External Email

Dear State Board of Health Members,

Please do not make Covid vaccines mandatory for our children to attend school. Those who choose to vaccinate their children certainly have that right. Those who choose not to have that right as well, especially for a disease that has a very limited impact on children and a vaccine that was so quickly developed.

And please work with the governor to get rid of the mask mandate for school for the same reason. In addition to be unsanitary, these masks have an impact on the education of our most vulnerable learners. They make it difficult to see the speaker's facial expressions as well as make it difficult to hear. Not only are children only minimally impacted by Covid, they are not super spreaders. Please get rid of masks in schools.

Thank you.

Steve Christensen

Pasco, WA

Data has proven that COVID does not effect children at a high rate, and they are not at high risk. Data also shows that adverse reactions have occurred in children that have received the Covid vaccine. As other vaccines that have been required for attendance at school, we have always had an option to exempt children from the vaccines. It should be the same for the Covid vaccine.

Subject: Regarding adding C-19 vaccine to childhood schedule

External Email

Dear WSBOH Members,

When making momentous decisions that affect the health of children, it is imperative to make sure that the benefit to the child outweighs the risk to the child. Society cannot ask children to bear the burden of taking risk away from the adults onto their young bodies.

These COVID-19 vaccines are in their infancy in use in children. There is not anywhere near enough safety data to support adding it to the childhood vaccine schedule, or make it a mandatory requirement for children to receive an education. In fact, there are serious known and documented adverse events with this injection, so serious, as to cause death or lifelong disability. This is an unacceptable danger to subject children to, especially as they are at a statistically low risk of serious disease should they become infected with the SARS-CoV-2 virus.

I trust that you and the rest of the board members understand the gravity of this decision you are being asked to make. These vaccines have already caused injuries and deaths, and will likely cause more if they are placed on the vaccine schedule. They are not at all comparable to the existing vaccines. In fact, they perform more like a treatment by easing symptoms, rather than conferring any sort of immunity.

I urge you to protect the children of Washington State and reject the proposal to add these harmful injections to the childhood vaccine schedule.

Sincerely,

Rosanna Menck RN (retired)

Subject: Strongly Against Proposed Covid WACs

External Email

Washington Board of Health,

I am writing to let you know that I am against the proposed WACs: 246-100-079, 246-100-045, 246-100-040, 246-100, 246-105. All deal with Covid policies and protocols. As we have witnessed since the beginning of the pandemic, there is little that can be done to stop the spread of the virus. Mitigation strategies put into place have had no effect.

I believe that the proposed WACS undermine freedom and will do little to stop the spread. What they will do is limit student's access to schooling, weaken our state, and place far too much power in the hands of individuals who have not been elected.

As such, the proposed WACS are unconstitutional, immoral and an abuse of power. I strongly stand against their adoption.

Stanley Hope

Hello,

I vigorously oppose agenda item #8. Mandating the COVID-19 shot for school children is completely unethical. It exposes children to a novel experimental technology for an illness to which they have statistically no risk of suffering complications from. Please vote no to this. My child will never receive this shot. This shot does not prevent a person from becoming ill or getting others ill. It has no impact on public health.

I strongly support agenda item #11, a petition that establishes a new rule that prevents the addition of any EUA products to the school required vaccine list. Using children as experimental test subjects is wholly unethical and immoral.

Thank you,  
Rebecca

To whom this may concern:

\*\*\* I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about cvd injections for consideration of mandating them for school required list.

\*\*\* I oppose the following proposed unconstitutional policies;

- WAC 246- 100- 070
- WAC 246- 100- 045
- WAC 246- 100- 040
- WAC 246-100 rule making that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

\*\*\* I SUPPORT Item #11 It is Informed Choice Washington's Petition for Rulemaking on the January 12th agenda which was filed by Xavier Figueroa, PhD, on behalf of Informed Choice WA.

I ask the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Sara O'Sullivan

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

To institute involuntary isolation camps for people with COVID-19 and mandate COVID-19 injections for children attending school.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Regarding the forced injections: First, the COVID-19 vaccines do not stop the spread of the disease. Secondly, as the VAERS database shows, there are serious, sometimes fatal adverse side effects, much more than any vaccine has demonstrated in the past. Regarding the involuntary isolation camps: Taking people's civil liberties away for a virus with a 98.6% recovery rate is an overreach of the state's power.

Subject: January 12th Meeting agenda - My Comments

External Email

Dear Board Members,

While the below letter may be copied and pasted, I fully agree with this individual and the information presented. I have done a lot of my own study on this topic these past two years. I have watched as this has progressed and the continued attempts to remove our basic individual rights as Americans in this state. Our basic rights have been under attack under the guise of public health. You are bordering on instigating communist rule in a nation of people that will not adhere to or accept it. If you do this, I expect you will be prosecuted and found liable when all is said and done. I don't think you can afford that.

The very thought that you would even consider a "police state" in the name of public health in WA is horrifying! To physically restrain and detain any individual because they are ill or have made a decision to take care of themselves as they see fit is not within your scope of responsibility, nor is this done in our nation. We are a free people. Period. Below you will find data on the vaccine, quarantine, testing. I think we have all found that people are going to get this virus no matter what they do. Vaccinated or not, you can get and give this virus. The chances of survival are great for most people in America. The policies over these past two years have not worked. I ask that you look past what you have been told, or directed and look into the facts of health and how people can work towards being healthy and work toward that.

Please allow common sense and cooler heads to prevail. Consider our constitutional rights and I ask that you also consider empathy in dealing with your fellow humans and do what is right, not continue to promote what is the ongoing narrative.

"Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100."

"Dear Board of Members,

No CDC guidelines, OSHA regulations or health officer order can suspend our rights. "We the People" and do not consent. We do not give you the authority to force any medical procedures on our children, elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families and what is done with our body and it doesn't matter whether the vaccine only has an "emergency

authorization" or not.

The masks and the testing are also "emergency use authorization" but even if they weren't, we cannot be forced into complying. Only a licensed medical doctor can suggest a medical treatment such as a mask, covid testing or a vaccine. You or school administrator has no authority to do so.

We have the constitutionally-protected and GUARANTEED right to life and the right to determine what it's done to our body.

We are covered under ADA laws and our needs would have to be accommodated by law.

You are not a medical professional and, therefore, you are unlawfully practicing medicine by prescribing, recommending, and using coercion to insist on this experimental medical treatment.

Whereas:

1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential."

2. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials.

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

"The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." 4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year.

5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models. The participants in clinical trials involving children aged 5-11 received "two doses of 10 µg BNT162b2 or placebo (saline)", not the new formulation.

6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death.

7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials.

8. FDA admits safety unknown. Children are being used as test subjects, with their parents acquiescing under fraudulent marketing pressure. Public Health messaging does not match the reality of the current knowledge base. At the October 26 VRBPAC meeting, FDA Advisor Dr. Eric Rubin admitted: ". . . but we're never going to learn about how safe this vaccine is unless we start giving it."

10. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than deaths in the last 10 years from all vaccines combined and only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID vaccines is unknown as there is a significant delay in uploading reports to the VAERS database.

The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary.

Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law.

Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence.

Any party found to be involved in vaccination coercion when entrusted with the care of our children such as all school staff, school board members and executive, and any other adults who may have access to our children while under their care. This includes the assistance of outside school staff, contractors, public health nurses, or health officials could be prosecuted to the full extent of law and you may be held personally and criminally liable for any injuries or deaths that may occur.

We are forced to err on the side of spiritual caution and refuse to harm our temples in honor of God's Holy Word.

The 1st Amendment of the constitution has protected these exact claims before the Supreme Court on many occasions. Even State governments have faced this glaring truth during the Covid crisis as they attempted to pass mandates and laws that violated this basic principle only to have their wrong decisions righted before the Courts, with financial penalties.

While, as Christians, we strive to be at peace with all men and to obey all laws and mandates from a Legitimately elected government. We do not do so in violation of God's Holy Laws, of which the protection of my body is one of those spiritual laws that supersedes all man made laws in my religious conscience.``

Importance: High

External Email

Hello,

I am writing this email to demand the fascist policies WAC 246-105 and WAC 246-100 to be ceased from existence.

Whoever decided to create them, as well as to propose them to the public is cruel and evil in their nature just like the policies themselves.

History shows that whenever government officers were allowed to affect people's lives in such a manner these policies allow them, there were millions of people who were denied their basic human rights of choice and freedom. Because of the same in their nature policies, 6 million Jews were brutally killed, and millions more of different were traumatized and suffering. And if we are to give these policies even a chance for existence, we will be repeating the same mistake here in the United States, the country of the free.

We CANNOT and SHOULD NOT allow policies like that to exist. It is against human rights, rights given to us by God himself, the rights protected by the constitution. The

constitution is designed to limit the government because absolute power corrupts absolutely, and our leaders are already corrupted. However, these proposed policies override the constitution and provide health officers absolute power, which makes these policies UNCONSTITUTIONAL.

It is clear that the pandemic, mainly created as a political tool to place power in the hand of just a few cruel people, has nothing to do with the proposed policies that cease human freedom. We all saw that somehow states like Florida, where people continued their normal lives, and somehow had even fewer cases of COVID compared to the Marxist states like California. It is not a question of protecting people's health because it is to be taken care of by each person individually by each individual, not by the government. That is, I am raising my voice AGAINST these UNCONSTITUTIONAL, UNHUMAN, IMMORAL, EVIL IN THEIR NATURE policies. I am raising my voice as my God-given constitutional right for the sake of the future of this generation, the generation of my future children and their children, and for the sake of this country.

I expect to hear a personal reply to this email, as it is my right and your obligation to read it thoroughly to take action upon the people you represent and whose constitutional rights you are to protect.

Best Regards,

Aleksandra Ankuda

I am a mother of two, and have been a Washington state resident (on both the east and west side) for over 16 years, in total. I am adamantly against a vaccine requirement for school children for the covid-19 vaccine, and vaccine mandate. My children are both fully vaccinated with all other required childhood vaccines. I followed a "Dr. Sears" method of vaccination, which allowed me to space out their vaccinations as I saw was best for their health. We do not receive the flu shot. If the covid vaccine was in fact the right thing to do for my family, no one would have to be mandating or requiring me to get it for my children! As it sits currently, the facts are there is absolutely no valid reason to be vaccinating our children for this, and the risk outweighs any idea of a benefit. ABSENCE OF DATA SHOWING HARM IS NOT THE SAME AS SAFETY! In this case, as an Advisory Board and Board of Health I would like you all to also consider who is/will be liable for the vaccine injuries in children if you mandate and require them to get it to receive an education? It certainly won't be the insurance companies, it ABSOLUTELY won't be the vaccine companies. No, it will be people like you all. It will be you and your families having to fight these lawsuits in court. And I guarantee you, the lawsuits are coming. Ask yourselves; are you prepared to take on the majority of Washington state residents? Are you prepared to be the one who's found guilty of forcing an experimental drug on a child that gives them a life-long, non-curable, heart problem that will likely kill them? Is forcing it on children in order to receive an education worth it to you? Could you still sleep at night knowing you did this to them?

To: DOH WSOBH  
Cc:  
Subject: 1/12/22 WSOBH meeting comment for item 11

External Email

Dear Members of the Board,

Thank you for your time and consideration in this matter.

I would like to comment on agenda item #11. Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry. Specifically, I formally oppose the proposal to require a Covid vaccine for children to attend school by adding Covid to WAC 246-105-030 Vaccine-preventable diseases children must be protected against for full immunization "In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a child care center"

I am against requiring the Covid vaccine for children to attend school or child care for the following reasons:

1. Covid is not a vaccine-preventable disease. The Covid vaccine is designed to and functions only to lessen the symptoms of individuals who contract the disease. The Covid vaccine does not prevent transmission of Covid.

2. Covid symptoms in children are mild and not life threatening. If a child contracts Covid, he/she is no more dangerous to other children than had he/she contracted a cold or the flu. It is okay for children to get sick. When children get sick, their natural immune system is the best defense to build immunity.

3. The science behind Covid is still evolving and changing as is evident by the continually changing guidelines put forth by the CDC and other government health agencies. To require a vaccine now when the data and other guidelines are still changing would be premature and short-sighted.

4. In the US, the death rate (0.000357%) and even the hospitalization rate (0.0296%) in children from Covid are so low that they do not warrant a mandatory vaccine. It should remain a family choice similar to the choice for other vaccines available. On the CDC website it states "There are approximately 28 million children between the ages of 5 and 11 years old in the United States. As of mid-October 2021, children ages 5 through 11 years have experienced more than 8,300 COVID-19 related hospitalizations and nearly 100 deaths from COVID-19." While every loss of life is tragic, it is not reasonable for the Board to consider such extreme measures for a virus that has such a minimal impact on our children.

5. The Covid vaccine does not have full FDA approval for children ages 5-11, it is still only authorized under emergency use authorization. It would be premature and reckless to require a vaccine that does not have full approval of the FDA.

Sincerely,

Tina Corbo

WAC 246-100: Allowing local health offices to use law enforcement (WAC-246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-400-045) following refusal to voluntary comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) School immunization requirements using WAC 245-105

11.

Are you Pro or Con on the proposal?

## 2. Con

---

I do not believe forcing experimental vaccines upon our community, children and taking away our freedom is what our country values were founded on. There are risks with the vaccine and with the high population vaccinated already and the rates of positive covid spiking; it is clear that the correlation of vaccination and positive is unrelated. The risks does not out weigh the benefits. Forcing quarantine individuals into quarantine facilities is.a waste of our resources and efforts when we need to push efforts and \$\$ resources to provide early Covid stage treatments.

❑ppose making the vaccine a school requirement. COVID has not been shown to cause severe illness in children. We have been battling influenza for years and it can cause secondary complications in people of all ages, but we aren't requiring it for school, to go into a restaurant, to get on a plane, etc. Also, how will school districts manage tracking this vaccine with scattered dates of initial immunization and endless boosters? Other immunizations on the school schedule are to be met by a certain age...this vaccine is different. I hope the state plans to fund more nurses for school districts in order to manage this because they get very little support for health services as it is. Or maybe DOH can manage it for them because schools can't find employees to fill these positions even if they were funded.

Secondly, involuntary quarantine? What are we doing to our state and our country? This is ridiculous. Who will be enforcing this?

Both of these items are very unethical and I hope you think about that before making a decision on moving forward with either of them.

---

My name is Melanie Tinsley and I am a concerned mother of 3 daughters, Steilacoom School Board Director, a Firefighter wife, and Realtor. I am against any proposal that suggests required immunizations for COVID, but am very strongly against required immunizations for COVID for children. This is immoral and wrong, as this virus is not any more harmful to children than the flu and that this vaccine is still in emergency use, and not fully approved. We have lived with this virus for only 2 years, and less since a vaccine was rolled out. If you believe this is enough time to warrant a required immunization rule, I would be urge you to think about your reasoning and really ask yourself if this is moral and ethical. Our children are not animals. They are not lab rats. Adults should be protecting them (physically, mentally, socially), not the other way around. We have already damaged this generation enough and we have yet to see the repercussions of the actions of our government the past 2 years. The after effects of this immunization are still yet to be seen, in both adults and children. Please ask yourself if your decision around this is to protect ALL children, for the rest of their lives. Or if it's a short-term, fear-based, knee-jerk reaction to a pandemic that is largely affecting adults vs children. If you choose to take action to approve required immunization for COVID for entry to schools, you will have a mass exodus of students from public schools. As a School Board Director, I will vote against any action in our district that proposes this. As a parent, I will remove my children from public school if this becomes a requirement. I urge you to please vote against this proposed requirement. Regarding any discussion on WAC 246-100, or any changes to isolation and quarantine procedures for COVID: I am against any increased forceable measures that would require law enforcement or health officers to involuntarily detain / isolate / quarantine a human being because of COVID. This is not the 1940's, and this closely resembles concentration camps, just in a modern setting. I urge you to consider the moral and ethical precedent this would create, and has already created. Additionally, this virus' current variant is spreading through both vaccinated and unvaccinated. There should be no separation or distinction between the two in consideration for any forceable measures. However, there should be no forceable actions at all. Thank you for your time, Melanie Tinsley

2.                      Con

---

\*Vaccinated or not, both can receive and transmit Covid 19. \*One that chooses not to get vaccinated does not make it less safe to be around than a vaccinated individual. \*This requirement would take away freedom of choice for those that oppose the vaccine for medical, religious, or any other reason \*Every child has a right to their education. The WA state schools have not shown that they can provide accequate education and resources for those that cannot participate in school due to do receiving Covid 19 or being sent home for reasons of close contact. What evidence supports that schools would work to offer a solution for those who oppose students becoming vaccinated? \*I fear our state would loose some of its most critical thinkers as many parents would move their children to private schools or take them to another state for their education. That would leave the school system with all like minded families...which is never a positive when trying to promote excellence, educational growth, and diversity in a school setting.

To whom it may concern,  
I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:  
Children are at extremely low risk for Covid  
The vaccines are still only EUA (emergency use authorized)  
There are no long-term studies to document any history of safety  
Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,  
The vaccine apparently does not stop the spread of the disease

There are no studies to determine what the possible long term side affects might be.  
Best Wishes

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. The disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it's is unconstitutional, criminal attempt for the government to control the population. Those who are opposing this plan should be charged with treason.

Children are NOT at high risk for covid. This vaccine is still only for Emergency Use Only, and should NOT be mandatory. There are no long term studies to verify the safety of this vaccine for children. Do you want to be responsible for future issues? The vaccine does not stop the spread of Covid, and studies now document that vaccinated and unvaccinated can transmit and spread Covid. This proposal is unnecessary. Please stop it.

Subject: No Vaccine Requirement ....PLEASE

External Email

FREEDOM OF CHOICE, please let us keep that right. Please do not force students to get the COVID vaccination. The vaccine does not stop the spread of the virous or prevent you from getting COVID. This should not be a forced vaccine especially not in a free society and democratic country. You are not here to decide what is best for the masses, we can decide that for ourselves. We have the right to choose what goes into our bodies not what you think is good for us. Each one of us has different beliefs so please respect that and don't push your ideas on other people. If the schools require students to get vaccinated, then I will have to remove my children from the public school district.

Subject: Comment regarding Covid-19 vaccination for children

External Email

The International Alliance of Physicians and Medical Scientists put this statement on the website <https://doctorsandscientistsdeclaration.org/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/>>  
dated October 29, 2021 that summarized thousands of physician and medical staff's findings and 20 months of research. I will paste it below, because I'm convinced that few of us could claim this much research, medical knowledge and experience, and the conclusion is overwhelming that the COVID-19 vaccination is a dangerous risk for children. I request that you realize the weight of what you are considering putting into our children and the risks to them. Please do not require any child to take this vaccine. Thank you.

NOW THEREFORE, IT IS:

RESOLVED, THAT HEALTHY CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION

- \* Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.
- \* Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.
- \* Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.
- \* Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

Covid-19 vaccination should not be mandatory for children. This is a private health care decision that is between parents and their doctors. As a father, I am appalled that the state would even consider coercing me into have my child vaccinated in order for him to participate in child-care or school in the state. This proposal should be unequivocally rejected.

I strongly oppose making the Covid vaccine a requirement to attend grades K-12 in public schools. I feel this is and should remain a personal choice that parents are allowed to make without stipulations, especially considering that there is no long term health data associated with the vaccine nor does it prevent contracting the virus. According to WAC246-105-030 immunizations are required only for "vaccine preventable diseases." Currently, there is no vaccine that prevents Covid, which in turn would disqualify it from being required to attend public schools. I have four children, all of whom currently attend public school. I have one child that attends high school, one that attends middle school and two that are in grade school. I have grave concerns about the educational, social and emotional losses that the children in our state have suffered since the beginning of the pandemic. These issues are of more concern to me than whether or not my children will become ill with a virus that has over a 99% survivability rate.

My scientific background allows me to research the Covid science facts and discard the science fiction that is being promulgated by the charlatans at CDC, NIH, NIAID, Big-Pharma, Bill and Melinda Gates Foundation, and others.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Items 6 and 9 regarding Covid vaccine and testing requirements for children

11.

Are you Pro or Con on the proposal?

2. Con

---

There are plenty of science facts (not science fiction put out by the CDC, NIH, NIAID, and others connected with government and big-Pharma) available that children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorization), which means that use requires fully informed consent, which children cannot provide, and that consent must be without coercion. That requirement is embodied in the Nuremberg code and Federal Law and failure to comply with that is a crime that carries severe civil and criminal penalties. Risking the lives of our children with Covid "vaccines," which are actually experimental treatments, is unacceptable and even criminal. STOP IT!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Most children have strong enough immune systems to fight Covid.

Children are a low risk for spreading Covid

The flu kills more children than Covid ever could and there is no mandate for that seasonal vaccine.

The flu took over 100 years to develop vaccines and they still don't stop the spread of the flu because there are so many strains.

**STOP TRYING TO MAKE MONEY AT THE EXPENSE OF OUR HEALTH!**

Not enough research to determine long term side effects in anyone who takes the vaccine.

There are currently more hospitalizations for vaccinated people than unvaccinated.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

To Whom it May Concern,

I am completely outraged at the thought of our State considering the legislation of such a heavy handed overreach of power to force the public to be vaccinated, requiring school children to be vaccinated, involuntary pressure and even forced isolation in quarantine facilities?! Are you kidding me? When did we become pre-World War II Germany?

This will NOT go down well. There are too many patriots and free citizens in this great country who will not take this sitting down. I speak for myself, but I know many who hold to the same principles of freedom who will object and oppose such outrageous legislation.

The emergency measures the state has been operating on are way past the legal limit. You are working from an illegitimate position. Thank you for reading my letter.

Richard Farinella

To whom this may concern, i phillip a gray a legal american and law abiding citizen currently residing in WA state would like to express urgent concerns about the following;

I oppose the proposed WAC's 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> , WAC 246-100-040 <tel:246-100-040> , WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

These things violate our rights as americans and the core beliefs and values the country was founded on, and it is a major constitutional breach. If we allow this now where does the line stop? Theres no telling what will be over stepped next. This is turning into socialism, no longer a place where theres freedom If choice.

Thank you for your consideration.

The vaccine isn't necessary for children, especially with Omicron being the dominant variant and the fact that children are far less likely to become seriously ill or need any medical intervention or hospitalization. How will you plan to run schools, when there will be a mass exodus of school children out of the public school system if you enforce the covid vaccine for children to attend school?! There is so much information available to show the side effects from the vaccine are far worse to children than the effects of actually getting any covid strain! As far as involuntary quarantine, last I heard, we live in AMERICA! Every single person I know has followed quarantine rules! Omicron is simply put, a cold! My family has had it as well as previously strains. I ask how do you plan to not only test every single Washingtonian, but then to forcibly remove them from their safe family home?! What if a child is positive and a parent is negative? Will you plan to only remove the child? Allow all of us responsible, tax paying, law abiding citizens to take care of our own families! We do not live in a dictatorship which if this is passed, is what it will become! Have faith in your fellow human! And remember this will affect you and your family as well! Thank you

No vaccine should be mandated for kids to go to school when it does not prevent anyone from getting Covid. Making kids get this vaccine with force parents to start homeschooling more. Which will cause the school districts to get less funding. There are three different vaccines for Covid and none have been very effective. Not even the flu shot is mandatory.

Subject: Covid 19 shot requirements for school

External Email

Hello,

Writing to voice my concern over the potential Covid-19 shot requirements that are being weighed in on. We strongly oppose said requirements and will not comply and are prepared to homeschool if it happens. This is not ideal as my children love their school. However, we will not be vaccinating our children to meet this requirement. Please consider the significant percentage of families who are not interested in the vaccine at this time.

Sincerely,  
Sarah Stockham

Against religious and philosophical beliefs of families. It is negligent to require an immunization that has only recently been available to our children without long term studies for possible adverse reactions. If this is something schools are going to require then there needs to be an exemption for both religious and philosophical. Absolutely not okay with our children being forced to be test subjects with a new vaccination that does not even prevent a mutating disease but only possibly lessens symptoms.

Subject: children Covid-19 vaccine

External Email

Dear Washington State Board of Health members,

I write this email with a very heavy heart. I beg you to reconsider trying to mandate the Covid-19 vaccine for children in schools for many reasons.

The first reason is that this vaccine has not been tested and tried for years like others have. We do not have any idea what LONG term affects this vaccine may have. We have no idea what putting this vaccine into a growing body will do years from now. It is one thing to inject a fast tracked vaccine into an adult body, it is a completely different idea to try to force families to inject their child with a vaccine that has not fully been FDA approved, nor tested for years and years.

The second reason is that Covid vaccines in general are a controversial subject right now and being a teacher, I fear that many families will pull their children out of school, thus my job may be in jeopardy and I may not be able to teach and do what I love. This could have a trickle down effect and could put many jobs at risk, as well as funding for schools with lower enrollment rates. I personally know of 5 teachers at my school who are all Covid vaccinated themselves as adults, but refuse to vaccinate their child and have been looking at moving to other states if this mandate goes through. One teacher already has left our school. My husband and I would also be in the same boat and would be moving states, as we would not be vaccinating our own children and would need to find a different school system to enroll them into. This would be a huge adjustment for our family, but a necessary one to not inject them with an experimental drug.

The third reason is that Covid-19 vaccines reduce symptoms and give you partial resistance (not immunity), whereas a typical vaccine gives someone immunity to the disease they are vaccinating against. We know that people who are vaccinated can still pass Covid to each other. Our school has been very effective in NOT spreading Covid to each other and most all of our cases are due to exposures from adults in their household, not other students. Our mask protocols and social distancing are working just fine. There is no need to divide our parents against the school (because that is who always feels the pressure at the end of the day) when they are safe how we are running things right now.

The fourth reason is that some parents are not comfortable with the potential side affects of the shot. I personally know of one parent who vaccinated her student and now her child is paralyzed and cannot walk. After some families heard of this, they refuse to vaccinate their children. Some parents do not want to risk dealing with side affects and they should have the option to choose if they want to vaccinate their child or not with an experimental drug. EVERY child should have the right and access to go to school without having to worry about not being able to go because they did not get this new, not fully FDA approved, and not long term tested vaccine.

The last reason is that Washington state is starting to feel more like a dictatorship than a democracy. Mandating this vaccine in the current state that it is in goes against our rights as being an American living in the United States. It is has been very frustrating trying to teach through all of the up's and down's these last few years (as I am sure everyone feels this way with their job). However, in my opinion sending your child to school should not have to be a choice for families based on if they vaccinated their child or not with this, specific Covid-19 vaccine. This is also NOT what is best for kids and will make school an unequitable place because some will be able to attend and some will not. We know the social-emotional welfare of students have been greatly affected these past couple of years and suicide rates alone were 4 times greater during the shut-down. We need ALL students in school, regardless of their Covid-19 status. Remember, mask wearing and social distancing is working!!! We can continue to do this and not transmit Covid. We have already proven this can be done. Please do not make families be forced with yet another hard decision. Parents have enough on their plates already.

