What does this mean in the real world? In the USA, there are approximately 4,000,000 children in each age year for adolescents. Thus, there are 16,000,000 children in the 12–15 age band. A serious adverse event, including death, that occurred at a 1/800 rate would not be detectable with high confidence in a sample of 1005 people. Thus, the results of the trials for 1005 children would allow for 20,000 children to suffer a non-trial-detected serious adverse event, including death, when extrapolated to potential inoculation of all children in the 12–15 age group! Given that the risk of contracting COVID-19 with serious outcomes is negligible in this population, ***proceeding with mass inoculation of children 12–15 years old based on the trials that were conducted cannot be justified on any cost-benefit ratio findings.***

Also, the evaluation of efficacy in children aged 6 months to 11 years has recently begun and continues [24]. Pfizer began enrolling children under 12 to evaluate the COVID-19 mRNA inoculant. Also, Comirnaty will be evaluated in a new clinical trial for children aged 6 months to 11 years. In the first phase, the study will enroll 144 people and will identify the required dose for 3 age groups (6 months - 2 years, 2–5 years and 5–11 years). After a 6-month follow-up period, the parents/guardians of children in the placebo group will have the option of allowing their children to receive the inoculation. The results are expected in the second half of 2021.

Moderna also began a study to evaluate the mRNA inoculation in children aged 6 months to 12 years. Both companies have already started testing vaccines in 14-year-olds. In the US, children make up 23 % of the population [113].

Data on the risks and benefits of possible inoculation in children and adolescents are currently insufficient and no recommendation can be made. Specifically, mass child inoculations cannot be recommended until the benefits and minimal projected risks have been demonstrated in a sufficiently large trial to provide confidence that mass inoculation will have an acceptable level of adverse effects relative to the demonstrated benefits. On the other hand, children often experience COVID-19 asymptotically, and the SARS-CoV-2 infection progresses harmlessly. Currently, in the context of limited inoculation capacities, there is no indication of urgent inoculation of children. In the context of declining incidences of SARS-CoV-2 infections and demonstrated low serious adverse effects from COVID-19 infections for children and adolescents, the issue of inoculating children and adolescents is no longer paramount. Authorized forums must calculate what prevails for children and adolescents: the benefits or risks.

#### A2-c Clinical Trial Issues for Other Categories

Although people with severe comorbidities such as obesity or oncological conditions were not initially included in the clinical trials that led to obtaining EUA, they were included in subsequent studies, some even ongoing. In their case, it seems that the efficacy was lower compared to the results obtained initially with healthy adults.

The interim analysis of data from a prospective observational study indicates the need to prioritize cancer patients for timely (respectively 21-day) booster administration in the case of administration against COVID-19 with Comirnaty. According to the study, the effectiveness of a single dose of Comirnaty among cancer patients is low, but the immunogenicity of patients with solid cancers increased at 2 weeks after receiving the second dose of inoculant 21 days after the first dose. Because the study was conducted in the UK, participants inoculated before December 29, 2020 received two doses of Comirnaty 21 days apart, and those who started the regimen after this date were scheduled to receive a second dose of Comirnaty 12 weeks apart. first administration. Thus, the study continues to collect data from participants receiving Comirnaty 12 weeks after the first dose.

Approximately 21 days after a single dose of Comirnaty, the proportion of study participants who tested positive for anti-S IgG antibodies was [114]:

- 94 % among healthy participants;
- 38 % among patients with solid cancers;
- 18 % among patients with hematological cancers.

Among participants who received the 21-day booster and for whom biological samples were available two weeks after the second dose, the following proportions of confirmation as seropositive for anti-S IgG antibodies were reported [114].

- 100 % of healthy participants, compared to 86 % of the same group of participants who did not receive the second dose;
- 95 % of patients with solid cancers, compared with 30 % of the same group of participants who did not receive the second dose;
- 60 % of patients with hematological cancers, compared with 11 % of the same group of participants who did not receive the second dose.

Two other studies suggest low immunogenicity in the context of Comirnaty administration in patients with hematological cancers. In one study, patients with chronic lymphocytic leukemia (CLL) had significantly reduced immune response rates to COVID-19 inoculation compared to healthy participants of the same age. Considerable variations in post-administration immune response have been reported among patients with CLL depending on their stage of treatment

The effectiveness of Comirnaty administration was also evaluated in elderly patients with multiple myeloma [115]. 21 days after administration of the first dose of Comirnaty inoculation (before receiving the second dose), 20.5 % of patients with multiple myeloma compared to 32.5 % of control participants had neutralizing antibodies against SARS-CoV-2. One possible explanation could be that the therapy negatively affects the production of antibodies. However, the administration of the second dose is important for the development of the immune response in these patients [115].

Preliminary data from the v-safe surveillance system, the v-safe pregnancy registry and the Vaccine Adverse Event Reporting System (VAERS) do not indicate obvious safety signals regarding pregnancy or the associated neonatal implications with mRNA injections against COVID-19 *in the third trimester of pregnancy* [3]. The study included 35,691 pregnant women [116]. Compared to non-pregnant women, pregnant women reported more frequent pain at the injection site as an adverse event associated with mRNA COVID-19 vaccination, and headache, myalgia, chills, and fever were reported less frequently. In the context where initial clinical trials of messenger RNA-based inoculants have not evaluated the efficacy and safety of innovative technology among pregnant women, these preliminary data *from the third trimester only* help to inform both pregnant women and health professionals in making the inoculation decision. However, continuous monitoring through large-scale longitudinal studies remains necessary to investigate the effects associated with maternal anti-COVID-19 inoculation on mothers, pregnancies, the neonatal period and childhood.

On the other hand, the inoculation landscape has become even more complex due to new circulating viral variants. Authorities recommend genomic surveillance and adaptation in order to be effective against new variants (different from the initial strain that was detected at the end of 2019). The efficacy data of Comirnaty against circulating viral variants are highlighted in a very recent study in Israel which showed that the protection offered by the Pfizer inoculant against variant B.1.351 (first identified in South Africa) is lower [112].

The results have not yet been submitted to the expertise of specialists. The study compared nearly 400 adults who were diagnosed with COVID-19 at least 14 days after receiving one or two doses of the inoculant to the same number of uninoculated people. It was found that B.1.351 represents approximately 1 % of the COVID-19 cases studied. But among patients who received two doses of inoculant, the prevalence rate of the variant was eight times higher than in those not inoculated - 5.4 % compared to 0.7 %. This suggests that Comirnaty is less effective against variant B.1.351, compared to the original variant and variant B.1.1.7. The limitation of the study comes from the small number of adult people studied, but it is an alarm signal for a closer study of these cases. In addition, it seems that at present, the prevalence of this variant is low. On the other hand, in early April, Pfizer announced that according to the results of the Phase III study in the adult population, Comirnaty also demonstrated 100 % efficacy in the prevention of Covid-19 disease caused by SARS-CoV-2 variant B.1.351 (9 cases of Covid-19 were recorded, all in the placebo group, and after sequencing it was found that 6 had been determined by B.1.351) [117].

## Appendix C

### MID- AND LONG-TERM ADVERSE EFFECTS FROM PRIOR VACCINES

A 2020 study emphasizing mid- and long-term adverse effects from prior vaccines [4] identified the following sixteen mid- and longer-term potential issues concerning vaccines. These include:

- 3.1. **Antibody-Dependent Enhancement** (where enhanced virus entry and replication in a number of cell types is enabled by antibodies);
    - 1a. Intrinsic Antibody-Dependent Enhancement (where non-neutralizing antibodies raised by natural infection with one virus may enhance infection with a different virus);
    - 1b. Immune Enhancement (enhancement of secondary infections via immune interactions);
    - 1c. Cross-Reactivity (an antibody raised against one specific antigen has a competing high affinity toward a different antigen.);
    - 1d. Cross-Infection Enhancement (infection enhancement of one virus by antibodies from another virus);
  - 3.2. **Vaccine-Associated Virus Interference** (where vaccinated individuals may be at increased risk for other respiratory viruses because they do not receive the non-specific immunity associated with natural infection);
  3. Vaccine-Associated Imprinting Reduction (where vaccinations could also reduce the benefits of ‘imprinting’, a protection conferred upon children who experienced infection at an early age)
  4. Non-Specific Vaccine Effects on Immune System (where previous infections can alter an individual’s susceptibility to unrelated diseases);
  5. Impact of Infection Route on Immune System (where immune protection can be influenced by the route of exposure/delivery);
  6. Impact of Combinations of Toxic Stimuli (where people are exposed over their lifetime to myriad toxic stimuli that may impact the influence of any vaccine);
  7. Antigenic Distance Hypothesis (negative interference from prior season’s influenza vaccine (v1) on the current season’s vaccine (v2) protection may occur when the antigenic distance is small between v1 and v2 ( $v1 \approx v2$ ) but large between v1 and the current epidemic (e) strain ( $v1 \neq e$ ).);
  8. Bystander Activation (activation of T cells specific for an antigen X during an immune response against antigen Y);
  9. Gut Microbiota (Impact of gut microbial composition on vaccine response);
  10. Homologous Challenge Infection Enhancement (the strain of challenge virus used in the testing assay is very closely related to the seed virus strain used to produce the vaccine that a subject received);
  11. Immune Evasion (evasion of host response to viral infection);
  12. Immune Interference (interference from circulating antibody to the vaccine virus);
  - 12a. Original Antigenic Sin (propensity of the body’s immune system to preferentially utilize immunological memory based on a previous infection when a second slightly different version of that foreign entity (e.g. a virus or bacterium) is encountered.);
  13. Prior Influenza Infection/Vaccination (effects of prior influenza infection/vaccination on severity of future disease symptoms);
  14. Timing between Viral Exposures (elapsed time between viral exposures);
  15. Vaccine-Associated Enhanced Respiratory Disease (where vaccination enhances respiratory disease); and
  16. Chronic Immune Activation (continuous innate immune responses).
- Most of these events are not predictable, and most, if not all, would be possible for the COVID-19 inoculant in the mid- and long-term for adults and children.

### 3.3. Mid- and Long-Term Serious Illnesses for Adults and Children from Past Vaccines

As stated in the aforementioned 2020 study on vaccine safety: “The biomedical literature is very sparse with studies on long-term vaccine effects, especially long-term adverse effects. Large numbers of people and long periods of time are required to identify such adverse events, and draw statistically-valid connections between vaccinations and disease. These efforts would be very resource-intensive, and there appears to be little motivation among the vaccine producers and regulators to make these resources available for such studies. Thus, the following examples reflect the extremely small tip of an extremely large iceberg of long-term adverse vaccine effects.” [4]

“The two main categories of diseases reported in the biomedical literature triggered by past vaccinations are “Autoimmune (e.g., Systemic Lupus Erythematosus, Psoriasis, Arthritis, Multiple Sclerosis, Hepatitis, Uveitis, Pseudolymphoma, Guillain-Barre Syndrome, Thrombocytopenic Purpura, etc.) and Neurological (e.g., Central Demyelinating Diseases, Developmental Disability, Febrile seizures, Narcolepsy, Encephalomyelitis, Autonomic Dysfunction, etc.). Others include Diabetes, Gastrointestinal, Joint-related, Necrobiotic Granuloma, Neutropenia, Pulmonary Fibrosis, etc.”

“Vaccinations may also contribute to the mosaic of autoimmunity [118]. Infrequently reported post-vaccination autoimmune diseases include systemic lupus erythematosus, rheumatoid arthritis, inflammatory myopathies, multiple sclerosis, Guillain-Barre syndrome, and vasculitis”.

“Studies have demonstrated a latency period of years between Hib vaccination and diabetes mellitus, and between HBV vaccination and demyelinating events [118] latency periods can range from days to years for postinfection and postvaccination autoimmunity”.

“Most of the extra cases of IDDM appeared in statistically significant clusters that occurred in periods starting approximately 38 months after

immunization and lasting approximately 6–8 months. Immunization with pediatric vaccines increased the risk of insulin diabetes in NOD mice. Exposure to HiB immunization is associated with an increased risk of IDDM.” [4]

Thus, even the sparse past vaccine studies that went beyond the short-term showed latency effects of serious diseases occurring **three years or more** post-vaccination.

## Appendix D

### COST-BENEFIT ANALYSIS OF COVID-19 INOCULATIONS

This appendix presents a non-traditional *best-case scenario* pseudo-cost-benefit analysis of the COVID-19 inoculations for the 65+ demographic in the USA. In this incarnation of a cost-benefit analysis, the costs are the number of deaths resulting from the inoculations, and the benefits are the lives saved by the inoculations. The time range used was from December 2019 to end-of-May 2021.

It is assumed, in this best-case scenario, that all the deaths truly attributable to COVID-19 only could have been eliminated by the inoculations given (about half the USA population has been inoculated at this time) [88,119]. It can be conceptualized as the vaccines having been available in Summer 2019, and subsequent administration having eliminated all the deaths experienced that were truly attributable to COVID-19. If the cost-benefit ratio is **poor** for this *best-case scenario*, it will be **very poor** for any real-world scenario [120].

We will use Figs. 1 and 2 as starting points to conduct a cost-benefit analysis of COVID-19 inoculations for the most vulnerable demographic, those 65+. We start with the official government numbers for COVID-19 and post-inoculation deaths, and modify them to arrive at actual deaths resulting from COVID-19 and the inoculations. We compare the two numbers (appropriately normalized) to ascertain costs vs benefits.

As Fig. 1 shows, there are three age bands that comprise the 65+ demographic. We weight the COVID-19 deaths per capita in each band by the band's population, and divide the sum of these three products by the total 65+ population to arrive at an average COVID-19 deaths per capita of 0.0087 for the total 65+ demographic.

Fig. 2 contains two normalizations. First, the deaths were normalized by total inoculations given, not by people inoculated or people who had completed the full series of inoculations. We will retain the normalization by total inoculations given, since it will provide the **most conservative results** (largest denominator) for estimation purposes. Second, the deaths were normalized/restricted to those occurring within seven days post-inoculation. This normalization was done to compare across age bands, where the inoculations started at very different points in time. For the present cost-benefit purpose, where we are concentrating on the 65+ band, we remove this latter normalization, and include all post-inoculation deaths. Removing this normalization increases deaths per inoculation by about 40 % to a value of 0.000032, and offers a more credible comparison to the numbers from Fig. 1.

Thus, based on the CDC's official numbers, there are an average COVID-19 deaths per capita of 0.0087 and an average deaths per inoculation of 0.000032 for the 65+ demographic. The chances of a person 65+ dying from an inoculation relative to their chances of dying from COVID-19 are approximately 0.0037, or about 1/270, based on these official CDC figures.

However, as we have shown previously, three corrections to these numbers are required to convert them to real-world effects. First, as the Harvard Pilgrim study has shown and as our results in Appendix 1 confirm, VAERS is underreporting actual deaths by about two orders of magnitude. Applying this correction alone to the above 1/270 ratio changes the risk benefit to about 1/3. Second, as the CDC has stated, approximately 94 % of the COVID-19 deaths could have been attributed to any of the comorbidities these patients had, and only 6% of the deaths could actually be attributed to COVID-19. As we pointed out, if pre-clinical comorbidities had been included, this number of 6% would probably be decreased further. For **conservative** purposes, we will remain with the 6%. Applying this correction to the 1/3 risk-benefit ratio changes it to 5/1! Third, as a comprehensive survey of false positives from RT-PCR tests concluded: “evidence from external quality assessments and real-world data indicate enough a high enough false positive rate to make positive results highly unreliable over a broad range of scenarios” [127]. Because of the myriad RT-PCR tests performed in the USA to screen for/diagnose COVID-19 using different values for Ct and different procedures, a specific number for false positives cannot be obtained at this point in time. Again, these false positives would reduce the 6% number, perhaps substantially. And again, for **conservative** purposes, we will remain with the 6% number.

Thus, our **extremely conservative** estimate for risk-benefit ratio is about 5/1. In plain English, people in the 65+ demographic are five times as likely to die from the inoculation as from COVID-19 under the most favorable assumptions! This demographic is the most vulnerable to adverse effects from COVID-19. As the age demographics go below about 35 years old, the chances of death from COVID-19 become very small, and when they go below 18, become negligible.

It should be remembered that the deaths from the inoculations shown in VAERS are short-term only (six months for those inoculated initially), and for children, extremely short-term (one month) [3]. Intermediate and long-term deaths remain to be identified, and are possible from ADE, auto-immune effects, further clotting and vascular diseases, etc., that take time to develop. Thus, the long-term cost-benefit ratio under the *best-case scenario* could well be on the order of 10/1, 20/1, or more for all the demographics, increasing with decreasing age, and an order-of-magnitude higher under real-world scenarios! In summary, the value of these COVID-19 inoculations is not obvious from a cost-benefit perspective for the most vulnerable age demographic, and is not obvious from any perspective for the least vulnerable age demographic.

## Appendix Da

### PROBLEMS WITH TEST CRITERIA FOR DETERMINING COVID-19

Consider the criteria for determining whether an RT-PCR test result is positive for SARS-CoV-2. The CDC instruction (until 1 May 2021) specifies running the RT-PCR tests for 45 amplification cycles. Then, to interpret the data: when all controls exhibit the expected performance, a specimen is considered positive for SARS-CoV-2 if all SARS-CoV-2 marker (N1, N2) cycle threshold growth curves cross the threshold line within 40.00 cycles (< 40.00 Ct). The RNase P may or may not be positive as described above, but the SARS-CoV-2 result is still valid ([103]a).

Many false positives are possible in the upper part of this cycle threshold range, especially in areas of low prevalence. In particular, virus culture has been found to be unfeasible in cases with a Ct value exceeding 33. A prospective cohort study involving the first 100 COVID-19 patients in Singapore also showed that attempts to culture the virus failed in all PCR-positive samples with a Ct value >30” [121]. During mass testing in Germany, it was found “that more than half of individuals with positive PCR test results are unlikely to have been infectious” [122]. Another study

found that tests with low specificity (deriving from use of many cycles) cannot provide strong evidence for the presence of an infection [123]. A systematic review of PCR testing concluded “Complete live viruses are necessary for transmission, not the fragments identified by PCR. Prospective routine testing of reference and culture specimens and their relationship to symptoms, signs and patient co-factors should be used to define the reliability of PCR for assessing infectious potential. Those with high cycle threshold are unlikely to have infectious potential.” [89].

As skeptics have argued, in the buildup of the pandemic, the rapid increase in numbers of COVID-19 cases was due in part to the high values of cycle threshold used in the tests. Unfortunately, the true numbers of false positives will probably be unobtainable if an audit were performed, since these values are not reported with the test results: all currently-available nucleic acid tests for SARS-CoV-2 are FDA-authorized as qualitative tests, and Ct values from qualitative tests should never be used to direct or inform patient management decisions. Therefore, it is not good for laboratories to include Ct values on patient reports [124].

After mass inoculations started, a large number of “breakthrough” cases emerged, and a total of 10,262 SARS-CoV-2 vaccine breakthrough infections had been reported from 46 U.S. states and territories as of April 30, 2021 [18]; the number of reported COVID-19 vaccine breakthrough cases is likely a substantial undercount of all SARS-CoV-2 infections among fully vaccinated persons. The national surveillance system relies on passive and voluntary reporting, and data might not be complete or representative. Many persons with vaccine breakthrough infections, especially those who are asymptomatic or who experience mild illness, might not seek testing [18].

This negative outcome of increased “breakthrough” cases motivated the CDC to change a number of reporting and test procedures and issue new regulations for identifying and investigating hospitalized or fatal vaccine breakthrough cases starting 1 May 2021, stating: “For cases with a known RT-PCR cycle threshold (Ct) value, submit only specimens with Ct value  $\leq 28$  to CDC for sequencing. (Sequencing is not feasible with higher Ct values.)”. Thus, the Ct values for sequencing were lowered from the high false positive range allowed during the pandemic buildup to a limit that would eliminate many of these false positives in the ‘breakthrough case’ identification phase [101].

Subject: Opposition to mandates

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

4. These mandates are in direct violation of our constitution. It also goes against the Nuremberg Code.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Takako Rodriguez

We have 3 grandchildren in Issaquah school district and want to voice our strong opposition to mandating covid vaccinations for children.

Most children do not contract the disease or have mild reactions. Adverse reactions can be severe or life threatening.  
VAERS reporting:

\* 22,782

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F19%26STATE%3DNOTFR%26WhichAge%3Drange%26LOWAGE%3D12%26HIGHAGE%3D18&data=04%7C>>  
total adverse events, including 1,400 rated as serious  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F19%26SERIOUS%3DON%26STATE%3DNOTFR%26WhichAge%3Drange%26LOWAGE%3D12%26HIGHAGE%3D18&data=04%7C>>  
and 29 reported deaths  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F19%26DIED%3DYes%26STATE%3DNOTFR%26WhichAge%3Drange%26LOWAGE%3D12%26HIGHAGE%3D18&data=04%7C>>  
. Two of the 29 deaths were suicides.

This could mean that anywhere from 7% to 55% of the teens injured by these shots today might not survive into their late 20s or early 30s. Some might not even make it into their early 20s! How is this possibly an acceptable tradeoff for a virus you have practically zero risk of dying from as a child or adolescent?

We will continue to oppose vaccinating children until all studies have been completed. Also a full approval from FDA not just emergency use authorization.

Sincerely  
Sheila James.

Subject: C19 on childhood schedule

External Email

Hello,  
I would like to voice my dissent for adding these new products to the childhood vaccine requirements for school.

Please consider the fact that pediatric COVID hospital admissions have been overcounted.

This was recently said by Anthony Fauci when he clarified that many children counted in those numbers were in fact not admitted for COVID. They weren't hospitalized for COVID-19. They just happened to test positive after admission for something else.

Please also consider that many children will be pulled from school. And many other children's parents will want to, but not feel like they have the option, because they need free childcare.

School should not be requiring this new type of injection, for children.

There are many studies about treatment options at [c19early.com](http://c19early.com)  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fc19early.com%2F&data=04%7C01>>  
.

There are scores of treatment options.

Covid19 never had to get this bad. People without treatment died unnecessarily. And people who were only treated with critical care hospital measures once they were very sick, also died unnecessarily.

Early treatment could have prevented most of this whole past 2 years.

Especially when we're talking about for children, this vaccine is not the savior it's being held up to be.

If you're considering it for preventing community spread to older school staff, please do not approve it.

Children should not be at the front lines, taking the risk of this new product, for our sake.

Thank you  
Stephanie Kosonen

---

As a mother, a teacher and a contributing member of society, I am alarmed and dismayed at the discussion of the Covid -19 vaccine to be included in Chapter 246-105 WAC. First, forcing parents and families to make a healthcare choice that they are not comfortable with is a significant and unnecessary overreach by the state government. Including a shot so very new to approval in the 5 – 11-year-old age range, as a requirement to attend school is irresponsible and shortsighted. Especially given that data shows the very population being forced to take the shot is so insignificantly affected by the virus. Second, Washington is a very diverse state. As you know, the issues that public schools face are different in each region and it has been more evident than ever in the case of the Covid-19 pandemic. The state mandates and regulations have already caused a significant burden on school staff, administrators, and Board of Directors. These unmet burdens have led to a lack of trust. Our goal is to educate students in an environment where they feel safe and welcome. I am confident that the inclusion of the Covid-19 shot as a required shot would elevate the animosity and distrust to unforeseen levels. Third, the purpose of public education is to provide individuals with an opportunity to grow, develop and achieve their potential so they may become active, self-sustaining members of society capable of critically thinking. We lose sight of our purpose when we create yet another barrier for parents to enroll their students. We already struggle why add this burden to all? It is no secret that Washington public schools have already lost over 55,000 students this academic year. How can we justify this new barrier when we know it is extremely politically charged and that it provides minimal medical protection for this sub-set of the population? For these reasons and for the basic fact that this rushed, top-down approach from the state government is not appropriate in public education - I strongly implore this board to not include the Covid19 shot in Chapter 246-105 WAC. Kind Regards, Brandy Sears 907-378-7255

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- children are at extremely low risk for Covid
- the vaccine is still in EUA and has no long term studies
- the vaccine does not stop the spread of Covid as we can see with the latest variant

Thanks,

Stephen Horan

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid.

The vaccines are still only EUA (emergency use authorized)

There are no long-term studies to document any history of safety

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease

Given that children are at a nearly non-existent risk (99.9+% survival) it is LITERAL INSANITY and INTENTIONAL EVIL to suggest enforcing a trial vaccine on them that has KNOWN SIDE EFFECTS that are FAR WORSE to their short-term and very likely their long-term health in order for them to be treated fairly and receive the same education opportunities that are offered to our society as a TAX-PAYER FUNDED PUBLIC SERVICE. The vaccines do not even protect against the virus or against spreading it. Natural immunity has already proven far more robust against the virus, and very likely MANY children already have natural immunity because so many when they have Covid are asymptomatic anyway. Kids share germs and colds, that is part of being a HEALTHY kid and building their immune system. Do NOT mutilate their health and hinder their freedoms. You should be there to uplift, protect and teach preservation of their God-given freedoms. The government does not get to decide what they WANT the people to do. The government is ELECTED to REPRESENT what the people want the government to do, at least in the America we should be living in. Thank you for your time.

Children are in the low risk category for Covid and the vaccine has not been out long enough to truly give all of the long term risks and possible side effects. I do not want my children used as test subjects for this vaccine. It has already shown that in adolescent boys, there is a potential for heart related issues.

1. Yes

---

## Mandates for children

11.

Are you Pro or Con on the proposal?

2.                      Con

---

The risk benefit analysis on a covid mandate for children is strongly weighted towards more risk than benefit to developing children, given the extremely short time it has been studied. There should not be a blanket mandate in what is a large scale human trial, particularly for children who have and need a robust immune system.

---

The Covid shot is not a vaccine. It does not stop infection or transmission. Children are at almost zero risk of severe infection. There is no need to require children to receive this shot. If parents feel their individual child needs the shot that is a personal decision based on their child's own unique health needs. Other children's Covid 19 vaccination status does not put others at more or less risk as ALL can become infected and transmit Covid regardless of vaccination status. This is an undisputed fact. Let parents make their own decision regarding what's best for their children.

To: DOH WSBOH  
Cc:  
Subject: Comments for the Immunizations Technical Advisory Group

External Email

To the Immunizations Technical Advisory Group:

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

I am opposed to any legislation requiring students to be vaccinated, due to the following reasons:

1. There is no documentation concerning the history of safety of the COVID vaccine. The vaccine could cause more harm than good. There have been reports of fatal and harmful health effects of the COVID vaccines and booster shots.
2. Long term effects of these COVID vaccines is still unknown. To require them is extremely risky and short-sighted.
3. Current studies show that both the vaccinated and unvaccinated can transmit COVID, rendering any requirement for the vaccine pointless.
4. Studies show that children are very low risk for COVID. The benefit does not outweigh the risk.

For these reasons, I CANNOT support subjecting our children to any COVID vaccines that could seriously jeopardize their current and future health. Our children are our future. If they are sickly now and/or in their future years from COVID vaccination health risks, this poses a serious risk to our future society and future way of life for the residents of Washington State.

Therefore, there should be no such law passed or requirement enacted for COVID or any other EUA (Emergency Use Authorized) vaccination for our children in Washington State. Any attempt to do so is hasty, risky and exhibits infringement on freedom and liberty for the residents of Washington State to make these decisions for their own children.

Tim Ryan

Washington State Resident

This is what i sent in

I am strongly opposed to adding the Covid vaccines for children to the WAC-246-105.

- 1 COVID vaccines remain under the Emergency Use Authorization and the rules that apply to this status
- 2 Children under the age of 18 have a 99.995% survival rate from COVID infection.
- 3 Children. Have a higher chance of death or adverse event to COVID vaccines than COVID-19 infection.
- 4 The research to support this were methodological flawed regarding safety data.
- 5 The COVID vaccines do not prevent getting COVID 19 infection, not prevent the transmission of this infection.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons: children are at an extremely low risk for covid, the vaccine is still only under emergency use authorization, and using our children to gain long term safety data seems both unwise and unethical. Additionally, the data indicates now that the vaccine does not stop transmission.

I trust you will consider the factual data available and make your decision in the best interest of the people of this state.

Respectfully,

Susanna Benito

This is a major over-reach by the BOH, DOH and the Gov. These are our children and you do not have the right to force these shots on them. You have stepped way out of line. This is not a dictatorship, we are still a democratic Republic. The real medical evidence shows people, especially children, are not at as serious a risk as DOH reports. The statistics are being manipulated to say what DOH and the Gov want them to say. If you truly cared about the health of people, you would be treating them rather than just letting them stay sick.

Subject: Fw: Do not add Covid-19 to the current infectious disease WAC codes

External Email

I Do not support Covid-19 being added to the current infectious disease WAC codes. I do not want the vaccine forced on me or my family. I have had covid and so has my family. Everything in my body is saying don't do it. The following email is just another view against Covid Vaccines but I say, no matter what, I do not want it.....

Do not add Covid-19 to the current infectious disease WAC codes, as this is not a disease that causes death as our Government Regime would like for us to believe, with a 96% + survival rate, "False Information" & "NO complete TRANSPARENCY", being an

"EXPERIMENTAL Vaccines" all of which comes from our Government, should not ever be taken to the lengths that it has.

This is my understanding to the pandemic; I would like you to consider this information and again DO NOT ADD Covid-19 to WA WAC Codes.

1. Federal government wants to run roughshod over state powers, contrary to what the Founding Fathers intended in the Ninth and 10th Amendments to the Bill of Rights, which reserved powers to the states.

2. Dr. Francis Boyle is an international law expert. He's also an expert on 'genetic bioweapons.' And he was a gentleman who framed the 'anti-terrorism act.' It's called the "Bioweapons Anti-Terrorism Act" or B.W.A.T.A. It was framed in 1989, signed into law in 1990 by President George W. Bush, with unanimous approval from the U.S. Senate and the U.S. Congress. And so, if there is a Genetic Bioweapons Anti-terrorism Act, it means obviously there must be a genetic bioweapons industry. And I want you to know, that on this earth: 22 nations on planet earth have what we call BSL4 Labs, BSL4 Labs means Bio Safety Level 4. Bio Safety Level 4 is the highest level of Bio Safety.

3. Dr. Derek Knauss, A clinical scientist Southern California laboratory immunologist-virologist says "he and colleagues from 7 universities, that of 1500 samples of people tested "positive" for Covid-19 could not find any (0) . All the people were simply found to have influenza A and to a lesser extent influenza B".

4. New Zealand has locked its entire citizenry down for one, yes one new case of COVID. This simply boggles the mind. A look across the United States shows a similar trend in states led by democrat leaders. The separation of powers, or the powers granted to the states under the constitution is the only thing stopping America from looking like the examples listed above. Leaders in the red states are essentially holding the line against national oppression in America, but they cannot do this alone.

I can predict with relative certainty that new variants or strains are about to emerge. New bloated case counts, not deaths of course, will pepper the headlines of news organizations, hysteria will once again rule the news cycles. Continued public crises are going to manifest and perpetuate fear throughout our communities. My hope is that you are done being scared; and anger and outrage finally sets in. Remember, you are exceptional. I can also say with absolute certainty that they will come for you one day, not matter who you are if you don't stand up now, vaccinated or not. Tyranny has no boundaries; and there are bigger plans for you, your children and your wealth. Globalism has found its way into American culture; and it is poisoning from within. Digital passports, digital currencies, elimination of privacy and private property ownership; and massive taxation are happening as we speak; and are modern day tools of enslavement. The time has come to resist lockdown measures (peacefully of course) and say no to tyranny. Collectively we are stronger than the world's largest armies. We will not give up any of our civil liberties granted to us under our Constitution. We will not comply with vaccine passports. We will not allow segregation and discrimination to take new root in America. We will not enforce any mask mandates, especially of our children. We will not frequent businesses that promote targeted oppression of our neighbors. We will not be

bullied by state agencies or elected abusers.

5. Natural Immunity has never been approved or meds that has proven to work, Ivermectin and hydroxychloroquine

6. I believe are state will suffer if any more mandates or codes are enforced at this time and more than likely the citizens will boycott businesses that enact segregated practices on our fellow citizens. We will have a zero tolerance for civil liberty abuses on our citizenry. We will utilize the American court system of justice; and non-violent civil disobedience to combat despotism and tyranny, as Dr Martin Luther King Jr has taught us. Above all else, we will remain free people.

Thank you, for your time and concern and please remember to open your heart, soul and mind to all the issues that I have tried to convey.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

To require COVID vaccinations for K - 12 children

11.

Are you Pro or Con on the proposal?

2. Con

---

COVID is not affecting children at a concerning level. To require a vaccine for a group that is very unlikely to get a disease and extremely unlikely to die from that disease is ludicrous. The vaccinations are not working like you pretend they are. You continue to suggest booster shot after booster shot with no proof that it's doing any good. I refuse to ever give my children a shot of something that has so many side effects especially when it does not solve anything. Making this shot mandatory is wrong.

1. Yes

---

The choice to vaccinate a child should be up to the sole decision of the parent or guardian and should not impact or impede a child's education.

11.

Are you Pro or Con on the proposal?

2.

Con

---

The choice to vaccinate a child should be up to the sole decision of the parent or guardian and should not impact or impede a child's education. Children are at extremely low risk for Covid and have a much more robust immune system than any other age group. These vaccines are still only EUA (emergency use authorization) and the long term side effects (for any age group) has not yet been identified and as a parent I am not willing to see what side effects or impact the vaccine will have on my child.

Mandatory vaccination for children to attend school will hurt our future generations in more ways than just side effects and adverse reactions, but the education in which they receive. I pay taxes to fund the schools, teachers, and the district and my child or any other child has the right to attend school no matter their sex, race, religion, ethnicity, sexual orientation, AND VACCINATION STATUS! This will create a new segregation and is not the American way! Denying a child an education based on their vaccination status is unethical and flat out discriminatory. As a parent, I am entitled to make any and all medical decisions I see fit! This proposal to mandate vaccination for children to be able to attend school is against our parental and human rights as well as the 14th Amendment of the United States Constitution which has had an enormous impact on protecting individual rights in public education and therefore any mandate enforced regarding whether or not a child can attend public school based on vaccination status is against our constitutional right!

As a COVID ICU nurse who worked thru the pandemic and breastfed 2 kids and throughout one pregnancy; I am completely against any of the overreaching covid policies regarding school children and teachers. Vaccines should only be on a voluntary basis especially as there is yet no full transparency given by the vaccine companies. This is unconstitutional and where there is risk there must be choice . There are many cases of myocarditis a life altering diagnosis , that outnumber any previous vaccines. Not to mention, historically as with any other pharmaceutical long term adverse effects are not typically discovered until years and even decades later. Again, where there is risk , there must be a choice.

I am against this proposal. It is dangerous to children. Not only a gross over reach of American freedoms which is granted by god in the constitution but deadly to children health. Children have the best immune system, But by using masks you are suppressing there natural immune system when they are still developing and at there best. Children are at no risk! Recently the Bayer executive has proclaimed "The MRNA vaccines are cell and gene therapy" and "95% would have refused injecting this before the pandemic. And also the fda won't release the gene therapy results for 75 years. Besides that the World Health Organization, Tedros Adhanom Ghebreyesus admitted that other countries are already using booster shots and it is killing children. The inventor of the mRNA vaccine who is pro vaccine is against this. So maybe red flags. People should be more concerned about the new nuremberg trials coming when it breaks out of how deep the corruption does go and what is really going on. It is not a vaccine. This is GENE THERAPY and all the other countries as well as ours are in lockstep. I will stand up for the children and not let you kill them .

Allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100). Additionally, including COVID-19 injections as part of school immunization requirements using WAC 246-105.

11.

Are you Pro or Con on the proposal?

2. Con

---

We have no long term safety data as it relates to the Covid 19 injections. Evidence shows children are not seriously affected by Covid. Furthermore, the inoculation does not prevent spread of Covid. Everyone should be free to make their own medical choices. People cannot give informed consent since doctors and researchers are being silenced and their studies hidden if it does not support the big pharma narrative. This is very dangerous. All Covid-19 inoculations currently available are experimental (EUA). Forcing an experimental vaccine on anyone goes against the Nuremberg code. If you vote to pass this proposal, you are guilty and will be held accountable by the people.

Subject: Childhood Covid-19 Vaccine Mandates

External Email

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group, with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.

2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no

public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.

3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider such a step and, if you have considered it, to reconsider.

Thank you,

Megan Minnick

To: DOH WSBOH  
Cc:  
Subject: Jan 12th Meeting Agenda Comments

External Email

Board of Health members,

I'm writing about my serious concerns regarding the Covid related policies which will be discussed at your January 12th meeting. I adamantly oppose involuntarily detaining an individual based solely on their Covid related medical decisions and compliance. The dominant variant Omicron is much milder, so these current proposed policies surrounding Covid bewilder me. Choosing not to take a vaccine, covid test, medical examination, or quarantine should not be considered a misdemeanor requiring law enforcement to get involved. These decisions should all be voluntary.

The Covid vaccines are proposed as the primary solution for our society, however they have been shown to be ineffective after just a few months. Washington State has a large percentage of vaccinated people and yet we still have many cases. Why is that? It is not just the unvaccinated spreading Covid. People who have taken the vaccine are also able to continue to transmit the disease to others. There are many documented Covid breakthrough cases (some high profile cases). This occurs even after people have taken both initial vaccines and the booster.

We actually do not even have any current FDA approved vaccinations for Covid being offered to the public. The Pfizer vaccine that is available on the market is not FDA approved. The FDA approved Corminaty, and for some reason people are actually still getting the Pfizer EUA injection. Does that explain why there are so many thousands of adverse effects from the Covid vaccines shown on the VAERS website at the CDC? I'm not against vaccinations in general. These Covid vaccinations need to be tested further and the public needs to be informed about the adverse reactions. There should be no mandates or coercion for any vaccinations and especially for a vaccination that has not even completed clinical trials. This brings me to my other serious concern. I think it is dangerous to mandate Covid Vaccines for school children in public and private schools. Parents need to be able to weigh the risks for each child and be free to make the decision that is best for them. Kids are at low risk for Covid but are at risk for a variety of adverse reactions.

All Covid related medical decisions need to be made with informed consent not coercion. As an American citizen we are allowed that right. I hope those of you making these important policy decisions will carefully consider the negative impact these policies will have to the community.

Sincerely,

Wendy Butzerin

Subject: Washington Board of Health Recommendations

External Email

We have been made aware that Washington State Board of Health will be discussing mandating the Covid-19 shots and recommending detaining 'by force' citizens who do not comply with a variety of actions deemed necessary regarding Covid-19 and/or other medical situations. We are the parents of 2 minor children and 2 adult children, born & raised in the State of Washington. WE STRONGLY ENCOURAGE YOU NOT MOVE FORWARD WITH THESE RECOMMENDATIONS.

We have personally been touched by this virus as we know so many others have been. We understand the seriousness of the virus. We also believe strongly in the fact that we must remain free to make medical decisions for ourselves and for our children, considering the unique circumstances of each individual in our family.

As Board members of Health in the State of Washington you are OBLIGATED to provide us with facts/evidence that support all guidelines and recommendations:

- 1) There needs to be transparency about current rates of mortality for Covid-19 with comorbidities and age groups represented;
- 2) There needs to be transparency about current rates of positive test results of those vaccinated and those vaccinated with a booster;
- 3) There needs to be transparency about the accuracy of testing available;
- 4) There needs to be transparency about how current mandates have consistently prevented the spread of Covid-19; and
- 5) Explain why there has been little focus on making the public aware of how Covid-19 is treatable and how hospitals are successfully treating patients.

It is our hope that as Washington State Health Board members, you still hold deeply the virtues and desires that led you into medicine and that you have not allowed yourself to become a political player. It is our hope that you truly do serve in your capacity with honesty and a desire to truly protect the citizens of Washington State, ALL Washington State citizens. We also hope you know that by recommending these actions, you will give countless citizens of Washington State no other choice, but to move out of the state. We personally have known 32 families who have moved out of state in the last 1.5 years and will see another 9 more move this year. We understand this is small, but exponential, given we are only one family. Passage of these recommendations into law will be where the line is drawn for our family when it comes to moving and many other families we know.

Do not continue this barrage of assaults on individual rights of your citizens, causing a mass exodus of this beautiful state that has been home to so many for so long! Be the person that stands up and truly protects your citizens, by giving them the inalienable rights and dignity they deserve as a citizen of this state and this country.

Concerned Citizens,  
Doug & Lauren Wozeniak

Subject: Vaccine Mandates

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7F&isredir=1) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7F&isredir=1>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&data=04%7F&isredir=1) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&data=04%7F&isredir=1>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Teresa Johnston

---

There is a growing body of medical evidence that Covid vaccines are harmful to children. The risk of mortality or serious illness in children due to the Covid virus is almost nil. The long-term effects of the vaccine are unknown. The vaccine currently being given is still under an emergency use authorization and not fully approved by the FDA. The state is drastically overreaching its authority by trying to dictate a medical decision that should be in the hands of the parents.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I urge you in the name of freedom of choice, which is our God-given and inalienable right (recognized in our constitution), NOT to mandate vaccinations for any person for any reason. I recognize there is risk in life, but requiring vaccinations for a virus that can be treated in other ways is not logical or right.

There is sufficient, worldwide data to prove that vaccines are not nearly as effective at controlling spread, illness, or even death as one might wish. If their rate of success in any of these areas is equal or less than equal to natural immunity or other treatments that are or can be made available, why mandate vaccines? One could surmise that there may be reasons other than public health (financial gain, government control, etc.).

The role of government is not to coerce, restrict, punish, etc. I suggest that you replace the concept of mandated vaccines with another concept to which you yourselves may take issue. Would you, a free American citizen, willingly accept mandates that negatively impacted who you marry, how many children you can have, what job you may have, etc.? Or how about what your children were taught in school (especially if you were atheist, but state schools were teaching only Christianity)? No, at some level we are all about freedom of choice, and mandates such as those you are considering completely obliterate this freedom.

I understand your desire, as a board of people who are concerned about others' health, is to do what is best on a grand scale. But putting in place mandates that restrict freedom in the name of public health cannot be the way forward.

I ask you to consider spending your time and resources on funding the best alternative treatments to vaccines. Some of these could include:

- other early medical treatments
- a public service program that encourages healthy lifestyles with organic food consumption, adequate vitamin and other supplement access, and availability to activities that can be done year-round to encourage movement and aerobic exercise
- a robust sick-days/encouragement to work or study from home policy so people who work or are students have the freedom to choose to stay home when ill without losing a paycheck or losing as much ground when they stay home as a precaution, with lesser-symptoms.

America and Washington should be a beacon of ingenuity in these types of policies, rather than leading the worldwide pack toward more and greater restrictions and making laws that treat people with differences of opinion into "criminals".

Hello, I am completely against any of the proposed Covid policies that are over-reaching and immoral. I stand against these WACs:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

This is greatly concerning to me and I believe this requirement would not be in the best interest for the children of our state.

Thank you!  
Serge

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration.

Timari Brower

Rule making regarding vaccine law, specifically the potential of the covid vaccine becoming mandatory for K-12 students.

11.

Are you Pro or Con on the proposal?

2. Con

---

The only \*FDA approved\* covid vaccine is Pfizer, and it is only \*FDA approved\* for ages 16 and up. Pfizer for ages 5-15, and the Moderna and J&J continue to be used under emergency use authorization. Also, childhood vaccines are covered under the National vaccine injury compensation program — covid vaccines are not. They are covered under the countermeasures injury compensation program which can adjust rules with the times. My opinion is until vaccines are fully FDA approved for children and they are added to the VICP states shouldn't even be discussing mandates for students.

Subject: STRONGLY OPPOSED TO PROPOSED POLICY (JAB, MASK, CONCENTRATION CAMPS)

External Email

REGARDING PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

DETAILS HERE:

<https://sboh.wa.gov/Meetings/MeetingInformation/2022/January12Online>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FMeetings%2FMeetingInformation%2F2022%2FJanuary12Online>>

Please let me start by letting you know that I understand the immense pressure with which you are all acting under. It cannot be easy to impose rules from under mandates (not law) under the threat of extortion, coercion and further impacted by the pressures of people buying into an orchestrated fear. I imagine that you get passionate letters of many persuasions either in favor of or against mandating medical interventions on employees, vendors and customers. I appreciate the position you've all been led into.

Understand that the pharmaceutical industry and US Government has ZERO liability for injuries of this experimental vaccine. They have an unrealistically cumbersome program for compensation that has not paid out [PREP Act / NVICP]. The only version of this jab that has FDA approval, and subject to liability has not yet been put into production; Comirnaty, by Pfizer. FDA and Pfizer have been playing a shell game on making BioNTech and Comirnaty interchangeable. The courts have been pushing back, since there are two different liability structures for FDA Approved products vs. Emergency Use Authorization products. Now ask yourself how Comirnaty has been approved when it hasn't yet been produced. The waivers that vaccine recipients are supposed to sign, if they are even given anymore, state that the vaccination must be voluntarily accepted, and without coercion. The threat of having to be subjected to an alternative medical procedure or lose income, be incarcerated, be treated differently than vaccinated, be subject to higher insurance premiums, or even be told they have no choice... is indeed coercion. This is the very intention of the Nuremberg code, a universal law. The vaccine manufacturers all ensured that they would be immune from liability before they agreed to make and distribute these products. In the end, the blame and lawsuits for harm caused by your unlawful actions of coercing people and persons into an experimental gene-therapy, not

meant to, nor effective at stopping spread or infection and not even formulated against the latest Omicron variant will fall squarely on you, as the very men and woman I addressed this letter to. It would be far cheaper, ethically sound and humane for you, the people of perceived leadership with illusionary penalties politicking your will on the people living on the states you are supposed to serve, to stop, and stand with the people. How do YOU compensate for lives lost, disabilities, orphaned children, created, at YOUR discretion or blind faith in government and industry captured agencies? "I was just following orders!" has been demonstrated as an insufficient defense in tribunals.

I spoke with several of the local Washington county health agencies as well as Washington state health agency to ask them a few questions. I wanted to understand the science they were leveraging to make their key decisions. I think it's fair to want references to the policies being imposed on the masses. After some very lazy and strange responses, such as, "just google [insert claim here], and you will find a vast amount of information" or, "go to the CDC site." Each of the county agencies ended up admitting that they take orders from the state agencies. The state agencies gave me the same ridiculous replies and then eventually admitted that they get their direction from the governor's office. Jay Inslee claims to have collaborated with state health agency scientists and doctors to make these decisions, but the agencies admitted, to me, that is untrue. Why are we paying health agencies, scientists and doctors to take orders from the governor? Why aren't these agencies doing the science or reviewing the science that led to this very unscientific general consensus. Why aren't they looking to protect us from agency capture, industry intrusion and bought politicians? I always thought that was their charter mission. I challenge all of you, as liable people to look into the directives being placed on you as to their lawfulness, or even just their origin. Don't blindly trust and believe that an agency has your back. Think of all the lobbying efforts that go into industry. Think of all the agency capture that has happened. Think about the \$35 Billion dollars that pharmaceutical companies have paid out over a recent 10 year span for fraudulent behavior leading to death and damage on all products EXCEPT vaccines which are exempt from liability. Think about our government atrocities in the Tuskegee Syphilis studies from 1932 – 1972 where OUR United States government, CDC, and Public Health departments infected black Americans for their own sick experimental satisfaction. It took the efforts of people like YOU and ME to stop that. The government will run amok for as long as WE allow for it. YOU have to stop where YOU have control. YOU are all positioned in well-respected roles at your place of employ. YOU are the power to stop atrocities.

2021 has been the year of the lowest population growth (i.e. death increase, birth decrease, still birth and miscarriages, suicides...), highest number of covid cases, and all in lock-step with the highest vaccination rate in history. Actuaries are stating a 40% increase in working class American deaths, since the release of these vaccines. Vaccine data has been captured by the CDC through a self-reporting system called VAERS. When you enter this website, a disclaimer notifies medical professionals that they have a legal obligation to report ANY SUSPECTED vaccine injuries to this system, and they are not to withhold possible damage at their discretion. However, most doctors don't even know it exists and don't even have training on what a vaccine injury looks like. In many cases, they simply repeat the mantra, "vaccines are safe and effective." \*Supreme court ruled that vaccines are unavoidably unsafe, long before this experimental technology came into play. Harvard Pilgrim medical was given by the CDC \$1Mil to research the VAERS system for known shortcomings. Over the 3-year study they concluded that less than 1% of vaccine injuries are even reported. With these new products, we are nearing reports of over ONE MILLION injuries including OVER 21,000 deaths reported to VAERS for these covid shots, in the United States alone. That far outnumbers the amount of reports of all vaccines since the databases inception in 1986, COMBINED. Draw whatever conclusions you may. It is reasonable to consider that we've administered a high number of vaccines in a short period, but please also consider, these are experimental technologies where a vast number of physicians still don't know the VAERS system exists. It is reasonable to assume the number of reports are greater than 1%, but if you've not heard of VAERS

either, there is a good chance, the numbers are still generously below 10% reported.

Thousands if not tens of thousands of well credentialed, well respected, and many conventional medical and medical science professionals are screaming at the top of their lungs, being kicked off of social media, fired from their government funded institutions and having their government funding stripped for speaking their scientifically arguable truths about the very possible dangers that mass vaccination imposes. These are not "anti-vax" professionals by any stretch of the imagination. They are being censored even when they speak at senate hearings. Ignorance and willful ignorance are no excuse for harming another person. Your actions of imposing these mandates onto people, will be seen as "practicing medicine without a license." The fine print and intentional convolution of laws, acts, legislation, orders... are meant to confuse you into taking the fall. The governments are pushing propaganda rhetoric. As people, paid to be leaders, you have the duty laid squarely on you to ensure that you do not cause harm to those you serve. Pay attention to the deceitful messaging that does NOT make a clear case for what you are making of these "mandates." They are only giving you a "feeling" about what you believe you are "supposed to follow" as an "order." You are responsible 100% for your actions, despite your beliefs. The constituents that follow orders are doing so at your discretion. Those are order followers and many do not think critically. They are our culture of minimum/minimal wage earners, preparing for their further enslavement. They believe they must act at your mercy. They are not lesser human beings, but they will faithfully follow you off of a cliff. You must give them their power back, allow them to make their own medical decisions, between them and their trusted medical doctors. The smart empowered will refuse and hold you accountable for their loss of income, to prevent their own debilitation or loss of life that would certainly cost them more than they can earn from their employment with your easily persuaded corporations.

If you still watch the news, I beg that you listen with a critical ear. Those allowed to speak as authorities are actually telling us all of this. "Omicron isn't deadly, rather it is super infectious" (i.e. common cold), "the vaccine does not prevent spread or transmission, but may reduce symptoms." A critical mind asks, "why do I need to allegedly reduce symptoms of a common cold and increase my chances of a vaccine injury, such as blood clots or heart problems, or even death?" Ask yourself why the media and health agencies are advertising (i.e. normalizing) heart conditions in children? Ask yourself why dialysis centers are popping up like Starbucks in the 90s. Ask yourself why there are so many drug commercials for the same diseases listed as possible side effects of vaccines. Critical minds do ask all kinds of questions.

I can highly recommend, in order to understand how this happened that each of you read the current best seller, a book written by RFKJr, 'The Real Anthony Fauci.' His law firm and non-profit, Children's Health Defense will be using the contents of this book, chalk full of citations, for a Crimes Against Humanity trial against Dr. Fauci. It gives a ton of insight into how one man, with billions of dollars of unchecked spending, at taxpayer expense has infiltrated the worlds' research, education, esteemed journal publications, media and medical industries. It is ripe with testimony from people who dared step outside of Fauci's persuasion and suffered consequences of his reign of worldwide terror. Also, follow the lawsuits against medical tyranny of agency-capture, led by Aaron Siri, Esq and the non-profit I-CAN. He won a lawsuit yesterday where the FDA is not granted 70 years to release the data from the vaccine manufacturers and must produce within 8 months. That means, the push to vaccinate more, before the atrocities are uncovered is going to be relentless. Stop now, before you have no further ability to.

Many ethical medical and science thought leaders are only now, realizing how powerful this system is at keeping them compliant. It's history repeating itself over and over, and until it impacts some of us personally, we choose not to see it or care. You each, have a special role, as being perceived as an authority, by your followers. That makes you accountable. I for one, am doing my part, by ensuring that the I share messages of how to treat people with the dignity and respect they deserve, including but not limited to

making their own medical decisions.

I trust and hope that at least one of you will be reached.

Kind Regards  
in Love and Truth

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I believe it is our right as parents to choose healthcare options for our children. My children will continue to be homeschooled if this is put i to law. I will not have such a new un proven vaccine shoved into my children.

As a parent,I feel the risk analysis for children has CLEARLY shown that children are not at risk from the Covid 19 virus. Don't waste the taxpayer's money on vaccinating children. It is an irresponsible overreach that will be remembered at the polls.

Jan 7 2021

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects ([www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>> ) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

And please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

The parents are responsible for their children, not the state. That is a moral law, one honored by our Constitution. Driving while drinking is more dangerous. And deadly.

Thank you for your time.

Tom & Vicki Tweddell

Subject: Why the Pfizer Inoculation Does More Harm than Good

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: [www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases

they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application,

and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

**Manipulation of Data Cohorts:** Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. This proposed rule could be used as a suppression of an individuals constitutional rights. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The vaccine hasn't been around enough or tested to see what the potential affects are on children like the current vaccines required.

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

## 2. Con

---

Making children to get the Vaccine to attend school is ridiculous. It should be a choice and up to the parents whether or not they get it. Children should not be punished or lose out on their education because a parent does not want their child to get it. If this goes through, we will be pulling our children from school. You should not be mandating something that some people will not get themselves. I am against this decision and children will be losing out on education if this goes through.

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

Dear Health Board Members,

I am a 39 yr old female health care worker with 17 years in my field so my comments are coming from an educated background in healthcare and wanting the best for all of us here in WA State. It is a big concern hearing that my state is considering using force to make people do what they think they should do (ie. using law enforcement to force those who the state considers non-compliant to go into a quarantine facility and receive treatment that the state considers appropriate for that person, mandatory Covid vaccine for school-age children who want to attend a particular school, etc). Over the past 2 years, our country and state having talking a lot about tolerance, equality, and pluralism but policies that use force does not show me a spirit of tolerance, equality, pluralism, and a desire to work with the citizens of Washington and hear their side. I understand that there are polar-opposite views on all of this and I believe there is a solution that can be a win-win for both sides. But your proposed policies of force and totalitarian methods does not show me that the State, Health Board, and Department of Health desires to find a solution that works for ALL the citizens of WA State. Instead, these policies show me that my state Health Board are wanting to control their citizens. I want to believe that the leaders of my state and country are honest and looking out for the best good of ALL people but the reality is that not ALL people or leaders have the same ethical standards as myself. These policies will give a few leaders power over the masses and I do not believe that is a solution to the COVID situation especially when we are supposed to be a democratic state. Democracy says that the citizens of our state have a voice in what happens, not power given to a few. I am deeply concerned that giving power to our health leadership to have absolute control and the ability to use law enforcement to make Washington citizens do what they want is not a good solution as there is a huge risk with those individuals using their power incorrectly. Further, the Omicron variant has been shown to be less deadly than Covid 19 and Delta so I am wondering why the Health Board thinks they need to take such drastic measures? If you wanted to use force, then why didn't you do that in the beginning when it was more deadly? I'm having a hard time understanding your logic. The hospitals are also not being overrun by Covid cases so that also makes me question your rationale.

Also, I do not believe that children should be required to have COVID vaccine in order to be eligible to attend school for the same reasons stated above.

I urge you as the WA State Health Board to reconsider your proposed policies and not push this aside just because you may not agree. Please use your positions to find a solution that works for everyone, not just for a few. Thank you for your careful consideration.

Sincerely,  
Twyla Burch

Dear Ms. Schreiber,

I'm writing in regards to your upcoming meeting which includes the following proposals:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid injections as part of school immunization requirements using WAC 246-105

I want to express my voice and concern over these proposals. To be honest, I am shocked that I even have to address these things in America, the land of the free.

I am 100% opposed to any forced Covid 19 mRNA shots on our children! This is absolute madness to even consider given that kids are at very little risk of harm from Covid and now that we have Omicron, which is proven to be mild, it shows that the pandemic is coming to an end. This is a virus that will always be around we simply need to learn to live with it. This is still an experimental shot and we have no way of knowing the long

term effects on our kids. I am not willing for my kids to be an experiment and there is simply no need for this to happen. Dr. Fauci himself, stated that kids were at little risk from dying of Covid and that the hospitalizations were being overcounted because they are including kids in the hospital WITH Covid rather than BECAUSE of Covid, this is a HUGE difference and confirms there is no need to mandate this for kids.

I am also appalled at the thought that quarantine facilities would be even be considered, is this Nazi Germany?! It is complete insanity and there is absolutely no scientific basis for you to approve this. We live in America, the land of the free I am sure you are aware of all of the evidence against but for some reason are choosing to ignore it. Why? I ask? Why? This is madness and it needs to stop now.

I was recently in a free state with no mask mandate or vaccine requirements to move freely around the city. It made me that much more aware of the tyranny we are living under here in WA. I love where I live and will fight to keep it free. Please don't make me leave the state because of irrational forced mandates.

The proposals being considered are tyrannical, evil and a complete overreach of power. There is NOTHING anyone can say or do to make me give my children this experimental vaccine that is causing so much harm especially to kids. Each parent has the right to choose what they want for their kids and for themselves.

I, and many others will hold you responsible for any irreversible damage from unnecessary experimental mRNA treatment so please vote accordingly. Are you prepared to be responsible for the harm that will inevitably come if you move forward with these proposals?

May God be with you as you make this crucial vote.

Thank you,

Nora Berry

To whom it may concern,  
I am opposed to adding the Covid vaccine for the following reasons:

1. Immunization Briefing Criteria as described by Sam Pskowski on October 13, 2021 pg 6 indicates that the first hurdle to adding a vaccine is " Advisory Committee on Immunization Practice recommends a fully FDA approved immunization against a specific antigen for the school aged population"

To date NO Covid vaccine has been FULLY approved and licensed. To date any and all vaccines are approved solely on an Emergency Use Authorization ("EAU") basis. Indeed, Pfizer states this unequivocally in their "Unapproved Product Review Memorandum" (See attached). Therefore, it is premature for the Board to convene a Technical Advisory Group to assess the nine criteria due to no current vaccine having fully approved status.

2. EAU is given when benefits outweigh the known risks. However, in Pfizer's own fact sheet regarding 12 and older dated January 3, 2022, on page 4 Pfizer states duration of effectiveness is unknown. Pfizer lists side effects on page 5 of the document and states "The possible side effects of the vaccine are still being studied in clinical trials". (See attached Memorandum). Therefore, due to the vaccines not being fully approved, we don't fully know what the risks are.

3. In Scott Lindquist's power point presentation on October 13, 2021, he provides evidence that vaccines for children 0-19 are not warranted. Page 21 demonstrates that 2-3 children out of 100,000 are at risk of a 7 day hospital stay due to Covid. That is a .003 risk factor. However in the aforementioned Pfizer Unapproved Product Review Memorandum, it states in the adverse reactions section that there is a .4 chance of adverse effects from the vaccine. This shows that children taking the vaccine is potentially more dangerous than getting Covid. Regardless, forcing experimental emergency use vaccines on children 19 and under with a .003 risk factor, when the manufacturers admit the product is unapproved and they don't know all the side effects, and cannot know the long term side effects is unconscionable. The "disease burden" for this age group is almost 0.

4. Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects is arguably not true when looking at Vaers Analysis. (See attached). The Vaers analysis compares Covid Vaccine adverse reactions alongside all other vaccines since 1990. The information is stunning, and requires that we as a society need to slow down and allow the Covid vaccines to go through the entire

licensing process to determine whether the drugs would actually be approved after being comprehensively vetted. At minimum, these numbers need to be investigated before injecting our children with an experimental vaccine. The cost of such experimentation and potential for harm is incalculable.

5. Neither the medical community, nor members of society agree on mandatory vaccine policies. I wonder if any of us in our lifetimes have seen such a great number of people, professionals, first responders, nurses, be willing to risk their livelihood versus being forced to take a vaccine. I can only imagine those numbers would increase when it comes to vaccinating their children. Such a policy would cause parents to pull their children out of the public school system, or not comply. This has already happened in Los Angeles where they had to pause their public school vaccine mandate due to such high numbers of parents saying they would not comply. The WA codes indicate that should that be the case, they should not implement such a policy until more information on the vaccine exists and more individuals accept and agree on a fully licensed vaccine.

5. Omicron has effectively eliminated the State's reasoning for mandated vaccines. Vaccines do not work on Omicron which is now taking over the country, as did Delta with Beta. Therefore, a vaccine mandate for a vaccine that does not stop the spread makes no sense, especially for a non approved product. In fact, a recent Danish study indicates that Omicron spreads faster in vaccinated and boosted individuals due to immune evading abilities. (See attached) This should be looked at before we vaccinate people and potentially cause Covid to spread faster. Also, it is now accepted that Omicron is less likely to cause a person to end up in the hospital, or to die from the disease, while also providing stronger natural immunity from Delta and other variants.

It is for the reasons stated above, among many others, that I am opposed to the measure presented on January 12, 2022.

Sincerely,  
Tyrone Martinez

# 1 Abstract

The Omicron variant of concern (VOC) is a rapidly spreading variant of SARS-CoV-2 that is likely to overtake the previously dominant Delta VOC in many countries by the end of 2021.

We estimated the transmission dynamics following the spread of Omicron VOC within Danish households during December 2021. We used data from Danish registers to estimate the household secondary attack rate (SAR).

Among 11,937 households (2,225 with the Omicron VOC), we identified 6,397 secondary infections during a 1-7 day follow-up period. The SAR was 31% and 21% in households with the Omicron and Delta VOC, respectively. We found an increased transmission for unvaccinated individuals, and a reduced transmission for booster-vaccinated individuals, compared to fully vaccinated individuals. Comparing households infected with the Omicron to Delta VOC, we found an 1.17 (95%-CI: 0.99-1.38) times higher SAR for unvaccinated, 2.61 times (95%-CI: 2.34-2.90) higher for fully vaccinated and 3.66 (95%-CI: 2.65-5.05) times higher for booster-vaccinated individuals, demonstrating strong evidence of immune evasiveness of the Omicron VOC.

Our findings confirm that the rapid spread of the Omicron VOC primarily can be ascribed to the immune evasiveness rather than an inherent increase in the basic transmissibility.

## 2 Introduction

The SARS-CoV-2 variant B.1.1.529, which is referred to as the Omicron variant of concern (VOC), has overtaken the Delta VOC in South Africa and has spread rapidly to at least 28 countries in Europe (7), Asia, the Middle East and South America (9; 17). The Omicron VOC has been reported to be three to six times as infectious as previous variants (4), with a short doubling time (11), including early estimates from countries with a high vaccination coverage indicating doubling times of 1.8 days (UK), 1.6 days (Denmark), 2.4 days (Scotland) and 2.0 days (United States) (26). Transmission of the Omicron VOC has been high among individuals being fully vaccinated against SARS-CoV-2 infection as well as among individuals with a history of COVID-19 infection (19).

A current concern worldwide is that the Omicron VOC is able to evade immunity induced by the currently used vaccines, and a preliminary meta-analysis of neutralization studies indicated that the vaccine effectiveness is reduced to around 40% against symptoms and to 80% against severe disease, but that the effect for booster vaccinations is at 86% and 98%, respectively (12). These results are supported by laboratory studies establishing a markedly reduced elimination of the Omicron VOC by neutralizing antibodies, indicating that the vaccination effectiveness with Pfizer-Biontech against infection is only at 35% for the Omicron VOC (5). This was corroborated by another *in vitro* study reporting an 8.4-fold reduction in neutralization for the Omicron VOC vs. the PV-D614G reference strain, whereas there was only a 1.6-fold reduction in neutralization for the Delta VOC (27). Therefore, the advantage of the Omicron VOC seems to be a combination of high transmissibility and increased immune evading abilities.

Studies on the transmission of the Omicron VOC are yet sparse and a critical prerequisite for effective control of this variant worldwide (3). In particular, it is important to clarify whether the growth advantage can be ascribed to immune evasiveness, i.e., a higher proportion of vaccinated or previously infected individuals being susceptible to infection, an increased inherent transmissibility for this variant, or both.

The aim of the present study is to investigate the household transmission of the Omicron VOC. Specifically, we address the following questions: 1) Is the secondary attack rate higher for the Omicron VOC than for the Delta VOC? 2) Does the Omicron VOC show a higher immune evasiveness relative to the Delta VOC? 3) Is booster vaccination effective for reducing transmission?

## 3 Data and Methods

### 3.1 Study design and participants

Since July 2021, the Delta VOC has been the dominant variant in Denmark. The first Danish case infected with the Omicron VOC was detected on 22<sup>nd</sup> November 2021 (Danish Covid-19 Genome Consortium, DCC), and community transmission was determined to be present by late November 2021. On 8<sup>th</sup> December, Danish authorities discontinued intensive contact tracing of close contacts for cases specifically infected with the Omicron VOC. We therefore started the study period on 9<sup>th</sup> December 2021 when cases of both variants were treated approximately equally, thus reducing bias from intensified contact tracing and active case finding of the Omicron VOC that was implemented shortly after its discovery in Denmark (24). The end of the inclusion period for primary cases was set at 12<sup>th</sup> December to balance the inclusion of enough cases for proper estimation and early dissemination of the results. Potential secondary cases were followed up to 7 days after, i.e., until 19<sup>th</sup> December 2021 to allow for test results to be obtained. We obtained the last test results on 21<sup>st</sup> December.

We used Danish register data for this study. All individuals in Denmark have a unique identification number, enabling cross linking between administrative registers. Using this, we obtained individual level information on home address, data on all antigen and RT-PCR tests for SARS-CoV-2 from the Danish Microbiology Database (MiBa; (20)), and records in the Danish Vaccination Register (13).

Households were defined based on residential addresses. We included households with 2-6 members to exclude care facilities and other places, where many individuals share the same address. If two individuals tested positive on the same day, we excluded these households from the data, to ensure proper identification of the primary case within each household.

We defined a primary case as the first individual within a household to test positive with an RT-PCR test within the study period. We followed all tests of other household members in the study period. A positive secondary case was defined by either a positive RT-PCR test or a positive antigen test (10). Almost all samples that tested positive with RT-PCR were tested with Variant PCR to determine the VOC (21) (see Appendix section 6.2). Based on the variant PCR test result of the primary case, we classified households into households with either the Omicron or the Delta VOC. The Delta VOC has been the dominating variant in Denmark since early July 2021, accounting for approximately 100% of all positive RT-PCR samples August-November 2021 (23).

We classified individuals by vaccination status into three groups: i) unvaccinated; ii) fully vaccinated (defined by the vaccine used, Comirnaty (Pfizer/BioNTech): 7 days after second dose; Vaxzevria (AstraZeneca): 15 days after second dose; Spikevax (Moderna): 14 days after second dose; Janssen (Johnson & Johnson): 14 days after vaccination, and 14 days after the second dose for cross vaccinated individuals) or 14 days after previous infection; or iii) booster-vaccinated (defined by 7 days after the booster vaccination, (16; 2)). Partially vaccinated individuals were regarded as unvaccinated in this study. By 22<sup>nd</sup> December 2021, of all vaccinated individuals, 85% were vaccinated with Comirnaty, 14% with Spikevax, 1% with Janssen, and approximately 0% with AstraZeneca (22).

### 3.2 Statistical analyses

We defined the secondary attack rate (SAR) within households as the proportion of potential secondary cases within the same household that tested positive between 1-7 days following the positive test of the primary case within the household (15). Adjusted odds

ratios (OR) were estimated from multivariable logistic regression models fit to the binary outcome of test status of each potential secondary case, with the primary explanatory variable reflecting the strain type in the household (Omicron vs. Delta VOC) and potentially confounding variables of age and sex of the primary case, age and sex of the potential secondary case, and household size (2-6 individuals). To test if vaccine status conferred differential protection against the Omicron and Delta VOC, we included an interaction term between vaccination status of primary and potential secondary cases and the variant. Standard errors were adjusted to control for clustering at the household level.

We have conducted a number of supplementary analyses to support the main analysis. We re-analysed each strata of the data separately using another set of logistic regression models (see appendix 7.4). To examine the potential mediating role of viral load of primary cases infected with the Omicron VOC relative to the Delta VOC, we plotted the distributions of Ct values for each variant (appendix Figure 3). We also examined the extent to which the Ct value of the primary case could explain the difference in transmission between the variants (see appendix Table 8). Our study relies on Variant PCR testing to determine if each primary case was Delta or Omicron. We estimated the intra-household correlation of variants, i.e., the probability that the positive secondary case was infected with the same variant as the primary case. To investigate if there was bias in the selection of samples for Variant PCR, we investigated the probability of sampling for Variant PCR by sample Ct value and age. Moreover, we tested the robustness of potential secondary cases being tested and testing positive by only using RT-PCR tests, which are more sensitive.

### 3.3 Ethical statement

This study was conducted using data from national registers only. According to Danish law, ethics approval is not needed for this type of research. All data management and analyses were carried out on the Danish Health Data Authority's restricted research servers with project number FSEID-00004942. The study only contains aggregated results

and no personal data. The study is, therefore, not covered by the European General Data Protection Regulation (GDPR).

### 3.4 Data availability

The data used in this study are available under restricted access due to Danish data protection legislation. The data are available for research upon reasonable request to The Danish Health Data Authority and Statens Serum Institut and within the framework of the Danish data protection legislation and any required permission from Authorities. We performed no data collection or sequencing specifically for this study.

## 4 Results

A total of 2,225 primary cases with the Omicron VOC and 9,712 primary cases with the Delta VOC were included (Table 1). The SAR was 31% in households with the Omicron VOC and 21% in households with the Delta VOC. Generally, the estimated SAR was higher for the Omicron VOC than for the Delta VOC, for all age groups. Unvaccinated potential secondary cases experienced similar attack rates in households with the Omicron VOC and the Delta VOC (29% and 28%, respectively), while fully vaccinated individuals experienced secondary attack rates of 32% in household with the Omicron VOC and 19% in households with the Delta VOC. For booster-vaccinated individuals, Omicron was associated with a SAR of 25%, while the corresponding estimate for Delta was only 11%.

Table 1: Summary Statistics

	Omicron				Delta

Notes: The secondary attack rate (SAR) is expressed as a percentage (%). Summary statistics based on primary cases are shown separately from summary statistics on potential secondary cases, positive secondary cases and SAR.

We found that the cumulative probability of potential secondary cases to be tested at least once increased from 33-41% to around 87-89% at 7 days after the primary case tested positive (Figure 1, panel a). The probability was higher when the primary case was infected with the Delta VOC compared to the Omicron VOC. The probability of potential secondary cases being tested twice increased from 9% to 69-74% at 7 days after the primary case tested positive. The probability of potential secondary cases testing positive increased from 3-4% on day 1, to 21% and 31% on day 7, when the primary case was infected with the Delta VOC and Omicron VOC, respectively (Figure 1, panel b).

Figure 1: Probability of being tested and testing positive

Notes: Panel (a) shows the probability of potential secondary cases being tested after a primary case has been identified within the household. Panel (b) shows the probability of potential secondary cases that test positive subsequently to a primary case being identified within the household. Note that the latter is not conditional on being tested, i.e. the denominator contains test negative individuals and untested individuals. The x axes shows the days since the primary case tested positive, and the y axes shows the proportion of individuals either being tested (a) or testing positive (b) with either antigen or RT-PCR tests, based on the variant of the primary case. The SAR for each day relative to the primary case can be read directly from panel (b). For example, the SAR on day 7 is 31% and 21%, whereas the SAR on day 4 is 24% and 15%. The shaded areas show the 95% confidence bands clustered on the household level. See appendix Figure 5 for the same two panels, only using RT-PCR tests.

The effect of vaccination on susceptibility and transmissibility of SARS-CoV-2 within households is shown in Table 2. The estimates of susceptibility by vaccine status were stratified by variant because we observed an interaction between variant and vaccination status of the potential secondary cases ( $p < 0.001$ ). After adjustment for confounders, we found that in households with the Delta VOC, the OR of infection was 2.31 (95% confidence interval (CI) 2.09-2.55) for unvaccinated individuals and 0.38 (CI: 0.32-0.46) for booster-vaccinated individuals when compared to fully vaccinated potential secondary cases. For households with the Omicron VOC, the corresponding OR for infection for unvaccinated individuals was 1.04 (CI: 0.87-1.24) and 0.54 (CI: 0.40-0.71) for booster-vaccinated individuals. When considering the vaccine status of primary cases, i.e. transmissibility, we observed no difference in the OR of infection between households with the Omicron and Delta VOC. An unvaccinated primary case was associated with an OR of 1.41 (CI: 1.27-1.57) for potential secondary cases compared to fully vaccinated primary

cases, while a booster-vaccinated primary case was associated with a decreased OR of 0.72 (CI: 0.56-0.92).

Table 2: Effect of Vaccination

	Susceptibility		Transmissibility
	Omicron households	Delta households	All households
Unvaccinated	1.04 (0.87-1.24)	2.31 (2.09-2.55)	1.41 (1.27-1.57)
Fully vaccinated	ref (.)	ref (.)	ref (.)
Booster-vaccinated	0.54 (0.40-0.71)	0.38 (0.32-0.46)	0.72 (0.56-0.92)
Number of observations	27,874	27,874	27,874
Number of households	11,937	11,937	11,937

Notes: This table shows odds ratio estimates for susceptibility and transmissibility by vaccination status. Column 1 shows the susceptibility based on the vaccination status of the potential secondary case, conditional on being in a household infected with the Omicron VOC. Column 2 shows the susceptibility based on the vaccination status of the potential secondary case, conditional on being in a household infected with the Delta VOC. Column 3 shows the transmissibility based on the vaccination status of the primary case, unconditional on the variant in the household. Note, all estimates are from the same model, but with a different reference category across column 1-3. The estimates are adjusted for age and sex of the primary case, age and sex of the potential secondary case, and size of the household. The estimates are furthermore adjusted for vaccine status of the potential secondary case interacted with the household variant, and the vaccine status of the primary case. 95% confidence intervals are shown in parentheses. Standard errors are clustered on the household level. The odds ratio estimates for the full model are presented in Appendix Table 8, column I.

The relative difference in transmission between the Omicron and Delta variants when comparing potential secondary cases with the same vaccine status is shown in Table 3. For unvaccinated individuals, an OR of 1.17 (CI: 0.99-1.38) was estimated for households with the Omicron VOC compared to households with the Delta VOC. For fully vaccinated individuals, the OR was 2.61 (CI: 2.34-2.90) for households with the Omicron VOC, and for booster-vaccinated individuals the OR was 3.66 (CI: 2.65-5.05). This significant change in OR for fully vaccinated and booster-vaccinated individuals represents strong evidence of immune evasion of the Omicron VOC.

Table 3: Relative effect of the Omicron VOC

	Unvaccinated	Fully vaccinated	Booster-vaccinated
Omicron households	1.17 (0.99-1.38)	2.61 (2.34-2.90)	3.66 (2.65-5.05)
Delta households	ref (.)	ref (.)	ref (.)
Number of observations	27,874	27,874	27,874
Number of households	11,937	11,937	11,937

Notes: This table shows odds ratio estimates for the effect of living in a household infected with the Omicron VOC relative to the Delta VOC. Column 1 shows the relative transmission of the Omicron VOC, conditional on being unvaccinated. Column 2 shows the relative transmission of the Omicron VOC, conditional on being fully vaccinated. Column 3 shows the relative transmission of the Omicron VOC, conditional on being booster-vaccinated. Note, all estimates are from the same model, but with a different reference category across column 1-3. The estimates are adjusted for age and sex of the primary case, age and sex of the potential secondary case, and size of the household. The estimates are furthermore adjusted for vaccine status of the potential secondary case interacted with the household variant, and the vaccine status of the primary case. 95% confidence intervals are shown in parentheses. Standard errors are clustered on the household level. The odds ratio estimates for the full model are presented in Appendix Table 8, column I.

We compared the Ct values of primary cases with the Omicron VOC and the Delta VOC (Appendix 7, Figure 3). The distribution of Ct values for cases with the Omicron VOC were slightly skewed to the left compared to cases with the Delta VOC, but the median values (27.24 and 28.29, respectively) did not differ substantially. Adjustment for Ct values of the primary cases did not materially alter the findings, suggesting that the difference between the Omicron and Delta VOC transmission is not due to differences in viral load in the primary case (appendix Table 8). Similarly, the distribution of time since last vaccination/booster/infection among positive secondary cases were approximately the same across the two variants (appendix Figure 4). However, these analyses are limited by the fact that vaccine roll out in Denmark is largely determined by age, which makes it difficult to estimate true associations for variables that are also correlated with age.

The probability that a sample was selected for Variant PCR was stable across Ct value, varying between 97% and 100% (Appendix 7, Figure 2). Selection for Variant PCR was also similar across age groups, varying between 95% and 99%. The Variant PCR was validated with high quality whole genome sequencing (WGS) data, and showed an

estimated false negative rate of 0.06% and a false positive rate of 1.15% (Appendix section 6.3).

We found an intra-household correlation between primary case and secondary case variants of 98.0% and 97.7% for households with primary cases infected with the Omicron VOC and the Delta VOC, respectively (Appendix section 7.2). This supports the assumption that subsequent infections within the same household are likely to be associated with the same variant as was identified for the primary case.

Finally, misclassification of primary and secondary cases is also a potential concern. It is not given that the index case is actually also the case with the first positive RT-PCR test. However, we believe that this potential bias would impact both the Delta and Omicron VOC transmission estimates equally. Figure 1, panel b, shows the proportion of secondary cases testing positive on each day after the primary case. One day after, 3% and 4% have tested positive, two days after, 7% and 12% have tested positive. These cases could have been misclassified as secondary cases, instead of primary cases. To investigate the sensitivity of our results for this potential misclassification, we estimated our regression model including only secondary cases that tested positive on day 2-7 and on day 3-7 (Appendix Table 9).

## 5 Discussion and Conclusion

Our results show that the Omicron VOC is generally 2.7-3.7 times more infectious than the Delta VOC among vaccinated individuals (Table 3). This observation is in line with data from (18), which estimated that 19% of Omicron VOC primary cases in households in the UK resulted in at least one other infection within the household, compared to only 8.3% of those associated with the Delta VOC. Furthermore, we show that fully vaccinated and booster-vaccinated individuals are generally less susceptible to infection compared to unvaccinated individuals (Table 2). We also show that booster-vaccinated individuals generally had a reduced transmissibility (OR: 0.72, CI: 0.56-0.92), and that unvaccinated

individuals had a higher transmissibility (OR: 1.41, CI: 1.27-1.57), compared to fully vaccinated individuals.

Surprisingly, we observed no significant difference between the SAR of Omicron versus Delta among unvaccinated individuals (Table 3). This indicates that the increased transmissibility of the Omicron VOC primarily can be ascribed to immune evasion rather than an inherent increase in the basic transmissibility. If this observation can be confirmed by independent studies, it has important ramifications for the understanding of the current challenges for control of the epidemic. Our data indicate that the non-pharmaceutical interventions that were used to control the previous variants of SARS-CoV-2 are also likely to be effective against the Omicron VOC. On the other hand, although we showed that booster vaccines did offer some protection against household transmission, the reduced level of protection means that vaccination is less likely to be sufficient to curb transmission within a population. Furthermore, the duration of the protective effect is currently unknown, and the rapidly waning effectiveness of the second dose against the Omicron VOC as well as data from neutralization assays (14; 8) do raise some concerns about the longevity of the booster response. This means that the current vaccines are unlikely to mitigate the spread of the Omicron VOC to the extent that has been achieved for previous variants on the long term. We therefore suggest that adapted or improved vaccines may be necessary to mitigate the spread of the Omicron VOC. However, both a primary series and a booster dose is likely to play an important role in reducing transmission on a short term and modifying the outcome of infection by reducing severity. We were unable to address this question as detailed clinical data were not available in our registries, and in any case the relatively short follow-up time precludes a thorough investigation of any subsequent hospitalisations and deaths.

(1) note that the existing circulating immunity within a country is of major importance in limiting the severity of the epidemic with the Omicron VOC. We found that booster-vaccinated individuals in Omicron VOC households had an OR of 0.54 (CI: 0.40-0.71) compared to fully vaccinated individuals (Table 2). This shows that booster vaccination is effective for reducing household transmission of the Omicron VOC. However, this effect

is also affected by other factors such as waning immunity for fully vaccinated individuals, since they were typically vaccinated much earlier compared to the dose received as a booster vaccination. For the Delta VOC, the booster vaccination had an OR of 0.38 (CI: 0.32-0.46) compared to fully vaccinated individuals, showing the high effectiveness of booster vaccinations against the Delta VOC. These estimates are important for decision makers worldwide, as they can inform models for predicting the epidemic and thus for balancing the most appropriate level of restrictions to control transmission in different situations.

There are some potential biases in this study. Firstly, in this initial phase, the spread of the Omicron VOC was characterized by spreading events, and has therefore not yet reached an even distribution throughout the population (3). We found that a large proportion of the Omicron VOC cases were aged 20-30 years, and therefore different from the age distribution of Delta cases (Table 1). Furthermore, the Omicron VOC is mainly found in households with 2 members, whereas the Delta VOC is mainly found in households with 4 members. This could potentially impact the comparability of our estimates for the two variants. However, our results are robust, when we exclude households with a primary case <10 years and when we only include 2-person households (Appendix Table 8).

Recently, self testing kits have become widely available for purchase in Denmark. This could influence the results, for instance if individuals that self-test at home refrain from also being tested in public testing facilities, meaning that their test results are not registered in the national databases. However, the probability of being tested was very similar between RT-PCR and any test (Figure 1 and Appendix Figure 5), and consequently most positive antigen tests were confirmed with a positive RT-PCR test, so we assume that has likely also been the case for positive self-tests as well. Moreover, we believe that this potential bias will impact both the Delta and the Omicron VOC transmission estimates equally.

There are also a number of other confounding variables that might lead to biases within our study. Vaccines are not randomly distributed within the population, so immunocom-

promised and other vulnerable individuals are more likely to have had access to a booster vaccine in particular. To some extent, this has been addressed by including age as an explanatory variable in the models, but it was not possible to include information on underlying risk conditions, so this information is incomplete. Similarly, there are likely underlying behavioural drivers for an individual being unvaccinated, which are likely to confound with other risky behaviours that might be expected to increase both transmission and susceptibility to infection (e.g. poor use of face masks, reduced attention to hygiene). The use of registry data limits our inference to associations between transmission/susceptibility and vaccination status of individuals, where part of the association is due to general characteristics of the individuals themselves rather than their vaccination status. However, a key point of our study is that these biases are non-differential with respect to variant, i.e. they would be expected to affect transmission of both the Delta and Omicron VOC identically because risky behaviours and/or underlying health concerns should affect both variants equally. Consequently, although the associations between vaccination status and transmission for each variant are likely to each be susceptible to bias, we believe that any such bias is non-differential with respect to variant. Therefore, our results concerning the relatively higher transmissibility of the Omicron vs. Delta VOC for vaccinated individuals should be robust to these potential biases.

The SAR was found to be higher for the Omicron VOC than for the Delta VOC across all age groups (Table 1). Notably, the SAR for individuals aged 70+ years was 32% for the Omicron VOC compared to only 18% for the Delta VOC. This has implications for e.g. care facilities, highlighting the need for increased protection against transmission, now that the Omicron VOC will likely overtake the Delta VOC in many countries.

To conclude, we found an increased susceptibility for unvaccinated individuals, and a reduced susceptibility for booster-vaccinated individuals, compared to fully vaccinated individuals in households infected with the Delta VOC. Additionally, we found a reduced susceptibility for booster-vaccinated individuals in households infected with the Omicron VOC. Furthermore, we found an increased transmissibility from unvaccinated individuals, and a reduced transmissibility from booster-vaccinated individuals, compared to fully

vaccinated individuals. Lastly, we found a general higher transmission in households infected with the Omicron VOC relative to the Delta for both unvaccinated, fully vaccinated and booster-vaccinated individuals. The Omicron VOC showed immune evasiveness for fully vaccinated and booster-vaccinated individuals. Our results confirm that booster vaccination has the potential to reduce Omicron VOC transmission in households, although vaccination as a strategy for epidemic control is increasingly challenged by the immune evasiveness of the Omicron VOC.

Comparing Omicron VOC to Delta VOC, we found an 1.17 (95%-CI: 0.99-1.38) times higher SAR for unvaccinated, 2.61 times (95%-CI: 2.34-2.90) higher for fully vaccinated and 3.66 (95%-CI: 2.65-5.05) times higher for booster-vaccinated individuals, demonstrating strong evidence of immune evasiveness of the Omicron VOC.

# Supplementary Appendix

## 6 Background

This section provides some background information in order to better understand the circumstances underlying our study. The results build on all data available in Denmark, i.e., not restricted to our study sample.

### 6.1 Time to test result

Denmark provides free testing with both antigen and RT-PCR tests. Antigen tests provide a quick test result (positive/negative) with a median time from sample to result of less than 30 minutes (Table 4). All positive antigen tests are recommended to be confirmed with an RT-PCR test. RT-PCR tests are more sensitive (25), but also require a longer time before the result is known. The median time is approximately 24 hours (Table 5). Only samples from positive RT-PCR tests are selected for Variant PCR and whole genome sequencing.

Table 4: Time to test results, antigen tests, minutes

Sample date		Time to test result, minutes					Number of tests
		P5	Q1	Median	Q3	P95	
09DEC21	Thursday	10	16	22	27	33	245,056
10DEC21	Friday	9	19	24	30	37	213,060
11DEC21	Saturday	13	20	24	30	35	155,857

19DEC21	Sunday	16	20	24	29	39	220,871

Notes: This table provides summary statistics on the time from sampling to the test result (positive/negative). P5 = 5th percentile, Q1 = 1st quartile, Q3 = 3rd quartile, P95 = 95th percentile.

## 6.2 Probability of sampling for Variant PCR

This subsection provides details on the sampling probability for variant PCR.

Figure 2 shows the proportion of positive RT-PCR samples selected for Variant PCR testing and the proportion testing positive with the Omicron VOC. There was no clear selection bias in the probability that a positive RT-PCR sample was selected for Variant PCR testing (purple)—neither across sample Ct value (panel a) nor across age (panel b). There was a higher proportion of cases aged 15-30 years that tested positive with the Omicron VOC (green, panel b).

Figure 2: Probability of sampling for Variant PCR

Notes: This figure shows the proportion of positive RT-PCR samples selected (purple) for Variant PCR testing and the proportion testing positive (green) with the Omicron VOC. Panel (a) shows the selection by Ct value; panel (b) by age. Only positive RT-PCR tests from 9<sup>th</sup>-12<sup>th</sup> December 2021 performed by TestCenter Denmark are included. The shaded areas show the 95% confidence bands.

### 6.3 Robustness of Variant PCR results

This subsection provides additional results in order to examine the robustness of the Variant PCR used to detect the Omicron VOC.

The Variant PCR was validated using the available high quality whole-genome sequencing (WGS) data. The rate of false positives was estimated to 1.15% (18/1,567) (Table 6, panel I). The rate of false negative PCR results was estimated to 0.06% (1/1,557) (Table 6, panel II).

Table 6: Validation of Variant PCR test using whole genome sequencing (WGS).

<b>I. False positive rate</b>		
	<b>Number of samples</b>	<b>%</b>
<b>Confirmed by WGS</b>		
No (false positive rate)	18	1.15
Yes	1,549	98.85
Total	1,567	100.00
<b>II. False negative rate</b>		
	<b>Number of samples</b>	<b>%</b>
<b>Variant PCR result</b>		
Omicron	1,549	99.49
Inconclusive	7	0.45
Delta (false negative rate)	1	0.06
Total	1,557	100.00

Notes: This table shows the estimates of the false positive rate and the false negative rate of the Variant PCR test, using whole genome sequencing (WGS). Panel I shows the number of Variant PCR tests that were confirmed (Yes) or not confirmed (No) using high quality whole-genome sequencing (WGS). The estimated false positive rate was 1.15% (18/1,567). Panel II shows the number of Variant PCR tests in samples confirmed as the Omicron VOC using high quality whole-genome sequencing (WGS). The estimated false negative rate was 0.06% (1/1,557).

## 7 Additional analyses

This section provides additional analyses in order to better understand our main results.

### 7.1 Viral load of primary cases

Figure 3 shows the density of sample Ct values of primary cases stratified by the Omicron VOC and Delta VOC.

Figure 3: Density of Ct value

Notes: This figure shows the density of the sample Ct values of primary cases stratified by the Omicron and Delta VOC.

## 7.2 Intra-household correlation of variants

In this subsection, we investigate the intra-household correlation of variants, i.e., the probability that the primary and positive secondary cases are infected with the same variant.

In households where the primary case was infected with the Omicron VOC, we found 1,160 positive secondary cases that also had a Variant PCR result (Table 7). Of these, 1,137 (98%) were also Omicron VOC and 23 (2%) were Delta VOC. Similarly, in households where the primary case was infected with the Delta VOC, we found 3,917 positive secondary cases. Of these, 3,827 (98%) were also Delta and 90 (2%) were Omicron VOC. The overall intra-household correlation of variants was 97.8 (CI: 97.3-98.3).

Table 7: Intra-household correlation of variants

<b>I. Number of cases</b>			
	<b>Primary case</b>		
	<b>Omicron</b>	<b>Delta</b>	<b>All</b>
<b>Secondary Case</b>			
Omicron	1,137	90	1,227
Delta	23	3,827	3,850
All	1,160	3,917	5,077

<b>II. Regression estimates</b>			
	<b>Primary case</b>		
	<b>Omicron</b>	<b>Delta</b>	<b>All</b>
Intra-household correlation (%)	98.0	97.7	97.8
(95%-CI)	(97.2-98.9)	(97.8-99.4)	(97.3-98.3)
Number of observations	1,160	3,917	5,077
Number of households	864	2,866	3,730

Notes: This table provides estimates of the intra-household correlation of variants, i.e., the probability that the primary and positive secondary cases are infected with the same variant. Panel I provides the number of observations. Panel II provides regression estimates. Standard errors are clustered on the household level.

## 7.3 Time since vaccination for positive secondary cases

Figure 4 shows the distribution of days since last vaccination/infection for positive secondary cases, stratified by the household VOC. We saw no clear evidence of difference across the two distributions.

Figure 4: Time since vaccination for positive secondary cases

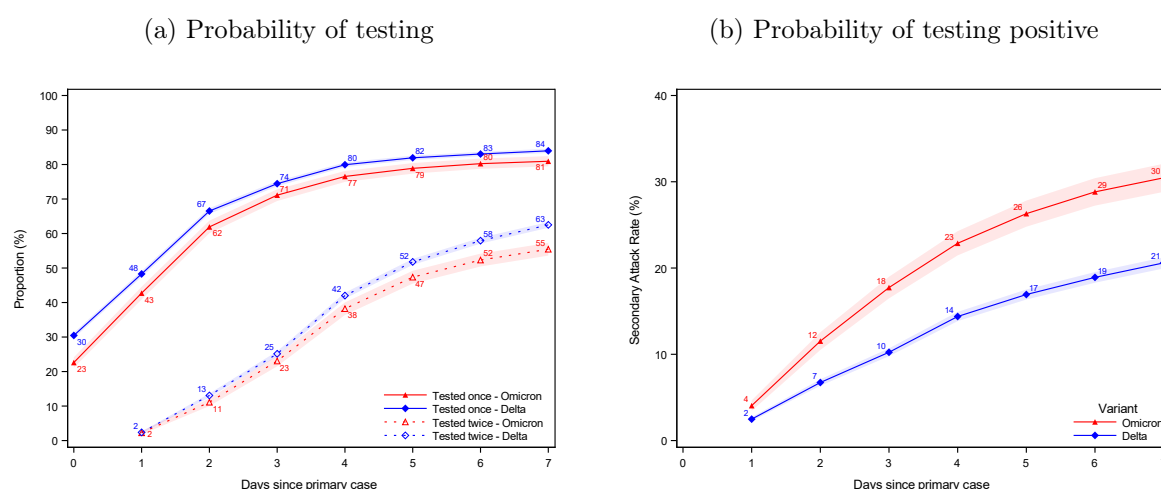

Notes: This figure shows the distribution of days since last vaccination/infection for positive secondary cases, stratified by the household VOC.

## 7.4 Robustness of main results

This subsection provides additional results in order to validate the robustness of the results shown in the main paper.

Figure 5 shows the same as Figure 1, but only using RT-PCR tests (i.e. excluding antigen tests).

Figure 5: Probability of being tested and testing positive with an RT-PCR test

Notes: This figure shows the same as Figure 1, but only including RT-PCR tests. Panel (a) shows the probability of potential secondary cases being tested after a primary case has been identified within the household. Panel (b) shows the probability of potential secondary cases that test positive subsequently to a primary case being identified within the household. Note that the latter is not conditional on being tested, i.e. the denominator contains test negative individuals and untested individuals. The x axes shows the days since the primary case tested positive, and the y axes shows the proportion of individuals either being tested (a) or testing positive (b) with an RT-PCR test, based on the variant of the primary case. The SAR for each day relative to the primary case can be read directly from panel (b). For example, the SAR on day 7 is 30% and 21%, whereas the SAR on day 4 is 23% and 14%. The shaded areas show the 95% confidence bands clustered on the household level.

Tables 8 and 9 show the results of logistic regression models fit to specific strata of the data.

Column I of Table 8 shows the odds ratio estimates of our main specification, i.e., the same as used in Table 2 and 3. Column II shows the odds ratio estimates, when excluding households with a primary case <10 years. Column III shows the odds ratio estimates, when only including 2-person households. Column IV shows the odds ratio estimates, while adjusting for Ct value of the primary case.

In Table 9 we show the estimates, while restricting the inclusion criteria for positive secondary cases. Column I shows the odds ratio estimates, including positive secondary cases found on day 1-7, i.e. our main specification, also presented in Table 2 and 3. Column II includes positive secondary cases found on day 2-7. Column III includes positive secondary cases found on day 3-7.

Notes: This table shows the sensitivity for the choice of inclusion of positive secondary cases. In Table 9 we show the estimates, while restricting the inclusion criteria for positive secondary cases. Column I shows the odds ratio estimates, including positive secondary cases found on day 1-7, i.e., our main specification, also presented in Table 2 and 3. Column II includes positive secondary cases found on day 2-7. Column III includes positive secondary cases found on day 3-7. 95%-Confidence interval in parentheses. Standard errors are clustered on the household level.

**VACCINE INFORMATION FACT SHEET FOR RECIPIENTS AND CAREGIVERS  
ABOUT COMIRNATY (COVID-19 VACCINE, mRNA)  
AND THE PFIZER-BIONTECH COVID-19 VACCINE TO PREVENT CORONAVIRUS  
DISEASE 2019 (COVID-19) FOR USE IN INDIVIDUALS 12 YEARS OF AGE AND  
OLDER**

**FOR 12 YEARS OF AGE AND OLDER**

**You are being offered either COMIRNATY (COVID-19 Vaccine, mRNA) or the Pfizer-BioNTech COVID-19 Vaccine to prevent Coronavirus Disease 2019 (COVID-19) caused by SARS-CoV-2.**

**This Vaccine Information Fact Sheet for Recipients and Caregivers comprises the Fact Sheet for the authorized Pfizer-BioNTech COVID-19 Vaccine and also includes information about the FDA-licensed vaccine, COMIRNATY (COVID-19 Vaccine, mRNA) for use in individuals 12 years of age and older.**

**The FDA-approved COMIRNATY (COVID-19 Vaccine, mRNA) and the Pfizer-BioNTech COVID-19 Vaccine authorized for Emergency Use Authorization (EUA) for individuals 12 years of age and older, when prepared according to their respective instructions for use, can be used interchangeably.<sup>1</sup>**

**COMIRNATY (COVID-19 Vaccine, mRNA) is an FDA-approved COVID-19 vaccine made by Pfizer for BioNTech. It is approved as a 2-dose series for prevention of COVID-19 in individuals 16 years of age and older. It is also authorized under EUA to provide:**

- a 2-dose primary series to individuals 12 through 15 years of age;**
- a third primary series dose to individuals 12 years of age and older who have been determined to have certain kinds of immunocompromise;**
- a single booster dose to individuals 12 years of age and older who have completed a primary series with Pfizer-BioNTech COVID-19 Vaccine or COMIRNATY (COVID-19 Vaccine, mRNA); and**
- a single booster dose to individuals 18 years of age and older who have completed primary vaccination with a different authorized COVID-19 vaccine. The booster schedule is based on the labeling information of the vaccine used for the primary series.**

---

<sup>1</sup> When prepared according to their respective instructions for use, the FDA-approved COMIRNATY (COVID-19 Vaccine, mRNA) and the EUA-authorized Pfizer-BioNTech COVID-19 Vaccine for individuals 12 years of age and older can be used interchangeably without presenting any safety or effectiveness concerns.

