, the child and the parents of the child.

1/3/2022 5:38 PM

Get out of our schools!! The government has never been so concerned about the common cold or flu. There is currently a yearly flu vaccine that is not mandated. COVID vaccines should be optional and NOT mandated!

1/3/2022 5:38 PM

Thank you for helping keep our students and staff safe.

1/3/2022 5:38 PM

Vaccination is a choice

1/3/2022 5:37 PM

No

1/3/2022 5:37 PM

Choice

1/3/2022 5:37 PM

Chapter 246-105 WAC the first line says preventable diseases. The vaccine for Covid does NOT prevent Covid. This has come in with all the breakthrough cases. I will withdrawal 3 of my 4 if the state decides to push this.

1/3/2022 5:37 PM

Studies show that the vaccines are not working. My kids have had covid and handled it just like the flu or a cold. Hopefully you as a district listen to the vast majority of us mead school district parents and fight this mandate for the kids.

1/3/2022 5:37 PM

I am not aware of a circumstance where I could support the Covid vaccine. It's too new, too many reported side effects, other countries are withdrawing support and putting warnings in it. The Covid risk to kids is extremely remote.

1/3/2022 5:37 PM

Please share with whomever the real data. Kids are still testing positive even after the vaccine. I know this to be true and so do you. Please don't hide this data. What advantage is there to get a vaccine that still allows you to get and spread the virus? I will give you that it may reduce symptoms, but it does nothing to stop the spread.

1/3/2022 5:37 PM

No, but I would ask the School District if you would you actually be asking these same questions about mumps, measles, TB and other infectious diseases. Stop pandering to the mis-informed and ignorant public and this school district and support public health to stop the spread of COVID . . . through mandated vaccines.

1/3/2022 5:37 PM

My kids are already vaccinated!

1/3/2022 5:37 PM

The vaccine does not prevent one from getting or transmitting covid. There is no need for our low risk children, who are otherwise healthy, to get this vaccine. This is about money. This is about politics. This is NOT about our health. Children are being harmed by adverse reactions to the vaccine. Permanent damage to their way of life, including death. It is reprehensible our children's natural health is on the line. Wake up.

1/3/2022 5:37 PM

Happy New Year

1/3/2022 5:37 PM

My children are already vaccinated. I dont believe this vaccine should be treated differently from all of our other mandated vaccinations. It should be included. Its the only way out schools will be able to move forward from this....

1/3/2022 5:37 PM

This is all completely unconstitutional; anyone complying with any/all of this crap has taken the blue pill

1/3/2022 5:37 PM

Each student must need to be vaccinated

1/3/2022 5:37 PM

Our family will not get vaccinated

1/3/2022 5:36 PM

Please do not mandate a vaccine. Although I am grateful for the option vaccines please do not make parents chose between our children's education and their personal medical choice for a myriad of reasons.

1/3/2022 5:36 PM

Although I vaccinate my children for a number of preventable illnesses, the Covid vaccine and Influenza vaccines are two that I do not believe my children need to receive. The risk of injury from the Covid vaccine seems to be higher than experiencing the illness itself of my healthy children.

1/3/2022 5:36 PM

COVID-19 has been shown to be tolerated well by minors. It is, in my opinion, poor logic and science to force children to get a vaccine for something they will very likely recover from by building their own antibodies.

1/3/2022 5:36 PM

We strongly believe that vaccinations are a family/parent decision. It is extremely upsetting to think that our children will be subjected to this mandate.

1/3/2022 5:36 PM

For many years, parents have CHOSEN to vaccinate their children according to the VFC schedule. The COVID vaccine should also be a choice. A child should not be denied the right to go to school because they choose to live over a vaccine that could kill them.

1/3/2022 5:36 PM

This is a far overreach and its evident that the vaccine does nothing to stop Covid, prevent covid so it is unnecessary to require such a mandate.

1/3/2022 5:36 PM

Both my kids are already vaccinated, for all childhood vaccines, as well as for Covid 19.

1/3/2022 5:36 PM

Fully support treating this vaccine the same way we do other vaccine requirements.

1/3/2022 5:35 PM

My wife and I got vaccinated and she had immediate and lasting side effects from it. There is no way I will subject my 5 year old to a "vaccine" that we don't know any long term implications from. DO NOT DO THIS!

1/3/2022 5:35 PM

I'm a divorced parent and her father feels completely different. So, mandates can be helpful in times like this. We need to look at the whole picture.

1/3/2022 5:35 PM

Follow the science and stop listening to NON-Experts "beliefs" and/or "Opinions". Stop the mob political mentality and listen to the experts.

1/3/2022 5:35 PM

Vaccines are the parents decision, not the school boards.

1/3/2022 5:35 PM

It is stupid to require a shot(it's not a vaccine) that does not actually protect the child and comes with a whole host of side effects including heart issues. Especially when children are rarely affected negatively by covid 19. I will never allow my child to get the covid shot.

1/3/2022 5:35 PM

Na

1/3/2022 5:35 PM

Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

1/3/2022 5:35 PM

Do not bow to these unethical mandates. "MY BODY, MY CHOICE" our Governor is a TYRANT and should be tried for treason against the people of Washington State.....which carries a punishment of death. Power to the People.

1/3/2022 5:35 PM

My children have already had COVID and their bodies have natural immunity built up because of this, which is better than the protection that the vaccine can offer them. To enforce a mandate discredits what science is saying about this, and would be forcing my family to not do what is best and safe for all- my children included.

1/3/2022 5:35 PM

My kids, all 3 of them are fully vaccinated however I severely disagree that the constitution is not being upheld for those who chose not to vaccinate. And we will be willing to stand with our church and uphold the U.S. constitution.

1/3/2022 5:35 PM

There is not enough research or testing to ensure these vaccines are safe for adults, let alone children. Mandatory vaccinations are not the answer and one can still transmit and contract COVID once fully vaccinated. These mandates are crippling our country and the madness from the left needs to stop.

1/3/2022 5:35 PM

I am fine with Vaccinations. I am not overly concerned with other peoples choices on the matter.

1/3/2022 5:34 PM

Vaccines protect our children from many different illnesses and disease. I implore the board to mandate the Covid vaccine so we can get closer to normal.

1/3/2022 5:34 PM

I will withdraw my student from Mead School District, and all Washington school districts requiring Covid-19 vaccination for children.

1/3/2022 5:34 PM

Quarantining kids and constantly keeping them home due to a runny nose is disruptive to their learning and we as families cannot continue to do this.

1/3/2022 5:34 PM

No

1/3/2022 5:34 PM

Pro Vaccine

1/3/2022 5:34 PM

No

1/3/2022 5:34 PM

Children need school and should not be vaccinated against a cold to be in school .

1/3/2022 5:34 PM

In no way should this be mandatory to attend school in Washington state or mead school district!

1/3/2022 5:34 PM

This new variant has shown that it is less severe. We do not vaccinate against the common cold and should not vaccinate against Covid. Unless it's by choice. This should NOT be required.

1/3/2022 5:34 PM

No

1/3/2022 5:34 PM

My 7 and 11 year old are already vaccinated for Covid 19. I am fully in favor of adding it to the other vaccines they are required to get to attend school to keep them and the teachers safe.

1/3/2022 5:34 PM

Health of children needs to supersede political theater in Mead. Perhaps have medical representation at meeting from SCHD to assuage concerns regarding efficacy and safety of vaccine in children (they will need thick skin, it will be a tough crowd).

1/3/2022 5:34 PM

A children's vaccine has not even been approved by the FDA, and I will not allow the governor to bully my children into compliance with his misdirected personal agenda. And the now becoming endemic virus, omicron variant, does not respond to the current vaccines. I do not approve of the vaccine mandate.

1/3/2022 5:33 PM

My kids entered school 13 years ago with all of the required vaccines. I don't understand how this one should be any different. Protecting our kids in public school with vaccinations against highly contagious/infectious disease, etc... is not new & should remain. I also work with this population of kids.

1/3/2022 5:33 PM

I support vaccinating our kids to keep broader communities and those at greater risk safer.

1/3/2022 5:33 PM

No vaccine mandate!!!!!!

1/3/2022 5:33 PM

No

1/3/2022 5:33 PM

Plain and simple. Vaccinated? In person attendance. Not vaccinated? Stay home. Not fair putting children at risk when simple solution exists. Then too! Masks can stop (ruining our children's mental well being and health wearing these!) being required since we are all vaccinated.

1/3/2022 5:33 PM

I will withdraw my child from the school district if an exemption isn't an option or if the submitted exemption is denied. I will not vaccinate my child, period.

1/3/2022 5:33 PM

This survey is missing representation of those parents/guardians that have already chosen to vaccinate their child(ren). It would have been better to have an option stating "my child(ren) are already, or will be vaccinated due to personal family choice"... or something along those lines. The way all these questions & response selections read... is that if we get our child(ren) vaccinated... it would only be due to mandate. Not very accurate for many families that have chosen vaccination already. Thanks!

1/3/2022 5:33 PM

make vaccines required so we can all get back to life before COVID-19

1/3/2022 5:33 PM

This vaccine is meant to take of not only ourselves but one another. People need to leave politics out of this, buck up and take care of one another. Lead by example, Our children learn by the modeling we do. Thank you for standing strong on vaccines for our families.

1/3/2022 5:33 PM

My children are already vaccinated but I feel that it should be a choice not a mandate. Science shows that children do not have the same hospitalization and death rate as adults

1/3/2022 5:33 PM

Please let us choose!

1/3/2022 5:32 PM

No

1/3/2022 5:32 PM

I believe parents are the best informed about their children regarding medical treatment especially vaccines. Every situation is different regarding the health of any child and a one size fits all mandate is not appropriate. This is a personal/family decision.

1/3/2022 5:32 PM

This is not a vaccine. If you take the shot you can still get and spread COVID. Children are more at risk from side effects of the shot than if they get COVID.

1/3/2022 5:32 PM

Let's Go Inslee!

1/3/2022 5:32 PM

My child Mia Martin will not be attending Mead School district if the district follows the bullshit Inslee/Dept of health are trying to require a shot in order to attend. My daughter will be unenrolled completely from mead so you will not get the funds for her as well. As a meat graduate myself, are used to hold meat at a high standard but I think it is a lousy school district and has no balls at all. Stand up for our kids and our families and quit being pussys!! Not only was I in essential athlete in 1990-1993 but my daughter is a 4.0 student as well as an amazing athlete. Would be a big mistake to force this upon us. Please attach my name and number to this survey Deanna Martin 509-868-4046

1/3/2022 5:32 PM

The vaccine is safe and it's time to step up and do the right thing for our overall community!

1/3/2022 5:32 PM

My son is non verbal and could not communicate if he is experiencing side effects of the vaccine which occur in nearly 100% of people at varying significance up to including death. The death rate for COVID-19 is less than 2%. The math says it is disproportionately unethical to put my son through the vaccine. Additionally, COVID-19 is now known to be less severe than previously thought and i would not be a good mother if i injected my son with chemicals because the political left wants thier way. DONT POLITICIZE SCHOOL. IT IS IMMORAL, UNETHICAL, AND DOES NOTHING BUT FURTHER DIVISIVE RHETORIC.

1/3/2022 5:32 PM

Please keep our freedom and right to choose what we think is best for OUR and OUR children's bodies. Medical tyranny will result in nothing good.

1/3/2022 5:32 PM

Thanks for making difficult decisions based on science instead of being pulled by constituents who have fallen for conspiracy theories.

1/3/2022 5:32 PM

The Governor needs fired! We must push back against his unconstitutional mandates!

1/3/2022 5:32 PM

I just want to say that I am unsure about giving my child the vaccine because it has affected my menstrual cycle and she is just getting to the age where she is supposed to be getting hers and I do not want to possibly put her In Harm's Way and have the vaccine affect her the same way it affected me.. She is too young to have her body messed with

1/3/2022 5:32 PM

This mandate would be a huge overstep of power and is completely unnecessary. Those who want the shot have already taken it. A mass exodus from the public schools will be the result if passed.

1/3/2022 5:31 PM

Vaccine injuries need to be addressed. They are real. Especially Children that have conditions should not risk an experimental drug of vaccine. It is also a complete breach of rights, autonomy and religious rights. It is illegal. It would also call for legislative changes in regards to taxes staying with the student.

1/3/2022 5:31 PM

There is significant data showing adverse reactions from the Covid vaccines in younger children and I am not willing to risk my child's health under a rushed vaccine that has already shown to cause otherwise healthy children a variety of possible health issues and/or concerns directly related to getting the vaccine.

1/3/2022 5:31 PM

Please let our school board, who knows what's best for our families, decide on this issue.

1/3/2022 5:31 PM

Vaccines make sense for all including school board members.

1/3/2022 5:31 PM

I have already started home school through North Star and I would be fine removing my children and the money that the school would receive if you enforce a covid mandate.

1/3/2022 5:31 PM

Please look at the science, not the politics.

1/3/2022 5:31 PM

Student already vaccinated.

1/3/2022 5:31 PM

No

1/3/2022 5:31 PM

My kids are vaccinated for all viruses including Covid 19

1/3/2022 5:31 PM

This is not okay. Vaccine has not been around long enough to force this.

1/3/2022 5:31 PM

My child is already vaccinated, I am not sure I would vaccinate because of a state mandate.

1/3/2022 5:31 PM

Both my boys- 9 and 12 don't receive the standard Flue Vaccine- we have opt-out of the Covid 19 Vac, it's a Family choice

1/3/2022 5:31 PM

There has been no scientific evidence to show that this needs to be mandated. I have watched my own 3 children (2 of which have a genetic syndrome) get through Covid with the most mild of symptoms. I believe there are much more dangerous things out there for kids and the risk of having an adverse affect to the vaccine is much riskier than their natural immune response to Covid. I do not believe you can mandate a vaccine with no scientific evidence to prove it. I will withdraw my kids from public school and/or move out of the state. How can so many other states have no mandates at all but you are holding our children prisoners here in Washington?! Please help us to understand how this all makes sense.

1/3/2022 5:31 PM

My kids have already gotten the COVID shot. It's not a vaccine it's like a flu shot. I wish we'd use the correct term.

1/3/2022 5:31 PM

I am pro vaccines and am not one to jump on political bandwagons. But the other vaccines that are required for our children to attend school are ones that actually can keep you from getting an illness or blocks it such as measles. We don't mandate the flu vaccine so I am not in favor of this vaccine being mandated when it requires boosters and what seems like yearly upkeep to not protect but potentially minimize the intensity of an illness. I hate to say that this is what would remove my kids from public school, I've disagreed but still followed mask mandates and vaccines to volunteer, but this also hasn't had enough research on long term effects for me to feel comfortable giving it to my kids, even if it means staying in school. I hope that our district will fight and our state will give parents to choice to make medical decisions for our own families.

1/3/2022 5:31 PM

I appreciate what the Governor and the Department of Health is doing to protect students, staff and families from the virus.

1/3/2022 5:31 PM

The sooner this is implemented the better. Our children should not be at such high risk for contracting a preventable infection. thank you for seeking parental input

1/3/2022 5:31 PM

The side effect in kids from Covid is not the same as adults but the risk factor for vaccines is significantly higher

1/3/2022 5:31 PM

No one has a right to tell me how to care for my children!

1/3/2022 5:30 PM

Thank you for keeping our children safe and healthy. Please add the COVID vaccine to the required vaccines for schools!

1/3/2022 5:30 PM

Please do not make the vaccine a mandate.

1/3/2022 5:30 PM

I need for Mead and DOH leaders to understand that they have parents who do not picket, yell or threaten but want to follow the science. I am exhausted by your kowtowing to the loudest voices. If the science says stay home, we should stay home. If the science says vaccinate, we should vaccinate. If you followed the state vaccination rules before COVID, Mead, you should follow these rules. If families got previous vaccinations, then they should get these vaccinations and not get an exemption. If you give exemptions, I want to know that my student has an exempted student in their class. This virus is mutating and even my vaccinated child is vulnerable to it. Their parents don't get to endanger my family with their bogus cries of facism and freedom.

1/3/2022 5:30 PM

Remove the masks and please don't make the vaccine mandatory or else student enroment will go down.

1/3/2022 5:30 PM

N/A

1/3/2022 5:30 PM

It's not the states place to tell me to vaccinate my children.

1/3/2022 5:30 PM

My kid is vaccinated

1/3/2022 5:30 PM

It's absolutely ridiculous that children as young as 5 have to be vaccinated to attend Mead School district. My oldest son has had covid, was vaccinated and had the booster and still ended up with covid.

1/3/2022 5:30 PM

The vaccine poses a massive risk to school-aged humans compared to the virus. A mandate such as this would be a complete overreach of governmental authority and will surely not go unchecked.

1/3/2022 5:30 PM

Vaccine mandate is unconstitutional.

1/3/2022 5:30 PM

I do not believe that overall healthy children should get a vaccine that has not been trial tested for the allotted amount of time. If side effects do happen from children getting the vaccine will the school district provide compensation to parents for having to keep their children home or hospitalized if it were a mandate?

1/3/2022 5:30 PM

my children are already vaccinated

1/3/2022 5:30 PM

Please mandate vaccines and keep all our kids safer.

1/3/2022 5:30 PM

I would like to see more data on the ongoing term effects of the vaccine and right now it's just too soon to tell. I'm all about vaccines however this is a very rushed vaccine that does not stop the

transmission. More and more vaccinated are getting very sick with COVID and until it truly is a vaccine I request that children are not forced into it. These kids are our future and I want to decide what's best for my family not the dictator we have currently.

1/3/2022 5:30 PM

No

1/3/2022 5:30 PM

You still get Covid even if you are vaccinated. I would vaccinate my child if vaccines would be effective but they aren't. I don't feel comfortable giving it to my child. I am Health care worker, who is actually testing patients all day long for COVID-19 and giving Covid vaccinations to patients.

1/3/2022 5:30 PM

This is the worst, most unscientific idea EVER. Do not pass this. We would seriously consider pulling our kids out of school.

1/3/2022 5:29 PM

I will pull my kids from the district if the vaccination becomes mandated for children.

1/3/2022 5:29 PM

Vaccines save lives. Please mandate COVID vaccinations for all school-aged children.

1/3/2022 5:29 PM

No

1/3/2022 5:29 PM

Please promote vaccine and masking requirements in line with scientific and medical best practices

1/3/2022 5:29 PM

Natural immunity should be considered in place of the vaccine , an exemption process is required for religious and medical accommodations.

1/3/2022 5:29 PM

Yes! Fully support mandated vaccines like always. This vaccine is nothing new. Don't let parents who are uninformed and are conspiracy theorists bully you into starting a new trend of optional vaccines. That's a very slippery slope and not one that a PUBLIC school district should go down.

1/3/2022 5:29 PM

This vaccine has proven not to work and may harm my children in the long run. It is not the government's decision on whether or not I vaccinate my child, ESPECIALLY, since they have had Covid and gained antibodies which are known to be stronger than a vaccine. Don't force parents to remove their child from the district with a mandate.

1/3/2022 5:29 PM

I would like to share my belief that the COVID vaccine should be treated like all other childhood vaccination requirements. Polio is required, and it is not even contagious. I also want to express the seriousness of exemptions. When exemptions are granted to anyone than wants one (like the school district just north of Mead), students and staff are put at risk, families are under the false pretense that staff are vaccinated, and staff are out for at least ten days, negativity impacting their

students and colleagues. So, please do not take vaccination exemptions lightly. In the end there is a price to pay for granting anyone that asks for one.

1/3/2022 5:28 PM

I think the school district is doing an excellent job with a difficult situation. Our kids are vaccinated so whether this passes or not we will continue attending Mead.

1/3/2022 5:28 PM

Why would they require this vaccine for school aged kids when the flu shot isn't required? Statistics show the virus doesn't show that kids are as affected by the virus. It should be a choice and not forced on these poor kids.

1/3/2022 5:28 PM

I think it is a huge overstep to mandate vaccines or masks. For the most part, Covid 19 does not affect children the same as elderly adults and those with a comorbidity. It is ridiculous to suggest a vaccine requirement. Those with the vaccine still get, carry, and infect others. If a mandate passes, we will absolutely not even consider getting the vaccine and will withdraw our children from the schools.

1/3/2022 5:28 PM

Our children are vaccinated. It is best for everyone.

1/3/2022 5:28 PM

I already homeschool 1 child and have no fear pulling all my children. If the vaccine becomes mandatory I WILL pull all 4 of my children. The Governor needs to let people have the freedom to choose what is right for their family. We have considered moving out of state, like several friends already have, because our freedoms are being taken away.

1/3/2022 5:28 PM

A vaccine mandate for children ages 5-17 is not supported by the numbers provided by the CDC. Personally, this is of particular concern when both of our children in this age bracket have had and successfully recovered from COVID-19. To expose them to greater risk of thrombosis, myocarditis, an allergic reaction not to mention the highly unlikely prospect of death with a new vaccine is definitely not supported by the numbers. There is new research indicating recovery from COVID-19, no matter how severe, likely equates to protection for life according to a Washington University School of Medicine study.

1/3/2022 5:28 PM

I am for the mandate.

1/3/2022 5:28 PM

I will not be vaccinating my children even if that means I pull them out of the school district!

1/3/2022 5:28 PM

No

1/3/2022 5:28 PM

The vaccine does not stop contraction or spread of Covid therefore you have no right to mandate something that does not stop the disease

1/3/2022 5:28 PM

The current pediatric Covid vaccine is safe and protects our children from rare serious disease from this virus and protects our community from ongoing spread and mutation. Covid has been in the top 10 causes for pediatric mortality for the last year. A vaccine will keep our children healthy and in school where they need to be.

1/3/2022 5:28 PM

Education is a right for our students, it is a horrible idea to take that right away based on health care choices. If the public schools will not educate non-vaccinated students the tax money designated for that student should be released to be used as vouchers to pay tuition at private schools who are open to all students including the unvaccinated.

1/3/2022 5:28 PM

Children should not have to have this shot put in them at all. I will not vaccinate my child with the covid 19 shot ever.

1/3/2022 5:28 PM

.

1/3/2022 5:28 PM

My child asked and wanted to be vaccinated upon her 12 birthday. She wants the booster but isn't eligible yet. She feels has a strong desire to do her part to help her friends, family, and community during this pandemic.

1/3/2022 5:28 PM

This is complete over reach for a therapeutic that that has no long term studies and the fact that kids are having adverse effects short term with vaccine is very concerning. And natural immunity isn't even considered is very concerning, as we have already had covid in our household, and have antibodies to it. This is an rna respiratory virus similar to influenza and should be treated as such.

1/3/2022 5:27 PM

I feel VERY STRONGLY that the Covid vaccine should be required for all students, just as all the other vaccines are required.

1/3/2022 5:27 PM

These are illegal mandates, if the exemption isnt an option, we will remove our kids from public school. The washington state governor has overstepped is authority and should be removed.

1/3/2022 5:27 PM

Vaccines have traditionally been for diseases that do not mutate like a virus. Vaccinating children when you are unsure of long term out comes and for a virus that keeps mutating is reckless. Current mandatory vaccines have been in places for many many years. Do no rush into something you can't go back on.

1/3/2022 5:27 PM

Thank you for considering this process.

1/3/2022 5:27 PM

Covid vaccinated should be a private decision between families and their physician. No mandates should come from the state.

1/3/2022 5:27 PM

Please do not required us of our student.

1/3/2022 5:27 PM

Looks like the Metoo movement and the my body my choice is selective. Not right to do this to kids

1/3/2022 5:27 PM

Let's go Brandon! Let's go Inslee!

1/3/2022 5:27 PM

A mandate would be way to early to mandate for kids since we do not no the long-term effects. I am concerned about the vaccine affecting their reproductive health as well as clotting.

1/3/2022 5:27 PM

Already vaccinated!!

1/3/2022 5:27 PM

The idea of mandating COVID-19 vaccines for children is ridiculous. They are not at risk and if the teachers and staff are vaccinated, they are protected. No need to vaccinate the kids.

1/3/2022 5:27 PM

My child is currently vaccinated

1/3/2022 5:27 PM

I think it should be a choice for kids to get the Covid vaccine. There's not enough long term studies and there is also a huge increase in heart problems in kids. With a 99 percent survival rate and when my kids had it last may they had zero symptoms. I think the health risks/ side effects are greater when you take the shot vs getting the virus. Where there is risk there should be choice.

1/3/2022 5:26 PM

No person has the right to tell parents what to put inside of there children. I will pull them out of your district and move to a district that doesn't require them to get a vaccine that doesn't even work which is a fact. You will lose funding and have to fire teachers because you won't have enough students to go to your schools.

1/3/2022 5:26 PM

I believe the best way to move out of the pandemic and stop the spread is to eradicate it with vaccines. I hope many families will consider this so that we can keep our kids safe, healthy, and move past this pandemic. I think we can all agree that we want this to be over - masks, regulations, all of it - so let's take a science-based action to get us there.

1/3/2022 5:26 PM

There are many states that do not madate masks or vaccines and the numbers are good. There is no real science behind it being effective so why is it required? Masks and vaccines should be a personal decision. The vaccine is still too new for me to consider for my child and like any other vaccine as a parent I have a choice as to vaccinate or not. The effect covid has on children is minor and the effect masks on the learning environment is not good.

1/3/2022 5:26 PM

None

1/3/2022 5:26 PM

It is important, academically, socially, and mentally, for students to participate in in person learning. Mandatory vaccinations will interrupt the current learning process that is still recovering from two years ago. For students who have IEPs, 504's, other accommodations, or other needs(financial, emotional,etc.), delays or prevention in services is life altering. Please just allow kids to go to school to learn and socialize.

1/3/2022 5:26 PM

No

1/3/2022 5:26 PM

Our children have already received the Covid vaccine.

1/3/2022 5:26 PM

Honestly, I feel like the covid vaccine is no different than any other expectation of our kids before they enter schools. I believe wholeheartedly this is become so political that the word covid vaccine causes individuals to fight tooth and nail to prevent what is proven to be effective in preventing death and serious illness. It's unfortunate.

1/3/2022 5:26 PM

Mandating an experimental shot for children (or anyone for that matter) is reckless, unconstitutional, against any and all scientific facts presented showing that our children have nearly zero risk from this virus, against the Nuremberg code and should result in termination of any and all duties for our government officials, teachers, school administrators, doctors and whoever else is trying their best to advocate for this shot. You should be ashamed of yourselves for promoting this entire idea and educate yourselves from the actual doctors who are being censored while trying to relay how unbelievably immoral it is to give this unapproved, unknown consequence, money-driven substance.

1/3/2022 5:26 PM

I will not allow my family to be bullied into this decision! I will not allow such a personal decision of my child to be mandated or required by anyone outside of my immediate family! It is our choice, our freedom, our right to not get the vaccine!

1/3/2022 5:26 PM

If this comes about I will be homeschooling children, not supporting levys/bonds for schools and possibly moving out of state.

1/3/2022 5:26 PM

N/A

1/3/2022 5:26 PM

No more health mandates

1/3/2022 5:26 PM

never going to happen we will pull our kids from the district so fast.

1/3/2022 5:26 PM

This is not ok. Now you are trying to interfere with student's education. What about all those families who chose not to vaccinate and now have to home school their kids and will not be able to work because of a mandate that does NOT put the needs of our students and families first. This is nothing

more than a politically driven mandate with no scientific backing. Think of what this will do to the social and emotional health of our students! This is NOT OK!

1/3/2022 5:26 PM

There is zero proof that vaccines (or masks) are effective against C-19. In fact, this virus doesn't even affect school-aged kids anymore than the common flu, so stop with these ridiculous mandates! There have been proven heart conditions and deaths from the vaccine, so why would Mead want to be responsible for these sorts of outcomes??

1/3/2022 5:25 PM

I think at this time with the measures that are already in schools in not totally necessary to vaccine your child

1/3/2022 5:25 PM

I would prefer my child not be used as an experiment. Thank you. My family will move to another state to make sure this doesn't happen. I am not against the vaccines. I am vaccinated. But I am against the mandatory vaccination of MY children for this vaccine. At least until further information is released on the effects of these vaccines on children.

1/3/2022 5:25 PM

I am not ready to vaccinate my children until they have at least one year of studies for side effect I feel this is still to new to be injected in to my children and fear the unknown risks it may have on them in the future

1/3/2022 5:25 PM

No

1/3/2022 5:25 PM

Why would I vaccinate my child if it doesn't keep them from getting Covid or spreading Covid?

1/3/2022 5:25 PM

I hope you clearly convey the likely majority that do not want the vaccine mandated. It is widely available for those that desire to give it to their children.

1/3/2022 5:25 PM

Thank you for putting science first and looking out for the health of our communities.

1/3/2022 5:25 PM

No child should be forced to be vaccinated in order to receive an education. It's unbelievable that this is even being considered since this virus rarely affects children at all. Let families be FREE to decide what's best for themselves AND THEIR CHILDREN!!

1/3/2022 5:25 PM

I think it is utterly irresponsible to mandate to inject children with a non proven vaccine that could cause irreparable harm for their entire lives. I would withdraw my children from school and look to move out of state if Washington decides to overreach on this subject.

1/3/2022 5:25 PM

I do not agree with mandated vaccines.

1/3/2022 5:25 PM

The vaccine is showing less effective for each new variant. With no long term studies on the side effects. We are not supporting a vaccine requirement. We've had delta covid and my child bounced back in 3 days.

1/3/2022 5:25 PM

Tell them that they suck.

1/3/2022 5:25 PM

Vaccines are safe and effective.

1/3/2022 5:25 PM

Both of my children (13 and 8) were fully vaccinated as soon as it was available for kids. They diligently wear masks everywhere and never complain. The three of us have not been ill in any way in almost 3 years. I attribute it to wearing masks.

1/3/2022 5:25 PM

Vaccine mandates are gross overreach. I am willing to accept those for smallpox, rubella, measles, and whooping cough - one time only vaccinations - but mandating vaccines for something as ubiquitous and benign as the coronavirus is a slippery slope that will be used to justify continual expansion and compulsion that is antithetical to the liberty and freedom that defines America.

1/3/2022 5:25 PM

If they wont require a flu vaccination why would they require a covid vaccination? My body my choice! My child my choice!

1/3/2022 5:25 PM

N/a

1/3/2022 5:25 PM

I believe we live in a free country and our own health and health of our kids needs to be our own decision and not mandate by anybody! It's agains our beliefs and we won't do the vaccines

1/3/2022 5:25 PM

The schools will be practically empty if you try to do this.

1/3/2022 5:24 PM

The Covid vaccine should fall under the same vaccine requirements already in place for other illnesses.

1/3/2022 5:24 PM

please see this short video:

<https://rumble.com/vqqa4q-dr.-malone-says-no-vaxx-for-children.html?mref=6zof&mrefc=2>

1/3/2022 5:24 PM

My children are already vaccinated

1/3/2022 5:24 PM

Too soon to require such vaccinations. There has not been a long enough time to adequately test for long term effects.

1/3/2022 5:24 PM

I don't believe this should be mandated. I think we should stop the masks as well.

1/3/2022 5:24 PM

This is a good step in increasing safety for students and all who come in contact with them.

1/3/2022 5:24 PM

No

1/3/2022 5:24 PM

I will not allow my child to be injected with an experimental holocaust bioweapon that has killed millions of people across the world. The schools are outside of their legal boundaries and do not make health decisions for my family. If this issue is forced, we will withdraw from your school permanently.

1/3/2022 5:24 PM

I will likely sacrifice my career to homeschool if there is a vaccine mandate. I got myself vaccinated, however, I am not convinced it is necessary for children.

1/3/2022 5:24 PM

None

1/3/2022 5:24 PM

Vaccines work. Dying to get school and regular life back to normal. Those that want medical liberty do it in your own schools with your own calculated risks...my kids and teachers/schools have been through enough already

1/3/2022 5:24 PM

No mandatory vaccination for our kids, it's parent choice what is best for their children. We live in a country where 10 amendments give us freedom over our choices and lives.

1/3/2022 5:24 PM

We will not comply with vaccinating our child regardless of the consequence.

1/3/2022 5:24 PM

I do not support a vaccine mandate for children

1/3/2022 5:24 PM

Due to my son's development delays and compromised immune system this vaccine mandate must be put in place. Without which our family will be in constant fear of him contracting COVID in any of its many varieties and potentially killing him due to his weakened immune system.

1/3/2022 5:24 PM

NA

1/3/2022 5:23 PM

It's been 2 years we want our freedom of choice no masks, no vaccines and no mandates

1/3/2022 5:23 PM

Please do not mandate children's vaccines, my child does not ever receive the flu shot nor will receive the Covid vaccine. Wait till they are of age 18 to decide. They are still growing and need to develop!

1/3/2022 5:23 PM

We find it extremely unfair to be put in a position to make our children put something inside their body that we ourselves are not comfortable taking in order to stay in school. If this were to become a mandate we without a doubt would pull our kids from the school district. This is still being given under an emergency order and with all of the question around possible long term effects of this vaccine and the fact that people are still getting Covid after receiving it it is hard to believe that we could be forced to give this to our children.

1/3/2022 5:23 PM

It's no different than other requirements to attend school. My household is fully vaccinated with boosters.

1/3/2022 5:23 PM

This is unacceptable and unconstitutional. Government overreach needs to stop.

1/3/2022 5:23 PM

No

1/3/2022 5:23 PM

I support science and protecting our children.

1/3/2022 5:23 PM

I am disgusted with the use of political power, to push something on families in order to keep their jobs, and now for children to be able to attend school. My hope is that, we can all recognize that mandates aren't good for anything but division. To our family, it is clear that is the government's goal...and it has nothing to do with our health and safety. I hope that the Mead school district can find it within themselves to push back against these ridiculous mandates.

1/3/2022 5:23 PM

Absolutely NO to vaccines for our youth 18 and under. Dr. Robert Malone and Dr. Peter McCullough have proven the deadly and dangerous path of vaccinating healthy children. This is the last course of action we are willing to withstand and will force our family to leave Mead and move to Idaho. Be strong Mead as you face this devil.

1/3/2022 5:23 PM

My children are vaccinated but it should be a choice until more time has passed.

1/3/2022 5:23 PM

A vaccine mandate for something like covid is ridiculous. We as parents should have a choice. Parents can make a choice for all other vaccines this should be an option as well.

1/3/2022 5:23 PM

Let the parent decide what's best for their children.

1/3/2022 5:23 PM

I am very much in favor of a vaccine mandate for children in school. I hope this happens sooner than later.

1/3/2022 5:23 PM

I would like to say thank you for considering this mandate. My children are vaccinated and I would love for us to get one step closer to school without masks.

1/3/2022 5:23 PM

There is not enough proven science behind these vaccines to even start giving it to people.

1/3/2022 5:23 PM

I feel like there should not be a mandate for the vaccine and it should be left up to the parents to decide. If there is not an exemption I would pull my children from school.

1/3/2022 5:23 PM

Do not require vaccines in school or in children. The science has shown that even the vaccinated are getting sick. The vaccine does not work.

1/3/2022 5:22 PM

No, just no

1/3/2022 5:22 PM

Majority of students have already had Covid and have natural immunity. This is not necessary.

1/3/2022 5:22 PM

There is no long term knowledge of this type of vaccine. Those that are older, at risk and in power should not make decisions about children that parents do not support due to lack of scientific knowledge on long term possible side effects. If people want to be protected, get the vaccine but do not make my child take it, especially when science shows they are tolerating it to the most degree.

1/3/2022 5:22 PM

My child is already vaccinated

1/3/2022 5:22 PM

Disappointed that the WDH are ignoring the 1,000's of adverse reactions kids get from this vaccine. Please read and pay attention to the true science and not just what is ordered by our government. Parents should have the right to choose what is right for their children.

1/3/2022 5:22 PM

This is just like other vaccines we have been doing for years. Yet this one has been made political. It's too bad we can't listen to healthcare and the DOH.

1/3/2022 5:22 PM

Grow some fucking balls and stand up for these kids. Tell the state and teachers union to fuck off, are kids have rights too.

1/3/2022 5:22 PM

I don't feel that the governor should be deciding what is in the best interest for children that are not his own. I would not want to mandate any type of vaccine until there is proven data and science that the vaccine does work. I think 5 years old children cannot verbally tell a parent or guardian if they are feeling any harsh side effects from the vaccine. As a parent who is vaccinated I do not oppose those who chose to vaccinate their kids. However, I do not agree with the age that the CDC recommends for vaccination.

1/3/2022 5:22 PM

The vaccine does NOT prevent infection or the spread of covid 19. Covid also does not cause severe illness in children. My children have had covid and will never be vaccinated for it. If this shot is mandated our children will no longer attend public schools in Washington state.

[https://open.spotify.com/episode/3SCsueX2bZdbEzRtKOCeYt?si=XZKR6BnRQf-VdRC15B\\_VsA&context=spotify%3Ashow%3A4rOoJ6Egrf8K2lrywzwOMk](https://open.spotify.com/episode/3SCsueX2bZdbEzRtKOCeYt?si=XZKR6BnRQf-VdRC15B_VsA&context=spotify%3Ashow%3A4rOoJ6Egrf8K2lrywzwOMk)

<https://open.spotify.com/episode/0aZte37vtFTkYT7b0b04Qz?si=ou8ROESISGGODxvZtJT4Ag>

1/3/2022 5:22 PM

N/A

1/3/2022 5:22 PM

Let the parents and their doctors decide what is best for their children and the safety of their classmates.

1/3/2022 5:22 PM

There are too many unknowns with this "vaccine". Young boys are having heart issues from this "vaccine", this should NOT be enforced on anyone period!

1/3/2022 5:22 PM

This will be the last straw and we will be leaving the state. this also means my business will be leaving along with 99 jobs and 20m in state revenue. I have had enough. Currently 3 employee had had heart attacks follow vaccines all are under the age of 30. my kids have had covid and experience no effects. There is no need for kids to take a vaccine to lessen the effects of nothing. currently my wife is vaccinated and is up stairs in bed sicker than hell while my kids and I which had it last year at testing negative. This is a joke. this has become the flu and we have to stop this BS.

1/3/2022 5:22 PM

It is unconstitutional to require a mandatory covid vaccination for children to obtain a fair education. A mandate like this would violate the Every Student Succeeds Act by preventing student participation.

1/3/2022 5:22 PM

Can't believe this is even being considered.

1/3/2022 5:22 PM

We have chosen not to vaccinate our children. If the vaccine becomes mandatory then we will withdraw our children and home school. Covid presents a very small risk in children and the long term effects of the vaccine are unknown.

1/3/2022 5:22 PM

I believe in the science and that the vaccines are safe. The only way to put COVID behind us is for everyone healthy enough to get the vaccine to do so. Our entire household has already been vaccinated including my children ages 11 and 13.

1/3/2022 5:22 PM

The CDC is now defining Fully Vaccinated persons those who have had the second dose or booster within 6 months. Subjecting our children to vaccines every 6 months or even yearly to attend school is. Or needed, healthy or in the best interest of our developing students.

1/3/2022 5:22 PM

I will not vaccinate my children!

1/3/2022 5:22 PM

Please strongly push for this mandate. I am a registered Nurse and my husband is a respiratory therapist in Spokane. It is in the public and communities best interest for all people that can be vaccinated to be required by schools and employment. My kids are vaccinated but they are in school with many who aren't. I'm tired of hearing of the dying and hospitalized in my community. Many public places aren't even enforcing mask wearing in my community. I live within 15 miles of the Idaho border. Their lack of masking and vaccine requirements is spreading to my large town. Covid could be less of a problem if vaccine were mandated of all ages and mask wearing would be enforced properly.

1/3/2022 5:21 PM

Nope.

1/3/2022 5:21 PM

Tell the governor to go fuck himself. I will not vaccinate my children against something that is no threat to them. Meanwhile we have no idea what the long term side effects of the vaccine may be.

1/3/2022 5:21 PM

I will not vaccinate my children with something that we yet to have the long term side effects for. I and my husband are both vaccinated. The entire family has had Covid before and this should be enough immunity for the children.

1/3/2022 5:21 PM

I will not vaccinate my children with an experimental vaccine that is known to cause lifelong heart problems such as myocarditis and has a low efficacy rate. This vaccine does not prevent infection or transmission, therefore, the risk is not one I'm willing to take. I will leave the state of WA before I vaccinate my children.

1/3/2022 5:21 PM

Good luck with that, see you in court.

1/3/2022 5:21 PM

This is a bunch of horseshit!! Don't mandate something parents may not agree with! It's not the government's job to parent! FJB and F Inslee!!

1/3/2022 5:21 PM

Stop it! This is madness!

1/3/2022 5:21 PM

No

1/3/2022 5:21 PM

There will be a rude awakening when the government starts going after children for their science experiment. Absolutely not. Anyone who is for this is okay with genetic rape on minors. No means no.

1/3/2022 5:21 PM

THANK YOU for considering this! I've already vaccinated my children, but this is such a huge step to keep our kids safe.

1/3/2022 5:21 PM

Go fuck yourself Inslee..

1/3/2022 5:21 PM

Just stop already!

1/3/2022 5:21 PM

The Covid vaccine has turned into divisive politics. This is about science, health, and safety. It should be no different than the other vaccine requirements.

1/3/2022 5:21 PM

Do NOT require this. This mandate would take away our rights as parents in determining what goes in our children's bodies. It would go against the freedom that this country stands for. This would be absolutely maddening if we are forced to do this! Those that are worried about the virus can get their kids vaccinated or keep them home. End of story.

1/3/2022 5:20 PM

The flu is much more contagious and deadly for children. If the flu vaccine is not mandated then the covid vaccine should not be either. The adults in our family are vaccinated and we fully support vaccines and covid precautions, however we believe this decision should be up to the parent's discretion with the advice of a medical provider. If their pediatrician recommends it then we will consider.

1/3/2022 5:20 PM

We're already vaccinated. I know you're going to get all kinds of feedback on this survey saying all kinds of reasons this is wrong. There are literally 11 vaccines on the list already and I can't remember a big group of people complaining. This is all getting a bit ridiculous. Let's vaccinate and move on. :)

1/3/2022 5:20 PM

No

1/3/2022 5:20 PM

While we support vaccines and have 2/3 of our school age sons(17 & 15 year olds) vaccinated, we strongly oppose a COVID vaccine mandate. Please leave this sensitive decision up to families.

1/3/2022 5:20 PM

My kids love Mead district and we would all be upset if there is a mandate put into place. This is the first district we have absolutely loved everything about it and that's coming from 2 other states. We will pull our kids from public school if this happens.

1/3/2022 5:20 PM

Other vaccines have been mandated for school attendance for a long time. Why should Covid be treated any differently? This is about public health, not politics.

1/3/2022 5:20 PM

Children do not need a vaccine!!!

1/3/2022 5:20 PM

I think it is necessary to the CoVid vaccine for kids. Just like the flu I think it's fine to make it an option but not a requirement. Healthy kids have strong immune systems and by fighting it off it will run its course in schools abs then probably not even be a big issue after next year. So why not vaccinate the at risk population and let the rest of the population build up natural immunity like we have done for viruses in the past

1/3/2022 5:20 PM

I am in favor of vaccinations to help combat the pandemic.

1/3/2022 5:20 PM

There is a study that shows that the vaccine causes reproductive health, blood clots etc for children receiving the vaccine. I even think it comes from the inventor of the vaccine, the horses mouth so to speak. I can't remember the doctors name on top the of my head. If asked I could provide more accurate information.

1/3/2022 5:20 PM

None

1/3/2022 5:20 PM

It is unconstitutional and the potential ramifications from the vaccine far outweigh any benefit

1/3/2022 5:20 PM

Nope

1/3/2022 5:20 PM

Forcing kids to get the vaccine to attend school is absolutely ridiculous. So many kids are going to fall behind because of this. Please don't force our kids, because our government is messed up.

1/3/2022 5:20 PM

I'm not fully against adding the covid vaccine to the required list, but I would feel much more comfortable with more years of trials and tests on kids that young.

1/3/2022 5:20 PM

COVID vaccines are emergency approved i.e. the extend of the side effects and long term effects are unknown. Let's not experiment on our children. And no more mandates will be great, too.

1/3/2022 5:20 PM

It should be a parents choice to whether or not to vaccinate their kids. If you mandate it, kids will lose the opportunity to be around their peers and in a social setting which is a big part of one's well being, mentally and physically. Please do not mandate this!?!

1/3/2022 5:20 PM

Provide and require more COVID testing to keep uninfected students in school.

1/3/2022 5:20 PM

My students are already vaxxed. It's ridiculous to not. The politics associated with this vax are ludicrous.

1/3/2022 5:20 PM

I will not vaccinate my children with this experimental drug. We will pull our children from the school district immediately.

1/3/2022 5:20 PM

No

1/3/2022 5:20 PM

Get all prevention in place, and allow our kids to have some normalcy in life! Get vaccinated

1/3/2022 5:20 PM

Until there is long term testing done, I will not vaccinate my student. Children are not dying of COVID.

1/3/2022 5:20 PM

We have nothing against vaccines. However, we would like to know the long term effects of the vaccine before injecting our children with the Covid vaccine.

1/3/2022 5:20 PM

Let parents decide for their children. Do not force our children to take this experimental vaccine. Please!!

1/3/2022 5:20 PM

We all have choice and all are unique to our own health, it should not be forced upon to get vaccinated.

1/3/2022 5:20 PM

I am not in favor and this will force me to leave the public school system!

1/3/2022 5:20 PM

If there is a mandate our family may seek home school. Many adults have died and there are many side effects to organs that are coming to light. We still do not know the long term effects of this "vaccine"

1/3/2022 5:19 PM

My comments are for MSD: This vaccine is no different from ANY OTHER vaccine required for school attendance. It's absolutely asinine that it is treated differently than other required vaccines by MSD. Please stop pandering to the anti-science crowd in the Mead District.

1/3/2022 5:19 PM

A vaccine for a virus needs many more years of study before making it a requirement. The government has no place in our schools to leave parents without a choice to choose for their family.

1/3/2022 5:19 PM

I believe all vaccinations for children are important for our community health. I would feel much safer sending my students to school knowing all students have been vaccinated.

1/3/2022 5:19 PM

There is simple no reason for this!!!! Leave the children alone!!!!

1/3/2022 5:19 PM

Vaccine education for those who need to the actual scientific pros and cons in order to make informed decisions opposed to political affiliation

1/3/2022 5:19 PM

Given my reaction as an adult I am hesitant to give the vaccine to my child and there isn't enough data in children for me to consider it.

1/3/2022 5:19 PM

I am in favor of the Covid vaccine for all children with the parent being able to seek an exemption from a licensed pediatrician.

1/3/2022 5:19 PM

It's still a new vaccine, we need time. I think patents should be allowed a choice.

1/3/2022 5:19 PM

My Child, My Choice. You do not raise my child and we will not let anyone demand that they have to vaccinated. That is no one's choice but the parents.

1/3/2022 5:19 PM

Please consider that other Western nations have formally found that vaccinating children poses graver health risks than Covid poses to these vulnerable wards. Until long-term studies show the safety of these experimental drugs, the State has no right to demand their use. Finally, with Omicron the shots have been shown not to prevent transmission or contagion.

1/3/2022 5:19 PM

This should be a choice. So many people have gotten Covid and have been fine! F\*\*\* inslee!!!!!!!  
And you sheeple.

1/3/2022 5:19 PM

I have already vaccinated my children (15, 14, & 8) and am strongly in favor of this action.

1/3/2022 5:19 PM

I hope the covid-19 vaccination is a requirement to attend school just like the other vaccines already required.

1/3/2022 5:19 PM

This vaccine is still extremely new, and time has not been given for us to understand if there are any long term effects, either positive or negative, and what those might be.

1/3/2022 5:19 PM

There has always been a religious and medical exemptions from mandatory vaccines. This shouldn't change for a "vaccine" that has questionable efficacy, especially for children who are not fully developed mentally or physically. The long term effects are unknown and, thus, too risky.

1/3/2022 5:19 PM

My children (both under 10) are already vaccinated; can we focus on removing masking mandates for already vaccinated people?

1/3/2022 5:19 PM

It is not necessary to vaccinate healthy children and expose them to potentially fatal side effects. We need to learn how to live with this, as we do with the seasonal flu, which we do not require a shot for students to attend school in person.

1/3/2022 5:19 PM

I strongly believe there is no benefit to children being vaccinated. We know that there is little risk of serious disease for children. Also, it is very clear that vaccination does not prevent Covid infection or Covid spread so again, there is no reason for a childhood vaccine.

1/3/2022 5:18 PM

COVID vaccine should be seen no differently than the flu shot, one in which, is NOT required. The 'disease' is just a virus that even the vaccinated are not protected against, which is a fact. Forcing parents to get a vaccine, which has not been around long enough to know the effects, to stay in school is unacceptable. If an exemption is not available based on personal belief and freedom to choose, you will have hundreds of children being pulled from the school district.

1/3/2022 5:18 PM

Vaccines remain a cornerstone of public health. Our schools continue to have the highest level of responsibility for our community's health and wellness.

1/3/2022 5:18 PM

No

1/3/2022 5:18 PM

Thank you for trying to keep this community safe. I have to vaccinate my child for MMR (etc). COVID should be no different.

1/3/2022 5:18 PM

Since when are we a society that burdens children with the task of carrying the risk of a medical intervention that has no long term evidence of safety in order to protect the older more vulnerable population? Healthy children are at statically zero risk of Covid disease and vulnerable children have access to the vaccine if they so choose. Vulnerable grandparents and teachers have also had the opportunity to protect themselves by taking vaccine. I draw the line in the sand with my children and so should you.

1/3/2022 5:18 PM

No

1/3/2022 5:18 PM

This is absolutely outrageous! This needs to be each families choice NOT a mandate!  
#NotMyGovernor

1/3/2022 5:18 PM

An exemption from the vaccine should absolutely be considered for children, just as was for adults.

1/3/2022 5:18 PM

No

1/3/2022 5:18 PM

I don't feel comfortable to send my vaccinated kids to school with unvaccinated kids. Do you part for us all to overcome this prolonged pandemic!

1/3/2022 5:18 PM

Vaccines with untested long term effects should not be forced on anyone, especially children.

1/3/2022 5:18 PM

My Mead students are already fully vaccinated and will be receiving the boosters as soon as they qualify. As with other vaccinations the community safety must be taken into consideration. To support the community I believe that vaccinations must be mandated for all students. The Covid-19 vaccination's safety is well documented with millions of doses given and an infinitesimally small amount of reactions and minor at that. It is time and it is my hope that this move will eventually free us up from having to wear masks in the school setting, isn't that what we all want? Please mandate the Covid-19 vaccine!

1/3/2022 5:18 PM

I think it's unwise to mandate a vaccine in children that has not passed through at least a 5 year study of long term effects. If there is a mandate my family will probably withdraw and begin to homeschool.

1/3/2022 5:18 PM

If we are to follow the science then the COVID-19 vaccine does more harm than good to kids in this age range. If this becomes mandatory we will withdraw from the public school system

1/3/2022 5:18 PM

We are against a required Covid vaccine for kids as Covid is not a significant health risk for children at this time

1/3/2022 5:18 PM

Ridiculous mandate and a clear overreach of power

1/3/2022 5:18 PM

I'm against to mandatory vaccination for kids

1/3/2022 5:18 PM

If this vaccine is forced upon students/parents. I wholeheartedly feel you will see parents removing their students from the Public school system. I for one will keep my daughter in remote learning. Not a good move all the way around.

1/3/2022 5:18 PM

Vaccination is key in getting back to normal.

1/3/2022 5:18 PM

Please consider adding this vaccine to the list of vaccines already required, so we can minimize learning disruptions.

1/3/2022 5:18 PM

I do not believe that there is enough info regarding future side effects to our children regarding the vaccine. I am not apposed to vaccines but not enough info available to us yet.

1/3/2022 5:18 PM

I don't see how this is different than other vaccine mandates families already comply with.... Or work through the exemption process for (I.e. measles). The research is there, I support this vaccination being considered.

1/3/2022 5:18 PM

We should absolutely include this vaccine as a requirement for school, just like the other important vaccines. Our kids are already vaccinated & would feel much safer knowing others were as well.

1/3/2022 5:18 PM

The people that are at risk oh death or hospitalizations have every right to get vaccinated. My wife and I are Vaccinated. There's zero science that would back up that kids should be vaccinated. If This becomes a state wide mandate I will happily move my family from Washington.

1/3/2022 5:18 PM

The science does not support that such a mandate it necessary.

1/3/2022 5:18 PM

Unless we mandate the FLU vaccine- I will absolutely NOT support this measure.

1/3/2022 5:17 PM

Please allow the parents to choose what goes in our children's bodies.

1/3/2022 5:17 PM

The COVID-19 vaccination is no different than other mandatory vaccinations required for school entry. It would be in the best interest of the entire public health for all children who are medically able to be vaccinated to do so; exemptions really should only occur if a child cannot receive it due to TRUE medical issue. Honestly, it's time to get over this politicization of public health issues.

1/3/2022 5:17 PM

We will not be putting this crap in our kids, ever.

1/3/2022 5:17 PM

Hell no to the vaccine. I will absolutely be homeschooling if there isn't an option.

1/3/2022 5:17 PM

None.

1/3/2022 5:17 PM

The "vax" is not working. And it sure isn't needed in young healthy children. All risk and no reward, other than following orders. Teach kids to be critical thinkers.

1/3/2022 5:17 PM

Already had COVID, will not subject my kids to additional potential harm/side effects.

1/3/2022 5:17 PM

I have no appropriate comments, at this time.

1/3/2022 5:17 PM

I would really like all children vaccinated so they can stop wearing masks.

1/3/2022 5:17 PM

This is absurd. We know that children are at almost zero risk of serious illness from COVID. What happened to "trust the science"?

1/3/2022 5:17 PM

I and many others will withdraw our kids if you mandate vaccines on our kids. You might as well start firing staff cause you're going to run out of money if you vote to do this in Mead

1/3/2022 5:17 PM

How can we require a mandate on a vaccine/booster, when it is in the process of being reformulated. A vaccine that is continuously being altered doesn't have ground stand on. (Information gathered from local pharmacists)

1/3/2022 5:17 PM

Natural immunity should count

1/3/2022 5:17 PM

I do not support any type of vaccine mandates. I myself have received an exemption for work. I would have quit my job had I had to have had the vaccine. I will pull my children from school if it is required and there is no exemption allowed.

1/3/2022 5:17 PM

Already vaccinated

1/3/2022 5:17 PM

There is not enough known about the vaccines to mandate them. I had an adverse reaction to both the MMR vaccine as a child and the COVID vaccine as an adult. My medical exemption to the MMR vaccine was accepted all through school, but WA does not accept my COVID vaccine. This is not okay-my body violently rejected it. Until we know more children should not be mandated.