I am "speaking" to you in hopes that you will consider what this will mean for Washington state and it's schools and families, mine included. It is not medically or consciously okay to use our children as test subjects and to force families to vaccinate their child with a Covid-19 vaccine. The science on Covid is still changing. For example, now they say you only need to quarantine for 5 days, not 10-14. Again, there are still so many unknowns, and we are talking about young, still developing bodies, not fully grown adults. They are the future of the United States and there has just not been enough time or evidence that this specific vaccine is fully safe. I sincerely ask you to not mandate this vaccine for school aged children.

Thank you for reading this.

Sabrina

I'd like to start out asking you "What country are we living in".... What State of the union do we live in???

You are taking away our God given rights one at a time....

I am completely against any proposed Covid 19 policies that are over reaching and immoral.

I am against the following WAC's

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

It should not be made mandatory for children to have the Covid 19 vaccine to attend school.

Our medical information is personal and should not be made public for any reason nor should health officials be able to use law enforcement to

involuntarily detain any on or group to be isolated for refusing to comply to testing, exams or vaccinations. Seeing talk of "quarantine facilities"..... What the hell.

I am a proud American!! I was born in this state and always been proud of it. I am so upset and disappointed in our state and what's become... no wonder so many people are talking about moving out of it.

Concerned,

Tracy Englund Dietrich

Subject: advisory meeting feedback

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest recommending a vaccine for Covid for school aged children who attend school in Washington State. I am against imposing this vaccine on our children. I believe this to be a horrible overreach of state government.

The Covid "vaccine" is experimental. There have been no studies on the long-term health side effects on children or even on adults. We have never required an untested drug to be used on our children. Making it required to attend public school is criminal and against our constitution.

If you decide to follow through with this abuse of state power, you will be held accountable for the consequences whether they are unintentional or not. You are taking the decision to monitor a child's health out of the hands of its parents. You must then face the repercussions that happen when this trial "vaccine" begins causing health problems way beyond the symptoms of Covid itself.

We do not need this requirement to protect our children or our communities. We need you to consider the constitutional rights we have been guaranteed by our founding fathers to stay free, to live and care for our families and our friends, and our communities based on our religious and moral beliefs.

With respect,

Ron Laycock

Dear Board of Health,  
I am opposed to vaccine mandates for anyone, especially children. I view your actions as an attempt on my child's life. I will protect my child at any cost.  
The experimental mRNA shots are not vaccines, they don't provide immunity, they don't stop transmission. Changing the definition of vaccine does not change the truth.  
Supposedly the shot "may reduce symptoms" of an already mild condition for where most people are asymptomatic and have a 99.99% survival rate.  
Natural immunity is superior, and we have it.  
Covid is a power grab operation ran by controlling the populations with fear.  
Your toxic shot for population control has already killed a minimum of 21,000 people in the United States and injured millions more. Per CDC VAERS data.  
I will refuse a foreign substance into my child's body.  
I do not care what kind of mandates or laws you create, we will not comply.  
You do not have any right to do what you are doing.  
You are engaged in crimes against humanity.  
You are violating the Nuremberg code.  
I do not consent.  
Please make a 180 degree turn from your Bio-Technocracy agenda, else you may be put on trial and pay the penalty for this treason.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

School age children with no significant additional health factors are at extremely low risk of complications from Covid-19. It is inappropriate given the risk to the children to require vaccination to attend school. Long term effects on children from the mRNA vaccines are still unknown and given the extremely low risk to the children themselves they should not be required to receive these vaccines.

---

The State Board of Health (SBOH) is considering the COVID-19 vaccine for inclusion in chapter 246-105 WAC. A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. • The vaccine has been directly available to every vulnerable sub-set of the population for some time. 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public. While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. • Under 51% of Spokane County residents are vaccinated. (srdc.org) • Less than 40% of kids 12-17 are vaccinated. (srdc.org) • Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org) 8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable. • Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

Hello,

I am a Washington resident since 1995 and I am not comfortable with WACS 246-100-070, 246-100-045, 246-100-040 & 246-105.

To require children to get injected with this experimental gene therapy is unethical and morally wrong. To use law enforcement to detain and quarantine families is also wrong and against our constitutional rights.

I am fully against these WACs and what they represent.

Signed,  
A concerned community member.

Hello,

I wish to express my opinion on your discussion/vote as to whether or not to require covid vaccinations for the 2022-2023 school year. As someone who works in a school district, I find the requirement unnecessary and ineffective in helping prevent the spread of covid. Statistics are proving that the vaccine does not prevent someone from contracting the virus, nor does it prevent them from spreading it. The only benefit is potentially decreasing the magnitude of the effects of the virus (as in, potential hospitalization). Of the 25-30 or so students from the elementary where I work who either contracted the virus over winter break or were close contacts, all but five of the students were vaccinated and all close contacts were exposed to someone who had the virus despite being vaccinated and, in most cases, had the booster. To require a vaccine that is proving to only benefit the individual and not the educational community is ridiculous. Will we then require flu vaccines? At least they actually help prevent the spread. Yet, for years, they have been available and not required.

Further, as a school district employee under the vaccine mandate, I am suffering the "accommodations" required because of filing a medical exemption for the vaccine. Weekly testing - though I pose no greater risk of spreading covid than those fully vaccinated - and other requirements place an undue burden on me, all because it's not safe for me to get the vaccine. It places an undue burden upon our HR department. (These are tests, by the way, that would better be utilized for testing those who are actually sick.) Would the same "accommodations" be required for students who claimed exemption? Our school is having enough difficulty tracking those who are sick or close contacts/exposed. We don't have the staff to monitor exemption requirements, as well. In fact, thanks to staffing cuts from the pandemic, we are barely staying afloat in the tracking/monitoring!

When the state reopened to in-person learning this fall, it was with the understanding that the six feet social distancing would be followed, BUT NOT AT THE EXPENSE OF ALLOWING A STUDENT TO ATTEND SCHOOL. Please don't now create a barrier to that learning. The kids are just now STARTING to show signs of recovery from the loss of in-school learning during the pandemic. Requiring vaccines next year will only set them back again.

I strongly request you keep covid vaccinations OPTIONAL in the school districts. It makes more sense logically and financially. Thank you for reading this and taking this into consideration as you vote.

Sincerely,  
Sonya Day

This should not be made a requirement. You can't refuse the right to education of a child because they have chosen for whatever reason to not get vaccinated. You have children in the school system that are actually putting other children at risk for a multitude of reasons (life skills, non verbal kids, etc) and you can't kick them out of schools. I refuse to give my 10 year old daughter a shot that doesn't have near enough research behind it to call it safe.

This action will never stop the spread of the disease of any kind! EVER! All it will accomplish is taking away the Liberties provided in our constitution and leaves us all in a nation that was ruled by Hitler! I Noticed in this act that therapeutics are never ONCE MENTIONED. WHY? All the reason for this even being considered is that if these experimental injections are forced upon on children they will be sicker and we will striped of all of our liberties. This is just all part of a well Orchestrated message from Fauchi and gates and Klaus Schwab for the last 20 years. WILL YOU VOTE FOR PRISON PLANET!

Washington state board of health,

I object to the plan to apply current infectious disease WAC codes to include Covid 19 for Washington state residence. This disease is manageable if treatment is started early. Moreover it is survivable by more than 90% of the population. Covid vaccines have a little affect on the omicron variant, and in fact most people who get this variant have been fully vaccinated some have even received booster shots. Being fully vaccinated will require regular booster shots forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from COVID-19 but they do have considerable risk from the unapproved Covid vaccines. In America health officers do not have the right to quarantine a person or family in a prison type facility for refusing the Covid vaccine or any other medical intervention. This is not about our health it is an un constitutional criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Sarah Y Hamblin

Vaccinations for school age children with the Covid 19 should not be allowed. If this committee was up to date on research involving adverse effects to children from this EUA you would have no other option to refuse mandatory vaxes for our children. Consider the legalities of US Code and our state Constitution that were derived from the Nuremberg Code to protect against using experimental medicine without informed consent. The Phizer studies are now to be released throughout the next 8 months per Federal Court order. No information covering adverse effects, has been published by pharmaceutical companies. The giving of these shots are a felony. In no way should these shots be given to children or adults.

It is a violation of human rights to force a medical procedure on an individual without their consent. Parents should have the final say on the Covid vaccination status of their child. This is a tyrannical overreach by the health authorities when it has already been shown that children are at extremely low risk of Covid and that the vaccine has a growing number of VAERS files accumulating. Government authorities should not be making these decisions for families or coercing parents with a choice of school or no school access. These vaccines are still in the EUA stage with NO long-term vaccine affects yet available due to the short amount of time they have been available.

I strongly oppose all of the following:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

This is unconstitutional. Please provide me with valid science to back the decision to support these policies. Why are policies not in place to test for antibodies for all of those who have natural immunity? This would eliminate all mandates to have had the Covid vaccine and avoid all the tyranny that these policies support. Perhaps making policies that mandate autopsies of those who died of Covid to get accurate answers for cause of death. Policies for allowing therapeutics to be given to those who contract Covid to heal them because clearly the Covid hospital protocols are not working and killing people.

Children are not affected by Covid. Statistics prove this on a global scale. WAC 246-105 is totally absurd. Children who have received the Covid vaccine in other countries have died and had adverse reactions. Children are far more likely to have these adverse effects and death from this Covid vaccine than from actually getting Covid. If you agree to pass this absurd policy, each of you will in turn be responsible for every single death and adverse reaction in every single child affected. You will then live with this decision for the rest of your life.

Get a second opinion from those who are silenced and banned from media. Listen to actual testimonials from individuals who have personally lost friends and family members to this Covid Vaccine from around the world.

VOTE NO TO THE WACS BELOW:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

BY VOTING NO YOU can stop these ridiculous policies that take away God given and Constitutional freedoms, and instead propose alternative policies to combat this virus. There are several alternatives to these policies that MUST be considered.

Andrea Anderson

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group, with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.

2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It

is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.

3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider such a step and, if you have considered it, to reconsider.

Thank you,

Megan Minnick

---

I am opposed to mandating covid vaccination for children in childcare and school. For the past two years, children have been safe and data shows that they are at no risk. Vaccination is the decision of the parents, not the state. If this proposal is approved, it will exacerbate the difficulties already faced by families.

To whom it may concern.

Why do you feel this is ok to do? This is taking away our freedom. We shouldn't have to be "detained" or taken to some place to quarantine if sick or unvaccinated. Also, this "vaccine " should NOT be required for kids to go to school or mandated for ANYONE. It's already been proven that the "vaccine" does not stop the spread or stop you from getting it. If you want the "vaccine" then great, but those that choose not to inject themselves with a drug that is unknown is not fair for you to punish them. This is discrimination at its finest and it's NOT OK.

Sincerely  
Shauna Lewis

Subject: "No!" To adding Covid-19 vaccine mandates to the requirement list

External Email

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1. The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.
2. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.
3. According to CDC & WHO data, there could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.
4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by disenrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family values.

Kathy Varela

To: DOH WSBOH  
Cc:  
Subject: Student Vaccinations

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Steven McCorkle

To the Washington State Board of Health:

I am a concerned parent and grandparent in the Spokane area and want to express my opposition to adding the Covid Vaccine to all other required standard vaccinations to school age children. This vaccine should always be a choice by every individual parent to give or not give to their child. Government has no given right to determine over parents their medical decisions. Please put your service on education and not the personal health decisions of parents. This is what parents want and expect from school boards and officials. And this is also why many parents are leaving the public school districts for this kind of abuse of power. Parents make the decisions for their children.

Subject: NO mandatory Covid-19 vaccines!!!

External Email

I am OPPOSED to mandatory Covid-19 vaccines in schools, or anywhere else for that matter. We have NO idea what side effects these vaccines will create and they don't even appear to be working. Everybody I know who has had Covid recently has been vaccinated. And, many people I know have gotten sicker with each subsequent shot. Many people are not on board for any more shots. The answer is NOT to blindly pump in more chemicals that will cause unknown damage to our auto-immune systems, especially for a disease that is an uncomfortable inconvenience for almost everybody who gets it. It is irresponsible to risk everybody's health and safety to protect a miniscule minority. Vaccines should be a choice, not a mandate. This is your PR disaster, not mine, so don't drag me and my family into your damage control efforts.

For the safety of our children, we should absolutely not be forcing an experimental vaccine. In order to protect my children, I will not be allowing my children to have a vaccine until it is out of experimental stages. Until long term side effects are better understood. Children are in a low risk demographic for COVID-19 virus. There should not be such drastic measures of control for them to have to take the shot. I will absolutely quit my job and stay home with my children versus sending them to school if that's what it comes down to.

'I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Education is a human right and should not have any medical or procedural requirements to be able to access public education. I have already pulled my children out of the grasp of public education because of massive oversteps by unelected and elected bureaucrats on the personal and medical decisions of each individual. You can expect more public outcry and large unenrollments in public education if you continue down this road. Parents will not stand for this overreach. Leave these decisions to the parents and each individual circumstance to be determined if we choose it for ourselves and our children. Thank you for your time!

These WAC's are absolutely an overstep of power and government.

There is no need for any of this and it just doesn't make sense.

We must have the right to choose our own path when it comes to our health and safety.  
The government doesn't have that right.

Stop shoving this false narrative down the publics throats, stop censoring information for this will effect generations to come. The only way you would pass this is because you WANT it to effect our children in a way to limit their choices down the road, and continue to expand the power, greed and control of the government.

Stop this madness and insanity immediately.  
Thank you.

As a parent I have the right to choose to vaccinate my child or not. There are many reasons including religious freedoms that make it wrong to force thses things upon our kids. Other vaccinations are optional and have been. This is unconstitutional.

External Email

Dear Tracy,

I am writing to ask you to take a stand against any legislation or policy containing language which would require covid-19 injections or any vaccination for children to be able to go to school. Mandates and requirements like these are physically, mentally and emotionally unhealthy. They are culturally insensitive, cause mental anguish to many, trample on families' religious rights as well as an individual's bodily autonomy from the government.

I ask you to consider that experimental Covid Injections currently available are not a "one size fits all" solution to end the spread of Covid or lessen its effects. Please look out for the Health of every Washingtonian as you consider that the proposed policy to include covid-19 injections as school immunization requirements is truly atrocious on all levels pertaining to health, and to put such policy in place is a complete abuse of the power you have been given.

I implore you to consider the science and the latest data as you read the following facts

before you make such an egregious decision:

\* Pursuant to the CDC, the fatality rate for children from COVID-19 nationwide is .00003%.

\* Pursuant to the CDC, the CDC Director and Dr. Fauci in his New York Times November 12 interview, the COVID-19 vaccine will not prevent infection or transmission of the COVID-19 virus, nor will it prevent serious injury, hospitalization or death any longer. Therefore, the vaccine is no longer the best tool for prevention of transmission. It is now a medical treatment, at best, hence it cannot be mandated as treatments are a personal medical choice pursuant to the state and federal Constitutions.

\* Pursuant to the FDA, the vaccine manufacturers, and multiple scientists across the nation and the world, these vaccines pose grave risks of severe myocarditis, blood clotting, and neurological damage to name a few, predominantly prevalent in adolescents. As such, the risks of taking the vaccine strongly and significantly outweigh the benefits especially as it pertains to the pediatric community.

Thank you for your service to our state. I will be praying for the board's decision making process and for truth and wisdom to be your foundation.

Sincerely,

Nicole Shuts

Mandates for this sort of thing are a huge breach of the trust we place in elected officials. Individual organizations should be able to make their own decisions. We're all reasonable adults and can decide on what is best for our businesses, families, and places of worship. Not only that, vaccine passports are a privacy nightmare and hipaa violation. By supporting this, you support creating a class of untouchables, of unclean people who refuse to carry spyware smartphones, or don't wish to identify themselves when out in the world. It's depressing how anti-privacy these measures are. Please reconsider.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Vacines

External Email

Washington State Board of Health,

The Powers and Duties of the Department and Board of Health do not extend to mandating for children to be "immunized" against COVID as a requirement to attend schools. At this point in time COVID vaccines or injections are still considered Experimental and at present COVID is NOT a vaccine preventable disease.

A healthy child bears no risk from COVID disease, and at the same time, conversely, a healthy child bears potential health risks of side effects from COVID vaccines or experimental COVID injections. Any hypothetical benefits to adults do not outweigh the risks to children from these injections.

Numerous studies as well as anecdotal evidence reveal the viral load in an immunized individual is as much as 250 times greater than that of an individual not vaccinated.

Studies and anecdotal evidence reveal immunized individuals are not prevented from acquiring COVID infections, nor are they prevented from spreading COVID infections to other individuals.

Covid vaccination has resulted in 850,000 vaccine injuries, including myocarditis and Guillain Barre Syndrome, and in 18,000 deaths.

Absent long term safety testing of available vaccinations, the Board and Department of Health are not authorized under any regulatory, legal, or legislative circumstances to mandate COVID vaccination as a condition for attendance at a State or Private School. Vaccines are not 100% safe, nor are they 100% effective, there is no safety data on any of the literature available with these injections, and no informed consent is available to parents or legal guardians.

The decision to or not to vaccinate a minor child in this state should not be mandated or coerced via Department rule-making, but rather should remain an individual family choice.

Respectfully,

Terri A. Zalevits

Subject: Childhood Vaccinations

External Email

Dear WA State Board of Health, employees and associates and TAP:

First off, I want to tell you that some of this email is borrowed from a friend of mine as she hit so precisely and so eloquently on what I think and feel. However, some of it is me. Please, take the time to read it all...

We now know that the covid 19 injections not only do not prevent infection, transmission, hospitalization and death of covid 19, but they are also a considerable health risk. Why would anyone conceive of including such on a childhood (or any) vaccination schedule? Have you not done your due diligence in researching the data and facts around this hastily rolled out injection? To date, there is not even possibility of long term or phase 3 trials being completed. The risk of a child dying from covid 19, is less than .01 percent. This vaccine has already proven to be more dangerous to children than covid 19 itself. It is your duty to search out these facts away from vested and conflicts of interests and learn for yourselves.

Thousands of highly esteemed doctors and scientists are speaking out about what the data and science is showing and they are voicing their objections to, and abhorrence for, these forced injections. These doctors and scientists speaking facts and truth against a narrative are being censored from social and main stream media and academia. Why is that? Are you aware of the VAERS? How many deaths from this forced injection are acceptable for you? I say not even 1 is acceptable, especially for a virus with a 99.9 + % recovery rate in children! Why won't Pfizer release all their data on these injections? Are you willing to take personal responsibility for the lives of children and adults you will maim and destroy by facilitating approval for this atrocity? Are you willing to break state and federal laws, US codes and constitutional protections to push this agenda? You will also be living in the state and country you chose to destroy personal protections from the real danger of an overreaching government in.

When presented with reality and all of the facts, the only conclusion one can reach for anyone supporting this agenda is:

1. They are either ignorant to facts, science and truth because of censorship and personally held distorted beliefs.
2. They are mentally ill, compromised or unstable.
3. They know what they are doing and are benefiting in some degenerative way from pushing this agenda.

In any case, those will not escape this horrific machine being fed and will not be immune to the consequences of their actions and madness.

We know the vaccine industry is pushing this injection for it's own reasons. We also know, based on wording in the current law, an approval on the childhood vaccine schedule would mean securing the vaccine industry additional liability protection.

To all of you in positions of importance regarding this matter: We are watching you, and

many more of us are becoming aware by the hour. All of the money on Earth will never supersede truth, you cannot stop or silence it. You will either be held accountable for your actions or you will reap untold reward. Get on the right side of history and do the right thing.

\*\*\*\*\*

In my lifetime, our country has never been at such a breakpoint, at such a divided level. I truly fear the repercussions of enacting a vaccine requirement for our children. I'm asking you on a very personal an individual level to step back and look at the broader view. Is this the right time to force this vaccine? This decision reaches far beyond community health. Now is not the time. To enforce a vaccine, one so young and lacking in time tested results, is like pouring gasoline on a powder keg. Please consider the larger impact to our society, our country, to what this could result in.

\*\*\*\*\*

Sincerely,

Rich Filori

To Whom it May Concern:

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

Children are at LOW RISK for contracting Covid19.

This vaccine is EXPERIMENTAL - there are no long term studies showing this is safe for children or adults!!

People with and with out the vaccine have gotten Covid and have also shared it. No guarantee it works.

Most importantly, this is still America. Our constitution guarantees we are free to make our choices. There should be no such mandates in our country.

We should FOCUS on things that make for good health and good citizens. And if you are sick- STAY HOME!

Thank you very much for considering my opinion. I take this matter very seriously.

As an elected official I have relevancy to make known the strong objections of the WAC 246 amendments from the citizens of Bonney Lake WA. I am the expert in the consensus opinion of my constituents.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Washington State Board of Health PROPOSED POLICIES: -Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. -Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

11.

Are you Pro or Con on the proposal?

2. Con

---

I am speaking against the WAC 246-100-040, 246-100-045, 246-100-070 code to include covid19. The City of Bonney Lake stands united and will never instruct their officers to enforce it. Our citizens are not criminals and should never be treated as such. Covid19 has a 99% survival rate and does not qualify to be treated as a danger to society. We should never allow in-voluntary quarantine of any citizen in WA State.

To Whom it May Concern:

As a nurse, I am concerned that you would require a vaccine that has been approved under Emergency Use Authorization only at this time. Since this drug has not been studied for years, we do not know the full implications of vaccination at this time. If a parent wants to vaccinate their child, they are able to do so. But keeping unvaccinated children out of school is NOT the solution.

We have seen that otherwise healthy children are not affected by Covid 19 the way the elderly or those with comorbidities are. However, it is abundantly clear that children did not do well when they were forced to attend school virtually.

Please do not require children to receive the Covid vaccine for entry into schools.

Sincerely,

Carol Teodoro

COVID vaccine for children

11.

Are you Pro or Con on the proposal?

2. Con

---

COVID presents no real threat to children, and implying so is blatantly false. The vaccine has been shown to be an absolute failure in acquiring and transmitting COVID. Therefore anyone who suggests that it be mandatory for anyone to get a mRNA vaccine should have their motivations scrutinized heavily. The vaccine should not be mandatory for anyone.

Hi Tracy,  
My name is Carol Linden,  
I'm asking you to vote NO on vaccines for school age children!  
Are you aware of the way Sweden handled Covid-19 when it first attacked?  
The children went to school as usual, NO masks, NO social distancing.... and NOT ONE  
child died from age 0-15!  
My message to you represents thousands of people that do not email because we think  
that you are not listening to the voices of the people.  
I hope you'll think of the children that are too young to make their voice heard!  
VOTE against vaccines for school age children.  
Carol Linden

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

\*\* The primary reason is that children are not at risk for dying. To date, approximately 814,000 people have died from COVID. Only a little over 100 of those were children under the age of 14. And in the US there is not even one recorded death of a child 14 and under that was healthy who died. There is absolutely no reason to mandate a shot to these kids.

☐ Please consider this list of facts before also coercing our children to have this experimental highly ineffective and understudied inoculation with many reported side effects including death.

Any Federal funds received to push this agenda are not worth the health and lives of our children. They have already been subjected to and psychologically damaged over the past two years of on account of something they have next to no risk of succumbing to seriously. They have a greater chance of being killed by lightning, or more practically speaking, in a car crash or by diabetes.

1. All COVID vaccines remain under Emergency Use Authorization (irrespective of many people believing that the Pfizer one has been approved; it hasn't);
2. Children under the age of 18 have a 99.995% survival rate from COVID infection;
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19;
4. There are no long-term studies to document and history of safety(
5. Studies now document that both the vaccinated and unvaccinated can both transmit Covid; and therefore
6. The vaccine does not stop the spread of the disease.

In addition, the intent to pass legislation to forcibly detain, exam, inoculate, and quarantine anyone against their will is in line with the treatment of all totalitarian regimes throughout history of their population, regardless of so called public health being used as the tactic of oppression. Even more so given that there is an overall 99.8% survival rate for anyone who does become ill. Even more so that the UNAPPROVED EXPERIMENTAL inoculation is proving not only ineffective, but is transmitting new variants, and is causing an alarming amount of serious side effects, including death. Normally such a medication or vaccine with such inefficacy and high risk of harm and death would be taken off the market immediately! I am astounded that our so called representatives are willingly justifying and implementing ever more ILLEGAL UNCONSTITUTIONAL tyrannical measures. All the past decades of concern and gains in areas of human rights, and my body my choice, have been now completely obliterated. We now have a two class society based on forced medical mandates and status, resulting in SEGREGATION , which we supposedly overcame 50 years ago. You all good with that? How much Federal funding is WA receiving to escalate the c\*vid tyranny? Enough to sacrifice the present and future well being of all of us, especially the children? Shame and quick Karma on anyone promoting any of this. You have no business making vital decisions about our lives.

Sleep well,  
From a very concerned human in WA

Subject: Regarding Mandatory Covid Vaccines

External Email

As the grandparent of six school age children I am deeply concerned that it is being considered to add a Covid vaccine requirement to public education. This virus has been proven to be a minor cold for the majority of children, and is currently so virulent a large majority have already had it or will catch it soon, thus giving the child(ren) personal immunity from the virus.

If a child is high risk, their parents and physicians can determine if the risk of the vaccine is the best choice for that particular child.

Looking at the risk of this vaccine versus the virus for teenage males regarding Myocarditis should cause anyone to pause in suggesting/mandating it for all school age children. I am very alarmed you would even consider adding this experimental drug to the vaccines required. I am against this experimental drug being mandated. I see doing so to be a gross over reach by the state and completely unnecessary.

Thank you for your time,

Teresa Lien

recommend against getting the Johnson & Johnson Covid-19 vaccine due to the risk of thrombosis (blood clots)

Source: <https://www.doh.wa.gov/Emergencies/COVID19/Vaccine>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.doh.wa.gov%2FEmergencies>

There are several studies right now looking into the increased rates of myocarditis and pericarditis, which potentially have a much higher risk for adverse health impacts on young males specifically. Again, as a mom of two boys, this is of significant concern to me.

Below taken directly from the CDC website. Source:

<https://www.cdc.gov/vaccines/covid-19/clinical-considerations/myocarditis.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fcov>

19%2Fclinical-

considerations%2Fmyocarditis.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C28f68002d4c14cb9ae

Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after mRNA COVID-19 vaccination (Pfizer-BioNTech and Moderna), particularly in adolescents and young adults. There has not been a similar reporting pattern observed after receipt of the Janssen COVID-19 Vaccine (Johnson & Johnson).

Reported cases have occurred predominantly in male adolescents and young adults 16 years of age and older. Onset was typically within several days after mRNA COVID-19 vaccination, and cases have occurred more often after the second dose than the first dose. CDC and its partners are investigating these reports of myocarditis and pericarditis following mRNA COVID-19 vaccination.