**The Pfizer-BioNTech COVID-19 Vaccine has received EUA from FDA to provide:**

- **a 2-dose primary series to individuals 12 years of age and older;**
  - **a third primary series dose to individuals 12 years of age and older who have been determined to have certain kinds of immunocompromise;**
  - **a single booster dose to individuals 12 years of age and older who have completed a primary series with Pfizer-BioNTech COVID-19 Vaccine or COMIRNATY (COVID-19 Vaccine, mRNA); and**
  - **a single booster dose to individuals 18 years of age and older who have completed primary vaccination with a different authorized COVID-19 vaccine. The booster schedule is based on the labeling information of the vaccine used for the primary series.**
- 

This Vaccine Information Fact Sheet contains information to help you understand the risks and benefits of COMIRNATY (COVID-19 Vaccine, mRNA) and the Pfizer-BioNTech COVID-19 Vaccine, which you may receive because there is currently a pandemic of COVID-19. Talk to your vaccination provider if you have questions.

This Fact Sheet may have been updated. For the most recent Fact Sheet, please see [www.cvdvaccine.com](http://www.cvdvaccine.com).

## **WHAT YOU NEED TO KNOW BEFORE YOU GET THIS VACCINE**

### **WHAT IS COVID-19?**

COVID-19 disease is caused by a coronavirus called SARS-CoV-2. You can get COVID-19 through contact with another person who has the virus. It is predominantly a respiratory illness that can affect other organs. People with COVID-19 have had a wide range of symptoms reported, ranging from mild symptoms to severe illness leading to death. Symptoms may appear 2 to 14 days after exposure to the virus. Symptoms may include: fever or chills; cough; shortness of breath; fatigue; muscle or body aches; headache; new loss of taste or smell; sore throat; congestion or runny nose; nausea or vomiting; diarrhea.

### **WHAT IS COMIRNATY (COVID-19 VACCINE, mRNA) AND HOW IS IT RELATED TO THE PFIZER-BIONTECH COVID-19 VACCINE?**

COMIRNATY (COVID-19 Vaccine, mRNA) and the Pfizer-BioNTech COVID-19 Vaccine, when prepared according to their respective instructions for use, can be used interchangeably.

For more information on EUA, see the **“What is an Emergency Use Authorization (EUA)?”** section at the end of this Fact Sheet.

## **WHAT SHOULD YOU MENTION TO YOUR VACCINATION PROVIDER BEFORE YOU GET THE VACCINE?**

Tell the vaccination provider about all of your medical conditions, including if you:

- have any allergies
- have had myocarditis (inflammation of the heart muscle) or pericarditis (inflammation of the lining outside the heart)
- have a fever
- have a bleeding disorder or are on a blood thinner
- are immunocompromised or are on a medicine that affects your immune system
- are pregnant or plan to become pregnant
- are breastfeeding
- have received another COVID-19 vaccine
- have ever fainted in association with an injection

## **HOW IS THE VACCINE GIVEN?**

The Pfizer-BioNTech COVID-19 Vaccine or COMIRNATY (COVID-19 Vaccine, mRNA) will be given to you as an injection into the muscle.

Primary Series: The vaccine is administered as a 2-dose series, 3 weeks apart. A third primary series dose may be administered at least 4 weeks after the second dose to individuals who are determined to have certain kinds of immunocompromise.

Booster Dose:

- A single booster dose of the vaccine may be administered at least 5 months after completion of a primary series of the Pfizer-BioNTech COVID-19 Vaccine or COMIRNATY (COVID-19 Vaccine, mRNA) to individuals 12 years of age and older.
- A single booster dose of the vaccine may be administered to individuals 18 years of age and older who have completed primary vaccination with a different authorized COVID-19 vaccine. Please check with your healthcare provider regarding timing of the booster dose.

The vaccine may not protect everyone.

## **WHO SHOULD NOT GET THE VACCINE?**

You should not get the vaccine if you:

- had a severe allergic reaction after a previous dose of this vaccine
- had a severe allergic reaction to any ingredient of this vaccine.

## **WHAT ARE THE INGREDIENTS IN THE VACCINES?**

COMIRNATY (COVID-19 Vaccine, mRNA) and the authorized formulations of the vaccine include the following ingredients:

- mRNA and lipids ((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N,N-ditetradecylacetamide, 1,2-Distearoyl-sn-glycero-3-phosphocholine, and cholesterol).

Pfizer-BioNTech COVID-19 vaccines for individuals 12 years of age and older contain 1 of the following sets of additional ingredients; ask the vaccination provider which version is being administered:

- potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose

OR

- tromethamine, tromethamine hydrochloride, and sucrose

COMIRNATY (COVID-19 Vaccine, mRNA) contains 1 of the following sets of additional ingredients; ask the vaccination provider which version is being administered:

- potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose

OR

- tromethamine, tromethamine hydrochloride, and sucrose

### **HAS THE VACCINE BEEN USED BEFORE?**

Yes. In clinical trials, approximately 23,000 individuals 12 years of age and older have received at least 1 dose of the vaccine. Data from these clinical trials supported the Emergency Use Authorization of the Pfizer-BioNTech COVID-19 Vaccines and the approval of COMIRNATY (COVID-19 Vaccine, mRNA). Millions of individuals have received the vaccine under EUA since December 11, 2020. The vaccine that is authorized for use in individuals 12 years of age and older includes two formulations; one that was studied in clinical trials and used under EUA, and one with the same mRNA and lipids but different inactive ingredients. The use of the different inactive ingredients helps stabilize the vaccine under refrigerated temperatures and the formulation can be administered without dilution.

### **WHAT ARE THE BENEFITS OF THE VACCINE?**

The vaccine has been shown to prevent COVID-19.

The duration of protection against COVID-19 is currently unknown.

### **WHAT ARE THE RISKS OF THE VACCINE?**

There is a remote chance that the vaccine could cause a severe allergic reaction. A severe allergic reaction would usually occur within a few minutes to 1 hour after getting a dose of the vaccine. For this reason, your vaccination provider may ask you to stay at the place where you received your vaccine for monitoring after vaccination. Signs of a severe allergic reaction can include:

- Difficulty breathing
- Swelling of your face and throat
- A fast heartbeat
- A bad rash all over your body
- Dizziness and weakness

Myocarditis (inflammation of the heart muscle) and pericarditis (inflammation of the lining outside the heart) have occurred in some people who have received the vaccine, more commonly in males under 40 years of age than among females and older males.

In most of these people, symptoms began within a few days following receipt of the second dose of vaccine. The chance of having this occur is very low. You should seek medical attention right away if you have any of the following symptoms after receiving the vaccine:

- Chest pain
- Shortness of breath
- Feelings of having a fast-beating, fluttering, or pounding heart

Side effects that have been reported with the vaccine include:

- severe allergic reactions
- non-severe allergic reactions such as rash, itching, hives, or swelling of the face
- myocarditis (inflammation of the heart muscle)
- pericarditis (inflammation of the lining outside the heart)
- injection site pain
- tiredness
- headache
- muscle pain
- chills
- joint pain
- fever
- injection site swelling
- injection site redness
- nausea
- feeling unwell
- swollen lymph nodes (lymphadenopathy)
- decreased appetite
- diarrhea
- vomiting
- arm pain
- fainting in association with injection of the vaccine

These may not be all the possible side effects of the vaccine. Serious and unexpected side effects may occur. The possible side effects of the vaccine are still being studied in clinical trials.

### **WHAT SHOULD I DO ABOUT SIDE EFFECTS?**

If you experience a severe allergic reaction, call 9-1-1, or go to the nearest hospital.

Call the vaccination provider or your healthcare provider if you have any side effects that bother you or do not go away.

Report vaccine side effects to FDA/CDC Vaccine Adverse Event Reporting System (VAERS). The VAERS toll-free number is 1-800-822-7967 or report online to <https://vaers.hhs.gov/reportevent.html>. Please include either “COMIRNATY (COVID-19 Vaccine, mRNA)” or “Pfizer-BioNTech COVID-19 Vaccine EUA”, as appropriate, in the first line of box #18 of the report form.

In addition, you can report side effects to Pfizer Inc. at the contact information provided below.

Website	Fax number	Telephone number
<a href="http://www.pfizersafetyreporting.com">www.pfizersafetyreporting.com</a>	1-866-635-8337	1-800-438-1985

You may also be given an option to enroll in v-safe. V-safe is a new voluntary smartphone-based tool that uses text messaging and web surveys to check in with people who have been vaccinated to identify potential side effects after COVID-19 vaccination. V-safe asks questions that help CDC monitor the safety of COVID-19 vaccines. V-safe also provides second-dose reminders if needed and live telephone follow-up by CDC if participants report a significant health impact following COVID-19 vaccination. For more information on how to sign up, visit: [www.cdc.gov/vsafe](http://www.cdc.gov/vsafe).

#### **WHAT IF I DECIDE NOT TO GET COMIRNATY (COVID-19 VACCINE, mRNA) OR THE PFIZER-BIONTECH COVID-19 VACCINE?**

Under the EUA, it is your choice to receive or not receive the vaccine. Should you decide not to receive it, it will not change your standard medical care.

#### **ARE OTHER CHOICES AVAILABLE FOR PREVENTING COVID-19 BESIDES COMIRNATY (COVID-19 VACCINE, mRNA) OR THE PFIZER-BIONTECH COVID-19 VACCINE?**

Other vaccines to prevent COVID-19 may be available under Emergency Use Authorization.

#### **CAN I RECEIVE THE COMIRNATY (COVID-19 VACCINE, mRNA) OR PFIZER-BIONTECH COVID-19 VACCINE AT THE SAME TIME AS OTHER VACCINES?**

Data have not yet been submitted to FDA on administration of COMIRNATY (COVID-19 Vaccine, mRNA) or the Pfizer-BioNTech COVID-19 Vaccine at the same time with other vaccines. If you are considering receiving COMIRNATY (COVID-19 Vaccine, mRNA) or the Pfizer-BioNTech COVID-19 Vaccine with other vaccines, discuss your options with your healthcare provider.

#### **WHAT IF I AM IMMUNOCOMPROMISED?**

If you are immunocompromised, you may receive a third dose of the vaccine. The third dose may still not provide full immunity to COVID-19 in people who are immunocompromised, and you should continue to maintain physical precautions to help prevent COVID-19. In addition, your close contacts should be vaccinated as appropriate.

#### **WHAT IF I AM PREGNANT OR BREASTFEEDING?**

If you are pregnant or breastfeeding, discuss your options with your healthcare provider.

## **WILL THE VACCINE GIVE ME COVID-19?**

No. The vaccine does not contain SARS-CoV-2 and cannot give you COVID-19.

## **KEEP YOUR VACCINATION CARD**

When you get your first dose, you will get a vaccination card to show you when to return for your next dose(s) of the vaccine. Remember to bring your card when you return.

## **ADDITIONAL INFORMATION**

If you have questions, visit the website or call the telephone number provided below.

To access the most recent Fact Sheets, please scan the QR code provided below.

Global website	Telephone number
<a href="http://www.cvdvaccine.com">www.cvdvaccine.com</a> 	1-877-829-2619 (1-877-VAX-CO19)

## **HOW CAN I LEARN MORE?**

- Ask the vaccination provider.
- Visit CDC at <https://www.cdc.gov/coronavirus/2019-ncov/index.html>.
- Visit FDA at <https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/emergency-use-authorization>.
- Contact your local or state public health department.

## **WHERE WILL MY VACCINATION INFORMATION BE RECORDED?**

The vaccination provider may include your vaccination information in your state/local jurisdiction's Immunization Information System (IIS) or other designated system. This will ensure that you receive the same vaccine when you return for the second dose. For more information about IISs visit: <https://www.cdc.gov/vaccines/programs/iis/about.html>.

## **CAN I BE CHARGED AN ADMINISTRATION FEE FOR RECEIPT OF THE COVID-19 VACCINE?**

No. At this time, the provider cannot charge you for a vaccine dose and you cannot be charged an out-of-pocket vaccine administration fee or any other fee if only receiving a COVID-19 vaccination. However, vaccination providers may seek appropriate reimbursement from a program or plan that covers COVID-19 vaccine administration fees for the vaccine recipient (private insurance, Medicare, Medicaid, Health Resources & Services Administration [HRSA] COVID-19 Uninsured Program for non-insured recipients).

**WHERE CAN I REPORT CASES OF SUSPECTED FRAUD?**

Individuals becoming aware of any potential violations of the CDC COVID-19 Vaccination Program requirements are encouraged to report them to the Office of the Inspector General, U.S. Department of Health and Human Services, at 1-800-HHS-TIPS or <https://TIPS.HHS.GOV>.

**WHAT IS THE COUNTERMEASURES INJURY COMPENSATION PROGRAM?**

The Countermeasures Injury Compensation Program (CICP) is a federal program that may help pay for costs of medical care and other specific expenses of certain people who have been seriously injured by certain medicines or vaccines, including this vaccine. Generally, a claim must be submitted to the CICP within one (1) year from the date of receiving the vaccine. To learn more about this program, visit [www.hrsa.gov/cicp/](http://www.hrsa.gov/cicp/) or call 1-855-266-2427.

**WHAT IS AN EMERGENCY USE AUTHORIZATION (EUA)?**

An Emergency Use Authorization (EUA) is a mechanism to facilitate the availability and use of medical products, including vaccines, during public health emergencies, such as the current COVID-19 pandemic. An EUA is supported by a Secretary of Health and Human Services (HHS) declaration that circumstances exist to justify the emergency use of drugs and biological products during the COVID-19 pandemic.

The FDA may issue an EUA when certain criteria are met, which includes that there are no adequate, approved, available alternatives. In addition, the FDA decision is based on the totality of scientific evidence available showing that the product may be effective to prevent COVID-19 during the COVID-19 pandemic and that the known and potential benefits of the product outweigh the known and potential risks of the product. All of these criteria must be met to allow for the product to be used in the treatment of patients during the COVID-19 pandemic.

This EUA for the Pfizer-BioNTech COVID-19 Vaccine and COMIRNATY (COVID-19 Vaccine, mRNA) will end when the Secretary of HHS determines that the circumstances justifying the EUA no longer exist or when there is a change in the approval status of the product such that an EUA is no longer needed.

Subject: URGENT: don't make covid vaccine mandatory for children!

External Email

Dear Sir/Madam,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

As a parent and a member of the community, I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at extremely low risk for Covid 19. The Covid 19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading C19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long-term effects of C19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally, in regard to vaccine effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing C19 nor is it preventing the spread of C19. The vaccine is not cost-effective for our nation.

Perhaps it is cost-effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate.

"Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive autoimmune flare-ups and other medical issues that arise immediately after their second dose. This is not a safe vaccine for all people. Even the FDA board that was approving those vaccines to young kids did it with the impression that this will be absolutely voluntary and will never be mandated which CDC guaranteed. Will you take upon yourself the responsibility for the health and wellbeing of innocent children who you will be subjecting to unknown risks in order to receive an education which is an ingrained right of every child? Will you create segregation and discrimination based on the medical choices made?

Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Thank you,

Vitaliy Bondarenko

Subject: proposed vaccination of children

External Email

To:

Washington State Board of Health.

I am writing to inform you as a voting and concerne citizen of the State of Washington that I am against any mandate that forces children and their families to vaccinate against the Covid 19 virus and any of its variants, at this time. These supposed vaccinations have been thus far ineffective.

If in futher studies, this vaccine could prove to be safe for everyone, then I would reconsider. But at this time there is not enough information and studies to prove this vaccine safe, expecially for those who are our future.

I am not someone opposed to vaccines in general. My children and I have had several. There are others we have chosen not to recieve as well because we have felt them not necessary after consulting with our PCP.

Please do your part to stop this political play that is taking place throughout our nation and do what is best for the health of all individuals.

The critical statement below is "provide immunity", which is not happening. If this were the case then we would not be seeing all the breakthrough cases of this disease. So why give our children something that has been proven not to be effective.

Thank you for "hearing" me as a voting citizen of this state and one who cares about the health of my children, grandchildren and my neighbors.

Regards,

Subject: Medical Freedom in Washington State...

External Email

I believe in medical freedom granted to us by the Constitution of the United States of America and as a God given right. I am thankful for FREEDOM. Please do not take it away.

Forced vaccinations are unamerican. Considering detaining by force because of a person's medical choice is a failure to uphold the values we hold dear as Americans.

(WAC 246-100-070, WAC 246-100-045,WAC 246-100-040)

My children are fully immunized with the current state required immunizations and attend public school. They will not be given the COVID vaccine. They have natural immunity from having the virus. The virus is not a threat to them. If you truly look at the science and care about it as you say, you also will agree that is not a threat to our K-12 students. If the COVID vaccine is added to the school immunization list, we will be pulling our 3 children from public education. I volunteer in the schools and am involved in many levels of PTSA. I believe in public education and love the staff and students in our district. However this is a very clear line I draw. No required COVID vaccines for K-12.

Respectfully,

Sandra Wolfe

Children are at extremely low risk of dying from Covid 19. They are at high risk of dying from the Covid 19 vaccine. Don't believe the media. Look at VAERS.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

\*

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

I am a parent/mother for three kids in the tacoma school district, ranging from high school to elementary.

I am very against making the covid vaccine apart of the mandatory vaccines in order to attend public school. My kids enjoy going to school to learn, play sports and most of all have that interaction with their friends. I will pull my children from public school in a heartbeat if this goes through.

People should not be forced into vaccination, testing, internment camps. This rings of Nazi-ism. The Nuremberg Code applies to every single individual including government officials who would ratify such a law. This is government overreach. More people die of Opioids, the flu, tuberculosis, smoking, heart disease than the what we have now, yet, public health is not doing POSITIVE empowering actions to ensure the health of its people: making sure they have healthy food, banning toxic chemicals and food, banning smoking, paying for nutrition and health counseling. The world is no "safer" from masking, lockdowns, and vaccinations as is evident from your public health "numbers". The burden of proof isn't there to enact such controlling laws. This is not Nazi Germany. Now that Pfizer's raw data has been released to the public following a court order (at least the first 6 months of data of their trials), it is clear that these shots do more harm than good and that children are at very high risk of adverse events, permanent disability and death. They should NOT be mandatory for anyone. This is still an experimental vaccine. Every member of public health and those in government needs to review this data (which is very easy to do at [www.canadiancovidcarealliance.org](http://www.canadiancovidcarealliance.org) - an excellent summary) BEFORE January 12th. If you do not take the time to look at this data before rendering your decision, it would appear that you have a vested interest in ignoring it. Do the right thing. History will remember you. Dr. Kan

Good Morning,

I'm writing to demand that you not require covid vaccinations as mandatory for school entry. This is further immoral encroachment on parents and individual rights and it must stop.

Also, with regards to discussion of WAC 246-100 as listed in the agenda; while I'm unaware of the context of this discussion, I implore you to not consider encouraging it for required detention or quarantine. The fact that this is even potentially being considered is insane.

I absolutely stand against mandating vaccines for children. They are still under emergency use and not enough data has been collected as to the safety of these vaccines for children. This virus is survivable by 99% of the population and manageable of treatment is started early. Now we are seeing that a huge percentage of our population (up to 25%) is sick with Covid-19, including vaccinated individuals. Vaccines do not prevent one from catching or spreading this disease. And further boosters could cause further harm to adults and children. You do not have the right to force vaccines on people! This is not about health and safety; it's about control. This is about the rights of citizens! You must REJECT requiring children to be vaccinated!!! Respectfully yours,  
Sloane Rogers

Dear Washington State Department of Health Staff,

We are very much against the covid vaccinations for children. Our son had normal vaccinations through his childhood and did fine but the one he got a few years ago he had a severe reaction to it and he was 12 years at the time. He ended up with jerks and ticks for a few months and we thought he may have this forever but before that he was a typical healthy boy with no physical issues. We prayed for him continually and eventually he came out of it and very thankful but it's very possible the vaccine could have ended normal life for us and our child. We also had him get the flu shot that year and he ended up severely sick for about a week with the fever and throwing up and before that he had never been sick since we had adopted him when he was 7. We also had a friend's daughter who also got a vaccination in her teens and she reacted severely from that and was in a daze and high fever for a few weeks. They went to their primary doctor to tell them about her reaction the very next day and he told them that it couldn't be from the vaccination even though she was completely fine and healthy the day before but the very next day after her vaccination she is having a severe reaction from it and he says it couldn't be from the vaccination. We don't believe that. They ended up taking her to an alternative doctor and he was able to help her. She had her usual shots through childhood and did fine but this last one was too much for her system and since this covid vaccination is still experimental it's scary to think what it's going to do to children. The shots both our kids have had were FDA approved and these covid shots are still experimental so we don't know how kids are going to react.

We beg of you, not to mandate these shots to kids as kids aren't dying from covid but if you force them to have the vaccination and they die or have severe injuries from them then that responsibility lands on you and that guilt and possible deaths will be on your hands.

Sincerely,  
Scott & Lori

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: [www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using

predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report. Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a

very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

To Whom It May Concern,

This comment is directed at the proposed agenda item for adding a COVID 19 vaccination requirement to attend public school.

We as parents are strongly opposed to this and if it is mandatory, our two daughters along with many others will leave the public school system.

Children are not at risk from COVID, nor should they be subjected to a vaccine that has absolutely no long term research.

I urge you to consider these things when making a mandatory, one size fits all decision for the children of our state.

Thank you,

WSB OH Board,

Citizens rights are being stripped before our very eyes. The covid vaccines have been shown in multiple studies to have negative impacts in adults already in a variety of different ways. It has not been around long enough or tested properly to see what some of these negative long term effects are. With children's body's changing and growing these effects could be even worse. Our children should not be used as guinea pigs. These vaccines go against many citizens religious and political beliefs as well. This is an abuse of power and everything that our great country once stood against. If people volunteer to get vaccinated then that is great, but it should never be mandatory! Thank you for taking the time to read this and hopefully allow parents to decide what would be best for our children.

Thank you,  
Ty Taylor

For 1...it is against the law to require or coerce someone to take a vaccination. This is exactly why the Nuremberg Code of Ethics was put in place. 2, as of Dec. 24th there have been over 1 million adverse effects reported in VAERS with over 20 thousand deaths. In the last 11 months there have been more adverse effects reported than in the previous 30 years of all other vaccines given. 3. Kids have a near 0% risk of death and with this a 0% chance of side effects from the Covid vaccine. 4. My kids will be pulled from the public school system should this get approved.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

- It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

## III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority.

- Under 51% of Spokane County residents are vaccinated. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>

)

- Less than 40% of kids 12-17 are vaccinated. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)

- Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>  
)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

- Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

- As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The covid vaccine is "EMERGENCY approved". It is NOT a true vaccine that when you get it you are protected from the virus.

The covid vaccine does NOT protect from GETTING covid. My wife and myself are vaccinated and got covid.

The covid vaccine does NOT protect from TRANSMITTING covid. I know vaccinated people getting covid from other vaccinated people.

Children and teenagers and even young adults have strong immune systems and almost all of them can battle the virus on their own and will develop good antibodies and be better off without "the vaccine".

It is unconstitutional to make this mandatory to any and all the people, it should be each individual's own choice.

Please don't make this mandatory and, stop ruining people's lives.

Thanks.

I strongly oppose adding a COVID-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The vaccine is not recommended for children as they have a nearly zero risk of infection.

I also strongly oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. As American citizens we have the God given right to decide what we inject into our bodies and the bodies of our children.

This is an egregious overreach of government power and will set a very dangerous precedent for the freedom of the people moving forward.

This virus and vaccine need more time to be studied to assure there are no serious long term adverse reactions as the current adverse reactions are quite alarming.

Thank you in advance for your time and consideration.

Subject: Covid Experimental Vaccinations - January 12th meeting

External Email

Sir or Ma'am,

This is in reference to The Washington State Board of Health (WSBOH) will be taking comments regarding proposals being considered at their January 12th meeting.

Children should not be mandated to take the Covid Experimental Vaccinations.  
Everyone in general should not be mandated to take the Covid Experimental Vaccinations.

Quarantines and lockdowns have proven ineffective against Covid19.

I want to remind you that:

Children are at extremely low risk for Covid  
The vaccines are still only EUA (emergency use authorized)  
There are no long-term studies to document any history of safety  
Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,  
The vaccine apparently does not stop the spread of the disease

Respectfully,

Wesley Steinbrink

I am writing to say NO, to adding any covid injections to the childhood vaccination schedule .The Childhood population is NOT in danger from dying Covid19, and its unethical to add an experimental shot to the list, when it hasn't completed all the safety studies. NONE of the current experimental drugs are stopping Covid19 in ANY way. Until phase 3 trials are legitimately completed, there shouldn't even be this discussion. Less than 750 children in the USA have succumbed to Covid19 since Jan 2020 and most that did had multiple comorbidities. Out of 78 million under the age of 18, that is NO justifiable reason to use that population as test subjects, when you have NO data on the long term health impact and risks to those youth and issues that may not show up until well into adulthood. Children's health and well being futures are at stake, please do NOT add an experimental drug to their already complicated lives. DO NO HARM. regards, Kelly Randall

Board Members:

Thank you for allowing me, parents and the community your time in hearing our thoughts and concerns.

WAC 246-105 Adding Covid-19 vaccine to required vaccines for school entry and childcare - CON

Per the CDC December 16, 2021 update on Omicron Variant:

\* As the Covid-19 virus evolves into different variants the Covid-19 vaccine's effectiveness lessens. At 10 week after vaccination the Covid-19 vaccine wanes to 35% effectiveness with Omicron (vs 64% for Delta). Will our children have to get 3+ vaccines per year as we chase these variants?

\* The variants continue to have a reduction in severity. Our children have been at a very low risk of hospitalization or death the duration of this pandemic.

\* 79% of Omicron cases are fully vaccinated.

The CDC Further States:

\* The Covid-19 vaccine may prevent serious illness not prevention of infection.

What about children who have had Covid-19 or a variant and have natural immunity. An Israeli study shows that natural immunity is 7x more effective than the vaccine.

It is very clear that children are a very low risk of spreading infection, becoming ill or

dying. (several published studies [www.ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov)  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.ncbi.nlm.nih.gov%2F>  
>). Our children are more at risk of vaccine injury than they are of hospitalization or death  
from Covid-19 or any variant. We are sacrificing our children for fear of maybe getting  
sick or dying from a virus that is looking more like the common cold as it evolves. @Rest  
in Peace 13-year old Jacob Clynick who died 3 days after his second Pfizer shot @ Maddy  
de Garay a 13-year old who suffered debilitating injuries during Pfizer trial.

\* LINK TO VEARS SHOWING ADVERSE CASE OUTCOME FROM COVID-19 VACCINE  
BY AGE: <https://www.medalerts.org/vaersdb/findfield.php>  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%2F)

Parents, providers and school boards have all shown that we do not want to vaccinate  
our children with a vaccine that wanes - for a virus that continues to have a reduction in  
severity - for a virus that is not a threat to our children. It does not make sense for the  
health of our children to add a vaccine mandate for an evolving virus that is looking more  
like the common cold.

WAC 246-100 Allowing health officials to use law enforcement....to detain a  
person...following refusal to comply with medical examinations, testing, treatment,  
counseling and vaccination - CON

I have no words. Disbelief. Are we in America? Where are we headed? Is this truly going  
to make us more safe? Image where this could lead.

Regards,

Lesla Russell

Subject: WAC 246-105

External Email

Hello,

I'm reaching out to express my concern about an issue being discussed on Jan 12th. The issue is concerning including Covid-19 injections as part of school immunization requirements using WAC 246-105.

From my perspective this seems like a very inappropriate step that is being pushed by political perspective rather than actual science. Covid has been around for a few years now so a large percentage of the population has either already got the virus naturally, have gotten the vaccine, and oftentimes both. This helps support an argument being made claiming pushing the vaccine further is not necessary.

Regarding children in schools it becomes even less necessary. Children have extremely low risk of any serious effect from this virus and should not be subjected to a vaccine that their parents don't want them to take. In my opinion it is just as silly for a parent to get their child a vaccine as it is for an elderly person to not get the vaccine- both sides are making political decisions and not scientific ones based on actual risk factors.

I also believe it is important as Americans to generally avoid mandates or laws that inhibit our freedoms so long as the cost of said freedoms aren't significant. I think we all know that Covid does not pose a significant danger to the general public and it is time we move on to a common sense approach that we learned in grade school- if your sick, stay home and make contact with as few people as possible.

Respectfully,  
Spencer Kariniemi  
Snohomish County Resident

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates, PERIOD. The science does NOT support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals. Children are statistically at ZERO risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. ([www.fda.gov/media/151710/download...the](http://www.fda.gov/media/151710/download...the)  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710>  
required studies on children will not even be completed until May 31, 2027!!!!!! And that is only one of the required pediatric assessments!) There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed. STOP USING OUR CHILDREN AS TEST SUBJECTS!!!

Sincerely,

Marie Sketchley

To: DOH WSBOH  
Cc:  
Subject: vaccine requirement for schools in WA

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

looking at the risk/ reward for school age population and covid it is seen they are NOT at risk from the virus but the EUA covid vaccine has put children in wheelchairs with neurological injuries- well documented but this incidences do not make the news because it is an inconvenient truth. Also there are ways to support the health of children (indeed all)before contracting and during viral disease that does not include giving an experimental injection. I believe we have to learn to trust our God given body defenses as well as learn to eat, live properly, these will guide our children to well being through out their lives. Thank you for listening and making the intelligent decision on the children behalf- they are counting on you fearlessly. A vote against mandatory vaccination for school children is putting trust in the innate wisdom of our bodies not Big Pharma with their own agenda. Again please consider the RISKS/REWARDS to our children our future.

---

Sent: 1/7/2022 10:50:52 AM  
To: DOH WSBOH  
Subject: Agenda items #8 and #11

External Email

To the Washington State Board of Health:

I am hereby voicing my opposition to agenda item #8, the formation of a technical advisory group to review information regarding COVID 19 shots for consideration of mandating these shots for school.

COVID 19 does not pose a danger to school aged children and adolescents. The injections for COVID 19 are authorised only for emergency use, and no such emergency exists for this age group.

On the other hand, there is significant risk of injury to children, adolescents and young adults resulting from these shots. Further, the long term impact to immune, cardiovascular and reproductive health is currently unknown.

Therefore the parents (who must bear any burden of harm to their children) must be allowed to choose on their behalf.

I am also writing to voice my support for agenda item #11, the Informed Choice of Washington petition for rule making, establishing a rule prohibiting the inclusion to the school required list any Emergency Use Authorized product, or any product which lacks completed phase 3 trial studies.

Sincerely,

Sharon D Scott  
Lifelong Washington State resident and concerned citizen

My Scientific background taught me how to read the scientific public publications and separate science fact from science fiction, and there is not science fact that justifies harming our children with life-threatening EUA medical treatments, especially those that require fully informed uncoerced consent, which is NEVER provided. Furthermore, because there exists safe and effective alternative treatments, the EUA is illegal. Also, Dr. David Martin, PhD has documented the criminal conspiracy behind all of this at [fullyliveacademy.com](http://fullyliveacademy.com) on the Attorney General tab that makes it perfectly clear that the principles at FDA, CDC, NIAID, MODERNA, & FIZER are not only involved in a criminal conspiracy but fit the definition of Domestic Terrorists under 18 USC section 2331, subsection 802 Acts of Domestic Terrorism resulting in death of American Citizens. Check

out his indictment, and if you can FACTUALLY refute any of it, please do so publicly.

All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you  
From a mother of 3 school aged children  
Stacey Howard

Using WAC 246-100 to involuntarily detain people or families for refusing to comply with medical tests, treatment, or vaccination.

11.

Are you Pro or Con on the proposal?

2. Con

---

It is unethical to force people out of their own home and break up families to force them to take a vaccine they do not want. We are a free nation and with that comes the freedom to choose what goes into their body. Damaging children by removing them from their homes with police and potentially separating families will cause extensive damage to children and families. Find a different solution, focus on education verses totalitarian responses.

Because parents and their doctors, know when and how best take care of their children. Not not government or politicians who are subject to outside influences which are not always in the best interests of their constituents! Nevertheless, a "one sized fits all policy" is never realistic for something that should be best determined by individuals!

The vaccines, though approved for Emergency use are still under study for children, and must have informed consent. Per international law, and EUA from FDA, there are no long term studies completed. There is also no liability for drug companies if any adverse events. Will Washington state be liable for coercion for informed consent, and financially liable for adverse events? Current outbreak shows us that vaccinated people ARE getting sick, and still needing to quarantine, thus missing school. This proposal doesn't seem to have any benefit to limit the number of outbreaks or time missed from school. Should we not allow the studies be completed before we take the step of removing by coercion informed consent on a drug study? Children with no co morbidities are less likely to go to the hospital, but there is a definite increase in visits for otherwise healthy children post vaccination. Could we please complete the studies, and have better understanding of safety questions before we take away a parents right to informed consent.

I am opposed to making COVID-19 shot mandatory for school admission or childcare in our State for the following Reasons:

- 1: Nuremberg code
- 2: individual liberties and freedoms
- 3: Home schooling does not provide as much Societal diversity.
- 4: thalidomide
- 5: <1% COVID mortality
- 6: my neighbor legitimately died from taking the shot and left behind three beautiful children
- 7: Maddie de Garay
- 8: how many children died from the flu in 2018 compared to this entire pandemic.
- 9: how come groups of people that have 100% fulfilled the mandate still spread this virus the same as any other.
- 10: there is probably no one reading this and the decision has already been made so I will not waste my time and put 90 more reasons but if you are reading this I truly appreciate your time and consideration.

Please do not require our children to get the COVID vaccine. I have 4 children ages 5-12. They are all healthy and I am not in the least bit afraid of what would happen if and when they get COVID. It's likely they have already gotten it and we didn't even know, given how mild symptoms usually are in kids. I would much rather let nature do what it's designed to do and let them develop natural antibodies rather than the synthetic ones in the vaccine, which aren't nearly as effective.

This choice should be up to parents, not forced upon children. The mandates must stop.

I am writing to express my EXTREME opposition to requiring a COVID 19 vaccine requirement to attend any level of school in the State of Washington.

There is NO approved vaccine available in the US. Not ONE! Children are statistically at zero risk from death from Covid. There is NO long term data to support such a ridiculous requirement. The drug company is requesting 75 years to even publish data on the vaccines. The number of injuries and deaths reported in VAERS alone is staggering.

The thought that you would intentionally put our precious children at such a huge risk in the name of POLITICS is not only absurd, it is disgusting. Force vaccinating healthy children for a disease that does not statistically affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for ANY school age children.

Thank you

Subject: Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children!!

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

We can not mandate that children receive the Covid vaccine. This vaccine has more risk than benefit for a virus that is low risk for children. The vaccine does not prevent one from contracting Covid nor does it prevent one from spreading Covid. The vaccine has also been shown to have more adverse effects in those that have already had been exposed to Covid naturally.

To whom it may concern:

As healthcare providers we are opposed to ideas of forced quarantine and vaccine mandates for Covid-19. We oppose expanding authority for quarantine in WAC 246-100 Rulemaking.

We also oppose making Covid-19 vaccines part of the school vaccine schedule. When studies show children do quite well if infected, we believe parents should have the right to choose what is best in this regard related to their children. We don't need to pander to fear others may be experiencing regarding such. We don't need an overreach into parents' personal choices with their children when there ARE vaccine injuries and complications documented.

Thank you,

Sheila and Steve Settle

RN, healthcare professional

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The plan to give health officers power to enlist law enforcement to detain and incarcerate people if they refuse to voluntarily comply with requests for medical exams, testing, treatment, counseling, or vaccination. (WAC-246-100) Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

11.

Are you Pro or Con on the proposal?

2. Con

---

I OPPOSE the proposed policies that would allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). I protest the inclusion of Covid 19 vaccinations as a requirement for school immunizations. It is impossible for a law that violates the Consitution to be valid. All laws which are repugnant to the Constitution are null and void. Marbury vs. Madison 5 US (2 Cranch) 137, 174, 176 (1803) Unlawful police detention without legal justification restricts a person's freedom to leave and constitutes a civil rights violation based on the Fourth Amendment. Police detention is a SEIZURE OF THE PERSON. If it is unreasonable, it violates the Fourth Amendment. If it violates the Fourth Amendment, it is unlawful. DO NOT APPROVE THIS PROPOSED WAC CHANGE - let us be free citizens of Washington state who maintain agency over our bodies, choices, and places of residence. Please remember You work for ALL Washington citizens. We are your employers. You do not get to decide for us in these matters. Thank you.

Subject: Proposed legislation

External Email

January 7, 2022

To Washington State Department of Health and anyone else concerned:

I am writing in Regards to Proposed Legislation WAC 246-100-070, WAC 246-100-045, 246-100-040, WAC 246-100 and WAC 246-105.

As a long-time resident of Washington State and a mother, I DO NOT agree with these propositions. I do not consent to our government dictating personal medical choices and locking up citizens. This is unconstitutional overreach. Our forefathers would never have tolerated this type of legislation! America was founded on the premise of personal freedom. As Benjamin Franklin wisely coined, "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety." This is America, land of the free and home of the brave! We do not consent to this intrusion into our private lives. What about those with medical conditions? Are they now to be locked up in a quarantine facility because they would die from an experimental medical procedure? What has happened to our country that this is even considered?

I believe these proposed laws are unconstitutional and violate the 4th amendment:

Amendment IV

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing

the place to be searched, and the persons or things to be seized.

Remember that whatever you do DOES NOT SUPERSEDE the United States Code. You can and will be held accountable by We the People!

Title 18 of the United States Code, Sections 241 and 242 criminalize conspiracy against rights and the deprivation of rights under color of law. In other words, they make it a criminal offense for public officials to go beyond the limits of their authority to strip away the public's rights. The law applies to police, judges, elected officials, and yes, public health officials as well as health care providers at public facilities.

Please also leave our children alone! Whether a parent chooses to vaccinate their children is a personal choice. All should be free to decide either TO get it or NOT to get it. I am OPPOSED to making COVID-19 vaccination mandatory for schools or childcare in our State. There are studies that show both vaccinated and unvaccinated can and do get and transmit COVID. And there are studies showing harm and death from the vaccine, as well as no long term safety studies so far. Children are also EXTREMELY low risk for dying from COVID. This should be a personal choice up to each family and parent. The vaccines have been proven to cause death. No one should be forced or coerced to take something that might kill them!

Please do not pass these laws and bring disgrace upon our nation, a world leader for its founding principles of freedom. Let us remember that "all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." And when we read the Declaration of Independence further, we see that when our government attempts to make laws that are destructive to personal freedoms such as bodily integrity and informed consent, then "it is right of the people to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness." Please remember our history and do not pass these horrendous laws in Washington State!

Thank you for your consideration of my request.

Sincerely,

Trena Gimmaka

I believe that parental rights must be always protected and defended! Parents know what is best for their children's health. Parents must be respected in their choice in vaccinations. Parents must be given the freedom to defend their religious, conscience, medical privacy and moral rights. I strongly oppose ever using force to detain anyone who refuses to take medications, vaccines or anything thing goes against the rights listed above! We must strongly consider the freedom of all our citizens! We MUST RESPECT ALL! It is time to unite in love whether vaccinated be or not! Another issue w regards to detainment is SAFETY WITHIN THESE FACILITIES! As a victim of assault as a patient in the hospital, I know far too well this danger!! Never would I wish to put anyone in this kind of danger! What about their adequate medical, mental, emotional care? What about existing health condition! Allergies,? Sadly, our excellent medical health personnel have either quit over existing mandates or have quit due to lack of support! Many friends are doctors and registered nurses, they will attest to this sad truth!! What we NEED IS GOOD, HONEST DIRECTIVES! STAY HOME IS HAVE EVEN SLIGHTEST COLD, FLU SYMPTOMS, WASH HANDS APPROPRIATELY! Eat healthy, take good vitamins and respect, love each other!!! I sincerely hope wise, ethical decisions will be made in these issues and all in the health and dignity of all citizens of Washington State! Thank you for "hearing" my heartfelt pleas!

I am voicing my rejection of both of these policies that are being discussed. You would be taking resources from the local police, which are probably short staff already because of this states mandate to get the shot and lost staff. Also shouldn't it be between a person and their doctor to decide who should be quarantined or not?

It should be the parent's decision if their child should have the Covid19 shot, not a school district. The Covid 19 shot is different than smallpox or the MMR shots. It does not stop you from getting it, just not as severe.

Since I just saw this the evening before and need to send an email to voice my rejection quickly, I am sure later on I could find more reasons why not to approve of these policies. What came to mind right away though is here are more freedoms being taken away and more of peoples lives being controlled by government or a government agency.

Thank you for letting me voice my rejection to these policies.

Sherry Colgan

I say no to government mandating or forcing our children to get vaccinated for anything. Government has limited power. Mostly it has only the power over its people that the people themselves give it. We are a free society and I do not wish to give the government that power.

Forced health decisions are not a history in our country. I have worked in schools systems for years and the common flu vaccination is something that tracked for immunization records, but had never been mandated or forced upon our children. Even vaccinations that took DECADES of research to bring to market are not forced upon our children. Our children are not high risk and have a tremendous survival rate against covid 19. This immunization has the highest complication and fatality rate of any vaccination to date and in the shortest amount of time. This vaccine is not a one size fits all and it is alarming to not take into account that it puts so many at risk to take it. This possible mandate is unjust, and against our constitutional rights the right to health freedom, the right to my body, my choice. My child's body, my choice, for their well being and best interest. This virus has the survival stronger than the coming flu, and you want to make children have to take a vaccine that is new and rushed to market with higher complication odds so they can attend school? Public education for our children and this vaccine is not about health. It is about power and pushing an agenda from a political party for power. This is not safe for our children. The safe place for our children is in schools, with the support and environment that was pre-COVID. One where the government didn't infringe upon one of our health rights, and where school was a place for our children to learn and be safe. Not a place for the government to take those freedoms from families through tactics of fear driven tactics. Our kids need to stop hearing a "new norm" and be given back their childhoods without a forced poke. Let herd immunity do what it has done for ages. Build itself. I feel very strongly that this should be left to each individual and family as a choice, just as the flu vaccine and that our schools and children should be left out of it.

Dr. Reiner Füllmich

The findings of the German Investigative Committee are entirely in line with the findings of the French Army Reserve Officers' Investigative Report on the Covid-19 pandemic and its relationship to SARS-COV-2 and Other Factors:

English: PDF

French: RAPPORT D'ENQUETE D'UN GROUPE D'OFFICIERS DE RESERVE SUR LA PANDEMIE DE COVID-19 - mise A jour le 13 mai 2020: PDF

Livestream on the translation of the French report: [here](#)

Summary

The German Corona Investigative Committee has taken testimony from a large number of international scientists and experts since July 10, 2020. Their conclusions are the following:

The corona crisis must be renamed the "Corona Scandal"

It is:

- The biggest tort case ever
- The greatest crime against humanity ever committed

Those responsible must be:

- Criminally prosecuted for crimes against humanity
- Sued for civil damages

Deaths

- There is no excess mortality in any country
- Corona virus mortality equals seasonal flu
- 94% of deaths in Bergamo were caused by transferring sick patients to nursing homes where they infected old people with weak immune systems
- Doctors and hospitals worldwide were paid to declare deceased victims of Covid-19
- Autopsies showed:

§ Fatalities almost all caused by serious pre-existing conditions

§ Almost all deaths were very old people

- Sweden (no lockdown) and Britain (strict lockdown) have comparable disease and mortality statistics
- US states with and without lockdowns have comparable disease and mortality statistics

Health

- Hospitals remain empty and some face bankruptcy
- Populations have T-cell immunity from previous influenza waves
- Herd immunity needs only 15-25% population infection and is already achieved
- Only when a person has symptoms can an infection be contagious

Tests:

- Many scientists call this a PCR-test pandemic, not a corona pandemic
- Very healthy and non-infectious people may test positive
- Likelihood of false-positives is 89-94% or near certainty
- Prof. Drosten developed his PCR test from an old SARS virus without ever having seen the real Wuhan virus from China
- The PCR test is not based on scientific facts with respect to infections
- PCR tests are useless for the detection of infections
- A positive PCR test does not mean an infection is present or that an intact virus has been found
- Amplification of samples over 35 cycles is unreliable but WHO recommended 45 cycles

Illegality:

- The German government locked down, imposed social-distancing/ mask-wearing on the basis of a single opinion
- The lockdown was imposed when the virus was already retreating
- The lockdowns were based on non-existent infections
- Former president of the German federal constitutional court doubted the constitutionality of the corona measures
- Former UK supreme court judge Lord Sumption concluded there was no factual basis for panic and no legal basis for corona measures
- German RKI (CDC equivalent) recommended no autopsies be performed
- Corona measures have no sufficient factual or legal basis, are unconstitutional and must be repealed immediately
- No serious scientist gives any validity to the infamous Neil Ferguson's false computer

models warning of millions of deaths

- Mainstream media completely failed to report the true facts of the so-called pandemic
- Democracy is in danger of being replaced by fascist totalitarian models
- Drosten (of PCR test), Tedros of WHO, and others have committed crimes against humanity as defined in the International Criminal Code
- Politicians can avoid going down with the charlatans and criminals by starting the long overdue public scientific discussion

Conspiracy:

- Politicians and mainstream media deliberately drove populations to panic
- Children were calculatedly made to feel responsible "for the painful tortured death of their parents and grandparents if they do not follow Corona rules"
- The hopeless PCR test is used to create fear and not to diagnose
- There can be no talk of a second wave

Injury and damage:

- Evidence of gigantic health and economic damage to populations
- Anti-corona measures have:

§ Killed innumerable people

§ Destroyed countless companies and individuals worldwide

- Children are being taken away from their parents
- Children are traumatized en masse
- Bankruptcies are expected in small- and medium-sized businesses

Redress:

- A class action lawsuit must be filed in the USA or Canada, with all affected parties worldwide having the opportunity to join
- Companies and self-employed people must be compensated for damages

I am against this vaccination being required. First off children are at extremely low risk of for covid and the vaccines are still on emergency use authorization. My own grandchildren caught covid and were only sick 24-36 hours. Even being sick they had less worrisome symptoms then when they catch a cold.

Thank you, Virginia McManus

I am 100% against mandating this "vaccine" for children to attend school. The "vaccine" does not stop the spread nor prevent anyone from getting covid. All it does is lessen one's symptoms, but even that is debatable. Covid barely has any effect on children and this is just ludicrous that this is even being considered. I will pull my 4 children from public school if this becomes mandated.

I am writing to let you know I strongly oppose the government overreach in the following proposed policies. Do not mask our children in school, do not require mandatory vaccinations for COVID for adults or children, and do not add COVID to the possible conditions for which detainment at quarantine facilities could be required.

>

> • I oppose allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

>

> • I oppose including the Covid-19 injections as part of school immunization requirements using WAC 246-100.

I find the proposals to be a gross overreach of the states powers and frankly immoral. The state seems to have forgotten that we live in a country that is founded on certain freedoms and in alienable rights, and though I have loved Washington for decades I am beyond ashamed by the leader ship and people doing horrible things in the "name of good", Before moving forward or even considering any of these measures, it would seem and has been confirmed by the CDC, that vaccinated and unvaccinated can both be infected and spread the virus. It is also true that children are at a very low risk and young boys are particularly at risk for myocarditis. In fact they are at greater risk of myocarditis and dying from the vaccine than from natural Covid infection. The Omicron variant may be spreading quickly but as of mid December there were two deaths in the entire world. People have the right to make decisions for themselves without fear and intimidation. When is in history has discrimination or putting people in camps, in Nazi Germany or in the US with the Japanese internment camps, when has that ever proven to be the right decision? It's against everything that is good. I would ask each of you as to whether you are okay with such policies being applied unilaterally. Whether you would trust the independent discretion of an individual unknown to you to make determination about the freedoms and decisions a loved one of yours might make. Every one of us knows someone that we love that has chosen not to be vaccinated. We may disagree, but I hope we would not wish them harm. It's very easy to make decisions when it's not personal, but imagine it being your child or parent, your best friend since childhood, your pastor, your nephew. Finally, consider this. One of my closest friends has Covid right now, as does her daughter. All four family members are vaccinated. But because of state law, her son is able to go to school while living with two infected individuals. He could test positive today or tomorrow but state policy allows him to go to school and their independent judgment as a family supports it. Ironically, I know another family, whom are all unvaccinated. When one parent got covid this summer, they willingly chose to all quarantine. No one else became infected in that family. In which circumstance was the opportunity for community spread? Also, given that we know people can be asymptotic, which family exercised better judgment? I pray to God that He will intervene and block this tyrannical agenda, and should it proceed forward, we will leave the state. For those of you that may vote against these policies I pray for your courage and conviction.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, Rosanna Liliequist. Renton Wa

To the members of the Washington State Board of Health

I would like to go on record as strongly opposing any mandatory vaccination requirement for PK-12 children to attend school in Washington. I based my objection on several factors:

- 1) The doses of COVID vaccine being administered in Washington remain only those provided under FDA EUA guidelines and are, as such, still experimental. Parent alone need to have the final say over whether their children are exposed to experimental medicine.
- 2) The death rate of those 19 years of age and under from COVID is 0.003 percent. Cancer and heart disease are far more prevalent in terms of disease-related death, as are overdoses and homicides. Also, statistical information shows children of this age are not prone to severe illness from COVID and even less so as the variants seem to weaken.
- 3) There have been studies and reports linking the vaccines with myocarditis and pericarditis, especially in young boys. While rare, I think parents must be the ones who decide if they are comfortable with their child becoming this "rare" instance. I, for one, am not.
- 4) Vaccines are supposed to keep people from contracting and spreading a virus. These vaccines, while able to alleviate symptoms, do neither. Their long-term efficacy is also dubious, as we are now into our third shot. Israel is into its fourth. I don't believe there has been anywhere near enough study—not could there have been at this point—of the long-term health impacts of these shots on children.
- 5) Specifically related to WAC 246-105-055 philosophical and personal exemptions are not allowed for MMR vaccinations, but not such ban is in place for the other mandated vaccinations under subsection -030: chickenpox, diphtheria, German measles, certain types of the flu, tetanus, hepatitis B, and whooping cough. I would ask that, at minimum, you would allow philosophical and personal, along with medical and religious exemptions to remain in place when it pertains to COVID vaccinations.

Thank you,

Robert Lowery

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I am absolutely opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

First, Fauci himself said the numbers are skewed. These are his comments:

Fauci continued, emphasis added. "And what we mean by that — if a child goes in the hospital, they automatically get tested for Covid. And they get counted as a Covid-hospitalized individual. When in fact, they may go in for a broken leg or appendicitis or something like that. So, it's over-counting the number of children who are, quote, 'hospitalized with Covid,' as opposed to because of Covid."

Next,

Growing evidence is showing that COVID-19 affects kids differently than adults.

Children experience lower infection rates, accounting for less than 10 percent of cases in the United States.

Infectious disease specialists say there are several factors that seem to protect children: immunity to seasonal coronaviruses, underdeveloped sinuses, and fewer chronic health conditions.

A new model from researchers in Israel found that kids are half as susceptible to COVID-19 compared to adults.

Source: <https://www.healthline.com/health-news/kids-are-half-as-likely-get-covid-19-as-adults-heres-what-we-know>

Next,

Vaccines clearly are not a "one-size-fits-all" fix to Covid-19 as numerous reports are showing. Antibodies are much better protection. Your attempt at forcing everyone to take the vaccine does not allow for religious exemptions, medical exemptions, or antibody creation in students who already have had Covid.

New York has much stricter requirements for vaccination than any other state in our nation yet they currently have the highest number of outbreaks.

Do not enforce a vaccine mandate on the people or youth of Washington State!

Sincerely,

Robert M. Pleas

I oppose WAC 246-100 Rule making that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. This vaccine insanity needs to stop because clearly it is not working. The majority of the people that I know who are getting sick with the virus are all vaccinated.

To Whom It may concern

I am writing today to express my deep deep concern for the direction our government is taking towards totalitarianism. This is a huge overreach of citizens' rights to bodily autonomy and the right to decide what is best for our children. With a survival rate of 99.99% there is no reason for these measures to be taken. Especially when it comes to our children and a parent's right, not the government, to decide what health and safety measures they will take. Also, the wording is disturbing and intentionally, I feel, left vague about when people would be released from this concentration, excuse me, quarantine camps. The wording would also imply that unless a person finally submits to receiving a STILL, as of this moment, experimental injection for the safety of others, which by the way is not my responsibility, is insane and reckless. I am only responsible for the safety of myself and my family. Neither is it the government's responsibility to keep me safe, and I am loathe to allow mere mortals to oversee such things. The old saying "power corrupts and absolute power corrupts absolutely" has never been made more evident than the start of this administration and the creation of a national crisis in the guise of a pandemic. My God given rights are being infringed upon in ways that have not been attempted in the history of this country when men feared God and therefore had morals and values that allowed every man to be free to do what he felt best. God numbered my days before even one came to be and before the foundations of the earth not man. He dictates when I die and when I live not the government or any human on this planet for that matter. Children are given to parents by God not by the government and it is the parent's job not the government to decide what is best for their child. We will have to answer to God not the government for how we raised our children on judgement day. You should all be ashamed of yourselves for even proposing such extreme and hostile measures on the population you swore to serve. There is clearly no fear of the God of heaven and your creator. I pray for all your sakes that you learn to fear God and repent from this evil scheme. Clearly none of you have learned your lessons from history or you have forgotten them. The more control governments exercise over their people the more oppressive and brutal that government becomes, and the more people will die. Far more than this plandemic has ever taken. I have a 90-year-old neighbor who is a Polish immigrant and she told me that this is feeling very much like Nazi Germany all over again and that she is glad that she will not live much longer. I hope you will heed her words and not go any further down this wicked and evil path of destruction.

Thank You,

Suzette Attinelli

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The severity of covid is an extremely low risk for children.
2. It would be very unwise to compel children to take a vaccine that is known to cause multiple negative side affects any much higher rate than the effects of the virus itself.
3. Empirical evidence now exists that shows the vaccinated and unvaccinated can both transmit covid; therefore the vaccine does not stop the spread of the disease and children should not be forced to get it.

Covid shots should absolutely not be a requirement for children. Children are at extremely low risk for COVID and vaccines are still only emergency use authorization. Parents need to make this decision not the government. If the government would let proven treatments/drugs to be used to treat COVID, there would be less of an issue and everyone would benefit.

Washington State Board member:

Please do not vote to enforce Covid vaccines for children at school. Children have a strong immune system and very high success rate. This goes against our constitution and parents desires for their children. For those that want it for their kids it's an option now. This should Never be forced on anyone. You will see people pulling their kids out of school so fast if this passes.

Also please vote no for allowing local health officers to use law enforcement to force an emergency order to involuntarily a person or group of people to be isolated in quarantine facility if refuse vaccine, or testing, treatment etc. we are human beings with free will. We live in a free country. We should not be forced to put anything in our bodies.

This needs to move to endemic status as this isn't going away. Vaccines aren't stopping this as people can still get Covid if vaccinated. Many from who I have seen are having a worse Covid experience after vaccination then the unvaccinated. Vaccines are not the answer. We need to learn to live with this. Our economy is affected enough, our mental health is affected enough, and our livelihood and health. Please vote no.

Michelle

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO (Emergency Use Only), and quite clearly not efficient or effective for stopping Covid, especially in children that are at a low risk of contracting or becoming seriously ill from the virus. The staggering data on VAERS supports this on the dangerous side effects resulting in permanent disability & even death after taking this experimental vaccine. The authorization infringes on our civil liberties of the people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time Mrs. Cassie Irwin (Mother)

I am against any ruling that would make vaccinations for the Covid-19 infections mandatory.

#1 Vaccines used for prevention of Covid-19 are still only under the EUA (emergency use authorization). There is little if any research indicating the vaccines are effective or safe, particularly for children.

#2 There appears to be growing evidence that vaccination is less effective than promised as shown by the number of hospitalized patients who have been "fully" vaccinated. Further, the number of vaccinations now being directed to protect people are increasing

#3 What is shown - children are at very low risk for Covid. This fact was disseminated through professional journals to care givers as early as April 2019.

#4 I have not seen any risk assessment metrics like what are developed for research review boards (IRBs). Thus, the risk of vaccination vs. any Covid risks has not been shown as to which model is safer, either near term or long term.

#5 Information released in the media for the past two years has been consistently rewritten, contradicting previous distributed information. If mandating vaccinations to children is the present way of thinking, then what will it be in six months or 20 years?

#6 A personal concern of mine based on historical facts - what will the next step be after mandating vaccination. Will there be Covid camps with implementation of mandates being accomplished by law enforcement agencies. All of this in the name of public health. Most states are not under such strict rules, so why are Washington's mandates of stricter measures needed.

#7 There is much information that the pharmaceutical industry is supportive of issues like this for the fabulous profits being made. Will the decisions made in this state be free from their lobbying?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: there has not been enough research and testing to see how these vaccines will impact children long-term. Also, with all the variants, how do you determine which shots and how many will be given. More time and research is needed before making a quick decision. Thank you. Stacey Meyer

I work in the healthcare field for hospice program. Rarely have we had patients since the beginning of covid pandemic actively dying of covid and certainly not a child. I do not feel it is up to our government to decide what vaccinations should be administered to our children. We choose the flu vaccine or vaccination for RSV which have resulted in more deaths. If these are options then this vaccine should be as well.

Tracy,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I'd strongly urge the members of the board in control of such an important decision to form their consensus based of the facts, logic and reasoning while using honesty, and fairness from an unbiased perspective to guide those decisions.

With great power comes great responsibility; Which is why it is crucial the members of the board make the right decision for the people and our children.

I understand that everyone has a different set of morals and values that guide how we each make our own decisions. Which is why it's important for you to really dive deep and ask yourself who you really are and determine if you are proud of who you are and what you as an individual are support and represent.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) ).

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Hailey Unland

Hello,

My understanding is that in this meeting the possibility for requiring COVID-19 vaccines for children to enter schools or child care will be weighed. I am writing to strongly oppose such a requirement. Studies show that children are at a very low risk of serious outcomes from COVID and the vaccines are still under EUA for many children. Studies are showing that vaccinated individuals still have a strong chance of infection of COVID, particularly with the Omicron variant, so the requirement benefits are unclear.

Sincerely,  
-Scott Schellenberger

We OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!

We SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

I beg you to not even consider making the covid vaccine mandatory for our children to attend school or do anything else. The risk of them dying from covid is very rare, but the risk of adverse effects from the vaccine is higher than the risk of dying from Covid for children. It has been obvious that the vaccine does not stop the spread of Covid. The research regarding the decreased in severity of Covid, decreased hospitalization, or dying from covid is based on faulty and questionable information.

The first thing is that the only true way to say that the vaccinated person has less severe disease than the unvaccinated could only be proven by having same person get Covid and then vaccinate them and them get Covid again to prove that vaccination decreased severity. However, even that is not a proof because perhaps the decreased severity with the vaccine may be to immune memory.

The fact that vaccinated can pass on the disease too does not protect those around them so it is not a social obligation.

Everyone responded differently to Covid so how do you know how that vaccinated body would have responded to the disease? The symptoms run from asymptomatic to deadly with little rhyme or reason for why. It is difficult therefore to determine if a vaccine actually works.

I personally know both vaccinated and unvaccinated that have gotten the disease, passed the disease, was hospitalized for the disease and died from the disease and there seems to be no difference as I observe. We, however, do not know the long term adverse effects that the vaccine will have on our children. As far as I can tell the only people who are benefitting is the vaccine companies who have no liability for what they are doing to people. Do not force parents to take their children from public school to protect their health by refusing the vaccine. STOP THE MADNESS

I am against any ruling that would make vaccinations for the Covid-19 infections mandatory.

#1 Vaccines used for prevention of Covid-19 are still only under the EUA (emergency use authorization). There is little if any substantiated (peer review) research indicating the vaccines are effective or safe, particularly for children.

#2 There appears to be growing evidence that vaccination is less effective than promised as shown by the number of hospitalized patients who have been "fully" vaccinated. Further, the number of vaccinations now being directed to protect people are increasing

#3 What is shown - children are at very low risk for Covid. This fact was disseminated through professional journals to care givers as early as April 2019.

#4 I have not seen any risk assessment metrics like what are developed for research review boards (IRBs). Thus, the risk of vaccination vs. any Covid risks has not been shown as to which model is safer, either near term or long term.

#5 Information released in the media for the past two years has been consistently rewritten, contradicting previously distributed information. If mandating vaccinations to children is the present way of thinking, then what will it be in six months or 20 years?

#6 A personal concern of mine based on historical facts - what will the next step be after mandating vaccination. Will there be Covid camps with implementation of mandates being accomplished by law enforcement agencies. All of this in the name of public health. Most states are not under such strict rules, so why are Washington's mandates of stricter measures needed.

#7 There is much information that the pharmaceutical industry is supportive of issues like this for the fabulous profits being made. Will the decisions made in this state be free from their lobbying?

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

In addition to these points it is becoming increasingly clear that the true value of the vaccine is keeping illness from point of death; however, in this age group the possibility of death from COVID is EXCEEDINGLY low (like ALMOST NON-EXISTENT). IF you are following the science, then this needs to remain consistent and the fact that this is even in a possibility in light of recent acknowledgements and recommendations by our government, medical agencies, and pro-vaccine doctors - WHY would this even be considered? Please reconsider this mandate and don't require unnecessary treatment of our children. I implore you to reconsider.

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health. There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19. Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

CBS Face the Nation December 26, 2021 In a roundtable discussion on "Face the Nation," CBS News correspondent Jan Crawford, said children, who have almost no risk of dying from COVID, have "sacrificed and suffered the most" from restrictive COVID measures. CBS News chief legal correspondent Jan Crawford on Dec. 26, 2021 appearance on "Face the Nation," Crawford slammed COVID policies, blaming them for a number of problems affecting children today, including the ongoing mental health crisis, increased suicide rates and learning disruptions due to school closures. Crawford said the risk of suicide attempts by girls is up 51%, while "black kids are twice as likely as white kids to die by suicide." "School closures, lockdowns, cancellation of sports — you couldn't even go on a playground in the D.C. area without cops scurrying, shooing the kids off [and it had a] tremendous negative impact on kids, and it's been an afterthought," Crawford said. Crawford said healthy teenagers have "a one-in-a-million chance" of catching and dying of COVID, noting they have a greater chance of dying in a car accident. "If our policies don't reflect a more measured and reasonable approach for our children, they will be paying for our generation's decisions, the rest of their lives," Crawford said. "And that, to me, is the greatest underreported story of the past year." Crawford's comments come shortly after U.S. Surgeon General Vivek Murthy in early December issued a 53-page advisory on the youth mental health crisis saying the COVID pandemic "dramatically altered young peoples' experiences at home, at school, and in the community."

Newsweek article 11/1/21 Schools are major transmission points for influenza, but not for COVID. While children do get infected, their risk for COVID death is minuscule, lower than their already low risk of dying from the flu. Throughout the 2020 spring wave, Sweden kept daycare and schools open for all its 1.8 million children ages 1 to 15, with no masks, testing or social distancing. The result? Zero COVID deaths: [chrome-extension://efaidnbmnnnibpcajpcgicfindmkaj/viewer.html?pdfurl=https%3A%2F%2Fwww.folkhalsomyndigheten.se/publikationer-och-material/efulltext/19-school-aged-children.pdf&clen=445881&chunk=true](https://efaidnbmnnnibpcajpcgicfindmkaj/viewer.html?pdfurl=https%3A%2F%2Fwww.folkhalsomyndigheten.se/publikationer-och-material/efulltext/19-school-aged-children.pdf&clen=445881&chunk=true) : among children and a COVID risk to teachers lower than the average of other professions. In fall 2020, most European countries followed suit, with similar results. Considering the devastating effects of school closures on children, Dr. Fauci's advocacy for school closures may be the single biggest mistake of his career. Speaking of Dr. Fauci During a segment with MSNBC's Ayman Mohyeldin on Wednesday, the director of the National Institute of Allergy and Infectious Diseases said that since every child is tested for Covid-19 when they go to the hospital for any reason, they get counted as being there "with Covid" if positive. "But the other important thing is that if you look at the children who are hospitalized, many of them are hospitalized with Covid as opposed to because of Covid," Fauci continued, emphasis added. "And what we mean by that — if a child goes in the hospital, they automatically get tested for Covid. And they get counted as a Covid-hospitalized individual. When in fact, they may go in for a broken leg or appendicitis or something like that. So, it's over-counting the number of children who are, quote, 'hospitalized with Covid,' as opposed to because of Covid."

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Shawn Cassidy

To be clear, I am not an anti vaxxer. I have four children, all of which are fully vaccinated against diseases that could kill them. Covid 19 is not killing our children. Most that have gotten it (if they show symptoms at all) merely have a cold. Mandating a vaccine that has no long term side effect studies is just absurd. We are heading into an endemic like the flu (which is not a mandated vaccine) and are gaining herd immunity. Please continue to make this vaccine an option for kids and not a mandate. We should have the right to choose what goes in our children's bodies as to what we feel best for their future health. Our children are much more likely to have adverse effects from the vaccine than the virus. Please, please do not require this vaccine in order for our kids to attend school.

To Whom It May Concern:

My name is Nicholas Hooge and I am the father of 3 small children. As a parent, I am abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic spike proteins the injection causes, resulting in possible permanent damage to my child's critical organs, such as the brain, nervous system, heart and blood vessels, reproductive system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. My wife will homeschool or we will move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Nicholas Hooge

1. Yes

---

WSBOH agenda for their upcoming meeting includes "Immunization Criteria for Child Care and School Entry." In other words, they will discuss making Covid-19 shots

mandatory for school admission and childcare in our state.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Covid Vaccines should not be required on children of any age. 1. children are at extremely low risk for Covid 2. Covid vaccines are still only EUA (emergency use authorized). 3. Covid vaccines haven't been around long enough to see long term side affects. 4. The CDC now says those vaccinated can still get Covid AND spread it. As a result the vaccine is not proven "effective" 5. Our body, our choice

Given the data available, a) Covid is no longer a significant health risk and b) children were never a risk. They rarely get severely sick and are not shown to pass it on. It is unknown the future physical affects these vaccines may cause. Covid does not pose a threat to the young and the healthy.

To Whom It May Concern,

I am here to opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely low risk for Covid
2. The vaccines are still only EUA (emergency use authorized)
3. There are no long-term studies to document any history of safety
4. Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
5. The vaccine apparently does not stop the spread of the disease

Thanks for your attention.

Thanks,  
W.S.

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Leave OUR children alone! No one decides what goes into our children's bodies but us Parents! PERIOD! END OF STORY!

Sincerely,  
Terra Kiens

Subject: No to experimental therapies or any other treatment being forced on children

External Email

I strongly support both parental rights and the right to privacy and choice between care providers and patients. I am strongly against experimental therapies linked to heart issues being redefined as "vaccines" - they are not sterile samples of the entire contagion viral body - and being forced upon children who are more at risk from these therapies than they are from the contagion the experimental therapies are meant to protect against. And with three shots quickly becoming four, and with breakthrough cases and spread of the disease among populations which have 100% undergone these therapies - sports clubs, schools, etc. - it is apparent the therapies have a very limited benefit while presenting a very real and documented danger of needlessly causing heart damage in children.

It should be between parents and doctors, period.

If these experimental therapies worked, you wouldn't need to worry about children who have had them being around children who haven't.

If these experimental therapies don't work, there is no reason to mandate them.

Either way, zero reason for a mandate given a free society.

Thanks!

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Karen Kane

---

There is absolutely no reason why there should be any quarantine site for Covid. This is not nazi Germany. Also, if you actually followed the science, the death rate for healthy people is not high. Most that die from Covid have underlying conditions that limit them from being able to fight. It is against our freedom to force us into quarantine camps and make us live like we haven't earned our right to freedom. Also, as a parent, I would never allow the government to choose what is right for my child's body. Kids are not dying from COVID, so why are we trying to make them get vaccinated to go to school? That is against what this country was founded on. Freedom. This isn't freedom, it is socialism I will not bow down to. My body, my right. Not a quarantine camp or a vaccine that still allows me to get the virus and spread it.

Hello!

I'm writing to you to please stop forcing the mandates for the Covid virus shot. As a American we as a nation are going backwards with these mandates! As Abraham Lincoln said, That this nation, under God, shall have a new birth of FREEDOM - and that government of the people, for the people, shall not perish from the Earth. The people are standing up and saying we DO NOT WANT THE MANDATES ON OUR CHILDREN AND FOR US! Enough is enough, if a person wants to get the Covid shot, that's their CHOICE! But DON'T FORCE OR DISCRIMINATE a human for their God given personal choice for choosing not to get the Covid shot! Especially when they can lose their job!!! As a state you are discriminating many citizens and now there is segregation where many citizens can not go to places. If that doesn't show HATRED then you have no compassion. This is not the USA land of the FREE if you continue this nonsense. And now you the Board of Washington Health want to have ALL children take this Covid shot! You have no right to put your personal decision on other citizens children!! Shame on you.  
Thank you for listening from a concerned Wa citizen, Gayle Morgan

---

I am writing to give feedback about the consideration of required vaccinations for children in Washington State. I am writing as a citizen, a teacher and a mother. Please do not add Covid-19 vaccine to the required list of vaccinations for children to attend school in Washington State. I know you have three criteria that you are considering in making this decision: vaccine effectiveness, disease burden and implementation. Regarding Vaccine Effectiveness: This vaccine is not proving to be effective, as seen by the many "break through" cases. Vaccines simply are not proving to stop the transmission or even stifle the transmission. More and more boosters are being suggested and sunseting as they are not proving effective in stopping the transmission. People are carriers of covid regardless of their vaccination status. Regarding Disease Burden: Children without co-morbidities have not suffered severe symptoms with covid, and the symptoms are lessening with the onset of Omicron. Children with co-morbidities should talk to their doctor, instead of having this vaccine mandated by the state for every child. Every medical treatment, medicine and vaccine has negative side effects for some. The risk of infection for children does not outweigh the risk of severe side effects that are being discovered with these vaccines. Implementation: Many parents view this as an affront to their parental choices. Implementing this will be difficult in many communities across the state. This will push more and more parents to opt to pull their children from public schools and further cripple the public education system. Let parents make their own decisions where their family is concerned. A required vaccine mandate is not right for our children.

Subject: Please say NO to vaccine mandates for school children

External Email

Dear Samantha:

Our children are our future. Please do NOT require Covid vaccines for children to attend school. They already have to have so many shots, and covid is not even a danger to nearly all children. Children are at extremely low risk for Covid. The risks definitely outweigh the benefits. Vaccines are STILL only EUA. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. Please, consider the preciousness of these children. They will be just fine... better than fine, actually, without the vaccine. Please vote NO! No Covid shots for children!!!

Thank you for listening.

---

An American citizens right is to do what they decide is best for their body and the State of Washington is trying to force the Covid 19 vaccine on not just adults but children as well. What happened to the 'my body, my choice' that was pushed so hard for? Is that not relevant now? Using law enforcement to detain people who refuse the vaccine is absolutely asinine and against everything this country has fought so hard for. Requiring a vaccine that is proven to not even protect the people that receive it is ridiculous and also shows that this isn't about the health and safety of our community, and more about the control of it. Our rights as citizens of this state and country are being infringed upon and nobody is stopping it. Wake up Washington!

External Email

I oppose a child vaccine mandate for school. Given the relative minor severity of illness in children for the vast majority of children, required vaccines goes above necessity. It also doesn't allow for kids that already have had COVID and thus have virus-acquired immunity.

Please do not require vaccines for children in public schools.

Suzanne Moss

Childrenb have strong immune systems. The current published data regarding low number of deaths or serious illnesses in children caused by Covid-19 does not validate "the shot" for all. Personal choice with appropriate parental guidance should be the established guideline.

I submit the following public comment to the Board of Health: A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 1. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. COMMENT: The vaccine has been directly available to every vulnerable sub-set of the population for some time. 2. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. COMMENT: It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. III. Implementation of the Criteria 1. The vaccine containing this antigen is acceptable to the medical community and the public. COMMENT: While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. 2. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable. COMMENT: Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking. 3. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. COMMENT: As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). \*\*\*\* Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that MUST be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves. I do NOT support this mandate under any circumstances.

I am writing to inform you that I absolutely and vehemently oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am also completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Covid 19 continues to disrupt our daily lives and be a financial burden to the public. And Omicron could affect virtually everyone across the globe, regardless of vaccination status, receipt of booster, or prior infection. There is accumulating evidence that while Omicron is clearly more transmissible & able to evade vaccines, booster, natural immunity & monoclonal antibodies - it is NOT more serious. As we see increases in child Omicron cases - the RATE of hospitalizations & death remain stable compared with prior strains. For children: ☐Hospitalization rates are still 0.8% ☐Death rates are still 0.01% (every death is one too many, but we need to know the numbers to make sound public health policy) ☐These numbers hold true for all strains (Omicron, Delta, Beta, Alpha) (<https://www.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/children-and-covid-19-state-level-data-report/> <https://covid.cdc.gov/covid-data-tracker/#mis-national-surveillance>) Data out of South Africa show that Omicron has LOWER hospitalization rates than Delta & Beta. Hospitalization rates were noted as follows: ☐Omicron: 38 per 1000 ☐Delta 101 per 1000 ☐Beta: 131 per 1000 (<https://www.nytimes.com/2021/12/14/world/africa/omicron-south-africa-study.html> A global meta-analysis of 77 studies found that 40-54% of people with SARS-CoV-2 infection are ASYMPTOMATIC. Which may be good or bad news depending on how you look at it. If you get infected with SARS-CoV-2, there's a 50/50 chance that you will have NO symptoms. (<https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2787098>) (Excerpts taken from Elisa Song, MD) Vaccination choice should remain with parents. Mandating a medical intervention that has emergency use authorization, where complete data has not been released, from a company that has no liability, for a condition that does not devastate children, is not only irresponsible, it's dangerous. Let parents and doctors make these decisions case by case and leave government out of medical decision making. Thank you, Dr. Stephanie Ferris

I'm an ASL sign language interpreter for Central Valley School District. If the vaccine was to prevent COVID or prevent the spread of COVID, I would go get everyone in my family vaccinated. But it does neither of those things!! If this new law is passed I will pull all three of my children from the school and home school them.

Hello,

I am writing this email in hopes that I can reach the correct people who are making decisions out side of their rights. I DO NOT believe that it is ok for you to decide what I put into my child's body!!!

That is not your decision to make and parents should not have to decide between putting an experimental vaccine into their child or to send them to public school. To say we cannot send our children to school without the vaccine....the school by the way that MY TAXES pay for is illegal and horrible.

Our children are not guinea pigs to be tested on. If I cannot send my child to school then there should be a law put into place so I can get out of paying the taxes on something I am not utilizing.

Please do not take a parents right to decided what is best for their child unless you are willing to come into our home and pay the consequences for what may happen to them. Kids need to be in school but they should not be forced to get an experimental vaccine!!!!

Thank you for listening and I hope you guys make the right choice. Washington state used to be the best place to live and now I am afraid many will be forced to leave because lawmakers think they have the right to make choices for us in what is supposed to be a FREE land!

Sincerely,  
A concerned tax payer that pays your paycheck!

The risk to children from Coronavirus per the CDC is less than their chance of being struck by lightning. The risk from the vaccine (pericarditis, other conditions) is unacceptably high. MUCH higher than the risk from Coronavirus.

These vaccinations are still only approved for emergency use and have not been given the proper amount of research, at least 5 years, to determine their efficiency. Children are NOT at risk for Covid. I can testify as a mother of 3 all my kids had it and it was less trouble than a typical cold. Please do not make these unnecessary vaccinations mandatory.

Subject: Fwd: Opposition to COVID 19 vaccine requirement for schools in Washington State

External Email

Dear health official,

I am writing to express my vehement opposition to any vaccine requirements for students in our state. Being a father of 2 school age boys, I am sincerely pleading for their safety. Please put your preconceived notions and politics aside and look at the facts.

The scientific evidence does not support the risk / benefit of COVID vaccine for males in this age group.

1. Risk of Myocarditis in young males is higher for vaccinated than for those who got COVID.

Ref. <https://www.nejm.org/doi/full/10.1056/NEJMc2115045>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056%2FNEJMc2115045>>

2. Vaccination does not prevent the spread of COVID to people in their household. In fact it barely reduces transmission relative to unvaccinated.

"We found that the secondary attack rate in fully vaccinated household contacts was high at 25%, but this value was lower than that of unvaccinated contacts (38%)."

Ref. [https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2FPIIS1473-3099\(21\)00648-4%2Ffulltext&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C80001c3f0e6345ddd14208d9d1f8e527%2F](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2FPIIS1473-3099(21)00648-4%2Ffulltext&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C80001c3f0e6345ddd14208d9d1f8e527%2F)

3. Risk of severe illness in children is basically non-existent.

"A total of 815 articles were identified. Eighteen studies with 1065 participants (444 patients were younger than 10 years, and 553 were aged 10 to 19 years) with confirmed SARS-CoV-2 infection were included in the final analysis. All articles reflected research performed in China, except for 1 clinical case in Singapore. Children at any age were mostly reported to have mild respiratory symptoms, namely fever, dry cough, and fatigue, or were asymptomatic. Bronchial thickening and ground-glass opacities were the main radiologic features, and these findings were also reported in asymptomatic patients. Among the included articles, there was only 1 case of severe COVID-19 infection, which occurred in a 13-month-old infant. No deaths were reported in children aged 0 to 9 years."

Ref. <https://pubmed.ncbi.nlm.nih.gov/33262177/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F33262177/>

4. All available vaccines are for emergency use authorization. For goodness sake please recognize the rules of law!

"WHAT IF I DECIDE NOT TO HAVE MY CHILD GET THE PFIZER-BIONTECH COVID19 VACCINE?"

Under the EUA, there is an option to accept or refuse receiving the vaccine. Should you decide for your child not to receive it, it will not change your child's standard medical care."

Ref. <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

I implore that you look at the facts objectively here and end this doom spiral of vaccine requirements. Eventually the courts will agree as well, and YOU will be held accountable.

In conclusion, humans are not cell phones or windows software that need to be upgraded every 2 weeks to deal with the latest virus threat.

Thank you.

I am absolutely OUTRAGED that this is even being considered. This is a violation of human rights and denying our children school if we choose not to give them a vaccine. I honestly don't even recognize the world that we are living in right now. Shame on you for even considering doing this to Washington's citizens & our children. Removing people involuntarily from their homes if they refuse to comply.... ARE YOU KIDDING ME! It's a slippery slope and where does it end? Did we not learn anything from WW2 and all the atrocities that happened? I am ABSOLUTELY 1000% AGAINST this & if you want a fight on your hands, you're gonna get one.

Regarding the covid vaccination for Washington state, it should not be forced on children or adults. It should be a choice not a mandate.

Sincerely

Julie Riveira, WA

1. Yes

---

Implementation of a mandatory inoculation for minors to attend school

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Masks and gloves can be removed after the incident, inoculations are permanent. The injections should be voluntary and NOT required as every life has a story. The STATE does not know what's best for each child over their parents! Parents rights matter! I am PRO-CHOICE in this matter. My body, My choice!

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Toni Miller

Covid shots should absolutely NOT be a requirement for school or childcare entry. Children are at extremely low risk for Covid and the vaccines are still only EUA (emergency use authorization) My daughter had an adverse reaction to a vaccine that resulted in hearing loss. It is not right of you to force the vaccine on ANYONE. We have no idea what the long term effect could be.

Subject: Proposed policy

External Email

Regarding the proposed policies for the upcoming meeting, I STRONGLY oppose them. To involuntarily detain people over something that has a 99% survival rate is unconstitutional and just not something that should even be considered, pure act of evil.... to mandate kids receive a vaccine that has high risks of myocarditis and teachers having to be taught signs of symptoms of cardiac arrest and yet actual Covid has less effects on them, is not right... it should be parent choice what happens to their children, they are the ones to birth them, raise them, feed them, etc.. they should be the ones to decide on vaccines...NOT THE GOVERNMENT!

NONE OF THIS IS OKAY. STOP THIS INSANITY NOW!

AGAINST THE PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: VOTE NO FOR COVID VACCINE SCHOOL REQUIREMENT

External Email

To Whom It May Concern:

My name is Christina Hooe and I am the mother of 3 small children. As a parent, I am abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic spike proteins the injection causes, resulting in possible permanent damage to my child's critical organs, such as the brain, nervous system, heart and blood vessels, reproductive system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. We will homeschool or move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Christina Hooge

Subject: TAG meeting proposals

Dear Committee members,

I listened to, and screen recorded, the first Zoom meeting that was held and heard the requirements for what was needed to say it was necessary for the Covid 19 shot to be "mandated" for children in schools. Before I begin, I should note that my children are fully vaccinated with the exception of the flu, HPV, Heb B, and Covid-19, so understand this is coming from a place of an extensive amount of time researching and learning, and the strong belief that parents, not the government, should have the say in what their children should put into their body. I know my children and their histories better than any agency or committee could ever know them, and my choices for them change as I learn new information over time.

Moving forward, the data in no way supports this being enforced, based on the criteria

you set in your first meeting, for multiple reasons, which I am sure you will all do your due diligence in reviewing, and actually look at hard data, not sensationalized headlines and "percentages" without actual numbers that make up those percentages. The committee should also be looking at the safety of the Covid 19 vaccine in relation to other vaccines, including-

1. Has it gone through the same rigorous approval process as other drugs? No.
2. Mandatory reporting of vaccine adverse events-including automating VAERS and VSD databases.
3. Ensuring all involved with Federal vaccine approvals and recommendations are free from conflicts of interest. - Those invested in approvals currently are not free from conflict of interest, including Mark McClellan who has ties with both the FDA and J&J. Scott Gottlieb, who has ties with both the FDA and Pfizer. Stephen Hahn, who has ties with both the FDA and Moderna. James C. Smith, who has ties with Reuters and Pfizer. Anthony Fauci, who is part of the NIH and has proven ties to the WIV. Even local schools and government agencies have benefited financially from money distributed by the federal government. These all create a conflict of interest. How are schools being compensated for enforcing the Covid 19 vaccination or even masking?
4. Support fully informed consent and individuals' rights to refuse vaccinations.
5. Recognizing that some are more susceptible to vaccine injury than others, and a one size fits all approach should never be made or enforced.

We also need to be diligent that a vaccine is being recommended by a company, Pfizer, that has paid the greatest amount of criminal fines in history.

I assume you will look at the reality that in two years of this pandemic, only 695 children aged 0-17 have died with Covid in the entire United States. Right now, during the current "surge", school was out! There is no evidence that children, even young adults, are spreading this virus or at any significant risk of even having Covid. Those that live in households with vulnerable populations, or teachers that do, can easily be accommodated through remote learning and teaching if they want to be, instead of expecting hundreds of thousands of children to be put at risk from being part of the clinical trial of this vaccine.

Knowing firsthand children and adults who were hospitalized or injured after receiving the covid shot, with heart issues, stroke, and even full-body paralysis shows the great risk with this shot. Our own family has issues with tachycardia and severe reactions to medications, and a child with FASD, that are at greater risk biologically in taking a vaccine in general, particularly one with little to no data, at least no data that shows it's risk is greater than the benefit. Children have an extremely small risk of serious infection, let alone death from the illness. Fauci himself has said the vast majority of kids coming to the hospitals with covid are just that- they test positive when they've gone to the hospital for another reason, they are there WITH covid, not because of it.

I recorded the hearing on whether or not to approve the shot for 5 to 12 year olds. The ratio was far higher of doctors saying it is unneeded, unnecessary, and premature. Did you watch any part of it? I'd like to know that the people making these life or death decisions have gathered all the info they possibly can. Here is one quote from those who spoke out against approving it...

Several members of the FDA's advisory panel pushed back on the agency's rush to clear Pfizer's vaccine for 5- to 11-year-olds.

"I'm just worried that if we say yes, that the states are going to mandate administration of this vaccine to children in order to go to school, and I do not agree with that," committee member Dr. Cody Meissner said. "I think that would be an error at this time until we get more information about the safety."

Temporary committee member Dr. James Hildreth said some estimates indicate that over 40% of all children nationwide have some form of immunity against Covid.

"It just seemed to me that in some ways we're vaccinating children to protect the adults when it should be the other way around," Hildreth said, adding that he supports vaccines

for high-risk children. "If 30 million children already have some form of immunity, they've made their contribution to herd immunity already and our focus should be to get the adults vaccinated to protect the children."

[illegible]

I will add, that even if this were shown to be 100% effective (not the 37% percent last noted), that it is still a violation of medical, Constitutional, religious, and personal freedom, for a government to mandate this in any form. Choice is central to autonomy and for a small group of people to come together to make a grand decision on behalf of an entire state, and using WACs (246-100-040; 246-100-045; 246-100-050 in particular) that are worded as a choice, when they are really coercion, to enforce said decisions, is at minimum unethical, and at a greater level, totalitarian and negligent. I ask if this committee is also willing to accept the full liability for any short-term and long-term effects this will have on others. If people are forced to "choose" school or a shot, that is not a choice. That is coercion, and I would hope that this committee would recognize the implications of that. None of you are physicians for those writing, and should not be acting as such. The schools, the government, the governor, and even the WA State Board of Health should not be acting as an individual's medical advisor. Even a doctor must provide informed consent before administering any procedure, medication, treatment, or surgery, and that is not happening in this situation. Does the board intend to go door to door and provide full informed consent to every single home that has a child that is being asked to take this shot? Physicians and pharmacies certainly are not doing so. Sitting in a car at a drive-through clinic, or for 15 minutes in a chair at the pharmacy, does not equal informed consent. Mandating anything be injected into someone else presumes that you know what is best for each individual, and violates Civil Rights laws, state and federal constitutional rights, and even RCWs, but also creates a police state when the WACS are weaponized against citizens. It is also creating a state of not only discrimination but segregation. I hope that this committee wants to be found to be on the right side of history when it comes to not ushering in a new era of segregation or being responsible for medical discrimination. Please be informed about the history of what has happened when government entities and agencies have begun to mandate medical inventions or rushed to use "vaccines" to treat people of things that already have little to no history of testing. The Anthrax vaccine for the military, the Tuskegee Project, Thalidomide, to name a few. There is a reason the Neurumberg Codes were created. It seems that history has already been forgotten when this discussion is being held to begin with.

Sincerely,  
Tammie Paul

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Thank you ,

Children should not be required to receive vaccination against covid 19 in order to attend any school or child care facility in the state of Washington, or any state. Statistically, children are at low risk of developing severe symptoms if they do, in fact contract the virus. It is also known that children who have been vaccinated against covid 19 may be at higher risk of adverse side effects from the drug. The risks may be higher than the benefits of this vaccine, which is still under emergency use authorization. The best interest of each child should be considered, rather than a mandate for all.

Subject: Upcoming Board Meeting Discussion

External Email

To the board:

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against expanding these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 that would empower the department to enforce widespread compliance for any vaccines, boosters, quarantine camps and any other measure that compel the public to act against their beliefs, religions or health care needs.

We know that vaccines do not stop transmission, masks are questionable, the vaccine's efficacies are questionable, people that have had COVID have higher immunity rates than vaccinated people, that survival of the disease is in the 98-99% range, and that children are particularly safer from this disease than adults, and only the most unhealthy and elderly of our population are the most susceptible to this disease.

You cannot continue to only choose to follow the science that fits the political agenda. That is not how science works. There are so many things wrong with how we are documenting and tracking this disease, there is no reason to believe any of the measures you are proposing would bring this pandemic to a quicker end.

To be clear, this is still America. This is not WWII when we had Japanese internment camps, or did you forget that we collectively decided that was wrong? We are not the Nazi government, or are you of the camp that believes THAT atrocity never happened? And we are not Australia where people have little recourse to fight this.

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I would also like to denounce involuntary detainment of people at quarantine sites, a completely draconian measure, and completely unnecessary.

Asking individuals to quarantine at home with COVID is perfectly understandable, and just as effective as putting people behind fences. We all know that there is something far more diabolical behind this measure than simply keeping others from COVID. I adjure you in the strong name of Jesus Christ to NOT follow through with this, because each one of you will be answering for this to the King of Kings and Lord of Lords, both in this life and the life to come.

Thank you for your kind attention to this email.

Subject: NO on including Covid-19 to WAC codes

External Email

January 6, 2021

Washington State Board of Health

The plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents is outrageous. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison facility for refusing the Covid vaccination. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason and thrown in jail.

Signed,

Kevin Mullen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The covid vaccine is not a true vaccine and the government has closed down and destroyed the many doctors and health workers who try to save us from vaccine injuries and deaths. Thousands of fully vaxed and boosted still get covid. Children are at very little risk; this has been proven over and over again by other country's child statistics. Covid is being used to cause herd fear and to ultimately control the people of a free nation: The United States of America! Show your intelligence and do not vote for this mandate. The already issued and enforced mandates have hurt businesses and medical personal.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child with covid.
- \* Mandates are not laws and every parent has the right to make medical decisions for their children.
- \* These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.
- \* Covid is spread by vaccinated and unvaccinated.

There are no valid grounds for mass shots for children!!!

Sincerely,  
Scott Farley

The Covid virus has very little effect on children. the covid vaccination is not necessary to protect children (as studies have shown), in in fact, poses a health threat to some children. the Covid Vaccine does not prevent getting the virus, or spreading the virus. it would be completely overkill to require this vaccine for children in school, and as a result, would cause thousands of children to be pulled from schools that will not get the vaccine. this would be terrible for the schools and most of all, the children.

Children are at low risk! Mine have all had COVID and been fine, no worse than a cold. The vaccines are still for emergency, there are no long term studies on them!! Clearly the vaccines and boosters are not working as everyone vaccinated person I know currently has COVID, or has had it. We can all still transmit Covid. I boldly disapprove of this mandate for school admission, for something so deadly that a person need a test to even know if they have it. Nonsense.

These actions will deeply damage public trust in our institutions and further escalate current political and social divisions. The majority of our state is vaccinated and vaccines have been made available to all but the very young who are not at high risk for severe illness as shown in countless studies. Vaccines are likely to be ready for the very young in the coming months and made available to parents who wish to vaccinate their children. Those who want a vaccine have been able to get one. Studies show that close to 90% of the elderly are vaccinated. If those who are vaccinated are largely protected from hospitalization and death, it does not bear out to involuntarily detain persons who refuse vaccination and who may be exposed to the virus. Both vaccinated and unvaccinated persons can spread the disease and current data is showing a similar viral load in the vaccinated and unvaccinated. These proposals are inappropriate and will cause harm long term. I urge you to consider the social ramifications of taking such drastic measures against a disease that 99% of healthy people recover from and that the vast majority of the vulnerable have been vaccinated against.

My name is Camie Lawing, and I am a 25 year old single mother of a 5 year old son in a Washington state public school. I am against the vaccine mandate for children to attend school. Every child has a right to public education, regardless of vaccination status. I think it is cruel and unfair to discriminate against children who are vaccinated and not vaccinated. I've worked hard to provide a safe and comfortable environment for my son and want to give my son the best life I can which includes his education. Please do not enforce this on children who are not old enough to make this decision for themselves please do not put the parents in a position to make that choice.

External Email

Dear Samantha Pskowski-

I am emailing the Washington State Board of Health to reject and plead with you to not mandate the covid vaccine for school age children and teens.

I have 4 kids and I am not an anti vaccine parent. I acknowledge that covid19 is real and has been horrible for the elderly and those with pre existing conditions.

These vaccines are not safe for our kids and may cause irrevocable injury and damage. The viral gene injected into parent cells forces my child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs. These organs include the brain and nervous systems, heart and blood vessels(including blood clots), their reproductive system, and this vaccine can trigger fundamental changes to their immune system. Once these damages have occurred, they are irreparable and can not be reversed. You can not fix the lesions in their brain, you can't repair heart tissue scaring, you can't repair a genetically reset immune system, and this vaccine can cause reproductive damage that can affect future generations of our family.

Why would I want to risk all of the above for little or no benefit? Plus all of my kids and most of all their friends have had covid and they have a natural immunity.

The vaccines have not been properly tested. They are still experimental vaccines!

The harms and risks of new medicine are often revealed many years later.

I do not want my kids to be a part of this radical experiment.

There is no benefit to vaccinating my children against the small risk of the virus given the known health risks of the vaccine that we may have to live with for the rest of our lives.

We should be thinking about the well being of the kids and little ones who will soon grow up and need to run this country. It is not up to the government to make my kid get a experimental vaccine. We will not comply.

Thank you for your time

Ruthie Nicholson

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I have concerns with forced quarantine as this seems perilously close martial law type activity. I hope you are not considering forcing C-19 vaccination o in order to attend school. We currently don't require other flu Vax for children and I believe the parents should decide what is in 5th he best interests of their child. I don't believe there is enough data on the long term effects of this relatively new vaccine science. cut urgently children have a better response to the virus and contact it less than adults. Some studies have shown those who had the virus have a 50-70% greater immunity after 6-9 months than those who have received the vaccine.

2. Con

---

Thank you for your time and willingness to allow for openness and feedback. My name is Sarah Werling, and I am a mother, an elected school board director, and I have been honored to serve as Center Manager and Family Service Coordinator for a local Head Start program. For the past sixteen years, I have served the most vulnerable children and families in a small rural island community in Washington State. Evident in my years of service, I wholeheartedly believe in the Head Start program and the public school system and I have bear witness to the positive impact these programs has had in our community, and in the individual lives of the children and families in which we serve. I will make it known I am not against the vaccine; I am however against the mandate. I strongly believe individuals should make informed decisions and choices about their own healthcare. Humans should not be coerced into getting an experimental vaccine. I have supported our children, families, and staff through from beginning of the pandemic, and I have ensured they have had the access to information and the resources to educated in their decision to get vaccinated; or not. We as a collective have kept providing quality services to our children and families throughout the pandemic, and even well before a vaccine was made available. Now that a vaccine is FDA approved and pursuant to Governor Inslee's Proclamation 21-14.2., I am now considered a threat to myself and others and I am unable to perform my job duties, although the vaccinated is proven to still become infected and still transmit it to others. San Juan County has the highest vaccination rates in the nation and is a small handful of counties in the United States without a single fatality. San Juan County has one of the lowest case rates in America and is reported as one of the least vulnerable United States counties. Have we explored all accommodations in lieu of forcing staff into vaccinations? This is not a one size fits all approach. What is occurring in educational programs across the country as shown in the success of local school districts and other learning centers following mitigation procedures, and by having routine testing available, it is possible to provide quality services to children and families regardless of vaccination status. As a public health board, you can stop a crisis within a crisis from being created. Programs have already lost quality staff and will continue to do so if we implement stricter mandates and restrictions. Several families have disenrolled and have decided to not even apply with the current mask mandates for their children in place. Our nation is experiencing a

serious decline in quality educational staff, and an increase in children with depression and anxiety and vaccination mandates and masking children as young as two-year old's is not supporting this issue. We should be encouraging fresh outdoor air, exercise, human connection, and ensuring families and individuals have access to resources to make their own informed decisions. Mandating vaccinations without having access to the data and long-term effects of the vaccine is absurd and an overreach of your position. If WAC 246-100-070 is implemented into law, I would expect to see local health officers voted into position, as we the people have no say to who holds this position of power. I encourage you please, to look at all options before implementing stricter mandates. We can and should do better.