1/3/2022 5:17 PM

This is a direct violation of our rights at parents and this vaccine has dangerous side affects proven to our children. It is criminal to mandate them to be given. It should be every person's choice whether or not they put these in their bodies. But to force parents to give them to our children is a whole of issue. This virus is not killing our children.

1/3/2022 5:17 PM

When making this decision, please consider the health and safety of the children, the staff, and their families. Please do not be swayed by empty threats to pull children from class over this issue. Vaccination saves lives and protects our community.

1/3/2022 5:17 PM

This would be the same as REQUIRING students to get a flu shot every year. The vaccine does not provide the same level of protection against COVID as other vaccines that are required do. Such as MMR/chickenpox. With all the breakthrough Covid cases I feel this is the same as a flu shot. No one has ever asked me if my kids get flu shots in order to attend events/school.

1/3/2022 5:17 PM

Thank you for taking steps to keep our kids safe!

1/3/2022 5:17 PM

Follow the science and the scientists. Not extremists. Not always easy but keep up the good work.

1/3/2022 5:17 PM

I trust the science behind the risks of COVID and the benefits of vaccination, and hope the Governor and SBOH continue to as well.

1/3/2022 5:17 PM

It would be great if everyone could comply with the directives.

1/3/2022 5:17 PM

I will not vaccinate my child for Covid. I will pull them from school if it become mandatory and we will go to private school. If it becomes mandatory there we will homeschool. We will not use an experimental vaccine on our children. This is a virus. Flu shot is not required. Covid should not either. It hasn't proven to prevent it. It isn't proven safe yet.

1/3/2022 5:17 PM

Stop shoving the vaccine down our throats. These are our children, not just a number in the system.

1/3/2022 5:17 PM

There is no science to support the rate of transmission in young children. My child will NOT be a test subject in this game.

1/3/2022 5:17 PM

Mandatory vaccines are unconstitutional especially when they are still under emergency use authorization.

1/3/2022 5:17 PM

This vaccine mandate should be like others students are required to have prior to starting kindergarten, and again around age 12. In my opinion, there is no difference.

1/3/2022 5:17 PM

With the medical complications that many children have experienced, I am not willing to give my son a vaccination that has not been thoroughly studied. My son is fully vaccinated otherwise.

1/3/2022 5:17 PM

The health and safety of our children and staff should be of the utmost importance. I fully support a similar vaccine mandate to all of the other vaccines that have been required for decades.

1/3/2022 5:17 PM

This makes no sense. Anyone who is scared or worried is able to get a vaccine, thus protecting them. Forcing this on everyone just creates divisiveness and strife. Our children have already had covid and had little to no symptoms. I realize that not all people get it that easy, and they are welcome to get a vaccine if they want.

1/3/2022 5:17 PM

The impact that the vaccine has on people is so uncertain. Some are sick for weeks, some are perfectly fine, and others have died. Forcing children to get a vaccine that still has so many unknown factors is not okay. Long term effects are unknown at this time.

1/3/2022 5:17 PM

I will not be injecting my child with an experimental vaccine with no available history of future side effects.

1/3/2022 5:16 PM

please protect all of our children and community from misled people who are not making decisions based on reality

1/3/2022 5:16 PM

No

1/3/2022 5:16 PM

I will have to homeschool my daughters if a vaccine mandate is put in place for students.

1/3/2022 5:16 PM

Original vaccination not as necessary require boosters

1/3/2022 5:16 PM

I think if enough kids get vaccinated (determined by SDOH) we can drop mask mandate

1/3/2022 5:16 PM

I will absolutely not vaccinate my child and will home school or use private education if mandated.

1/3/2022 5:16 PM

NA

1/3/2022 5:16 PM

We need people to get vaccines. My son works in the hospital and deals with Covid patients on life support. Get kids vaccinated .

1/3/2022 5:16 PM

Ourselves and many parents we know will not vaccinate their children and they will be pulled from schools. You need to factor in a large enrollment drop in eastern Washington and a large drop in funding following that

1/3/2022 5:16 PM

We have proven that healthy kids pose almost a zero risk of getting more than the common cold from Covid. It is also proven that vaccinated still acquire and spread Covid.

1/3/2022 5:16 PM

All of my children are vaccinated and I think everyone should vaccinate their children if they want to send them to public schools!

1/3/2022 5:16 PM

What do parents do when children live in 2 households, one that's pro-vaccine and one that's anti-vaccine?

1/3/2022 5:16 PM

100% yes, the Covid vaccine should be required. We are seeing the worst of the spread with those unvaccinated missing double, now triple the amount of school, getting sick enough for hospitalizations and they are more contagious than vaccinated individuals. We must stop this cycle,

and the only way out is vaccination. Just like we have demanded of other vaccines for years. Maybe consider the flu vaccine to be required too??

1/3/2022 5:16 PM

If Vaccination becomes required, we will be removing all children from the school districts in Washington State!

1/3/2022 5:16 PM

Thank you for trying to make sure our kids are safer from Covid 19, and just as you've mandated MMR, Polio and other vaccines for the well-being of our children in school I ask this vaccine be mandated as well.

1/3/2022 5:16 PM

No

1/3/2022 5:16 PM

Please don't do this to our children...

1/3/2022 5:16 PM

There Is minimal risk to children who contract covid. Many students already have necessary antibodies. There is NO long term research to assess the side effects of this vaccine in children. In NO way does the risk outweigh the rewards

1/3/2022 5:16 PM

I think this is a smart idea. It will keep us healthy and at school.

1/3/2022 5:16 PM

Kids are not a high risk & have survived at school this Long without vaccine. That's insane to make a shot mandatory to kids that aren't even fully developed yet that isn't even safe for adults to take. No masks. No vaccine.

1/3/2022 5:15 PM

No

1/3/2022 5:15 PM

My kids are already vaccinated due to their wish to not have to quarantine from other activities. I would not have vaccinated them just to medically protect them from this virus.

1/3/2022 5:15 PM

Nope

1/3/2022 5:15 PM

If there is no flu vaccine requirement, why would there be a covid vaccine requirement?

1/3/2022 5:15 PM

My children WILL NOT be vaccinated. They will be pulled from the school district.

1/3/2022 5:15 PM

We support vaccine mandates for all children who don't have medical exemptions.

1/3/2022 5:15 PM

No

1/3/2022 5:15 PM

There is not enough information available to know the longterm effects of the vaccine on young children, who already have displayed a higher immunity/resistance/resilience to COVID than other populations.

1/3/2022 5:15 PM

I will pull all 3 of my children out of the district if there is a mandate. There is not enough information on this vaccine and it's not even working including with a 4th booster. It's not shown to be bad for children so it's completely unnecessary for them to get it.

1/3/2022 5:15 PM

I am ready for school to go back to normal. Vaccines seem like the best option for all of us!

1/3/2022 5:15 PM

Please leave it to the individual household to determine what is best for them.

1/3/2022 5:15 PM

As a nurse myself, I think it is reckless to mandate a vaccine that is under EUA for children. There is not enough research or data post vaccine to mandate this.

1/3/2022 5:15 PM

If exemptions are given, it would be great to have some sort of process to make sure they are followed.

1/3/2022 5:15 PM

If this becomes mandatory my three children will be removed from the public school system. I have a back up home school option already in place should this happen!

1/3/2022 5:15 PM

This should be a requirement like any other childhood vaccination.

1/3/2022 5:15 PM

We are supposed to be a free country. I will not be a sheep.

1/3/2022 5:15 PM

my kids (5 and 18) are fully vaccinated with my 18 year old with the booster as well.

1/3/2022 5:15 PM

No

1/3/2022 5:14 PM

My children have natural immunity and shouldn't be subjected to this trial when the numbers don't show a significant risk to their age group.

1/3/2022 5:14 PM

Please stick up for our kids civil liberties and do not mandate vaccines. You have the ability to go against Inslee. Do it.

1/3/2022 5:14 PM

My two children already are vaccinated

1/3/2022 5:14 PM

No

1/3/2022 5:14 PM

Both My Kids are already vaccinated.

1/3/2022 5:14 PM

No

1/3/2022 5:14 PM

Thank you

1/3/2022 5:14 PM

No

1/3/2022 5:14 PM

Absolutely will NEVER vaccinate my children against this. They will be pulled immediately

I think it is every parents right to make this decision for their children not the government or by extension schools. I for one have no plans to ever enroll my kids in public or private school if this is in place and I think the parents who are able to will take their children out. There is medical evidence that this is causing harm in children,

especially young boys. If you make the decision for a mandate all of their life's and potential life long medical issues will be on you. The kids/parents who want this will go get it and good for them if that's what they want but there's nothing wrong with a parent and child not wanting this- kids are hardly even being affected by COVID. Please do what's right for our kids not what a certain agenda is making you feel like you have to.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed, Susan S Peverly; Washington State citizen for 79 years.

Include the Covid-19 injections as part of school immunization requirements using WAC 246-105

11.

Are you Pro or Con on the proposal?

2.                      Con

---

WAC 246-105-030 states that "children must be protected against ... vaccine-preventable diseases." Former VP and Chief Scientist Dr. Michael Yeadon of Pfizer recently stated that the vaccine is "50 times more likely to kill [young people] than the virus itself." In the past month, Secretary of Defense Lloyd Austin, Senator Cory Booker, and before them Press Secretary Jen Psaki have tested positive for COVID-19 despite vaccination and multiple boosters. As COVID-19 vaccinations do not protect children, have been known to harm children, and do not prevent the disease, it is entirely inappropriate to add COVID-19 vaccinations to WAC 246-105-030.

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO (Emergency Use Only), and quite clearly not efficient or effective for stopping Covid, especially in children that are at a low risk of contracting or becoming seriously ill from the virus. Data regarding efficacy and safety only recent became published for pregnant women (August 11th, 2021). These are our children and we do not need to use them as guinea pigs. Are mandates on our teachers and para-professionals not enough? Again, children are at a low risk of becoming seriously ill/ have mild symptoms and we know the vaccine does not prevent the spread. It only minimizes the symptoms. The authorization infringes on our civil liberties of the people to make their own medical decisions in regards to any medicine put into their bodies and the bodies of the children they are charged to protect! Make sure the schools are following safety guidelines, make sure the vaccination is safe and effective. Don't rush into making a choice based on constantly changing science. That choice can have serious, permanent side effects. Thank you for your time, Mrs. Kayleigh Halstedt (Mother)

Subject: Child vaccines

External Email

Please carefully consider mandating this Covid vaccine to school age children. It is being used as an experiment as noted by New England Journal of Healths, Eric Ruben. He, notably stated that "we will not know about the safety in kids until we begin giving the shots to them!" I cannot understand how you as a regulating body would even consider for ONE second forcing our children to take an experimental shot in order to attend school. This shot is nothing like any other required vaccine on the list for kids, not to mention this virus has virtually zero effect on young healthy people. It has been compared to a cold unless you are obese, diabetic or have a severely compromised immune system and there is absolutely no evidence of a child bringing the infection home to relatives!

For mostly economic reasons I have personally taken and supplied my own daughter the flu shot for nearly 20 years so cannot be considered anti-vax.

I am aware of very few adverse reactions to the flu vaccine. Mostly allergy to ingredients. I believe this injection to be shown deliterious to a growing cohort of, especially young boys, in the risk of heart damage that in some cases may not reverse. The risk/reward for this particular shot is not even close when considering the effects of virus VS shot. Lastly, knowing how strongly a growing number of parents feel after weighing the benefit against risk for their own children the possibility of MANY children being pulled from the educational system entirely will be devastating not only economically to the system but also for the families having to rearrange their lives to avoid this mandate.

PLEASE do not mandate this shot for our kids!  
Sincerely, Tracy Shephard

---

Mandatory vaccination for K-12 in the entirety of WA schools.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Vaccinations do not stop the transmission of the virus. Certain kids as well as adults have medical conditions that would be detrimental to their health if forced to take the shot (s). 70-80% of viruses mutate to a milder state in order to survive, not aggressive state in order to kill (hence Omicron). CDC states that human immunity is 27 times greater than vaccinations (herd immunity). Accepting an mRNA vaccine (under the 1st amendment of the United States constitution, which protects 5 rights) needs to adhere to the willful decision of the accepting party in order keep in line with the party's freedom of religion as such acceptance of an mRNA Vaccine may be contradictory to the party's religion. Hence mandating or forcing vaccination(s) such as the mRNA (which deposits information into human cells) breaks the individuals freedom of religion protected under the 1st amendment.

---

School aged children are at very low risk of severe illness from covid 19. The current vaccines do not prevent infection or transmission of the disease, they only prevent severe symptoms. Kids are not at a high enough risk of severe illness to require the vaccine. Statistically kids are more likely to have a adverse reaction to the vaccine then they are to have a severe case of covid.

To whomever it may concern,

We The People/Parents will not tolerate any covid shot requirements for school age children. We will consent to medical treatment to our children IF we so desire, once we have had ample time to gather all pertinent information and make a wise and informed decision, which many of us do not feel have we had time for.

And many of us feel that much more time and information is needed re: safety, and efficacy, and long term studies from this new product.

Furthermore, it's proven the Covid shots do not work against variants. Celebrities and public figures are tweeting/talking about testing positive for Covid, within the last couple weeks, even though being triple vaxxed(in fact, today, on The View, it was Whoopi Goldberg).

This, (and many more reasons) and firstly, the fact that you are not our children's parents, and secondly, children are not at high risk for Covid, makes this whole decision mute.

We encourage you to stand for freedom and support the parents in making the best informed decision for their children.

Let Freedom Ring,

E. Meyers

P.s.

Well-Structured German Study Shows No Deaths among Healthy German Kids Ages 5 to 11

Here is what we find for healthy kids with Covid-19:

- For healthy kids, the risk of going to the hospital is 51 per 100,000
- For healthy kids, the risk of going to the ICU is 8 per 100,000
- For healthy kids, the risk of death is 3 per 1,000,000
- There were no deaths reported in healthy kids older than 5
- Kids 5 to 11 have a lower risk than kids <5 and adolescents 12 to 17
- Kids 5 to 11 have a risk of going to the ICU of 2 in 100,000; 0 died
- Among kids who died of COVID19, 38% were already on palliative/ hospice care

The Germany study shows that risks to healthy kids are very low.

So why the school closures, mask mandates, and vaccinations for children who are not at risk?

Mandatory Injections of an experimental vaccine that does not prevent transmission or inoculate the recipient of COVID-19 and its variants on children who are not at high risk of hospitalization or death without comorbidities.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Though one of our honored Supreme court justice thinks that there are 100,000 kids on ventilators, the truth is according to HHS 3,342 kids have been on ventilators, less than a thousand have died. The strains are getting weaker though more transmittable. The risks of Myocarditis and other negative effects from the vaccine are higher than the actual hospitalization case rate(not infection rate which is lower) and the CFR and IFR. If you do this more kids will develop heart problems that we don't know if it will heal themselves latter on. Please let parents/kids and doctors make decisions on there own health.

Including COVID-19 vaccines as part of school vaccinations requirements

11.

Are you Pro or Con on the proposal?

2.                      Con

---

These injections have not been through enough time and verifications to accurately show the efficacy or harm. Forcing children to be subject to an unclear medical procedure is extremely dangerous for the future. Studies are showing myocarditis (especially for young males) is a side effect and that is irreversible damage by these injections. If the prevention and non-transmissibility to others was indeed proven by these injections and the disease has a high death rate then there would be a possible reason to place the requirement for children, but there is no substantial evidence for this requirement.

Hello,

I am writing you all as a mother of two teenaged sons. I am very concerned with January 12th's proposal and possible decisions to make the Covid19 vaccines mandatory for all school children. The evidence thus far is clear that children, esp teens and young men, are far more at risk from this vaccine than of Covid19 itself. Furthermore, it is clear that vaccinated individuals are just as capable of spreading this virus as non vaccinated individuals. This vaccine should not be mandatory to participate in society for anyone, including and especially for children and school. (Below I have attached 39 studies showing this to be the case).

I urge you to make the right decision and let this highly risky medical procedure remain a choice for parents to make, with their trusted medical providers, for themselves and their children.

I don't know if any of you are parents (I'm sure some of you are) but please remember that we parents will do anything to protect our children and we have every right to do so, as we see fit. It is our duty. Also know that if you come after our children, there is a whole slew of us that will come after you.

Thank you,  
Sam K Cochran

85-95% range at least until 24 weeks after the second dose. As a contrast, the efficacy against infection waned down to around 30% at 15-19 weeks after the second dose.

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.11.21255555v1%2Ffull-text>  
-reported that vaccinated individuals who get infected with the Delta variant can transmit SARS-CoV-2 to others. They found an elevated viral load in the unvaccinated and vaccinated symptomatic persons (68% and 69% respectively, 158/232 and 156/225). Moreover, in the asymptomatic persons, they uncovered elevated viral loads (29% and 82% respectively) in the unvaccinated and the vaccinated respectively. This suggests that the vaccinated can be infected, harbor, cultivate, and transmit the virus readily and unknowingly.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Flink.springer.com%2Farticle%2F10021-00808-7&data=04%7C01%7Cwsboh%40sbh.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7cab%7C11d0e2>

-reported that “at the country-level, there appears to be no discernable relationship between percentage of population fully vaccinated and new COVID-19 cases.” When comparing 2947 counties in the United States, there were slightly less cases in more vaccinated locations. In other words, there is no clear discernable relationship

[•\[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpapers.ssrn.com%2Fsol3%2Fpaper-looked at transmission of SARS-CoV-2 Delta variant among vaccinated healthcare workers in Vietnams\]\(https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpapers.ssrn.com%2Fsol3%2Fpaper-looked+at+transmission+of+SARS-CoV-2+Delta+variant+among+vaccinated+healthcare+workers+in+Vietnam\)](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpapers.ssrn.com%2Fsol3%2Fpaper-looked+at+transmission+of+SARS-CoV-2+Delta+variant+among+vaccinated+healthcare+workers+in+Vietnam). Of 69 healthcare workers that tested positive for SARS-CoV-2, 62 participated in the clinical study, all of whom recovered. For 23 of them, complete-genome sequences were obtained, and all belonged to the Delta variant. “Viral loads of breakthrough Delta variant infection cases were 251 times higher than those of cases infected with old strains detected between March-April 2020”.

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F3435>  
-found that among 469 cases of COVID-19, 74% were fully vaccinated, and that “the vaccinated had on average more virus in their nose than the unvaccinated who were infected.”

• <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.eurosurveillance.org%2Fcontent/7917/ES.2021.26.30.2100636&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348cfd256d5d41f0e9>  
Finland, Hetemäli et al. observed that “both symptomatic and asymptomatic infections were found among vaccinated health care workers, and secondary transmission occurred from those with symptomatic infections despite use of personal protective equipment.”

• [https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.eurosurveillance.org%2Fcontent/view/full/7917.ES.2021.26.39.2100822%23html\\_fulltext&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.eurosurveillance.org%2Fcontent/view/full/7917.ES.2021.26.39.2100822%23html_fulltext&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348)  
-hitrit et al. observed “high transmissibility of the SARS-CoV-2 Delta variant among twice vaccinated and masked individuals.” They added that “this suggests some waning of immunity, albeit still providing protection for individuals without comorbidities.”

- [https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/97864/covid-19-surveillance-report-week-42.pdf&data=04%7C01%7Cwsboh%40sbob.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7cabcb%7C11](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/97864/covid-19-surveillance-report-week-42.pdf&data=04%7C01%7Cwsboh%40sbob.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7cabcb%7C11)

t was noted that there is “waning of the N antibody response over time” and “that N antibody levels appear to be lower in individuals who acquire infection following 2 doses of vaccination.” The same report (Table 2, page 13), shows that in the older age groups above 30, the double vaccinated persons have greater infection risk than the unvaccinated, presumably because the latter group include more people with stronger natural immunity from prior Covid disease. As a contrast, the vaccinated people had a lower risk of death than the unvaccinated, across all age groups, indicating that vaccines provide more protection against death than against infection.

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056%2FNEJMoa2110947>  
- "conducted a 6-month longitudinal prospective study involving vaccinated health care workers who were tested monthly for the presence of anti-spike IgG and neutralizing antibodies". They found that "six months after receipt of the second dose of the BNT162b2 vaccine, humoral response was substantially decreased, especially among men, among persons 65 years of age or older, and among persons with immunosuppression."

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolum>  
-reported that "During May 3–July 25, 2021, the overall age-adjusted vaccine effectiveness against hospitalization in New York was relatively stable 89.5%–95.1%). The overall age-adjusted vaccine effectiveness against infection for all New York adults declined from 91.8% to 75.0%."

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.biorxiv.org%2Fcontent%2F10.1101%2F2021.08.10.456111>  
- noted that "Our data demonstrate a substantial waning of antibody responses and T cell immunity to SARS-CoV-2 and its variants, at 6 months following the second immunization with the BNT162b2 vaccine."

•[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpapers.ssrn.com%2Fsol3%2Fcf\\_de](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpapers.ssrn.com%2Fsol3%2Fcf_de)  
observed that "vaccine effectiveness of BNT162b2 against infection waned progressively from 92% (95% CI, 92-93,  $P<0.001$ ) at day 15-30 to 47% (95% CI, 39-55,  $P<0.001$ ) at day 121-180, and from day 211 and onwards no effectiveness could be detected (23%; 95% CI, -2-41,  $P=0.07$ )."

3099&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7cab%7C11d445344534453  
4/fulltext examined the transmission and viral load kinetics in vaccinated and unvaccinated individuals with mild delta variant infection in the community. They found that (in 602 community contacts (identified via the UK contract-tracing system) of 471 UK COVID-19 index cases were recruited to the Assessment of Transmission and Contagiousness of COVID-19 in Contacts cohort study and contributed 8145 upper respiratory tract samples from daily sampling for up to 20 days) "vaccination reduces the risk of delta variant infection and accelerates viral clearance. Nonetheless, fully vaccinated individuals with breakthrough infections have peak viral load similar to unvaccinated cases and can efficiently transmit infection in household settings, including to fully vaccinated contacts."

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056%2FNEJMoa2110947>  
NEJM, has recently reported on the resurgence of SARS-CoV-2 infection in a highly

vaccinated health system workforce. Vaccination with mRNA vaccines began in mid-December 2020; by March, 76% of the workforce had been fully vaccinated, and by July, the percentage had risen to 87%. Infections had decreased dramatically by early February 2021..."coincident with the end of California's mask mandate on June 15 and the rapid dominance of the B.1.617.2 (delta) variant that first emerged in mid-April and accounted for over 95% of UCSDH isolates by the end of July, infections increased rapidly, including cases among fully vaccinated persons...researchers reported that the "dramatic change in vaccine effectiveness from June to July is likely to be due to both the emergence of the delta variant and waning immunity over time."

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2F3099&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7cab%7C11d%2Ffulltext> -sought to describe the impact of vaccination on admission to hospital in patients with confirmed SARS-CoV-2 infection using real-world data collected by the Yale New Haven Health System. "Patients were considered fully vaccinated if the final dose (either second dose of BNT162b2 or mRNA-1273, or first dose of Ad.26.COV2.S) was administered at least 14 days before symptom onset or a positive PCR test for SARS-CoV-2. In total, we identified 969 patients who were admitted to a Yale New Haven Health System hospital with a confirmed positive PCR test for SARS-CoV-2"...Researchers reported "a higher number of patients with severe or critical illness in those who received the BNT162b2 vaccine than in those who received mRNA-1273 or Ad.26.COV2.S..."

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolume> -A very recent study published by the CDC reported that a majority (53%) of patients who were hospitalized with Covid-19-like illnesses were already fully vaccinated with two-dose RNA shots. Table 1 reveals that among the 20,101 immunocompromised adults hospitalized with Covid-19, 10,564 (53%) were fully-vaccinated with the Pfizer or Moderna vaccine (Vaccination was defined as having received exactly 2 doses of an mRNA-based COVID-19 vaccine  $\geq 14$  days before the hospitalization index date, which was the date of respiratory specimen collection associated with the most recent positive or negative SARS-CoV-2 test result before the hospitalization or the hospitalization date if testing only occurred after the admission). This highlights the ongoing challenges faced with Delta breakthrough when vaccinated.

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F> - They reported that "while vaccination still lowers the risk of infection, similar viral loads in vaccinated and unvaccinated individuals infected with Delta question how much vaccination prevents onward transmission... transmission reductions declined over time since second vaccination, for Delta reaching similar levels to unvaccinated individuals by 12 weeks for ChAdOx1 and attenuating substantially for BNT162b2. Protection from vaccination in contacts also declined in the 3 months after second vaccination...vaccination reduces transmission of Delta, but by less than the Alpha variant."

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F> 021-01575-4%23auth-Matan-Levine\_Tiefenbrun&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7 - Levine-Tiefenbrun, 2021 looked at Viral loads of Delta-variant SARS-CoV-2 breakthrough infections after vaccination and booster with BNT162b2, and reported the viral load reduction effectiveness declines with time after vaccination, "significantly

decreasing at 3 months after vaccination and effectively vanishing after about 6 months.”

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticle/PMC7144441/>  
- Puranik, 2021 looked at a Comparison of two highly-effective mRNA vaccines for COVID-19 during periods of Alpha and Delta variant prevalence, reporting “In July, vaccine effectiveness against hospitalization has remained high (mRNA-1273: 81%, 95% CI: 33–96.3%; BNT162b2: 75%, 95% CI: 24–93.9%), but effectiveness against infection was lower for both vaccines (mRNA-1273: 76%, 95% CI: 58–87%; BNT162b2: 42%, 95% CI: 13–62%), with a more pronounced reduction for BNT162b2.”

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticle/PMC7144441/>  
Saade, 2021 looked at Live virus neutralization testing in convalescent patients and subjects vaccinated against 19A, 20B, 20I/501Y.V1 and 20H/501Y.V2 isolates of SARS-CoV-2, and reported as “Assessed the neutralizing capacity of antibodies to prevent cell infection, using a live virus neutralization test with different strains [19A (initial one), 20B (B.1.1.241 lineage), 20I/501Y.V1 (B.1.1.7 lineage), and 20H/501Y.V2 (B.1.351 lineage)] in serum samples collected from different populations: two-dose vaccinated COVID-19-naïve healthcare workers (HCWs; Pfizer-BioNTech BNT161b2), 6-months post mild COVID-19 HCWs, and critical COVID-19 patients... finding of the present study is the reduced neutralizing response observed towards the 20H/501Y.V2 variant in fully immunized subjects with the BNT162b2 vaccine by comparison to the wild type and 20I/501Y.V1 variant.”

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2021.06.01.21261111v1>  
Canaday, 2021 looked at Significant reduction in humoral immunity among healthcare workers and nursing home residents 6 months after COVID-19 BNT162b2 mRNA vaccination, reporting “Anti-spike, anti-RBD and neutralization levels dropped more than 84% over 6 months’ time in all groups irrespective of prior SARS-CoV-2 infection. At 6 months post-vaccine, 70% of the infection-naïve NH residents had neutralization titers at or below the lower limit of detection compared to 16% at 2 weeks after full vaccination. These data demonstrate a significant reduction in levels of antibody in all groups. In particular, those infection-naïve NH residents had lower initial post-vaccination humoral immunity immediately and exhibited the greatest declines 6 months later.”

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2021.06.01.21261111v1>  
Israel, 2021 looked at Large-scale study of antibody titer decay following BNT162b2 mRNA vaccine or SARS-CoV-2 infection, and reported as “To determine the kinetics of SARS-CoV-2 IgG antibodies following administration of two doses of BNT162b2 vaccine, or SARS-CoV-2 infection in unvaccinated individuals...In vaccinated subjects, antibody titers decreased by up to 40% each subsequent month while in convalescents they decreased by less than 5% per month. Six months after BNT162b2 vaccination 16.1% subjects had antibody levels below the sero-positivity threshold of <50 AU/mL, while only 10.8% of convalescent patients were below <50 AU/mL threshold after 9 months from SARS-CoV-2 infection.”

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2021.06.01.21261111v1>  
- Eyran, 2020 examined The longitudinal kinetics of antibodies in COVID-19 recovered

Kingdom, and at a time when the Alpha and Delta variants were competing for dominance. The finding was that “although the vaccines did offer some protection against infection and onward transmission, Delta dampened that effect. A person who was fully vaccinated and then had a ‘breakthrough’ Delta infection was almost twice as likely to pass on the virus as someone who was infected with Alpha. And that was on top of the higher risk of having a breakthrough infection caused by Delta than one caused by Alpha.”

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.08.18.22274441v1> reported that PCR cycle threshold (Ct) values were “similar between both vaccinated and unvaccinated groups at diagnosis, but viral loads decreased faster in vaccinated individuals. Early, robust boosting of anti-spike protein antibodies was observed in vaccinated patients, however, these titers were significantly lower against B.1.617.2 as compared with the wildtype vaccine strain.”

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.08.18.22274441v1> reported on reduced neutralization of SARS-CoV-2 omicron variant by vaccine sera and monoclonal antibodies. “in vitro findings using authentic SARS-CoV-2 variants indicate that in contrast to the currently circulating Delta variant, the neutralization efficacy of vaccine-elicited sera against Omicron was severely reduced highlighting T-cell mediated immunity as essential barrier to prevent severe COVID-19.”

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolum> on the details for 43 cases of COVID-19 attributed to the Omicron variant. They found that “34 (79%) occurred in persons who completed the primary series of an FDA-authorized or approved COVID-19 vaccine  $\geq 14$  days before symptom onset or receipt of a positive SARS-CoV-2 test result.”

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.08.18.22274441v1> presented live neutralisation titres against SARS-CoV-2 Omicron variant, and examined it relative to neutralisation against the Victoria, Beta and Delta variants. They reported a significant drop in “neutralisation titres in recipients of both AZD1222 and BNT16b2 primary courses, with evidence of some recipients failing to neutralise at all.”

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.08.18.22274441v1> assessed whether Omicron variant escapes antibody neutralization “elicited by the Pfizer BNT162b2 mRNA vaccine in people who were vaccinated only or vaccinated and previously infected.” They reported that Omicron variant “still required the ACE2 receptor to infect but had extensive escape of Pfizer elicited neutralization.”

- <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2022.08.18.22274441v1> Denmark study looked at vaccine effectiveness against SARS-CoV-2 infection with the Omicron or Delta variants following a two-dose or booster BNT162b2 or mRNA-1273 vaccination series. A key finding was reported as “VE against Omicron was 55.2% initially following primary BNT162b2 vaccination, but waned quickly thereafter. Although estimated with less precision, VE against Omicron after primary mRNA-1273 vaccination similarly indicated a rapid decline in protection. By comparison, both vaccines showed higher, longer-lasting protection against Delta.” In other words, the vaccine that has

failed against Delta is even far worse for Omicron. The table and figure below paint a devastating picture. See where the green dot is (Omicron variant) in the vertical lines (blue is Delta) and the 2 edges of the bars (upper and lower lips) 91 days out for Omicron (3 months). Both Pfizer and Moderna show negative efficacy for Omicron at 31 days (both are below the 'line of no effect' or '0'). The comparative table is even more devastating for it shows how much less vaccine effectiveness there is for Omicron. For example, at 1-30 days, Pfizer showed 55.2% effectiveness for Omicron versus 86.7% for Delta, and for the same period, Moderna showed 36.7% effectiveness for Omicron versus 88.2% for Delta.

•<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk%2Fmedia/government/uploads/2022/01/11/uk-reporting-showed-that-boosters-protect-against-symptomatic-covid-19-caused-by-omicron-for-about-10-weeks-the-uk-health-security-agency-reported-protection-against-symptomatic-covid-19-caused-by-the-variant-dropped-from-70-to-45-following-a-pfizer-boost-for-those-initially-vaccinated-with-the-shot-developed-by-pfizer-with-biontech-specifically-reporting-by-the-uk-health-security-agency-showed-among-those-who-received-an-astrazeneca-primary-course-vaccine-effectiveness-was-around-60-2-to-4-weeks-after-either-a-pfizer-or-moderna-boost-then-dropped-to-35-with-a-pfizer-boost-and-45-with-a-moderna-boost-by-10-weeks-after-the-boost-Among-those-who-received-a-pfizer-primary-course-vaccine-effectiveness-was-around-70-after-a-pfizer-boost-dropping-to-45-after-10-plus-weeks-and-stayed-around-70-to-75-after-a-moderna-boost-up-to-9-weeks-after-boost->

33.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C348cfd256d5d41f0e9d508d9d1f7cab%7C11UK reporting showed that boosters protect against symptomatic COVID-19 caused by Omicron for about 10 weeks; the UK Health Security Agency reported protection against symptomatic COVID-19 caused by the variant dropped from 70% to 45% following a Pfizer booster for those initially vaccinated with the shot developed by Pfizer with BioNTech. Specifically reporting by the UK Health Security Agency showed "Among those who received an AstraZeneca primary course, vaccine effectiveness was around 60% 2 to 4 weeks after either a Pfizer or Moderna booster, then dropped to 35% with a Pfizer booster and 45% with a Moderna booster by 10 weeks after the booster. Among those who received a Pfizer primary course, vaccine effectiveness was around 70% after a Pfizer booster, dropping to 45% after 10-plus weeks and stayed around 70 to 75% after a Moderna booster up to 9 weeks after booster."

External Email

I am strongly urging you to vote NO for vaccine mandates for our children and schools. Please resist the public hysteria and Big Pharma lobbying machines, look at the science and data for kids, and ask yourself why would we force such a thing on our precious children? FACT - zero kids 5-11 in the Pfizer clinical trial, either vaccinated or in the control group, had severe Covid symptoms. Zero. FACT - per the CDC data, less than 1/10th of 1 percent (<0.10%) of people hospitalized with (not because of) COVID were kids 0-17, and even fewer died. FACT - vaccinated people can spread the disease - look at what's happening now. FACT - we don't know the long-term side effects of this vaccine; it's just too early. FACT - the drug companies cannot be sued for any deaths or adverse reactions to their products; ask yourself why? Given all of this, how could you even consider mandating a vaccine on our children? Let the parents and their doctors decide!!!!

Also, consider also that the least vaccinated portion of our population are minorities. What message will this send if you vote yes?

To Whom It May Concern,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

These mandates are overreach & immoral.

Sincerely,  
Shelly

WSBOH, We wish to emphasize that children are at extremely low risk from Covid19 death. The current vaccines are still only EUA (emergency use authorized) and the vaccine's have set adverse events and deaths records on the government's VAERS data, which are above all other vaccines adverse effects and deaths combined in the history of the database. Currently Americans cannot obtain FDA approved vaccines. When in the history of the United State of America have we placed children at risk for the protection of older adults? These actions are unprecedented and unnecessary. We would like to express our strong opposition to any COVID19 vaccine mandates for children. Thank you.

Subject: Proposed policies for January 12, 2022 meeting

External Email

Thank you for your time! I know you are busy and your time is valuable!

I am emailing as a citizen of Washington state to ask you to stand for medical freedom and constitutional rights.

Two of the proposed policies as stated:

"- Allow health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.  
- include the Covid-19 injections as part of school immunization requirements using WAC 246-105."

I am strongly against these proposals!

As someone who has been injured by toxins used in medical procedures, and someone who has genes with blood clotting tendencies, I have some valid medical reasons to be concerned about my health declining or even dying if I were to get this vaccine. I also have concerns for my children getting this vaccine as they may have my genes.

I have several friends with medical conditions that would be harmed by getting this vaccine also.

This is not a one size fits all situation.

As an American citizen and a citizen of Washington state, I would like the freedom to choose if the vaccine is best for me and my family. Please stand for freedom and our right to choose!

Thank you again for your time!

Respectfully,  
Kady Land

To whom it may concern,  
I am writing in to let you know I am strongly opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The CDC data shows that although the vaccines may help reduce the overall severity of the virus in a vaccinated person it does not stop vaccinated people from spreading the virus.
2. There are health risks to taking any vaccine which is why there have always been provisions in schools and childcare facilities for children and parents to claim religious and/or medical exemption without any other approval necessary. This vaccine should be no different.
3. It's been almost 2yrs since the first Covid-19 case in WA State and many children already have natural immunity which delivers 13 times more protection against Covid-19 than any of the vaccines and that is according to a recent 2.5-million-person study from Israel.

The science shows that the Covid-19 shots are more like flu-shots with boosters needed every few months if not every year to provide any sort of protection. A flu shot has never been mandatory to attend schools or childcare institutions and neither should the covid shot.

Any legislation that would ban children from attending childcare or school without a covid shot would be a huge mistake and overreach of power.

Thank you,  
Travis

1.            Yes

---

Potential recipient of forced experimental chemical injection that could kill me

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

There has not been enough data compiled on the side effects of risky covid 19 chemical injections that alter RNA in children in particular. They are not at high risk of death or long term damage from covid 19 infections. Why risk permanent genetic damage in the under 50 group when not necessary?

11.

Are you Pro or Con on the proposal?

2. Con

---

Risky experimental covid 19 chemical genetics- altering injections are not necessary for citizens under 50 years old who are healthy. Data shows they are at VERY LOW RISK FOR COVID DEATHS.

P.S. Forgive my oversight in the salutation. This letter is meant for all the members of the board. Thank you.

On Thu, Jan 6, 2022 at 11:56 PM Shannon Gifford <sgiff122@gmail.com> <mailto:sgiff122@gmail.com> > wrote:

Dear Chair Grellner, Vice Chair Pendergrass, and

Regarding including Covid-19 to WAC 246-100 and adding Covid-19 vaccination to school immunization requirements in WAC 246-105.

I adjure you to REFRAIN from adding--or at the very least delay adding--Covid-19 vaccination requirements to our state code. The time period for testing the true "safety and efficacy" of these shots has not been sufficient. Requiring them --especially of our children-- is unconscionable.

We have plenty of reason as a state and nation to question the safety and efficacy even with the data we have so far.

On a personal note, I have three people very dear to me experiencing debilitating adverse effects after receiving COVID shots. One was required to take the shot in order to keep her job--and no exemption was allowed, though she sought one. She is experiencing ongoing migraine headaches. Another lost use of her dominant arm after the initial vaccination, followed by the loss of her dominant leg after receiving the booster shot. The third is experiencing ongoing fatigue and malaise.

I have two friends whose husbands have experienced permanently disabling adverse effects after receiving the shots.

None of these people has legal recourse to be reimbursed from the pharmaceutical companies for the damage done or the medical and hospital bills incurred.

Leaving the personal side of the story, these are NOT "rare" side effects as published by mainstream media.

More than half of the reports of adverse reactions to vaccines on VAERS (which has been in place since 1990) are now from COVID19 shots--whether Pfizer, Moderna, or J & J. Over 800,000 reports in ONE YEAR alone. Furthermore, thanks to Covid 19 vaccines, death reports after vaccination on VAERS have more than tripled. Again, in ONE YEAR. More information and discussion on the validity of these figures is available at [openvaers.com](https://openvaers.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C>>, or at the VAERS website.

I am sure you have noted that Washington state (as of 1/6/2022) has the third

highest incidence of active COVID-19 cases in the nation (569,666), AND that the current active cases represent more than half the number of total cases (919,040) (Source: Worldometer.com). So, even though our rate of vaccination has continued to rise, our cases are rising even more. In my own county the hospital is overwhelmed.

Why is this? What happened to the "safety and efficacy" of the vaccine?

Without being able to answer this question, or adequately address the formerly made points, there is NO WAY you (or our legislature) can with good faith make rules for the people of our state that include requiring COVID-19 vaccinations.

Please consider deeper study of prophylaxis and early treatments of COVID-19 that have already been shown safe for generations, and are even now in clinical trials showing efficacy as well.

Thank you for considering my comments. I lived with febrile seizures as a child and into young adulthood--what my family later learned was most likely an adverse reaction to a childhood vaccine. What health issues and effects are we inflicting on the children now being immunized for COVID-19? The cost of our hasty decisions made out of fear are yet to be fully realized.

Sincerely,  
Miss Shannon Gifford

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. It is not effective at stopping the student from spreading the disease. The Covid injection does not stop the child from transmitting the disease. It does not really protect the person medicated with mRNA concoction. It is not effective.
2. It is not effective at stopping contraction of the disease. The Covid injection does not stop the child from contracting the disease. It is not effective.
3. It is not approved for mandatory use in anyone by the FDA. The Covid injection is only Authorized for Emergency Use. You have no legal right to require the intake of this experimental drug. The alleged Covid medication/injection that was approved by the FDA is not even available in the United States, if anywhere. It is not legal to require submission to this medication.
4. The injection is demonstrably unsafe. There are no studies of the safety of this drug, long or short term. However, there are tens of thousands of adverse reactions and unexplained early injuries and deaths, in the VAERS database, due to heart and organ damage. When H1Ni vaccine had 59 adverse reaction, the vaccine was removed from the market. It is insane to push forward with this insistence by the current political administration on the Federal and State levels in light of the vast number of injuries and deaths proximate to the time of the infection. Many of the adverse reactions occur within the first two weeks. Therefore, CDC 'arbitrarily' decided that no adverse reactions occurring within two weeks of injection are 'deemed' by them to be unrelated to the injection. This is a ridiculous appeal to superstition and does not serve our children, or anyone else. It is not safe.
5. It is not necessary. Children have a recovery rate of better than 99.995. There are more child deaths per year from automobile accidents or pedestrians walking . If this recovery rate is too low to suit you, then we need to outlaw automobiles and walking, rather than adding this dangerous medical regimen to the child's risk load. It is unnecessary and unsafe.

Cordially,

Ron Hardy

Involuntary quarantine? Sounds a little holocaust-ish, don't you think ? I decide what goes into my body not you. When will you follow real science and honor natural antibodies which are better than any vaccine ?! Requiring Covid vaccines for school will reduce enrollment therefore funding. Is this really what our schools need? Let the parents decide. Again - honor natural antibodies - not a vaccine needing a booster every - what is it, five months now ? I, among many others, will dis-enroll my child from public school the moment you require Covid vaccines for a virus with nearly 100% survival rate. Stop running this state on fear. Start using logic and actual science - not science paid for by vaccine companies !

There is no reason for our children to have to be vaccinated against an virus that has an extremely low risk rate in children to begin with. Children are not the main demographic to get Covid and they are not spreading it as highly as other demographics. The vaccine is currently under emergency use authorization only and there is evidence that shows vaccinated personal are spreading the virus just as much if not more than the unvaccinated. They are more likely to spread the virus being vaccinated as they are more likely to be asymptomatic and that can cause a more serious threat to people with fragile health conditions. Please consider these points.

I am adamantly against the consideration of the proposed COVID-19 policies. I am most concerned about the vaccine for inclusion in chapter 246-105 WAC. These policies are immoral and over reaching. These vaccines offer only an opportunity for harm and no real opportunity for benefit in children. In analysis of the data on mortality you will find across every age group, an individual who took the vaccine, more prominently in the older age groups, was more likely to die after the vaccine than actually take your chances with COVID and ultimately die of COVID. These emergency measures have gone on too long in Washington. There is no longer an emergency. Omicron is a variant of the vaccinated. The vaccinated are out spreading the virus unknowingly. We must stop the madness. I ask you to please reconsider or risk not only losing more children out of the public sector but more children to the vaccine experiment. • Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

I am against the vaccine mandate for children in schools. Children have a 99% survival rate with Covid and we have no business forcing families to comply with this mandate. If a family wants to vaccinate their children I have no problem with their choice but families should have the opportunity to decide for themselves. Children are not at high risk and if they are then their parents should be able to make that choice for them. The vaccine doesn't prevent from getting the virus I personally know of many people who have been vaccinated and still contracted the virus. I'm also concerned if this does pass that schools will experiment a high number of children leaving the public school system are you prepared what that will do for funding and school system employees. Please do not pass this leave our kids alone.

Subject: OPPOSITION TO VACCINE REQUIREMENT IN WASHINGTON SCHOOLS

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am writing to take a stand against the possibility of mandating the COVID vaccine for schools in Washington State. Parents deserve a choice for medical decisions for their kids. This vaccine has more documented adverse reactions and deaths than any other vaccine in history. There are no long term studies so support the safety of this type of vaccine for our youth. If this mandate goes through and the vaccine is required for school entry, our four children will be pulled from the WA public school system. And many of our friends will do the same. From just our close circle, this would be losing 22 kids. Please continue to give families the right to choose what is best for their children! Thank you so much for taking input on this very important topic

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population.

Signed,  
Tracey Bertilson

2. Con

---

I believe it is unconstitutional to involve law enforcement to impart force on our personal or religious freedoms when it comes to taking an experimental vaccine. We as the American people should be able to choose what is right for our own bodies and our children's bodies under the constitution and the laws of our religions. I believe this is a gross over step and am prepared to oppose it until suggested laws as such are denied.

2. Con

---

Fauci stated the worst of Covid-19 Omicron should peak and trend downward by the end of January, but even more compelling is the statement by CDC Director Walensky saying, "What the vaccines can't do anymore is prevent transmission." Vaccines can reduce the severity of Covid-19 symptoms and reduce risk of hospitalization and death, especially in patients with co-morbidities. Children, however, are least at-risk for such symptoms. Vaccines are no guarantee against transmission. Flu viruses always mutate, and as such, no flu vaccine should ever be mandatory for children or adults, including Covid-19. Chicken pox, measles, mumps, rubella, and all the rest ~ they don't mutate. Their vaccines have years of statistics behind them and they do the job because the disease they target does not change. Covid-19 has already changed, and the vaccines do not adequately guard against transmission. Therefore, I am strongly against mandatory immunizations for children of all ages for any reason. It should be the explicit choice of the parent or child (when they are of age) to decide. And no one else. No child should be forced, coerced, lured, or baited into receiving a Covid-19 vaccine without parental consent, and no freedoms should be withheld for those who do not wish to receive vaccination. This proposal is treading on dangerous ground. I implore you to respect the rights of parents, as well as to listen to the science. The science shows the virus has already mutated away from the vaccines to the point where transmission occurs quite regularly among the vaccinated. The negative side effects for a small minority are still being revealed and will continue for some time; as such, it is still too early to safely mandate these vaccines. These children are our future. They will be caring for us in our golden years, and we need them to be strong and healthy. They have good, strong immune systems by and large. They will get the flu, their bodies will build natural immunity, and they will continue to grow and thrive. A small percentage of children and adults need medical care for Covid. Don't penalize the 97% for the 3% (and that's being generous).

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccine that was FDA approved is still not available in the United States. The distributed vaccine in Washington State is experimental medicine. Your citizenry and especially our children are not science projects.

There are a significant number of reported incidents of myocardia complications in young men and many more that are misdiagnosed by medical professionals who are ethically compromised, as a result of this vaccine. Putting our children's health at risk by vaccine is a short sighted ineffective solution to the pandemic. Particularly when you consider our population growth is already anemic.

Mandating the vaccine for children in order to attend school is a violation of equal opportunity statutes already in effect and puts parents in the untenable position of having to choose between being criminals to protect their Children's health, or unnecessarily risking their Children's health.

You cannot lawfully force me to vaccinate my child. All of the measures used to "flatten the curve" or "slow the spread" have not worked. Forcing quarantines and vaccinations is unlawful, a violation of privacy, doctor patient privilege and most importantly the RIGHTS I have as a parent to decide what is best for my child. Science does not support masks, quarantine, or these "vaccinations" If any of it worked we wouldn't be here TWO YEARS LATER.

I do not support mandated vaccines for children. The science says children are at low risk for transmitting Covid . There are no long term studies for Covid vaccines for children and the vaccine does not stop the spread of the disease . People who are vaccinated can and do transmit Covid and it is ineffective against the new variants delta and omicron.

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

Dear Washington State Board of Health,

Please watch this thorough review of Pfizer's 6 month data on the Covid 19 Inoculations before determining if these are safe and effective medical treatments for our young children. <https://www.canadiancovidcarealliance.org/media-resources/the-pfizer-inoculations-for-covid-19-more-harm-than-good-2/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/media-resources%2Fthe-pfizer-inoculations-for-covid-19-more-harm-than-good-2%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8bd913e324cd4fa8b49108d9d2176915%7C11d0e2>>

As a long time health care practitioner in Washington State, I urge you to review all the data when making decisions that potentially impact the health and wellness of our children. Public health policy should always include a thorough risk/benefit analysis. Even the CDC recognizes that the Covid hospitalization risk for children is about the same risk as the flu. Yet the long and short term safety of the Covid inoculation is unknown, especially for this age group. Even one child that dies due to this "preventive" treatment is too many.

At this time, tens of thousands of medical doctors in our country and around the world (including the creator of mRNA technology, Dr. Robert Malone) warn of the extreme dangers of this experimental medical treatment. It is not safe, responsible or legal to require the Covid-19 inoculation for children.

Thank you for your time and consideration,

Susan Adamson

The COVID vaccination should not be added to the list of required vaccinations for the following reasons: 1 - there is NO long term data to suggest that the vaccination won't cause harm later down the road. 2 - it does NOT stop individuals from contracting the virus nor from spreading the virus. 3 - all the same masking requirements, quarantine guidelines will still remain in place. 4 - the virus is constantly changing making the vaccination less effective on the newer strains. 5 - the younger population 5-11 is not adversely affected by the virus. 6 - the amount of people who will pull their children from the Public School system will be devastating to our young people.

Subject: NO to COVID vaccination Mandate for Children, NO isolation facility against people's will

External Email

Hi,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

In regards to the proposed policy to allow officers to force families to be isolated in a quarantine facility is against basic human rights. I cannot believe this proposed policy is even on the table to be discussed. We live in a democracy not a Nazi world nor a communist country. The government cannot force people to do things against their will, especially medical actions that are already been questioned.

Here are some examples and data of COVID Vaccination side effects and damages already been reported.

1. 382 Athlete Cardiac Arrests, Serious Issues, 222 Dead, After COVID Shot (until 12/27/2021)<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgoodsciencing.com%2F%2Fsuffer-cardiac-arrest-die-after-covid-shot%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cfbfb9514e83242599f3908d9d1999984%7C11d>

I want to thank you for all your efforts to keep everyone safe in our community. I know this pandemic has been hard on everyone. I am writing as a parent to plead with you not to mandate any Covid 19 vaccines for K-12 schools. Covid 19 vaccines are not a one size fits all. My son who is 15 had Covid 2x and had no symptoms either time. He has a blood clotting gene that causes blood clots. For him to take the Covid 19 vaccination its more of a risk to take the vaccine than not. It has already been proven that the survival rate for kids who get Covid are over 99% . They are the lowest at risk. their are so many side effects associated with this vaccination such as myocarditis in teenage boys. As a parent with his medical issues I know what's best for him. He is best off not taking the vaccine. I say this with no disrespect but the school board, the superintendent, the governor, and the Health department do not know what's best for my child with his medical issues. So once again this vaccine is not a one size fits all. Each parent should decide what's best for their child.

If this vaccine does get mandated for school aged kids are you willing to take the responsibility if the side effects reported to VAERS happen to our children? Are you willing to take the responsibility if any child dies as a result of this vaccine? I guarantee you that if anything happens to our children parents will tie you up in the court systems for life and make sure justice is served for their child if any thing happens as a result from the vaccine.

So in conclusion as a parent with my sons medical condition a vaccine would do more harm to him. I am begging you to please let vaccines be up to the parents .

Thank you Margo

I OPPOSE any and all agendas that would mandate any COVID vaccines for school requirements. (Agenda item 8)

And I support the petition to add the new rule that eua products cannot be mandated. (Agenda item 11)

I also OPPOSE any and all additions of COVID to the infectious disease WACs and I oppose any and all mandates of any kind (vaccines, masks, testing or otherwise)

Very Respectfully,

Sharifa Marker

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* It should be a parents choice/decision made with their doctor
- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

## 2. Con

---

Children are at an incredibly low risk of any serious issues with Covid 19. There is absolutely no reason to force a "vaccine" on them. The vaccines have not been thoroughly vetted, and the side effect risks far outweigh the benefits. This proposal is an assault on the American way of life and should be rejected.

Vaccine mandates are against the Constitution of the United States. We have been given the freedom of choice over our own bodies and the government does not have the right to take that from us. This is a choice which should be made by the parents of the children. Not the government and not the schools.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed,

Tina Champeaux

I am first of all concerned about the lack of public information shared about such extreme measures. I am second of all concerned that we think such extreme measures are necessary - what data points are being presented to support this suggestion? Third, bringing this into schools/our kids requires additional insight and thought and should not be lumped in with the extreme public measures being suggested above.

If you are concerned that you may have COVID-19 because you have symptoms, we recommend that you get tested right away.

If you are concerned that you have COVID-19 because you know you had an exposure to someone who tested positive for COVID-19, we recommend that you get tested between 5 – 7 days after exposure, regardless of vaccination status.

Testing is the only way to know for sure if you have COVID-19.

Interim Recommendations to Mitigate Health Care Worker Staffing Shortage During Pandemic

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3Dc3221d86f5%26e%3Dc>

In times of COVID-19 surge, health care facilities may experience health care personnel (HCP) shortages due to employee illness, exclusion from work due to higher-risk exposure, the need to care for ill family members, fear of illness, and burnout.

Maintaining appropriate staffing in health care facilities is essential to providing a safe work environment for HCP and safe patient care. This guidance is for COVID-19 contingency capacity staffing and crisis capacity staffing.

Care Connect Washington is a program for people who have either tested positive for COVID-19 or been exposed and need support to isolate or quarantine at home.

You are eligible for services once a case investigator or contact tracer calls you. They will ask you whether you have health or social needs that will prevent you from staying home during your period of isolation or quarantine. If you tell them you need help to stay home, you will be referred to a local care coordinator. Your care coordinator will contact you and work with you to develop a care plan to meet your needs during isolation or quarantine.

Inslee Announces Additional Resources for Omicron Variant

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsrhd.us11.list-manage.com%2Ftrack%2Fclick%3Fu%3Dfc782ce2ead2036a351c11e73%26id%3D6269c09d27%26e%3Dc3>

As Washington state is experiencing a dramatic rise in COVID cases due to the Omicron variant, Gov. Jay Inslee announced steps today to contain the spread. Inslee did not announce any rollbacks, restrictions or closures.

The governor's announcement had three main components:

- \* Expanded testing
- \* Increased vaccination availability
- \* Intention to have schools remain open

Up Your Mask Game: Omicron is Here

We are seeing a dramatic rise in COVID-19 cases due to the Omicron variant. That means, more of us will test positive, including some people who are vaccinated. The vaccines are doing their job of preventing severe illness, but we can expect more cases.

Because Omicron is so highly contagious, well-fitting and high-quality face masks are more important than ever. It's one of the most important tools we have right now to limit the spread.