You yourself, along with the CDC have recommended against the J&J for other reasons so while the risk of myocarditis may not be as high as with their vaccine, the risk of thrombosis is. I believe that as these studies continue, we will learn more and more about these adverse actions but right now, it's just not enough information to gamble with the lives and future health of our children.

I pray you don't take this decision lightly and ask that instead of considering a mandate for our children, for a virus that has no real risk to them, that instead, you'd make recommendations to schools to create policies around healthy eating, eliminating/reducing sugar and processed foods, require regular exercise and physical fitness and focus on mental health. Work on the things that will reduce the co-morbidities and the increased risk that comes with being overweight and depressed. These last few years have impacted our children in many ways, kids need school, they need their peers, they need social interaction as a critical piece of their development. This vaccine should not be a barrier to entry for any of these children and they should all be given the opportunity to attend school.

Below I've included a link to a recent interview on a podcast with an expert in this field, Dr. Robert Malone, that I think is worth listening to if you haven't already. He is the inventor of the nine original mRNA vaccine patents, originally filed in 1989 (including both the idea of mRNA vaccines and the original proof of principle experiments) and RNA transfection. Dr. Malone has close to 100 peer-reviewed publications which have been cited over 12,000 times. He's the Medical Director of The Unity Project, a group of 300

organizations across the US standing against mandated COVID vaccines for children. He's also the president of the Global Covid Summit, an organization of over 16,000 doctors and scientists committed to speaking truth to power about COVID pandemic research and treatment.

<https://open.spotify.com/episode/3SCsueX2bZdbEzRtKOCeYt?si=Mnhc4NZiSyipQy32O4G3fQ>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopen.spotify.com%2Fepisode%2F>

I strongly believe that there just isn't enough information out there to consider mandating this vaccine. The right to choose, this or any other medical decision should be left to the parents.

Thank you for taking the time to read this email and for making our kids and our future generations the priority.

Tiffany York  
Mom

The proposition to add Covid-19 to WAC 246.

11.

Are you Pro or Con on the proposal?

2. Con

---

I want to express deep concerns over the proposition to add Covid 19 to WAC 246. The Covid 19 vaccines are all 100% experimental. There simply has not been enough time to ascertain the long term side affects. Main stream propaganda would have you believe they are safe and effective but I would like to point you to the EXPLODING VAERS data showing otherwise. I would also like to point you to the numerous other studies conducted showing the harmful side affects of the Covid 19 vaccines. These studies include but are not limited too. Pfizer's own study which is slowly being released. Within that study it shows alarming data. Another study done in the UK shows a clear link between the Covid 19 vaccine and neurological disorders specifically Guillain-Barré syndrome. Another study done by the Cleveland Clinic shows there is zero point vaccinating those who have already contracted Covid. These are but a few studies out of DOZENS that show either the harmful side affects or useless results of the Covid 19 vaccine. Requiring our children to take this vaccine is in fact a violation of the Nuremberg Code. There are also studies done that PROVE children are hardly affected at all by Covid so I'm extremely concerned that the downsides extremely outweigh any micro benefit there may possibly be to taking a vaccine. We also know Covid 19 itself has a massively high survival rate. This wasn't the dreaded pandemic we all thought it would be. I implore the Board to vote NO on adding Covid 19 to WAC 246. As I've clearly shown it is experimental, dangerous and ineffective as a vaccination. Covid-19 is the modern common cold and to add it to WAC 246 would cause nothing but the destruction of the possibility of ever returning to normal. I implore you all to do some non bias research into the dozens of studies done showing negative or deadly side affects from the Covid Vaccine. Some of the worlds top authorities are against the Covid 19 vaccine. Those include Dr Robert Malone the inventor of RNA technology and the leading expert on RNA. With all due respect, if this is passed. We The People will not stop fighting it. For the sake of our children we implore you to vote NO.

Subject: Endorsement of COVID Vaccine Mandate for Children Attending Public School

External Email

Hello - I live in Clark County, WA, and my 7 year-old is currently attending a public elementary school. My 7 year-old is also fully vaccinated.

I wholeheartedly endorse a COVID vaccine mandate for all eligible children attending public schools. Vaccines have been scientifically proven effective in stopping the spread of COVID, as well as reducing the severity of the illness.

Moreover, CHILDREN ARE ALREADY REQUIRED TO PROVIDE EVIDENCE OF MULTIPLE VACCINATIONS BEFORE THEY ARE PERMITTED TO ATTEND PUBLIC SCHOOLS. I do not understand why this potential vaccine mandate would be viewed any differently than existing vaccine mandates.

Please do not kowtow to a vocal minority speaking out against such a mandate. Do the right thing for our children based on scientific evidence and medical precedents.

Thank you,  
Shawn Del Duco

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, R L

1.            Yes

---

I am a parent of school age children and am an emergency responder throughout the COVID experience

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Strongly opposing vaccination requirements for children. There is enough information regarding adverse affects and long term affects of the vaccine. Health, mental health and physical activity along with socialization needs to be stressed. There is proven therapies currently in use that don't create long term health issues that are being experienced by the vaccination process.

11.

Are you Pro or Con on the proposal?

2. Con

---

There is enough information and scientific data that has been proven and documented that children don't require this vaccination process. The creator of the MRNA is in record that is having adverse affects on children that are most likely going to be long term for both girls and boys. Female reproductive systems and heart issues are just a couple of the documented issues that are happening. . The documentation shows children have better long term health with the antibodies and have the ability to overcome Covid if they get it and we know now there is plenty of inexpensive therapies to help with recovery from covid. As a parent, this is a parent decision, not a government decision. If the vaccine is forced, will the school and the state be willing to sign documents showing they are responsible for adverse and long term health issues? For Financial liability.

Please do not make Covid-19 vaccines mandatory for children to attend school or daycare. Many private schools have been operating successfully all throughout the pandemic in the US and other countries following less drastic protocols. Since children have been shown to be at very low risk of severe disease and death, it seems like a mistake to mandate a treatment that does not prevent getting or transmitting this virus. Thank you,  
Vicki

I never would have thought that the WA State Health Board was so willing to do the wrong thing. If you consider detaining someone, forcing them to get injected, or using law enforcement as a necessary means to attain your goals, then your goals are sick, disgusting, and unAmerican. We do not want your protection against anything. We have seen what it leads to. It leads to livelihoods destroyed, communities shut down, and children's mental health destroyed. None of your actions have led to a positive outcome with Covid and your proposed measures will be catastrophic. You have clearly shown your greed for power. We do not consent to such tyranny.

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

Dear MSBOH Committee Members,

I would like to add my voice (as a fully vaccinated individual) to those voices opposed to mandatory vaccination, of children, in particular. We are still learning much about little body's reactions to this vaccine and, as I understand it, the young are not the ones who are spreading or being hit hard by this virus. A mandate to vaccinate children would be a premature overreaction, especially when the dominant Omicron seems to be less virulent, yet blows right through the current vaccines, anyway. What then is the purpose of vaccinating children?

Instead of constantly trying to instill fear into the hearts of Americans, why not nationally televise a CIVIL debate? Both sides would sit together on a stage, calmly and respectfully present the true facts behind the pandemic (including true hospitalization and death facts as we know them today), all of the known negative, physical reactions to the vaccine and ALL of the alternative treatments available?

Doctors should not have to fear losing their jobs when they present the other side of the story. I do not view it as disinformation, it is simply information. I recoil when I hear the term 'disinformation'. Decisions cannot be made in a vacuum. We know for a fact that all medical experts in the field do not agree with everything being said. The government needs to stop making decisions and then try to give the public only the information that supports what they have decided. Show family, friends, co-workers neighbors, fellow humans respect for their intelligence. We can easily be suspicious of what we don't know, especially when we feel information is being withheld.

Let's get back to being the America where the people have the information, understand every side of it, maybe aren't happy with the decision, but buy into it, because they know it was a very difficult decision that had to be made. Right now we are being kept in the dark on too many fronts.

Respectfully,  
Rita Roth

11.

Are you Pro or Con on the proposal?

2. Con

---

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. 1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory. 2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit. 3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org)) Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: NO! to state mandated Covid-19 shots for children in Wa!

External Email

I strongly urge you to NOT implement forced Covid-19 vaccinations for the children of Washington State.

These are known facts about the Covid vaccination:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety in adults or children
- \* The vaccinated can develop both symptomatic and asymptomatic cases of Covid-19
- \* Studies document that both the vaccinated and unvaccinated can transmit Covid to others, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Our energies should focus on treating people with higher risk from COVID vs. wasting our time trying to force vaccinations on everyone, especially children who have little risk of death from the disease. COVID is not going away and we need to learn to live with it. The vaccines are a part of the available therapies but not the only one. More emphasis should be placed on therapeutic treatments for the inevitable Covid-19 infections which will occur. It would benefit Public Health to stop the politics, use real science, and regain some semblance of trust from the public by stopping the forced vaccinations.

Sincerely,  
Shelly Boekennoogen

---

Vaccines that are currently required for school admission actually prevent said disease. The Covid-19 vaccines that are currently available do not prevent illness. The currently available Covid-19 vaccines also do not prevent transmission between fully vaccinated people. Most of the diseases that we require children to be vaccinated against result in irreparable damage to the people infected with them. Children by and large have not been seriously affected by the severity, nor are there apparent serious long term affects that are likely to harm our children. There are more adverse affects reported to the VAERS System for these vaccines than all other vaccines combined. The VAERS System is now reporting over a million adverse reactions to the Covid-19 vaccines, including death. This translates into odds of 1/245\*(CDC) people having an adverse reaction that may include death. If you run the math it is .4%. At this time, Covid-19 is much better understood than it was a year ago, and is obviously not very harmful to the general public, let alone to children. More than 5 million children (17 yrs and under) have tested positive for Covid-19 to date, yet nationwide only 700 have died\* (usa today: Covid-19 in kids) If you run the math, that is .014%. By these numbers alone, children are approx. 30x more likely to be harmed by the vaccine than to die from Covid-19. Please use common sense, logic, and the best available science in your decision making process. Our children have a much greater chance of having an adverse reaction to Covid-19 vaccines than they do of actually being harmed or dying from Covid. Thank you for your time and thank you for not requiring the Covid-19 vaccine for our children.

At this time, COVID vaccines should not be mandatory for child care and school entry. Children are at a much lower risk for serious complications with COVID. The vaccines are also still only EUA (emergency use authorization) and thus should not have a requirement for children at this time.

Thank you for hearing my position on this matter. 1) children are at extremely low risk for Covid. 2) the vaccines are still EUA. EUA vaccines are not part of the standard protocol for required vaccines for school & daycare admissions 3) The seasonal flu shot is not a required vaccine . Covid is a mutating virus, like the seasonal flu so these vaccines are never 100% effective. A requirement for covid-19 vaccination is short-sited. 4. It is highly discriminatory toward communities of color, low income and religious who will be denied access to education based on their status or beliefs. The pandemic will end, as all do. How we respond with thoughtfulness, not panic and fear, will allow us to navigate this time with our freedoms and long-term health intact.

Children are at a higher risk to vax side effects than covid. They have not been found to transmit to adults. Schooling is a right and cannot be denied to any person based on medical health. It puts the schools in the position of doctor and police and will end up in non vax families becoming criminals because their children will not be in school. Dont divide families and dont expect schools to police vax requirements. Discrimination is illegal.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

To whom it may concern:

Good day,

My name is Teresa Miller, I am a mother of a 23 & 35 year old & a grandmother of 6 precious little hearts.  
I live in Sequim Washington with my significant other and we call it home.

My voice today will be on covid and covid protocols in our state, county and schools.

A few points of concern:

- \*The vaccine(S) have not been approved by the FDA. (government approval only)  
-they are in a trial period and have been proven NOT safe, depends on what news channel you are watching.
- \* The Covid vaccine(S) do not protect you from NOT getting Covid.
- \* The Covid vaccine can harm or kill people
- \* The covid vaccine does NOT make you immune to "Covid"
- \* Children are proven low risk for Covid.
- \* Unmask my children already, this has been shown to cause breathing issues and anxiety and, full of toxic shot.
- \* It is proven that the vaccinated will continue to get Covid, Give Covid and Die from Covid.
- \* Natural Immunity is working for me and my family, as we know how to take normal common sense precautions.
- \* You know darn well this vaccine does NOT stop the spread of the covid.  
-and you have proof of that. right?

What is happening here is madness.  
You are taking the life out of the people, for what?

money.  
money.  
Government Funding.  
State Money.  
Blood Money.

Please, stop.  
Please, can't you see?  
Where has the world ever seen such crimes against humanity?  
This virus has all the same states as HIV.  
I've done my research..  
So have others..

I beg of you to be thorough in your conscience with what you decide as the WDOH,

There is talk of lockdown, concentration covid camps, taking families from homes, making law enforcement do the opposite of what they were sworn in for, "to serve and protect"

to protect.

Please, pray for my grandchildren.

Thank you for your time,  
Sincerely,  
Teresa Miller  
Sequim WA.

---

As a practicing pediatric RN, I am strongly against mandating the Covid vaccine for school admission for several reasons. First and most importantly, it is still under emergency use for most of the pediatric population and has no long-term studies. Many of the studies that were done in other countries have shown a high incidence of myocarditis risk that has been repeatedly downplayed in our country, particularly after the second vaccination (and especially in males). Indeed, most other nations do not even administer a two-vaccine series to 12-18 year olds because of this enhanced risk. The third booster that was just added was not even vetted through the proper channels and adds an additional unknown level of exposure to our children. The FDA never intended the 5-11 vaccine to be approved for widespread use and certainly not mandated for this group. They trusted the CDC to make a responsible recommendation to the American public for high risk children in that age range only and they failed. Second, even before the vaccine was approved it was estimated that over 40% of our children already had natural immunity from prior infection to Covid. After Omicron is done circulating, that number is going to be significantly higher, which would render a mandate almost meaningless. Furthermore, no vaccination safety studies have been done on children with existing natural immunity. Third, as we are seeing with the most recent outbreak this vaccination does not stop transmission yet only lessens the severity of the disease. Since children almost never get a severe form of the virus in the first place, mandating this vaccine is a serious violation of their right to make medical decisions for themselves. The fourth reason I am against this mandate is one of health equity. The WHO has repeatedly told wealthy nations to stop boosting and vaccinating groups that are not at risk of serious disease as much of the world's poorest residents still have not had the chance to get their first vaccine. This hoarding of vaccines by wealthy nations is what led to Omicron; not the unvaccinated on our own soil. Last and most importantly, I oppose this mandate because of how it will impact marginalized communities. The communities that are least likely to be vaccinated, those of African-American and Hispanic descent, are those that can least afford to have their children excluded from school for refusing to comply with this mandate. Other states such as California that have passed such mandates have later had to backtrack on it once they found that tens of thousands of marginalized students were going to be forced into an online system that was ill equipped to handle them. Vaccines are widely available to any adult that wants one. It would be

criminal in my opinion to mandate a child to get a vaccine with no long term studies to largely protect an adult that refused to protect themselves. Our children have sacrificed enough over the past two years of this pandemic to protect the adults. Isn't it time that the adults for once start protecting the children?

BODY: Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness. Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control. The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization. This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them. You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!! Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

On behalf of the Western States Scientific Safety Review Workgroup and Pfizer, we recommended to Governor Gavin Newsom, California, Governor Steve Sisolak, Nevada, Governor Kate Brown, Oregon, and Governor Jay Inslee, Washington, to pump children up with an experimental vaccine despite there being essentially no risk of them dying from COVID-19. Adult vaccination rates had basically died off so it was necessary for cash flow to open this up to new markets, namely, children. And if they are not going to take it voluntarily then we must mandate it! (It also has the dual effect of getting more children hooked up to more pharmaceuticals at a younger age.) Conveniently, our Workgroup is unelected and unaccountable and using us gives the governors plausible deniability using the classic appeal to authority tactic.

I think this an absolutely horrible idea! I am a school teacher who CHOSE to get vaccinated when it was not required. I weighed through my choices and decided it was best for me due to my risk factor. Children are not even close to the risk factor of adults. I know this because my children have had COVID twice in 1 year! I would have taken that sickness of any other cold or RSV. And for families that want their children vaccinated or who are at risk- now have the choice to get it! This should not be a required vaccination! Additionally, I had COVID, got vaccinated, and then had a breakthrough case 4 months later. This is something we need to learn to live with and I don't want to add additional sets of nearly monthly shots and boosters to my children's health care requirements.

Additionally, the largest issue that our education system will face with this is a mass exodus of students. As a teacher at my school we are already facing incredible enrollment decline with 280 out of the typical 340 at my school. Can we really do that to our schools and to students? That will also have a large impact on our economy and the ability to maintain our current staffing with obviously need to decrease. In addition to this, we have had no school outbreaks and have been in-person over 1 year.

Think through all the angles in this. This would be a massive historical blow to our State. When all the leaders who make these decisions leave their offices and go back to their Cush lifestyles we'll be left with the repercussions. Students pulled for homeschool, and look at the stats on how well many of those situations are. Many of those students come back to us FAR below grade-level. I am a mother of three young children and do not want to be forced into giving them an Emergency approved vaccine. Give us the option to make this decision on our own- I know you'll get a way better outcome in the end if people feel in control of their lives and decisions.

-Desilee

I am a mother to 3 children that all attend public school. I do not believe children should be forced to receive the covid vaccine when they pose no threat to themselves or others. Every single person in the world can spread covid no matter their vaccination status. A child is less likely to get it and if they did than they hardly affected. A child is in more danger of getting a life threatening side effect from the vaccine. More and more children will be pulled from public schools and the schools will lose funding due to less students if you keep forcing unsafe procedures on our children. It is unethical and unconstitutional to force anything into someone's body that they do not want.

Please do not mandate the covid vaccine for children. After listening to the several hour FDA panel meeting (for kids age 5-11), several of the pediatricians voiced hesitation for even approving it because they were concerned it would lead to mandates. Overwhelming they agreed it should be ultimately be available, and particularly for those with comorbidities or might be at a higher risk, however they agreed it wasn't appropriate for ALL kids. We don't have mandates for the flu shot, please don't have mandates for the covid vaccine. Just today President Biden's office notes that the number of hospitalized children with covid is similar to the number hospitalized with the flu. It makes no sense, with what we continue to know as this virus become more contagious, yet less potent, that these vaccines are a necessary mandate for school and/or childcare entry.

Covid shots should NOT be a requirement for children attending public OR private school in Washington state. Covid is not a danger to young children, and the shot is still only authorized under emergency use. I am concerned for the health of our children if this becomes a requirement for children to attend school. Please do NOT make the covid shot a requirement!

Sincerely,

Katie

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. It is discrimination and clearly a violation of the United States and WA State Constitutions.
2. Children are at an extremely low risk level for Covid. Even with Omicron, which is more transmissible, it's even less deadly.
3. The vaccines are still an Emergency Use Authorized EXPERIMENTAL drug. This constant pushing of these vaccines constitutes coercion, which violates at least two US Federal codes and the Nuremberg Code. Do you really want that legal liability on your heads? Because that is where it will land at the end of the day.
4. There are no long-term studies for safety and no real safety data is required for 75 years! It makes zero sense that a pharmaceutical company would be able to get away with that.
5. It's been proven that the Covid vaccines do not prevent the individual from contracting or spreading the virus, so what is the point?
6. Finally, we live in America, last time I checked. Land of the FREE. It is a parent's choice what they inject into their children. It should be the right of everyone on this planet to decide what goes in or on their bodies.

All children deserve an equal opportunity public education, free of coercion and discrimination. I stand against this medical mandate.

Respectfully,

Tracie Markley

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health. There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19. Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

The vaccines are proving profoundly ineffective against the SARS-CoV-2 variants, in particular Omicron. And the risk to kids is very small. And the risks of severe adverse effects from the vaccines are astronomical. In particular: The mRNA vaccines have been found after 1 shot to cause 19x the expected myocarditis cases over background myocarditis rates in 12-15 year olds, with an additional 5x increase in myocarditis rates in 15 year olds after the second shot. To administer any of these experimental drugs to children is quite arguably child abuse. And please note that there are still no currently available FDA authorized vaccines. Only COMIRNATY has been FDA approved, and this vaccine is not available in the United States as of now. I urge you to not make children the objects of an experiment using drugs who is the long-term effects are utterly unknown. <https://jessicar.substack.com/p/a-report-on-myocarditis-adverse-events?fbclid=IwAR3xpGrI7WLXBTdMXfswO6TXMToz5zfEeGZ5z4asuQrrz3GKcYSY1tNiiCo>

Hi,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thanks, Shannon Sauter

Subject: School Vaccine mandates

External Email

January 7, 2022

Good Morning,

I am writing to urge you to NOT support vaccine mandate for children to attend in person school. I currently have three children of school age and do not support a mandate for a Covid MNRA injection. Multiple international studies have proven that our children are at little to no risk if they contract this virus. If they do contract it, having a natural immunity is proving to be equal if not more effective than the current experimental injections being provided. If you refer to the VAERS report our children are at greater risk of potential complications and side effects from taking the experimental mRNA injection. As parents and guardians this decision should be ours alone on which risk we wish to embrace. I urge you to read all the data that supports this position with an open mind and choose to leave this decision in the hands of parents and guardians.

Once again, I urge you to NOT support a mandate for children to attend in person school.

Sincerely,  
Stephanie Loff  
concerned Mother

To Washington State Board of Health,  
Please protect our children by not requiring the Covid vaccine for school age and childcare situations. Children appear to be at very low risk of having serious effects from the virus if contracted. I'm especially concerned as there are many reported side effects from the vaccines that don't appear to be addressed by health authorities.

Also, parents are responsible for children and not the state. Parents should be the ones making the decision about choosing to get any vaccine for their child.

Are you Pro or Con on the proposal?

2.                      Con

---

It is NOT the state's right to tell anyone that have to put something in their body. The Covid 19 vaccine does not keep anyone from getting sick and will not touch mine or my kids bodies. You can get Covid with or without the vaccine....you can spread it with or without the vaccine...none of this makes any sense to why it is being forced on people. NOBODY knows the long-term effects of this vaccine my family will not be guinea pigs for the state. There have been so many vaccine related deaths/health problems and I will not subject my CHILDREN to it. Please, do not force this. It is not your job.

I am completely against any of the proposed covid policies that are over reaching and immoral. I am wondering what happens to the children with mental and physical challenges ?

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Per CDC WALENSKY, Dr. Faulk and Dr. Zacs of Maderna the covid shot does NOT stop transmission. They are capable of transmitting covid to someone else. Consequently children with a shot are now reaching more people to transmit a disease that could kill someone. Therefore I see this not as a preventative measure, but a spreading of the disease. My question is why do you desire to spread the dis-ease?

External Email

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Given the language in these codes and the efficacy of the vaccines this seems to be more of control than public health and safety. The vaccinated are contracting and spreading covid just as much if not more than any unvaccinated individuals. To have individuals and families put into quarantine camps based on a health officials recommendation is a gross overstep and overreach of the government on individuals liberties.

I have personally seen more vaccine injuries than people who have died from covid. To force people to not only inoculate themselves but also their children is not science based. A one size fits all solution is not the role of our government. The governments role should be to provide all the relevant information for individuals to make informed decision.

Also the fact that natural immunity is not discussed is gravely concerning. There are multiple studies showing you are just as protected if not more protected from natural immunity compared to vaccinated immunity. Also, the studies that show if you have recovered and get vaccinated you have an increased risk of adverse side effects. This is not science based one bit and the fact that individual liberties and individuals health are toyed with for the sake of "public health" is highly disturbing.

As a society, for us to use an experimental treatment on our children "for our protection " shows how much we have strayed in our motals and ethics. Children have little to no effects from covid. As a first responder and father, I have seen this first hand. I have yet to treat or see a child badly affected by covid. We should look to protect our children not look to them to protect us. There is no long term data on the side effects these vaccines may cause and the risk is no where near worth the benefit of inoculating our children.

Given the fact that we are 2 years into a "pandemic" and we do not have an early treatment recommendation other than "get vaccinated" concerns me this is more about money and power. Given the financial incentives hospitals and pharmaceutical company are given through this, it would benefit them the most to not utilize early treatments. Without early treatments, this pandemic will continue and allow politicians to overstep on individual liberties. I am 100% against that. There are many treatments that have been proven effective to treat covid patients and prevent hospitalization. Rather than utilize and treat patients we have instead demonized these treatments and withheld them from the public to utilize.

I am absolutely against this proposal. Our children are not at risk of dying from Covid-19. There have also been links from the vaccination to infertility, heart defects and other risk factors that can kill or harm our children. This is unacceptable. Other vaccines that keep our children from dying are perfectly acceptable and reasonable to require but the COVID vaccine does not fit in this category. I will fight this tooth and nail to protect my children. They will never get this vaccine.

External Email

Washington State Board of Health member,

I believe the Covid vaccine should not be a requirement for children to attend school or childcare in this state.

The science and data show that children are at very low risk for contracting or transmitting Covid or any of its variants. CDC data shows that since Jan 2020, in the state of WA 10 children (age 0-17) have died with (not from) Covid. As unfortunate as that is, it is less than the number of WA children dying of the flu on an average year.

Deciding to vaccinate a child against a virus with a 99.7% overall survival rate is the parent's responsibility, not that of the State.

A vaccine requirement would also be an infringement upon the religious freedom of people of faith in WA State. Section 11 of our state constitution states "Absolute freedom of conscience in all matters of religious sentiment, belief and worship, shall be guaranteed to every individual, and no one shall be molested or disturbed in person or property on account of religion . . ."

Thank you.

Steve Surface

I would like to speak up against forcefully detaining people to force a vaccine on them as well as forcing children to be vaccinated in the state of Washington. This is unconstitutional and should never happen in a free democratic society!  
And no before you even think it I am not a "anti-VAX-er " I myself am vaccinated, but I believe in the Constitution and the freedoms it offers all of us!  
How can the same people who fight for a woman's right for abortion now say you must be vaccinated or else! That is nothing but hypocritical to say the least!

God bless America and the free USA!

We the people of Washington shall not be forced into quarantine. No one person should have the authority to take someone to a "quarantine camp" against their will for up to 30 days or at all! This is a gross overreach of power over the people. The covid vaccine should never be mandated on anyone especially not children who have a 99% survival rate. These vaccines are still in an emergency use authorization. They are not proving to stop the spread or slow it down.

Subject: Covid Vaccines should not be mandatory for children at public school

External Email

Greetings,

Hope this email finds you all well.

I am writing the WSBOH on this most important topic of the future and well being of our children. As I am sure you know, our society is very divided these days on array of different topics and the Covid vaccine is but another one. It is my hope that something we can all agree on is the fact that children are at very low risk of having any complications from Covid, if they even contract it at all.