Subject: No to Covid Shots for Children!!

External Email

Dear Samantha,

Please say NO to this terrible idea. Please add my name to the list of those pleading against this travesty. Please do NOT require Covid vaccines for children to attend school. Children are at extremely low risk for Covid. The risks hugely outweigh the benefits. Vaccines are STILL only authorized for EMERGENCY USE ONLY. They are not verified. We have absolutely NO long-term studies to demonstrate safety. Studies DO show that both vaccinated and unvaccinated can both transmit Covid. Therefore, the vaccine apparently does NOT stop the spread of the virus. There is a HUGE risk and no benefit. Please, consider the needs of the children. They do NOT need the vaccine! Please vote NO! No Covid shots for children!!!

Respectfully,

Alex

---

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death. The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs. Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu. Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children. Thank you for your time.

Subject: NO on Unconstitutional Vaccine Agenda!

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Covid-19 is manageable when effective treatment is started early. Furthermore, it is survivable by more than 90% of the population. The Covid vaccines have little effect on the Omicron variant, and, in fact, most people who get this variant have been double vaccinated. Some have even received booster shots. Being fully vaccinated will require regular booster shots because it has been determined that the vaccines only work for a limited time, and even then, they are not very effective. They do not prevent people from getting Covid-19.

Including Covid vaccines as a requirement for attending public school is not only unnecessary, it is criminal. Children have little risk from Covid-19 but they do have considerable risk from these "experimental" Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health. Rather, it is an unconstitutional and criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Please vote NO!

Children are at very low risk of significant illness from covid 19. There are risks associated with the vaccine and it's indisputable that the vaccine doesn't stop the spread of the virus. This proposed requirement is not comparable to the other required-for-school vaccines because the other vaccines stop the spread. Thank you!

COVID shots should NOT be made mandatory for child care and school admission. COVID presents an extremely low risk to children. The shots are still under emergency use authorization. It will take 10-15 years before we could begin to know with certainty what the implications of the shot are on the reproductive health of a young child. Many children, including my own, have already had COVID, without complication. Their immune systems have proven that they can handle COVID and they know have natural immunity.

The "vaccine" does not prevent the spread of COVID or any of the variants. It is similar to the flu SHOT and should be treated as such and NOT be made mandatory for our children. Our children already have multiple vaccinations from the time they are brought into this world. Vaccinations that have been around for decades that we know have illuminated the diseases. The COVID vaccination/boosters do nothing more than our God given immune system does. I do not want to see more cases of autism and other mental illness in our children do to an unnecessary mandate. Therefore, I urge to NOT mandate this vaccine. Period.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Dr. Robert Malone highlighted the second Physicians Declaration by the International Alliance of Physicians and Medical Scientists, dated October 29, 2021, which has been signed by more than 16,000 doctors and scientists, stating that "healthy children shall not be subjected to forced vaccination" as their clinical risk from SARS-CoV-2 infection is negligible and long term safety of the shots cannot be determined prior to such policies being enacted. Not only are children at high risk for severe adverse events, but having healthy, unvaccinated children in the population is crucial to achieving herd immunity. The declaration also demands that health agencies and institutions "cease interfering with physicians treating individual patients." Three Times Parents Must Know Malone writes: "Before you inject your child — a decision that is irreversible — I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created. There are three issues parents need to understand: The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including: Their brain and nervous system. Their heart and blood vessels, including blood clots. Their reproductive system. This vaccine can trigger fundamental changes to their immune system. The most alarming point about this is that once these damages have occurred, they are irreparable: You can't fix the lesions within their brain. You can't repair heart tissue scarring. You can't repair a genetically reset immune system. This vaccine can cause reproductive damage that could affect future generations of your family. The second thing you need to know about is the fact that this novel technology has not been adequately tested. We need at least 5 years of testing/research before we can really understand the risks. Harms and risks from new medicines often become revealed many years later. Ask yourself if you want your own child to be part of the most radical medical experiment in human history. One final point: the reason they're giving you to vaccinate your child is a lie. Your children represent no danger to their parents or grandparents. It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease. In summary: There is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives. The risk/benefit analysis isn't even close. As a parent and grandparent, my recommendation to you is to resist and fight to protect your children." Please oppose or put a halt to this requirement for students that attend public schools. This is such a new vaccine that have limited time on their safety data that we have no clue what the long terms affects are and should not be using our children as an experiment. The science has been constantly changing and I'm not comfortable as well as other parents to putting this into our children. We should have a choice with what happens to our children and it is not up to the government to decide what we or our children do with our bodies. Why is " my body my choice" only allowed in certain situations but not what happens with ourselves or our children. Please take a look at a parents perspective on this. This is so important that we halt this and take time to think clearly on something that could later on be harmful to our children no matter what the government is pushing on us. We've already been doing what we were told we needed to do to stay safe and that's as force our children to mask 8+ hours a day. Now what? Do the masks not work because covid is still around and even though 78% of Washington is fully vaxxed covid is still here and affects vaccinated. This will never end vaccination or no vaccination. Please give us a choice.

Subject: Public Comment Covid Mandates

External Email

" I am completely against any of the proposed Covid Policies that are overreaching, illegal, unethical, and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

While Covid is not a threat to children's health and they do not transmit it, the "vaccine" is a threat to their health, since 133 times as many children die from the injections than from Covid. Why is natural immunity not part of the discussion?

The purpose of the mandate is to add to the current vaccine schedule. The reason seems to be profits, and there is NO LIABILITY to the pharmaceutical companies in case of death or injury. Pfizer earned 36 billion with the Covid shots last year, up from one billion the year before.

We have heard authorities say they have the science and the data but they never produce any that could be examined. They are unethical, lawless, liars and cannot be trusted with more power to further erode our Constitutional freedoms, and in some cases, to enrich further themselves with money from special or pharmaceutical interests. People's lives have been sacrificed and public health has been degraded.

From Jan. 6th doctor Newsletter:

#### STORY AT-A-GLANCE

\* According to Collette Martin, a practicing nurse who testified before a Louisiana Health and Welfare Committee hearing December 6, 2021, children are having "terrifying" reactions to the COVID shot, yet her concerns are simply dismissed

\* The average number of adverse event reports following vaccination for the past 10 years has been about 39,000 annually, with an average of 155 deaths. That's for all available vaccines combined. The COVID jabs alone now account for 983,756 adverse event reports as of December 17, 2021, including 20,622 deaths — and this doesn't

include the underreporting factor, which we know is significant

- \* Children are at risk for potentially lifelong health problems from the jab. Myocarditis (heart inflammation) has emerged as one of the most common problems, especially among boys and young men

- \* Myocarditis is inversely correlated to age, so the risk gets higher the younger you are. The risk is also dose-dependent, with boys having a six fold greater risk of myocarditis following the second dose

- \* British data show deaths among teenagers have spiked since that age group became eligible for the COVID shots. Between the week ending June 26 and the week ending September 18, 2020, 148 deaths were reported among 15- to 19-year-olds. During those same weeks in 2021, 217 deaths occurred in that age group — an increase of 47%

The video above features Collette Martin, a practicing nurse who testified before a Louisiana Health and Welfare Committee hearing December 6, 2021.<sup>1,2</sup> Martin claims she and her colleagues have witnessed “terrifying” reactions to the COVID shots among children — including blood clots, heart attacks, encephalopathy and arrhythmias — yet their concerns are simply dismissed.

In a November 21, 2021, tweet, cardiologist Dr. Aseem Malhotra wrote:<sup>22</sup>

“Extraordinary, disturbing, upsetting. We now have evidence of a plausible biological mechanism of how mRNA vaccine may be contributing to increased cardiac events. The abstract is published in the highest impact cardiology journal so we must take these findings very seriously.”

Tragically, it’s not only the CDC and FDA that have been captured by the drug industry and who are sacrificing public health, including the health of our children, in order to further the technocratic Great Reset agenda.

Even the American Medical Association, which is supposed to lobby for physicians and medical students in the U.S. and promote medicine for the betterment of public health, has abandoned all semblance of ethics, transparency and honesty.

#### What Do the VAERS Data Show?

Research published in 2017<sup>24</sup> calculated the background rate of myocarditis in children and youth, showing it occurs at a rate of four cases per million per year. According to the U.S. Census Bureau, as of 2020 there were 73.1 million people under the age of 18 in the U.S.<sup>25</sup> That means the background rate for myocarditis in adolescents (18 and younger) would be about 292 cases per year.

As of December 17, 2021, looking only at U.S. reports and excluding the international ones, VAERS had received:<sup>26</sup>

308 cases of myocarditis among 18-year-olds

252 cases among 17-year-olds

226 cases in 16-year-olds

256 cases in 15-year-olds

193 in 14-year-olds

132 in 13-year-olds

108 in 12-year-olds

In total, that’s 1,475 cases of myocarditis in teens aged 18 and younger — five times the background rate. And again, this does not take into account the underreporting rate, which has been calculated to be anywhere from five to 40.

Meanwhile, the CDC<sup>27</sup> claims that, between March 2020 and January 2021, “the

risk for myocarditis was 0.146% among patients diagnosed with COVID-19," compared to a background rate of 0.009% among patients who did not have a diagnosis of COVID-19.

After adjusting for "patient and hospital characteristics," COVID-19 patients between the ages of 16 and 39 were on average seven times more likely to develop myocarditis than those without COVID.

I am writing against having an immunization for COVID-19 for kids K-12. With this being a new vaccination, kids should not be required to have this prior to attending public or private school. The flu vaccination is not mandatory, the COVID-19 vaccination should not be mandatory either. I am for getting children vaccinated. My child is fully vaccinated against measles, mumps and rubella. The reason I am for these vaccines is because they were helpful in eradicating against these diseases. So far, COVID has changed so much that the vaccine does not prevent them from getting COVID. This is why I am against making this particular vaccine (COVID) from being mandatory for K-12 at this time.

Personal/ religious it is down right against our freedoms and our right for such mandates to be enforced on our children or selves! All individuals have the right to make their own decisions regarding health based on what we see fit ( this is not a one size fits all) I will not bow down and let someone else force me to comply out of their fear! My job as a parent/protector is to make the best decision for my family their health and safety! We as a family choose not to live in fear! I will not stand for this! Nor will we subject our children to such things!

I strongly oppose making COVID shots mandatory to attend schools.

Children under the age of 20 are extremely unlikely to contract COVID and suffer any permanent consequences.

The safety and efficacy of the COVID shots has not been established. The shots do NOT prevent the illness from spreading and do NOT prevent a person from becoming infected with COVID.

There are many reported injuries and deaths from the COVID shots.

To the WSBOH Members,

My children will never receive this experimental covid shot. If it is mandatory, we will find a private school that does not require it or home school.

My entire family had Covid last spring. We're all fine. We have tested positive for covid antibodies. Israeli studies have found that previous infection confers FAR BETTER protection than the covid shots. This Cleveland Clinic study of 50,000 patients found No benefits to getting vaccinated after having covid <https://www.news-medical.net/news/20210608/No-point-vaccinating-those-who've-had-COVID-19-Findings-of-Cleveland-Clinic-study.aspx>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.news-medical.net%2Fnews%2F20210608%2FNo-point-vaccinating-those-who've-had-COVID-19-Findings-of-Cleveland-Clinic-study.aspx&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C6e778162ac494042782408d9d1a2a3c7%7C11d0e217>>

The CEO of the largest life insurance company in America noted a 40% rise in deaths and severe disability claims that began July 2021. These were mostly NON-COVID deaths of working aged people. They have never seen anything close to this. For perspective, a once-in-a-200 year catastrophe would cause a 10% increase. The only difference between 2020 and 2021, is 230 million covid vaccinations.  
<https://rwmalonemd.substack.com/p/what-if-the-largest-experiment-on-if-the-largest-experiment-on>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Frwmalonemd.substack.com%2Fp%2Fwhat-if-the-largest-experiment-on&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C6e778162ac494042782408d9d1a2a3c7%7C11d0e217>>

Here a world renowned microbiologist and a pathologist worked together to use autopsy results to display the damage the vaccines are doing to heart tissue. Why would I do this to my child, when I have seen that he isn't harmed by covid?

<https://stevekirsch.substack.com/p/bhakdiburkhardt-pathology-results>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fbhakdiburkhardt-pathology-results&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C6e778162ac494042782408d9d1a2a3c7%7C11d0e217>>

I believe the shots are killing people. If you believe they are safer than covid, you can make that choice for you and your family.

Thank you,  
Tyson and Wendy Mercure

---

Mandatory vaccines for school children.

11.

Are you Pro or Con on the proposal?

1. Pro

---

When I was a child we actually received smallpox and polio vaccines at school. That was done to help protect children from crippling and deadly diseases. Vaccines have been required for children in public schools for decades. That is an appropriate public health response. The fact that vaccines have become a political issue is really unconscionable. To not require that children to be vaccinated puts all children at risk as well as teachers, school staff, and bus drivers. If children and school personnel are not vaccinated there is a likelihood that people will get sick and even that people might die. For those who oppose vaccines I wonder if they are willing to identify the members of their family who they would sacrifice for what they consider "freedom". This isn't a political issue, it's about science, it's about compassion, it's about common sense. Thank you for allowing me to share my opinion.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Steve Chilson  
9117 48th Dr NE  
Marysville, Wa

I am writing to voice my complete opposition to the proposed policies being discussed at the January 12 meeting.

I am completely AGAINST: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. These policies are completely overreaching and immoral. It is so incredibly sad to see our state officials take away the rights and freedoms of its people – please don't let this go any further than it already has.

Our tax dollars should not be going toward quarantine facilities and law enforcement because someone chooses not to be vaccinated. Getting any vaccination or medical procedure comes with risk and therefore must remain up to each individual. Anyone in support of these forceful policies is corrupt and in favor of eliminating human rights, and should be ashamed. And now to force children into vaccinations – wow. It is all so wrong and I hope that any incentives the state is receiving to push these awful covid-related policies are not powerful enough to override your conscience.

For the sake of our children, our state, our country, and the world, please do what is right and give the people their freedom to choose what is best for themselves and their families.

Subject: RE: WSBOH Jan 12th

External Email

To the Washington State Board of Health:

Covid is now researching endemic versus pandemic levels. Vaccine efficacy is poor and requires infinite boosters. The vaccines are still emergency use, so Pfizer, etc. have no ONE COMPANY or GOVERNMENT agency will help those who are vaccine injured. Long term impact unknown. VAERS which is grossly underreported is greater for Covid than all previous vaccine reporting combined.

With risk there must be choice. Religious objects are numerous, moral objections as well.

We will remember the choice you make on Jan 12th and we vote for those who support the voice of the people the bureaucrats and technocrats.

I challenge any medical expert to talk with me one on one regarding vaccine efficacy and safety. The people have no problem replacing representative that do not represent.

Why, when we have Omicron, the least dangerous of variant are we rushing to push forth legislative?

When is governmental power too much.

Remember that you are making decisions for our children. To date zero reports have been put forth by the cdc, etc. to speak to vaccine safety in an official way.

\* What test will be used to determine SARS-COV-2 infection?

CDC withdrew the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization of the current test being used.

- \* Does the new testing isolate only for the SARS-CoV-2?
- \* Where is the data that isolates a live sample of the SARS-CoV-2 for these tests?
- \* A testing device would need to be proven reliable against a reliable isolated live sample with verified repeated data and studies.
- \* Where is the data that shows the science for the accuracy for these tests? There are so many False Positives and False Negatives.
- \* How can anyone make a decision that "One size fits all" for SARS-COV-2?
- \* With a population that is supposedly 80-90% vaccinated how can we still be having such outbreaks?

- \* With each new variant, the symptoms lessen, as with Omicron; most say it's no more than a cold.
- \* Why is Natural Immunity from a SARS-COV-2 infection not noted or taken into consideration?
- \* Our Government should not take place of parents making choices for their children, or for themselves either.
- \* People are waking up and understanding that the science with no published studies for SARS-CoV-2 is more about Control vs. Health. Any current studies seem to be censored.
- \* Where is the data on what is in the MRNA inoculations? We all need INFORMED CONSENT.
- \* Isolating anyone involuntarily for quarantining for such a high survival rate virus is unthinkable. This is America, not Australia.

I am staunchly AGAINST any proposed required vaccine for school children. Unlike other required vaccines, this vaccine has not had time to be proven by the medical community over a course of many years. It is too early on to know what any long last side effects may be. Why put our children at risk. If this requirement goes into place we are likely to lose thousands of children that whose parents will not comply, thus costing hundreds of jobs. Allow parents to parent and make these medical decisions for themselves.

Subject: Do NOT Force Vaccinate our School Children

External Email

Dear Washington State Board of Health Member,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of

Health to show medical records for even one child who has died OF COVID.  
Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Respectfully,

Kelvin and Claudia Hanson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Let kids be kids. If the parents and the school teachers decided to be lab rats, let them. They were told the vaccine that isn't a vaccine would save them from getting or receiving the Covid. The kids do not need this vaccine that is not a vaccine (CDC reworded the term "vaccine" to include the Covid shot. If the schools do not believe they can open safely without injecting the kids, then the money we pay in our taxes needs to be reimbursed to the tax payer. You have lost 55,000+ kids to this mandatory nonsense and costing the tax payers more money to fund the schools. Enough is enough. When you can not or will not do your job, you need to be fired. Doctors have forgotten their oath "do no harm". Teachers have forgotten that they are to teach reading, writing and arithmetic, not their radical beliefs. Cameras in all classrooms. The teachers (with your permission) have been indoctrinating the kids for too long.

Stop the nonsense.

As a life long resident of WA state, I am adamantly opposed to mandatory vaccination of the children of this state. I am a mother and grandmother and will make sure the children in my family will only be vaccinated by our own informed decision and not directed by the state. There is no data about the long term affects and we should not be willing to experiment with our kids for an illness that kids have shown not to be infected with.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: i will not vaccinate my children if you pass this constitutional violation i will remove my children from public school

From: RASAR AMY  
Sent: 1/6/2022 10:14:54 PM  
To: DOH WSOBH  
Cc:  
Subject: Mandatory shots

External Email

Washington State Board of Health members,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

\* During the October 26th FDA advisory committee meeting, 16 of the 18 members were very clear that they did not believe "otherwise healthy" children do NOT need this injection. It was specifically stated in their closing comments that they were recommending approval so that "high risk children in conjunction with their parents and doctors" could have it available. They also noted that though some states may try to "mandate" it, they couldn't let that deter them from making it available to high risk kids that may need it.

\* Federal Emergency Use Authorization statutes prohibit school mandates of EUA products. The only FDA approved version is not yet available in the United States.

\* Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026. Source: <https://clinicaltrials.gov/ct2/show/NCT04816643> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fstudy/NCT04816643>>

\* The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

\* Not having language that recognizes and acknowledges innate immunity of the Covid 19 recovered is irresponsible medicine and employs a one size fits all medical approach that does not take into account the individual health needs of children.

\* Children are the least affected by this virus regarding severity and most at risk of unknown long term effects.

Thank you for your consideration in this matter.

Kind regards,

Amy Rasar

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Mandatory Covid shots for schoolchildren and eventual all WA ST citizens. Implementing WAC 246-100-40, 246-100-45, and 246-100-70, and more.

11.

Are you Pro or Con on the proposal?

2. Con

---

By considering these for implementation, you are opening up the State for massive lawsuits, money better spent on other priorities. Some people simply cannot get the shot, like myself, as it has the high probability of strokes and death. I have been let go from a state job because of this, and I have also had a severe case of Covid, and SURVIVED, and most likely have better immunity than those who went ahead and got the shots. Where is the transparency, such as the actual ingredients of this "vaccine"? What about reporting what this shot has done to thousands of people, i.e., death and permanent disabilities. We simply do not know the long-term effects. Look what happened in the 50's and the drug thalidomide. I know for a fact the State was hiring personnel for "containment centers", for the previously mentioned WAC's. You all, by considering these proposals, may be endangering the very lives of thousands of Washingtonians, not only for their health, but livelihoods. I feel all of these mandates are against our constitutional freedoms and our basic rights as humans. I just found out about this specific meeting through the grapevine, why all the secrecy?

The Covid 19 inoculation is not a vaccine. It does not prevent nor is it eradicating the virus. Science has told us over and over that children do not spread the virus and have a far greater risk of severe infection. The Covid 19 inoculation has not been in use for a long enough time to prove long term safety. It is not the governments nor states responsibility to make decisions for my children and grandchildren. Let parents be the decision maker when it comes to injecting an experimental (under emergency use) substance into children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:  
These "vaccines" do not work, they are an experimental drug that our youth do not even need, they're the least affected by illness. Government overreach!

To whom it may concern,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Whatever happened to no child left behind? This will Remove up to 40% of children from the public/private school system who have a right to be there, and it's our duty to make sure they're there so they can be educated enough to contribute to society. Poor education is shown to lead to crime and depression.
  - 1a. What about 2 income homes? What will those parents do if they cannot use public or private schools? Their children will be at home alone, not getting an education, not being around friends, they will not develop socially. We've already seen that Covid lockdowns, which this would be like, leads to depression, suicide, emotional instability.
2. Science shows that Covid is not a threat to children. I repeat, please do your research, science shows that children are more likely to suffer from the Covid shot than from Covid itself. This is completely unnecessary for that reason alone.
3. Scientists are saying with omicron, because it's so highly contagious, that the Majority of the population will get it. The good news is it is not as serious as previous strains. In addition, many scientists are saying with Omicron we will develop the herd immunity that we need to defeat Covid.
4. Covid shots do not work. Boosters do not work. Why would you make mandatory a shot or booster that does not work? You may say that children who get Covid will not suffer the same severity if they have a shot, but that is scientifically false. even today in the school system, which I have access to, children who are testing positive are asymptomatic. They are not affected by Covid. There is no risk among our children.
5. Other countries, such as India have proven that prophylactics are the solution, not vaccinations. Do your research on prophylactics, there is scientific evidence that prophylactics reduce severity of Covid and hospitalizations by up to 63%. Focus on prophylactics for children, not shots that have been proven to be ineffective.
6. Forcing vaccinations on children will not stop Covid. As seen today, there is a very high incidence of Covid among school children, even those who are vaccinated.
7. In the past two years we have learned much more about Covid. Today we know how to treat it, we know how to prevent it using prophylactics, we do not need the same measures today that we may have needed when we first saw Covid. The measures you are proposing are based on the initial unknowns of Covid— we are beyond that.

There are plenty other vaccines that are "important" but not required. This should be a CHOICE for parents if they want to inject another vaccine into their children. OR when the child is of age to choose so for themselves. Too many individuals have been mandated to get the vaccine over their want just to keep their jobs. It is not right to take away someone's freedom of choice.

It has been proven that young children are not at serious risk from Covid. The vaccine does not prevent you from passing along the virus or contracting the virus. It only lessens the severity of the virus. Since children are not at serious risk from the vaccine it does not make any sense to force a vaccine on them that is not going to present the spread of the virus. As a mother I do not feel comfort giving my child a vaccine that has not been around very long and that we do not yet know the long term effects of the vaccine. It is also against our constitutional rights to have a vaccine forced on us as US citizens.

Subject: Concern about our children

External Email

Hi Tracy,

I generally sit quietly and just let things work their way out, however I am not going to be able to with regards to mandatory children vaccinations. I had to for work and have some side effects - I just am pleading we allow parents to make choices for their children. I have 10 grandchildren all who have health risks that will create fueled negative effects on their autoimmune systems

Please know I am opposed to vaccinating our Children in the State of Washington - I am speaking up please hear me.

My oldest daughter during COVID learned she had CF - we have now all been tested. The vaccination has caused damage to two of my adult granddaughters currently.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its

availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=...>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&data=...>> )

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

From: Renee Houston  
Sent: 1/7/2022 11:45:24 AM  
To: DOH WSBOH  
Subject: Strongly oppose vaccine enforcement

External Email

Washington State Board of Health Members,

My name is Renee, I am residing in Wenatchee, WA, wish to STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The government has no right to force anyone to take anything into their bodies they do not choose to take. This idea is equal to the taking of God-given freedoms in Nazi Germany. It also is criminal to punish or detain anyone for their choice of medical freedom. Reference the NUREMBERG Code! A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and its variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. I had Covid in Aug. of 2021 (Delta variant) and survived. Our God-given natural immunity kicked in and we successfully navigated the disease and are now stronger for it. Allowing people's natural immunities to fight this virus is the ONLY way to reduce its strength. The mRNA vaccines are EXPERIMENTAL and should not be forced on anyone, period! These vaccines have been proven to carry more of a health risk than getting Covid! Look at the VAERS reports!

Also, I also have the same opinion about not mandating children to be vaccinated against Covid. Almost ALL children survive the virus as easily as the common cold or flu virus. Again, these vaccines are EXPERIMENTAL and have not yet proven to be safe! Heart, nervous system, and other systems in the bodies of young people receiving these The risk FAR OUTWEIGHS any benefit! It is truly WRONG to mandate these vaccines when natural immunity is very effective against this virus!

Please accept our concerns and recommend AGAINST these proposals being presented.

Sincerely,  
Renée Houston

Why is OUR state going backwards in ending this "pandemic"? Please follow the science and not political agenda in making a decision that affects so many of the states residents. I can not believe this once great State is even thinking of doing something like this. It makes me really sad. What rights are you looking at getting rid of next? Are there any medical doctors involved with the health department? Is there still such a thing as the Hippocratic Oath? There is still no "approved" vaccine on the market, how can you round up families and take them to concentration camps because they do not want an "experimental" drug forced on them? If people want to take the vaccine, that is fine, leave the others to decide for themselves! People also have religious reasons to not get a vaccine, are those accommodations being considered? This just does not seem like the USA that my family has fought to protect in previous wars. It is embarrassing!

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. The disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are opposing this plan should be charged with treason.

Signed,

Oksana Kiforishin  
7018 61st St W University Place, WA 98467

According to CDC, the contagiousness of vaccinated and unvaccinated persons infected with COVID-19 is similar.

[https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s\\_cid=mm7031e2\\_w](https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s_cid=mm7031e2_w)  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7031e2.htm%3Fcid%3Dmm7031e2\\_w](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7031e2.htm%3Fcid%3Dmm7031e2_w)

Therefore, the vaccines are not effective in stopping the spread of COVID-19.

According to CDC & FDA, COVID vaccines pose risks of myocarditis, blood clotting, neurological damage and death, to name a few, predominantly in adolescents

[https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html;file:/C:/Users/pfish/Downloads/5.3.6-postmarketing-experience%20\(1\).pdf](https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html;file:/C:/Users/pfish/Downloads/5.3.6-postmarketing-experience%20(1).pdf)

I OPPOSE WAC 246-100 Rule-making that would expand any authority to involuntarily quarantine individuals.

I also OPPOSE adding an experimental C-19 Gene therapy vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The documented risks of myocarditis and other heart inflammation related reactions associated with this brand new Gene therapy injection far outweigh any risk associated with natural infection.

As a medical professional I am not allowed to provide or administer any medical treatment against a persons will. People have the right to informed consent. If a person chooses to refuse any medical treatment, I am required to respect their choice and withhold treatment and medication. My opinion in the matter does not play into this. It is the individuals choice. Ones right to choose should not be lost. If someone is 95 with life threatening conditions and they still want to proceed with full treatment, we still treat. We don't tell people I am sorry but you are 95 and no longer have the right to treatment. If we start making mandatory decisions like these, taking away ones right to choose who is to say we won't make all decisions for the people.

Please listen to those peoples concerns and respect their wishes. I hope some reads these. And I hope someone actually takes public comments into account.

Children are a extremely low risk for Covid. The vaccine should not be mandatory.  
Parents should be able to have the choice to not vaccine if they believe the vaccine could cause serious harm. Vaccines are not safe for everyone.

To WSBOH

As a microbiologist (BS in microbiology, cum laude, WSU, 2006) with virology laboratory experience and a history buff of medicine, I believe that Covid-19 vaccinations should absolutely NOT be a requirement for our children to attend school or childcare.

Children are at extremely low risk for Covid-19 and that the vaccines are still only EUA (emergency use authorized). Additionally, the courts are ruling repeatedly that Biden's vaccination mandates are unconstitutional. People should have the freedom to choose how to care for their bodies. If we can't choose, then what other freedoms will be stripped? Having heard numerous accounts of people surviving totalitarian, socialistic, and communistic regimes, I must be against all such laws.

The Covid 19 virus is a flu virus. Yes, the severity of the flu tends to be worse than the "normal" virus, but nonetheless it is at its core a flu virus. We have not mandated flu shots in the past, and we shouldn't now or in the future. It has been shown that the current "vaccinations" (they are not a true vaccine) does not (1) stop someone from getting Covid-19 or (2) stop someone from spreading Covid-19. We do not know the long term side effects of the vaccine- it has been around less than two years so how can we know what the five year or ten year effect is? It normally takes years for a drug to come to market with the proper approvals, yet these vaccines have been pushed through the approval process at an alarming - dare I say scary - rate. The decision to take the "vaccine" should be left up to the individual family.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Our children have strong natural immunity and are at an extremely low risk for Covid.
2. The vaccines are still only EUA. Every individual should decide what is best for them and their body! Forced inoculation is an overreach and severe violation of our citizens American rights!! My choice, my body!!
3. There are no long-term studies done. We have no history to validate safety and a significant number of citizens are having adverse reactions.
4. We are seeing documentation now that vaccinated and unvaccinated can transmit Covid. Thus, these vaccines are not effective in stopping the spread of this disease. The notion of removing unvaccinated citizens to quarantine facilities is wrong, divisive, and will destroy the well-being of families in the State of Washington!

For the reasons stated above, I appeal to the advisory group to drop this notion of extending the WAC 246-100-070 to reference any inclusion of the Covid-19 virus.

Subject: Put the children first

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. It's time to do the right thing.

Thank you for listening,  
Steve Kasemeier

I oppose Agenda Item #8. This proposed change is unethical. The Covid vaccines are not vaccines as they do not prevent Covid. Ample research needs to be done over a long (10 years) period of time to fully understand the efficacy and side effects of the vaccines. The amount of deaths from Covid especially in children, does not support the need for them to have these shots. Covid is an illness in which these shots do not prevent people from getting anyway. The government should not have the power to tell people that to do with their bodies. It is against the constitution in which this country was founded. WA should not mandate Covid shots for children.

There should not be containment allowed for communicable diseases. I oppose these changes of the proposed rule to the WAC for control of communicable disease in the school systems.

I oppose the TAG group (agenda item #8) and support the idea of informed choice: petition Agenda #11.

To whom it may concern:

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. This is especially true for vaccines that have not been thoroughly tested. Clinical trials are not expected to be completed for another year, and we still do not know the long term effects of this vaccine.

It is irresponsible to mandate a vaccine which does more harm to the children than the disease it is protecting against. The chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%.

I urge you to consider the risks vs benefits of this mandate. Contracting COVID is not a death sentence for our children anymore than contracting the flu or a common cold. As Dr Fauci stated, deaths and hospitalizations FROM (not with) COVID in our young children are almost non existent. We must take this into consideration.

<https://www.newsweek.com/fauci-children-hospital-covid-omicron-1664676>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.newsweek.com%2Ffauci-children-hospital-covid-omicron-1664676&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C50af1e88a4c94b72a2a408d9d20b3775%7C11d>

I encourage you to do all in your power to ensure a return to the democratic principles upon which this country was founded.

I realize your role is to maintain the legislation that "it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases" (RCW 28A.210.060

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault> through 28A.210.170

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault> ). Furthermore, your responsibility is to make decisions for public health for the

"immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions" ([ 1979 ex.s. c 118 § 13

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fleg.wa.gov%2FCodeReviser%2Fdo> ). Unfortunately, the current inoculations have not proven to protect the public from

transmission or infection of the Covid-19 virus . The inoculation concoctions still have an EUA status and have not completed Phase III safety trials. EUA products are, by definition, experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. No healthy adult or child should be injured or die from a vaccine imposed upon them by their government.

What we know now about COVID-19 and children:

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fservices.aap.org%2Fen%2Fpages/novel-coronavirus-covid-19-infections%2Fchildren-and-covid-19-state-level-data-report%2F&data=04%27C01%27Cwsboh%40sbh.wa.gov%27C50af1e88a4c94b72a2a408d9d20b3775%27C11>

\* The World Health Organization

\* A concerning number of young people

\* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29thUPDATE, there have been 856,919

[illegible]

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F19%26DIED%3DYes&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C50af1e88a4c94b72a2a408d9d20b37> following COVID-19 vaccination.

\* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

\* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to  
congregate

-- Do not support any legislation or directive establishing lockdowns

-- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect?

May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state. You have the unique opportunity to be on the right side of history for our State and our Nation

Sincerely,

Tiffany Startin

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

January 7, 2022

Hello Washington State Board of Health Members,

I am writing to inform you of my GREAT CONCERN over the new proposed WAC for requiring the MANDATORY COVID Vaccine for children in child care and schools. PLEASE DO NOT MAKE THIS VACCINE MANDATORY.

As reported directly by the CDC, "Children can be infected with the virus that causes COVID-19 and can get sick with COVID-19. Most children with COVID-19 have mild symptoms or they may have no symptoms at all ("asymptomatic")."

You are individuals who are educated in this subject matter. Therefore, you are aware of the potential for the severe adverse side effects (including myocarditis and pericarditis) surrounding this vaccine. CHILDREN SHOULD NOT BE MANDATORILY SUBJECTED TO A "VACCINE/CHEMICAL" THAT HAS NOT BEEN THOROUGHLY STUDIED, IS KNOWN FOR CAUSING SEVERE EFFECTS (and may lead to death), AND IS ONLY IN AN "EMERGENCY APPROVAL" PHASE.

In addition, as you are aware, the vaccine does not prevent individuals from getting the virus, and many who have received the vaccine have still become ill from the virus and from the vaccine itself. CHILDREN SHOULD NOT BE MANDATORILY SUBJECTED TO SOMETHING THAT HAS NOT BEEN PROVEN TO "STOP THE SPREAD" OR TO A CHEMICAL THAT HAS NOT BEEN PROVEN TO BE SAFE. (As "evidence" shows, even with the vaccine, the spread has continued and is continuing, even among those who are vaccinated.)

I AM CURRENTLY AND HAVE BEEN DIRECTLY INVOLVED IN CHILD CARE, and in health care for many years. I have heard the voice of many parents. You have asked for input and public comment from parents. PLEASE ALLOW parents TO CHOOSE! (Side note: As you may be aware, WASHINGTON has a CRISIS in the CHILD CARE INDUSTRY, as well. I DO NOT want to be forced to give up what my family has worked for for so many years based upon a mandatory vaccine for children that is not proven effective to fight the virus, or adequately tested for safety for children (or adults), or "officially" approved by the FDA as with other "standard" medications or vaccines.)

PLEASE REMEMBER THE CONSTITUTION OF THE UNITED STATES OF AMERICA. Our forefathers founded this nation based on The Constitution of The United States. The preamble; "We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of LIBERTY to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America."

Yes, promoting health AND securing Blessings of LIBERTY. DO NOT REMOVE THE RIGHT OF A PARENT TO CHOOSE.

PLEASE ALLOW PARENTS TO MAKE A CHOICE. This government allows mothers to choose to keep or to terminate their unborn child(ren). THIS SAME GOVERNMENT SHOULD ALLOW A PARENT TO CHOOSE WHETHER TO INFLICT THEIR CHILD WITH A "VACCINE/CHEMICAL" THAT CAUSES RISK FOR SIGNIFICANT SIDE EFFECTS (which can potentially lead to DEATH).

IN THE LAST 4 Days, I have heard the Voices/CONCERNS of others.

I have received MESSAGES from:

- \* A Friend (nurse, mother, and grandmother): Sent me information from "Conservative Ladies" on "Call to Action: Say NO to state mandated COVID shots for kids."
- \* A Friend (mother and grandmother): With a video and CONCERNS OPPOSING THE MANDATE (Noted: Planning to move out of this state in this summer.)
- \* A Mother: With a PETITION to SIGN AGAINST THIS MANDATE
- \* A Mother/Grandmother: With information regarding your meeting on the 12th, and the INFORMATION TO SEND COMMENTS BY NOON TODAY.

THIS SHOULD NOT BE MANDATED as a WAC Requirement for schools and child care. PARENTS SHOULD BE GIVEN THE LIBERTY TO CHOOSE!

PLEASE DO NOT MAKE THIS VACCINE MANDATORY.

My husband is a pharmacist who has worked in a chain pharmacy for over 20 years. He has seen the impact of "Big pharma," and how politics, and the media have extremely impacted and changed his industry for the worst since COVID-19 hit. He has witnessed the droves of people "driven by political negligence, causing life-changing fear."

Please consider the "FACTS" pertaining to this matter. PARENTS SHOULD BE GIVEN THE CHOICE AND LIBERTY to decide whether to inject their child with a CHEMICAL THAT IS NOT THOROUGHLY TESTED AND "NOT OFFICIALLY" FDA approved. PLEASE ALLOW PARENTS TO EXERCISE THEIR FREEDOMS IN THIS STATE. This matter should be about "TRUTH." This vaccine does not "prevent" or "stop the spread" of this virus. As previously referenced, according to the CDC, "most children with COVID-19 have mild symptoms or they may have no symptoms at all ("asymptomatic")."

Do not require innocent children to be subjected to a potentially unhealthy chemical that can alter their current healthy state!

"KNOWING TRUTH" brings FREEDOM. Allow PARENTS the Liberty to Choose!

Please DO NOT REQUIRE PARENTS TO GO AGAINST something they believe to be UNSAFE AND UNETHICAL. PLEASE HEAR THE VOICE OF ONE CONCERNED MOTHER, who represents many. Please consider the "rights" which should not be taken from us, and allow parents to decide. This is about individuals making an "educated" decision based on "the facts," and allowing parents to decide based upon "WISDOM" and "TRUTH."

Sincerely,

Tiffanie A. Henderson, RN, BSN, FCN

Subject: Mandatory COVID Vaccination for Children -- Unacceptable

External Email

It has come to my understanding that you intend to discuss making the covid "vaccination" mandatory for students to attend both public and private schools.

As it is a legal requirement to send our children to school from my understanding, forcing us to inject our children with a "vaccine" that has not had rigorous testing and the data shows is more likely to cause adverse reactions than the disease itself, in order to send them to school is a massive violation of our rights as parents. Private school students especially should not be required, as we are paying to send our children there and not using government funds.

Further, the Nuremberg Code outlaws forcing medical procedures, including vaccination, on people. This was decided by and agreed upon following the atrocities committed during World War 2 by the Nazi Party of Germany. Forcing our children to take an unproven "vaccination" with a disturbing number of adverse events in the youth in order to attend school when they are mandated by law to get an education is a gross violation and a massive step back toward a history that is universally held as contemptible and evil.

As a father of two in Washington, under NO circumstances will you be injecting my children with these vaccinations. I will defend them from government mandated violence against them, and if that means we leave Washington for another state that doesn't embrace violence against children, so be it.

-S.McDougal

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Tamara Newman

We do not live in Communist China or the old Soviet Union. We are US citizens will not be ruled by totalitarians. There is no way that we should allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility. Aren't we still embarrassed about locking Japanese Americans in concentration camps during WW2?

We now know that those that are vaccinated can catch Covid, and pass Covid. There is no valid scientific reason to treat non vaccinated persons as less than citizens. We as US citizens will not let government elected and non- elected officials get away with taking our liberties away without consequences.

Also, vaccinating children with experimental vaccines is insane. These vaccinations are a gynecide. This will not go unpunished in the end. You so called leaders better wake up.

☐

☐Hello,

This letter is to inform you of my views on the DOH current considerations on the following items:

1. OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period! These are proven not to stop COVID nor stop the spread of it!
2. SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Kind Regards,

Subject: Chapter 246-105 WAC

External Email

Dear Washington State Health Board Member(s),

Regarding Chapter 246-105 WAC and the upcoming meeting scheduled for January 12, 2022, as a life-long citizen of Washington state and a parent, I am vehemently opposed to the requirement of the covid vaccination for school attendance for school-age children. Firstly, the covid vaccine(s) have not been subject to the years of testing and research normally applied to vaccinations; therefore any long term effects or reactions are unknown. This should bring extreme caution, especially when administered to young children and their developing bodies. Children are not test subjects. Secondly, it is scientifically known that children are in a low-risk category from death and even contracting covid itself. Additionally, these vaccines do not prevent the spread of covid, also proven in testing and science. We the people are continually told to "follow the science." I am respectfully asking that you do the same. Lastly, it is imperative to acknowledge parental rights. Daily I make decisions for my children and have done so without the government. Medical treatment and health care is not one-size-fits-all. How one child may physically react to a vaccine or any medical treatment does not equate another child positively/adversely reacting the same. may/may not adversely react. As you also (should) know, the Against Medical Advice form is made available to all those refusing medical treatment after counsel from their care provider. This is one's right and the legality of the form cannot be ignored, either by medical professionals or those in government. Personal and religious exemptions must also be recognized and honored. It's called personal autonomy and being a competent parent, raising my child(ren), it is my duty and responsibility to them, not the government, to provide the utmost, best care to their individual, unique, personal health/interest and well-being.

To simplify and reiterate, I am categorically against the covid vaccination requirement for school attendance. I anticipate my voice being heard and represented well, and the decision(s) made regarding this subject to be corrected-NO to covid vaccines for children.

---

Dear WA State officials, I am taking time to comment on your upcoming meeting regarding WAC 246-100 possible actions and possible action on enforcing covid 19 vaccines on school age children as part of the school immunization requirements. Your agenda mentions discussion, public comment and possible action will be take on WAC 246-100 but do not mention what subsection. I note that the WAC discusses possible detention of entire families or members of families if citizens do not follow directives of local health officers. This was an issue that came up in 2020 and was dropped by the State due to public outcry. We the citizens of WA State STILL are in opposition to this becoming a directive in regards to Covid. I refer you to CDC and world covid statistics that are clear that the death rate worldwide from covid is only 1.2% of people infected and the death rate among children ages 0-17 is statistically Zero. This would indicate that extreme measures like separating families and quarantining people in detention sites is not only not necessary but also violates Article 4 of the US Constitution. Another agenda item is about COVID-19 shots for school – it seems to be an update on the Technical Advisory Group (TAG) you have gathered and it's the first step toward adding the Covid vaccines for children to school attendance requirements. This TAG should never have been formed and yes, we do protest this action! WE OPPOSE THIS! Covid hospitalizations for children are under 4% of infected ages 0-17 and deaths in that age group are statistically Zero. This would indicate that the problems covid causes to school age children are not at a level that requires a vaccine that has no double blind testing and has been tested only by the pharmaceutical company producing the vaccine and only on 3000 children. These tests give no confidence that the vaccine is safe for children. A petition filed by Informed Choice WA was filed asking BOH to establish a new rule that would prohibit them from requiring EUA products or any licensed product that doesn't have completed Phase 3 clinical trials. We agree with this petition. Thank you for your time

The science does not back any kind of mandate for children. They are not at a great risk of infection or of death from the virus. These vaccines are still experimental and as such should not be administered to our children. Especially with no study's out for long term risk factors due to having this vaccine. We as parents believe this will do more harm than good. Especially since the vaccine has proven to not keep you from getting the virus and the need for boosters does not stop that either.

---

My perspective is that of a healthcare provider (Nurse Anesthesiologist), mother of young children, and local citizen. It is one thing to encourage and make vaccination available. It is entirely another thing to require it in minors and as a condition for an essential service (education). I oppose such a mandate. A Covid vaccine mandate in children is unnecessary. The goal of vaccination is to decrease severity of disease; fortunately, children are at low risk for severe disease with Covid perhaps due to their good health, age, & robust immune response. The AAP states "At this time, it appears that severe illness due to COVID-19 is uncommon among children", with hospitalizations and deaths not increasing despite the increased number of cases. The morbidity & mortality data presented in the hearing from the CDC (fall 2021) for covid in the age group of 5-11 quoted the following data: Of 1.9 Million covid cases in this age group there were 8300 related hospitalizations (0.44%) and 146 deaths (0.008%). These statistics seem contrary to an emergent need for vaccination. A requirement for Covid vaccination in children is premature. Clinical trials and a drug safety profile takes YEARS to develop. Covid pediatric vaccination (let alone a mandate for it) is not "following the science" because the data is lacking. The risks for Covid disease in children is equivocal (or possibly unfavorable) with the risk of adverse reactions from the vaccine (ex: myocarditis). It is unknown if vaccination prevents long-covid or MISc. Thanks to Omicron, it IS currently known that while covid vaccination decreases severity of disease, it does NOT prevent infection (& transmission) in that individual. Abandonment of autonomy and parental decision-making should only be determined by extremely compelling evidence with all other measures exhausted. Absolutism fails children-- a mandate of the Covid vaccine for school prevents parents from the freedom to make individualized medical choices that are best for their children. A Covid vaccine mandate for children to attend school is most detrimental to the least privileged in our community. Persons with means can afford private tutoring, homeschool education, or even relocation out of state. Those parents without will be forced to choose between access of education for their children or their conscience. Restricting education in this way fosters distrust of the medical community and local governing bodies (state & school). We know the detriment to children from school absence and our goal should be to remove barriers

to education, not to create them. Last, the existing mandates for school attendance is not comparable to a novel Covid vaccine mandate. Some differences are obvious: such as the rapid pace of the Covid vaccine roll-out process and that Covid is not the childhood illness that Polio & Measles are. Some differences are more nuanced: such as the difficulty in obtaining an exemption for Covid vaccination, as well as the political and financial influences tainting this public health issue. Please do not misunderstand me. I am not "anti-vax" or "anti-science". On the contrary, I am grateful for vaccination against Covid and have personally volunteered in mass vaccination clinics. I believe science guides us to make the best decisions we can with what we know at the time. As leaders and as parents, it is imperative for us to be thoughtful about how our rules affect all and consider the unintended consequences. Children have suffered the most from our rash decisions over the last 2 years in this pandemic. We can afford to be thoughtful and evidence-based. I appeal to you to please advocate in the best interest for children--resist the Covid vaccination mandate in Washington for school attendance. Thank you.

Children are not the ward of the state. They have parents to care for and make decisions on their behalf. Parents have the right to choose any vaccines their children receive. Covid vaccines should not be the exception. Vaccine mandates are unconstitutional. Lawsuits have been filed and appeal made to the Supreme Court on this matter. Not many children have even got Covid, because they already have an innate immune response that is ready to fight off the virus. So, in addition, mandating they be vaccinated is not a wise use of the resource of Covid vaccines.

Subject: Potential Vaccine Mandate for School Entry

External Email

Dear Members,

I am writing as a parent of school aged children that have burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why.

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extreme detrimental and profound on OUR children and our future.

Sincerely,

Sarah Karr

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

External Email

As a citizen, voter, father, professional and business owner of Washington State since 1992 (30 years!), I am writing to express my extreme disagreement with any proposal to unconstitutionally enforce any vaccination mandate on the population of this state. My family immigrated to the United States from communist Eastern Europe and we have watched with great sadness as this country has slowly but surely shed its priceless freedoms in favor of empty and often ignorant promises from politicians and bureaucrats.

If you vote to impose these draconian measures on my family, we will liquidate our WA holdings and pick up and move our lives out of this state to somewhere where our children can live normal lives instead of living in a constant stream of fear and abuse from those in positions of power. Between my wife and I that's roughly \$1/2M per year in economic activity that will leave this state and as a difficult to replace professional, the knock-on effects of my departure will be much greater as my employer will struggle to fill the empty slot.

You are not only threatening American freedoms, you are driving this state into the ground.

Please wake up and reconsider what you are about to do before it's too late.

Sincerely,

An anonymous citizen of WA State.

As a long time resident of Washington State, I absolutely oppose any mandates vaccines, including the most recent covid-19 vaccine. It is no ruling governments right or authority to determine what goes in a citizens body, even in a time of "emergency". Covid-19, especially, has proven itself not to be the dire emergency our state government has tried so hard to push it to be. When actual data is analyzed, it shows that a very small part of the population is at risk and I would imagine, as such, those people have chosen to be vaccinated. Whether or not a person or their children are vaccinated is the sole choice of said person, and not the government. It is a huge government overreach to think otherwise and Washington is losing many good citizens because of these authoritarian mandate and will continue to lose more.

The government needs to stay in its approved lane and leave citizens to make choices for themselves and their families without interfering.

Subject: PLEASE, No Vaccine for School-Aged Children!

External Email

Dear Sir or Ma'am,

Please do not recommend a vaccine requirement for school aged children! Current research indicates that the risk of not vaccinating is minimal. There are over 53 million 5-17 year olds in the US as of 2017. Using the data provided by the CDC

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fvaccines%2Frecommendations%2Fchildren-teens.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C56f92de4baa24899c01708d9d18338d2%7C11>

as of late Oct. 2021, only 8300 children have been hospitalized and less than 100 have died from COVID. Using these numbers that means that only 0.00015% of our child population has been hospitalized. Further, only 0.0000018% have died from COVID. 0.000043% have had Multisystem Inflammatory Syndrome associated with COVID. Mandating vaccination of these children is irresponsible given the low risk to the general youth population and short time frame in which vaccination of children has been researched.

Additionally, there is conflicting evidence about the ability of children to widely spread COVID. Even if children were super spreaders of the virus, are not we as a nation committed to the protection of all of our vulnerable population - to include children especially. Encouragement of COVID vaccination should be aimed at the adult population, instead of potentially endangering our children.

While vaccination of children may prove a better course of action over time, do not mandate vaccination as the risk is still quite low. Children whose parents do decide to vaccinate for COVID will in most cases be adequately protected.

Thank you for considering this request.

Sincerely,

SaraBeth Wadsworth

---

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. • The vaccine has been directly available to every vulnerable sub-set of the population for some time. 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Hello -

As you get ready to vote on whether or not COVID vaccines should be required for kids to be in WA state schools, I'd like you to vote against that.

Although we are considered to be in a pandemic, there is not enough evidence of the possible side effects for these vaccines for our kids. Any medicine that is ingested or injected in the body has potential side effects. When we inject this into our kids who are still growing and changing we don't know what the long-term effects of this will be.

There is already much evidence of it affecting the hearts of previously healthy children. In fact, at least one other country has already stopped allowing their children to get this vaccine because of the heart-health effects.

Please say NO to this vaccine requirement and say YES to the long-term health of our children!

As an additional note - there have already been many children who were removed from public school because of mask requirements, there will be more who will be removed if a vaccine is required.

Thank you,

Subject: Oppose agenda item #8; Support agenda item #11

External Email

Dear WSBOH members,

"Americans have accepted more harm to children in exchange for less harm to adults."

"American children are starting 2022 in crisis."

These are quotes from David Leonhardt, the author of Tuesday's New York Times article titled, "No Way to Grow Up." He has just come to the conclusion that the adult's handling Covid have enacted extreme damage to the children of the world.

I completely agree with him.

Therefore, I pleading with you: OPPOSE agenda Item #8 and SUPPORT agenda item #11.

Please DO NOT form a TAG group to consider trading education for a Covid shot. This is a bad bargain for kids—it's actually coercion.

Merriam-Webster defines coerce as, "to compel to an act or choice; to achieve by force or threat." If you create the TAG group and support mandatory vaccinations, you are compelling, forcing, and threatening parents to implement YOUR choice. This is abusive.

Apart from the extremely damaging example this abuse of power conditions children to accept, there are piles of data that call into question the benefit of children receiving the Covid shot: only 0.08% of covid deaths are children from 0-17; we don't know what the side-effects are; and dissenting views are being silenced rather than debated. Moreover, most of the at-risk population to Covid has already received their shots, so why should children be coerced?

Don't be one of those adults willing to inflict MORE harm to children.

Instead, support agenda item #11 that will help prohibit the abuse of using EUA products or products that have not completed Phase 3 trials.

Thank you for your time.

Sincerely,

Shawnta Mulligan

Subject: Proposed Policies

External Email

Dear Washington State Board of Health,

I am a life long resident of the State of Washington and I currently reside in the City of Enumclaw, Washington. I am writing to you tonight to relay my concern for an issue you are addressing at your next board meeting. My concern is specifically around your consideration of WAC 246.100.070 and WAC.246.100.040.

I have heard that the Washington State Board of Health is considering allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of people who refuse to voluntarily comply with the request for medical examination, testing, treatment, counseling or vaccination. I understand the Board is considering COVID 19 vaccination to be included in this WAC.

I am requesting that the board vote to decline any language that would allow such a stance. In this time of polarized opinion on the best course of managing the pandemic, inserting such a barbaric method of public health policy will only inflame the polarization.

I respectfully request that the Washington State Board of Health look for a way to manage the crisis in our health care system. Explore and implement plans to increase staffing of hospitals, clinics and long term care facilities. Provide treatment of the sick rather than forced detention of our citizens.

I also ask that you decline the addition of the covid vaccine to the (already lengthy) children's vaccination schedule. These vaccines are still in their experimental phase and have not been properly safety tested. Our children will not be guinea pigs.

I am a mother of two young children and a restaurant worker in my small community. The past 2 years have taken a toll on my family directly, as my children have not attended our public school district because we do not believe in the compliance of enforced mask mandates. The small business I work for has endured 2 years of hell trying to keep up with the restrictions that have been imposed in this state. Following through with these proposed draconian measures will only divide this state even further and any faith in our government will be completely lost.

I appreciate the work the Board does on behalf of the citizens of the State of Washington. Thank you for your service.

Respectfully,

Rachel Brusseau

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Robert Allen

To Whom It May Concern:

Covid shots should ABSOLUTELY NOT be a requirement for our children/grandchildren. Children are low risk for covid and vaccines are still only EUA and the medical issues caused by this vaccine are too much of a risk for our children.

Many parents have already taken their children out of public school and are home schooling them. If this shot becomes a requirement many more of us will have no choice but to take our children out and homeschool them. For every child taken out the school district loses money. Money has already been lost and the potential is there for much more to be lost.

The school district has canceled classes several times because of a shortage of staff due to the result of requiring your staff to be vaccinated. This is NOT fair to our children and it is ABSOLUTELY NOT fair to them or their families to require this vaccine to attend school. Honestly, it is ABSOLUTE insanity.

Thank you for choosing to NOT be insane and require this vaccine to attend school.

Twila Darland

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

The vaccine mandate and this topic on agenda Chapter 246-105 WAC Immunization Criteria, Child care and school entry, is not for the safety of the people. Children have a low risk of getting and being hospitalized by Covid and have a higher risk of being injured by the vaccine and we have yet to know the long term consequences.

The Covid Vaccine is still an experiment and under the EUA. There is no FDA approved vaccine here in the states for an adult or child to have access to so they may CHOOSE yo take.

No person, not child, should be forced to take anything in order to be educated or a part of society. To segregate people has been a lesson in history that should not be repeated. There is no accountability if mine, or your child is injured or dies from the vaccine. Are you willing to have child injuries and deaths on your conscience? This is not your decision but every parents and child's and is unconstitutional for you to do so.

Topic on agenda Communicable and other certain diseases Chapter 246-100 WAC.

If public health and safety is your number one priority then forcing people to be quarantined and held against there will does more harm than good and risks the people having more fear and poses a greater health and safety concern.

There are many examples of this in our history that we should have learned from, not to be repeated.

In the course of the two years a low percentage of people have died from Covid 19 and the vaccine treatment has proven ineffective at contracting, spreading, hospitalization and even death.

I trust you will not repeat history with the overuse of power by segregating and forced health experiments on the population.

Thank you,

Shawna Jones

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely

Carlos Arguello

To those who sit on this board,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I vehemently oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking.

This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), which demands the Board to establish a new rule that prohibits this board from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

I STRONGLY OPPOSE even the consideration of WAC 246-100-070. Forcing people to "quarantine facilities", really? Pick up a history book, those are called concentration camps. Even the consideration of this does not put you on the correct side of history. This happened in 1939 under Adolf Hitler's reign, is that really the side you are choosing?

In addition, a reminder that you ALL work for US, the people, not the other way around. You have NO right to make decisions for other people's children or health without cause. This is why we have a constitution as a nation to protect RIGHTS. You all are stomping on those rights.

Signed,  
A furious constituent

---

The vaccine efficacy and long term effects for children have yet to be revealed. It should remain a parents discretion whether or not to vaccinate their children. Both of my children have already had covid with very minimal symptoms and I don't believe the vaccine is in their best interest in these very beginning stages. Once Pfizer has actually released their data (which isn't even published yet) on the long term side effects, we can make an informed decision. That's all I am requesting, is to know that years have gone by and the vaccine is safe for my children - before injecting them with something we cannot undo.

Hello I am a parent of 4 children in the White River School District in Buckley WA. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. This is such a violation of parental rights. This decision should be left to the parents, not the government.

Here are just a few reasons why I'm against the vaccine...

1) No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2) Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3) There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4) The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots.  
COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research

5) Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity in the future. Please read this for 5 studies that show children already have robust natural immunity to this virus. Hands-off, CDC and Pfizer: Children are to be considered already COVID 'vaccinated' – Opinion – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F%2F>  
)

6) No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffl.facebook.com%2Ffl.php%3Fu%3D%26h%3DAT3Awif5-9Ub\\_nKaZVRtHlzip4QmkeM4QFH6dThjiNnk7ePikM36aDxf5tqECEoZ-th5HbTS2liJUPNpXJ5HGM3napk9PUz8ocSbsXOGxYay-EjG1PtvpPxloXOGGoDSwNA%26\\_\\_tn\\_\\_%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvlsYjm\\_VIEqMqOH-SiAxJAQId9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61\\_ESraJAWOD9RKXSrbC09V\\_5TtosrzhCF4tCUITZ7y-yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-uHHmh4T1krQGnUNjERnuaSVfjJNQ&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C852206b316a849](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffl.facebook.com%2Ffl.php%3Fu%3D%26h%3DAT3Awif5-9Ub_nKaZVRtHlzip4QmkeM4QFH6dThjiNnk7ePikM36aDxf5tqECEoZ-th5HbTS2liJUPNpXJ5HGM3napk9PUz8ocSbsXOGxYay-EjG1PtvpPxloXOGGoDSwNA%26__tn__%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvlsYjm_VIEqMqOH-SiAxJAQId9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61_ESraJAWOD9RKXSrbC09V_5TtosrzhCF4tCUITZ7y-yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-uHHmh4T1krQGnUNjERnuaSVfjJNQ&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C852206b316a849)  
)

7) You may "enjoy" reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate (NNTV) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? (substack.com  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffl.facebook.com%2Ffl.php%3Fu%3D%26h%3DAT0nrB0IeRfjSU1m6TybVA4tib52f\\_CE48VvX4M79gNAji9ed-oANEydyFYuxrdYzP3aivVC4RIVA%26\\_\\_tn\\_\\_%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvlsYjm\\_VIEqMqOH-SiAxJAQId9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61\\_ESraJAWOD9RKXSrbC09V\\_5TtosrzhCF4tCUITZ7y-yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffl.facebook.com%2Ffl.php%3Fu%3D%26h%3DAT0nrB0IeRfjSU1m6TybVA4tib52f_CE48VvX4M79gNAji9ed-oANEydyFYuxrdYzP3aivVC4RIVA%26__tn__%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvlsYjm_VIEqMqOH-SiAxJAQId9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61_ESraJAWOD9RKXSrbC09V_5TtosrzhCF4tCUITZ7y-yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-)  
)

)

8) In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3po7b79fwuO8WAjgg43PhjbA\\_c15hIA%26\\_\\_tn\\_\\_%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvsYjm\\_VIEqMqOH-SiAxJAQID9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61\\_ESraJAWOD9RKXSrbC09V\\_5TtosrzhCF4tCUITZ7yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-uHHmh4T1krQGnUNjERnuaSVfJjNQ&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C852206b316a849](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3po7b79fwuO8WAjgg43PhjbA_c15hIA%26__tn__%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvsYjm_VIEqMqOH-SiAxJAQID9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61_ESraJAWOD9RKXSrbC09V_5TtosrzhCF4tCUITZ7yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-uHHmh4T1krQGnUNjERnuaSVfJjNQ&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C852206b316a849)  
)

9) It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website. Adverse Reactions | Real Not Rare These are real people. Their stories are real. At a minimum, why are these being hidden and why isn't Pfizer investigating why people have these types of reactions? If you only have time to watch one of these, how about this one: Ernest Ramirez (17 yr old son) (realnotrare.com

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%36wCtW5Ry6hHxPJQ\\_y-nre8WJQU6OdhugRbz5A6X4wSfzvwJ-GIe6hLp-oIf-vp66AAMYtppqaL1g\\_RP00UnVIPGyO3fokCQ%26\\_\\_tn\\_\\_%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvsYjm\\_VIEqMqOH-SiAxJAQID9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61\\_ESraJAWOD9RKXSrbC09V\\_5TtosrzhCF4tCUITZ7yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-uHHmh4T1krQGnUNjERnuaSVfJjNQ&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C852206b316a849](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%36wCtW5Ry6hHxPJQ_y-nre8WJQU6OdhugRbz5A6X4wSfzvwJ-GIe6hLp-oIf-vp66AAMYtppqaL1g_RP00UnVIPGyO3fokCQ%26__tn__%3D-UK-R%26c%255b0%255d%3DAT3DyGabWsKfNHJlvsYjm_VIEqMqOH-SiAxJAQID9vzotMeRslQqtxwWSl60DkzcfRQC0zIcsXJdr61_ESraJAWOD9RKXSrbC09V_5TtosrzhCF4tCUITZ7yMVgC2QuxAmbUzBMfTMViIZYuZYfkD2xS674-jCi6-uHHmh4T1krQGnUNjERnuaSVfJjNQ&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C852206b316a849)  
) Do you really want to force these injections on innocent children? Do you want to cause this kind of pain to parents?

I've listened to hours and hours of testimony and information from people on both sides of this issue and the only support I've heard from adults in support of COVID vaccines for children is that they will allow us to move past this pandemic and allow a return to normalcy.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Aside from all the research showing the risks and ineffectiveness of the vaccine, it really boils down to this: the decision to vaccinate my children should lie with ME, their parent. The government is overreaching again. The government should not be making decisions on what is best for my children. God entrusted my children to me when he created them, and he gave ME the responsibility to decide what is best for them.

I would really appreciate your support in this matter. Pls allow decision making for our children to rest with the parent.

Sincerely,

Michelle Kinney

Subject: Your meeting next Wednesday January 12th  
Importance: High

I ADAMANTLY OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school and childcare settings. I oppose COVID-19 shot mandates, period! There is overwhelming evidence that these experimental shots are wholly unnecessary in the low-risk pediatric population and are causing documentable harm to kids. If you take this step, you will be responsible for harming innocent children and the public school systems will see an exodus the likes of which the state can ill-afford to deal with as well. Well-informed parents are the best defense against this abomination and assault on the freedom of informed refusal. The UW itself (in their own Covid Town Hall on December 29th), reported 27 cases of myocarditis in their own population of kids who got the shot, and they have absolutely no way to guarantee the harm caused will not be long-term in those kids...this is only the tip of the iceberg. THERE IS SIMPLY NO LONG-TERM DATA ON SAFETY/USE IN THIS POPULATION! Besides, this is not a true vaccine, as evidenced by the tsunami of Omicron currently in those being "fully vaccinated". Our children and grandchildren should not be sacrificed for the old/weak/infirm who can choose the shots as consenting adults and therefore assume their own risk of harm. See references below.

I do SUPPORT Informed Choice Washington's Petition for Rulemaking — the petition is

item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. Where there is risk, there must ALWAYS be informed consent, which includes informed refusal.

I also adamantly oppose any attempts at our government to house individuals against their will in the so-called "Quarantine Camps"/hotels which have been re-purposed for isolation, especially if it is involuntary quarantine. There is absolutely no reason for this to even be a possible public health measure and needs to be removed from state public health powers.

#### Vaccinating Children Means Unnecessary Risks

##### 1. Deaths by Age U.S. : 0-18, Centers for Disease Control (CDC)

Subject: January 12 Board of Health Public Meeting proposed WAC changes.

External Email

To whom it may concern,

I strongly oppose of all these proposed WAC code changes. They are in complete opposition to our constitutional rights as Americans and our freedom of medical choices. There is no reason that any government agency should have the right to force any citizen to get medical treatment if they don't want to, and certainly shouldn't be forcing families, children and schools to get vaccinated. It has proven ineffective against covid and carries a dangerous risk of side effects. I strongly oppose the covid vaccines being added to school vaccine requirements. I strongly oppose the use of police to enforce people getting vaccinated and strongly oppose the requirement of people to be vaccinated. This is a free country and we have a God given right to have freedom of choice. Within that freedom includes freedom to chose medical treatments we want or don't want.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: 1. Already reading about children dying from heart issues after receiving vaccines. There are no long term studies.  
2. Vaccines are Emergency use, they do Not stop the spreading of covid or stop vaccinated from developing covid.  
3. Mandating should never be an option.  
Sincerely Teresa Neiman

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

This is in regards to immunization criteria for childcare and school entry for children.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Please do not make it mandatory for Washington State kids to be forced to take the covid19 vaccines. As a mother of six and a grandmother of 13, I adamantly oppose this proposed action due to information in the medical community that kids will only experience mild symptoms of the virus and will not have lasting effects. I have seen this with some of my grandchildren - nothing more than a mild cold and then immunity. I strongly believe vaccinating children with the currently available medicines is dangerous to their health and their future. Thank you, Kathy Dizard

Subject: Opposition to Covid shot school requirement

External Email

To whom it may concern:

As a Clark County parent to 2 young boys I would like to address the following concerns regarding the Covid 19 shot. I do not support the Covid 19 mandates and I do not support the Covid 19 shot being added to the list of required school vaccinations.

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose all COVID-19 shot mandates.
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking, item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Respectfully,

Sarah Serhan

Subject: Oppose mandatory Covid vaccine for children

External Email

Honorable Board members,

I am asking you to OPPOSE any mandate on Covid shots for children as a requirement to attend K-12 public schools.

Children are at extremely low risk for Covid. There are no long-term studies to document any history of safety. Studies do now document that vaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Thank you,  
Violina Pimonenko

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Mandate for covid shots for kids. This is not the states or board duty to force a covid shot on children. It is a parent's choice. This should not even be discussed by the board or

anyone else. I have seen the side effects from the vaccine, and they are awful. It is in trial. So don't be using children for Guerina pigs. No one knows the long-term effects of this.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

You are not or won't listen to the side effects of the vaccine. It is in trial. It is killing people and ruining lives. Personal choice. Not the board or government.

Sent: Thursday, January 6, 2022 8:47 PM  
To: Schreiber, Tracy N (SBOH) <Tracy.Schreiber@sboh.wa.gov>  
Subject: Jan 12th (9:30am - 3:30pm) MEETING re. WAC Codes

External Email

I have just been informed that on Jan. 12th (from 9:30 AM to 3:30 PM), the WA State Board of Health will be discussing applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

As a European Jew (I am also an American Citizen, registered to vote in WA State as well as being a resident here, in WA), I am horrified by the amendments to the laws you are seeking to implement. The idea that someone can come to my door and decide what I PUT INTO MY BODY, or TAKE ME AWAY, or PUNISH ME for NOT COMPLYING, TRAUMATIZES ME.

Is that what you are looking to do? TRAUMATIZE people??

I am OPPOSED to implementing the WAC 246-100-070 to FORCE an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility.

I am OPPOSED to implementing WAC 246-100-045 following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination WA 246-100-040.

In England, in 1940, at the age of 20, my mother joined the Ambulance Corps. Subsequently, as bombs fell on London and people went running for the shelters, my

mother was climbing into an ambulance to go out looking for those wounded. (After the war, she came to America, where she met my father. She lived here the rest of her life). If she were here NOW, she would be dumb struck by the measures being proposed today, BY THIS GOVERNMENT, as well as appalled and shaken to her core.

On the other side of the globe, in San Francisco, my father's nanny, Toshi, who was Japanese, was taken away to a camp, 'GUILTY' only BY ACCIDENT OF BIRTH.

As a society, we have come to admit that draconian measures such as these, are shameful, are wrong, and constitute Government Sanctioned Discrimination.

Under Title 21 Code of Federal Regulations section 50.23 and 24, it is illegal to make anybody participate in an experimental program using coercion. That is how the United States law embraces the Nuremberg Code.

If, as a Nation, we are to make reparations for the past, it is incumbent upon us to NOT SLEEP IN THE PRESENT, making these mistakes all over again, albeit with different sectors of the population, under the pretense of caring for people's safety. A Government trying to FORCE people to take something into their bodies that they have NOT agreed to and DO NOT WANT, is Government Sanctioned rape.

As a U.S. Citizen, I go on the record as OPPOSING Agenda # 8: the WA State Board of Health (or any other entity) forming a Technical Advisory Group (TAG) to review information about Covid-19 shots with the intention or consideration of MANDATING them for children of ANY age.

I wholeheartedly SUPPORT Agenda #11 (Informed Choice Washington's petition): I am asking the WA State Board of Health to create a new rule that PROHIBITS the adding of ANY 'Emergency Use Authorized' (EUA) product/substance/drug or any licensed product that lacks completed phase 3 trial studies to the School's 'Required' List.

I OPPOSE implementing COVID-19 injections as part of school immunization requirements using WA 246-105.

A year into the vaccinations and we are seeing that they do not work, that those vaccinated can catch AND transmit covid-19, that there have been massive numbers of people irreparably harmed by them, with the drug companies NOT interested, NOT HELD ACCOUNTABLE, indemnified. This is HORRIFIC. History will be the final judge, but my hope is that people who know their history will intervene to see that we do not repeat heinous mistakes.

Need I say more?

Sincerely,

Andrea Jeffress

(US Citizen)

---

To men and women of the Board, i; a woman, do not consent to your heavy-handed approach to my health and health of my child. I do not give you the authority to force any medical procedures on me, my child, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial. I follow science closely; science is clear that children have close to zero risk of covid death; zero without co-morbidities. No risk, no benefit of mandates. Please refer to this recent German study (link: <https://www.medrxiv.org/content/10.1101/2021.11.30.21267048v1.full.pdf>), which concludes: "Our analysis of the data shows that the SARS-CoV-2-associated burden of severe disease or death in children and adolescents is low. This is particularly true for COVID-19 related symptoms in 5-11-year old children without comorbidities". The mistrust the public is experiencing is due to the extreme measures that have been taken against the people and the very heavy-handed measures that have not been supported by the actual data. [https://covid.cdc.gov/covid-data-tracker/#trends\\_dailycases](https://covid.cdc.gov/covid-data-tracker/#trends_dailycases)  
<https://crsreports.congress.gov/product/pdf/LSB/LSB10443/7> Please also review Pfizer's 6-month data. I've attached the document along with the link under "breaking news" called "More Harm Than Good." Although this is from Canada, we share lots of information, because we are all using the same vaccines.  
<https://www.canadiancovidcarealliance.org/> Finally, i, along with many others, intend to hold those responsible for bringing forth the mandate for Covid-19 vaccines to all students and any potential health damage. So, i urge you to vote from your innermost consciousness and with regards to the scientific data and risks and benefits assessment, with a Precautionary Principle in mind. i, sincerely thank you for your community service. It is only because of the people on the ground, like you and i, that real change is ever possible. i, sincerely believe that this still holds true! Thank you once again for honoring the Hippocratic Oath and the Nuremberg Code by voting NO.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Yasha Carpentier

Subject: Vaccine Mandate for Children

External Email

Dear Ms Schreiber

Please do not support vaccine mandate for children. Such a mandate has the potential and high likelihood of great harm to our children. Children are at very low risk for Covid. The few who do experience Covid, have very mild symptoms, and also, they then have natural immunity.

These children's health decisions should be left to their parents, not the government.

Sincerely,

Sara Gamache

---

WAC 246-100: Involuntary quarantine and WAC 246-105 children's vaccination for covid-19

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Involuntary quarantines will make people less likely to be willingly tested and will pit the government against its citizens. Involuntary quarantines and other forceful measures not associated with punishment for a crime are contrary to the freedom America stands for. Both these measures have not shown themselves to be more effective in states where they have been tried than in states where there are no such measures. I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I almost had a heart attack from the vaccine. It's not effective in stopping the spread of the disease. Kids are the least known to spread and have health complications from the virus yet suffer from the vaccine. I was denied medical waiver/exemption and I was told I would die if I got the second shot. This is outrageous. I know what's best for my kids and this is not it. So many more kids are suffering from the vaccine as well as mentally from the last two years of Covid lockdowns and limitations. Kids are overwhelmed with stress, anxiety and fear. Children's Hospital has records of 8-18 year olds suffering from mental disorder LW. They need to be in school, in sports and free.

Hi All,

Our children are not test subjects. It has been proven time and again that the vaccine does not prevent someone from getting or spreading COVID!!! In fact, the vaccines are causing the virus to mutate.

DO NOT MANDATE THIS VACCINE FOR CHILDREN, LEAVE OUR KIDS ALONE!

Thank you,

Subject: I DO NOT CONSENT!!!!

External Email

"Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" DO NOT CONSENT. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will, your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rulemaking petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or the school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualifies as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or

effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." Source: <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for the market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation.

Source: <https://www.fda.gov/media/153447/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153447/download>

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it."

9. International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

"Consensus is clear among MDs and medical PhDs: following 20 months of exhaustive research, millions of patients treated, hundreds of clinical trials performed and scientific data shared worldwide, they conclude that healthy children and the COVID-recovered should be excluded from restrictions and vaccine mandates."

Source: <https://globalcovidsummit.org/news/thousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fglobalcovidsummit.org%2Fnews%2Fthousands-of-physicians-and-scientists-reach-consensus-on-vaccinating-children-and-natural-immunity&data=04%7C01%7CWSBOH%40sboh.wa.gov%7Cda081f3acfd244e464e308d9d208c168%7C110>

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine

Adverse Events Reporting  
System (VAERS), than death  
[www.fda.gov](http://www.fda.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.fda.gov%2F&data=04%7C01>

fda.gov

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Ffda.gov%2F&data=04%7C01%7C>

Lisette

Lisette Caire

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting

System (VAERS), then deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID

vaccines are unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children

and this form of treatment is unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and

culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials

could be prosecuted to full extent of law and you may be held personally and criminally liable for any injuries or deaths

that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of God's Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as

they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all men and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of God's Holy Laws, of which the

protection of my body is one of those spiritual laws that supersedes all man made laws in

my religious conscience."

Sincerely,

Rachael Swanson

I oppose mandating the the Covid-19 vaccine for the following reason. 1. Covid-19 poses little to no risk to children between the ages of 0-18. 2. There is a correlation between increased rates of myocarditis in males less than 30 years of age and taking the vaccine. There is no dispute that the vaccine is linked to an increased risk of myocarditis in males under 30 years of age. 3. The long term studies of the vaccine are incomplete. No vaccine has been mandated before the long term affects were understood. 4. According to CDC data, Omicron now makes up 95% of new cases in the US. Omicron appears to hospitalize people 83% less than Delta and be 40 times less fatal than Delta. 5. Data from Canada and Israel show that the vaccine does little to prevent infection or transmission of Omicron. Mandating the vaccine would have no affect on Covid-19 case rates.

Mrna Vaccines are not vaccines, they are gene therapy, and therefore change the RNA of the patient getting the shot. we do not know the long term damage this will do to our children for future generations. On the short term, this vaccine has been proven ineffective, and natural antibodies are 27 more times better than the Mrna vaccine. Children are also not affected by Covid-19 AKA the Flu, but they are being affected by Covid-19 vaccines with multiple cases of young athletes dropping dead or collapsing on the courts or fields this so called vaccine is now killing young and old people with clotting, strokes, and heart attacks. I am still in aw that you are pushing this kill shot on our children. My kids are not owned by Pfizer, and will not be test subjects.

To The Board Members of the WA state Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual Prevention. No one can tell me what the effects may be on my child in 5 years or 10 Years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for

them selves.

Thank you for your time.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, Rhonda S. Dormaier

The following survey response is submitted:

1.

State Board of Health Meeting Date:

---

January 12th, 2022

2.

Agenda Item or Issue:

---

involuntary quarantine and children's C-19 Vax

3.

Your Name:

---

Kevin Harris

4.

Do you have a professional title?

2. No

5.

Are you representing an organization?

2. No

6.

Address:

---

12433 Admiralty Way Q204 Everett, WA 98204

7.

Email:

---

kharris19@mail.csuchico.edu

8.

Phone Number (Include Area Code):

---

9168137986

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

---

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Since children are the least affected by this virus it is truly a moot point to vaccinate these children against an ever mutating virus that will also require boosters. Science does tout a natural immunity and if you were really following science you would take into account what the majority of epidemiologists are reporting. Also, parents are the ones who should make this choice.

The efforts in protection from this virus should be focused on the elderly and at risk population rather than the not at risk.

Too bad that this has become a political issue rather than a true caring for your fellow man. Give someone just a little power and see what they do with it. Draconian measures never fair well for long.

Carole and Paul Pelela  
Shelton, WA

To who it may concern:

I would like to stay that I and everyone I know do NOT agree with this idea. The government has no constitutional right to dictate what I inject into myself or my children. You are forcing a broad strategy to an entire population. People are different and virus as well as health treatment have never had a cookie cutter solution, ever. On top of our government trying to over step on what treatment we decide to take, you are trying to implement measure taken in other countries, such as forced quarantines and vaccine passports. These are unacceptable and go against everything this country stands for. You people should be ashamed of yourselves for even bringing this up. You swore an oath to uphold our constitution and the rights provided by it. To make matters worse you propose this and the vaccine doesn't even protect you from getting or passing along Covid. It may help with the symptoms but only people with underlining health conditions should truly take the vaccine. This is a virus that despite multiple errors in reporting, still has a 98% survival rate. There are other treatment options out there that are backed by science that a particular group of politicians in this country have tried to suppress. If you truly care for the people of this state then help them to have all options available.

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. We completely oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Robert Larson & Sarah Larson

#### External Email

I ADAMANTLY OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school and childcare settings. I oppose COVID-19 shot mandates, period! There is overwhelming evidence that these experimental shots are wholly unnecessary in the low-risk pediatric population and are causing documentable harm to kids. If you take this step, you will be responsible for harming innocent children and the public school systems will see an exodus the likes of which the state can ill-afford to deal with as well. Well-informed parents are the best defense against this abomination and assault on the freedom of informed refusal. The UW itself (in their own Covid Town Hall on December 29th), reported 27 cases of myocarditis in their own population of kids who got the shot, and they have absolutely no way to guarantee the harm caused will not be long-term in those kids...this is only the tip of the iceberg. THERE IS SIMPLY NO LONG-TERM DATA ON SAFETY/USE IN THIS POPULATION! Besides, this is not a true vaccine, as evidenced by the tsunami of Omicron currently in those being "fully vaccinated". Our children and grandchildren should not be sacrificed for the old/weak/infirm who can choose the shots as consenting adults and therefore assume their own risk of harm. See references below.

I do SUPPORT Informed Choice Washington's Petition for Rulemaking — the petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. Where there is risk, there must ALWAYS be informed consent, which includes informed refusal.

I also adamantly oppose any attempts at our government to house individuals against their will in the so-called "Quarantine Camps"/hotels which have been re-purposed for isolation, especially if it is involuntary quarantine. There is absolutely no reason for this to even be a possible public health measure and needs to be removed from state public health powers.

To whom it may concern,

This has been a grueling two years. Parenting in this pandemic and political climate has been exhausting. We are fighting corruption and uphill battles on a daily basis. From mask mandates to school closures to inconsistent covid restrictions and rules to mental health stability to the threat of mandatory c-vaccine for our children. ENOUGH IS ENOUGH! Our children are not at risk, therefore the vaccine should always be a choice and informed consent is key!! All three of my kids had covid and they had very mild symptoms with no long term affects. They have greater protection from future infections because they had covid. Let their immune systems continue to do what they were designed to do. They have a higher chance of vaccine injury than they do of complications from the illness or death. It is not in the best interest of our children to receive the vaccine. We will not tolerate this overreach of power and are drawing a line in the sand. If the vaccine is mandated for school aged children we will pull our kids from public school and add to the already increasing number of students leaving the public school system. It is my understanding that there will soon be a discussion and vote on this matter. Please, I implore you, do not vote the mandatory c-vaccine into existence. Stand up for our families, children and future generations in the state you represent and say no!

Thank you.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population.

Signed,

Rhea Hendricks

Subject: Vaccine requirements

External Email

My family strongly opposes requiring the Covid-19 vaccine to attend school. All other required vaccines have had a MINIMUM of 10 years of studying for efficacy, and side-effects before becoming a required vaccine.

The small pox vaccine was first developed in the late 1700's, and was not mandated for almost 200 years later, in the mid 1900's.

Polio took nearly 50 years.

We simply do not know any longterm effects this vaccine will have on our children. I personally know a 14 year old girl who lives in Spokane, who days after receiving her second shot fell to her knees screaming in pain that her heart felt like it was going to explode, while she was playing basketball. She is now unable to play her favorite sport.

There are MANY reports of adverse reactions to the vaccine in children, including myocarditis, seizures, paralysis, etc.

More children have been harmed by the vaccine than have been by the virus itself.

If the vaccine becomes a requirement for school, we will pull all of our children out of the Peninsula School District.

Please do NOT vote to make this vaccine a requirement to attend school, and do not vote for the state to have the power to forcefully quarantine, separate families, and administer vaccinations against people's will.

Subject: Say NO to vaccine mandates for children

External Email

Please, please, please do not mandate experimental vaccines for our most precious national treasure, our children! We do not have long terms studies and the risk to children from the vaccine far outweighs the benefits!!!!

Children ARE NOT at high risk of serious illness and death from Covid. The vaccine is not as effective as was hoped for. Mandatory vaccination for children is a very big risk!  
Please say No!

Respectfully,  
Vicki

1.

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

This is horrible and against our constitutional rights.

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thank you,  
MeLainee

Children are at low risk in contracting Covid-19 and recover quietly if do contract Covid-19 because of their strong immune system. They should not be forced receive a shot of a bio-agent that took less than 6 months to develop and has not been fully tested for short or long term side effects. There has been some cases of severe side effects and even death in healthy children that have been given the shot.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7dfd4f8b63414ab1002208d9d1fb>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Sincerely,

Robert Kennett

Subject: Oppose Covid 19 vaccine for children

External Email

I urge you to reject the imposition of a covid 19 vaccine requirement for children in Washington State. Children have a nearly 100% recovery rate from Covid 19, they have not been shown to be spreaders of the virus, and should never be required to receive an experimental EUA drug known to cause severe side effects and death.

The tyrannical vaccine mandates that have been imposed in many work and school settings for children age 15 through adults and elderly are not only unconstitutional but also pose a great health threat. These vaccines have not only been unsuccessful in stopping the spread of covid 19 but have also caused severe side effects including cardio myelitis, Guillame Barre syndrome, blood clots, stroke, heart attack, miscarriage, deep vein thrombosis, neurological disorders, and death, all of which are being reported in unprecedented numbers on the VAERS reporting system. Many doctors and scientists of good repute have spoken out against using these vaccines in children. Any other vaccine with even a fraction of these side effects would long since have been pulled from use.

You are charged with giving good guidance to and safeguarding the health of the citizens of Washington state. Please do not impose these dangerous experimental vaccines on our children!

Subject: Do not mandate child vaccine

External Email

To Whom it May Concern,

You have been charged with doing the right thing to promote the health of children in our state. I strongly oppose any requirement forcing vaccinations on children. The mRNA gene therapy that is known as the vaccine for covid has its place as a tool to prevent severe illness among our susceptible populations. However any proposal that acts like a healthy child is on the same level as a elderly individual with multiple comorbidity is ludicrous.

Doing "something" does not show concern, it only shows that you are not weighing the facts. The only honest answer regarding this covid vaccine's long term safety profile is... we don't know yet. And ignorance is not a reason to enroll children in this irresponsible ongoing drug trial.

Children have less than a .003 percent fatality when infected with covid. Is that any reason to push a short sighted agenda with dubious ties to big pharma?

Sincerely,  
Dr. Ray Pope  
Camano Island, WA

To whom it may concern:

I am a mother of 5 and the wife of a firefighter. I teach for a home education program and I have battled autoimmune illness for most of my life, very severely in the last 7 years. All of these experiences give me significant interest in the agenda for the January 12, 2022 meeting.

I am in opposition to the following:

1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;

There is NO evidence that those with natural immunity to Covid-19 or those who are unvaccinated are of greater threat to their communities. In fact, both those who are vaccinated and those who are unvaccinated can still transmit the virus, as evidenced in the very high number of vaccinated firefighters who are currently sick with Covid. Any type of mandatory quarantine would not only be unnecessary and illogical, but an egregious affront to citizens' civil liberties.

2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

There are currently NO vaccines available for use in the United States that are not still under emergency use authorization. Covid-19 poses less than 1% risk of mortality to children and there are no long-term studies done on risks due to the vaccine. Please do not jeopardize our children's health and futures.

Sincerely,  
Cutzi Jobes

Dear Board members,

I write to you today to discuss the overreach of Government concerning a mandatory vaccine for school age children. It is unethical to require an experimental gene therapy vaccine still under Emergency Use Authorization. As per Senator Ron Johnson and Liberty Law firm stated:

Letter to the FDA

<https://childrenshealthdefense.org/wp-content/uploads/2021-08-26-Letter-to-FDA-re-Comirnaty.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fwp-content%2Fuploads%2F2021-08-26-Letter-to-FDA-re-Comirnaty.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cde72c6d7dbd94307367308d9d1a867cd%7C11d0e2>>

"As I stated to you in my letter dated August 22, 2021, "I see no need to rush the FDA approval process for any of the three COVID-19 vaccines. Expediting the process appears to only serve the political purpose of imposing and enforcing vaccine mandates."5 Because the FDA-approved Comirnaty vaccine is not generally available in the U.S., but the Pfizer-BioNTech COVID-19 vaccine will continue to be used in the U.S. under a reissued EUA, the FDA seems to be confirming my suspicion."

According to Liberty Council, Lawfirm

<https://lc.org/newsroom/details/082721-fda-does-a-bait-and-switch-with-covid-shots>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Flc.org%2Fnewsroom%2Fdetails%2F082721-fda-does-a-bait-and-switch-with-covid-shots&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cde72c6d7dbd94307367308d9d1a867cd%7C11d0e2>>

In other words, there is currently NO FDA approved COVID-19 injection available anywhere in the United States. Every COVID shot in America remains under the EUA law and thus people have the "option to accept or refuse" them;

Liberty Counsel Founder and Chairman Mat Staver said, "The FDA has apparently tried to deceive people by issuing its two confusing letters without proper explanation. Despite the FDA's sleight of hand, there is currently no FDA approved COVID shot available in the United States. Even if there were an FDA approved COVID shot available, people still may request that employers, schools, and the military accommodate their sincerely held religious beliefs."

Requiring any of these Experimental Gene Therapy EUA vaccinations in schools makes each and every one of you liable and responsible. Therefore; in violation of Nuremberg Code. See attached PDF below:

<https://history.nih.gov/download/attachments/1016866/nuremberg.pdf?version=1&modificationDate=1589>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhistory.nih.gov%2Fdownload%2F1016866-nuremberg.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cde72c6d7dbd94307367308d9d1a867cd%7C11d0e2>>

We, the citizens of Washington State, and the rest of the Nation, will be watching and holding you all responsible for the decisions you make January 12th. We will pursue every lawful avenue necessary to remove each and every board member, as well as file criminal complaints if this becomes mandatory for school age children.

Sincerely,  
A concerned Washington State Citizen

WA State Board of Health,

I am in support of Dr. Xavier Figueroa's petition requesting that the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

To require the administration of a medical procedure under an EUA is illegal and immoral. That is especially the case of a child who can never provide informed consent by the very virtue of their age.

This vaccine has not been studied long enough to understand its effects on the human body and how to treat potential injuries caused by said vaccine. Until more studies have shown the side effects are like to none, no person should be required to receive this vaccine, especially children who have years to live and may suffer life long consequences due to this requirement. Children's survival rate after contracting covid is incredibly high, new drugs and treatments for severe cases of covid are being discovered. Children should NOT be required to get this vaccine to obtain a public education until this vaccine has long term studies that show it is safe for children.

COVID-19 vaccine mandate: Reviewing Antigens for Potential Inclusion in WAC 246-105-030

11.

Are you Pro or Con on the proposal?

2. Con

---

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. • The vaccine has been directly available to every vulnerable sub-set of the population for some time. 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public. While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. 8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable. • Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • Parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children have an extremely low risk for Covid  
Vaccines are still only EUA  
There are no long term studies to document any history of the safety of the vaccines  
Studies DO now document that vaccinated & unvaccinated can both transmit Covid, therefore  
the Vaccine apparently is NOT stopping the spread of the virus.

thank you,

Washington State Board of Health,

I believe the Covid vaccine should not be a requirement for children to attend school or childcare in this state.

The science and data show that children are at very low risk for contracting or transmitting Covid or any of its variants.

Deciding to vaccinate a child against a virus with a 99.7% overall survival rate is the parent's responsibility, not that of the State.

Thank you.

Kerri Surface

External Email

To the Washington State Board of Health,

I am writing to express my deepest concern and adamant rejection of your proposal of possibly mandating children to receive the Covid-19 vaccine in order to attend school or participate in society in Washington state, whole or in part. Children are at extremely low risk for Covid and the vaccines are only authorized for emergency use and have proven to be harmful or fatal to previously healthy individuals. This is not a gamble I am willing to take. If this is mandated, we will be pulling our children from public or private school and abandoning this state. Please leave the decision to be vaccinated or not against Covid-19 up to the individual and keep private medical decisions private and respected. Thank you.

- Veronica

Children are less than .10% at Risk. Why are we mandating the least at risk in our population get vaccinated? This is not about science and is in fact ignoring much about science. We continue to have forced masked mandates that are mere symbols and completely useless. Please make this about what is truly best for children and not political rhetoric and control. Allow parental choice and freedom.

---

I am against the Covid-19 vaccine being added as a requirement for public school entry and urge you to allow parents to be the decision makers as to whether their children are required to be vaccinated with the Covid-19 injection. Children are lowest at risk health wise to harmed by Covid-19 and to mandate a vaccine which is not even currently authorized by the FDA (outside of emergency use) until a future version becomes available in 2023 is dangerous and discriminatory. To mandate a vaccine that can potentially cause more harm then the virus itself, clearly brings into question the motivation behind the potential action.

the COVID vaccine should not ever be placed on children or adults as a mandatory stipulation for employment or education. The purpose of vaccines is to provide antibodies however those with natural antibodies from having COVID naturally already have them.

Parents should always make health decisions for the best of their families, not the state/government. There has been excessive overreach in recent months and its time these unconstitutional edicts stop.

Let Washington State be free. Free of masks. Free of restriction. Free to make personal choices with no coercion or fear.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Parents should be able to decide if the vaccine is right for their own children.

There is no long term data on the side effects of the vaccine.

Currently, the vaccine is not combatting the virus in people of all ages. Therefore, the reason to receive the virus is moot.

January 6, 2022

Comments presented to the Immunization Advisory Committee for the Washington State Board of Health related to WAC 246-105-030 for their deliberation about requiring a COVID 19 vaccination for Washington schools/child care on January 12, 2022.

My initial comments are related to general information known to all about this pandemic. First, the only vaccines, even for adults, available in the US are all Emergency Use Authorization types. The Pfizer Biontech FDA approved vaccine Cominarity is only available in Europe and this is only available to adults not children anyway. Second, since there are many new treatments that appear to be effective in preventing morbidity and mortality at the same time as Omicron is rampantly being passed by both vaccinated and unvaccinated it doesn't make much sense to try to prevent spread by further vaccination. Third, the research gathered over the past two years suggests that children are at very low risk of morbidity or mortality from the virus, and at least with previous variants not effective spreaders. Children who have been infected and recovered have a robust immune response to prevent reinfection. We don't know about Omicron yet. The research on the vaccine in children only had 2 months of data and the FDA even reported that there wasn't really a strong relative risk difference between acquiring the virus vs vaccine adverse events in the 5-11 age group. Finally, by the time this would go into effect there could be even more variants that the vaccine doesn't even stop the disease at all. What is the rush to vaccinate children with something that may not be effective and may cause lifelong problems? I don't believe any of you want our children to be an ongoing medical experiment with unknown outcomes.

The following are specific responses to the nine criteria you are to use for your deliberations:

#### Nine Criteria to Consider in Evaluating Antigens

##### I. Criteria on the effectiveness of the vaccine

1. A vaccine containing this antigen is recommended by the Advisory Committee on Immunization Practices and included on its Recommended Childhood & Adolescent Immunization Schedule.

The vaccine for all children of school age is currently only being used under Emergency Use Authorization (EUA). To that end, unless the FDA changes that to "approved" it cannot legally be required for children.

2. The vaccine containing this antigen is effective as measured by immunogenicity and population-based prevention data in Washington State, as available.

Since there were only two months of data presented to the FDA for the 5-11 age group before EUA authorization, there has been no data presented as to its effectiveness in Washington State so any mandate is definitely premature.

3. The vaccine containing this antigen is cost effective from a societal perspective.

Because the Federal Government is paying Pfizer for all vaccines being used this criteria is moot.

4. Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects.

Using the VAERS data for 6-17 year olds in the state of Washington in 2021 (as of December 24th) the total reported is 652 events. In Spokane County since the start of the pandemic there have been 117 hospitalizations in the 0-19 age groups and only 3 deaths. Because of the way data are reported, the hospitalizations and deaths could be "with Covid" and not "from Covid". Since the vaccines have only been available for about 6 months 652 events compared to 3 deaths in two years the risk benefit ratio does not suggest this is an acceptable level of side effects.

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

The data from Spokane County Health District from the start of the pandemic to this week for the 0-19 age group as stated above is only 117 hospitalizations and 3 deaths. Because the data isn't broken down by school age, the breakdown by 0-9 and 10-19 is 6,461 and 10,673 cases, 54 and 63 hospitalizations, and 0 and 3 deaths. The hospitalizations are 1.2% and 1.4% of the total, and deaths are 0% and 0.3% of the total. If seniors were your population of interest, it would make sense, but we are talking about children who have essentially 0% risk of morbidity or mortality.

6. Vaccination against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

Data reports from all countries are consistent that the Omicron variant is not prevented by vaccination. Those vaccinated and boosted are equally able to spread the disease as those who are unvaccinated so at the present time when over 90% of cases are reported as Omicron this criteria fails. Unless there is a new variant that becomes dominant there is no reason to require a vaccine mandate for school age children.

## III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

Because these are EUA vaccines it doesn't matter whether they are acceptable at this time.

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

Unless someone on this board is able to give effective informed consent (including anything included in the VAERS report) of an EUA vaccine, which includes liability protection for the manufacturer, and is willing to take on the liability of any adverse effects that may occur, the costs incurred for any adverse effects could be cost prohibitive to the state.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

While the accessibility of the vaccine does not create a burden for the parent/caregiver, if there were to be an adverse effect it could create a significant burden.

Thank you for your consideration of these comments, I sincerely hope you will make the correct decision realizing that this is way too soon to require a COVID 19 vaccine for our children.

Because COVID does not pose a general threat to kids, and there are substantial health risks to taking the vaccines. I am not anti-vaccine, but I think this is something that parents should decide for their families. Not taking the vaccine does not pose a threat to other children, as even vaccinated people can spread it as well. The risks outweigh the benefits, and more than anything, it is wrong to force parents to vaccinate their children when they are not comfortable with it!

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

lauriely@protonmail.com <mailto:lauriely@protonmail.com>

To whom it may concern:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring that anyone take an EUA product or licensed product that has not yet completed Phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating the shots for schools. I oppose any Covid-19 shot mandates because each person needs to weigh their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-17 it is at 0.00002 (99.998% survival rate) which is statistically a zero percent death rate. Beyond that, when you consider that most hospitalizations for the young are with Covid-19 and not for Covid 19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions than of a serious Covid-19 illness. We must protect our young

before we consider self-protection.

Sincerely,

Laurie Buhler

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory. 2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit. 3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org)) Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Please, do not consider requiring vaccines for school age children. Like all other decisions regarding their children parents should have the final say about what's best. It should be up to parents to choose.