A big fat NO on  
#9 the detaining of WA citizens of all ages;  
#11 mandatory vaccination of school age children

If these are passed I will withdraw my children from school at minimum. I have no problem selling my home and moving out of state as well. I will not support a state with my tax dollars who will not represent me as an individual.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

To whom it may concern:

We do Not support ANY vaccination mandates for school- aged children, in order for them to attend public school in Washington state. We especially do not support CoVid vaccination mandates for school-aged children! Children have so many struggles & barriers to their academic success already, why add to it? Not all parents are neglectful in their child's health care and it surely appears that the FDA & other entities have been neglectful in their approval of the Covid vaccine! Moreover, big Pharma does Not have our children's health as their priority, but are driven more by profits! The list of mandated vaccines for children in this state is ridiculous! They are not Guinea pigs for Big Pharma, but are the future of mankind! Please be respectful of the parent's right to make health care decisions for their children! NO VACCINATION mandates for children! Thanks for the opportunity to share our voice of reason!

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,  
Sarah Herrera

Hello!

I am writing concerning the upcoming State Board of Health meeting to discuss whether or not to mandate the Covid vaccine for school attendance in the 2022-2033 school year. I am deeply troubled about this and I want you to know that I vehemently oppose the vaccine for my child. I believe every person should have the right to choose for themselves and their children. I appreciate your time and I thank you for reading my email. I will be praying for each and every one of you in attendance at this upcoming meeting.

Sincerely,

Stacy Mares

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Please confirm this comment is submitted to all WSBOH members and included in the minutes for the meeting dated January 12, 2022. Thank you.

To Washington State Board of Health:

I am writing today in opposition to the measures you are considering to force involuntary quarantine, testing, exams, as well as experimental injections against the citizens of Washington State. These measures are grossly unconstitutional, unlawful, and immoral as outlined below. Moreover these 'vaccines' do not pass a reasonable benefit/cost analysis in terms of the risks they impose on all ages of the population. The longterm effects are virtually unknown. These measures are:

Unconstitutional- violating the constitutions of the United States including the Bill of Rights, particularly the 1st, 4th and 14th Amendments, as well as the Washington State constitution.

Unlawful-violating HIPAA, the Health Insurance Portability & Accountability Act, by requiring private health information in the form of vaccination certificates be publicly displayed to enter a restaurant and other public venues. No such certificates have ever been required for any other communicable diseases such as aids or small pox. They are NOT ALLOWED under the law.

Unlawful-violating the ADA act, which models the Civil Rights Act of 1964, discriminating against unvaccinated persons, those who choose not to have an experimental, untested mRNA injection forced into their bodies; an injection that forever interferes with their own Creator-designed immune system. Prior to Covid 19, no vaccines have ever been approved without up to 10 years of thorough testing and research. This vaccine was granted an "experimental, investigatory injection" status in less than a year, bypassing all safety standards applied to vaccine testing protocol. It is dangerous and untested. No one knows the longterm effects.

Immoral-violating all 10 of the Nuremberg Codes written & agreed upon in 1947 by all civilized nations, that no person shall ever again be forced to accept medical procedures (as perpetrated by the Nazis during WWII) without informed consent; INFORMED CONSENT without any duress, manipulation, coercion or force of any kind. These measures are nothing less than coercion. Each person has the inalienable right to choose what is

put into their own bodies.

Moreover, on the topic of safeguarding health and safety, there is mounting evidence worldwide that Covid-19 injections are the cause of a rising number of significant and alarming disease markers in post-vaccinated populations. These vaccines are proving to be more of an endangerment to human health than covid itself. Eminent doctors and scientists referenced above are urging an immediate halt to vaccine mandates. Why? It has now been proven these experimental vaccines:

1. Do not prevent infection or re-infection; do not prevent breakout cases as evidenced by the most highly vaccinated countries in the world recording the highest breakout rates (86% in Israel & 77% in Iceland) among fully vaccinated persons. Pharmaceutical companies are now dictating boosters are necessary to maintain effectiveness. Why? Because the vaccines have no real efficacy and their longterm effects are completely unknown. In fact Israel, is now considering 'herd immunity' as an alternate strategy to continuing rounds of vaccines against the Omicron variant.
2. Do not prevent transmission. Why do masks and social distancing continue to be required even after one is vaccinated multiple times?
3. Do not "Keep our communities safe" as so falsely prescribed in the media.
4. Dr Luc Montagnier, Nobel Laureate virologist, in his research has shown the vaccine itself is creating variants and will continue to do so.
5. Results from Dr. Ryan Cole's autopsies of vaccinated subjects show the spike protein (which was to remain at the injection site) is invading every organ system and crossing the blood-brain barrier. Micro-clots & inflammation occur throughout the body. The spike protein exhibits symptoms identical to Covid! Not only are we dealing with Covid but the vaccine itself is causing illness & producing serious side effects even death (see US gov't VAERS site).
6. The European Medicines Agency is reporting a rise in Multisystem Inflammatory Syndrome & cancer markers in vaccinated subjects. Evidence is mounting this is a dangerous untested injection & no one should be coerced to take it!

Unvaccinated persons are not the enemy! The unvaccinated and especially those who are asymptomatic are being targeted as a political scapegoat to keep people from seeing what is really going on. The vaccine itself is causing illness, creating variants & spreading the virus!

I urge you in every way possible to strike these extreme, reckless, unconstitutional, and immoral measures from the record; measures which unconscionably violate the inalienable rights of every citizen and business in Washington State.

Respectfully,

E. Renee Renninger

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

When the government takes control of how to protect one another as a citizen, especially away from their parents to make the right reasonable decision for a virus that has baseless claims of how dangerous it truly is; enforces it with the results of losing everything, while allowing GMO horrible food, pesticides to get away with everything is Not right! Especially coming from companies that have not ever been in the vaccination market ever before are now making billions off the hard working middle class people we are is disgusting! What happened to all the people who hate that Texas made abortions illegal? Where are all the folks at staying my body my choice? We have a higher risk of getting hurt by already what the vaccine mandate has become by people forced to quit or fired! Never allow fear doubt and your subconscious play tricks on you! As it should be the right decision to provide for your family is now your last option as well with the children going to school while the government uses our tax money to pay for and spend the money like let's use Paul's money to pay Sam? This is absolutely embarrassing more people in Washington state will and have overdosed on drugs than any young obviously healthy child could ever total! Remember masks don't work doctor Fauci, slow the spread, now look at other horribly run democratic states! California has vaccination cards to do anything? This is not the Seattle Washington I remember as a kid, oh wait I haven't visited that city in 3 years as I wouldn't even walk the streets with my kids. Stay hard! Don't fold under pressure! Stand up for your rights beliefs! 35 Navy seals won their case against the mandate and the United States Navy as will be the biggest embarrassment in history to deprive those heroes their duty's!

Subject: Public Comments for WSBOH Members on Proposal of Covid policies

External Email

Good evening Board Members,

This is my first time leaving a public comment on a board/council meeting. I was made aware today of proposals being set forth to involuntary detain individuals or group (families) of individuals and the forced vaccination of our school children. I am appalled and livid that any such proposal would be sent through for consideration and I would like to know the names or name of the individuals who brought this forward. This is an outrage! Is this Nazi Germany we are living in or the FREE United States of America?! This proposal should be stricken and never mentioned again. Also I am prepared to pull my child out of public school and leave this state if any such atrocities are bestowed upon our people. I work hard everyday to pay my taxes and be a outstanding member of this society, while criminals are allowed to roam free and cause havoc in our streets. I will not have my hard earned money go to support such nonsense. Also how do you think that's is going to work, trying to round up citizens and detain them? Are you not aware of our 2nd amendment rights? There are masses of legal gun owners out here. You will have an uprising like you have never seen! It would be smart of you to rethink these proposals and strike this down. Stop!

External Email

Hello, Ms. Schreiber,

I have a child in a middle school in Washington. I would like it to be made known that I am greatly concerned about the possibility of mandating that school-aged children be required to receive a COVID-19 shot in order to attend school.

First, as has been made abundantly clear, these COVID-19 shots have been completely ineffective in preventing the spread of the corona virus.

Second, the only available shots in the U.S. are those under experimental use authorization by the FDA. This means that there are no fully vetted vaccines for the COVID-19 virus available.

Third, there is evidence that these shots have created adverse reactions in many younger people who have received the inoculations. These adverse reactions, like myocarditis, cause irreparable damage to the heart of children which have these consequences.

Please do not approve any action which would mandate that school-aged children would be required to receive these COVID-19 shots. Doing so would, in my opinion, place the

Washington State Board of Health in a place of enmity with myself and other citizens of the State of Washington.

Thank you for your time in reading this message.

Sincerely,

Neil Berry

To Whom it may concern,  
Our family is completely against any of the proposed covid Policies that are over reaching and immoral. We stand against these proposed WAC's:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-

WAC 246-105

Have you looked at the VAERS Report? its on the CDC website. If you have, I am certain you wouldn't be pushing for this. The CDC has admitted that the tests are not accurate. There is no liability for the "vaccines". Making children take them will allow the "vaccine" companies to continue to not be liable. What a horrific agenda...using children to shield so the companies to continue to make money.

It may not seem that you will be held liable for pushing this agenda...but eventually all the truth will come out, and people will be held accountable for crimes against humanity, and they will be tried for going against the Nuremberg Code 1. It is atrocious that someone would even think its ok to force a medical procedure against another's will. The pharmacies won't even include information about the "vaccine" in their inserts. And really...75 years to share the details of the vax?!

Its atrocious that you would set up checkpoints. This is not only unconstitutional, it is immoral.

Please do not be an accomplice in this.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid.
- \* The vaccines are still only EUA (emergency use authorized).
- \* There are no long-term studies to document any history of safety.
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does notstop the spread of the disease!

Dear Tracy,

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

My family & I STRONGLY OPPOSE all of Inslee's & His Health Dept overarching and UNCONSTITUTIONAL proposals to forcefully take people from their homes due to a flu-like virus that has a 99.997% SURVIVAL RATE —(NO ONE IS DYING FROM OMICRON!!)

These proposals (WAC 246-100-070, WAC-246-100-045, WAC 246-100-040, WAC 246-100-105) are PURE EVILNESS & you all know it!!

WE THE PEOPLE OF WASHINGTON STATE WILL NOT ALLOW YOU TO FORCE ANYTHING INTO OUR BODIES OR OUR CHILDREN THAT WE HAVEN FREELY CHOSEN FOR OURSELVES. We also will not allow you to take people from their homes like the police states of Australia & Canada are doing!) Thank goodness for the 2nd amendment in America where we have arms to protect ourselves & each other from TYRANNICAL governments like Washington state INSLEE & our federal government!

We are actively ORGANIZING for peaceful protests against all of these proposal. Again we will be peaceful—but we will also protect ourselves from your evilness. You obviously have another agenda—THE GREAT RESET—but you will not win this battle. There are far more of us —MILLIONS OF US (& only a few thousand of you!) WAKING up more people EVERYDAY to the evil agenda that INSLEE & you are up to—you're definitely NOT SERVING US!

If you vote these laws in, you will force the people of Washington state to rise up against you. We will not allow you to forcefully make us do anything that go against our FREE constitutional rights!

Washington State Board of Health

I am completely against I am completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's!!!

We cannot allow our medical freedom to choose be stripped away from us. The most important thing it is, to be an American and a Washingtonian is freedom!!

Also please do not mandate vaccine on all of our children! This vaccine has not been studied long enough and we do not know the side effects! Not all children are the same, my children have had Covid and recovered very very well and quickly from it and now it's been over a year of natural immunity, and we've never done better. Children are at such low risk, taking the vaccine has a higher risk than just getting Covid! Please let parents make the best decision for their kids, the government should never ever implement any type of vaccine on children or adults for that matter. Please know I am not anti-VAX, my kids have every other deadly disease vaccine, this is just not one of them, we would ever consider for our children!

We are begging you please leave the children alone!!!!!!

Kindest regards, Valentina Koszorus

#### External Email

I am writing you as a VERY concerned Washington citizen. When I heard the Board of Health was disgusting WAC codes to use against law abiding citizens I thought there was no way this could be true, yet here we are!

I am curious how you will overcome these protections we have as law abiding and legal citizens of WA and the US.

1. Washington Constitution Article 1 Section 2- The Constitution of the US is supreme law, which means we have the protection of the Bill of Rights.
2. Washington Constitution Article 1 Section 3- No person shall be deprived of life, liberty or property without due process of the law.
3. Washington Constitution Article 1 Section 7 - No person shall be disturbed in his private affairs without the authority of the law (not health orders, but laws voted on by elected legislature)
4. Washington Constitution Article 1 Section 11 - RELIGIOUS FREEDOM! We have the right to refuse medical treatment due to religious conflict.

With those protections in mind, I urge you all to tread carefully here on what you are trying to implement. We have the protection and the right to refuse medical treatment, exams, tests, counseling, injections, and being unlawfully removed from our homes.

The confusion with covid is real. The CDC and all other medical agencies cannot get their stories straight. Now they say masks don't work. It is now being admitted the injections do not work to stop the infected person from getting nor stop them from spreading the infections. There are plenty of studies confirming these results. Even main stream media is admitting this as well, clearly you all see this as well.

It also should be noted that the injections, masks, and tests are not approved for Covid, you can find this easily on the FDA website. They were only given a EUA. Under the law we all have the right to refuse to participate in products that are EUA. The masks, tests and shots are all in the experimental stages and therefore everyone has the right to refuse them.

I strongly urge you to follow the protections we have with WA and US Constitutions before considering using our police in such an unlawful and unconstitutional way.

Maybe we could use our police to enforce the laws we have, making our cities safe again for our children to play without fear of being stuck by drug needles. How about letting our police focus on helping our communities feel safe again from home robberies, car break-ins, and violent crimes. There are so many more pressing issues that police can be focused on than trying to force law abiding citizens into unconstitutional mandates.

My husband served in the USAF, he promised to protect this country from ALL enemies foreign and domestic, and did so willingly and proudly. These actions you are considering go against the very freedoms he fought for and laid his life on the line for.

Medical decisions should be left up to the individuals, and it should be left to parents to decide for their children. So I urge you to do what is right and protected under our WA and US Constitution and protect the citizens of Washington state from this blatant overreach.

Sincerely,

Shannon Brackett

Subject: WAC 246-100-045, WAC 246-105

External Email

Hello,  
I am a practicing chiropractor in Vancouver, Clark county, WA.

Regarding this piece of agenda, WAC 246-100-045 and WAC 246-105, both vaccine requirements for children in schools as well as law enforcement becoming involved with the detaining of individuals not following certain guidelines:

The phrase "Voluntarily complying with requests by the health department" should be first analyzed by scrutinizing what requests are being made. COVID-19 is an evolving problem and on the whole, WA has masked up and vaxxed up as requested by Gov. Inslee and President Biden, as well as Dr. Fauci, and frequent handwashing and sanitary practices have been place in our local community businesses, etc., and we have adapted to a new normal.

Washingtonians have stepped up to the challenge, and future government intervention with regards to enforcement is counterproductive. Epidemiological concerns about the spread of the disease should be left to the scientists alone, including the doctors, And the potential for our citizens to be involuntarily quarantined out of prevention or an excess of caution, or disobeying "guidelines" or mandates is unacceptable. Our law-enforcement should be left for greater domestic and foreign threats than COVID-19. Our health department officials need to think scientifically, not overreaching that scope by enforcing COVID vaccines as a requirement and limiting citizens' access to schools or their lifestyles by through some sort of individual or family lockdown or quarantine, as part of an emergency order.

In conclusion,  
I will emphasize my sense of pride in our ability, as Americans and Washingtonians, to follow good health guideline recommendations for social distancing, handwashing and mask wearing, but enforcement or detainment with regards to the COVID-19 vaccine is an over-step of the government, even as we currently face the Omicron variant challenge.

Thanks for representing the people and providing an open forum format for January 12th, and I hope all opinions and health enforcement options are left on the table without any quick legislative actions.

Sincerely,  
Taylor Cox DC

2. Con

---

I am submitting my firm conviction that Covid-19 shots should absolutely NOT be a requirement for our children to attend school or childcare in Washington State or anywhere else. Children are at extremely low risk for Covid. In fact, any children I know of who have had it have not had more than cold symptoms, if even that. The numbers are ridiculously low; in fact, more children suffer from vaccine ADVERSE EFFECTS than they do from the SARS Cov-2 virus itself! These shots are still only EUA (emergency use authorized); the ones supposedly "approved" (Comirnty) are even not available in the U.S., so mandating their use or coercing and intimidating people into taking them is entirely ILLEGAL and downright UNETHICAL.

---

I would like to have the board consider that children are at extremely low risk for COVID and that the vaccines are still only emergency use authorization. There should not be a mandate in place that is forcing Parents and Children to choose between a valued education and a vaccine. Vaccine's should be pro-choice, not a mandate against their

will. The COVID vaccine has not been on the market long enough to know what the long - term side effects are going to be. We teach our Children that their bodies are their own, and that no one should be able make a choice for them. With this being mandated we are taking away their right to say no without feeling a negative repercussion because of a choice.

Ladies and Gentlemen,

In regards to the January 12, 2022 meeting. At this time, in my view, a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105.

Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers."

The facts are the current COVID vaccines do not prevent catching the disease, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely to be a pre-treatment for the disease that generally reduces the severity.

Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases of the -030 currently listed diseases is so small as to be negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines is significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease. Compare and contrast COVID to one of the listed diseases with an actually effective vaccine - Mumps. According to the CDC, there were only 139 cases in 2021.

Considering that the best available evidence as of this writing indicates that on average children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them. Compare to the current policy for seasonal flu: Flu is an equal, if not a greater risk to children (and never mind the ability of children to spread seasonal flu to adults) AND the seasonal flu vaccine risk profile is well known and low, yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That would be illogical and would indicate other non-fact based motivations for such a mandate.

I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030.

Subject: Student Covid Vaccinations

Madams and Sirs,

I am writing as a concerned parent about the vaccination mandate for students that is on your agenda soon. I strongly feel this should NOT be required for enrolment.

1. There is so little long term data for this type of vaccine, esp its reproductive effects on children.
- 2.

Its their body not the governments to handle

- 3.

Parents have ultimate say in what they feel is right for a child and courts have upheld that.

- 4.

The current levels of people testing positive for CV19 after vaccination is clearly showing the vaccines are not protecting as we hoped.

- 5.

Soon a modified killed vaccine will be available to teh market. A tried and test type of system with proven sucess fighting various other diseases.

Please leave this decision private like any other medical issue.

Regards;

- 1.

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time!

Hi Tracy,

I want to express my opinion for your upcoming board meeting...

I think the most important thing is for people to have a choice about their own body and health. I think children should not be forced to be vaccinated .. their bodies are healthy with a great immune system that with proper food and care will protect them.

I had my boss die last year after taking the second shot of the Pfizer vaccine, my friend in the office got Bell's Palsy after her first vaccine shot and my other friend's son wife who was pregnant got a miscarriage right after the shot ... so I think with so many people having side effect and dying ... you as the health care department should absolutely not force people to get this vaccine and give people a choice of what each person wants to do.. the risk and consequences of this experimental drug are way too big to enforce it on people.

Why does being healthy not mean anything anymore.. having a healthy body with a good immune system should be the greatest thing. I'm from Switzerland originally and over there people who have had Covid and have anti-body .. that is good enough to live life and not have to get the vaccine. Why can we not do this hear. The healthy people should not be forced to be vaccinated.

So I would like that you

1. OPPOSE Agenda # 8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for children of ANY age
2. SUPPORT AGENDA # 11, Informed Choice Washington's Petition for Rulemaking -- this is item 11 on the agenda! This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Alice Bossart

External Email

Hello

I am writing to express concern about the proposed policies surrounding WAC 246-100-070, WAC 246-100-045, WAC 246-100-040 and WAC 246-105.

According to the Nuremberg Code, there are 10 basic principles that must be met when it comes to medical treatment. The very first point addresses voluntary consent being absolutely essential without the intervention of force, fraud, deceit, duress etc. Article 6 Section 1 and 3 states that any preventative, diagnostic and therapeutic medical intervention should only be carried out with the free informed consent of the person concerned and in no case shall a collective community agreement or consent of a community leader or other authority substitute for the informed consent of an individual.

Your proposed policies stand in direct opposition of the Nuremberg Code, which for over a half a century, has been the foundation and basis for medical ethics in our country.

The Covid19 vaccine does not allow for informed consent. Currently, the FDA and Pfizer are attempting to keep the vaccine side effect data secret for decades – all while shielded from liability for any injury received from the vaccine. Its interesting that a vaccine that the FDA approved in a little over 3 months needs to release data over a 55 year period. Why? I would say that does not support informed consent. Any parent wants to be able to weigh the risk of disease vs risk of vaccine injury prior to choosing that particular medical intervention for their child. In addition, the vaccine does not stop spread of infection. It is like a flu shot – perhaps your symptoms might be less severe, but flu shots aren't mandatory.

Please re-think your proposed policies and allow the citizens of Washington to make these important choices that directly impact their life.

Thank you,

Suzanne Kelly

Subject: My Public Comments (January 12th, 2022 Board of Health Public Meeting)

External Email

Dear Board of Health Members,

Re: Agenda Item 6

I oppose the inclusion of COVID-19 into WAC 246-100 level codes. I believe it is inappropriate to include COVID into WAC 246-100, WAC 246-101, WAC 246-105, WAC 246-110, or any new title under WAC 246.

I believe to do so at this time and with current conditions of public health, public discourse, and viral mutations is simply inappropriate and emblematic of the political contagion "do somethingitis" with no beneficial outcomes for the public. I will now address why I believe it is inappropriate to include COVID-19 into each of the above listed WAC 246 sections.

WAC 246-100 Communicable and certain other diseases.

WAC 246-100-036 – Given the social vitriol directed at the great and evil unvaccinated, any attempt to add COVID-19 to this section would need to be at least as privacy conscious as provisions for HIV, particularly given the implications of non-vaccination status being a statistical indicator for other diseases (which would give away other sensitive medical information) or for religious/personal beliefs that would single out populations for abuse. Improperly handled, inclusion in this section, particularly under (3) and (4), could easily lead to segregation analogous to forcing a yellow star be worn.

WAC 246-100-040 – Subsection (1) of this statute is already worded in such a way as to be a threat to civil liberties. It gives the health officer sole executive authority to effectively imprison people without due process. The period may theoretically be limited to 10 days under subsection (3)(a), however subsection (5) opens the window on longer detentions. More egregiously, there is no provision for preventing the health officer from simply repeatedly exercising their authority under subsection (1) to abuse individuals. The provision for the detainees to petition the courts is laughable when the realities of the timing needed to retain a lawyer, write the petition, and schedule bench time are considered. WAC 246-100-055 requires court action within 48 hours of receipt and scheduling a hearing as soon as practicable. Any bets on how long it would take to get such a hearing? A zealot health officer would flood the courts so effectively no judicial relief was possible. I would be skeptical of whether even one with lawyers on retainer and documents prepared could actually effectively seek judicial relief under realistic conditions.

Adding COVID-19 provisions under WAC 246-100-040 in today's socio-political climate is begging to make the state's health apparatus into a gestapo. After all, haven't current vaccination efforts already amounted to "Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with request for ... vaccination ..." under subsection (1)(a)? More infuriatingly, in the hands of the zealous, (1)(c) could easily be weaponized in light of Omicron's high level of infectiousness, to justify detaining anyone thought to be COVID-19 positive. When testing lags, and false positives are considered, this opens the door for many to be quarantined after their illness has run its course, or having never gotten sick. Don't even start on the potential for selective implementation of quarantine or biases in populations. Want to take bets on the damage to social cohesion when group X people are disproportionately quarantined or exhibit behavior without consequence that gets other groups quarantined?

I would also note that given Omicron's infectiousness, rate of spread, and severity, that changes to WAC 246-100-040 are simply too late to be meaningful, except for opening the door on abuse. What is the quickest such changes could realistically be written up, reviewed, and enacted?

WAC 246-100-045 – Misuse of quarantine powers will cause armed conflict. There is no longer sufficient trust in the system at large to use the powers outlined in this section and not trigger shootouts. The principle of "Do not get on the train" makes any attempt to use these powers dangerous before COVID-19. Adding COVID-19 to this section is unnecessarily inflammatory and will be interpreted as a precursor to a purge. A simple review of Australia's (quarantine/concentration) camps considered in light of the number of armed Americans should give the board pause. There are dumber things to do, but not many. Changes to subsections (8) and (9) are particularly likely to cause violence. There have been sufficiently vociferous idiots out in the public sphere arguing for forced vaccination that changes to section (9) to allow for forced vaccination will lead to violence. Not may, not might, WILL.

WAC 246-186 – Changes to this section to tighten things up for COVID-19 run the danger of serving as stepping stones to a police state. The Holocaust in Germany, numerous purges and de facto genocides in the USSR (Cossacks and the Holodomor for example), and other genocidal actions were built upon laws put in place years before the events. It's also part of how slavery was maintained and how freed slaves were suppressed in the south after the civil war. For example, Nazis began purging non-Aryans from public service in the Law for the Restoration of the Professional Civil Service (April 7, 1933). Numerous laws followed restricting non-Aryans from professions such as doctor, lawyer, and so on into 1939. Extremely careful thought is needed before the board does anything to codify the exclusion of the unvaccinated from society and government. It very rarely has an outcome other than death or suppression. In fact, I would love to hear from the board if they know of one instance where such laws didn't multiply and culminate in genocide or wide spread suppression.

New WAC 246-100-XXX section – Given the specificity for other diseases such as HIV, Tuberculosis, rabies, and Psittacosis, I don't see how the BoH could possibly codify laws on COVID-19 without compiling databases on the entire population of the state and

intruding into numerous aspects of the population's lives. The other codified diseases have clear and definite point sources where the diseases can be controlled and infections can be tracked back to. With endemic community spread of COVID-19 and the especially rapid and widespread nature of Omicron, no such relationships and control are possible without introducing police state powers. I doubt that even militant police state powers would actually control the spread of Omicron, but it would look like the state was trying and display one of the symptoms of "do somethingitis". Will you require a COVID passport to do business? Maybe crib a little from the Bible and borrow from Revelations Chapter 13 "And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name."

#### WAC 246-101 Notifiable Conditions

As a general rule, I see no problem in adding COVID-19 to the list of conditions in WAC 246-101-101 (2) of the version that will take effect on Jan. 31st, 2022. It is how this data will be used that will cause problems. Will case numbers be used without context of hospitalizations and deaths be used to drive more hysteria and fear mongering? Or, will the data be used to target public health measures where they will do the most good? So far I have little confidence in this body, the state government, or the state as a whole to exercise any measure of wisdom in this regard.

#### WAC 246-105 Immunization of Child Care and School Children against Certain Vaccine-Preventable Diseases

The BoH has absolutely no business adding COVID-19 to this section. None whatsoever. COVID-19 in general, and Omicron specifically, have so little effect on children it beggars belief that so called professionals would weigh the current long term unknowns of the vaccine(s) against infection by a disease that has so little effect on children (also unknown, but vaccination is certain, infection is only likely). The flu is more dangerous to children and yet we have never mandated the flu shot for children. This is also another case where, by the time it is put into effect, Omicron will have already run its course and effectively given everyone natural immunity.

#### WAC 246-110 Contagious Disease – School Districts and Childcare Centers

With the prevalence of asymptomatic cases, what could you plan to actually legislate here? Continuous testing of asymptomatic kids is going to cause more stress and mental harm to the kids than the disease itself. Constantly sending schools into lockdowns and remote learning on the predictable knee jerk basis when cases are detected is also more damaging to the kids than the disease. The best "solution" I can think of is to have schools of sufficient size set aside classrooms for higher testing/cleaning standards to teach students with comorbidities and suppressed immune systems. Make it an opt-in program for students/parents and schools.

Sincerely,

Jon

---

I oppose covid quarantine camps, this is equivalent to concentration camps. Forcing people into a camp against their will is unconstitutional and immoral. This virus has a less than 1% mortality rate, the sold called "vaccine" does not prevent the spread and it was never designed to prevent infection or spread. The "vaccine" does not work, masks do not work, if they did, we would have seen a change by now. This is a gross over reach of power on the part of the state and I highly oppose this proposal, it's disgusting. The government has absolutely no business in demanding children be vaccinated. Children pose no threat to society from this virus. I am not anti vaccine, I am anti mandate and the government trying to strip away my autonomy and that of my children and those I love. Making a decision to get vaccines is 100% that of the individual, based on religious reasons, health history and more. Vaccines are not a one size fits all. This poison which is what it really is, is causing irreparable damage. Myocarditis, blood clots, neurological disorders, etc. These problems can not be undone, peoples lives are forever changed, how could we do that our children? Our job is to protect them and I whole heartedly believe only harm will come from this. There is direct reported evidence of the dangerous side effects from this shot, never in the history of vaccines have there been so many. It was rushed to market and the true safety of this thing will not be known for at least 75 years! The government does not own me or my children, they own no one and have zero right to make decisions for my health or that of my children or any child or person. I highly oppose this proposal based on moral, scientific and legal basis.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Covid-19 is manageable when effective treatment is started early and it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated. Some have even received booster shots. Being fully vaccinated will require regular booster shots because it has been determined that the shots only last a limited time and, even then, they are not very effective. The vaccine does not prevent one from getting Covid-19.

Including Covid vaccines as a requirement for attending public school is both unnecessary and criminal. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health. Rather, it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Please vote NO!

Sincerely,

Vicki S. Wantland  
5012 Kingsway  
Anacortes, WA 98221

Subject: Agenda Items 9 and 11 for the Meeting on 1/12/22

External Email

To the Washington State Board of Health, employees, and associates and TAP,

I strongly oppose making COVID-19 shots mandatory for school admission or childcare in our State of Washington for the following reasons:

\*

Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

\*

Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

\*

Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

\*

Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether COVID-19 vaccines assist herd immunity.

Furthermore, I strongly oppose all WACs pertaining to forced and/ or involuntary isolation and quarantine facilities in our State of Washington for the following reasons:

\*

They are in violation of our Federal Constitution.

\*

They are in violation of our State Constitution.

\*

excess. To extend these WACs is to rubber-stamp the Governor's unconstitutional

Sincerely,  
Washington State Citizen,  
Rebecca Jolly

I and many families that I know are against their brindle a Covid 19 mandate to allow our children to goto school. Theirs no physical evidence showing that this vaccine is in fact safe. And many many people that are vaccinated are still developing covid. I believe that this vaccine needed to be on the market for much longer to see the true side effects before pushing it on families.

Thank you,  
Tyleen

My 3 daughters who are not vaccinated had covid over Thanksgiving break. I also had covid and I am vaccinated. My children had cold symptoms for 2 days and then where completely fine. I had severe symptoms for close to two weeks. The vaccine did nothing to prevent or lessen my symptoms. However my un vaccinated children where practically normal. Along with myself my sisters family and a friends family, 16 of us in total 10 being children un vaccinated and 6 being adults 5 are vaccinated. One child didn't get covid. One had no symptoms. Three had symptoms for under 48 hours. Four had symptoms for under 72 hours. Out of six adults one vaccinated didn't get covid. The other four all had the same symptoms for around two weeks.

10.

2. Con

---

The Covid 19 vaccine should not be mandatory for children. Looking at facts and statistics children are less likely to get or have serious complications from getting covid. They have milder symptoms if they do get covid. Also this did not meet the requirements to be added, as the covid vaccine does not stop or prevent the spread of covid and there is no evidence that it gives any immunities for covid 19 after a person is vaccinated. The health problems that have been linked to children after getting the vaccine is something else that should be considered. I ask that you reconsider adding the covid vaccine to the list of mandatory vaccine. Thank you

>  
> ☐ To whom it may concern:  
> I would like to go record as a registered WA voter to say that I am adamantly opposed to vaccine mandates for children to attend school. In fact, I am opposed to any vaccine mandate, as people should have the freedom to choose what to put in their body. I say this as a vaccinated adult who is not anti vax or opposed to vaccines in general. However, with children, who have an extremely low chance of becoming seriously ill with Covid, and with new, emerging information and evidence, have a low chance of spreading the omicron variant, this becomes even more important as males between 12 and 17 have a higher chance of being hospitalized from myocarditis from the vaccine than from any reason from Covid. I feel so strongly about this that I will pull my children from public schools if a mandate is imposed.

Subject: OPPOSE Mandatory COVID 19 shots

External Email

I am strongly opposed to making COVID-19 injections mandatory for school admission or childcare for the following reasons. I urge you to vote NO and reject this proposal.

The state has no right to interfere in the personal health decisions of parents for their children. Our children do not belong to the state and you have no right to dictate what they must put into their bodies in order to attend school which is a human right. It is plainly obvious that the current shots are neither safe nor effective. They do not work to stop the spread of covid or any of the variants as we can all plainly see now.

The current shots are still under the EUA, as the only shot with FDA approval is not available in the US and won't be for several years. The CDC's Vaccine Adverse Event Reporting System has documentation that children have been permanently injured and killed from the Covid shot. Children are not at risk of COVID and have over a 99% chance of surviving so the risks of the experimental vaccine dramatically outweigh any possible benefit. Furthermore we do not know the long term health consequences of these experimental vaccines for children. Is the state going to be responsible for children harmed or killed by these vaccines should this mandate be forced on Washington's children? It would be grossly irresponsible to mandate a vaccine under these conditions. VARES data shows that more people have died from the Covid vaccine than from all other vaccines combined.

Please vote NO on mandatory vaccines.

Sincerely,

Jo Bogner

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. There are no long-term studies to document any history of safety
5. Studies do now document that vaccinated and unvaccinated can both transmit COVID, therefore,
6. The vaccine apparently does not stop the spread of the disease

Best Regards,

Dear Washington State Board of Health I do not support the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Covid 19 is manageable if treatment is started early, and 99% of the population survives the virus, many without treatment. Covid vaccines have little effect on Covid, and there is no notable difference in contracting and spreading Covid between those who are vaccinated and those who are not. Therefore, it is unreasonable that Americans should be forced to be vaccinated or that boosters should be required. Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. It is irresponsible to put children at risk in this way. Parents will bear the consequences, and therefore should have the choice. In the United States health officers do not have the authority to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them. Given the facts above, it is hard to believe the mandates and vaccines are about health. Instead it appears to be a gross over-step by government into the health decisions of Washingtonians. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them. Respectfully, Elizabeth Lambert

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Please reconsider forcing the Covid Vaccine on our children or anyone else. The Vaers reports are conclusive, this is harming our populace and will be especially devastating to our vulnerable children, too many deaths and damaged people for any of us to be comfortable with. With the rise in the variants, it is proving to be not only ineffective but instrumental in creating the variants. Many, many well renowned Doctors and researchers are speaking of the damages this causes. We are a free people of Washington state, do not infringe on our rights granted in our constitution by forcing this on anyone, we have a right to our own choice as to what to put into our bodies.

Subject: January 12th Meeting

External Email

Ms. Pskowski@sboh.wa.gov <mailto:Pskowski@sboh.wa.gov>

I'm writing about my serious concerns regarding the Covid related policies which will be discussed at your January 12th meeting. I adamantly oppose involuntarily detaining an individual based solely on their Covid related medical decisions and compliance. The dominant variant Omicron is much milder, so these current proposed policies surrounding Covid bewilder me. Choosing not to take a vaccine, covid test, medical examination, or quarantine should not be considered a misdemeanor requiring law enforcement to get involved. These decisions should all be voluntary.

The Covid vaccines are proposed as the primary solution for our society, however they have been shown to be ineffective after just a few months. Washington State has a large percentage of vaccinated people and yet we still have many cases. Why is that? It is not just the unvaccinated spreading Covid. People who have taken the vaccine are also able to continue to transmit the disease to others. There are many documented Covid breakthrough cases (some high profile cases). This occurs even after people have taken both initial vaccines and the booster.

We actually do not even have any current FDA approved vaccinations for Covid being offered to the public. The Pfizer vaccine that is available on the market is not FDA approved. The FDA approved Corminaty, and for some reason people are actually still getting the Pfizer EUA injection. Does that explain why there are so many thousands of adverse effects from the Covid vaccines shown on the VAERS website at the CDC? I'm not against vaccinations in general. These Covid vaccinations need to be tested further and the public needs to be informed about the adverse reactions. There should be no mandates or coercion for any vaccinations and especially for a vaccination that has not even completed clinical trials. This brings me to my other serious concern. I think it is dangerous to mandate Covid Vaccines for school children in public and private schools. Parents need to be able to weigh the risks for each child and be free to make the decision that is best for them. Kids are at low risk for Covid but are at risk for a variety of adverse reactions.

All Covid related medical decisions need to be made with informed consent not coercion. As an American citizen we are allowed that right. I hope those of you making these important policy decisions will carefully consider the negative impact these policies will have to the community.

Sincerely,

Wendy Butzerin

In terms of making vaccines mandatory for school children, it should always be the parents choice in this matter. It always has been. The research presented by the creator of MRNA, Dr. Robert Malone, has said that the Covid vaccine is not necessary for children. Many children are experiencing health issues associated with the vaccine. Again, it should not be a requirement to attend school, it should be a choice.

Thank you for your time,

Wanted to express my disgust with even the THOUGHT of this proposition. These vaccines were meant to be VOLUNTARY from the start. Now, not only have they been FORCED on the majority of adults, you are trying to FORCE them on CHILDREN!!! The risks of this vaccine to children FAR outweigh the severity of the virus. They are no more at risk with this virus than the common flu. This is NOT smallpox, measles, polio, etc., that had a much higher risk of harm.

You might also want to think about how much money your schools are going to lose, because I GUARANTEE there will be a mass exodus from the public school system if this is implemented!

Thank you for your time,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There are more children with adverse reactions than have died from this virus. For some reason no one wants to hear of all the people with disabilities or medical conditions caused by this vaccine and when reported to VAERS the best you will get in response is a recorded message. Ultimately the drug companies with the compliance of our federal, state and local governments are, under the guise of keeping us healthy trying to cause us disease, disabilities or death in order to work, educate ourselves or conduct our lives appropriately.

This virus has mutated to a common cold and has proven in other countries to run its course with no more death. This is an endemic at this point no longer a pandemic this is nothing but power play and mandates are no longer necessary.

If you actually care about humanity contact me I can show you testimony after testimony of very sad adverse events due to this mandate and if forced on our children you will have a population of very sick people.

Dear Tracy Schreiber,

Please do not create a police state with requirements or even allowances for law-enforced quarantining, isolation, medical exams, treatments, or vaccinations in regard to Covid-19.

There are still no long term studies to show Covid vaccines are safe. Let people decide whether to vaccinate for themselves.

Furthermore, the vaccines clearly aren't working to prevent disease and the idea that one's infection is less severe is dubious at best- afterall, how can one know how severe it would have been had they been unvaccinated? And that, especially when so many unvaccinated have such non-severe infections.

Please do not take away parental freedom for healthcare decisions for children. This should be a personal decision for each parent. And children are at very low risk of developing severe Covid.

The vaccine does not stop the spread of this disease as studies show both the vaccinated

and unvaccinated are spreading it.

Finally, I find it shocking, unscientific and discriminatory that provision for those who have natural immunity never seems to be considered. If any new rules are made, PLEASE address natural immunity.

Sincerely,

Rebecca L Hageman. RN

I always oppose tyranny and support the right of the individual to make choices about their own bodies. The government allows abortion and even pays for them because of the rights of a woman over her own body to get rid of a baby. Now suddenly those same rights do not extend to children or to the parents of those children to decide what's good for them.

---

Washington Students need to be in school in person. Discrimination against unvaccinated students and not allowing them in person instruction is unscientific, biased against lower income and minority populations, and will serve to undermine an already stressed subset of young children. Because of the Pandemic and the stress of the last 2 years each student in our state already bears an ACE (Adverse Childhood Event) that will contribute to health issues for the rest of their life. While many parents and students will choose the vaccine as the best option, and we can rejoice that they have that choice, we must also allow those students who feel the risk of the vaccine is too high for them to opt out while more data comes in. If there was some scientific backbone to a vaccine mandate in which it contributed to the stop of spread of infection or actually prevented infection, there might be room for discussion. However, scientific studies during the Delta wave proved viral load is the same for those who test positive in vaccinated and unvaccinated populations and the spread occurs at the same rate among both populations ([https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)). It is time to stop with political power play that makes our children the pawns of state actors and take back the educational goals our kids deserve. While the 3 vaccinations (Moderna, Pfizer, and J and J) approved for emergency use in the US to prevent severe disease and death from Covid have proved to be essential life saving tools for at risk populations, their use cannot classify under a one size fits all category. Each group and subset in our populations falls into a different risk stratification for severity of Covid disease and it is incumbent upon every individual to understand their own risk and decide with their health care provider what is the best plan for them. Given that Covid disease is 1000 times more deadly and dangerous for the elderly population than for the adolescent population, risk assessment is essential to understand which has a higher risk. Does a 16 year old prior infected male have a greater chance of myocarditis from vaccination than from a second exposure to the disease? As we all know, the vaccine has not been effective in stopping transmission nor infection, (as grateful as we are that it truly has saved many lives and lessened severity in many.) Our family personally knows of 3 teen boys who developed myocarditis after the second Pfizer vaccine (diagnosed by a cardiologist). This was when CDC claimed there were only 300 cases in the US- underreporting of Adverse Events is potentially 10 fold. With vaccines only being approved for Emergency Use and not full FDA approval, our children are being subjected to mandates where there is no one really responsible if they do indeed have an adverse event. While these remain hopefully rare, we must be reminded that severe outcome for adolescents is also rare. Less than 1.2 percent of those infected end up hospitalized and less than .002 percent have died during the pandemic. The risk from influenza is greater in this population for mortality than Covid and it would behoove officials to discuss whether they would mandate an influenza vaccination mandate before they start on a new vaccine that has been administer to children for less than a year. What is the end goal with this for children? Please review the article below from Vinay Prasad MD, MPH. <https://vinayprasadmph.substack.com/p/risk-of-hospitalization-severe-disease>

Subject: January 2022 Board Meeting SBOH COVID-19 vaccine for inclusion in chapter 246-105 WAC

External Email

To Whom it May concern,

With the latest topic being discussed as to whether there should be a vaccine requirement for Covid in Washington State public schools, it is my duty to voice what is the right thing to do in this situation. It is truly scary what has happened in our world recently. Politics aside, this is not about health or the safety of our kids or teachers. The science and data coming from the US and other countries do not support the hysteric push to mandate a vaccine for school aged kids. I am the aunt of 3 kids who are all in the WA public school system. All 3 of which will be pulled from school if Covid vaccination is required. I am not an anti vax person and believe some are absolutely necessary and pertinent to our society, however as previously mentioned, the studies done with these recent vaccines are a completely different story. While I do not have my own kids yet, I know that in the future, I will not be sending them to public schools in WA if this becomes a mandate.

When the FDA approved the COVID-19 vaccinations back in October for ages 5 -11 it was stated that their approval was not intended for mandate use. Just like when they approved the covid vaccine for adults, it was stated that it would not be mandated, which has come very far now with mandates in almost all sectors other than private business. This vaccination approval was intended to be optional and was to allow the parents to decide what is best for their child. If it becomes a mandate or requirement, the child's medical choice is no longer with the parent but is now made by the Washington State Public Education System. Public school should be available to all children, regardless of their COVID-19 vaccination status, because not only does the data not prove a need for COVID vaccination for children but the data also proves that you can still contract and transmit the virus even when vaccinated.

As a future parent, a friend to many parents with school aged children, an aunt with wonderful nieces and nephews, please understand what rippling effects this will have for our kids' future. Not being able to make medical choices for our children to receive education is frightening and a slippery road to embark on. Please make the right choice and leave it with the parents to decide whether or not they want their kids to have the COVID-19 Vaccine.

Respectfully,

Whitney S.

Anyone ignoring the facts, evidence and data is blind... These Genetic therapy (Vax) inoculations are harmful to children and adults. Look at the VARS data - Vaccine Adverse Reaction Reporting System. Over 21,000 Vax induced deaths? What in the world are you proposing here? Have we lost our collective minds? Expect to loose a large number of students that will be promptly pulled from the public school system if these mandates are enacted, perhaps 30% of total public school population statewide? What does that do to your Federal Funding? Not to mention a flurry of law suits filed by parents. These mandates are in violation of multiple US Code sections. Stop the madness!

Kids are not being affected by COVID-19 and should not be subject to an experimental shot. Many are dying and have severe adverse reactions that are going unreported and simply ignored. Subjecting our children to this is INSANITY. The shot doesn't even work. 65% of hospitalizations are among the "vaccinated". And check out the definition of "vaccinated". That makes the 65% number even larger. Think about what you are trying to do to us. Open your eyes and see it for what it really is. Don't buy into the fear. Please.

I've seen the CDC data concerning Covid-19 and compared it to deaths from other causes. This is not the big threat that is being narrated to the public. The so called vaccine does not stop the spread of the virus,so getting vaccinated doesn't protect anyone else, and not getting vaccinated doesn't put the vaccinated at risk. This should be a personal choice and it is unconstitutional to force a medical procedure on anyone , let alone one that has not been fully tested in a controlled environment to determine immediate reactions, and long term effects. This is especially true for children who are at almost no risk from the virus. You need to submit to the constitution and forget about pretending to stop a virus, that is now no more dangerous than the flu.

Thank you for your consideration.

Wendy Whitaker

Honorable Board member,

I am asking you to OPPOSE any mandate on Covid shots for children as a requirement to attend K-12 public schools.

Children are at extremely low risk for Covid. There are no long-term studies to document any history of safety. Studies do now document that vaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Thank you,

Violina Pimonenko

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. The following criteria is not being met under sections II and III on the list of criteria:

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

## III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot ignore the fact that public acceptance does not even represent a strong majority.

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- Most parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages

50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

The slogan: Mask or be vaccinated to protect others is defeated by the fact that the virus spreads regardless of vaccinated status or using masks.

Children should not be forced to have a Covid-19 vaccination by the state in order to receive an education. Decisions regarding medications and healthcare should be the right and responsibility of their parents, together with the healthcare professionals whom their parents trust to make medical decisions in their best interest. Children still have a very low risk of contracting serious Covid-19 cases, and parents must be allowed to weigh the risk of Covid-19 against the risk of side effects to the vaccine, especially when some of the vaccines are still under emergency authorization order, there have been documented cases of very severe side effects, and there simply has not been enough time and data to fully understand long term risks and effects of the vaccine.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Samantha Cumpton

Dear Tracy,

Please say NO to this terrible idea. Please add my name to the list of those pleading against this travesty. Please do NOT require Covid vaccines for children to attend school. Children are at extremely low risk for Covid. The risks hugely outweigh the benefits. Vaccines are STILL only authorized for EMERGENCY USE ONLY. They are not verified. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. There is a HUGE risk and no benefit. Please, consider the needs of the children. They do NOT need the vaccine! Please vote NO! No Covid shots for children!!!

Respectfully,

Alex

Dear Members,

I am writing as a parent of school aged children that have burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why.

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extreme detrimental and profound on OUR children and our future.

Sincerely,

Sarah Karr

I am writing this is in direct opposition to the WA state DOH proposal to modify WAC to use Law Enforcement to involuntarily detain individuals and families into quarantine for failure to comply with requests for medical exemption, testing, treatment, counseling, and/or vaccination and also I am staunchly opposed to the DOH proposal to require COVID vaccines as part of school immunization requirements.

This is an unscrupulous action by the DOH and I expect more from public officials.

As a concerned citizen, I AM NOT IN SUPPORT OF THE DOH ACTION TO MODIFY WASHINGTON LEGISLATION TO INCLUDE COVID-19 FOR ILLEGAL DETENTION AND MANDATORY VACCINATIONS. Not only is this immoral, it is a complete abuse of law enforcement action and outside the reach of the DOH.

Sonya

I totally oppose children getting vaccinated with an emergency untested vaccine. They are at high risk of adverse complications including sickness, hospitalization or heart disease. I believe it is safer and more beneficial for them to get Covid and have natural immunity as a result.

The DOH should not have the power to involuntarily inject children or adult citizens of the United States. This is coercion and illegal. We the people have a right to choose what is injected into our bodies. These proposed Covid Policies are an over-reach and immoral.

Sincerely,  
Deborah Bowen

Subject: Must kids really be vaccinated? Mandating COVID shots and the ICWA's petition on item #11 for 1/12th agenda

External Email

To the dedicated reader at BOH,

I imagine you're tired of reading hundreds of these, but I thank you in advance for taking the time to read this one additional one... and those that follow. Here are my thoughts...

I oppose mandating COVID shots, and more specifically the children must NOT be required to have a COVID vaccine because:

1. Many healthy unvaccinated children in my community that tested positive for COVID experienced symptoms that were no worse than a nasty cold or a typical flu bug and fully recovered within a week. These are families I know. I am not recounting news or social media sources, which I do not trust.
2. I understand that the vaccine does not stop the spread of COVID, but merely reduces the severity of the sickness.
3. Healthy children should not be used as guinea pigs until complete clinical trials and several years of sound scientific data has proven its 90-100% free of any short- and long-term side effects.
4. Should #3 eventually be achieved, then sound scientific data must evaluate and prove that a vaccine is more effective and less harmful than natural immunity.
5. Should #3 & 4 be achieved, then community trainings should be performed by reputable health professionals relying on a trusted and scientifically secure information sources. After such trainings, PARENTS MUST HAVE THE FREEDOM TO CHOOSE whether the offered vaccination is best for their own child's individual circumstances.

Majority of children do not suffer from a lengthy severe sickness that leaves them with long term or permanent effects. Thus, the warrant for a mandate is not reasonable and unjust. Hospitalization admissions should not be a measure, as unnecessarily frightened (due to hysteria in the media) and unprepared parents are prematurely rushing children to hospitals without taking basic at home care to nurse their kids back to health at home.

If it's true that the COVID vaccine does not completely stop the spread of COVID and mostly limits the severity of the illness, then why vaccinate children for a virus that merely affects most of them like a nasty cold or flu? Why alienate parents and create more hostility by government forcing something that does not make logical common sense, without sound scientific data to back it up?

Lastly, I support the ICWA's petition (item #11) on January 12th agenda to establish a new rule prohibiting government (BOH) from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

## OFF TOPIC - Suggestions

BOH / Gov't should extend funding and expertise for training people the basics for how to be healthy, boost the immune system, and how to properly care for self and others when the inevitable virus (cold, flu or otherwise) makes them sick... so that they know what to do to reduce the severity, and when it makes sense to make a trip to the hospital.

Then perhaps, a care kit could be mailed to those with positive test results when requested. As a people, I think we have forgotten how to take care of ourselves and people tend to run to the doctor for every minor event... and with the mass media hysteria, that has likely been a big reason why hospitals are unnecessary overrun. Actually, before COVID our medical system needed improved... so hopefully the silver lining and lessons learned from COVID will ultimately improve and increase our medical facilities and staff.

Yours truly,

MaMa Bird

Subject: NO VACINE MANDATE

External Email

State Board of Health,

Please understand that it is illegal to mandate injections that are mere "treatments". These "injections" have been proven to be ONLY TREATMENTS that, for "some people, may reduce symptoms of covid-19.

CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission."

Dr. Anothny Fauci says, "We know now as fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Since these injections are only treatments, there is NO LEGAL GROUNDS FOR FORCED USE. Any mandate would be a reckless abuse of power without justification in case law.

This doesn't even address the crime against humanity that using an unapproved drug ON CHILDREN is! WHERE THERE IS RISK, THERE MUST BE CHOICE!

I BEG OF YOU, DO NOT ALLOW UNLAWFUL MANDATES, ESPECIALLY WHERE OUR CHILDREN ARE CONCERNED.

Thank you,

Marie Kilcup

not death numbers worthy of adding COVID-19 to the infectious disease WACs.

Forced quarantines for not wanting to take a risk on an experimental product that has been demonstrated to be neither safe (see VAERS data <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F2020/04/23/VAERS-report-on-the-safety-of-the-COVID-19-vaccine/>) nor effective by the CDC's own admission are not the right public health measure to be considering. There are known effective therapeutics and highly successful early treatment options available which should be promoted and pursued by the WA Board of Health instead.

For the above reasons, please discontinue your consideration of adding COVID-19 to the infectious disease WACs and school immunization requirements and turn your attention to early treatment and proven, highly successful therapeutics.

Thank you for your time.

To whom it may concern,  
I do not agree with the efforts being made to allow local law enforcement to involuntarily detain someone or group of people to be isolated in a quarantine facility.

I do not agree that anyone should have to comply with enforced medical examinations, testing, treatment, counseling, or vaccinations regarding COVID-19.

I ESPECIALLY do not agree with including the Covid-19 injections as part of school immunization requirements.

I think that our state even considering these is disgusting, inhumane, and unlawful. The mere fact that the Covid-19 status, and facts are consistently changing at a societal, and departmental level goes to show that everything surrounding Covid-19 is still unknown. Therefore, Washington laws have NO reasons being involved in these matters.

I will not support these new efforts. I will not support this state.

The inclusion of the COVID-19 vaccine as a mandatory vaccination for children entering public school does not make any logical sense. Firstly, children and adults alike are mandated to wear masks in schools, regardless of vaccination status. This mandate is in place because it is now common knowledge that the COVID-19 vaccine does not prevent transmission of the virus. If the vaccine entirely eradicated the disease, this would be a different conversation, but it decidedly has not. Additionally, school aged children are the least impacted subset of our population, facing little to no danger of harm from the virus. If the vaccine requirement is being put in place to protect the more vulnerable elderly citizens, we have to consider the fact that they have had ample opportunity to receive the vaccination themselves. Washington State has over 300 school districts. Districts representing vastly differing groups of students across the state. What is the purpose of these hundreds of different districts if the State will simply allow unelected members of the Board of Health to dictate how they handle their students? The vaccine can be encouraged, but it should not be mandated for our children to receive an education.

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be

isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

11.

Are you Pro or Con on the proposal?