Furthermore, the vaccines have been proven to cause some very serious side effects for our youth, including but not limited to, myocarditis. We have been seeing a rash of student athletes dying from strokes and cardiac arrest along with professional soccer players in Europe keeling over on the field. This obviously should not be happening to people in the prime of their life.

I urge you to think of those who are innocent and to vote no on requiring these still experimental vaccines to enter public school.

Thank you very much,

John Giordano

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:  
Children are at extremely low risk for Covid.

The vaccines are still only EUA (emergency use authorized) and there are no long-term studies to document any history of safety.

Studies do now document that vaccinated and unvaccinated can both transmit Covid, so the vaccine apparently does not stop the spread of the disease.

The adverse effects of this experimental vaccine are known to be irreversible so parental informed consent is paramount and must not be a 'one size fits all' mandate by the State.

It is coercive to mandate that children receive an experimental, untested vaccine or otherwise be denied the right to an education or go to daycare.

I STRONGLY OPPOSE making COVID-19 shots mandatory!

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Covid-19 vaccination SHOULD NOT BE REQUIRED FOR SCHOOL ADMISSION. I AM AGAINST THIS IDEA THAT CHILDREN SHOULD BE VACCINATED.

KIDS ARE AT EXTREMELY LOW RISK FOR COVID SIDE EFFECTS.

My school age children (3) all had COVID back in November of 2020. All have verified covid antibodies. Their "sickness" lasted 24 hrs with a low grade fever. After 24hrs of Ibuprofen and Tylenol, they were back to normal, jumping off the walls.

There is absolutely no need for mandatory covid vaccination for school admission.

Subject: No to COVID-19 Mandates!

External Email

Dear Sirs;

As a concerned citizen of Washington State, I would encourage the WA State Board of Health to have the good sense to hold off on it's new proposals regarding mandating vaccination of our school children for COVID-19. This is not a proven vaccine yet....it is merely a "shot". It is still considered experimental and in its early stages of testing at this point. How do you know, without a doubt, that this so-called vaccination is without harm to our children's overall and long term health? There are too many reported instances of individuals having permanent adverse reactions to this COVID injection.  
WAC-246-105

Also, it is our citizens' right and freedom of choice to be able to make a decision for ourselves whether or not to be tested or vaccinated for COVID. It should NOT be punishable by quarantine should we make those choices.

Let's not become a dictatorial state! I ask that you DO NOT APPROVE of these two new rule proposals in WAC-246-100.

Sincerely,  
Willa Bedient, registered voter and concerned citizen of Washington State

COVID vaccine requirements for public school entry

11.

Are you Pro or Con on the proposal?

1. Pro

---

Almost every day I receive an email from my child's school that they have been in contact with someone who is COVID positive at school. My daughter has two teachers who are out with COVID right now. Children are missing out on their time in school due to this virus disrupting the education process. We have vaccines available, fully approved by the FDA, that we know work at reducing the risk of becoming COVID positive and reduce the risk of severe illness. For the sake of getting back to a normal life for our children I am voicing my support for adding the COVID vaccine to the list of required immunizations for public school entry.

I do not agree with the proposal to mandate the Covid-19 vaccination for our school-aged children. They are among the lowest risk for getting, spreading, and being hospitalized from this virus. Additionally, forced isolation and/or detention of children and/or families is against the Constitution of the United States of America. As a licensed health care provider in this state, I vehemently oppose these policies!

I do not support a vaccine mandate, period. And I certainly will not allow my children to be vaccinated under such circumstances. I'm not anti-vax by any means. I have received other vaccines and so has my wife and children. But the COVID vaccine is not even a real vaccine. Especially in the sense that it inhibits the person-to-person spread of a disease much like that of polio or measles vaccines. The COVID vaccine doesn't reduce the transmissibility at all. It only protects the person getting the shot. And even that statement is debatable. Perhaps if it worked like it's supposed to, I'd be more inclined to get it and allow my children to get it but until there's more data on the health risks of the vaccine, we will not be getting it. People who are pro COVID vaccine want/are pushing this experimental vaccine like it's the savior of all mankind and yet when people are in the hospital or at home suffering from COVID, those same people/ groups/ politicians/ doctors/ hospital administrators will not allow any other treatment other than what they have approved regardless of whether any other treatment may work or not. Didn't the doctors take a Hippocratic oath to help people in need? Why are other effective treatments being sidelined only to have the vax shoved down our throats?

Comments/Questions regarding Children's Health Policies including Covid 'vaccines'

Why? Why should the Covid 'vaccine' be required for young/school-age children when the risks of serious illness, hospitalization, and mortality from the SARS-CoV2 virus are so extremely low and the potential risks are unknown?

- of the several hundred children that died 'from' Covid in the past two years, the great majority (maybe all) were found to have had serious co-morbidities, including obesity.
- does the WSBOH know the immunization status of all children? Immunization not being the same as partially or fully vaccinated? How many children have already been exposed to the virus and developed natural immune response? With reports that vaccinating persons (perhaps especially children) who have already had natural exposure increases risk and occurrence of adverse events, at the very least, shouldn't the immune status of each individual be fully understood before requiring a drug therapy and/or vaccine? Wouldn't such an assessment be best accomplished by the child's personal physician?
- since this virus is now endemic, including more and more reports of the virus being found in animal populations, the likelihood of children already having had natural exposure to the virus and developing natural immune response is increasing.
- we are now in the wave of the "Omicron" variant. The vaccine was developed in 2020 and designed to reduce symptoms (not infection nor transmission) from infection by the Alpha variant of 2020. There have been more than 10,000 variations of the SARS-CoV2 virus with Delta and Omicron being the ones of most recent concern. Why would anyone recommend taking an obsolete 'vaccine'? Do our Public Health officials recommend taking the 2020 flu vaccine for the 2022 flu season?
- if the 'vaccine' were to be re-designed/updated for later variants, should it be submitted for new testing and trials before being deployed for use in our children?
- this 'vaccine' is "leaky" (aka "non-sterile") with increasing numbers of breakthrough cases reported around the world including locations among highest population 'vaccine' rates such as Israel, Gibraltar, and the State of Vermont. And a disproportionate number of the new cases, hospitalizations, etc. are breakthrough cases (that is: in the fully 'vaccinated' populations).
- this is the first 'vaccine' in my lifetime (I'm only 65 yrs old), that requires everyone I might come in contact with to be 'vaccinated' in order for my 'vaccine' to be effective. When I took the polio vaccine as a child I didn't live in fear of someone passing the polio virus on to me. I was protected. With the Covid 'vaccine,' the 'vaccinated' people are told to fear and avoid the "UN-vaccinated" even though 'vaccinated' persons have comparable viral loads and are as likely (possibly more) to transmit the virus. Officials at the highest level of government are spreading lies and fear by pronouncing that this is "a pandemic of the unvaccinated!"

Safety. One of factors necessary to evaluate safety of any product is TIME. The "Covid vaccine" was tested, produced, and deployed in less than two years. The 'vaccine' for children has been tested/authorized and deployed in a matter of months. The trials, especially for use in children, have been weak. With risk of serious illness, etc. from this virus to children being so extremely low, epidemiologists who design clinical trials have stated the control and test groups would each need several million subjects. Instead, conclusions were drawn after "testing" much smaller groups increasing risks of mis-interpreting data.

- It was reported that trials for the younger age-group of 5-11 year-old children showed

a 90+% effectiveness. What was being measured? They weren't tested by exposure to the virus. What I found was that younger children developed antibodies that were considered to be a 90% response when compared to the older group of teens/young adults. Is that 90% in quantity, or quality, or ...? But if the antibodies aren't effective against later variants (e.g. because they are designed to respond to an obsolete Alpha variant), what difference does it matter how many antibodies they make?

- Are children with weakened immunity, chronic/serious health issues, history of adverse reactions to actual vaccines at higher risk of adverse outcomes and un-intended consequences? If so, would they be granted a waiver in the event of mandating Covid 'vaccines'?

- Reports of possible adverse effects on reproductive health, especially for young woman, have been made and are increasing. The evidence may be considered lacking because it hasn't been studied adequately. In the UK, tens of thousands of young women reported changes to their monthly cycles.

- No one knows the safety profile of these 'vaccines.' NO ONE! It's not possible. There hasn't been enough time to make such a statement that the 'vaccine' is safe. We will not know for many years, even decades, what the actual safety profiles of these products are.

This may be the first time in history that a society has put the lives of its' children at risk for the sake of the elderly.

Given the reality that excess body weight and obesity are among the most significant co-morbidities for Covid illness, what has the WSBOH done and/or propose to do to increase awareness of this risk factor and effect real meaningful change for the sake of the general public but especially for our children? Has there been any campaign looking at food being offered in schools (meal programs, vending machines, etc.) informing of this fact and what each person can do to reduce his/her risk? It occurs to many that time, effort, and resources might be better used reducing the epidemic of obesity.

Finally, since the topic is children's health, I submit a comment/question about the use of masks for your consideration. I will assume the WSBOH is aware of the use of nanoparticles in surgical and other masks. The manufactures explain that nanoparticles have great surface area and therefore have increased absorption capacity. I hope the WSBOH is also aware that the physical properties of these particles have great similarity to asbestos. In addition to restricting air/oxygen flow what other risks will short- or long-term mask wearing pose to the wearers, especially children?

Thank you for your consideration.

Most Sincerely,

Thomas Utt, DDS  
LTC (Ret), US Army  
Dayton, WA

I am extremely upset reading the agenda for January 12th, 2022 along with the meeting notes for November 10th, 2021. It's unconstitutional for you to propose an involuntary detaining site for a virus that over 90% of people are serving. It's even more sickening that you're trying to mandate the vaccine for children! You have no idea of the long term effects. Children are not at a high risk and I object to them being used as test subjects.

Subject: Against Proposed Covid-19 Policies

External Email

To Whom It May Concern:

I am writing to let you know that I am against the proposed addition of Covid-19 policies to WAC. These WACs 246-100-070, 246-100-045, 246-100-040, 246-100, and 246-105 are a complete overreach and unnecessary.

I am especially opposed to WAC 246-105 mandating that children receive the EUA only, experimental, Covid-19 injection in order to enroll in school. The risks associated with taking this product far outweigh any perceived benefit, and it should never be forced, nor should coercion ever be used.

I sincerely hope you will read all of these emails etc. that the citizens are sending and understand that we do not support these potentially dangerous policies.

Kind regards,

Samantha Barrett

Subject: Considerations for the SBOH regarding items on the January 12th meeting agenda

External Email

☐ Dear WA State Board of Health,

Thank you for your work in service to our state and for reviewing public comments on important deliberations of the Board. I offer the following for the Board's consideration regarding items 8, 9 and 11 on the January 12th meeting agenda.

In the summer of 2021, the Office of the Superintendent of Public Instruction published the following in a FAQ on returning to school in Fall 2021:

"What is the process for requiring the COVID-19 vaccine for students?

The State Board of Health (SBOH) may formally consider requiring the COVID-19 vaccine for children in schools if a vaccine is licensed and recommended by federal authorities. The SBOH reviews vaccines that are fully licensed by the Food and Drug Administration (FDA) and recommended by the Advisory Committee on Immunization Practices (ACIP).

Once fully licensed COVID-19 vaccine(s) are recommended by the ACIP, the SBOH could convene a technical advisory committee to review the vaccine(s) against the state's immunization criteria. If the vaccine(s) passed the criteria and recommendations of the committee, the SBOH would consider adding it to the state's list of required immunizations through a formal action to begin rulemaking at a future Board meeting."

The only one COVID-19 vaccine available for use in individuals 5 through 11 years of age has only received Emergency Use Authorization from the FDA. The only available vaccine is not fully licensed by the FDA. Why has a technical advisory committee been convened to review an EUA vaccine? The fact sheet <https://www.fda.gov/media/153717/download> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717/download>> for age 5 through 11 recipients states:

"For children 5 through 11 years of age, there are no other COVID-19 vaccines available under Emergency Use Authorization and there are no approved COVID-19 vaccines. Under the EUA, there is an option to accept or refuse receiving the vaccine. Should you decide for your child not to receive it, it will not change your child's standard medical care."

COVID-19 deaths have proved rare among children over the course of the pandemic. As of last week (December 2021), 721 in the U.S. had died of the disease, according to data reported to the American Academy of Pediatrics.

The childhood population is not statistically at significant risk from COVID-19. This is an empirical fact borne out by the data. A July 2021 Wall Street Journal report provided research from the United Kingdom that shows that even children who were infected have an extremely high case survival rate. "Children are at extremely slim risk of dying from Covid-19, according to some of the most comprehensive studies to date, which indicate the threat might be even lower than previously thought," WSJ notes

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wsj.com%2Farticles%2Fin-children-risk-of-covid-19-death-or-serious-illness-remain-extremely-low-new-studies-find-11625785260&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce07c343ab3cd4dca6be808d9d1ffea48%7C>

The July 2021 CDC data recorded "542 deaths involving Covid-19" among those under 18 since January 2020. When ruling out 94 percent of this population due to serious underlying comorbidities, such as heart disease and cardiopulmonary disorders, the case survival rate for healthy children under the age of 18 is 99.99 percent. The vaccines also do not 'stop the spread,' according to the CDC's admission

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbeckernews.com%2Fcdc-director-changes-her-story-now-admits-covid-vaccines-dont-prevent-virus-transmission-40754%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce07c343ab3cd4dca6be808d9d1ffea48%7C11d>, and their lowering of transmission is not highly effective and wanes quickly.

The CDC's figures

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fcases-updates%2Fburden.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce07c343ab3cd4dca6be808d9d1ffea48%7C11d> estimated that at least 120 million Americans had been infected with Covid-19 by the end of May 2021 thus possessing natural immunity, which is superior to vaccinated immunity. The FDA advisory panel did not account for natural immunity which is highly prevalent among the childhood population.

During the week of Dec. 22-28, an average of 378 children 17 and under were admitted per day to hospitals with the coronavirus, while an average of nearly 10,200 people of all ages were admitted per day during the same week in December, the CDC reported. Children represent a small percentage of those being hospitalized with COVID-19, and doctors say they have less illness than those who came in during the delta variant over the summer, consistent with early indications that the omicron variant causes milder illness.

The FDA did not examine reports on COVID-19 antibodies, acknowledge natural immunity from prior infection or the very low risk posed to healthy children or adults. The case survival rate for all ages in Washington state is 98.9 percent. This calls into question motives to require vaccines regardless of the medical necessity, the ethics or the actual science and calls into question whether a vaccine recommendation and a subsequent requirement are justifiable on public health grounds.

Additionally, according to the Associated Press, new COVID-19 cases in Americans of all ages have skyrocketed to the highest levels on record: an average of 300,000 per day, or 2 1/2 times the figure in mid-December 2021. The milder omicron accounted for 59% of new cases last week of December, according to the CDC. This calls into question the real effectiveness of the current EUA vaccines for all age groups, and should give significant pause to requiring COVID-19 vaccines for children attending K-12 schools and child care centers.

Thank you for your time and consideration.

Sincerely,

Tracy von Trotha

Subject: I oppose involuntary quarantines and mandated vaccinations

External Email

I oppose the involuntary detention of persons at quarantine sites; and I oppose requiring school children (or anyone) to be required to get the Covid-19 vaccination.

My family considers our vaccinations strong enough to protect us against disease regardless of what other people choose to do or not do with their bodies. Medical choices are personal choices. DO NOT MANDATE quarantines or vaccinations for Covid-19 in Washington state.

If you involuntarily quarantine people or force them to be inoculated, you are no better than those in Nazi Germany. I always said I would not sit by while the government hauled people off or did medical experiments on others - and I won't. Read your history and do not make the same horrendous and evil mistakes on our population. Our vaccinations are enough to keep us safe. Leave those who make other choices alone. You are acting irrationally and out of fear if you choose to be Nazis about this. Washingtonians oppose involuntary quarantines and mandated vaccinations.

STOP THIS OVERREACH HERE AND NOW.

A concerned 5th generation Washingtonian.

Subject: Vaccine Requirement for School Children

External Email

Please don't make vaccinations mandatory for all school children. There are numerous sincerely held reasons parents don't want their children vaccinated that are VERY important to them. They will be forced to take their children out of school if the mandate is imposed. Children have suffered enough because of this pandemic. Please don't make it worse.

The National Vaccine Injury Compensation Program is in place for those who may be injured by a lot of vaccines and The Countermeasures Injury Compensation Program is in place to compensate people injured by the Covid-19 vaccine in particular (which is not a vaccine in the way all other vaccines that I have ever heard of are). Since Covid-19, especially the Omicron variant which is the main variant at this time, has such low incidence of injury to children; I believe the vaccine may well be more dangerous than the disease. Where there is a risk there should be a choice.

It makes me shudder to think the federal government can force people to make medical decisions they don't believe are good for them. Being forced to wear a mask is bad enough but being forced to have your children injected with something that has a potential for harm is just too much. Where have our rights to make medical decisions gone? You can't see people's medical records because of HIPPA regulations but you can demand whether or not they have had an injection, and how many. It does not make sense, it seems to me it should be illegal.

Sincerely,

Rosina Robbins

Mother and grandmother

To State Board of Health,

As a parent and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Sincerely,

Rob

Data has shown children are less likely to contract Covid. This should be the parents choice whether or not to have their child be exposed to this vaccine especially since it is so new of a vaccine. It should not mandatory to receive this vaccination in order to receive an education.

Please know that I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105. If for no other reason, the potential risk of children being harmed by covid-19 is much less than the potential harm that may come from the "vaccine." We still have no idea what the long term risks are from such vaccination.

Thank you,

Robert O'Bannan

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There will be a mass exodus of students from state funded schools in order to avoid the mandate. Families will remove their children from public schools and enroll them in private schools or homeschool. This enrollment decline will create a loss of funding and limit the diversity of community in our public schools for a well rounded education.

It is also my belief that students should not be mandated to take a vaccine that is not FDA approved for their age group. It is unconstitutional to force students to receive an EUA only approved vaccine. It has been proven that the current vaccines do not stop the spread of covid. There are also no long term studies to document any history of safety. Our children should not be involved in this medical experiment. The chance of a fatality from covid is extremely low. Covid symptoms are already weakening. Herd immunity is the most reliable way to end the spread of this disease.

v/r,  
Stacy Brown

Hello --

I am vehemently opposed to a covid vaccination mandate for Washinton State school-age children. That is a gross abuse of power. The decision to vaccinate or not for covid should only be made by parents and their children's doctors. Government has no place in that decision for this particular virus.

The proposal for detainment of people based on their vaccination status, and the proposal to mandate all school and daycare children to be vaccinated against the brand new covid vaccine.

11.

Are you Pro or Con on the proposal?

2. Con

---

Historically, have the people who were forcibly placing people in any sort of housing/concentration/detention and taking their sovereignty over their bodies typically been in the right? It is my choice what treatment I accept. It is my educated decision, based on my knowledge of the statistics and of my own health and what would benefit and risk it. The same goes for my family. Sending law enforcement officers into someone's home to take them away, inject them with things against their will and treat them in other ways they don't consent to. Are you that sure that your good is that great? Sounds an awful lot like people should start prepping their attics and floorboards to hide under. Are you going to tattoo them too for easier tracking? As for the second thing I'd like to address on the agenda, parents are responsible to protect their children. The liability on this vaccine is on nobody. You have no retribution against the companies giving it to you if it harms you. The experimental status was just recently lifted, though no studies will come out for years and the companies have sought to seal those results for 75 years... Does that raise your eyebrows? You can't pretend they've never been wrong. The largest payout in a lawsuit for harming people? One of the vaccine manufacturers. Do you remember thalidomide? They thought it was safe for all pregnant women, wait no, it causes babies to be born with no arms or legs or to not survive after birth at all. X-raying pregnant women, that should be fine too. Oops. Lots of things have historically been discovered to do harm in time. Forcing nearly all children to take it could have really severe consequences. Check the VAERS (Vaccine adverse event reporting system) for this vaccine and see what is already going on. The stats and consequences suck. If parents have to inject their kids in order to send them to school, they will, but children are very unlikely to get or pass this so who is this benefitting? That ties parent's hands because if they need to send their child to school and daycare to work and provide for their kids, they don't have any choice. If one caregiver can't stay home from work to care for the children or homeschool them what can they do? Low income families especially will be effected. In summary, my and my children's medical treatment is my informed, sovereign choice to make. Look at history, look at what few studies are available so far, look at the VAERS, and allow people the freedom to choose what is right for them.

As stated elsewhere there is no defensible information to suggest requiring an experimental injection into children, who have not shown any particular risk of Covid and yet there is documental evidence of risk from the experiment. General data is weak with gaps and absolutely no information/testing of chronic issues. This technology has never been tried and we are going to force it on kids?

Dear Ms. Schreiber

As I understand, the BOH is considering the issue of mandatory vaccination for school age children.

I, as a parent of 4, respectfully ask that you postpone any mandates till further studies have been done.

There are many scientists and researchers that have concerns about the efficacy and actual safety of these vaccines. The amount of VAERS data reporting is quite alarming and should be considered in any decision regarding forcibly injecting a vaccine into a population that shows such a lack of actually being at risk of serious illness.

Some of the voices asking questions include:

Dr. Peter McCullough- developed a protocol of early treatment to prevent the seriousness of Covid 19.

Dr. Judy Mikovitz- a leading researcher in the HIV/AIDS field.

Dr. Robert Malone- Chief architect of the mRNA platform technology that is being used for one of the experimental vaccines.

These researchers are highly regarded in their fields and their concerns have been silenced.

The rush to vaccinate the entire population of the United States and the silencing of dissenting opinions, causes me to question what actually is the agenda behind it.

To publicly mandate vaccination for any citizen of the US, is a violation of their civil rights. I do not intend to follow any mandate regarding these vaccines and respectfully ask the Board of Health table this mandate till there is further scientific review.

Thank you

Tony Kearns

To whom it may concern:

I am absolutely stunned that you would force young people that have almost zero chance of hospitalization and death to have an experimental mRNA vaccine in order to attend in person classes. In fact, the VAERS data shows increasing incidents of coronary and other side effects among youth under 18 years of age.

Additionally, it is an outrage that you are considering quarantine camps and law enforcement to bully citizens to accept these leaky vaccines. The unvaccinated are no danger to the vaccinated and data shows that the vaccinated are just as likely to spread COVID to others. We taxpaying citizens have had enough of this health dictatorship in Washington state!

First as a parent I'm concerned about my child's health and the lack of long term studies of the covid vaccine. We do not know how the vaccine could affect a persons health for years to come into adulthood. Second reason is lack of availability in our state to acquire the vaccine. We have a lack of healthcare workers and facilities to be able yo admonish at large number of people. As a pharmacy employee we are so stretched thin just trying to get people their first booster. We are scheduled weeks leaving nang vulnerable elderly people unable to get the vaccine themselves. Let's focus on the elderly and at risk population first. I have to send away 100s of people everyday because we have no tests and no time.

Hello,

I am a Washington State resident and have been made aware of the proposed policies to be presented on January 12th.

I am writing to register my horror and emphatic opposition to both mandated Covid-19 vaccines for school attendance and involuntary placement in quarantine camps for those who resist complying with human medical experimentation which is unconstitutional and breaks the Nuremberg Code.

The loss of bodily autonomy is a very serious thing and to this point has been relegated to communist, socialist and Marxist regimes, not free republics.

I strongly urge you to consider what the enforcement of these WAC codes would mean for our free society. Because Covid-19 is a treatable and low risk illness for most individuals - especially children, these actions would be absolutely unnecessary and contrary to our state and federal constitutions, resulting in the loss of freedom for millions of individuals.

I would also ask you to consider the severity of breaking the Nuremberg Code. Because the Covid-19 injection is still an experimental drug, it falls under its jurisdiction. All human medical experimentation is to be conducted with voluntary informed consent. Those involved in forcing a person against his or her will to participate in medical experimentation are subject to the penalties of crimes against humanity. Please recognize that those seeking to enact these proposed WAC codes are culpable.

Respectfully submitted,

Debbie MacInnis

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
westley miller

---

Dear Board members, I write to you today to discuss the overreach of Government concerning a mandatory vaccine for school age children. It is unethical to require an experimental gene therapy vaccine still under Emergency Use Authorization. As per Senator Ron Johnson and Liberty Law firm stated: Letter to the FDA <https://childrenshealthdefense.org/wp-content/uploads/2021-08-26-Letter-to-FDA-re-Comirnaty.pdf> "As I stated to you in my letter dated August 22, 2021, "I see no need to rush the FDA approval process for any of the three COVID-19 vaccines. Expediting the process appears to only serve the political purpose of imposing and enforcing vaccine mandates."5 Because the FDA-approved Comirnaty vaccine is not generally available in the U.S., but the Pfizer-BioNTech COVID-19 vaccine will continue to be used in the U.S. under a reissued EUA, the FDA seems to be confirming my suspicion." According to Liberty Council, Lawfirm <https://lc.org/newsroom/details/082721-fda-does-a-bait-and-switch-with-covid-shots> In other words, there is currently NO FDA approved COVID-19 injection available anywhere in the United States. Every COVID shot in America remains under the EUA law and thus people have the "option to accept or refuse" them; Liberty Counsel Founder and Chairman Mat Staver said, "The FDA has apparently tried to deceive people by issuing its two confusing letters without proper explanation. Despite the FDA's sleight of hand, there is currently no FDA approved COVID shot available in the United States. Even if there were an FDA approved COVID shot available, people still may request that employers, schools, and the military accommodate their sincerely held religious beliefs." Requiring any of these Experimental Gene Therapy EUA vaccinations in schools makes each and every one of you liable and responsible. Therefore; in violation of Nuremberg Code. See attached PDF below:

<https://history.nih.gov/download/attachments/1016866/nuremberg.pdf?version=1&modificationDate=1589>

We, the citizens of Washington State, and the rest of the Nation, will be watching and holding you all responsible for the decisions you make January 12th. We will pursue every lawful avenue necessary to remove each and every board member, as well as file criminal complaints if this becomes mandatory for school age children. Sincerely, A concerned Washington State Citizen

Subject: Public Comment - Against Covid shot mandatory for child care and school admission

External Email

Dear Sir/Madam,

I am here to express my strong objection to making Covid shots mandatory for child care and school admission. Children are at extremely low risk for Covid and the vaccines are still only EUA (emergency use authorization). The long term impact of COVID-19 on the development of children is still not clear. Our government should not impose any such mandatory and enforce our children to the risk.

Thanks!  
Sherry Sun  
A resident in Washington

---

Mandating the adolescent, school aged children be vaccinated for COVID-19 to attend public school

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Per the CDC, it is a FACT that vaccinated people still contract and spread COVID-19. Vaccinated people do more spreading because the unvaccinated are having to be routinely tested to attend events where COVID-19 may/does end up being spread. Many people have health reasons to consider, and the potential side effects can be detrimental. As a parent of 4 very athletic children who will probably have a very good chance at collegiate sports, I am not comfortable with the risk of a heart ailment that ends their ability to play sports. As otherwise very healthy children with no underlying conditions, they are at more risk of that side effect than of dying. The statistics show that. Please don't force potential harm onto my children. It's the adults jobs to keep them safe. We keep a very small circle and we don't travel, both to protect ourselves and others. Please don't punish us when we are doing the right thing.