As an educator, ministry leader and parent I whole heartedly disagree with enforcing mandates on citizens. I also believe that the masks and face covering requirements are doing more harm than good to school aged children and students and should be lifted immediately!

In service to my community,

Mrs. Laurice Warthan

Subject: WA State Health Board

External Email

Washington State Health Board,

As an educator and parent of 3 school aged children, I urge you to consider the ramifications of your possible decisions in the next several days. Forcing to require a Covid vaccine for all school aged children will cause hundreds, if not thousands, of parents to pull their children out of public schools in Washington State. Yes, children are getting sick and catching colds just like they do every single year. But hospitalizations of school aged children are very low. Nothing we are seeing is out of the ordinary for any other typical school year. Students catch a cold, they stay home for a few days if needed, and then they are back. Like every other year! Our students are in school and are thriving academically, socially, and mentally.

I urge you to leave child vaccination as an OPTION for parents and NOT a requirement. Please do not force parents to make tough decisions for the well being of their children. Trust them to do what is best for their child and others by staying home when sick. A child vaccine requirement would cause myself and thousands of other parents to pull their children from public education, which will be traumatic for the public school systems across our state. Let parents make their own decisions for their children. You have already enforced unnecessary requirements on our teachers, please don't put our children through the same thing.

Thank you!

If there is any vaccine mandates for children we are taking our family of 6 out of Washington to a state that will promote freedom of choice. I've been a resident of Washington my whole 35 years and have 4 children. We are ready to leave this dictatorship of a state. We built a house and wanted this to be our forever home but I have grown to hate Washington. I want my freedoms or I'm getting out. You will not get our tax dollars once we leave. The schools already don't get money for our 4 kids as we have yanked them (3) from the shit local government runned schools.

Sincerely  
A extremely fed up mother of 4 ages 1-15

Subject: Vaccine Mandate for Children

External Email

I am opposed to making COVID-19 mRNA vaccine shots mandatory for school admission or childcare in our State for the following REASONS:

- Vaccines do not prevent transmission.

Facts that the vaccines DO NOT stop the transmission of Covid come from our own key federal government officials including Anthony Fauci who says that Covid transmission from vaccinated individuals is now a fact and the CDC Dir. Walensky has stated "What the vaccines do not do anymore is prevent transmission."

- Vaccines are no longer effective.

95% of Covid cases are now from Omicron strain. Currently US & worldwide data documents vaccine boosters are failing against the Omicron strain of Covid. Additionally, it is documented that the most common Covid strain "Omicron" is non-life threatening and similar to a common cold.

- No Long Term Safety Data in Children

- Critically important is that there are NO long term safety studies for the mRNA Covid vaccines in children.

- Litigation

- In consideration of the facts above the Washington State Board of Health (WSBOH) should avoid unnecessary and harmful actions against children which will guarantee costly litigation against the WSBOH and it's members if they pursue vaccine mandates for children admission in school and childcare.
- Today the 6th Circuit Court of Appeals refused a request to stay an order blocking the governments Federal Contractor Vax Mandate. Additionally a significant number of lawsuits are working there way to US Supreme Court in regards to the legality of state or federal vaccine mandates.

Respectfully Signed,  
Stephanie Clabaugh  
Tacoma Resident

It has come to my attention that the board of health is taking public comment regarding the possibility of a COVID vaccine mandate for public school in this state, and I wanted to voice my opposition to it.

If you look at the science since the beginning of this pandemic, children are at the lowest risk of severe COVID reactions. Besides them having nearly zero chance of getting severely ill, the vaccine is still only under emergency approval for children aged 5-11. There is no long term studies to show what this vaccine will do to these students; obviously as this is a new vaccine, but that doesn't change the fact that these are our children and it's worrisome to force them to take something that at the face of it seems unnecessary considering the incredibly small likelihood of a severe illness.

My daughter is six, and she loves school. All of her teachers have commented on her full attention and love of learning something new at school. She looks forward to it each and every day. If you require vaccinations for her to continue to attend I honestly am not sure I can live with the decision. On one hand, I can force her to get a shot that she doesn't want to get with the potential of long term side effects or an adverse reaction to the vaccine, and the other is to take away something that she loves so dearly as it's what I think is best for her safety.

This is the predicament that you'll be putting thousands of parents in if you decide to enforce vaccine requirements, and for the sake of our children's mental and emotional health, I hope that you don't do that to this states youths.  
Thank you

To Whom it may concern,

I strongly oppose the Board's consideration of mandating the EUA Covid-19 vaccine for school.

I do however, support the petition that prohibits any EUA product from being added to the school required list. Any product that has not completed Phase 3 clinical trials should never even be considered to be required for children!

By the time this is even implemented the "emergency" will be over.

Sincerely,

Rhonda Krahn

Dear Washington State Board of Health Members,

I'm writing to you concerning the possible COVID-19 vaccine requirement for children to attend school. Studies have indicated that children are at an extremely low risk for COVID. In fact, there is a statistically insignificant chance of any serious illness developing.

Children have a higher chance of being harmed seriously from the vaccine itself than from contracting COVID. These vaccines are still only Emergency Use Authorized (EUA), and there are no long-term studies to document any history of safety. Studies now document that both the vaccinated and unvaccinated can transmit COVID 19. The vaccine apparently does not stop the spread of the disease.

The decision must be left up to parents and their doctors, not the State of Washington.

Thank you for your time.

Sincerely,

Ryan Whisnant

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: the kids are such a low risk, & had been proven that kids don't die from it. Why give them an experiment MRNA when there are no long term studies. I would never in a million years give my child this until it has been out for 5-10 years. To many people I know are getting vaccine injuries so why on Gods green earth would I give it to my child..... why force people, why not let it be our choice.

Subject: NO - to mandated Covid shots for children

External Email

NO - to mandated Covid shots for children:

- Demonstrated: The current "vaccines" do not prevent the spread of SARS-CoV-2 (per CDC admission).
- Demonstrated: The current "vaccines" have poor effectivity against Omicron (&likely future) variants.
- Demonstrated: Low Covid-19 transmission rate via children to adults.
- Demonstrated: Covid-19 presents very low risk for young children .
- Demonstrated: "vaccine" effectiveness diminishes rapidly with time. Thus, the need for boosters.

Thus:

- Society receives very little benefit from injecting young children.
- Young children receive very little benefit from the injections.
- Any positive benefits will dissipate long before they might need it as adults.

We have minimal test data and zero long term data on the "vaccine". Therefore:

- The "vaccine" is still experimental (only emergency authorized)
- Long term risk is very high.
- The risk is likely irreversible; the damage will be permanent.

Young children get none of the benefits and virtually all of the risk. Long-term damage from many of these risks is likely irreversible. Thus, mandatory injection of young children with these experimental drugs is unthinkable evil!

NO - to mandated Covid shots for children!!!

Sincerely Steve & Karen Foote

Hello,

My name is Shaela Nehls and I am writing in to say that myself, and my family are completely against making the Covid vaccine mandatory for school. There are several reasons I am against this.

The first one is that there have not been sufficient trials done on children for this vaccine to know what long-term effects it will have on children. Most vaccines go through a rigorous trial process that takes years and years on thousands of willing participants, this vaccine has not had that, and has been rushed to the market. By requiring this vaccine to be mandatory you are subjecting Washington children to either take a medical procedure with absolutely no knowledge of the ramifications it could cause years down the road, or not be getting the education that they have a right to. Dr. Robert Malone, who has spent his medical career researching vaccines (and who calls himself pro-vaccine), warns parents to take into consideration that this type of vaccine goes into the children's cells, causing their body to create a toxic spike proteins. These proteins often cause permanent damage to critical organs including the brain and the nervous system, Heart and blood vessels, reproductive system and can alter the immune system. Without knowing from years and years of trials how this vaccine will affect these children, and knowing what damage it could cause to them, there is no reason that this should be a mandate for children to go to school. This is a private, medical decision that should be up to their parents, and if they feel that these risks are acceptable to them, they should be able to vaccinate their child. However if they do not feel comfortable with this, they should not be bullied into their children getting vaccinated in order for them to go to a public school.

Another reason I am against this forced vaccine mandate on children, is that children are almost at zero risk of dying from Covid. Why would it be mandated for them to get a vaccine for something that they stand such a low chance of dying from? This should once again be the parents decision, and the school and state needs to stay out of it.

It is also taking advantage of low income families, who do not have the means to provide other options for schooling, if they do choose to not vaccinate their child with this. If they are unable to provide additional care, private school, or homeschool, this leaves them with absolutely no choice but to have their child vaccinated even if it is against their wishes. The area that I live has a population that is 75% Hispanic and a 90% poverty level, both parents work at least one job. This mandate would be telling them they either can give their child a vaccine that has not been tested so they can go to school, or that their child can stay home, with no chance of education.

I am urging you to think of the children that we all should want to protect. These are our future generations, and without knowing what the vaccine could do to them due to lack of trials, we have no right subjecting them to this in order for them to go to school. The vaccine is available for families that want it for their children if they feel that is what they want to do. For those that do not want it for their children, for any reason, should have that choice without having the child's education taken away. I appreciate your time reading this, and hope you can take these words to heart. This is a very serious time in our country to remember the rights that everyone should have living in America.

Shaela Nehls

2. Con

---

I am anti-mandatory vaccine. I have a vaccine injured child, however beyond this it's up to the parents if any vaccine should be given. It is not any school or government agencies business whether or not our kids get them. It also needs to be a choice between the parents and physicians. Please take this into consideration so that divisive behavior such as this can stop. I have never seen so many people worry about other families health or vaccine status before. This absolutely cannot happen. Please let the parents discuss among themselves and their physicians to make the best choices for themselves and families. Especially since children are less affected by this particular virus!

January 7, 2022

Hello Washington State Board of Health Members,

I am writing to inform you of my GREAT CONCERN over the new proposed WAC for requiring the MANDATORY COVID Vaccine for children in child care and schools. PLEASE DO NOT MAKE THIS VACCINE MANDATORY.

As reported directly by the CDC, "Children can be infected with the virus that causes COVID-19 and can get sick with COVID-19. Most children with COVID-19 have mild symptoms or they may have no symptoms at all ("asymptomatic")."

You are individuals who are educated in this subject matter. Therefore, you are aware of the potential for the severe adverse side effects (including myocarditis and pericarditis) surrounding this vaccine. CHILDREN SHOULD NOT BE MANDATORILY SUBJECTED TO A "VACCINE/CHEMICAL" THAT HAS NOT BEEN THOROUGHLY STUDIED, IS KNOWN FOR CAUSING SEVERE EFFECTS (and may lead to death), AND IS ONLY IN AN "EMERGENCY APPROVAL" PHASE.

In addition, as you are aware, the vaccine does not prevent individuals from getting the virus, and many who have received the vaccine have still become ill from the virus and from the vaccine itself. CHILDREN SHOULD NOT BE MANDATORILY SUBJECTED TO SOMETHING THAT HAS NOT BEEN PROVEN TO "STOP THE SPREAD" OR TO A CHEMICAL THAT HAS NOT BEEN PROVEN TO BE SAFE. (As "evidence" shows, even with the vaccine,

the spread has continued and is continuing, even among those who are vaccinated.)

I AM CURRENTLY AND HAVE BEEN DIRECTLY INVOLVED IN CHILD CARE, and in health care for many years. I have heard the voice of many parents. You have asked for input and public comment from parents. PLEASE ALLOW parents TO CHOOSE! (Side note: As you may be aware, WASHINGTON has a CRISIS in the CHILD CARE INDUSTRY, as well. I DO NOT want to be forced to give up what my family has worked for for so many years based upon a mandatory vaccine for children that is not proven effective to fight the virus, or adequately tested for safety for children (or adults), or "officially" approved by the FDA as with other "standard" medications or vaccines.)

PLEASE REMEMBER THE CONSTITUTION OF THE UNITED STATES OF AMERICA. Our forefathers founded this nation based on The Constitution of The United States. The preamble; "We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of LIBERTY to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America."

Yes, promoting health AND securing Blessings of LIBERTY. DO NOT REMOVE THE RIGHT OF A PARENT TO CHOOSE.

PLEASE ALLOW PARENTS TO MAKE A CHOICE. This government allows mothers to choose to keep or to terminate their unborn child(ren). THIS SAME GOVERNMENT SHOULD ALLOW A PARENT TO CHOOSE WHETHER TO INFLICT THEIR CHILD WITH A "VACCINE/CHEMICAL" THAT CAUSES RISK FOR SIGNIFICANT SIDE EFFECTS (which can potentially lead to DEATH).

IN THE LAST 4 Days, I have heard the Voices/CONCERN of others.

I have received MESSAGES from:

- \* A Friend (nurse, mother, and grandmother): Sent me information from "Conservative Ladies" on "Call to Action: Say NO to state mandated COVID shots for kids."
- \* A Friend (mother and grandmother): With a video and CONCERNS OPPOSING THE MANDATE (Noted: Planning to move out of this state in this summer.)
- \* A Mother: With a PETITION to SIGN AGAINST THIS MANDATE
- \* A Mother/Grandmother: With information regarding your meeting on the 12th, and the INFORMATION TO SEND COMMENTS BY NOON TODAY.

THIS SHOULD NOT BE MANDATED as a WAC Requirement for schools and child care. PARENTS SHOULD BE GIVEN THE LIBERTY TO CHOOSE!

PLEASE DO NOT MAKE THIS VACCINE MANDATORY.

My husband is a pharmacist who has worked in a chain pharmacy for over 20 years. He has seen the impact of "Big pharma," and how politics, and the media have extremely impacted and changed his industry for the worst since COVID-19 hit. He has witnessed the droves of people "driven by political negligence, causing life-changing fear."

Please consider the "FACTS" pertaining to this matter. PARENTS SHOULD BE GIVEN THE CHOICE AND LIBERTY to decide whether to inject their child with a CHEMICAL THAT IS NOT THOROUGHLY TESTED AND "NOT OFFICIALLY" FDA approved. PLEASE ALLOW PARENTS TO EXERCISE THEIR FREEDOMS IN THIS STATE. This matter should be about "TRUTH." This vaccine does not "prevent" or "stop the spread" of this virus. As previously referenced, according to the CDC, "most children with COVID-19 have mild symptoms or they may have no symptoms at all ("asymptomatic")."

Do not require innocent children to be subjected to a potentially unhealthy chemical that can alter their current healthy state!

"KNOWING TRUTH" brings FREEDOM. Allow PARENTS the Liberty to Choose!

Please DO NOT REQUIRE PARENTS TO GO AGAINST something they believe to be UNSAFE AND UNETHICAL. PLEASE HEAR THE VOICE OF ONE CONCERNED MOTHER, who represents many. Please consider the "rights" which should not be taken from us, and allow parents to decide. This is about individuals making an "educated" decision based on "the facts," and allowing parents to decide based upon "WISDOM" and "TRUTH."

Sincerely,

Tiffanie A. Henderson, RN, BSN, FCN

Washington State Board of Health Directors,  
I implore you to reconsider your decision regarding the implementation of WAC 246-100-070 which empowers the county health officer to utilize law enforcement to involuntarily detain persons in a quarantine facility for noncompliance of whatever rules are adopted by the SBOH. I believe that you have already made the decision to give away my constitutional rights and this meeting is only a formality-going through the motions. Please tell me it isn't so! Basically, you are authorizing ONE individual to have the ultimate say and power over Washington state citizens! Do you not realize that you are all pawns in the demise of a great nation? Do you really hate our country this much? Do you not realize that this will affect YOU and YOUR families? Communism is what this is....pure unadulterated TYRANNY!

As a Registered Nurse, I feel compelled to speak out. You have sent emails out to all Health care providers threatening suspension or revocation of licensure if spreading "disinformation!" Patients are given ONE option for recovery from COVID- Remdesivir! This is essentially a death sentence! In years past, in nursing school, we were taught to individualize health care, now it's one size fits all! CMS says, "My way or the Highway!" In early 2020, I found an article submitted by the NIH released 2019 regarding Ebola and different drug trials. 53% of recipients of the drug Remdesivir died and the drug was pulled from the market. Then Fauci authorized the use of this drug for COVID! This drug is toxic to the kidneys and the liver. Now, this article can no longer be found. Wonder where it went? In 2015, NIH released a study that Hydroxychloroquine was effective against SARS 2 virus which is the same type of virus as COVID. Guess who's name was on that study.....Fauci! Can't find that article now either. What if one of your loved ones or YOU became critically ill with COVID and was offered the only option of Remdesivir, how would you feel? Would you beg that your life be spared by using any means available including Ivermectin and Hydroxychloroquine? I am asking these questions because YOU are ultimately responsible for the outcome of your decision and will be held to a higher level of accountability. The change you are supporting may never be reversed once passed. Please weigh heavily your decision as it affects the future of us all!

Sincerely,  
Susan Sotebeer

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- 1) Review of CDC data on Covid-19 deaths in children showed that zero children have died from Covid-19 in the US without pre-existing condition.
- 2) During the EAU authorization of the vaccine, the panel openly admitted that they would know what would happen to the children unless they went ahead and authorized.
- 3) Covid-19 vaccine adverse effect risks far out way any potential benefit.
- 4) There are NO long term studies as to the vaccines safety.
- 5) the vaccines do not prevent transmission
- 6) Adult doses are only on Phase 3 and won't be completed until 2023.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Applying current infectious disease WAC codes to include Covid-19 for all WA State residents. • Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Everything I've read on this proposal violates the WA Constitution and the US Constitution. Covid is no longer a pandemic but has shifted into an endemic and we have to live with it. The citizens of Washington State are US Citizens, have the right to body autonomy and the State has no rights under the Washington and the US Constitution to dictate these proposals.

Mandatory COVID vaccines for kids

11.

Are you Pro or Con on the proposal?

2. Con

---

Covid shots should absolutely NOT be a requirement for our children to attend school or childcare. It is also generally known that children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorized). Please don't make COVID vaccination mandatory for our kids to attend school.

Being as it is in direct violation of the Nuemburg code to force any human to be subjected to a medical experiment without full informed consent . And being as this vaccine is not only still only approved for emergency use. And being as they have intentionally hide the ingredients from public view. Any forcing of this vaccine is in direct violation of international law. And must be halted immediately especially considering the Proliferance of dangerous side effects and inability of the vaccine to stop the vaccinated from getting it or spreading it!

I believe in medical freedom granted to us by the Constitution of the United States of America and as a God given right. I am thankful for FREEDOM. Please do not take it away.

Forced vaccinations are unamerican. Considering detaining by force because of a person's medical choice is a failure to uphold the values we hold dear as Americans.

(WAC 246-100-070, WAC 246-100-045,WAC 246-100-040)

My children are fully immunized with the current state required immunizations and attend public school. They will not be given the COVID vaccine. They have natural immunity from having the virus. The virus is not a threat to them. If you truly look at the science and care about it as you say, you also will agree that is not a threat to our K-12 students. If the COVID vaccine is added to the school immunization list, we will be pulling our 3 children from public education. I volunteer in the schools and am involved in many levels of PTSA. I believe in public education and love the staff and students in our district. However this is a very clear line I draw. No required COVID vaccines for K-12.

Respectfully,

Sara Balsley

Referencing RCW43.20.050 Powers & Duties e)& f). Re: item #9 Safety and health is never a one size fits all approach. The main rule of public health policy-making is to consider the best control measure for the problem that DOES NOT violate the public's civil liberties. It's not legally defensible and against our constitutionality & civil liberties for such a draconian attempt in a free society of setting up involuntary isolation & quarantine facilities. WA State has no legal rights to adopt any rules pertaining to control of an airborne non-life threatening virus to most people with a 99% recovery rate that is present in society. There's been NO standard met by legal requirements proving a GRAVE DANGER in society or the workplace and the EMERGENCY TEMPORARY STANDARD that's being used for Covid vaccine mandates is illegal. The numbers have proven vaccines do not prevent anyone from contracting or spreading the virus in the workplace or society. There are numerous proven successful treatments available for Covid 19. What you're discussing is clearly an outrageous overreach against our civil liberties and it's offensive in our free society of the United States. Re: item #11 It's rare for children to not only get the virus but to spread it, not to mention vaccines are still considered "experimental" with unknown long term effects specifically on our children. Along with everything stated regarding item #9 there are other approaches to control & kill the virus such as installing iWave Air ionizer through the HVAC system which kills up to 96% of pathogens, allergens, mold & viruses including Covid 19. It's already being installed in numerous schools, businesses & prisons around the country and should have been done at the outbreak verses closing down our schools and severely affecting the children of this country to much worse than a virus with a 99% recovery rate. Again this is against our civil liberties and I am 100% against any legislation requirement of a Covid shot to attend a WA public school and will be home schooling if passed as a requirement.

The vaccine industry cannot be used is their product injures a child due to convincing Congress that they were inherently dangerous. Those vaccines had been tested for enough time to see long-term consequences. None of the current vaccines existed long enough for long term results. Children seldom get COVID and don't die from it. There is no reason to put them to potential serious long term disability.

Subject: opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

#### External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I believe you are responsible to the Creator to not harm his created. If you do there will be consequences to your actions. For God is the Avenger and this would be his to repay. Anyone causing one of these little ones to stumble it is better to have a milestone tied around his neck and thrown to the bottom of the sea. God will destroy you if you destroy his loved ones! So you have a big responsibility to not only us but to God. He gave us free will remember also.

I do agree and stand with the below opinions and facts as well. NO MANDATES FOR ANYONE!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, Leslie Peterson

Subject: Comments for the Immunizations Technical Advisory Group

External Email

To Whom it May Concern at the Washington State Board of Health,

Thank you for taking the time to receive public comment on this matter. I would like you to know that I and my husband are opposed to making COVID-19 immunizations mandatory for school admission or childcare in our State.

At this point in time, COVID vaccines for children is still provided under Emergency Use Authorization. As the vaccine has only been tested in a small number of children, those currently receiving the vaccine are, in effect, part of a current study, unfortunately without firm measurable boundaries.

To make covid vaccines mandatory for school and child care, even when severe disease is rare in children, is to remove educational opportunities from families who are choosing to wait on more robust information in effort to make a more informed decision on healthcare choices for their family.

Please consider holistically what this will mean for the families of Washington state if such strict regulations are put in place. Thank you.

Respectfully,

Sarah Tompkins

Subject: Against mandated childhood vaccinations

External Email

To Whom it May Concern,

Please vote against any mandatory childhood vaccinations. This is a gross governmental overreach. The government has no business making sweeping decisions for personal medical freedoms to be removed from parents or children.

For many decades we have heard and honored the phrase, "my body, my choice" if that's the precedence that's been set, why would in the world we change it?

Each person should have sovereignty over their own body and what they choose to do with it, whether we agree with their choices or not. Please do the right thing and protect peoples rights to continue to make their own medical decisions.

Thank you for your time and consideration.

Sincerely,  
Shannon Van Hook

Subject: Writing to oppose covid shots mandated for WA school children (Jan 12 mtg)

External Email

Dear Board,

I am a WA state resident writing to voice my strong opposition to any consideration of requiring covid shots to be mandated for school children. The science is very clear that children without comorbidities (ie the vast majority) have less chance of dying from covid than from seasonal flu. There are increasing reports of harm from covid vaccines, however, and it would be unconscionable to place a risk upon our children with little to no benefit gained.

As all vaccines carry some risk of harm, NO vaccine should ever be mandated on any individual. The most basic of all human rights is the right to decide what happens to one's own body.

I also voice my support of Informed Choice Washington's Petition for Rulemaking, requiring that no EUA product be considered for mandatory use (agenda item 11).

Thank you for acting in support of the medical freedom of WA state families and children.

Sincerely,  
Dr. Robert Davis

---

I think it would be a mistake to damage whatever trust people might still have for the government institutions such as DOH, SBOH, OSPI, etc by requiring these vaccines that are still being scrutinized. Parents who want the COVID vaccine for their kids have already done so. It's clear to me based on my discussions with many coworkers, neighbors, and peers, that the public does NOT want this mandate. Many are reticent to speak out due to the current political climate. I will speak out for them. As a mother of two, I have observed the information warfare happening on both sides and I refuse to subject my children to something that generates this much controversy. If the vaccines are required for children to attend school, I would rather homeschool or move than subject my kids to a vaccine I KNOW has not been subject to the same rigors as other vaccines. I'm fairly well-educated. I've read the pro-COVID vaccine arguments over and over again. I am familiar with both sides of the argument. Yet I feel confident in my decision for my family to elect NOT to take the vaccine. If this passes, I think you will have a lot of angry parents. They are waiting for someone to recognize their concerns and stop this train from going any further into unknown future damages. Please be that one agency that recognizes our concerns and do what is right.

Subject: School Mandate

External Email

Hello,

Washingtonian here.....I am a very concerned parent. Mother of 3 boys ages 8,10 and 12. We live in Covington Wa. Our family does believe in vaccinations. However we are not on board with the Covid-19 vaccine for multiple reasons. We also strongly feel people should have the right to choose. We have lost a friend due to adverse reactions from the vaccine and have countless people in our lives now with ongoing life threatening issues. The stories we hear are endless from other friends and co-workers too.

My husband and I both keep saying we wish this would just stop! Things are just spiraling downhill in my beautiful state I grew up in. So many vaccinated people are getting sick. It just seems more like a flu shot, not a vaccine. The mandate is just causing division between people, it's so sad. Children especially don't need this vaccine. If a parent wants to take that risk and vaccinate their child then that is there right. But to be forced is completely wrong. Regardless we along with thousands of families will pull our children and many of us will move out of state or find other education options. I strongly hope that you will all consider not mandating this vaccine. Please!! Thank you for your time.

Thank you,  
Stephanie Skeel Brown

I'm writing to express my opposition to the proposed vaccine mandate for K-12 children to attend school. This is absolute overreach and a decision that should be made by the parents. The vaccine is too new with long term side effects unknown. Furthermore the risk posed to children by COVID is extremely low. The risk of a new vaccine is greater in my opinion. This is not the time for such a mandate. I'm asking you to please not mandate COVID vaccine for students. If mandated my children will be homeschooled.

To whome it may concern,

I am a King County resident writing regarding the January 12th meeting of the WA State Board of Health.

Please DO NOT add Covid-19 to the current infectious disease list applicable to WAC 246-100-045, WAC 246-100-940, WAC 246-100, WAC 246-105. I believe these proposed policies a vast over reach, violate our rights as American citizens and go against medical freedom.

I especially oppose adding the Covid-19 gene therapy (referred to as "vaccine") to the lists of requirements for children to enter public school, based on the following reasons:

1. The long term safety is unknown.
2. What IS known is that the spike protein migrates to various places in the body, causing a variety of conditions, as seen in the increase in myocarditis & nervous system issues.
3. Children are not at high risk of dying from the disease.

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

4. Immunity from these shots is waning, but immunity from natural infection is not.

To the WSBOH members, concerning your upcoming January 12th meeting when you address "Immunization Criteria for Child Care and School Entry."

First I would like to point out that children younger than 18 years old have an almost zero chance of dying from or even being hospitalized from Covid. Very few even show any symptoms. We also know that all changes when they receive the unproven vaccine and that there have been many and various serious reactions and deaths to these young children after being vaccinated. OUR children!!

By requiring an unproven experimental vaccine to be injected into someone's child against the parents will, will have repercussions that equal getting between a mother bear and her cubs. Most people have known this is a bad, bad idea since bears and people have existed. Even people with no common sense realize that the foolishness of such an act would have serious immediate and long term consequences.

The below statement made shows the FDA doesn't believe they are liable because it's an experimental vaccine. But they are not the ones who are forcing it on peoples children.

"We are never going to learn how safe this vaccine is until we start giving it." (10-26-2021 FDA meeting

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=onPfizer'sCovidvaccinesforkidsages5to11>) The clinical trial for Pfizer's childrens jab and post-surveillance myocarditis studies won't be completed until 2023, and 2024-27, respectively. [source  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15173>  
]

I hope you can see the bear has already been poked and do not further provoke the bear so everyone will stay safe.

Thank you for serving on the board, Randy Simmons

Subject: No to vaccine mandate for school kids

External Email

Hello,

Please vote no on these mandates for covid shots to school children. They are a massive over reach and unconditional, in addition, potentially dangerous and unneeded. Children are not even affected by this virus and if they do get it, it is very mild. It's ridiculous to mandate this. You will find is a mass exodus of students from the public school system if you do. People will stand up to protect their children even if you won't. Let school be what it's supposed to be, a learning environment, not a prison or concentration camp like it's been made into. Students are unhappy and apathetic towards school and life right now. They need normal. They need people. They need fun. Stand up and fight for freedom and choice for those who need you to stand in the gap for them. You are in your position for such a time as this. Do what is right, allow parents to make their own choices. These are our children and we know what is best for them.

Thank you,  
Shea Brown

A yes vote will only further divide and alienate children and communities.  
As a mother of a severely compromised child who has already had Covid with no issues. Forcing a vaccine that is not by the original definition of a vaccine- that does not prevent one from giving or getting an illness is absurd. I will not be told I am "anti-vaccine" I'm not. I believe in science which is not one sided and allows for healthy debates and reviews and most of all honest facts. My trust has been broken with the roll out especially in Washington state. The Doctor patient relationship has been destroyed because they can no longer have an honest conversation. Medical is not a one size fits all. With the information that is currently available and the information that is not... we will not under any circumstances be participating. If it means leaving the state we will. Shutdowns and mandates have lead to my mother worsening health and my fathers cancer being left untreated. My brother -in-laws suicide my friends suicide and my son has lost 2 good friends to suicide. My career has already been destroyed, I've lost friends and family after "vaccines" and several more suffering from Myocarditis and Perio carditis as well as neurological disorders my neighbors minor niece spent two weeks at Children's Hospital with hemorrhaging that required medical intervention-more so than to Covid at this time. Enough is enough. Vote no . Children are not at risk and if you are, be self accountable and do what's right for you.

I have seen many people who will draw the line at forced vaccinations for children; these are skilled professionals and solid taxpayers; they are the building blocks of our community. Once they leave, we will never get them back. While some people would cheer such a thing, the net effect will be miniscule vis a vis public health. Teachers, nurses, cops already work without backup because of mandates; it doesn't help the situation, it hurts, especially when veterans leave their positions early. Talk to any personnel department and ask how long it takes to replace an entry level worker, and you will realize that what you are doing will hurt more than it will help. This will prolong the pandemic by entrenching resistance; if you make it a free choice, and stop kneecapping folks, you will achieve your aims. Everyone I know is quarantining anyway if they have covid; stop with the foot on the neck, and start working with people whether vax or unvax. Creating a two-tier system of citizens is causing more deaths

Subject: Covid inoculation required for Public School attendance

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Sincerely,  
Stephen Warren  
Des Moines, WA.

I am exist mandating Covid vaccines for our youth. There is much data that indicates risks. All risks are up to a family, not a state. Schools are for learning and all children should not be turned away. Btw, I am vaccinated. Vaccination is a choice. Especially considering that it is emergency approved. We first must "do no harm". This is not a virus that kills healthy kids.

One person in charge of a state should not have indefinite power to make decisions affecting every aspect of our lives, especially emergency orders that caused deep emotional pain, soaring unemployment, cut family ties, cut family incomes and close tens of thousands of businesses, shut down schools and demoralize our society with a mask that doesn't prevent transmission. I appreciate you getting together and gathering public comment for the possibility of avoiding another mandate in our schools. As we have all seen the vaccines do not prevent transmission, may reduce symptoms or keep someone free from the virus, but there is also harm that can be done. As we have seen with the death of a young mother who just wanted to volunteer in her children's classroom, link here: <https://www.clarkcountytoday.com/news/exclusive-healthy-young-mother-dies-of-vaccine-induced-blood-clot-then-twitter-censors-her-obituary/> As we have seen across the country courts are denouncing mandates and many virus strategies and they are also flabbergasted that when a request for documents is filed the response is in 55-75 years. This is atrocious! So for our governor to keep mandating, coerce and belittle us to accept something that is still in the experimental stages, is ludicrous. Even out of experimental stages like many other treatments/vaccines, we should have a choice for ourselves and our children. No more mandates in schools or elsewhere, vaccine segregation or the power to make it happen in one persons hands. Make it voluntary and see our state flourish again!

Subject: I OPPOSE WAC 246-105

External Email

To The Board Members of the WA state Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual prevention. No one can tell me what the effects may be on my child in 5 years or 10 years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for

themselves.

Thank you for your time.

Members of the Washington State Board of Health;

As an informed citizen of the State of Washington, I fervently request that you NOT make COVID immunizations mandatory for child care and school entry. Children have been proven to be an extremely low risk segment of the population to contract COVID. Mandating that they receive a vaccine that has only been authorized for emergency use with little known about its short or long term effects on children would be irresponsible and unconscionable!

Please vote NO on the vaccine immunization mandate for child care and school entry!

Respectfully,

Susan Van Horn  
Citizen of Washington State

It's is a complete over reach by the state government to make personal decision regarding a persons health care. To use law enforcement officers to enforce health decisions instead of doing their job and cleaning up the rising crime rates in our state is disgusting. Children should not be required to take an experimental vaccine that cause heart problems for a virus that does them literally no harm.

---

From: Stacy Brebner  
Sent: 1/7/2022 9:08:17 AM  
To: DOH WSBOH  
Cc:  
Subject: Upcoming WA State BOH Meeting-January 12-2022

External Email

To Whom This May Concern:

It has been brought to my attention, as well as thousands of other concerned WA State citizens, that there will be a meeting with the BOH on January 12th, at 9am to discuss the following possible implementations:

- \* Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families)
- \* to be isolated in a quarantine facility (WAC 246-100-045)
- \* following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- \* Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I not only strongly oppose this proposal, but I will die on this hill fighting it. There is NO way my family, or myself, will not put up the fight of our lives to protect ourselves from this tyranny. You are asking for a civil war.

Bullet Point #1: You do not have the manpower to detain the amount of people that you are suggesting. The unrealistic idea that local law enforcement, which is already struggling to maintain active officers, is ridiculous. You are putting law enforcement at risk for endangering their own lives, as I know civilians will not comply. It will be ugly.

Bullet Point #2 and #3: Isolating persons/families in quarantine facilities. Are you joking? Washington State's population has outgrown this state and its services YEARS ago. Do you even know the percentage of people that are unvaccinated THAT ARE NOT GOING TO GET VACCINATED? If we haven't gotten vaccinated now, we won't EVER! There are so many personal reasons to not be vaccinated. I have a plethora of health issues that put me at high risk of dying or being permanently disabled from ANY vaccine, yet alone, an mRNA experimental one. I also have religious beliefs that I strongly hold, in which this completely goes against. You have NO RIGHT to force bias examinations, testing, treatment and counselling. So, in counseling, you mean brainwash? Propaganda? Do you hear what you are proposing?

Last Bullet Point #4: CHILDREN ARE NOT AT RISK OF DYING OR BEING INJURED by this COVID virus! This virus has already mutated to hardly anything. We are at the herd

immunity level in which all of this seems futile even more. If everyone has already gotten this virus, why are we having talks so late in the game? I feel there is something more nefarious going on since death rates are going down at an alarming rate.

My final thought. Be afraid. If this goes through, you will not only see the biggest mass exodus of this state's history, but you will be declaring WAR. You have been warned by the unvaccinated people of Washington State.

Sincerely,

Stacy Brebner

The covid virus continues to mutate and requiring a vaccine on a virus that is mutating often and becoming less deadly doesn't make sense. The vaccines have had adverse effects on children and the risk of continuing to force people to vaccinate isn't the right way to proceed. Children have a high recovery rate from Covid and that has been true from the start. There is not a need to force vaccinations when the virus is continuing to mutate. You will force children to have to leave public schools if you mandate the vaccine in order to attend in-person school. Our children have already lost so much with closures, mask mandates, and sports being canceled. Let every parent make the choice that is best for their situation.

Dear Board Members,

Please do not mandate the covid vax for students. Covid is not a threat to children. It is impossible to know the long-term effects of the vaccination, because it has been in use only 13 months for adults, way less for children. Who knows what might develop in 5, 10, or 20 years? How many FDA-approved medications later have to be recalled? You would not want to be responsible for mass harms emerging years from now in students for whom you mandated vaccination.

For children, the risks from covid are far less than the risks from the newly developed vaccine. We already know the vaccine causes myocarditis in young people, especially young males.

Furthermore, the vaccine will not help prevent the current Omicron surge. Even vaccinated people are getting and transmitting the virus.

The medical facts are clear. There is no medical justification for vaccinating kids. Covid is not a significant threat to them.

No vax mandates!

Sharon Damoff  
Mukilteo, WA

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

CDC data shows that children are not at risk from COVID 19 as the elderly and immunocompromised individuals. This is not a vaccine like polio or small pox as it does not stop the disease. It is the same as a flu shot - its can stop some virus and/or possibly make the symptoms less, but it does not stop the virus!! There is more evidence that children are being harmed by the vaccine than are being harmed by the virus itself. Chicken pox is an example of a childhood disease that once a child contracted it, they were immune forever going forward. Natural immunity is better than any vaccine - please do not pass the policy!!!

I oppose mandatory vaccination of children. The known risks outweigh the benefits of a vaccine since the data shows children have lower risk of severe illness, hospitalization and death. The vaccines have not been approved and are still only under EUA. The long term effects of the vaccine are still unknown.

WSBOH Member,

I, a public school teacher, mother, and 'covid survivor' aka person with strong Covid antibodies, am strongly against including the Covid-19 injections as part of school immunization requirements using WAC 246-105. Kids are not at high risk and the jury is still out for harmful effects on these vaccines in kids though there have been links to many heart issues, tumors, blood clots etc. that are just being ignored. If you really want what is best for our kids let them and their family's make the best decision for each one. It should be a choice and not forced. All other required vaccines were out on the market and studied for a MUCH longer period of time before they were required. This could be catastrophic in the future. After all, no long-term studies have been done so how can you assure me my kids will be fine? I am very much so against home-schooling because I love my job teacher middle school Spanish but I will do what I need to do to keep my kids safe. Please don't make any rash decisions based on pressure from outside parties. Please protect our children at all costs.

Subject: COVID Vaccine Requirement

attachments\48F4005460574F78\_image.png

External Email

Dear Health Official,

I am writing to express my vehement opposition to COVID vaccine requirements for students in our state. As a mother of 2 school age boys, I am sincerely pleading for their safety. Please put your preconceived notions and politics aside and look at the facts.

The scientific evidence does not support the risk / benefit of COVID vaccine for males in this age group.

1. Risk of Myocarditis in young males is higher for vaccinated than for those who got COVID.

Ref. <https://www.nejm.org/doi/full/10.1056/NEJMc2115045>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nejm.org%2Fdoi%2Ffull%2F10.1056%2FNEJMc2115045>

2. Vaccination does not prevent the spread of COVID to people in their household. In fact it barely reduces transmission relative to unvaccinated.

"We found that the secondary attack rate in fully vaccinated household contacts was high at 25%, but this value was lower than that of unvaccinated contacts (38%)."

Ref. [https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2Flaninf%2Farticle%2FPIIS1473-3099\(21\)00648-4/fulltext](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thelancet.com%2Fjournals%2Flaninf%2Farticle%2FPIIS1473-3099(21)00648-4/fulltext)

&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7372a200779e456decd908d9d1a2ebed%7C

3. Risk of severe illness in children is basically non-existent.

"A total of 815 articles were identified. Eighteen studies with 1065 participants (444 patients were younger than 10 years, and 553 were aged 10 to 19 years) with confirmed SARS-CoV-2 infection were included in the final analysis. All articles reflected research performed in China, except for 1 clinical case in Singapore. Children at any age were mostly reported to have mild respiratory symptoms, namely fever, dry cough, and fatigue, or were asymptomatic. Bronchial thickening and ground-glass opacities were the main radiologic features, and these findings were also reported in asymptomatic patients. Among the included articles, there was only 1 case of severe COVID-19 infection, which occurred in a 13-month-old infant. No deaths were reported in children aged 0 to 9 years."

Ref. <https://pubmed.ncbi.nlm.nih.gov/32320004/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F32320004/>

4. All available vaccines are for emergency use authorization. For goodness sake please

recognize the rules of law!

"WHAT IF I DECIDE NOT TO HAVE MY CHILD GET THE PFIZER-BIONTECH COVID19 VACCINE?

Under the EUA, there is an option to accept or refuse receiving the vaccine. Should you decide for your child not to receive it, it will not change your child's standard medical care."

Ref. <https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>

I implore that you look at the facts objectively here and end this doom spiral of vaccine requirements. Eventually the courts will agree as well, and YOU will be held accountable. In conclusion, humans are not cell phones or windows software that need to be upgraded every 2 weeks to deal with the latest virus threat.

Thank you,

What the state is proposing is illegal and in constitutional. Illegal in the sense that these vaccines have not gone through the trials and long term evaluations as other commercial vaccines. The mandate would be for an action that lacked informed consent. Non informed consent goes against the Nuremberg Codes. Our children do not give consent to this medical experiment. It would be unconstitutional if personal exemptions weren't allowed for those who deemed it necessary. There's still some Americans that would like to exercise their Freedom of choice.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \*Children are at extremely low risk for Covid
- \*The vaccines are still ONLY EUA (emergency use authorized)
- \*There are no long term studies to document any history of safety
- \*Studies do now document that the vaccinated and unvaccinated can both transmit Covid
  
- \*The vaccine does not stop the spread of the disease.
- \*With the onset of the omicron variant, and the rapid spread of this disease, many already have immunity.

Stephanie Stanley

I am a very concerned citizen writing you to urge you to refuse to push through the new proposed policies that include mandatory covid vaccinations, and that also permit health officers to use law enforcement power in forcing isolation, quarantine, and detainment of individuals and families. This is completely unconscionable, and Washington citizens have had enough. Not only do children have a 99.995% covid survival rate, but these vaccines are STILL in the early stages of development and testing, and any long-term side effects are still completely unknown. Weighing this risk MUST be one each individual freely does for themselves, and is not forced into, particularly for parents deciding what is best for their own child. Each person has the right to choose - and refuse - medical treatment, counseling, and testing without being forcibly detained for their choices. These policies not only vastly overstep the constitutional bounds of 'health care', but also seriously infringe on personal and parental rights.

We the people INSIST you vote to STOP these unconstitutional policies from moving forward, at once.

Sincerely,

Heidi Forslund

New state Covid policy, including vaccine mandates for children/students and expanded quarantine enforcement powers.

11.

Are you Pro or Con on the proposal?

2. Con

---

I believe that Covid policy to date has done more harm than good and that the proposed measures to expand vaccination and quarantine enforcement would continue that trend. I urge the Board of Health to take more time to consider the potential negative consequences of such policies. The danger of Covid is being exaggerated, especially for children, while the potential risks of vaccination are being diminished. Vaccination should not be required for children to attend school. The effects of Covid on children are very rarely serious and don't justify risking the health of all school children by requiring vaccination. The proposed quarantine enforcement policies are excessive and dangerous and threaten to unduly disrupt the lives of many individuals, families, and communities. Thank you for your consideration.

This should not be a mandate from the state but rather an option for parents. If they choose not to vaccinate, they can remove their students from school if an outbreak occurs. These vaccines may be very safe (although there is concerning data out there) but not every parent is comfortable giving their kids an experimental vaccine and should not be forced to do so. The state needs to stop using the educational system to wrench control from parents over their children's lives and healthcare. Of health and welfare is truly a concern of the state, make it easier for parents to homeschool their kids if sending them to school is a healthcare concern.

Please, please, please reject any emergency order to involuntarily detain persons to be isolated in their home or a quarantine facility for refusal to comply with any examination, testing, treatment, or vaccination status. This brings to mind the severe, authoritarian overreach by governments outside America, e.g., Australia.

Please reject adding the COVID vaccinations to required school immunizations. These COVID vaccines are all currently in the experimental phase. COVID-19 and its variants are shown to be virtually no risk to our healthy children.

Please reject any law enforcement use in forcing compliance to these issues of personal health decisions.

Hello, I am Timothy Basarab and I'm a Washington state resident and I am completely against any of the proposed Covid policies that are over-reaching and immoral. I stand against these WACs:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

I wanted to email in a comment before the meeting. I heard the board will be considering adding covid vaccines to the list of those required to attend school. This is greatly concerning to me and I believe this requirement would not be in the best interest for the children of our state.

Thank you!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Severe medical problems from Covid in children are extremely rare. The vaccine has not gone through long term safety studies, and as if that weren't enough, current studies show vaccinated people can spread Covid. Thus, a mandate to vaccinate children is completely unwarranted & inappropriate.

Subject: Oppose mandating covid shots!

External Email

I strongly oppose this covid shot being mandated on our children.

I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What you (WA State Board of Health) is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to make a decision on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms, we gave birth to these children that happen to reside in WA state, we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

1. Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified to work in the schools and if you mandate this, I would not consider ever working in a WA school if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents are educators and school staff, they didn't sign up for what you are proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

2. Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022:

"What are civil rights?

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination.

The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

- \* state and local social and health services agencies,
- \* hospitals,
- \* clinics,
- \* nursing homes,
- \* insurers who are participating in the Marketplaces and receiving premium tax credits, and
- \* other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hhs.gov%2Fnode%2F2391&>

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C9e6cd361ecfb4b4a11b908d9d2177d96%7C11d0e2>

rights-center%2Fstatutes%2Fcivil-rights-act-of-

1964&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C9e6cd361ecfb4b4a11b908d9d2177d96%7C11d0e2

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this.

3.

Please refer to WAC 246-105-030

4. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is not preventable: "Vaccine-preventable diseases children must be protected against for full immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a child care center)."

4. What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long term effects that could occur in children, this is a valid concern for parents and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision.

We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

☐ Dear Board member,

☐

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Kim Pham

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,

1. Yes

---

Proposed to put covid 19 on the list of infectious disease. To do this would allow government to control our own children and mandate items with covid-19 unconstitutionally and the health districts and government has not allowed doctors to treat patients for covid and in states where the government has allowed doctors to treat covid like Florida, it is working a lot better.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I do not want any government to control my kids health and they have or at the least I don't want government to control my kids as much as the government wants to try to control. I believe I have the best interest for my kids as do all other parents. A parent has the right to say no to items going into their children's body.

---

Children are very low risk for covid 19. The vaccines are still emergency use authorized. There's no long term studies on the effects of the covid 19 shots. Studies now document that both the vaccinated and unvaccinated can still transmit covid 19 so the vaccine apparently does nothing to stop the spread of the virus. The is completely unconstitutional and must be put to a stop. No good will come from forcing the population into taking experimental drugs.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Please do NOT require COVID vaccination for school children

External Email

To the Washington State Board of Health:

As a mother of four small children, I implore you to NOT include the Covid-19 vaccination on the list of required vaccinations for schools.

We have completed required immunizations for our children and we can agree that vaccinations are important for protecting our children from certain illnesses.

This vaccination, however, is relatively new and we don't know all side effects/long term studies of this for our children. There have been many adverse effects of the vaccination in kids according to the VAERS.

What we do know is that in otherwise healthy children, Covid has an extremely low risk of any hospitalizations or serious adverse effects.

Please don't force parents to make hard decisions regarding education for their kids because of a forced vaccination that they don't agree with at this time.

Please allow parents, the ones who care most about the health and well-being of their children, to make the determination of receiving this vaccination for their own children. Again, I urge you to NOT include the Covid-19 vaccination as a requirement for school age children.

Sincerely,  
Sara Shoff

Dear WSBOH,  
Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

Dear Washington State Board of Health,

As a WA state resident and father of 4 children, I want to register my extreme opposition to any form of forced health intervention using law enforcement EVER.

I want to voice my extreme opposition to any consideration of using law enforcement to remove individuals into quarantine.

I want to voice my extreme opposition to any state health officer considering mandating the forced injection of ANY Washington state student for ANY vaccine including the current iterations of the COVID vaccine.

Please consider the basic facts, that are currently being argued about—so NOT settled.

This current crisis is arguably not very severe.

The CDC has admitted that only 5 to 6% of people are dying directly because of COVID, this amounts to 30 to 60 thousand total dead from COVID in the United States—a normal flu season runs comparable.

The hospitals have been monetarily incentivized to diagnose COVID.

There are readily available over the counter treatments for COVID.

People who actively treat COVID early have a great percentage of NOT being admitted to hospital. (As much as 85% in some studies)

Our school children ARE not in danger of COVID.

The current Vaccines DO HAVE potentially harmful side effects including death. CDC admits as many as 5,000 to 15,000 (this is disputed—numbers according to VAERS reporting) have died directly because of the Vaccine efforts.

Masks are NOT proven to prevent COVID, as the statement on the N95 box declares.

The current COVID vaccines do not prevent COVID nor Prevent the transmission of COVID

There is an excellent alternative protocol developed by Stanford and Harvard trained medical professionals that can be found at [www.gbdeclaration.org](http://www.gbdeclaration.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.gbdeclaration.org%2F&data=>

.

Please do not continue COVID policy which more aligned with communist Chinese protocols.

The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous

lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely submitted Jan 7th, 2022

There is almost a 100% chance of NO child dying of COVID . There is a high % of adverse reactions to this Vaccine. Look into the # of Adverse reactions to the vaccine. You should not subject our kids to this vaccine. Especially when the vaccine does not keep them from getting COVID or stop the spread of it. They are at almost 0 risk. It's not good. I would be a terrible decision.

To whom it may concern,

This emergency order is inhumanity and goes against our rights. I hope you will realize how insane this order is and choose to not pass it.

The injustice to force children to get the vaccine without parents having the choice is outrageous.

Forcing people into covid camps is outrageous.

We pride ourselves on being a free country but there are new rules taking away our freedom and rights every day.

I urge you to reconsider and think about the outcome of this order being passed.

The vaccine has shown it does not work to prevent the spread of covid.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Vaccination recommendation for school children

External Email

I am writing to let you know that I am distressed to learn that your organization is considering recommending the Covid vaccine be administered to children. Why???

The Covid vaccine is already showing serious side effects for children by changing girls menstrual cycles and creating heart problems in boys.

Why are you recommending a vaccine that does nothing to curb the rate of infection nor keep one from getting the virus?

Are you aware that the vaccine is not fully approved by the FDA? It is still in its emergency only classification.

You are not all powerful and you do not have the right to recommend how I choose to keep my children's health safe.

If this becomes a prerequisite for school entry I will pull my children and sue our school district.

Please banish this ridiculous idea that is completely ILLEGAL and goes against the Nuremberg laws.

Sincerely yours,

Bethany Barker

Subject: Proposed Mandate for COVID vaccines

External Email

To the Washington State Board of Health,

The Board of Health should not be mandating that children in this state are required to receive the currently available COVID vaccinations as a requirement for school or childcare entry. Statically, children as a demographic are not at risk for severe COVID infection, and the currently available vaccinations have an unproven, largely undocumented safety profile-particularly in children. There are no long-term studies on the efficacy or potential side effects of these experimental vaccines, and it is clearly evident from the vaccination status of those who have now been infected with COVID that vaccination does not prevent infection or transmission of the COVID virus.

It would be irresponsible and negligent on the part of the Board of Health to mandate a vaccine for an illness that is statistically low-risk in children, when that vaccine does not prevent infection or transmission and has an unknown risk of immediate or long-term side-effects.

Additionally, mandating this vaccine will create inequity of access to public education by excluding a large percentage of children whose parents will choose not to subject their children to an unnecessary, unproven, and potentially harmful medical treatment with unknown long-term side-effects. As a parent and an educator in the state of Washington, I am OPPOSED to the addition of the COVID vaccine to the list of required vaccines for school and childcare.

Sincerely,

Serene Robeson

Subject: School Vaccination Mandate

External Email

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children.

Thank you for your time,

Dear Ms. Schreiber,

I am taking the time to write to respectfully implore you to protect the health of Washington children. What is the rush to make it mandatory to have children vaccinated against Covid - 19? This medical intervention has barely been marketed for a year. Can you please show us data demonstrating the long term safety of this vaccine and if this is such a good thing, why is it necessary to violate parental sovereignty and force this in the lives of children. Who do parents contact if their child suffers one of the, already known, side effects of these shots?

Recently, the only FDA approved version - the Cominarty product - was determined to "not be the same as the Pfizer" product that is available in the US. Resulting in the fact that none of these shots have received FDA approval. You are asking, yea, requiring all parents to subject their precious, innocent, children to an experimental medical product that has NO long term, safety data. This is brand new vaccine technology. I have never seen the first generation of any NEW technology "get it perfectly right." Why would we think this new technology is any different?

Recently both the CDC and Dr. Fauci both admitted that this vaccine does not prevent infection or prevent spread of Covid - what is the point then of requiring this, at the risk of experimenting on our society's most precious commodity - and our most precious future - our children? Did we as a society not learn anything from the WWII holocaust? Medical experiments were forcibly conducted on vulnerable people. Did we not learn anything from the 40 year long Tuskegee experiments? Again, medical experiments were forced on unsuspecting humans - to their dire harm.

Washington parents are smart, caring people who love their children. The vast majority of them will evaluate the options and do what they sincerely believe is in their child's best interest. Why would the Board of Health force this decision on these vulnerable children? How is this NOT discriminatory and unAmerican?

Respectfully submitted to you,

John Wolfe, PhD

To Whom it May Concern,

I would like to express my concern and disapproval of any child vaccination/gene therapy mandates for children to attend school. I think you are going to find many parents pulling their children from public school if you move forward with any intention to enforce such a measure. It seems an absurd consideration in the face of numerous facts such as:

1.) This virus has never been a serious health risk to children who have shown great natural immunity. Deaths from COVID 'incredibly rare' among children (nature.com)  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F021-01897-w&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C17c5e94ff27f46eebb4208d9d214eaab%7C11d0e21726>>  
, The Kids Were Safe From COVID the Whole Time (nymag.com)  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnymag.com%2Fintelligencer%2Fkids-were-safe-from-covid-the-whole-time.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C17c5e94ff27f46eebb4208d9d214eaab%7C11d0e21726>>

This has always been a virus that attacked the elderly, esp, those w pre-existing conditions, not children.

2.) The history of vaccines and their rollouts has always been stratified to isolate the vulnerable. Applying shots to the unaffected calls up questions of concern as to who is actually benefiting from this?

3.) It is now known that the "vaccines" do not prevent infection or transmission. So the argument that children must sacrifice to protect the elderly has no footing.

4.) The current variant, Omicron, is presenting throughout the world as having an effect ranging from light cold to mild flu. WHO sees more evidence that Omicron causes milder symptoms | Reuters  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.reuters.com%2Fbusiness%2Fpharmaceuticals%2Fwho-sees-more-evidence-that-omicron-affects-upper-respiratory-tract-2022-01-04%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C17c5e94ff27f46eebb4208d9d214eaab%7C11d0e21726>>

5.) Numbers of adverse events, especially with young men and boys are documented in the VAERS graphs . We would be putting our children into the game of russian roulette whether they succumb to myocarditis or pericarditis. As well, there are absolutely no studies on long term affects.

Dec 28, 2021

CDC Centers for Disease Control

Government

<https://www.cdc.gov/vaccines/covid-19/clinical-considerations/myocarditis.html>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fcov19%2Fclinical-considerations%2Fmyocarditis.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C17c5e94ff27f46eebb4>

#### Clinical Considerations: Myocarditis and Pericarditis after Receipt of mRNA COVID-19 Vaccines Among Adolescents and Young Adults

Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after mRNA COVID-19 vaccination (Pfizer-BioNTech and Moderna), particularly in adolescents and young adults. Reported cases have occurred predominantly in male adolescents and young adults 16 years of age and older. Onset was typically within several days after mRNA COVID-19 vaccination, and cases have occurred more often after the second dose than the first dose. CDC and its partners are investigating these reports of myocarditis and pericarditis following mRNA COVID-19 vaccination.

6.) This technology is not a true vaccine, but is instead an experimental gene therapy and has not gone through the rigorous testing required of such. Even the normal trials for vaccines was short cut and never fully completed. The trial was aborted after 6 months and all members of the "control group" were given the shots. Thus eliminating the control group and prematurely ending the trail. As an experimental technology, without a proper trial pared with the expected discourse and scientific debate, implementing these shots as a mandate to allow children to be full , normal citizens of society and attend school would be illegal as per the Nuremberg Code. Please do not waste taxpayer money on legal disputes that you'll clearly lose. Courts have made that clear in L.A., county and SanDiego, Ca.

Increasing numbers of people are becoming aware that the push to get every citizen jabbed is not a movement generated by concern for the health of either individual or community. Another agenda is at play. As public officials, if you institute this policy, this puts you in a position of breaking, not only public trust, but also firmly established laws and constitutional rights. You put not only your career and personal integrity at risk, but would be setting yourselves up for the valid opportunity for litigation.

Perhaps you do mean well and just have not questioned the original trajectory of fear and concern for what this new virus could do. So if you think I'm wrong about whether children are safer without the risk of vaccine adverse effects, take the time to do the trials, at least 2-5 years.

Please reorient your actions toward supporting the human genomes strengths and weaknesses, not tearing down or altering our genetic makeup to please the pharmaceutical industry. The last time we had coercive public health policies that violated individual civil and human rights driven by the state it was called nazi germany. Please do not follow that path any further.  
<https://www.commdiginews.com/health-science/a-cautionary-tale-a-history-of-using->

medical-programs-to-control-a-populace-139063/  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.commdiginews.com%2Fhealth-science%2Fa-cautionary-tale-a-history-of-using-medical-programs-to-control-a-populace-139063%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C17c5e94ff27f46eebb4208d9d214eaab%7C11>

Please, please champion the "End of the Pandemic". At this time, it is a flu with less severe symptoms than the common cold. The Covid policies of the USA have failed miserably (more deaths than anywhere else in the world ) with top medical direction that blocked effective early treatment protocols and relied entirely on a "final solution" (Bill Gates words) of unproven, ineffective, dangerous gene therapy vaccines. I would like to see our governmental agencies take some responsibility by calming the fear frenzy, ending this series of policies that have destroyed countless citizens livelihoods and damaged the mental health of us all. Declare it over. We need not fear the COVID 19 virus any longer with basic tools of immune support available etc. We have more deadly flus than the Omicron variant every flu season. It has been a success to ride through the covid variants to this nearly benign mutation. Let's celebrate and let our children return to school free of masks, distancing and the risk of ANY adverse vaccine side-effects. Obviously, we will not know the adverse effects for these children for decades! How can it make sense to risk our children in this manner?

Thank you for your consideration of these thoughts and concerns.  
Health autonomy is a right, taking it away is Facism.

With trust in your humanity and love of democracy,  
Salomae Hill

Good afternoon,

The fact that nobody can reach you or your colleagues through phone or email is concerning. It appears that you and your colleagues do not want to hear from the public.

I want you to consider the consequences of your actions and decisions. Mainly, the meeting today where I understand you and your colleagues will consider imposing forced isolation for individuals and families. It is my understanding you and your colleagues will be deciding whether to demand all public school students are vaccinated.

I want you to consider the consequences of your actions. Do you know the public school attendance is on a steady decline? Citizens are losing trust in public schools. Sit down and critically think what problems this may cause to the safety and well being of children.

Furthermore, if you or your colleagues vote for any type of forced isolation, you will be voting against the Constitution. Have you read that lately? It seems that if you have, you would not consider any thing that is on your agenda.

Speaking of agendas, the public has lost faith in you as well for considering these unconstitutional demands. WE ARE NOT against science. WE ARE AGAINST AGENDA SCIENCE. We are not against vaccines. We are against FORCED VACCINES, especially when the data does not support them as a common good. Insurance companies are reporting a spike in deaths, not after Covid came but after vaccines came. The vaccine doesn't stop you from contracting "Covid" or spreading "Covid".

Consider the actions of YOUR INDIVIDUAL decisions and actions. The public is not happy with the tyranny being imposed in WASHINGTON state. We are fed up with all the dead small businesses, the suicide and the agenda science.

The public is fed up. It's up to you to do the right thing and think critically, not under an agenda. These two topics you consider imposing, consider how the public will react. The public trust is teetering, legal action will be brought forth against you and your board, you will sever any lasting threads of trust in the public schools and you will infuriate many parents and citizens. We see outrageous suicides, even of one entire family. This doesn't need to happen. Look at all science, not just agenda science. Follow the Constitution, not money.

Thank you,

Tatyana S.

This is a breach of our constitutional rights and it has been widely studied that children do not present a high mortality rate. Further, children are at extremely low risk of suffering adverse affects from the disease. Additionally, the vaccine is still EUA.

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right deciding what is best for our children. You are not the parent, grand parent or guardian. You are a public servant, hired and paid for by the people. and guess what, you're doing a very poor job and really pissing the people of Washington off.

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaxxed and unvaxxed, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone, when time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. Nope, definitely don't want the people to do that!

Give this shot 10-20 years of long term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system? My 3 children will soon be adding to the number of unenrolled students if the outcome of this meeting is to try and force me to do something that I don't think is right for my family. I will never stop fighting for what I believe is right for them, just as I have raised them.

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're

doing just the opposite.

Sincerely,  
A concerned parent and tax payer.

My position is that I am very much against both policies that will be discussed at the meeting on January 12th. The ends do not in any case justify the means to invoke the punishment of a misdemeanor offense and forced quarantine for refusing to comply with a request for a medical examination or even vaccination. It is absurd that policies like this are being discussed this far into the pandemic that are akin to the french rule of law in more archaic times that a person is "guilty until proven innocent" or in this case, sick until proven healthy. That citizens of the state should be treated as infectious lepers at all times is damaging to our progress as a civilization. It is un-American, and sets a precedent of a dictatorship instead of a democracy. This has become not about the vaccine but about control and maintaining power and wealth among those who already possess it.

Furthermore, while reported cases are up, this metric is almost completely a function of the ability of a region to administer tests and is a bad way to measure the true impact of the virus. Nowhere in current mainstream media is found the amount of hospital attendance nor death rates. That's because this omicron variant is so mild as to be compared to a low level case of the flu. It is more virulent, yes, but less lethal as all viruses eventually mutate into. Covid 19 is no different from all other coronaviruses that have followed this pattern.

On the topic of vaccinating those in public schools against Covid, this is a gross mistake. This vaccine has not undergone the stringent protocols, authorizations, accountabilities, and research that every other prerequisite vaccine has undergone. It obviously doesn't have the lasting affect as the others on the list. Lengths of efficacy wane after mere months, which is why an unprecedented 4th booster is now in the public discussion. A much more fitting comparison is the flu vaccine which has a new iteration every year. The flu vaccine is not required for public school attendance. People die from the flu every year and we do not hold the ones who infected the deceased accountable in any way. In this regard, one person's health is not another person's responsibility. The overall national response is an overreaction and these policies being discussed are terrible consequences of such an overreaction. If invoked, one can expect citizens of Washington State to move out of state en masse even more so than they have already been moving this past year.

This is to inform whomever it may concern, that I do NOT agree with adding the covid vaccine to the list of required immunizations for my child. There are many arguments for and against getting this vaccine. And when it comes down to it, we and our children should NOT be required to, or forced to get this vaccine. So NO, this should NOT go on the list of required immunizations.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State

Thank you

Honorable Board members,

Keep in mind the constitution of this state and country when making decisions about the health freedom of taxpayers and residents and their families. These COVID virus shots do not work as intended, are causing undue harm to some people, and are wrongly being used to keep working people out of jobs.

I hope that you will OPPOSE the following specifically:

1) any involuntary isolation/quarantine of people as described in parts of WAC 246.100; and 2) any mandate on COVID shots for children as a requirement to attend K-12 public schools.

These are morally and fundamentally wrong, and not done in a free democratic republic.

I am aware that you are considering the vaccine requirement for school aged children next week.

I vehemently oppose this.

Children are at a VERY low risk from covid-19 and the vaccine is still too early to know the long term effects.

To make this requirement would CLEARLY be an abuse of power.

I am positive that hoards of parents would remove their children from public school if this were to move forward.

Please listen to parents and do not make this a mandatory requirement.

Thank you for your consideration,

Lindsey Rude

To All To Whom This Concerns,

I am writing on behalf of the children, the vulnerable who trust us as adult parents and citizens to protect them from harm by making good decisions. With a survival rate above 98% for children, this emergency shot is not necessary. This statistic stands alone and is sufficient.

Statistics in Israelies who are vaccinated, boosted and on their fourth shot with a new record high on Covid cases are factual and provide proof that these shots are not preventing Covid.

(Covid<https://datadashboard.health.gov.il/COVID-19/general>).

Please consider the information in the attachment provided, noting that the year of issuance is 2011.

I stand for the children,

Sheila White

following COVID-19 vaccination.

\* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

\* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to congregate

-- Do not support any legislation or directive establishing lockdowns

-- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

I am in support of the petition prohibiting the addition of any EUA product to the required vax list.

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect?

Thank you for listening,

Shelby Hennigar

9.

Do you have any special expertise relevant to this topic?

1.            Yes

---

I have a Masters degree in Civil Engineering and I am aware of how the data collection and overall scientific method works to draw conclusions.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The DOH proposal to add Covid-19 to their list of infectious diseases.

11.

Are you Pro or Con on the proposal?

2. Con

---

There are many reasons why this is a very bad idea: 1. This drug is still experimental and there has not been enough data collected to make any law or decision to force this upon our young, innocent and healthy children 2. This drug (the so-called vax) has been approved by the FDA for use on Children. If so, please show evidence of this. 3. The state DOH has done NOTHING over the last two years to work towards providing a way to treat Covid. I had Covid in September, called my doctor and she said, " we don't treat Covid ". If it goes to your lungs, then go to emergency. Not a healthy way to handle a sickness. 4. The CDC VAERS website shows over 14,000 deaths have occurred as of September, 2022 and many more have serious health side affects as a result to taking the experimental drug 5. OneAmerica insurance company just report 40 percent more deaths report among 18-48 year olds over pre pandemic numbers and also state that Covid related deaths are down 50 percent. This implies that the death could be a result of those who have taken the vax. More research is needed here because this insurance company claims that other insurance providers are seeing the same trend 6. There are many proven way to treat Covid-19 that the DOH refuses to even consider. This is irresponsible at best if not criminal. These means need to be studied, debated, tried and considered and the public needs to be involved and ample time given so many people from the public can comment. They are ivermectin, hydroxichloriquine and zinc, and monoclonal antibodies. I strongly oppose adding Covid-19 to list of infectious diseases.

2. Con

---

All vaccines for Covid-19 are under emergency use authorization (EUA) only by the FDA. Children (<18, without underlying condition) are NOT at proportional risk of hospitalization much less death as a result of contracting COVID-19 (CDC, Nov 21). Data does NOT support a public health policy, or rule requiring the vaccination of children because even if children were vaccinated, Covid-19 we already know is still likely to be transmitted among peoples. Data also shows that children are NOT chief vectors of transmission, if anything a child's immune system is the best protection against the spread of Covid-19 as breakout infections are extremely rare (CDC, Aug 21). Vaccines are a testament to our human spirit and ability to use science to save lives (if not a miracle!). However, my daughter is living proof of the dangers that every parent thinks will never happen to them. A few months after receiving a hepatitis immunization she suddenly became very ill and then became horribly ill and she was later diagnosed as having developed a very serious neurological disease (Guillain-Barre syndrome) known to be brought on by an adverse reaction to receiving vaccines, in close succession that triggered a cascade of health problems, nearly killing her. I believe in the power of data when used to solve problems. However, there are very real consequences to policy that attempts to "blanket" risk, or eliminate risk entirely which is not possible (my daughter for example). The data here does NOT support vaccinating children, not the least for the purposes of attending school. Parents are still the chief deciders of a child's health decisions and the data supports choice, not a mandate. Thank you for your consideration.

Proposal to mandate covid vaccine for K-12 students

11.

Are you Pro or Con on the proposal?

2. Con

---

Vaccines do not fit into my family's personal beliefs or health practices. I do believe that vaccines are a wise option for some individuals but often carry more risk than reward for healthy children and adults. My children have always attended school on a vaccine exemption, long before the pandemic. No one but the school nurse has ever known my children's vaccine status and they've never been treated any different than any vaccinated student. This is how it should be. Given the 12 months of examples of vaccination status deacrimination and segregation, I fear that a mandate will lead to schools treating vaccinated vs unvaccinated students differently (ie. masking and quarantine requirements, segregated lunches, etc). This would be constitutionally wrong. Because it is now widely known that vaccinated individuals can spread Covid at the same rate as unvaccinated, the choice to vaccinate is simply a personal decision rather than an act for the greater good. Families should be able to choose whether or not they want to receive a vaccine in order to reduce perceived risk of severe symptoms, not because of a mandate or government force. If a mandate does come to fruition, I plead with you to deliver the same treatment, education and access to all students including those with personal, religious and medical exemptions. No segregation, no variance in protocol and no discrimination. Just as students have not been allowed to be treated differently based on choices made by their parents (religion, employment status, divorce, criminal history, etc), children of parents who make the informed and/or personal decision to not vaccinate their families should not face discrimination.

Our children don't need to be mandated to take the shot. They are low risk for covid complications. We have downgraded to omicron, which, according to most information out there is a cold or flu. Especially mild to children. The shot "vaccine" does not stop transmission, it does not stop one from getting covid, we don't even know if it actually lessens symptoms. For children it is up to the parents to asses the risk / reward and decide if we want them to have it. Please keep this mandate away from the children. There is no reasonable reason to mandate it. MAYBE if it made you immune and you couldn't transmit, but, you can. As is proven by the amount of "breakthrough" cases being reported. Not to mention, perdue pharma coined the term break through so they could sell more oxy. Anyway, let parents make the choice on the covid shot. Thank you!

After seeing facts about vaccine. I believe children are safe with out vaccine so it should be a family choice to vaccinate. This virus attacks you whether vaccinated or not.its mild and acts like a cold. We should have the right to choose whether to vaccinate or not. We all have natural immunity in our family. We feel very strongly that freedom of choice is how we get out of this covid mess. Kids who have had virus ans have immunity have all the immunity they need. Just let the kids get back to being kids. Teach them, practice reasonable sanitary protocol. Kids don't need an experimental vaccine and l the sticks that follow.

Dear Board of Health,  
Please excuse my current state of amusement, as I think of the title, "Board of Health", and realize it's somewhat the same as calling an obese person "Tiny".  
That being said; you have been weighed in the balances and are found wanting. This medicinal industrial complex, with it's de facto agencies under District of Columbia's parent corporation, are more than problematic in the current medical emergency state by which we are being subjugated.

If there truly be any among you that are not fully aware that these EUA jabs are a bio-weapon, then you must be either: tuned in to CNN 24/7, or have your heads fantastically planted deep within your anus! If you think that for one minute, We; the People, are going to sit idly by while you try to please your despotic masters by sacrificing our children to a demonic god named "science", as an experiment in transhuman technology; you are out of your sadistic minds!

If you are still in possession of a shred of conscience (notice the etymology of that word: "con" science .... as in: the opposite of science) or an inkling of a virtue we refer to as goodness; please do the right thing.

Facts proven with regard to the "Covid": CHILDREN ARE ALMOST COMPLETELY WITHOUT RISK OF EITHER BEING INFECTED OR TRANSMITTING THE Covid. Corona: family of the cold and influenza ... the Crown by which vaccinations received their royal status, and by which pharma has built an empire. With an overall survival rate of 99.4% after infection; I think it's safe to say ... we're safe. Children under 12 had a survival rate of nearly 100% ... AND YOU WANT TO CONSIDER PUTTING A DEATH SHOT INTO THEIR BODIES?!?! Psychotic is the term used to express the mind of an agency and its agents that would seek to offer "safety" and "protection" in the form of death and injury.

If I pulled you out of your house, and set you on the freeway at night, taped to a chair, for your own protection .... would that seem like a reasonable expression of health care? Because that is what you are asking us to believe and accept!  
You will be found guilty of Crimes Against Humanity. The International Courts of Justice are already putting it all together. You've been noticed.

Your boss, Mark T.

I am  
Sovereign by nature of existence; not of license nor statute, and it does not take leave based on administrations, nor does it suffer deprivation due to jurisdiction. Sovereignty remains while policies change.  
"They" say that Life is what you make it.

What are we to do, upon confirmation that "they" are Liars?!

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Tarah Wrenn

To whom it may concern

I am writing in regards to the covid vaccine mandate for children to remain in school.

I am begging to not let this take effect. Like it or not this vaccine is still in an experimental phase and it is against our freedom to be forced to take part.

I have a 7 year old healthy son and I believe he is more likely to be hospitalized from vaccine complications then he is to be hospitalized from covid. Studies are showing the vaccine is less effective towards the new variant. We don't know how covid is going to continue to play out and what the next variant is going to look like and I don't want to be forced to put this vaccine in his body every time I'm told to.

Not to mention there is still a lot unknown about how this can potentially impact children's reproductive organs in the future. I am so scared for our future... not of covid but of the vaccine mandates and continued choices/ freedoms we are being stripped of.

My son has the basic human right to go school and receive a free education but I will not be keeping him in public school if this passes. And I will fight everything I can to ensure I'm not forced to vaccine my child.

Please do not allow this crazy mandate to pass

Thank you  
Rachel

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

To all the members of the Washington State Board of Health,

It has come to my attention that one of the agenda items for your January 12th, 2022 meeting is to consider "allowing law enforcement to forcibly enforce an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with request for: medical examination, testing, treatment, counseling, and vaccination."

I want to express IN THE STRONGEST POSSIBLE LANGUAGE MY ABSOLUTE OPPOSITION TO SUCH A POLICY!!!!

Here are some of my reasons for opposition to this proposed policy:  
Every American has the right to determine what medical procedures he or she will or will not take. We have the right to Life, Liberty and the Pursuit of happiness.  
Mandates from state executives and their subcommittees should not be allowed. The LEGISLATURE should debate such all-encompassing rules, not "health boards"!

Under HIPPA rules, my medical decisions are PRIVATE

Unvaccinated people pose no more of a danger to the public than vaccinated people. This has been proven over and over! Supposedly, the vaccinated are safe...so leave the unvaccinated alone!

The current vaccinations are not effective against the current virus strains, anyway. The original strain and Delta (and soon Omicron) will be history...but the vaccination has not changed the infection rate.

This is AMERICA...not Communist China where women have been forced to get abortions against their will, or Saudi Arabia where women are forcefully sexually mutilated because the Muslim leaders say so. For the BOH to pass such a rule would violate everything that is good about American Freedom!

Every American has a RIGHT to choose what healthcare they will or will not take.  
This policy will drive more good people to leave this state because of its liberal and extremely harmful policies regarding Covid.

It is DANGEROUS! If this policy is adopted and enforced, there will, without doubt, be violence. Both law enforcement and civilian Americans, my fellow Washingtonians will be injured or killed.

I beseech you to NOT pass this policy. It is dangerous, unAmerican and makes no sense in terms of public health. I believe that the ONLY reason any state government would pass such policies would be to control their people for nefarious purposes.

We are now well over a year into this pandemic and we know for a fact, that this does

not cause serious illness in children. Kids do not get sick from this. Nor do they transmit this disease to others. The data and the studies prove this over and over.

The so called vaccine, does however potentially cause harm. And YOU KNOW THIS. There have been many, too many, reported cases of harm caused from the shot. And probably way more that hasn't been reported.

I am a practicing physician in the emergency department and have seen and treated countless cases of Covid patients. I have seen first hand the harm and morbidity the vaccination has caused in our young. Such as a case of an 18 year old who presented to the ER with chest pain the same evening after receiving his second Moderna shot. Diagnosis, STEMI. Had to be rushed to the cath lab. An 18 year old. With a heart attack. Caused by the COVID Vaccination. It's harmful. What if that was one of your kids? You all took an oath to do no harm.

You all know, this Covid does not pose a huge risk to our young. You all know that the vaccine can be harmful. So DO THE RIGHT THING. Use your critical thinking to do what's you know is right. Don't just follow the recommendation of your government leaders who don't know any better than to push the own agenda.

DO THE RIGHT THING AND OPPOSE THIS MANDATE!

Dr. William Moore

I am VERY opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We don't know the long term effects of these vaccinations. That is not worth the risk for my children.

They do not prevent Covid. It will still spread.

---

There are a couple reasons. First, looking at the list of required vaccines, every one on the list, the vaccine is over 99% effective at both preventing the child from getting the disease and also from spreading the disease. The COVID-19 vaccines do not do either of those things. There are thousands of cases of fully vaccinated people getting COVID, spreading COVID, getting hospitalized and even cases of people dying. Secondly, the risk of children getting seriously ill and/or dying from COVID is less than 1/10,000 or a percent. There is NO scientific evidence that supports an unproven vaccine being force for a disease that has almost no risk of serious disease or death. There is also no historic precedence for the government to force something like this where there is no public emergency. COVID should be treated as any other disease where those at most risk are given the options and the choices to fight it how they feel is right for them and not forced upon society. Lastly, the mRNA vaccines have no long term studies, results in human use. None of the other required vaccines use mRNA technology, and a drug being tested should not be required ESPECIALLY in children.

Dear Mrs. Schreiber,

I Erin Kranzler oppose the use of law enforcement to be used to detain those who are unvaccinated.

We are not second class citizens. Many of us have natural immunity by now. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and over all health. You will be held accountable if it comes out in years to come that the vaccine is not safe.

There has been a filing in the International Crimes Court the ICC by dr Michael Yerdon and others for crimes against humanity by pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus.

Please do the right thing and oppose these WACs from being added to laws.

---

This is a viral gene that is injected into a child's cells. The gene forces the body to make toxic spike proteins. These proteins can cause permanent damage in a child's critical organs, including the brain, nervous system, heart and blood vessels, reproductive system, and immune system. Once these damages have occurred, they cannot be repaired. Additionally, this novel technology has not been adequately tested. At least 5 years of testing are necessary to really understand the long term risks. Harms and complications from new medicines often take time to reveal themselves. I do not want my children forced into being a part of the largest medical experiment in human history. Lastly, the entire reasoning behind child vaccination is a lie; children represent no danger to adults of any age. It's actually the opposite; their immunity after overcoming Covid is critical to saving our families and our entire world from this disease. The risks posed by Covid for our children is minute. The risks of even the KNOWN health risks surrounding child vaccination is significant. The risk/benefit analysis is not even close. Please consider this viewpoint when making your decision on mandatory child vaccination.

Vaccines are NOT a one size fits all solution for all people, and children should never be forced to have it in order to attend school.

It has been Proven that getting the vaccine CAN protect the individual- it does NOT protect others around you NOR stop you from Spreading it to other people - whether they are vaccinated or not. Therefore, since it only benefits the person getting the vaccine, it wouldn't even make sense to require it. It should remain a personal choice - one that comes from weighing personal risk factors (which children are still by far at the lowest risk for hospitalizations and death) and talking to your dr, but ultimately, it is - and should remain- the individual's, or parent's right to choose.

The Covid-19 vaccine had not been studied for long term effects. You should not consider requiring a vaccine that has unknown long term effects. That would be incredibly irresponsible and dangerous. Parents should be free to make the choice that is best for their children - what they have always been allowed to do.

Please vote NO to vaccine requirements in schools.

If you read all the way to the end here, and you disagree (or agree), I'd love to hear why you are considering this, and your side of the argument.

Thanks,

Anne Heath

External Email

To the Board of Health,

Attached are my written comments to be included on the meeting records.

I look forward to attending, hearing the board and providing my comments.

Very respectfully,

Xavier A. Figueroa, Ph.D.

To the members of the Board of Health and to all members of the various Departments of Health in Washington state,

The current Emergency Order by Governor Inslee has provided cover under Color of Law for mandating lockdowns, masks, diagnostic testing and has insinuated the legal ability of private businesses, public businesses, government agencies and non-government organizations to mandate the use of the inoculums using the RNA/DNA gene transfer technologies of Pfizer/BioNtech, ModeRNA and Johnson & Johnson to the public at large. All the while, masks, SARs-CoV-2 detection kits and RNA/DNA inoculums are under an emergency use authorization, which have explicit requirements, under 21 U.S. Code § 360bbb-3 for informed consent. Worse yet is the lower standard of authorization that exists under this section for medical products: they only need to satisfy the “may be effective” criteria versus the FDA required “effective” criteria for approval of a drug, device or therapeutic product.

The Department of Health and the Board of Health, under state, federal and international law have failed to adhere to the standards and legal requirement as officers and employees of the State of Washington to uphold and defend the rule of law (U.S. Code), the Constitution, International Law (Universal Declaration of Human Right and the International Covenant of Social and Political & Economic Rights) and for the medical professionals, their oaths as healers.

Federal law states clearly that there is a requirement to inform the physicians and those providing the therapy or intervention of the potential benefits and harm of the intervention using the **totality of scientific evidence**. If the Secretary of Health and Human Services fails to provide such information or guidance, it is the duty and obligation of the state officials and employees to in turn, ensure that the totality of the scientific evidence is brought to bear and analyzed to either accept or reject the E.U.A of the medical product being offered.

Furthermore, the recipient of the E.U.A product has the right to receive all information on the E.U.A product and decline the use of medical products under E.U.A., without consequence to the individual. That means that ANY form of coercion or discrimination (non-admittance to courts, denial of medical services, denial of access to public accommodations, denial of the ability to earn a living) are violations of state, federal and international law. If this information is not provided to either the practitioner or the recipient, there is a direct chain of custody of the parties responsible for violating the law. Additionally, if the individual county and State Departments of Health institute or provide support of guidance for these violations, in any illegal form, they are aiding and abetting crimes. Under the UN Charter of Universal Human Rights, Articles 2, 3, 4, 5, 6, 7, 9, 10, 12, 13, 18, 20, 23 (1-4) and 29. Attached is a copy of the UN Charter of Universal Human Rights.

Under Common Law General Principles, “Primum non nocere” – “First Do No Harm” is the guiding principle under the Constitution. You don't get to harm a person's property, person or liberty. It is a constitutional obligation of state officers, employees, and citizens to uphold these simple tenets and failure or omitting to act in preventing harm is equivalent to causing harm. “I was just following orders” or ignorance of the law is not a defensible argument. Plan accordingly and make your choice: continue violating the law or refuse to carry out illegal orders and come clean.

## The Rush to Inoculate Children

Now we are rushing to create a technical advisory group (TAG) and making changes to the WAC, that will empower the DoH of the individual counties and the various agencies, to gain more power to enact even more restrictive rules. The creation of the TAG is an acknowledgment that a plan is in place to accelerate the mandate for inoculations of these gene therapies in our school age children.

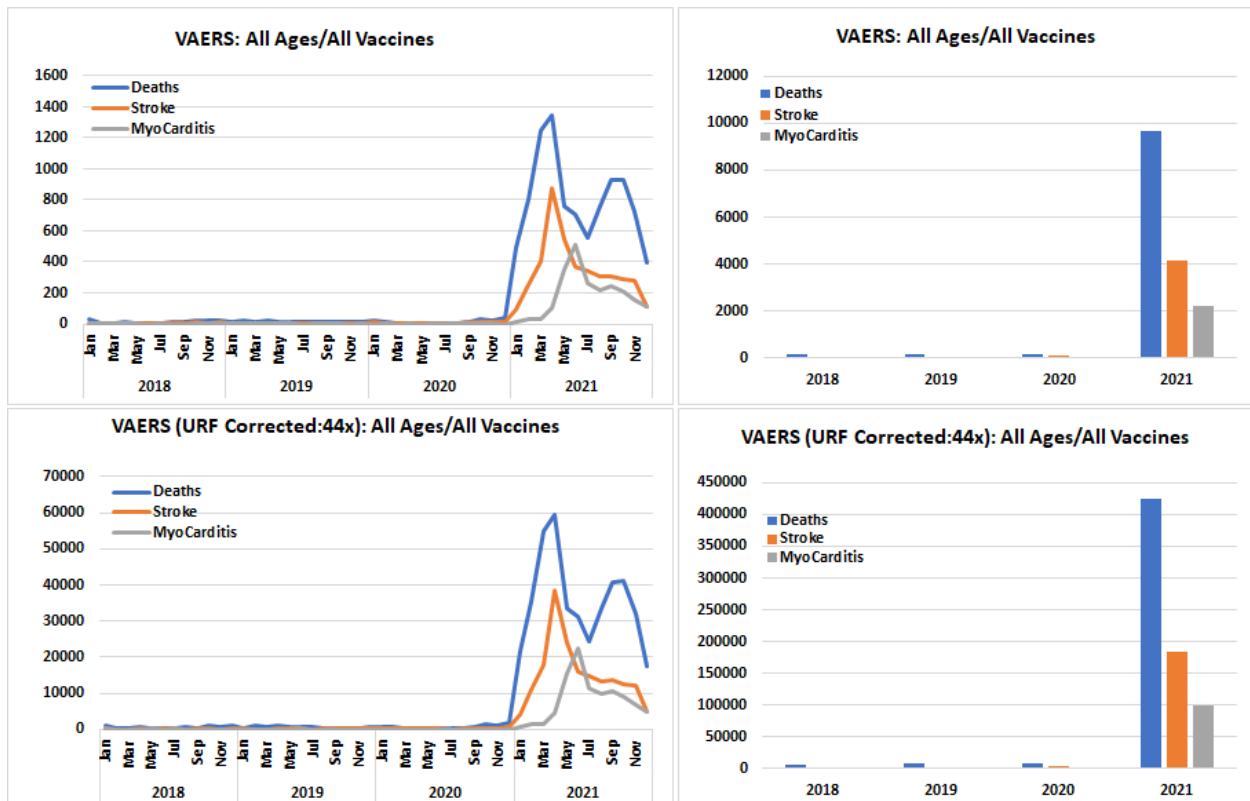

How is the TAG going to explain this development, when hospitalizations and deaths in the 0-18 year population are lower than influenza? For the past two years, deaths from SARs-CoV-2 have occurred in a pediatric population that had comorbidities and has numerically lower hospitalization and deaths than the flu. No mandate, lockdown or experimental gene therapy were required for this population when we experienced significant increases in 2018 for flu hospitalization and deaths. It was left to the parents to make that choice. It seems that our health officials have lost all sense of perspective, sense and ethics and will only adhere to the whims of expedience and authority.

The canard that transmission of SARs-CoV-2 can be stopped via the use of an experimental inoculation therapy is absurd on its face. We cannot stop the transmission of the influenza virus with a well-established vaccine. Now we are told to believe that an unproven gene therapy is essential to stop the spread and must be mandated for our children. It is acknowledged by the manufacturers of these medical products and the director of the CDC that these gene therapy inoculation do not stop transmission or even protect from death. It is all risk with ZERO benefit to our children.

The evidence of data manipulation, clinical trial tampering, inadequate supervision of trial sites and mismanagement of trial sites is mounting (against Pfizer and Moderna), rendering the results of the reported clinical trials useless in establishing safety and efficacy. The skewing of the population cohorts in the trials, the under-powered pediatric populations, and the requirements to add black-box warning about myocarditis/pericarditis for these inoculations are already damning against a disease that has a 99.8% survival rate, overall. This is the first time we made the calculation that it is better to place the youngest generation in danger in order to protect the elder population. As I stated earlier: It is all risk with ZERO benefit to our children.

You can continue to ignore the VAERS data (which under reports adverse events and deaths) and continue to eschew the tired line of "correlation does not equal causation". It's a safe claim to make when each of these manufacturers are immune from liability and autopsies are not being performed on these dead children and people. But that is slowly changing and international groups and U.S. based groups (which you should be tracking: **totality of scientific evidence**) are discovering that deaths are being caused by these E.U.A. gene therapy inoculations. The data are screaming stop (see the figures from VAERS below, using a correction factor for under-reporting), but apparently the brains and hearts of the DoH and the BoH have been silenced by the dictate to "reduce vaccine hesitancy at all costs".

I understand that there are enormous pressures on the members of the DoH and BoH to carry forward with the inoculation push, but you are not required to carry out illegal requests/orders or to contravene your conscience. There is still time to reverse course and make changes that truly protect people of all ages, in all parts of Washington.

Very Respectfully,

Xavier A. Figueroa, Ph.D.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be

isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100). • Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. Involuntary detainment of private citizens at the discretion of health officers is ludicrous. How do we not see such detainment and isolation in quarantine facilities as being just as similar in practice as the Japanese internment camps, segregation, and the like. Science, data, and all the same logic was used in these circumstances to justify inhumane treatment of people. Different ingredients and yet, somehow, we are making the same soup.

Washington State Board of Health:

I strenuously object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. If you want to mandate something, release physicians to do what doctors have always done: let them treat their patients with early therapeutics rather than send them home until they can't breathe. What you are currently doing is criminal.

These Covid "vaccines" apparently have little effect on the Omicron variant, and in fact, most people who get this variant have been double ++ vaccinated (Israel). These are not tried and true and tested vaccines by the traditional definition, and surely you know this. Being fully vaccinated traditionally means you can't get and you cannot give a disease, a traditional vaccine has minimal risk, and it sure as hell doesn't require multiple "booster shots" per year of the very same (experimental) "vaccine" that didn't work the first three times, forevermore.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have **\*\*considerable risk\*\*** from the unapproved Covid vaccines. Leave the children alone. **LEAVE THE CHILDREN ALONE. LEAVE ALL THE STUDENTS ALONE**, including college students.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the experimental Covid "vaccination" or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population in an horrific and holy UN-American way. I'm certain most of you understand that, too. Don't let this be on your watch. We will hold you accountable.

Sincerely,

Susan R Lund

Mercer Island

To Whom it may concern,

As someone who has actually been on the front lines of this disease, not in an office or lab somewhere, the notion of mandating these vaccines on children is asinine. The current data indicates children are at more risk from the vaccine than they are from these Corona viruses. Furthermore the complete departure from the confirmed science of natural immunity is breath taking. Perhaps you can make a decision based on facts and science and not being sales people for big pharma.

Two other thoughts, have you ever heard of closing the corral to catch the horses when they have already left? and If the vaccines work how come they don't work well?

Respectfully,  
Stewart Kunkel

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,

External Email

Hello Tracy,

I am writing as a concerned parent of two boys in the Bellevue School District. Before you vote on whether or not to make this vaccine a requirement for school, I am asking you to listen to this 1- hour compilation of critical questions brought up by the FDA Advisory Board when deciding to approve Pfizer's COVID vaccine for 5-11 year old's. In case you are unable to listen, I have provided key points from the meeting below. Please note myself and thousands of other parents will be unenrolling our children if this is required to attend school. Before you vote - please make sure you are informed on the benefits and risks to our children.

Key Points from the FDA Advisory Board Meeting - Oct 26th:

\*\*\*Link to 1-hour highlights video here.

Advisors do not recommend healthy children get this vaccine

Advisors do not recommend this vaccine be required to attend school

Doctors do not expect the vaccine to prevent infection

They have no data or expectations it will prevent transmission

Based on current data and modeling, the risks of the vaccine to children outweigh the benefits

Children's vaccine is based on the alpha variant and has little to no protection against Delta or Omnicron

Children's vaccine includes Tris (hydroxymethyl)aminomethane), a stabilizing agent, however the vaccines given during the clinical trials did not include this new ingredient so no one knows the potential risks to our children.

Advisors very concerned about increase in myocarditis and pericarditis especially in young boys

Approval was given based on the vaccine being available to immune compromised children only.

Thank you for your time,

Kathy Wall

No one should be mandated to take any kind of vaccine. We have the right to decide what goes in our bodies. As parent we make the decisions for our children based on what we feel is right not by what we are made to do. Why would this vaccine be massaged in anyone when the survival/ recovery rates are so high. This has gone on long enough and is out of hand. When did "we the people" lose our voices???? There are too many side effects and not enough knowledge of long term side effects to demand this vaccine on anyone, let alone children. Enough with the mandates. Thank you, Machel Smith

requiring forced Covid-19 vaccination upon our school- and preschool-age children

11.

Are you Pro or Con on the proposal?

2. Con

---

There is no reason for this requirement; not only is it unconstitutional but it is also government overreach in caring for our children. You have no right to inflict experimental drugs on our youth and there is no justification for it, no scientific evidence to support, and nothing but power and politics motivating it. The vaccination is not proven to prevent the spread of Covid and in fact, it is not helping at all. Natural immunity is much more effective just like natural immunity for colds and other viruses. Trying to protect people from the spread of a virus by enforcing masks and vaccinations is doing more harm than good as a people cannot fight the simplest cold at this point, constantly wearing masks, using hand sanitizer and distancing - we have no healthy germs. For the first time in years, I got both a cold and a bout of flu this year, having not had the flu for as long as I can remember - at least 10 years. It's all because I have no natural immunity left!

Subject: WA State Board of Health meeting

External Email

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates. The science does not support the notion that unvaccinated individuals spread the virus, any more than vaccinated individuals. Children are statistically at zero risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. ([www.fda.gov/media/151710/download](http://www.fda.gov/media/151710/download)) The required studies on children will not even be completed until May 31, 2027. And, that is only one of the required pediatric assessments. There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed.

We all are concerned about the safety of our children and teachers. But, making a therapy mandatory, whose efficacy in preventing transmission is increasingly short lived as new variants of COVID-19 emerge, abandons reason. Specifically, when you consider that we just don't know how detrimental the therapies will be to the long-term health of all people, especially children whose bodies are still developing. We don't know what we don't know. We as a state have historically been the beneficiaries of a certain Washingtonian level headedness, a trait that has kept us out of the numerous pitfalls we've witnessed other states succumb to. We can't use our children as test subjects. Let us set an example for the nation and world, and pursue measures that protect informed consent for our public health and upholds the highest standard of medical ethics.

Sincerely,

Zech Bordon

Respected leaders,

As a teacher, I am concerned about the scope of the proposed WACs regarding forced quarantine at the refusal of vaccination. The enforcement of these laws would negatively impact the education rights of a vast number of students. The paramount duty of our state as written into the constitution is to provide a free and basic education. These proposals impair our ability to provide that education.

As a parent and community member I am appalled and concerned that any such laws would be considered. We must never compromise our democracy, our sovereignty. The threat of totalitarianism and indiscriminate use of power is too easy to ignore in the name of noble aims such as public health. Yet, freedoms can only be compromised to a limited extent for the safety of community. This is the point where the safety is best ensured through freedom. Through individual responsibility and freedom a democratic society ensures that policy is the will of the people. In this situation, schools should continue current policies of at home quarantine but forced quarantine as the consequence of an individual's choice not to vaccinate crosses a line. It puts the power in the hands of a government in ways that our constitution did not intend. In ways that only communist or totalitarian governments exercise.

Keep forced quarantine out of our state and never force someone to relinquish their sovereignty over their own body.

Sincerely,  
Sucia Dhillon

External Email

Dear Washington State Board of Health,

I'm writing to you today and requesting that you do not recommend or require any vaccines or boosters to be mandatory for any child. Whether anyone gets a vaccination for themselves or their child should be their choice. We live in a free country where we are free to choose what we do with our own health. This is no one's concern or business but our own. Our country was founded and based in freedom, liberty and the pursuit of happiness. Forcing someone or forcing someone's child to be vaccinated when it is not the parents choice is going against the very foundation of our country. At the founding of our country many fought to the death so that we could have this constitutional rights and freedoms and that is what we enjoy in America today. We will not stand for our freedoms to be taken away so I ask for you to stand with us so that you may also enjoy these freedoms in the future. I do understand that we are going through a pandemic of a highly transmissible virus that is sometimes deadly but in very low percentages among adults and rarely in children. Therefore there is no reason to be mandating a vaccine that hasn't had a proper trials. There is so much information still to come out but in general we do not need to fear the virus just take precautions when one has a comorbidity or some thing that might cause them to not be able to overcome it with their own immune system. I would never send my child to a school that would force a vaccine upon them. I will never be forced to take a vaccine. That is my choice and I use my own sound mind to make health decisions for myself and for my child. It is not the governments or the schools choice to decide what to feed my child, teach my child or give any medicine to my child against my will. This is the right of the American people under a free government. I ask you to keep America free to do the right thing. It might be confusing

to some because they might think they are doing the right thing vaccinating everyone but the bigger picture is it strips our freedoms away. Each person gets to choose how they want to go about taking care of their own health. Please do the right thing keep America free by not recommending or requiring any vaccines or boosters to be mandatory for any child.

I love my country and want to enjoy of freedoms.

May God bless America!