2. Con

---

Regarding the PROPOSED POLICIES, to: • Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Include the COVID-19 injections as part of school immunization requirements using WAC 246-105. When does Government go too far? Forcing citizens to act against their will; coercion due to non-compliance; detaining citizens against their will; compelling and threatening citizens... all without due process. Our system of government, particularly the Rule of Law, equally depends on the consent of the governed and the voluntary cooperation and compliance with the laws governing a civilized society. We abide by laws for the common good. But, our compliance and cooperation are subject to limits, or we are truly slaves. Coercion due to non-compliance or failure to cooperate has never been the solution in a free and just society. In a totalitarian system, coercion and the heavy hand of government is the rule, not the exception. This is not to say that we do not comply with or follow the law simply because we do not agree with it; our form of government is based on voluntary compliance with the laws, rules, and requests of the government. We make allowances and room for exceptions, for even the most necessary of actions and requirements, because a rational and objective understanding of all issues recognizes that legitimate differences of opinion and personal belief must be allowed in our society – or we are no longer civil. Equally, Civil Disobedience is a hallmark of a free society and people. With regard to medical issues and personal choice, we are all aware that there are legitimate differences and disagreements with prevailing orthodoxy and dogma. Advocates of abortion frequently state, "My Body, My Choice." Why can't the same ideal apply to those who don't want the COVID vaccine? Cemented policy is dangerous and ignorant. For example, those who use the term "settled science" are making a political statement and not a scientific one. Science is a dynamic endeavor that must allow for objectivity and flexibility. We live in intolerant times and this mindset is unfortunately spreading, corrupting our culture and our politics. It is evident in the mendacity with which opposing opinions are attacked and in the way that state and federal governments conduct their business. Control and compliance seem to be the overriding objectives – masked in the false premise of mandates "for the greater good." In these proposed policies, the coercive and even vindictive arm of government is being brought to bear and legitimized so as to constrain disagreement and the rational objections of law-abiding citizens. Does no one see the inherent danger and slippery slope of totalitarianism in these brazen proposals? Germany in the 1930's, under Chancellor Hitler, could not have crafted a more troubling policy. Comply. Show your papers. Do as we say. Don't question us. Trust this new government.

Everything will be ok. Assurances of a power-hungry government and of the administrators within it are worthless; the historical precedent is unequivocally clear. A disturbing number of citizens are unaware, uninformed, or ignorant of the actions of government and, like the disengaged citizen, their ignorance and apathy remove perhaps the most essential element of our fragile republic: an informed and engaged electorate who restrain and remind their representatives of their proper role and accountability. I am not ignorant nor apathetic. This is your reminder: please exercise restraint and act to preserve the freedoms of the people of this great state, instead of enacting agenda-based policies that are further fueled by fear. Remember the lessons of the past; remember who you serve.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Scott Farley

To whom it may concern,

I am a citizen of Washington State and am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

They are unprecedented, unconstitutional, and completely ignore informed consent. These vaccines are not safe or effective, we are currently seeing extremely high covid cases with the vast majority of Washington state vaccinated. They ignore parents rights to protect and care for their children as they see fit, they ignore religious and medical freedom, and do very little to keep people vaccinated or unvaccinated from contracting covid or our state would not currently have over 16,000 new cases yesterday.

These codes are a violation of human rights and remind me of the interment camps constructed on Washington state soil to detain the Japanese in the 1940's. The science does not prove that vaccines reduce transmission and every individual has a right to informed consent which cannot be ignored.

Thank you and please hear the voices of thousand of your constituents asking you to uphold medical freedom and personal choice in the name of the law.

I am extremely opposed to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. Per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children.
3. Myocarditis is a known side effect of the vaccines. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a milde illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.
4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research
5. Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity.
6. No one knows the long term risks of these vaccines. There are many risk/benefit analysis that show little risk and little benefit. So why mandate!
9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Please allow parents to decide on behalf of their children and do NOT mandate!

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Immunization Technical Advisory Group,

Please, for the sake of our young children, do not require the Covid-19 "vaccines" for school admission or childcare in Washington state. First, healthy children are not at risk for serious complications from Covid. Secondly, these "vaccines" for covid are still under emergency use authorization and therefore optional. Thirdly, there are no long-term studies to document any history of safety. The studies are still ongoing. Fourthly, there are studies now that document that the vaccinated and unvaccinated can both acquire and transmit covid, so the "vaccine" does not stop the spread of the disease. These "vaccines" for covid do not even qualify as vaccines in Washington state. These Covid "vaccines" do not fit the definition of what a vaccine truly is. Washington state law says "Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease." Therefore, Covid-19 Jabs are not "vaccines" and cannot be required for this reason and the fact that it is still an EUA.

Thank you for your consideration.

Children fortunately have an extremely low risk of complication or death from Covid. There is broad scientific consensus on the extremely low risk level, and it is clearly demonstrated in US CDC and our state Department of Health data. The Washington State Board of Health must make decisions using an appropriate risk/benefit analysis, especially with regard to our children. There is no benefit to mandating Covid vaccines for children given their extremely low risk, and as with all vaccines, there is risk. Parents must be given the choice to weigh the risk/benefit for their children on a case by case basis. With regard to Covid vaccines, the clear facts demonstrate that it is not the Board's place to mandate vaccines for all schoolchildren. Do the right thing - leave this decision with families, where it belongs.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Please be mindful of these reasons as you make this decision.

Regards,  
Rosene Hurd

Subject: WA State Board of Health Proposed Policies

External Email

In response to these outrageous proposed policies:

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To Whom It May Concern,

It is outrageous that this is even being considered (for a "virus" with a near 100% survival rate). I put that in quotes because evidence suggests Dr. Fauci helped create it in a Wuhan lab which could suggest purposeful intent. Your efforts should be focused there. Plus, these jabs do not work. The double and triple jabbed are still getting infected and spreading/shedding it. This "pandemic" is of the vaccinated.

We citizens of Washington and of these United States of America have constitutional, God-given rights that you cannot alter. Anyone who took an oath to uphold and defend these constitutional rights should be prosecuted to the full extent of the law.

Scott

Hello,

My name is Hannah Kilcup. I am a teacher and a single mother of 3 children. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank You,

Hannah Kilcup

If you get this in error, please forward to Keith and his team.

Thanks for your help.

---

Dear Washington State Board of Health members

The "vaccine" is working just as designed and intended.

After a full year of exposure to the "vaccine" efficacy being studied by scientists and medical researchers worldwide, the results show convincing consistency from all developed nations.

Likewise, a plethora of autopsies confirm an undeniable efficacy affecting a wide range of organs.

And we don't need just scientific data to confirm the results.

Additionally, just raw data from unrelated industries are consistent with medical research:

\* Life insurance companies are showing a 40% increase in death claims in 18 to 64 year olds.

\* Hospitals now report the number of stillbirths normally seen in a year, are now reported in just 24 hours.

\* The number of covid cases are dramatically increasing in the "vaccinated"

\* Hospitals report that the greater number of covid patients are the "vaccinated".

\* GoodSciencing.com has compiled a growing list of almost 400 athletes who they maintain experienced cardiac arrest or other serious issues after taking Covid vaccines, including 231 athletes who have died.

\* Airline pilots are a healthy bunch, maybe 6 die a year, after the "vaccine" mandate, 39 died in one month, July 2021.

Yep, working as intended:

1. Delete your natural immunity so you will depend on Big Pharma to keep you well, and
2. Slowly attack almost every organ in your body to cause most deaths in an 18 month window of time.

(Why? Research eugenics, Gates, Rockefeller and Rothchild on Duck Duck Go)

Now we know why Members of Congress, their Aides and Federal Courts are Exempt from Vaccine Mandate

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fneedtoknow.news%2F2021%2F09-01%2Fcongress-their-aides-and-federal-courts-are-exempt-from-vaccine-mandate%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cbcd9fcc3dd444ac4dcd608d9d213499e%7C1>

Now, you are considering mandating it for children. Why would you be pressured to mandate it for children?

Here's why:

Robert F.Kennedy Jr explained that Fauci and drug manufacturers are going after children because the only way to obtain immunity from liability and lawsuits is if a vaccine is approved and the CDC posts it on the childhood vaccination schedule.

So, if you mandate this bioweapon, (true definition of drug used for genocide), then you generate a great financial boost for Big Pharma and embolden and encourage the wealthy elite committed to eugenics.

Oh yes, then one more bullet point can be added above for all the children killed by the bioweapon.

Or, you could help end this madness and genocide by deciding on a resounding NO to the Death Jab for children AND NOT approving quarantine camps for those who don't want the death jab.

Please vote No to the Death Jab for children and quarantine camps for those who don't want the death jab.

Thank you,

Roger Kinney

To the State Board of Health, I am writing to express my concerns in regard to items on your meeting agenda. Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities? Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

We as parents have the right to make decisions for our kids. And we decide on what is better for our children! Also, considering that the Covid vaccine does NOT protect us from getting Covid. There are many side effects to this vaccine, and I would never want to risk having my children go through any terrible. And this is proven and clearly a trial run!! Also, considering that health requirements should never be mandatory and should always be a choice!

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Shawn Cassidy

Public Health works are woefully appreciated by the general public, yet all members of a society reap the benefits of robust disease prevention systems. Childhood vaccinations are the key to our nation's success in reducing childhood morbidity and mortality. Precedent has already been established for mandated vaccinations in order to attend compulsory education. The inclusion of a COVID-19 vaccination as part of this panel of mandated childhood vaccines is common sense. As a mother of 3 school age children and a Family Nurse Practitioner, I hold these vaccines as God's answer to the public's thoughts and prayers. My 2 children old enough to receive the vaccines happily, and bravely, rolled up their sleeves. Sadly, I don't believe a "mandate" will create buy in. The CDC really botched the information campaign and for vaccine hesitant folks, is not a valuable source of information. Therefore, in addition to the mandate, I would encourage the SBOH to also consider adding an additional angle: The pocketbook angle, AKA, ounce of prevention is cheaper than a pound of cure. If people don't want to "buy in" vaccines for prevention, they need to buy in the cost of hospitalization and treatment. I would propose that health insurances be allowed to obtain more cost share from people who forgo vaccinations but then are hospitalized with illnesses that could have been prevented. This could be applied to illnesses for which FDA approved vaccinations exist. Like tetnus. A few years ago, in Portland, OR an adult was hospitalized with tetnus. The bill for that treatment was just about \$1,000,000.00. 1 million dollars spent on a single human for which a \$15 dollar tetnus booster should have sufficed. I don't want to foot the million dollar bill, but that's what happens. The expense is passed on to the rest of us.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccines have not been studied long enough to even prove they're working since all of my coworkers who were fully immunized and received their booster shot still got covid had to be quarantined for 2 weeks but I do know people who were not vaccinated and did not get sick at all. More and more people are losing trust and are questioning what is really happening in our world!!!

I believe it should be a choice for each parent to decide what is best for their child. Especially for those children that have compromised immune systems. Two of our three children were born with multiple heart defects. This should not be something that is forced on people because not all situations are exactly the same.

Dear Health Official SERVANTS of the People of Washington State,

I vehemently oppose the upcoming policies up for review and potential decision making at the State Dept. Board of Health meeting's, January 12, 2022, agenda where they are trying to give the same power to that of law enforcement to "local health officials" to involuntarily detain/quarantine/test /vaccinate, individuals and families!

These are a result of an OVER-REACHING, TYRANNICAL, and IMMORAL government and cannot possibly uphold the democracy of our state, yet alone our people!

WAC's under these considerations are but not limited to:

WAC 246-100-070, WAC 246-100-040, WAC 246-100-045, WAC 246-100, as well as the required COVID injections for children, school and daycare in WAC 246-105.

Respectfully submitted,

Rebecca Roadman

Good evening. My name is Zachary Duncan. I am a middle school teacher in the state of Washington. I am appalled that the Washington State Board of Health is even considering making vaccines mandatory for students. There is overwhelming evidence that students are not at substantial risk for Covid. Furthermore, they are not major vectors for the disease. In every large case I studied involving school districts, student populations (and schools in general) had far lower infection rates than the surrounding community. Vaccines are now being pushed on students, in an effort to curb the disease. I would say we are doubling down on stupid, but we are way past that. Lockdowns, social distancing, masks, vaccines, do not work! How many times are we going to respond in the same way to stop these surges. It has not worked yet. With the exception of one individual, every person I know who has gotten covid (and there are a number) have been vaccinated. Even those with boosters. So, if vaccines work, why don't they work? And now you want to push these on students? I keep hearing that the vaccines are safe for kids. We do not know that. It takes years and years to prove the effectiveness and safety of a vaccine. With the amount of harm we have already caused our students, you have no right to force this on them. There are students who have had horrible side effects (some life altering). I would love to cite stats on all of the adverse reactions we know of (and the huge risk, especially to young males of myocarditis). However, statistics do not matter to those of you who are on the left. So allow me to speak plainly. I will remind you that parents have the right to choose what medical decisions are made for the children. You are absolutely blind to the truth if you are continuing to push an agenda that has not stopped this disease. Leave our students alone. You do not want to make this move.

Sincerely,  
Zachary Duncan

To Whom it May Concern,

In reviewing your meeting agenda for January 12, 2022, I wanted to take a moment and send my opinion as concerned citizen, local taxpayer, and mother of 3.

I strongly oppose the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school.

I do not believe children should be mandated to be given an experimental vaccine with no long term data. This virus has never been a significant threat to children. The vaccine has not shown to be completely effective in preventing the illness and there is a chance of a reaction to the vaccine itself.

The bill is including COVID 19 into the list of infectious diseases requiring mandatory reporting. Right now it's being reported under the Emergency Orders mandates, but this bill will require it to be reported permanently. I oppose any legislation requiring the reporting of non-sexually transmitted diseases to the government.

I also believe natural immunity needs to be taken into consideration. Other countries, such as Germany, recognize that natural immunity is effective.

The bill is defining "exposure" as having any "contact" with an infected person (instead of the less than 6ft for more than 15 min and the person had symptoms definition). I oppose this loose definition because it is vague and overboard.

The bill is defining "associated death" as anyone who died from EVEN an INDIRECT result of COVID 19. I oppose this because it perpetuates incorrect information (i.e. the number of COVID deaths), spreads false fear, and allows the government to continue its mandates due to "COVID deaths".

I oppose that the bill will also require public schools to teach children about ALL sexually transmitted diseases (it used to just require the teaching of HIV), starting WHENEVER the school board decides and in WHATEVER manner the school board decides. I oppose this because the parents are best equipped to discern how and when to inform their children about such things, not the school. I particularly oppose this because the bill specifically says that the public schools have the "unique" position of being able to educate kids about such important matters.

I support Agenda Item #11, the Informed Choice Washington's Petition for Rulemaking.

Thank you for your time.

Sincerely,  
Robert Phillips

☐

☐

☐Hello,

I'm writing with regards to agenda topics 9 and 11 for your meeting on 12 Jan 2022.

Agenda topic 9 regarding being able to send people, against their will, anywhere when they have not committed a crime is a violation of our rights, and is blatantly illegal (false imprisonment), and this WAC should be taken off the books entirely, not extended.

Agenda topic 11 regarding making the COVID vaccine "recommended" for school attendance will further deplete schools. I know many people who are extremely pro-vaccine who have told me if their children are required to get this vaccine to attend school, they will be pulling them out and homeschooling. There has already been a wave of parents in this state who have started homeschooling, which has cut funding to the schools already. Imposing this recommendation will further cut into that as well as possibly cause financial hardships for those families who will likely have one parent quit working to be able to homeschool. While we already homeschool our son, I know some who are willing to endure the financial hardship to not require their kids to get the vaccine. They should not have to make that choice as so many Washington state employees have already been forced to do so.

Thank you for your time.

To the board of Health Directors,  
Please do not require children to be vaccinated for Covid. I have 2 grandbabies and do not want this to be mandated for them in the future.  
The chance of a child passing away from Covid is very very minuscule. Vaccines should be a choice a parent makes. This is an over reach in my opinion and children should have body autonomy as they mature. These mandates must not continue. We are a free people and the constitution is the supreme law of the land which declares our personal rights.

Please do not require the Covid vaccine to attend school. I have 2 school aged children and I will not comply with the requirement. I have worked in the medical industry. I understand viruses I know a lot about vaccines I've seen enough adverse reaction to vaccines. I made a professional decision to not vaccinate my children against covid 19. The risks of the vaccine outweigh the benefit. Also there has been many studies that show that children recover well from the illness, they do better with Covid 19 then with influenza or RSV. Requiring covid vaccine to attend school is not scientific, it is political. Please do not implement this in the schools. If the Vaccine becomes a requirement for school attendance I will be pulling my children from the public school system.

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at an extremely low risk of severe illness from Covid  
The "vaccines" don't prevent contraction and spreading Covid  
The "vaccines" are still only for emergency use authorization  
There are documented adverse reactions to the "vaccines" which outweighs the risk to Covid for children  
Even if the "vaccines" become approved for normal use the adverse reactions outweigh the risk for children contracting Covid and the reactions will create lawsuits and damage to the confidence in the medical community. Any harm caused to children from requiring the "vaccine" will be on your heads.

Thank you for taking this possible requirement seriously.

The proposal to mandate vaccination on children to continue going to school or childcare.

11.

Are you Pro or Con on the proposal?

2. Con

---

I do not believe that vaccines should be mandated at this point for children in schools or childcare. At this point vaccines are only approved on an emergency basis. There are also known vaccine side effects in children. Parents should be allowed to make the best medical decisions for their families. The effects of Covid tend to be mild in children and teens. And the vaccine isn't preventing spread or contraction of Covid 19.

To the Board of Health,

Please enter the following comments regarding Agenda Items 8 and 11.

Agenda Item #8: I oppose Agenda item #8, the Board's formation of a Technical Advisory Group re mandating COVID shots for schools. I oppose COVID-19 shot mandates.

Agenda Item #11: I support the petition by Xavier Figueroa, PhD, to establish a new rule that prohibits the Board of Health from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

I oppose the addition of Covid-19 to the Washington Administrative Code under any section.

Respectfully submitted,

Sue Forde

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Kids are at extremely low risk to COVID 19
2. Many kids have had COVID 19 and have natural immunity, this needs to be discussed as superior immunity.
3. The Constitution and Nuremburg Code stops you from making this experiment mandatory.
4. Liberty supersedes fear
5. As a parent of 3 school age kids, I will not back down on this cause. There will be no mandates for my kids.
6. Where there is risk there should ALWAYS be choice.

Thank you,

Tricia Cyr

□ Regarding to the petition to add the Covid-19 "shot" to WAC 246-105, I am completely opposed to this action. First off, this is not a "vaccine" per it's origin definition of "preventing disease". As stated in WAC 246-105-010 <tel:246-105-010> , the rule is "to protect children and the public against certain vaccine-preventable diseases." Covid is not a "vaccine-preventable" disease and there is no "vaccine" or "shot" that prevents people from contracting Covid. Both vaccinated and unvaccinated alike can and do contract Covid-19. To make this a requirement when it does NOT prevent anyone from contracting Covid is completely ludicrous and frankly insane. It does not prevent the

spread of the virus. I have over 20 close contacts who have all contracted Covid after being fully vaccinated (and some boosted). What exactly are we "preventing"? Possible severe disease when they DO catch it? It is well known that children are less at risk of becoming seriously ill when they do contract it and it is well known that a big contributor to severe illness from Covid is due to obesity and co-morbidities. As a parent, it is my responsibility for the health and welfare of my child. If I believe there is more risk of LIFE LONG injuries from the Covid 19 shot than there is overcoming Covid, that is my decision to make for myself and my children. I know my child's health. Everyone has a right to choose for their own children whether the shot is right for them or not based on their own health factors. Same with the flu shot. The Covid shot has no more effect of preventing the spread of Covid than the flu shot does in preventing the spread of the flu. It doesn't! It is also complete insanity that we are only testing unvaccinated students in school in order to participate in school sports when it has been known for the better part of a year now that being "vaccinated" does not prevent you from contracting the virus. Why then are only unvaccinated athletes tested in school when both vaccinated and unvaccinated can both catch it and spread it? Further, why are we still masking our children when they are sitting at their desks in school? If it is ok for everyone to take off their masks after walking 5 feet to their table at a restaurant, why can students not take off their masks when seated at school? All of this is so incredibly non-sensical. OPPOSED OPPOSED OPPOSED!

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

May God bless you abundantly today. Samantha

To: DOH WSBOH  
Cc:  
Subject: Concerned parent

External Email

Dear member of the Washington State Board of Health,

I am writing to you as a concerned parent regarding the upcoming decision as to whether the Covid vaccine should be required for school age children for the 2022-2023 school year. My husband and I have 3 children ages 12, 9 and 7 years, one boy and 2 girls. We have a close family member, who is fully vaccinated, that had vaccine related myocarditis a few months back and has still not fully recovered. Sadly, there are 22,117 cases of confirmed myocarditis/pericarditis in the US CDC VAERS system, as of December 24th, 2021.<sup>1</sup> With high rates of myocarditis being reported as an adverse side effect from the vaccine in boys ages 12-17, that is a serious concern of ours for our son. He is an active football player, and we are concerned about the long-term effects of myocarditis, especially since it has not been extensively researched in kids.

I believe consideration should be given for families who have had positive Covid cases, have fully recovered and now have antibodies. There seems to be a blatant disregard in our community, and Washington state as a whole, for anyone who has fully recovered from the virus and can prove they have antibodies. Someone I know personally had to jump through major hoops to be able to attend an event in Seattle. They were told they needed to present a negative covid test taken within 72 hours of the event OR an antibody test. This individual got the antibodies test done before the event and then double-checked with the organization a day before to ensure they would still accept the antibody test. They said they would not accept it and a negative covid test was required to attend. There are currently 140 studies available on the robust, durable protection of natural immunity from around the world by hundreds of scientists, researchers and doctors.<sup>2</sup> Why is this not a part of the conversation in our country and state??

Studies have shown that Covid affects children far less than it affects adults and over 16,000 physicians and medical scientists around the world are declaring that healthy children should NOT be vaccinated against Covid.<sup>3</sup> To require mass vaccination of school age children with a vaccine this is STILL under Emergency Use Authorization is wrong. We as parents still do not have clear lists of potential side effects and complications of the vaccine and we should have the right and freedom to weigh the pros and cons for our individual children based on their health history.

Our country was built on freedom and choice. Our state government and Board of Health are taking those freedoms away from parents by implementing mandates regarding the virus. Even at a national level the vaccine mandates have stopped. Why is our state continuing to push these mandates?? It is unnecessary. Let parents make decisions for our children, which we have been doing all their lives. Please take a step back and look at the potential long-term ramifications of mandating this vaccine for kids. It has not

been well tested and there have been over 169,934 cases of adverse reactions to the vaccine in our country, as of December 24th.<sup>1</sup> After the vaccine has gone through the proper testing and we truly know how it affects children, then let's have the conversation about requiring it for school-aged children.

Thank you,

Rachel Groves

Resident of Olympia

☐ Dear BoH Members,

I would like to express my extreme opposition to WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend any school, preschool or daycare.

No Covid vaccine available in the United States has received FDA approval. All available vaccines including the Pfizer BioNTech vaccine are being administered under an Emergency Use Authorization. The only approved COVID-19 vaccine is Comirnaty and it is not available in the United States and there is no anticipated date for its availability. This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a federal judge recently rejected Pfizer's claim that the two products are interchangeable: Federal judge rejects DOD claim that Pfizer EUA and Comirnaty Vaccines Are Interchangeable Per Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory!

No one knows the long-term risk of these vaccines. You may remember one of the members of the FDA advisory committee stated "we are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben. Children are statistically at zero risk of dying from Covid. Their survival rate is in the range of 99.997 to 99.998%. The very children who are listed as Covid deaths did not die of Covid, but rather with Covid as anyone who has been admitted to a hospital nowadays is forced to be tested. I challenge the Washington state Board of Health to show medical records for even one child who has died of COVID!

Force vaccinating healthy children for a disease that does not affect them, to make adults feel safe, is a new low for humanity. Will you be liable for any adverse reactions for the children who are forced to be vaccinated if you recommend this? If not, who will be? Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Sally Snyder

Vancouver, WA

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. One adverse reaction should mean that no child gets the shot without proper consultation with a primary care provider on risk to benefit factors. Since the Government will not take responsibility for adverse events that may happen, they should not mandate medical procedures for children.

2. Since the vaccines may only lessen symptoms, and have been proven not to prevent disease; as well as for the greater effect, children do not have the reactions that most adults do, so there is no reason for children to get this vaccine.

3. Finally, if science is supposed to refute science, the Washington State Health Board is not allowing, nor following scientific data that disputes the efficacy or legitimacy of the COVID vaccine. Instead, COVID has been turned into a political piece in which to manipulate and control the population. This is against both Washington State Constitutional principles, as well as US Constitutional provisions and principles. Washington State Constitution is unique in that it is the only state Constitution which states clearly that the US Constitution is to be regarded as higher authority when questions arise within the State Constitution. Yet it is being 'overlooked' because of the provisions of 'Emergency Powers of the Governor.'

It is my belief that the 'giving of authority' in the form of the legislation to health boards, while appropriate and legal, should be done as oversight NOT enforcement or in what is proposed, law binding authority. Law is written by the legislature and signed by the governor, which gives the people the choice of voting for legislature and governors to overturn said laws which do not hold to principles of which we choose. Giving this power to authorities that are not voted by the people allows for 'taxation without representation', which is definitely against either constitution which is supposed to be the greatest laws of the land.

Respectfully,  
Shawn O'Reilly

The covid vaccine has presented dangerous side effects. I personally have family members that have experienced serious adverse reactions to the vaccine, including death. School-aged children are not as high risk from getting seriously sick from covid. The covid vaccine does not have enough high quality published and unpublished data to evaluate safety and efficacy. The vaccine is non-sterilizing as opposed to the other vaccines on the required vaccine list for students. Vaccinating does not reduce the risk of person-to-person transmission. Vaccinated people are still contracting and transmitting the virus. Individuals who receive the covid vaccine are not immune to covid. Vaccinating children can still result in outbreaks of the disease. Person-to-person transmission still occurs even to those that are fully vaccinated. Vaccinating against this disease does not reduce the risk of person-to-person transmission. This vaccine does not have an acceptable level of side effects. More research, time, and reliable resources are needed to evaluate safety of the covid vaccine. Adults in contact with children do not have higher covid-19 mortality. Vaccinating children does not protect at-risk populations, because as stated, covid is still highly transmissible regardless of vaccination status. As a parent of a school-aged child, I STRONGLY oppose this proposal to include the covid vaccine in the 246-105 WAC.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,Robyn Swesey

To whom it may concern:

I am writing as a very concerned citizen. Vaccinated or unvaccinated aside. I beg you to actually look at statistics.

Why are kids all of the sudden sick right after they started getting the vaccine? Kids were virtually unaffected by this virus for TWO YEARS. Two years!! Now they're getting sick.

My niece is paralyzed from the waste down.

I have friends who athletic children now have heart issues that they didn't have before the vaccine.

Athletes are dropping like flies.

Not to mention vaccinated are still getting COVID!!

Please call this whole mess off.

DO NOT MANDATE THIS VACCINE.

Thank you,

Concerned parent and citizen

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be

isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

11.

Are you Pro or Con on the proposal?

2. Con

---

To Whom It May Concern, We strongly disagree with any proposed policy that discriminates against medical decisions made by individuals for themselves or their children, and that plans to use police force to detain individuals based on their own personal medical decisions. Medical decisions and autonomy over one's own body are basic freedoms that Americans are entitled to, regardless of any "emergency " deemed by our state government. This "emergency " of Covid-19 has been over for a very long time. Our state government, and indeed our state health officials are not following actual and accurate science by continuing to insist on 100% vaccinated citizens. So many of us now have natural immunity, which the state still refuses to recognize. This is basic science and virology. The state is still touting the still experimental vaccine as safe, even for very young children, even pushing advertising that they are safe on television. When VAERS has collected evidence of the contrary and state residents have personal knowledge of those who have died or are permanently damaged physically due to having taken the vaccine, it is not safe for everyone. The risk to benefit ratio at this point weighs heavily against the vaccine. Students should not be forced to take this experimental vaccine, when it will not prevent them from getting the virus or spreading it. There's no solid science behind the decision to force children to get the vaccination . The virus at this point has taken its natural course and is waning. We must now learn to live with this virus as we have the flu and the cold. Having traveled to other states, we have seen that life can be better. Our state has applied tremendous overreach in people's lives already, destroying individuals' livelihoods and our state economy. We have seen many friends and families leave this state forever due to the decisions made by our state government. Please do not allow these policies to move forward. They are unconstitutional and un-American. Sincerely, Mark and Wendy Baker

**PROPOSED POLICIES:** • Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I'm opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) The vaccines do not stop the spread of the disease. This is undeniable. No one should be mandated to take a medication that doesn't work.
- 2) Children are at extremely low risk of serious complications or death from COVID-19.
- 3) The vaccinations have not been adequately tested on children, nor are there any long term safety studies. Our children should not be made into guinea pigs.
- 4) Unreasonable mandates will force even more parents out of the work force.

This so called "vaccine" is not the classical sense of vaccine! In addition this has only "Emergency Authorization" status with no long term studies! Children is under low risk category! It is not worth to take this risk!

Notice of Public Meeting Wednesday, January 12, 2022 9:30 a.m. – 3:30 p.m. Virtual Meeting via ZOOM Webinar (hyperlink provided below) 2:30 p.m. 11. Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry –Possible Action Tom Pendergrass, Board Vice Chair Samantha Pskowski, Board Sta I, Aleta Busselman, a citizen of Washington State since 1969, say NO on allowing the governing body of Washington state to be able to isolate or quarantine or mandate controversial and emergency use vaccinations on its citizens (especially the kids – of which do not have the capacity to accept or deny emergency-use vaccines that have yet to be proven to prevent disease as stated in your RCW 28A.210.060 ). That choice is up to their parents (the people that know their children better than anyone else). According to your RCW 28A.210.080 once proof of full immunization or proof of completion of an approved schedule has been presented, no further proof shall be required as a condition to attendance at the particular school or center. Changing the definition of fully vaccinated is not acceptable especially since the shot that you are mandating to be put in to our bodies has not been shown to meet RCW 28A.210.060 (especially in kids). I have been a Washington Citizen for my entire life and up until now, I have trusted our elected body to govern our great state with reasonableness and common sense. I am not against proven vaccines. I am 100% for understanding the facts and making an educated and informed decision on medical procedures. Please do not try to take away our constitutional and God-given rights of free will by continually changing the definitions of the law. Please don't whitewash what it means to be fully vaccinated. Please don't overstep your authority by impeding on our personal privacy on how we live our lives and raise our kids. Please don't try to take away every individual soul's unalienable right to know what is best for our own bodies and for our children (especially since we have yet to fully understand the actual science behind this horrible virus). Please consider what you are trying to take away from your citizens and ultimately yourselves and your families as we go forward. Thank you, Aleta RCWs > Title 43 > Chapter 43.20 > Section 43.20.050 43.20.035 << 43.20.050 >> 43.20.065 RCW 43.20.050 Powers and duties of state board of health—Rule making—Delegation of authority—Enforcement of rules. (2) In order to protect public health, the state board of health shall: (e) Adopt rules for the imposition and use of isolation and quarantine; (f) Adopt rules for the prevention and control of infectious and noninfectious diseases, including food and vector borne illness, and rules governing the receipt and conveyance of remains of deceased persons, and such other sanitary matters as may best be controlled by universal rule; and (g) Adopt rules for accessing existing databases for the purposes of performing health related research. RCW 28A.210.140 Immunization program—State board of health rules, contents. The state board of health shall adopt and is hereby empowered to adopt rules pursuant to chapter 34.05 RCW which establish the procedural and substantive requirements for full immunization and the form and substance of the proof thereof, to be required pursuant to RCW 28A.210.060 through 28A.210.170. RCW 28A.210.060 Immunization program—Purpose. In enacting RCW 28A.210.060 through 28A.210.170, it is the judgment of the legislature that it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization

of school-age children against certain vaccine-preventable diseases. RCW 28A.210.080 Immunization program—Attendance of child conditioned upon presentation of alternative proofs—Information regarding meningococcal disease—Information regarding human papillomavirus disease. (1) The attendance of every child at every public and private school in the state and licensed day care center shall be conditioned upon the presentation before or on each child's first day of attendance at a particular school or center, of proof of either (a) full immunization, (b) the initiation of and compliance with a schedule of immunization, as required by rules of the state board of health, or (c) a certificate of exemption as provided for in RCW 28A.210.090. The attendance at the school or the day care center during any subsequent school year of a child who has initiated a schedule of immunization shall be conditioned upon the presentation of proof of compliance with the schedule on the child's first day of attendance during the subsequent school year. Once proof of full immunization or proof of completion of an approved schedule has been presented, no further proof shall be required as a condition to attendance at the particular school or center. RCW 28A.210.090 Immunization program—Exemptions. (Effective until July 1, 2022.) (1) Any child shall be exempt in whole or in part from the immunization measures required by RCW 28A.210.060 through 28A.210.170 upon the presentation of any one or more of the certifications required by this section, on a form prescribed by the department of health: (a) A written certification signed by a health care practitioner that a particular vaccine required by rule of the state board of health is, in his or her judgment, not advisable for the child: PROVIDED, That when it is determined that this particular vaccine is no longer contraindicated, the child will be required to have the vaccine; (b) A written certification signed by any parent or legal guardian of the child or any adult in loco parentis to the child that the religious beliefs of the signator are contrary to the required immunization measures; or (c) A written certification signed by any parent or legal guardian of the child or any adult in loco parentis to the child that the signator has either a philosophical or personal objection to the immunization of the child. A philosophical or personal objection may not be used to exempt a child from the measles, mumps, and rubella vaccine.

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Susan Heid

I vote NO to mandate this untested vaccine for our students to attend school. There has not been enough research or time to find errors in long term effects from this rapidly

produced chemical. We decide what should go into our children's bodies, no one else. This is getting out of hand and must stop, otherwise, schools will be empty and everyone will be homeschooling.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Please see statement above. No one tells me what my child must put into their body to attend school. Sick.

Subject: Covid vaccine mandates for school

#### External Email

Good morning, I am writing to you as a concerned parent about the upcoming meeting to discuss requiring the Covid vaccine for school attendance. I am urging you NOT to require this shot for students to attend school or childcare.

First, it is still under EUA in the United States. The only currently FDA approved Covid shot is Comirnaty, which is not licensed in this country. Requiring a treatment that is still under EUA is unsafe and unethical.

Secondly, this virus is not dangerous or deadly to the vast majority of people, especially children. The statistics prove this. Over 99.95% of children will survive this illness and most will not transmit it to adults.

Thirdly, this treatment is not effective at preventing infection or transmission, as stated by the director of the CDC and Dr. Fauci, and any benefits would be solely for the individual receiving the shot (lowered risk of hospitalization and death). This means that unvaccinated students and staff would not be any more a risk to others than the vaccinated would.

These points alone show that mandating this vaccine makes no scientific sense, and it should not be done. Every medical procedure carries a risk to the person taking it. No matter how small the risk, it cannot be ignored. Coersion is unethical when it comes to medical treatments, and requiring people to take any medical product to be able to participate in school, work, etc is coercion.

I hope you take this into consideration for the health, safety, and well-being of our children.

Thank you,

Shelley Winje

Subject: URGENT

External Email

Hello Tracy,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern

I have been made aware that the Washington Board of Health is asking for parental input of making the Covid 19 vaccine mandated for all school age children. This is unacceptable to mandate, I am not against vaccines my children are vaccinated. I am against this particular "vaccine " as it is not a vaccine. A vaccine is to protect people from getting sick from actual viral or bacterial infections. The Covid 19 shot has proven over and over again it does not actually prevent anyone from catching it or spreading it. I personally know people who are fully vaccinated and still caught Covid 19. In fact states and countries who have the highest vaccination of people also have the highest Covid 19 cases. There are also hundreds of thousands of reported cases from the states and around the world of children developing serious heart complications after receiving the Covid shot. You do NOT have the right to play "doctor" with my children's health or safety nor using them as Lab Rats for some sick political gain. Considering the fact that children are not the ones being seriously affected by this virus. This is about parental choice, we the parents and only the parents should have that choice for what is best for our children. This would be a gross over reach on your part and it will not be accepted. This is an attack on our parental rights. I am begging you to please reconsider and NOT make this Covid 19 vaccine mandated for our children. If you do in fact care for the welfare of our children please do not put them in harms way, you will end up doing more harm than good. Thank you for your time.

Subject: Freedom of Choice

External Email

To whom it may concern,

Please vote against any mandatory childhood vaccinations. This is a gross governmental overreach. The government has no business making sweeping decisions for personal medical freedoms to be removed from parents or children.

For many decades we have heard and honored the phrase, "my body, my choice" if that's the precedence that's been set, why would in the world we change it?

Each person should have sovereignty over their own body and what they choose to do with it, whether we agree with their choices or not. Please do the right thing and protect peoples rights to continue to make their own medical decisions.

Thank you for your time and consideration.

---

My state government is deciding that a vaccination that isn't effective at prevent people from getting the virus or spreading it (and in some cases, getting hospitalized) is a legal issue for the state to get involved in. In 2020/2021, politicians were on national media NOT condemning (and in some circumstances celebrating) the blatant disregard for the law. Let's let people make their own health decisions. If I want to go out and get high on meth, and steal to get the drugs, now its not a big deal. If I want to not get the shot, I'M suddenly the menace and a danger to society. It's wrong. Leave people alone. Let law enforcement catch the real bad guys that are out the and leave us law abiding , productive citizens alone. Thank you!

Subject: Opposed to Proposed Policies

External Email

Hello,

I'm concerned about the WAC's being reviewed to possibly be revised and added to. Taking parental and individual medical freedom away and making this a government decision is unconstitutional. This is not the government's right and this needs to be stopped. The following proposed policies/WAC's are unconstitutional!

**PROPOSED POLICIES:**

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC

This blatant abuse of power needs to stop. I am NOT in support and oppose these possible changes. Please don't do this.

Thank you,  
Sara Samdal

Washington State Board of Health,

I am the father of a teenage daughter. In my opinion the science does not support forced vaccinations of Children. This is wrong on every level and I am 100% against it. Personally we did vaccinate our daughter, just as my wife and I have been vaccinated, however that is a decision we made for ourselves. Government mandated dictates like this will not be well accepted, even by people who support vaccines. This is a slippery slope to Fascism, and you may be surprised by the negative reaction.

In my personal opinion we should open everything, take off our masks, get covid and develop natural immunity and get back to normal. Half the population is not fooled by Covid being used as cover for Fascist overreach by our local and federal government.

Thanks

Subject: Totalitarian Law - WAC-246-100-070

External Email

Hello,

I'm writing this as a protest against your unconditional law of detaining Washington citizens.

My family and yours have worked extremely hard generation after generation to have a free society. Due to there hard work we've become one of the greatest places to live in the world. We have pushed invitation and technology year over year and increase a better life for much of are society. But with Covid the last couple of years WA government has lost its mind on these policies. We can now look at the data and see the lockdowns didn't make Covid spread any less, vaccines haven't slowed the spread, defunding the police isn't a good idea (look at Seattle), and so many more.

If you recall the 4 amendment is part of this country's foundation and we don't live in a Totalitarian society. But these laws your trying to but forth are just that. You really want your family and friends to be detained and injected for a virus that has show it to be like most other viruses that get weaker over time?

Below you'll see the former and current leaders of totalitarian countries and states. If this is what you want for US and all the military (men, women, children) that have fought an died for are freedoms to now be subjected to such Heinous rule. You should step back and take a deep breath and understand the slippery slope your in gauge in.

Thanks for time and understanding to this matter.

Shane

To the WSBOH: Forcing children to do a medical procedure issued by our government agencies against their will is Illegal!! The shot is not stopping the spread of anything. It has been a year for people to choose to get this shot and those of us who don't agree with it should not be forced against our will. Thousands of children will be taken out of school including mine. I refuse to be forced to inject a experimental medical procedure that hasn't proven to be effective by science. The other thing that concerns me is that the age group that is being targeted is NOT the demographic of people who have been affected by this virus. It has more negative effect on elderly or people with pre-existing conditions. This is wrong, immoral, unjust, and illegal!! I stand firm in my position against the forced mandates and believe our current government is ruining our country and taking away our rights and our freedoms. We live in a country that has a constitution that allows us freedom of speech and freedom of choice. Your taking that away and the consequences will be severely damaging to our children. Leave those of us alone, we choose not to have this done. Stop trying to force society into a socialism. I'm against our government and all that it stands for at the moment. Jay Inslee is wrecking our state. business, schools and lives. There is a 99.9% chance of surviving Covid 19 according to science. In 2018 2.1 million people died from tuberculosis according to the CDC but we don't hear about that. Does anybody die from influenza anymore? The government and mass media has put a name on this and has been bullying and fear mongering people into the vaccination. It is wrong in every way. We can live with this in society and we can survive without your shot. STOP THE MANDATES!! STOP THE ILLEGAL ACTS ON AMERICAN PEOPLE!! REPLACE JAY INSLEE WITH SOMEONE WHO WILL HEP OUR STATE - NOT HURT IT MORE. Sincerely Thomas Belaire

I am strongly against WAC 246-100-070. This is completely illegal and unconstitutional. Having health squads to patrol around and round up people and put them in isolation camps? Read the policy out loud and think of history. This cant be the solution. Strongly apposed WAC 246-105. thank god COVID is less harmful to children the the common flu. that is something we should be celebrating. To force a vaccination that has not been properly tested and the long term side effects are unknown. In simple terms the risk is not worth the benifit. Please consider my opposition to these proposed policies.

#### External Email

Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

2. Con

---

These proposed changes to our laws are unconstitutional. When the data of the ineffectiveness of the vaccine and of harm that is caused to a person are becoming more obvious with the facts daily. Demands that children be vaccinated against Covid-19 or be unable to attend public school, is against our rights as Washingtonians, and Americans. The lists are growing of young children who received the vaccine and develop heart conditions, or die from adverse effects. I will not allow my children to be a statistic of this nature. When the data is becoming more evident of the spike proteins from the vaccine affecting humans reproductive systems, I will not allow my children to become a statistic of this nature. Forced isolation or force to comply with an unwanted medical procedure is against our constitutional rights and a violation of the Nuremberg Code. Some words from the proposed law state " voluntary compliance" ... those two words are contradictory. Allow parents to make choices for their own children. Allow adults to make choices for themselves. But forcing compliance is unnecessary and unconstitutional. As Americans we should be fighting for what was fought for for us.

To: DOH WSBOH  
Subject: Comments for the Immunizations Technical Advisory Group

External Email

Good morning,

I am emailing to let you know that I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

To pass this mandate considering the above reasons is criminal. To subject our kids to potential long term health issues for something that is not a major risk to them is wrong. There is plenty of data and statistics proving that mandating this is wrong. You need to do what is right. Our kids need to be protected from this vaccine until further studies and longterm history can prove it is safe.

Please do your part in taking a stand against the mandate for our children.

Thank you,

Robynn Langley

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Informed Consent is required by law.

There are 95000 videos about vaccines, but here is one...

☐ More Harm Than Good ☐

The Pfizer Inoculations For Covid-19

Canadian Covid Care Alliance

<https://www.bitchute.com/video/RaQkNEzpAdQo/>

Sars-Cov-2 has never been isolated - no proof exists, 25 countries, 139 institutions+  
<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will.  
Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product -

Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Subject: Comment on PROPOSED POLICIES

External Email

When viewing the PROPOSED POLICIES to divest Washingtonians of our civil rights and allow us to be "involuntarily detained" (i.e. seized from our homes) and "isolated in a quarantine facility" (i.e. transported to camps), an image of Germany in the 30's flashes before my eyes.

I was married to a 2nd generation Holocaust survivor, and the horrors perpetrated on innocent private citizens in the Nazi Era are all too clear to me. Indeed Holocaust survivors of the camps, such as Vera Sharav, are speaking out publicly today and warning us that history is repeating itself.

I will not remain silent. I protest with every fiber of my being any move, ruling, or step towards implementing plans leading to concentration camps for State of Washington residents who have refused the COVID-19 shots.

As regards these injections, they are designed for a virus with a 99.99% recovery rate. I am in excellent health, my immune system is strong, and I am a threat to no one.

I exercise my right to refuse my informed consent to being injected with a gene therapy that is an experimental, untested drug--a right outlined in the Nuremberg Code and a right upheld by the Constitution and Federal Law.

As for injecting children of any age, it has been clearly demonstrated that children seldom contract the symptoms of COVID-19 and when they do, invariably recover rapidly and completely. Reports and statistics are showing disastrous adverse effects on injected children, and even death! Children must never, ever receive these shots. To mandate them for school attendance is the height of folly, and I would even say criminal.

I request that my comment be submitted to those present at the January 12th meeting of the Washington State Board of Health.

#### External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in the State of WA for the following reasons:

- There's no long-term safety studies on these vaccines (unlike all other currently required school vaccines). The mRNA novel technology has not been adequately tested. We need at least 5 years of meticulous testing / research before we can understand the risks (you'll find all other required vaccines will have been legally required to follow such a protocol). According to the FDA's own website, harms & risks from new medicines often aren't revealed until years later (the average drug is on the market for 3-5 years before it's pulled for known safety issues).

- A mandate would force our children to participate in a medical experiment against their will (a direct violation of the Nuremberg Code).

- COVID-19 vaccines have proven that they do not prevent infection or transmission, making it illogical to mandate.

- Studies show that if you've been previously infected by COVID-19 and get a vaccine, chances of adverse reactions increase by 2-4x. So lack of consideration for natural immunity is beyond dangerous for our children.

- The statistical risk of serious side effects or death from COVID-19 for school-aged children is extremely low.

- Children represent no danger to their parents, grandparent, community, teachers or fellow students.

- There wasn't even a correctly run Level One study to show efficacy or determine the safety profile of the vaccine in adults, and the study done on that recommends this vaccine to our children had less than 1000 participants and also was not considered a Level One trial (breakdown of Pfizer study here:

<https://www.canadiancovidcarealliance.org/media-resources/the-pfizer-inoculations-for-covid-19-more-harm-than-good-2/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/media-resources%2Fthe-pfizer-inoculations-for-covid-19-more-harm-than-good-2%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4a852325303f4cc01da908d9d1a74f80%7C11d0e2>>).

- In taking the COVID-19 vaccine, a viral gene is injected into the child's cells. This gene forces the child's body to make toxic spike proteins. These proteins often cause permanent damage in children's organs, including: their brain & nervous system, their heart & blood vessels (including blood clots), their reproductive system, and the vaccine can trigger fundamental changes to their immune system.

The most alarming point about this is that once these damages have occurred, they are irreparable: you can't fix the lesions within their brain, you can't repair heart tissue scarring, you can't repair a genetically reset immune system, and this vaccine can cause reproductive damage that could affect family generations.

- Per Dr. Elisa Song (pediatrician): "As Omicron is set to affect virtually everyone across the globe, regardless of vaccination status, receipt of booster, or prior infection - the FEAR that has driven personal and policy decisions over the past 2 years must STOP. And that begins with acknowledging the accumulating evidence that while Omicron is clearly more transmissible & able to evade vaccines, booster, natural immunity & monoclonal antibodies - it is NOT more serious.

As we see increases in child Omicron cases - the RATE of hospitalizations & death remain stable compared with prior strains. For children:

□ Hospitalization rates are still 0.8%

□ Death rates are still 0.01% (every death is one too many, but we need to know the numbers to make sound public health policy)

□ MIS-C remains rare

□ These numbers hold true for Omicron, Delta, Beta, Alpha, etc...

(<https://www.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/children-and-covid-19-state-level-data-report/>

)

Data out of South Africa show that Omicron has LOWER hospitalization rates than Delta & Beta. Hospitalization rates were noted as follows:

□ Omicron: 38 per 1000

□ Delta 101 per 1000

□ Beta: 131 per 1000

(<https://www.nytimes.com/2021/12/14/world/africa/omicron-south-africa-study.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nytimes.com%2F2021%2F12%2F14%2Fworld%2Fafrica%2Fomicron-south-africa-study.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4a852325303f4cc01da908d9d1a74f80%7C110>

A global meta-analysis of 77 studies found that 40-54% of people with SARS-CoV-2 infection are ASYMPTOMATIC. Which may be good or bad news depending on how you look at it. But however you look at it - if you get infected with SARS-CoV-2, there's a 50/50 chance that you will have NO symptoms.

(<https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2787098>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2Fjamanetworkopen%2Ffullarticle%2F2787098>

I am not in any way minimizing the gravity of how serious COVID can be for some. But 2 years into the pandemic, we need to move out of the uncertainty of 2020 & the fear of 2021, and step into 2022 with a calm plan.

And that starts with acknowledging that getting INFECTED is NOT the same as being sick.

Having a positive test should not invoke panic, fear, guilt or shame. Don't be cavalier. But don't feel helpless."

-----

Last, if you're considering mandating a vaccine for children, I'd be most grateful if you could please provide the following information, in accordance with statutory legal requirements.

1. Can you please advise the approved legal status of any vaccine and if it is experimental?
2. Can you please provide details and assurances that the vaccine has been fully, independently and rigorously tested against control groups and the subsequent outcomes of those tests?
3. Can you please advise the entire list of contents of the vaccine that a child would receive and if any are toxic to the body?
4. Can you please fully advise of all the adverse reactions associated with this vaccine since it's introduction?
5. Can you please confirm that the vaccine you are advocating is NOT experimental mRNA gene altering therapy?
6. Can you please confirm that the children will not be under any duress from the state of WA, in compliance with the Nuremberg Code?
7. Can you please advise of the likely risk of fatality, should a child who takes the vaccine under mandate be unfortunate to contract Covid-19 and the likelihood of recovery?
8. Can you please advise if a child were to experience any adverse reactions is the manufacturer of the vaccine liable? If the manufacturer isn't liable will the Washington State School board or the State of WA be responsible & liable as it is their request that a child have the vaccine in order to attend school?

This decision should be weighed with upmost care, consideration and latest research. And the decision itself should be backed by actual said research & studies.

Thank you. - Whitney & Regan Mack

Subject: No to vaccine mandates for kids

External Email

Please DO NOT mandate Covid-19 vaccines for students. They are unnecessary as the risk of Covid to children is so extremely small. The vaccine has proven to lose efficacy quickly and now needs to have continual "boosters" to have affect. My children have had Covid and had no issues. They now have some level of immunity. Which many studies show is a stronger, more robust, broader based, longer lasting immunity then they would get from continual vaccinations. All their friends, vaccinated or not have also had Covid. The vaccine did not make a difference with symptoms or with catching or with spreading Covid. In fact, our observation has been that the only people who are not getting Covid right now are the people who have already had it. Let parents CHOOSE if they want to vaccinate their children with an EUA vaccine that has no long term studies, is not effective at preventing infection.

Thank you,  
Tammy Kvinsland

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We can not risk our children's future health with an untested, emergency use vaccine. Children are at EXTREMELY LOW RISK. This is America, we should not mandate our health with unproven safety studies.

I would like to voice my concern over the mandating this vaccine (not immunization) as a requirement for school. We do not have the scientific evidence of long term effects this has on children. We have already seen the immediate effects it can have, but without proof, why should anyone be forced to be vaccinated in trade for education? Please provide proof to the public on how this is a good idea in the long run. I work within Pharmaceuticals and am pro-vaccine. I'm vaccinated fully against Covid myself, but I can tell you from reading the study designs and also lack of clinical trial thoroughness, that I would be uncomfortable as a parent to inject my child with this. There are other means we should be looking at. There are preventative treatments we can look at as well. I would ask you as a human, to understand that this is NOT a black and white decision. There is a lot that we are all trying to learn from this, but mandating the vaccine on children in order for them to go to school will only hinder our society in the future. I would hope that you all, as leaders, would not be ok with this. Let the people have a choice. I know several children who have had covid and it hasn't impacted them. Some didn't even know they had it because they were asymptomatic. Please, use your logic and critical thinking. Your own, not what you are being fed. You are all smart individuals and know what is right. I think the state of WA is learning right now that mandating isn't the answer. Why double down on something that is not working? Why not try to find other solutions? I would challenge you to think deeper into a solution that will impact people you do not even know. On the issue of using law enforcement to detain a person or group to be isolated. Can you please stop and think of how insane this is? Does concentration camps ring a bell to you? You do see the correlation between the two, right? If a person or family is covid positive and have a home that they dwell in, they should have the freedom to isolate and recover there. Taking them away and throwing them into a detainment camp is not humane at all. I understand you are looking at people refusing to comply with isolation, treatment protocols, but I would take a guess that there aren't many, so in that sense, why waste money on running these facilities? Is it a show to the rest of us to show us you have ultimate power? I would again challenge you to think differently for a solution. Do not repeat history. You are leaders who are in a position to do things different than the past and to do better for mankind, not make it worse. The division around all of this is horrific and we need leaders to bring us together, not divide us even further like you are wanting to do. If you are able to rest your head at night knowing that you are taking freedoms away from people, then I can only pray for your soul. Thank you for reading this. Please do what is right for freedom's sake. You may think you are making the right decision or going along with it, but in the end you may in fact hurt more people with both of these matters.

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Angela Winston

Vast amounts of data and information show COVID risk to healthy children is negligible at best, and that inflammation risks especially to boys is a relevant concern. COVID is endemic and seasonal, the vaccines still allow infection and spread. As a fully vaccinated parent who supports vaccination, this specific vaccine should be weighed for each individual family and their personal medical doctors. A blanket mandate on kids for this specific vaccine does not follow science or reason and should not be allowed. Thank you.

I don't believe there ever been a study by the cdc on antibody immunity and they have never answered the question honestly. Also why would you use an experimental vaccine on our most precious children without more studies. Children from my understanding from CDC are not at high risk! This is crazy because there so much we don't know. None or very little news from CDC on side effects and I personally know people around me who have suffered severe side effects. I'm sorry this doesn't add up!

I oppose involuntary quarantine and childrens vaccines. Children are generally safe from the virus and adults can choose to get the vaccine or not. There is no real benefit from requiring children to get a vaccine for Covid. Involuntary quarantine is a hardship that will destroy lives. There is no benefit from requiring quarantine as the individual would have already been spreading the virus by the time you realize they are even sick.

Subject: Public Comment: C19 Vaccination Requirement for k-12 Children

External Email

Washington Board of Health Members,

As a parent of multiple public school students in King County, I would like to go on record that I vehemently oppose any sort of Covid 19 vaccination mandates on our youth. Science simply does not support enforcing a vaccine that as yet has only been granted emergency authorization. A number of years of rigorous trials/studies are still required to determine whether the asserted benefits merit the actual risks. According to the statistics, the healthy are at minimal danger for long term viral consequences from Covid 19 & its variants. The current experimental injections are increasingly being shown to have little efficacy in preventing the contraction or spread of the newer strains. Furthermore, children are known to be at minuscule risk of significant harm from this virus, & they are certainly not major spreaders. For those who feel vulnerable & are confident in its safety, the vaccines are already an option - therefore, the willing are protected.