Subject: Jan 12th attempt to make mRNA injection mandatory

External Email

How DARE you try and pass this through. You have NO right to make a decision as to the health of my child. It is FACT that the mRNA injection, it is NOT a vaccine, has a higher chance to cause permanent harm to children than the virus itself. My wife, both of my kids and myself have ALL recovered from Covid19 and have natural immunity

which is PROVEN to be more effective and longer lasting than any of the shots and boosters.

The blood of children is on your hands, stop this insanity, I pray that you wake the hell up

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* This should be a parent decision, not the state
- \* Children are at much lower risk
- \* This is too far and would be taking too much control

Thank you for doing what is right and not making the COVID shot mandatory. I pray you make the right decision before God.

To: DOH WSBOH  
Cc:  
Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

Dear WSBOH,

I am a parent of a third grader and a fifth grader in the Peninsula School District in Vaughn Washington. Last year we homeschooled with book curriculum to keep normalcy and structure as we did not know what to expect during the school year due to the pandemic. My children although flourished academically, we grew as a family and enjoyed our time together; it did not replace the childhood experience of going to school with peers and teachers.

My children are doing amazing being back at school socially, academically and developmentally. Children need children for healthy mental and social emotional development, it is crucial.

I am desperately asking you to please not mandate the EUA Covid-19 Vaccine product for children to attend school in Washington State. We believe in keeping the community healthy and support keeping others safe, but in our core as parents we cannot ignore many unknowns of the Covid-19 vaccine for children.

It is parents jobs to keep their kids safe, our number one priority and we do this with informed decisions. It is difficult to make a decision to give a young child a vaccine when the FDA will not release their report for the \product for 50 years. The risk of myocarditis is very concerning, it is permanant scarring of the heart muscle, possibly predisposing children to premature cardiovascular disease. The testing for this product was done on a very small group of less than 2,000 participants and even at the FDA stated that "we wouldn't know the true risk of serious side effects until it is rolled out onto a larger population". There are noted vaccine injuries such as the 12 year old female who has a feeding tube and cannot walk, numerous reports of young athletes collapsing due to heart issues that led to death. We do not know or test what biomarkers for future disease the vaccine may cause for our younger precious popluation. The benefit versus risk for this population is not proven.

This is the information us concerened parents have to process as we make the best decisions for our children. We have also been living the last 2 years in a pandemic, trying to keep life going normal, balance jobs, health and our family's well being. It is life changing and terrifying to think that we may have to choose to provide our children with an education that meets their mental health needs, social emotional and academic needs, or give them an inoculation that we feel may be unsafe. It literally breaks my heart privately, when I see their happy faces and know it may all be gone, due to a mandate.

Whether you agree with parents like me or not, we are out here. Our feelings are very strong and we will not comply with a Covid-19 Vaccine mandate for our children to attend school. Some will be ok, some may have lasting mental heath and academic consequences that could lead to other health crisis such as depression, substance abuse, suicide and future unemployment. WE MUST FACTOR THE RISK VERSUS BENEFIT.

Please hear my Prayer.

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++ In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed,

Sally Burt

To Whom It May Concern:

My name is Nicholas Hooge and I am the father of 3 small children. As a parent, I am abhorred by the ideas currently being proposed to legislation to FORCE "vaccination" on my children.

Dr. Robert Malone who is the creator of the gene therapy - not vaccine - strongly advises parents NOT to inject the covid "vaccine" into our children due to the dangerous toxic spike proteins the injection causes, resulting in possible permanent damage to my child's critical organs, such as the brain, nervous system, heart and blood vessels, reproductive system and immune system.

The rate at which this "vaccine" has rolled out is alarmingly fast, and suggests cause for concern based on the lack of testing over time. As a person holding a Bachelors Degree in Science, the lack of testing, of knowing exactly what risks we are potentially ignoring is completely unacceptable to me as a parent. I should be able to look at research and decide for myself if the benefits outweigh the risks to an injection and, as it stands, this is a no brainer for me, as a parent. So far, it seems children have very mild systems due to COVID-19. I understand this is not always the case, but it does appear to be the majority, so my kids are at no increased risk to their lives or safety without this "vaccine."

It is not legislation's right to FORCE my child to receive an injection I do not feel is in his best interest; not only that, one in which could cause IRREVERSIBLE HARM to his body as he continues to grow.

If COVID-19 vaccination becomes a requirement (without allowing exemptions) for school enrollment, you can be sure my 3 children will be unenrolled instantly. My wife will homeschool or we will move out of state before I put my children's lives in jeopardy.

I hope you will truly consider my words as a concerned parent; America has always afforded us the right to CHOOSE for ourselves. It is my right as a parent to choose wisely for my children and not your right as a government official.

Thank you for supporting us parents when you vote NO for a covid vaccine requirement for school.

Sincerely,

Nicholas Hooge

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: Public Comments Regarding Mandatory Child Vaccination and Vaccine Passports

External Email

Hello:

I am writing to you for some public comments for the mandatory vaccination of children and vaccine passports in Washington State and Kitsap County. I served for more than 20 years as an intelligence officer and graduate of both the Naval Postgraduate School, Expeditionary Warfare School, and the Naval War College Phase I. I am also a data scientist and software engineer and own a company in the Medical AI space. I am hoping my experience can illuminate some of the challenging policy decisions facing our community. Here is some very important data that I hope you will take into consideration during the decisions. I will happily work with the state or county for FREE to look at data and meet with officials so that critical data is incorporated into decisions.

The first thing that needs to be discussed is what's in the data. The data basically shows that not everyone is affected the same way, with children far less susceptible to covid than elderly adults. 90 percent of the fatalities and serious covid injuries are in the 65+ demographic. The data also shows that having a comorbidity greatly increases the risk of injury by Covid. If not everyone is affected the same way by Covid, then it makes very little sense to expect that a single solution can be used to solve the Covid issue. In fact, improved overall health is a key indicator of improved response to Covid which means better diet, more exercise, and less stress would likely have increased positive outcomes. There are also some very troubling indications of problems in the unfolding medical experiment with more vaccine injuries reported than all 30 years combined on the Covid vaccines and a complete lack of long term data. There is also a lack of transparency on the part of the FDA with the FDA requesting non release of data until 2096, or more than 75 years currently. This is a serious issue for determining proper courses of action based

on data if it's not being released and this is considered a very large breach of experiment protocol.

This video is highly encouraged to watch, as European scientists are actively investigating companies for a Nuremberg 2.0 war crimes trial.

The next aspect to discuss is the legality and how federal code encapsulates the Nuremberg Code, which is an important legal framework surrounding medical experiments. Military officers receive substantial training in war crimes in order to drive ethical decision making. The Emergency Use Authorization for the vaccines means this is a medical experiment in progress and it's very evident that the companies are conducting experimentation on production lots to determine what is a lethal dose. Not everyone is getting the same dose or formula. There is an issue with the conduct of this experiment, in that the Nuremberg Code REQUIRES informed consent and violations of the Nuremberg Code are grounds for charges of war crimes. Clear violations of these codes appear to be happening. Under 21 code of Federal Regulations Section 50.23 and 50.24, it is absolutely illegal to make anyone participate in an experimental program using coercion. This is how we have embraced the Nuremberg Code in US law. Under 18 US Code Section 2331 subsection 802, inside of the definition of domestic terrorism, anytime a citizen or government agency is forced to do something against their will with coercion, this is domestic terrorism. Indictments for domestic terrorism have been filed in all 50 states against individuals and organizations at the federal level attempting to mandate illegal experiments against the Nuremberg Code.

I am an expert in counterterrorism, having commanded multiple organizations defending against war actions from our nation's enemies. Globalist organizations have overtly stated the intent to use the pandemic to drive a socialist agenda and to cause indiscriminate harm to civilians in order to make the nation susceptible to a social agenda. This is a well known war plan called the Cloward Piven plan and has been studied by military officers for decades. The major objective of the Cloward Piven plan is to drive overwhelming demand on national infrastructure and welfare in order to collapse the system through bankruptcy. A quick glance at M1 money supply shows the US is on an unsustainable banking path. Even worse, indiscriminate harm to civilians (economic, psychological, physical) is a war crime. Importantly, aiding a war crime is also a war crime. Media orgs and government officials that aid war crimes in progress may be responsible for committing war crimes. Some elements of the government apparatus appear to have been co-opted by globalist orgs with the intent to cause instability in the United States. This means that the Covid situation, which is serious, is being exploited for an other than health objective, and the organizations are stating this objective in the open. The World Economic Forum is a primary nexus of both political organizations and corporations and the Executive Chairman has made overt statements indicating the

desire to exploit the pandemic for social objectives. He has even written a book (The Great Reset), which I highly recommend for reading, since it specifies in great detail the rise of technocracy and social agendas surrounding the pandemic. This social impact economy appears to encompass a social credit score which has been pioneered in China, and even the prototype system has had significant abuses. The county and state are encouraged to distance themselves from this agenda as lawsuits and criminal investigations are actively underway.

"The pandemic represents a rare but narrow window of opportunity to reflect, reimagine, and reset our world" - Professor Klaus Schwab, Founder and Executive Chairman, World Economic Forum

<https://www.weforum.org/agenda/2020/06/now-is-the-time-for-a-great-reset/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.weforum.org%2Fagenda%2Fnow-is-the-time-for-a-great-reset%2F&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ced517998180443eb66ac08d9d199c814%7C>

Social Credit Score in China. Highly encouraged to watch.

I am happy to work with the state or county on research if there is any ambiguity on the above legality and data in particular. The unification of personal data and overt attempts to force participation in medical experiments is highly illegal and the county and state are encouraged to avoid participation in order to avoid being involved in possible criminal proceedings. Feel free to reach out to me at your convenience.

Dear Board of Health members,

Please recommend a vaccine mandate for the Covid vaccine for K-12 students in Washington state.

It is so important to keep our kids safe and in school, and if we have any hope of reaching herd immunity and seeing the end of this pandemic, we need to get as much of the population vaccinated as possible.

Thank you for your time,

Subject: No COVID 19 Vaccine Requirement

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense

([childrenshealthdefense.org](http://childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org)

No one should be forced to take a medical treatment. The Covid 19 vaccines are not preventing infection nor transmission. And they are causing harm to thousands including deaths. The numbers are documented on the CDC. As well, many people have health issue that prevent them from being able to get the vaccines. Everyone should have the freedom to discuss with their doctor, and decide for themselves. Also, Covid has shown to be a very low risk for children.

---

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. As a parent, this should be my choice as a mother that I decide for my child. There is not enough information on the long-term effects of a child or teenagers growing and changing body. The CDC is fully aware and monitoring (per their website) the reports of myocarditis and pericarditis after COVID-19 vaccination. They state that this is rare, however, what parent should be forced to gamble and play roulette with their child's lives, hoping and praying that this "rarity" does not happen to their child. I should not have to worry about her education being in jeopardy because of our choosing not to take a vaccination, leaving the state, the only home she has ever known, not graduating in 2 years in her school she has an active part in and with her friends. A flu vaccination is not required for children. Why is this any different? What about the children who have had covid already? The natural immunity that the body has now? Why are people not talking about this? I am not against vaccinations; however, I am against the rushed, forced way that this is happening, especially in the lowest at-risk group. This shot has only been out for a year. I am pleading with the Washington State Board of Health not to force this vaccination on parents and children. Let them decide for themselves if this is something that they want to get- at least until more years of research is complete. Thank you.

I am grieved with the ideas proposed by the State Board of Health regarding emergency orders for Covid vaccines, treatment, testing, and school immunization.

You are taking over decisions that are personal and should never be mandates for me or my children. Then to cap it all off, you are thinking of isolating individuals and their family members for having an opinion about their personal health just because it is different from yours. This sounds like we live in Nazi Germany....I can't believe you would isolate anyone in a quarantine facility for expressing their personal decisions about their health.

To cap it off,, you are suggesting that the Covid experimental injections be required of school children. NEVER! NEVER! This is the right as well as the responsibility of parents, not a public agency or a school official. Do you not know that children, even 13 year olds are dying of cardiac arrest following the vaccination. Latest report in VAERS (from CDC data) reveals 5 kids dying of cardiac arrest and many more, up to 800, killed by Covid vaccines in various ways.

I urge you to step down from your seat of authority and consider the rights of individuals. Act like a parent or grandparent. SCRAP this whole idea.

WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

I would like to formally submit I am entirelyly against any and all of these covid19 policy proposals, as is my entire family and extended family of several registered voters in the state of Wa. This is a clear, unethical and fear based over reach of policy and a large part of the reason (in some WAC policies listed) why children are being pulled out of public education and why there is a mass exodus of Wa state residents moving out of state with their tax payer money. Furthermore, science does not support any of these measures are effective. We stand against these proposed policies fervently and implore these policies be rejected immediately. Thank you for your time.

-The Regans

---

These "vaccines" have not undergone thorough testing for long-term effects on adults or children. Therefore, they are essentially experimental drugs that require patient consent. The Nuremberg Code of 1947 specifically addresses these experiments. To remind you, the Nuremberg Code addressed the ethics of medical experiments after the horrific events of the Holocaust during WWII. These experiments shots that are being forced on the general population and children go directly against tested science and ethics. Do not force these shots on the residents and workers of Washington or you will be remembered in history as responsible for the events and deaths that follow. The Nuremberg Code (1947) Permissible Medical Experiments The great weight of the evidence before us to effect that certain types of medical experiments on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human experimentation justify their views on the basis that such experiments yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts: The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the

anticipated results justify the performance of the experiment. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability or death. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

I oppose COVID-19 vaccine mandates for school aged children and I oppose any rule that expands any agency (local or statewide) authority to impose involuntary quarantines. The backbone of Covid rules and mandates lies (or used to) on the premise that vaccines prevent transmission. We were deceived to believe that, now it is crystal clear it is not the case. As designed, vaccines do not prevent transmission and even severe illness. I do listen and follow science, not propaganda.

External Email

According to your own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so we do not see how this meets the Board of Health requirements. We recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do, which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, I am not certain as to how these mandates are legal.

To the Washington State Board of Health members,

I'm a registered voter here in Washington and would like you to vote NO for the mandate of children to have to have the Covid vaccine to go to school. I believe that medical decisions and treatment should be between the person/family and their medical providers only.

Thank you for your time,

Elisha Lane

Hello,

Our kids will be pulled out of public school if the covid vaccine becomes a requirement or they are discriminated against for not having it.

1- The risk of severe illness or death to children is still very low, considerably lower than influenza. There is a higher risk of adverse reactions to the vaccine. It is not our children's responsibility to protect the vulnerable at their own risk. Any vulnerable teachers and staff are welcome to vaccinate themselves to mitigate their own risk.

2- Vaccinated are still becoming infected and are spreading it the same as unvaccinated, posing the same risk to the vulnerable. Again, the vulnerable all have access to the vaccine to mitigate their own risk as they see fit.

3- While adverse reactions to the vaccine may be fairly low in the short term, they do happen. there are literally zero long-term studies in humans to know if there will be any impacts to health down the road. History is full of products once deemed to be safe by the FDA that are now banned. Let's see how this looks in 5 to ten years.

4- I would also like to add that as long as "any cloth or paper" mask is deemed sufficient, I will consider the source of the requirement to be of questionable intent. ALL ACTUAL SCIENCE has consistently shown an actual surgical mask to have marginal effectiveness against a virus, with a K95 or N95 to be the only mask to make much difference. The flimsy cloth or paper that the majority of children are wearing is less than effective. I would like the data on how many staff and children are out of WA schools with other viral/respiratory illnesses/asthma compared to the 2018/2019 school year. Our circle of children have been continually struggling with this since the beginning of school. Please see The University of Michigan website for info on their influenza outbreak that was severe enough that the CDC was called in. This university requires masks AND vaccines (and lets not forget that influenza particles are significantly larger than Covid particles). These are college students, capable of better mask hygiene than the younger children.

Subject: COVID Shot for children

External Email

Greetings,

I am writing about my concerns regarding mandating children to take COVID shot. Vaccines and shots should not be forced on anyone especially children in order to have them attend school. COVID does NOT pose a high threat to young people and even those under the age of 50 have over a 98% recovery rate.

These COVID shots are not a one size fits all. There are many factors each of us have to personally make regarding personal health and convictions. Allow me to explain further. If a person has a history of cancer, taking this shot may not be the best choice for them, especially for a virus with a 99% recovery rate. Studies performed in US, Netherlands, Denmark and India are all revealing how the lining in T cells are being weakened and destroyed by the shot. T cells fight cancer and other infections. The genes from the shot cling and grow to the blood cell linings which the lymphocytes will see as a virus and attack. If someone has a second dose the the complement leukocytes also attack the cells (something medical scientists have never seen from a shot before). You can also research the study done by Francis Crick Institute in the UK finding the Pfizer-BioNTECH shot destroys T-cells and weakens the immune system. A study in Spain revealed the shot contains graphene oxide which is a toxic substance found to promote blood clots, damage red blood cells, damage immune system and contribute to loss of taste or smell. Natural immunity created in IgM, IgG and IgA antibodies are more effective than the COVID shot without the harmful side effects. The SARS COVID strains, whatever the strain, change very little in structure, unlike the influenza virus, so our natural immune system is not blind against new forms of COVID strains. Is Washington State willing to accept the liability for adverse affects on children have since you would be forcing them to take COVID shot in order to attend school? Especially when COVID poses very little harm to children? Some children have have adverse affects to "established" vaccines so why would your force children, whom COVID poses very little threat too, to take an experimental shot that has no lasting affects? What about religious concerns regarding how the shots were created?

Currently all the COVID shots have been created using aborted baby parts, which is a conviction for many people.

The use of cells, cellular debris, protein, and DNA from willfully aborted human children found in Adenovirus, Polio, Dtap/Polio/HiB Combo, Hep A, Hep A/Hep B Combo, MMR, MMRV Pro Quad, Rabies, Varicella, Covid 19, and the Shingles vaccines violate the very basic commands found in Exodus 20:13 and Deuteronomy 5:15 which instructs us to not murder. The following ingredients were derived from no fewer than 107 human souls who were sacrificed for social reasons and then used in past and ongoing vaccine research; PER C6, HEK293, WI-38, (RA 27/3), WI-1, WI-2, WI-3, WI-4, WI-5, WI-6, WI-7, WI-8, WI-9, WI-10, WI-11, WI-12, WI-13, WI-14, WI-15, WI-16, WI-17, WI-18, WI-19, WI-20, WI-21, WI-22, WI-23, WI-24, WI-25, WI-26, WI-27, WI-38, WI-44, and MCR-5 plus many other ingredients obtained from human children not required to be listed by FDA guidelines. HEK 293, Human embryonic kidney cells were used to test and manufacture Moderna, Pfizer and AstraZeneca Covid 19 inoculations. Johnson and Johnson Covid 19 shots contain PER C6, which is the retina cells of an 18 week old baby boy. Supporting vaccinations and vaccination developments is an endorsement of the sacrifice of those

and the continuing sacrifice of other human souls.

Genesis 4:1, 17 and Jeremiah 1:5 demonstrate that the deceased children used in the aforementioned vaccinations were recognized by God as human souls from the point of conception in the same way that we as parents, recognized our child as a human from the moment we were aware of his/her presence in his/her mother's wombs.

Genesis 1:27-28, 4:1, 2 Kings 17:17-18, Psalm 22:10-11, 106:35, 37-38, 113:7-9, 127:3, 139:13-16, Amos 1:13, Matthew 18:1-4, and Matthew 19:13-15 are just a few verses that illustrate the aforementioned children as blessings from God that are valued and loved by Him, their Creator, in whose image they were created and that their killing is condemned and causes God's destructive anger to burn against their murderers and those complicit in those murders.

Exodus 20:13, Leviticus 18:21 & 20:2-5, Deuteronomy 5:13, 12:30-32, 18:10, 2 Kings 16:3, and Psalm 106:38 illustrate that all child sacrifice is condemned with no exception clauses allowing for the greater good or public exception clauses found anywhere in the sacred scriptures.

1 Corinthians 6:19-20, and 10:31 remind us that we are to regard our bodies as temples of God's Holy Spirit and that we are to honor God, our Creator and possessor of our very bodies by not defiling them. Notwithstanding the presence of socially sacrificed human cells and debris in vaccinations, we firmly believe that the presence of neurotoxins, hazardous substances, attenuated viruses, animal cells, foreign DNA, albumin from human blood, carcinogens and chemical wastes is in strict violation of our imperative to treat our bodies as holy temples of the very Spirit of God.

Genesis 9:4, Leviticus 17:10-11, 17:14, Deuteronomy 12:23, Acts 15:20 and 29 informs us that blood represents the life force of human and animal species and that human blood was to be kept pure under all circumstances and free from contaminants such as animal cells, parts, and blood.

COVID poses very little threat to young people and most age groups, so forcing an experimental shot, that does not have lasting effects (according to several sources including CDC) in order for them to attend school, play sports or other activities is just illogical and unethical. Medical choices should be left to parents and individuals to make based on their medical history and religious convictions, NOT forced by the government.

Please DO NOT mandate vaccines/shots for children in order for them to gain an education.

Thank you,  
Terri Reed

Hello,

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

The implementation of a COVID 19 vaccine requirement for schools in Washington State is absolutely insane.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Amyee McKnight

Senator

I am writing to you today in regards to the proposed WAC changes involving Covid-19, specifically WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am 100% against these proposed policies. They are immoral, illegal, and unconstitutional. Detaining citizens against their will without due process is illegal, not to mention the fact that it regards a personal, medical decision in which the government should have no say in.

Regardless of where you stand with the Covid-19 vaccine, mandating experimental treatment without informed consent is wrong. Forcing this experimental vaccine on our children is wrong.

What is the benefit of forcing a vaccine that does not prevent the transmission of the virus?

The logic is just not there.

Please consider my comments when making your decision. I have lived in Washington my entire life and, with the direction this state is heading, I don't recognize it anymore. Please be on the right side of history. These proposed WAC changes will turn this state into a modern-day Nazi Germany.

I appreciate your time,  
Sandy Holmes

NO mandatory covid shots for kids, that is wrong. These are not true immunizations like the MMR, DPT or Polio vaccines required to attend school, and no one should be forced to put them in their body, least of all children.

NO involuntary internment at any quarantine camp for anyone. Get rid of that WAC and definitely do not expand it.

Stop violating the Constitution and start remembering that WE the People are YOUR boss, not the other way around.

Requiring children to receive a Covid vaccine to attend child care and school.

11.

Are you Pro or Con on the proposal?

2. Con

---

I feel very strongly that children should NOT be forced to receive a Covid vaccine in order to attend day care or school! The science does not support this! Children remain in an extremely low risk category and the vaccine is still not fully approved (it is still under emergency use authorization) for this age group. Furthermore, we have NO LONG-TERM studies to prove that this vaccine is in-fact safe for young children to receive. If we are worried about unvaccinated children being a danger to their teachers, teachers have already been forced to receive the vaccine. Everyone who wants the vaccine has had ample opportunity to get it (including many children). Yes, Covid+ numbers are increasing with Omicron but the symptoms are milder. Many hospitalized patients who are Covid+ are not there for treatment of Covid... they are there for something else and happen to test positive for Covid because we test every patient now, whether or not they are symptomatic. Please, I implore you to follow sound scientific evidence vs. sensationalized group panic. Thank you.

I am writing to inform you that I absolutely and vehemently oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am also completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

This is a parents/families personal choice. There is still not enough information about potential side effects of the vaccinations down the line. This is a personal choice. Mandating is not the way we should be doing anything.

I am a concerned mother in Washington state and I strongly oppose any mandatory covid 19 vaccines for anyone including children in school (elementary-college). This coercion, pressure and force is a violation of the Nuremberg code and this needs to be taken seriously and people that don't should be held accountable. None of these shots are FDA approved and mass vaccinations and mass compliance is not the answer to the problems we face in our society. Stop assaulting our children and respect their bodies and their rights to live in a free country where they are respected and free to choose what is best for them. Our children do not need to grow up living in fear and being forced to inject anything into their bodies, especially against their will. This must stop immediately. Do better for our children. They are our future generation and we need to help prepare them and respect them and empower them through these difficult times not force them to inject substances into their bodies with unknown side effects that could harm them and violate their rights.

Sincerely,

Brienne Alexie

To: DOH WSBOH  
Cc:  
Subject: Immunization Criteria for Child Care and School Entry

External Email

Hello,

My name is Ralph Walter and I would like to respectfully and emphatically comment on your consideration for school age children to take the Covid-19 shots. A decision to move ahead with the plan to administer the shots WILL cause irreparable harm to some percentage of the recipients. This harm in many cases has proven to be serious, even life-threatening.

I plead with you! For the children's sake and the sake of society itself, do not force this shot to be taken by children or adults.

Here for example, in German kids ages 5 to 11

Here is what we find for healthy kids with Covid-19:

- For healthy kids, the risk of going to the hospital is 51 per 100,000
- For healthy kids, the risk of going to the ICU is 8 per 100,000
- For healthy kids, the risk of death is 3 per 1,000,000
- There were no deaths reported in healthy kids older than 5
- Kids 5 to 11 have a lower risk than kids <5 and adolescents 12 to 17
- Kids 5 to 11 have a risk of going to the ICU of 2 in 100,000; 0 died
- Among kids who died of COVID19, 38% were already on palliative/ hospice care

The Germany study shows that risks to healthy kids are very low.

So why the school closures, mask mandates, and vaccinations for children who are not at risk?

Thank You,  
Ralph Walter  
Snohomish, WA

2.                      Con

---

I am a parent of 2 surviving children who are 8 and 9 and have many clients and friends who are parents of young children. There are 73 million kids 17 years old and younger in America. Many of whom face severe health challenges and diseases. There are less than 700 kids 17 and younger in our nation who have passed away in the last 2 years that had the virus (These deaths are not solely due to the virus). There are a small percentage of kids who have had to get treated and be admitted to the hospital and we also know there are people who are contracting Covid after being vaccinated, I have had 2 in my own family. Children have been in contact by millions of Washingtonians who have had the virus and many of these kids do not get Covid and if they do contract the virus, they have minor symptoms. Covid shots should absolutely NOT be a requirement in the State of Washington for our children. This is a child's guardian decision not the state to decide on behalf of the family. Thank you for reading our statements.