Sincerely, Elizabeth Howard

As a citizen of this great country, this proposal goes against everything our country was founded on; our constitution. You have NO right to demand or mandate anything when it comes to our children (or anyone for that matter) . YOU are not their parents and you will not make medical decisions for these children. Plenty would die on this hill to protect our children and everything sovereign about them. They pose almost zero risk, so to me this is slimy. Money must be involved somehow, someway. Everything is about following the money. As far as I'm concerned, no parent in WA state or any state in this country will co-parent with the government. Over our dead bodies! Also, does anyone know how to READ statistics? The data shows very very very low death rates in children so this is just unlawful. And instead wanting to just running around wanting to jab everyone, maybe offer therapeutics first, but wait!, that goes against this entire agenda. The truth always prevails but you won't be touching our children! Shame on you people that follow along. You're a bunch of meaningless followers; no real leaders. You will not touch the children. Period.

I'm taking the opening position to this vaccine because children are At extremely low risk of getting sick/hospitalized from COVID, and the vaccine is still only for emergency use. I am not on board with my children being the experiment for a vaccine that has caused AWFUL side effects to many people I personally know!

I am concerning if this proposal will turn into mandatory covid-19 vaccination requirement for children to enter school/child care. Current covid-19 child vaccination is only approved as emergency use, meaning lacking full cycle, thorough medical evaluation done with other vaccinations. Even the chance probably is low, the result is irreversible. Plus real world data tells recent omicron symptom is minor to most people, the return of vaccination is really limited but with potential long term, unknown, irreversible damage. We should keep vaccination volunteer

Subject: Agenda

External Email

Dear Representative of the Board of Health,

I would like to:

1. OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!
2. SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Regards,

Tatyana Kravchuk

Subject: No vaccine mandates for kids!

External Email

Tracy,

As you probably surmise from the subject line of this message, I am writing to express my concern about the BOH meeting to discuss adding a vaccine requirement to attend public school. The evidence is increasingly clear that people under 40yrs old face greater risk of harm from the shots than from natural infection.

With the emergence of Omicron as a common cold-like infection for virtually everyone, this is the time when we need to be discussing the timeline of peeling away restrictions, mandates, and all of the things that we've been harming our kids with over these last two years, NOT adding more useless and potentially harmful mandates. No sane society uses their children as a shield to make adults feel safer.

The idea that parents are having to worry about making a decision whether to pull their child out of school or inject their child with a vaccine that might harm them is abhorrent. The very idea of mandating a vaccine for children that has no long-term data on possible negative effects (for any age group) is amoral on the face of it.

This isn't about being "anti-vax", the latest weapon word. This is a simple risk/benefit calculation.

Every other required vaccine for kids underwent a much longer approval process, and then an additional 6-16 years (depending on the vaccine) of use in the general population, before they were ever considered as a requirement to enter public schools. We have no long term safety data on these mRNA vaccines!

Now is the time to publicly speak up against this single-minded approach to dealing with the pandemic. I personally think that they are a marvel of technology and I am glad that they are available for those who stand to benefit from them. However, our Governor and those of you overseeing the Board of Health seem to have lost the script. You need to know that this is the wrong way to proceed. I worry that they will set back trust in all vaccines for a generation if too many kids are being harmed by these new shots. Trust in our public health agencies is already at an all-time low and that is dangerous.

Please, I am asking you to back away from this idea.

I also encourage you to read this post by Dr. Vinay Prasad. He has been a voice of moderation and reason throughout the pandemic and he is deeply concerned that we may be rushing into something that we might regret.

<https://vinayprasadmmdmph.substack.com/p/uk-now-reports-myocarditis-stratified>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvinayprasadmmdmph.substack.com%2Fp%2Fuk-now-reports-myocarditis-stratified&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C35c7e5eedb954186782808d9d1fbdbde%7C>

If you have 30 minutes of extra time then you might also listen to this interview between Zuckerberg and Fauci from way back near the beginning of the pandemic. If you do, then pay particularly close attention to what Fauci says regarding the process by which the vaccine safety profiles need to be established. Then ask yourself if the science changed, or whether something else happened.

<https://m.facebook.com/zuck/videos/live-with-dr-anthony-fauci-the-uss-top-infectious-disease-expert-to-learn-about-/10111683294466031/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.facebook.com%2Fzuck%2Fvideos%2F10111683294466031%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C35c7e5eedb954186782808d9d1fbdbde%7C>

I am hopeful that the madness and hysteria of the last two years is beginning to fall apart and that we might begin to work towards a healthier situation for our kids. They have been harmed enough by our pandemic policies. I just hope that Washington State isn't the last place to get the memo. Most of the country seems to have figured it out already and I am astonished that we still seem stuck in some weird fearful version of 2020.

What in the heck are you all thinking?? Enough is enough. It is time to learn to live with this virus, focus on protecting the most vulnerable, and leave the rest of our society alone.

Thank you,

Erik

I am completely against any of the proposed Covid Policies and I feel that are over reaching, immoral and goes against our constitutional rights. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

I will not support or allow our medical freedoms and right to choose for myself and my children be stripped away from us. This is government overreach and completely unacceptable. There has been no scientific basis on these measures that deem these proposals Necessary.

Thank you,  
Rachel Rumph

To utilize law enforcement to detain individuals who do not quarantine for COVID is so far overreaching. You are turning Washington State in Nazi Germany. We are losing GREAT families that are leaving Washington State because of the atrocious laws. PLEASE STOP ruining our state over a virus that has a 98% survival rate.

Requiring COVID vaccinations as part of school immunizations is also crazy. This is NOT a proven vaccine...it requires more study and data. How can a vaccination that only has a EUA be mandated as a condition of public school. STOP NOW PLEASE.

IF YOU TRULY CARE ABOUT THE PEOPLE OF WASHINGTON, DO SOMETHING ABOUT OUR KIDS MENTAL HEALTH HEALTH.

PLEASE NO ADDITIONAL COVID RESTRICTIONS.

Thank you for your time and I ask that you take into consideration that I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

\* Children are at extremely low risk for Covid

\*

The vaccines are still only EUA (emergency use authorized)

\*

There are no long-term studies to document any history of safety

\*

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,

\*

The vaccine apparently does not stop the spread of the disease.

## 2. Con

---

I believe it is wrong to require vaccines for any age group! This should be a personal choice for individuals and families. This vaccine is also still under emergency use and has not even gone through the necessary testing. Kids rarely show signs of having Covid and recover from it very quickly and easily (unless there are underlying health issues), I have witnessed this first hand. Please stand for freedom and our constitution and allow families to choose to vaccinate or not.

Hello,

I am writing this email in hopes that I can reach the correct people who are making decisions out side of their rights. I DO NOT believe that it is ok for you to decide what I put into my child's body!!!

That is not your decision to make and parents should not have to decide between putting an experimental vaccine into their child or to send them to public school. To say we cannot send our children to school without the vaccine....the school by the way that MY TAXES pay for is illegal and horrible.

Our children are not guinea pigs to be tested on. If I cannot send my child to school then there should be a law put into place so I can get out of paying the taxes on something I am not utilizing.

Please do not take a parents right to decided what is best for their child unless you are willing to come into our home and pay the consequences for what may happen to them. Kids need to be in school but they should not be forced to get an experimental vaccine!!!!

Thank you for listening and I hope you guys make the right choice. Washington state used to be the best place to live and now I am afraid many will be forced to leave because lawmakers think they have the right to make choices for us in what is supposed to be a FREE land!

Sincerely,  
A concerned tax payer that pays your paycheck!

Children have a low risk of contracting the Covid-19 virus. In addition to this the current vaccine has not undergone the proper steps for testing and verifying the safety of its use. It is still only being approved for emergency use. Our children's bodies are developing and growing - I strongly object to submitting them to a trial vaccine that hasn't stopped many from contracting the virus it is supposed to protect them from.

---

The covid infection rate for children is extremely small and the vaccine which addresses infection has been shown to cause myocarditis and other heart related issues in many vaccine recipients. The risks of the vaccine far outweigh any benefit to either the child or the people in the child's life. Additionally, the burden to offer "protection" to the elderly or anyone else who comes into contact with a child should not rest on the shoulders of the child but rather on the adults in that child's life, especially when the "protection" offered carries such potentially harmful and devastating risks.

My comments for the meeting are as follows. I oppose any mandates, restriction or requirements regarding vaccines for both children and adults.

Our children should not bear the burden of adults fears and unreasonable expectations. The risk for kids to end up seriously ill is almost non existent. We need to return the responsibility of children's health to the parents and stop the madness of a false conversation.

The vaccines are not doing what they were supposed to do, to stop the spread. Vaccinated people are still spreading getting Covid-19. So in this case the risk far outweighs the benefit for kids. I strongly oppose any mandates.

Allowing law enforcement to detain individuals and families that refuse to "voluntary

comply" to various medical procedures. Adding Covid-19 to school vaccination list.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Long term health effects have not been investigated on the new gene therapy style of vaccines. Clinical study information has not been released by the FDA in order for individuals to give informed consent to this medical procedure and should therefore not be forced on them through coercion.

Hello,  
Please read the attached public comments for the Board of Health.  
Regards,  
Bob Runnells  
Vancouver

**RE: Oppose Addition of Faulty, Untested Products for School Entry Mandate List**

To the Washington Board of Health:

People across the state have hoped that COVID-19 vaccines would work as a...well, as a vaccine. Vaccines are supposed to prevent infection and transmission.

Yet, the makers of the shots can't say they prevent infection or transmission. The CDC Director Walensky is quoted a few months ago as saying the same thing.

On Wednesday December 15<sup>th</sup>, the New England Journal of Medicine published an editorial Perspective by three authors, including one Anthony Fauci. They make a case for better, different vaccines while admitting: "As important as these vaccines are, however, their protective efficacy wanes over time, necessitating booster doses. Vaccination has also been unable to prevent "breakthrough" infections, *allowing subsequent transmission to other people ...*" [emphasis added] <https://www.nejm.org/doi/pdf/10.1056/NEJMp2118468>

If a product doesn't do what was intended, how can it be mandated? Let alone approved? Now people's intelligence is further insulted as many agencies are changing the definition of a vaccine to sound more like a typical medicine that reduces symptoms. The shots are hardly worth mandating on a school entry list when it doesn't work as a vaccine. You might as well mandate Dayquil for Kids - it reduces symptoms of the common cold and allows transmission of the cold viruses too.

Many other states have gone so far as to make mandates illegal.

There are now a lot of safety and effectiveness data on the one-size-fits-all solution being forced on everyone. Public comments made to the Board of Health during the pandemic are not misinformation. It is the missing information - factual information supported by hundreds, if not thousands of scientific studies and doctors and PhDs proving the products do not work as advertised. What is indisputable about the COVID shots? Risk. The chance of significant personal or child harm, coupled with the ineffectiveness of the products, does not warrant mandates. Policy not backed by sound rationale is arbitrary and amounts to punishment for many.

The argument against including COVID shots on the WA school mandate list can be summed up concisely:

- Children and adolescents are not at measurable risk from bad infections, so they don't need the shot.
- The shots don't prevent transmission, so the argument to have the kids take the shots to protect older people doesn't hold water.
- The shots have only been in children for about 12 months. The virus will be endemic before any long-term effects of the shots are understood in the young.
- There is no urgency. Dr. Fauci has now admitted that the child hospitalization data is inflated because of admissions 'with' COVID. The BOH should wait until Phase III trials are completed to understand more of the safety profile of the so-called vaccines.

To consider this shot for schoolchildren while the products are waning in efficacy and remain under Emergency Use Authorization is wasteful of tax dollars and myopically focused on a one-size-fits-all approach.

If you recommend that COVID shots be added to the school schedule, the Public Health agencies will lose what little credibility remains and no one will listen when a truly bad health emergency arises.

Sincerely,

Robert Runnells

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health. There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19. Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you,

Sandy Scherich

2. Con

---

I'm not exactly sure how anyone in this country could even contemplate the legitimacy of forced quarantine, regardless of how this may be proposed to be carried out. In a country that prides itself on being the "land of the free" it is precisely the opposite of this that lead to the incarceration of Japanese Americans during WW2 that is and shall always remain a blight on this nations's history. We would be remiss to treat our citizens so again for any reason. Take also into co sideration that this State was altogether eager to use the pandemic as an excuse to RELEASE CRIMINALS FROM PRISON, where they are quarantined from the rest of the population for acts of violence. Now, this State should contemplate imprisoning people (in their own homes or otherwise) for the crime of getting sick. This concept is startling and I oppose it at every level with every fiber of my being. Furthermore, a vaccination mandate for children is exceedingly unnecessary considering the as yet unknown long term affects on top of the exceedingly rare instances of of hospitalization, let alone death, of healthy children due to COVID-19. This would only serve the profits of vaccination companies, not our children or public health. Our state should not be using children to mandate profits for billionaires and stock holders. I oppose this measure vehemently.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I am here to voice my concerns taking place in this State in regard to COVID 19 shots.

I feel that every parent chooses what they feel is right for their children and themselves. Whether that means choosing to get a shot or not, just like choosing to breast feed or use formula. Both are a right answer in what they choose for their family and that because it's a CHOICE. It should always be a choice to get a shot or not, just like the flu shot (Norway already views COVID as the flu so we really need to get on their level).

Thousands of fellow parents will pull their kids out of school if this is required. I love my children too much to force junk in their body that has yet to even be proven affective from getting it spreading with the shot- so what the point of even getting it? Due to the thousands of parents pulling their children will only add to the falling economy... as teachers, bus drivers, cooks, etc. will no longer be needed since their will hardly be any children in school.

Face it, COVID will not go away- people need to move on and live their life and realize it's not serious. People die from smoking... yet that's still ok....how many alcohol related deaths have there been? Millions... but yet let's still sell it and every venue, restaurant, and store. That makes sense.

There isn't a Covid pandemic. There is a people with power pulling pandemic. Horrible people that do not respect the constitution.

As you can see I am completely against forcing people and children from a shot that they feel is not good for them. And punishing those families who chose not to get it. This is un-American and I hope you are ashamed of yourselves.

Good morning!

I am emailing to express my very great concern over the measures that are being proposed in next week's meeting. This is unbelievably unconstitutional.

Forcing people to take a medical treatment and placing them into camps if they choose not to. Forcing children to take the vaccine. Does this not remind you of a dark time in the past? This is just like Hitler. At what point do you draw the line. We cannot give up our freedoms. It is our constitutional right to choose such things.

Thank you for making the right decision and declining these measures.

Kind regards,  
Trish Honegger

Today I am writing to you to express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Sincerely,

Rita Deady

From: Tara McGinty  
Sent: 1/6/2022 9:55:25 PM  
To: DOH WSBOH  
Cc:  
Subject: Upcoming Proposed Policies

External Email

I am writing in regards to current proposed policies in which Inslee/Government will allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105

We the people are against this. Taking away our rights and writing it into code that we can be placed involuntarily into "quarantine" and/or isolation is inhuman and will not be tolerated by the people any longer.

For a party that speaks so highly of science it truly saddens me to see how little science is being used to make decisions for Washingtonians. Children have the lowest risk of dying from/with covid. I believe it is 99.995% chance. That does not warrant a mandate of this gene therapy or "vaccine" (as it is mistakenly being referred to) as a requirement for attending school.

Enough of the fear.  
Enough of the fabrications.  
Just Enough already!  
It's a freaking cold at this point.

Fed up,

Tara McGinty

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid

The vaccines are still only EUA (emergency use authorized)

There are no long-term studies to document any history of safety

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease

The government does not have any right to tell people what they have to inject into their bodies.

Dear WA Board of Health,

I'm writing to you today about the issue of making Covid shots mandatory for children. I'm a mother of four and a Registered Nurse who has worked in the pediatric field for over 10 years. This shot should NOT be mandatory for children to attend school or child care. Children have a very low risk of having severe symptoms with Covid. In addition, the vaccines are still only for emergency use authorization. Leave this choice up to the parents.

Thank you for your time,  
Susan Hughes

Subject: Board of health recommendation

External Email

It is a terrible idea to have the WA state board of health make decisions about vaccinations for our children. Those decisions should be left up to the families. This covid virus, based on data, is similar to common colds and the flu especially in children. Thus should be treated like we do colds/flu. There is no mandate for shots for those viruses. This would be considered government overreach. Enough is enough with telling people what decisions to make about their own health choices!

My position is that there is overwhelming scientific evidence to say that children are not at risk from dying of Covid, making a mandatory vaccine senseless. The vaccines have also proved to be ineffective at stopping the spread of the virus. In addition, the vaccines have a higher death rate in children than the actual disease they are to prevent. Exposing a child to these vaccines only exposes them to a greater risk of death and health issues than Covid itself. It is simply an irrational decision to force children to take these vaccines! Lastly, each individual has the right to make their own medical choices and it is not the State's place to tell people what they must put in their body. This is an overstep of the individual's U.S. Constitutional rights.

I am a fully vaccinated adult. My child attends public school and has all required immunizations. I fully support vaccinations and masking for those who wish to do so. It is, however, too early to create a TAG to consider adding Covid19 to required immunizations for school entry, especially since it does not appear that the 9 criteria for reviewing antigens for inclusion 10 WAC246-105-030 have been met. Criteria II(5) is about significant mortality rates. According to the CDC ([https://data.cdc.gov/widgets/9bhg-hcku?mobile\\_redirect=true](https://data.cdc.gov/widgets/9bhg-hcku?mobile_redirect=true)) the mortality rates in children is extremely low and the age groups with much higher mortality rates who might be working in the schools are already required to be vaccinated and masked per Washington state mandate. Criteria II(6) indicates the vaccine must reduce person-to-person transmission. The current COVID19 vaccines do not stop transmission. Masks and social distancing are still required for school and inside public buildings in Washington state regardless of vaccination status. Criteria III (7) While a large percentage of the medical community supports vaccinations, I have personally asked the advice of various medical physician assistants and doctors (MultiCare, Providence and Private Practice) I have seen in the past 6 months about Covid19 vaccines and children and I have received differing opinions on whether it is necessary in a child without an underlying medical condition. And looking at WA DOH data, only 20% of children ages 5-11 have received both doses of the Covid19 vaccination, which doesn't indicate the public is confident in vaccinating school aged children (<https://www.doh.wa.gov/emergencies/covid19/datadashboard>) Criteria III (8) While I cannot speak to the burden on K12 school staff this would create, I did see how vaccine compliance at the higher education level overly taxed staff and meant postponing many job responsibilities while they addressed verifications and exemptions. Criteria III (9) the burden on caregivers to obtain the vaccine seems to depend on personal circumstances. While vaccines don't cost anything, I have a car and live in the second largest city in Washington which means I likely have easier access to vaccine appointments than more rural areas or areas without public transportation options or for caregivers that don't have flexible schedules due to work or other responsibilities. Also there is only one vaccine that currently has emergency authorization for use in children, so it is up to the caregiver to have access to that Pfizer vaccine. As you can see a number of the criteria haven't been met so it is premature to organize a TAG to consider requiring COVID19 vaccinations to enter school.

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Andrew and Rhonda Krahm

By far, there are over 1 million adverse effects from the Covid-19 "vaccines" reported on the VAERS, 410 young, strong, fit athletes have collapsed during the games/in front of the cameras, and why would WA Dept of Health want to enforce such a measure on the healthy kids who are literally not affected by the covid virus? Most of the kids who are hospitalized are the ones with the covid vaccines, and why would you want to enforce the failed "vaccines"? My proposals are: 1. stay out of my kid's health decision 2. investigate possible corruption committed by the public health officials 3) investigate the public health officials' relationships with WA Governor Inslee, and Bill Gates, and Bill and Mellinda Gates Foundation. I have more, detailed covid "vaccines" victims' information if you need them.

11.

Are you Pro or Con on the proposal?

1. Pro

---

VAERS analysis reveals hundreds of serious adverse events. Over 4,000 adverse event codes are elevated by COVID vaccines by a factor of 10 or greater and the CDC is neither warning people about these adverse events nor are they mentioned in informed consent documentation. As of November 1, 2021 there have been more adverse events reported for the COVID vaccines than for all 70+ vaccines combined since they started tracking adverse events 30 years ago. This metric alone should be enough to move the decision against not only requiring the vaccine for any person but especially from administering the vaccine to children of any age. COVID vaccines are the most dangerous in human history, 800 times more deadly than small pox which was the previous record holder. COVID vaccines have killed at least 150,000 Americans, including children, and injured countless others. The Pfizer 6-month trial showed the vaccine is capable of saving 1 life for every 22,000 vaccinated, it killed more people than it saved (there were 20 deaths in the control group vs 14 in placebo after unbinding) and by the numbers it kills 15 people for every 1 it saves. Any reasonable person would conclude this vaccine poses a greater danger to children than the virus and based on that, I hope this committee will do the right thing and neither recommend nor mandate this vaccine for children as a condition to enter public, private or any other school.

Any of you authoritarian totalitarian board members trying to impose involuntary quarantine's to free Americans outta be ashamed of yourselves. Go live in Europe or Australia. Get out of free America. Wave a nazi flag, cuz that's exactly what you are. Nazi's. Trying to involuntarily quarantine free Americans for something that's nothing more than mild flu symptoms just shows how power hungry and or insecure you all are. This pandemic is somewhat concerning for for the elderly, and immune compromised. That's it. Everything else is lies, deceit, and coercion. All you can do is let the public VOLUNTARILY get a vaccine if they want. Everything else is government overreach. Stop here. You have no facts, and no data as to why this should be done. It's completely unnecessary. You would rather "feel safe" than be free. Pushing this will have drastic repercussions I have been on the front lines working as a fireman during this entire pandemic. I have seen less than 10 positive Covid patients. None of which died, none of which were critically ill. Children have a higher likelihood of dying from pneumonia than they do from Covid. I know the truth. Maybe don't, or maybe you choose not to.

While I support the state school vaccination requirements already in effect, it premature to add a COVID 19 vaccination mandate. All the current COVID vaccines are only EUA for children, more data and time is needed to ensure that they are safe for our kids. I also question whether a COVID 19 vaccine mandate at schools would have any positive effect on community transmission of the virus. Finally, what is appropriate for the Seattle school district may not be appropriate for our small rural county (Jefferson) - there should not be a statewide school vaccine mandate - instead leave it up to local authorities.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Subject: Support covid vaccine for school attendance

External Email

I am writing tonight to encourage you to vote FOR requiring the Covid 19 vaccine for all students and staff to attend school.

I am a teacher at the high school level. I receive notices almost every day that at least one student (or today it was 10) has been placed in quarantine due to testing positive for covid.

One of my students lost both her parents (a week apart from each other) in September to covid. Kids who go out because they get sick with covid can't learn. And because it is so contagious, those kids cause a cascade of illness to flow through the school.

As a teacher, I don't feel safe in my workplace because the vaccine is not yet required. And as a parent, I don't feel safe sending my vaccinated kids to school with other unvaccinated kids despite the mask mandate. I'm constantly telling my high school students to wear their masks properly.

We need to be safe at work & have our kids be safe at school.

Not requiring a vaccine is basically allowing kids to come to school with a deadly weapon.

Please vote FOR VACCINE REQUIREMENT to attend school.

Thank you  
Holly Rose

---

Requirement of COVID Vaccines for school. The COVID vaccine should NOT be a requirement for children to attend school in WA state.

11.

Are you Pro or Con on the proposal?

2. Con

---

Children should not be required to take a vaccine to attend school that is 1. Currently under Emergency Use Authorization, 2. Has no long term studies, 3. Has no studies of vaccinating children that have already had the Illness , 4. Does not stop the child from getting infected or spreading the infection. (As recently seen with the omicron mutation)all for an illness that has an extremely low risk to children. If we had a vaccine that actually stopped the spread and didn't allow the vaccinated to get sick then maybe we could consider having this vaccine be mandatory but that is not the case. Over the last month I have seen vaccinated child after vaccinated child come down with COVID at a rate no different then their unvaccinated counterparts. This doesn't make sense. Why take on the added risks of forcing vaccination when many of these children already have had one or more prior infections.

Subject: Re: Agenda Item #8

External Email

My family and I strongly oppose mandated Covid shots for school aged children as it has been clearly proven that the risks outweigh any perceived benefits especially given the fact that children are the most unlikely members of society to be affected by the Covid virus. The instance of children who have been harmed by the Covid shots and have suddenly developed heart related problems is extremely disconcerting and Item #8 on the agenda is a matter of huge concern for us and for many other families that we know. Your consideration will be most appreciated. Thank you!

I am writing to speak out against the proposed K-12 Covid vaccine mandate. These vaccines are still in emergency use authorization for 5 to 12 year olds. Long term side effects of this vaccine on developing children are to date unknown. Influenza is more dangerous to kids, yet flu vaccines are not mandated. Further, the Covid vaccines do not prevent people from contracting or spreading the virus. Parents should have the right to choose for themselves whether or not to vaccinate their children with the Covid vaccine. Thank you.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Tony Gale

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Immunization Criteria for Child Care and School Entry. Specific Topic in Discussion:  
Making Covid Vaccines mandatory for Child Care and School Entry.

11.

Are you Pro or Con on the proposal?

2. Con

---

On the specific discussion over Covid Vaccines being made mandatory for child care and school admission): I am against this as a parent. It is void of any logical reasoning based on the facts we have observed all over the whole world when pertaining to children. Kids recover from this virus 99.9% of the time and rarely hospitalized if at all. One of the very earliest reports I remember coming out of Wuhan when the virus escaped was that is 'mysteriously' - and I remember this well because of the wording and the subject having to do with children - \*mysteriously\* did not affect children nearly as severe as the adults. My husband and I got Covid 3 months after we got vaccinated. We had symptoms for up to 2 weeks. Our son got it from us and barely had symptoms. He felt sick one night and was back on his feet the next morning, hardly affected. After the first Pfizer shot I had an adverse reaction that was neurological. I read about many of these online. We are not being told everything about the possible bad side effects from these shots. On day 4 after the shot my mouth burned for a straight 2 weeks. I couldn't eat well or brush my teeth. It wouldn't stop. I went to Urgent Care 3 times, ER once. Got a CAT scan. No one would tell me it was reaction until I saw my Primary Care Physician. She told me not to get the 2nd shot. My husband got both shots, but 3 months later we got Covid anyway. I was over Covid in a week and a half. I was over the shot after extreme pain & discomfort and depression over the course of 2 months. This vaccine is not realized. It is not safe. I've had vaccines my whole life and have never had anything like this. I was in the army and remember shot 'guns' on either side of my arm going off and I was fine with it. I've been fine getting my son vaccinated so far his whole life and he is now 10. But not this. NOT THIS. I do not want to subject my son to any adverse event such as I went through or others I have since read about. We are not being told about adverse events in the news or getting paperwork about possible side effects like every other shot you get. Where's the paperwork with this one where we can be informed and make the decision for ourselves? Now the state is going to forego our individual medical histories and rights and decide for us? I do not want this shot for my son. Again. - it is not fully realized or ready for the public. If people want to take the chance with their own children and get it, that's up to them. But you cannot force people, you cannot force me. This is a free country, we are supposed to have liberty. And that was another reason I have against mandates, it is not humane, it is not recognizing freedom. It is wrong, plain and simple

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

It has come to my attention that the you will be discussing Covid vaccine mandates, specifically for children. I disagree massively with any mandates, specifically for children.

I also do not appreciate the "preventable disease" provision of the article being used as a lever to propagate a Covid vaccine mandate. We have had an experimental vaccine, a booster, another vaccine, more boosters, and none of them have proven effective "preventing" contraction of Covid, or spreading it for that matter. I believe it is every parent's right and duty to protect their children to the best of their ability and look out for their overall well being. For me, that means fighting not to inject them with an experimental immunotherapy drug to "treat or prevent" a mutating virus, that will neither prevent them from getting or spreading the virus and will also be obsolete in a few months once another mutation comes along. Furthermore, the only data we can be fairly certain about is how these different viruses affect different ages and populations. Across the country and the world, aged 5-17 are the least vulnerable in regard to fatality or serious complications. Additionally, this age range is the most asymptomatic population. So why in the world would I want my child to have an experimental potentially dangerous drug injected into them when it will not prevent them from getting covid, will not prevent them from getting Covid, and even if they did, they would have little to no symptoms and extremely low possibility of any type of serious complication. Furthermore, the exempt status of this drug is absolutely alarming. The drug companies are literally not responsible for any vaccine injury and there is no money left from the government to make up for it. That was gone within weeks of first vaccine. These drug companies won't even share public information for 55 years. Why do you think that is? Lastly, forcing families to make this decision is shameful. A blatant manipulation of verbiage to push an agenda. Our rights and freedoms have been trampled on for far too long in this state, an many more ways than one. You start messing with our kids and jobs, there will be consequences. You Go get whatever shot you want, take whatever drug you want, wear whatever piece of cloth that you want to feel safe in, miss time with your family and friends, isolate yourself entire family from the world waiting for what else your government wants you to do so you can feel safe, but don't tell me I have to. Do not promote this nonsense. I urge you to keep our bodies and our children's bodies under our own control. Please say no to mandates children vaccines. And let's go ahead and stop making adults get a shot that's ineffective. People can and will say no. Mandates are illegal, and I truly hope the propagators of all this massively intrusive and unconstitutional agenda we've endure will see brutal justice and consequences.

Subject: No! to the Covid 19 Vaccine

#### External Email

Let me start off by saying that we will be pulling our children from public school if the covid-19 vaccine becomes a requirement. Getting the covid 19 vaccine should be a choice made by each individual family depending upon their health and beliefs just like the flu vaccination.

The death rate for Children under 18 who are infected with covid19 is less than 0.01 percent. This is straight from the CDC website. There have been a total of 694 child deaths "involving" covid 19, in the last TWO years in America. This is less than car accidents per one year.

The side effects from the covid-19 vaccine that we are seeing in children and adults is alarming. The biggest concern that we are seeing in children is Myocarditis, (inflammation of the heart muscle) and pericarditis . This should be scary enough to make everyone rethink the decision of giving their children the covid vaccine especially when the death rate for covid is less than 0.01 percent. Covid 19 vaccines are different from any other vaccine that we have ever used. We do not know anything about what the long term effects of the vaccine are yet. Other vaccines took 10 to 20 years of studies before they are even considered to be approved and here we are being asked to give this vaccine to our children.

There are stories after stories of children and adults having side effects and death due to the covid vaccine. Many people that I know become very ill for weeks after getting the vaccine and continue to have side effects from getting the vaccine.

The risk of the covid-19 vaccine is so much greater than actually getting covid for children. There is only risk and zero benefit. There isn't even the benefit of not getting covid. Everyone I know that currently has covid has been vaccinated, some even with a booster. Again there is only risk and no benefit to our children.

Thank you,  
Tira Will

Subject: Agenda Item 11. Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

External Email

To whom it may concern,

In regards to the January 12, 2022 meeting, Agenda Item 11: Rulemaking Petition—Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry, I would like to voice my stance on the possibility of adding the COVID-19 vaccination as a requirement for school attendance:

**UNDER NO CIRCUMSTANCES SHOULD THE COVID-19 VACCINATION BE MANDATORY AS A CONDITION TO ATTEND SCHOOL!**

First, the drugs being used to inoculate people against COVID-19 in America are still under EUA; there is no fully-approved COVID-19 vaccine being used in the United States. It is still considered experimental and cannot be mandated. Second, COVID-19 is not a serious health risk to children. Third, there have been astronomically more reports to VAERS for the COVID-19 vaccine than for all other vaccines combined in the history of the VAERS reporting system. Fourth, myocarditis is a well-established side effect of COVID-19 vaccination, especially in young boys and men. Fifth, in Chapter 246-105 WAC, Section 246-105-010 the stated Purpose is as follows (underlining mine):

The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers.

Because it is well-established that no current COVID-19 vaccine prevents infection with Sars-cov-2 disease, mandatory vaccination with the COVID-19 vaccination would be in violation of this section of WAC 246-105. Furthermore, as stated in Section 246-105-030 of the same Chapter, children should be allowed exemption from vaccine mandates when proof of acquired immunity is shown.

Please protect the health of our beautiful children: Do NOT issue a mandate on COVID-19 vaccines to our children.

Thank you,

Dr. Susan Bowser

Subject: Children and Covid 19

External Email

Dear Esteemed WA State Board of Health,

It has come to my attention that you are considering some rather aggressive policies for our state, its families and our children around Covid 19.

I am writing to strongly oppose all of it.

As a Mom of three children whose family had Delta and have the antibodies to prove it, I am strongly against mandatory vaccination for children to attend school. I have had many, many friends and family members who became ill with this virus. While adults often struggled with the disease, our children SAILED through with little impact.

This anecdotal and lived experience seems to square with the data from the CDC in which less than one percent of ALL pediatric deaths of ALL causes from January 2020 to 2021 were in children that died WITH covid, not from it. Congressional testimony bore out the fact that investigations into those rare deaths with covid in children demonstrated that in ALL cases the children had at least one co-morbidity and on average had four co-morbidities.

Healthy children are NOT at risk from Covid -19!

They have, however, had their health severely impacted by radical lockdowns, social distancing and masking. A recent Brown University study demonstrated that IQ dropped 20 points in infants and children ages 1 to 5 had a cognitive decline of 23% over all previous years prior to the lockdowns of 2020! Actual brain damage, due to masking and social distancing due to these draconian measures are taking place.

Are you Health directors or child abusers?

Your decisions around continuing these measures of constant covid-testing our children, forcing masks on their little faces, forcing them to isolate and distance from their peers, losing valuable educational opportunities, and now injecting them with something that is 100% experimental with NO LONG-TERM STUDIES, have and will impact generations.

The measures you have already forced on our communities have been cruel and unnecessary enough. Will you continue and even exacerbate your abuse?

I know of not ONE SINGLE CHILD in my community injured from the virus, but I have a laundry list of injuries from masking, social distancing, lockdowns and now a friend whose son contracted myocarditis from this injection for a disease he was not at risk from.

There is zero benefit for children from these EUA injections that do not prevent transmission of disease; there is ONLY risk.

According to the 1905 Jacobson vs. Massachusetts SCOTUS decision, a vaccine mandate could only be given if it could be proven to prevent the spread of contagious disease.

Our school district is now testing both vaccinated and unvaccinated athletes in close contact sports after a recent outbreak of covid at a WA State wrestling tournament. This 100% PROVES that these vaccines are not true vaccines at all as they do NOT "prevent the spread of contagious disease."

Therefore, any and all measures to mandate this injection to anyone, apply covid 19 to current WACs such as the one ending in 100, create covid passports for entry into establishments, travel, or school is, in my opinion, blatantly illegal and certainly immoral and unethical.

44 other states no longer have mask mandates. Are they digging mass graves there? No. They are not. It is time for Washington to get back to living, stop the fear mongering, and STOP any talk whatsoever of vaccine mandates or passports for a medical treatment that is NOT FDA approved.

The Pfizer vaccine we are currently using here in the States is NOT FDA approved!

It is time to start having the adults in the room protect the children and put their needs first like a civilized society.

Never in any civilized nation have adults put the onus of "protecting Grandma" on the shoulders of our youngest, healthiest population. That our Governor would call the unvaccinated, such as little, innocent children, and those of us who are covid-recovered, "domestic terrorists" is appalling and gross. That is not inclusive, compassionate, or a measured, responsible response from a political leader. It is shocking and diabolical.

It is our job as adults to protect the young not the other way around. This vaccine, again, poses zero benefit to our youth and provides only risk.

Please, stop the abuse of our children right here and right now.

Thank you,  
Sarah Garriott  
Gig Harbor  
4th generation Washingtonian

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid. The vaccines are still only EUA (emergency use authorized). There are no long-term studies to document any history of safety. Studies now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease. Why take part in a vaccine trial that has been shown to not work yet seems to have horrific side effects in some instances. Why mandate vaccines when the CDC has stated that the survival rate is 99.6%. I see no need for a vaccine that has been proven not to work.

Thank you, Kirk Rodda

Please

My childhood mentor just died in reaction to the vaccine.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital

nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school

---

This matter gravely concerns me. I want to express that the Covid shots are absolutely not necessary for children. Why would this be a requirement to attend schools where children are at an extremely low risk of Covid. Please show me where the emergency is - when considering that children should be subjected to this? These shots are only experimental. They are not approved by the FDA. Even they are being sneaky. The ingredients to these shots are still under investigation. I urge you to not participate in what I believe to be the most dangerous assault onto humanity and our dear children that still have growing bodies, and deserve a future. Where there is a risk there must be a choice, Please don't allow this in the State of Washington. Please consider your decisions based on science in red states. There are greater ways to protect their enate-immune systems, that don't involve shots that are untested, and still under clinical trials. I beg you to reconsider ever coming up with a forced injection upon the innocent. Thank you

---

I am writing today to provide dissenting comments regarding the Washington State Board of Health's proposal to add Covid-19 to the existing Communicable and Certain Other Diseases law. As I understand the proposal, this would allow local health officers, who are not elected officials, to utilize law enforcement (WAC 246-100-070) to involuntarily detain a person or group of persons (families) for isolation and quarantine following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, or vaccination (WAC 246-100-040). Non-complying individuals would be guilty of a misdemeanor with a penalty of up to one year in jail. In addition, the board seeks to require Covid-19 injections as part of school immunization requirements under WAC 246-105. First, let's understand that COVID-19 presents a high risk of severe illness and death to a minority of Washington's population and a negligible risk to the majority of the population. The median age of death with COVID-19 is similar to that of natural mortality in most countries. Ninety-five percent of hospitalizations occur in individuals with one or more existing health problems, and 99.95 percent (pdf) of individuals below 70 survive being infected by COVID-19. In addition, it is becoming more clear by the day, if you choose to honestly assess the incoming data, that the existing COVID-19 vaccines are imperfect. While they may lessen the severity of disease, they obviously are non-sterilizing or "leaky" vaccines and do not prevent vaccinated and even boosted people from getting infected or spreading infection to others. Even if everyone is vaccinated, transmission will continue and variants will keep evolving. In addition, there is mounting evidence of serious adverse events associated with the vaccines, particularly myocarditis in the young, following COVID-19 vaccination. Vaccination is only indicated when the intervention clearly represents a greater benefit than risk for the individual. This criterion isn't met for children and young people, individuals below 60 with no existing health problems, and individuals with past SARS-CoV-2 infection (including asymptomatic infection). In addition, vaccinating individuals who do not benefit from the intervention diverts valuable resources away from the vulnerable, as well as disadvantaged communities. Mandatory vaccination, or other punitive medical care, has no place in a free society. Public health policy should never be coercive and should always be participatory. Decisions must be made by individuals in

consultation with their personal medical team and not by bureaucrats who will never have to live with the consequences of their actions. As always, where there is risk, there must be choice. The role of public health agencies is to provide the public with accurate information and respect individuals and communities to make their own decisions. Medical ethics requires seeking the individual's informed consent before any medical intervention: informing them of the risks and the benefits of the intervention and getting their voluntary consent without "any element of force, fraud, deceit, duress, overreaching or other ulterior form of constraint or coercion," according to The Nuremberg Code. Currently, individuals can't be provided with full information on vaccine side effects as no long-term data exists yet. The results of the vaccine trials should be replicated by independent scientists prior to vaccine rollout to the high-risk group. Public transparency of all efficacy and safety data is necessary, but is currently being stymied by the FDA's legal battle to attempt to delay complete release of data to the public for the next 55+ years. While vaccination requirements for public schools are an important public health tool, previous vaccines have undergone 4-16 years of testing and trials prior to being mandated in order to attend school. We simply don't have enough long term data on these vaccine to warrant requiring them for a population with no risk from the disease. We face two scenarios. Either the vaccines work, delivering protection to the vaccinated and eliminating the claim that everyone needs to be vaccinated, or they don't work, and therefore, no one should get vaccinated. On both counts, forced vaccination, especially of children who's risks from COVID-19 are statistically approaching zero, is a pointless "public health" tool that will undermine trust in the Washington State Board of Health, the medical profession in general and in vaccination programs specifically. These proposed mandates seem to serve other agendas, and most fundamentally, they are unethical. Thank you for the opportunity to comment.

I make my own medical choices for myself, and family if needed. Not you or any lawmaker. This is a topic that should never be. So you know there is studies that show you give covid-19 to other people after vaccination? Like the cruise ships with fully vaxed crew and passengers and covid-19 ran through the ship. You would be sending covid-19 in all schools in this state and parents/teachers will get it. Masks are useless. This state has done more damage under emergency powers to the people of this state. This is messing with peoples freedom, are you really sure you folks want to go there? If so I be moving from this tyrannical state.

Under law, everyone has the "right to refuse" EUA products. There are key differences between fully licensed vaccines and those authorized under EUA. EUA products are considered experimental under US law. This means they CANNOT be mandated, and everyone has the right to refuse such vaccines without consequences. The Nuremberg Code, as well as federal law, provide that no human being can be forced to participate in a medical experiment. Under 21 US Code Sec. 360bbb-3(e)(1)(A)(ii)(III), "authorization for medical products for use in emergencies," it is unlawful to deny someone a job or an education because they refuse to be an experimental subject. Fully licensed products have fewer liability protections and EUA products can't be used once the FDA-approved product becomes available. Another key difference between fully licensed and EUA vaccines is that, under the 2005 Public Readiness and Preparedness Act (PREP Act), EUA vaccines are accompanied by a far-reaching liability shield that protects all parties involved with the product from lawsuits. When the Centers for Disease Control and Prevention includes a fully licensed vaccine on its recommended vaccination schedule, the vaccines similarly enjoy generous liability protections, but those protections are not as complete under the PREP Act. In this case, An EUA is considered illegal and invalid if there is a fully licensed alternative available. This appears to be the case with Pfizer's licensed Comirnaty while it's EUA Pfizer-BioNTech is still on the market. This also applies to mask-wearing and testing. Both mask use and testing products are listed in the EUA as experimental medical devices, as thus CANNOT be forced upon anyone. In the words of our founding father, Thomas Jefferson, "When the people fear the government, there is tyranny. "When the government fears the people, there is liberty." Therefore, "When tyranny becomes law, rebellion becomes duty."

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense

(childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember

that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Vaccine Mandates K-12 Students

External Email

Honorable Jay Inslee, Governor of the State of Washington,

I adamantly oppose all vaccine mandates and wish to have my voting voice heard as a clear "no" to any vaccine mandate proposed for children attending schools K-12.

Not only does the decision to vaccinate or not lay completely with parents, it is not for the government to force a conclusion to vaccinate on the citizens of the great State of Washington.

Further, the overwhelming evidence, as supported by the CDC's own data, is that the age groups represented are not at an elevated risk for morbidity from Covid-19 and its current variant, Omicron.

The Covid-19 vaccines, in their current forms, have not been effective in either stopping a person from contracting the virus or from keeping a person from spreading the virus. In addition, the number of reported adverse-vaccine related injuries is greater than any other vaccines ever given in our history. This alone should give pause for mandating a substance that is still years away from clinical trial vetting for possible side-effects both in the short and in the long-term. We are a generation away from understanding exactly how these substances will affect our children. Ask anyone who's families are impacted by the well-meaning administration of the drug Thalidomide. Babies born without limbs and those who escaped that challenge and yet are unable to bear children due to sterility caused by the "safe" drug given to their mother would all argue that long-term trials are not only essential, they are ethically required.

I believe you are in a position to make a course-correction that may positively impact untold thousands of lives. Please re-consider the proposed mandate of vaccines, especially for our children who are counting on us as parents to make the best possible decisions for their long-term health and well-being.

Respectfully,

Sandy Kicha

Subject: Writing opinion opposing to school mandate

External Email

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

Subject: COVID-19 vaccine requirement for schools in Washington State

External Email

Good morning,

I am writing to express my extreme opposition to the implementation of a COVID-19 vaccine requirement for schools in Washington State.

Here are the primary reasons why I oppose this requirement:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it." Since we do not know the long-term effects of the vaccines, it is irresponsible to inject so many growing and developing children with them.

Force vaccinating healthy children for a disease that is not dangerous to them to make adults feel safe is a new low for humanity. As a newlywed who is planning on having children soon, I am horrified by how Washington state is putting children at risk and wondering if it is safer to raise children elsewhere.

Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Robyn Antoine

To: DOH WSBOH  
Cc:  
Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission for childcare in WA State for a number of rational reasons, some of which include:

Shots that have not been researched adequately (most if not all of what has been given to humans) are at best a gamble, at worst, unhealthy or even deadly.

Those who have access to information from the large number of doctors, nurses, virologists & other health-care experts who are willing to courageously reveal the truth, are well aware that among the results of getting one or more shots is that an inordinate number of those getting the shots often develop previously undetected (or non-existent) medical problems). Some sports professionals who were healthy before getting one or more shots, die inexplicably ("inexplicably" to those who have limited or no access to valid info).

Mainstream news sources (regular broadcast TV & radio, and most print media) either avoid reporting those deaths or attempt to explain them as being from other or unknown causes.

There is ample evidence that shots "vs. Co-Vid" are unnecessary for those with healthy immune systems (including youngsters). Healthy people have a very high survival rate even if they contract Co-vid, a rate very similar to the survival rate for flues common in "flu season."

It is past time to stop the insanity, and start demanding the release of valid info, so human beings have a chance to see what is so obvious to those who have sources of information beyond that of the mainstream news sources noted above.

Sincerely, Richard G. Schamber, PhD

WSBOH,

As a concerned parent I want you to please really consider what you are asking here. Mandating the covid vaccine for children shouldn't be rushed. Children have a very low risk of getting covid, and no long term studies have been done on the safety for children. But you know what studies have been done and documented, that no matter if you are vaccinated or unvaccinated you can still transmit covid. We should not allow our kids being part of an experiment, this vaccine is still under emergency use authorization and the vaccine apparently doesn't stop the spread. So please do not force our children, the future of our country, to get a vaccine that still has so many unanswered questions.

Sincerely,  
Shannon Baker

Letter From A Concerned Person to WA BOH

On the 29th day of December 2021, a notification by way of the email was received that the Washington Board of Health Technical Advisory Group (BOH) is exploring adding COVID-19 vaccination to school admission requirements.

#### CLARIFICATION OF THE ISSUES

Any physical and/or tangible evidence that a medical pandemic as legally and medically defined has occurred anywhere around the world over the past two years (December 2019 to December 2021).

To allow the students of State of Washington to make an educated decision on this matter, it is hereby requested that the Washington Board of Health Technical Advisory Group (BOH) provide copies of any and all official and supporting documents in the BOH possession of:

1. Any physical and/or tangible evidence of medical isolation of the purported COVID-19 virus pursuant to the CDC and/or W.H.O. vaccine isolation protocols.
2. Any physical and/or tangible evidence that a "Medical Emergency" exists by statutory definition in the state of Washington.
3. Any physical and/or tangible evidence that any COVID-19 vaccine prevents infection by the COVID-19 virus and that any COVID-19 vaccine prevents the COVID-19 virus from spreading.

Please provide the exact legal and lawfully promulgated OFFICIAL procedure enacted by the legislature within the limits set by the Washington State Constitution and Washington State Law (enacting clause, statutes, session laws, legislative certification and Common

Law Rules) that authorizes the BOH to administer medical advice and treatment and/or have any say on a student's medical health care choices.

This correspondence is seeking "validation" that is competent evidence and strict proof that the Washington Board of Health Technical Advisory Group (BOH) has a legal liability and lawful authority in relation to any "medical drug use injections" and/or medical health care choices and are truly acting within the scope of their fiduciary relationship to the students of Washington State concerting this matter.

Sincerely,

Tina McCorkle - Pastor and Grandparent

Good afternoon,

It has been brought to my attention that you are having a meeting on January 12th to discuss making the covid 19 vaccination part of the requirements to attend school. As a mother and aunt of several children, I am highly against this requirement. I am fully aware that over 55,000 children have unenrolled from public school this last year in Washington state. Trust me when I tell you it's not out of fear of the virus. The only virus that is plaguing our children is your gross overreach and indoctrination. Making it a requirement will be detrimental to the school system.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Thomas P Ricketts

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

I personally am vehemently opposed to implementing these BOH codes which shred our Bill of Rights and the US Constitution to have the personal freedom to decide to get or not get the so called vaccine for Covid. Using law enforcement to detain a person or their family and isolate them in a quarantine facility? Unbelievable but true. This reeks of communism-a person is stripped of all rights. Also taking away a parents right or decision to have their own child given an injection in order to attend public school. May I remind you the property tax is paid to the state to educate the children. This is disgusting, unlawful, and must be stopped. Do not do this. Sincerely, Sylvia Evans

Subject: NO COVID Vax for kids

External Email

Dear Washington State board of Health,

It has been brought to my attention that this board is considering mandatory COVID vaccinations for school children. As a parent of school aged kids I am 100% against it. Children are at extremely low risk for COVID and the vaccine has not been proven safe, effective, or necessary, especially for school aged kids. It would be tyrannical on your part to implement this vaccine as mandatory for school.

You are forgetting that these children have parents, and if the parents choose to give this vaccine that is well within their right as a parent. But for this board, or anyone else in government, to make the decision for the parent is inapprehensible. It would only prove to be a power grab.

I understand that you all, to put it simply, have a job to do (so did the Nazis). But forcing people against their will to do something, especially to force something on their children, is unforgivable. There will be a reckoning and do you really want this decision to be on the side of the devil? Choose wisely.

May God bless you all.

Sincerely,  
Sandra Yameogo

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for a number of reasons:

- 1) Children are not effected by Covid 19.....there have been 330 deaths in the entire US for the past 2 years - and 80% had pre-existing conditions, like cancer, rare immune disorders, or were morbidly obese.
- 2) The Covid Vaccines are for Emergency use only - there is NO emergency as there are safe alternative medications like ivermectin. I am not willing to inject children our children with a controversial Mrna vaccine, for no other reason than it is politically forced on us.
- 3) Rather we should focus on the health of our children. Obesity is the 1# reason people get sick with Covid.....so children need exercise, fresh air, regular meals and a good education.

Our children are the future. If the school district is not willing to make our children lives more important than bending to Big Pharma - yes we know you are getting Covid cash so may feel blackmailed, then we will have to remove our children and home school.

By the way, the pandemic of 1918 - which was a true pandemic, was over in a year and 1/2. We are going into year 2 of this made up Covid 19 pandemic with no end in sight. Unless we stand up to this tyranny, freedom in America will be a forgotten thing.

Regards Susan

I am writing to express my extreme dissatisfaction in the required and mandated vaccinations that you are imposing on not only our children, but on the people in Washington State. Vaccinations should be tested and proved as safe; these are not. The long-term results and implications are still yet inconclusive. There is no documentation that having a covid vaccination prevents you from getting covid - in fact it is the opposite. Many, many, MANY people who are vaccinated continue to get covid, so clearly the vaccination is not doing it's job. A vaccination is supposed to PREVENT you from contracting a disease - this covid vaccination does not do that! This vaccination is weakening peoples' immune system and should not be required at a government level. This is a personal choice issue and governmental agencies have NO BUSINESS being involved with the (our, as parents) decision. Childrens' immune systems are strong. Their rate of infection with Covid is low and their hospitalization is lower. As this vaccination is still in its trial stages, please do not inject, or force our children to be injected, with an unknown long-term substance that we do not know, nor will we know the effects of the vaccination, for years to come. Stay out of our homes and the governing our children. It is our jobs to monitor our children, what they inject or ingest into their systems, and their beliefs. Please, do your jobs and not ours.

I am strongly opposed to requiring vaccination for entry into public schools. The science is clear that the risk to children from covid 19 is very low. We are going too fast and reaching too far without adequate evaluation of the consequences of these actions. If you keep children out of schools, you will do more damage to them and their families than the proposed vaccination mandate will achieve.

I am also strongly opposed to the language below and its making possible deep infringement on the civil liberties of citizens. Public health is not to be the power imposition of a few but seeking the consensus and well being of the many. Coercion is not effective public health policy.

"WAC 246-100-040 Procedures for isolation or quarantine. (1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons in- to involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

(a) Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with requests for medical examination, testing, treatment, counseling, vaccination, decontamination of persons or animals, isolation, quarantine, and inspection and closure of facilities, or has determined in his or her professional judgment that seeking voluntary compliance would create a risk of serious harm;"

I oppose mandating the covid shot on children. We have never sacrificed our kids for the elderly, less than 1% in this case, and we do not need to continue making our kids suffer over these unlawful mandates. Wa schools were failing before the pandemic, and our report card is worse now. This needs to stop. Leave our kids alone and let the parents deal with their health privacy! This is also discrimination, preventing anyone from education over their private, protected health status!

Dear Board:

I would like to address vaccinations for children and for the general population. To begin I would like to tell the story of my son who is a high school wrestler. As an unvaccinated wrestler he is tested weekly and before competitions. Vaccinated students were not COVID tested. In early December after a wrestling tournament our student came down with a fever. This is common in wrestling to pick up "something". He recovered by the next day. A day later we learned he tested positive for COVID. It was our conclusion he most likely picked up COVID from a vaccinated wrestler. All others in our household, including those vaccinated, picked up COVID from our student. All recovered quickly. Our student did not take any therapeutics for COVID, the rest of the household did.

I tell this story to illustrate a personal example. First the vaccine did not prevent contracting COVID. Further more vaccinated persons spread COVID.

Points of Principal

Children

Parents are the foremost responsible for their children. This applies to ALL areas of the child's well being. Especially as it relates to their healthcare. The school is a resource to parents. For education. They are not in the position of mandating a healthcare issue. No one circumstance is the same and a large group can not be making decisions for every person/child. A parent is the only one who can carefully consider the needs served best for their child. This applies to vaccinations and mask wearing.

There is credible data suggesting that vaccinations are not in the best interest of a child. This is the most up to date data for today.

U.S. VAERS data from Dec. 14, 2020, to Dec. 24, 2021, for 5- to 11-year-olds show:

- \* 5,706 adverse events

- <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

- , including 114 rated as serious

- <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

- and 2 reported deaths

- <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

- .

- \* 11 reports

- <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

- of myocarditis and pericarditis (heart inflammation).

- \* 14 reports

- <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>

- of blood clotting disorders.

\* 25,802 adverse events  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F19%26STATE%3DNOTFR%26WhichAge%3Drange%26LOWAGE%3D12%26HIGHAGE%3D18&data=04%7C>

attributed to Pfizer's vaccine.

I have many further concerns as I look closer at FDA and CDC approvals for children. Panels of experts were ignored or not included in decision making about vaccines for children. As well as it is being ignored that ALL of this is experimental. Consider the article below.

Dr. Michelle Perro  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdrmichelleperro.com%2F&data=0>  
, pediatrician and co-author of "What's Making Our Children Sick  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.chelseagreen.com%2Fproducts/making-our-children-sick%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C15235b90cd344098341a08d9d210da2c%7C11d>  
," disagreed with the FDA's decision, pointing out that "children are not mini-adults." In  
an email to The Defender, Perro said children's rapid growth, quick cellular turnover and  
less efficient detoxification pathways are factors that must be considered whenever any  
new therapeutics are being introduced.

Perro said:

"This newest immunomodulating therapy, the mRNA inoculation, has already been shown to have produced multisystem negative health outcomes in children garnered from the CDC's own database."

Perro outlined five reasons she believes this "experimental therapy" must be immediately withdrawn:

- \* Gene-edited injectables have not been adequately studied in children as per Pfizer's own data, where they meshed childrens' and adults' data together.
- \* The injection utilizes nanotechnology which is now part of the emerging technology in vaccinology research. These nanoparticles are so small in size they can cross the blood-brain barrier which can adversely affect our already fragile population of children.
- \* The mRNA itself is unstable and is thus encapsulated in a lipid biosphere comprised of a polyethylene glycol shell which in itself is toxic.
- \* The number of children suffering from already documented irreparable side effects from the inoculations, such as those occurring in their hearts (myocarditis), is not only unacceptable but immoral.
- \* Children's healthcare providers are neither educated or proactive in diagnosing and treating the effects from this experimental therapy.

Perro questioned the FDA's motives, given that children suffer nearly zero  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fidp.nature.com%2Fauthorize%3F021-01897-w&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C15235b90cd344098341a08d9d210da2c%7C11d0e2172>>  
morbidity and mortality from COVID infections.

She also said the FDA is "veering from" its own historical stance.

"When previous true vaccines were introduced historically (rotavirus vaccine), after just a few cases of adversity, they were immediately withdrawn," Perro told The Defender. "The FDA must adhere to its own historical position regarding their assigned task of the protection and oversight of our country's greatest asset: our children."

I have taken time to study this topic extensively and I am opposed to any mandate for vaccines of any kind including COVID-19 vaccines for children.

Thank you,  
Sherri Larkin

To whom it may concern

I absolutely object to any mandatory vaccinations. More and more VAERS is reporting injuries from the Covid 19 vaccines. Many Countries refuse to offer Moderna because of the potential heart issues.]

These vaccines have proven ineffective at reducing the spread. Children are minimally effected and there is much evidence that they do not spread the virus to their teachers.

This is becoming endemic in our society. We have no idea of the long term affects of giving this to children in the future. We have never mandated Flu shots. And this virus has proven to be more like flus and cold viruses (the common cold is a Covid as you are aware and we still have no cure for the common cold). It is not at all like Meals, Mumps, and even Chicken Pox which is a one time event.

Please stop the fear mongering and follow the actual science.

Respectfully  
An extremely concerned citizen  
Shannon Spencer

2.                      Con

---

My position is that there is overwhelming scientific evidence to say that children are not at risk from dying of Covid, making a mandatory vaccine senseless. The vaccines have also proved to be ineffective at stopping the spread of the virus. In addition, the vaccines have a higher death rate in children than the actual disease they are to prevent. Exposing a child to these vaccines only exposes them to a greater risk of death and health issues than Covid itself. It is simply an irrational decision to force children to take these vaccines! Lastly, each individual has the right to make their own medical choices and it is not the State's place to tell people what they must put in their body. This is an overstep of the individual's U.S. Constitutional rights.

Subject: mandatory vaccination Covid19 WA state students

#### External Email

Vaccines for the Covid19 inoculation for WA State school students is absolutely not based on the science. I trust that all of you as representatives of the people will make your decisions with a strong sense of ethics, safety, practicality, and solid science. Thank you for your consideration. Here are some of the issues at hand.

These Covid19 inoculations are not FDA approved and by FDA's own rules cannot be made mandatory. It is known that Comirnaty, which is the approved version, is not the same as the Pfizer-BioNTech inoculation, which is the one available. These are not interchangeable products and should be treated as such.

To that end, the research for Pfizer-BioNTech inoculations have shown to be incredibly sloppy and likely not reflective of actual true data outcomes. How can a public trust this shot with articles from reputable journals such as this produce this paper!! Covid-19: Researcher blows the whistle on data integrity issues in Pfizer's vaccine trial | The BMJ

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bmj.com%2Fcontent%2F375>

Covid-19: Researcher blows the whistle on data integrity issues in Pfizer's vaccine trial | The BMJ

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bmj.com%2Fcontent%2F375>

Revelations of poor practices at a contract research company helping to carry out Pfizer's pivotal covid-19 vaccine trial raise questions about data integrity and regulatory oversight. Paul D Thacker reports In autumn 2020 Pfizer's chairman and chief executive, Albert Bourla, released an open letter to the billions of people around the world who were investing their hopes in a safe and ...  
[www.bmj.com](http://www.bmj.com)

No healthy child (no comorbidities) has ever died from Covid19 and any of its variants. Through the CDC's own admission, there are concerns in young people with myocarditis and pericarditis. And personally I find it unfathomable that a member of the FDA Advisory Committee is quoted as saying, "We are never going to learn about how safe the vaccine is until we start giving it." We all should be asking why we put an experimental drug where long-term data is sorely missing.

As a parent and with all that I know, I am skeptical about having my student receive an experimental injection. Please use your good conscience and let the decision of the Covid-19 vaccine be at the discretion of families and not government.

I know there is more that I am not including here. Please consider all the input that you will receive.

Thank you for your consideration. God bless you and I hope you all will make the ethical choice.

Covid-19 is in the same category as the Common Cold and the Flu. There has never been a mandate to require masks or vaccines for the Flu, even though it kills hundreds of thousands of people every year as well. Look up the death rate for Influenza per year on Wikipedia....but yet there is no lock downs for it, there is no mask requirements, and no vaccine requirements for the flu. And what about Pneumonia? Another top killer for immune compromised individuals, but yet there is no vaccine mandate for that one either. There are required vaccines for children that are needed to attend school...but what about the parents that are antivax and don't vaccinate their children for any of those infectious diseases? They get out of doing it based on their beliefs and are still allowed to send their children to school. Where do you draw the line between those parents and the parents and individuals that don't want to get the Covid vaccine? Where do you draw the line where you tell people its your choice if you want the flu vaccine, but its not your choice if you don't want the Covid vaccine. You can't pick and choose who can be exempt from certain vaccines, while requiring another or pay a price. Its an infringement on our American Rights, the United States of America is the land of the free, but many people in power have forgotten this. It is my right to make the choice of what's best for my body and what's best for my kids, not some power hungry government agency.

I am writing this is in direct opposition to the WA state DOH proposal to modify WAC to use Law Enforcement to involuntarily detain individuals and families into quarantine for failure to comply with requests for medical exemption, testing, treatment, counseling, and/or vaccination and also I am staunchly opposed to the DOH proposal to require COVID vaccines as part of school immunization requirements.

This is an unscrupulous action by the DOH and I expect more from public officials.

As a concerned citizen, I AM NOT IN SUPPORT OF THE DOH ACTION TO MODIFY WASHINGTON LEGISLATION TO INCLUDE COVID-19 FOR ILLEGAL DETENTION AND MANDATORY VACCINATIONS. Not only is this immoral, it is a complete abuse of law enforcement action and outside the reach of the DOH.

*attachments\A5577B50B6E64292\_WSBOH Comments SYF 1-2022.pdf*

External Email

As a resident and registered voter residing within Washington State, I am respectfully providing my comments regarding the discussions being held by WA State Board of Health in consideration of including COVID-19 vaccination requirements within the Washington Administrative Codes for lawful enforcement under the Revised Code of Washington (RCW).

My comments follow in order of personal priority with references provided to proposed topics of discussion by the State Board of Health.

1.0 WAC 24-105-030."Discussions to add Covid-19 to the list of child immunizations required for school attendance should consider the following.

1.1 In principle, mandated treatments including this proposed action represents a substantial over-reach by the State and eliminates parental rights to administer their family's health decisions with full and factual "Informed Consent".

1.2 Further, consideration of any proposed amendments to the WAC for including Covid should provide for "Parental Informed Consent" and reasonable exceptions, (i.e.; religious beliefs, natural immunity, alternate treatments including emerging drugs, medical, and private/home education).

1.3 In my opinion there is a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105. Quoting from 246-105-010:

"The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers."

The facts are the current COVID vaccines do not prevent catching the disease or any of its variants, and therefore should not be eligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases. At most, they merely amount to a pre-treatment for the disease that may generally reduce the severity or death in the most vulnerable population. This vulnerable population does not include the majority of school aged children.

1.3.1 Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. There are essentially no significant records of multiple breakthrough cases associated with currently

listed diseases. Yet the number of COVID cases that breakthrough the current vaccines, including booster shots is significant. Therefore, as a matter of traditional definition, COVID is not a vaccine preventable disease.

1.3.2 The best available evidence and international focus of the COVID vaccine was to treat the vulnerable elder community with comorbidities that increased their risk of hospitalization and potentially death. As of this writing, reported data over the last two years indicates that on average, children suffer no worse from COVID than the normal seasonal flu. Considering the unknown and potential long term side effects of the current COVID vaccines, the risk-reward profile of vaccinating younger people indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them.

1.3.3 In your discussions of amending the WAC to include a vaccine mandate please compare the current policy for seasonal flu. Flu is an equal, if not a greater risk to children yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children but has a vaccine with an unknown long term risk profile? That seems illogical and would indicate other non-fact-based motivations for such a mandate. I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030.

2.0 WAC 246-100-070, WAC 246-100-045, WAC-246-100-040 in regard to detaining, isolating or quarantining a person or group of persons (families) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling and vaccination.

2.1 I object to any amendment or modification of WAC 246-100-070 which would permit law enforcement to detain, isolate, or quarantine a person or group of persons following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling or vaccination for any disease. My objections include persons, or groups of persons who are themselves; or the minor dependent, of a legally registered citizen of the United States of America and I encourage the members of the Washington State of Health to disregard this proposed amendment which I believe is in conflict with the fundamental provisions of the United States Constitution and the rights of legal citizens granted by the Bill of Rights.

Subject: Proposed Final Agenda for January 12 Public Meeting

#### External Email

I am thinking that everyone has forgotten that this virus was man-made and Fauci was involved from day one. Also, the vaccination was man made with Fauci and the government involved.

I know that covid exists as I am a survivor of Covid 19 and I know there is evidence that people have died from covid, but my belief is that most people have died with covid not from covid.

Covid 19 - Symptoms may include: fever or chills; cough; shortness of breath; fatigue; muscle and body aches; headache; new loss of taste or smell; sore throat; congestion or runny nose; nausea or vomiting; diarrhea.

Delta same symptoms but 2x as contagious supposedly.

Omicron - Symptoms running nose, cough, sore throat.

Common Cold - The common cold is a viral infection of your nose and throat (upper respiratory tract).

Flu - Fever or feeling feverish/having chills. Cough.

- \* Shortness of breath or difficulty breathing. Fatigue (tiredness)
- \* Sore throat. Runny or stuffy nose.
- \* Muscle pain or body aches. Headache.

Now you want to propose law enforced WAC's because Covid-19. Most of the symptoms of Covid are the same as a cold or flu. Oh yeah I forgot for the past three years there hasn't been any flu or colds, just Covid. I also believe that the covid tests are not accurate. There are a lot of positive negatives and negative positives. This is just another way for the Governor and his people to continue to control us tax paying citizens.

You are going to implement a legal agenda for Covid when the government overlooks criminals stealing, grand theft, vandalism, etc. Hard working tax paying Americans are tired of having our freedoms taken away and still have to pay for it. I would like to know when WE THE PEOPLE get our freedoms back to decide what we want to do and when we don't. I like that the government thinks that they can control us Americans to do what they want. We do not want to be a socialist/communist country, we want our freedoms and amendments.

We the People say no to your new WACs and why don't you put your time and our money into what matters, law enforcement, educated school teachers, roads and giving us tax payers a break...

Fed Up Citizen Especially Here In Washington State.

Subject: Covid vaccine as a requirement for school

External Email

To Whom It May Concern,

I am absolutely against a decision to require the covid vaccine for in person learning. Not only would this be a detriment to our school, it would be to our entire community. If you were to recommend that children get the covid vaccine for school it would ultimately mean shutting down schools.

There are no long term studies saying the covid vaccine is safe for our children. Why aren't we discussing natural immunity? Why does that not matter anymore? Covid doesn't affect children the way it does adults and there is no reason to subject them to a shot that we just don't know enough about.

I urge you to really consider the small potential upside and the devastating downsides to this situation if you were to recommend the vaccine for children in order to attend school.

A Concerned Parent,  
Terry Larson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccine is causing additional health complications to people with autoimmune suppression. It is meant to cause havoc on the autoimmunity in the human body, children have not developed nearly enough to fight off such an intrusion.

Vaccines they are using for COVID is not stopping the virus, yet you are telling people it will stop the spread.

Children need to be advocated for by THEIR PARENTS not the state.

State should lose funding for students who are forced to vaccinate when their custodial Parents/legal guardians refuse the vaccine.

pediatric inflammatory multisystem syndrome (PIMS-TS), cytokine storm

"While a Covid-19 vaccine will prevent serious illness and death, we still don't know the extent to which it keeps you from being infected and passing the virus on to others. Per WHO

I have put in numerous hours each day reading reports from esteemed experts in the field of medicine and science, and looking at studies relevant to the coronavirus. The government does not own our bodies. We do. The vaccine was authorized for emergency use only through junk science, and has not been through adequate safety studies, That would take years. We cannot know the long-term effects, yet we are being coerced into taking injections against our will for a virus that poses very little risk to anyone aside from high risk groups. The vaccine does not prevent infection or transmission. There are many reports of horrible side effects, up to and including death. One cannot in good conscience coerce people to take something that has the potential to injure or kill. That is against the Nuremberg code and the rights of free citizens. Children are add virtually zero risk from injury or death from the coronavirus, Yet they are at measurable risk from cardiomyopathy and pericarditis. We should not be playing Russian roulette with our children's health, or our own.

Children are at an extreme low risk for a vaccine that is still operating under EUA and further causing increased unknown harm to all children's wellbeing. This does not follow suit with other vaccines that have known efficacy and are not in a trial phase. I whole heartedly DO NOT support this mandate which puts all children at a much greater risk.

would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I know someone personally who has had the injections and now has to see a doctor every 4-5 weeks to see if there is any progress to reverse the adverse reaction due to the Covid-19 shot.

I have a child in preschool. It is my responsibility as the parent to choose what is best for my child. If an adult can have adverse reaction to this injection why on earth would we want to give this to a child?!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To Whom it May Concern,

I wanted to share my concerns with the upcoming meeting schedule January 12th @ 9am. The agenda is a little misleading and hard to pin point exactly which WAC will be reviewed. For example at 10:15 briefing, and at 11 am 246-100 and again at 1:30 pm ruling. No where is there a place to leave comments for the meeting. I would assume these are the laws the committee is referring too.

WAC CODE LAWS:

Per your last meeting in November Ms. Allen stated that roughly 80% of Washingtons population 12 and older had been vaccinated. The rest of the 20% would account for the immune compromised, children under 12, individuals with religious exemptions and the small few that have elected to wait until FDA releases the vaccine studies and manufacture vaccine inserts. Ms. Allen said further that as the DOH added the age group 5-11 and vaccination rates increased as well. We will never be at 100%. Forcing the population to take a vaccine against their will is unconstitutional. Telling a parent they will have no choice. Detaining people would cause chaos throughout the community. Tearing families apart, detaining a much needed workforce to keep Washington's economy thriving, would in turn drastically hurt small and medium businesses and create further delays in the chain of command at large businesses. Further pushing Washingtonians to believe that they can not trust their government. Loosing all faith in their elected officials, if their loved ones are detained for how ever long. This push is

tyrannical and forces individuals and families to make a huge shift in their life. For most, leaving Washington would make the most sense.

TY,

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The state's current proposal of mandating involuntary vaccination and also the enforcement of vaccination as a requirement to continue your schooling.

11.

Are you Pro or Con on the proposal?

2. Con

---

COVID has devastated all of us over the past couple of years, and while well-intentioned, this bill will actually make it difficult for people to trust this legislature. Specifically, Governor Jay Inslee. It has been made well aware that Washington is one of the strictest states when it comes to how we handled COVID-19 (partially because we were the first state to be recorded with it). But with every potential new threat of a mandate that limits or threatens to eliminate individual concern, the right of the people, is where we only get division, not subtraction of our state and it's current situation. I applaud Governor Inslee for wisely taking a step back as far as loosening his grip on mandates after Omicron, which is truly a weaker version of COVID. However, this mandate he and the state are attempting to enforce will only push the state backwards, not forwards in it's progression against this virus. In conclusion, while this proposed act is well-intentioned, this act also inconsiderately undermines the will of the people who make this state function. Good intentions alone are not good enough; good intentions, sound thinking, and rallying action are. Thank you for reading this voice of concern. --Caleb Forslund

I am completely against any of the proposed Covid policies that are over-reaching and immoral. I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am against mandated Covid shots for kids as criteria for child care and school entry. Children are extremely low-risk for Covid and vaccines are still only EUA (emergency use authorization).

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Shelly Ricketts

To whom it may concern, you unelected bureaucrats,

I am a FREE citizen and lifelong resident of Washington. I reside in Spokane County. I am one of your bosses. I am not your servant, peasant, subject, peon, or inferior.

I have a multitude of questions, serious, important questions, and a lot to say about the way people employed by the government of Washington have begun to believe they are the rulers of the citizens of Washington, have come to the completely mistaken and wicked belief that they are entitled to make private, medical decisions for the citizens of Washington and the children, and that they have the right to coerce, compel, and force the FREE citizens of Washington to do anything, especially anything that violates a free human being's bodily autonomy.

I OPPOSE WAC 246-105 (You may NOT allow Covid-19 injections to be added to school immunization requirements.)

I OPPOSE WAC 246-100 (You may NOT allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).).

I do not agree that these WACs should be modified, changed, or altered in any way to add any language referring to COVID-19 or coronavirus or any of the variants.

I DEMAND that you tread lightly and remember that We The People are free, sovereign human beings with the right to speak and move freely, amongst other things. You have no right to violate our rights, freedoms, or bodily autonomy. Anything you do while being paid by the taxpayers of Washington must be with the full awareness of our rights and zero treading upon them.

My first question, a 2 parter, which you MUST address: When did you become the rulers/bosses/parents/supervisors/kings/queens/lords/stewards of the citizens of Washington? And when did WE the People abdicate our rights and freedoms to you?

If your answer is anything but "NEVER" and "NEVER" then you should resign in shame immediately. How dare you believe, even for 1 second, that YOU have any right whatsoever to dictate anything to the free citizens who have chosen to live in Washington? WE are YOUR bosses. WE pay your salaries. You are supposed to work for us. We are not peasants, subjects, peons, slaves, indentured servants, children, minions, inferiors, etc. We have the right to make our own decisions. You have ZERO right to impose your wicked ideas on us, to force, coerce, threaten, chide, compel, or anything. If you cannot remember these things then resign right now. You have no business being in "public service" if you cannot remember YOU SERVE THE PUBLIC. As the publicly funded website for the Board of Health says, "the State Board of Health has served the people of Washington for 132 years." SERVED THE PEOPLE. It does NOT say "ruled the people." Further, it says you "promote policies that protect and improve the public's health." Promote does not equal "coerce" or "force" or "rule." Maybe you should refresh your memories and remember your places (that would be beneath the people who are your bosses, by the way).

We elect representatives to a legislature where they discuss, write, take opinions on, debate, and vote on laws. We did not elect career bureaucrats to create rules, regulations, or demands on the people. If you have not been elected to a legislature then stop thinking you have any right to force your notions upon us. No rules/regulations without representation. If you are in the legislature, then it's time to remember YOU WORK FOR US. You have no business creating and passing laws that violate our freedoms and rights. If you cannot remember this, then resign in disgrace. I do not care if the legislature "grants you powers." They only serve with the consent of the governed and we do not consent to be experimented on, to be ruled by unelected (or elected) power-hungry fascists or give up our rights, freedoms, and bodily autonomy. WE DO NO CONSENT.

WE ARE IN CHARGE, not you. You have ZERO right to violate my bodily autonomy, make medical decisions for me, force me to inject ANYTHING in my body, deny me entrance to publicly funded spaces, force me to wear fabric on my face, coerce me to inject anything into my body, coerce me to wear fabric on my face, etc. etc. As a free human being, I get to decide what I inject into my body, what I wear, and where I go. My tax dollars pay for publicly funded spaces and if you want to deny me entrance to anything my money pays for then I want all of my money back and I will no longer pay taxes. Such things are literally discrimination, segregation, and immoral. I will not share my private medical choices with event staff, clerks, government officials, or to enter establishments, public or private. My private medical records are MY BUSINESS ALONE. If you think forcing people to share their medical records with others is acceptable, then you better be ready to put your own medical records out in public view immediately so we can all have a look and make decisions on what you are allowed to do, what you must inject, the behavior you are no longer allowed to engage in, etc. Further, if you want to coerce us into sharing this medical decision, then it's only fair that everyone's every medical

decision be public record. Promiscuous? Then we want to see if you have STDs before you can be in public. A drinker or smoker? We get to dictate what you get to do in life. A drug user? We get to make decisions for you, too, and share everything publicly. Or maybe you should back this runaway train up and remember you serve free citizens who have the right to private medical records.

Second Question: When did the free citizens of Washington give their children to you to raise? Why do YOU think you have the right to dictate other people's children's medical decisions? Children belong to God and with their parents. They do not belong to the governor, the attorney general, legislators, school principals, babysitters, cousins, neighbors, store clerks, or you, unelected, arrogant, power-hungry bureaucrats. You have NO RIGHT to decide what is injected into other people's children. Parents have the responsibility to make decisions for their children.

COVID-19 is really not much of a threat to MOST people and it's even less of a threat to children. According to the CDC's best estimate of the infection fatality rate for individuals ages 0-19 is 0.00002, meaning 99.998% of children survive it. Why on earth do they need to be injected with things which have no long-term studies or trials? These shots have barely been around for a year and you cannot possibly argue that a year or 2 suffice as "long-term." It is horrifying that you are even considering making experimental shots mandatory for anyone, let alone children. Other immunizations (which actually IMMUNIZE, unlike the COVID "vaccines") were tested for a long time before they were used and were available for a long time before anyone considered making them mandatory. As COVID primarily impacts the elderly and the ill, it is unconscionable to demand children be forced to get injected with these experiments. Please refer to this article and many others like it for more information, as apparently you are completely ignorant of reality: <https://www.tabletmag.com/sections/news/articles/covid-vaccine-mandates-kids-legal>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.tabletmag.com%2Fsections%2Fnews%2Farticles%2Fcovid-vaccine-mandates-kids-legal&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C227203f7f45c41b9563408d9d1f6fe41%7C11d0e>

Currently, as I am sure you must know, there is no COVID-19 "vaccine" available in the United States outside of ones approved only under the Emergency Use Authorization, which is only possible if there are no therapeutics available to treat something. As we all know, there are therapeutics available to help fight COVID-19. I believe you cannot mandate these shots as long as they are under the EUA. And, as you know, "Comirnaty" is not available in the United States so you cannot mandate children be forced to get the EUA injections. Or anyone else, for that matter.

To quote the article above at length:

"In 2004, under Section 564 of the Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3, Congress permitted the FDA to grant EUAs so that any American in a personal emergency can choose whether or not to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments. EUA products, by definition, have not yet been proven safe and effective according to FDA standards.

Indeed, Congress has recognized that Americans should not be forced to take medical products that have not been deemed safe and effective by the federal agency charged with the power to decide. The same federal statute that authorizes EUA products also requires, among other things, that potential recipients of such medications be informed "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that

are available and of their benefits and risks." According to a plain reading, individuals have a statutory right to "refuse administration" of a vaccine approved only for emergency use. The language leaves no doubt that Congress intended for any decision to take such products to be made free of coercion, pressure, or duress. A city or school system that withholds children's access to education, extracurricular, and recreational activities—all crucial to their cognitive and emotional development—violates both the letter and the spirit of the statute."

I read this and think you should read it, too (or read it AGAIN): 'As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". CLEARLY, these COVID "vaccines" DO NOT PREVENT TRANSMISSION. We were told repeatedly, by the CDC, Biden, and the rest of the snake oil salesmen, that these "vaccines" would 100% prevent you from getting or transmitting COVID-19. That was obviously a bunch of lies. Numbers show that highly "vaccinated" places are seeing massive surges of "cases." Masks also do not stop transmission (DUH) either and we do not consent to be muzzled. The only point of mandating these shots which do not prevent transmission is to control free human beings and force them to do as you "command." NOPE. We do not consent.

There are no Washington laws which give you the authority to mandate citizens must take an medication or have any medical intervention. Such a thing is so far out of your purview that you should never show your face again in public if you think you have even a tiny, infinitesimal "right" to do so. Requiring these untested "vaccines" for children is outside any law as well. Such decisions belong solely to parents/guardians and children. As the article says, "The Ninth and 14th Amendments to the United States Constitution protect the right of individuals—both children and adults—to bodily integrity and to decline unnecessary medical treatment."

Further, Natural Immunity is an important, long-studied scientific fact which those in the "health" field, in their haste to seize control and impose their own wills upon free citizens, have decided to pretend doesn't exist. Do you force those who have had chicken pox or measles, etc., to get the actual vaccines for these diseases? Do you force them to get "booster" shots? No, you do not, as such things would destroy the natural immunity which does a better job than anything created in labs. Since the COVID "vaccines" do not immunize anyone, you have no reason to coerce, compel, force, or mandate anyone into getting these shots. You have no moral, ethical, scientific, or legal standing to do so. If you think you have such rights, then please be aware that others can use the same arguments to dictate their beliefs in the future. Most Christians do not believe in sex before marriage and a case could certainly be made that engaging in such promiscuous behavior has consequences that hurt society at large, which would mean the government should be able to force interventions on those who think they have the right to decide who they sleep with. Etc. If you want to open that door, we're happy to make sure everyone in this Godless state is living pure, holy lives.

As we do not know the bodily consequences these "vaccines" might have long-term, it is unconscionable that you would even consider mandating them for children (or anyone). We cannot have any idea how their developing bodies might be hurt by these experimental shots. Are you prepared to be sued, as a "board" and as individuals by parents whose children are damaged by something you ordered before long-term studies can possibly exist? You will be morally, ethically, and, hopefully, criminally/monetarily/civilly held liable for any consequences if you mandate these for children. If you have half a brain amongst you, then you will step back, remember your place, and wait a decade or more to see how things go. Parents/guardians have the sole rights to make this decision for children. NOT YOU.

Under Jay Inslee's hateful guidance, government workers have arrogantly decided they have the right to dictate to the free citizens of this state, to discriminate, segregate, violate bodily autonomy, and threaten, coerce, force. We live in the United States of America and as Americans, we are FREE. We have the sole right to decide what medical "treatments" are injected into our bodies. We have the right to move freely, at will, to speak freely, to assemble, and to get rid of all governments which violate our rights. You are employed by the citizens of Washington. You better remember your place. You may provide suggestions and we are free to ignore them. There is not one medical treatment or medicine which every single person needs. Not one. We do not force healthy people to have chemotherapy or take heart medication (malpractice, anyone???). We do not put casts on unbroken legs. Why on earth would you think everyone should get these experimental shots? You have no idea what consequences many people will face due to your immoral, unethical coercion. You may recommend people get these experimental shots. You may NOT demand, force, coerce, pressure, threaten, or mandate them. In the last two years, you have created a hateful, divisive, cruel society where you segregate people based on their personal medical choices. You tell them they are less than, vectors for disease, and evil, when they are not. You lock them out of society and foment hatred against them. Is it any wonder that there have been so many more opioid overdoses and deaths, more domestic violence, more suicides, more hopelessness? YOU have contributed to these deaths and despair. YOU. And yet you cruelly continue to divide and subjugate us. If you care about the health and well-being of all Washington citizens (what a laugh!), then you should be concerned with all of those people. Vastly higher numbers of people have been affected by those things than by COVID-19 but you have ignored them at our peril. You have failed to encourage therapeutics, exercise, and healthy eating to prevent COVID and other things. You have locked people inside, kept them away from co-workers and loved ones (gathering strengthens immune systems, obviously, so it's interesting to consider whether you purposefully crafted policies which forced people to weaken their immune systems), and tried to keep them frightened.

Government is instituted by the people, for the people, to make life better for the people, not to rule the people. Free people cannot be compelled by any government or business or person to violate their bodily autonomy. Do you know what we call it when a person uses force or coercion to violate another's bodily autonomy? RAPE. We call it rape and it is immoral and evil. You have no right to violate our bodily autonomy or our children's bodily autonomy. We do not consent to any violation of our bodily autonomy. We do not consent to being locked out of society. We do not consent to be ruled by bureaucrats.

If you are a doctor, you have presumably taken an oath to "do no harm." Yet, in the last two years, you have crafted policies which have done immeasurable harm. You have kept people frightened, alone, and you should be held accountable for these things. Time to remember your oaths and step back from committing evil against the free citizens of Washington. You continue to abuse power loaned to you by the legislature, which only has power because it is loaned by the people. We do not consent to be abused, manipulated, frightened, coerced, forced, threatened, segregated, discriminated against, or locked out.

Perhaps you should spend some time learning more history so you can see how those who violated bodily autonomy and freedom are remembered. Many were put on trial and faced severe consequences for their evil actions. You have the choice to violate freedoms or to step back and recognize you have no such powers on this earth. For example, you should read the Nuremberg Code and why it was instituted in the first place. Never in history have the good guys been the ones coercing, forcing, threatening people with injections. So perhaps you might recognize which side you are currently on here. (Not the good guys, obviously.)

Nuremberg Code:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as

to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

"The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity." (This means each of you individually is responsible for ascertaining the consent of the people, as in each person you think should be forced to have these experimental shots, and if you force/coerce/threaten, then you are individually responsible for the consequences. You cannot say it was a group decision or you just went along with others. You are complicit and morally, ethically responsible.)

To whom it may concern,  
I am writing today to voice my concern for the vaccine requirements for COVID 19 for children.  
The science and survival rate statistics does not justify the implementation of the proposed mandate. The school is public not the child!  
The government/state should focus on the education of children period. The vaccine is not preventing the COVID 19 or the variants.  
Please vote against Chapter 246-105WAC.  
Sincerely,  
Shaleen M.Holstein

it's absolutely bullshit that you are trying to mandate vaccines for anyone let alone children when less than 1 percent of the population has died and natural immunity is proven to fight the virus . at my work 5 people who got the vaccine are out sick. so the vaccine isn't effective. cdc says mask don't work and they still have to wear them. fuck washington state

External Email

Hello members of the board,

My name is Ryan. I am a concerned parent of 6 school age children and I strongly oppose any effort to make Covid-19 immunization mandatory for entry to child care or school.

Children are at extremely low risk from Covid-19 and parents are in the best position to determine what is best for the health of their child. Any ruling that makes Covid immunization mandatory will cause lasting harm to many families and further divide our society. Please hear us on this issue and let the parents decide!

Thank you,

Ryan Hennigan

Subject: January 12 Meeting Comments - Mandatory School Vaccine

External Email

I am writing to comment on the topic of including the Covid-19 vaccines as part of school immunization requirements :

I strongly oppose mandating the Covid-19 vaccine for school children.

This vaccine is still in the experimental phases and children are at EXTREMELY low risk of severe disease from COVID (<https://www.bbc.com/news/health-57766717>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bbc.com%2Fnews%2Fhealth-57766717&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdd5be47bc6ea4154142508d9d200776f%7C11d0e2172>

). In fact, unlike adults, for children COVID is comparable to the flu (<https://www.npr.org/sections/health-shots/2021/05/25/997467734/childrens-risk-of-serious-illness-from-covid-19-is-as-low-as-it-is-for-the-flu>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.npr.org%2Fsections%2Fhealth-shots%2F2021%2F05%2F25%2F997467734%2Fchildrens-risk-of-serious-illness-from-covid-19-is-as-low-as-it-is-for-the-flu&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdd5be47bc6ea4154142508d9d200776f%7C11d0e2172>

). For people under 18, we've had over twice as many deaths from pneumonia than COVID according to the CDC

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisional-COVID-19-Deaths-by-Sex-and-Age%2F9bhg-hcku&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdd5be47bc6ea4154142508d9d200776f%7C11d0e2172>

.  
>

School enrollment is already down and this will make things worse. We've already lost almost a decade of gains in school enrollment due to the poor management of schools (<https://www.npr.org/2021/12/15/1062999168/school-enrollment-drops-for-second-straight-year>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.npr.org%2F2021%2F12%2F15%2F1062999168%2Fschoolenrollmentdropsforsecondstraightyear&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdd5be47bc6ea4154142508d9d200776f%7C11d0e2172>

Furthermore, a vaccine mandate is even likely to increase racial inequity by disproportionately removing Black and minority students from school (<https://wtop.com/dc/2021/12/report-warns-covid-19-vaccine-mandate-for-dc-students-could-increase-racial-inequity/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwtop.com%2Fdc%2F2021%2F12%2F15%2Freportwarnscovid19vaccinemandatefordcstudentscouldincreaseracialinequity%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdd5be47bc6ea4154142508d9d200776f%7C11d0e2172>

). The same will be true in the more rural areas of the state which have increased poverty and rates of vaccine hesitancy, further increase educational inequity across social economic lines.

We should not force a vaccine for a population that is not threatened by the disease. These vaccine doses could be used all over the world by elderly people that need them.

Children that have rare medical situations which leave them vulnerable to COVID can still get the vaccine. There is no reason to push this on every child in the state.

Please make a logical, data based decision. We can't keep making decisions based on fear.

Thank you for your time.

Will Bedient

I am strongly against all of the proposed actions the Board is considering listed above. Health Boards and the officials overseeing the pandemic have earned the skepticism of the public with overreaching policies, dishonest statements, and hypocritical behavior. Whether or not a child receives this should be the uncoerced decision of the parents. And putting law enforcement in the position of detaining persons and families that have committed no crime would further damage public trust in law enforcement. No. This is wrong

*attachments\DE7B1DD2ED5B4632\_August 23, 2021 FDA Approval Letter - Comirnaty.pdf*

External Email

Hello, I am a citizen of the United States, living in Washington State.

I am opposed to including Covid-19 injections as part of school immunization requirements using WAC 246-105. I am also opposed to law enforcement being used to charge and detain persons without due process.

Immunizations for children are for those diseases that have FDA approved vaccinations that are proven to inoculate children against certain childhood diseases that have proven to be of severe risk to life and future health of children.

1. FDA has not approved Pfizer for children under 16 YOA. This is an FDA Emergency Use License for Pfizer/Comirnaty stating pediatric studies have not been conducted and are required before approval for children (see attached FDA License as issued).

2. This vaccine does not provide full immunization, it does not guarantee against infection, as does existing inoculations for measles, mumps, rubella, and the like, therefore the benefit does not outweigh the unknown risk of using an emergency use vaccine in children, and should not be injected into children.

3. Children are not at high risk of death or future health risks related to contracting COVID 19. Like other similar H1N1 viruses children are low risk and the benefit/risk analysis does not justify giving the vaccine to children. Death rates in children are similar to influenza. Influenza shots like 19 shots may or may not protect against infection, may or may not reduce symptoms depending on totality of a person's unique health state.

4. Until the required by FDA pediatric studies are completed, mandating this for all students now creates potential risk of great harm that are unknown. Creates liability for the state due to potential unknown harms. The benefit does not outweigh the unknown risks. Be patient, wait for FDA, then make an educated decision.

5. Natural immunity is tried and true best science. Children's natural immunity is superior to a man-made vaccine, that is solid truth backed by science. Require health screening and staying home when sick as a best practice.

6. I am opposed to any law enforcement action without direct crime, punishments, and law passed by the state legislature. Anything less is a violation of due process outlined in the state and federal constitution.

Thank you for your time.

Subject: Covid vaccination

External Email

I would like to express my concern and greatly oppose the horrible idea of enforcing a covid vaccine to enter school. This is ludicrous! There have been no long term health studies done to know for sure the kind of serious implications this vaccine may have on individual especially children and young adults. Because of the lack of studies and so many unknowns, it would make no sense, especially for young and also healthy individuals to be enforced to take a vaccine with unknown side effects for a virus with such a high survivability. I want to remind you that COVID vaccines remain under Emergency Use Authorization.

2. Children under the age of 18 have a 99.995% survival rate from COVID infection

3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I would like to add the fact that those who choose to receive the vaccine can also get covid and spread covid. It seems to me it should be a personal choice to take it or not. Because of the risk to benefit ratio, my family will not receive this vaccine!

Thank you Stacie Oswalt

Requiring families to administer an experimental vaccine to a child who is NOT AT RISK of harm from the illness is madness, especially for families whose children have zero risk factors, and those whose children have natural immunity. After reviewing many medical studies, speaking with our pediatrician, and reviewing our own children's medical histories, there is no way we would ever allow our children to be vaccinated against COVID and would certainly withdraw from school before we would let that happen. We stand with those supporting parental rights, medical freedom, and family choice. We stand in vocal opposition to any who would attempt to impose medical tyranny.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Discussion on whether students in WA State should be mandated to get the COVID Vaccine.

11.

Are you Pro or Con on the proposal?

2. Con

---

If the vaccine actually stopped people from getting COVID, I might agree with the pro side, but the fact is it doesn't stop COVID. Children who get COVID are highly unlikely to end up in the hospital because of it or to die from it. The vaccine itself looks to be more problematic for some children than the virus itself. Government needs to stop ignoring the fact that natural immunity is at least just as valid a stop to the spread if not more so than the vaccine. Government also needs to recognize and make widely available the wide range of therapeutics to treat COVID so that people don't die. Whether a child gets this particular vaccine should be determined by the parent with guidance from their doctor. This vaccine is not on par with other vaccines like polio, measles, mumps, etc. that have totally eradicated those diseases. The COVID vaccine does not stop the spread like other vaccines do. Therefore it should not be mandated.

All COVID vaccines available are still under EUA and you can't legally mandate anything under EUA. The school aged population has closed to zero risk for severe disease from SARCOV2 infection. On the other end, thousands if not millions of short term vaccine related adverse reactions already shown at VAERS while the long term adverse reactions are yet to discover. The risk vs. benefit ratio doesn't justify any mandate.

All Covid vaccines are too new and not pass the 9 criteria to mandate. Research and real life complications indicate too many who have taken the vaccine have had Covid post vaccine injection. I'm not opposed to vaccination. The mandate is premature. Statistics show very few 18 year olds and younger have had symptoms from Covid resulting in hospitalization.

Both of my kids had covid in December and they showed no symptom. It is not clear how vaccine will impact children like my kids who had prior covid infection. It is also clear that vaccination does not stop infection/spread of the virus, since all of our family members are fully vaccinated and we are all infected. Given the clear lack of the benefits and the potential risk of side effects of vaccine, I as a parent see no reason why it should be mandatory for our children.

Subject: Vaccine Discussion 2022

External Email

To whom it may concern,

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of washington state education is in store if this becomes mandatory.

Best regards

Subject: Upcoming advisory meeting Jan 12

External Email

Good afternoon board members,

I am emailing you in regards to the upcoming meeting and vote that will be happening next week. I don't feel it is necessary to clog this up with all the facts as we all have had plenty of time to look them over and make our personal and family decisions.

I am writing you to just let you know that if you vote to require covid 19 vaxx to attend school we will unenroll our family. I don't feel this is the right decision. Not everyone is able to or even wants to take the vaxx and that should be their decision.

As well as if you vote to give authority to have law enforcement detain families who refuse the vax or refuse the quarantine.

So if you are keeping tally of what the community wants give my family a mark in the Vote NO column. We are in the Sumner Bonney Lake SD just for reference.

Thank you for your time.

Subject: Upcoming meeting on covid protocols

External Email

Good evening!

I'm wanting to take the time to voice some major concerns I have about the upcoming meeting you guys will be having that involves covid.

I am completely and extremely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I oppose all of them but the one that stands out the most for me and I feel extremely passionate about and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for taking your time to read my concerns and I pray you take them seriously and truly do the right thing in not requiring these vaccinations for our children, or actually even stopping and ending this mandate on people having to have this injection to even have and keep their jobs!!

Sincerely,  
Victoria Zeitler

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. There are no long-term studies to document any history of safety
5. Studies do now document that vaccinated and unvaccinated can both transmit COVID, therefore,
6. The vaccine apparently does not stop the spread of the disease

Best Regards,

Lyudmila Ianosel

I am NOT in favor of the committee's that would unilaterally require all school-aged children, particularly elementary and younger individuals, to be vaccinated. The reasons are based on the following and to remind the WSBOH that:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease
- \* And one last item to consider, is the reasoning behind the vaccine company's desire to place a seventy-five year moratorium in releasing any and all documents relating to any previous, current (and future) safety studies, including all injuries and morbidity results from the taking of the "vaccines". Obviously, in seventy-five years, those who should be held accountable for any and all injuries or deaths associated with the Covid 19 "vaccines" wouldn't be alive any longer, and the statute of limitations would have run out for prosecution of the companies. My belief is that the companies know the complications will cause massive, catastrophic suffering and death but are too far in to back out now. That is why their request for a seventy-five year pause has been requested.