It would seem that this push to bully parents to act against their conscience when it comes to their own precious children, is nothing more than yet another baseless, obscene, unjustified abuse of power. I, and many others, will most assuredly be withdrawing our children from the public school system rather than potentially endanger their health by forcing them to become unwilling test subjects in the largest, most rushed medical experiment in human history..

This is America. Please remember that!

Sincerely,

Wendy Middleton

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

Good Evening,

I hope this email finds you all in good health. This is a first for me, as I've never commented on board meeting, much less a special meeting. I've never felt the need to, that is, until the safety of our children is on the agenda.

Believe me when I say that I take the well being of our children with severity and consideration.

And in that serious consideration of the current dilemma facing our community and world, that being COVID 19, when being presented with the circulating information on both sides of the debate, I can not comfortably, nor hold my peace in good conscience. The fact is, we do not know enough about the vaccine to guarantee that it will safe guard our children from further harm. They are already at low risk and more apt to build a natural immunity to the virus than an adult. There is also their development to take into consideration. How do we know whether or not this "emergency use" sermon will not affect their hormonal and structural makeup? How do we know whether or not we will regret such a decision five, ten, twenty years down the road. How do we think history will look upon us?

It is a misconception that their is even an FDA approved vaccine in the states. A court ruling even judged that the comirnaty FDA approved vaccine is not the same, nor in league with the current Pfizer vaccine.

I ask then that careful consideration be placed on potentially dangerous mandates. I would also like to draw attention to the preliminary ongoing investigation carried out by the CDC in relation to inflammatory heart conditions.

"An epidemiology Ph.D. called Tracey Hoeg learned this recently. She posted slides from the CDC's own website showing that rates of myocarditis -- a potentially fatal heart inflammation -- are extremely high in young people who have taken the vaccine. That's not in dispute anymore; the CDC's preliminary investigation has just confirmed a link between the vaccine and myocarditis."

This quote was from fox news, the link follows,

<https://www.foxnews.com/opinion/tucker-carlson-covid-vaccine-dangerous-kids-big-tech>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.foxnews.com%2Fopinion%2Fcarlson-covid-vaccine-dangerous-kids-big-tech&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8ec1acadfa29494fb0ce08d9d1a10ae9%7C11d0e217>>

Epidemiologist Tracey Hoeg is also apart of an on going research for adolescents that are affected by this disease (Myocarditis).

The following is Hoeg's and her colleagues conclusion to their analysis findings in the MedRxiv article (link below).

SARS-CoV-2 mRNA Vaccination-Associated Myocarditis in Children Ages 12-17: A Stratified National Database Analysis

Conclusions Post-vaccination CAE rate was highest in young boys aged 12-15 following dose two. For boys 12-17 without medical comorbidities, the likelihood of post vaccination dose two CAE is 162.2 and 94.0/million respectively. This incidence exceeds

their expected 120-day COVID-19 hospitalization rate at both moderate (August 21, 2021 rates) and high COVID-19 hospitalization incidence. Further research into the severity and long-term sequelae of post-vaccination CAE is warranted. Quantification of the benefits of the second vaccination dose and vaccination in addition to natural immunity in this demographic may be indicated to minimize harm.

<https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

As pointed out by these specialists, more research is warranted. Let us not research on our own flesh and blood, on our future generations. What could this potentially foreshadow for children but stunted and altered lives, if not even premature death. Please consider the safety of your children as you discuss and vote on their future.

Thank you for your time.

---

To: DOH WSBOH  
Subject: Rulemaking Petition - Chapter 246-105 WAC

External Email

As parents of a current third grader and soon-to-be kindergartener, we find this agenda item incredibly concerning.

Let's start by explaining my husband and I's position here. We are by no means what anyone would consider "anti-vax" parents. Our children are current for all required vaccines to date, with exception to the flu vaccines and what we are calling a COVID vaccine. We have done quite a bit of research for each vaccine offered for our children, and feel we are fairly well educated when it comes to the medical care of our children. We are not doctors or nurses, but we do take our time to look into proposed treatments and vaccines.

One of our responsibilities as parents is to make the most effective and appropriate decisions we can to ensure the safety and well being of our child(ren). We feel that the proposed WAC here infringes on our rights to do just that. We also feel it is an overreach of power when we are discussing requirements for medical procedures with very little study and history backing them. There are no studies to show what kind of long-term effects these procedures will lead to. There is nothing to say that what we are putting into our children's bodies today won't have adverse effects on their reproductive, neurological, or physical health 10+ years down the road. There are also no legitimate studies that show a considerable benefit to requiring CHILDREN to participate in these shots. Even the CDC's data shows that school-age children are part of the lowest risk category for the virus!

Should the Washington Board of Health choose to move forward with requirements of COVID vaccination in order to access PUBLIC EDUCATION, we will be forced to find alternative education means for our children.

Thank you for your time and thoughtful consideration of the voices of parents in the state of Washington when it comes to this matter.

Signed,  
Sarah and Mikel Kober

External Email

Dear Chair Grellner, Vice Chair Pendergrass, and

Regarding including Covid-19 to WAC 246-100 and adding Covid-19 vaccination to school immunization requirements in WAC 246-105.

I adjure you to REFRAIN from adding--or at the very least delay adding--Covid-19 vaccination requirements to our state code. The time period for testing the true "safety and efficacy" of these shots has not been sufficient. Requiring them --especially of our children-- is unconscionable.

We have plenty of reason as a state and nation to question the safety and efficacy even with the data we have so far.

On a personal note, I have three people very dear to me experiencing debilitating adverse effects after receiving COVID shots. One was required to take the shot in order to keep her job--and no exemption was allowed, though she sought one. She is experiencing ongoing migraine headaches. Another lost use of her dominant arm after the initial vaccination, followed by the loss of her dominant leg after receiving the booster shot. The third is experiencing ongoing fatigue and malaise.

I have two friends whose husbands have experienced permanently disabling adverse effects after receiving the shots.

None of these people has legal recourse to be reimbursed from the pharmaceutical companies for the damage done or the medical and hospital bills incurred.

Leaving the personal side of the story, these are NOT "rare" side effects as published by mainstream media.

More than half of the reports of adverse reactions to vaccines on VAERS (which has been in place since 1990) are now from COVID19 shots--whether Pfizer, Moderna, or J & J. Over 800,000 reports in ONE YEAR alone. Furthermore, thanks to Covid 19 vaccines, death reports after vaccination on VAERS have more than tripled. Again, in ONE YEAR. More information and discussion on the validity of these figures is available at [openvaers.com](https://openvaers.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fopenvaers.com%2F&data=04%7C>>, or at the VAERS website.

I am sure you have noted that Washington state (as of 1/6/2022) has the third highest incidence of active COVID-19 cases in the nation (569,666), AND that the current active cases represent more than half the number of total cases (919,040) (Source: [Worldometer.com](https://www.worldometer.com)). So, even though our rate of vaccination has continued to rise, our cases are rising even more. In my own county the hospital is overwhelmed.

Why is this? What happened to the "safety and efficacy" of the vaccine?

Without being able to answer this question, or adequately address the formerly made points, there is NO WAY you (or our legislature) can with good faith make rules for the people of our state that include requiring COVID-19 vaccinations.

Please consider deeper study of prophylaxis and early treatments of COVID-19 that have already been shown safe for generations, and are even now in clinical trials showing efficacy as well.

Thank you for considering my comments. I lived with febrile seizures as a child and into young adulthood--what my family later learned was most likely an adverse reaction to a childhood vaccine. What health issues and effects are we inflicting on the children now being immunized for COVID-19? The cost of our hasty decisions made out of fear are yet to be fully realized.

Sincerely,

I oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will. I also oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school.

To Whom It May Concern,

Looking at this Proposed Law for Involuntary Quarantine (PROPOSED POLICIES: • Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.) to isolate a person(s) or a family is very wrong in many areas. When people in office get elected they are supposed to work for the people to help them as our tax money pays their salaries. I understand from reading this that the Government feels this is necessary, but it is not. Forcing a person(s) for a medical examination, testing, treatment, counseling or a vaccination is completely appalling!

During this time there is too much information that is not given to the public on the vaccines and possible side effects it may have that will be different for each individual person(s). My wife, mother and other family members including myself should not be vaccinated for other health reasons, like a brain aneurysm and blood clotting concerns, ect. Don't you think that this should be based on each person(s) as everyone is different? It would be one thing if there were people trying to intentionally infect others, but that is not the case.

Hearing what some doctors say about Covid has been disturbing. Example is when a doctor states he does not want to help anyone that is not vaccinated and that person should just suffer is maddening. Doesn't this go against the oath that Doctor's take to care for others no matter what the situation is at that time?

We have had worse situations in the past and many people die every year from the common flu, but oddly enough everyone only dies from Covid 19 anymore. If the vaccine is suppose to work, why have I seen the last set of employees to get Covid were fully vaccinated and out of 14 only 2 were not vaccinated, tells me it doesn't work. Why is the vaccine not working, well maybe because a virus is constantly morphing and changing.

Why are there so many highly educated people and Doctors being shut out of the media? They are trying to pass on the ways to prevent these issues instead of waiting till it is too late? Doctors are having to spread their knowledge & expertise through Podcasts and are getting banned from YouTube & Twitter for no good reason. Is it because they are trying

to educate and help society beat the odds and all diseases by being preventative? Taking vitamins and taking care of your body is a huge way to defend against any type of virus or cold, why is boosting your immunity & getting healthy not being spread through the media & News?

Again, our tax dollars pay for Government salaries, but that money should also be used to help save & educate the public. Instead of trying to control the situation, help to prevent it!

Thank you for taking the time to review the frustration that many of the public has in regards to this situation.

I urge you to reject the imposition of a Covid vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug to cause severe side effects and death.

Thank you for your time,  
Mary Harris

---

I do not want the state mandating these new vaccines for children that are close to zero risk from Covid. My husband and I are both vaccinated and are not anti-vax (even though the definition has been changed). If this is approved, we will be pulling our children from public school, my husband who is a teacher will be considering a different profession, and we will seriously be considering leaving this state. And what the heck is this all about? " involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntary comply with requests for medical examination" what country is this??

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

\* Severe morbidity and cases of death resulting from the vaccines have been reported but are not yet well understood. Children have proved to be very low risk for morbidity and/or death due to contraction of the covid-19 viruses. The risk the benefit is currently unknown. It is irresponsible and inhumane to treat an entire generation of children as "the study".

\* The existing vaccines are understood to potentially provide reduced symptoms of covid, if the viruses are contracted and not to prevent the contraction of the virus or even to reduce the spread of, as is proven by the requirement to continue wearing masks and socially distancing regardless of vaccine status. The existing vaccines are expected to provide some "immunity" and reduced symptoms for a limited amount of time, approximately 6 months, at which time all benefits of the vaccine are gone and a booster is required. It is not reasonable to have our children get booster after booster every 6 months.

\* The viruses evolve and new variants are "detected" frequently. This implies that whatever the current vaccine formula is, it will be outdated anyway when the new "variant" is detected.

\* The government should have no say in the health care requirements of our children. The government agencies routinely cite "Mother's rights" when they return beaten children to their violent parents. Extend "Mother's rights" to responsible parents who would like to wait for more safety studies prior to inoculating their children with a new drug.

Dear Sirs and Madams,

I am writing to communicate my opinion and concern over mandating child Covid-19 vaccines for schooling, as well as utilization of a health officer to enforce involuntary quarantine for people or families if they refuse to comply with recommendations, which include the Covid-19 vaccines.

Covid-19 shots should never be mandated for anyone in our country, and especially our children. This vaccine, which is actually genetic therapy, is still under experimental emergency use authorization, and a mandate for vaccination tramples the freedoms we have as individuals and parents to do what we feel is best for OUR OWN children. It has been shown that children are extremely low risk to contract or get severely ill from Covid-19. PLEASE REJECT the mandate.

I do not believe it is government's responsibility to forcibly require isolation and quarantine for individuals. As with any contagious disease, people should be advised to stay home if they are sick. Government agencies should not be given power to decide who should and should not be quarantined, and then use force to make it happen. Again, this tramples our freedoms established in our great country.

Thank you for your service, and I am praying for wisdom for you all. Please vote to keep our freedoms in tact in this state. As a parent, I am extremely concerned with the direction our state is headed.

Sincerely,  
Sarah Carossino

Stop focusing on the younger population as we know they are not at the same risk as the elderly population and their transmission is lower. With the new omicron variant, we have more proof now than ever before that the vaccinated can still get and transmit Covid. Why are we allowing 50,000 adults in a football stadium without a vaccine yet considering not allowing our kids to go to school unless they are vaccinated. Schools are not requiring a flu shot and the flu is more deadly than Covid for children, so what is the logic behind requiring a Covid shot? Our state government should NOT be mandating Covid vaccines on our children. These medical decisions should be left in the hands of parents.

These PROPOSED POLICIES are over reaching and immoral and must not be allowed to take over our freedoms and put us under draconian control. The right to choice for our own bodies is a basic freedom you are trying to strip away. The vaccine should be a choice.

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

We cannot allow our medical freedom to choose be stripped away from us.

Dear health official,

I am writing to express my vehement opposition to any vaccine requirements for students in our state. Being a father of 2 school age boys, I am sincerely pleading for their safety. Please put your preconceived notions and politics aside and look at the facts.

The scientific evidence does not support the risk / benefit of COVID vaccine for males in this age group.

1. Risk of Myocarditis in young males is higher for vaccinated than for those who got COVID.

Ref. <https://www.nejm.org/doi/full/10.1056/NEJMc2115045>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056%2FNEJMc2115045>>

2. Vaccination does not prevent the spread of COVID to people in their household. In fact it barely reduces transmission relative to unvaccinated.

"We found that the secondary attack rate in fully vaccinated household contacts was high at 25%, but this value was lower than that of unvaccinated contacts (38%)."

Ref. [https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2FPIIS1473-3099\(21\)00648-4%2Ffulltext&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C5f591ed19e2743961ee208d9d1f826b0%2F](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2FPIIS1473-3099(21)00648-4%2Ffulltext&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C5f591ed19e2743961ee208d9d1f826b0%2F)

3. Risk of severe illness in children is basically non-existent.

"A total of 815 articles were identified. Eighteen studies with 1065 participants (444 patients were younger than 10 years, and 553 were aged 10 to 19 years) with confirmed SARS-CoV-2 infection were included in the final analysis. All articles reflected research performed in China, except for 1 clinical case in Singapore. Children at any age were mostly reported to have mild respiratory symptoms, namely fever, dry cough, and fatigue, or were asymptomatic. Bronchial thickening and ground-glass opacities were the main radiologic features, and these findings were also reported in asymptomatic patients. Among the included articles, there was only 1 case of severe COVID-19 infection, which occurred in a 13-month-old infant. No deaths were reported in children aged 0 to 9 years."

Ref. <https://pubmed.ncbi.nlm.nih.gov/33262177/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F33262177/>

4. All available vaccines are for emergency use authorization. For goodness sake please recognize the rules of law!

"WHAT IF I DECIDE NOT TO HAVE MY CHILD GET THE PFIZER-BIONTECH COVID19 VACCINE?"

Under the EUA, there is an option to accept or refuse receiving the vaccine. Should you decide for your child not to receive it, it will not change your child's standard medical care."

Ref. <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

I implore that you look at the facts objectively here and end this doom spiral of vaccine requirements. Eventually the courts will agree as well, and YOU will be held accountable.

In conclusion, humans are not cell phones or windows software that need to be upgraded

every 2 weeks to deal with the latest virus threat.

Thank you.

I Oppose Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID -19 shots for consideration of mandating the shots for school. I firmly oppose CODID-19 shot mandates, period.

I SUPPORT Agenda Item #11, Informed Choice Washington's Petition for Rulemaking. This petition asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list of shots.

My primary concern is my child's health. Severe outcomes from COVID-19 are very rare in children, whereas the vaccine safety data is incomplete and there is no long term safety data. I think there is more risk to my child's health to take a vaccine with unproven safety profile than the risk that they have a bad outcome from infection with SARS-COV2, the virus that causes COVID-19. Additionally, vaccination does not prevent infection or transmission of the SARS-COV2 virus and will therefore not slow the spread of the virus or bring an end to the pandemic.

These shots should not be mandated. Every family and every person has a right to their own choice.

The United States of America had historically been known to be a free country. This is the reason so many people immigrate here. They are fleeing the oppressive controlling governments of their own country. I am vehemently opposed to taking away our medical freedom! It is our personal right to choose what happens to our own bodies and those of our children. To force people to be injected with anything is wrong. Its against our rights and that of our constitution. Vaccinations should be a choice. Period. No one is above another. No one has the right to insist on changing or hurting another person by force. There are many people with health issues that the vaccine will make worse and or kill. We've seen it happen. Please, please do not make mandatory vaccines for anyone, especially our children. The future of our country. And the idea of detainment is criminal.

Vaccinate the Young?

According to the data from the CDC (Children and COVID-19: State-Level Data Report) children:

1. Represent 17.4% of all covid cases.
2. Among states reporting (24 States and NYC), children ranged from 1.8%-4.1% of their total cumulated hospitalizations, and 0.1%-1.8% of all their child COVID-19 cases resulted in hospitalization.
3. Among states reporting (46 States, NYC, PR, and GU), children were 0.00%-0.27% of all COVID-19 deaths, and 5 states reported zero child deaths.
4. In states reporting (46 States, NYC, PR, and GU), 0.00%-0.03% of all child COVID-19 cases resulted in death.

From this data we can see that children result in roughly 2-4% of cumulative hospitalizations and only 0.1%-1.8% of all their child COVID-19 cases. The best news is that 100%-99.97% of the COVID-19 cases in children resulted in total recovery.

This means that COVID-19 cases in children place little demand on hospital resources and, that there is almost 100% recovery for children. Which means that there is relatively little financial cost to the State and almost zero loss of life for children from this disease.

We also know that 1 in 2680 young men develop acute myocarditis/pericarditis in adolescents following Comirnaty vaccination in Hong Kong. This means that there is known heart damage resulting from this vaccination, especially in young males. We have no clue what long term effects there may be from this experimental vaccination.

The obvious risk vs benefit conclusion for COVID-19 is DO NOT VACCINATE THE YOUNG.

The head of Indianapolis-based insurance company OneAmerica said the death rate is up a stunning 40% from pre-pandemic levels among working-age people. It's not elderly people who are dying, but "primarily working-age people 18 to 64" who are the employees of companies that have group life insurance plans through OneAmerica. Just to give you an idea of how bad that is, a three-sigma or a one-in-200-year catastrophe would be 10% increase over pre-pandemic," he said. "So 40% is just unheard of. 40% is a twelve sigma event. That rules out the increased death rate as an expected random event.

In most cases, State, Federal, and political appointees are protected from personal liability suits by the position they hold. However that protection does not hold if the individual does not do what a reasonable person would be expected to do in a particular situation. Given the known damage that vaccination is known to cause youth, any person that has a part in mandating vaccination for youth, would be open to a personal liability suit.

Children are extremely low risk for getting sick with Covid -19. Therefore there really is no reason to vaccinate children with a drug that isn't FDA approved.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It's still under an EUA and has not had proper safety studies. Completely experimental. Our children are at more of a risk of suffering from adverse reactions from the covid 19 vaccine than they are getting I'll from covid 19.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Children are at extremely low risk of Covid. The vaccines are still only EUA (emergency use authorized). There are no long-term studies to document any history of safety. Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease.

You are using children as participants of an experimental drug upon the advice of an evil man, Anthony Fauci, who should be prosecuted for crimes against humanity. Why in the world would you even consider taking away the rights of parents to protect their children from a vaccine that has proven ineffective? If you are complacent for such an evil act you are stupid, have no capacity for critical thinking and have no knowledge regarding risk and benefit reasoning. Shame on you for even considering this unlawful act.

The proposal is that children in our public schools should be subject to mandatory Covid vaccinations.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Children are LOW RISK for Covid-19. There is no scientific reason to subject children in public schools to receiving mandatory vaccinations for Cov-19 when they are at such low risk level, and secondly, when the Emergency Use Authorization is in place: as long as the EUA is in place, by law it is illegal to mandate the medical therapeutic because the therapeutic is still experimental/in trial. This means that it would not only be unnecessary but illegal if children were forced to receive mandatory vaccinations were they to attend public school. I do not support mandatory vaccinations for anyone, much less children.

A Covid vaccine requirement mandatory for school admission is ridiculous, completely absurd and wrong on many levels. There is not enough data showing the effectiveness of this vaccine in children and there definitely is no data showing long term effects and negative implications in our youth. I am against this proposal. Covid vaccines should NOT be mandatory for a virus that has such a high recovery rate in children. I am appalled that this is even being discussed in our state and I will not adhere to this requirement for my children.

Father of two boys in Issaquah School District here. I am fully vaccinated and agree that the existing COVID vaccines help reduce hospitalization and deaths in vulnerable populations.

I oppose vaccination requirement for K12 students for the following reasons:

1. While vaccines demonstrated some benefits for 5-11 age group prior to EUA approval, its efficacy against recent strains such as Omicron is not yet confirmed by clinical data.
2. COVID vaccine for this group has been approved under EUA (Emergency Use Authorization). There is no precedent for conditioning child's ability to learn on taking a vaccine that has not been fully approved by FDA and remains in a clinical trial.
3. Vaccines may reduce but clearly do not provide adequate protection against the transmission. This is already addressed by the existing mask mandate and special measures taken by schools.
4. Based on recent vaccination numbers and survey responses, the mandate is likely to result in 25% of children being forced out of public education system. This number is likely to be in 40%-50% range for Hispanic and Black populations.

Forcing vaccination of kids under age 12 is unlikely to result in noticeable health benefits given insignificant impact of COVID on this age group, while implementation of the mandate will have devastating effects on education and mental health of children who will be forced out of the public education system.

Thanks,

Vladimir

To whom it may concern,

As a parent and a public school educator I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares, and any other mandates ordering citizens to go against their Constitutional rights to manage our own health care for themselves and their children.

This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

Again, I am speaking as one of "We the People" I am adamantly opposed to a covid vaccine requirement for any and all children!

Thank you for your time.

To whom it may concern,

I want to let you know that I am strongly against the vaccine mandate for children. This is a complete abuse of power for a virus that has a 99.8% survival rate.

To make children get the vaccine with out the proper studies and answers on what could irrevocably happen to them because of the vaccine would be a complete overstep and those involved in the approval of this should pay for any adverse effects that's these children have.

Please do not consider putting our children, our future at great risk.

Thank you,

Sunny Konop

I believe that Covid shots should absolutely not be a requirement for our children to attend school or child care facilities. These immunizations are still only eua authorized emergency use only. Many doctors do not deem them safe nor do they know the long-term effects of these shots. Dr Ben carson, a very reputable doctor has said they should not be used on children as they are extremely low risk for covid. Again shots are eua emergency use only authorized for children and should not be used on them.

---

Sent: 1/6/2022 9:42:40 PM  
To: DOH WSOH  
Cc:  
Subject: Covid 19 Vaccine Requirement

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Terri Scott

#### External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It's a lie that Americans were told repeatedly in the all-out government and media effort to get every living being in the United States jabbed: "Vaccines stop the spread."

President Biden himself told the known lie in October 2021, and even "fact checkers" wouldn't back him up.

"We're making sure healthcare workers are vaccinated because if you seek care at a healthcare facility, you should have the certainty that the people providing that care are protected from COVID and cannot spread it to you," Biden claimed.

It is important to note that this was a deliberate lie to mislead the American people into taking the vaccines, regardless of individual risk. CDC Director Rochelle Walensky

had admitted a month earlier that the Covid vaccines didn't prevent the spread of the virus.

"Our vaccines are working exceptionally well," Walensky claimed. "They continue to work well for Delta with regard to severe illness and death, they prevent it. But what they can't do anymore is prevent transmission."

The viral loads in the vaccinated and unvaccinated proved to be similar, as the CDC stated in a document released in July.

"Today, some of those data were published in CDC's Morbidity and Mortality Weekly Report (MMWR), demonstrating that Delta infection resulted in similarly high SARS-CoV-2 viral loads in vaccinated and unvaccinated people," the CDC report said. "High viral loads suggest an increased risk of transmission and raised concern that, unlike with other variants, vaccinated people infected with Delta can transmit the virus."

Since then, Covid vaccines have become major vectors for both the Omicron and the Delta variants. Indeed, in September, Becker News reported that higher vaccination rates appeared to correlate with more Covid-19 infections. This trend was confirmed by a Harvard-led study of 68 nations and 2,947 counties in the United States that was

published in the European Journal of Epidemiology in December.

But the question remains: Why? Was the inability of the “vaccines” to stop infections or the spread an oversight on the part of scientists or was it an inherent flaw in the mRNA shots’ mechanism?

More importantly, was this a design flaw or did the vaccines work exactly as intended?

Two highly esteemed doctors have produced scientific findings that show that not only do these mRNA shots fail to stop the spread of an airborne virus like Covid-19, they are unable to prevent transmission.

First, let’s get the backgrounds of the medical researchers. Apparently, since truth is publicly associated with “authority,” especially among the scientifically illiterate, let us examine the credentials. According to their short biographies, they are quite impressive.

Dr. Bhakdi has spent his life practicing, teaching and researching medical microbiology and infectious diseases,” the Doctors for Covid ethics website states. “He chaired the Institute of Medical Microbiology and Hygiene at the Johannes Gutenberg University of Mainz, Germany, from 1990 until his retirement in 2012. He has published over 300 research articles in the fields of immunology, bacteriology, virology and parasitology, and served from 1990 to 2012 as Editor-in-Chief of Medical Microbiology and Immunology, one of the first scientific journals of this field that was founded by Robert Koch in 1887.”

“Dr. Arne Burkhardt is a pathologist who has taught at the Universities of Hamburg, Berne and Tübingen,” the article continues. “He was invited for visiting professorships/study visits in Japan (Nihon University), the United States (Brookhaven National Institute), Korea, Sweden, Malaysia and Turkey. He headed the Institute of Pathology in Reutlingen for 18 years. Subsequently, he worked as an independent practicing pathologist with consulting contracts with laboratories in the US. Burkhardt has published more than 150 scientific articles in German and international scientific journals as well as contributions to handbooks in German, English and Japanese. Over many years he has audited and certified institutes of pathology in Germany.

The article then states why these mRNA shots are incapable of stopping infection and transmission of Covid-19.

A fundamental mistake underlying the development of the COVID-19 vaccines was to neglect the functional distinction between the two major categories of antibodies which the body produces in order to protect itself from pathogenic microbes,” the doctors note.

“The first category (secretory IgA) is produced by immune cells (lymphocytes) which are located directly underneath the mucous membranes that line the respiratory and intestinal tract,” they point out. “The antibodies produced by these lymphocytes are secreted through and to the surface of the mucous membranes. These antibodies are thus on site to meet air- borne viruses, and they may be able to prevent viral binding and infection of the cells.”

“The second category of antibodies (IgG and circulating IgA) occur in the bloodstream,” the doctors go on. “These antibodies protect the internal organs of the body from infectious agents that try to spread via the bloodstream.”

“Vaccines that are injected into the muscle – i.e., the interior of the body – will only induce IgG and circulating IgA, not secretory IgA. Such antibodies cannot and will not effectively protect the mucous membranes from infection by SARS- CoV-2,” the article

continues. "Thus, the currently observed 'breakthrough infections' among vaccinated individuals merely confirm the fundamental design flaws of the vaccines."

Measurements of antibodies in the blood can never yield any information on the true status of immunity against infection of the respiratory tract," they add. "The inability of vaccine-induced antibodies to prevent coronavirus infections has been reported in recent scientific publications."

In other words, there was never a time when any scientist could claim these "vaccines" could "prevent transmission" based on any empirical evidence. They either lied about claiming they knew that they could stop transmission or they deliberately designed the "vaccines" to be vectors for virus transmission in order to justify universal vaccine mandates.

Thus, while the scientific data suggest the mRNA shots being marketed as 'vaccines' may correlate with a lowered risk of hospitalization and death among the 'at- risk' segment of the population, the vaccines are not an impediment to infection or transmission.

Therefore, vaccine mandates and vaccine passports are irrelevant from a public policy standpoint. They do nothing but balkanize society, violate individuals' health rights, and introduce more long-term medical unknowns for Americans who are not significantly at-risk from Covid-19 (such as those who are young or have natural immunity).

Please consider the basic human rights that your decision today may strip away from the common man.

The mRNA vaccine has not been shown effective at preventing people from becoming ill with the virus; Especially the newest variant.

The CDC and pharmaceutical companies have not proven to anyone's satisfaction that the vaccine is more safe for children than the virus itself is!

It is the role of parents to make these critical decisions for their children.

If the Department of Health chooses to assume this role, many parents will lose trust altogether.

Our community is well aware that there are financial power players that are imposing a pressure on local health departments to mandate this experimental procedure, but you stand as one of our very last lines of defense.

These drugs have not been well studied, and we do not choose to be scientific experiments for pharmaceutical companies.

Please have compassion...

Sincerely,  
Tabitha Carter

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

The only \*FDA approved\* covid vaccine is Pfizer, and it is only \*FDA approved\* for ages 16 and up. Pfizer for ages 5-15, and the Moderna and J&J continue to be used under emergency use authorization. Childhood vaccines are covered under the National vaccine injury compensation program — covid vaccines are not. They are covered under the countermeasures injury compensation program which can adjust rules with the times. Until vaccines are fully FDA approved for children and they are added to the VICP, the state should not even be considering discussing mandates for K-12 students.

This is a huge over-reach by unelected officials (and elected).

The adverse effects of this shot need to be addressed. There have been more deaths and serious debilitating reactions from this injection than from all other vaccines in the past 30 years. Robert Kennedy, Jr. has done extensive research on the adverse effects of all vaccines and his information is readily available for these comparisons.

In 2021, the VAERS reporting system has had over 1 million adverse effects and deaths reported. At best, only 1% gets reported to VAERS. The young athletes we are seeing collapsing on the field as a result of the jab, many dying, should not be ignored. These are people in their prime physical condition. Many pilots that were mandated into getting the shot are seeing blood clots, heart attacks, strokes, etc.. These people are monitored closely for their health conditions and wouldn't be flying if they had previous conditions or co-morbidities.

When you look at the states that are fully open -- no shot mandates, no mask laws -- compared to lock-down states, shows that there is no benefit to having the lock-downs. The studies as of date are showing that variants are affecting people who got the shot in much greater numbers than those who didn't. If a person has had the virus, giving them the shot actually diminishes their immunity to the virus and its variants. We have seen reports that of those who have taken this shot, there is a loss of 3.5 to 4% of their innate immune system weekly. Thus, once their immune system is basically gone, they have a new name for this...VAIDS.

This is an experimental gene therapy and with no one taking responsibility for adverse effects or deaths, this puts these kind of rulings totally against the Nuremberg code. Depending on the outcome of this decision, you are putting yourselves at risk of going before a military tribunal.

We had Covid. Our extended family had Covid. Many people we know had Covid. We were home, we were off work. The only people in this huge circle who had major issues received Remdesivir at the hospital. Some of these people had the shot and still ended up in the hospital. The shot doesn't stop you from getting it, or spreading it.

To give this to children is total insanity. All of the test methods are inaccurate with high false positive results. The new test coming out is no better.

Researchers who have done their homework:

Dr. Robert Malone  
Dr. Zev Zelenko  
Robert Kennedy, Jr.

To whom it may concern;

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our state of Washington for the following Reasons:

- 1) Children are at extremely low risk for Covid.
- 2) Children already have a huge mandatory list of required vaccines. This one is not necessary for all kids and should be a personal, family choice, like other flu shots.
- 3) The vaccines are still only EUA (emergency use authorized) without any long-term studies to document any history of safety for our children.
- 4) Studies do now document and prove that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Please do the right thing for Washington children and families and vote no on mandatory vaccines.

Thank you,

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

My comments today are in reference to two items that are under consideration. Agenda item 8, which would require a COVID vaccine for children to attend school and agenda

item 11, of which I am in full support of. Agenda item 11 would prohibit the board from adding any product to the mandated list unless it had successfully completed phase 3 trials for proper licensure.

11.

Are you Pro or Con on the proposal?

2. Con

---

Agenda item 8 - I oppose the addition of COVID shots as mandatory for children to attend school. These shots clearly do not prevent COVID transmission as we are currently seeing. This vaccine is very different from previous vaccines and does not meet the criteria needed to mandate them - they do not prevent the disease. FDA members have actually stated that we don't know the long term effects of these shots and we need to just give them to the children to understand if they are harmful. This makes our kids an experiment and it remains unclear how much these shots can harm them. That is not acceptable. Agenda item 11 - I support this item, to establish a new rule that prohibits the board of health from adding an Emergency Use Authorized product that lacks completed Phase 3 trial studies to the school required list. The reasoning for this is the same as why I oppose these mandated vaccines for children, referenced above in my comments for item 8. There is not enough information about the effects of these shots and we already know they don't prevent disease. These kids have very minimal risk from coming down with COVID. We do not know enough about the side effects and long term effects as they are so new to the market with incomplete studies to support their safety.

I am against vaccinating children for Covid19. Data has shown that children are not at risk of serious disease from covid, data also shows that they are not a risk to others. Data also shows that vaccination against covid does not stop the spread of covid, nor does it prevent people from getting covid. Data shows that children are more at risk from a serious adverse event from the covid vaccine than they are from covid itself. These vaccines are a threat to our children's health and safety as shown by the science. As they say "follow the science".

Subject: debate on covid vaccine requirement for public schoolchildren

External Email

Members of Washington State Board of Health,

We would like to let you know that we strongly disagree with the covid shot/vaccine being a requirement for children to attend public school in Washington state. Here are the reasons:

1. As the covid shot is so new, no one knows the long term effects of this shot. This is an issue that can affect children especially, as they have their whole life ahead of them.
2. If a child were to get covid, they have almost a 100 percent chance of survival.
3. The choice of what is put into our bodies should be our personal choice or in the case of a child, their parent's choice as their guardian.

Respectfully,

Dave and Sharon Guernsey

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Steven Phillips  
Chewelah, WA

This is a an absolute overreach of government into peoples personal choices on their own health. It is a criminal misuse of our law enforcement officers. Children should absolutely not be forced to be vaccinated, the risks of the vaccine greatly outweighs the benefit. Children are such low risk for disease that they should not be vaccinated at all!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) Children have an extremely low risk of contracting Covid.
- 2) Vaccines are only EUA  
(Emergency Use Authorized).
- 3) There have been no long term studies documenting any history of safety.
- 4) Current studies now indeed document that vaccinated and unvaccinated can both transmit COVID.

Therefore, based on the above points, the vaccine apparently does not stop COVID from spreading. It would therefore seem absolutely pointless to require all school children to be vaccinated and potentially harmful, instead. I am therefore entirely opposed to mandatory vaccination of children attending public schools.

Hello,

I am writing to provide feedback on a couple of agenda items for the SBOH January 12, 2022 meeting, discussing Rules Hearing Continuance for Communicable and Other Certain Diseases, Chapter 246- 100 WAC.

I believe Item 6 & 9 cover the similar topic of allowing local health officers to use law enforcement (WAC 246-100-070) to enforce an emergency order to involuntarily detain a person/group to be isolated. The conditions allowed for under (WAC 246-100-040) are too broad and general, and gives way too much power to a single person, while eliminating bodily autonomy for WA citizens.

This proposed rule assumes the health officer's approach is a one size fits all solution to a "health emergency". Each patient needs to be viewed through a holistic approach, and doctors need to be given freedom to appropriately treat and address concerns. This rule eliminates the benefits associated with allowing a provider to truly know and understand each unique patient.

-Our police officers are already overburdened.

I am opposed to WAC 246-100 (and all of the specific sections 045, 070, and 040).

Agenda Item number 11:

WAC 246-105 - I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \*Because COVID-19 shots are still EUA shots,

- \*There are no long-term studies available indicating safety and efficacy' meanwhile current efficacy is waning

- \*Implementation should only be considered after long term studies are available, and after the SBOH has conducted an analysis on all of the Freedom of Information Act documents that the FDA used when approving the COVID-19 vaccines. This can only be done after all of those documents have been released by the FDA.

- \*Then a public hearing should be held detailing the findings from the FOIA documents and long-term studies, and why they believe it is in the best interest of our children to receive this shot.

I sincerely appreciate your time,

Sandra Jahns

All medical decisions including and not limited to vaccination is a careful consideration for all humans especially for those concerning ones children. As a parent whom has chosen most vaccinations based on lengthy historical date for efficacy, i have chosen to exclude those more recent including that for HPV for my son. At 17yo he has been SEVERLY affected by those updated "school requirement" vaccinations in Middle school & has since caused autoimmune issues that have severely impacted his quality of life, abilities as an athlete and mental processing. Considering these vaccines are seemingly "proven" i emphatically feel it is imperative to see at a minimum a DECADE of date based on Animal trial (NOT HUMAN) for an injection deemed vaccine & NOT require any version for any human until well after that decade marker if ever. Medical choice, medical freedoms; these are not only personal rights by the United States Constellation, but a PARENTS CHOICE. Regardless of my personal experience within my family & for my child, i feel this for all Americans regarding the Covid19 injections & any newer offered without decades of proven non-human research. Myself & my family do NOT support this.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:  
It is the choice of the parent to decide what is appropriate for their child and should not be mandated by a governmental agency. Medical freedom is part of what makes America free. Also, medical choices are not a one size fits all. Every person is uniquely made and what works for one individual may not work for another. Children have strong immune systems which are able to fight off illnesses. We do not know the long term effects of these vaccines which could have grave consequences for their health in the long run. Please do not mandate this experimental vaccine for children. To do so would be an extreme over reach of power and an a wreck less approach to medicine.

Thank you,

I have been a resident in WA State for 25 years and have put all my children through the public school system. I have one child in high school and despise having to send him to school every day with a mask on his face. It should be our individual choices as parents as to whether or not we want to mask up, but we are being forced to do so because our district took money in exchange for masking and testing. Disgusting. I don't personally know how any of you sleep at night.

It has now come to my attention that the WA Board of Health is holding a meeting tomorrow to discuss adding the COVID shot to the mandatory childhood vaccines, while adding COVID to the list of conditions for which you can FORCE us into COVID quarantine facilities.

This is by far the most alarming procedure that could possibly happen, aside from lining the kids up and forcing them to be given this non-FDA approved poison without parental consent. It is not your place to play doctor. This has gone from "15 Days to Flatten the Curve" to almost TWO full years of hell.

If this decision moves forward, you will have an uprising of likes you have yet to see during this PLANdemic. We are SICK and tired of the games and tyrannical behavior from all levels of our governing bodies.

It's time to move forward and get back to being free.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

This is still NOT a vaccine, emergency use only.

Children are not harshly impacted by Covid

The Omicron variant was created "by the vaccinated" is like a common cold and is bringing herd immunity to everyone.

The shot has potential to cause more harm than good. The cost outweighs the benefit. Boys are having cardiac issues and girls changes in their menses - lipids affect their ovaries!

Please listen to Dr. McCullough and Dr. Malone who have filed lawsuits against these unprecedented and illegal mandates.

The government works for us - you work for us - we the people, not the other way around!!!

To Whom It May Concern,

We strongly disagree with any proposed policy that discriminates against medical decisions made by individuals for themselves or their children, and that plans to use police force to detain individuals based on their own personal medical decisions. Medical decisions and autonomy over one's own body are basic freedoms that Americans are entitled to, regardless of any "emergency " deemed by our state government.

This "emergency " of Covid-19 has been over for a very long time. Our state government, and indeed our state health officials are not following actual and accurate science by continuing to insist on 100% vaccinated citizens. So many of us now have natural immunity, which the state still refuses to recognize. This is basic science and virology. The state is still touting the still experimental vaccine as safe, even for very young children, even pushing advertising that they are safe on television. When VAERS has collected evidence of the contrary and state residents have personal knowledge of those who have died or are permanently damaged physically due to having taken the vaccine, it is not safe for everyone. The risk to benefit ratio at this point weighs heavily against the vaccine. Students should not be forced to take this experimental vaccine, when it will not prevent them from getting the virus or spreading it. There's no solid science behind the decision to force children to get the vaccination . The virus at this point has taken its natural course and is waning. We must now learn to live with this virus as we have the flu and the cold.

Having traveled to other states, we have seen that life can be better. Our state has applied tremendous overreach in people's lives already, destroying individuals' livelihoods and our state economy. We have seen many friends and families leave this state forever due to the decisions made by our state government.

Please do not allow these policies to move forward. They are unconstitutional and un-American.

Sincerely,

Mark and Wendy Baker

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070 <tel:246-100-070> ) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045 <tel:246-100-045> ) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 <tel:246-100-040> ). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To the Board,

In regards to the circulating proposal of adding COVID-19 to the list of Infectious and Communicable diseases warranting the extreme measures of Washington Administrative Code 246-100, I am writing you as a concerned citizen and resident within Kitsap County and 26th Legislative District. Many of you are unelected appointed positions, who do not represent the people of this state in any form of representative government. I find it a grave danger to the safety of Washington State that out of simple fear, or something far more dishonest, there is being a proposal for draconian measures to be implemented under the guise of Public Safety. The greatest danger to our children, our safety and our Constitutional Republic is when policies are enacted with zero regard for individual liberties and unalienable rights, gifted to us by our Creator and by the Supreme Law of the Land, the United States Constitution. Unelected officials being tasked with directing law enforcement to rip families from their homes based on hearsay, rumors or conjecture borders on a totalitarian pedigree reserved for the most heinous criminals in human history. First thing you should think of when I say that is; "Is there a reliable measurement tool for SARS-CoV-2?" Your thought proposal would be to use unreliable, non-FDA approved medical devices to determine whether a person is positive and have law enforcement forcibly remove someone from their home. Or remove them based on presumed close contact, which is even more egregious. For almost two years the CDC authorized the use of 2019 nCoV Real Time RT-PCR Diagnostic Panels using the first assays available. Per the CDC this could not detect the difference between SARS-CoV-2 and Influenza virus. [[https://www.cdc.gov/csels/dls/locs/2021/07-21-2021-lab-alert-Changes\\_CDC\\_RT-PCR\\_SARS-CoV-2\\_Testing\\_1.html](https://www.cdc.gov/csels/dls/locs/2021/07-21-2021-lab-alert-Changes_CDC_RT-PCR_SARS-CoV-2_Testing_1.html)  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcsels%2Fdls%2F21-2021-lab-alert-Changes\\_CDC\\_RT-PCR\\_SARS-CoV-2\\_Testing\\_1.html&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Ccb4f29c60f1d49a400a008d9d199f718%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcsels%2Fdls%2F21-2021-lab-alert-Changes_CDC_RT-PCR_SARS-CoV-2_Testing_1.html&data=04%7C01%7Cwsboh%40sbh.wa.gov%7Ccb4f29c60f1d49a400a008d9d199f718%2F)  
]

There is a reason there is no FDA Approved Testing Devices for detection of SARS-CoV-2. They would have to be proven reliable against an isolated Live Sample with verified, repeatable data and studies. How could you possibly violate another American's right to Due Process if there is ANY shred of doubt in the reliability of your evidence? There is no chance of reliability at this point.

And, how is natural immunity calculated into this type of decision? The CDC has admitted thru Freedom Of Information Act (FOIA) request that there is no data on, or evidence of a naturally immune person contracting COVID-19, recovering, and later becoming infected again, and transmitting SARS-CoV-2 to another person.

[<https://www.sirillp.com/wp-content/uploads/2021/11/21-02152-Final-Response-Letter-Brehm-1.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sirillp.com%2Fwp->

]

A proposal of involuntary isolation and quarantine for a virus with an enormously high survival rate is unthinkable. Ebola outbreaks of the past have ranged 25% to 90% fatality rates based on World Health Organization information, similar numbers for Marburg virus outbreaks. Smallpox killed one out of every three infected. Two Stanford University professors, Catherine Axfors and John P.A. Ioannidis published the stats of survival rate for COVID-19 by age group

[<https://www.medrxiv.org/content/10.1101/2021.07.08.21260210v1>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.07.08.21260210v1>  
]. Based on data from 14 countries, the only group with less than a 99.41 % survival rate  
was those over 70+ years of age. SARS-Cov-2 is NOT a grave danger to the public  
warranting Communist Regime tactics to coerce and intimidate the populace to conform  
to a corporate agenda. While respecting the God given right of Americans, while  
protecting the religious freedoms of families, or while preserving the foundational pillars  
of our Washington State Constitution, you should also consider whether a greater risk of  
injury to another is even occurring.

In regards to adding a COVID-19 vaccine to the childhood vaccine schedule (or forcing upon anyone for that matter), protecting the Public Health using a vaccine that does not prevent contracting a virus and does not prevent transmission of a virus, is no long a tool to protect the PUBLIC. Forcing a medical product upon someone against their will, is a government official inserting themselves into matters of personal conscience and personal life decisions of the individual alone. There is no PUBLIC being protected, because the vaccine does not prevent that individual from contracting or transmitting, which in turn does not lessen any exposure to the virus. See Rochelle Walensky - CDC Director's explanation of this back in July [

<https://www.cdc.gov/media/releases/2021/s0730-mmwr-covid-19.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmedia%2Freleases%2Fs0730-mmwr-covid-19.html&data=04%7C01%7Cwsboh%40sbob.wa.gov%7Ccbbf29c60f1d49a400a008d9d199f718%7C11d0e1...>

] The same sound logic is true for children, if they are being forced by the government entity to get vaccinated against their families wishes; that is the State inserting itself into the family. That is what Communist States do, that is Un-American. That is removing power of the family to make family decisions. That is the State saying that you are too stupid to make our own medical decisions for yourself, and the government needs to make your choices for you. Forcing this vaccine upon the individual is an attack and a trespass upon the individual. You are assaulting, injuring, and potentially killing that individual without bringing any added protection to his fellow citizens. The collective populace is NOT being better protected from exposure, is NOT better protected from contracting, and is NOT being better protected from transmitting if an individual chooses the COVID vaccine. The protection stops at the INDIVIDUAL, the best you are asking for is that it will protect the INDIVIDUAL from a severe case. That is not the role government officials; elected or unelected. It is not the role of any governmental agency to insert themselves at a granular level of individual health choices.

If my personal health choice is to protect God's Temple by using natural foods and sources high in Zinc, Quercetin, Vitamin C, Vitamin D and antioxidants; that is not preventing me from contracting or transmission. And neither does the vaccine; a vaccinated person who contracts SARS-CoV-2 spreads similar viral load as an unvaccinated (again see the CDC.gov link above). I make personal decision with regards to my body with full agreement of my conscience and my Creator. As Thomas Jefferson said

"We lay down as a fundamental, that laws, to be just, must give a reciprocation of right; that without this, they are arbitrary rules of conduct, founded in force, and not in

conscience.”

As it stands, I DO NOT CONSENT to the government having say over my conscience, or my family, or my agreements with Almighty God. My personal freedom of choice is my natural right and does not create a danger or greater chance of injury to others. My personal choices and faith in my decision allows me to place my trust in the Lord above, to show I trust in his design and protection, and grants me a greater sense of fulfillment in life.

Thank you for your time and consideration,

v/r

Theodore Rice

To Whom It may concern,

for your 12:00 noon deadline, I submit that I oppose #8 and support #11 of your proposed bill.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

This new rule would impact and protect all minor children, and their parents and guardians, in WA State.

The Addendum attached provides just a few of the many resources available to support this petition. We request adequate time to present more information and expert testimony to the BOH in person or via an online meeting.

Addendum

1. Federal Emergency Use Authorization statutes prohibit school mandates of EUA products

"The possible side effects of the vaccine are still being studied in clinical trials. . . Under the EUA, there is an option to accept or refuse receiving the vaccine." source: pp. 4-5 <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15371>

The option to accept or refuse an EUA product is not conditioned upon written assertion of exemption. Medical, personal, or religious

Subject: Vaccine Mandate for children

External Email

To whom it may concern,

Today the State Board of Health is meeting to discuss a possible vaccine mandate for children. I would like to ask that you reconsider this mandate.

The CDC has shown that the symptoms are minor in children with the Omnicron variant, far less than with the Delta variant. It should be up to the parents to determine what is injected in their kids. It has been proven that the vaccine doesn't prevent the virus, it merely reduces the symptoms, but if the symptoms are already reduced with the new variant there really isn't any reason for the vaccine.

I am all for parents that believe in the vaccine or if their kids are high-risk to allow their kids to get it, but it should not be required across the board. Similar to many of the other vaccines available for children, this should be optional based on the families beliefs.

Thank you for your time

Sincerely,  
Vitaly

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

I appreciate you considering this evidence. Our state still has a high incidence of illness yet has a very high vaccination rate making it very clear the vaccine does not prevent the spread of this illness which is very treatable with good recovery, especially in our youth. There is plenty of evidence from other states with less restrictions leading to less illness that we need to restore the freedom of choice among the people to manage their own health and the health of their children. Mandates are a gross overreach of the government.

Thank you for considering the voice of the people you are to represent.  
Sue Beardemphl

\* A concerning number of young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeconnecticut-teens-hospitalized-heart-problems-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C18c83285c7ee4494684608d9d20f37b2%7C>, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination.

\* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

\* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

\* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffinal%2F2020%2F10%2F29%2F19%26DIED%3DYes&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C18c83285c7ee4494684608d9d20f37b2%7C11d0e2172> vaccine injuries including 18,078 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffinal%2F2020%2F10%2F29%2F19%26DIED%3DYes&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C18c83285c7ee4494684608d9d20f37b2%7C11d0e2172> following COVID-19 vaccination.

\* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

\* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to congregate

-- Do not support any legislation or directive establishing lockdowns

-- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people

of our state? The very people you serve to protect?

May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Specifically, if there is a COVID-19 vaccination requirement added for children in Washington State to attend school, we (along with many others that I know) will be looking to relocate to a state that values our fundamental rights as humans and our medical freedom.

Thank you for your time,  
Jessica Scott

Tracy,

I oppose this proposition. I am not opposed to the choice or availability of vaccinations, in fact I have received many vaccinations. But I am whole heartily against the covid-19 injections and the fear and bullying tactics being employed to coerce the public, "joints for jabs", free bus rides for a month, cups of coffee, and now this idea to forcibly detain those who do not wish to receive the covid-19 vaccination in a concentration camp, excuse me, in a "quarantine facility". This disease is real but it is also overwhelmingly mild and does not result in hospitalization for the vast majority of those who contract it. Those with risk factors including advanced age, immune deficiency, obesity, respiratory, and heart conditions should certainly make informed choices for themselves as should the rest of the public. This is a matter of bodily autonomy this is not a matter for bureaucracy and the WA State Board of Health. It is and should remain out of the scope of practice for this board to apply current infectious disease WAC codes to include Covid-19 for all WA State residents. Recommendations are one thing forced intervention is another. Our state has a very high percentage of vaccinated residents 75%

(<https://usafacts.org/visualizations/covid-vaccine-tracker-states/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fusafacts.org%2Fvisualizations%2Fstates%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C4b1d3ebefda48252eca08d9d1f7998b%7C>>  
) and herd immunity in this case is reported by the Cleveland Clinic to be achieved between 70-85% (<https://health.clevelandclinic.org/how-much-of-the-population-will-need-to-be-vaccinated-until-the-pandemic-is-over/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhealth.clevelandclinic.org%2Fhow-much-of-the-population-will-need-to-be-vaccinated-until-the-pandemic-is-over%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C4b1d3ebefda48252eca08d9d1f7998b%7C>>  
) . Further the 65 and older population, (unquestionably the most vulnerable population from the onset of this pandemic), has an even greater percentage of vaccinated individuals at nearly 100% nationwide (see the before mentioned usafacts.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fusafacts.org%2F&data=04%7C01%link>).>

I am very strongly opposed to these proposed policies being discussed.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Very Sincerely,

Stephanie Newcomb

---

Pursuant to the CDC, the fatality rate for children from COVID-19 nationwide is .00003 percent. Accordingly, children are not warranted to be vaccinated for COVID-19. Pursuant to the CDC, the CDC Director and Dr. Fauci in his New York Times November 12 interview, the COVID-19 vaccine will not prevent infection or transmission of the COVID-19 virus, nor will it prevent serious injury, hospitalization or death any longer. Therefore, the vaccine is no longer the best tool for prevention of transmission. It is now a medical treatment, at best, hence it cannot be mandated as treatments are a personal medical choice pursuant to the state and federal Constitutions. Pursuant to the FDA, the vaccine manufacturers, and multiple scientists across the nation and the world, these vaccines pose grave risks of severe myocarditis, blood clotting, and neurological damage to name a few, predominantly prevalent in adolescents. As such, the risks of taking the vaccine strongly and significantly outweigh the benefits especially as it pertains to the pediatric community.

I am extremely opposed to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please let parents make informed decisions, not the government!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. Per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children.

3. Myocarditis is a known side effect of the vaccines. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots.  
COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research

5. Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity.

6. No one knows the long term risks of these vaccines. There are many risk/benefit analysis that show little risk and little benefit. So why mandate!

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Please allow parents to decide on behalf of their children and do NOT mandate!

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health:

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received their booster shots (three colleagues who are vaccinated & boosted have tested positive this week). Soon being fully vaccinated will require regular booster shots forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have a considerable risk of side effects from the unapproved Covid vaccines; myocarditis being one such example.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Thank you,

Taryn Rux

My name is David Pulido, and I am a parent of 2 young girls in WA state that would be directly impacted by the proposed mandatory Covid vaccination requirement. This policy would be in direct contradiction to all of the scientific evidence we have regarding the virus's affect on children. We know that the risk of hospitalization and death to minors is statistically near zero. Of the few children who have died WITH Covid, there were co-morbidities and underlying health issues that undoubtedly played a part, and therefore a claim they died OF Covid cannot be made with 100% certainty. Furthermore, the EUA (emergency use authorization) issued by the FDA that allows administering this experimental vaccine to children in the first place was a controversial decision itself. Being a parent who takes my children's health and wellbeing very seriously, I took the time to listen to the FDA discussion prior to voting on the authorization, and was appalled when one of the voting doctors readily admitted that "we won't know [the long term side effects of the vaccine on children's health] until we start giving it". And he said this in arguing for giving it to them! This is literal human experimentation on children, in an attempt to solve a problem that does not exist. Covid is not dangerous to children, so why gamble on an experimental drug? And if WA passes this resolution, then it will be government imposed medical experimentation on children. Is that really what you want to be a part of? Noone understands a child's unique health circumstances better than their parent(s)/caregiver(s) and primary care physician. Therefore, given the abundance of evidence regarding the risks vs rewards of these vaccines, the decision should be individually catered to each child, rather than implementing a broad policy that has the potential to have devastating consequences. This is the only decision that makes objective sense if looking at the evidence in total. On behalf of all of the children in WA state, please vote NO against this policy and allow those who know each child best to make the call.