You are in your position to make decisions on what is best for the people of Washington. I strongly disagree that people who refuse to voluntarily comply with requests for medical examination, testing, treatment, counseling or vaccination should be involuntarily detained in a quarantine facility. Are we going the way of Nazi Germany? If you pass this we certainly are!!! I am so disappointed that this is even a something you can make decisions for the state on. Also, Covid shots should NOT be required for school children. PLEASE do not vote these restrictive and EVIL changes. Please consider the people you represent and listen to reason. You would be totally taking away the freedom of citizens with these proposed changes.

It is a scientific fact that the risk of children getting vivid is extremely rare. We do not know how this vaccines will affect our children in the future. It is also a fact that many children have had adverse reactions to vaccines, leaving some of them physically handicapped. There have been some that have even died. I believe that a vaccine should be researched for a few years not a few months. If you make mandatory vaccination for children many people will pull their children out of schools and home school them. Please don't do this unnecessary vaccine to our children.

I am a Firefighter and my wife is a nurse at 2 hospitals. We have worked through this pandemic safely and effectively. I have also seen first hand, the adverse reactions than can come from the covid vaccines.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

WAC 246-100 Rulemaking that would expand any authority to involuntary quarantine individuals. Also adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

11.

Are you Pro or Con on the proposal?

2. Con

---

I am a Firefighter in Washington State, the husband of a nurse in the operating room, and a father. I oppose WAC 246-100 Rulemaking that would expand any authority to involuntary quarantine individuals. I also oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. It is unconstitutional and violates HIPPA. As a firefighter I have been trained in my profession to advocate for my patients and their right to make their own medical decisions. I am doing the same now for myself, my family, and all fellow Washingtonians! It is not appropriate for the government to have this much control over the citizens they serve! I believe both of these proposals go well beyond the limits of the government's duties. It is government over-reach and an unconstitutional infringement on our rights.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

This vaccine has not been through the trials or had enough time to know the long term effects it's having on our children and their health.

Children are at a very low risk from getting or dying from covid.

This vaccine is still under emergency use and has not been approved in this country.

Informed consent had not been properly given to people or families.

Myocarditis is a side effect, especially in boys. Once the heart is damaged, it's damaged for good. Why put children at risk for this when they are at such a low risk of getting covid.

I strongly urge you to decline adding this covid vaccine to the list of childhood vaccines.

Sincerely,  
Tricia Monsen

Dear Washington State Board of Health Member:

On January 12th you will be gathered with the Board of Health to decide whether law enforcement should be allowed to enforce your COVID-19 edicts and whether school children should be injected.

If you vote in the affirmative, you will have voted to usurp the constitutional protections you are sworn to "support and defend" and someday, like the Nuremberg Trials, you will be called to task before the bar of justice.

I am a veteran of eight combat tours in Vietnam. I and my brethren and I fought to protect your rights as citizens. Do not prostitute the office you serve in by attempting to take away my right to choose for a disease which is not much worse than the flu, curable by well established propalaxis, and inflated by a corrupt press.

You may believe you are doing the right thing but you, like the character in the movie "Falling Down" will someday find yourself saying "So I'm the bad guy?" when you realize the hell that the slippery slope of assuming powers you were not intended to have reaches it's hellish conclusion.

You will have to live in the country you will destroy with your edicts along with me. This is an egregious overreach of power and if you think you are immune from power corruption, you'd better think again!

Shame on all of you for even thinking of this and terrorizing those of us who still believe in individual freedoms!

Sincerely: David Meyering Cdr. U.S.N (Ret.)

I am completely against any of the proposed Covid Policies that are over reaching . This Covid 19 vaccine is in clinical trial and has a lot of side effects like paralysis, Anaphylaxis, blood clots, myocarditis, even death.

If you will proceed with these policies we will remove our kids from public schools and move out to different states.

We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100- 040, WAC 246-100, WAC 246-105.

Thank you!

Sincerely,

Y. O.

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to

be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Monty Chellis

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) Children are at an extremely low risk to contract or transmit any & all forms of Covid.
- 2) vaccines are still ONLY EUA...Emergency Use Authorized, period.
- 3) to date there are no long-term studies documenting any history of safety.
- 4) At this time, studies document that both vaccinated and unvaccinated can transmit Covid.

Based on the four previously mentioned points it is apparently the case that the vaccine DOES NOT stop the spread of the disease. Therefore, I am opposed to mandating that school children (to include my five grandchildren) be required to be vaccinated to attend in-person public school classroom learning.

Hello board members and anyone else it may concern,

As parents in Washington state, we say please do not mandate a vaccine to go to school!

Children are at extremely low risk for Covid.

The vaccines are still only EUA.

There are no long term studies to document any history of safety.

Studies DO now document that vaccinated and unvaccinated can both transmit Covid.

The vaccine apparently does NOT stop the spread of Covid.

The risk of injury from the vaccine is not worth it when it doesn't even stop the spread to begin with.

A mandate doesn't make any sense!

Thank you,  
Katie and Josh McGuire

Dear SBOH,

Please DO NOT Recommend Covid vaccines for the students of Washington public schools. Current Covid vaccines are for emergency use only, not for our student population in general. The most current data indicates the risks of the vaccine are more harmful than the risk of children getting Covid. Why increase the risk of harm to our children?

Please establish a new rule that prevents the use of EUA products until they have completed phase III trials.

As a medical professional, I have worked my entire career taking care of people who may or may not like the medical fields recommendations on how to treat them. It has been my duty to not only educate patients but also uphold their autonomy while they are in my care. I have taken care of many people whose lifestyles I don't agree with, yet I was reqFirst let me state that the CDC's definition of "vaccine" was changed in Sept. of 2021. The original definition stated that a vaccine is "a product that stimulates a person's immune system to produce immunity to a specific diseases". Now the CDC's definition of a vaccine states "A preparation that is used to stimulate the body's immune response against a disease". The entire basis for requiring children to receive a COVID shot to attend school, something our public tax money funds, is off base. The true studies, statistics and health information shows that children are much less likely to have significant, or life threatening, symptoms from contracting COVID-19, that natural immunity lasts twice as long as the shot immunity

Dear Washington State Board of Health,

Concerning the proposals being considered on January 12, 2022, I would like to share my thoughts and concerns.

The Covid19 vaccines have not proven to be effective at preventing the virus nor in the spreading of the virus. Something ineffective should NOT be mandated.

The vaccine does not have a record of long term effects, so we do not know how it will affect us in the future. Something unproven should NOT be mandated.

Children are at extremely low risk for Covid19. Why should our children (or anyone) be vaccinated when it is ineffective and unproven concerning the long run effects?

Cases around the world have proven that those countries without vaccines do much better overall than countries/states with strict mandates.

The greatest reason of all to NOT create strict mandates is that it is unconstitutional. Each of us should have the right make our personal health and medical choices for ourselves and our families.

Thank you for deciding against mandates.

Sincerely  
Rhonda Sanders

I am adamantly opposed to the unconstitutional violation of my rights as a parent and the violation of my children's rights that would come with the attempt to force anyone to be vaccinated or have any medical procedure forced upon an individual against their will. I am uncomfortable administering a vaccine that may cause serious health problems, when the reverse (them contracting COVID-19) is less serious of a threat. While I am comfortable administering other vaccines to my children, the covid 19 vaccine has not been properly vetted and tested in my opinion. Covid 19 is not a danger to children and there are no longitudinal studies to verify the vaccine's long term safety in prepubescent minors. There are more children at this point horribly and irrevocably affected through the side effects associated with this so called vaccine than from actually contracting a very survivable virus. I will not submit to this violation of my family's rights.

1: I oppose WAC 246-100 Rule making that would expand any authority to involuntarily quarantine individuals.

2: I oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I oppose adding C-19 to vaccine schedule because:

- a. Statistically deaths among children are almost zero with C-19. See screenshot below of death rate over last year, captured from CDC website)
- b. The vaccine schedule is already crowded. Requiring C-19 statistically has no benefit. I wonder why we are even considering it?
- c. It's a barrier to education for poor children and children of color. Because of the history of government medical experimentation on black people, it's no wonder that statistically, black parents and their children are way less likely to get the vaccine. For example the Tuskegee Study of Syphilis in Black Males is a famous example of why there is distrust of a government pushed vaccine. In Washington State, children of color are significantly less likely to graduate from high school refer to figure 2 below. I'm questioning the ethics of what is really going on here and it seems obviously a biased requirement.

Dear WA Dept of Health:

It is a mistake to vaccinate young children with the mRNA approach for at least 2 reasons:

1. The focus of the spike protein production is only on the encoded genome in the mRNA vaccine, it will NOT address the 1000's of virii variants which naturally occur. This is why we are now seeing the need for booster shots. (look at current Israel for the data on this, the nation is 90% vaccinated but infection rates are climbing)
2. The risk of ADE is increased and we are already seeing the Omicron variant preferentially clustering in vaccinated people especially. The mRNA genome encoding will interfere with the human body's natural immunity not aid it as commonly believed. Natural immunity is superior to the mRNA approach and it is the best answer to this covid-19 influenza. Cold vaccines have failed in the past due to the nature of the influenza coronavirii.

The current covid-19 influenza is NOT a health risk to children and they provide the herd immunity which is needed for the general population.

It is not wise to vaccinate the children, for at least the reasons mentioned above. Current VAERS data shows that children are being more harmed by the covid-19 mRNA vaccines than by covid-19 itself.

THank you for taking note of my comments.

Randall L Rathbun

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Federal law 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(III) requires that the person to whom an EUA vaccine is administered be advised, "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks."

This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. The COVID-19 vaccines manufactured by Moderna and J&J are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely "may be effective."

Please note that many public school districts around the country are losing in litigation and having to rescind their mandates.

Save us all some money, time, energy and discrimination and do not mandate vaccination for public school children.

Thank you for your sincere consideration.

Rob Story

To Whom It May Concern;

As a mother, entrepreneur, and taxpaying citizen of the State of Washington, I am both disgusted and appalled that the upcoming discussion to remove a medical freedom of choice is even being considered. It seems the dominant party of the State would support the freedom of a woman's choice to abort (MURDER) an unborn fetus with no freedom inside the womb of it's own. So I'll keep my words brief... if it is required for children to get vaccinated for the COVID-19 virus, I WILL remove my children from public school, and homeschool my children. I refuse to inject my children with a poison, developed in haste to a virus no more deadly than the seasonal flu, and treatable with natural remedies. I have faith that I am making the most informed decision for my children and my family.

Sincerely,

Concerned Voting and Taxpaying Citizen

3606011762

9.

Do you have any special expertise relevant to this topic?

1. Yes

---

I am currently quarantined. I am experiencing very little in regards to symptoms. Yet, I am required to stay home from my teaching job for ten days. In the mean time, no subs are available to teach my six classes each day. Therefore random teachers from my building are stepping in to cover my absence. This is a complete waste of resources. Each class covered is costing the school district and estimated \$60.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

All of the above proposed policies (WAC 246-100-070; WAC 246-100-045; WAC 246-100-040; WAC 246-100) should be dropped. It is a parents right to decide if and when they will vaccinate their child or themselves for that matter. It is not the role of the state to mandate the use of law enforcement to detain a person or group in a quarantine facility involuntarily.

11.

Are you Pro or Con on the proposal?

2. Con

---

The United States of America is a democratic republic. The ideals in the Declaration of Independence and in the Constitution of the United States of America clearly state that WE THE PEOPLE have the unalienable Rights of Life, Liberty, and the Pursuit of Happiness. We also have the right to alter and abolish government when it becomes a destructor of our God given Rights of Life, Liberty, and the Pursuit of Happiness. To attempt to pass a law or laws which would allow local health officials to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, (and/or) vaccination is clearly evidence of an attempt to deny my God given Right to Life, Liberty, and the Pursuit of Happiness. It is hard to believe that this governor of the state of Washington and those that would do his bidding are emboldened enough to attempt this coup. We will not stand for this. I urge you to cease and desist with this proposed set of policies.

To whom it may concern,

I do not believe that WAC 246-100-040 should include Covid-19 or any of its variants. I also do not believe that the Covid-19 vaccine should be a part of the required vaccines for our school children or any person.

I believe that this is a control and decision that should stay with the individual.

Please do not change this WAC to include this.

Victoria A Bush

This vaccine has not been studied for long term effects. 9 months should not be considered a long enough trial for young kids to know what will happen 10+ years down the road. The FDA has also only 'approved' it for EUA and the pharmaceutical companies hold zero liability if something should happen that negatively impacts the consumer. How can a group of individuals put parents and children in a situation where they are forced to have medical decisions made for them, and hold no one liable for harmful outcomes. The current list of required vaccinations also come with protection under the national vaccine injury compensation program. The covid injection does not fall under this program.

Stop this nonsense. People are going to give you all the reasons why having kids vaccinated with the Covid vaccine is gross and why having quarantine centers is also gross, so I don't really need to. I also know I don't need to go through all the reasons because they are obvious. Be on the right side of history, be courageous and go against these disgusting ideas, and let's move on with life. Let's let kids have the kind of childhood you and I got. Let's be logical, wise, and healthy adults and put an end to these horrific ideas. Please, please, please listen to reason and the vast majority of the public. Let make Washington a place people want to come to not escape.

I am very opposed to mandating the experimental gene therapy shot on our children!!! It has not been properly tested for adverse events and has shown numerous prospective adverse effects on those who have taken it. I know more people who have died and had serious negative consequences from it than for the condition it is supposed to offer protection from.

I am horrified that this is even under consideration and will advise others to not support officials who back this overreach into a personal health decision.

Sincerely

Margaret M Mason RN/BSN

Children are NOT at high risk for covid. This vaccine is still only for Emergency Use Only, and should NOT be mandatory. There are no long term studies to verify the safety of this vaccine for children. Do you want to be responsible for future issues? The vaccine does not stop the spread of Covid, and studies now document that vaccinated and unvaccinated can transmit and spread Covid. This proposal is unnecessary. Please stop it.

Please help us fight over-reach by our WA board of health. This takes less than 5 minutes. Will you stand up for freedom? Comments must be submitted by noon. Feel free to create your own message or just copy and paste this: I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

As a parent of three girls (6,9,11), I feel that we as parents should have The Choice to decide weather or not our children should receive this vaccine. My girls have all there other vaccines, and they get there flu shot every year. All of these have been around for along time, and I feel comfortable doing so. I would like to see longer studies "Yeah I'm talking years", and maybe at that point they may be adults. But there is not enough time of the studies, that makes me confortable putting this in their bodies. Plus the vaccine doesn't show to actually prevent, people still are getting covid. Thank you for your time, I hope and pray the government leaves this as A individual Choice, and does not take away more choices of the people.

Children are not at high risk for Covid-19 in addition that these "vaccines" are not yet FDA approved and are only authorized for Emergency use. Not enough time, study, or data has been tested on the long term effects of these injections to the know the long term outcomes. The risk doesn't outweigh the supposed benefit since these have not been thoroughly and properly tested. Since the current injections are not thoroughly even protecting a person from contracting and or spreading the virus this idea of mandatory "vaccination" would be unconstitutional to force someone to inject their child without absolute fully knowing all of the long term effects.

On Agenda #11- WAC 245-105, I am vehemently opposed to requiring vaccines for children. Any type of vaccine requirement I am opposed to, but requiring vaccination for school or childcare entry is a violation of many people's freedom of exercise under the first Amendment. The BOH has a responsibility to those whose faith is at odds with vaccines to ensure their Constitutional rights are protected and not infringed upon.

I am absolutely opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Time and data has shown us that the spread of covid-19 is the same regardless of vaccination status.
- There is no long-term evidence of the safety of the vaccine and therefore is too great a risk to take with our children's health. Especially given that the average child is least likely to have serious complications after contracting covid-19. However, complications like myocarditis are far more concerning and a greater threat to our children than covid-19.
- We are rushing a giant experiment in a hail Mary and as a parent, you don't get access to my child in this way.
- Schools will lose significant funding as a result of the number of families that will pull their children from schools in the state of WA (our family included).
- We continue to see the virus mutate and change and as it does it appears the severity is less but is more contagious. As such we have more people contracting covid-19 (both vaccinated and not). We should not be rushing and pushing an experiment on our children that has a constantly moving target and regularly changing information.

Please do not approve this.

Respectfully,  
Renée

expect more people to die during this winter from the negative effects of the vaccine in the coming months. This has resulted in a 30 percent death rate in just the last six months.

In Seattle, where Mayor Jenny Durkan has employed the Fire Department to forcefully vaccinate all nursing home residents, there is also a thirty+ percent death rate among all nursing home residents, with many thousands of people death, disabled, or dying from the Covid vaccines.

None of the Covid vaccines were tested on humans before they were released for "Emergency Use Authorization", but the Pfizer vaccine was tested on animals, and when they were, all of the animals died as a result.

Scientific studies have documented how dangerous these so called "vaccines" are. For example, a shocking new study reveals covid vaccine terminates 4 out of 5 pregnancies – see: <https://www.brighteon.com/89677c54-51e3-4139-9af1-093fe160a3a1>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.brighteon.com%2F89677c54-51e3-4139-9af1-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.brighteon.com%2F89677c54-51e3-4139-9af1-093fe160a3a1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd99cf3e2f3c0440455b708d9d2175afb%7C11d093fe160a3a1)

According to this article, "a shocking new study published in the New England Journal of Medicine reveals that when pregnant women are given covid vaccinations during their first or second trimesters, they suffer an 82 percent spontaneous abortion rate, killing 4 out of 5 unborn babies. Out of the 127 women receiving vaccines during their first or second trimesters, 104 spontaneous abortions occurred before their pregnancies hit the 20-week mark. All this means that live births may plummet by 3.2 million over the next year, in the USA alone, if every pregnant woman is vaccinated during the first 20 weeks of pregnancy. The number of unborn babies being murdered in the womb, in this case, is reaching "holocaust" levels, which is why this is being called a medical "atrocities."

In Turkey, babies born of parents who have taken the so called "vaccine" are having babies born without normal eye pupils – the babies have black eyes because they do not have any soul, and hence, they have no compassion, no love, and no emotions. See:

<https://thebiblefiles.com/2021/10/01/hybrid-transhuman-black-eyed-babies-pandemic-babies/>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fthebiblefiles.com%2F2021%2F10%2F01%2Fhybrid-transhuman-black-eyed-babies-pandemic-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fthebiblefiles.com%2F2021%2F10%2F01%2Fhybrid-transhuman-black-eyed-babies-pandemic-babies%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd99cf3e2f3c0440455b708d9d2175afb%7C11d093fe160a3a1)

All the Covid vaccines separate the soul from your physical body. The vaccines also shut down all of people's eight Chakra's and destroys the pineal gland, so they cease to be human. People who take the vaccines become biological robots, unable to have any compassion. Pfizer is now targeting children with their Covid vaccines so they can not only kill these poor children, but also turn them into biological robots without any compassion, or connection to spirituality or God. Rudolf Steiner wrote, ". . . a way will

finally be found to vaccinate bodies so that these bodies will not allow the inclination toward spiritual ideas to develop and all their lives people will believe only in the physical world they perceive with the senses. ... [P]eople are now vaccinated against consumption, and in the same way they will be vaccinated against any inclination toward spirituality”.

In 2021, according to Nobel Peace Prize Laureate Luc Montagnier stated that all vaccinated people would die within 2 years. Nobel laureate Luc Montagnier has confirmed that there is no chance of survival for people who have received any form of the vaccine. In the shocking interview, the world’s leading virologist stated bluntly: “There is no hope and no possible treatment for those who have already been vaccinated. We must be prepared to cremate the bodies.” The scientific genius backed up the claims of other eminent virologists after studying the ingredients of the vaccine. “They will all die from antibody-dependent enhancement. That is all that can be said.” <https://coellc.com/2021/05/22/covid-vaccinated-people-within-2-years/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcoellc.com%2F2021%2F05%2F22%2F%2Fcovid-vaccinated-people-within-2-years%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd99cf3e2f3c0440455b708d9d2175afb%7C11d>

In fact, Covid vaccines have now killed more people than the atomic bombing of Hiroshima. See:

<https://newslettercollector.com/newsletter/covid-vaccines-have-now-killed-more-people-than-the-atomic-bombing-of-hiroshima/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnewslettercollector.com%2Fnewsletter-covid-vaccines-have-now-killed-more-people-than-the-atomic-bombing-of-hiroshima%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd99cf3e2f3c0440455b708d9d2175afb%7C11d>  
(Natural News August 9th, 2021)

According to the article, “When the US government dropped an atomic bomb on a mostly civilian population of women and children in World War II, it proved that the United States government is willing to commit mass killings of targeted ethnic groups to achieve its strategic goals.

The internment of Japanese Americans in U.S.-based concentration camps is yet another crime against people of Japanese descent, and it proves again that the United States government is ready and willing to throw its own citizens into concentration camps in order to achieve its own strategic aims.

Remember this: If the US government was willing to throw people into war-time concentration camps based on the color of their skin, it is also willing to throw people into covid camps based on the status of their vaccine passports. Today's feature article and podcast delve into the how covid vaccines have already killed more people than the bombing of Hiroshima, and the world's vaccine zealots are just getting warmed up”. See:

(Natural News August 9th, 2021)

This is a state where we still have Second Amendment rights, and if you authorize law enforcement to come to the doors of the people who live here to forceably vaccine people (or move them into detention camps), you may be met with force. I want you to know the people of Washington will fight you because most know that these Covid shots are

nothing more than an agenda to kill off most people with a depopulation program. It is NOT about health – it is about DEATH and MURDER! And this is what you are really doing if you force people in this state to get the poisonous vaccine. We will fight you. And the people will win.

I have a radio show with over 25 million listeners in over 100+ countries, and I will be sure to discuss your proposal on my next show tomorrow. The name of my show is called “Out of this World Radio” – see: [www.outofthisworldradio.net](http://www.outofthisworldradio.net)

(15) What happens energetically after the Covid vaccination? A message from France - the experiences of a French energetic healer: Natalie Schaevers, [03/23/2021 at 8:39 pm] "The scariest thing was when I was working on the heart chakra, I connected with her soul: it was detached from the physical body, it had no contact and it was, as if it was floating in a state of total confusion: a damage to the consciousness that loses contact with the physical body, i.e. with our biological machine, there is no longer any communication between them ... There was another change, and again a deterioration, both in severity and in the energy that its energy field transmits, but most importantly, there was a very marked decrease in frequency". See:

[https://www.reddit.com/r/conspiracy/comments/mvpjd7/what\\_happens\\_energetically\\_after\\_the\\_covid/](https://www.reddit.com/r/conspiracy/comments/mvpjd7/what_happens_energetically_after_the_covid/)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.reddit.com%2Fr%2Fconspiracy>

(16) The mRNA vaccines from Pfizer and Moderna completely change your DNA forever to become subservient and to obey government and authority. The vaccines also completely destroy of of your eight Chakras and your pineal gland, destroying your God gene and making it impossible to connect with God and become spiritual. The current plans by Pfizer, Moderna, AstraZenica, and Johnson and Johnson to vaccinate children is an attempt to stop children from becoming spiritual and believing in God or the Supreme Being. The mortality or death rates from these vaccines will ultimately be greater than 50 percent within the next three or four years, with only 15 or 20 percent surviving. Of those who survive, they will be controlled by nanobot technology where they will lose their free will & become robots without any emotion or compassion. This is the future for those who take the vaccine – death (up to 80 percent), and for those who survive, a future where people lose their humanity.

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- This a personal choice
- there risk of the vaccines outweigh risks of a Covid for kids. Vaccines should remain an option just like flu shots but not be forced
- this is unnecessary
- there are numerous other ways to combat Covid such as health food choices and exercise. Let's mandate those !

Are you Pro or Con on the proposal?

2.                      Con

---

The vaccine does not prevent infection or the ability for someone to spread it. In the unfortunate event they are injured, it is liability free product. Parents are not being told that the vaccines include human aborted fetal cells. Strong religious convictions can not be discriminated against. This very controversial vaccine should not be forced on the public for government profit. Parents are more then capable in making informed choices without the input from the board of health. We are living with world views that do not match this authoritarian takeover. You will single handily collapse the school system if you force this vaccine.

The Covid risk for kids is extremely low. Families should be making the decision about whether to vaccinate their kids based on their individual risk profile. The WA State Board of Health needs to leave this important health decision with families.

Dear board members, et al, these proposals are worth opposing.

They are not based on the best (world wide available data and science), current information that we have about COVID risks for people--and especially for children. They perpetuate a hysteria over COVID risks that do not do individuals or the state at large enough good.

I oppose mandating the jab for anyone. The latest science from around the world is in and for those that have eyes to see. Please open your eyes. Consider also the Supreme Court findings and arguments.

One size fits all mandates does not work. Masks are in effective. Tests are not reliable. The sickness is not substantial. It's a cold. The jab is killing more kids than it saves. Look at the data!

It's very obvious scientifically that the first mandatory covid-19 vaccines do not work as many people are still able to get the covid and spread the covid , then we get the second dose that still doesn't protect us , we can still get the covid and still spread the covid . Then we are encouraged to get the booster which doesn't protect us either , and we can still spread the covid . Personally in my family my mother has had 3 vaccines ( moderne (2 shots , plus a booster) this Christmas she has been infected with the covid .

Until we see mass death and a real pandemic 99% of the people can agree IS a pandemic - there is nothing to see here. Please concentrate on solving some problems both sides of the isle agree are issues.

I have had the vaccinations growing up , they have been in use for over 60 years . But please listen to Fauci and the CDC . There is a .019 % chance you will die only if you are in senior citizen age range . That's less than 1/10 ( 1 Tenth ) of individuals that have preexisting conditions that are estimated 60 and older . The children are not at risk .

Even if we say the children will spread it to the adults , you add the fact the vaccines do not work , don't continue pushing the vaccines . Tell the truth , the truth is the vaccines are really only shots (medicines that hide the symptoms ) . And when you hide the symptoms it can spread even faster . Tell the truth , people will listen more and make good decisions .

And yes , These vaccines which don't stop the spread of covid , which just came into existence in the last two years . We have no idea of the long term effects .

I believe in vaccines , shots , Medicine should be by free will ( many many will get it) but it should be wanted , not forced .

And personally I see this causing an uprising that can have many negative domino effects in the state of Washington . Please listen to the people .

Thanks,

- Todd Zersen  
skagit county.

I am against requiring student to have an emergency use authorization "vaccine" in order to go to school. Obviously, many students will not participate in this tyranny and the public school system will lose thousands of students. Additionally, the mortality rate for children for covid-19 is greater for many other pathogens, like the flu, than it is for covid. My children chose to not get vaccinated and we will stand by that. I know hundreds of families that think the same.

1. Yes

---

EUA "vaccines" should NOT be added to WAC 246-105

11.

Are you Pro or Con on the proposal?