---

I'm a parent of a 5 year old girl who is enrolled in the special needs program in the Stanwood Camano School District. I am against the proposal to require a Covid-19 Vaccine for children to attend school or childcare. As we know children are not the ones being impacted severely by Covid-19, but that are at higher risk of having severe side effects from the vaccine. The data speaks for itself. This is not a pandemic of the youth and the VAERS data shows how detrimental these vaccines can be for young people. This vaccine has a higher percentage of side effects than any other vaccine recommended in childhood. We are seeing that the vaccine isn't stopping the omicron variant so mandate should not be necessary. My daughter has a rare genetic disease called 3C Syndrome, condition that is all encompassing much like Down Syndrome. My husband and myself were very worried about Covid due to her immune system being suppressed due to her condition. Unlike other illnesses, when she caught Covid she recovered incredibly... better than our entire family! But if she was to have the vaccine I wouldn't believe she'd fair as well with the risk of myocarditis and other symptoms that really aren't all that rare. My daughter was born with a heart defect (one of the major signs of her condition) and structural brain abnormalities that put her at higher risk of severe reaction. Yet she wouldn't be able to receive a medical exemption since they generally carry only cover allergic reaction. Where there is risk choice must always be involved! Parents should be making the choice to vaccinate for Covid, the government and school system should not be forcing a parents hand. I will pull my child from school and homeschool if a mandate passes for students because of the risk of my daughter having a severe reaction and I refuse to play into the overreach of power by the State of Washington.

Subject: WAC 246-100, WAC 246-105

External Email

Dear State Board of Health Board Member,

Re: WAC 246-105

I understand that including Covid-19 injections as part of the school immunization requirements will be considered next Wednesday, January 12.

As a tax paying person of Washington State, I would like to comment that I strongly DISAGREE that the Covid-19 injection should be made a requirement. While I understand the various injections have now been approved by the FDA, the use on SARS type viruses is newer technology and the vaccine manufacturers own websites have commented that they, themselves, do not know what the long-term affects will be. And while the Johnson & Johnson injection is using a traditional, long-used technology, it has been demonized due to potential blood clots (even though the risk of blood clots is lower than the risk of heart muscle inflammation from mRNA types) and even made very difficult to obtain if people are more comfortable with the J&J option. If people feel comfortable with these new immunizations and want to take them and want them for their children, then that should be their choice but not a forced requirement for a child to attend public education. In my opinion, it falls in the same category as the annual flu shot which is not required to attend school.

Re: WAC 246-100-070, WAC 246-100-040

During the last two years, we have seen a significant increase in governmental overreach in various areas. While it appears the government's preferred mode of treating Covid is by injections instead of treatment, there are many reputable and trusted medical professionals that believe, and have experienced first hand, the benefits of early treatment of Covid and not just telling people to stay home until you can't breathe or your lips turn blue and then go seek help. Horrible advice when there are many options beginning with something as simple as recommending people stay current on their vitamin D. I haven't seen one Public Service announcements about that which drastically increases our own body's immune response. When receiving early treatment, the likelihood of needing hospitalization is drastically reduced. So then why would the implementation of forced isolation / quarantine / counseling be necessary if adequate treatment is largely successful when provided? Again, I strongly DISAGREE with this proposal allowing local health officers to use law enforcement to engage people regarding their own personal health.

One final thought that I can't seem to get my head around regarding the immense pressure to receive a Covid shot. Why do I see Health Departments / health and

government officials so adamant about the right to abortion and "It's my body, my choice" but when it comes to the Covid shot, it no longer is my body, my choice? So it's socially acceptable to kill a baby, a living human being, but I can't say "no" to a shot for my child or myself for a virus that is fairly easily treated? Dumbfounding . . . .

Sheila Pebles

---

Dear WA State Board Of Health, I am writing in regards to the upcoming January Board meeting which will include the expansion of law enforcement for the purposes of forcing compliance with covid-19 quarantine mandates, as well as the potential requirement of covid vaccine doses for all Washington children in child care centers and students K – 12. As we are all aware, this is a highly debated issue. But this subject should not be a matter of debate based on subjective personal opinions about what is “best” for all Washington residents. Rather this should be a subject that is considered objectively and determined based on the established legal and civil rights acknowledged by existing WA State law, which are guaranteed to all individuals. Fundamental to our rights are the right to make informed decisions about our medical care, including the right to object to any medical treatment, to be given informed consent about the risks and benefits of any medical treatment, and to be free from coercion, which includes threats of exclusion from public education and child care. At the present moment there are no fully authorized FDA approved injections for covid-19. There are 3 EUA injections. An EUA treatment cannot be legally required, as has been shown in court rulings that have issued stays over challenges of similar decisions by health boards across the United States to attempt to require covid “vaccines” upon the population. As is known and accepted widely throughout the world, experimentally authorized medical treatments are subject to additional scrutiny and a higher standard of informed consent as well as additional protections for the right to refuse. Any decision by the board to require EUA injections will be challenged in court, and will be proven unconstitutional. Aside from obvious legal issues, the other component of the issue is the undue hardships that would be forced onto families who chose not to give EUA injections to their minor children based on their personal assessment of the risks and benefits to their child. Hundreds of thousands of individuals could be forced to remove their children from school, and childcare. This would have ripple effects throughout society that could destabilize the educational system at large, and worsen outcomes for children throughout our state. To provide clarity on the potential risks and benefits I want to share some statistics based on the most current data provided by the American Academy of Pediatrics (updated 12/30/2021) of the cumulative Covid-19 cases and deaths across the US. Their website states, “Among states reporting, children were 0.00% - 0.027% of all Covid-19 deaths, and 5 states reported zero child deaths.” Children have less than 0.03% risk of death from this disease. Based on Pfizer trial data that was used for EAU, out of 1,131 children who participated in the study, at least 1 child developed a permanent disability and she is now wheelchair bound, and on a feeding tube. Thus, Pfizer data shows that there is a 0.088% risk of developing a permanent, life-altering medical condition. The benefits of the EUA covid-19 injections do not provide a statistically relevant benefit to children, and

studies are showing the injections may have a negative benefit, meaning the risk of harm from injection is greater than the risk of Sars-Cov2 itself. In regard to the expansion of the use of law enforcement, I believe this is a misuse of public funds, and a misappropriation of law enforcement resources which should be reserved for more critical situations affecting the safety and security of our citizens. There is no data that would show quarantined/isolated individuals are leaving those quarantine areas. There is no data to support the suggestion that Washingtonians are at risk from individuals who do not quarantine. We need to trust our citizens to stay home when they are sick, and there is no reason to utilize our already strained law enforcement resources to enforce physical quarantines. Please use your best judgement in considering these potentially devastating and unconstitutional requirements. I am placing my trust in you to make the right decision for WA students and families in preserving our right to medical autonomy, and our right to have freedom from discrimination in education. I thank you sincerely for your time, Danielle Pridgen

Good Morning,

I am writing to on behalf of my family. We are completely against any of the overreaching covid-19 policies that are being proposed. They are completely unethical, immoral, illegal and do not follow the science at all. This is a blatant over reach of power.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also strongly oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The following are a few reasons why:

- Children are at extremely low risk for Covid period!
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety.
- Studies do document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine does NOT stop the spread of the disease, even in the vaccinated.

If you agree to any of this malice...consider yourself with blood of innocent children on your hands.

I AM STRONGLY AGAINST:

WAC 246-100-070,

WAC 246-100-045,

WAC 246-100-040.

Concerned American Patriot,  
Jim & Vicky Olson

Subject: Do NOT Require Covid Inoculations

External Email

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: [www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org)  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200

deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Thank you,

Georgene Faries

I am writing this email to express my opposition to the vaccine mandate for children. As a mother of three, grandmother of ten and a kindergarten teacher of over 20 years, I have researched this topic thoroughly. It is my conclusion that the vaccine poses potential greater risk to children than actually contracting covid. Per the CDC website, as of January 4, 2022, children ages 0-17 have a 99.99918% survival rate against covid. Statistically, children have a greater risk of contracting myocarditis or other adverse side affect than contracting covid. Please STOP this madness. These decisions should not be made by anyone but a child's parents. Bottom line...NO MANDATE. Please do what is right for our children.

Sincerely,  
Wendy Hoy

Please do not consider making Covid-19 vaccines mandatory for children. The science has shown that children are at low risk for Covid and because the vaccines are still emergency use authorization it is not proven safe. I have listened to doctors and read and read data that recommends on waiting for more studies. At this time doctors are testifying the vaccine to be a much higher risk than actual covid. . Please do not take part in this experiment on my grandchildren!

Also, I ask that you do not take away our freedom regarding anyone to be quarantined or mandated to be vaccinated.

Sincerely,

Sandra Corliss

Please hear me,

I want to join the countless other parents who object to a vaccine mandate for our kids. There are many reasons why these vaccines should be a family decision rather than a mandated requirement. I'll briefly list a few of these reasons:

- 1 The vaccines are not without severe risk. Those risks have to be weighed against the potential benefits. For kids, the data clearly says the virus risks are low for kids and they appear to be getting even lower with new viral strains.
- 2 Many kids already have natural immunity which is proving to be incredibly resilient. Adding vaccines on top of that is both unnecessary and comes with risks.
- 3 Many families have suffered from vaccine-induced illnesses including, but not limited to anaphylaxis, vaccine-induced thrombotic thrombocytopenia, myopericarditis, and Guillain-Barré syndrome. Forcing families to vaccinate their kids after seeing those symptoms is a perverse form of torture in violation of the Nuremberg Code.
- 4 Our public schools are not popular right now and private school enrollment has dramatically increased. Vaccine mandates will only further force families into alternative options like homeschooling.
- 5 The current vaccines don't solve the transmission problem as we've seen with fully vaccinated environments like cruise ships.
- 6 We don't have long-term studies of these therapies.
- 7 Data suggests transmission in schools is very low.
- 8 The decision to vaccinate should be between a family and their doctor, not a one-size-fits-all state requirement.
- 9 Milder, but contagious strains like omicron will increase natural immunity which continues to be the most resilient defense.

Thank you!!

I strongly oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The vaccine is not recommended for children as they have a nearly zero risk of infection. I also strongly oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. As American citizens we have the God given right to decide what we inject into our bodies and the bodies of our children. This is an egregious overreach of government power and will set a very dangerous precedent for the freedom of the people moving forward. This virus and vaccine need more time to be studied to assure there are no serious long term adverse reactions as the current adverse reactions are quite alarming.

It is proposed the the board mandate that preschool and school children be immunized against COVID-19 for entry to public school or child care.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Whereas children are extremely low risk for complications from COVID-19 and the vaccines are still on EUA I recommend against this requirement. I personally know of several families who will choose to pull their children out of public school should the vaccine be mandated for school attendance. Families should retain the personal choice whether or not to receive the vaccine and children should not be denied education based on a personal health choice.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It's wrong!

Children are a low risk for Covid  
Vaccines are still only EUA  
No long term testing on history and safety  
vaccinated and unvaccinated can both transmit Covid.  
the vaccine does not stop the spread of the disease  
No one should be forced to put something in their body, EVER!

I come to you today as a concerned grandparent and citizen of Washington State. I have four grandchildren, several great nieces and nephews in the public school system. I am fearful for their future and right to a public education if you force a Covid-19 vaccine requirement on our children. Children pose low risk to themselves and their communities and should not be forced to take a vaccine with no long term efficacy studies. You are putting the lives of children in danger by imposing such mandates. We live in the land of opportunity and home of the free, and that must include freedom to chose what we put in our own bodies. These children are not property of the State of Washington. I ask you to reconsider your stance on covid vaccine mandates for school children and vote no.

It's irresponsible to consider mandatory vaccination of children, particularly adolescent girls, until the correlation of altered menstrual cycles is fully investigated and identified by empirical research in the United States. This recent study, published in September of 2021: <https://www.bmj.com/content/374/bmj.n2211>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bmj.com%2Fcontent%2F374>

show altered menstrual cycles of 35,000 women in the United Kingdom. This research has not been conducted on adolescent girls in the United States, and there is zero evidence to suggest the COVID vaccine will not interfere with the developing reproductive system of adolescent girls. Stop the madness, and follow empirical standards of research.

Washington State Board member:

Please do not vote to enforce Covid vaccines for children at school. Children have a strong immune system and very high success rate. This goes against our constitution and parents desires for their children. For those that want it for their kids it's an option now. This should Never be forced on anyone. You will see people pulling their kids out of school so fast if this passes.

Also please vote no for allowing local health officers to use law enforcement to force an emergency order to involuntarily a person or group of people to be isolated in quarantine facility if refuse vaccine, or testing, treatment etc. we are human beings with free will. We live in a free country. We should not be forced to put anything in our bodies.

This needs to move to endemic status as this isn't going away. Vaccines aren't stopping this as people can still get Covid if vaccinated. Many from who I have seen are having a worse Covid experience after vaccination then the unvaccinated. Vaccines are not the answer. We need to learn to live with this. Our economy is affected enough, our mental health is affected enough, and our livelihood and health. Please vote no.

Michelle

STOP the unconstitutional laws that will forever separate us all. These mandates and laws that you are discussing go completely against our rights as an American! Nothing about this brings us together to solve the problem with health OR community! There is so much science and facts that have been found over the last 2 years and more that prove masks don't work to stop the virus, vaccines don't work to stop the virus AT ALL, and all of these effects are indefinitely changing our younger generations connection, mental perspective on how to be human. They are not able to communicate to understand each other and the depression and anxiety on them is detrimental to this world.

Be the better human and open your eyes to understand WHY this doesn't work. Look at the results from other schools, cities, states, countries! None of the segregation and forceful mandates are improving Covid numbers OR benefiting you or the community it effects!

This is discussing that it is oven a conversation we have to have.. I am sickened by your power trips and lack of thinking outside the box to solve an issue that is unsolvable. By pushing people to do as you say you will NOT get compliance. You will get a new issue.

Think about it. STOP abusing the system for unethical, unconstitutional, unrealistic laws that don't change the problem!

--

Sincerely,

Susan Williams

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

<<https://ui.icontact.com/assets/1px.png>>

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Thank you for your consideration?

Children do not need to be vaccinated for CV19. CV19 vaccination is not without risks. As the father of 2 little girls, this mandate would be government overreach and would force me to pull my children from school. Do not proceed with this.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.  
Thank you for hearing my voice!

We should never be adding a vaccine to the childhood schedule that is only under emergency use authorization and And has a known and quantifiable risk to children... That far outweighs the risk of the disease. Also, the idea of involuntarily quarantine people is completely unthinkable. We've been at this for 2 years, we don't need to be threatened with covid camps. The idea is truly repulsive and un- American.

I will not have my children or grandchildren vaccinated when I myself do not trust it. The CDC is not wanting to release information regarding it. The facts are not available and are not consistent. Why does Congress have an exemption? Why mandate the citizens when there is an open border. Start with taking control of the southern border and offering the truth about vaccine. Let the citizens decide if they need it and start considering those who have had Covid and natural immunity. NO MANDATE!!

Subject: My Public Comments

External Email

Good Morning,

Thank you for taking the time to read this. I'm sure there have been a lot of comments sent in that y'all are trying to get through, so I will do my best to keep this brief.

To begin, thank you for all you do for the health and well being of all. I'm sure your job comes with many burdens and stresses, even more these last two years. I wish you peace of mind and strength of spirit.

On the agenda for your meeting on the 12th is the topic of making the Covid vaccine mandatory for all school children K-12th grades. I understand the need and desire to do what is best for our children and to keep them healthy and protected. It is for this exact reason that I am strongly opposed to mandating a vaccine that has no long term testing. We still do not have enough information on the long term effects of these vaccines and some places have even begun administering booster shots to teens. It seems like we're ramping up for a never ending round of science experiments and I will not include my children.

To my knowledge, and correct me if I'm wrong, the vaccine's primary function at this point is to lessen the effects of catching Covid. It does not prevent the actual spread. Therefore, the vaccine is a personal shield and not a societal one. For this reason alone the vaccine should be a choice and not a mandate.

Without being pigeon holed as an anti-vaccer (my children are current on all other vaccines), there are a lot of details and side effects being completely ignored by the media and people in government. You can find these details and side effects listed on the CDC website.

In conclusion, I ask that you do your own research. I ask that you stop listening to the screaming voices on the outside and listen to the quiet voice inside. I would presume that you were each given your jobs based on your knowledge and skills and not for political reasons. The decision you make will effect millions for decades to come.

With Sincerity,

Sharon E. Tilley

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Mark Tibbles

Subject: Public Comment Re: WAC 246-100 and C-19 Addition to WAC 246-105

External Email

To Whom it May Concern:

Re: January 12, 2022 WA SBOH Meeting

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Specifically, the rulemaking in WAC 246-100-036 "Responsibilities and Duties – Local Health Officers" is welcome for disseminating information to the public, but the authority in (3) and (4) for and investigations and instituting control measures is way beyond the authority and expertise of a local government health bureaucracy. I have extensive experience as a chemical engineer, involved for over 40 years, in the chemical and nuclear industries, with significant training, use of personal protective equipment, and implementation and management of a safety culture programs for serious chemical and nuclear hazards. I consider the bureaucrats in the state executive arm, local health department untrained and unqualified to make decisions on investigations and control measure for public health concerns that may be properly or improperly viewed as significant as the hazards I have dealt with. This authority should be reserved for the legislative branch involving certified and qualified trained experts in health hazard fields.

Specifically, for adding Covid-19 vaccination requirements for children to the WAC 246-105 rule, the board should investigate the CDC's VAERS database

(<https://vaers.hhs.gov/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2F&data=04%7C>

) to understand the true risks of these vaccines. WSDOH web pages and information fails to inform the public of this federal database and its horrendous US statistics (tip of the iceberg) associated with the current vaccine sets. VAERS data summary can be found at <https://www.openvaers.com>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.openvaers.com%2F&data=0>

. Bottom line, there are no long term studies performed on the effects to children for any of the C-19 vaccines. The implication of the CDC's own database for the huge number of immediate horrible health effects should give any rational thinking person pause, before requiring that we inject these chemicals into the bodies of our children.

Thank you for considering my input.

As a teacher and a parent of four school-age children, I urge you to make vaccination voluntary for students. My husband and I are vaccinated and booster, our 12 year old is fully vaccinated and we have appointments on Sunday for our other three children to be vaccinated. However, we strongly believe vaccination decisions should be left to parents. Most of our unvaccinated friends would have chosen the vaccine had the decision been left to them. However, we are all opposed to governmental overreach and some have chosen to defy that overreach by remaining unvaccinated. I obviously disagree with this approach – the vaccination decision should be a medical, not political, decision. However, I believe that if people are given both the information and the responsibility to make wise choices, they largely will. When our government mandates things (such as an emergency use authorization vaccine for school admission), it sends a subtle message to people that they are not capable of making wise decisions... and so they begin believing that about themselves and may eventually begin making less wise decisions. They need to be given the information, be given the responsibility for making that choice, and the consequences need to fall on their shoulders as much as is possible. Thank you for your time!

To the WA state superintendent of schools, WA state secretary of health and their boards,

I implore you as a mom of 2 girls and a person who has worked with children for 42 years, do not make the experimental covid vaccine mandatory for school attendance. I am NOT anti-vaccine. My children and I are fully vaccinated with every tried and true vaccine. I am confident we will not get tetanus, whooping cough, measles, etc. These vaccines have been vetted and long term studies have been done to maximize effectiveness and minimize side effects.

There have been numerous studies around the world showing that the covid vaccine is much more harmful than covid itself to boys. At minimum, the UK found that boys are 6 times more likely to suffer myocarditis from the vaccine than covid itself. Since the vax has been approved for kids 5 to 11, 1 in 100 has a documented adverse reaction in VAERS. These numbers have never been seen and the drug still allowed to be used.

Please do not mandate the covid vaccine for all children. Children are at greater risk of harm from vax side effects than covid itself.

Thank you for your time and consideration,

Patty Johanson

This vaccine is still under EUA. More and more professional medical experts are speaking out against it weekly. Kids are not at risk from dying or being severely injured by covid 19. The amount of side affects are shocking and the likelihood of a child being harmed by the vaccine is now higher than being harmed by covid 19. Please don't put our children at risk of sever adverse affects from a vaccine that they don't need.

2. Con

---

The vaccine has been proven to not be as effective as everyone one hoped. I've seen numerous people still contract the virus, while vaccinated no only with family and friends, but with the NFL and NBA. I still believe in people and they will take care of each other, but it's not anyone's responsibility to take care of your health or make health choices for you, except you. We're just now hearing from news stations that being overweight makes you more susceptible to getting sick. This should've been something pushed from the beginning. Why not educate everyone on how to get healthy and put yourself in a better situation to deal with illnesses as they arrive. Instead they want to push a hurried through vaccine that's already shown to have some negative side effects (one of those is death). So why is death or any side effect from the vaccine that our Governor and Health Dept want to mandate, but the deaths and side effects of covid are different? Doesn't every life matter? Medical treatments should stay between the patient and dr and recommended based on their health history.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

It should be the decision of the parent of whether or not to give a child a drug. Not make it mandatory. People pay taxes for their child to go to school so they should have a say. And if they can't use child care, who will take care of their child when they are at work? You?

Mandating vaccinations when studies & researchers won't have information for 55+ years on medical documentation. Hundreds of children are suffering from vaccines that haven't

been fully researched. It proves the vaccine itself doesn't protect us from the actual illness. It should be a choice on this particular topic. We have a choice in getting the flu shots and we should be able to make this one the same opportunity.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Waiting for a medical document for 55-75 plus years is waste of time. We as Americans should have a choices what we do with our bodies and how we care for them. It's under the Bill of Rights. You're all violating this if you force us to inject something without knowing it is safe for the community.

To whom it may concern:

As a concerned Washington citizen, I am opposed to the covid shot being given to public school students. This should be the choice of the parents and not the government.

This shot has not been proven safe or effective. It has not been studied long enough to know what the lasting side effects are.

The government is abusing their authority. No one is mandated or ordered to get flu shots or pneumonia vaccines and these are far more dangerous than covid.

Again, I am stating my opposition to this bill.

Concerned citizen for our children.

External Email

To the Board of Health,

I am speaking on behalf of my family. Covid shots should absolutely NOT be a requirement for our children to attend school or childcare. Children are at extremely low risk for Covid and the vaccines are still only emergency use authorized. Science shows that children have a 99.7% survival rate from COVID. Science also shows that children who take the jab have a higher risk of major on-going issues due to the spike protein levels in administered medicine. This is unnecessary for what amounts to a common cold. Kids don't die from COVID. Please give us back our freedoms and personal choice to do what is best for our families.

Sincerely,

Shan Trick

Subject: Jan.10 meeting WSBOH RE: vaccination requirement for school aged children

External Email

To Whom it May Concern:

I am sending this message to voice my concern about the mandates for the vaccinations that you will be discussing on Monday in your meeting. I and many others are against making it mandatory to have these shots to protect the public for several reasons.

1.

While it appears that the shots lower the severity of the attack by the virus, they are ineffective at stopping the spread.

2. There are adverse results to receiving the shots of which only the immediate affects have had time to manifest themselves.

3. The trial periods were way too short due to the EUA and longer-term consequences have not had time to occur.

4. The hysteria and fear that has been prompted through various sources has created a major division and distrust of government and media and even some in the medical profession.

5. The survival rate for humans is such that 95+ percent of those who acquire the virus will be able to defeat it with or without the shot.

6. Early treatments that are available can reduce the danger of the virus.

Unfortunately, these treatments are being suppressed by government and media in favor of pushing citizens to Perceive that the shots which can have short term serious consequences like heart attacks, myopericarditis, shingles, bells palsy and other permanent disabilities and in to many cases death. We do not know of the long term dangers as the normal trial period will not be reached for several more years.

Finally, "This shot is the FIRST TIME EVER that the use of mRNA gene transfer technology has been used against an infectious virus. This is the FIRST EVER vaccine to make no provable claims about reduction of infection, transmissibility or death. This is the FIRST EVER coronavirus vaccine ever tested on humans (and previous coronavirus vaccines all failed due to antibody-dependent enhancement, a condition in which the antibodies actually facilitate infection rather than defend against it). The first ever use of genetically modified polynucleotides in the general population."

I have personally had a close friend and another acquaintance die within weeks of receiving the second shot and one young woman who I have known since she was born who had the shot when pregnant and had a miscarriage. This is important to me and I believe that many others have had similar experiences.

I hope you will consider these thoughts and do your own research about this and in the mean time please do not agree to any mandates regarding this "Vaccine "PERIOD. And certainly not for school aged children who have no choice and little ability to understand the difference between this shot and other vaccines that they have received.

Thank you for your time and consideration.

Sincerely,

Jean R. Doty

Registered voter in Stanwood, WA.

## Mead School District #354 - Survey Responses to Potential COVID Vaccine requirement for School-Aged Children

\*\*\*Please note that the date/time below each comment is the date/time stamp for that comment.

Anything that you have to mandate is not good for anyone. Should they continue down this path of mandates, the resistance and fallout will only grow. We will not force this on our kids and will homeschool, and or relocate so our choice is respected. Thank you

1/7/2022 9:19 AM

Instead of looking at the politics and the money involved with requiring vaccine mandates, the Governor's Office (and everyone else) needs to look at the science of the vaccines and the impacts on not only all who get the vaccine, but especially children. Other vaccines prevent what they are intended for. This is NOT a vaccine, it is a shot. It is VERY apparent that this "vaccine" does not prevent anyone from getting Covid, nor does it keep a vaccinated person from transmitting Covid. This has been shown time and time again with groups of individuals who have the vaccine yet sporting events are continually delayed because vaccinated players all have Covid or ships with 100% vaccinated people on-board all have Covid. There is so much evidence and science behind the negative impacts of the Covid "vaccines", especially on children. I, among many others, will leave this state before I vaccinate my child. I am submitting this survey as a parent who lives in the Mead School District.

1/7/2022 9:15 AM

The government should just leave this alone. The risk of children getting seriously sick or dying from COVID is so much smaller than other things that the government does nothing about, so they need to leave this and just leave it up to the parents. Suicide, drug overdose, death from car accidents, those are all examples of things that have a higher risk than COVID, yet the government and school systems aren't mandating anything for that. We would move out of Washington state and take the taxes we pay with us if the government required this.

1/7/2022 9:13 AM

In no way will I vaccinate my three children with this experimental vaccine. My wife and I are prepared to do whatever it takes to keep our children safe, as we know what is best for our own children. To mandate a vaccine for a population that isn't at high risk, is absurd. If we are truly following the science, you'd already know that masks are not working, lockdowns didn't work, vaccines are not working, and 79% of the new cases of covid are in fully vaccinated people. Washington has already seen a large percentage of parents disenroll their children from the public school system. I have no doubt this number will multiply if you mandate this vaccine. Nicholas Lunzer

1/7/2022 9:06 AM

Our children have been hit the hardest throughout this pandemic. Mandating an experimental vaccine for a population that is not greatly affected by this virus, as the science has proven, is an extreme overreach of our Constitutional rights by our state leadership. This is putting our medical and religious freedoms at risk. Our children deserve to be in school, without the added pressure to take an experimental vaccine. Washington state has already lost over 55,000 students enrolled in public schools. That number will greatly increase if this vaccine mandate goes into effect. Studies have continually been emerging that show how unsafe this vaccine is, especially for young men. The rates of Myocarditis and pericarditis are 1 in 2700 for young men in the ages of 12-17. Having

three boys of my own, I will not be forced into getting them this vaccine and am prepared to do whatever it takes to keep them healthy. I am completely against any of the proposed Covid-19 policies that are being discussed. We stand against the following WAC's: WAC 246-100-070 WAC 246-100-045 WAC 246-100-040 WAC 246-100-105 Sincerely, Amanda Lunzer

1/7/2022 8:59 AM

If this was truly a vaccine that prevented contraction and spread of a disease it would be different. This vaccine does neither of those things. A mandate deprives ones individual rights to make choices about the healthcare of their children with zero benefit. The public school system is not the sole source of education, therefor if a mandate is put in place, public schools will no longer be a viable choice for our family

1/7/2022 8:59 AM

Please stop pushing something that, as we are currently seeing, is clearly not working. If you truly care about our health needs, focus your time and energy on finding other solutions to this virus.

1/7/2022 8:59 AM

We strongly oppose mandatory vaccines. We are very baffled by the apparent lack of intelligence regarding natural immunity, and disregard for a history of the disease. These absolutely should be considered and this is a breaking point for us.

1/7/2022 8:50 AM

No

1/7/2022 8:46 AM

The Vaccine Mandate is coming two years too late. Why would we force a mandate upon our children when vaccine efficacy has significantly decreased against the new strains? COVID is now a part of life just like the seasonal flu. Coronaviruses are present with the common cold. The mandate was a government overreach that was not grounded in scientific principle.

1/7/2022 8:34 AM

We as a parents get to choose to vaccinate our kids or not. Not the governor. Our kids had enough it's been a hard time for all of us.

1/7/2022 8:24 AM

No

1/7/2022 8:22 AM

The state is ignoring medical risks by vaccing children and is ignoring the actual science behind covid and the so called vaccines. it is criminal to force it on children. Where is the informed consent? real data?

1/7/2022 7:35 AM

Unmask there is a 99.9 survival rate mandates are not laws, is the school working for our children or for the governor. There are cures and if the vaccines work why are people better vaccinated getting Covid. This is all propaganda.

1/7/2022 7:03 AM

The decision to vaccinate my child is mine to make as a parent. There is just not enough time and research for the long standing effects of this vaccine for children. It also does not stop the spread.

Requiring my child to partake in a medicine that does not stop a virus, and could have potential health risks is a concern for me as a parent. It is my choice to make, not the government's.

1/7/2022 6:05 AM

COVID vaccine mandates for school age children are inappropriate because of limited risk to children from the disease and inadequate assessment on the risks of the vaccine for this group. Children under the age of 18 are at extraordinary low risk for death or serious illness. As of Dec 15, 2021, 655 Americans aged 0-17 died from COVID-19, all of those had significant co-morbidities. Children and schools have not been a significant cause of spread in the US or elsewhere. COVID-19 is not a childhood disease, so vaccination is not justifiable for their protection. Vaccination in children, especially those under 12, has not been adequately evaluated. Testing for emergency use authorization consisted of roughly 2,000 children, of which only 1,000 were given the actual vaccine. There are known, serious adverse reactions and other side effects. Also, vaccine adverse reactions are 2-4 times more likely for those with natural immunity from prior COVID exposure. Given the children who are known to have had the disease plus those who were exposed, but asymptotic, there is a large childhood population at real risk of harm from COVID vaccination. Ignoring both the low risk of the disease to children and the real risk of harm from existing vaccines is not only anti-scientific, it is immoral. Since COVID vaccination impose risks on children not present in the disease, the only remaining reason to mandate it is to protect adults. Risking the health of children to safeguard adults is unethical and must be rejected unequivocally.

1/6/2022 11:42 PM

Most children are not getting covid. If they do get it, cases are mild compared to adults. The vaccine should be a choice for both children and adults.

1/6/2022 10:46 PM

We do not agree with forcing this shot on anyone. I have a child with medical issues and I have spent hundreds of hours studying this. I have read more articles than you can imagine, not just from the US but from all over the world. We have family all over the country. My kids see their cousins not being required to take this shot OR wear masks and you know what? Their school and children are doing great. As I'm sure you have heard there is another new variant they found in France. Coronavirus is here to stay, it will never leave. The places that have the highest numbers also have the highest shot numbers. It's time to let people be. The people who wanted the shot have had it.

1/6/2022 10:17 PM

Vaccine mandate is not constitutional.

1/6/2022 10:15 PM

The government has no right to make decisions for our kids. Only the parents can make the decision. It is unconstitutional for the state to take away our rights. It is a socialism agenda, very similar to what I have experienced in China. I suggest the governor to read George Orwell's 1984 before the board meeting. There should be no room for a Ministry of Truth in WA.

1/6/2022 9:57 PM

Mandates are unconstitutional. Refresh yourself by reading the Constitution.

1/6/2022 9:42 PM

Pour more funding into homeschool programs. Most parents are untrustworthy of the teachers today. I do not need a stranger teaching my kid their morals and beliefs

1/6/2022 9:14 PM

This is a personal and private choice and the governor is overreaching his authority!

1/6/2022 9:10 PM

Medical decisions shall be left with the parents.

1/6/2022 9:02 PM

Medical decisions belong between patient and chosen care provider, who knows their medical history. It does not belong with government.

1/6/2022 8:36 PM

No

1/6/2022 8:18 PM

My family has been part of the Mead community for a long time. And I have chosen to follow other mandated vaccination requirements for my kids. But all those other vaccines had a long time history of results (and even risks). There was data to show that those vaccines actually eradicated the diseases and illnesses associated with the vaccines. The Covid vaccine CANNOT claim the same! It has not been around for long. Years worth of data has not be collected. And it does not eliminate the Covid virus. It is irresponsible and dangerous to require children to get the Covid vaccine at this time. Parents should be allowed to choose what they will do with their own children. I have older teens and am at this time undecided if I will vaccinate them. But I DO NOT want to be told I have to. Let me and my kids decide what to do.

1/6/2022 8:17 PM

History will look back on this time period just like the Germans in the 1930's. Forcing a vaccine by coercion is a crime against humanity and basic human rights. This is a dangerous slippery slope. If you dont get the vaccine, you dont get to work. If you dont get the vaccine, you dont go to school. If you dont get the vaccine, you dont get to buy food. If you dont get the vaccine, you dont get to live in a community. On and on until finally...If you dont get the vaccine, you dont get to live. History always repeats itself, only with slightly different details and circumstances. I will NEVER gamble my children's health and future on an experimental vaccine that could kill, permanently injure or potentially sterilize them. We all know the decisions have probably already been made. You will put on quite the performance pretending to care about the health and safety of the community and children. Everyone is onto politicians and their "motives". I'm sure hands have already been shook with big pharma or at the very least the offer could already on the table to purchase said "vaccines". Knowing politicians reputations and past behavior, pockets might have already been lined. It's just a matter of theatrics and the big announcement! People will flee Wa to protect their children and find a better state, its economy will tank and everyone will look back on the "leadership" of 2022 as the cause. I wish I could say the choice is yours, but like I've said before, decisions are probably already made.

1/6/2022 8:09 PM

Stop this madness. There is NO approved covid vaccine. They are ALL EUA and they contain MRNA technology. This state needs to stop politicizing our children! Enough!!!

1/6/2022 7:34 PM

My kids are 15 and 18 and both vaccinated. I couldn't answer this because I believe in choice. I don't agree with vaccinating younger children.

1/6/2022 7:28 PM

This isn't polio, or a serious disease. These covid shots may not always protect against the virus. Healthy/young people shouldn't be taking this vax/shot at this time when we're not sure how it will affect younger generation in the long term. Let's not force people to take it....not constitutional or safe for those with health issues that could make their health worse, like blood clotting.

1/6/2022 7:09 PM

My youngest son has already had Covid a vaccine mandate for this is ridiculous.

1/6/2022 6:46 PM

I do not think the Covid Vaccine should be mandated for kids to attend schools. I think it should be a decision made by the parents and their pediatrician based on the individual risk/benefit profile of each child. My family is vaccinated except for my youngest child who was too young for the vaccine last year and in the Fall, my youngest child got Covid from school. He had very minor symptoms and was only sick for one day. Even my family members who were vaccinated (including myself) got Covid from him and only had minor symptoms. Data has shown that even vaccinated people can spread Covid and get breakthrough cases and our family was an example of that. So it doesn't make sense to mandate the Covid Vaccine in schools. Natural immunity should be considered and as these Covid Variants are getting more mild and more people have been exposed to Covid or have already had Covid, I think we need to remove the Covid restrictions in school and get back to our normal life. Each person should be able to make their own decision about getting vaccinated based on their own benefit/risk profile. I think now that it has been almost 2 years and we have collected more data and know more about Covid, a person who is really high risk or concerned about Covid can make their own decision and protect themselves with a vaccine and/or mask but it should not be a mandate for everyone, especially kids.

1/6/2022 6:45 PM

According to VAERS Website: There are Now Over a Million Adverse Reaction Cases to the COVID Vaccine and Over 21,000 Vaccine Deaths for Year 2021.

1/6/2022 6:43 PM

I will not vaccinated my kids... or myself PERIOD!!!!

1/6/2022 6:38 PM

It is upsetting this mandate is now attempting to include our children. Typically vaccines have been studied for years (up to 10years) before admission, according to JohnsHopkinsUniversity.edu. I was mandated to take the vaccination or I would loose 15 years of federal service to our country. I would like to make this decision for my children not be mandated to comply. I would prefer to give the vaccine more time for studying and research before being faced with a decision to pull my kids out of a school district we specifically moved into for the outstanding faculty and student experience.

1/6/2022 6:33 PM

Not only will my kids no longer attend the schools I will move out of the district to not pay toward the district taxes.

1/6/2022 6:17 PM

No

1/6/2022 5:53 PM

Understanding the seriousness of this issue, it will be detrimental to our children to involve them in a decisive issue such as this. As a parent, it is MY responsibility to protect my child and will not allow our state officials to dictate how I do so. If a child has an exemption, for whatever reason it may be, please tell me how it will not segregated the child given today's social climate. I ask you to be a part of the solution, not the problem. Do not force parents to pull our children from public schools, preventing them from having decisions made regarding what will enter their body, by state officials.

1/6/2022 5:02 PM

Vaccination for Covid needs to be a decision by each individual family not a mandate, similar to the flu vaccine.

1/6/2022 5:00 PM

N

1/6/2022 4:49 PM

This is too experimental and has had mortal consequences for young children and teens. In addition, those getting vaxxed are getting Covid and variants. There needs to be an end to the constant moving carrot to get out of Covid protocols. We were told the vax would prevent you from getting Covid, but that wasn't true. Then, if you get vaxxed you won't have to wear a mask, that wasn't true either. States with lowest spikes are those who have not shut down their businesses. Please research Natural Immunity, stop mask and shot mandates.

1/6/2022 4:47 PM

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

1/6/2022 4:35 PM

Children cannot benefit from COVID-19 injections, seeing how they only have a 0.005% risk of death in the first place. Healthy children have died shortly after the jabs and dozens of cases of heart in flammation have been reported. By requiring vaccines for children, they would be taking all the risk and receive no benefit. Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis.

1/6/2022 3:17 PM

My children have a family history that makes this shot potentially deadly. My spouse has a medical exemption and he has been retaliated against in his work place. I will not subject my children to the treatment my spouse has faced. My family will make the financial sacrifice and move out of state if a state mandate, out of district if a district mandate. Additionally, the cdc released a statement on 1/6/22 that the "vaccine does not stop the transmission of covid, only lessens the severity of the illness". The recent surge of omicron is a perfect example of this statement. In conclusion my children WILL NOT receive the vaccine and will withdraw if it is mandated

1/6/2022 3:17 PM

I do not recognize the legal legitimacy of gubernatorial "mandates. Under absolutely NO circumstances will I or my children be vaccinated. None. Not even under threat of arrest or imprisonment.

1/6/2022 2:52 PM

personal choice and freedom is essential for health matters and what we put into our bodies

1/6/2022 2:39 PM

Recently, six doctors who were members of an advisory board for President Biden during his transition period posted a series of opinion articles in the Journal of American Medical Association advising him to change the path that he is on with Covid-19. Among their opinions they cited - "The goal for the 'new normal' with COVID-19 does not include eradication or elimination, eg, the 'zero COVID' strategy. Neither COVID-19 vaccination nor infection appear to confer lifelong immunity," they wrote. "Current vaccines do not offer sterilizing immunity against SARS-CoV-2 infection. Infectious diseases cannot be eradicated when there is limited long-term immunity following infection or vaccination or nonhuman reservoirs of infection." The Covid-19 vaccine is unlike other vaccines mandated for school children that have created immunity against. Those vaccines that have provided this immunity have a lengthy proven track record with minimal side effects. The government has substantially overstepped it's authority in even considering to force adults and more significantly now children to get a vaccine to be able to live their life as they choose when the vaccine provides no immunity to the virus and has no proven track record other than not providing immunity and having substantial side effects. The argument that the vaccine for children who are already at an extremely low risk of death from the virus is necessary to slow the spread is ridiculous. Triple masks, face shields, and booster shots combined haven't proven effect for adults already living in a bubble. Stop sacrificing the health and welfare of kids. If you want the vaccine and you think it will stop the virus then take it. If you don't want the vaccine then don't take it. Either way you'll end up with the virus that is similar to the flu in severity in how it effects various demographics so why push a vaccine on people and risk additional side effects that are known/unknown. It's okay for this tyrannical government to admit they were wrong and change course. It shows leadership, maturity, growth, and progress for government that claims to be progressive.

1/6/2022 2:38 PM

No.

1/6/2022 1:21 PM

These questions assume my two high school students are NOT vaccinated, and that I'd only consider it under duress. My kids are vaccinated (along with 95%+ of M.D.s). I would favor a mandatory 12+ vaccine to attend school, but the threat to young children up to 12 is very minor, even unvaccinated (less than the flu). But serious health consequences and inconveniences to everyone are the result of the unvaccinated, so I do favor increased mandatory vaccination (just like MMR). BTW: I very much dislike the way the governor has appropriated so much unauthorized power in all of this (I'm a conservative).

1/6/2022 1:19 PM

This is an egregious violation of civil and parental rights. I am strongly opposed to vaccinating my children for Covid19, particularly not knowing what the long-term health effects would be. The risk of the vaccine far outweighs the benefit to my children, who have already been exposed to Covid for years

1/6/2022 1:18 PM

Please tell me what the long-term effects are from this vaccine, especially on children? I don't want to be told that "experts" say it's safe--I want to know what the long-term effects are as determined from appropriate scientific studies conducted over the appropriate amount of time.

1/6/2022 12:26 PM

The Governor has no business mandating this vaccine for any one. There are no long term studies of effects of this vaccine on adults let alone children. Show me the data that children are transmitting the disease or that it highly affects children, including percentage of children disease, or hospitalization. This is unnecessary.

1/6/2022 11:56 AM

I don't think anyone should be forced to take the vaccination. I think as parents we should be able to decide that for our children.

1/6/2022 11:52 AM

Thank you for keeping our students safe, hoping to see a vaccine mandate implemented in line with precedent set by other vaccines!

1/6/2022 11:33 AM

1. We oppose the Covid-19 shot mandate, period! 2. We support the Informed Choice Washington's Petition for Rulemaking (item 11 on the agenda). 3. The Covid-19 shot has not completed Phase 3 clinical trials 4. CDC acknowledges risks of myocarditis and blood clots 5. Children are not at high risk for severe disease or death from Covid-19. (Both of my children have had it) 6. FDA admits safety is unknown. Children are being used as test subjects. Dr. Eric Rubin admitted: "...but we're never going to learn about how safe this vaccine is unless we start giving it." 7. The Physicians Declaration II by the Global Covid Summit, International Alliance of Physicians and Medical Scientists resolve that healthy children shall not be subject to forced vaccinations. 8. We oppose Covid-19 shot mandates, period!

1/6/2022 11:31 AM

Every person is different and should be forced. There has not been any consistent information. So as a family this is our decision.

1/6/2022 11:01 AM

The vaccine is not safe and has not been tested for long term side affects, there is all ready young boys developing heart complications, it violates our civil rights it's just wrong.

1/6/2022 10:59 AM

Dear Mr. Inslee, Please stop the madness. Sincerely, The People of Washington

1/6/2022 10:43 AM

You have a greater risk of dying from a car wreck than Covid. Are we going to stop driving?

1/6/2022 10:39 AM

This is absurd and not scientific based. Shame on the governor for this overreach. He should be removed immediately from his office.

1/6/2022 10:04 AM

I support vaccines.

1/6/2022 10:01 AM

Vaccinating children is reckless. There are zero benefits and risks are unnecessary, especially for those who have already had COVID.

1/6/2022 10:00 AM

As with other diseases we can mitigate with vaccines, covid-19 becomes manageable for society and safer for individuals with the widespread administration of vaccines. I do not expect to be asked whether or not I want to mandate a chicken pox vaccine, or measles, and this should be no different. When a new vaccine comes along with great efficacy and safety, that protects our whole society, and ensures a safe school environment, there is no reason NOT to mandate its use. Medical exemptions should be the only acceptable exemption. No major religious leaders have raised objections, and a personal exemption renders the mandate meaningless, allowing for politically-motivated exemptions. Please follow science and medical experts in making this decision.

1/6/2022 8:41 AM

This is what I sent as a response to the Board of Health. To: Washington State Board of Health January 6, 2022 From: Mr./Mrs. Price & Angelique Paramore Concerned Parents Arbonne Consultant (District Manager) WA Air National Guard Officer – Medical Service Corps (MSC) - National Guard Bureau Joint Surgeon – Regional Medical Plans Officer (FEMA 10) Owners, College Hunks Hauling Junk & Moving, Spokane, WA To whom it may concern, Thank you for this opportunity to address the committee and we hope that our comments will illuminate my perspective on this serious issue and that many in my community share. The topic of vaccination of school age children is an important one. As a couple we believe in vaccines, we have enjoyed a world almost eradicated of polio, smallpox and other dangerous viruses that have plagued human existence since the beginning of our time. Vaccines have been a science that has been used to help save millions of souls and made our world a better place. We hope that our world continues to develop the science to help more people in the future. The issues that we would like to redress in this forum are twofold; one, health mandates, though usually perpetuated with a noble cause, can quickly erode the fabric of liberty and choice. Two, that unlike the vaccines of old, with a long history of proven technology, the mRNA technology, does not have a long enough track record to suffice the health and safety of the public and our precious posterity. To illustrate my point on this topic we will present data that we pulled from the CDC later in my letter. Liberty and safety have always been at odds with each and never so much so since the beginning of our great country. Our Founding Fathers enjoyed a safe and secure government under the protection of the English King, but that security came at a cost, the cost of choice and the agency to will an individual's or family's circumstances to a better place. Our Founding Fathers wanted the ability to choose for themselves the best actions and accept the consequences whether great or small, good or bad. This is what they fought for and died to acquire for our country. However, safety is a public good and we can alleviate to the fact that there are some circumstances where prudent and constrained orders and laws can and should be implemented to protect the community as a whole. However, as we have seen among many cultures and countries, that the perceived public safety can quickly erode the private agency of a man or woman. In doing so, tyrannies and dictators have formed and continue to form even in our day of advancement and civility. In the realm of medical choice and agency, our elected officials have passed many acts to protect our medical freedom. The HIPAA of 1996 is one of the most comprehensive. This act was specifically designed to protect and safeguard your personal information. In today's climate much of this act has been violated, such that a common entry into a public establishment for retail, recreation or a public good now is requiring the disclosure of private medical information. We do not agree with this, and nor do we agree with disclosure of private medical information to school officials. This was true with us even prior to COVID. We believe parents should have the right to determine what is appropriate for their children. A major point that we would like to make at this juncture is that many schools have allowed for parental freedom to vaccinate and many children in recent times have forgone vaccination for polio, smallpox, mumps, measles and other viruses, whether for medical or moral issues is a moot point. For this reason, in our country, we have had many outbreaks of these far more serious viruses than for the common coronavirus. Please let us not forget that the

coronavirus has been around since the 1960s. If parents have the right to choose whether to vaccinate their children against serious and deadly viruses like polio, then we should have the right to choose not to vaccinate our children against, for all intents and purposes, a harmless virus like coronavirus. More on mortality rate below. We believe that the board's decision will greatly impact the medical freedom in our great state and will cause a rift of major proportions of the populations. We believe it is in the best interest of the community for parents to decide whether a student needs to be vaccinated. If a parent feels, due to their circumstances, that the child deserves an added measure of protection and feels the risk is worth the reward than the parent has the right to do so. On the other hand, the parent also should have the right to decide that the vaccination is not worth the consequence of an adverse reaction. It is not the job of the state to determine what is best for the child. That responsibility lies with the parent, no matter how the state feels about the aptitude of the parent is in making such a decision. My second point is very different from my first. The risk and reward for this endeavor is disproportionate and unfavorable. An important ingredient to this discussion is the risk involved to our children. COVID is uniquely harsh to the geriatric populations. The case count and death count are extremely high among these demographics. However, the case and mortality rate for children is miniscule compared to other age populations. (See graph; source CDC.gov). There is no visible documentation of deaths in the charts until the 18–29 year-old bracket. In fact, there is no more than 250 deaths in any one of the age brackets from 0-17, despite the smallest bracket, 16-17 year olds, represents over 8,286,232 individuals. The total population for 0-17 is 73,924,334. The point that we are vehemently indicating, is that the supposed threat to our children's health in our schools is simply not palpable. Although the risk to our children is low, the risk to our children in taking the vaccine, is well above the tolerance of public consumption. In other words, the risk of adverse reactions in taking the vaccine far exceeds the risk and threat of death by COVID itself. Here is some data pulled from the Vaccine Adverse Event Reporting System (VAERS) by the CDC. This information is from January to October 2021. Incidences Reported: 611,414 COVID Vaccine Incidences: 593,256 (97% of all incidences reported) Pfizer Vaccine Incidences: 253,731 (43% of all COVID incidences) Moderna Vaccine Incidences: 282,068 (48% of all COVID incidences) Janssen (or J&J) Vaccine Incidences: 55,188 (9% of all COVID incidences) Deaths Reported as Symptoms: 5,197 (1 out of every 114 incidences) Although death is a very grave and impactful symptom of taking a vaccine, looking through the reports and data, there are many more severe symptoms that should not be taken lightly. Anecdotally, we personally know of a friend who's teenage son, took the Pfizer vaccine. Each shot he developed severe pain in his legs. On the last shot it immobilized him for 2 weeks. The parents were frantic on how to remedy the symptom and the effect. Fortunately, they were able to do so. However, there are some children where the situation was not so fortuitous. Finally, please indulge us with an analogy to present our last point. Once there were two individuals that were given a wager. Each was to drive up a winding road, as close to the edge of the cliff without driving off. The first drove up the road giving as much space between the car and the edge. The second, rode the edge of the cliff and unfortunately drove too close and fell into the deep chasm. There is a fine line between public safety and dictatorial rule. Around that line is a plethora of loose rocks and dirt. Decisions like the one the board is about to make either draws us closer to the edge of tyranny or steers us back on the road of freedom. We, as parents and as members of this community, would rather stay as far away from the cliff as possible. We implore you to consider all the ramifications of this decision. We plead that you give parents the freedom to make the best choice for their children and avoid an unnecessary and burdensome requirement that will not produce a safer school environment than the one prior to the pandemic. Respectfully, ardent citizens, Price & Angelique Paramore

1/6/2022 8:15 AM

This continues to be an intrusion into the parents right to choose what is right to put into their child's body. I am a fully vaccinated grandparent of a grandchild this mandate affects so therefore am not against vaccinations but am against forced vaccinations, especially for children. If this becomes a mandate, I would recommend they remove my grandchild from public education into private or homeschool education.

1/6/2022 8:09 AM

This virus is no more deadly than the flu or common cold and we don't require vaccines for those illnesses or require masks. The fear of this virus is out of control and ridiculous. My children are vaccinated but I still believe vaccines should be optional for each family. It's a personal decision and the government has no business mandating the vaccine. They should do their job and govern not mandate.

1/6/2022 7:16 AM

At this point, all of my children have been vaccinated, but I would like families to have the right to decide what is best for them.

1/6/2022 7:14 AM

You can not control a virus and you can't control the citizens. Force in any situation is never productive. The citizens can use good judgment for themselves.

1/6/2022 6:49 AM

Mandates are a infringement of our medical freewill. I did not serve to fight tyranny just to come home to find more here.

1/6/2022 6:30 AM

The vaccination process of our youth is a misguided attempt at total revocation of our medical free will. As a parent this is absolutely the hill I will die on.

1/6/2022 6:27 AM

Our children are not experiments. Let parents make decisions and stop your overreach. I know what is best for my child.

1/6/2022 6:27 AM

If a vaccine mandate is put in place then a mask mandate is no longer needed in the schools.

1/6/2022 6:02 AM

Stop controlling people

1/6/2022 5:19 AM

No

1/6/2022 5:19 AM

Keep masking mandates going until the numbers are consistently down for an extended period of time. Vaccination should be a requirement for all.

1/6/2022 12:08 AM

Reason No. 1 86% of Children suffered an Adverse Reaction to the Pfizer Covid-19 Vaccine in the Clinical Trial Reason No. 2 1 in 9 Children suffered a Severe Adverse Reaction leaving them unable to perform daily activities in the Pfizer Clinical Trial Reason No. 3 Just 9 deaths associated with

Covid-19 have occurred in Children since March 2020 Reason No. 4 The risk of Children developing serious illness due to Covid-19 is extremely low Reason No. 5 The Pfizer Covid-19 Vaccine is experimental and still in Clinical Trials Reason No. 6 Three Scientific Studies conducted by the UK Government, Oxford University, & CDC, which were published in August have found the Covid-19 Vaccines do not work Reason No. 7 Public Health England Data shows the majority of Covid-19 Deaths are among the Vaccinated and suggests that the Vaccines worsen disease Reason No. 8 There have been at least 1.18 million Adverse Reactions to the Covid-19 Vaccines in the UK alone Reason No. 9 There have been more deaths in 8 months due to the Covid-19 Vaccines than there have been due to all other available Vaccines since the year 2001 Reason No. 10 The risk of Myocarditis (Heart Inflammation) in Children due to the Pfizer Vaccine Reason No. 11 Children have died and are dying due to the Covid-19 Vaccines Reason No. 13 The Joint Committee on Vaccination & Immunisation have refused to recommend the Pfizer Vaccine be offered to Children

1/5/2022 10:51 PM

The vaccine is still not APPROVED by the FDA in children under 16. Mandate is also not absolute law. That word is thrown around like it's law. I am not against vaccines, but to require a vaccine that is still under the EUA is unacceptable. Clearly our amazing scientists need more data and time to truly try and eradicate this virus and its variants by means of a vaccine. Unfortunately, a good measure of study in children is a minimum of 5-10 years. I don't currently see the value of this "rush" for young children, as many of my Kindergarten students have received the vaccine and have tested positive for Covid. Yes—I'm aware we can all still get Covid if vaxxed, but especially in young children the so called reward is not worth the risk. Thank you for providing this forum to share! Mead School District is BEST!

1/5/2022 10:21 PM

If the mandate passes for my 3 soon to be 4 children in mead school district all 4 of them will be pulled from the school district and homeschooled. The tyranny has gone way to far. CDC, FDA etc has no right to tell us what we have to do with our bodies or our children's bodies. Doctors don't even have the right to do so, all they are allowed to do by law is give us choices that we decide what to do with the information given.

1/5/2022 10:14 PM

Children are not and have not been at risk for severe Covid effects. If older population want protection, and the vaccine works, then they can get it and feel safe. This is absolute derelict control and unconstitutional.

1/5/2022 9:27 PM

A forced mandate is against our constitutional rights. Children should NOT be allowed to be a part of this experimental vaccine. Children represent no danger to the parents or grandparents it's actually the opposite. Children's immunity after getting Covid is critical to save your family if not the world from this disease.

1/5/2022 9:25 PM

No

1/5/2022 9:11 PM

The Covid vaccine has been listed by the VAERS as the second highest in terms of adverse reactions, second only to Shingrix. Mandating something with such serious side effects is a complete departure from anything resembling bio ethics or our constitution. We will not be giving our children an mRNA vaccine ever.

1/5/2022 8:51 PM

Vaccinations that are boosters have always been optional and should remain that way. This should be at the student and parents discretion.

1/5/2022 8:37 PM

Be like other school districts and states and do not allow the mandates.

1/5/2022 8:30 PM

Teach correct principals, and let them govern themselves. Educate as much as possible, as much as you want, then allow the citizens to choose. Coercion is never the answer. Forcing people against their will is not appropriate or acceptable.

1/5/2022 8:30 PM

No

1/5/2022 8:25 PM

When studies show that vaccines work then I will have no problem getting my children vaccinated.

1/5/2022 8:21 PM

I think Mead has done an excellent job at minimizing transmission/exposure in our schools and I don't see any reason to vaccinate children. Especially based on how well it has gone so far. I have three kids in two schools and have not had any of them experience direct exposure at school in the last two years.

1/5/2022 8:09 PM

These mandates are not okay and not supported by science. Children aren't at great risk and these mandates must end. There are great concerns with these vaccines and so many things that we still do not know about their affects

1/5/2022 8:05 PM

None

1/5/2022 8:04 PM

I trust the department of health to make good decisions for our community.

1/5/2022 8:03 PM

Someone needs to look at the statistics of children getting covid vs the risk factors of the covid vaccine. We do not even know the long term effects of what the covid vaccine will do to these children. Why would we inject them with something that they have a survival rate of 99.9% of surviving if they get covid. I really hope Washington state does not mandate this. They will lose lots of public school funding and lots of Washington state residents

1/5/2022 8:02 PM

follow the science you are completely out of line this is suppose to be a free country

1/5/2022 7:55 PM

They need to stop all mandates they need to have teachers educate and allow parents to be parents

1/5/2022 7:43 PM

Na

1/5/2022 7:37 PM

School budgets will tank as they should will crazy mandates such as these

1/5/2022 7:28 PM

This has gone to far, with some states outlawing federal vaccinations, this has gotten to political. Not to mention all the athletes dropping on the courts. Plus Children have 99.995 survival rate from covid. DON'T JAB OUR CHILDREN!!!!

1/5/2022 7:26 PM

I. Do not feel that this vaccine has been tested enough and believe that we won't really know the possible problems it might cause for years. I don't believe the vaccine should be forced.

1/5/2022 7:21 PM

Don't mess with our kids

1/5/2022 7:10 PM

it should be a personal choice

1/5/2022 7:09 PM

I refuse to vaccinate my kids. I will pull them if this becomes mandatory

1/5/2022 7:08 PM

These experimental vaccines should not be mandated by anyone, much less children with such a high survival rate of Covid. It is clearly plain to see that the vaccine is not working. Run Covid thru it's course, and let's move on.

1/5/2022 7:07 PM

This is bullshit. If you get the shot or not you can get it. Plus I'm not putting anything in my child body that we don't know nothing about. I will not make my child a Ginny pig.

1/5/2022 7:03 PM

Vaccine Mandates are illegal, unconstitutional, and a crime against our children. Covid is 0% death rate in children. These vaccines will kill and injure for life many many children and it will be by the hands of You! Do your job and protect our children's God given and constitution rights!

1/5/2022 6:09 PM

This proposal is reckless. This proposal is asking us to vaccinate our children with a vaccine that 1. Has NOT been approved by the FDA. The only one to receive full approval was Pfizer -BioNtech...commercially known as Comirnaty. This drug has not been used in the United States and Pfizer has stated they have know intention of distributing it in the US anytime soon. 2. How many boosters would be involved here? The goal post keeps moving and frankly this is too important to leave it up to people who appear not know what the neck they are doing every step of the way. I will pay for private instruction or school.

1/5/2022 6:08 PM

There is no scientific evidence showing that children are at any kind of risk to covid. There is also no evidence showing the vaccine is successful in stopping the transmission of covid. At best it can be SUGGESTED that the vaccine is helping people be prepared with antibodies to LESSEN the severity but in no means is preventing the virus. Death numbers would not be as high in my opinion if people had been treated properly to begin with & not put back into retirement and assisted living

homes, wiping out dozens of people at a time. Its proven that 70+ year olds have the most to worry about with over 90% of the deaths coming from that age bracket. I believe there is more harm coming from a pushed & untested vaccine than there is from the covid virus at this time. Thank you.

1/5/2022 5:00 PM

I think the time has been reached where the people who want to get the vaccine have done so. I feel that it doesn't work so why do we need to expose our children to a vaccine with unknown side effects. Also, children are not affected like mature adults with health problems.

1/5/2022 4:54 PM

I strongly disagree with this mandate for our children. Covid 19 poses little to no risk to children. The risks involved that come with getting the vaccine are far greater than allowing natural immunity to take its place, especially in children. This vaccine is still in a trial period, how can we force our children to be guinea pigs for a virus that doesn't even pose risk to them? The VAERS data shows very high injury and death rates from the Covid vaccine (20,000+ deaths and over 1 million injuries), I would implore you to take a look at this data for yourselves. How can the powers that be, force a vaccine on our children when there is obvious risk in getting the vaccine? Can you or anyone tell me with 100% guarantee that my child will not suffer an injury or die from this vaccine?? Who is going to be held accountable for these injuries, is it going to be the school districts or the DOH?? No, there is no accountability in this tyranny. The pharmaceutical companies and government entities making these mandates have all the power but none of the responsibility. Where there is risk there needs to be choice. We cannot continue to let power and money dictate our state of health, our jobs, our liberties, our freedom to make informed decisions for ourselves. Since when is it ethical to force injury or death on anyone??? Why are we continuing to force a vaccine that has proven to not be effective? Those who are vaccinated can still carry and transmit the virus, they can still get sick, they can still need hospitalization, they can still die. The safest route for our children, is to teach proper nutrition, exercise, proper hygiene, to teach awareness of symptoms and keeping sick children home.

1/5/2022 4:46 PM

This is an experiment that you will not do on my child. I will withdraw all 5 kids.

1/5/2022 4:10 PM

Vaccines are not proven to protect children any more than natural immunity.

1/5/2022 3:59 PM

Over reach by our government with false numbers . Control of the people. We want our freedom to choose, Not Insley , Biden , Pelosi Fauci making decisions for the people ...NO no no !!!!

1/5/2022 3:37 PM

If a vaccine is required, and an exemption is not available, we will need a virtual education option for our child.

1/5/2022 3:35 PM

We want zero vaccine and mask mandates for kids. Science and omicon shows mask dont stop spread. Natural immunity.

1/5/2022 3:31 PM

I think vaccination is one of the most impactful tools we can use to protect our children and our communities. Mandatory vaccination is not a new concept, it has been effective for many other diseases, such as polio and measles. This is no different.

1/5/2022 3:31 PM

I don't agree with the mandatory vaccine for covid. It is unsafe to give our children.

1/5/2022 3:23 PM

This is totally ridiculous

1/5/2022 3:23 PM

We support people who choose to vaccinate and choose not to vaccinate. We feel so strongly that the vaccine is not right for our family at this time, that we will pull our kids from the Mead school district, any school, or state mandating the Covid vaccine. It's understood that the vaccine doesn't prevent transmission or infection, and it comes with inherent risks. The population you are considering mandating is the least at risk for Covid complications of any age group. We have had Covid, trust our natural immunity, and feel it is more risky to vaccinate than catch another Covid variant.

1/5/2022 3:21 PM

I don't agree with mandating vaccinations for ANYONE.

1/5/2022 3:20 PM

I support COVID vaccinations as well as masking to ensure the health and safety of students, staff and families.

1/5/2022 3:13 PM

Please tell Spokane parents to turn off Fox news. It's literally killing people.

1/5/2022 3:02 PM

The vaccines have not proven to be effective from preventing COVID. This is an absolute violation of our liberties and our constitutional rights. I cannot permit taking or having my children take a vaccine that our government states that they will not release the data on for 55 years.

1/5/2022 2:58 PM

No. But, I'd like to share a comment with the Mead School Board. The board comes across as very anti-vaccine these days. It's disheartening.

1/5/2022 2:54 PM

It should be a choice. The district will lose credibility and a lot of students if this takes place.

1/5/2022 2:42 PM

I will be sure to get legal representation to repeal any levy and tax credits to no longer be allocated based on segregation practices and infringements of personal health rights, and breaches of HIPPA laws.

1/5/2022 2:39 PM

Keep seeking to do what's best for the kids!

1/5/2022 2:17 PM

I strongly agree with vaccine mandate

1/5/2022 2:14 PM

This is a new vaccine we are still learning about. Children have an extremely low risk of becoming very sick. They also seem to spread it less. The vaccine does not prevent the spread only possibly the seriousness. Why would we use our children as guinea pigs as we are learning about this vaccine or should I say shot. Up until recent a vaccine meant it prevented the disease. I am shocked we are considering giving it to children and especially young males who have additional harmful risks with receiving the vaccine.

1/5/2022 2:01 PM

Please follow CDC guidelines and not any unscientific politics.

1/5/2022 1:54 PM

Child covid vaccination is still under emergency use and SHOULD NOT be used on our children as an experiment! Their immunity is better than the covid vaccine, statistics have shown! Also, we have been open in our Washington school district in person starting September 2021 with no problems!

1/5/2022 1:47 PM

I feel highly uncomfortable with my child attending school with unvaccinated children, even if they do so through an exemption process.

1/5/2022 1:44 PM

This vaccine is experimental! To mandate that children, who are not at risk of COVID, to participate in a dangerous vaccine experiment is insane. To withhold the child's education because their parents refuse to allow their children to participate in this experiment is criminal!

1/5/2022 1:39 PM

This is not an approved vaccine, it is still under a EAU protocol, and it is illegal to suggest or coerce anyone to get a vaccine. It is a gross overstep of boundaries by the government and cannot be considered.

1/5/2022 1:30 PM

Forcing parents to give their child a vaccine that has been used less than 2 years is ludicrous. Our children are growing and we have no idea what these vaccines will do to their bodies in the long run. I already have a vaccine damaged child and am against anyone mandating that I make her vaccinate in order to attend a public school that I pay for with taxes and my military husband fights for the freedoms we thought we had to choose these things for our families.

1/5/2022 1:26 PM

I do not feel this should become a mandate for children to be in school. It is a personal decision and should remain that way. Do not take away our freedoms.

1/5/2022 1:26 PM

This is absolutely ridiculous that we are considering this! I have over seen so many negative reactions to the vaccine. If they want people to buy into this then there needs to be someone responsible for our children's negative reactions!

1/5/2022 1:20 PM

I expect the school district to stand up against WA state government mandates regarding vaccines and masks. The SD needs to do it's part to protect our children from the illegal overreach of the

state. Mandates are illegal for EAU vaccines. Should be by parental choice alone. By not standing against the these mandates the SD is complicit with this illegal action

1/5/2022 1:17 PM

No vaccines and no mask mandates for K-12 students. Will not comply. Will leave the district

1/5/2022 1:08 PM

This shot is not a true vaccine and should never be given!!!!

1/5/2022 1:03 PM

The only reason I would go along with the mandate is because I planned to vaccinate my children anyway. I do NOT believe in being forced into it.

1/5/2022 1:03 PM

With all do respect, mandating vaccinations for school children is insanity. All credible, yes credible research shows that schools are the SAFEST place for children. These mandates are tantamount to child abuse if not worse. There are no long term studies that show that these vaccines are even safe for the children in the long run. Curious to know if any of you have even heard of the studies done on school children in Sweden, where they NEVER had them wear masks and never stopped in-person learning, and there were absolutely NO records of children giving COVID to a teacher. That was in 2020 when Covid first came out when there were no vaccines and they are thriving to this day. Do some research yourselves and find that out. Now concerning this Omicron variant, it is well known in the scientific community that it is highly contagious, but symptoms are mild at best. It was found in South Africa in November, and for the most part is gone, same in UK where Omicron cases are plummeting to a non-threatening level. In fact a leading epidemiological US researcher is quoted as saying that are maybe 10, yes I said 10 deaths from Omicron in the country. That was the last week in December. Those unfortunate people had serious co-morbidities, obesity, cancer, etc. Omicron cases might be up, but hospitalizations and deaths are significantly down. To mandate vaccines for a condition that is basically a common cold for 99.5% of people, obviously minus the immune-compromised, is nothing short of abuse and neglect. Now if you take into consideration that young people are the LEAST affected by COVID to begin with, you are playing with these children's lives. You state that you are trying to keep everyone safe, well teachers unions obviously care more about politics than our children's safety. They have received billions of tax-payer dollars, to only say now that they might go back to online learning because of Omicron. That is against all CREDIBLE research regarding this Covid, especially the Omicron variant. Also, you completely disregard the natural immunity people get by beating Covid and having anti-bodies. Which, again, until now has been AGAINST every epidemiological standard to get a vaccination for something you already have anti-bodies. In fact scientists now know that if you get the Omicron variant and beat it, which everyone basically does, that your immunity for all Covid is incredibly high. I'm sorry but facts and credible scientific evidence does not care about your feelings. It is also now well known, that vaccinated people can get Covid and spread Covid just as much as un-vaccinated people. Another thing, it has been well documented the detrimental affects of this vaccination in young people. From heart related issues in young men, to possible infertility issues in young women. If you happen to be unaware of the detrimental affects of the Covid vaccine, look up the Government sponsored website VAERS, and read about them. It might open your eyes if you actually care about our children. So I ask you, do you really care about our children when you force, not by law, but by mandate, our children to wear masks, and get forced vaccines? Have you ever heard of the Nuremberg Accords? It is international law that people cannot be forced to get anything put in to their bodies that they do not want. By mandating vaccinations for children, you ARE forcing them to get vaccinated if they

want any sort of a normal life with their friends and school. Now please don't misunderstand me, I am not an anti-vaccer, I have been properly vaccinated as most everyone else has for MMR, Chicken Pox, Small Pox, etc and so have my wife children, but for the reasons I discussed, and the fact that my wife, myself, and both my daughters have had Covid and beat it, none of us, especially my daughters should have to get the vaccination to lead a normal life. I guess the severe rise in teenage suicide because of seclusion and depression because of bureaucratic opinion, not science, has no affect in your decision making whatsoever. So if it is a decision between getting vaccinated or going to school, my children will opt for the exemption. But you are forcing millions of parents to make life-altering choices for their children, that could actually be life-threatening in some cases. Can a parent afford not to send their kids to school, so you are handcuffing them in forcing the vaccine on their children. You always say, "Follow the science", well for the above mentioned reasons, you are obviously following the bureaucratic opinion and the MSM fear mongering and not following the science.

1/5/2022 1:02 PM

Will naturally immunity count instead of being vaccinated? The vaccines are not working so why are we continuing to push them?

1/5/2022 1:01 PM

This is an unscientific and immoral mandate. We will not comply. We will withdraw from the Mead School district. We will organize with other parents. Children are not susceptible to the covid-19 viruses. The number of hospitalizations and deaths, not to mention even symptomatic cases, are incredibly, undeniably low. Teachers have the opportunity to be protected via the vaccines. VACCINATION DOES NOT PREVENT TRANSMISSION. With the onset of Omicron, which experts suggest is likely to become the dominant variant. Omicron is a very low impact variant, even among the unvaxxed. We are not anti-vaxxers. Most people who feel the way we are not. We as parents are vaxxed. THERE IS SIMPLY NO REASON TO VAX CHILDREN OR THE YOUNG. THE THREAT TO THEM IS EXTREMELY LOW AND VACCINE DOES NOT PREVENT TRANSMISSION. EXPLAIN TO ME WHY. Why should I inject my small child with a drug she DOES NOT NEED, when there is no way to tell the long term impact, especially as it does NOT PREVENT TRANSMISSION.

1/5/2022 12:59 PM

Mandating vaccines for anyone is unconstitutional and against the Nuremberg code. Anyone who tries to enforce these unlawful mandates will be subject to trial and punishment by the Nuremberg code including school board members and teachers. Be careful what you mandate. Be careful who you harm. Justice will prevail.

1/5/2022 12:54 PM

Yes, if the vaccine is mandated with no REALISTIC option for an exemption other than religious or medical reason, my child will be pulled so quick from any and every school/school district mandating. If it's the state of Washington, looks like we are home schooling. This is a disservice to children

1/5/2022 12:49 PM

I will take my tax money else wear for his education.

1/5/2022 12:37 PM

As an RN who is vaccinated for covid, I think this is a potentially harmful mandate. Everyone knows children are at significantly lower risk from covid than adults, and this is a very new vaccine. Forcing

parents to vaccinate children for covid may reduce vaccine compliance overall, creates distrust and bad feelings, and is likely to result on lawsuits. There's very little benefit and a lot of detriment.

1/5/2022 12:37 PM

I think the Mead School District does an amazing job on maintaining social distancing, mask wearing, hand washing and quarantine restrictions. I do not support a mandate in vaccinating our children against Covid.

1/5/2022 12:34 PM

No

1/5/2022 12:25 PM

Mandating a vaccine for a disease that has statistically zero risk for healthy children is abhorrent. The very real risk of severe vaccine side effects - including myocarditis in young boys - makes a mandate an unethical, immoral and anti-science overreach.

1/5/2022 12:06 PM

Please grow some courage and push back. Stop just doing as they say. You work for the students and their families NOT the state. Remember who your clients are. We parents are tired of this Covid nonsense.

1/5/2022 11:53 AM

The State Board of Health's Disease Burden Criteria states the vaccine must prevent disease and reduce transmission. The COVID vaccine does not prevent COVID or transmission of COVID. Per the SBOH's own criteria, this vaccine should not be mandatory for schools. Furthermore, due to the novelty of this vaccine, there is no reasonable evidence to disprove long term side effects.

1/5/2022 11:49 AM

Please listen to Dr Peter McCullough and Dr Robert Malone who are both experts in this field and both strongly oppose vaccinating children. It is not scientifically proven to be safe for our children despite what the CDC says.

1/5/2022 11:43 AM

I can't believe we are even discussing this. Why on earth would we vaccinate our children for a virus that poses virtually zero threat to them. Lets not forget that vaccinated people get and pass this virus. This is nobody's decision but the parents. We should be discussing less covid restrictions in schools not more. Worry about the curriculum and not my Childs medical history.

1/5/2022 11:27 AM

Mandating the covid vaccines for children of this age is absurd. Children do not have severe reactions to Covid - look at your local health district data! To force children to be vaccinated with this particular vaccine when we can't possibly know it's long term side affects is unbelievably irresponsible.

1/5/2022 11:27 AM

No person should be forced to put something in their body that they are not comfortable with. If someone personally decides they don't want the COVID vaccine they shouldn't have to worry about losing their job, their kids not being able to go to school etc. This is wrong and unlawful and government representatives should be ashamed of what they are trying to do.

1/5/2022 11:01 AM

CDC data is showing kids are at extremely low rates of hospitalization/death for COVID, so we do not see that the numbers are showing enough concern that a government agency should be pushing a vaccine mandate that has not been studied enough at this point, especially as other precautions are also being required in the schools already.

1/5/2022 10:55 AM

My child = my choice. Your child = your choice.

1/5/2022 10:46 AM

I am a parent of 2 elementary age students ( 7 &9), one of which has an immune disorder. I am in support of vaccines....I've been vaccinated as well as received the booster. I have concerns over my medically compromised student and mandating a vaccine as I feel it would cause more harm/not benefit him at this time. I would seek an exemption. As for my other student if mandated we would comply in order for her to attend school.

1/5/2022 10:43 AM

If this "vaccine" actually prevented covid I could see requiring it. So far it hasn't proved enough for our family of 6 to be vaccinated.

1/5/2022 10:41 AM

Stop unlawful mandates! We need freedom back in America!! There's an elite group running the Pres and trying to make US be socialist then communist!!

1/5/2022 10:35 AM

I do believe in vaccines that have a history of working. I do not believe in mandates that are ineffective.

1/5/2022 10:35 AM

Dear Mead School District Board of Directors, I appreciate the opportunity given to share my thoughts regarding a potential COVID-19 vaccine mandate for K-12 children in the Mead School District. As a hospital physician and parent of two K-12 boys in the Mead School District I believe we must be sure that what we mandate for our children will benefit them in the long run AND above all cause them no harm. Currently the risk of death from COVID-19 in K-12 is less than 1 in 1 million nationwide. If we compare this to influenza deaths in 2020 there were 139 deaths in 56 million K-12 children nationwide or 2.5 per 1 million. There is currently no mandate to vaccinate against influenza in K-12 children in Washington State. In fact, only 2 states nationwide mandate influenza vaccines for K-12 children. The influenza vaccine has been thoroughly studied over many years and even without a mandate has been widely used because of its safety record verified outside the pharmaceutical industry (including in my two sons). The side-effect profile of the m-RNA vaccines in K-12 children has recently been studied in 4.5 million children in the U.S. BUT only by the drug company that makes it. It is felt to be safe but there are 2 reported deaths in 2 young girls and 15 cases of myocarditis in older boys. At this point it is still unclear that the benefit significantly outweighs the risk involved to mandate a COVID-19 vaccine in our children. Some may argue that it will reduce deaths in adults by vaccinating children but I ask since when do we trade one vaccine related death in a child for saving 1 death in 100 adults. My wife and I care for my 82 year-old mother in our home and her safety is important to us. She would not trade this however for even 1 child vaccine related death. At this time I would advise against a COVID-19 vaccine mandate in K-12 children until further safety data can be obtained outside of the pharmaceuticals industry. I would encourage further studies be performed in this age group funded by the U.S. government

outside the pharmaceutical industry and if the safety data is independently verified and expanded upon then a mandate could be revisited. Again, I appreciate the Mead School District soliciting the input of the parents regarding this critical issue. Sincerely, William F. Reed, MD

1/5/2022 10:23 AM

This is a ridiculous request for something less deadly than the flu. Our family has already had Covid and we do not feel that a vaccine is necessary. While we are not anti vaccine- we are anti covid vaccine. It is too new and not 100 percent effective or even long lasting. There are too many unknown factors for us to feel comfortable injecting our children with this vaccine. Many families will suffer if their children can't attend school because of this. Thank you

1/5/2022 10:21 AM

According to the CDC and the American Academy of Pediatrics, vaccines are recommendations. To vaccinate oneself, or one's child, is a medical decision. A medical decision made within the doctor-patient relationship. For the government to mandate any vaccine means they are eliminating this time-honored relationship. That is wrong. Wrong for the federal government. Wrong for the State of Washington. And wrong for the Mead School District.

1/5/2022 10:15 AM

I don't think that vaccines should be required for kids just yet. There are many parents with strong feelings on this subject and it's not fair to put them in a position where they have to choose between their children's safety and good schooling. There is much that is still unknown about this vaccine's effect on children, we have already seen some negative side effects. Yet we do know that covid does not seem to have very severe symptoms in children and we have seen great success in preventing transmission in schools. The risks of requiring children to be vaccinated outweigh the benefits at this point. Some have argued that vaccinating kids is to prevent transmission to adults. But those adults are significantly protected if they are vaccinated. So in essence, we are asking our kids to take the hit for the adults who refuse vaccination. That is not right.

1/5/2022 10:07 AM

The COVID-19 "vaccine" does not qualify for Chapter 246-105 WAC for two reasons. 1. The CDC had to change the definition of "vaccine" in order to give this product that designation. 2. The title of Chapter 246-105 WAC is Immunization of Child Care and School Children Against Vaccine-Preventable Diseases. The COVID-19 "vaccine" does NOT PREVENT COVID-19.

1/5/2022 9:50 AM

This would be incredibly reckless of Washington state health department to require this untested and unnecessary shot. The science does not support this for children at all and I will never vaccinate my child. He has already had Covid and was 100 percent fine. I will move to alternate schooling if the Wa State tries to do this. California has not had very good success with this

1/5/2022 9:48 AM

Please do not endorse a mandate if one is put in place. It is not fda approved, there is no booster schedule finalized, it is not preventing transmission, the virus impacts kids mildly. Let parents be in charge of their children's healthcare. It is time to start standing up to the overreach. Numbers are surging in highly vaccinated areas. It's not working and is ridiculous to force at this stage. I'm not anti vaccine but there needs to be a lot more work done in this area before I give it to my kids.

1/5/2022 9:44 AM

I am not opposed to my child be vaccinated. My only hesitation or concern, is the limited studies/research of the safety or affects on children. I don't want mandated vaccines on children to be rushed, what so ever. I am in favor of the vaccine being added as a requirement, if necessary, but would prefer that it is required in a time frame where more information/research is made available on the safety, efficacy, and effects on children.

1/5/2022 9:39 AM

Stay in your lane Inslee. Leave parenting to parents. Medical advice to doctors. And medical freedom for all Americans. Remember the constitution. And if I am forced to withdrawal my kids from public school, my property tax should go down...

1/5/2022 9:25 AM

I am not for a mandate for a sickness there has little to not serious out comes for children. If I do not have ability to exempt my child we will sadly have to up root our family and move.

1/5/2022 9:24 AM

Vaccinated people get covid. An entire navy ship who was vaccinated came down with covid. I will not allow an experimental vaccine for my child who has severe allergies.

1/5/2022 9:17 AM

Thank you for taking this step to further protect our community.

1/5/2022 9:06 AM

The vaccines aren't preventing anyone from getting Covid. It may help lessen the symptoms but doesn't prevent the spread of the virus! This has become a ridiculous political issue. We are not a communist country which is what the democratic government is trying to accomplish. It's all about power and control.

1/5/2022 9:04 AM

This is absolutely insane and 100% illegal. There will be issues if this gets put into place. No more school funding, no more community support. Hundreds of jobs will be lost. That's probably what you want, to make us all dependent on the government for help. I know of a few other countries that have tried this approach....

1/5/2022 9:01 AM

Absolutely Do Not Mandate Vaccinating our Children as a requirement to attend public schools. No one knows yet the mid or long term side effects on our kids of the vaccines that are available.

1/5/2022 8:57 AM

I will never comply with a mandatory Covid vaccine for my children, nor will my children receive any vaccine I do not feel they need. It is my job as their parent to protect them from harm. No human today can say with absolute certainty, that the Covid drug is safe without future side effects; therefore, this mandate is insane.

1/5/2022 8:49 AM

Vaccines have always been a way to keep children safe in public schools, it only makes sense to continue this practice and require a Covid vaccine to keep all students safe in school.

1/5/2022 8:35 AM

I believe that the consequence resulting from parents decision not to vaccinate their child/ren is their responsibility. If child/ren are too medically fragile to get the vaccine due to allergies/other, then there may need to be other school/home-health isolation options provided as their health is at risk anytime they leave their home or come into contact with others they are not sure have been vaccinated in or out of the school arena. They are able to isolate patients separately from one another in different wings of hospital settings with differing levels of risk. Maybe parents should have to get a Doctor's note indicating that a child is unable to get the vaccine for health reasons.

1/5/2022 8:35 AM

If it's not mandated then the school should have an option for kids who are vaccinated to keep them safe. Do the right thing.

1/5/2022 8:32 AM

The COVID-19 "vaccine" is not a vaccine as it does not prevent the spread or contraction of COVID-19. Children pose almost no risk of dying from COVID-19 and my kids already have natural immunity to it. The government/governor should not dictate what is injected into our children's bodies. That is the job of WE THE PARENTS!! Kimberly Rippy kimberlyrippy@gmail.com

1/5/2022 8:27 AM

If anyone votes for this mandate and tries to put this on our kids you are beyond saving and will need to be replaced asap.

1/5/2022 8:25 AM

Will natural immunity be talked about and will that be consider in place of a vaccine?

1/5/2022 8:14 AM

Our students have been fine going to school for a year and a half with the District's safety protocol. Continue our safety protocol.

1/5/2022 8:09 AM

Please don't do this

1/5/2022 8:00 AM

Yes this mandate is unconstitutional and against my and our countries freedom of choice. No one has the right to force a parent to do what they value and believe is wrong for their child. I will not under any mandate vaccinate my child. I will stand up and give up whatever I need to to protect my child.

1/5/2022 8:00 AM

This vaccine does not have enough time behind it to support safety in our children. This vaccine should be a choice and not mandatory.

1/5/2022 7:57 AM

How can you require children to get an emergency use mRNA injection that has NO long term studies? The mRNA injection has never been given to children before in the history of this planet and there are no long term studies. Doctors can't even answer this question because no one knows what could happen to children long term that receive the injection. It is appalling that you would even think of requiring this for children to attend to school.

1/5/2022 7:49 AM

All three current COVID injections are experimental gene therapies, not vaccines. The COVID gene modification injections permanently change human genetic material, cause infertility, cancer, birth defects, and more. VAERS through 12/24/21: 1,000,227 adverse events reported. 21,002 deaths, 110,609 hospitalizations, 109,245 urgent care, 156,456 doctor office visits, 8,673 anaphylaxis, 12,532 Bell's palsy, 22,117 3,435 miscarriages, 10,640 heart attacks, 22,117 myocarditis/pericarditis, 35,650 permanently disabled, 5,011 Thrombocytopenia/low Platelet, 23,892 life threatening, 36,492 severe allergic reaction, and 11,462 shingles. <https://openvaers.com/covid-data>. Based on these numbers, the COVID injection roll out should have been stopped a long time ago. I believe these numbers are being significantly under reported.. I've seen athletes drop dead on soccer fields in large numbers of videos I have viewed.. some reports say 300 to 400. Those athletes were coerced into receiving Covid injections in order to be allowed to participate in their sports. Covid injections are dangerous and harmful. Those persons who are complicit in coercing children and teens into receiving these covid injections are violating Nuremberg Code. Please do not allow our children and adolescents to be subjected to dangerous medical procedures.

1/5/2022 7:27 AM

My 10 and 12 year olds are fully vaccinated. However, similar to flu vaccines I support a recommendation rather than a mandate. If it becomes a requirement like other vaccines for students, then allowing for a medical exception would be reasonable. A mandate unfortunately seems to illicit a negative response in many homes and the goal is to get persons vaccinated and not create a more hostile environment between the medical community and the persons they serve.

1/5/2022 7:08 AM

Na

1/5/2022 6:54 AM

The vaccine is a shot like the flu and does not prevent contracting COVID. To mandate the vaccine for kids is ridiculous considering everyone can still contract the virus.

1/5/2022 6:38 AM

I understand parent concerns about the vaccine and understand that some children may require an exemption due to other health issues.

1/5/2022 6:27 AM

We now know the vaccines don't work, so why are we looking to require them?

1/5/2022 6:26 AM

Vaccine requirements are nothing new for public school but where does this vaccine stop? At fully vaccinated but not the booster? After the 1st booster? A 2nd booster is being done overseas...if/when the 2nd booster is needed in the USA does it stop there? Where does this stop for a requirement? Our son is vaccinated but he is not interested in the booster. Does that mean he cannot attend school? Where is the "finish" line for being vaccinated?

1/5/2022 5:52 AM

I do not co-parent with the government.

1/5/2022 5:43 AM

Please speak for us. Hear us. We all deserve a choice and for our children to attend public schools.

1/5/2022 4:03 AM

I had a reaction to the vaccine, spent a week in hospital and almost died. We should have the right to sue the governor when our kids give birth to handicapped children in future due to the vaccine.

1/5/2022 1:13 AM

It should be the parents choice to give their child this shot..... not the governor's office.

1/5/2022 12:33 AM

Easiest way to lose students & funding is with C19 vaccine mandates. My children will not continue with the Mead School District if a mandate for the C19 vaccine is issued. Home school or private school is a much better option than a district with this type of mandate. Sad to even hear this is being considered.

1/5/2022 12:24 AM

Question #4 only allowed one selection. I would have checked off two options: I would first seek an exemption from the vaccine in hopes of keeping my children in the Mead School District; If no exemption was available, I would withdraw my children from Mead Schools. For the Governor's Office and the Washington Dept. of Health, I would say please do not mandate a requirement for COVID vaccines for school attendance. After much research, I have found that the danger for children who contract the virus is so extremely low it's not even worth considering, especially compared to the harmful effects of the vaccine.

1/5/2022 12:02 AM

As we have learned through this pandemic, it is essential for kids to be in school. Mandating kids to learn from home was detrimental to the mental, social, and emotional health of students. Mandating masks at school has also negatively impacted students' physical, mental, social, and emotional health. Mandating a vaccine will result in additional concerns for students. Not only are there serious physical side effects of the vaccine, including death, but there are additional impacts...forcing students who have moral and religious reservations to get the vaccine will greatly impact students and families...social shaming, discrimination, pressures to go against their morals or lose friends, their school, and their teachers who pour into their lives. In Mead schools there is the saying that every student belongs. What about the unvaccinated? Do they belong? For many, this is not the same as getting the usual school vaccines. Tetanus for example has a 99.9% death rate, whereas Covid-19 has a 99.9% survival rate. Just like the flu shot is optional, so should the COVID-19 vaccine. As the evidence shows, the vaccine does not prevent the disease. Every day, vaccinated people are contracting COVID. Students and families should have a say in what is put into their bodies. Students should be able to attend school without compromising their moral and/or religious beliefs. They should belong...just like everyone else.

1/4/2022 11:27 PM

Covid mutates. Vaccines don't work. Boosters don't work. My observation and opinion. Vaccinated get Covid as unvaccinated. I do not want my kids to have a vaccine which was not tested for a long period of time and full spectrum of side effects it will have on the health of my children. I have 3 children with Spokane Public schools. One child in Mead middle, 2 children in Arlington Elementary school.

1/4/2022 11:21 PM

Covid vaccines are raw and don't work. Neither boosters do. Why should I risk children's health with vaccines which don't work? Virus constantly mutates and vaccines don't work for new variations of Covid. I will not risk it. Also covid is not that dangerous to kids, it is not worse than regular flu. We are not concerned about kids getting Covid infection at school.

1/4/2022 11:16 PM

The government should not be making this decision for my family or children. This should be a voluntary vaccine just like the flu vaccine is. The long term effects this may have on children is unknown and I prefer not have my child used in the experimental process of pharmaceutical companies for a virus that has been blown out of proportion. Yes the virus is real and it has had fatal outcomes but so has the flu. We have had the virus and survived, our bodies did what God intended it to do.

1/4/2022 11:11 PM

It's unconstitutional and unethical. I don't think that you should have to be mandated to inject anything into your body against your will. Plus the vaccine manufacturers aren't liable for any adverse reactions even deaths that may occur as a result of getting the vaccine. That don't sit right with me.

1/4/2022 11:04 PM

Stop the insanity and let us choose how we live

1/4/2022 11:03 PM

Dear Mead School District Board of Directors, I appreciate the opportunity given to share my thoughts regarding a potential COVID-19 vaccine mandate for K-12 children in the Mead School District. As a hospital physician and parent of two K-12 boys in the Mead School District I believe we must be sure that what we mandate for our children will benefit them in the long run AND above all cause them no harm. Currently the risk of death from COVID-19 in K-12 is less than 1 in 1 million nationwide. If we compare this to influenza deaths in 2020 there were 139 deaths in 56 million K-12 children nationwide or 2.5 per 1 million. There is currently no mandate to vaccinate against influenza in K-12 children in Washington State. In fact, only 2 states nationwide mandate influenza vaccines for K-12 children. The influenza vaccine has been thoroughly studied over many years and even without a mandate has been widely used because of its safety record verified outside the pharmaceutical industry (including in my two sons). The side-effect profile of the m-RNA vaccines in K-12 children has recently been studied in 4.5 million children in the U.S. BUT only by the drug company that makes it. It is felt to be safe but there are 2 reported deaths in 2 young girls and 15 cases of myocarditis in older boys. At this point it is still unclear that the benefit significantly outweighs the risk involved to mandate a COVID-19 vaccine in our children. Some may argue that it will reduce deaths in adults by vaccinating children but I ask since when do we trade one vaccine related death in a child for saving 1 death in 100 adults. My wife and I care for my 82 year-old mother in our home and her safety is important to us. She would not trade this however for even 1 child vaccine related death. At this time I would advise against a COVID-19 vaccine mandate in K-12 children until further safety data can be obtained outside of the pharmaceuticals industry. I would encourage further studies be performed in this age group funded by the U.S. government outside the pharmaceutical industry and if the safety data is independently verified and expanded upon then a mandate could be revisited. Again, I appreciate the Mead School District soliciting the input of the parents regarding this critical issue. Sincerely, William F. Reed, MD

1/4/2022 11:03 PM

Please don't force parents to vaccinate children against Covid 19. It is not a childhood disease like others vaccinated against. If it happens I foresee many more families will resort to homeschooling. This will have rippling effects on our community. Please make these mandates stop.... it's making me grumpy!

1/4/2022 11:00 PM

To even consider this mandate for our children to attend public school is utterly ridiculous. A fight worth fighting if there ever was one!

1/4/2022 10:57 PM

No

1/4/2022 10:56 PM

Get ready to lose 1/3 or more of your district attendance.

1/4/2022 10:55 PM

It should be the choice of each family! It should be encouraged but not forced!!

1/4/2022 10:51 PM

Covid vaccine can't be a mandate in public schools or any schools period. We still do not have the data proving this vaccine is safe for adults and children.

1/4/2022 10:29 PM

Leave choice to their parents, this isn't a communist country.

1/4/2022 10:28 PM

As a liberal parent who has been vaccinated I cannot ignore evidence evolving currently regarding the safety of the Covid vaccine in children and its long term health impacts on the immune, reproductive and vital organ health of our children. until the 5 year testing of the vaccine has occurred I will not feel comfortable giving it to my children.

1/4/2022 10:27 PM

I'm a democrat and I will considering switching parties if such a mandate is instituted.

1/4/2022 10:26 PM

I do not believe my children should not be able to get a proper education because of a vaccine that has not been around long enough to see long term effects as well as some of my children cannot take it due to medical reasons as well as one of my childrens Fathers will not allow the vaccine even if I was to be ok with it. So i dont see why the children should not get a proper education because of a decision I have made to keep them safe.

1/4/2022 10:17 PM

I in no way support this mandate.

1/4/2022 10:16 PM

My child will not be an experiment with the covid vaccine. I personally know more vaccinated people that have gotten covid then non, I am pro vaccine but not this. If I had 3 polio vaccines in a year and still got polio I would have some questions. If a covid shot becomes required for school, my kiddo will be home schooled. Sad, because I love mead school district and all its employees

1/4/2022 10:11 PM

We need mandates. This vaccine is no different than the other required vaccines for school- except it is actually more needed due to the urgent need to control the virus.

1/4/2022 10:10 PM

We are a country based on freedom to choose. My kids should not be forced to get a vaccine.

1/4/2022 10:01 PM

Please mandate the vaccine!!! Our kids need to be in person for better learning and socialization. Clearly the pandemic is not slowing and there is no ending in sight. Our kids need to be vaccinated to protect each other!

1/4/2022 9:56 PM

Please stop issuing one size fits all mandates and put the parents and local leaders in charge of our families again. Many Washington citizens, entities and leaders are tired of mandatory divisive tactics such as excessive testing, mask wearing and vaccines. These tactics and more would better suit our diverse population being voluntary actions. We can look at other states and see they are doing just fine. We cannot control this virus like we think we can as shown by many diverse topics ranging from mandates to natural immunity and beyond. No one state or federal leader has it right or the right to issue mandates on experiments, therefore many of these topics need to rest in the hands of the people, what America was founded on.

1/4/2022 9:53 PM

Our children's health and safety should always be the number one priority. Not politics and not angry parents.

1/4/2022 9:49 PM

There is NO medical or scientific reason to mandate this experimental injection to be forced on children, or anyone else for that matter. It violates the Nuremberg Code and the Constitution of the United States. The statewide exodus of 55,000 students from the public school system that has already occurred will only worsen if the state and school districts push ahead with this unlawful and ill-advised mandate.

1/4/2022 9:42 PM

Simply put, this is a vaccine with no data provided to the public. It is being forced and that is not going to end well. It violates basic human rights, the constitution, and body autonomy. When you look at the real data, children are not at risk. There is no reason to force a vaccine on children. I will keep my children home as I have done and will continue to do if this madness doesn't end. Never in my life have I seen public and government sectors so interested in the health of each individual. This is clearly a money making issue and it's sickening. We have research and data that actually doesn't support the mandate. For some reason common sense and research are not part of the decision making process and that includes any decisions made by authority on this pandemic. I strongly oppose this vaccine being mandated.

1/4/2022 9:39 PM

We as parents have the right to decide which vaccines our children receive and should not have to choose between a vaccine or their education.

1/4/2022 9:37 PM

This is still in the experimental stage. Please be careful!

1/4/2022 9:35 PM

Experimental vaccine mandates are illegal.

1/4/2022 9:23 PM

I will not get the vaccine nor will I ever make my children get it. I don't even get the flu shot why would I ever get this vaccine.

1/4/2022 9:14 PM

We should vaccinate all the students.

1/4/2022 9:08 PM

It should be up to the the family's of our district to make that Decision whether or not to get vaccinated. It is not up to the governor of our state to mandate this to our children.

1/4/2022 9:01 PM

This is a health decision and should NOT be mandated or ordered by the government.

1/4/2022 9:00 PM

Vaccine's shouldn't be a mandate it should be a parents choice. Our child aren't science experiments. until they release the studies on covid 19 vaccines I don't believe children should be mandated to get the vaccine.

1/4/2022 8:59 PM

Covid isn't deadly to children, there should be no forced vaccinations. The FDA approved vaccine "Cominarty" isn't available here yet- they're still vaccinating people with leftover emergency use vaccines.

1/4/2022 8:59 PM

If a mandate is put in place for my child to attend public school, I am prepared and fully willing to move forward with legal action against the governors office and this school!!!