External Email

To Whom it may concern,

I'm a concerned Grand parent of Washington State. I have been notified that Governor Inslee is proposing to vaccinate our school age children against the will of the parents. And making the experimental jab a part of the vaccine protocol for school admission Here is my stand against this.

1st the FDA wants to hide Pre-licensure data before your deaths, and they also want to hide the post-licensure safety data.  
Proof-Covid-19 shots kill people.  
Covid-19 Vaccines damage the immune system. Scientific reports, the damages inflicted by covid-19 jabs of any retailer, cause permanent damages to the entire human immune system.

REASON'S CHILDREN SHOUD'NT GET VACCINATED:

1. 86% OF CHILDREN SUFFERD AN ADVERSE REACTION TO THE PFIZER COVID-19 VACCINE IN THE CLINICAL TRAIL.

2.

3.

4. 1 IN 9 CHILDREN SUFFERD A SEVERE ADVERSE REACTION LEAVING THEM UNABLE TO PERFORM DAILY ACTIVITES IN THE PFIZER CLINICAL TRAIL.

5.

6. THE RISK OF CHILDREN DEVELOPING SEVERE ILLNESS DUE TO COVID-19 IS EXTREMELY LOW.

7. THE PFIZER COVID-19 VACCINE IS EXPERIMENTAL AND STILL IN CLINICAL TRAILS. EMERGENCY USE ONLY. THIS AUTHORIZATION IS VALID FOR ONLY ONE YEAR, SO THE PHARMACEUTICAL COMPANIES HAVE TO FULFILL SOME OBLIGATIONS. THE VACCINE HAS TEMPORARY AUTHORIZATION BECAUSE IT IS STILL IN CLINICAL TRAILS SCHEDULED TO END ON MAY 2, 2023.

8. THREE SCIENTIFIC STUDIES CONCLUDED BY THE UK GOVERNMENT, OXFORD UNIVERSITY & CDC PUBLISHED IN AUGUST, HAVE FOUND THE COVID-19 VACCINES DO NOT WORK.
9. THE LATEST RESULTS SHARED THAT THE DELTA COVID-19 VARIANT IS THE MOST DOMINANT AND THAT THE VACCINES CAN'T PROTECT US FROM IT. VACCINATED INDIVIDUALS CAN SPREAD THE VIRUS.
10. PUBLIC HEALTH ENGLAND DATA SHOWS THAT MOST COVID-19 DEATHS ARE AMONG THE VACCINATED AND SUGGESTS THAT VACCINES WORSEN THE DISEASE.
11. THERE HAVE BEEN AT LEAST 1.18 MILLION ADVERSE REACTIONS TO THE COVID-19 VACCINES IN THE UK ALONE. (THIS IS TOTALLY UNEXCEPTABLE)
12. THERE HAVE BEEN MORE DEATHS IN 8 MONTHS DUE TO THE COVID-19 VACCINES THAN THERE HAVE BEEN DUE TO ALL OTHER AVAILABLE VACCINES SINCE THE YEAR 2001.
13. THE RISK OF MYOCARDITIS (HEART INFLAMMATION) IN CHILDREN DUE TO THE PFIZER VACCINE.
14. MYOCARDITIS IS INFLAMMATION OF THE HEART MUSCLE, AND PERICARDITIS IS OF THE PROTECTIVE SACS AROUND THE HEART. THESE ARE SEVERE INFLAMMATIONS BECAUSE THE HEART CAN'T BE REGENERATED. ( HOW IS A PARENT SUPPOSE TO CARE FOR THEIR CHILD WITH THIS FINANCIAL BURDEN FOR THE REST OF THEIR LIFE. IS GOVERNOR INSLEE GOING TO GIVE THEM MONEY? WILL THIS CHILD BE DISABLED FOR THE REST OF THEIR LIFE? AND IS THE GOVERNMENT GOING TO HELP WITH THE COST? THESE ARE SOME QUESTIONS THAT NEED TO BE ANSWERED.)
15. CHILDREN HAVE DIED AND ARE DYING DUE TO THE COVID-19 VACCINES.
16. VARES SHOWED THAT CHILDREN DIED IN THE US AFTER COVID-19 VACCINES.
17. WHO PROFITS FROM YOUR CHILD GETTING THE COVID-19 VACCINE?
18. BILL & MELINDA GATES FOUNDATION ALSO COINCIDENTALLY BOUGHT \$55 MILLION WORTH OF SHARES IN BIONTECH IN SEPTEMBER 2019, JUST BEFORE THE ALLEGED COVID-19 PANDEMIC STRUCK. (DOES THIS GIVE YOU REASON TO WONDER WHY? MOST PEOPLE WOULD QUESTION THIS.)
19. SHOULD A PERSON TAKE A MEDICAL TREATMENT SO THEY ARE ABLE TO PARTAKE IN SOCIETY OR EDUCATION? THE ANSWER IS NO!!!. A PERSON SHOULD ONLY EVER TAKE MEDICAL TREATMENT FOR A MEDICAL REASON. IN THE CASE OF THE COVID-19 VACCINE, THAT REASON SHOULD BE TO PREVENT INFECTION, WHICH IT DOES NOT DO, OR PREVENT ILLNESS WHICH IT WILL NOT DO. CHILDREN ARE REALLY AT SUCH LOW RISK OF SUFFERING SERIOUS ILLNESS DUE TO COVID-19. (ARE WE GOING TO RISK THEIR LIFE FOR THIS EXPERIMENTAL VACCINE NOT KNOWING THE OUTCOME 5 TO 10 YEARS FROM NOW. ARE YOU WILLING TO TAKE THAT RISK FOR YOUR CHILD. ALSO KNOWING THAT THE PHARMACEUTICAL COMPANIES WILL NEVER BE HELD RESPONSIBLE FOR ANY INJURY OR DEATH TO YOUR CHILD EVER)

SO: THE CONCLUSION OF THIS IS SAY NO TO THIS UNCONSTITUTIONAL RULE OR MANDATE TO VACCINATE YOUR CHILD WITH THIS EXPERIMENTAL JAB. THIS IS AN INFRINGEMENT OF OUR RIGHTS AS PARENTS AND GRAND PARENTS TO BE IN CONTROL OF OUR CHILDREN HEALTH CARE NEEDS AND RIGHTS. WE ARE THE ONLY ONES THAT CAN PROTECT THEM FROM THIS TYRANNY COMING FROM THE GOVERNOR'S OFFICE.

THANK YOU FOR YOUR TIME,  
Tammy Cousins

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Studies show that vaccinated people can still transmit the disease. Children are extremely low risk for any serious issues related to Covid. Most concerning is that we have zero information about the long term risks of these vaccines on our children's health. As a mother, I am strongly opposed to mandating vaccines for our children.

Subject: Vaccine Requirement for Washington State Schools

External Email

To the Washington State Board of Health,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

\*\*Furthermore, you are causing wonderful Washingtonians to flee the state in record numbers. I have personally known and met several people who fear for their safety and the safety of their children due to Gov Inslee's overuse of power. They feel they have no choice but to leave Washington in order to keep their children safe. Please do the right thing and do not let this Covid 19 requirement pass for our children's sake!

Respectfully,  
Sara Wood  
Sammamish, Wa

Hello,

I am a FIRM NO to any mandatory vaccinations or enforcement of anything associated with COVID in any way shape or form.

I am truly appalled that the WA BOH is considering the following proposed policies:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Thank you,  
Robert Bury

I am strongly opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

There are many reasons why I'm strongly opposed to mandatory Covid vaccines for school admission.

A few are:

They don't stop the spread of Covid.

Long-term studies haven't been done that prove their safety - especially for kids.

Kids are extremely low risk for serious illness from Covid.

Please be open-minded and consider the educated opinions based on reliable research of those of us opposed to mandatory vaccines for kids. I think they would create more problems than they are trying to fix.

Subject: COVID abuse of power

External Email

Good afternoon,

I am writing as a resident and voting member in Washington State. I am voicing my strong opinion that current and proposed COVID regulations and mandates are unwarranted and a violation of our individual liberties.

**I ESPECIALLY AM ADAMANTLY OPPOSED TO ANY VACCINE MANDATE FOR ADULT OR CHILD IN ANY WAY SHAPE OR FORM!**

An individual should have autonomy over their body and their medical choices, for themselves and their children.

**DO NOT MOVE FORWARD WITH ANY ACTION THAT SUGGESTS, RECOMMENDS, SUPPORTS, OR PROPOSES ANYTHING ALONG THESE LINES. The state government is far over reaching their power and the state residents DO NOT WANT THIS as a whole. Anyone that CHOOSES to vaccinate can do just that, CHOOSE.**

Regards,

Tara Brown

To whom it may concern,  
I do not agree with the efforts being made to allow local law enforcement to involuntarily detain someone or group of people to be isolated in a quarantine facility.

I do not agree that anyone should have to comply with enforced medical examinations, testing, treatment, counseling, or vaccinations regarding COVID-19.

I ESPECIALLY do not agree with including the Covid-19 injections as part of school immunization requirements.

I think that our state even considering these is disgusting, inhumane, and unlawful. The mere fact that the Covid-19 status, and facts are consistently changing at a societal, and departmental level goes to show that everything surrounding Covid-19 is still unknown. Therefore, Washington laws have NO reasons being involved in these matters.

I will not support these new efforts. I will not support this state.

Shaelyn Hood

Subject: C19 proposals

External Email

Good Morning,  
I am completely against the proposed COVID policies. They are over reaching and immoral!  
On top of that, there isn't enough research, study and knowledge to back up these actions!  
I, along with many other Washington residents, stand against these proposed WAC's :  
WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.  
Not only are these an infringement against our constitutional rights, but also our moral & personal rights!  
If these pass, I along with MANY other WA residents will leave the state and relocate to states which protect and honor our rights and freedoms.  
Natural Immunity must be considered in the fight to end the pandemic.  
Everyday we are seeing natural immunity being considered, questioned and in some cases allowed. Since when did a man- made vaccine overrule our bodies and our immune systems.  
Look at the data and see the writing on the walls. Vaccinated people are still contracting and spreading COVID, they are filling up the hospitals and ICU and early children have more than a 99% chance of survival.  
This is America and we have the right to decide what goes in our bodies.  
If this passes I will take all of my children out of public school, and so will many other parents.  
Actions have consequences and WA residents will not stand for this kind of unconstitutional power grab.  
Thank you,  
Todd Johnson

January 7, 2021

RE: January 12, 2022 meeting

Opposition to Agenda Item #8, the Board's formation of a Technical Advisory Group

Support for Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC,  
Immunization Criteria, Child Care and School Entry

Ladies and Gentlemen,

I am sure others have provided you with sound research, properly conducted, to demonstrate why we should not be mandating vaccinations particularly in children. As such, there is no need for a Technical Advisory Group on this matter; thus Agenda item 8 pertaining to this should be voted down. To form such a group results in a very small number of people steering decisions for children and their extended families statewide. As of July 2021, the US Census Bureau indicates the state population over 7.7 million with 21% being under age 18. You are making decisions on behalf of 1,625,125 children plus several million other family members, for that which affects one person affects the whole family.

Now what type of information would these decisions be based upon? What has been the quality and accuracy of public information given to the WA state government and citizens received these two years? It has been a rollercoaster of bait-and-switch actions. The issuers of official guidance—FDA, CDC, NIH, etc. referred to collectively as “Federal officials”—told us the vaccines would prevent people from becoming ill with Covid-19. Once enough vaccinated people caught Covid, they switched to saying it doesn’t prevent infection but prevents death, and that people will suffer much less if vaccinated prior to being infected. Meanwhile, they deny Covid deaths amongst the vaccinated, spreading

for many months the soundbite that the vaccinated have a 1 in a million chance of dying from Covid. This is a rare outlier figure that cannot be substantiated and defies common sense. More realistically:

"[...] the exact definition of rare disease, or orphan disease, varies from country to country. The National Institute of Health classifies a rare or orphan disease as one with fewer than 200,000 cases in the country. The European Union defines it as any disease that affects five or fewer people out of every 10,000. Whichever definition you use, the answer is the same: Thousands of rare diseases affect millions of people every day."

The guidance from the Federal Officials later dropped to 1 in 250,000. However, you can still see by the NIH own definition that this is an outlier figure, one that would not pertain to a general population. And the Federal Officials in collaboration with the media do not accurately depict the increasing rates of Covid deaths amongst the vaccinated.

Meanwhile, the CDC still promotes adverse effects like Guillain-Barré Syndrome as rare when at the same time the American Neurological Association is following the significant occurrences of post-vaccine incidents. The lists could go on and on, as for two years we have had very specific messages intentionally aimed to conditioning the general public through collaboration with media outlets.

In spite of various legal actions nationwide against mandating vaccination, Washington state has chosen to expedite vaccinations, modeling for organizations statewide to terminate thousands of workers by accepting but not accommodating exemptions. While at the same time various officials speak of the 'unknowns', they advance controls with penalties to citizens at a rapid speed based on insufficient and even faulty science. For example, just this week, the National Comprehensive Cancer Network® updated their Pre-exposure Prophylaxis recommendations:

"research shows many immunocompromised people develop inadequate immune responses from vaccines. Thankfully, we now have additional tools to help people in active treatment for cancer, solid organ transplant recipients, engineered cellular therapy (e.g. CAR T-cell) or stem cell transplant recipients (a.k.a. hematopoietic stem cells), and those with other immunodeficiency-causing conditions (such as HIV, DiGeorge syndrome, or Wiskott-Aldrich syndrome)." [...] "The Food and Drug Administration (FDA) has issued an emergency use authorization for the monoclonal antibody combination of tixagevimab plus cilgavimab for pre-exposure protection from COVID-19 in adults and children starting at age 12 (weighing at least 40 kg) who have moderate to severe immune compromise and may not be responsive to vaccination. Patients with blood cancers (including those receiving stem cell transplantation or engineered cellular therapy) are more likely to have inadequate responses to COVID-19 vaccination" {...} "We have new agents to prevent and treat COVID-19 that will benefit patients with cancer"

Meanwhile, "the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission." [...] Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else." [...] Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated." In contrast to the narrative espoused in collusion with media outlets, vaccinated persons do carry the same, and sometimes higher, viral load as the unvaccinated, thus the unvaccinated are not the super-spreaders.

Now we face Omicron which is 95% of Covid-19 cases; experts agree it is milder than previous Delta and will not result in as many hospitalizations nor deaths. Yet the public remains conditioned to believe the deaths occur amongst the unvaccinated, and WA state government continues driving policies and taking actions with this presumption as well. In addition to VAERS data (which has been demonized in the narrative) and reports from

many countries, an example of our government's own data would be the HHS' Countermeasures Injury Compensation Program (CICP) Data of the 4751 Covid injury claims. The program only has 5200 claims of which 4751 claims pertain to Covid-19 treatments. The Epoch Times earlier reported that out of this 4751, 2297 are claims of adverse effects from vaccination with over 600 deaths in these claims. Forbes reported that the HHS states there were only 1357 vaccine claims and 53 of these were deaths. That is 3.9% of the claims. The article also demonstrates how the government is not paying compensation for Covid vaccines and the new limitations it has placed upon them.

Adult Americans have been the human experiments for these vaccines for too long. Officials in the FDA and CDC have made statements that go without recourse such as males under age 40 have greater chance of suffering debilitating damage from the vaccine than from the Covid virus itself. There have been many studies substantiating that. Last month, a panel of advisers to the Centers for Disease Control and Prevention unanimously recommended people do not take the Johnson and Johnson vaccine due to adverse effects and deaths. Unfortunately, this came after 16 million Americans had already had J&J. Other countries had already banned the J&J vaccine and have banned mandates as well.

Now we suffer the move to experiment on our children despite that a systematic review of the research found:

"five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially"

Last October, FDA panelist and Editor in Chief of the New England Journal of Medicine Eric Rubin said "We're never gonna learn about how safe the vaccine is until we start giving it. That's just the way it goes." Given that the tweet had 1.8 million views, I assume you are already aware of this. Since last spring, the death rate associated with Covid-19 in Whatcom county has run at or just under 1% for all ages. Meanwhile, the obituaries and testimonials of vaccine survivors increase as tens of thousands of people, with all good intentions to serve their country, are maimed and killed by the vaccines. And who could ignore athletes in their prime, particularly soccer players, collapsing on the field? With 183 deaths so far and hundreds more injured, young adults have suffered.

You can now see the need not only to vote down item 8 Technical Advisory Group but also to approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

While it is a dearth of information, I ask that you take time to seriously review in detail the resources provided by me and others prior to Monday's meeting. Thank you in advance for doing so.

Sincerely,

Lisa Dykstra

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Please don't do this to the children.

Thank you for reading this.

This vaccine is still under EUA! There are no studies of long term effects and no history for at least under two years. To make this mandatory will dismantle the public school system and more people will leave and funding will be lowered. These vaccines should be a parents choice not the public schools place to mandate for a virus that has a 99.2% chance of survival. If you want to mandate adults then so be it. Do NOT move forward with this.

Dear Washington State Board of Health members,

There looks to be so many reasons not to mandate these experimental mRNA vaccines on anyone let alone our vulnerable children that don't have a say to what is done to their bodies.

Can we ask ourselves some questions?

Can we look into our hearts and souls and ask: \* Is this really the world we want to create for our children, grandchildren and great grandchildren etc.? Where their basic Freedoms that our forefathers fought and died for are taken and violated; where they are forced to hand over the rights of their own bodies? Do we really want to live in such a world?

Or do we want to create a world of Freedom, Peace, Love. Joy, Liberty, compassion and free choice for Everyone?

Can we look beyond the narratives, take a peak behind the veil and ask what the real agenda is? What is really going on?

Can we wake up before our own child or children get hurt?

Let's create a world of freedom for our children to choose what is done to their bodies or not.

Thank you for your consideration.

Kind regards,

I am opposed to making COVID-19 vaccines mandatory for school admission or childcare in our State for the following reasons:

We know children are at extremely low risk for covid. As this virus changes over time we are already witnessing that even though it is more contagious the effects of the virus are milder. The vaccine does not stop the contraction of covid, but it does lessen the severity. One last point, the vaccines are still only approved for emergency use.

Although I am fully vaccinated and thankful for this vaccine, I made this decision for myself as I am older and at more risk for severe disease. However, parents and guardians of their minor children are responsible for making the best healthcare decisions for their children. Parents know and understand along with the child's medical provider whether or not a vaccine would be in the best interest of the child.

Parents know better than the State the individual needs of their children.

Therefore, I am opposed to making COVID-19 vaccines mandatory for children.

Respectfully,

Rochelle Atkins

As a mother and educator, we need to have choices that we make on behalf of our children (exceptions for any other immunizations are available). There is not enough research that has been done. Even the federal government released the vaccination as an emergency action. Many medical members do not stand behind this science (vaccination), and all sides need to be considered. Healthy children have a healthy body with natural immunity and should not be forced to immunize. If elderly people and persons with compromised health conditions require the vaccination that it should be available to those but NOT forced on healthy individuals. NO on mandatory immunizations!

Hello,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thank you,  
Erin

RE: Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

I urge you to avoid adding a Covid-19 immunization requirement for school and child care attendance. I'm not an anti-vax parent but there hasn't been enough time to study the long-term effects (and, no, I don't consider 1-2 years nearly long enough) of these vaccines on the health and development of our children. Regardless of the short-term benefit, if we get this wrong and force families to comply, the results could be life-altering or deadly.

It's just too soon!  
Becky Shepard

---

Throughout my years of being a RN, I have had to take care of many people whom I do not agree with when it comes to their health and/or lifestyle choices. It has always been, and will continue to be, my duty to educate patients while upholding their autonomy. Unfortunately it doesn't sound like WA state wants to give it's citizens the the same choices. First and foremost I'd like to point out that the CDC conveniently changed their definition of "vaccine" in Sept. of 2021. The COVID-19 shot, is not a vaccine, it's a shot. Just as the "Flu-Shot" is not a vaccine. COVID is here to stay, it will continue to mutate, just as the flu and many other respiratory viruses do every year. Requiring children (the group of people walking this earth with the least likely chance of severe/life threatening symptoms) to receive a shot that provides, not only limited protection but also fleeting protection, to receive a proper education that their family's tax money pay for, is asinine. The shot doesn't stop infection or transmission of COVID. There are plenty of studies and data, from all over the world that will show you natural immunity far outlasts that of somebody who received a COVID-19 shot. At best, the shot gives some immunity for approximately 6 months. Natural immunity lasts for at least 13months. The benefits of the shot do not outweigh the risks, especially when you look at the injuries in children that have been caused by these shots. Additionally, threatening citizens to get a poorly constructed, partially effective shot or be punished is complete government overreach. If your board decides to mandate this shot for children, so the children can get a proper education and care while their parents are at work, trying to make ends meet and provide the best life they can, you will lose students. People will find a way to pull their kids out of school, you will lose all trust in the authorities that run the school, our local and state governments and ultimately the schools will lose funding and therefore more people, who LOVE children, will lose their jobs, putting a further burden on Washington families. It may not stop there, people will eventually leave this state as your restrictions no longer allow us to live in a free state. I am asking you to strongly consider taking the COVID-19 shot requirement, in all capacities, off of the agenda. If you don't know the studies I'm referring to, they are easy to find. Do your own exhaustive research. We have already seen the vaccine mandate play out in adults and the ramifications it has had on families. It's disheartening, disgusting and sad that it has come to down to the citizens fighting their ELECTED officials regarding their OWN HEALTH MATTERS. Why aren't you concentrating on education and early treatment of COVID-19? Why aren't we sharing the FLCCC guidelines for hospitals since remdesivir isn't getting the job done? Why, 2.5 years into this aren't we trying something DIFFERENT? Why aren't you teaching our children about the importance of vitamins, balanced diets, good sleep, less screen time and more exercise, clean air, pre and probiotics etc etc? This is the state I grew up in. I love living here. I love the land, the ocean, the mountains, the rivers, the fishing, the woods for camping and hunting. Our family enjoys areas of Washington state from

the west side to the east side of the state, but all of these restrictions are making Washington and the beautiful place it used to be, less and less appealing. Please do not pass this mandate and please please please do your own research.

There should be no mandatory vaccines for the right of the American citizens. Certainly not the children when this vaccine has not had time to be proven on long term issues down the road. I considered taking the right away of the individuals and in fact decisions that could be harmful to children. Not all children's bodies are the same as we know, as children have different impacts due to vaccines. You are dividing our state even more so than it already has been divided. More and more people are pulling their children out of the public education system because they have no faith in it and this is one of the reasons why. Vaccination mandates are wrong! There has been so much controversy and what is true and right with the Covid pandemic. No one trust our government now.

I 100% OPPOSE WAC 246-100 (-070)!!!! It is NOT ok to use law enforcement to force any sort of involuntarily detain a law-abiding citizen or group of people in a quarantine facility (WAC 246-100-045) for refusing any treatment.

I also oppose adding an experimental, emergency use gene therapy vaccine to the list of required vaccines for children to attend schools! The documented risks are heart inflammation and greatly outweigh risk to children from natural infection. If we force injection on them in order to save ourselves, what kind of parents would we be. The children are our future! As a parent, you need to trust each of us that we are doing our best to keep them happy, healthy, and safe.

I find it funny that in the age of communication I am just finding out about this the day before comments are due. If this proposed ruling was more known, I guarantee there would have been a much greater flood of emails. Damn right this is about our freedoms; once you give it away, they won't just give it back, you have to fight for it.

Concerned Citizen,

Sara Hren

Subject: I Oppose Mandating Shots for Schools

External Email

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — the petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

The above is my stance on the proposed mandate. Please do not force this trial covid-19 shot on my children.

Sincerely,  
Wendi Stremmer

Hello I heard you are considering vaccine mandates for children and teens We don't know the long term side effects of the vaccine. Last week four young soccer players died after receiving the vaccine. Children have some immunity from covid. More young people are dying of fenatnyl than covid. Please reconsider this thank you Irene Randall

Dear WSBOH,

It would be a mistake to make COVID vaccination mandatory for school age children. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

External Email

To Whom it may concern:

As a parent of school age and a resident of the State of WA for now, I have serious concerns regarding administering the covid shot to children. I do not believe it is safe, necessary, nor effective preventing the virus.

1. Getting covid provides an extremely low risk for children
2. The vaccines are still only authorized for emergency use. It would be very unwise to compel children to take a vaccine that little is known about, and that is known to cause multiple negative side effects.
3. Empirical evidence now exists that shows the vaccinated and unvaccinated can both transmit covid; therefore, the vaccine does not stop the spread of the disease and children should not be forced to get it.

253.224.5239

9.

Do you have any special expertise relevant to this topic?

1.            Yes

---

I have 16 grandchildren, many of which attend WA public schools and am a resident of WA state.

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

---

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Involuntary quarantine strikes itself as a form of internment of Jews during fascist Nazism. If my grandchildren receive the COVID vaccine, it should be under the guidance, direction and decision of their parents.

Dear Washington State Board of Health,

I am writing to express my opposition to making COVID-19 vaccination mandatory for school admission or childcare facilities in Washington state for the following reasons:

1. Children still display exceptionally low risk of COVID infection, and maintain very low rates of hospitalization and/or severe illness following exposure.
2. There are no long-term data on the safety or efficacy of COVID vaccinations in children (or adults).
3. Vaccination does not significantly alter the spread (i.e. community transmission) of SARS-COV-2 among children or adults (it is instead used to reduce the burden on the healthcare & hospital systems).

As a healthcare provider in my community & father of 4 children, I assure you that the potential risks & adverse effects of COVID vaccination exceeds the risk of COVID-19 infection for children.

I urge you to act responsibly, & support the autonomy of families in making their own healthcare decisions, and NOT make COVID vaccination mandatory in schools & childcare settings.

Warmly,

Sean Guinan

Good Morning,

I am a Washington state resident that is deeply concerned regarding the discussion of implementing COVID WAC codes that blatantly violate the constitutional rights of all Washington residents. It is very clear that, if one does their research or does any thinking for oneself, that if we just let COVID run its course herd immunity will be obtained, be it through vaccination or natural immunity. It should be a person's choice as to how they choose to live their life.

The mRNA vaccine is ineffective at preventing infection and transmission of the virus. I know many many people who are fully vaccinated, mask everywhere they go, and have still come down with COVID. The science shows this. Breakthrough infections are a real thing and they happen often.

Numerous studies have shown that natural immunity is just as good, if not superior to that of the vaccine, in protecting individuals from reinfection and transmission of the virus. One the largest case studies conducted by MedRxiv in Israel concludes, "This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity. Individuals who were both previously infected with SARS-CoV-2 and given a single dose of the vaccine gained additional protection against the Delta variant."

If vaccinated individuals can also become infected and transmit the virus then what purpose is it to acquire "immunity" by means of force through a medical procedure that doesn't achieve what is intended to be accomplished, immunity? Why can we not also acknowledge natural immunity as a viable option?

I've attached the previously referred to study at the end of this email.

Thank you for your time,

Marci Blakney

## **Abstract**

### **Background:**

Reports of waning vaccine-induced immunity against COVID-19 have begun to surface. With that, the comparable long-term protection conferred by previous infection with SARS-CoV-2 remains unclear.

### **Methods:**

We conducted a retrospective observational study comparing three groups: (1)SARS-CoV-2-naïve individuals who received a two-dose regimen of the BioNTech/Pfizer mRNA BNT162b2 vaccine, (2)previously infected individuals who have not been vaccinated, and (3)previously infected *and* single dose vaccinated individuals. Three multivariate logistic regression models were applied. In all models we evaluated four outcomes: SARS-CoV-2 infection, symptomatic disease, COVID-19-related hospitalization and death. The follow-up period of June 1 to August 14, 2021, when the Delta variant was dominant in Israel.

### **Results:**

SARS-CoV-2-naïve vaccinees had a 13.06-fold (95% CI, 8.08 to 21.11) increased risk for breakthrough infection with the Delta variant compared to those previously infected, when the first event (infection or vaccination) occurred during January and February of 2021. The increased risk was significant ( $P<0.001$ ) for symptomatic disease as well. When allowing the infection to occur at any time before vaccination (from March 2020 to February 2021), evidence of waning natural immunity was demonstrated, though SARS-CoV-2 naïve vaccinees had a 5.96-fold (95% CI, 4.85 to

7.33) increased risk for breakthrough infection and a 7.13-fold (95% CI, 5.51 to 9.21) increased risk for symptomatic disease. SARS-CoV-2-naïve vaccinees were also at a greater risk for COVID-19-related-hospitalizations compared to those that were previously infected.

### **Conclusions:**

This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity. Individuals who were both previously infected with SARS-CoV-2 and given a single dose of the vaccine gained additional protection against the Delta variant.

## Introduction

The heavy toll that SARS-CoV-2 infection has been taking on global health and healthcare resources has created an urgent need to estimate which part of the population is protected against COVID-19 at a given time in order to set healthcare policies such as lockdowns and to assess the possibility of herd immunity.

To date, there is still no evidence-based, long-term correlate of protection<sup>1</sup>. This lack of correlate of protection has led to different approaches in terms of vaccine resource allocation, namely the need for vaccine administration in recovered patients, the need for booster shots in previously vaccinated individuals or the need to vaccinate low-risk populations, potentially previously exposed.

The short-term effectiveness of a two-dose regimen of the BioNTech/Pfizer BNT162b2 mRNA COVID-19 vaccine was demonstrated in clinical trials<sup>2</sup> and in observational settings<sup>3,4</sup>. However, long term effectiveness across different variants is still unknown, though reports of waning immunity are beginning to surface, not merely in terms of antibody dynamics over time<sup>5-7</sup>, but in real-world settings as well<sup>8</sup>.

Alongside the question of long-term protection provided by the vaccine, the degree and duration to which previous infection with SARS-CoV-2 affords protection against repeated infection also remains unclear. Apart from the paucity of studies examining long-term protection against reinfection<sup>9</sup>, there is a challenge in defining reinfection as opposed to prolonged viral shedding<sup>10</sup>. While clear-cut cases exist, namely two separate clinical events with two distinct sequenced viruses, relying solely on these cases will likely result in an under-estimation of the incidence of reinfection.

Different criteria based on more widely-available information have been suggested<sup>11</sup>, the Centers for Disease Control and Prevention's (CDC) guidelines refer to two positive SARS-CoV-2 polymerase chain reaction (PCR) test results at least 90 days

apart.<sup>12</sup> Using similar criteria, population-based studies demonstrated natural immunity<sup>13,14</sup> with no signs of waning immunity for at least 7 months, though protection was lower for those aged 65 or older<sup>9</sup>.

The Delta (B.1.617.2) Variant of Concern (VOC), initially identified in India and today globally prevalent, has been the dominant strain in Israel since June 2021. The recent surge of cases in Israel<sup>15</sup>, one of the first countries to embark on a nationwide vaccination campaign (mostly with the BioNTech/Pfizer BNT162b2 vaccine), has raised concerns about vaccine effectiveness against the Delta variant, including official reports of decreased protection<sup>16</sup>. Concomitantly, studies have demonstrated only mild differences in short-term vaccine effectiveness<sup>17</sup> against the Delta variant, as well as substantial antibody response<sup>18</sup>. Apart from the variant, the new surge was also explained by the correlation found between time-from-vaccine and breakthrough infection rates, as early vaccinees were demonstrated to be significantly more at risk than late vaccinees<sup>8</sup>. Now, when sufficient time has passed since both the beginning of the pandemic and the deployment of the vaccine, we can examine the long-term protection of natural immunity compared to vaccine-induced immunity.

To this end, we compared the incidence rates of breakthrough infections to the incidence rates of reinfection, leveraging the centralized computerized database of Maccabi Healthcare Services (MHS), Israel's second largest Health Maintenance Organization.

## **Methods**

### ***Study design and population***

A retrospective cohort study was conducted, leveraging data from MHS' centralized computerized database. The study population included MHS members aged 16 or older who were vaccinated prior to February 28, 2021, who had a documented SARS-CoV-2 infection by February 28, 2021, or who had both a documented SARS-CoV-2 infection by February 28, 2021 *and* received one dose of the vaccine by May 25, 2021, at least 7 days before the study period. On March 2, 2021, The Israeli Ministry of Health revised its guidelines and allowed previously SARS-CoV-2 infected individuals to receive one dose of the vaccine, after a minimum 3-month-interval from the date of infection

### ***Data Sources***

Anonymized Electronic Medical Records (EMRs) were retrieved from MHS' centralized computerized database for the study period of March 1, 2020 to August 14, 2021.

MHS is a 2.5-million-member, state-mandated, non-for-profit, second largest health fund in Israel, which covers 26% of the population and provides a representative sample of the Israeli population. Membership in one of the four national health funds is mandatory, whereas all citizens must freely choose one of four funds, which are prohibited by law from denying membership to any resident. MHS has maintained a centralized database of EMRs for three decades, with less than 1% disengagement rate among its members, allowing for a comprehensive longitudinal medical follow-up. The centralized dataset includes extensive demographic data, clinical measurements, outpatient and hospital diagnoses and procedures, medications

dispensed, imaging performed and comprehensive laboratory data from a single central laboratory.

### ***Data extraction and definition of the study variables***

#### ***COVID-19-related data***

COVID-19-related information was captured as well, including dates of the first and second dose of the vaccine and results of any polymerase chain reaction (PCR) tests for SARS-CoV-2, given that all such tests are recorded centrally. Records of COVID-19-related hospitalizations were retrieved as well, and COVID-19-related mortality was screened for. Additionally, information about COVID-19-related symptoms was extracted from EMRs, where they were recorded by the primary care physician or a certified nurse who conducted in-person or phone visits with each infected individual.

#### ***Exposure variable: study groups***

The eligible study population was divided into three groups: (1) fully vaccinated and SARS-CoV-2-naïve individuals, namely MHS members who received two doses of the BioNTech/Pfizer mRNA BNT162b2 vaccine by February 28, 2021, did not receive the third dose by the end of the study period and did not have a positive PCR test result by June 1, 2021; (2) unvaccinated previously infected individuals, namely MHS members who had a positive SARS-CoV-2 PCR test recorded by February 28, 2021 and who had not been vaccinated by the end of the study period; (3) previously infected *and* vaccinated individuals, including individuals who had a positive SARS-CoV-2 PCR test by February 28, 2021 and received one dose of the vaccine by May 25, 2021, at least 7 days before the study period. The fully vaccinated group was the comparison (reference) group in our study. Groups 2 and 3, were matched to the

comparison group 1 in a 1:1 ratio based on age, sex and residential socioeconomic status.

### *Dependent variables*

We evaluated four SARS-CoV-2-related outcomes, or second events: documented RT-PCR confirmed SARS-CoV-2 infection, COVID-19, COVID-19-related hospitalization and death. Outcomes were evaluated during the follow-up period of June 1 to August 14, 2021, the date of analysis, corresponding to the time in which the Delta variant became dominant in Israel.

### *Covariates*

Individual-level data of the study population included patient demographics, namely age, sex, socioeconomic status (SES) and a coded geographical statistical area (GSA, assigned by Israel's National Bureau of Statistics, corresponds to neighborhoods and is the smallest geostatistical unit of the Israeli census). The SES is measured on a scale from 1 (lowest) to 10, and the index is based on several parameters, including household income, educational qualifications, household crowding and car ownership. Data were also collected on last documented body mass index (BMI) and information about chronic diseases from MHS' automated registries, including cardiovascular diseases<sup>19</sup>, hypertension<sup>20</sup>, diabetes<sup>21</sup>, chronic kidney disease<sup>22</sup>, chronic obstructive pulmonary disease, immunocompromised conditions, and cancer from the National Cancer Registry<sup>23</sup>.

### *Statistical analysis*

Two multivariate logistic regression models were applied that evaluated the four aforementioned SARS-CoV-2-related outcomes as dependent variables, while the study groups were the main independent variables.

*Model 1—previously infected vs. vaccinated individuals, with matching for time of first event*

In model 1, we examined natural immunity and vaccine-induced immunity by comparing the likelihood of SARS-CoV-2-related outcomes between previously infected individuals who have never been vaccinated and fully vaccinated SARS-CoV-2-naïve individuals. These groups were matched in a 1:1 ratio by age, sex, GSA and time of first event. The first event (the preliminary exposure) was either the time of administration of the second dose of the vaccine *or* the time of documented infection with SARS-CoV-2 (a positive RT-PCR test result), both occurring between January 1, 2021 and February 28, 2021. Thereby, we matched the “immune activation” time of both groups, examining the long-term protection conferred when vaccination or infection occurred within the same time period. The three-month interval between the first event and the second event was implemented in order to capture reinfections (as opposed to prolonged viral shedding) by following the 90-day guideline of the CDC.

*Model 2*

In model 2, we compared the SARS-CoV-2 naïve vaccinees to unvaccinated previously infected individuals while intentionally *not* matching the time of the first event (i.e., either vaccination or infection), in order to compare vaccine-induced immunity to natural immunity, regardless of time of infection. Therefore, matching

was done in a 1:1 ratio based on age, sex and GSA alone. Similar to the model 1, either event (vaccination or infection) had to occur by February 28, to allow for the 90-day interval. The four SARS-CoV-2 study outcomes were the same for this model, evaluated during the same follow-up period.

### *Model 3*

Model 3 examined previously infected individuals vs. previously-infected-and-once-vaccinated individuals, using “natural immunity” as the baseline group. We matched the groups in a 1:1 ratio based on age, sex and GSA. SARS-CoV-2 outcomes were the same, evaluated during the same follow-up period.

In all three models, we estimated natural immunity vs. vaccine-induced immunity for each SARS-CoV-2-related outcome, by applying logistic regression to calculate the odds ratio (OR) between the two groups in each model, with associated 95% confidence intervals (CIs). Results were then adjusted for underlying comorbidities, including obesity, cardiovascular diseases, diabetes, hypertension, chronic kidney disease, cancer and immunosuppression conditions.

Analyses were performed using Python version 3.73 with the stats model package.

$P \leq 0.05$  was considered statistically significant.

### *Ethics declaration*

This study was approved by the MHS (Maccabi Healthcare Services) Institutional Review Board (IRB). Due to the retrospective design of the study, informed consent was waived by the IRB, and all identifying details of the participants were removed before computational analysis.

### *Data availability statement*

According to the Israel Ministry of Health regulations, individual-level data cannot be shared openly. Specific requests for remote access to de-identified community-level data should be directed to KSM, Maccabi Healthcare Services Research and Innovation Center.

### *Code availability*

Specific requests for remote access to the code used for data analysis should be referred to KSM, Maccabi Healthcare Services Research and Innovation Center.

## Results

Overall, 673,676 MHS members 16 years and older were eligible for the study group of fully vaccinated SARS-CoV-2-naïve individuals; 62,883 were eligible for the study group of unvaccinated previously infected individuals and 42,099 individuals were eligible for the study group of previously infected and single-dose vaccinees.

### *Model 1 – previously infected vs. vaccinated individuals, with matching for time of first event*

In model 1, we matched 16,215 persons in each group. Overall, demographic characteristics were similar between the groups, with some differences in their comorbidity profile (Table 1a).

During the follow-up period, 257 cases of SARS-CoV-2 infection were recorded, of which 238 occurred in the vaccinated group (breakthrough infections) and 19 in the previously infected group (reinfections). After adjusting for comorbidities, we found a statistically significant 13.06-fold (95% CI, 8.08 to 21.11) increased risk for breakthrough infection as opposed to reinfection ( $P < 0.001$ ). Apart from age  $\geq 60$  years, there was no statistical evidence that any of the assessed comorbidities significantly affected the risk of an infection during the follow-up period (Table 2a).

As for symptomatic SARS-COV-2 infections during the follow-up period, 199 cases were recorded, 191 of which were in the vaccinated group and 8 in the previously infected group. Symptoms for all analyses were recorded in the central database within 5 days of the positive RT-PCR test for 90% of the patients, and included chiefly fever, cough, breathing difficulties, diarrhea, loss of taste or smell, myalgia, weakness, headache and sore throat. After adjusting for comorbidities, we found a 27.02-fold risk (95% CI, 12.7 to 57.5) for symptomatic breakthrough infection as

opposed to symptomatic reinfection ( $P < 0.001$ ) (Table 2b). None of the covariates were significant, except for age  $\geq 60$  years.

Nine cases of COVID-19-related hospitalizations were recorded, 8 of which were in the vaccinated group and 1 in the previously infected group (Table S1). No COVID-19-related deaths were recorded in our cohorts.

### ***Model 2 –previously infected vs. vaccinated individuals, without matching for time of first event***

In model 2, we matched 46,035 persons in each of the groups (previously infected vs. vaccinated). Baseline characteristics of the groups are presented in Table 1a. Figure 1 demonstrates the timely distribution of the first infection in reinfected individuals.

When comparing the vaccinated individuals to those previously infected at any time (including during 2020), we found that throughout the follow-up period, 748 cases of SARS-CoV-2 infection were recorded, 640 of which were in the vaccinated group (breakthrough infections) and 108 in the previously infected group (reinfections).

After adjusting for comorbidities, a 5.96-fold increased risk (95% CI, 4.85 to 7.33) increased risk for breakthrough infection as opposed to reinfection could be observed ( $P < 0.001$ ) (Table 3a). Apart from SES level and age  $\geq 60$ , that remained significant in this model as well, there was no statistical evidence that any of the comorbidities significantly affected the risk of an infection.

Overall, 552 symptomatic cases of SARS-CoV-2 were recorded, 484 in the vaccinated group and 68 in the previously infected group. There was a 7.13-fold (95% CI, 5.51 to 9.21) increased risk for symptomatic breakthrough infection than symptomatic reinfection (Table 3b). COVID-19 related hospitalizations occurred in 4 and 21 of the reinfection and breakthrough infection groups, respectively. Vaccinated

individuals had a 6.7-fold (95% CI, 1.99 to 22.56) increased to be admitted compared to recovered individuals. Being 60 years of age or older significantly increased the risk of COVID-19-related hospitalizations (Table S2). No COVID-19-related deaths were recorded.

### ***Model 3 - previously infected vs. vaccinated and previously infected individuals***

In model 3, we matched 14,029 persons. Baseline characteristics of the groups are presented in Table 1b. Examining previously infected individuals to those who were both previously infected and received a single dose of the vaccine, we found that the latter group had a significant 0.53-fold (95% CI, 0.3 to 0.92) (Table 4a) decreased risk for reinfection, as 20 had a positive RT-PCR test, compared to 37 in the previously infected and unvaccinated group. Symptomatic disease was present in 16 single dose vaccinees and in 23 of their unvaccinated counterparts. One COVID-19-related hospitalization occurred in the unvaccinated previously infected group. No COVID-19-related mortality was recorded.

We conducted a further sub-analysis, compelling the single-dose vaccine to be administered *after* the positive RT-PCR test. This subset represented 81% of the previously-infected-and-vaccinated study group. When performing this analysis, we found a similar, though not significant, trend of decreased risk of reinfection, with an OR of 0.68 (95% CI, 0.38 to 1.21, *P*-value=0.188).

## Discussion

This is the largest real-world observational study comparing natural immunity, gained through previous SARS-CoV-2 infection, to vaccine-induced immunity, afforded by the BNT162b2 mRNA vaccine. Our large cohort, enabled by Israel's rapid rollout of the mass-vaccination campaign, allowed us to investigate the risk for additional infection – either a breakthrough infection in vaccinated individuals or reinfection in previously infected ones – over a longer period than thus far described.

Our analysis demonstrates that SARS-CoV-2-naïve vaccinees had a 13.06-fold increased risk for breakthrough infection with the Delta variant compared to those previously infected, when the first event (infection or vaccination) occurred during January and February of 2021. The increased risk was significant for a symptomatic disease as well.

Broadening the research question to examine the extent of the phenomenon, we allowed the infection to occur at any time between March 2020 to February 2021 (when different variants were dominant in Israel), compared to vaccination only in January and February 2021. Although the results could suggest waning natural immunity against the Delta variant, those vaccinated are still at a 5.96-fold increased risk for breakthrough infection and at a 7.13-fold increased risk for symptomatic disease compared to those previously infected. SARS-CoV-2-naïve vaccinees were also at a greater risk for COVID-19-related-hospitalization compared to those who were previously infected.

Individuals who were previously infected with SARS-CoV-2 seem to gain additional protection from a subsequent single-dose vaccine regimen. Though this finding corresponds to previous reports<sup>24,25</sup>, we could not demonstrate significance in our cohort.

The advantageous protection afforded by natural immunity that this analysis demonstrates could be explained by the more extensive immune response to the SARS-CoV-2 proteins than that generated by the anti-spike protein immune activation conferred by the vaccine<sup>26,27</sup>. However, as a correlate of protection is yet to be proven<sup>1,28</sup>, including the role of B-Cell<sup>29</sup> and T-cell immunity<sup>30,31</sup>, this remains a hypothesis.

Our study has several limitations. First, as the Delta variant was the dominant strain in Israel during the outcome period, the decreased long-term protection of the vaccine compared to that afforded by previous infection cannot be ascertained against other strains. Second, our analysis addressed protection afforded solely by the BioNTech/Pfizer mRNA BNT162b2 vaccine, and therefore does not address other vaccines or long-term protection following a third dose, of which the deployment is underway in Israel. Additionally, as this is an observational real-world study, where PCR screening was not performed by protocol, we might be underestimating asymptomatic infections, as these individuals often do not get tested.

Lastly, although we controlled for age, sex, and region of residence, our results might be affected by differences between the groups in terms of health behaviors (such as social distancing and mask wearing), a possible confounder that was not assessed. As individuals with chronic illness were primarily vaccinated between December and February, confounding by indication needs to be considered; however, adjusting for obesity, cardiovascular disease, diabetes, hypertension, chronic kidney disease, chronic obstructive pulmonary disease, cancer and immunosuppression had only a small impact on the estimate of effect as compared to the unadjusted OR. Therefore, residual confounding by unmeasured factors is unlikely.

This analysis demonstrated that natural immunity affords longer lasting and stronger protection against infection, symptomatic disease and hospitalization due to the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity. Notably, individuals who were previously infected with SARS-CoV-2 and given a single dose of the BNT162b2 vaccine gained additional protection against the Delta variant. The long-term protection provided by a third dose, recently administered in Israel, is still unknown.

I am seeing so many adult friends have reactions from the vaccines let alone on putting a mandate in our children. It's not freedom for each individual family. I ask that you put this into consideration that families are in charge of their children not the government

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, Wayne media

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid  
The vaccines are still only EUA (emergency use authorized)  
There are no long-term studies to document any history of safety  
Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,  
The vaccine apparently does not stop the spread of the disease

To whom it may concern,

I am a parent of two bright boys that love school! Unfortunately for them I don't allow them in public school with the mandates and have homeschooled the last two years.

With the new vaccine mandate going to vote they may never get the chance to go to public school.

It is a parents choice what goes into their childrens bodies and no one else's.

Because of a flu you want to jeopardize so many young kids. Listen to the parents! Let it be a choice!!

---

Detainment seems quite extreme given people who are vaccinated also pass on the virus not just unvaccinated. There are many kids that have serious reactions to other vaccines and this has not had the testing or long term studies that have been on all the other ones given to our children. This would be like mandating the flu vaccine. If kids can pass it either way it should be choice. Are you taking the responsibility if there are adverse effects to our children and families by this mandate? In our counties where vaccines are well distributed with mask mandates and need for vaccine cards everywhere there is the same transmission rates. There is not enough evidence making the stricter rules has reduced transmission and numbers. You want only unvaccinated mandated to do testing and masks. If we all transmit it the same and the main thing the vaccine does is help with harmful side effects of the virus there really needs to be an option for personal choice. There are many that have been documented as harmed from the vaccine where they had the virus and suffered no ill effects. I speak as a concerned mom and tax paying citizen of the state.

External Email

Dear Tracy Schreiber-

I am emailing the Washington State Board of Health to reject and plead with you to not mandate the covid vaccine for school age children and teens.

I have 4 kids and I am not an anti vaccine parent. I acknowledge that covid19 is real and has been horrible for the elderly and those with pre existing conditions.

These vaccines are not safe for our kids and may cause irrevocable injury and damage. The viral gene injected into parent cells forces my child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs. These organs include the brain and nervous systems, heart and blood vessels(including blood clots), their reproductive system, and this vaccine can trigger fundamental changes to their immune system. Once these damages have occurred, they are irreparable and can not be reversed. You can not fix the lesions in their brain, you can't repair heart tissue scarring, you can't repair a genetically reset immune system, and this vaccine can cause reproductive damage that can affect future generations of our family.

Why would I want to risk all of the above for little or no benefit? Plus all of my kids and most of all their friends have had covid and they have a natural immunity.

The vaccines have not been properly tested. They are still experimental vaccines!

The harms and risks of new medicine are often revealed many years later.

I do not want my kids to be a part of this radical experiment.

There is no benefit to vaccinating my children against the small risk of the virus given the known health risks of the vaccine that we may have to live with for the rest of our lives.

We should be thinking about the well being of the kids and little ones who will soon grow up and need to run this country. It is not up to the government to make my kid get a experimental vaccine. We will not comply.

Thank you for your time

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Inslee and the schools are in violation or trying to coerce this state into taking a vaccine testing and deserve to be fined accordingly. We are human and have rights and medical freedom especially when it comes to our children. When scientists state it can cause long term damage in our children who are the future of this state and country! WA state will not put up with this. Violation 21 code of federal regulations section 50.23 and 24 and violation of 18 2331. Inslee and anyone who agrees to violate our rights and continue that act of terrorism deserve the penalty of 99yrs and 100million fine. We are tired of these ridiculous scare tactics and it'll only be time until WA state fights back.

Subject: Vaccine Mandate for school age children vote on January 12, 2021

External Email

Good Afternoon,

I am sending you what I and my associates have researched and need you to take into consideration when you are making a decision based on politics and not fully looking at the big picture as it relates to the health of our children not just now but for thier future.

I EMPHATICALLY VOTE NO TO A VOTE THAT WOULD PROPOSE VACCINATION TO OUR SCHOOL AGED CHILDREN

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

#### II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

#### III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)
- Less than 40% of kids 12-17 are vaccinated. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in

schools would disproportionately affect students of color in our community. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

☐

☐Hello,

I'm writing with regards to agenda topics 9 and 11 for your meeting on 12 Jan 2022.

Agenda topic 9 regarding being able to send people, against their will, anywhere when they have not committed a crime is a violation of our rights, and is blatantly illegal (false imprisonment), and this WAC should be taken off the books entirely, not extended.

Agenda topic 11 regarding making the COVID vaccine "recommended" for school attendance will further deplete schools. I know many people who are extremely pro-vaccine who have told me if their children are required to get this vaccine to attend school, they will be pulling them out and homeschooling. There has already been a wave of parents in this state who have started homeschooling, which has cut funding to the schools already. Imposing this recommendation will further cut into that as well as possibly cause financial hardships for those families who will likely have one parent quit working to be able to homeschool. While we already homeschool our son, I know some who are willing to endure the financial hardship to not require their kids to get the vaccine. They should not have to make that choice as so many Washington state employees have already been forced to do so.

Thank you for your time.

Subject: Jan 12 meeting on COVID-19

External Email

Hello,

My understanding is that the State Board of Health is planning on January 12th to discuss adding COVID-19 to the list of infectious diseases and including policies which would allow health officers to coerce a person or persons to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). Additionally, the policies would include COVID-19 vaccinations as part of school immunization requirements.

These policies are very dangerous to the life, liberty, and pursuit of happiness to the citizens of Washington State. Please do not proceed with these policies and instead allow citizens to make decisions about their and their loved ones own health.

Sincerely,

Adding Covid-19 to WAC-246-100

11.

Are you Pro or Con on the proposal?

## 2. Con

---

I understand the need for vaccinations to protect the population. The issue with this proposal is that it is a newer vaccine with some inherent risks to people that are just now coming to light. We do not know the long-term risks of this vaccine. Please do not add Covid-19 to that WAC giving authority to others on what goes in my children's body and mine. Once all of the side-effects are found out and given to the public, then it maybe time to add it.

I am against involuntary isolation and detainment of individuals who may have been exposed to COVID, who have COVID, and/or who have not been vaccinated against COVID. The CDC already has guidelines in place that state individuals should quarantine if they may have been exposed to COVID, and to isolate if they are COVID positive. Job sites and schools have policies in place that do not allow individuals to come back to work or school until they can provide a negative COVID result or get an excuse from a doctor. Governor Inslee has passed guidelines for eating and drinking establishments that prohibit entry without proof of vaccination against COVID or a negative test result. Forcefully detaining people when masking, physical distancing, and all these regulations are available is an unnecessary use of force.

External Email

Good morning,

I am writing to you as a concerned parent and citizen in our community. To detain people against their will and mandate this vaccination for children is not only wrong, it is unconstitutional and I hope you choose not to move forward with this agenda.

I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank you for helping maintain freedom.

To: DOH WSBOH  
Cc:  
Subject: JAN 12 BOARD MEETING

External Email

To WA State Board of Health,

I am strongly and completely against any of the proposed Covid Policies that will be voted on January 12th. These are extremely overreaching and are akin to concentration camps BECAUSE they will involuntarily detain people. Medical examinations (testing, treatment, counseling, vaccination etc) are a personal decision and the patient always has the right to refuse any sort of treatment. The proposed policies would be violating such rights every human being is deserving of. We reject medical paternalism because the history of this country has shown that it will sterilize its own women, run STI experiments on them and many other horrendous experiments.

It is understandable that the board is seeking to maintain health in the state. As the CDC has said, obesity is a huge contributor to worse reactions to covid. If you're willing to make mandates and now vote on these proposed policies, you should first make gyms, daily walks, hiking, swimming, or any other form of exercise mandatory. The state as a whole has shown they are truly concerned about the health of people. This would be a policy that would benefit people more and encourage people to take their health into their own hands. Not only that, start by banning certain food groups that are banned in our Allies' countries for their toxicity or other detrimental effects. This would be a better first step than to immediately debate concentration camps which you call quarantine facility.

The proposed WAC Policies I stand strongly and completely against are WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100 and WAC 246-105.

The website [clinicaltrials.gov](https://clinicaltrials.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fclinicaltrials.gov%2F&data=04%7C>>  
shows that the Pfizer vaccine is not even done in its clinical trials. The estimated completed date is July 30th, 2023. This study is the Pfizer-BioNTech COVID-19 BNT162b2 Vaccine Effectiveness Study. Making a vaccine required for children which is not done through its clinical trials is completely immoral. There are too many risks especially when it comes to the children. I have provided the link if you want to take a look at the information yourselves.