2.                      Con

---

1) EUA medical countermeasures have no relevance in being a requirement for K-12 education. The COVID-19 "vaccines" are still experimental and have not gone through the standard clinical trial period. The side effects are still unknown and changing. The seasonal flu shot is not mandatory and COVID is part of the same contagious disease family! 2) Kids are the least vulnerable and at risk to COVID-19. Per the CDC website (<https://covid.cdc.gov/covid-data-tracker/#demographics>), .001% of COVID-related deaths are kids 17 and younger. 3) The COVID vaccines have proven to not be highly effective. It does not mean you won't get COVID or spread it to others. For the past 2 years, NONE of the COVID mandates have proven to be effective. They've actually created more significant problems - economic down-turn of our country (= kids w/o basic needs), division (=manufactured hatred), and a mental health crisis (= sky-rocketing suicide rates). Organizations like the Board of Health should be putting energy, resources, and hearts into addressing the impacts these issues have on our youth... which impact significantly more kids and will have long term affects. This proposal is driven by a narrative that continues to change and has no backing by science and data. Additionally, this is a parent's decision... not the state.

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
> Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> ) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Anne Asher

External Email

Good afternoon,

The fact that nobody can reach you or your colleagues through phone or email is concerning. It appears that you and your colleagues do not want to hear from the public.

I want you to consider the consequences of your actions and decisions. Mainly, the meeting today where I understand you and your colleagues will consider imposing forced isolation for individuals and families. It is my understanding you and your colleagues will be deciding whether to demand all public school students are vaccinated.

I want you to consider the consequences of your actions. Do you know the public school attendance is on a steady decline? Citizens are losing trust in public schools. Sit down and critically think what problems this may cause to the safety and well being of children.

Furthermore, if you or your colleagues vote for any type of forced isolation, you will be voting against the Constitution. Have you read that lately? It seems that if you have, you would not consider any thing that is on your agenda.

Speaking of agendas, the public has lost faith in you as well for considering these unconstitutional demands. WE ARE NOT against science. WE ARE AGAINST AGENDA SCIENCE. We are not against vaccines. We are against FORCED VACCINES, especially when the data does not support them as a common good. Insurance companies are reporting a spike in deaths, not after Covid came but after vaccines came. The vaccine doesn't stop you from contracting "Covid" or spreading "Covid".

Consider the actions of YOUR INDIVIDUAL decisions and actions. The public is not happy with the tyranny being imposed in WASHINGTON state. We are fed up with all the dead small businesses, the suicide and the agenda science.

The public is fed up. It's up to you to do the right thing and think critically, not under an agenda. These two topics you consider imposing, consider how the public will react. The public trust is teetering, legal action will be brought forth against you and your board, you will sever any lasting threads of trust in the public schools and you will infuriate many parents and citizens. We see outrageous suicides, even of one entire family. This doesn't need to happen. Look at all science, not just agenda science. Follow the Constitution, not money.

Thank you,

Tatyana S.

Subject: Public Comment: 1/12/22 mtg - Potential inclusion of Covid-19 vaccine in WAC 246-105

External Email

Hello,

I'm reaching out to you with a public comment related to the potential inclusion of the Covid-19 vaccine in WAC 246-105, which is being considered at your January 12, 2022 meeting.

I believe vaccines have a place in our community, especially in our adult and senior population; however, a Covid-19 vaccine mandate does not pass the nine required Criteria for Reviewing Antigens for Potential Inclusion in WAC 246-105-030 and I am against including it in WAC 246-105 at this time.

Specifically, the Covid-19 vaccine fails to meet the criteria set in:

## II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

## III. Implementation of the Criteria

7. The vaccine containing this antigen is acceptable to the medical community and the public.

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

To point five, the vaccine is widely available to every vulnerable subset of the population.

In general, children are not a vulnerable population. According to the CDC

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisi>

COVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-

juj3%2Fdata&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4843a575942c4455974908d9d20b621d%7C1

, as of 1/6/22, there were 823 provisional Covid-19 deaths in the 0-18 population for the period of 1/4/20-1/4/22, for the entire country. Many of these are deaths "with" Covid rather than "from" Covid. Even so, on an annual basis, this is less than the annual number of estimated deaths in a typical year from the flu

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2>

2020.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4843a575942c4455974908d9d20b621d%7C1

. The flu vaccine is not mandated. I assume that this is because, similarly to the Covid-19 vaccine, the flu vaccine is not a guarantee against infection as the polio vaccine is, and we do not know, year-to-year, whether the respective vaccine will be the correct one for the flu variant.

Along these lines, and to point six, it is widely proven that vaccinated individuals still catch and transmit Covid-19. We know this because this was the science used to justify mask mandates; masks are currently still mandated indoors everywhere in the state of Washington, including in schools and regardless of vaccination status, because of this reason.

To point seven, it is hard to tell if the vaccine is currently acceptable to the medical community, as it pertains to children. Unlike the adult vaccines, none of the Covid-19 vaccines are fully approved for children ages 5-15, they have only received Emergency Use Authorization (EUA). Also, the FDA has chosen to not consult with their expert advisory board on their most recent EUAs related to Covid-19 vaccinations and boosters for children, seemingly because their expert advisory board does not concur with their current decisions.

Additionally, it is hard to tell if the vaccine is currently acceptable to the general public.

According to usafacts.org

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fusafacts.org%2Fvisualizations%2>

vaccine-tracker-

states%2Fstate%2Fwashington&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4843a575942c445597490

, despite being widely available, only 68.14% of Washington state's population has been fully vaccinated. This statistic belies the fact that our top three demographic groups in the state are vaccinated at rates of 53% or less (White: 53%, Hispanic: 46%, Black: 53%). Vaccination rates are considerably lower for those 19 years of age and under; only 1.55% of this population has been fully vaccinated.

These vaccination rates do not show a strong level of public acceptance. They also show

that parents are choosing to not vaccinate their children, likely because they know that they are, fortunately, not generally susceptible to Covid-19.

To point eight, hospital administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

Lastly, to point nine, coercing parents to vaccinate their children with a vaccine that is currently only authorized with an Emergency Use Authorization, for an illness that they are largely not susceptible to, does not fall within a reasonable burden of compliance. It is not logical to coerce parents to vaccinate their children for something that poses such a low risk to them. At this point, our children are already doing what they can to protect their elders. They did remote schooling for a year until their elders could be vaccinated. They are not generally susceptible to Covid-19 and when they do catch it they shed much less of the virus than adults do. They spend their full school day masked. And, over 90% of our Washington state senior citizens, those 65 years and over, are now fully vaccinated. Many of them are also boosted, and they too continue to mask up. Therefore, arguing that vaccinating our children to protect our elders is an argument without substance.

Parents who want to vaccinate their children should absolutely be able to do so. And, if and when our medical community develops a vaccine that prevents infection from Covid-19 rather than just the more dire effects of the illness, this matter should be reconsidered. Unfortunately, that day is not today. Therefore, I ask that you vote not to include the Covid-19 vaccine in WAC 246-105.

Thank you for your time,

I'm against mandating vaccines for children to attend school.  
I am not an anti-vaxxer , I am fully vaccinated.  
I feel this will be very divisive and end up in court, costing tax payers a great deal of money.  
Thank you Ralph J. Schieno

I would like to speak up against forcefully detaining people to force a vaccine on them as well as forcing children to be vaccinated in the state of Washington. This is unconstitutional and should never happen in a free democratic society!  
And no before you even think it I am not a "anti-VAX-er " I myself am vaccinated, but I believe in the Constitution and the freedoms it offers all of us!  
How can the same people who fight for a woman's right for abortion now say you must be vaccinated or else! That is nothing but hypocritical to say the least!

God bless America and the free USA!

I want to know why the state of Washington is forcing vaccines on children and the position it has when DARPA files show real treatments are being suppressed. I also want to know why government officials are not standing up for the science and why Dr. Robert Malone and Dr. Peter McCullough are being silenced but we listen to Inslee and his think tank including the gates foundation. These crimes against humanity will not be forgotten.

External Email

Washington State Board of Health—

First, if you watched the Supreme Court hearing, their information is 100% incorrect. There are not 100,000 kids on ventilators. Masks do not stop you from spreading the virus. Vaccines do not stop you from getting covid or from spreading the illness too.

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

I would refer you to the FDA website and the FDA Youtube channel, which says entirely different information than the CDC, who own vaccine patents.

First, please read Slide 17 of the October 22, 2020 powerpoint presentation, which the drug rep said was "Not important." These were known serious adverse effects that are not included in the studies, because trial participants were given an app with pre-selected choices of adverse effects to choose from. Like headache, fever or rash. They could NOT report any Level 3 or 4 effects, such as myocarditis, Guilliane Barre, or worse, because there was no "Other" in the app. Thus, the drug companies were miraculously allowed to say no serious events happened. You can also find this slide at the 2:33:40 mark fo the same date video on the FDA Youtube channel.

Have on record the following known adverse effects from the trial the rep tried to cover up:

- ☐ Guillain-Barré syndrome
- ☐ Acute disseminated encephalomyelitis
- ☐ Transverse myelitis
- ☐ Encephalitis/myelitis/encephalomyelitis/meningoencephalitis/meningitis/encepholapathy
- ☐ Convulsions/seizures
- ☐ Stroke
- ☐ Narcolepsy and cataplexy
- ☐ Anaphylaxis
- ☐ Acute myocardial infarction
- ☐ Myocarditis/pericarditis
- ☐ Autoimmune disease
- ☐ Deaths
- ☐ Pregnancy and birth outcomes
- ☐ Other acute demyelinating diseases
- ☐ Non-anaphylactic allergic reactions
- ☐ Thrombocytopenia
- ☐ Disseminated intravascular coagulation
- ☐ Venous thromboembolism
- ☐ Arthritis and arthralgia/joint pain
- ☐ Kawasaki disease
- ☐ Multisystem Inflammatory Syndrome in Children
- ☐ Vaccine enhanced disease

Mandatory covid vaccines for school children should not be passed. Nor for adults in Washington.

Are you aware that children in the 5-11yo study, per FDA EUA documents, were only followed for 2.4 weeks? 2.4 weeks! That is not even short term, let alone long-term. And about 1,150 kids were in that study.

Are you aware that Pfizer asked for, and was granted, a formulation change, to use TRIS, tromethamine, in the 5-11yo formulation with NO data on the new combination?

This ingredient is what is in the Moderna shots.

Are you aware that several countries have paused the Moderna shots for under the age of 30, due to very, very clear data signals of exponential increases of adverse cardiac events in young males? France, Iceland, Norway, Sweden, Finland. Each shot increases the risk of attacking young males' hearts. Please see page 282 of transcript of the 9/17/21 FDA meeting for boosters. They stated a 1 in 5,000 risk of myocarditis for young males, which then INCREASES with each shot.

There is no such thing as mild myocarditis. Anyone on this board who thinks there is should resign immediately.

And lest we ignore the elephant in the room of all the reported menstrual issues among those who identify as women. Is the board misogynistic?

A new article in Yahoo said it only changed people's cycles a day, but that's spin too. I know two young ladies who both clotted for over five months. I bet one of you knows some people with menstrual issues too.

Are you aware that the 9/17/21 Vaccine Advisory meeting for boosters voted 16-2 AGAINST approving boosters? Page 307 of the transcript. WHY? Because they were concerned with the adverse effects. Committee members repeatedly stated the trials must have been flawed, they were seeing very serious adverse effects. Things were not adding up.

They wanted boosters approved only for over 65 or folks who were immunocompromised like organ transplants, or chemo or were morbidly obese, the groups at risk of severe covid. Another reason why they voted against approving boosters, the safety for 65+ was based on one month of data for TWELVE people. And even more alarming, the effectiveness for the boosters for seniors is based on data for 18-55 year olds. They extrapolated safety data for the 5-11yo too, which was ridiculous since a totally new formulation. Yet your organization is telling seniors boosters work. A lawyer can go right to FDA docs and show the effectiveness was not even in a senior age group. Someone is going to be liable for lying.

Children are not at risk of severe covid. But the data is showing they are experiencing more adverse side effects from the vaccines. How many children should be disabled or killed to save an elderly or sickly person? We were willing to shut down the economy to Save Grandma. Are we willing to maim and disable those under 40 years old, and especially children, to Save Grandma?

I have mentioned the shots seem to be causing issues with under 40 to older folks and every one of them did not care. Do you? It's called the clot shot for a reason. Watch professional soccer, or lately, tennis, to see athletes who would never have been at risk of severe illness from covid, keel over and die or have to retire due to cardiac issues.

You may ignore the FDA, the safety arm, and continue to listen to press releases from the CDC, who hold vaccine patents. Are you aware that the Pfizer Fact Sheet for

Healthcare Professionals says "Insufficient data to inform the risk" for pregnancy? Yet your organization says it is safe. How interesting that you know more than the FDA or Pfizer. It also states "unknown risk" for lactation/nursing.

When parents and loved ones of any who have suffered adverse effects, even death, from the shots, find out none of you even read any of the trial information or data, hopefully you have some good reason why you ignored actual science, clear data. Even though the drug manufacturers manipulated the trial reporting to eliminate reporting of Level 3 and Level 4 events. Someone is going to be held liable. Will it be you committee members?

All of these alarming adverse effects are happening when half of the group has been getting a placebo. Look at the WHO Vigibase of reported effects. Or the UK Yellow Card system. Or the US VAERS.

The board must firmly vote against mandating vaccines for children, or citizens in Washington. And how strange we can not even get the Cominarty approved shot in the US. People are still only able to get the EUA formulation.

You must also NOT vote to allow an expansion of power by the Health Department with any quarantine or mandatory testing or mandatory vaccinations for citizens.

And the biggest travesty of this all is there are known early treatments that work. Just like Dr. Fauci did during the AIDS crisis, when he knowingly withheld medications that would help, he is doing it again with ivermectin and hydrochloroquine. Is your board not only misogynistic but also homophobic? The movie Dallas Buyers Club was made to show how loved ones of the gay community had to go out of the country to buy needed medications, that worked.

Hundreds of thousands of people have died, needlessly. Pushing mandates will just increase those numbers. It should be a choice and used by those most at risk, the elderly and the morbidly obese.

Thank you--

Subject: Upcoming Proposal

External Email

These are my comments on your upcoming proposal. I am currently shopping for a new home in a Red State. I sold my business in December and my kids have already left. My employees have requested remote work locations in Nevada, Tennessee and Florida which I have granted.

Next is my grandson who will be moved out of state before you can get your scuzzy criminal hands on him. In the meantime if you try to pass this and even touch anyone in my family, you better be ready for a fight as it won't go well for you. You disgusting animals. I personally know more people that are dead from jabs and suicide. You have destroyed so many lives and businesses with this bullshit. We are not going to take your shit any longer.

You work for us!!! Don't forget it. I couldn't be happier to have sold my business and to be moving my employees out of this shit hole state. You won't see a dime from me in coming years. Soon it will just be the homeless zombies wandering the streets of the hollowed out cores that were once Washington towns. You all disgust me.

-----  
RED ALERT! On Jan. 12th starting at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents. Zoom meeting details below. Please attend and show them you are listening.

THESE ARE THE PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Send email to: Send email to: [wsboh@sboh.wa.gov](mailto:wsboh@sboh.wa.gov) <<mailto:wsboh@sboh.wa.gov>> and let them know you object.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Subject: Public Comment Re: Opposing Item 9 and 11 on upcoming agenda

External Email

I am requesting the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. In addition I would like to comment on item 9 and 11.

My husband is in remission from Bladder cancer and currently has a medical exemption from his physician. His doctor fears the vac would trigger cancer cells. My 85-year-old neighbor has Bells Palsy and has been instructed by her doctor never to get the vaccine as it could cause her symptoms to become more severe. Both item 11 and 9 on the upcoming meeting agenda are very troubling and unconstitutional! People have the right to make their own medical decisions. Please do not extend this WAC. The current Governor's unconstitutional excesses have already created an exodus of accomplished medical personal and teachers who believe in health choice to leave our state. Regarding item 11, why would we subject children to vaccinations when they have virtually no risk of getting covid? Yet we do know there are proven risks and death with the vaccine. Earlier this year a young man in his early 20's in Touchet WA died from a heart attack a day after receiving the vaccination. This Government data I attached reveals over 946K injuries or death from the COVID-19 vacs. Please take time to read this study before making a decision. Thank you

1. Yes

---

Agenda Item 11 addressing immunization criteria, specifically making the EUA vaccines for Covid a requirement for children entering school or child care.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

The fact that this is an experimental medicine that will not have full results for years to come, should make us halt injecting kids immediately. In any case, it is illegal by international law (Nuremberg Code) to force individuals to receive experimental medical procedures. It's horrifying that we are actually having to call back to a code that came about as a result of the Holocaust. Children are not at high risk for Covid. That is a fact verified by the real evidence. The shots have serious side effects for some, including much higher risk of myocarditis in young boys/men. Not to mention the unknown effects on autoimmunity, fertility, and myriad other possibilities. The only beneficiary in this measure would be the pharmaceutical companies, gaining more buyers and earning liability protection by getting their newest vaccine on the childhood immunization schedule. We must not approve this measure.

There's a lack of transparency. The refusal to except natural immunity and other therapeutics that have been known to treat COV-1 9'r disease has lead to a decline in the willingness for people to take the vaxx. We are seeing boys coming up with high rates of myocarditis. Women that are 50 and below are experiencing high rates of TTS and CVST. The massive campaign to drive everyone to a vaccine solution gives rise to caution. Additionally, Any mandates or laws approved during an emergency status does not void the Constitution. Any laws made that violate the Constitution are not lawful. Therefore, these proposals will be unlawful and can not be upheld in the court of law. Therefore can not be enforced by any federal, state or local agents or law enforcement agencies. Therefore, I will stand against any proposals set forth by this government as per the CONSTITUTION. Also, The proposed vaccines that are currently under the emergency use authorization are not tested and approved for safety as we are seeing the horrendous cases of adverse events and adverse events of special interest. We should wait until Pfizer releases all of the 460,000 documents that the courts have ordered to be released within the next eight months. I have read the accumulative report from Pfizer. The data is suggesting high rates of adverse events such as myocarditis, TTS , CVST and other debilitating conditions caused by the vaccine. TTS is a new diseased caused directly from the vaccine. The efficacy is grossly exaggerated as per the documents put out by Dr. Robert Malone

To whom it may concern:

Thank you for having this forum. I am writing in support of Petition #11 which requests that BOH establish a new rule that prohibits requiring that anyone take an EUA product or licensed product that has not yet completed Phase 3 clinical trials. I oppose BOH formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandating the shots for schools. I oppose any Covid-19 shot mandates because each person needs to weigh their medical condition with their medical provider and make an informed, personal decision. This is especially true since the infection fatality rate for Covid-19 is low. For ages 0-17 it is at 0.00002 (99.998% survival rate) which is statistically a zero percent death rate. Beyond that, when you consider that most hospitalizations for the young are with Covid-19 and not for Covid 19, we can know that they are not in mortal danger from Covid-19. Neither is there a great risk of the young spreading Covid-19 to staff and teachers. The young have a greater risk of Covid-19 vaccine adverse reactions than of a serious Covid-19 illness. We must protect our young before we consider self-protection.

Sincerely,

Larry Pitcher

The vaccine doesn't protect us. Super spreaders are those who are vaccinated. Our children shouldn't be puppets to this vaccine. Look at the side effects it gives adults. Flu vaccines aren't required for school only recommended. Please follow through with recommending instead of requiring. Don't take our medical freedom away especially from our children

Subject: No covid inoculation mandates

External Email

Good morning,

I am writing to you letting you know that I DO NOT support a mandate of the covid-19 inoculation on our school age children in Washington state. The benefits do not outweigh the risks and science has now proven it. The rates of infection and transmission are low, the infection is mild or non-existent in affected children and they are proving to provide herd immunity by not getting the jab and building up a more robust immune system naturally. But beyond that, cases are dangerously on the rise of serious adverse events in children. It is absolutely unnecessary to mandate these inoculations in anyone, especially children. I would also like to point out that many many more people, including me, will pull their children out of public schools if this happens. If mandating this is a way to get more money from the federal government, it needs to stop and you need to take a stand for the people you represent, especially our future generations. Further more, I oppose item #8 on your agenda to form a covid-19 Technical Advisory Group and I support agenda item #11, the petition for rule making.

Please, do not mandate this covid inoculation. Keep your conscience clean. Protect the children. Support natural immunity. And let the parents make their healthcare decisions. Thank you so much for your time.

Sincerely,  
Rochelle Hadley

Dear Washington State Board of Health member, I am writing to encourage board members to leave medical decisions for children in the hands of their own parents. These choices regarding the health of children are in the sphere of the family government. An overreach by the state would be unethical. I urge you to vote against a mandatory vaccine for children in Washington. Please keep in mind that children are at extremely low risk for Covid and that the vaccines are still only EUA (emergency use authorized).

Dear WSOH,

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org))

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) violates our civil rights and the Geneva Convention. Refer to the following: 18 U.S. Code § 2441 - War crimes

Please remember your oath. Stop this madness NOW.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We now know that the COVID19 vaccines do not stop the transmission of the disease nor do they ensure immunity to the recipient. Therefore, COVID19 is NOT a "vaccine-preventable disease" according to WAC 246-105-030 and no "vaccine" currently being offered should be considered to be "required" or "mandated" by WA State's own guidelines.

Additionally, it must be acknowledged that these "vaccines" ARE causing injuries. The risk/benefit ratio is deeply skewed toward higher risk vs benefit for young people. We have seen over and over again that young people ( under age 30) have statistically zero risk to death or adverse long term problems from COVID recovery. This is not the same statistically for the vaccine with these age groups. Not to mention, the added benefit of herd immunity in disease-recovered individuals.

It must be noted that SARS-COV2 is a HIGHLY MUTABLE disease. You cannot "vaccinate" out of this pandemic. We are risking lives by continuing this patently misguided direction of mass vaccination during an active pandemic.

Respectfully submitted,

Ruthie Johnson

Subject: vaccine mandates

External Email

There are many reasons why I feel there should be no vaccine mandates for anyone, but especially vaccine mandates of the Covid shot for children.

1. Children have a less than 1% chance of dying from Covid over a much bigger chance of dying from the shot. <https://covid19.onedaymd.com> > 2021 > 11 > dr-peter-mccullough-early-treatment.html  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcovid19.onedaymd.com%2F2021%2F11%2Fdr-peter-mccullough-early-treatment.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7ee812f2a9b046462b2208d9d20934a3%3A%2F%2Fgcc02.safelinks.protection.outlook.com%3Furl%3Dhttps%3A%2F%2Fcovid19.onedaymd.com%2F2021%2F11%2Fdr-peter-mccullough-early-treatment.html>>

2. My family all had covid. Some of us worse than others. One died because of hospital protocols and doctors refusal to give early treatment. All others lived because we started treatment early.

3. Of those we know who have taken the shot, many who once were healthy people have developed health conditions , some very serious: heart problems, long term bleeding of nose and menstruations, tremors, horrible rash, excessive hair fall out.

I know that a government must consider the group over the individual. At this point these individuals have become a group. Please consider the individual.

Thank you for listening

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed,

Parents have the right to decide what medical treatment their children should have. Taxpayer-funded schools do not have the right to deny service to families over medical decisions. Covid is not a serious threat to children yet the Covid vaccines to pose serious threat to them. The government has no right to force children to receive a specific medical treatment. If this change goes through, I can guarantee there will be a mass exodus in public schools- and some will even move out of state- resulting in a loss of funds for these school districts that are already suffering budget shortages. There is plenty of information available to show that these vaccines are not essential for the health of or children nor do they prevent infection or spread. Such a mandate is illogical and potentially harmful for children as well as school districts by loss of funding. The choice belongs to the parents.

To whom it may concern,

As you sit and debate what to do , remember this, the REAL science is being ignored by a lot of powerful people. Most of these people are acting in pure Political motives, NOT on True Science.

Children are not the spreader's they are made out to be. Their immune systems are developing and don't need to be used as Guinea Pigs like a notorious Doctor of the past which resulted in the Nuremburg Code!! A Code you all should take the time to read and understand!

Here is a quote from some one else,

"if you still need the booster after being fully vaxxed... and still need to get tested after being fully vaxxed...and still get hospitalized after being fully vaxxed, its probably time that you admit that you've been conned"

Hopefully you've been put on this Board because you can think for yourself and think clearly, and not by political pressure put to bear. Please do what is RIGHT, not what gets you further ahead in life or camera time!!

Sincerely

Roger Townsend

My name is Joshua Tinsley and I am a concerned father of 3 daughters, and a Professional Firefighter. I am against any proposal that suggests required immunizations for COVID-19, but am very strongly against required immunizations for COVID-19 for children. This is immoral and wrong, as this virus is not any more harmful to children than the flu and that this vaccine is still in emergency use, and not fully approved. If you believe this is enough time to warrant a required immunization rule, I would be urge you to think about your reasoning and really ask yourself if this is moral and ethical. Our children are not animals. Our children are not lab rats. Adults should be protecting them (physically, mentally, socially), not the other way around. We have already damaged this generation enough and we have yet to see the repercussions of the actions of our government the past 2 years. The after effects of this EUA immunization are still yet to be seen, in both adults and children and clinical trials are not even close to finished. Please ask yourself if your decision around this is to protect ALL children, for the rest of their lives. Or if it's a short-term, fear-based, knee-jerk reaction to a pandemic that is largely affecting adults vs children. If you choose to take action to approve required immunization for COVID-19 for entry to schools, you will have a mass exodus of students from public schools. As a parent, I will remove my children from public school if this becomes a requirement. I urge you to please vote against this proposed requirement. Regarding any discussion on WAC 246-100, or any changes to isolation and quarantine procedures for COVID-19: I am against any increased forceable measures that would require law enforcement or health officers to involuntarily detain / isolate / quarantine a human being because of COVID-19. There should be no forceable actions at all. Thanks your time, Joshua Tinsley

Subject: Commit to no COVID vaccine mandates on children

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: Jan. 12, 2021 Meeting: "Immunization Criteria for Child Care and School Entry"

External Email

Please do not make vaccinations for COVID-19 mandatory for school admission or child care in our state. As a citizen who will soon have children and is compassionate to other parents in my personal and professional life, I urge you to please NOT require any sort of immunization at this point in time against COVID-19 for children under 18 in our state. (I have personally made the decision to receive the COVID vaccine, though I don't believe I should be required to tell anybody that for access to private or public services or to be taken seriously in public forums.) Based on the data available and my family's situation, I believe it would be in my own child's best interest to not receive a COVID vaccination at this point in time. Others can take the precautions necessary to protect themselves and have the resources available to do so. Others can make the decision to have their child vaccinated. I urge you to not require this for school admission or childcare. I base my position on the intersection of my understanding of our individual liberties in this state and our country, the EUA status of the COVID vaccines, the asymmetric access to vaccinations and data on vaccination outcomes in our state/country, on the data surrounding the risk of COVID-19 to children and other citizens, and on iatrogenic risks surrounding vaccine administration.

Thank you,  
Scott Littlefield

To add the COVID-19 vaccine to the list of vaccines required for children to join a public school

11.