1/4/2022 8:47 PM

This should be an individuals choice, not a mandate. Not being vaccinated may increase the odds of contracting, but that is a calculated risk of the individual. Those who choose to be vaccinated have minimized to a very large degree their odds of contracting. Omicron has an extremely low mortality rate. Our kids are entitled to an education in person. IF they get Covid it is our problem to deal with as a family. Please allow us to choose and stay committed to in-person school. The risks of uneducated kids because we don't put them in the classroom over an extended period of time is far greater than missing 5 days of school because they got sick. Please make decisions based on the long term consequences, not on the short term fear of push back from a small population who want to drag this on. I work everyday exposing myself to the possibility of illness. Why can't we expect the same from our education system?

1/4/2022 8:36 PM

Why would we mandate the greater risk of adverse Vax effects when there's almost zero chance of any harm from covid?

1/4/2022 8:35 PM

This is absolutely assanine, follow the science.

1/4/2022 8:27 PM

It has been hard to find locations that are providing the vaccines for the younger children. We have yet to vaccinate for that reason.

1/4/2022 8:27 PM

There is not enough proof that this works on kids. The likelihood that my child will have lasting complications due to covid far outweigh the side effects of the vaccine. I will pull my child from school and seek other education before I vaccinate them. Please put a stop to this.

1/4/2022 8:24 PM

Thank you for keeping the kids safe!

1/4/2022 8:19 PM

Perhaps start the survey by asking if our child is already vaccinated? And if not, follow up asking why?

1/4/2022 8:15 PM

It's time for the power grab to stop. Let's us make decisions on a local level the way it was intended to be.

1/4/2022 8:15 PM

I think it should be parents decision to vaccinate their child or not.

1/4/2022 8:10 PM

Mandating an experimental shot for children or anyone for that matter is reckless, unconstitutional, against any and all scientific facts presented showing that our children have nearly zero risk from this virus. I will in no way subject my children to this gene therapy and will withdraw them from the Mead school district without a second thought.

1/4/2022 8:05 PM

Following the science our children are not in any danger of Covid 19 or any of the variants! What they are suffering from is fear, anxiety, depression and isolation.

1/4/2022 7:46 PM

I'm urging the Governors office and the Washington Dept of Health to allow people to keep the freedom to choose what is best for their families. Each and every person should be permitted to choose for him or herself what is right and best for them. This is not about public safety and I'm tired of hearing that story. Children K-12 are not at risk for this virus. Statistically speaking they are at 0 risk. They have good and strong immune systems. I'm not against vaccines. I am against forced vaccination for a virus that statistically poses no risk to children. I am against government officials using their "power" to control people in the name of health. Covid is an endemic virus. Just like the flu and cold viruses it will always be a part of the human story. We do not mandate flu vaccines. We tell people to stay home if they are sick. Not only will mandating this vaccine mean loss of children from many school districts (I pulled mine after Covid hit because of all the ridiculous mandates but would love to send them back without vaccine mandates) but it will affect the mental health of these children for the rest of their lives. If you, who care so much about the safety of our children cannot see that all of these mandates and restrictions have created a mental health nightmare in young people then you are clearly missing the bigger picture. The very best thing for our kids will be to return to school as usual-no masks, no social distancing, no vaccine mandates- and allow our children to continue to learn and grow together trusting the miracle of the human bodies immune system to protect them. Schools all over the country have gone back to life as normal and their schools are not losing students because of Covid deaths-they are thriving and doing so much better than the schools in these liberal states with all their mandates and restrictions. It's time to respect the constitution, respect peoples right to choose, and respect the mental health of our students. Do not choose a vaccine mandate because we are ready for a fight...and we won't back down!

1/4/2022 7:45 PM

Making an irreversible, life/health threatening decision like education required vaccination on behalf of my child that has not been adequately tested is inhuman and unacceptable.

1/4/2022 7:42 PM

Unbiased medical data regarding the COVID illness as it relates to children and the vaccine risks and benefits should be strongly considered before following or instituting any government based mandates that are not based on solid unbiased medical information.

1/4/2022 7:41 PM

Please let us keep our freedoms and our choice

1/4/2022 7:35 PM

Dr Robert Malone who invented synthectic mrna vaccine says do not vaccinate children with this experimental vaccine it is extremely dangerous and if you just look at vaires report that will tell you the why.

1/4/2022 7:34 PM

Let us keep our freedoms and make our own choice for our kids. COVID isn't going away, it'll mutate into new strains, just like the flu. It's an endemic virus and here to stay. Our bodies are amazing and will adjust, just like they do to the cold and flu. Please let us make our own choice, not be forced. God Bless the USA

1/4/2022 7:26 PM

NA

1/4/2022 7:26 PM

My child has an appointment set to get the vaccine regardless of if there is a mandate or not

1/4/2022 7:24 PM

I agree with vaccines and have already vaccinated my 6 year old but also understand the hesitancy of some parents. I don't necessarily agree with mandates and if this occurs I think exemptions should be allowed.

1/4/2022 7:21 PM

This vaccine is not safe for children's reproductive systems and hearts. They are not at risk.

1/4/2022 7:20 PM

This survey should have allocated an for famlies who have already opted to vaccinate their children. Many families already made that decision and done so.

1/4/2022 7:19 PM

Vaccination is important and necessary. The science has proven that it is essential for children and the community. My child was vaccinated at the earliest availability and will continue to get boosters as recommended.

1/4/2022 7:18 PM

Please add the Covid-19 vaccine to the mandatory vaccine list so that we can keep our children in schools safely. Also so that teachers, staff, and students don't constantly have to stay home in quarantines due to this illness.

1/4/2022 7:14 PM

The kids should be vaccinated.

1/4/2022 7:13 PM

This is a parents choice. Period. No politician can dictate or mandate health decisions for my children.

1/4/2022 7:09 PM

It is very important that students should be in person school for them to succeed and the vaccine mandate would put students behind in learning. It would be a shame to take it out on kids when they don't have any idea about what is going on with COVID-19. You don't know the long term effects on our children. I would hate to pull them out of school but if it comes to that I will. Please stand up for our children.

1/4/2022 7:08 PM

No

1/4/2022 7:07 PM

Do not force people to do things that they don't want to do! My choice for my body!

1/4/2022 7:04 PM

Do not make vaccination a mandate for children! They are too young and the vaccine is new and untested for long term effect.

1/4/2022 7:03 PM

COVID has continued to change over the past nearly 2 years. There is a significant amount of information not known and every changing and to mandate this vaccine so soon is not right. Vaccines do not prevent illness or prevent spreading. Furthermore, children have been the least susceptible to the illness and have the least symptoms if they do contract it. In many ways, it's looking similar to the flu, which is an optional vaccine. COVID should be treated the same way. Please do not require the COVID vaccine for children.

1/4/2022 7:02 PM

I very strongly urge all of you to remember there is absolutely NO - I repeat, NO long-term safety data for these vaccines. These are our children. Further, The mortality rate in Children from COVID-19 is 0.00049% There are treatments available rather than mandating poorly studied vaccines, that are lacking in long-term safety data. Clinical trials in children and young adults are ongoing and will not be completed for at least one year. In fact, the WHO has announced that young people should not take the vaccine. A concerning number of young people, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination. Additionally, Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination. COVID-19 vaccines are Emergency Use Authorized - not FDA approved, therefore, mandating it violates Federal Law. Further, Children who receive COVID shots will face an additional risk that most adults will not: simultaneous administration of multiple vaccines. I'd be happy to provide more data for your consideration. Thank you for taking my comments.

1/4/2022 6:58 PM

Our children should not be used in this experiment.

1/4/2022 6:51 PM

[https://youtu.be/2\\_jPlI9DI\\_o](https://youtu.be/2_jPlI9DI_o) Hearing that from the man who designed the mRNA vaccine say that it will be harmful to children makes me wonder why you are pushing this? This is still America is it not? Leave the medical choices to the parents!

1/4/2022 6:48 PM

You might as well be asking parents did you vote for Trump or Biden. What a ridiculous and pointless survey.

1/4/2022 6:44 PM

I will move my family out of this great state that has been the only home my children have known.

1/4/2022 6:37 PM

No

1/4/2022 6:37 PM

If there is a mandate and my kids are not granted an exemption, I will withdraw all 5 from Mead schools. I will also withdraw my kids if there is any attempt to ostracize or stigmatize them because they remain unvaccinated.

1/4/2022 6:31 PM

Please provide the data as to how many children have been severely sick - hospitalized and/or lost their life due to being sick with COVID. Especially with Omicron variant. If majority of children are not losing their life, or filling up hospital - why do you require vaccination?

1/4/2022 6:30 PM

The schools Covid policy's seem to be working well as is.

1/4/2022 6:23 PM

My children will both have both Covid vaccinations completed by January 13th

1/4/2022 6:23 PM

I do not understand why we would need a vaccine requirement for a virus that does not effect children anymore than a common cold does. There are no long term studies of the potential side affects of the vaccine, especially in children.

1/4/2022 6:17 PM

It's the parents choice.

1/4/2022 6:14 PM

People will talk a big game in comments but fall in line when the chips are down.

1/4/2022 6:08 PM

Nope

1/4/2022 6:06 PM

This should not be a mandate in general let alone the schools. Why are we mandating a vaccine that has no long term effect statistics?? I would rather wait to see the effects and studies from 3-5 from now to see if this vaccine is really appropriate and not harmful to our children.

1/4/2022 6:03 PM

Please do NOT mandate Covid vaccines for our children.

1/4/2022 6:03 PM

Before you mandate a fake vaccine, make sure it actually works. It's absurd that they would even consider mandating this when IT ISN'T WORKING NOW!

1/4/2022 6:03 PM

If this becomes a requirement for my children to attend school in this or any other district, we will find other education.

1/4/2022 6:02 PM

We will do our part to help keep our community and schools safe.

1/4/2022 5:47 PM

I will not have my child vaccinated from Covid, I will pull him from the school before I put experimental drugs into his body.

1/4/2022 5:39 PM

My child attending school in state of WA will depend on exemption process and what the accomodation is, if an exemption is approved. Otherwise we will move out of state of WA.

1/4/2022 5:35 PM

This will absolutely destroy children's education and funding for schools. Too many children will not attend in person if it becomes a mandatory vaccine.

1/4/2022 5:34 PM

Children do not need to be vacinated! Nor should they be required to wear a mask!

1/4/2022 5:34 PM

Be prepared for law suits

1/4/2022 5:30 PM

There is not enough long term evidence to know unintended consequences of this vaccine. Parents should not be forced to vaccinate, it should be a choice.

1/4/2022 5:28 PM

I did not answer questions 2-4 as I am not a parent of children. My wife and I are concerned grandparents and I am a business man of respectable finances and community connections. If need be we will apply our resources and efforts to start up as many schools as are needed to educate the children of this community. We will then share this model with all who seek it

1/4/2022 5:26 PM

If there is a vaccine mandate I will withdraw my child immediately and not enroll my other children when it's time for them to go !!!

1/4/2022 5:25 PM

No mandatory vaccine for schools!!!

1/4/2022 5:24 PM

I will not give my children this vaccine. They have healthy immune systems. And the vaccine is clearly not providing any immunity to the virus as evidenced by ever increasing number of cases.

1/4/2022 5:23 PM

I want to choose how to raise my kids not the schools or government.

1/4/2022 5:18 PM

I want decisions to be made based on real facts and real data regarding transmission of COVID amongst children ages 5-17 and the direct impacts it has on not only their physical health, but also their mental health. As it has been challenging dealing with covid, my worries become what the long term mental health aspect will be on these children growing up, having to social distance from one another and are unable to "just be kids". I want decisions to be made based on what is truly best for all our children and want them all to be in a safe and healthy environment while attending public schools.

1/4/2022 5:15 PM

This is an unnecessary vaccine that does not provide immunity.

1/4/2022 5:14 PM

Yes yes yes yes! Our freedom depends on people taking care of each other, and that includes protecting one another - including our children and their teachers - through vaccinations.

1/4/2022 5:14 PM

No way my kid will get a vaccine. I'll move to Idaho or another state or homeschool or go private.

1/4/2022 5:11 PM

Government over reach , violation of the Nuremberg code.

1/4/2022 5:06 PM

I have been considering leaving Washington state for some time now. If this mandate is passed this will be the final push for me to get out of this state. My successful business, annual taxes and family will go with me. Required vaccination for Covid 19 in kids is not scientific. Please follow real science, not money or agenda/profit driven science when making these decisions. Health decisions with regards to children are to be made by the parents, not the state.

1/4/2022 5:03 PM

Vaccines violate our religious beliefs and our belief in medical freedom. They take our parenting rights. Period.

1/4/2022 5:00 PM

The data shows kids are not at risk for covid. Also, vaccinated people can still get and transmit covid. So we are unnecessarily putting our kids at risk with an unknown vaccine that poses little to no benefit.

1/4/2022 4:55 PM

Please look at the death rate data for children, a child has a significantly higher chance of dying in a car accident than from COVID. There is nearly zero need for a child to be vaccinated and if there is a need for an immunocompromised child that should be determined by the parent/guardian and pediatrician. Children (especially boys) have a higher chance of being hospitalized from an adverse reaction (myocarditis and pericarditis) from receiving the vaccine than from being infected with COVID. Please consider the new dominant variant (Omicron) and the data show it to be very mild, more akin to a common cold. Natural immunity must be taken into consideration, my youngest child has had COVID (Delta) and the symptoms only lasted one day. If the vaccine was similar to

other vaccines (measles, mumps, rubella) and actually eradicated the disease I would likely have a different opinion, however, it appears to only help against hospitalization and death which are both non-issues for nearly all children. As Dr Fauci recently stated the hospital admittance numbers for children are a bit misleading as the data includes scenarios where a child is admitted to the hospital for a broken leg or some other issue and they also happen to test positive for COVID. Please do not mandate the vaccine for children, it will only cause further divide in our state and country. The vaccine does not stop COVID infections, I am fully vaccinated and I had COVID in October. My child being vaccinated does not protect anyone from COVID and with his natural immunity there is zero need for him to get the vaccine especially when you consider the risk of myocarditis and pericarditis. Again I am asking you, please do not mandate this vaccine for children.

1/4/2022 4:54 PM

It is crossing the line for the government to mandate this. It should be up to the parents to decide if they want their children vaccinated or not.

1/4/2022 4:50 PM

My kids are already vaccinated!

1/4/2022 4:46 PM

I have already pulled my student from public schools. Mandates will make it easier to keep my student out, and at home.

1/4/2022 4:42 PM

Absolutely DO NOT support such requirements to ensure my child is given his right to continued public education.

1/4/2022 4:36 PM

Yes. Please follow the science instead of continuing to move the goal post. Vaccinated people can still get and spread Covid. The Vaccine is closer to a therapeutic vs a true vaccine. This government chose to focus on vaccinations over therapeutics and won't admit that it was a mistake. I work in healthcare and cannot believe how far this has gone. They are harming children and others with these mandates. Control and power is what this Governor and health department cares about. Leaving the state will be our next step.

1/4/2022 4:31 PM

I am in favor of keeping our kids in school and as safe as possible. My kids have done great with a year and a half of masking. The importance of staying in school is important to me.

1/4/2022 4:31 PM

Young people have the highest survival rate from this virus without the shot. They have an increased risk of side effects from the experimental shot. I will withdraw my kids immediately if this is implemented!!

1/4/2022 4:30 PM

Requiring the covid vaccine for school age children, much like requiring it for state employees and facilities with 100+ employees, is absurd. People should be given the choice to vaccinate or not, especially when it comes to a new vaccine that has not had 20+ years of evidence to see any potentially harmful side effects. I do not believe that there is enough scientific data to support a vaccine for covid being less detrimental than covid itself in most cases. Furthermore, many people that I know personally who are vaccinated and contracted covid were no better off than those who

were not vaccinated. If a parent finds it best to vaccinate their child, that is their prerogative. Much like the flu vaccine, the covid vaccine should be an individual's choice. If it becomes mandated, I will not hesitate to take my kids out of school until something changes and people stand up for what is right.

1/4/2022 4:25 PM

Children are at very low risk for getting sick, but the science is still pending on how vaccine side-effects may potentially affect our little ones in their futures.

1/4/2022 4:25 PM

I feel that parents should have the right to choose which vaccinations are appropriate for their individual children.

1/4/2022 4:23 PM

No

1/4/2022 4:21 PM

Vaccines help prevent the spread of disease, during this ongoing pandemic it should be required

1/4/2022 4:20 PM

This is going away and when the dust settles history will remember those that tried to force tyranny on others.

1/4/2022 4:19 PM

I believe the school district should follow the philosophy adopted by the Nuremburg Code (whether one believes in the ethical relationship between the Code and the vaccine or not). The bottom line is, that it is an infringement of personal rights to require a vaccine for an individual who does not wish to have it injected into their body (for whatever reason). An exemption (by definition) cannot be challenged, since it invites the bias of a third-party.

1/4/2022 4:12 PM

I am pro vaccine as both my kids are vaccinated against Covid. However I am against mandating it at this time as it could have negative consequences. I believe many parents would pull their children from school if the vaccine is mandated which would effect school funding as well as possibly effect the jobs of school employees. Since the vaccine only lessens the severity of symptoms and does not prevent Covid nor prevent spreading Covid then it should be up to parents if that is something that they are willing to take a chance on with their kids.

1/4/2022 4:11 PM

Please do not force children to get this.

1/4/2022 4:10 PM

I am not for mandates or force and or being bullied by big pharma. I will pull my students ASAP. We need to let freedom and common sense prevail. In states where people are free Covid cases are the lowest. Ie Florida and Texas. Covid has killed less than the flu has per year. Stop the left wing false narrative. Here and now TY TY.

1/4/2022 4:08 PM

I personally have friends who have been vaccinated, who have gotten Covid after they got their vaccines. It isn't effective or researched enough to mandate that everyone get it.

1/4/2022 4:08 PM

Please no vaccine mandate

1/4/2022 4:07 PM

A mandatory COVID vaccine is absolutely unnecessary for school age children. The vaccine does not stop the contraction, nor the transmission of the COVID virus. It is nothing more than a symptom suppressor. For a healthy school age child, the risk of severe illness is extremely low as reported by the CDC. In addition, the probability of death for a school age child is statistically near zero. <https://covid.cdc.gov/covid-data-tracker/#demographicsovertime> It is my firm belief that the risks of the vaccine far outweigh the benefits, especially for healthy people 30 years of age and younger. I have done my research and I refuse to allow this vaccine to be administered to my children.

1/4/2022 4:04 PM

N/a

1/4/2022 4:02 PM

Children are NOT in danger of Covid! The side effects of the vaccine are more of a danger to them. Parents will not subject their children to this irresponsible mandate. This would be the worst mistake this administration could make. Therapeutics cure this illness! Shame on Gov. Inslee for his perpetual tyrannical emergency powers. The emergency is over! Let's move on now!

1/4/2022 3:55 PM

Do not make this mandatory for children. Allow parents the option and freedom of medical choice.

1/4/2022 3:55 PM

With a natural immune system the body can build its own natural response to a respiratory illness. There is a multitude of illnesses that include coronavirus that have been circulating for over half a century. It is proven the survival rate for this illness in children is over 99.7% with no intervention. Just like the influenza, a medical decision should be left to the parents, NOT forced upon them.

1/4/2022 3:54 PM

Adding the COVID-19 vaccination to the immunization law does not fit the criteria set by the law for it to be added. This should not even be considered. If a mandate to vaccinate my child for attendance to public education I will withdraw my child. I will not seek an exemption. I will pull my child and support other parents to do the same.

1/4/2022 3:51 PM

Requiring childhood vaccinations for Covid 19 is ignoring the actual data regarding risk to benefit. Expect lawsuits if you abuse your power to mandate this vaccination.

1/4/2022 3:50 PM

It's not a vaccine. It's genetic therapy.

1/4/2022 3:50 PM

Why vaccinate when it doesn't prevent my children from getting Covid. And there are some adverse reactions to the shot that we are not willing to roll the dice with. Poor Governing in my opinion, follow CA and OR into the depths of hell.

1/4/2022 3:47 PM

I WILL FILE CLASS ACTION LAWSUIT AGAINST THE MEAD SCHOOL DISTRICT AND STATE OF WASHINGTON REGARDING THEIR INABILITY TO MANAGE A SAFE AND HEALTHY ENVIRONMENT OR COVID PROTOCOL

1/4/2022 3:47 PM

If truly following the science is a priority then mandating this "vacine" is completely UNNECESSARY!!! Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

1/4/2022 3:46 PM

No

1/4/2022 3:43 PM

The COVID vaccine isn't necessary to protect our community. The endangerment of kids by giving this injection is more of a concern than the impact of kids getting COVID (with almost 100% recovery/survival). We will not be vaccinating our kids with the COVID vaccine. They are up-to-date will all other vaccines...

1/4/2022 3:42 PM

Nobody needs mandates we are free to decide what we do with our body and children !!! This is tyranny !!

1/4/2022 3:39 PM

You are not taking into account or consideration the kids that are advised not to take this from their Doctors. What are you going to do for those students who fall into that category?

1/4/2022 3:38 PM

Don't agree with mandates, but fully support the vaccine. I will be getting my child vaccinated in the near future

1/4/2022 3:37 PM

Vaccination should be a choice!!!!

1/4/2022 3:36 PM

Thank you for making the hard but correct call so that local districts don't bend to local pressure by a vocal few at the expense of public health.

1/4/2022 3:33 PM

I will immediately withdraw my students from Mead SD if you mandate these experimental shots. I have boys and there is an increased risk of myocarditis in young men that have received these shots and this age group has over a 98% survival rate from the virus, which is well on its way to becoming endemic! NO to mandates!!

1/4/2022 3:31 PM

Masks appear to be working. I am vaccinated, however I am not willing to have my children vaccinated at this time.

1/4/2022 3:28 PM

This is a virus that is not going away. The flu shot has never, nor should it be required. This is the same. This virus is basically a cold with over a 99% survival rate in all ages. Mandating what is still an experimental drug with unknown long term consequences for kids is absolutely criminal. This should be a choice for parents to make as far as what they want to do with their kids.

1/4/2022 3:23 PM

As a healthcare professional I do not believe that there is enough evidence, research, to warrant a mandate of children needing a Covid-19 vaccine.

1/4/2022 3:21 PM

I will seek an exemption if one is offered however if one is not offered and/or we are not granted the exemption we will be removing our students from school and most likely moving out of state.

1/4/2022 3:19 PM

Since as long as I can remember, schools have required their students to be vaccinated to keep others safe. Why not now, especially when there's a deadly virus? Stop the conspiracies. Vaccinate or die.

1/4/2022 3:18 PM

Mandates are not law and this attempt to vaccinate children or adults is against the Constitution of the US

1/4/2022 3:17 PM

These vaccines are not effective and we should not submit our children to these experimental vaccines. We don't know the long term effects and it's unfair for us to do this to our children.

1/4/2022 3:15 PM

This is a BREACH OF OUR CONSTITUTIONAL RIGHTS!! We as Americans have ALWAYS been given a choice no matter what the state or emergency is! Not 2 choices but several. This is a slap to the face of ALL HARD WORKING AMERICANS! Just so you all can sit on your ass and not get your hands dirty just to keep a roof over your head!

1/4/2022 3:13 PM

Mandating vaccines is unethical and STUPID!!! WE PAY for public schools with OUR taxes, NOT FOR CHILDREN'S/PARENTS CHOICES

1/4/2022 3:12 PM

Such rapid extreme measures without long term studies to understand the extent of side effects and all when illness risk is so minimal is irresponsible, negligent and potentially dangerous.

1/4/2022 3:07 PM

It's important to remember that parents are still the decision makers when it comes to healthcare choices for their children, they know their children best. Not every child is the same, nor do they have the same immune system - so for some a vaccination is just routine, with no problems, for others however a requirement for vaccination means serious difficulty for the child. E.g. A seemingly

harmless snack such as a peanut, could be a great treat for MOST children, or it could mean immediate hospitalization for some others. But we rely on parents to navigate this and make the choices for their children to help them best succeed.

1/4/2022 3:06 PM

Children must show proof of vaccination status for other viruses to attend school what difference is one more.

1/4/2022 3:05 PM

My kids are 12 and 16 and are already vaccinated. My 16 yo is getting his booster on Saturday. This should be treated as any other childhood vaccine and should become mandatory. Thank you.

1/4/2022 3:05 PM

Regardless of vaccination status, EVERYONE has a right to an in person public education. Leave the medical decisions to the parents and our pediatricians, leave your political money making agendas out of our schools, and leave our children alone.

1/4/2022 3:03 PM

We should not require our children to receive an experimental vaccination (Comirnaty is not available in the US.) with no long term safety studies done. I will find alternative methods of education if this vaccination is required for my children.

1/4/2022 2:59 PM

This "mandate" needs to stop. Children's lives are more affected by all these restrictions, including the masking of children; i.e., depression, suicide, etc. A vaccine for an age group that is barely affected by COVID is NOT necessary. The vaccine has been proven that COVID spread does not stop and additional boosters are not stopping the spread of COVID. Having a huge family, with everyone in it having gotten COVID, we believe this is an unnecessary requirement. We've all recovered just fine and we will not be subjected to a mandate for a vaccine. We'll pull all of our kids out of the school system. We are not "anti-vaxxers". We believe in science. We do not believe this vaccine is in our children's best interest and we will not have our children vaccinated and then boosted and boosted, which seems to be the way things are going. It will never stop...there will always be a different variant and there will always be another push for another booster. If it means we disenroll all of our children from public school, we will do so immediately.

1/4/2022 2:54 PM

This is not ok

1/4/2022 2:53 PM

COVID mandates for kids is absolutely ridiculous and does not follow any real science or even common sense.

1/4/2022 2:53 PM

We should not still be debating this. Vaccines work. We need to protect all the children regardless of their parents political beliefs. My child deserves an education and to be healthy at school. Its time for the parents who refuse to vax their kids to keep their children and let them learn virtually. Its common sense. Vaccines work

1/4/2022 2:47 PM

Already vaccinated my kids and would expect the school district to enforce vaccines to keep my kids safe

1/4/2022 2:46 PM

The vaccine is highly ineffective and until we know long term effects of the vaccine, it is VERY negligent for anyone to be mandated. Especially helpless children that do not get to make their own health decisions. All medications/procedures/vaccine have risk. Where there is risk there MUST be choice! My husband and I were both vaccinated last spring and both still caught Covid this fall. Our children are not vaccinated and did not catch Covid. Creating this mandate is worthless and 100% about power, not health. I do not support the mandate and will not vaccinate my children at this time.

1/4/2022 2:42 PM

We will never vaccinate of children!!

1/4/2022 2:32 PM

Kids are not affected by "virus" so let them be kids and get the mask off that are child abuse.

1/4/2022 2:32 PM

Leave my children out of this political debacle. Vaccinated (I use the word loosely as you need a booster every month practically) or not, everyone is capable of getting this virus. Recent studies show that those who are vaccinated are more prone to infection and to be carriers. Regardless of vaccination status, everyone has a right to a public in-person education. Get over yourselves, get off your ivory towers, and leave our kids alone.

1/4/2022 2:31 PM

It's should be everyone's choice. People who choose to be vaccinated are protected and have nothing to worry about. We all have free will given to us by God.

1/4/2022 2:21 PM

The FDA approved vaccine is not available in the United States of America.

1/4/2022 2:18 PM

Requiring the vaccine should not be allowed. It hasn't been test enough as it has only been 2 years. Requiring this will force myself and other to quit their jobs so homeschool and I am not efficient enough to take over those responsibilities. I have been vaccinated to keep my job and they said I wouldn't take have to wear a mask, things would be better. Didn't happen. When will this end? We need to stand up for our kids.

1/4/2022 2:16 PM

Home school would be my choice if there was a vaccine mandate. I'm prepared to take that step.

1/4/2022 2:13 PM

Stop waiting and mandate the vaccine for anyone that doesn't have a valid, verified medical issue, ages 5 and up.

1/4/2022 2:08 PM

My child is already vaccinated.

1/4/2022 1:42 PM

I will not vaccinate my children.

1/4/2022 1:41 PM

My body my choice. The number of persons under the age of 18 who have died from COVID is completely negligible. It should not even be a concern.

1/4/2022 1:41 PM

Forcing families to decide between injecting their children and their education is immoral and wrong. The fact there is no long term studies on this vaccine makes it unconscionable and borderline criminal. This is the line in the sand for many families including mine. We will not under any circumstances be vaccinating our children with the covid-19 vaccine. This is a decision for families to make, not the state.

1/4/2022 1:39 PM

It is critical that children remain in school. As a psychiatric nurse I am witnessing first hand the mental distress and trauma children and families are experiencing. I hope that our number one priority is keeping children in school. Vaccination for staff and students are one of the best tools we have to do so. Can we consider testing students weekly or even daily as the UK does?

1/4/2022 1:36 PM

I am happy to vaccinate my children for their protection and for the protection of other students

1/4/2022 1:26 PM

I don't trust the long term science regarding vaccinating my 12 yr old daughter for Covid and will not be coerced into having her vaccinated by the state of Washington. As an adult I am vaccinated and boosted but I don't believe this is necessary for children at this time.

1/4/2022 1:21 PM

Stop this insanity! Too many scientific studies have proven this "vaccine" does not work and causes more damage to children than COVID itself.

1/4/2022 1:19 PM

Mandating the vaccination of children with an experimental vaccine is unethical and absolutely disgusting.

1/4/2022 1:16 PM

Our school district has done a phenomenal job keeping staff and students safe and healthy through this pandemic, requiring a new vaccine to continue to attend this amazing district is an unnecessary strain on students that don't have a choice

1/4/2022 1:10 PM

We will not get vaccinated! I will leave my job with the district and withdraw children.

1/4/2022 1:02 PM

It should be my choice or my child's choice of what goes into their body. This state says a woman has the right what to do with their body in the case of abortion, in turn we should have the choice of our bodies for vaccines.

1/4/2022 12:56 PM

Do your job teach our kids.

1/4/2022 12:43 PM

There is not a single peer reviewed scientific article I can find that definitively shows a benefit to children under the age of 12 to get a covid vaccine. Why would we mandate something that we haven't studied yet, and can't prove it's beneficial?

1/4/2022 12:39 PM

No I will not force my children to be vaccinated and if so they will be pulled from the school district. This should be an option not a forced upon action. The vaccine doesn't protect you from catching covid so therefore should not be forced upon the students. You can still get covid whether being vaccinated or not . My child should not have to be mandated to take a vaccine.

1/4/2022 12:39 PM

Let us choose!

1/4/2022 12:37 PM

The fact that this is even being brought up is outrages. We, as parents, will take care of our children the way we see best. Science has showed that you can still catch and spread covid even after being vaccinated. Scientists have also given us proof that children are not at risk of serious health problems if they do catch covid. This is getting out of control. I have 2 boys in the Mead school district and we will absolutely pull them out of school before being forced to give them the jab!

1/4/2022 12:37 PM

Children are at such a low rate, that it's beyond ridiculous to risk putting a new Vaccine that we don't know anything about into our kids. I do not believe the government should be able to control what we put into our children in order for them to go to school.

1/4/2022 12:36 PM

No

1/4/2022 12:32 PM

I am adamantly opposed to a mandated COVID vaccine for children.

1/4/2022 12:25 PM

I feel that this vaccine should be made a CHOICE to parents/children. Not all exemptions are valid, kids have a better immune system without being vaccinated. This should not be mandated and if it is my son will not return to school.

1/4/2022 12:23 PM

He can go to hell

1/4/2022 12:23 PM

It is the government's job to protect its citizens. Requiring the Covid vaccine should be common sense. My child will not return to an in-person class until it is safe to do so. Every person who enters a school building should be vaccinated. No exemptions. If a person doesn't want to be vaccinated they have the option to do virtual school. The government should stop trying to please everyone and JUST DO THE RIGHT THING!

1/4/2022 12:22 PM

There needs to be more information gathered on all sides of this issue before we make a "one size fits all" approach to the vaccine.

1/4/2022 12:22 PM

The current protocol implemented by the Mead School District has kept our kids safe and uses a sensible approach to ensure kids are tested and quarantined when they show symptoms. Enacting a mandate for a vaccine for Children that are not at risk is a gross overreach of state level emergency authorization and encroaches personal freedoms at an unprecedented level.

1/4/2022 12:22 PM

The rise of myocarditis in children (all of whom have been vaccinated) should be all we need to say.

1/4/2022 12:17 PM

Look at the data. Kids don't need the vaccine and we have no long-term info to confirm the vaccine is safe.

1/4/2022 12:14 PM

Look at the studies, look at the stats. There's little to no risk of serious illness from COVID to children in this age range. I'm pro vaccine but for the groups whom it actually hospitalizes and kills. This is coming from an ICU nurse at Sacred Heart that has cared for dying Covid patients (almost all unvaccinated). With that being said, they have all been adults, and nearly all with co morbidities or current disease. If the worry is that an unvaccinated child will pass Covid to an unvaccinated adult family member, then that is the decision that that adult has made to not get vaccinated. No reason to mandate a vaccine for children to make up for a potentially poor decision of an adult with a full functioning pre frontal cortex. Decisions ought to be made by individuals, not group think. Furthermore, a mandated vaccine will send thousands of kids to private schools, including my own. A good portion of Spokaneites are already disgusted with the curriculum that is seeping into the classrooms, motivated by a one sided opinion on these issues. The convenience of public school will not outweigh the encroachment of the educational system's desire to follow left leaning curriculums, and private school would be a welcomed change from that.

1/4/2022 12:13 PM

Mead School Board, WA DOH and Governor Inslee, As we begin year 3 of 'two weeks to flatten the curve', anyone who still believes the lies propagated by the media and our government will get what they deserve when this is all said and done. We in the Mead community have answered multiple surveys and spoken for hours upon hours at school board meetings. The President of the Mead School board (Burchard, along with Denholm and Olson) lack intestinal fortitude and will continue to do whatever the SRHD tells them to do instead of representing the people of Mead who voted them into office. This is yet another survey that will fall on deaf ears. It's extremely disheartening to see our School Board, our elected officials, stand by and let the Governor overreach his authority by abusing his power under a completely fabricated "pandemic". You were elected to represent the people of this community. 73% of your constituents replied to "your survey" and said they wanted medical choice. You have a moral obligation to sue the Governor for his egregious overreach. When asked (at the 16 August School Board meeting) if you'd be willing to stand up for our children if "the State wanted to inject them with an experimental drug", Mike Cannon was the only person who said he would object to that. This is completely horrifying. Parents had the courage to speak for two hours on medical freedom at the 16 August meeting, because they knew they were in the right. Your response was to move the next meeting to a Zoom call (that had "technical difficulties" and therefore you wouldn't have to listen to parents), and you could hide behind technology. You know what you're supporting is evil. I believe most people are good, therefore I can only conclude you are uninformed about what is happening to this country. At first (during the two weeks to flatten the curve), I thought this was a political stunt (left vs. right, D vs. R, etc). Now it has become completely clear, this is a

battle between good and evil. We know Fauci said there would be a “surprise pandemic” during Trumps first term. We know the virus was funded in part by the American people (via Fauci and the NAIAD) in a bioweapon lab in China. We know China released it 9 months before a presidential election. We know that Joe Biden has prostituted his son to China and Ukraine, therefore compromising his ability to lead. We know the recipe for the experimental gene therapy drug came from scientists in China, and it possesses nano lipid technology and many toxic chemicals such as SM-102. In 1938, good men started rounding up Jews and conducting medical experiments on them because they were “just following orders”. Now YOU are going to stand by and allow thousands of children in our community to be coerced into taking a Chinese developed, untested experimental gene therapy drug. [The Nuremberg trials were a series of military tribunals held following World War II by the Allied forces under international law and the laws of war. The trials were most notable for the prosecution of prominent members of the political, military, judicial, and economic leadership of Nazi Germany, who planned, carried out, or otherwise participated in the Holocaust and other war crimes.] I believe “good” will prevail in the end and we will see similar Military Tribunals to hold people like you accountable for these crimes against humanity. I believe that all elected officials, politicians, and military members who promoted these tyrannical mandates will be held accountable. As we are on day 662 of the 14 days to “flatten the curve” you have run out of time to stand up for “Good”. All that is required for “evil” to succeed is for good people to stand by and do nothing. Good Luck and God Bless you all...

1/4/2022 12:13 PM

My family has every intention to up and move out of WA if there is a vaccine mandate at the Mead School District. Requirement of an experimental vaccine is unconstitutional.

1/4/2022 12:13 PM

Mandating a COVID vaccine for children is absurd. Working everyday in a children's hospital-providing direct patient care-we are not seeing a large number of children adversely effected by COVID. It is not in the children's best interest to demand vaccination for all. It is a very personal decision that-frankly the state has no business being apart of. This vaccine has not been around long to know long term effects and we are still seeing break through cases in all ages. It is not the fool proof method to end COVID. We don't require influenza vaccination to attend school? Logic is very flawed in making children obtain this vaccine just to be able to attend public school. I am very disappointed in our state and the authority they believe they have regarding personal health decisions for families/children. The state should focus energy and resources on more pressing matters. Leave the medical decisions simply as that-a decision between a medical provider and their patient. Vaccination mandates for COVID are abhorrent and huge overreach of power.

1/4/2022 12:11 PM

No

1/4/2022 12:07 PM

The high courts of this country continue to shut down Biden's mandate. Most recently the private business owners. My family nor my kid will follow suit an truly untested so called vaccine that has zero long term affects studies from companies who only care about stuffing their pockets.

1/4/2022 12:07 PM

My son, who is 17 and attends Mead High School in Spokane, has been fully vaccinated against COVID-19 since May 2021 and recently received a booster. My wife and I are fully vaccinated and boosted too. Adding COVID vaccination as a requirement of students is reasonable, given the other

vaccinations already required of them, and would benefit public health. Such a requirement would better protect vaccinated students from infection by a COVID variant.

1/4/2022 11:59 AM

I have already vaccinated my child against COVID-19 and fully support a mandate for this vaccine. It is the best way to protect our children and others from the spread of COVID-19 and keep our schools safe and open.

1/4/2022 11:58 AM

I would seek an exemption, as I refuse to vaccinate my children with something where the side effects are unknown, but if free choice is taken away from us, I will seek exemption first and if denied I will withdraw both my students from Mead School District and take them to school across the state line in Idaho.

1/4/2022 11:56 AM

I think it's ridiculous to make vaccinations a requirement for school cause you shouldn't be able to force us to give our children anything that we don't want them to have and it's really interesting the big guy bully and the little guy into what they want them to do so no I think it's ridiculous and I will not vaccinate my child.

1/4/2022 11:50 AM

This mandate is all about MONEY! We know MSD will receive millions of federal money if Mead mandates. A child is in more risk of death riding in a car than dying of COVID19. It is proven those silly masks do not stop the spread of the virus. The only difference between the seasonal flu and COVID19 is loss of smell and taste! I wish you would understand the only science our government looks at is what they fund themselves. It is a total scam to mandate vaccines and masks. I hope Mead School District is smarter than the Biden administration. Thank you for the opportunity to voice my concerns.

1/4/2022 11:46 AM

Don't do it, flu shots are not mandated this should not either

1/4/2022 11:43 AM

Let us decide for our own children, not the government.

1/4/2022 11:40 AM

Dear Governor's office, our children are not at risk. Save your vaccines for those who require it. FOLLOW THE SCIENCE! We will NEVER vote for anyone who follows this line of vaccine mandates! We will fight this non-science based requirement at all costs! Last I looked, it is called "Public School" not government-school. Respect our God given and unalienable rights!

1/4/2022 11:36 AM

If this does become mandated by the state, it needs to be clear that it's coming from them and not from the school district. I fear the implications could be very costly for education.

1/4/2022 11:35 AM

Please review the latest study out of Germany in regards to students and covid. it was done over 15 months and covered 10 million adolescents. No deaths. According to the CDC the vaccine is dangerous to young people and their hearts especially boys which I have 4 of. Statistically speaking

our youth are more at risk traveling to school then being injured by covid. If the DOH follows the science and data they will not even consider a mandate. Thank you Tim Mason

1/4/2022 11:33 AM

Our children have the right to public education (that we pay for) regardless of their Covid-19 vaccination status.

1/4/2022 11:30 AM

This is crazy. How dare the Governor or any other public entity demand that I inject my child with a vaccine that may or may not even help them from getting a virus that has nearly ZERO chance of harming them. We will not only pull our students from the school, but we won't go quietly.

1/4/2022 11:28 AM

If there is a mandate we will remove our child from Washington schools. This nonsense needs to end. The Mask mandate is ridiculous enough!

1/4/2022 11:22 AM

COVID is not Ebola or Polio. It is 99%++ survivable and especially non-life threatening in children. COVID vaccinations are a private decision. The Governor needs to respect the personal rights of WA citizens.

1/4/2022 11:21 AM

Requiring the COVID-19 vaccine to attend public schools is absolutely the correct course of action. The COVID-19 vaccines have proven to be safe and effective, and as a community we need to protect each other. Children, while not at as high of a risk from the adverse effects of a COVID-19 infection, are still at some risk of the long term effects we are only beginning to understand. Additionally, children are... Let's just say it: Children are messy. They don't have the greatest understanding and awareness of germs and spreading disease. They will absentmindedly and unintentionally pass bacteria and viruses back and forth to each other. This, in turn, spreads those infections further out into the community, often exposing family members who are at a much higher risk from COVID-19. Literally all of the anti-vaccine information available is either based on a misunderstanding, or is patently (and demonstrably) false. There is no good reason not to mandate vaccines. The historical precedent exists. A law requiring other vaccines already exists. Adding the COVID-19 vaccine to that list of required vaccinations is good policy and good for the community. I urge you not to give into public pressure from people who are well-intentioned but ultimately ignorant of the facts. Please listen to state, federal, and international experts. Please protect our children and our community. Thank you!

1/4/2022 11:19 AM

My students are already vaccinated, but I have a hard time with a mandated vaccine that does not have full FDA approval.

1/4/2022 11:12 AM

The COVID-19 vaccine is safe and effective. As a parent, I want to ensure my child is as safe as possible when entering school and I believe vaccines are an important element of public safety and health. Parents who do not wish to have their children vaccinated can withdraw their child and put them in another school.

1/4/2022 11:06 AM

There is absolutely no need for a child to get this vaccine period... if there was any obvious data that showed a realistic percentage of child deaths with this new variant then it would make sense. But there isn't, it's not even talked about. If a child gets covid their immune system will be stronger for it. Even in the elderly population it's is far less than a half a percent that die from it, if that. It's based on fear and control. No thanks...

1/4/2022 11:06 AM

This vaccine does not prevent one from getting covid as we now know...even those who are vaccinated and boosted are getting covid. DO NOT REQUIRE THIS VACCINE IN OUR CHILDREN WHO ARE AT VERY LITTLE TO NO RISK OF this virus. I will pull my child from the public school system if this becomes a requirement.

1/4/2022 11:04 AM

Families should have a choice of what they put in their bodies. Nothing should be forced when it comes to our bodies.

1/4/2022 10:59 AM

Are you taking in to consideration kids that are Medical Fragile and their Doctors advise against it.

1/4/2022 10:56 AM

Fuck inslee. This is bullshit. This is not a necessary move. It cannot be enforced legally. Since when has the governor's office decided to become a communist dictatorship.

1/4/2022 10:56 AM

Please understand a parents hesitation at putting new medicine in a child's body. Do not take a parents right away to choose what they deem best for their children. If the expectation is to raise productive healthy members of society it begins with insuring that they are granted freedoms that our country is founded on. I am not against vaccines I'm against mandates and forcibly removing choices from Americans.

1/4/2022 10:56 AM

No

1/4/2022 10:54 AM

Stop forcing people to put vaccines in their body. There is not enough historical data on the effects of these vaccines.

1/4/2022 10:50 AM

Covid doesn't affect children like it does the elderly. There is no local data that supports (child hospitalizations due to Covid illness) Covid vaccinations would be helpful for this age group. Kids have a great immunity towards Covid.

1/4/2022 10:43 AM

I am a school nurse. I am also a mother of 4 children, ages: 13, 11, 8, and 5. I feel a school mandated vaccine is necessary to help combat COVID. Thank you!

1/4/2022 10:38 AM

Fuck Jay Inslee and his group of corrupt minions

1/4/2022 10:34 AM

Stop this tyranny!

1/4/2022 10:34 AM

There is absolutely NO WAY I am vaccinating my children! No ONE ELSE will determine what is best for my children's health and well being. I know all the facts about benefits vs. risks regarding the COVID vaccine and children, and there are numerous risks compared to benefits! My children will NOT be getting vaccinated! And if there is no option for exemption, I am pulling my kids from Mead schools so fast it's not even funny!

1/4/2022 10:30 AM

Don't have a Mandatory Covid-19 vaccine. We do not approve.

1/4/2022 10:26 AM

If this Vaccine is mandated I will be withdrawing my child from the Mead School District and he will be homeschooled. There is no way that I will Vaccinate my child until I feel that there is enough data to show all of the side effects of the Vaccine.

1/4/2022 10:26 AM

My family is vaccinated with the Pfizer series - we are not "anti-vaxxers". Of 5 of us, one has suffered adverse effects from this vaccine. My teen daughter has experienced absence of menstruation, sickness and cramping which continues 8 months post-vaccine. For this reason, I am reluctant to seek the booster for my child at this time and have learned that most medical providers are not allowed to write medical exemptions for this even if they feel that the risks outweigh the benefits for my child. I would encourage the district and governing authorities to approve exemptions for those children who need it if they decide to mandate the vaccine or boosters for all children. Although the benefits may outweigh risks for the population as a whole, this is not the case for all individuals and families should be able to make decisions in the best interest of their children's health as well.

1/4/2022 10:26 AM

The Covid-19 vaccine is similar to the Flu vaccine. It will be an ever changing vaccine because of the nature of the virus and new strains, as is the case with the Flu vaccine. Requiring children to have to be subjected to never ending boosters will be problematic and intrusive. I am pro vaccine in general but disagree in requiring a vaccine that will always need boosters. The covid vaccine is not like typical childhood vaccines such as MMR which does not require yearly boosters.

1/4/2022 10:25 AM

Stop all the covid scare tactics. Our governor is an idiot and needs to be impeached for not following all the science and for listening to fauci who is a liar and a politician who does not care about the people.

1/4/2022 10:23 AM

The state's duty to educate children could be compromised. An individual's decision could place others health in jeopardy. The state's obligation to protect public's health and safety would be compromised. The state's economic interests could be threatened by the cost of care for vaccine preventable illnesses, related disability, or death. And by the cost of managing vaccine preventable disease outbreaks.

1/4/2022 10:23 AM

Please get vaxxed.

1/4/2022 10:22 AM

There is no data showing evidence that Covid-19 is a threat to the health of children ages 5+ along with there is zero scientific proof showing that the vaccine prevents the spread of Covid. Unlike Polio, MMR, Chickenpox, this vaccine does not prevent the disease you are vaccinating in any capacity. AND this disease does not cause anymore illness amongst that age group than a common cold. We do not mandate a flu vaccine, you should not be mandating the Covid vaccine without proper data supporting your case.

1/4/2022 10:22 AM

Covid does not pose a large enough risk to this age group to outweigh the risk of a brand new vaccine.

1/4/2022 10:18 AM

No mandate!

1/4/2022 10:17 AM

1. There is no evidence supporting the vaccination of healthy children with natural immunity, and there is overwhelming evidence showing that healthy children are at very minimal risk of severe complications from COVID-19. 2. The evidence shows that vaccines do not limit the transmission of COVID-19. 3. Given that natural immunity is always more robust and comprehensive in a healthy person than vaccine immunity, there are no benefits to be gained by vaccine mandates for otherwise healthy children with natural immunity or those who would likely develop natural immunity through infection and subsequent recovery. 4. Vaccine mandates are unconstitutional and a violation of parental rights.

1/4/2022 10:16 AM

There is not enough research regarding Covid vaccine effectiveness or side effects, especially in children. There is no reason to mandate Covid vaccine in children. If they are sick then they stay home. Mead schools have proven successful protective measures since 2020. The mandate is not needed for students enrolled in k12. Practice social distancing and please follow the science. In addition, the vaccine made me sick and we will not subject my 3 children to the vaccine. Both my husband and I are college educated. We will home school as needed to keep our kids healthy.

1/4/2022 10:15 AM

I did choose to vaccinate my 12 year old and 16 year old. Not because of a mandate from the governor but because I talked with their pediatrician and decided it was beneficial to them personally. I make health care decisions based on information from an MD I know and trust. I don't appreciate when politicians try to force everyone to comply with their opinions. Let people manage their own risk and their own families. I don't believe a Covid-19 unvaccinated child poses tremendous risk to other adults or children.

1/4/2022 10:15 AM

Our family will not only pull our children from in person to homeschool. We will also make sure to pick a private party home school and you will not receive our tax dollars. We will also encourage our fellow Mead parents to do the same. Do not do this and also push our governor to get rid of the mask mandate for our children. It makes no sense and is unfair to our children. There are schools all over the country where kids are not forced to wear a mask and there is no statistical data to show its helping. Help make them optional.

1/4/2022 10:11 AM

I will either seek exemption or homeschool my children

1/4/2022 10:11 AM

No Vaccine mandates for our children! Unless you want to see a massive exodus from public schools. Washington has a large Russian/Slavik population and most of us choose not to vaccinate our children especially from Covid and we definitely don't like mandates.

1/4/2022 10:07 AM

I truly wish that there were some sort of logic behind this. The virus and its affects on is actually less than a flu and it should be treated as such. There are only four states with a mask mandate, because the rest of the nation has honored individual choice along with science and research. Please, for the love of community, can we quit leading in fear and lead with love for all humans despite differences in opinions. We need to focus on health and fitness. Quick fixes are not the answer! Shots and pills are not the answers to our problems as a nation!

1/4/2022 10:06 AM

The masks are working well so it should be left as it is. Vaccinated people are still getting Covid so forcing a vaccine on our children at this point should not happen!! The Governor needs to leave the medical decisions to the parents.

1/4/2022 10:02 AM

Vaccines have been a way of life and required for education, but those vaccines are for diseases, not mutable viruses. It's not the same and should not be viewed as the same.

1/4/2022 10:01 AM

The vaccine is changing the way the body can process information!

1/4/2022 9:59 AM

Unreal they are looking at a mandate for a newer vaccine in children without research of long term side effects. How about you provide the numbers of children in our district that were hospitalized or died from covid? The numbers do not support a mandate of any kind.

1/4/2022 9:59 AM

The Governor's office can shove any covid mandate where the sun doesn't shine

1/4/2022 9:56 AM

Vaccines have not proven to improve a child's health or prevention of Covid.

1/4/2022 9:55 AM

There are many in our district that have had covid 19, their antibodies are more effective than the vaccine. Natural immunity must be considered. Stop and look at the vaccine injuries that are rarely talked about. The data isn't public. Multiple break through cases in the vaccinated.

1/4/2022 9:51 AM

Forcing children to receive a vaccine against an illness that has such little medical impact on the child is insanely irresponsible. Not to mention the fact that this vaccine is so new to this sub-set of the population, and the long term effects cannot be known at this point. As a medical professional I see that the risks far outweigh any benefit.

1/4/2022 9:49 AM

The idea that we are forcing a vaccination upon our children is wrong in so many ways. Are we showing children that regardless of whether you want to or not, the government feels that they own you and if you want to participate in American life you need to do as you are told. Masks and distancing is fine due to the risk of getting COVID, but a needle is too far.

1/4/2022 9:43 AM

It is unconstitutional and unlawful to mandate a vaccine for my children to be able to attend school and receive the education they require. This vaccine has only received emergency use authorization and its safety and efficacy have not yet been established through the full FDA testing regime.

1/4/2022 9:43 AM

Please don't do this to our children, the least affected population.

1/4/2022 9:41 AM

It is unconstitutional and unlawful to mandate a vaccine for my children to be able to attend school and receive the education they require. This vaccine has only received emergency use authorization and its safety and efficacy have not yet been established through the full FDA testing regime.

1/4/2022 9:41 AM

Vaccines are required for other illnesses and should be required for COVID. This will keep our community healthy and will keep our schools open and our students and staff healthy and safe. The only way to end this COVID threat is by vaccinating our society so we can reach herd immunity and mandating vaccines will help with this- then we can move on from COVID and the risks it has to our community.

1/4/2022 9:39 AM

To Whom It May Concern: This entire idea is a total infringement and stretch to consider "including" COVID-19 vaccines under WAC 246-105-030! It's also a total waste of tax payers money!! This WAC says it all....."IMMUNIZATION OF CHILD CARE AND SCHOOL AGAINST CERTAIN VACCINE-PREVENTABLE DISEASES"! I am focusing on the word "preventable" in this WAC. The message from the drug companies, our government, and local municipalities from the start was that the vaccine would "prevent" a person from getting and or spreading the COVID-19 virus in adults. Since then we have learned this to be untrue! Not only can vaccinated get COVID-19, they can also spread it just as easily. Not to mention every 6-12 month there have already been 2 widely known variants in Delta and Omicron and many more variants to come, as Coronavirus has been around for decades. It has already been proven the vaccine in adults did not prevent, stop, or even mitigate these variants in industries with 97%+ vaccination rates such as the NFL, NBA, and NHL to mention a few. All of which have had higher rates of COVID than the previous seasons/year with "choice" vaccinations! Or the Airline industry which is cancelling flights at unprecedented rate that they say is COVID related. Interesting, since almost every Airline demanded employees' be vaccinated! Chicken Pox, Measles, Polio, Mumps, etc. listed under WAC 246-105-030 in Numbers 1-11 are preventable with an early childhood vaccine regiment between parent and physician. Again, the word "preventable". This whole process is unnecessary! Allow choices to be made on all FLU vaccines, just as we have for decades. All this discussion, fear, and misuse of emergency power will create chaos, distrust, and massive un-enrollment in the public school systems of Washington State. Ultimately harming the public school system, the amount of staff they employ, disrupting our children's education, the quality of education, and community division! We have enough reasons and problems in the world creating division already, we don't need our local school systems creating more!

1/4/2022 9:37 AM

This is a virus that has been relatively mild in children. Forced vaccination them does not make sense.

1/4/2022 9:32 AM

The facts are these: 1) There are cures being suppressed in some states, Ivermectin and HCQ in early treatment have been effective. Doctors all over the world are saying this including but not limited to: Dr Simone Gold, Dr Stella r Simone Gold, Dr Stella Immanuel, Dr Vladimir Zelenko, Dr Mike Yeadon, Dr Robert Malone, Dr Peter McCullough, Dr Carrie Madej, Dr Judy Mikovits, Dr Sherry Tenpenny, Americas frontline doctors. 1,000, Pierre Kory, Richard Flemming, Dr david Martin, Geert Vanden Bossche, Dr Shiva Ayyaduri, Dr Vladimir Zelenko, Dr Mike Yeadon, Dr Robert Malone, Dr Peter McCullough, Dr Carrie Madej, Dr Judy Mikovits, Dr Sherry Tenpenny, Americas frontline doctors. 1,000, Pierre Kory, Richard Flemming, Dr david Martin, Geert Vanden Bossche, Dr Shiva Ayyaduri. 2) Children are not at risk of this virus. At most they have very mild symptoms. 3) Children are not super spreaders. The data proves all of this. Quit listening to Fauci and start doing research on these other Doctors provided.

1/4/2022 9:32 AM

Have yet to see any data indicating a need for children to be vaccinated for this virus. As these vaccines are operating under an EUA, they have (by definition) not undergone the standard test/evaluation process required by the FDA. The vaccine producers have been granted immunity from any side-effects resulting from their product. Knowing these facts, why is the state/state board of health pushing to vaccinate an age group that is minimally impacted (0-19 20.1% of cases, 2.6% of hospitalizations, 0.4% of deaths, from current SHRD.org data) for a virus is now proven to be declining (in severity of symptoms)?

1/4/2022 9:29 AM

River Malone one of the greatest of the vaccination says himself that the vaccination should not be given to children and teens and that is harmful to their health. It can damage the brain, blood vessels and heart and reproductive and immune systems. The children and teens were never at risk for this virus. It has a 99.5 percent survival rate. That's what was communicated in the beginning and is still correct information. The problem is we are not hearing factual information on the virus. I will not allow my children to attend a school that does not allow them to take in information and make logical choices or doesn't stand for freedom of thought and belief. That is not a true school anyway.

1/4/2022 9:28 AM

This is absolute garbage. Do not force vaccines on our children that have not been properly researched. Years of research goes into vaccines to make sure they are safe. The schools are doing a wonderful job keeping kids safe with masking, social distancing and hand washing/ sanitizing. I love Mead school district but will be pulling my kids if this gets pushed through.

1/4/2022 9:27 AM

I am not in favor of mandating a vaccine that does not get rid of the virus. I have been a long time supporter of the Mead District from when I went to school to now my children going to school. My kids ages range from high school down to Kindergarten and we have gotten all other childhood vaccine requirements. But the science does not prove that this vaccine stops the spread of covid or stops it from being transmitted. I do believe that some people are safer if they get the vaccine, but

that should be a choice we get to make. I will 100% pull all four of my kids out of the Mead District if this vaccine is mandated.

1/4/2022 9:26 AM

No one has the right to mandate anything. You have become a tyrant.

1/4/2022 9:26 AM

My child is already vaccinated. I plan on getting her a booster as well. Please keep the children in school this year. It is not fair for the SR's, to lose their SR year. My oldest daughter lost her SR year in 2020, and I do not want to see that happen to my youngest daughter this year. Thank you.

1/4/2022 9:18 AM

This crap has got to end!! Everyone needs to be responsible for themselves!!

1/4/2022 9:17 AM

This vaccine should be optional for our children, just like the flu shot.

1/4/2022 9:13 AM

Stop the irrational hysteria and crisis mongering of this flu. Further, NO agency/entity has the authority to dictate what I put in my child's body with the threat of exclusion, shaming, termination, or thinly veiled punishment in the form of baseless testing, which has about as much scientific validity as, we're learning, the vaccines themselves. This over-reach is frightening and un-American and should be a wake up call to any rational, independent thinking adult regarding the extent to which Governments, public agencies, and business will go to manipulate people to achieve their agendas. Stop this!

1/4/2022 9:13 AM

This is insane you are asking me to inject my son with something with zero long term research. Shame on you

1/4/2022 9:11 AM

No

1/4/2022 9:10 AM

Many parents, myself included, have reached the precipice. We will seek other means to educate our children that does not involve the public education route. This has been a eye opening experience, for sure. As Health boards and districts roll out restrictive mandates that infringe on our Constitutional rights, enrollment in public schools will decrease.

1/4/2022 9:08 AM

Science has proven that these kids do not need vaccinations.

1/4/2022 9:06 AM

There is no possibility I will give my kids an experimental shot.

1/4/2022 9:04 AM

Let's go Brandon!

1/4/2022 9:04 AM

No mandate until FDA approved in children.

1/4/2022 9:03 AM

I have a right as a parent to decided what I should do with my child. Isn't right to make a mandate for children to further their education publicly.

1/4/2022 9:02 AM

There is NO evidence that masks work!!! Our kids need to be un-masked NOW!!! The vaccines are killing people!!! They do more harm than good!!! The vaccines are spreading diseases NOT stopping them!!! DO NOT MANDATE POISON !!!

1/4/2022 9:02 AM

Children are not dying from COVID. If they are show us the proof. Mead needs to tell the governor to show us the statistics on how this is affecting our kids. It is way past time to move forward without masks or testing requirements.

1/4/2022 8:59 AM

I am worried about several cases of females I know that have had changes to their menstrual cycles following vaccination...I'm worried about what this means for my young daughter if she gets vaccinated, without knowing ANYTHING about long term effects on reproduction

1/4/2022 8:59 AM

Without vaccination this will never end but good luck with radicals in this school district. Can't win against Dr Facebook and the misinformation machine that is Fox News.

1/4/2022 8:59 AM

This so called "governor" can go kick rocks. You will not touch my child with a needle. I'm not willing to put my 9 yr Olds health at risk. Go kick rocks and eat dirt!!!

1/4/2022 8:57 AM

I believe that parents need to decide whether or not it is right for their child(ren). This should not be a government decision

1/4/2022 8:56 AM

I WILL not get my children vaccinated. I don't believe it is right for anyone to force vaccinations

1/4/2022 8:54 AM

mRNA-based vaccines haven't been sufficiently tested; long-term affects still unknown. It's obvious their efficacy falls far short of "traditional" vaccines that utilize the virus itself (inactivated or live-attenuated). If a traditional vaccine like Valneva becomes available, I'll consider allowing my children to be vaccinated with that.

1/4/2022 8:52 AM

I pay mead taxes. I love mead schools and want my children to attend but everyone should be able to pick what goes into your own body. Mead is about being your self and having different kids come together and learn. We dont all need to be the same. We can still be healthy and not Vaccinated.

1/4/2022 8:51 AM

I don't think it's constitutional do you have to vaccinate our children when the vaccine isn't currently being proven effective and we have yet to learn all of the current side effects for adults nonetheless children. Until they do a clinical trial in children of the Covid vaccination I am hesitant to give my daughter the vaccination even though I am currently vaccinated myself

1/4/2022 8:50 AM

Vaccines save lives. Vaccine requirements for public school have existed for decades. This should be a nonissue.

1/4/2022 8:49 AM

This survey did not address parents who vaccinated their kids but do not support a mandate. Covid-19 is statistically far less dangerous to kids than accidental drowning, so requiring them to be vaccinated does provide significant protection for them. I chose to vaccinate my kids, but do not support a mandate that forces people to be. The circumstances around the Covid vaccines is different than other required student vaccines, and that should be taken into consideration. In addition, cloth and surgical masks are what most students and teachers wear, and they have been proven to be ineffective against Omicron. The majority of KN95s are proven to be counterfeits, so that leaves n95s as the only effective masking option. If the Governor can provide those for every person in every school, then the mask mandate will be effective. If that can't be done, then we are just pretending that we are effectively tamping down the spread of Omicron. We either need to properly mask, or remove them entirely. Right now, very few students and staff are getting legitimate protection from Omicron. Covid mandates cause legitimate problems in schools and provide very limited benefits. Omicron changed the landscape, and we need to adjust.

1/4/2022 8:49 AM

Vaccine mandates are plain and simply unconstitutional. I am for the vaccine, I just do not agree with mandating them. Mandating health procedures is wrong. It is a personal health decision to be vaccinated.

1/4/2022 8:49 AM

We support COVID mandates as they contribute to keeping our kids/staff/community safe and more likely to be healthy. This is a public health issue and we'd prefer there be vaccine guidelines in order to better protect all.

1/4/2022 8:49 AM

My children will not be forced to get a vaccine by anyone.

1/4/2022 8:45 AM

Eastern Washington needs to stop being so similar to North Idaho.

1/4/2022 8:45 AM

If necessary, I will withdraw my children from public school and home school if the COVID-19 vaccine becomes a required vaccine to attend. I likely will not seek an exemption.

1/4/2022 8:44 AM

Watch what happens if you try this. I'm a property owner so every time you guys put something on the ballot for increase on my taxes I will vote no. I will continue to vote you people out until you get the message.

1/4/2022 8:44 AM

Just accept the obvious - COVID will continue to mutate faster than vaccines can fight them, so keep calm, wash your hands, keep social distancing, and live free.

1/4/2022 8:43 AM

I hope we have a school board that recognizes how these mandates are unconstitutional. I am vaccinated because I chose to be vaccinated. However, forcing people to be vaccinated, especially children is flat out wrong.

1/4/2022 8:43 AM

Public schools have a history of supporting and upholding vaccination mandates to ensure the safety of all of our children. Schools are not the place to politicize public health.

1/4/2022 8:41 AM

There is no statistic showing a child should get the vaccine. This is child abuse to require children to get the vaccine and I will go to the ends of the earth to prevent this and hold the people accountable that have allowed this to happen.

1/4/2022 8:41 AM

I have already removed my children from regular school and put them in North Star because of the pressure associated with the vaccine and testing. I hope that Mead takes a stand against this so I can one day put my children back in regular Mead Schools. If the mandate goes into effect I will remove my children from North Star

1/4/2022 8:41 AM

If exemptions are not approved we will be withdrawing our students from Mead if a vaccine requirement is implemented.

1/4/2022 8:41 AM

Already vaccinated

1/4/2022 8:41 AM

Stay Safe, Stay Healthy, Get Vaccinated

1/4/2022 8:40 AM

No

1/4/2022 8:39 AM

You cannot require anyone to take a drug they don't want. Especially an experimental one that it's proving itself to be useless and stopping the spread of covid.

1/4/2022 8:38 AM

N/a

1/4/2022 8:36 AM

Requiring Vaccinations via mandates is evil and un-American. Let people make their own choices and accept the consequences. The idea that unvaccinated young people are somehow harming old vaccinated people is absurd and illogical.

1/4/2022 8:35 AM

You are looking to mandate a vaccine that is an emergency use authorization product for a group that has shown not to have "emergency" issues with this illness. Even Dr. Fauci has recently stated hospitalizations in children are not because of covid, but with covid. Full testing has not been done on long term effects of this vaccine. The potential for protection may be overshadowed by serious negative issues in the years to come. ( look at myocardial issues already being seen in teens in our

area due to this vaccine as a start) We have had this illness, and we are following our doctor's advice to hold off on this vaccine. Our doctor, not the district or the state bureaucracy, is who we trust to guide our medical decisions. These vaccines have proven themselves to at best be a therapeutic, as they do NOT limit spread of infection. Those vaccinated are contracting and spreading Covid. This creates a situation where you are possibly mandating a vaccination to provide personal, not public, protection. If the only protection is personal, the state should not be mandating a vaccine in the name of public health. If there is a concern regarding adults fearing this illness being transmitted by students, then those adults should have the right to CHOOSE to be vaccinated to help their bodies handle symptoms of Covid. Our school district has shown it can handle this virus well, and will continue to do so with more ease as new therapies present themselves. If the science doesn't give you pause, I believe there will be lawsuits regarding this matter. I do not think it is in the best interest of the school district to place itself where it can be a defendant. It could be financially catastrophic.

1/4/2022 8:35 AM

My children are vaccine except AND if the state mandates a vaccine I will remove my children from public schools with out question.

1/4/2022 8:32 AM

Mead SD will be a very different and sad

1/4/2022 8:32 AM

Absolutely WILL NOT comply with COVID vaccine "mandates".

1/4/2022 8:32 AM

This is tyranny, forcing someone to inject themselves with a mRNA (not a vaccine)that companies have no liability for and won't give out data for (until 50 years from now) is a gross use of power. Also currently, the data has shown these mRNA shots do not work. They do not stop the spread of this virus that has a 99.9 percent survival rate. It's a flu and we should get back to living instead of bowing to lord inslee.

1/4/2022 8:31 AM

Don't you dare try and mandate our children! You will see homeschool enrollments skyrocket and your money train will dissolve.

1/4/2022 8:30 AM

This vaccine should not be any different than any other one required to attend school. It is for the safety of all. Mead School District should not be controlled by conspiracy theorists who do not believe in science.

1/4/2022 8:28 AM

That is completely inappropriate to require a vaccination for our young children before it's long-lasting effects have been thoroughly studied. I am not anti-vaccine, but it is highly concerning to be required to administer a COVID-19 into my young children in order to let them continue to attend school. Once the vaccine has been studied to the degree that the other required vaccinations have been, then I will be comfortable with that.

1/4/2022 8:28 AM

In chapter 246-105 states a vaccine-preventable disease. However, covid-19 vaccine is not a preventable course of action. My son and I as well as a dozen of individuals I know got covid from

those who had the vaccine and boosters. With that in mind the science does not support the "vaccine-preventable" statement in the pdf chapter 246-105WAC.

1/4/2022 8:27 AM

The governor has no right to dictate our freedoms. We live in a dictatorial state.

1/4/2022 8:26 AM

I appreciate the WA State Dept of Health and The Governor's Office for following the CDC and science based reports to keep our schools and communities safe. I absolutely support the vaccination mandate.

1/4/2022 8:26 AM

As a teacher, I appreciate the governor trying to keep us safe at school. Vaccines are already required to come to school; this one shouldn't be any different.

1/4/2022 8:25 AM

I will relocate my child out of state if this takes place - he is a stellar athlete with hopes of playing lacrosse in college and this would force our hand to have him in a place where he could continue to play and attend school.

1/4/2022 8:25 AM

To whom it may concern. Children have OVER a 99% survival rate with the covid virus. Covid is Labeled in medical book under common cold. Our family has already had the Covid 19 Virus. We have natural immunity given by God Himself. We will apply for religious exemption and if there will not be one. We will pull our kids out of school and either private school or home school. We will NOT comply with something that has not gone through the years of trials before it has been approved. I love my kids and I will protect them from anything made by man and that is totally unnecessary.

1/4/2022 8:24 AM

I have already had covid 19 & so have most families I come in contact with!!! I know there is validity in herd immunity. Once ppl get covid 19 the natural immunity is 27x stronger than the vaccines!!! (without adverse side effects!!)

1/4/2022 8:21 AM

This form of vaccination hasn't been in use long enough to rule out long term negative effects.

1/4/2022 8:19 AM

I will not vaccinate my children for Covid

1/4/2022 8:17 AM

Parents should have the only say. The governing body should not be allowed to mandate COVID vaccination. There is not enough concrete proof that the vaccine is safe long term.

1/4/2022 8:17 AM

This is getting out of hand. People should have a choice and these kids already have been stripped of a lot of there freedom in the last 2 years. There is no reason for this! I work in healthcare and this is not as bad as the media and the Governor make it seem. Yes people have died, but people die each year from the flu, car accidents and suicide.

1/4/2022 8:15 AM

Any measure that forces my child to get the COVID vaccine in order to attend public school will result in my child being disenrolled from the public school system.

1/4/2022 8:13 AM

no

1/4/2022 8:13 AM

5 and up is too young. I will vaccinate my kids who are over 12 but not my 7 year old.

1/4/2022 8:10 AM

Let the parent make this decision rather than forcing them to do it. The outcome would be a more positive one.

1/4/2022 8:10 AM

All four of our children (8-17) have already been vaccinated

1/4/2022 8:08 AM

Mandating a vaccine that has not had years of studies and been proven safe and effective is inhumane. I will refuse to conform and is an exception process is not withheld I will withdraw my child from MSD

1/4/2022 8:08 AM

My children are already vaccinated and will be boosted this month.

1/4/2022 8:08 AM

This will not age well in coming months and years. There is no reason to vaccinate children who are at almost no risk of bad infection. The myocarditis we know about and the many unknowns because of lack of long term use will haunt parents for their entire lives. Politicians probably not so much. This is an experiment on children which we have never done before with no rational reason behind it. Stop it NOW!!!!

1/4/2022 8:08 AM

this madness of mandates needs to end now. Once you bring our children into this the fight will be on and elected officials will start to lose their seats.

1/4/2022 8:07 AM

I don't think it's right to mandate the vaccine. The long-term affects are still not known. My eligible children ARE vaccinated, and I think it's important, but I think a mandate at this point is wrong.

1/4/2022 8:05 AM

Kids should not be vaccinated. They are at no risk

1/4/2022 8:04 AM

We do not see a difference between this vaccine being required from any other. The Mead district has always required vaccines in accordance with the state requirements. Having a required vaccine for COVID ensures inclusion for our most vulnerable populations in our schools who have weakened immune systems as well as keep the teachers safe and acknowledging that their health also matters, as does their families health.

1/4/2022 8:03 AM

I do not believe there is enough research on the safety and efficacy of this vaccine. It has already been determined that vaccine does not provide enough immunity according to the current research so giving this vaccine means that my children will have to continually be subjected to this vaccine potentially more than once a year for it to be effective. Without long term research on the safety and efficacy of these vaccines and the potential harm that could be done to my children I am very much against giving this particular vaccine to my children.

1/4/2022 8:03 AM

Students with natural immunity, as well as, religious beliefs that go against the nature of how this vaccine was developed should be heard and recognized and allowed to have an exemption for this vaccine mandate. Our Family had a direct death in the family because of the vaccine (proven by medical boards) and NOT covid itself. This has prompted a lot of insecurity and lack of confidence in this vaccine. Our Family will NOT be getting this vaccine; period!

1/4/2022 8:02 AM

I will not vaccinate my child to attend school, and how dare anyone mandate this vaccine to have an education. Our government is taking away our rights and freedoms. So no my child will not take this jab

1/4/2022 8:02 AM

Data shows that children and young adults 0-19 are not at risk of dying or of detrimental hospitalization from COVID. In Spokane county, there are 83,000 children who fall under the 0-19 age range and in a year of collected data, 4 children have been recorded as having died \*with\* COVID (Spokane County doesn't differentiate between dying \*with\* COVID versus dying "due to" COVID - <https://covid.srhd.org/topics/spokane-county-case-data>). That is statically zero. Spokane County doesn't release any other info concerning associated co-morbidities or BMI numbers for the deaths which could have been contributing factors. I will not risk my children's lives with an experimental and largely untested (especially long term) "vaccine" to make the Governor and the WA DOH happy because it bumps up their numbers.

1/4/2022 8:00 AM

This is such a disgusting over reach in the government. I will never give up parental rights just so my child can remain in a school.

1/4/2022 7:56 AM

I'm glad that COVID does not thrive in most children, nor do children seem to be more affected by COVID than other seasonal sicknesses (in some cases, less affected). I hope WA State does not over correct by forcing children to have an experimental vaccine that data shows has a higher chance of causing severe heart issues in males under 30 than severe COVID symptoms. The "cure" can be worse than the COVID. If no exemptions are allowed by the schools, and a growing number of children are hurt by the vaccine, absolutely expect lawsuits from parents. If no exemptions are allowed and a child is kicked out of school for not taking a potentially harmful vaccine, also expect lawsuits from parents for harming their children's education. Please help us all avoid this dangerous, costly mess by stopping this early on.

1/4/2022 7:54 AM

What are they trying to solve by requiring vaccination? Since vaccinated people can still carry the virus and also get sick, just like non-vaccinated people, what is the benefit, other than to the individual who is vaccinated who may not get 'as sick' as someone who is not vaccinated? Also, what does the data show about student data and COVID, specifically related to Mead school

district? How does a non-vaccinated student affect this data? There seems to be a larger issue with student mental health and connection to others, and by mandating something that results in students being forced into on-line learning puts them at greater risk than if they were to contract this virus. Risk of anxiety, depression, trauma, suicide, substance use, have increased and the most protective factor for these issues is connection, hope, sense of purpose, which is developed by attending schools in person.

1/4/2022 7:51 AM

Will future boosters when approved for ages 5 and up be mandated?

1/4/2022 7:50 AM

We support everyone getting vaccinated and believe it's the only way we'll ever put a stop to COVID for good.

1/4/2022 7:50 AM

I think the mandate is absolutely bogus and how dare one person try and dictate how and what we do with ourselves and our children. He is a joke as is the mandate

1/4/2022 7:50 AM

my Child is Vaccinated, but I don't agree with forcing anyone to vaccinate if they don't want to. It's freedom of choice. What our country is founded on.

1/4/2022 7:49 AM

Remove Mask Mandates for our children. They are at zero risk. Your leadership is pathetic and dictatorial.

1/4/2022 7:49 AM

My kids are vaccinated, I don't believe in forcing someone to obtain a vaccine if they feel against it. They should take extra precautions to stay safe and healthy. (Masking washing hands)

1/4/2022 7:47 AM

My daughters, age 18, and 21, are vaccinated. We also have a 4 year old. I believe that they should set the standard at 13 years old, when a child can make medical decisions for themselves.

1/4/2022 7:46 AM

I'm strongly against giving anyone, let alone young children, a vaccine that is known to cause health issues and even death. The cover -up on this data is disgusting!

1/4/2022 7:43 AM

This is a complete overreach of authority and not at all in line with what's best for the community and our children.

1/4/2022 7:43 AM

Why give something to a group of people really not in harms way ? The choice is individual not the states as to what people put in there bodies - what is wrong with you people!

1/4/2022 7:42 AM

My daughter failed online last year and is now on the honor roll due to in person learning and tutoring. Isolating her again will have devastating effects on her in every way.

1/4/2022 7:38 AM

I am VERY uncomfortable giving my 5 year old a vaccine where we do not know the long term effects. There should continue to be a "test to stay" option without a vaccine requirement.

1/4/2022 7:38 AM

Mandate it but take away the mask policy.

1/4/2022 7:37 AM

Still too soon for children!

1/4/2022 7:37 AM

I do not believe the govt has any right to force my child to be vaccinated because they go to a public school. Children are at such low risk that it is unnecessary anyway. They never have forced vaccinations that, by the way, have been proven to help on my children in the past. It's time THEY follow the science. Look at all the states that are open and see how they are faring. Not too badly. No mask policies even. It's time this nonsense ends. Vaccines have always been parent choice. Should remain so with the freedom to remain in public schools. The few that may be high risk should have option to take vaccine and wear masks and stay home schooled. The opposite should be true for the majority that is low risk. Stay in school. Option to mask and option to vaccinate without being demonized by others.

1/4/2022 7:35 AM

Unmask our kids!! We will NOT GET THE COVID VACCINE!! If Mead requires the jab we Will pull our kids out!! Masks don't work! Wake up this plandemic is over!!

1/4/2022 7:35 AM

requiring a vaccine for a virus that is not really hurtful to young children/kids is bad policy (unlike the other required vaccines that are currently present to be taken).

1/4/2022 7:34 AM

There should be no mandate. There is no evidence that children are at significant risk from complications to Covid 19. It has also already been proven that the vaccine does not stop you from getting Covid. Therefore, the risk of possible side effects from getting the vaccine should be left to a family decision.

1/4/2022 7:29 AM

Make the vaccine required for entry to school.

1/4/2022 7:29 AM

I think it is a good idea to have vaccination requirements to help keep our schools open and to protect kids, teachers, and school staff.

1/4/2022 7:28 AM

Do not mandate vaccines for this age group

1/4/2022 7:27 AM

Decisions like this should be left up to the parents. We as a family remember 4 years ago when our daughters class of 25 had 20 kids home sick with a cold. Nobody was freaking out then. It's that time of year.

1/4/2022 7:24 AM

Government does not have the constitutional right to mandate you put any type of drug in an individual, especially one that is proving to be deadly or causing life threatening risks to both children and adults. The actual deaths of Covid are found to be much less than the Flu as evidenced by the CDC itself stating the deaths from the crisis have been over-estimated. Bottom line, have some common sense.

1/4/2022 7:21 AM

I am ok with a vaccine mandate as long as it follows the same procedures as other vaccine mandates with exemptions allowed.

1/4/2022 7:20 AM

My children are already fully vaccinated.

1/4/2022 7:20 AM

The vaccine is not fully FDA approved. For the health, safety and spiritual warfare of my child I will take a stand.

1/4/2022 7:20 AM

I do not feel that there has been enough research conducted in regards to the long term effects on children that are vaccinated. First it was a 2 dose vaccine, and now boosters???

1/4/2022 7:19 AM

This is no different than any other vaccine required for school age children and it makes sense to require it. Don't let the culture war political crap make this decision for you.

1/4/2022 7:19 AM

The science does not support a need for children to be vaccinated against Covid. All of my children have had it, exhibiting cold symptoms. This decision should not be mandated, and should be a private family health. Vulnerable populations have sufficient resources to protect themselves. Mandates in this matter are non-scientific political over-reach, and a disgusting breach of public trust.

1/4/2022 7:16 AM

Please tell me how many students in Washington State have died or somehow are in danger of COVID....? Shouldn't we have a data driven reason for wanting to vaccinate our children.

1/4/2022 7:15 AM

As a teacher, I do not want to be forced to continue with vaccine's and boosters.

1/4/2022 7:15 AM

Mandating an experimental shot for children (or anyone for that matter) is reckless, unconstitutional, against any and all scientific facts presented showing that our children have nearly zero risk from this virus, against the Nuremberg code and should result in termination of any and all duties for our government officials, teachers, school administrators, doctors and whoever else is trying their best to advocate for this shot. I will 100% pull both my kids from Mead Schools if this happens and likely move out of state.

1/4/2022 7:12 AM

I believe that effective alternatives for those requesting exemption should be allowed but strict provisions should be made such as wearing an N-95 mask all day and daily or twice weekly testing at the expense of the parents.

1/4/2022 7:06 AM

I am vaccinated but until there has been at least a 5-10 year study to see how this affects us in the long term I am not interested in giving it to children.

1/4/2022 7:04 AM

Take your own advice and "follow the science".

1/4/2022 7:02 AM

Do not agree with forced vaccine mandates. Especially on young children.

1/4/2022 7:00 AM

Our children should not be forced to get the covid vaccine in order to go to school. Our kids love going to school but they've made their own informed decision and their own opinions about this vaccine and they are not interested! Kids need to be in person for school and ours will not be happy if they have to attend homeschool just because they don't agree with a vaccine mandate. Can't we just let our kids be kids?? The mask mandate is already ridiculous and they shouldn't have to wear them in the first place. If it becomes required we will pull our kids out of school. They're hearts will be broken but they are also not afraid to stand up for what they believe in. We hope for the sake of all children it will not be enforced.

1/4/2022 7:00 AM

Our children should not be used as Guinea pigs for an experimental gene therapy drug that continues to prove ineffective and does nothing to stop the spread of the virus.

1/4/2022 6:59 AM

Let me start by saying, I know what I say doesn't matter. I know it will NOT be taken into account and you will not listen to my feelings about the matter. However, with that being said. I am not even comfortable with taking the vaccine yet, I have given my children (because they are legally old enough to make their own decisions about their future health - as also advised by the admins at Mead) the choice to vaccinate or not. For as long as I can remember, schools have allowed "anti-vaccers" to send their children to school. We are NOT ANTI-VAC.. we just believe that the COVID vaccination is not for everyone. Schools have NEVER required FLU vaccinations, HPV, or birth control...BECAUSE those are choices between parents and children... THIS should also be a CHOICE. MY children are not comfortable at this time to take a vaccination that has not been proven over TIME to be effective and not harmful.. And that point ALONE is FACT!! That is not a theory, this is a new vaccine that we just simply do NOT know

1/4/2022 6:59 AM

No mandates period! We're adults, we can make our own decisions!

1/4/2022 6:59 AM

If the doctors offices are making \$500 per covid vaccine, how much is the Governors office making? STOP the mandates!

1/4/2022 6:57 AM

I think it should be mandated and then hopefully masks can be removed.

1/4/2022 6:56 AM

This is taking away our health rights and disregarding hippa laws. What happened to our medical freedom? Mandating is not a free country.

1/4/2022 6:54 AM

This is unconstitutional and wrong. It isn't a vaccine. If it truly was a vaccine we would see numbers decrease. The true nature of this shot is only to subside symptoms, and was never designed to "cure" COVID. This is a fact. How and why would you require a shot that isn't even proven or designed to eliminate COVID? Under the constitution of the United States you cannot force us to put this poison into our children. I have known 3 people personally that have died from getting this shot, within days. It is not safe and to require us to do something that isn't even proven to be safe or effective is wrong morally, ethically, and constitutionally.

1/4/2022 6:52 AM

This mandate is unconstitutional and we can not standby like sheep while the wolves try and make all these bogus mandates. There is no mandate for students to get the flu shot; so why does this have to be different? These "vaccines" aren't even FDA approved in the states at this time. Why spend so much time and money on pushing this on our kids....this should be OPTIONAL no matter what! I WILL NOT subject my children to a "vaccine" where I don't know the long term affects. This could ruin their future and even their lives! God has given us natural immunity and we should trust in Him to take care of our bodies. If this does become mandatory, it would be a huge disappointment to many families and teachers. I ask that you please don't mandate this but make it optional for students.

1/4/2022 6:47 AM

Your not in charge of my children and until there is a long term study of the vaccine. I will not get my kids vaccinated.

1/4/2022 6:45 AM

When the vaccine doesn't prevent the disease as do other vaccines - it should not be mandated. When this vaccine does not prevent children from wearing masks or being tested for Covid than again - it is not a proven vaccine. I'm a doctor and I find it so odd there is a vaccine mandate when the vaccine's efficacy is so poor that it does not prevent contamination / spread. The mask mandate is equally ludicrous as the label on the masks themselves states it prevents nothing.

1/4/2022 6:41 AM

Children are extremely unlikely to die from Covid, as with the flu. Vaccines for Covid possibly reduce severe symptoms and do little to nothing for transmission. Let's not forget they are still Emergency use with limited trials. Vaccine choice should exist, medical tyranny.

1/4/2022 6:38 AM

If public schools do not require vaccination, then vaccinated students should receive accommodations to attend fully vaccinated schools within each district.

1/4/2022 6:37 AM

n/a

1/4/2022 6:37 AM

Please do not require COVID vaccines for our children.

1/4/2022 6:36 AM

There is scientific proof and evidence that covid-19 and it's variants do not present a danger to children, there is nearly no deaths of this age group and very little evidence that vaccines are needed. This is a clear over reach by the Governor and our federal government to control and dictate parents right to choose what goes into their child's body. This is not about health but about control. I am vehemently against this mandate for forced and coerced covid "vaccination" of our children. There is no long term studies of the effect these so called vaccines will have on our children or any human that receives them. This is a violation of the constitution and basic human rights.

1/4/2022 6:34 AM

The vaccine should be optional for those who desire and those who don't should have an equal and fair alternative so that they can still participate in school like the rest of the kids.

1/4/2022 6:34 AM

Governor Inslee is a tyrant and needs to be stopped.

1/4/2022 6:33 AM

My family will not get the vaccine, period. We have all had COVID and our natural immunity is working fabulously! Natural immunity is 100 percent stronger than the deadly vaccine. Myself and my family have been exposed multiple times to people who had Covid, some actually living in our own home, and we have NEVER isolated, worn masks, or kept socially distant. The result was zero reinfection with Covid due to our natural immunity! The vaccine is the result of satan influencing big pharma and the government. Our eyes are open and we will not be a part of satan's plan. God made our bodies able to fight this virus and we will trust in Him!

1/4/2022 6:33 AM

Please be the voice of the people and make this craziness stop! It is proven that vaccines do not work, so we have to ask ourselves what is the government really trying to do. Gain control. Let each person make their own decision and let's get the government out of our lives.

1/4/2022 6:32 AM

There's no science to support compulsory vaccination of children against COVID. None.

1/4/2022 6:31 AM

Our kids are already vaccinated, as of June because they are individuals who care not only for ourselves. The decision was theirs.

1/4/2022 6:25 AM

Science has proven throughout history that those who obtain a virus develop natural antibodies against it. The fact that we are not testing for antigens and just mandating a shot is absurd! There is enough data of health risks to my children regarding this shot that I will not allow my children to receive it. They have had Covid and have antibodies against it. Why is this not factored into these decisions?

1/4/2022 6:22 AM

Let's go Brandon!

1/4/2022 6:19 AM

I will not be vaccinating my children

1/4/2022 6:19 AM

The government is taking away our rights to decide what to do with our bodies and our children's bodies. What happened to: my body my choice? Parents need to work, but I will figure out another way. I will not risk my child potentially being harmed or death by a vaccine that has injured thousands and people are dying. People are also getting covid and dying with the vaccine and I would rather keep my children safe from a drug that is not necessary.

1/4/2022 6:15 AM

I am strictly opposed to the vaccine mandate. I will never allow my child to remain in a school that forces choices in order to attend.

1/4/2022 6:13 AM

Although my family does vaccinate due to being in the medical field, I don't think it is right for the Governor to mandate vaccines. It is un-American to not let people have freedom to make their own choice. There should always be an exemption policy in place.

1/4/2022 6:08 AM

No

1/4/2022 5:45 AM

Life must move on. Vaccines have been created. We can't wait indefinitely for this. It is unlikely that SARS-CoV-2 will be eradicated. This pathogen should move to a similar protocol as we have for mumps and other infectious diseases. If there is an outbreak, vaccines must be required to attend school.

1/4/2022 5:41 AM

Praying for you all to have wisdom and compassion. This can be such a messy issue.

1/4/2022 5:23 AM

My kids are fully vaccinated and will continue to be. I personally know of 5 people now that have died from covid that were not vaccinated. The latest was a 33 year old man that died and left his 5 and 9 year old. He refused to get the vaccination and now his kids are fatherless. Before he was put on the ventilator he pleaded with his family to get vaccinated. The one that died before that was the same story. Until everyone does what they need to this is not going to end. Until people who refuse to vaccinate lose someone close to them they will continue to believe that this won't affect them. Please make this end for everyone.

1/4/2022 5:09 AM

In the United States we have the freedom of choice. Don't take our freedom away. Children deserve the right to go to school. Vaccines should be the parents' right to choose.

1/4/2022 4:59 AM

I will not get my girls injected with an experimental vaccine, ever.

1/4/2022 4:55 AM

The vaccine has not been successful in preventing individuals from contracting covid-19. The CDC is now saying now that it is useful because it lessens the symptoms, however, children already experience mild symptoms. Please reconsider a required vaccine, and let us decide what's best for our children as their parents. Thank you.

1/4/2022 4:41 AM

This is an absolute outrage!! As a parent it is our right to CHOOSE if our child receives vaccines....and ALL health related decisions!! How dare ANYONE, especially some no good govenoner, to try and make those decisions!! In my opinion there is not enough known about this "vaccine" to feel safe putting it into my child, or myself. You are backing parents into a corner and ruining LIVES! Stop this maddness! LET US CHOOSE, YOU HAVE NO RIGHT!!

1/4/2022 4:12 AM

Everybody should be able to make their own choice. Parents should not be forced to go against their conscience and get their family vaccinated. We all should be using common sense and keep our kids home from school if they are sick, make sure we are washing our hands, and use proper precautions as with any other virus/disease.

1/4/2022 4:11 AM

You have set statewide policy that has negatively impacted our local community greatly. Don't make this same mistake, please allow each Distract to operate independently and at their own discretion.

1/4/2022 3:54 AM

It seems premature to consider mandating Covid vaccines for school attendance. I just read an article that while Omicron cases are skyrocketing, deaths due to Covid are not. I read another article last week saying that mandates are not working to stop the spread of Covid (certainly seems true giving recent spikes). I am concerned that the emphasis is not on deadliness of Covid but simply its spread. Let's wait to see if numbers of deaths warrant any further measures.

1/4/2022 3:32 AM

My children, not Mead school district's or the state's. WE will decide if they get the Covid shot. We are not against the vaccine just the mandate. This is another potential overreach by Inslee.

1/4/2022 3:19 AM

There shouldn't be a mandate for school children. The shot has health risk for adults that aren't talked about and if you really care about the children then this shouldn't be a consideration. Taking school away from a child because of a new shot that doesn't get rid of covid mandate is just crazy to me. Where is the concern for the education?

1/4/2022 3:01 AM

COVID-19 is like any other disease (i.e. MMR) in which children are required to be vaccinated in order to attend public school. I see no difference between a COVID vaccine mandate and the other mandated vaccinations. It would also be nice if public schools would require the Flu vaccine/shot as well. Thank you.

1/4/2022 1:30 AM

I whole-heartedly support required full vaccination and boosters. I also think that appropriate KN95 or N95 facemasks should be provided with some of the federal funding provided for Covid mitigation.

1/4/2022 1:25 AM

We are in 100% agreement with a mandate. If you look at history, the ONLY WAY to eradicate these types of viruses is to develop vaccines. Or else smallpox, measles, yellow fever, chickenpox, cholera and diphtheria would be as prevalent in 2022 as the Coronavirus currently is. This should never have become a political issue as everyone is focused on the wrong things. Those that can,

HAVE TO for those that truly, truly can't. And if it comes down to mandates, which it has, then politics HAS TO get involved. There are at least a few individuals reading this who have studied history, and understand the premise that when more people are protected, the virus has fewer and fewer places to go. And it is eradicated. Just like Polio. Only thing that makes sense right now.

1/4/2022 1:20 AM

Just wondering what the outcome is when children this young get their vaccinations the side effects of it

1/4/2022 1:01 AM

Vaccines have been required for many other diseases/illnesses and for good reason. Don't let those who are misinformed or politically motivated pressure you into not doing the right thing. They can send their children to another district or private school if their anti-vax stance is suddenly so important to them.

1/4/2022 1:00 AM

These vaccines are not working. They are not preventing anything There are inaccuracies throughout the entire CDC reporting system. Mead School District 354 has pioneered and implemented an extremely effective plan and protocols that have been a huge success. Yet the Governors Office lacks the courage to acknowledge our success. Consistently choosing a power mandate stance. Implementing restrictions that don't work, masks that >100 diverse studies prove they are detrimental to our children. When your so called Covid Vaccine is proven to be as effective as the measles and small pox measures we can then trust they are needed. What is the rate of danger to the K-12 demographic? Where are the huge risks that these children have? There aren't any. Get your eye on the Issue SBOH!! Provide and promote effective and available treatments you have missed the issue and the threat entirely. You have failed these children don't even think we will allow you to double down and harm them any further. One of many who are done

1/4/2022 12:28 AM

My kids are 11 and 9 and have already had their first dose and will getting their second dose of the COVID vaccine in the next week

1/4/2022 12:25 AM

Please make the covid vaccine mandatory. Just like a dozen other vaccines that are required to attend school. The non vaccinated are burning out the medical care industry.

1/4/2022 12:24 AM

They are completely unnecessary and not safe

1/4/2022 12:23 AM

You are walking a very thin line in regards to our rights stated in the constitution of these united states and in the eyes of God. How dare you think it is your right to use your position of power to make people inject anything known or unknown to be safe or harmful, short or long term into their own bodies, let alone the bodies of their children. It is the equivalent to rape. May God be merciful on the souls who mandate the rape of our children and ourselves. Through Christ all things are possible. So if you're scared, go to church.

1/4/2022 12:18 AM

I believe there should be a place here where you ask if people have already opted to vaccinate.

1/4/2022 12:17 AM

Vaccines are not right for everyone. Mandates are not acceptable in a free country. My child's health is my choice.

1/4/2022 12:16 AM

There truly isn't anything so far to justify the tyrannical behavior of the various governments to mandate and control the public's lives. This country is not founded on this behavior. It must stop.

1/4/2022 12:09 AM

Children of this age are not high risk for Covid and should not be required to take the vaccine

1/4/2022 12:08 AM

No

1/3/2022 11:59 PM

I will not vaccinate my children, enough is enough you are already ruining our children's education with all of this.

1/3/2022 11:51 PM

None

1/3/2022 11:46 PM

My immediate and extended family will be pulling our children from public school if this is mandated. Children absolutely do not need this shot. It does not prevent infection or the spread of Covid.

1/3/2022 11:43 PM

This is so wrong on so many levels.

1/3/2022 11:34 PM

Vaccines work. Keep our children safe

1/3/2022 11:28 PM

This absolutely should be a requirement, given how fast and easily the omicron variant is spread, masks and washing hands isn't enough to protect our communities and it's our responsibility to ensure that our children, school staff and support staff, etc. stay safe. If you don't want to vaccinate your children, then you shouldn't have the luxury to send your children to school.

1/3/2022 11:27 PM

One of my children had moderate reactions to several childhood vaccines, and a severe reaction to the first MMR, it took me 3 years to finally get a medical exemption for her. I will not be vaccinating her because of her history, and knowing how difficult it is to get a medical exemption, I don't see much hope for a covid exemption. We are not anti-vax (we are vaccinated ourselves) but I cannot risk my child having another severe reaction. I would end up having to pull her out of school if this became a requirement, which she would be devastated about.

1/3/2022 11:26 PM

Bring on this fight, I am prepared.

1/3/2022 11:26 PM

If there is a mandate I will go through as many processes as I can to object to the mandate. This will likely mean lawyers and lawsuits and my financial resources. I am prepared to take on this challenge if need be; and I will have plenty of help from community members as well.

1/3/2022 11:22 PM

Covid mandates for schools and our children is a crime. Look closely at the statistics, there's NO reason for children to get this vaccine. Children are not dying of Covid. They have a very high survival rate and their symptoms are very mild. It should NOT be required for our children to attend school. If this is made mandatory I'm sure there will be many students moving to homeschool.

1/3/2022 11:18 PM

It should be the parents right to decide whether or not there children get the vaccination. Not the Government!!

1/3/2022 11:18 PM

The Governors mandate is ridiculous and we the people are sick of all the communist BS this state is trying to pump into our kids. you will loose,kids,funding,teachers.and staff!!!!!! we will not live scared!!!! funny how all other issues such as colds,flu,bronchitos,pnuemonia, and just about everything else just dissappered over the last couple years it is ridiculous. People are sick of it the crap dont work natural immunityPERIOD!!!!