<https://clinicaltrials.gov/ct2/show/NCT04848584>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2FNCT04848584)>

The state of washington has not been consistent with the goals that it would take to stop all the mandates detrimentally imposed on the residents. We were told that if more than 70% or so of the population were vaccinated, herd immunity would be a great protector and now that is not the case. This % was mentioned by the CDC which your board, I assume, relies on for information. Not fulfilling your claims is betraying the residents and showing that you are detrimental to us instead of helpful.

Vote NO on all WAC's previously mentioned and resort to other suggestions like exercise and better eating to the residents of this State. The Policies mentioned are extremely extreme in the detrimental manner, splitting up families or forcing whole families into what you call quarantine camps is beyond immoral. This state already has a bad history with rounding up the Japanese. Do not make the same mistakes again. There are many

other options.

Hope to see this board protecting the rights of Washington Residents

Sincerely,  
Saúl García

To: Schreiber, Tracy N (SBOH) <Tracy.Schreiber@sboh.wa.gov>  
Subject: Wa State Board of "Health" & Inslee's proposed Tyrannical & Unconstitutional Quarantine Camps & Forced Vaccine's

External Email

It's come to our attention that the WA Board of Health & Dictator Inslee is considering passing UNCONSTITUTIONAL bills for Quarantine Camps & forced vaccines with:

\*WAC 246-100-040

\*WAC 246-100-105

\*WAC 246-100-070

\*WAC 246-100-045

If you pass these bills you WILL BE IN VIOLATION of the NUREMBERG CODE & YOU WILL BE INDICTED for CRIMES AGAINST HUMANITY for your participation. Currently there are Common Law juries being formed ALL around WA State which have the power to do this to YOU! If you have't heard about this, you ought to look it up before you vote. WE THE PEOPLE will hold you accountable for YOUR actions, & we will not let you get away with this CRIME!

These bills not only violate our precious & beloved Constitution but several other health laws including:

\* PATIENT BILL OF RIGHTS

\* HIPPA LAWS

\* THE Supreme Court ALREADY RULED THAT NO EMERGENCY CAN ELIMINATE ANY RIGHTS GUARANTEED BY THE CONSTITUTION

If your "Health" Board & Inslee proceed to pass these bills after being warned of these facts you are KNOWINGLY VIOLATING, YOU will be considered to be intentionally committing TREASON against the Constitution & against We the People of the United States of AMERICA!

The covid Omicron variant is contagious HOWEVER, VERY MILD...HEALTHY PEOPLE ARE NOT DYING OF IT. Actually it will help us reach herd immunity quickly for anyone interested in REAL SCIENCE. However, our government officials don't seem to be interested in real science. Instead you all only use data that goes alongside of your AGENDA.....& are fully focused on THE GREAT RESET & destroying our state & country for a virus with a 99.997% SURVIVAL RATE, so you'll be able to pass the Vaccine Passport to take over control our assets if we don't comply with your every whim. You are EVIL!!!!

We are actively ORGANIZING & WE THE PEOPLE will PEACEFULLY fight you on this. We are thankful for the 2nd Amendment during times like these when our government has become tyrannical — this is exactly WHY our founders made the 2nd amendment so we the people if need be could defend ourselves from governmental TYRANNY. \*\*\*Canada & Australia sure wished they hadn't surrendered their guns....they NOW have no defense against their tyrannical DICTATOR government officials & are now a communist police state. This is not a threat...it is a simple fact.

Never have I understood the importance of the 2nd Amendment UNTIL BIDEN & INSLEE have gone CRAZY MAD & now our own Wa State Board of Health too over covid restrictions taking ALL OUR FREEDOMS AWAY .... Again for a very survivable virus for healthy people of all ages.

You act like we don't talk with friends from other states. ALL RED STATES ARE WIDE OPEN. Our daughter goes to college in Arizona, & they don't even mask up there! Dear friends moved to Florida & they said Covid is NON-EXISTENT there!!!

WE THE PEOPLE OF WASHINGTON STATE WLL NOT ALLOW YOU TO FORCE ANYTHING INTO OUR BODIES OR OUR CHILDREN'S THAT WE HAVEN'T FREELY CHOSEN FOR OURSELVES.

There are MILLIONS OF US IN WA STATE & only a few hundred or thousand of you. We are AWAKE to your tyranny & stomping all over our Constitutional Rights. WE WILL WIN THIS BATTLE....not you! We will rise up against you & protest every minute of everyday against this until you make the right decisions to OPPOSE THESE BILLS & any others in the future!

I believe this should not be required for students to attend school- our doctor has recommended our kids not receive the vaccines. No long term studies have been conducted, we simply do not know enough. We've learned so much in the past 18 months we need time to learn more. We are also learning that the vaccines are not effective long term necessary or 100 percent preventative.

This is ridiculous! You cannot force vaccinations and you cannot force the unvaccinated into camps. I am vaccinated and boosted and I think this is ridiculous! We do not live in Nazi Germany! How anyone even thought this would be a good thing is beyond me! How this proposal made it this far is beyond me as well! I know that if this passes it will only be a short time before the vaccinated will lose their rights as well. You should all be ashamed of yourselves for even bringing this proposal this far! God have mercy on your souls!

Washington State Board of Health is discussing rulemaking for involuntary quarantine and children's C-19 Vax Wednesday, January 12, 2022. It is proposal WAC 246-100. I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Please share this information with your friends and family! This is where we work together to Save Our State. God Bless, Team SMF oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Please share this information with your friends and family! This is where we work together to Save Our State.

11.

Are you Pro or Con on the proposal?

2. Con

---

I have several points of objection but here are just a few: 1) I oppose the proposal of WAC 246-100 as it is clearly against citizens constitutional rights. No one can force anyone to do something against their religious beliefs. We are protected from discrimination due to our religious beliefs. 2) The vaccine is still experimental and the risk of its potential harm is potentially higher than the actual virus risk. Risk vs benefit is not proven. 3) These mandates and rules are tyrannical and anti-American. It is hard to believe that anyone, let alone the department of health, feels it is okay to force a substance (that has ingredients not listed) into someone that is healthy and perhaps already has the antibodies to fight the virus of which has a 95-97% survival rate. 4) There are treatments for a Covid-19 infection that have been proven to be effective. 5) We all know once a rule is made it is almost always permanent. This virus can very well be temporary. 5) The rules established for experimentation drugs are not being followed. 6) Let's not leave out that the logistics to implement such a ruling would be a nightmare and detrimental to all involved. Can you imagine the nightmares post Germany Nazis must of felt the rest of their lives after they played a part in the extermination of millions of people? 7) What if we find out the experimental vaccine leads to a compromised immune system or worse death to some. We just do t know the long term effects. 8) With so much in question why would anyone even consider having our children vaccinated with a substance that we don't get to know the studies and outcomes for over 50 years? 8) Finally please take the veil off your eyes and minds, this almost sounds like a sci-fi fiction, Wake up! Stop playing God and let people live the way they feel God wants them to live! It should be a choice, our body our choice, or does that only apply to women who want to terminate a pregnancy? Back to the first point: Please look at our Constitution to settle this once and for all. I pray fervently that this is struck down!

WAC 245-100: gives the ability for health organizations to use law enforcement to forcefully quarantine people/peoples who are covid positive. WAC 245-105: makes it a

requirement to receive the covid vaccination to attend school.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

WAC 245-100: please explain to me how you are going to use the same police force that has been defunded, short staffed, over worked (and I'm talking about law enforcement, not the cronies sitting in offices writing these bogus "laws") to detain innocent civilians who are not in any more danger than someone with the flu, but they are not allowed to pursue true criminals who are in active resist of arrest? This is just one of the issues with this proposal. WAC 245-105: has it not become glaringly obvious what your current mandates have done to public education? Over 50,000 children UNENROLLED from public school this year. The budget will soon catch up to you because people can afford to private or homeschool their children. This is not the way to force adults into complying with your communist laws you are imposing on our citizens.

Subject: No to Covid-19 Vaccine Mandates for Children

External Email

Hello,

My name is Shannan Jones, and I am writing today to express my concern with a potential Covid-19 vaccine mandate for children to be able to attend a public school in Washington State. As a parent of two children, I firmly stand by parent choice and allowing parents to make health decisions for their own children. Please know that I am pro-vaccine and understand the importance of vaccinations to public health. After a great deal of research, and after considering the risks versus benefits, I have also personally chosen the Covid-19 vaccine for myself. However, I am opposed to vaccine mandates, and vehemently opposed to a Covid-19 vaccine mandate for children, particularly to attend school or play sports. Particularly for this vaccine, that is so new and does not have a long term safety profile, parents must be able to choose. It is well known from scientific data in this country, and around the world, from hospitals in this state and all over the country and from WA's own board of health that children are the least at-risk from serious complications from Covid-19. It is also now well known that the Covid-19 vaccine does not prevent spread so mandating this vaccine for a child to attend school or play sports, and to remove a parent's ability to make this important medical decision for their child, is absolutely unacceptable. Quite frankly, I am appalled that this is even on the table for our children to be able to attend school or play sports. There are millions of families across this state that simply want the ability to choose whether the Covid-19 vaccine is right for their child(ren). We are one of those families. If WA State mandates the Covid-19 vaccine for our children to attend school, our children will be pulled from the public school system and there are many, many families who will choose to do the same.

I'm respectfully asking you to consider the many families you would harm by instituting such a mandate for our children, including the many families who will feel no other option but to pull their children from school and the education they deserve. Please do the right thing and allow parents the ability to choose what is best for their children. Please do not mandate the Covid-19 vaccine for our kids.

Respectfully,  
Shannan Jones

## Involuntary quarantine and children's C-19 Vax

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I am strongly against the involuntary quarantine, especially for an illness that has a 99.7% survival rate. This is a door that can not be closed once it is opened! I am even more strongly against mandated vaccines. I, honestly, can not even believe that a government official thinks that they have the right to tell me that I have to inject my child with a chemical that has NO long-term testing and is showing to have negative side effects. Again, this is a door that we can not open! I hope that the government officials of Washington State will start thinking about who elected them and the long-term possible outcome. Covid is serious but 99.7%...

I strongly oppose any efforts to mandate the Covid-19 vaccine for school children of any age. The young population has been shown to be the least threatened by the disease. Current case trends show that the vaccine does not mitigate spread. Combined, these facts are evidence against any urgency that this proposal may stem from, or any assumptions that mandating said vaccine would offer significant public health benefits. Considering the unknown long-term effects of the vaccine due to insufficient time to perform the rigorous studies necessary, requiring this therapeutic would be irresponsible. The decision should be left to the parents, free from the coercion that the threat of unenrollment represents.

Subject: BOH meeting January 12th

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. item #8 on the agenda for January 12th meeting.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I do want to encourage you to support item #11 on the agenda that Xavier Figueroa, PhD, on behalf of ICWA, asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

O.J. Marston

Hello board members,

I am writing to you as I am a very concerned parent regarding the possibility of this Covid 19 vaccine becoming mandatory for my children to attend school. I live in Bellevue and have two children in the schools there. I know there is much controversy surrounding this topic, therefore, besides explaining my concern for my children's safety, there is the fact that myself as well as many, many other parents that would have to unenroll my children should be become a requirement.

I listen closely to the facts that are out there and respect and hold on to what was spoke on October 26th, 2021 at the FDA Advisory Board Meeting. It is my hope that you are familiar with the results of this board meeting as certainly it is not about making every child be vaccinated. They actually "do not" recommend this vaccine for healthy children, the approval for children was to make it available to those that have a compromised immune system and there is no proof that this vaccine will prevent transmission. If you have not seen this Board Meeting video, you should for sure watch it as thousands of parents have and are not comfortable having something put into their children's arm that has not been tested....and....the virus has mutated into mild cold like symptoms which only enrich our children's immune system making them stronger.

Please, please consider all the facts and what is best for our children. We all know that it

is having them in school, learning, learning socialization and being kids.

I have always thought how great it would be if some of the zillion hours spent on TV on everything horrible about this virus would be spent on listing and talking about how we can help our immune become strong to be able to fight off any cold, flu etc...,zinc, Vitamin C etc. etc. etc. But nothing – to me that would be helping our children and the World.

Thank you for reading this.

I have my fingers crossed that you will make the right decision!

Thank you!

Subject: Medical Freedom □□□□

External Email

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice.

There are not enough long term studies regarding the use of the Covid-19 EUA vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science. This shot is not FDA approved and still an EUA product despite the lies. Comrnaty the FDA approved vaccine is still not available in the US. Please do your research.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Furthermore, the current Omicron variant is burning out Covid as I type this and the need for a vaccine no longer exists.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Under principle 1 of the Nuremberg code, voluntary consent is absolutely essential and you will be held responsible for crimes against humanity if you push this illegal action on Washington state citizens.

Subject: January 12, 2022 meeting

External Email

Dear Washington state board of health,

As we have the opportunity to make our comments heard about not requiring forced Covid vaccinations upon our school age children, we respectfully request you do not pass this mandate.

It has been proven to be dangerous to the children, it has also been proven that the children do not transmit the virus and rarely get the virus themselves.

According to Vaers, the vaccine has been proven to kill more children than Covid itself. The health hazard and side effects of this vaccine for children make it not reasonable to subject them to it.

I understand that some parents want to vaccinate the children despite the research and they should have the right to make that choice. Parents that are unwilling to take the risk with their children should have the right to decline as well. It is our constitutional right to make the choice.

Given all the research and statistics showing how harmful these vaccines are we request you do not pass this mandate to force vaccinations upon our school age children. This year 32,000 families have taken their children out of public schools, if you do pass this mandate, I believe you will see even more families leaving public school.

Sincerely,

Susan Ashton

Never before have I ever been told that I have no other choice than to put medication (toxic poison and unborn fetus) into my child because the GOVERNMENT said so. This is wrong, it is governmental over reach. If we don't stand up for ourselves and our children now, who will in the future? If our voice no longer matters to the elected officials in our state then maybe it is time to remind them that they were hired by our votes and they can just as easily be fired by our votes! Please rethink your choices and do not allow The Health department directors, Chris Rykedal, or Jay Inslee to mandate these vaccines.

To Whom It Concerns,

Please be advised that as a parent, I do NOT wish to have the Covid vaccination as a requirement for Washington public schools. I will officially pull all four of my children from public school if this becomes the case. It should be the parents decision whether or not our kids get the Covid vaccine. Also, please note all the dangers that come with an untested vaccine, as the vaccine related death rates and major side effects are being completely ignored by the media. I personally know two (2) people that have received the vaccine, and both were dead by the end of the week. Both were healthy young men, and now they're no longer with us. How can you suggest or force parents to give this vaccine? YOU CAN'T.

Valerie Johnson

Subject: COVID Vaccine Mandate Comment for January 12th Meeting

External Email

Dear WA State Board of Health,

After much deliberation, research, and prayer, I am writing to share my thoughts regarding a COVID vaccine mandate in Washington State. As a WA State resident, born and raised, I would love nothing more than to continue raising my own children here. However, regardless of my vaccination status, I, and many others, strongly stand against a COVID vaccine mandate for several reasons, and if enforced, will withdraw our children from schools and be forced to move.

First, it is clear the vaccine will not prevent infection or transmission of COVID. This fails one of the qualification criteria for mandated vaccines set forth by the Board of Health. Why even have qualification criteria if not adhered to? To protect the rights of the people. Most people I know that currently have COVID are fully vaccinated, further proving my point.

Thankfully, COVID is not a risk for children. The vaccine poses a greater risk of adverse effects than the virus itself. There have been reports of issues of post-vaccine myocarditis, pericarditis, cardiac arrhythmias, menstrual issues, blood clots, neurological issues, severe abdominal pain, and headaches in both children and adults. This must weigh heavily on your decision to mandate this vaccine both in schools and in adults. A German study concluded ZERO deaths from COVID for kids age 5-12. In addition, 57 leading scientists call for an immediate HALT to child mandates due to the high rate of adverse effects, and raise questions on the safety of these vaccines. The benefits of the vaccine must outweigh the risks, and there is not enough data to show the benefits of the vaccine on healthy children. Perhaps we can revisit this in the decades to come, but now, it simply does not make sense.

Lastly, Our state requires that the illness prevented by a vaccine must cause significant morbidity and mortality in the population in question. It is apparent this is not the case for most healthy adults and nearly 100% of children. I hope you take all these, and the many other concerns, seriously, and do the right thing. Please do not mandate the COVID vaccine in schools, or allow health officers to use law enforcement to force an emergency order to involuntarily detain a person to be isolated following refusal to comply with vaccination.

Sincerely,  
Sadie Johnson

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Mark Tibbles  
Anacortes, Washington

I am against adding covid 19 to the current health WAC codes for other infections diseases and I am against forcing children to be vaccinated for the following reasons:

The benefit is undetectable for stopping the spread with vaccination.

<https://beckernews.com/harvard-study-explodes-myths-about-vaccines-stopping-the-spread-but-its-even-worse-than-that-43431/>

This study by Harvard shows that vaccinated individuals have no discernable difference in how they spread covid-19 compared with unvaccinated individuals.

The study states "At the country-level, there appears to be no discernable relationship between percentage of population fully vaccinated and new COVID-19 cases in the last 7 days (Fig. 1). In fact, the trend line suggests a marginally positive association such that countries with higher percentage of population fully vaccinated have higher COVID-19 cases per 1 million people."

Secondly, the vaccines are all under EUA even according to the CDC, as comirnaty is not available in the us.

Third, I and many parents am concerned regarding the lack of research on long-term impacts on children for the COVID-19 vaccine. Especially considering the very low mortality rate among children.

These together with the staggering low number of deaths among children ( <https://covid.cdc.gov/covid-data-tracker/#demographics> ) mean that we shouldn't force these experimental vaccines on children. They do not stop the spread and only provide a marginal difference in the course of infections for adults. Without much more studies on the long term effects of these injections in children it is amoral and unethical the force these vaccines.

Finally, I am against infringement on constitutional freedoms by health order for covid 19 which is proving to be steadily decreasing in severity and mortality.

Thank you for reading.

To whom it may concern -

I think that making Covid vaccinations mandatory for school attendance is a very bad idea. Here are some of my reasons -

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

The idea of eliminating Covid through vaccination is impossible. Because Covid has an animal reservoir, even if we were somehow able to vaccinate 100% of the population of the planet (extremely unlikely) the virus would still exist in the wild and be able to reinfect humans. Combined with the fact that Omicron has proven that vaccine resistant variants already exist, it is simply foolish to believe that more variants will not be created. Because the vaccines are leaky and allow both infection and spread of the virus, the virus will always be mutating to defeat the vaccines.

I have a degree in Biology from Stanford, and have a pretty good understanding of all the science involved here. Sadly I have not seen much real understanding of true science by almost any of those who are supposed to be making decisions on this subject. Until we come to grips with the reality that the vaccines are not going to "end Covid", and that it is already endemic, bad decisions will continue to be made.

Please do not allow vaccines to become mandatory for school attendance.

Sincerely,

Tom Ellis

Subject: proposed policies

External Email

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

1. One adverse reaction should mean that no child gets the shot without proper consultation with a primary care provider on risk to benefit factors. Instead, shots are being administered by providers that give only slighted information at best to the benefits of getting the shot, very rarely are any side effects discussed with parents. This is directly in opposition with the Nuremberg Code, and Hippocratic principles which state that informed consent must be given post all risk to benefit has been shown for said medication administration. Since the Government will not take responsibility for adverse events that may happen, they should not mandate medical procedures for children.

2. Since the vaccines may only lessen symptoms, and have been proven not to prevent disease; as well as for the greater effect, children do not have the reactions that most adults do, so there is no reason for children to get this vaccine.

3. Finally, if science is supposed to refute science, the Washington State Health Board is not allowing, nor following scientific data that disputes the efficacy or legitimacy of the COVID vaccine. Instead, COVID has been turned into a political piece in which to manipulate and control the population. This is against both Washington State Constitutional principles, as well as US Constitutional provisions and principles.

Washington State Constitution is unique in that it is the only state Constitution which states clearly that the US Constitution is to be regarded as higher authority when questions arise within the State Constitution. Yet it is being 'overlooked' because of the provisions of 'Emergency Powers of the Governor.'

It is my belief that the 'giving of authority' in the form of the legislation to health boards, while appropriate and legal, should be done as oversight NOT enforcement or in what is proposed, law binding authority. Law is written by the legislature and signed by the governor, which gives the people the choice of voting for legislature and governors to overturn said laws which do not hold to principles of which we choose. Giving this power to authorities that are not voted by the people allows for 'taxation without representation', which is definitely against either constitution which is supposed to be the greatest laws of the land.

Respectfully,  
Shawn O'Reilly

I am concerned about the health risks from these vaccinations. The vaccines do not keep anyone from getting or passing Covid-19. Our family (age 10m-36) had Covid in November. The kids were just fine and back to normal in a few days. We had our 10 days of quarantine and went back to normal life. So why risk healthy children for something that hardly affects them?

Subject: Proposed vaccine mandates

External Email

We oppose making the COVID-19 vaccine mandatory for school aged children. Medical decisions should not be mandated or enforced through agency policies or decisions, but should be made by patients with their doctors. Respected medical professionals have raised a variety of questions about this particular vaccine which was rushed into production without time for human trials or extended testing. Children and young adults are the least likely to have long-term adverse effects or death from COVID-19. Young people are experiencing a marked increase in some medical conditions such as myocarditis following receipt of the vaccine. The choice as to whether or not a child should receive this vaccine should remain solely with the child's parent and physician.

Thank you,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

#1: it is the Parents God Given right to decide what is best for the health and well-being of their children when it comes to vaccines- not WSBOH or the WSDOH or the CDC or the WHO.

#2: The WSBOH has over reached their authority in a tyrannical and oppressive way- just look at the last 2+ years. Saying that you are following guidance for health and wellness shame on you. What does the science say about the effect of COVID on children? The truth is they are not affected. Maybe .09% affected. DEFINITELY NOT ENOUGH TO MANDATE A VACCINE.

#3: Do not oppress the ones that don't want it. If people want to get it that's fine. That is why we have freedom. DO YOU REMEMBER WHAT THAT IS? Do you remember how we got it? Do you wonder why the rest of the world would risk dying to come to this great nation? Don't mandate this- Don't piss our freedom away-

#4: Does it make sense? No it doesn't- Do you have long term data on its effects on Children? No you don't. Do NOT Mandate it.

#5: Everything the WSDOH has put out in the last 2 years has changed and then has changed again- masks don't work. People are still getting COVID. This Vaccine does not work- people that have been vaccinated are still getting COVID! Come on WSBOH-

WAKE UP!

For the sake of time I'm only listing 5 reasons- if you'd like to hear more please feel free to contact me on my cell which is listed below.

We as parents have the right to make decisions for our children. Also, considering that the vaccine is not effective and there are many side effects that come along with it! I would never want to be responsible of having my child go through any side effects of the vaccine. It's proven that it's not effective and clearly we are at the trial run phase. Also, health requirements should never be mandatory, but always a choice!

I am a grandparent of 15 children living in Washington. I am very concerned regarding Covid vaccine requirements. The Covid vaccination should NOT be required for children or teens for school attendance and childcare. The vaccine does not have long-term safety data for children and children have shown to be at very low risk for serious illness or death from Covid. Additionally, these vaccines currently have only emergency use authorization.

Please don't make this mandatory at this time.

Vaccinations are currently mandated for students to attend public schools, but then exemptions are allowed. I have had both shots of Moderna and still got COVID and now I am told I need a booster; will students need boosters every year to attend school? Why aren't we testing to see if our population is gaining natural immunity before we put substances in our bodies that we really don't know what long-term consequences there will be. One last thought, how many people are dying from "recreational drugs" and yet they are allowed to choose for themselves to use dangerous drugs to overdose. As I said, I have had my shots, but I believe people have a right to decide what is right for their bodies and the bodies of their children. Daillene Argo

Covid isn't a serious threat to the safety of our children and the immediate negative reactions to the vaccines are far worse. The long-term health effects can't even be known. It's not a risk we should be forcing people to take. It's a risk they should be free to make on their own with informed consent. Forcing individuals into complying with medical measures and procedures set forth by our government is beyond the scope of the government's intended purpose. We are to be protected from foreign and domestic enemies and given the freedom to pursue life with liberty, full stop.

I oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will. I also oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school. These proposals stand against the Washing State Constitution, the US Constitution and the rights of every individual to make informed decisions about their life and particularly healthcare. They are also highly prejudicial and discriminatory against minorities, persons of color, and people with religious beliefs. The Covid-19 vaccine is experimental and has no long-term testing or data to prove it is not harmful. An emergency protocol meant for the high-risk demographic cannot be used as universal treatment for the citizens of this state and this country. It is unethical, immoral and will not stand.

I am opposed to making COVID-19 inoculations mandatory for school admission or childcare in our State (Washington) for the following Reasons:

1) The Inoculations are still under EUA (experimental); No Covid shot available in the US is FDA approved. Pharma is not releasing the studies of these inoculations until 2075. No Covid shot available in the US. Since EUA products cannot be mandated per the Nuremberg Code and 18 US Code 175

<https://www.law.cornell.edu/uscode/text/18/175>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%2F18%2F175)

Any violation of US codes is a felony! Are you ready and prepared to go to court? We the parents and constituents of this state will fight it. Can the school districts afford it?

2) The inoculations have been proven harmful to children causing myocarditis and blood clots. Our children are not lab rats!

[https://stevekirsch.substack.com/p/myocarditis-rates-in-kids-is-off?r=o7iqo&utm\\_campaign=post&utm\\_medium=web](https://stevekirsch.substack.com/p/myocarditis-rates-in-kids-is-off?r=o7iqo&utm_campaign=post&utm_medium=web)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fmyocarditis-rates-in-kids-is-off%3Fr%3Do7iqo%26utm\\_campaign%3Dpost%26utm\\_medium%3Dweb&data=04%7C01%7Cwsboh%40](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fmyocarditis-rates-in-kids-is-off%3Fr%3Do7iqo%26utm_campaign%3Dpost%26utm_medium%3Dweb&data=04%7C01%7Cwsboh%40)

3) Forcing to inoculate children for a virus that doesn't effect children to comfort adults who live in fear is wrong! Remember the old saying, "If your friends jump off a bridge would you follow!"

PLEASE do your research! Use Duck duck go to do your research. Google lies.

---

The covid "vaccine" is an experimental drug only being used only under Emergency Use Authorization. There are no long term studies on this drug. There are no comparable studies done on similar drugs because this is a totally new technology. This is not a traditional vaccine that introduces dead or live virus particles to trigger an immune response and create antibodies. Again this is a totally new, untested drug. Therefore, you can not ethically require people to inject their children with an experimental drug. Children are not at risk of dying from Covid. In fact, short term statistics prove that children are more likely to suffer serious side effects from this experimental drug than they are to suffer complications or death from Covid. The argument has been made that children need to be vaccinated to protect adults from Covid. There are two (or more) flaws with this argument. First, you can not ethically require someone to use an experimental drug to protect another person. Second, the vaccine does not prevent the vaccinated from contracting or transmitting the virus. Therefore, there is no protection for adults if vaccinated children can still transmit the virus to them regardless of vaccine status. Other required vaccinations were studied for decades before they were added to the required immunization schedule for school children. Long term studies have been completed on these vaccines. And still with these required vaccines, there are exemptions available to children and parents. Children who have an exemption to (for example) the MMR vaccine are not segregated, tested or treated any differently than vaccinated children. Currently those fearful of Covid have already begun to segregate and treat the unvaccinated differently regardless of the fact that vaccinated people can also contract and transmit the virus. This insanity has to end! Finally, the state is not raising our children. You are not their parents. You are not even their doctor. You are not allowed to make medical decisions for every child. That right and privilege lies solely with parents. If you enact a requirement for this vaccine in schoolchildren, be prepared for a mass exodus of children away from public school to home based instruction. Also prepare yourselves and budget for lawsuits. You have an awful lot of angry parents and citizens in this state that are tired of the BOH acting like the fourth, unelected branch of the government that wants to rule over the people with an iron fist. The government derives its power from the consent of the governed. We Do Not Consent to your tyranny! Lisa Dahlgren

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19,

but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about +our +health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Phil Weight

Board of Health:

I strongly OPPOSE adding any Covid vaccine to the child/school entry list under Agenda Item #8

I am very concerned about what the Board is considering during this next meeting. The pandemic has already devastated many communities, industries, schools and businesses, but more importantly: families. Due to an overwhelming, misguided, improper, illegal, and unconstitutional over-reaction on practically every front, millions of people were either kicked out of schools and businesses or forced to become human lab-rats for a Holy Grail medical experiment that quickly proved to be the WRONG THING TO DO. Facts came to light early that should have immediately warned us that the "vaccine" was NOT the safe, effective solution to the pandemic it was claimed to be. Many tests and medical studies showed the "vaccines" were rushed through too quickly, without normal (time-consuming) procedures, and the government's suppressing those studies does NOT make them inaccurate. The original claims to be 90-95% "effective" have now proven to be false. But most importantly: it rapidly became obvious that children were basically at NO RISK to become seriously ill or die from this new manufactured "virus!" Not only are healthy children less likely to get the "virus," even the ones that do are less likely to transmit it.

Children need in-person teaching and social immersion. Mandating this ineffective, unproven, DANGEROUS shot on our kids should NEVER be required.

I also strongly OPPOSE adding ANY new product to a mandated list unless it has successfully completed Phase III trials for proper licensure, which you are considering under Agenda Item #11.

The Covid "vaccines" were not only rushed through development without the normal, required, necessary Phase III trials. This obviously has shown to be one of the most egregious medical mistakes in the history of mankind. All any of us should need to know is the pharmaceutical companies demanded, and were granted, FULL IMMUNITY from all legal liability related to their "vaccines." This fact alone should tell any discerning adult there is something rotten in Denmark. The companies that MAKE the drugs know what they are capable of causing. The pharmaceutical company's leadership, doctors, and scientists know their products may have debilitating, or even deadly side effects. In our overwhelmingly litigious society, they knew this would have been the biggest financial gamble they could ever take without government protection, and they also knew they couldn't take financial advantage of the hysteria forever. They are in the business of making money. Anyone who honestly thinks otherwise obviously either never paid attention in life, or are severely intelligence-challenged. The application of this "vaccine" killed more people in the first three months than ALL of the vaccines in the history of vaccines EVER HAD!

No product should ever be considered without going through ALL of the required Phase III trials.

Thank you for your consideration.

Respectfully,  
Richard Cline  
Underwood, WA

To the Washington State Board of Health

With each passing day, people all over the world are uncovering and sharing the truth about covid, its origin and its treatment – or lack thereof. Vaccines are being mandated as the only alternative to treat covid, but that's not only false, it's also irresponsible, illegal, unconstitutional, potentially harmful and/or deadly, and in violation of the Nuremburg Codes.

It's important to note that this gene therapy injection, also known as a covid vaccine, was introduced under emergency use authorization only, which should have only occurred when there were no viable treatment options available. But as we now know, there were several treatments available and vital information regarding those options were suppressed by the media and the government. Many well-respected physicians and scientists, including the inventor of mRNA technology, have stepped up to voice their concerns, despite opposition, and have proven it to be so.

The misinformation and propaganda surrounding covid are too vast to be included in this short email, so I urge you to step outside the box of this politically charged narrative and fight to stop the tyranny. This is America, home of the free. Let's keep it that way. It's not just for the people you're obligated to serve and protect, but for you as well. Do not let the devastating history of Nazi Germany repeat itself.

NO to forced quarantines, which should never occur under any circumstance in a free society.

NO to forced covid vaccinations for school-age children, who are not at high risk of contracting covid, but rather placed at greater risk of harm from the vaccine.

Susan Dissmore

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. According to VAERS, there have been thousands of adverse reactions to the vaccine, including an alarming amount of cardiac problems, like myocarditis. Children have very little risk of hospitalization and death from the Covid-19 virus. Please vote to keep them safe.

Sincerely,  
Rebecca Rijo-Berger

All other immunizations required for school provide long term or permanent immunity against the disease. They are also all diseases that pose a significant threat to the recipient of the vaccine. Since neither of those statements apply to the COVID-19 vaccine for healthy school age children, it should not adopted under the same auspices.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Because we have chosen to harm children for the benefit of adults for 2 years now and it needs to end. This vaccine does not prevent the spread and transmission of Covid itself therefore it should not be a mandatory vaccine. The parents of this state should have a right to choose what is put in their childrens bodies. This is and over reach.

Covid has a 99.9 survival rate. There is no need to force these vaccines on our children. They're more of a chance of the kids being affected negatively from the vaccine than from the actual virus.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for hearing my voice on this matter!

I am a citizen who has spent a fair amount of time in healthcare working for physicians who treated people of various diseases including viruses and infectious diseases. Observation from the frontline over years of service.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

As stated above WAC's 246-100-040, 045, 100 and 246-105 several others are used to support at least the enforcement and defining vaccine properly

11.

Are you Pro or Con on the proposal?

2. Con

---

The hearing and proposed policies all of the above WAC's which are flawed in that there is no supporting proof children are at risk of death which would be the only reason to call it and 'eminent threat' in our own state or anywhere in the country. The proposal is for a vaccine and these are not vaccines because they do not stop the virus or any of its mutations through boosters- these are still experimental shots and the number and severity of the "vaccine" injuries is higher and long lasting - especially to females reproductive health but not limited to any one in terms of the cardiological injury and deaths experienced by top athletes and service men and women as testified by an Army Lt. colonel physician. So WAC 105 in totality should be dismissed as inapplicable especially when early treatments that have worked from time immemorial on viruses utilizing Nebulizers for highly distressed lungs via steroidal treatment ONLY to the lungs instead of by mouth, injection or I.V. in addition to mono-colloidal treatments, ivermectin and hydroxychloroquine by off-label benefits among others. Furthermore, WAC's 246-100-040, 045 and 100 use language to quarantine on SUSPICION repeatedly and taking away someone's freedom is a SERIOUS enforcement that cannot be lawfully done on SUSPICION and then force a CITIZEN and TAX PAYER to get an attorney when a local health board representative can keep a person there beyond the initial 10 days on SUSPICION OR for ANY disease - this was not limited to Covid - it could be for a cold and if a person sneezes- that could be SUSPICIOUS. These WAC's are not appropriate to the constitution of WA or the United States. They breach Parental Rights which the US Supreme Court would and has consistently overturned. Removal of a person's Civil rights of freedom does not fall under the purview of the State Board of Health any more than mandates under OSHA because they are not ejected officials rather they are agencies. Forcing people to put a dangerous drug into their bodies as children - the most resistant population who will and are building natural immunity which is better than the shot which does not nor does each successive shot referred to as a vaccine which it is not and these individuals are still shedding the virus while LOSING immunity. This should not even be a proposal when the variants are so weak and all the data across the country

and the world says it's over. Be not fooled about cares verses hospitalizations who are just covering liability by admitting patients at this point not to mention the dollar's being coerced upon them- the FACT that 98% are surging this virus now (and always) in this state does not diminish the pain and suffering by those who have suffered terribly - schools and health departments do not need to over regulate any more.

To Whom it May Concern: It has been brought to my attention that your group will be meeting to vote on " mandatory injections " for these "trial vaccines", on our children. This virus is mild and not even a danger to children and adults. Colds and flu's will always be here! Please, consider the effects of the unknown ingredients in these "shots" that won't be disclosed until 2076, that may potentially cause death or life long issues that have only begun to be brought to light. These "mandates" are being driven by a Governor that has over-stepped his authority! I pray, that God intervene on behalf of His children. I ask you to seriously understand that you will be standing before Him one day and held accountable for what you do to the Children and Adults of Washington State.

(This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

## III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public

acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)
- Less than 40% of kids 12-17 are vaccinated. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)
- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

Dear Board of Health,

I am a writing to officially submit my opinion on the following -

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school.

I OPPOSE COVID-19 shot mandates, period!

I SUPPORT Informed Choice Washington's Petition for Rulemaking in regards to Item 11. (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

1. All COVID vaccines remain under Emergency Use Authorization (irrespective of many people believing that the Pfizer one has been approved; it hasn't);
2. Children under the age of 18 have a 99.995% survival rate from COVID infection;
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19;
4. There are no long-term studies to document and history of safety;
5. Studies now document that both the vaccinated and unvaccinated can both transmit Covid; and therefore
6. The vaccine does not stop the spread of the disease.

Sincerely,

Stephany Mast

---

There is no reason to make a vaccine that is not fda approved mandatory for school admittance. Most children who get covid have very mild symptoms and recover quickly. Parents should have the choice to give this to their children. There are no long term studies of this vaccine. Many children who have received this vaccine are now experiencing heart issues. This is not normal and not ok.

This shot should be a parents choice. It should not be made a mandatory. VAERS as well as lots of parents and medical professionals have seen adverse reactions. The CDC has even stated that myocardial effects is happening as well as many other effects. I also believe that the public school system will have a huge loss of funding because more people than y'all realize will be pulling their children.

Children are not being affect by Covid like adults are and so there is no reason to force this vaccine on them. Our right as human beings is that we have a choice in what we do with our lives and what we put in our bodies. We should all have that right to choose what we want to put in our bodies and our children's bodies. It is against our constitutional rights to force this vaccine on anyone.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

It's absolutely unamerican and against our rights as parents to be forced to put our child through a medical procedure. Kids are at little to no risk to the hoax that is Covid-19. To think that we, as a society, would risk our youth on an experimental medical procedure to "save" the elderly is absolutely absurd. The shot has been available to those that wish to take it, forcing it would be unethical and against the Nuremberg code. Mandate this for schools and you will see a huge rate of pulling our kids out of the system and fighting for our tax dollars back.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: No Covid shot for students

External Email

Please do not require Washington State students to get a Covid-19 shot in order to attend classes.

This shot is still unproven for the long term effects it might have on our students and since children are a very low risk for getting the virus- this risk of the shot's unknown effects seem to outweigh the benefit.

Also, it is now proven that Covid transmission occurs whether one is vaccinated or not (e.g. cruise ships where everyone is vaccinated still have to go to port because of outbreaks and every week on the NFL there are fully vaccinated players sidelined with Covid. )

This is not going to help our children and might even harm them .

Parents must have the right to make this decision for their own children - not the state board of health.

So, please, in light of these facts- and for the sake of our kids, do not require the Covid shot for our students.

Sincerely-  
Steve Fosnot

Subject: Meeting on January 12th - Proposed WAC's

External Email

Dear Members,

I stand completely opposed to the overreaching Covid policies and abuse of power being considered. They are immoral and over broad. Medical freedom and bodily autonomy is a human right. If we don't have autonomy over our own bodies, we are no longer free. I am adamantly against involuntary quarantine and forced injections. Mandatory injections for children are especially troubling, as the risks far outweigh the benefits for them. All injections are still under EUA and there is no long term safety data. The companies also have no liability for any injuries caused. No one is being given informed consent as required by law. Children are at a greater risk of being hospitalized with myocarditis, or other adverse reactions, than with Covid. The risk of getting in a car to drive to school is far higher than the risk of Covid. Children also aren't known to be spreading Covid to adults. Their immune systems shred the virus. Many children have already acquired natural immunity and injections would wipe that out. If you allow these policies to be implemented, you will see a mass exodus from the school system and even from our state. I stand against these proposed WAC's. Please have a conscience.

Respectfully,  
Sasha Smith

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.
2. Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.
- 3.Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.
- 4.Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether COVID-19 vaccines assist herd immunity.
5. For children, mandating the experimental COVID-19 vaccine would only benefit the pharmaceutical companies. There is no compelling reason to risk harm to our children by mandating the vaccine.

Sharon Michael, M.D.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines, including among other adverse effects death and myocarditis.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason and/or become subject to consequences by virtue of indictment as appropriate under the Nuremberg Code.

Children are the least susceptible group to be affected by Covid. Injecting them with a failing vaccine that has no long term testing is dangerous. Making it mandatory for school or daycare attendance will only further the division that is increasing in our society.

Proposal to require immunization against COVID 19 for Child Care and School Entry

11.

Are you Pro or Con on the proposal?

## 2. Con

---

I am against mandatory vaccination against COVID 19 and I urge you for the safety of our children to not require mandatory vaccination. There are families who have already vaccinated their children, or have begun that process. There are also families who are hesitant or do not want to vaccinate their children because of the side effects (myocarditis and pericarditis among them.) The FDA fact sheet for the vaccine also states: "Serious and unexpected side effects may occur. The possible side effects of the vaccine are still being studied in clinical trials." This vaccine is only under Emergency Use Authorization, unlike other vaccines required for school and childcare entry. I urge you to not require and EUA vaccine when schools and childcare sites have been operational for a year now with few outbreaks. The COVID-19 Outbreaks in K-12 Schools Report documents less than 1% hospitalization and 0 deaths as a result of these outbreaks. We need to trust that parents and caregivers want to do what's best for their children. It should be up to the family to weigh the pros and cons and decide whether the COVID vaccine is something they want to get.

External Email

Dear Samantha Pskowski,

Please do not create a police state with requirements or even allowances for law-enforced quarantining, isolation, medical exams, treatments, or vaccinations in regard to Covid-19.

There are still no long term studies to show Covid vaccines are safe. Let people decide whether to vaccinate for themselves.

Furthermore, the vaccines clearly aren't working to prevent disease and the idea that one's infection is less severe is dubious at best- afterall, how can one know how severe it would have been had they been unvaccinated? And that, especially when so many unvaccinated have such non-severe infections.

Please do not take away parental freedom for healthcare decisions for children. This should be a personal decision for each parent. And children are at very low risk of developing severe Covid.

The vaccine does not stop the spread of this disease as studies show both the vaccinated and unvaccinated are spreading it.

Finally, I find it shocking, unscientific and discriminatory that provision for those who have natural immunity never seems to be considered. If any new rules are made, PLEASE address natural immunity.

Sincerely,

Rebecca L Hageman. RN

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The Covid vaccinations are still under EUA; which means they are still experimental and the data is not being released and there hasn't been adequate time to understand the long term complications on anyone, especially children, who are still developing physically and mentally. The only Covid vaccine that has gotten FDA approval is unavailable in the US and the data regarding the side effects of that particular concoction, nor the ingredients has been released to the public in order to attain full informed consent.
2. There are numerous studies and sufficient data released, including on the CDC's website, stating the fact that children are the least affected by this virus and have the least adverse complications from it and have healthy natural immunity when or if they do contract it.
3. It is unethical and illegal to require anyone, especially children, to be forcibly injected with an experimental drug and not given the information for proper informed consent. It is illegal according to the international Nuremberg code, US and state constitutions to be coerced, bullied, and punished into human experimentation.

Washington state is attempting to go down a very dark and slippery sloped road if we do not stand up for our rights and our freedoms for our children. They are literally our future and if we, as adults and parents, do not say NO to this egregious over-reach of a power trip then we are literally digging our own graves to insanity and failure. We must do better and show our children that they matter and their freedoms matter, not only to them but to us as well.

Thank you for your time and I appreciate being given the chance to voice my concerns to those that I have elected to represent me. I respectfully request that this agenda NOT be passed and that the health of our children NOT be thrown to the wolves of a human experiment.

Hello,

I am writing to let the SBOH that I do not want COVID-19 shots mandated to school children in Washington state.

I OPPOSE agenda item #8. I oppose any action of the Board to form a technical advisory group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for schools. I oppose COVID-19 shot mandates period.

I SUPPORT agenda item #11 Informed Choice Washington's (ICWA) Petition for Rulemaking. The petition (filed by Xavier Figueroa, PhD, on behalf of ICWA) asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product or any licensed product that lacks Phase 3 trial studies, to the school required list.

Sincerely,

Richard Carosa

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, Randall J Dormaier

I am opposed to mandating the vaccine for school and childcare. It is a parents right to decide and children are not at risk for covid 19. We have no long term studies on what this could do to the future of our children's health. They are up against so much already please don't hurt the health of this generation.

Please do not require a Covid vaccination for children. There are so many with underlying health issues and if you require this vaccine they will not be able to attend school. This is doing a huge disservice to Washington states children. The vaccine is only being used under emergency authority, and absolutely should not be required. It is a personal choice that should be made by Individual people and between children and their parents. They should absolutely not be mandated. Children are at extremely low risk forgetting and even dying from the disease. Mandating the vaccine will do so much more harm than good. Please listen to the parents of your state! We are depending on you!

The scientific data is clear, children in general do not need a Covid19 Vaccine and are at almost no risk. Parents with their medical doctor should make this decision. It will vary per child and should be the parents choice. The current available shots do not prevent transmission (spread.) The CDC as has the medical community made it clear even without the shots the safest place for children is in school. That this would even be considers flys in opposition to widely published medical data. It is clear parents are already pulling their students in large numbers from the public school system and this will only serve to have more parents do so especially in younger children. There are parents that are currently delaying getting standard vaccines for their children due to the mistrust of the medical community that this pandemic has caused. Certainly for some it is a very good choice to get this especially with underlying condition but again that should be made between the parents and the childs doctor. I am completely opposed to this at this current time.

The COVID-19 crisis has led to many lives lost and has put stress on healthcare providers world wide. However, those most affected by COVID-19, based on CDC data are those of advanced age and those with significant comorbidities; especially diabetes, obesity and heart disease. Fortunately, vaccines are available for those who fit these high risk categories and wish to protect themselves from the devastating effects of this disease. Unfortunately, these vaccines are not sterilizing. They do NOT prevent transmission. They do NOT prevent contracting COVID-19 in vaccinated persons. Therefore, vaccines should be regarded as a personal choice and preventative measure for those who have weighed their risk-benefit ratio with their doctor/provider. Parents decision to vaccinate their minor children should be left up to them and their pediatrician. Children are at very low risk of having severe illness or dying from COVID-19. Even if children are vaccinated, they CAN still spread it to adults and/or other children. These vaccines are still under EUA. Comirnaty is not available in the US for distribution. It has been given CONDITIONAL approval and BioNTek must first investigate the real risk myocarditis poses, especially amongst 16-25 year old males. These vaccines are still very much in the testing phase. With them having very low benefit for children, they absolutely should not be required for school participation. The long term risks of these vaccines are not yet known. We MUST know the implications of requiring a treatment for an illness that disproportionately affects older adults with underlying conditions-NOT healthy children-prior to requiring it to attend school. I am strongly opposed to this proposal. The cure cannot be worse than the disease. We need to stand up to big pharma who are pushing these senseless policy ideas, without paying attention to the actual statistics of COVID-19. They do not care about our children. They are more concerned about the billions in profits that have come from mass vaccinations. I am a mother who believes in informed consent for medical treatment and sadly I am not seeing that take place. We cannot require experimental treatments for our children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Please vote against the vaccination mandate!

These vaccines have no long term safety data. The short term safety data indicates greater risk for harm to children than natural infection. All currently required immunizations went through a much longer time period (6-16 years AFTER FDA approval) before being required. Currently required vaccines are sterilizing, the mRNA vaccines are not. These vaccines seem to only show benefit to the person being vaccinated, and the efficacy wanes within months, requiring repeated boosting. We do not yet know the cumulative effects of these shots. It is amoral and obscene to consider requiring parents to put their children at risk of harm with no direct benefit to the child. Omicron evades this vaccine, and possibly even shows negative VE making mandates pointless and wrong. No sane society uses their children as shields to protect adults and give them a false sense of safety.

Tess Johnson

Mossyrock, WA

Dear Sirs and Madams,

I am writing to you regarding the Advisory Group meeting on Covid-19 shot mandates for school children in the state of WA. I was able to listen in on the Zoom meeting on Wednesday, December 29, 2021 and have some thoughts to share.

As the mother of young children and as a healthcare provider myself, I cannot understand how the TAG and BOH can consider voting to require an experimental gene therapy for children in daycare and K-12 when it is only under EUA, and has only been in use for less than 1 year. Why is the government so set on experimenting on our children? Why is this such a high priority when children are affected by Covid-19 at such a low rate? Those children who have unfortunately succumbed to Covid-19, had other comorbidities which were contributing factors. Show me the documented hospitalizations and deaths for children with no other health conditions, because I am not seeing it.

In the TAG meeting on 12.29.21, criteria for mandating injections was discussed. One of the points for consideration was children being a reservoir of the disease. This is simply not true for Covid-19. As a ARNP, I have successfully treated many adults, and in many cases, children in the home did not test positive or were asymptomatic positive cases. It is my professional observation that children are not a reservoir for Covid-19, and therefore this cannot and should not be mandated.

No one wants to discuss Farr's Law, which states that viruses become weaker as they mutate. Perhaps more transmissible but less virulent. This is the basis of the 2 weeks to "flatten the curve" that has turned into 94 WEEKS of a seemingly never ending state of emergency. For a virus that for many is akin to the common cold. Unreal!

It seems that the BOH has made up their minds, regardless of the action groups findings. I have spoken with many parents in my community and this will cause massive unenrollment in the public school system. Parents and community members have lost their trust in the public school system and the healthcare system. The State of

Washington and Governor Inslee are on a power trip, and they are NOT and will NOT act as conservators of our children. Parents are not near as ignorant and compliant as you make us out to be. We can and will use the power of the pen to fight for our children and we will not back down.

Respectfully,

Tess Johnson, MSN, ARNP

You have no right to dictate my children's health. Especially outside of school. Making social distancing, temperature checks, masks, and even covid tests requirements to attend school only effects my children while they are at school. Mandating the covid vaccine is an overreach, as it effects them outside of school. It effects their whole lives. You have no right. Personal beliefs aside. You have no right. I will pull my children out of public school if you attempt this dictate. Additionally, if you move forward with this dictate, I will seek to work with other parents of like mind to stop you. Perhaps legal action will be necessary. You are about to step into a discrimination/segregation quagmire.

January 6, 2021

RE: January 12, 2022 meeting

- Opposition to Agenda Item #8, the Board's formation of a Technical Advisory Group
- Support for Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

Ladies and Gentlemen,

I am sure others have provided you with sound research, properly conducted, to demonstrate why we should not be mandating vaccinations particularly in children. As such, there is no need for a Technical Advisory Group on this matter; thus Agenda item 8 pertaining to this should be voted down. To form such a group results in a very small number of people steering decisions for children and their extended families statewide. As of July 2021, the US Census Bureau indicates the state population over 7.7 million with 21% being under age 18. You are making decisions on behalf of 1,625,125 children plus several million other family members, for that which affects one person affects the whole family.

Now what type of information would these decisions be based upon? What has been the quality and accuracy of public information given to the WA state government and citizens received these two years? It has been a rollercoaster of bait-and-switch actions. The issuers of official guidance—FDA, CDC, NIH, etc. referred to collectively as “Federal officials”—told us the vaccines would prevent people from becoming ill with Covid-19. Once enough vaccinated people caught Covid, they switched to saying it doesn’t prevent infection but prevents death, and that people will suffer much less if vaccinated prior to being infected. Meanwhile, they deny Covid deaths amongst the vaccinated, spreading for many months the soundbite that the vaccinated have a 1 in a million chance of dying from Covid. This is a rare outlier figure that cannot be substantiated and defies common sense. More realistically:

“[...] the exact definition of rare disease, or orphan disease, varies from country to country. The National Institute of Health classifies a rare or orphan disease as one with fewer than 200,000 cases in the country. The European Union defines it as any disease that affects five or fewer people out of every 10,000. Whichever definition you use, the answer is the same: Thousands of rare diseases affect millions of people every day.”

The guidance from the Federal Officials later dropped to 1 in 250,000. However, you can still see by the NIH own definition that this is an outlier figure, one that would not pertain to a general population. And the Federal Officials in collaboration with the media do not accurately depict the increasing rates of Covid deaths amongst the vaccinated. Meanwhile, the CDC still promotes adverse effects like Guillain-Barré Syndrome as rare when at the same time the American Neurological Association is following the significant occurrences of post-vaccine incidents . The lists could go on and on, as for two years we have had very specific messages intentionally aimed to conditioning the general public

through collaboration with media outlets.

In spite of various legal actions nationwide against mandating vaccination, Washington state has chosen to expedite vaccinations, modeling for organizations statewide to terminate thousands of workers by accepting but not accommodating exemptions. While at the same time various officials speak of the 'unknowns', they advance controls with penalties to citizens at a rapid speed based on insufficient and even faulty science. For example, just this week, the National Comprehensive Cancer Network® updated their Pre-exposure Prophylaxis recommendations:

"research shows many immunocompromised people develop inadequate immune responses from vaccines. Thankfully, we now have additional tools to help people in active treatment for cancer, solid organ transplant recipients, engineered cellular therapy (e.g. CAR T-cell) or stem cell transplant recipients (a.k.a. hematopoietic stem cells), and those with other immunodeficiency-causing conditions (such as HIV, DiGeorge syndrome, or Wiskott-Aldrich syndrome)." [...] "The Food and Drug Administration (FDA) has issued an emergency use authorization for the monoclonal antibody combination of tixagevimab plus cilgavimab for pre-exposure protection from COVID-19 in adults and children starting at age 12 (weighing at least 40 kg) who have moderate to severe immune compromise and may not be responsive to vaccination. Patients with blood cancers (including those receiving stem cell transplantation or engineered cellular therapy) are more likely to have inadequate responses to COVID-19 vaccination" {...} "We have new agents to prevent and treat COVID-19 that will benefit patients with cancer"

Meanwhile, "the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission." [...] Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else." [...] Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated." In contrast to the narrative espoused in collusion with media outlets, vaccinated persons do carry the same, and sometimes higher, viral load as the unvaccinated, thus the unvaccinated are not the super-spreaders.

Now we face Omicron which is 95% of Covid-19 cases; experts agree it is milder than previous Delta and will not result in as many hospitalizations nor deaths. Yet the public remains conditioned to believe the deaths occur amongst the unvaccinated, and WA state government continues driving policies and taking actions with this presumption as well. In addition to VAERS data (which has been demonized in the narrative) and reports from many countries, an example of our government's own data would be the HHS' Countermeasures Injury Compensation Program (CICP) Data of the 4751 Covid injury claims. The program only has 5200 claims of which 4751 claims pertain to Covid-19 treatments. The Epoch Times earlier reported that out of this 4751, 2297 are claims of adverse effects from vaccination with over 600 deaths in these claims. Forbes reported that the HHS states there were only 1357 vaccine claims and 53 of these were deaths. That is 3.9% of the claims. The article also demonstrates how the government is not paying compensation for Covid vaccines and the new limitations it has placed upon them.

Adult Americans have been the human experiments for these vaccines for too long. Officials in the FDA and CDC have made statements that go without recourse such as males under age 40 have greater chance of suffering debilitating damage from the vaccine than from the Covid virus itself. There have been many studies substantiating that. Last month, a panel of advisers to the Centers for Disease Control and Prevention unanimously recommended people do not take the Johnson and Johnson vaccine due to adverse effects and deaths. Unfortunately, this came after 16 million Americans had already had J&J. Other countries had already banned the J&J vaccine and have banned

mandates as well.

Now we suffer the move to experiment on our children despite that a systematic review of the research found:

“five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially”

Last October, FDA panelist and Editor in Chief of the New England Journal of Medicine Eric Rubin said “We're never gonna learn about how safe the vaccine is until we start giving it. That's just the way it goes.” Given that the tweet had 1.8 million views, I assume you are already aware of this. Since last spring, the death rate associated with Covid-19 in Whatcom county has run at or just under 1% for all ages. Meanwhile, the obituaries and testimonials of vaccine survivors increase as tens of thousands of people, with all good intentions to serve their country, are maimed and killed by the vaccines. And who could ignore athletes in their prime, particularly soccer players, collapsing on the field? With 183 deaths so far and hundreds more injured, young adults have suffered.

You can now see the need not only to vote down item 8 Technical Advisory Group but also to approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

While it is a dearth of information, I ask that you take time to seriously review in detail the resources provided by me and others prior to Monday's meeting. Thank you in advance for doing so.

Sincerely,  
Renee M. Baranek

I am against the proposed agenda to mandate Covid 19 vaccinations for childcare and school entry due to the inefficiency of the current vaccines offered. At this time even a fully vaccinated person who has had the booster can still get Covid and pass it to others, just like a non vaccinated person. The survival rates of children under 12 is 99.8% and the vaccines offered are still considered experimental with unknown side effects and no long term studies have been conducted to date. As a parent the risk does not outweigh the benefits. This agenda is an overreach by the WA State Board of Health. I encourage the Board of Health to NOT pass any mandates related to vaccines unless they are also willing to be held accountable for future medical problems related to the Covid 19 vaccines and booster shots.

I do not believe children should be required to have Covid inoculations to attend public school. Long term affects of all forms of the Covid shot are yet to be seen and they remain only approved for emergency use. After reviewing many studies I also believe that the emergency approvals are based on incomplete data. Children who have little to no risk of being harmed from Covid may very well experience harm later in life from an inoculation they don't need. Requiring Covid inoculations will most certainly cause more harm than good.

Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children!!

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

ALLOWING LOCAL HEALTH OFFICERS TO USE ENFORCEMENT TO FORCE AN EMERGENCY ORDER TO INVOLUNTARILY DETAIN A PERSON, OR GROUP OF PERSONS, TO BE ISOLATED IN A QUARANTINE FACILITY FOLLOWING REFUSAL TO VOLUNTARILY COMPLY WITH REQUESTS FOR MEDICAL EXAMINATION, TESTING, TREATMENT, COUNSELING, VACCINATION.

Forcing kids that have the lowest chance to die for covid is wrong. The science backs this claim up. It's the parents choice to decide the health and welfare of their children.

Greetings,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thank you for your consideration.

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates. The science does not support the notion that unvaccinated individuals spread the virus, any more than vaccinated individuals. Children are statistically at zero risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. ([www.fda.gov/media/151710/download](http://www.fda.gov/media/151710/download)) The required studies on children will not even be completed until May 31, 2027. And, that is only one of the required pediatric assessments. There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed.

We all are concerned about the safety of our children and teachers. But, making a therapy mandatory, whose efficacy in preventing transmission is increasingly short lived as new variants of COVID-19 emerge, abandons reason. Specifically, when you consider that we just don't know how detrimental the therapies will be to the long-term health of all people, especially children whose bodies are still developing. We don't know what we don't know. We as a state have historically been the beneficiaries of a certain Washingtonian level headedness, a trait that has kept us out of the numerous pitfalls we've witnessed other states succumb to. We can't use our children as test subjects. Let us set an example for the nation and world, and pursue measures that protect informed consent for our public health and upholds the highest standard of medical ethics.

I also strongly OPPOSE WAC-246-100 that will allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, and vaccination. This policy is tyrannical, an atrocious abuse of power, unconstitutional and a violation of the public trust.

Sincerely,

Zech Bordon

WSBOH members,

I would like to voice my opposition to making COVID-19 shots mandatory for school admission or childcare in our state. Children overall are at an extremely low risk for Covid infection, and according to statistics healthy children almost never suffer serious or even moderate complications from Covid.

There are currently no long-term studies or data on the safety of the vaccine for children, and we do not know how the initial shot, or subsequent boosters, could affect children in the future. We do know that young men, especially 16-25 years old, have an elevated risk of heart-related issues, such as myocarditis, that increases with each additional shot.

Also, according to recent studies and data from the CDC and other health organizations, those who have been vaccinated can still catch and transmit Covid to others. Based on ever-increasing information there is no science- or health-based need to require this vaccine for children at all.

Thank you for your time and consideration,

Sabrina Bruinsma

Since the vaccines is still at the EUA stage and there is no guarantee for the safety and effectiveness. So the vaccine mandate is violating the constitution and citizen's right. If the state authority still want to impose the mandate to all citizens and children, the damage will go around and eventually everyone will be impacted sooner or later, including those who make the policy. Be respective and be wise, since history repeats itself over and over.

We would like to express our extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

Linda and Len Psyk

1/7/2022

To whom it may concern,

Thank you for your time and willingness to allow for openness and feedback. My name is Sarah Werling, and I am a mother, an elected school board director, and I have been honored to serve as Center Manager and Family Service Coordinator for a local Head Start program. For the past sixteen years, I have served the most vulnerable children and families in a small rural island community in Washington State. Evident in my years of service, I wholeheartedly believe in the Head Start program and the public school system and I have bear witness to the positive impact these programs has had in our community, and in the individual lives of the children and families in which we serve.

I will make it known I am not against the vaccine; I am however against the mandate. I strongly believe individuals should make informed decisions and choices about their own healthcare. Humans should not be coerced into getting an experimental vaccine. I have supported our children, families, and staff through from beginning of the pandemic, and I have ensured they have had the access to information and the resources to educated in their decision to get vaccinated; or not. We as a collective have kept providing quality services to our children and families throughout the pandemic, and even well before a vaccine was made available. Now that a vaccine is FDA approved and pursuant to Governor Inslee's Proclamation 21-14.2., I am now considered a threat to myself and others and I am unable to perform my job duties, although the vaccinated is proven to still become infected and still transmit it to others.

San Juan County has the highest vaccination rates in the nation and is a small handful of counties in the United States without a single fatality. San Juan County has one of the lowest case rates in America and is reported as one of the least vulnerable United States counties. Have we explored all accommodations in lieu of forcing staff into vaccinations? This is not a one size fits all approach. What is occurring in educational programs across the country as shown in the success of local school districts and other learning centers following mitigation procedures, and by having routine testing available, it is possible to provide quality services to children and families regardless of vaccination status.

As a public health board, you can stop a crisis within a crisis from being created. Programs have already lost quality staff and will continue to do so if we implement stricter mandates and restrictions. Several families have disenrolled and have decided to not even apply with the current mask mandates for their children in place. Our nation is experiencing a serious decline in quality educational staff, and an increase in children with depression and anxiety and vaccination mandates and masking children as young as two-year old's is not supporting this issue. We should be encouraging fresh outdoor air, exercise, human connection, and ensuring families and individuals have access to resources to make their own informed decisions. Mandating vaccinations without having access to the data and long-term effects of the vaccine is absurd and an overreach of your position. If WAC 246-100-070 is implemented into law, I would expect to see local health officers voted into position, as we the people have no say to who holds this position of power.

I encourage you please, to look at all options before implementing stricter mandates. We can and should do better.

Sincerely,

Sarah Werling

State Board of Health,  
I encourage you to NOT pass legislation requiring Covid-19 vaccinations for school age children. This immunization unlike other "required" vaccinations has NOT been approved by FDA. FDA has only authorized the Covid-19 vaccination for EMERGENCY USE. This vaccination HAS NOT been tested thoroughly like other required vaccinations for school age children. The fact that their short studies have proven two serious side effects of risks for myocarditis and pericarditis is proof enough to me that we MUST wait before requiring this vaccination!  
Media is avoiding the fact that Covid-19 vaccinations have been approved for EMERGENCY USE AUTHORIZATION "ONLY!"

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Please!! Let's use logic and sound reasoning!!!

Children are not severely affected by Covid. It's a fact. It's in the science!!! They are not spreaders of the virus. It's a fact!!! It's in the science.

This fear mongering makes no sense!!

This variant will dissipate as quickly as it has started just as before.

Why does the government need to make parents stressed and anxious. This is mental abuse for families.

Please take the politics out of your decisions and use logic!!!

Thank You ☐☐

Subject: Please do NOT require COVID vaccination for school aged children

External Email

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

As the mother of 2 school-age children in Bellingham, I can say with certainty that a decision to mandate kids to have this shot would wreak havoc on many families and within our schools.

I'm sure we can all agree that vaccines are an important and effective tool for preventing many diseases- and I have always been perfectly willing to utilize them to protect my own children, and our community. However, there are many reasons why (most) parents have chosen to wait on having their children receive these particular shots including, but not limited to:

\* In the scheme of things, the covid vaccines are still quite new and most parents, (while willing to receive the jabs themselves) are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light. Don't you understand that many people are DYING from this vaccine as well as having horrible side effects. Why would I subject my children to this poison?

\* In terms of how the vaccines will affect public health- that science is still evolving as well. Considering that both VACCINATED and unvaccinated individuals can contract and pass along the virus, many parents remain skeptical that any perceived or real risk is actually worth any perceived benefit. I personally know 5 family members who have had COVID after receiving the vaccine, please tell me what is the point?? It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

\* Covid in otherwise healthy children is not a large risk- and the

(extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the FREEDOM to choose their own level of risk for their family. Isn't this still a free country? This will directly go against my rights as a native American citizen.

\* There are MANY medical, religious, and other deeply personal reasons why parents are hesitant to give this shot to their children. Sadly, most of these reasons will not be covered by "exemptions"- forcing parents to choose between their children's health or their schooling. Please DO NOT force parents to make this choice. How dare you, force us into this. You should all be ashamed of yourselves that this is even a topic of discussion in a country that has fought and died for its freedom.

For whatever reason, the covid vaccines- effective or not- have been profoundly politicized, with most parents falling on one side or the other. Because of this, it is reasonable to assume that a decision to require this particular vaccine at this time would directly cause a mass exodus from our schools, shattering our communities and negatively impacting public health across the state.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families- and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that NO ONE cares more about a child's health than their PARENTS. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community.

I sincerely appreciate your time and consideration.

Sarah Pittman

I have spent over 25 years working in the medical field. This is an experimental emergency shot not a vaccine. I have several friends whom are in private practice. They have never seen the amount of cardiac issues among young children until now. Each of those children had the shot.

For the record, I do support vaccines. These cv-19 shots have not gone through the long term tests required by other shots. I will not allow anyone to put my child in harms way. It is my job to protect my child as it is the every parents.

I will get straight to the point. If this shot is added to the required shots, I will pull my child from school and move.

S. Garnett

Ms. Schreiber,

I'm writing about my serious concerns regarding the Covid related policies which will be discussed at your January 12th meeting. I adamantly oppose involuntarily detaining an individual based solely on their Covid related medical decisions and compliance. The dominant variant Omicron is much milder, so these current proposed policies surrounding Covid bewilder me. Choosing not to take a vaccine, covid test, medical examination, or quarantine should not be considered a misdemeanor requiring law enforcement to get involved. These decisions should all be voluntary.

The Covid vaccines are proposed as the primary solution for our society, however they have been shown to be ineffective after just a few months. Washington State has a large percentage of vaccinated people and yet we still have many cases. Why is that? It is not just the unvaccinated spreading Covid. People who have taken the vaccine are also able to continue to transmit the disease to others. There are many documented Covid breakthrough cases (some high profile cases). This occurs even after people have taken both initial vaccines and the booster.

We actually do not even have any current FDA approved vaccinations for Covid being offered to the public. The Pfizer vaccine that is available on the market is not FDA approved. The FDA approved Corminaty, and for some reason people are actually still

getting the Pfizer EUA injection. Does that explain why there are so many thousands of adverse effects from the Covid vaccines shown on the VAERS website at the CDC? I'm not against vaccinations in general. These Covid vaccinations need to be tested further and the public needs to be informed about the adverse reactions. There should be no mandates or coercion for any vaccinations and especially for a vaccination that has not even completed clinical trials. This brings me to my other serious concern. I think it is dangerous to mandate Covid Vaccines for school children in public and private schools. Parents need to be able to weigh the risks for each child and be free to make the decision that is best for them. Kids are at low risk for Covid but are at risk for a variety of adverse reactions.

All Covid related medical decisions need to be made with informed consent not coercion. As an American citizen we are allowed that right. I hope those of you making these important policy decisions will carefully consider the negative impact these policies will have to the community.

Sincerely,

Wendy Butzerin

Subject: COVID-10 hearing Friday

External Email

Hello -

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization.

The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense

(childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not

die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you and thank you for your service to the board!  
Sheila

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Residents of Washington State, and all other states, must maintain the right to refuse medical examination, treatment, testing, counseling and vaccination. We must be allowed to have autonomy of our own bodies and those of our minor children.

No person should be forced to quarantine or involuntarily be taken to a facility for any length of time for any reason. It is not the governments job to be involved how a person lives their day to day lives, sick or well. Each person must be able to make their own decisions based on what is best for themselves and their families. Each person must be able to obtain medical advice from their trusted personal physician and make decisions based on his/her recommendation. Forcing people to do otherwise is violating the patient/medical professional relationship.

Public Health offices are a service and should remain a service providing education and medical services to those that seek them out. Public Health should not interfere with and individual's freedom and liberty.

I oppose WAC 246-100 rule expanding the authority ot involuntarily quarantine individuals.

I OPPOSE adding C-19 vaccine to the WAC schedule of required vaccines for children.

Please put me on record in opposition to making COVID-19 shots mandatory for admission to school or childcare in Washington state.

We now know that the COVID shots do not prevent transmission. We also know that children's risk for acquiring COVID-19 is statistically so low as to be approaching zero. The unknown, long-term side effects of the drug, which is still authorized as emergency use only, makes it an exceptionally poor choice for use on children.

At this point in time, based on science, and common sense, these drugs should NOT be used on children.

Thanks,

Roger Cunningham

Regarding Covid Vaccine in schools:

The vaccine does not eradicate the Covid virus like for instance the polio vaccine. Because children rarely die from covid and are at the lowest risk for dying, I do not support children being forced to take this vaccine. As we see currently people who did get vaccinated are getting the virus like crazy so it's effigy needs to be questioned. I also do not support forced quarantines or any of the police powers you are giving the State.

Thank you for your time.

Samantha,

As you probably surmise from the subject line of this message, I am writing to express my concern about the BOH meeting to discuss adding a vaccine requirement to attend public school. The evidence is increasingly clear that people under 40yrs old face greater risk of harm from the shots than from natural infection.

With the emergence of Omicron as a common cold-like infection for virtually everyone, this is the time when we need to be discussing the timeline of peeling away restrictions, mandates, and all of the things that we've been harming our kids with over these last two years, NOT adding more useless and potentially harmful mandates. No sane society uses their children as a shield to make adults feel safer.

The idea that parents are having to worry about making a decision whether to pull their child out of school or inject their child with a vaccine that might harm them is abhorrent. The very idea of mandating a vaccine for children that has no long-term data on possible negative effects (for any age group) is amoral on the face of it.

This isn't about being "anti-vax", the latest weapon word. This is a simple risk/benefit calculation.

Every other required vaccine for kids underwent a much longer approval process, and then an additional 6-16 years (depending on the vaccine) of use in the general population, before they were ever considered as a requirement to enter public schools. We have no long term safety data on these mRNA vaccines!

Now is the time to publicly speak up against this single-minded approach to dealing with the pandemic. I personally think that they are a marvel of technology and I am glad that they are available for those who stand to benefit from them. However, our Governor and those of you overseeing the Board of Health seem to have lost the script. You need to know that this is the wrong way to proceed. I worry that they will set back trust in all vaccines for a generation if too many kids are being harmed by these new shots. Trust in our public health agencies is already at an all-time low and that is dangerous.

Please, I am asking you to back away from this idea.

I also encourage you to read this post by Dr. Vinay Prasad. He has been a voice of moderation and reason throughout the pandemic and he is deeply concerned that we may be rushing into something that we might regret.

<https://vinayprasadmmdmph.substack.com/p/uk-now-reports-myocarditis-stratified>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvinayprasadmmdmph.substack.com%2Fp/uk-now-reports-myocarditis-stratified&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C3a0a1dc98e3e45c5101108d9d19a2ab0%7C>

If you have 30 minutes of extra time then you might also listen to this interview between Zuckerberg and Fauci from way back near the beginning of the pandemic. If you do, then pay particularly close attention to what Fauci says regarding the process by which the vaccine safety profiles need to be established. Then ask yourself if the science changed, or whether something else happened.

I am hopeful that the madness and hysteria of the last two years is beginning to fall apart and that we might begin to work towards a healthier situation for our kids. They have been harmed enough by our pandemic policies. I just hope that Washington State isn't the last place to get the memo. Most of the country seems to have figured it out

already and I am astonished that we still seem stuck in some weird fearful version of 2020.

What in the heck are you all thinking?? Enough is enough. It is time to learn to live with this virus, focus on protecting the most vulnerable, and leave the rest of our society alone.

Thank you,

Erik

Subject: Vaccine Mandates for Children

To all of you,

These vaccines are ineffective and dangerous for our children. There is no upside, no "benefit" to experimenting our most vulnerable population. However, the costs of this overreach are innumerable. There is no doubt that even a cursory glance at the stacks and stack of data prove these vaccines and all other child-related mitigations are morally wrong, physically and emotionally dangerous and entirely unnecessary. Everyday, there is mounting evidence of fraud, bias and abuse in the process that brought us to this sad point in time. If you choose to mandate these vaccines or continue with ANY other Covid protocols, I will remove my children from school. You do not and will not control MY children.

Further and according to your own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so beyond the logical arguments made above, the vaccine does not meet Board of Health requirements. I demand the vaccine be removed from consideration until and unless it proves immunity to stop transmission like other common vaccines do- which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, I am certain these mandates are illegal.

Yours in deep sincerity,

Vanessa Hansen 253-355-9751

Vaccine mandates are unconstitutional and should not be treated as law—where there are natural consequences in the event the mandates are not adhered to. The decision to vaccinate myself or my child is strictly my own and the government is not in place to make decisions regarding my personal health decisions against me. It is our right to be able to access education for our children. Especially because my child is on an IEP plan. To revoke access to public education and support mapped out on her IEP plan due to a vaccine is not equitable.

Tracy Schreiber

Please do not require mandatory vaccination of school age children in order to attend public school. The vaccines that are available are authorized under the emergency use authorization act. The vaccine that is approved is not available. Therefore, requiring students to be vaccinated forces them to participate by definition in a medical experiment. Furthermore, the CDC admits that the vaccines neither prevent one from catching Covid nor prevent one from passing it on to others.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Maddie de Garay is a 13 year old girl who volunteered for the Pfizer vaccine trial with her parents support. She had devastating side effects which started within 24 hours of the second jab. She is paralyzed for life and needs a wheelchair. She is unable to eat and needs a feeding tube in her nose to provide nutrition. Her mother has been trying to get doctors including those in Pfizer study to acknowledge the side effects that Maddie has suffered. Pfizer reported her side effect in the study as only 'functional abdominal pain' which means abdominal pain with no obvious cause, probably psychological in nature. Pfizer refused to report any of Maddie's terrible side effects that she experienced in the study, which is fraudulent.

We know one of 2300 children in the Pfizer study had a very serious side effects that were not reported in Pfizer's trial. Is it ok for 1 in 2300 children to be disabled for life to prevent a disease that does not cause disability or death in children?

How many other children and adults have had devastating side effects that the pharmaceutical companies have been successful in covering up? Because not all who have died or suffered side effects have advocates who are willing to do the very difficult task of speaking out publicly.

By Extrapolating one in 2300 injury rate to the 86 million teens in the United States, some 36,000 of those potentially debilitating injuries could be expected to develop nationwide. ( The Real Anthony Fauci by Robert Kennedy p. 90)

How many of those 36,000 children will be in Washington? You have been informed and cannot claim ignorance. When parents come to you with their dead or maimed child after injecting their child with the experimental vaccine, you will have to say that you you knew this was going to happen and you didn't care, in fact you wanted it to happen

because you coerced them to have their child injected.

Are you going to inform parents that injecting their child with the experimental vaccine could cause death or permanent disability? Are you going to inform parents that they could prevent the same illness by simply taking a vitamin D tablet every day? Are you going to inform parents that giving the vaccine to their child will not protect anyone else since the experimental covid-19 vaccine does not prevent transmission?

The Nuremberg code of 1948, which states that the voluntary consent of the human subject in a medical experiment is absolutely essential and must be without any element of coercion. Mandating an experimental vaccine is coercion.

Parents have a right to decide what medical care their children receive, whether the treatment is safe or dangerous, experimental or not.

Mandating a vaccine for school children is illegal and is a violation of the United States Constitution and the Washington state constitution.

yours sincerely

a concerned citizen of Washington State

Dear WA State Board of Health,  
Thank you for providing an opportunity for residents of our state to have our voices heard. I genuinely appreciate your doing this, especially in this instance.

Please know that I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid;
- The vaccines are still authorized only for emergency use. We should not be experimenting on our children.
- One+ years into Covid vaccines is showing that both the vaccinated and unvaccinated can transmit the virus, thus demonstrating that the vaccine (with its foreseeably increasing number of booster shots) does not stop the spread of the disease.

I have a concluding thought and a line of questions to offer the Board for consideration as its members seek to do what is truly best for WA State inhabitants, especially our children:

The human body is equipped with an AMAZING natural immune system! What are natural ways we can cooperate with that system (individually and collectively) in order to strengthen its capacity to fight off the virus?

I recognize I may be accused of being 'unscientific,' but why are we not investing at least the same amount of effort, time, money, and resources into promoting overall nutritional health, exercise, vitamin supplements, and other such things?

Thank you very much for taking the time to read my comments.  
Respectfully,  
Sigrun Freeman

COVID-19 and its subsequent variants statistically have consistently shown minimal risk to children. Therefore, there is no rationale to support the mass immunization of children of an experimental drug therapy as a requirement for admission to a learning institute. Please do not support the passage of this proposed requirement.

Subject: Public Comment RE: Covid injections as part of the K-12 immunization requirement

External Email

To Whom It May Concern,

Please note that as a parent of two Washington Public School students I object to this proposal and encourage you to reject the covid-19 injection as part of the WA K-12 public school immunization requirements.

Reason#1: this injection while touted as a vaccination doesn't meet the traditional definition of a vaccination nor is it the same as the other vaccinations required. The various covid-19 injections available at this time are a gene therapy treatment. We do not know the consequences of manipulating the genes of growing and maturing bodies and this could lead to bigger problems in the future. Also, this injection does not entirely prevent one from contracting or transmitting the virus.

Reason #2: The CDC has just recently stated that this virus has become endemic and is here to stay. The historical vaccinations children received to attend public schools helped to end a pandemic! We are currently moving from pandemic status to endemic status and the requirement of this injection, if put into place, would set an unnerving, new precedent. This is considering that none of the other endemic virus we regularly encounter require any injections; Such viruses are Influenza A & B, RSV, adenovirus, various coronaviruses & rhinoviruses.

Reason #3: School aged children are among the least-likely population demographic to experience severe illness, hospitalization or death and yet the long term costs or benefits are still undetermined. When there is risk there should be choice because right now there is not enough tenured evidence to show what the cost - benefit ratio will really be.

For these reasons and many others; please reject this proposal!

Sincerely,  
Trisha Brash  
Washington Voter

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: The vaccine does not work, there are plenty of cases proving adverse reactions in all age groups, why would you want to do this to the children or anyone for that matter, my kids will be pulled from school if this happens, studies show vaccine or no vaccine this "flu" can still be transmitted. No long-term studies have been done to show any history or safety of what may come, children are at "extremely" Low risk, and the vaccine is for emergency use only and there is no emergency. And while we are at it let's get rid of the good for nothing masks.

state's List of required immunizations for school entry.

11.

Are you Pro or Con on the proposal?

2. Con

---

I am a fully vaccinated and boosted adult who continues to wear masks. My child attends public school and has all required immunizations. Despite fully supporting masking and encouraging people to get vaccinated, it is too early to creating a TAG to consider adding Covid19 to required immunizations for school entry, especially since it does not appear that the 9 criteria for reviewing antigens for inclusion 10 WAC246-105-030 have been met. Criteria II(5) is about significant mortality rates. According to the CDC ([https://data.cdc.gov/widgets/9bhg-hcku?mobile\\_redirect=true](https://data.cdc.gov/widgets/9bhg-hcku?mobile_redirect=true)) the mortality rates in children is extremely low and the age groups with much higher mortality rates who might be working in the schools are already required to be vaccinated per Washington state mandate. Criteria II(6) indicates the vaccine must reduce person-to-person transmission. The current COVID19 vaccines do not stop transmission. Masks and social distancing are still required for school and inside public buildings in Washington state regardless of vaccination status. Criteria III (7) While a large percentage of the medical community supports vaccinations, I have personally asked the advice of various medical physician assistants and family doctors and pediatricians (MultiCare, Providence and Private Practice) I have seen in the past 6 months about Covid19 vaccines and children and I have received differing opinions on whether it is necessary in a child without an underlying medical condition. And looking at WA DOH data, only 20% of children ages 5-11 have received both doses of the Covid19 vaccination, which doesn't indicate the public is confident in vaccinating school aged children (<https://www.doh.wa.gov/emergencies/covid19/datadashboard>) Criteria III (8) While I cannot speak to the burden on K12 school staff this would create, I did see how vaccine compliance at the higher education level overly taxed staff and meant postponing many job responsibilities while they addressed verifications and exemptions. Criteria III (9) the burden on caregivers to obtain the vaccine seems to depend on personal circumstances. While vaccines don't cost anything, I have a car and live in the second largest city in Washington which means I likely have easier access to vaccine appointments than more rural areas or areas without public transportation options or for caregivers that don't have flexible schedules due to work or other responsibilities. Also there is only one vaccine that currently has emergency authorization for use in children, so it is up to the caregiver to have access to that Pfizer vaccine. As you can see a number of the criteria haven't been met so it is premature to organize a TAG to consider requiring COVID19 vaccinations to enter school.

Requiring school aged children to have the covid-19 vaccine to attend school.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Kids that are under the age of 17 are at a far greater risk of a serious complication from getting the covid-19 vaccine than they are if they were to get the covid-19 virus naturally. Data up to December of 2021 from the CDC indicate that 655 kids under 17 have died from covid-19. The numbers for kids under 17 that have had the covid-19 vaccine are 30 deaths, 538 cases of myocarditis, 1,632 serious events, and 1,067 cases that required more than 48 hours in the hospital. The vaccine for this age group is not well tested, there is no long term study on side effects and it is causing a far greater risk to the kids than getting natural immunity. The seasonal flu poses a greater risk to kids than covid-19 does and historically our country has not done anything to protect kids from that. It's a persons right to choose what they put in their body to keep themselves health, not a group of ten individuals.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at Extremely low risk of covid.

The vaccine safe STILL only EUA.

There aren't any long term studies to document any history of safety

Studies are available that document that both vaccinated and unvaccinated both can get covid.

Thus the vaccines do not stop the spread of this disease.

With a 99.995% survival rate

amongst our children it is senseless to mandate that all children regardless of health concerns or none at all should be forced to get this questionable vaccine.

Signed

Teresa Sparks

Any rule of authority you may possess at this time should never go against our constitutional rights.

So forcing unwanted medical procedures on anyone is against our rights.

Forcing unnecessary medical procedures on children is abuse.

Tyranny means we the people are at risk from those that govern.

\* I'm totally against our government taking away our rights as citizens! I'm against forcing vaccinations on our children - some people have health concerns and they should not be forced to be vaccinated against their will.

\* Our government also should not be allowing law enforcement to force an emergency order when they can't keep up with the crime caused by not having enough police to police the problems and crimes we already have going on. Like mail theft, thefts in stores, in homes, so many crimes not being enforced because there's not enough police! Nobody should be forced to isolate in a quarantine facility! Who's going to pay for that, us taxpayers? Really? We are so taxed it's sad. So many people are leaving the state because of the ridiculous mandates! I hope you won't pass these ridiculous wacs!

\*

\* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

\* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The United States is special because we are guaranteed Rights that are allowed in few other countries around the world. The most precious of these Rights are the Right to choose what we put in our bodies, the Right to free speech, the Right to employment without discrimination, and the Right to disagree and question issues on every level.

The government has no business mandating any kind of vaccine or shots for adults or children and they are supposed to be protecting our Right to choose whether individuals take the vaccine for themselves or their children.

The COVID-19 shots have been proven to not have the benefits that they have proclaimed to have and it has been proven that there are severe and negative health risks for some adults and children to take the shot. Again, let individuals and parents make the choice on whether or not they take the COVID shot.

There should be no expectation that individuals are never again going to catch the flu, a cold or COVID. Let's end the fear and fraud pandemic now by respecting everyone's Right to choose what is best for themselves and their families!

Hands off my Rights!

To Whom It Concerns (WSBOH),

As a retired Special Education Teacher of 30 years, I know how important "in the classroom learning" is for student success.

The science is showing us that student risk is extremely low. Our teachers are fully vaccinated. Therefore, the science is telling us that their risk is quite low for symptoms that would require hospitalization if they were to contract the Covid Flu.

The current health science 2 years into the pandemic, is proving that Covid flu shots only help to prevent severe illness and hospitalizations requiring further life saving measures. Individuals with underlying health issues seem to be affected more adversely and probably need to be more aware of the health science information to make their own decisions about their individual health.

Students (children) are typically the least affected by the Covid flu.

Parents - not the government and or government agencies, should be making those decisions for their children based on available health science.

Therefore, I say "No" to passing any mandate requiring students in Washington State to be vaccinated with the Covid flu shot.

Subject: Opposition to Mandatory COVID-19 Vaccinations for Schools or Childcare

External Email

Please do not vote in favor of making COVID-19 vaccinations mandatory for schools and childcare for the following reasons:

First of all, children have a recover rate of about 99.995%. The vaccine is unnecessary for them.

The vaccine has proven ineffective at stopping the spread of the virus.

The vaccine does not stop children from contracting the virus.

The vaccines are only authorized for Emergency Use. There are not studies to show the long-term effect of these vaccines on our children. There is no legal ground to forcibly inject these experimental chemicals into anyone, let alone children.

The injection is demonstrably unsafe. There are no studies of the safety of this drug, long or short term. However, there are tens of thousands of adverse reactions and unexplained early injuries and deaths, in the VAERS database, due to heart and organ damage. When H1Ni vaccine had 59 adverse reaction, the vaccine was removed from the market. It is insane to push forward with this insistence by the current political administration on the Federal and State levels in light of the vast number of injuries and deaths proximate to the time of the injection. Many of the adverse reactions occur within the first two weeks. Therefore, the CDC 'arbitrarily' decided that any adverse reactions occurring within two weeks of injection are 'deemed' by them to be unrelated to the injection. Insurance companies are reporting a 40% increase in non-COVID related, premature deaths in 2021. This incredible increase can only be attributed to the millions of vaccines administered in 2021.

Finally, mandatory vaccinations are ILLEGAL according to international law and Nuremburg Code. If vaccines are mandated, there will be lawsuits filed by all who were forced to take and were damaged by the vaccine. The consequences could be catastrophic financially.

I am not an anti-vaxer or some extremist. I am rational and concerned citizen. Please do not put our children in harms way. Thank you for your consideration.

Sincerely,

Scott Berry

Dear Tracy,

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

I am writing to urge you to stand against mandating the covid-19 vaccine for children in any capacity, but specifically to attend school.

It is clear that there are still a lot of questions about the efficacy and safety of the covid-19 vaccine in general, and clearly in children.

We are seeing evidence that transmission even when fully vaccinated does not stop the transmission of covid-19, this was exemplified in the recent cruise ship outbreaks where passengers and crew were all vaccinated.

There are no covid-19 vaccines that have been fully FDA approved available in the United States.

There is clear data showing that the covid-19 vaccines can cause harm in children, the CDC website states:

What You Need to Know

\* Cases of myocarditis reported to the Vaccine Adverse Event Reporting System (VAERS)   
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Findex.html&data=04&from=mailto%3Atracy.schreiber@sboh.wa.gov&to=mailto%3Ahandsakerhome@gmail.com>>  
have occurred:

\* After mRNA COVID-19 vaccination (Pfizer-BioNTech or Moderna), especially in male adolescents and young adults

\* More often after the second dose

\* Usually within a week of vaccination

\* Most patients with myocarditis or pericarditis who received care responded well to medicine and rest and felt better quickly.

\* Patients can usually return to their normal daily activities after their symptoms improve. Those who have been diagnosed with myocarditis should consult with their cardiologist (heart doctor) about return to exercise or sports. More information will be shared as it becomes available.

Both myocarditis and pericarditis have the following symptoms:

- \* Chest pain
- \* Shortness of breath
- \* Feelings of having a fast-beating, fluttering, or pounding heart

Seek medical care if you or your child have any of the specific or general symptoms of myocarditis or pericarditis especially if it's within a week after COVID-19 vaccination.

Please do not mandate these vaccines for children, let the decision be left up to families to do as they see fit for their child.

Thank you,

Alison Handsaker

Subject: Covid Student Vaccination Mandate & Quarantine Camp Comments

External Email

To Whom it May Concern, January 6, 2022

I am a teacher, a lifelong citizen of Washington State, and a person deeply concerned with human rights and bodily sovereignty, and I am writing to share my profound opposition to the proposed Covid Student Vaccination Mandate for Washington State schools and Quarantine Sites.

The facts are becoming more and more clear, and even the official organizations have admitted that the Covid vaccines are not a neutralizing vaccination. They do not stop people from getting Covid, nor do they stop people from spreading it.

While the following are anecdotal, they serve to make a point that the vaccinations are not the answer to the problem, and therefore, forcing anyone, especially children, to get them is morally wrong and violates freedom.

1. The National Hockey League was at an almost 100% player vaccination status. For weeks now, they have had to postpone games due to a massive number of players who have tested positive for this virus. Not only is this vaccination not preventing the spread (one merely needs to compare the cases all over the world, despite mass vaccination...looking at the cases when there wasn't a vaccine, vs. when majorities have been vaccinated), but they are also not proven to be safe long term, and if you take the time to look into it, for many, especially young men, they are not safe short term.

2. When the vaccines first came out, Joe Biden, the CDC representative, and many other officials and doctors claimed that those injected would not be infected. They may deny that now, but if you take the time to search, you can find an abundance of clips where they speak just that. In less than a year, they have been proven blatantly wrong. This further supports the point that these shots are experimental, it is unknown what the long-term effects are, just look at how they did not know the short term effectiveness.

If I had more time, I would fill my letter to you with statistics to support my points, but I do not have more time to get my comments to you.

To mandate that children have an experimental substance injected into their body, especially not knowing the long term effects, is morally wrong. I am sure that you all feel the weight of what our world has experienced over the last years. And you are all in a position that holds some authority and power. So I humbly ask you to take to heart what it would mean, if a year or so down the road, you realized that the long term effects on children were devastating. Could you carry that weight in your hearts? Can you take that chance? Would you enroll your own children in experimental studies on their body? Other mandated vaccinations have not been imposed until there was long term data and

research. This one is not the same.

Have you payed attention to what happened in some cases in California where they tried to mandate the vaccination on children?

We are the taxpayers of this state. I am not willing to take part in my money going towards requiring our state's children to become guinea pigs.

When one knows history, not just the facts, but the causes and consequences, you do not find one time where those on the side of good forced others to inject themselves with an experimental drug.

In addition, it was not long ago that I dismissed talk of there being sites set up by the state, thinking how this is America. We don't have camps. Again, I would ask you to think about which side of history you are going to choose to be on? When in history have sites/camps been looked back at as something to be proud of?

Thank you for taking the time to read this short piece of what is in my heart.

Trisha Provinsal

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children have a very low risk of hospitalization or death from Covid. This vaccine was approved for emergency use only....we do not know the potential risks that children can face from the vaccine itself !

We now know that this is NOT a pandemic of the unvaccinated....both vaccinated and unvaccinated can catch as well as transmit the Omicron variant.

If politicians could be held personally liable for problems that children develop from the vaccine itself, they wouldn't be doing this !

I am not an "anti-vaxxer"....I'm 66 years old and I've been vaccinated. In addition, I'm not a ill-educated person...I graduated from Stanford and I can think for myself.

Regards,

Stan Burwell

Subject: STRONGLY OPPOSED TO WAC-246-100

External Email

In light of the overwhelming evidence that these covid vaccines are harming and causing death according to the latest Vaccine Adverse Event Report, it is inconceivable that the Washington State Board of Health would even consider WAC 246-100. Existing laws would be broken as well as well as the violation of the Nurenberg code. Members of this board will be liable for the harm done to the children and adults of Washington.  
Sincerely, Kathy Amidon

I am opposed to any change in requirements for school attendance which would require experimental COVID-19 vaccines to be required for school attendance in the State of Washington.

In addition, I oppose any use rule or regulation to unconstitutionally use police or national guard personnel to compel any health requirement or medical procedure including vaccine on any person. I also oppose the unconstitutional idea of forced quarantines of people on any medical or health grounds.

Washington State Health Board,

As an educator and parent of 3 school aged children, I urge you to consider the ramifications of your possible decisions in the next several days. Forcing to require a Covid vaccine for all school aged children will cause hundreds if not thousands of parents to pull their children out of public schools in Washington State. Yes, children are getting sick and catching colds just like they do every single year. But hospitalizations of school aged children are very low. Nothing we are seeing is out of the ordinary for any other typical school year. Students catch a cold, they stay home for a few days if needed, and then they are back. Our students are in school and are thriving!

I urge you to leave child vaccination as an OPTION for parents and NOT a requirement. Please do not force parents to make tough decisions for the well being of their children. Trust them to do what is best for their child and others by staying home when sick. A child vaccine requirement would cause myself and thousands of other parents to pull their children from public education, which will be traumatic for the public school systems across our state. Let parents make their own decisions for their children.

Thank you!

Good morning Washington State Board of Health,

I am writing to express concern that a decision is going to be made that will affect children's health. It is understandable that we would want children to be healthy and strong, but this is not the way to go about it. Evidence has shown that children are at an extremely low risk for COVID. There is no verifiable proof that this vaccine doesn't have a long term effect on adults so why would should we put it in our children? It is our responsibility to ensure they have every chance at a long, healthy life. . So why vaccinate them with and experiment? This vaccine is still EUA. Please don't allow the bait an switch of saying the vaccine is approved fool you. And, it has already been proven the vaccine does not prevent the spread of COVID nor does it stop a person from getting COID. I pray that you please make the wise decision and forego mandating children be vaccinated for childcare and school entry.

Sincerely,  
Stevin Johnson

Hello Tracy,

I am a lifelong resident of Washington state.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Lynette McLaughlin

Subject: Student Covid Vaccinations

External Email

Madams and Sirs,

I am writing as a concerned parent about the vaccination mandate for students that is on your agenda soon. I strongly feel this should NOT be required for enrolment.

1. There is so little long term data for this type of vaccine, esp its reproductive effects on children.

2.

Its their body not the governments to handle

3.

Parents have ultimate say in what they feel is right for a child and courts have upheld that.

4.

The current levels of people testing positive for CV19 after vaccination is clearly showing the vaccines are not protecting as we hoped.

5.

Soon a modified killed vaccine will be available to teh market. A tried and test type of system with proven sucess fighting various other diseases.

Please leave this decision private like any other medical issue.

Regards;

1.

Dear WSBOH,

Hello, I do not approve of the mandatory Covid Vaccinations for childcare and school admission.

Hoping you will refuse this type of action for the following reasons:

Covid vaccination is still under emergency use authorization, children under the age of 18 have a 99.995% of survival rate, and they have a higher chance of death or adverse reaction to covid vaccine than covid-19 itself.

Thank you for your time and consideration, it's VERY appreciated! We CAN make the right decisions☐

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The proposal to mandate Covid 19 vaccinations for all WA residents as well as the addition of the Covid19 vaccination to be required for all children to attend school, public or private, and preschool/daycare facilities.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

The mandate violates a parent's right to informed consent: Vaccines are chemically synthesized biopharmaceuticals with known and documented side effects that include permanent injury and death. Forcing a medical procedure on a non-consenting individual that carries the risk of injury or death, no matter how small that chance may be, is medically unethical according to the American Medical Association's code of ethics, is inhumane and is a violation of our basic human right to possess autonomy over one's own body.

Subject: Oppose the Proposed Policies

External Email

Regarding the proposed policies for the upcoming meeting, I STRONGLY oppose them. To involuntarily detain people over something that has a 99% survival rate is unconstitutional and just not something that should even be considered, purr act of evil.... to mandate kids receive a vaccine that has high risks of myocarditis and teachers having to be taught signs of symptoms of cardiac arrest and yet actual Covid has less effects on them, is not right... it should be parent choice what happens to their children, they are the ones to birth them, raise them, feed them, etc.. they should be the ones to decide on vaccines...NOT THE GOVERNMENT!

NONE OF THIS IS OKAY. STOP THIS INSANITY NOW!

AGAINST THE PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I oppose adding COVID-19 vaccinations to the list of required immunizations for children to attend school. This is a gross overreach and our children should not ever be required to sacrifice their health for the elderly. Ever. Children are also not at high risk for dying from Covid. I also wonder if people are pushing the shots to be put on the schedule so the makers can then be liability free while maximizing profit? Do the right thing. It's never to late. I also oppose any sort of government overreach such as using law enforcement to detain, in any fashion, those refusing medical examination, testing, treatment, counseling, or vaccination.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

---

The Covid-19 clearly no longer demonstrates protection against the most recent variants. It does not seem reasonable to mandate a vaccination for children that doesn't protect the individual from contracting and spreading the virus when the risks of vaccination (myocarditis, immune mediated disease, thromboembolic events) vastly outweigh any pros - which cannot be accurately measured because children have almost no risk of serious adverse events to (especially) the newest variants.

There is substantial and growing body of knowledge demonstrating the lack of necessity of universal vaccination for Covid 19 (these vaccines are leaky and do not prevent spread). and serious health risks happening with the experimental vaccines (especially children)

I am absolutely against this proposal. Firstly, the vaccine available is still only an EAU product so it is illegal to mandate it. Secondly, children are at a basically zero risk of severe disease and death from covid, so the benefits of the vaccine do not outweigh the harms in young people (especially when you have risks such as myocarditis and death from the vaccine). Even in Pfizer's own trials, the vaccine group had a higher rate of adverse effects than the control group.

Leave our children alone! Our children are not dying from Covid, therefore they do not need the Vaccine!

The vaccine has proven to do more harm than good for children! Heart conditions, blood clots & death!

Any vaccine that has not gone thru the proper amount of testing time should never be given, period. Let alone be used on our children as guinea pigs.

We as parents do not coparent with the government. You do not have authority over what goes into our children's bodies.

If you go ahead with this, I can promise you will see a mass exodus from the public schools.

Don't do this.

Covid 19 vaccines should not be mandated for children. They are at a very low risk of hospitalization and issues/death related to Covid 19. The vaccine is still under EUA and should not be required for any individual, but especially minors.

To whom it may concern:

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I OPPOSE any and all moves to mandate these shots for kids in the public school. There are no long term studies or gold standard tested shots for covid. Children are not at high risk and producers have Yet to Prove safety or efficacy other than lowest level of test. It is dangerous to force this when there are so many unknowns with it. I SUPPORT Item #11 as a Petition for Rulemaking.

Thank you for your time. Please protect children, not endanger.

Sincerely,

Susan

1. Yes

---

Mandating COVID vaccinations for public school children; revising WAC 246-100-070 to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for vaccination (WAC 246-100-040)

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I am completely opposed to the mandating of COVID-19 vaccinations for our school children for the following reasons: 1. The vaccines are unnecessary due to the very low mortality rates in this age group. 2. The vaccines are unnecessary because there are effective and safe alternative treatments and preventative treatments such as ivermectin, HCQ, zinc + vitamin D and vitamin C, and others. 3. The vaccines are ineffective as demonstrated by the Israel study and other studies that show that even with multiple boosters, patients can still be infected and spread the virus. 4. The vaccines have not been approved for general use and are still only for emergency use. 5. The vaccines are not effective as evidenced by the requirements for multiple boosters. 6. The vaccines are not safe as evidenced by the VEARS database results of many deaths, injuries, and other negative side effects of the vaccines. 7. The vaccines are not safe as evidenced by the many athletes and even children dying on the field after receiving the vaccine or boosters. These deaths are almost all cardiac in nature and it is now widely known that myocarditis is a side effect of the vaccines. Although I agree that individuals or groups who are known to be infected with dangerous (lethal or high severe symptomology) that could potentially infect others should self-quarantine and seek proper medical treatment for their own safety and the safety of others, I completely disagree with equating "unvaccinated" with "contagious" or "dangerous" and therefore totally oppose using force of law to force anyone to be vaccinated or the forceful involuntary detention of anyone only because they are unvaccinated. Equating "unvaccinated" with "contagious", "infected", or "dangerous" is a complete violation of known science. I also strongly oppose requiring vaccination if more effective and safer treatments and preventatives are readily available. I will be attending not only the January 12, 2022, meeting but all following meetings. I will be taking thorough notes and sharing these notes with a large distribution list of WA residents and voters. These are important issues, and we thank you for taking our comments on them.

Subject: Strongly opposed to proposed policies

External Email

Hello,

I have recently become aware of some proposed policies that will be voted on next week to which I am strongly opposed.

- \* I oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will.
- \* I also oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school.
- \* I am confident there are additional proposals aimed at limiting the people's freedom and taking away their right to choose. I strongly oppose any such policy!

I would hope that many on the board agree with opposing these types of policies, but someone is pushing these things forward. Please stand up to these 100% politically motivated policy changes, they are insanely dangerous. I encourage you to look into times and places throughout history where policies like these have been put in place... they are always disastrous and damaging, and will be again. Those in favor will find themselves on the wrong side of history in hindsight.

Thank you for your time,  
Wade

Washington State Board of Health,

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Lance M.

Subject: Public Comments Regarding Mandatory Child Vaccination and Vaccine Passports

External Email

Hello:

I am writing to you for some public comments for the mandatory vaccination of children and vaccine passports in Washington State and Kitsap County. I served for more than 20 years as an intelligence officer and graduate of both the Naval Postgraduate School, Expeditionary Warfare School, and the Naval War College Phase I. I am also a data scientist and software engineer and own a company in the Medical AI space. I am hoping my experience can illuminate some of the challenging policy decisions facing our community. Here is some very important data that I hope you will take into consideration during the decisions. I will happily work with the state or county for FREE to look at data and meet with officials so that critical data is incorporated into decisions.

The first thing that needs to be discussed is what's in the data. The data basically shows that not everyone is affected the same way, with children far less susceptible to covid than elderly adults. 90 percent of the fatalities and serious covid injuries are in the 65+ demographic. The data also shows that having a comorbidity greatly increases the risk of injury by Covid. If not everyone is affected the same way by Covid, then it makes very little sense to expect that a single solution can be used to solve the Covid issue. In fact, improved overall health is a key indicator of improved response to Covid which means better diet, more exercise, and less stress would likely have increased positive outcomes. There are also some very troubling indications of problems in the unfolding medical experiment with more vaccine injuries reported than all 30 years combined on the Covid vaccines and a complete lack of long term data. There is also a lack of transparency on the part of the FDA with the FDA requesting non release of data until 2096, or more than 75 years currently. This is a serious issue for determining proper courses of action based on data if it's not being released and this is considered a very large breach of experiment protocol.

This video is highly encouraged to watch, as European scientists are actively investigating companies for a Nuremberg 2.0 war crimes trial.

The next aspect to discuss is the legality and how federal code encapsulates the Nuremberg Code, which is an important legal framework surrounding medical experiments. Military officers receive substantial training in war crimes in order to drive ethical decision making. The Emergency Use Authorization for the vaccines means this is a medical experiment in progress and it's very evident that the companies are conducting experimentation on production lots to determine what is a lethal dose. Not everyone is getting the same dose or formula. There is an issue with the conduct of this experiment, in that the Nuremberg Code REQUIRES informed consent and violations of the Nuremberg Code are grounds for charges of war crimes. Clear violations of these codes appear to be happening. Under 21 code of Federal Regulations Section 50.23 and 50.24, it is absolutely illegal to make anyone participate in an experimental program using coercion. This is how we have embraced the Nuremberg Code in US law. Under 18 US Code Section 2331 subsection 802, inside of the definition of domestic terrorism, anytime a citizen or government agency is forced to do something against their will with coercion, this is domestic terrorism. Indictments for domestic terrorism have been filed in all 50 states against individuals and organizations at the federal level attempting to mandate illegal experiments against the Nuremberg Code.

I am an expert in counterterrorism, having commanded multiple organizations defending against war actions from our nation's enemies. Globalist organizations have overtly stated the intent to use the pandemic to drive a socialist agenda and to cause indiscriminate harm to civilians in order to make the nation susceptible to a social agenda. This is a well known war plan called the Cloward Piven plan and has been studied by military officers for decades. The major objective of the Cloward Piven plan is to drive overwhelming demand on national infrastructure and welfare in order to collapse the system through bankruptcy. A quick glance at M1 money supply shows the US is on an unsustainable banking path. Even worse, indiscriminate harm to civilians (economic, psychological, physical) is a war crime. Importantly, aiding a war crime is also a war crime. Media orgs and government officials that aid war crimes in progress may be responsible for committing war crimes. Some elements of the government apparatus appear to have been co-opted by globalist orgs with the intent to cause instability in the United States. This means that the Covid situation, which is serious, is being exploited for an other than health objective, and the organizations are stating this objective in the open. The World Economic Forum is a primary nexus of both political organizations and corporations and the Executive Chairman has made overt statements indicating the desire to exploit the pandemic for social objectives. He has even written a book (The Great Reset), which I highly recommend for reading, since it specifies in great detail the rise of technocracy and social agendas surrounding the pandemic. This social impact economy appears to encompass a social credit score which has been pioneered in China,

and even the prototype system has had significant abuses. The county and state are encouraged to distance themselves from this agenda as lawsuits and criminal investigations are actively underway.

"The pandemic represents a rare but narrow window of opportunity to reflect, reimagine, and reset our world" - Professor Klaus Schwab, Founder and Executive Chairman, World Economic Forum

I am happy to work with the state or county on research if there is any ambiguity on the above legality and data in particular. The unification of personal data and overt attempts to force participation in medical experiments is highly illegal and the county and state are encouraged to avoid participation in order to avoid being involved in possible criminal proceedings. Feel free to reach out to me at your convenience.

Justin Jones

Requiring COVID vaccines for school children

11.

Are you Pro or Con on the proposal?

2.           Con

---

Children are at low risk for complications from COVID-19 infection. Also, the vaccines are still only licensed for emergency use, and therefore should not be mandated for children.

Subject: strongly oppose forced vaccination for school age children

External Email

Hello Samantha,

I am a lifelong resident of Washington state.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than

2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,

Lynette McLaughlin

To: DOH WSBOH  
Cc:  
Subject: No to Mandatory COVID Shots for Children

External Email

Good morning,

I am writing about the meeting you are having on January 12th regarding mandatory COVID vaccination for children. I would like to begin by saying I am not an anti-vaxer or anti COVID vaccine. I believe the decision to take any vaccine should be the decision of the individual based upon their own needs, lifestyle and risk factors.

I understand there are vaccines that are required for children to attend school in the State of Washington. There are opportunities for exemptions for these vaccines that allow children to attend school without vaccines. I do not disagree with this. The vaccines that are required for children to attend school have been administered for years, and took over years to develop and decades after the first introduction of the illness. Plus there are tests and trials that have been utilized for years to test their safety and effectiveness.

The COVID vaccines took less than a year to develop. The Pfizer vaccine data was going to take over 50 years for all the data to be released. That has been changed from 500 pages to 55,000 pages. There is a serious question to the effectiveness of the vaccines. Someone who has been vaccinated and boosted can still catch and spread the illness. I understand the vaccines help with the severity of the illness, but shouldn't that be an individual decision?

We live in a state and country that was founded upon freedom and individual rights. We are supposed to have a limited government. The government is supposed to respond to the will and desires of the governed. We have moved beyond this to mandates that reflect totalitarianism rather than a democratic republic. This is not what our country was founded on.

From the beginning of the pandemic, our Governor has stated that he is making decisions based upon science, and science will dictate his decisions. I believe that following science and making decisions based upon science is an acceptable means of decision making. What is frustrating is the Governor has not given the people, his boss, a clear path to ending the restrictions and mandates in place to battle this pandemic. There is no clear end in sight. We all went home for 15 days to flatten the curve. The curve was flattened, yet the Governor still maintained his emergency powers. More restrictions are being added without just cause or remedy to relax or eliminate them. Keep in mind, there are many states in the union that do not have these restrictions and have lower per capita COVID rates than our state. The measures our Governor have in place have not had the desired effect.

I urge to use common sense and rule of law in your decision making powers. You are making a decision that will affect millions of children, not only this year, but for years to come. This vaccine could be a mandatory vaccine for children to enter schools. If this is

the action you would like to take, I urge to push back and set up benchmarks and timeframes for the effectiveness and safety of this vaccine to be vetted in the court of science, public opinion COVID and rule of law. Thank you.

Sincerely,

Todd Cunningham

Subject: Please OPPOSE involuntary isolation/quarantine in parts of WAC 246.100 and COVID mandates for children in K-12 schools

External Email

Hello,

As a concerned citizen of WA state, I respectfully write to ask that you OPPOSE these two items below. Can you please site in the constitution where these items are even allowed? You are employees of the people of this state and not the other way around.

- 1) any involuntary isolation/quarantine of people as described in parts of WAC 246.100 AND
- 2) any mandate on COVID shots for children as a requirement to attend K-12 public schools.

I want to see a time for public comment on these topics as well.

Thank you in advance.

Rachel Alleman

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The vaccines are experimental and do not stop the spread of Covid-19. Children do not get severely sick. Natural immunity from catching Covid 19 and re covering should be as good as a vaccine but it's not even considered. One size does definitely NOT fit all in this situation and this takes away my right to decide with my pediatrician what is better for MY child.

Thank you for taking the time to read my concerns,

Shanon Glasgow