1/3/2022 11:16 PM

Please look at what other states are doing. There does not appear to be evidence that mandates are needed. Children are not dying at higher rates in other states due to COVID, many of states don't even have mask mandates in schools any longer. This should not be about politics. Look at the anxiety and mental health problems we are causing.

1/3/2022 11:16 PM

I will 100% not be told my child; MY child is required to have a vaccine that I do not know the long term affects of. If this is the case and it moves forward, I will be removing my child from the school district and moving forward with contacting my attorneys to move forward with a lawsuit, as this is unconstitutional.

1/3/2022 11:16 PM

Be aware of how this affects the children. Please accept exemptions. Some students may have a reaction to it, others may have special needs and be sensitive, and so forth. A choice should be made and not forced.

1/3/2022 11:14 PM

You will lose 3 more students if you do this! I've already withdrawn my youngest because of the mask mandate!

1/3/2022 11:11 PM

I believe vaccinations are a important step in reducing the risk and stoping the spread of this virus.

1/3/2022 11:10 PM

I am absolutely against the Covid vaccine mandate for myself and especially my children.

1/3/2022 11:08 PM

No

1/3/2022 11:04 PM

No person should be required to vaccinate. This is a personal decision that should be made by the individual. Although I am vaccinated, many people, including children and teens, do not want to get the vaccine. That should be their right as an American citizen.

1/3/2022 11:02 PM

To force this uncertain fate upon Our children is not acceptable

1/3/2022 11:00 PM

The risk of side effects are too great at this time to want to get my children vaccinated. They have gotten Covid already with no side effects. Why would I want to vaccinate when they can still get Covid after vaccination. Don't require vaccinations. My children are doing fine without them.

1/3/2022 10:59 PM

Mandating an experimental shot for children (or anyone for that matter) is reckless, unconstitutional, against any and all scientific facts presented showing that our children have nearly zero risk from this virus, against the Nuremberg code and should result in termination of any and all duties for our government officials, teachers, school administrators, doctors and whoever else is trying their best to advocate for this shot. You should be ashamed of yourselves for promoting this entire idea and educate yourselves from the actual doctors who are being censored while trying to relay how unbelievably immoral it is to give this unapproved, unknown consequence, money-driven substance.

1/3/2022 10:56 PM

Please tell them that they are absolutely insane if they decide to make a Covid vaccine mandatory in order to attend public school!

1/3/2022 10:53 PM

Let parents and their family care providers make the best decision for their families. This is a constantly mutating virus like many others and the vaccine isn't going to make it go away like polio which is a disease that can be eradicated.

1/3/2022 10:47 PM

Leave the mandates out of schools.

1/3/2022 10:47 PM

It's unfortunate that we are not using logic and real science to make these decisions. There is so much political pressure surrounding this pandemic, that no one really knows the truth. My truth is that I have yet to see experience a death of someone solely as a result of Covid. I don't see ANY signs that children of any age EVER have any significant symptoms even if they do "test positive". My 89 year father-in-law live in our home. We have treated Covid like any other illness (the flu). He has already contracted Covid and came through it just fine 1-2 week recovery (just like the flu). Could the flu possibly take his life - absolutely. Do we live in fear of it, absolutely not. These mandates and controls are becoming out of hand. If we would test for the flu and publicize the results and deaths each year like we are treating Covid- we would have the world scared to death- but we don't. People calmly choose to get the flu vaccine or not. We limit contact when our kids contract it and then move on with life. The fact that we are even having these discussions is really proof that government mandates are out of hand! Seriously, we must wear a mask into a restaurant until we sit to eat and then we can remove it- so Covid is not effective below 6 feet? Common sense has gone out the window. Thanks for all your help in gathering our opinions- we really do appreciate you and know that you are in a "no-win" situation!

1/3/2022 10:47 PM

I WILL PULL ALL 4 OF MY CHILDREN OUT OF MEAD PUBLIC SCHOOLS IF VAC ARE REQUIRED ..... PERIOD

1/3/2022 10:47 PM

My child has already been vaccinated and will get the booster as soon as it is approved for her age group. I believe the COVID vaccine should be included with the other required vaccinations. Students already have a list of mandatory vaccinations in order to attend school. This should not be anything different than the MMR, chickenpox or polio vaccinations. I'm in full support of MOST students getting vaccinated for the good of the small minority of students and teachers who cannot be vaccinated due to existing medical conditions.

1/3/2022 10:45 PM

It's our choice as the parents to decide if the vaccine is needed for our children. Not the Governors or WA department of health.

1/3/2022 10:40 PM

I feel we should have more options than just Pfizer for children. Additionally, for many children the flu is worse, yet we don't mandate flu shots. With omicron we are seeing that vaccines aren't making much of a difference for younger people. The state should allow exemptions for those children who already had covid, as studies have shown natural immunity is just as effective as vaccine immunity, if not more so.

1/3/2022 10:40 PM

Na

1/3/2022 10:38 PM

Mandating experimental medical treatments for children is blatantly unethical. The science clearly shows that the vaccine does not stop the spread of the virus and therefore accomplishes nothing, except to make some people feel good about themselves. Please look at the actual science. Stop politicizing our children's health. Unelected bureaucrats are not qualified to make personal health choices for millions of individuals. Bottom line: the vaccines don't work and mandating it for children against a parent's better judgment is unethical.

1/3/2022 10:37 PM

Medical decisions should be up to individuals. There are risks to taking the vaccine and not taking the vaccine. Is the state or school district going to assume responsibility if there is a adverse reaction to the vaccine? COVID is very low risk to children. Leave people alone and let them decide what is right for them!!!!

1/3/2022 10:36 PM

I am for everyone having their own choice, however, if it means getting over this pandemic I will do whatever steps necessary to do so.

1/3/2022 10:36 PM

Yes, you're an idiot Inslee. A selfish, soul sucking and lost person. Quit picking on the children.

1/3/2022 10:33 PM

My child was already vaccinated but that was my decision for my family. My decision has no bearing on others decisions

1/3/2022 10:33 PM

All my children 5 and up are vaccinated. My husband and I are in the medical field and follow the advice of medical groups.

1/3/2022 10:33 PM

N/a

1/3/2022 10:32 PM

I have huge concerns regarding this mandate. First of all, everyone's situation is different and this should be a personal choice. In addition, there are people who have medical issues to where it is recommended they don't receive the covid "vaccinations". Mandating this is unconstitutional and against all scientific facts. Children aren't dying from covid and you still have to wear a mask whether vaccinated or not, then continue to receive booster shots that don't work. In addition, the pharmaceutical companies are not held responsible for any medical issues that arise from the vaccination. Will the State Board of Health be held responsible for medical issues that occur due to forcing our children to be jabbed with something that hasn't been around long enough to know long term effects? Who will be held responsible? The covid "vaccination" does not prevent further disease like the other vaccinations do like the polio or MMR. The polio or MMR vaccinations only require one or two injections in their lifetime. The covid "vaccination" requires two, three or four in one year and they still don't work in prevention of spreading and catching the virus. We don't know long term effects the mRNA has on our children. There is also a 99% + survival rate. Why are we giving our children a "vaccine" when they aren't dying? Nothing about this makes sense. It has become political and our children are paying for this more than anyone with the mask mandates at school and now the potential to be forced to get something that doesn't work. Requiring us as parents to put my children at risk by getting a vaccine that doesn't work is reason enough for me to pull my children from the public school system. Please make the right choice for our children. They are the future of our country.

1/3/2022 10:31 PM

No

1/3/2022 10:31 PM

I believe the vaccine will not prevent my child or myself from being infected by Covid. My daughter has no issues that inhibit her immune system. She is healthy and so am I so the .01% chance of death is not worth the risk of the potential negative long term consequences for taking the vaccination which have yet to reveal themselves. Thank you but no thank you. I will gladly home school my daughter if this mandate goes through without batting an eye.

1/3/2022 10:30 PM

I will also pull her if exemptions are not accepted next year. I would also be will to stay with Mead Options which is what we did this year.

1/3/2022 10:30 PM

My family is absolutely against forced vaccinations. We have natural immunity that needs to be taken into account. Mead school district needs to fight against this mandate.

1/3/2022 10:28 PM

Vaccines have been required for children to attend school for years, Covid vaccination should be no different. Mead prides itself in quality education, do what's right and follow the educated professionals, scientists leading on this issue. Do what's right for the community.

1/3/2022 10:27 PM

I have 3 kids enrolled in Mead School District and all 3 are fully vaccinated against COVID-19. The science is clear: the vaccines are safe and effective. Let's prioritize the health and safety of our community and mandate vaccination for in-person cohort education! Time is of the essence as new more contagious strains propagate and threaten to destroy our healthcare systems. Please don't delay!

1/3/2022 10:26 PM

I think the Covid vaccine decision should be left up to the parents of the children. The state should have no say in what is right for individual families.

1/3/2022 10:26 PM

We are on the brink of withdrawing our 3 children as it is now with the mask requirement. If there is a vaccine requirement and no exemption, we are out for sure. Please fight with us school board!

1/3/2022 10:22 PM

There is not enough longitudinal data on COVID vaccines for children to make them mandatory. Other required vaccines have decades of data to show benefit outweighing risk. Please wait on a mandate until enough research exists to make a sound scientific decision and not a reactionary one.

1/3/2022 10:22 PM

I do not feel vaccines should be mandated. I have chosen to vaccinate my daughter for vaccines that have been out for decades based on medical research. However, I do not believe mandating is okay. It should be a choice. Additionally, I would like to see more research on these vaccines for children. It is too new with not enough information for me to make an informed choice on the covid vaccine for my child.

1/3/2022 10:21 PM

Keep up the good work. Vaccines save lives.

1/3/2022 10:21 PM

Covid poses virtually zero risk to children and there are many doctor stating that the risk of vaccination exceeds the risk of covid. Our children are not lab rats nor are they scapegoats to keep other safe. This is untested technology we should not be unleashing on young children who have to live their entire lives with potential side effects.

1/3/2022 10:20 PM

This is ridiculous!

1/3/2022 10:20 PM

Don't gamble with long or short term side effects on our children by giving them a "vaccine" that has been proven thousands of times over that it is not in fact a vaccine at all. It "may" reduce symptoms for some but our children are at an extremely low risk for experiencing hospitalization or death from covid. I continue to be disappointed by conversations on a vaccine requirement as a sweeping measure that give no consideration for natural antibodies or other measures to reduce spread of covid.

1/3/2022 10:18 PM

What is the point of vaccinating kids when COVID poses virtually no serious risk to children? If the answer is to protect adults like teachers...they should be vaccinated so why should they care?

1/3/2022 10:18 PM

There is no need to do an experimental vaccine on our children. Children are at a lower risk of dying from Covid.

1/3/2022 10:16 PM

There has not been enough long term testing to know the effects the vaccine had on children. I am a teacher and am vaccinated so that I can have a job to provide for my family, I am not afraid of the vaccine. The survival rate of Covid worldwide should be enough to show that children should not be required to get the vaccine. I have lived a good life and would like my children to continue to do so, without the worry of vaccination issues coming later in life. We mask and follow the rules, but the vaccine required for children is where we draw the line. My four children and I have been in school this entire time after the shut down and distance learning, my husband also is a contractor/real estate agent, so everyone is out and exposed. We believe healthy habits should be instilled in helping our bodies fight Covid, and being smart at gatherings and staying home when any symptoms arise. If vaccines are mandated, I will homeschool my children, it should be the family's choice. There are too many discrepancies and contradictory rules, mandating the vaccine to attend school just pushes people even more over the edge.

1/3/2022 10:16 PM

No

1/3/2022 10:13 PM

I am vaccinated, but am very uncomfortable vaccinating my children with such a new vaccine. I was okay with the mask mandates and the social distancing for our kids, but again, it makes me very uncomfortable as a parent to be required to have my kids receive a new vaccine. I also do not appreciate being put in a position where I feel the need to consider making an unthinkable and burdensome decision of withdrawing my children from Washington schools in order to try to do what's best for my children and family.

1/3/2022 10:13 PM

Enough with forcing us to get this vaccine. This vaccine has not been out long enough. Stop taking away our freedom!!!!

1/3/2022 10:11 PM

I am a health care professional who is pro vaccination. However, I do not believe we should force children to receive a vaccine that has no long term efficacy or safety data behind it. Parents should not be forced to decide between putting an experimental vaccine in their child or harming their education.

1/3/2022 10:11 PM

Children are at a low risk getting Covid or dying from Covid knowing this as a healthcare worker. Also, working in a healthcare environment I have personally seen severe side effects from the Covid vaccine in both children and adults. I do not believe that my child needs the vaccine in order to attend school. This violates our rights as U.S citizen. I will withdraw my children if this becomes in effect.

1/3/2022 10:11 PM

Both of my children (9yr and 12yr old) are already vaccinated. It's like any other vaccine that is mandated for school and I would like this pandemic to end. My husband and I work with Covid

patients. We need to do our part to stop the spread. I'm also just fine with the antivaxers staying away from my children and homeschooling. Thanks for the survey!

1/3/2022 10:11 PM

This is unacceptable. Mandates are ridiculous and I will not have my children forced into this.

1/3/2022 10:10 PM

Mandates are not laws. This is still in the experimental stage. Definitely not enough long term data. Too many unknowns

1/3/2022 10:09 PM

The RCW referenced about the vaccine states "vaccine preventable diseases." The Covid-19 vaccine does not prevent anyone from getting Covid-19. I know more people who have been fully vaccinated with boosters who have had Covid-19 than unvaccinated people. This is not acceptable. I will be pulling both my children from the Mead school district if they mandate vaccination. Trust me that the majority of parents in the mead school district will be doing the same. This is a bad move. Your teachers will be out of jobs because there will not be enough children attending school.

1/3/2022 10:09 PM

This is ruining my sons life. He has no friends and no desire for life like he used to before Covid restrictions have been forced. His well being has diminished by these blanket decisions.

1/3/2022 10:08 PM

There is no long term studies that these vaccines are safe for kids Also you can still get and spread covid even while vaccinated. Kids aren't not being hospitalized from having covid. I have special needs children that are non verbal and do not like needles and won't even wear masks. I will not vaccinate them even if they mandate it.

1/3/2022 10:08 PM

Our 3 children -all in the Mead school district - are already fully vaccinated. We've committed to doing our part to keep ourselves and others healthy and safe.

1/3/2022 10:07 PM

I support parents choice

1/3/2022 10:07 PM

We will enroll our kids in private school if there is a mask or vaccine mandate.

1/3/2022 10:07 PM

No

1/3/2022 10:06 PM

CDC reports 558 kids have died from Covid in the US. There is 73 million children ages 5-18 in the US that is a 0.000008 death rate. That along with no long term known side affects. Data not being released for 55 years. Please do the right thing and say we will allow our parents to parent their children. How many kids have had and recovered from covid already. (natural immunity) More than 5 kids die per day from neglect and abuse 1800 per year 3 times that of Covid.

1/3/2022 10:06 PM

My children are already vaccinated and we'd love to see more children get vaccinated.

1/3/2022 10:06 PM

I believe that vaccines for Covid-19 are in the beginning stages people are still contracting the virus unlike the other vaccines. There will be thousands of kids leaving the public schools to be home schooled I know quite a lot of people that want the freedom to choose. I firmly believe in God and I leave things like this in his hands have we lost faith well I haven't and I will never lose faith in he who created me.

1/3/2022 10:05 PM

I refuse to vaccinate my kids no matter what

1/3/2022 10:05 PM

It's obvious Covid-19 is a tricky virus. My mom in her late 60's got it (Has RA, in treatment for breast cancer, and other health issues) and recovered quickly from it. Was hospitalized for about 5 days for oxygen and observation. Another family friend passed away from it, he was in his 30's and healthy. So it's a weird virus. However, I don't agree with mandating the virus at any age. As I'm writing this, I tested positive for it two days ago and fully vaccinated. 4 of my 5 family members tested positive, including my one son who is not vaccinated 16 years old). My 13 yr old who is vaccinated tested negative. Should we encourage the vaccine? Yes, it seems to reduce the severity of symptoms, but is not a vaccine that rises to the effectiveness of being mandated.

1/3/2022 10:04 PM

It should still always be a choice.

1/3/2022 10:03 PM

My children are already fully vaccinated

1/3/2022 10:01 PM

Ridiculous that this is even being considered!

1/3/2022 10:01 PM

With the many side effects the vaccine has been proven to give young men and young women, forcing young men and women to receive the vaccine would not be for the safety of the students since there is a very low death rate for young men and women. Why would we force side effects on our young men and women? This makes no sense.

1/3/2022 9:58 PM

I am a primary care provider here in our community and fully support vaccination. I do not support a mandate for the COVID vaccine. Please leave this decision to be made between patients, parents, and their medical provider.

1/3/2022 9:54 PM

My body my choice.

1/3/2022 9:54 PM

I don't see this vaccine to be effective so to be required for student's to have is an issue for me and my family

1/3/2022 9:52 PM

We can not require patents to give a vaccine that does not have full FDA approval. It needs more clinical trials with long-term studies before it would be right to mandate it.

1/3/2022 9:52 PM

This will end all public school systems. Leave our children out of this political agenda. There is absolutely no science or statistical data to represent that children are in need of any additional vaccines of any kind in regards of their health or well-being.

1/3/2022 9:51 PM

I don't believe people who have been following previous vaccination requirements should be allowed to exempt themselves from Covid vaccine mandates. WA state has mandates vaccines for school age kids for years and this is no different. People who have not been exempt in the past should not be exempt from the Covid vaccine.

1/3/2022 9:49 PM

Thank them for all their work in keeping students in school without a mandate. How tragic it will be if students have to be vaccinated for a virus they have had and continue to be vaccinated with boosters for the same virus every 6 months to a year? Please tell them that most children have had the Covid virus and most likely have a natural immunity that may surpass the wisdom that doctors have today. Please ask them if they are 100 percent sure these shots will eradicate this virus for good in children and not actually cause a drop in life expectancy over the next 50 years due to these vaccines and not the actual virus? Thanks for your time. Please do not mandate this vaccine in the next 10 years. Be still and know what the actual affects are in children!

1/3/2022 9:49 PM

This is absolutely ridiculous and Absurd. The vaccine is in experimental stages and doesn't even work work and you think it would be ok to do this to our youth? Shame on you. Covid has very little affect on youth and mandating the vaccine is absolutely reckless.

1/3/2022 9:48 PM

Vaccinations are a safe way to protect our community and save lives. The benefits of vaccinations FAR outweigh the risks, proven by the % of hospitalized patients and death from not being vaccinated. Thank you for saving lives with the vaccines. Just like we don't see polio anymore because of the polio vaccine that was invented to protect and save people's lives. Thank you.

1/3/2022 9:48 PM

N/a

1/3/2022 9:46 PM

Requiring this 'emergency use' vaccine is absurd. The side effects of the vaccine is worse than the side effects of covid. Quit following the money.

1/3/2022 9:46 PM

People should not be forced to vaccinate their children in order for them to attend school.

1/3/2022 9:44 PM

Our children are already vaccinated

1/3/2022 9:43 PM

Leave options for people: maybe to test, be remote etc

1/3/2022 9:43 PM

To vaccinate (our) children without parental consent, is illegal, for any purpose.

1/3/2022 9:39 PM

I completely disagree with any "vaccine" mandate

1/3/2022 9:39 PM

Leave my children alone. You're overstepping your authority and risking the lives of our children while simultaneously circumventing parents rights. The government has no authority to tell parents what medical decision to abide by concerning their own children.

1/3/2022 9:39 PM

The idea of a vaccine mandate for children is unconstitutional, a violation of their freedom of choice to choose what they put in their body & we will not have any part in it!

1/3/2022 9:38 PM

We should leave children out of this mandate. The safety and long term effects are still not known. It also does not seem like a necessity as children are not greatly affected. Furthermore, this is an endemic now. It is Rudy loud and unnecessary to force vaccinate children.

1/3/2022 9:38 PM

Experimental drugs have not and will not be used on my children. I hope deeply that people would just educate themselves and dividing a nation over this is wrong on so many levels.

1/3/2022 9:36 PM

Thank you for following the science and keeping our children safe.

1/3/2022 9:36 PM

I'm not sure if I'd even apply for an exemption. I have no interest in doing experimental vaccinations on my kids.

1/3/2022 9:33 PM

My child is already vaccinated

1/3/2022 9:33 PM

Kick rocks.

1/3/2022 9:33 PM

This injection has not had enough time to undergo enough studies to inform us of its side effects. Why would Mead school district enforce such a experimental injection that may have life long consequences? Or is it money? Does it all just boil down to money? Why doesn't the Mead school district do what is right by it's students and see what the parents and families do for the school district? This experimental 'vaccine' has been linked to severe and life long consequences. I will not inject my children with an experimental vaccine!

1/3/2022 9:32 PM

When do we as a people get the right to decide for ourselves? We have heard the possible future of vaccinations for young ages, that aren't effected by Covid really at all.

1/3/2022 9:31 PM

I should not be forced to put something in my child's body for them to be able to be in school and get an education.

1/3/2022 9:31 PM

The MEAD district has been wonderful for our family from elementary to middle school. I don't want to withdrawal them and disrupt everything they know to be normal and safe. The measurements taken so far by the district (masks, sanitization, ect) has kept our children safe, please do not support and move forward with this requirement. It is not safe and research shows that it doesn't benefit children the way it does those that are higher risks. Thank you

1/3/2022 9:29 PM

It is absolutely ridiculous to want to push a fast track, long term tested vaccine on children.

1/3/2022 9:28 PM

If a Covid vaccine mandate for schools is made, we will be homeschooling our children.

1/3/2022 9:28 PM

No, not okay with this mandate.

1/3/2022 9:27 PM

CHILDREN DO NOT NEED TO BE VACCINATED ! WAKE UP

1/3/2022 9:25 PM

I will withdraw my students if a vaccine mandate is implemented. I will move out of state before I will ever vaccinate my children for COVID. The risk of COVID death is extremely low in school age children. Jay Inslee can kiss my \_\_\_\_!

1/3/2022 9:25 PM

This should be a parental choice, not a government mandate.

1/3/2022 9:25 PM

Since you can still spread covid, even if vaccinated , requiring it makes no difference

1/3/2022 9:25 PM

I am concerned about the risk of myocardial and should not be forced to pit my child at risk for this.

1/3/2022 9:23 PM

Do not force this upon our children with so little research as to its effects. Kids are not high risk. It is unnecessary. Do not force us to take our children to school in Idaho, because we will.

1/3/2022 9:22 PM

Continue masking and processes as mead has been doing. Please do not make the vaccine a mandate for children

1/3/2022 9:22 PM

The governor has no business stating what vaccines the children should receive.

1/3/2022 9:19 PM

All kids and parents must get vaccinated to ensure everyone's safety.

1/3/2022 9:19 PM

Ive already withdrawn my children from public school

1/3/2022 9:18 PM

My child will not be a test patient for this trial vaccine. This will continue to be a choice for our family and will not be forced upon us.

1/3/2022 9:18 PM

Our kids are already vaccinated. I don't know if this survey is written in a way that would include that information. Maybe it's irrelevant.

1/3/2022 9:17 PM

Let's go Brandon

1/3/2022 9:16 PM

I do not feel there is enough long term data to force this on our children. It is not the same as with adults, in my opinion. There is too much risk with future growth and developments for the state to force this vaccine at this time. Flu shots are not mandated and COVID should not be either.

1/3/2022 9:16 PM

No

1/3/2022 9:16 PM

The vaccines don't work, and are dangerous. My children will not be vaccinated.

1/3/2022 9:15 PM

Please really think of the loss of enrollment should this be made mandatory. The flu also infects and can kill yet the flu shot is not mandatory to attend school. Children are not dying due to Covid.

1/3/2022 9:14 PM

No

1/3/2022 9:14 PM

I would like prior covid status to be included in the information.

1/3/2022 9:14 PM

No

1/3/2022 9:13 PM

We strongly believe that this is an individual family decision that does not need state input.

1/3/2022 9:13 PM

As Covid weakens with each variant and the CDC even reduces guidelines I don't understand with COVID's hold over us coming to an end Washington state is considering mandating the COVID vaccine for our children. As a parent who loves my school district and being involved in so many ways it will break my heart to pull my children. But if this vaccine is mandated that's the choice my family will make. We've had COVID and as such will not be vaccinating our children against something their bodies are already naturally working to keep them safe from.

1/3/2022 9:12 PM

Freedom of health choice and not to be told I don't have a choice

1/3/2022 9:11 PM

Freedom of health choice and not to be told I don't have a choice

1/3/2022 9:11 PM

This is ridiculous. We have never required flu shots, why are there mandates for a virus that is shown to have a below 1% mortality rate for children. It was unconstitutional to require this vaccine for employees, do not mandate it for the children. This is an experimental vaccine still.

1/3/2022 9:11 PM

Families need to decide for themselves and public education. Should not be withheld. Vaccines are not stopping COVID, don't let vaccines stop school!!!!

1/3/2022 9:11 PM

Follow the science. This doesn't effect children. If you actually look at the numbers children don't need the vaccine. Plus, it is proven over and over again the vaccine doesn't work. Quit trying to control everyone.

1/3/2022 9:10 PM

The Covid shot is not a vaccine. It is a genetic experiment and the government will not be experimenting on my 4 children! There are serious side effects to this shot including death. My family has all had Covid and we did just fine with it. We have our own antibodies and we do not need artificial antibodies put into our system!

1/3/2022 9:09 PM

I believe that children should not be required to be vaccinated to attend public school. Research has shown that whether or not you are vaccinated you can still spread Corona virus to others and data has shown children have much milder symptoms and very low death rate after they have contracted the virus. What isn't known is the effects the vaccine may have on young children in the long run.

1/3/2022 9:09 PM

It does not prevent covid, a common cold so stop forcing us to get the shot!

1/3/2022 9:08 PM

It is ludicrous to mandate a 'vaccine' that does not prevent infection or transmission.

1/3/2022 9:06 PM

The covid vaccine should be required as should all other routine vaccines. It's public school so our children should all be protected from preventable diseases as a standard

1/3/2022 9:06 PM

If Dr Malone is saying don't get the vaccine, then it really should NOT be a mandate ever. I would gladly pull my kids if a mandate happens, even if an exemption is available. I am the parent, I make the best choices possible for MY child. Shame on you for implying that thousands of parents are ill-equipped to make medical choices for their families.

1/3/2022 9:05 PM

My Child is vaccinated and thank you for caring about her.

1/3/2022 9:05 PM

This is a farce. A huge over reach. Completely ridiculous

1/3/2022 9:03 PM

Mandates are unconstitutional. They will not be forced upon myself or my children.

1/3/2022 9:03 PM

I, along with many other concerned Parents across this State have grave concerns about adding the Covid-19 Vaccine to the list of required vaccinations amongst children of any age. Requiring an mRNA injection that DOES NOT PREVENT DISEASE was never the intent of the legislature in it's delegation of authority to the State Board of Health to approve a schedule of immunizations for "vaccine preventable diseases". As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. Children are not at high risk of death from Covid-19. The latest variant comes to the majority of them as cold symptoms or nothing at all, and that INCLUDES children who's parents made the choice to vaccinate. Requiring me to put my child at risk by getting a vaccine that offers perceived safety rather than actual immunity- is reason enough for me to pull my child from the public school system, and that is what I will do if this becomes a requirement.

1/3/2022 9:02 PM

All my kids are vaccinated!!! I would have them get vaccinated again if need be.

1/3/2022 9:00 PM

FAFO

1/3/2022 9:00 PM

Stop controlling out of fear, and let us parents make decisions for our own kids!

1/3/2022 8:59 PM

I will pull my child from school if vaccine mandates are imposed on my family.

1/3/2022 8:59 PM

Mandates are ridiculous. We will be pulling our kids the moment mandates are put in effect.

1/3/2022 8:59 PM

First, this is an EUA vaccine and cannot be mandated. The research for this age group before approval only lasted 2 months that is not sufficient to know if there are long-term effects. Until someone analyzes and reports on the data in VAERS no one should be mandating any vaccine. According to the research cloth masks are ineffective in preventing Covid and the cost of using N-95 masks is prohibitive with the secondary problem that they should not be used for long periods of time and can't be reused. Masks are also inhibiting learning by covering everyone's face. It also appears that Omicron is so mild but so contagious it might end the pandemic by herd immunity and all this worry might be for naught. Unless the Department of Health can provide strong research that backs up anything they recommend they should not be allowed to mandate anything. We are tired of people using their opinion as fact when making decisions.

1/3/2022 8:59 PM

The vaccine mandates go against the nuremberg code. Those who mandate it will be prosecuted for crimes against humanity and free will.

1/3/2022 8:58 PM

Vaccinations should be left to the parents decision not the state. I see this much like the flu vaccine as it should be an optional vaccine not a requirement for school.

1/3/2022 8:58 PM

Freedom of choice is what America is SUPPOSED to be all about! Try teaching our kids and our countries future leaders the constitution!

1/3/2022 8:58 PM

Not at this time

1/3/2022 8:58 PM

Our government has no business playing doctor!!! This is not a vaccine it is a genetic experiment and no one will be experimenting on my children!!!! It is a gene therapy experiment and it is also in violation of the Nuremberg code!!!!

1/3/2022 8:57 PM

continue wearing the mask

1/3/2022 8:57 PM

I will seek exemption for my children but if that is not an option I will withdraw my children from the Mead School District.

1/3/2022 8:57 PM

This is completely unethical

1/3/2022 8:57 PM

It should be a personal choice for the kid, parent and DR. This is not for a Governor to tell a school what to put in our kids bodies. It is proven to not have been tested as other vaccines have and it isn't working after a year of almost everybody getting it. The vaccinated are getting sick more than unvaccinated and we can't be mandated to keep taking medicine that doesn't work. It is unconstitutional and against our civil rights to mandate an untested vaccine and use people as your test subjects. Why can't you just leave the kids alone since they have always been the least vulnerable. There are bigger issues in the State and world right now that need looked at, not a virus that is a 99% survival rate. The masks also aren't working, that has needs to be dropped. You can't stop airborne viruses.

1/3/2022 8:56 PM

We need to stop punishing our children. Why are they subjected to the most strict guidelines when they are at the least risk?

1/3/2022 8:56 PM

This absolutely should be part of the required childhood vaccines required for children to attend school. Far too many of us who follow the science and work in healthcare and who live/work with those struggling with COVID are being called liars by those who either don't understand the science or don't WANT to attempt to understand. Please don't allow the politicalization of this public health pandemic cloud your judgement on what the right thing to do. Our children have to be immunized from multiple PREVENTABLE diseases beside starting kindergarten. This is no different. Please don't be bullied by the ignorant and angry. Make it a mandate.

1/3/2022 8:55 PM

Stop treating the citizens like your peasant servants. We have rights as Americans! One is freedom of choice and as a parent it is MY job to do what's best for my child not your decision to Make.

1/3/2022 8:54 PM

No

1/3/2022 8:54 PM

We need to take a firmer stance against the moronic anti-vaccine community that is endangering our children and communities. These people need to be accountable for overwhelming our health care system and should be given the lowest priority for any emergency care. Additionally, we need to incentivize insurance providers to deny coverage for anyone without a valid medical exemption for the vaccine.

1/3/2022 8:53 PM

It should absolutely not be mandated. It should be a choice and not pushed on our children. It's our body our choice.

1/3/2022 8:53 PM

With no exemption option, this denies parents the right to medical freedom and choice. Risk of serious covid illness in children is so minimal, the need to vaccinate is not based in science and statistical probability. If the vaccine protects the vaccinated, there should be no fear of the unvaccinated and no need to mandate it for those who don't want it. Teachers can vaccinate if they feel that protects themselves because they are in a "higher risk" age group.

1/3/2022 8:52 PM

Will not vaccinate my child for Covid. Already contacted it and are against this vaccine.

1/3/2022 8:51 PM

I look at this as any other vaccine that has been required for all 5 of my children to attend school. This is just like mmr, polio, chicken pox ect. Both of my kids that remain in the school district are currently vaccinated at this time.

1/3/2022 8:49 PM

I will never inject an experimental poison into my children because the school system requires it. More children are having adverse effects or death from these awful vaccines than any child actually contracting Covid. Vaccines do not stop the spread of Covid nor do masks. As far as I am concerned mead school district is participating in child abuse on a daily basis. Do what is right and protect our children. No vaccine or mask mandates. STOP the abuse.

1/3/2022 8:48 PM

Simply prove the safety of the vaccination for our children

1/3/2022 8:47 PM

No.

1/3/2022 8:47 PM

The age group the state is considering forcing to take the COVID vaccine is the same age group that are not having detrimental effects from the virus. There has been no long term testing on the vaccines effect on a developing body. There have been people fully vaccinated and had the booster who are still getting sick with the COVID virus. Some medical experts have said of this last strain (omicron) they do not know how effective the current vaccine is at protecting the vaccinated. It seems odd to me that almost 2 years into this "Emergency" is when the state is considering taking medical decisions away from children's parents and pediatricians to force an issue, when the life

cycle of the virus is becoming less deadly. To me this seems like an unknown risk versus a not guaranteed reward. I do not think the risk is worth the reward.

1/3/2022 8:47 PM

I will make my childrens health care decisions and if that means sending them to a private school or home schooling, my family is fully prepared to do so. I already know several families that have withdrawn from Mead school district for all the lousy calls being made in the last couple years. Total disappointment

1/3/2022 8:47 PM

This is absolutely insane and disgusting to even consider! The schools will have hardly any students left because we are prepared to withdrawal our kids! Shame on all of you!!

1/3/2022 8:47 PM

You do not want death on your hands. Myocarditis has a fatality rate of 10-30% in children. (Source = myocarditisfoundation.org) and less than one quarter of one percent chance of death from Covid. Source = CDC

1/3/2022 8:46 PM

The vaccines don't really work as vaccines. They don't prevent the "vaccinated" from Covid, therefore don't prevent transmission. As parents we have the right of choice. That should not be taken from us. I know a 14 yr old who was vaccinated against parental knowledge at school in Alabama who ended up in a coma. We should have a choice with obvious risk.

1/3/2022 8:46 PM

We will NOT VACCINATE our 5 children with this so called "vaccine." This is the reason two of our boys are pulled out of school already and we will pull our other boys out immediately if there is such mandate.

1/3/2022 8:44 PM

My kids are already vaccinated, as we all should be.

1/3/2022 8:44 PM

I would like to highly urge that this COVID-19 vaccine not be mandated. This vaccine is only approved on an emergency bases, it's not been proven affective against new strains. If approved this will be just one more major hurdle being placed in front of our children and their access to education.

1/3/2022 8:43 PM

No

1/3/2022 8:42 PM

I think that children under 12 already have a laundry list of mandatory vaccines required for school attendance. The Covid vaccine has not been able to slow or stop the spread, young children are not high at risk, and the virus itself is a SARS variant which is similar in severity to the flu if not treated properly or infects a vulnerable person.

1/3/2022 8:42 PM

I will not be vaccinating my students. They have had Covid and have antibodies. The natural antibodies after getting Covid are higher than a vaccinated individuals antibodies who has not had Covid.

1/3/2022 8:42 PM

No

1/3/2022 8:41 PM

it is not normal to force people to be vaccinated, people should have the right to choose, very much that this right will be taken away from us

1/3/2022 8:41 PM

Pfizer has a criminal history of injuring people for profit. It is terrifying to think that we would just play along. The only reason we know this was happening is thanks to whistleblowers, which most Big Pharma companies are currently lobbying to punish. In what world do we leave our children in the hands of the criminally negligent?

<https://www.justice.gov/opa/pr/justice-department-announces-largest-health-care-fraud-settlement-it-s-history>

1/3/2022 8:40 PM

I feel that forcing parents to vaccinate kids is against not only religious rights, but also constitutional rights. This vaccine is still new and I for one do not feel safe giving it to my family at this time. We have family members that get severe reactions to vaccines and feel it would be more risky with them. We have immune compromised members of our family that for one would not be safe to receive a vaccine. We feel that this is completely against our rights to force people to become vaccinated for school as this is not been tested enough for us to feel safe with the vaccine, and do not feel it's even proven to be effective in preventing individuals from getting COVID. The current vaccine has been proven not to prevent Covid-19, but with the newest strains, the science shows that they are basically useless, preventing nothing. The failure rate of current vaccines against the newest strain, Omicron, is shown to be better than 90%. Until science can create an effective vaccine, I will refuse to inject my children with a useless substance. We wish to keep our students in school to gain the social skills, and interaction that they need as children, but not to the extent that we will get the vaccine at this time, or in the foreseeable future.

1/3/2022 8:39 PM

Do not implement vaccine requirements. I'll move out of state if needed and you'll lose more taxpayer funding.

1/3/2022 8:38 PM

If there was a vaccine that ensured that we would not be infected with covid or spread covid than I would define be on board with vaccinating my children.

1/3/2022 8:38 PM

Vaccinations are safe and important for student and staff health.

1/3/2022 8:38 PM

Stop calling it a "vaccine." It's a therapeutic, at best. And what happened to "my body, my choice?"

1/3/2022 8:37 PM

No

1/3/2022 8:37 PM

Vaccine mandates violate the NUREMBERG CODE. We will withdraw from Mead if you support this in your district whether we are vaccinated or not.

1/3/2022 8:37 PM

Kids are already vaccinated. I believe it should be a personal choice. We should all do what we are comfortable with and do it with respect of others. It is a personal choice to make it to the other side of this thing... And if they chose wrong that's on them.

1/3/2022 8:37 PM

If this mandate is forced on our children, we'll withdraw our children from the mead school district.

1/3/2022 8:37 PM

Student is already vaccinated. Am opposed to continuous boosters being required.

1/3/2022 8:37 PM

My children are already vaccinated. The fact that already vaccinated is not an option in any of the questions above leads me to believe you are looking for very specific answers. We have had vaccine mandates to attend school for at least 50 years. There is zero reason the covid 19 vaccine should not be included in what is already required to attend school. This message is not for the governors office but for the mead school district. Please stop pandering to a specific political group and start actually doing what is best for students.

1/3/2022 8:37 PM

We are strongly against Covid vaccine mandates. We should have the right to decide what's best for ourselves and our children.

1/3/2022 8:36 PM

This should not be mandated for children. This should be a decision for families to make on their own and not impact their ability to attend school.

1/3/2022 8:36 PM

I'm a proponent of the vaccine as a individual and personal decision. I'm fervently against a mandate! Federal and State Governments need to respect our Civil liberties!

1/3/2022 8:35 PM

This should be between the student, Dr and parent. Just like the flu vaccine there should be choice and left to the discretion of the parent/student and the teachers. In healthcare, we can't require everyone we treat to be vaccinated...and we get to be pretty up close and personal...leave it up to each individual and let them take on that responsibility.

1/3/2022 8:35 PM

Don't do it

1/3/2022 8:35 PM

Please dont allow a misinformed, vocal minority dictate public policy regarding the safety of my children.

1/3/2022 8:34 PM

Parents should have the right to choose if and when to vaccinate their children. This covid vaccine is still new and some people may not be comfortable yet. The survival rate for children and covid is high and this should not be forced on people. Education or vaccines? Why do parents have to choose. This is going too far. Freedom of choice!

1/3/2022 8:34 PM

The virus is still being caught and spread, even by the vaccinated. There is not enough information on the vaccine, especially with the constant boosters, for me to feel safe enough to have my children vaccinated. Furthermore, antibodies against the virus should be considered as an alternate to the vaccine. We have a right to public education as well as medical autonomy, and nobody should be forced into any medical decision in order to receive a public education. My children will absolutely be pulled from any district that forces the Covid-19 vaccine.

1/3/2022 8:34 PM

While I am fully for vaccinations, I still would not want to vote for something that forces others to do the same.

1/3/2022 8:34 PM

There is no benefit to doing this for children. There is a hereditary heart issue in my family and the vaccine shows to cause issues at times in children so as a responsible parent I cannot put my children at risk.

1/3/2022 8:34 PM

My child has special needs and is Type 1 diabetic, also already had COVID, there is no trial on people like him so you cannot fully assure me that this is safer for him than getting COVID again or that getting the vaccine will keep his peers safe, or tell me long term affects it could have on him. I'm fine with my child staying home from school if he is sick and with follow guidelines he needs to take if he ill but at this time I will not have my child vaccinated for Covid and trust that he has immunity from having Covid already. No I'm not an anti Vaxer and actually work in healthcare and been in the trenches since the pandemic started but I do fully believe that I know what's best for my child and getting the vaccine is not it at this time. Thank you.

1/3/2022 8:34 PM

As a first responder, I was mandated to get the vaccine in order to continue to serve my community. I am not thrilled about other people telling me how to care for my child, especially with regard to what is being put into their body.

1/3/2022 8:32 PM

It is NOT a vaccine, it's a shot or jab. You don't take a vaccine every 3-6 months. Kids are not at risk. These kids are so screwed up because of this.

1/3/2022 8:32 PM

We plan to remove our children from the Wa public schools if the COVID shots are mandated and/or the testing and masks requirements continue.

1/3/2022 8:31 PM

Nobody including students should have to take a covid vaccine because the government says so. People have had 2 shots and need boosters. Now children who have had the shots might need a booster. Yet are still contracting Covid and spreading it. I believe in the herd immunity.

1/3/2022 8:30 PM

Our children have already been vaccinated for covid-19. Along with all the other normal vaccines children need to have a healthy life and attend public school. We care about our children's well being along with other children, teachers, and support staff. It's our duty as citizens to recognize the importance of community and what it means to be apart of that.

1/3/2022 8:28 PM

I think the vaccine mandates should majorly focus on high school kids.

1/3/2022 8:27 PM

The "vaccine" is clearly not stopping people from getting infected nor stopping them from spreading the infection. At most the "vaccine" is a therapeutic for at risk individuals which the vast majority of children are not.

1/3/2022 8:27 PM

Until a vaccine is fully approved by the FDA (not just emergency approval) We are not comfortable vaccinating our kids. "Follow the science" works both ways. The drug approval process was developed through thorough scientific vetting and should not be ignored or disregarded.

1/3/2022 8:27 PM

Safety of the children and belief in science should be the motivating factor, not political stances and a ridiculous belief in false narratives. The vaccine works and saves lives. In any other time in our history, people would jump at the chance to save others and themselves. If the science and research proves the vaccines effectiveness, then absolutely mandate it's use.

1/3/2022 8:27 PM

Mandate the vaccine!!!

1/3/2022 8:26 PM

Covid vaccines do more damage in children than the disease it claims to prevent. The conclusion of data points to justify the Covid vaccine for children and for adults for that matter, are reasonable. However, the data points are the problem, they have been skewed, manipulated and at times falsified by any reasonable standard.

1/3/2022 8:25 PM

Just like with the other vaccines, parents have a choice to have their child vaccinated or have an exemption. Choice is important. We all want our children safe and in school, but it shouldn't be because we are forced to vaccinate our children.

1/3/2022 8:25 PM

This entire situation continues to defy logic, facts, science and human rights. Please keep fighting this absurd ideological tyranny.

1/3/2022 8:25 PM

Unethical to require experimental vaccines with known side effects for children. Their rates of covid infection are low and usually mild.

1/3/2022 8:24 PM

There is no way I will give this vaccine to my kids. That will be the line for my family and my kids will be pulled from school. I'd hate doing this, but it would have to be done. I'd this happens, my family will be devastated.

1/3/2022 8:24 PM

I am not putting something in my child's body I do not agree with nor have myself. COVID has a 99.9% chance of survival for kids and its absolutely insane we are even discussing this for our children. We will gladly move away to a state that has better morals and standards if this goes through.

1/3/2022 8:23 PM

No

1/3/2022 8:23 PM

No

1/3/2022 8:22 PM

No vaccine mandates!

1/3/2022 8:22 PM

Please require students to be vaccinated. Kids already get vaccinated for polio, measles etc. These vaccines made these diseases rare. People need to be vaccinated so we can all take off our masks and get back to normal. This also protects teachers and their families. I fully support a vaccine mandate for school age children.

1/3/2022 8:21 PM

Mandating a vaccine on our children that has been rushed through the system and met with as much speculation as this has, is wrong. Period.

1/3/2022 8:21 PM

Please don't mandate this. Will an exemption even be possible through WA state?

1/3/2022 8:20 PM

Stay in your lane and let me worry about making decisions for my children.

1/3/2022 8:20 PM

We sincerely hope there will be no mandates, but we still choose to vaccinate.

1/3/2022 8:20 PM

Both my kids are vaccinated. We require vaccinations for other serious and potentially life threatening illnesses that impact the public health safety and school community. This is no different. I support the school vaccination mandate.

1/3/2022 8:20 PM

No

1/3/2022 8:18 PM

We have been requiring vaccines for the good of Public safety since vaccines were created- not sure what has changed. vaccines save lives- and protect society from long term consequences from disease. We have a vaccine schedule for a reason-

1/3/2022 8:18 PM

Kids don't need the vaccine to be educated in person

1/3/2022 8:17 PM

Until the long term side effects of the vaccine are known, this should NOT be mandated for children (or anyone for that matter).

1/3/2022 8:17 PM

I will elevate the concern for the COVID vaccine in 2 years. Until then, my children or my family will not be vaccinated. God will protect my family as he has always done.

1/3/2022 8:16 PM

Most of the people I know who've gotten COVID have been vaccinated, and I know three individuals who had COVID first and then almost died after receiving vaccines. Mandating a vaccine that is still so controversial and is still allowing such high infection rates is not in the best interests of any of our families. The protocols our schools have in place are keeping infection rates low; I trust my district to act in the best interests of our kids.

1/3/2022 8:15 PM

We need to vaccinate to stop the spread of Covid.

1/3/2022 8:15 PM

Mead SD has led the state and nation with the response to in-person learning and making it work for kids and staff. I am happy my kids are in a district that took a leadership route rather than follow what all other districts of similar size did. If this changes and Mead SD requires vaccines, we will sadly look to another district or private school even if this means in Idaho.

1/3/2022 8:15 PM

I absolutely do not support a vaccine mandate in any form.

1/3/2022 8:14 PM

Forced Covid Vaccination of children is abuse. This vaccine is not necessary for children and there is no long term evidence that it is safe for kids. This needs to be the parent's choice.

1/3/2022 8:14 PM

I do not support or agree with a covid vaccine mandate

1/3/2022 8:14 PM

Thank you for your diligence in keeping our kids safe. Vaccines saves lives!

1/3/2022 8:14 PM

Long-term health effects are unknown with COVID vaccine with children. Children are not impacted by COVID compared to adults. I will never give my children COVID vaccine. If you want to mandate the vaccine, do it through legislation so we have representation and it can be debated.

1/3/2022 8:13 PM

A mandate is an extreme overreach of government creating medical discrimination and violation of agency of body

1/3/2022 8:13 PM

I am pro vaccine, but not pro mandates. Freedom of choice is essential to our American values. Clearly the vaccine does not stop you from contracting covid-19. Just helps your body fight it.

1/3/2022 8:13 PM

I see no scientific evidence that covid19 is a threat to the health and well being of my children. They each have gotten covid19 naturally and recovered quickly and in minimal time. I see no purpose in them being required to get vaccinated as they have no underlying conditions that would put them at higher risk. Please follow the science and don't require mandatory vaccinations of children 5 and older. Thank you.

1/3/2022 8:12 PM

It's a possible MANDATE NOT a LAW! Even if it was a law it's a choice. I thought this was land of the FREE. Great Men died for our freedom and this is spitting on those who fought and fight for our freedom. If this is taken away what's the point in saying we live in the greatest country in the world?

1/3/2022 8:12 PM

We have managed to keep our kids in school for the last year and a half without fearing Covid, we are completely against a mandate and will not be vaccinating our children at this point in the pandemic.

1/3/2022 8:12 PM

My students are both vaccinated however I am unsure if I feel this should be mandatory for 12 and up. I do not feel it should be mandatory for 12 and under

1/3/2022 8:11 PM

Government needs to leave vaccinations to the local school districts

1/3/2022 8:11 PM

Mead School District has managed the Covid situation well with out vaccine mandate and a vaccine mandate infringes on my child from receiving an education.

1/3/2022 8:11 PM

Healthy children have a greater risk from the vaccine then from the virus. My children have already had the virus and express antibodies. This is an aggregious overreach. Political theater is no place for people who care about the welfare of our communities children.

1/3/2022 8:10 PM

The vaccine is not safe even more so for young children. This is reckless and very unsafe for the kids

1/3/2022 8:09 PM

We will not vaccinate our children for Covid 19 regardless of mandates. We will disenroll our kids from the district if this comes to pass.

1/3/2022 8:09 PM

Parents should be able to parent as they choose in a democracy. Washington state is no longer a democracy. Very sad.

1/3/2022 8:08 PM

Like many other vaccine requirements, this is important for the health of our children and the community. Thank you.

1/3/2022 8:08 PM

The vaccine has not been proven safe enough to mandate it for children. COVID has such a low risk for children that the potential negative effects from the vaccine outweigh the benefit to their health.

1/3/2022 8:07 PM

This is against my children freedom to choose.

1/3/2022 8:07 PM

My 9 year old/4 grader at Midway is already vaccinated for Covid-19!

1/3/2022 8:07 PM

There have been no significant risk for children throughout this whole COVID process and all variants. The vaccine doesn't help stop the spread or stop you from getting it. Why mandate it.

1/3/2022 8:07 PM

No

1/3/2022 8:07 PM

Thanks for keeping our families safe!

1/3/2022 8:07 PM

I don't believe these vaccines have been proven safe or effective for children. It's one thing to vaccinate adults, but children are still growing and developing, and it is impossible to know what the long term effects would be. It's my duty to protect my children from anything that could harm them. In addition, why require a vaccine that doesn't stop the spread of this virus? Every family should have the right to choose. My children's vaccination status has absolutely no effect on other students or teachers.

1/3/2022 8:06 PM

This should be an individuals choice not forced upon them.

1/3/2022 8:05 PM

Please don't require vaccines.

1/3/2022 8:05 PM

It's not right to force the vaccine, we don't force the flu or necessary all the others and are allowed to be able to exempted them from other vaccines.

1/3/2022 8:05 PM

The government has no business to tell us what to put into our child bodies especially with such a controversial vaccine. It should be the parents choice and not the governments choice or for the government to force the Covid vaccine onto children especially for a 99.997% survival rate. We will pull our children form the mead school district and find other options, like home schooling if this mandate is forced upon our school children.

1/3/2022 8:02 PM

This is ludicrous and could be the last straw for us to remove our children from the public education system. Also this is not a vaccine! It's a new technology and people who are vaccinated still shed

the Covid virus and transmit it to others as much or more than the unvaccinated. Don't mandate this or else run the risk of losing families and students.

1/3/2022 8:02 PM

I'm hesitant to require vaccines yet when they have only been available for just over a year. I'd like there to be a state funded option to test weekly if not vaccinated.

1/3/2022 8:02 PM

5 is too young to vaccinate with such a new course of medicating. I would be more inclined from 16 and over.

1/3/2022 8:02 PM

Please do not mandate this vaccine

1/3/2022 8:02 PM

My children are already vaccinated.

1/3/2022 8:01 PM

Children within that age range have not been found to be at risk from serious complications from Covid, requiring a vaccination at this point would be absurd.

1/3/2022 8:01 PM

We will not subject our children to being pawns in a political game.

1/3/2022 8:00 PM

I work with COVID patients at the hospital and I've seen a lot of death. I believe the science and I believe children who are eligible should be vaccinated.

1/3/2022 7:59 PM

America should still include basic freedoms.

1/3/2022 7:59 PM

This isn't unlike having other vaccine requirements currently in place. EX: Measles, Chickenpox, Mumps, etc

1/3/2022 7:58 PM

No

1/3/2022 7:57 PM

I believe it is in the best interests of all students, faculty, staff, outside vendors, and anyone those come in contact with to be vaccinated. I fully support a mandate to continue to protect our society.

1/3/2022 7:57 PM

Stop this utter madness

1/3/2022 7:57 PM

Don't require it

1/3/2022 7:57 PM

Please review the effects of vaccines on children!!

1/3/2022 7:56 PM

Let it be a choice!!!!

1/3/2022 7:56 PM

I do not think you should require the vaccine.

1/3/2022 7:56 PM

It would be helpful to know if kids already had COVID-19 why is it necessary to be vaccinated.

1/3/2022 7:56 PM

This is out of control. How have our most educated of those in modern society become such naive useful idiots. Shocking. May remove from public schools regardless.

1/3/2022 7:56 PM

My two children have had COVID-19 and my strong preference, at this time, would be to not have them vaccinated and remain at Mead SD with in-person learning.

1/3/2022 7:55 PM

My child will be leaving the school district without a doubt and the hoops and masks that are a part of her being there now need to stop immediately. Your taxpayers aren't going to stay much longer. This is a shot that has been given emergency approval. It should not be part of mandated protocols, especially for children. In order for a vaccine to be considered, according to the criteria, it shall "demonstrate that it is safe and has an acceptable level of side effects" and "is effective as measured by immunogenicity<sup>2</sup> and population-based prevention data". This does not exist. The vaccine does nothing but potentially reduce severity of symptoms and does not stop the spread. If it did the test populations- like sports teams that have 100% vaccine rates- would not be having exploding numbers of cases. We have seen this experiment done, why are we continuing to double down on what DOES NOT WORK? Might there be a different reason? What is best for kids and families and for education is to stop all of this. It's run its course and those that want to get the vaccine will and those who don't won't. Period. You are going to continue to lose students= lose funding. You are going to continue to ruin this state and its educational system that is in ruins will go bankrupt district by district. My child will not be participating in this charade.

1/3/2022 7:55 PM

I chose freedom of choice

1/3/2022 7:55 PM

I would ask them to remain politically neutral and to follow the science. The vaccine is not needed for normally healthy children or adults.

1/3/2022 7:54 PM

This vaccine is way to new for you to want me to sign my children up to be gennipigs and I will not put my children through it. It's bad enough that you are testing them a bunch of time during the week just so they can play sport

1/3/2022 7:54 PM

Covid has been around for over 2years now. We are a house hold of 6, at times 10. We are not vaccinated for covid. Not against vaccinations, just against one that has not had the proper studies and time to know the ramifications. We all survived covid. My husband had covid pneumonia and never had to go to the hospital. The media and CDC are not informing the public of the deaths from

taking the vaccine, or the amount of vaccinated people who are still getting covid. My point being, Kids get over it so much faster than us adults. the vaccine will do more harm than anything to our children. Take the masks off and let our kids be kids. Here are just SOME vaccine ingredients. These are being INJECTED into your kids; Formaldehyde/Formalin - Highly toxic systematic poison and carcinogen. Betapropiolactone - Toxic chemical and carcinogen. May cause death/permanent injury after very short exposure to small quantities. Corrosive chemical.

Hexadecyltrimethylammonium bromide - May cause damage to the liver, cardiovascular system, and central nervous system. May cause reproductive effects and birth defects. Aluminum hydroxide, aluminum phosphate, and aluminum salts - Neurotoxin. Carries risk for long term brain inflammation/swelling, neurological disorders, autoimmune disease, Alzheimer's, dementia, and autism. It penetrates the brain where it persists indefinitely. Thimerosal (mercury) - Neurotoxin. Induces cellular damage, reduces oxidation-reduction activity, cellular degeneration, and cell death. Linked to neurological disorders, Alzheimer's, dementia, and autism. Polysorbate 80 & 20 - Trespasses the Blood-Brain Barrier and carries with it aluminum, thimerosal, and viruses; allowing it to enter the brain. Glutaraldehyde - Toxic chemical used as a disinfectant for heat sensitive medical equipment. Fetal Bovine Serum - Harvested from bovine (cow) fetuses taken from pregnant cows before slaughter. Human Diploid Fibroblast Cells - aborted fetal cells. Foreign DNA has the ability to interact with our own. African Green Monkey Kidney Cells - Can carry the SV-40 cancer-causing virus that has already tainted about 30 million Americans. Acetone - Can cause kidney, liver, and nerve damage. E.Coli - Yes, you read that right. DNA from porcine (pig) Circovirus type-1 Human embryonic lung cell cultures (from aborted fetuses) You can view all of these ingredients on the CDC's website. I encourage everyone to do their own research. Look up the MSDS on these chemicals. Read the thousands of peer reviewed studies that have evaluated the biological consequences these chemicals can have on the body, especially when being injected. Fact check vaccine ingredients here:

<https://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/b/excipient-table-2.pdf>

1/3/2022 7:53 PM

I'm completely appalled that Mead is even considering this! Children specifically have over a 99% survival rate from contracting Covid, yet the vaccine itself is causing myocarditis, seizures, and paralysis. Requiring a vaccine that DOES NOT PREVENT DISEASE but is causing life threatening side effects is completely reckless. As you are all aware, this vaccine does not prevent one from getting the virus, or spreading it, even with follow up boosters. So with that being said I will not allow my child to be apart of any experiment or trial and will not be putting his life at risk to attend school. If the district so feels that mandating an unnecessary vaccine for children to attend school then my child will be pulled from the district.

1/3/2022 7:52 PM

Strongly oppose vaccine mandate for children. Adult mandates make sense, but children are not dying from covid and the spread in schools by children is so minimal it should not be mandated!

1/3/2022 7:52 PM

My children, my money and my support will go elsewhere if you decide to pursue mandates to put our children at risk with an experimental vaccine that have a greater risk dying from the common flu. We will pull our children out of public school if this mandate is followed, someone needs to say no to these mandates. I am a social worker and see these mandates as an attack upon the most vulnerable of populations, the very population our schools are suppose to protect, our Children. These mandates are putting our children directly downstream of global pharmaceutical corporations and their whims and the effects of these choices will be something that none of us will

have to bear. Our children will bear it. Our children will ask us someday what we did, I know what me and my family will do.

1/3/2022 7:52 PM

A vaccine mandate is against the law and should not be enforceable. There is absolutely no reason to force vaccination on children.

1/3/2022 7:52 PM

My children are 12yr and up. They received their vaccines with last dose in mid June. They agreed to the vaccines. 2 of the 3 still got Covid in Dec. Very mild cases but not sure when the stopping point for getting boosters will ever arrive. I would probably get boosters for them if they chose as I feel they are old enough to decide for themselves.

1/3/2022 7:52 PM

Of the state believes that the vaccine is effective, then students whom are voluntarily vaccinated are protected. Students who's parents choose not to vaccinate accept the risk of exposure. It is not within the authority of the state, county nor school board to mandate a vaccine to a virus which, while contagious, has a low fatality rate of under 1%. There is no mandate for flu vaccines, and there should not be mandate for Covid-19 vaccines. People have the God given right to self determination, including what we allow into our bodies.

1/3/2022 7:52 PM

I believe the covid 19 vaccine for Kids is appropriate and should fall in line with the other vaccines for public school enrollment. In my view it keeps every one safe just like preventing measles.

1/3/2022 7:52 PM

Enough is enough, covid doesn't affect kids as severely, the CDC and federal government have decreased the quarantine period because the virus isn't as deadly as the media tries to make it, federal mandates have lost numerous times in court, and if the school board and Governor want to continue this course of actions there will be more law suites to follow. Washington schools have already lost \$200M in funding and more will follow. We have had covid, and have antibodies that are actually affective unlike the bogus vaccines that have been proven to be under 50% affective. Stringing along booster after booster is idiotic when it is a coin flip if it will work. He side effects from this unproven shot (clotting, endocarditis, pericarditis, among others) are more concerning then the virus itself. Omnicrom spreads easier but is less evasive then even delta or other variants. It is not going to happen, if that means homeschooling our children or moving to another state... so be it. You all should be ashamed of yourselves.

1/3/2022 7:52 PM

There is a lot of cases where it is causing heart problems for boys. THIS IS STILL NOT FDA APPROVED. There are very little cases of kids passing away from this virus. The vac is only to protect the child and not others. Many people are getting Covid that are vaccinated, so if kids aren't dying and the shot isn't stopping it from spreading why are we pushing this?

1/3/2022 7:51 PM

Do NOT make this vaccine mandatory. I will pull my kids and homeschool.

1/3/2022 7:51 PM

The flu for our youth, according to the CDC, is more deadly than Covid so will flu vaccines be required as well??

1/3/2022 7:51 PM

Let em know this is the hill I will die on and I'm not alone!!!

1/3/2022 7:50 PM

As a parent I am responsible for doing best by my children. Forcing me to do anything less than the best in order to obtain an education is not right.

1/3/2022 7:50 PM

Please MANDATE this covid vaccine for ALL students, teachers, and Para professionals !! NO I mean NO exemptions If adults doesn't get the shot find another job. If kids don't get the shot they can be home school by their parents All other vaccines have been mandatory (MMR, polio ,etc) The covid vaccine should be treated the same. The only way to stop this madness is for ALL to be vaccinated. All unvaccinated persons when presenting symptoms should be housed in a Sanitarium and not bog down hospitals and hospital staff Just like we did for TB in the past

1/3/2022 7:49 PM

I sincerely appreciate the guidance and initiative from our state's Governor's Office to help safeguard the health of our community in the Inland Northwest, even if those decisions are unpopular and cause a backlash.

1/3/2022 7:49 PM

The Covid health risks to my child do not align with the risks associated with the Covid vaccine. It is criminal that our children are being used as guinea pigs in this process. Over and over again the governors so called Covid response actions and mandates have not been based on real science. The data continues to show that children have a greater risk riding a in a car than suffering from serious COVID illness.

1/3/2022 7:48 PM

I will not allow a government to take my freedoms to choose what is best for my children. I will withdraw them from school in order to keep them safe.

1/3/2022 7:48 PM

politics need to stay out of the medical field. The medical professionals playing politics need to be fired. Every person should have the right to make medical decisions on their own, and not have a governor make the decision for us.

1/3/2022 7:48 PM

COVID is nothing more than a bad flu. 98.5% of people who contract COVID survive, and of the 1.5% who do not, 94% of them had co-morbidities (obesity, advanced age, etc.). Healthy children DON'T DIE from COVID. Mandating a vaccination will further the decline in public school enrollment that began when COVID policies were implemented.

1/3/2022 7:47 PM

I really hope it doesn't come to this for our children

1/3/2022 7:47 PM

Please stop sending surveys of this nature. Surveys that encourage division and polarization. The vaccine is a public health issue (as all previous vaccines have been) and surveys like this encourage it to be thought of as a political issue. As a school board you should be considering the well being of all students and not their parents political views. Why are the "rights" of one student

more important than the “rights” of another student? Don’t our medically fragile kids and special education kids have a right to free and appropriate public education? If their education can’t be safely provided without herd immunity then isn’t it the district’s responsibility to provide that? Your questions in this survey lead parents to think that their anti-covid-vaccine stance has privilege and entitlement and that the threat to unenroll their kids has a remarkable amount of power. Instead of sending divisive surveys, consider sending surveys that gather ideas about ways to care for our community, neighbors and children. How about questions that encourage understanding and togetherness?

1/3/2022 7:47 PM

Please initiate covid vaccine mandates to keep kids and staff safe in school. My children are already vaccinated. It was no big deal.

1/3/2022 7:47 PM

The other required vaccine are known to prevent the infection they are intended to prevent. The Covid vaccine is not preventing the disease as we have seen in break through cases fully vaxed people that also have had the booster. My cousin was vaccinated and had his booster and still connected covid.

1/3/2022 7:47 PM

This cannot be passed. There is no reason to require this vaccine.

1/3/2022 7:46 PM

Not at this time

1/3/2022 7:46 PM

It continues to be imperative that we look out for ALL children, and by extension, our entire community by supporting the SDOH efforts to keep everyone as safe as possible through vaccinations and booster.

1/3/2022 7:45 PM

Nuremberg Code

1/3/2022 7:45 PM

No

1/3/2022 7:45 PM

This vaccine mandate should be no different than any other that allows for a religious exemption in a WA state school district.

1/3/2022 7:44 PM

Though we don't scream, threaten, or disparage others, I believe the majority of parents support common sense safety measures including vaccines and masks. Those loud but few do not represent the overall support for science, safety, and precautions for our families and neighbors. Please don't give in to the angry mobs that portend to support liberty or freedom, it's simply their excuse to pretend to be angry about things that are meant to protect them, because selfish leaders spew fake astonishment at being asked to do something for the common good.

1/3/2022 7:44 PM

I do not feel the Covid-19 vaccine, just as the Flu vaccine, needs to be required. Especially when there are effective treatments available.

1/3/2022 7:44 PM

The flu shot is not mandated, and the flu has different variations every year. Covid has shown us that it frequently gives us new variations and questions the integrity of the vaccine. I will not run for a new vaccine when we get a new variation. When we know what we are dealing with, I will vaccinate my children. At this time the vaccination recommendations keep changing (boosters, no boosters, covering/not covering variants). I will leave my teaching profession to teach my children at home if we are forced this vaccination on our kids.

1/3/2022 7:43 PM

It should be our choice to vaccinated our children.

1/3/2022 7:43 PM

With an extremely high recovery rate, and extremely low trial subjects (2,500 test subjects) we should not be required to vaccinate our children at this time. There is not enough information on long standing side effects to require vaccines for children 5 and up.

1/3/2022 7:42 PM

Other vaccines are needed for school. It's not that big of a deal.

1/3/2022 7:42 PM

The number of children that have had serious illness or death does not justify mandatory vaccination of hundreds of thousands of children, especially since there is no data on the long term effects these vaccines will have on young kids. Those that are vaccinated can still catch and spread COVID, so mandating vaccines will not eliminate COVID. Those that want to get the vaccination should be allowed to, and those that do not want to be vaccinated should not have to.

1/3/2022 7:41 PM

Na

1/3/2022 7:41 PM

No

1/3/2022 7:40 PM

My kids are already vaccinated and I would feel safer if I knew that their classmates were similarly vaccinated to reduce spread. We have elderly and immunocompromised family members and doing what we can to slow down transmission makes a difference for them! :)

1/3/2022 7:40 PM

If required to vaccine children, we will be relocating immediately out of state.

1/3/2022 7:40 PM

Yes. Get the hell out of our homes and let us make our own choices in our lives.

1/3/2022 7:40 PM

Unvaccinated kids shouldn't be allowed at school!!!! Get vaccinated and put on a mask!

1/3/2022 7:39 PM

I do not agree with mandates that involve overriding a persons right to make their own health choices. We might as well start deciding for people who is allowed to be treated in our hospitals despite the fact that they can or can't pay the bill. If we are going to decide who is allowed to have an education based on whether or not they get a shot. Do those parents get a refund on the taxes they paid for their child's education so we can afford to give them a private education or quit our jobs to homeschool them?

1/3/2022 7:39 PM

I am all in favor of all children/students and all faculty that work within a school setting be fully vaccinated if they will be attending in person. I also think it's a good idea to have staff and students to continue wearing face masks.

1/3/2022 7:39 PM

Children are the lowest risk for all age groups for covid. My children are safe healthy and athletic. I have been advised by our family pediatrician to not vaccinate any of my children.

1/3/2022 7:38 PM

No mandates! Let parents parent!

1/3/2022 7:38 PM

My children are already vaccinated and soon to be boosted.

1/3/2022 7:38 PM

I know it isn't an easy or lighthearted decision but we know the vaccines are safe and effective. I am in favor of this just as I am of the other required vaccines for admission to school and childcare.

1/3/2022 7:38 PM

Because of the risk with preexisting medical conditions my children will not be vaccinated until it is safer for them.

1/3/2022 7:37 PM

The thought of mandating our children to take a vaccine fir the group that is the least at risk is absurd. The state has effectively muzzled our children, and deprived them of social learning and recognizing facial expressions necessary for future development. Other nations such as Great Britton have not masked their children for these reasons and yet we sacrifice our children at the alter of Covid. We have lost a generation for nothing

1/3/2022 7:37 PM

I think vaccinating our children is an important step in mitigating severe illness and hospitalization tied to this virus. Our child has already been vaccinated and I think it is an important step in the right direction.

1/3/2022 7:37 PM

This is a parents choice for the health of there kids. Kids are the lowest risk of anyone. There is absolutely no need for kids to be vaccinated. I would like to see actual data that shows these kids are in so much danger that we need to vaccinate. What about natural immunity. It is better than being vaccinated and that is coming directly from the president of phizers mouth. The CDC also just came out with the PCR test debacle of not being able to differentiate between COVID and the common cold. I do not support any of this and I would pull my kids from the school

1/3/2022 7:37 PM

Vaccines and all other medical decisions are a person's private and personal choice. No mandates but choice. Children & families should not be punished and unable to participate in society because of a personal medical choice. I don't understand this intense pressure to get kids vaccinated with a non FDA approved shot that doesn't prevent a person from getting or transmitting covid. Not to mention that kids are very minimally impacted by covid. This vaccine has become political and has nothing to do with health and safety. I'm for freedom of choice. No mandates!

1/3/2022 7:36 PM

A vaccine mandate for school entry should be required for public health and safety.

1/3/2022 7:36 PM

N/a

1/3/2022 7:36 PM

The government is grossly overreaching in far too many aspects of our daily life. I have lived in Washington for 30 years, and our family is strongly considering moving out of the state. Something we never thought we would do. There are powers that belong to the government, this is not one of them.

1/3/2022 7:36 PM

I believe that vaccines work. However I do not agree with them being mandated. People can and should make their own choices on what works best for them personally.

1/3/2022 7:36 PM

Instead of using the word "mandate" maybe say requirement. Just like any of the other required vaccinations to go to school. I feel people get upset at the word mandate.

1/3/2022 7:36 PM

The choice should be ours as parents whether or not to vaccinate our children. It blows my mind that it would even be taken in to consideration to mandate it and possibly hinder the education of our children. I shouldn't have to choose between my Children's education and a vaccine. The choice should be that of each individual parent(s). Our bodies our choice. The vaccine saving people from getting covid. There should not be a mandate for our kids.

1/3/2022 7:36 PM

Stop pushing something that is not the law! And give real facts!

1/3/2022 7:35 PM

Already vaccinated

1/3/2022 7:35 PM

I believe we as parents should be allowed to choose what is put in our children's bodies. This is a matter of choice.

1/3/2022 7:35 PM

If the state requires kids to vaccinate I hope they realize how many kids they will have pulled from school. I know several Families willing to move to Idaho to get away from this states failed mandates. I hope people wake up.

1/3/2022 7:35 PM

I don't believe the vaccine is safe at least not yet we don't know the long term effects of any of them and people have died from getting their first shots. I understand wanting people to be vaccinated but I fear for my daughter's health if she is expected to get these shots. We will not be vaccinating our child at this time or in the near future.

1/3/2022 7:35 PM

NO VACCINE MANDATE. WE ARE BORN WITH AN IMMUNE SYSTEM ON PURPOSE. LET IT DO ITS THING.

1/3/2022 7:34 PM

Please follow through with the mandate!! Keep the children age.

1/3/2022 7:34 PM

No

1/3/2022 7:34 PM

There have not been any long term studies on this shot for children. There is no way I would ever give any of my 5 children who are enrolled in the district this shot!

1/3/2022 7:34 PM

Requiring a vaccine is against our constitutional rights. I am not against the vaccine, however I am against the force of requiring something be injected into your body

1/3/2022 7:33 PM

There is no FDA "fully approved" COVID vaccine available in the United States. The Comirnaty version is still not being produced and shipped by Pfizer within the US. I will not subject my children to any EUA experimental mRNA vaccine; one that leaves the vaccine manufacturers off the hook for harm caused by their product. I require long-term studies and transparent trial data to make a truly informed decision. The FDA requested 55 years to comply with a FOIA request for the release of the Pfizer clinical trial documents. This gives me no confidence in the safety and efficacy of the vaccine. I am not anti-vax, but I will not be "coerced" into subjecting my children to the significant and known adverse reactions (as well as unknown risks) of the J&J, Pfizer, or Moderna vaccines. Considering the extraordinarily low risk of severe illness and death to children from COVID, especially for healthy children, it is irresponsible to vaccinate them. A study published at the National Institutes of Health NCBI (PMCID: PMC7260492) found that the death rate among children 5-14 years old is 2 in 10 million. Furthermore, the FDA bypassed its own expert scientific advisory board, who voted down authorizing vaccination of children 12-15 years old, to approve its use. Two senior FDA officials resigned because of the White House's push to authorize booster shots. Many prominent and eminent scientists and physicians have warned of serious potential long term effects from the vaccine. These policies smack of politics and greed and not for the safety and health of our children. To mandate its use for our children at this stage is unconscionable and outrageous!

1/3/2022 7:32 PM

No

1/3/2022 7:32 PM

I fully support vaccinations that have a long track record of preventing a disease. The Covid 19 vaccine has not proven to be fully effective in preventing Covid 19, any more than the influenza

vaccine is fully effective. I absolutely do not support requiring a vaccine that does not fully (or almost fully) stop a disease that is constantly varying.

1/3/2022 7:32 PM

I would like an option to have children titer tested for exemption to show if they have antibodies.

1/3/2022 7:31 PM

Mandatory is not OK. It's a flu shot not a vaccine! If it was a vaccine people that got the shot would not be getting sick! It's a flu shot and horrible one at that!!!

1/3/2022 7:31 PM

There is not enough research and data to show the long term risks for children. I don't like the idea of having to booster adults as well as children every six months for an unknown duration of time. For a virus that has an extremely high recovery rate, forcing a vaccine on children is not the route we should be taking. Our school district has done a fantastic job over the last year and a half keeping kids in school and keeping numbers down. I believe the choice to vaccine against covid 19 should be up to the parents and the children's health care providers, not by the Governor.

1/3/2022 7:30 PM

Na

1/3/2022 7:28 PM

We will not vaccinate our kids!!

1/3/2022 7:28 PM

We live in the United States of America where we have the freedom to make decisions about what is best for us as individuals and our families. Taking our rights away from us and forcing any human to do something against their will is wrong and inhumane.

1/3/2022 7:27 PM

We should not be doing this to our kids! The science on this is clear. They are not at risk and are not a risk to others!

1/3/2022 7:27 PM

I believe in the science and benefits of vaccines. My spouse and I and my children are all currently up to date. I do not agree with requiring a vaccine out of fear, control or hurry; particularly for low risk demographics. I believe people on the conservative side of the political continuum would choose to get the COVID vaccine if it was not forced. Thank you for soliciting opinions.

1/3/2022 7:27 PM

There haven't been any long-term safety studies done on these vaccines. COVID is not a threat to the vast majority of K-12 students. Mandating this vaccine without that knowledge is reckless and irresponsible.

1/3/2022 7:27 PM

We need to see longitudinal studies showing the long term impact of the vaccines on children. We want to stay in school.

1/3/2022 7:27 PM

Impeach inslee

1/3/2022 7:26 PM

I would like more longitudinal data on these COVID 19 vaccines before putting them in my child. My children have already had COVID and we're practically asymptomatic. Considering the above statement, the fact that my kids have acquired some natural immunity already, the fact that these newer variants are creating less severe symptoms especially in healthy adults and children, and that the vaccines don't stop the spread of the virus, I do not support a vaccine mandate. It is also not constitutional.

1/3/2022 7:26 PM

Nope

1/3/2022 7:26 PM

If the vaccine was proven to eradicate Covid that would be more impressive, but at this time it only reduces symptoms so it should be a personal choice. Our family is vaccinated by choice but do not feel it should be a mandate.

1/3/2022 7:26 PM

We will NEVER Vaccinate our children with the covid vaccine. We will gladly pull them if enforced

1/3/2022 7:26 PM

Absolutely require vaccinations.

1/3/2022 7:26 PM

There is no budging or discussion on this issue. Any vaccine requirement for students and we will withdraw from the Mead School district IMMEDIATELY and will not re-enroll in the Washington State school district again until the mandate is reversed.

1/3/2022 7:25 PM

This is unconstitutional!! The vaccine is not proven or trusted!! Vaccinated people are catching and spreading covid just like the unvaccinated! Children have a .004 percent chance of being affected by covid. I will vote against all funding for mean school district if this passes, as well as remove my wife from the PTO and remove my child from mead school district. Please do not go against the parents constitutional right to choose their medical freedom!!!!!!!

1/3/2022 7:25 PM

No!

1/3/2022 7:24 PM

My children just got their 2nd vaccine dose. They are ages 9 and 11. I am in favor of vaccines to help keep the kids safe and get rid of this virus.

1/3/2022 7:24 PM

I am not anti-vaccine, but mandates of this kind are unconstitutional and wrong. I am anti-COVID vaccine for the following reasons: If this were a vaccine, like the ones for measles and polio, where getting vaccinated would significantly help prevent and lessen the spread and physical symptoms and mortality, then I would be all for it. This is not a typical virus, and its effects on people vary greatly and are unpredictable, except for the elderly and those with previous health conditions. The vaccine is not having the desired protection outcomes, rather there are many cases of injury and even death from receiving it. Finally, the children have been the most resilient to this virus, and have had the lowest number of hospitalization and deaths during the pandemic! In my opinion, most if not

all have most likely been exposed to or had Covid by now. Natural immunity from exposure should be enough for school age children, without a vaccine that would very likely do more harm than good- especially for those with sensitivities or who are likely to have a reaction to the vaccine. There needs to be less dictating from leaders, and more listening to families!

1/3/2022 7:24 PM

No

1/3/2022 7:24 PM

No

1/3/2022 7:24 PM

Kids need to be in person to learn and should not be required to get vaccinated to attend.

1/3/2022 7:24 PM

Nooooo!!! What data are you reviewing to justify a mandate? It doesn't make sense. Children do not have the same experience as adults with the virus. NOOOO!!!

1/3/2022 7:23 PM

Our governor does not have the right to require an injection of any kind into any child's body or face a withholding of their education. Absolutely not. We will home school or fucking move.

1/3/2022 7:23 PM

NO ABSOLUTELY NO!!

1/3/2022 7:23 PM

I think it's stupid to mandate a vaccine on children. My child already wears a mask all day which I think is enough. This isn't a private school it's public school. This isn't California!

1/3/2022 7:22 PM

Parents should decide if their children should be vaccinated and not the governor. This vaccine hasn't been around for to long to see what side effects it can cause to children therefore it's wrong to mandate it.

1/3/2022 7:22 PM

The data has been changing rapidly on the efficacy of the vaccine as time has gone on. All the other vaccines that are required for my children to attend school are one time vaccines with a long data driven history. Until the CDC can show a clear plan that does not change week by week for what is necessary I do not believe it is safe for my children to take. There has not been enough time to weigh the pros and cons versus natural immunity. There has not been enough time to say whether or not therapeutics will be a better option. Furthermore...if the data truly proves that the available vaccines for Covid-19 was the right decision there would be virtually no debate on the issue...state legislatures would agree state by state that this should be done universally and with very few exceptions. Socially it is a very small group of people in This country that are truly anti vaccines. However there is large group of people in this country, state, city, and district that believe that if the vaccine was the right choice it would be backed with consistent solid data and hard to dispute. This is not where we are at today.

1/3/2022 7:22 PM

Fuck off Inslee!!! Let's go Brandon!

1/3/2022 7:21 PM

My children are 7 and 10. I will remove them from the public school system if the COVID-19 vaccine becomes a Requirement to attend public school. The vaccine is not necessary. My kids immune system is better defense and less risk than the COVID-19 vaccine. Please do NOT mandate that children get COVID-19 vaccination in order to get a public education.

1/3/2022 7:21 PM

There should be no mandates for anything. Every parent should have the choice if they want to vaccinate their child with COVID. They have the choice with every single other vaccine and this should not be any different. The government should stay out of healthcare!!!!!!!!!!!!!!

1/3/2022 7:21 PM

I would be more open to a Covid vaccine requirement after it has been fully authorized (not emergency use) and there have been long term studies about the vaccines impact on individual health of diverse populations.

1/3/2022 7:21 PM

Don't do it! What data are you reviewing to justify the mandate? Children do not have the same experiences or outcomes as adults. It doesn't make any sense to mandate children to be vaccinated. NO!!!

1/3/2022 7:21 PM

Yes. Neither myself, or anyone with the school district or on the Board of Directors is a health professional. We should follow the recommendations of health professionals with expertise in this field.

1/3/2022 7:20 PM

This is a personal choice and should not be a mandate especially for our children. The vaccine is not stopping this virus so mandating it is not going to stop it from spreading either. People that are vaccinated are still getting covid. I will not be vaccinating any of my children

1/3/2022 7:20 PM

Just as some people feel it is their right not to vaccinate their children, it is OUR right to send our children into a school environment that is taking all precautions to keep our children safe and healthy. COVID vaccination should be treated just as all other vaccines that are mandated to attend school.

1/3/2022 7:20 PM

Please heavily consider vaccines as a way to further protect not only our children but also our workforce serving children.

1/3/2022 7:20 PM

Our family will absolutely leave the public school system if a COVID vaccination becomes a requirement. Even the fact that it's being considered is pushing us even more to move to Idaho.

1/3/2022 7:19 PM

Do it. We have other required vaccines. This has become way to political when all you need to do is look at the science. The board needs to be willing to make the right call - even if it's unpopular at the time. That is the definition of leadership.

1/3/2022 7:19 PM

Stop the mandates. Let parents choose for their children. Stop punishing students for another student getting sick. Let students return to school without restrictions.

1/3/2022 7:19 PM

I think requiring children to vaccinate when the vaccine hasn't been proven to work but has been proven to have adverse effect is ridiculous and wrong. Shame on anyone who supports this. People who are vaccinated can catch and give covid to others so why are we trying to require it when it really doesn't change anything. I'm tired of our government trying to make us get something against our beliefs and against our choice.

1/3/2022 7:19 PM

My 8 year old is already vaccinated.

1/3/2022 7:19 PM

According to the CDC, the vast majority of children are not at risk for severe disease from Covid 19. Parents should be given a choice whether or not to vaccinate.

1/3/2022 7:19 PM

We need everyone who is eligible and medically can to be vaccinated. Just like with all of the other vaccines we currently require. We need to stop Covid and prevent more variants.

1/3/2022 7:18 PM

We are preparing to withdraw our children from public schools rather than be forced to get the Covid vaccine. I do not trust the same regulatory apparatus that gave us the opioid crisis to suddenly have the health of the public at heart.

1/3/2022 7:18 PM

This is absolutely ridiculous. We must stand up for our children!!

1/3/2022 7:17 PM

I don't want masks or mandatory vaccinations. People who are vaccinated still contract Covid-19 and still spread it. It has been proven we are able to go to school without mass transmission. I don't care what anyone says there is no proof this vaccine is safe for anyone. There's data that says it is not safe so this can be argued either way. If it is safe why won't they disclose what is in it until 2075? Why did they make it so no one can hold the government or the drug companies accountable for death or injury? This tells me this is not safe and people should have the right to choose what vaccines they get and when they get it. Children should be able to attend public schools without masks and without this vaccine.

1/3/2022 7:17 PM

Is Gov Insleed loosing his head completely? This will be disaster for all school and children. Ill be the 1st one to remove my children from school asap if mandate is approved. Moving to different state If needed.

1/3/2022 7:17 PM

Both my wife and I got fully vaccinated and we both got Covid. So it's not a sure fire solution to make it a mandate to attend public school. I strongly believe that it the decision to vaccinate or not vaccinate our kids needs to be left up to the parents, and not be decided by politicians.

1/3/2022 7:17 PM

This is not what's best for our children. You are making medical decisions when you are not a medical professional.

1/3/2022 7:16 PM

Do NOT continue down the path of illegal mandates!

1/3/2022 7:16 PM

It has not had enough research to show it is truly safe and the amount of children getting really sick from does not prove a vaccine is needed for their safety.

1/3/2022 7:16 PM

Mandates are not the answer for children in the education process.

1/3/2022 7:15 PM

This is unconstitutional & makes no sense! Children are more likely to have adverse reactions from this vaccine than they are from the disease which this vaccine e clearly does not prevent.

1/3/2022 7:15 PM

My opinion is that the Covid "vaccine" should be optional. It is like the flu shot it does not prevent you from getting the virus, it only makes symptoms less severe if you do get it. The flu shot is not required to attend school. I am not a anti-vaccination person. I vaccinate my children against all preventable diseases. I'll use the polio vaccine as an example. If my child has the polio vaccine for they will NEVER get that disease. This Covid "vaccination" is basically the flu shot. I think it should be a choice. Not something that is forced upon my children. My husband fought for the freedoms of our country. This is not freedom to force people to get something like this.

1/3/2022 7:15 PM

Public health should not be a political gambit. Had 10% of the money used to mitigate this pandemic gone towards education, we could have teachers that are paid their due and could look forward to a new generation of students that aren't too uneducated and/or ignorant to understand they have been manipulated by various political idealism.

1/3/2022 7:15 PM

Child already vaccinated.

1/3/2022 7:15 PM

Not at this time.

1/3/2022 7:15 PM

The COVID vaccine is still considered experimental and should not be required for anyone. It is a personal choice and should be made by the parents in concert with their trusted physician.

1/3/2022 7:14 PM

No

1/3/2022 7:14 PM

Vaccines aren't necessary to maintain health and safety for our kiddos. Their survival rate is almost 100%, and vaccinated people are spreading covid.

1/3/2022 7:14 PM

The only way to end this pandemic is for everyone to get vaccinated. Our students and teachers are at risk every day. I do not understand why people are against wearing masks and getting vaccines. We need to follow our health experts and the scientists.

1/3/2022 7:14 PM

The only way to end this pandemic is for everyone to get vaccinated. Our students and teachers are at risk every day. I do not understand why people are against wearing masks and getting vaccines. We need to follow our health experts and the scientists.

1/3/2022 7:14 PM

I understand and respect each parents decision and as any other vaccine it should be a parents choice not a have to

1/3/2022 7:14 PM

Are children have already been vaccinated.

1/3/2022 7:13 PM

No

1/3/2022 7:13 PM

I absolutely will not be giving my children the COVID-19 vaccine.

1/3/2022 7:13 PM

There were already exceptions made for people who went to work and tried to use the exemption and they lost their jobs. These people are firefighters, police officers and DOT. This list goes on and on. Medical exemptions are not honored, it's just the states way of bulldozing their new laws and mandates to get people to conform and get the vaccine. While they are pushing COVID vaccine, children are at the lowest risk. The side effects out ways the risks by far for the age group of children whom have a low risk of infection.

1/3/2022 7:13 PM

I will be very disappointed if the vaccine that can potentially harm our children and their future is mandated to be able to attend school. I will absolutely unenroll my kids from school if they are required to have this vaccine. This is horrible

1/3/2022 7:13 PM

Why enforce a vaccine that is neither safe or effective for an age group that has a safe and effective natural immune system!

1/3/2022 7:12 PM

In light of history, especially recent history, many public health experts and vaccine historians say it's not yet time for school vaccine mandates for COVID.

1/3/2022 7:12 PM

The government should stay out of everyone's health decisions.

1/3/2022 7:12 PM

The Covid vaccine is experimental and has NOT been around long enough to provide us with any evidence or reassurance that it is safe for our children. We will 100% pull all 3 of our children from the Mead Schools if this becomes a mandate.

1/3/2022 7:12 PM

We will move to Idaho and take our children out of Washington State schools.

1/3/2022 7:12 PM

The science has proven that the efficacy of all shots for Covid diminish rapidly, hence the large number of breakthrough cases. Proof of antibodies is much more sound and factually based.

1/3/2022 7:11 PM

Do not mandate that we make our kids get this shot! It is not a vaccine! It does not stop you from getting the virus or spreading it!

1/3/2022 7:11 PM

Let kids be kids. All they ever hear about is Covid this and Covid that. They aren't able to be kids anymore.

1/3/2022 7:10 PM

Home schooling is starting to look good

1/3/2022 7:10 PM

Cuz the vaccine is still in an experimental stage in its early stages we should never be mandated to participate in experimental medicine

1/3/2022 7:10 PM

Kiddos are already vaccinated!

1/3/2022 7:10 PM

This vaccine is not proven nor acceptable on any level not just for children 5 and up but for every citizen of the Free US - mandate requirement is wholly UNCONSTITUTIONAL!!!!!!

1/3/2022 7:10 PM

I appreciate the efforts to keep our students, staff, and community safe.

1/3/2022 7:10 PM

This vaccine is a joke. My grandparents still got really bad sick from it and with it.

1/3/2022 7:10 PM

None

1/3/2022 7:10 PM

I would feel much MORE comfortable sending my children to school knowing others were vaccinated as my children already are.

1/3/2022 7:09 PM

1. Please consider natural immunity. 2. The flu vaccine is optional for children and not mandated. Covid is low risk for children and I believe the vaccine for it should be optional. Thank you!

1/3/2022 7:09 PM

Fuck Inslee!!!

1/3/2022 7:09 PM

As far as my children there will be NO vaccine forced upon them for COVID! There is no reason for an emergency approved vaccine that hasn't gone through the appropriate studies and trials be injected into my child without the knowledge of what the potential long term effects could be. I know for us we would be pulling our kids from Mead School and any other district and figure out a home-school program if this becomes a mandate.

1/3/2022 7:08 PM

My kids are both vaccinated

1/3/2022 7:08 PM

There is no benefit demonstrated by the vaccine to children. The man who created the vaccine himself states that this vaccine is not for children and is harmful to children. No experimental vaccine should ever be mandated children. Parents should still have the right to take care of their child as they see fit. The government should not be forcefully imposing this experiment on anyone especially children!

1/3/2022 7:08 PM

Just to say how hard it is to get a vaccine for my child under age 12. Would expect that it should be easy if it is mandated.

1/3/2022 7:08 PM

This is above and beyond acceptable. Thank you for sending this survey out.

1/3/2022 7:08 PM

I think the vaccine for children is ridiculous. I withdraw my child from mead and any other school district the second a mandate is imposed on children.

1/3/2022 7:08 PM

My oldest is vaccinated because we believe it was the right course of action to take. We are also booking an appointment to have our youngest vaccinated because we believe its the right course of action to take. I don't believe anyone mandating or not mandating anything would have had any influence on our decisions.

1/3/2022 7:07 PM

My understanding is you absolutely can spread and catch Covid even if vaccinated thus the true risk we actually would be assuming on our child should the vaccine actually reduce symptoms. We would not be risking others anymore then vaccinated individuals would be.

1/3/2022 7:07 PM

Read the vaers reports. This is not a legal vaccine and does nothing to protect from anything. There is no reason to take and all the reasons not to expose anyone to be a part of a study.

1/3/2022 7:07 PM

The vaccine needs to be required if we are ever to move past this roller coaster. This is not a political issue - it's an issue of science and medicine, both of which you should support as educators. Also, of course the exemptions will be allowed as it's required under the ADA and Washington's law against discrimination and title VII. Including that question here suggesting they won't be allowed is just stirring people up unnecessarily.

1/3/2022 7:07 PM

My student is already fully vaccinated, and for her protection I would prefer as many others that can do so as well in the Mead school district.

1/3/2022 7:06 PM

I am a parent of 2 boys that are in Kindergarten & 4th Grade. They both have had Covid & recovered in a couple of days from it. It doesn't seem to affect kids to make them get the vaccine. My husband & I feel like at this time there is not enough evidence that it would help them to get it. We are against make it mandatory for kids at this time to be in school or just to live in the state of Washington.

1/3/2022 7:06 PM

Adding a vaccine for COVID to the list of required vaccine is appropriate.

1/3/2022 7:06 PM

this is absurd!!!!

1/3/2022 7:06 PM

Covid will pass as time wears on - mandating this vaccine sets a dangerous precedent for requiring vaccinations in the future for other coronaviruses which may not be as serious. We're already required to vaccinate kids for many good reasons but mandating Covid vaccine doesn't seem like the right course of action.

1/3/2022 7:06 PM

My son (now 15) was born 7 weeks premature. We're not willing to put anything in his body that may cause him harm.

<https://www.webmd.com/lung/news/20210611/evidence-ties-covid-vaccines-to-heart-issue-in-youth>

1/3/2022 7:06 PM

Kiddo is 13 and already vaccinated. I believe it should be required for school attendance.

1/3/2022 7:06 PM

No mandates!!

1/3/2022 7:06 PM

no.

1/3/2022 7:06 PM

I believe a COVID vaccine mandate for children is unreasonable. I hope the Mead School District continues to take a leading, common-sensical approach to dealing with such a mandate.

1/3/2022 7:06 PM

Mask mandate is more important for gathering students!

1/3/2022 7:05 PM

The only way we can get past this pandemic is through vaccination. Kids can and will get the virus and spread it to others. We owe it to our children, teachers, school staff, and our community to do everything we can to protect each other. I would hope that the Mead School District and the State of Washington would be leaders and support the scientific and health communities and not fall for the "freedom" rhetoric that is so insidious in our country right now.

1/3/2022 7:04 PM

My child is vaccinated. However this is a choice by parents not mandates

1/3/2022 7:04 PM

Please allow us as parents more time to consider if this vaccine is right for our children. I do not want to have to pull my kids from a school they love because of a vaccine mandate!

1/3/2022 7:04 PM

It is unethical to require injection of a non-FDA approved product to attend public school, which is a basic right for children and for which I pay taxes. It will make the school district open to potential law suites. Statistically, disease spread is shown to occur similarly by both vaccinated and non-vaccinated individuals, so I am unsure why it would be required for "public safety." I also have great concerns for the REAL risk of potentially deadly pericarditis documented even by the CDC for young males receiving the currently available COVID vaccinations (see the 108 deaths of FIFA soccer players). Should a safe and FDA approved vaccination become available in the future, I will be happy to have my children vaccinated.

1/3/2022 7:03 PM

I do think that parents should be able to make whatever decision they feel right for there children

1/3/2022 7:02 PM

While I am 100% pro vaccine and I am vaccinated. The data is not there for the vaccine and children. Also this vaccine does not prevent the spread or contraction of the virus simply reduces the severity which is huge in adults, but it has been shown to not effect children like adults so the risk for them is lower. If this vaccine prevented covid-19 like the polio vaccine or measles I would vaccinate my children for it. But since data shows that children fight this virus much better than adults and it does not prevent people from catching or spreading it even if vaccinated so I will not be vaccinating my children.

1/3/2022 7:02 PM

At the federal level all mandates are no longer required. They are up to each state's office and up to each individual. As should any and all health requirements. If this goes through we will be one of many that pulls our child out of the district. You've already lost a bunch, wanna lose more? Make it optional and leave it alone already it's been over 2 years

1/3/2022 7:02 PM

Fully support a vaccine requirement.

1/3/2022 7:02 PM

Our entire household is fully vaccinated ages 13 to 47

1/3/2022 7:01 PM

I am absolutely apposed to this vaccine for children. We will withdraw our 4 children from Mead schools and encourage others to do so as well.

1/3/2022 7:01 PM

My Kids are already vaccinated. I work at sacred heart. Covid is real and vaccines work.

1/3/2022 7:01 PM

Let's get everyone vaccinated so we can be done with this. Thanks!!

1/3/2022 7:01 PM

I cannot believe mandating this vaccine is even being considered. This is an experimental vaccine with no long term studies done for any age. If you mandate this, we will withdraw our children so fast from public school. Robert Malone, the inventor of the MRNA technology, even says Children should NEVER receive it. Do what's right for our children and stop the madness of masking and mandating this vaccine. It is 100% wrong that schools are receiving funds for keeping the children masked and even considering making the vaccine mandatory.

1/3/2022 7:00 PM

I am not sure how this can be mandated. The vaccine is not safe for all kids nor has there been enough data to support the vaccine. We don't know the long term effects of this vaccine. In the past vaccines have had studies and been one or two shots. We are currently asking people to take third and fourth shots in a year and they are still getting sick from Covid. We need to wake up. We will take our chances with the higher than 99% survival rate for kids. Our family takes part in the other vaccines that are required, but something is wrong here.

1/3/2022 7:00 PM

Please look at the stats for covid in Children. A mandate for our children to take a vaccine that doesn't even work is unconstitutional.

1/3/2022 7:00 PM

I have lived in this State for 41 years and I like living in this state. If the government of this state madates what I should do with my children I will have no other choice but to move out of this state.

1/3/2022 6:59 PM

Due to the lack of severity at which children are affected by Covid and the continued uncertainty as to the complete efficacy of the vaccine, we would not be in favor of including the Covid vaccine on the list of required vaccines.