Are you Pro or Con on the proposal?

2. Con

---

The Covid-19 vaccine presents a list of side effects that are dangerous to any age group. Children are not at risk for getting seriously sick from Covid-19. The Covid-19 vaccine is also non-sterilizing, as opposed to the other vaccines listed in the requirements for students. Adding the Covid-19 vaccine to that list would have more merit if it were actually sterilizing.

My response to petition against WAC 246-100-070, 246-100-045, 246-100-105. I first want to state I have a bachelors of Science degree and am licensed practitioner here in the state of WA. I want to remain anonymous because of the content of the material shared. I have taken many biology classes and microbiology classes. Many doctors livelihoods have been threatened for speaking truth. I am no different than they. If you FORCE an untested, unregulated covid-19 injection on my kids, myself or any person I know including my patients with a change of the law, I would encourage everyone I know to leave this state ASAP. I would inform patients, friends, coworkers and loved ones to put their house up for sale and create a mass exodus of this unconstitutional state. First of all, forcing a vaccine that does not prevent covid-19 is absolutely stupid. Most patients that have come in to my office fully vaccinated have contracted covid 19. Therefore, I do not understand how you can ethically mandate a vaccine that doesn't stop anyone from contracting the virus. And now many who have already contracted C-19 have what I call "natural immunity". You know, the "real science". My question to all of you on the DOH boards is how much stock in Moderna, Pfizer, J&J do you all have? How much money are these Big pharmaceutical companies paying you and our state for pushing these untested vaccines on every airwave possible? How much money was allocated to WA state to do so? What a waste of tax payer \$. For those who have eyes to see, this is ALL about money or more importantly how much money our state is getting for this wickedness. There is no money to be made in wellness. Read that again. I know a retired doctor who used Ivermectin as a preventative means at contracting covid effectively. I have read studies done in Texas that successfully used it for this reason. So, I ask you, why aren't we taking ivermectin to reduce the spread of c-19 especially in highly vulnerable adults/groups? Instead, we are denying retired PHYSICIANS to fill RXs of ivermectin. Wow. What would the general public say if they knew all these truths I have heard from my patients these last two years? I even asked my own doctor if the stuff I was hearing was true. She confirmed it. This should put every person questioning, what the hell is going on with our healthcare system!? It's no wonder doctors are saying Remdesivir is replaced in the hospitals with ivermectin to kill people. (Look up how this medicine is metabolized.)It's shocking to me nobody is questioning what is going on. Personally after 25 years, I no longer have trust in our local hospitals or medical community. The care is focused on sale production not treatment aimed at actually caring for people. It seems they have had a gag order out on these doctors. Why aren't they speaking out? Furthermore our pharmacists are denying the use of life saving drugs like HCQ and Ivermectin. You tell me what is the connection of these doctors, pharmacists, big Pharma to our state government health departments?? I sure would like to know and so does the American people. I also heard from one patient that she was coached by her doctor on how to get her prescription of ivermectin filled. She was told to lie and say she had worms. She was asked by the pharmacist just as her doctor told her they would. Yes she had to lie to receive her prescription of life saving drugs. I would have reminded the pharmacist that it is a violation of HIPPA to ask such questions and wasn't their business! Last I knew we the people still have rights. I am also hearing health departments in our state bullying our doctors, threatening to take away their licenses for Rx ivermectin! Anyone on the board want to comment on that? I'd sure like to know why your threatening doctors? We the educated know the real truth to this question. A person came in today wearing a green band on their wrist saying "vaccinated". This person told me their employer said if they wore it during working hours they could stay "unmasked." Are you kidding me? Isn't it obvious by now, masks don't work and vaccines also don't work, because ...you guessed it, it's a virus. Anybody take a microbiology class? There is no cure for viruses. Remember AIDS? Secondly, this company is violating this persons right to medical privacy. Companies should know this is a clear violation of HIPPA. I am completely floored by stuff going on like this. Has everyone lost their brains? It is apparent to me the government and its tentacles that branch off of it want to invade my privacy, know what's in my bank accounts and control what goes into my body. Guess what? I'm not a robot, nor an artificial intelligent computer that will let you do these things. I am a human being. I say NO, NO, No to your change of WAC laws and oppose any legislation that does not give the people a right to choose what they put in their bodies. Do you know that many of the people in my church unvaccinated contracted

covid from the vaccinated? Do you know one of my patients families contracted covid from their elderly family member who is in the nursing home. That's what happens when all the staff was FORCED to be vaccinated! So the lies the media are spewing about the unvaccinated causing the spread of covid are just that, LIES. But you already know the hidden truth don't you? You should all be ashamed to sit behind your €@#ing titles and call yourselves professionals. I would say the point of having everyone vaccinated especially in these care facilities with the elderly IS hoping to cause death. Right?? That would be my guess knowing what I know. Especially since the governor of NY removed himself after the media caught wind of him putting covid + patients in the nursing homes. Our governor was guilty of the same thing in Seattle at the start of covid but oh how people forget. I would say your vaccines are giving people covid directly, even more specifically mRNA, not passed by FDA. Did anyone else notice the start of omicron came on the heels of the third dose exactly about 2 weeks after administration?? It's so obvious to me your spreading the virus. Each new variant with each new booster. Unbelievable to me what I have witnessed and heard these last two years not to mention using a test that cannot tell the difference between covid and the flu. Mandating unvaccinated students to be tested and NOT the vaccinated. I scream DISCRIMINATION! You are purposefully creating a second class to cause hatred and division among the people. I have heard the stories. We all know the vaccinated get and spread the disease as well as the unvaccinated. Fear fear fear is all I have seen spread from the DOH and PROPAGANDA; on news, radio, and tv for last 2 years. Do your part, get the vaccine yada yada yada " because it's responsible". In my opinion, you are GUILTY of using the media to spread fear in order to control and manipulate the masses and push an untested unregistered vaccine on many. I am educated and have studied microbiology. In addition have read from many doctors like Dr Vladimir Zelenko, Dr. Carrie Madej, Dr Christiane Northrup MD, Dr Christina Parks MD, Dr Bryan Ardis, Dr. Malone and many more from American frontline doctors that "natural immunity" is best though it seems like even after natural infection; the DOH is STILL mandating to get the c-19 shot. This is not true "science". What an absolute disgrace and injustice to all peoples around the world. I have not seen one thing educating people on radio about diabetes/obesity being related to covid deaths and how taking Vitamins such as C, D Zinc etc could help power through natural infection. It's all about fear porn and pushing people to an unwanted vaccine. I DISAGREE with injecting any mRNA in my body or my kids, period. My kids have had most of their vaccines but all this nonsense has me questioning the medical communities and our local hospitals affiliated with the state after they do nothing but push this death jab. A friend was coerced by a doctor to get it because she needed a much needed knee surgery and her doctor would not complete it without her getting the shot. She already had covid a year earlier. What a tragedy. None of this makes sense to me. He should lose his license for pushing a vaccine she did not want!! We will not stand for this tyranny. The only difference between Wa state and Australia is we have guns. Thank God because if anyone comes near my kid or me with this poison that is causing myocarditis in kids, We the parents of WA state will use whatever means necessary to protect our kids and family. If you think you will do this at school without my knowledge, my kid has been warned. You will be hearing from me and a good lawyer if this shall happen without my consent. . In the event they make us not able to work because they keep pushing this ridiculous agenda, I would be glad to pack up and leave the state of WA. . I can no longer tolerate brown shirt mentality and unethical discrimination against people who do their research. It is time to say NO NO NO, we've had enough control. We are sick of unconstitutional mandates and governmental overreach. We need laws to protect us from this tyrannical governor. Two weeks to flatten the curve have turned into 2 years. Enough is enough. I say NO more mandates or we the people are out of here.

Adding the vivid vaccine to the list of school requirements when it has only been administered for a few months for school age children is not looking out for the safety of our children. Forcing people to be detained against their will because of a virus is unconstitutional and a violation of our rights as Americans. Please reconsider.

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health. There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19. Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

Mandating Covid-19 vaccines for children in public schools

11.

Are you Pro or Con on the proposal?

2.                      Con

---

We trust the public school system to have our children's best interest in mind, not the political trend of the day. Mandating a vaccine that does not have sound long term studies on children, as well as simply being unnecessary on an age group with a low fatality and side affect rate is absolutely irresponsible. If public health opts to mandate vaccines for kids it will sadly mean the end of public school for our family.

Mandatory Covid vaccine for children

11.

Are you Pro or Con on the proposal?

2.                      Con

---

My daughter has had adverse reactions numerous times to two different vaccines. After those reactions and doing research on vaccines I will not be giving my children any vaccines nor myself. If this vaccine is forced on children many children will be pulled from school by their parents which will cause less funding and unfortunately the people that will be affected most by this are the families where they don't have a choice because they can't stay home to homeschool their children. We as parents should be able to make health choices for our children not the government.

There is no reason for our children to have to be vaccinated against an virus that has an extremely low risk rate in children to begin with. Children are not the main demographic to get Covid and they are not spreading it as highly as other demographics. The vaccine is currently under emergency use authorization only and there is evidence that shows vaccinated personal are spreading the virus just as much if not more than the unvaccinated. They are more likely to spread the virus being vaccinated as they are more likely to be asymptomatic and that can cause a more serious threat to people with fragile health conditions. Please consider these points.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

+++++++  
This is not about our health;  
it is an unconstitutional, criminal attempt for the government to control the population.  
Those who are proposing this plan should be charged with treason.

Signed,

John and Sandy Fortune

I am a parent. I believe vaccines are a choice. I believe in freedom. Our children are at an incredibly low risk of dying of Covid. The government should never mandate an individual to receive a vaccine they don't trust or believe they need. WE NEED FREEDOM OF CHOICE. The choices WA state have made have already been destructive to our children.

I am strongly opposed to adding covid vaccine for children to the WAC-246-105-030

Covid vaccines remain under emergency use authorization and the rules that apply to that status Children under 18 yr have extremely low clinical risk from covid infection Children have a much higher risk of adverse event to the vaccine- including life long health issues Research supporting child vaccinations safety is flawed by the methods used to collect it Covid vaccines do NOT prevent getting it or transmitting it

DO NOT subject our children's health to a failed vaccine and the future unknown risks it may cause

#### External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Data has shown children to be extremely low risk to any of the covid strands.
- As the vaccine is still authorized under EUA, there shouldn't be any mandates or requirements under any circumstance.
- Long term effects of the current covid vaccine is still unknown.
- Short term effects of the vaccine are distinct and dangerous enough to allow choice in the matter for taking the covid vaccines.
- Taking the vaccine doesn't affect the spread of the virus nor will it improve the way the school systems handle the covid-19 virus spread.
- The vaccine isn't the only solution to protecting our children.
- The vaccine doesn't protect you from getting covid or spreading it.
- The vaccine can only protect the individual so the choice in immunization should be the way to handle this.
- There are already proven methods that can protect us from covid such as improving our immune systems through vitamins and nutrition, eating a healthier diet, taking an active lifestyle, and keeping up with a social circle to fight against depression and isolation.

This route in mandating covid vaccines in the name of public health is not only wrong but pointless. It is the governments responsibility to inform the public and give them the options to take care of their own health.

Subject: Re: Decision about Recommending Covid-19 Vaccine for School Children

External Email

Each member of the Washington State Board of the Health has a grave responsibility to set practices and make policies that affect individual citizens and families of the State of Washington. Parents have the right and responsibility to make decisions for their children. A vaccine of any kind is putting a substance into a body that has either wanted efficacy against disease or unwanted short-term or long-term damage. I ask the board to rule against any recommendation of the Covid-19, Novel Coronavirus Vaccine for children in Washington State schools or anyone else.

As Americans we have sovereign jurisdiction over our bodies. Parents know their children best and should make ultimate medical decisions for their children. They can consult their doctors or faith leaders. Parents want to make informed choices about what goes into their children's bodies. Children are not at great risk of Covid-19 or of spreading it. I urge the Board to vote No or Against the Covid-19 vaccination recommendation for Washington's school children.

Sincerely,

Janet M. Young

External Email

I'm reaching out to voice my opinion on the Covid vaccine for our children to be added on their immunization card to be able to attend school. I don't think we have enough research on this vaccine. The vaccinated are still getting Covid. All my children have their immunizations, but are NOT vaccinated for Covid, either are my husband & I.

We need to make this a personally choice. I don't trust this vaccine. As of now, I know of several people who are vaccinated & have Covid. A few have had some health issues since they received the booster. Please don't make this a mandatory vaccine for our future when we don't know the outcome. Thank you for ur time.

Thank you,  
Sabina Drury

Subject: My comments regarding:

External Email

Dear Board of Health,

My comments regarding:

WAC 246-100-070)

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

I am adamantly against forced/mandatory vaccines. The government has NO business and NO right to mandate an injection into any person. It is a parental responsibility and right to care for our own children and ourselves. As you can easily find information on; children are extremely low risk for Covid, (way less than 1% mortality) so low, which I'm sure you all know. And the vaccines are still in the experimental stage-EUA (Emergency use authorization). I will not give my GOD given Freedoms – Liberties! over to bureaucrats or the state.

I also adamantly oppose involuntarily detainment of a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) This is unconstitutional and therefore illegal. These are our bodies and our choice. The state cannot illegally kidnap people for detainment based on illegal mandates.

Hundreds of medical staff are testifying that hospitals are near empty - evidence that there is no emergency. The PCR test already proved itself as not accurate, not effective in counting Covid cases and deaths. Covid has been shown, with the right early

treatment, to have a recovery rate of 100%. And Omnicron although contagious barely lasts a day. Herd immunity has and is happening.

You may not have heard about the incredible success in Uttar Kadesh, India w/a population of 241 million people! They started all 241 million people on preventative anti-viral therapies and their case rate was minuscule and so were their deaths!

Please! Each one of you! Do your own research! Search for the truth and make ethical decisions, sound / logical discussions and listen to the PEOPLE Of Washington State.

I say NO to mandatory vaccines and NO to illegal detainment (kidnapping).

Thank you for your attention to this.

Very Sincerely,

Mrs. Stacy Valencia

External Email

Ladies and Gentlemen,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! This is enough! COVID is highly contagious, I agree with that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19 itself.

I would like to get my opposition in on record before the Public meeting on January 12th.

Thank you for your time and consideration.

• Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be

isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100. • Including the Covid-19 injections as part of school immunization requirements using WAC 246-105. (Immunization Criteria for Child Care and School Entry - making EUS Covid shots mandatory for child care and school admission).

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Children are at very low to no risk of injury from covid. The risk of adverse reaction to the vaccine is greater than any possible benefit. The freedom and right of parents to decide for their children regarding health issues is violated by this proposed legislation. This is a bad, unjust and harmful proposal. It's opposed to our rights and freedoms of American citizens.

Kids do not need to be vaccinated to be in school! In two years that I have taught during Covid, we have only had 1 student in my class contract it, and she didn't catch it at school. She caught it at home at the very last of her family's one month of quarantine. Do not make this a requirement. Teachers do not support this potential legislation. Less is more. The idiot (Inslee) needs to understand this.

I feel that because the vaccination is relatively new and we are not fully aware of long term impacts it may have on children, that it should not be mandated. There is no way of knowing what this will do to our children, possibly nothing now, but we aren't aware of how it impacts them as they develop. Please allow parents to make the choice. Children are very low risk of complications from covid, especially a healthy typically developing child. Please leave medical choices up to the parents and not force it for schools and other activities.

Subject: I STRONGLY OPPOSE WAC 246-100

External Email

Good evening Board of Health.

I will make this email incredibly to the point.

I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals or demand from them to participate in any unwanted medical intervention. I also oppose adding a C-19 shot to the WAC 246-105 schedule of required immunizations for children to attend schools.

Per your rules it states that you only have say over immunizations for children. This COVID-19 shot is NOT an immunization by definition. It IS an Authorized under emergency use only experimental gene therapy still in stage 3 clinical trial.

The manufacturers claim its job is to lessen symptoms. Children do not suffer severe symptoms. Even with all the shots and boosters you still get the virus and still transmit the virus. So again it is NOT an immunization it is an experimental gene therapy which as of currently we have no study to show what long term ill health effects this treatment may cause. For children there is NO net positive and only risk.

I believe that there should be a rule made to exclude any policy that requires any product under the Emergency Authorization or an approved product and not cleared from stage 3 clinical trials.

This is common sense. It is for the good of all people including you and yours. Entering into a medical experiment should be voluntary with true informed consent meaning all the possible side effects have been conveyed to those who have the cognitive skills to understand the risks and only then should be administered. To force or coerce in any way a person into a medical experiment is felonious and against the Neurenberg Code. Yes 8 different felony acts will be committed each with up to 99years in federal prison and each with up to 100,000,000 dollars fine. Each person who votes to make policy through threat or coercion of not being able to have the rights and freedoms that our constitution affords will personally be committing these crimes.

Again do NOT add this experimental gene therapy ie (Not an immunization) to the required entry list of school and daycare immunizations

Sincerely,  
Tina Pilcher

The Covid 19 vaccination does not eliminate peoples chances of getting or passing Covid. Therefor it does not make sense to require it for students to attend public schools. It is childrens rights in the United States for a fair education, and forcing this vaccine in order for them to attend school takes away their rights to make their own health decisions. There are too many adverse effects for people with this. Vaccine to force everyone to get it.

I am a concerned grandmother. I do not agree with injecting children with the experimental mRNA covid vaccine. By mandating such a thing many parents will remove their children from public school. Let parents decide what is best for their children always! Thank you for your consideration in this matter. Sincerely, Vicki Gorman

Subject: Public Comment - JAN 12 WABOH Meeting - Immunization Criteria for Childcare and School Entry

External Email

January 7, 2022

To the Washington State Board of Health Members:

I would like to comment on any action you are considering to take regarding immunization criteria for school entry and childcare. It is apparent that medicine is not a "one-size-fits-all" application. My two children have received immunizations with no apparent reactions, while my niece has received some of the same immunizations and has experienced sickness, seizures and allergic reactions. This is why it is important for exemptions for vaccine requirements to remain in place for school entry (and daycare). It is also fundamentally necessary to keep religious and philosophical exemptions in place because there are many families who practice holistic and natural medicinal care – we live in a free country where we can practice a religion of choice and make decisions that we believe are best for our bodies (or for our children).

I also implore you not to require COVID19 injections for ANY child in childcare or school. It is evident the COVID19 injections being administered are not stopping the spread of SARS-COV-2 (as we are seeing a surge in cases). Not to mention, no COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States with no anticipated date for its availability. Also, the FDA has not been transparent on the data they have collected thus far (and we will not see full data until 2076)/there is not enough long-term testing data available for people to make an educated medical decision. The safety of the injections currently being administered should be in question as well - the number of hospital cases of myocarditis and pericarditis, at Seattle Children's alone, should shut down any further issuance of these experimental injections in children. Requiring this injection does not protect our children!

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% which statistically speaking they have zero risk of dying. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

Additionally, this injection is not meeting the criteria the WA BOH has set forth because it

is not reducing the risk of person-to-person transmission. The survival rate is well over 97% in the general population. Not to mention that even long-term effects of SARS-COV-2 do not represent a significant amount. There is an extremely large number of both the medical and the general public who do NOT accept the COVID injections as an effective or safe means to combat SARS-COV-2.

Please PROTECT our children by NOT requiring a COVID19 injections to attend childcare or school.

Thank you,

Stephanie Lofquist – Washington citizen

Dear Tracy,

Please do not mandate these experimental vaccines on our young healthy children.

It has been proven that children are not at risk of dying from covid or even catching it (let alone spreading it).

Vaccination is a personal choice that should be left to the parent/ guardian to decide for themselves. This is stated in the Nuremberg codes that were written to protect us from these very circumstances.

There is not currently an emergency that gives our government the right to enforce these mandates.

Sincerely,

Sonja Hild

Subject: Vaccine Mandates

External Email

Washington State Board of Health members,

I am opposed to making COVID-19 vaccines mandatory for school admission or childcare in the State of Washington for many reasons. The following are just a few:

During the October 26th FDA advisory committee meeting, 16 of the 18 members were very clear that they believed that "otherwise healthy" children do NOT need this vaccine. It was specifically stated in their closing that they were recommending approval so that "high risk children IN CONJUNCTION WITH their parents AND doctors" could have it AVAILABLE. They also noted that though some states may try to mandate it, they couldn't let that deter them from making it available to high risk kids that may need it.

Federal Emergency Use Authorization statutes prohibit school mandates of EUA products. The only FDA approved version is not yet available in the United States.

Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007-the main clinical trial in children and young adults with BNT162b2- has an estimated completion date of May 5, 2026. Source: A Phase 1/2/3 Study to Evaluate the Safety, Tolerability, and Immunogenicity of an RNA Vaccine Candidate Against COVID-19 in Healthy Children and Young Adults - Full Text View - ClinicalTrials.gov

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow9>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow9>

A Phase 1/2/3 Study to Evaluate the Safety, Tolerability, and Immunogeni...

A Phase 1/2/3 Study to Evaluate the Safety, Tolerability, and Immunogenicity of an RNA Vaccine Candidate Against...

The vaccine formulation now being given to US children aged 5-11 is NOT the same formulation used in the clinical trials and NOT the same formulation that has been administered to all other age groups under the EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

Not having language that recognizes and acknowledges innate immunity of COVID-19 recovered is irresponsible medicine and employs a one size fits all medical approach that does not take into account the individual health needs of children.

Children are the least affected by this virus regarding severity and most at risk of

unknown long term effects.

SBOH has called COVID-19 a vaccine preventable disease which is untrue. The vaccines do NOT prevent the disease and this is even more true with the newest Omicron variant.

According to WA 246 105 030, all other required immunizations accept "proof of acquired immunity" in lieu of the child having the immunization.

Last, but not least, many parents will pull their children out of public school which could be financially detrimental to our schools which are already struggling. This is NOT in the best interest of the education of our children in the State of Washington. In addition to this, if children become injured from mandated vaccines, are you prepared for the legal fights that will ensue and further drain the financial resources of our State?

Sincerely,  
Tanya Burrill

Good Afternoon Representatives,

I am writing to OPPOSE proposed policies:

That allow local health officers to use law enforcement (WAc 246-100-070)  
that are aimed to force an emergency order to involuntary detain a person  
or group of persons (families) to be isolated in quarantine facility (WAC 246-100-045)  
following refusal to voluntarily comply with requests for medical examination,  
testing, treatment, counseling, vaccination (WAC 246-100-040).

I am writing to OPPOSE proposed policies:

that would include COVID-19 injections as part of school immunization  
requirements using WAC 246-105

I am writing to SUPPORT the request to adopt a new rule:

ICWA is requesting the WA State Board of Health adopt a new, permanent Rule

prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized

product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

This new rule request pertains to any and all avenues through which the Board has authority to add

medical interventions requirements, including through regular or emergency rule-making.

The rule is needed because: Despite the absence of any FDA licensed COVID-19 vaccine w/ completed

Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots, the BOH

has gathered a Technical Advisory Group to examine adding COVID-19 vaccines to daycare & school requirements.

This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent,

which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

The new rule would affect the following people or groups: All minor children, their parents and guardians in WA state.

I am against a mandate for the Covid vaccination for children. They aren't getting sick nor are they dying from Covid, why would we require a vaccination for them? The process of making this vaccine and the vetting of the Covid vaccine have been pushed through and hurried along. Why would we subject our children to a process that hasn't followed the scientific process of a 10-15 year study? These children are our future.

I stand with all those who want the freedom to vaccinate their children for Covid if/when they choose to do so.

External Email

We are completely AGAINST any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's : WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

The proposed rule giving DOH powers to involuntarily quarantine or inject US and WA citizens is in violation of federal law and we OPPOSE this! This is the United States of America and there is no place for this in a free country.

Under Title 21 CFR Section 50.23 and 50.24 it is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism.

We are also adamantly OPPOSED to the proposed covid vaccine mandate for students in school. Any vaccine decision should be up to the parent or guardian, and not mandated. It is VERY clear that the covid vaccines are not stopping transmission or contraction of covid, and whether one chooses to get the vaccine to (possibly) lessen severity in symptoms, is one's personal decision, or their parents' in this case.

Please do not pass these immoral and tyrannical legislations.

Sincerely,  
Gabe and Rachel Pickens

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Opposition of COVID vaccine for children in K-12

External Email

I understand that it is being considered to have the COVID-19 vaccine for children to attend schools in K-12. As a resident of Washington state, a mother, and a health care provider, I ask that you please look at the science and data prior to making this decision.

According to the WADOH website (updated as of 01/03/22), the age group from 0-19 has only had 17 deaths since the start of this pandemic. While each death is a tragedy, none were without underlying health conditions. This age group is NOT at risk from this disease and each parent should be granted the right to assess the individual risk of their own child and then make that health decision.

Furthermore, science shows that transmission of Covid-19 occurs in both the vaccinated and unvaccinated communities.

Please consider the science and individual liberties while making this decision that will impact so many. It is my concern, also, that if this mandate is made we will see a mass exodus in WA (especially Eastern WA) from public schooling that will be crushing to public school systems and to the children/families that rely on them for quality education.

Thank you for your time and consideration.

BOH,

Please do not require mandatory vaccination of school age children in order to attend public school. The vaccines that are available are authorized under the emergency use authorization act. The vaccine that is approved is not available. Therefore, requiring students to be vaccinated forces them to participate by definition in a medical experiment. Furthermore, the CDC admits that the vaccines neither prevent one from catching Covid nor prevent one from passing it on to others.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. According to the CDC, children have basically a zero percent chance of being harmed from COVID. Kids have been back at school for months with no issues. Without knowing for certain the long term adverse effects of this vaccine it makes no sense to vaccinate a low to zero risk population.
2. The science is clear. The vaccine is not effective in preventing infection or stopping the spread of the Delta or Omicron strains of the virus. Why would we mandate a vaccine that does not keep one from getting or spreading the virus. Break through cases are quite common as you know very well.
3. There have been no long term clinical studies on the safety of the vaccine, which is why a person in the USA still cannot get a vaccine that is FDA approved. Even Pfizer's rebranded Comirnaty vaccine, which is FDA approved, is not available in the United States. Hmmm. In other words there is no recourse against these pharmaceutical companies for people who have adverse reactions.

Frankly, it is intellectually dishonest to compare the COVID 19 vaccines to other traditional vaccines. The data speaks loudly to the inefficacy of these vaccines. Furthermore we should not mandate an unproven vaccine to a population (children) that has virtually zero risk from the virus.

Sincerely,

Matt Armstrong

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. There's absolutely NO long term data showing how safe these MRNA vaccines are in children. In adults, several adverse events are coming to fruition. I'm fully vaccinated with Moderna, but after my second shot that almost landed me in the hospital with a severe reaction, I will never get another MRNA vaccine.
2. Children without comorbidities have almost a zero percent chance of dying of COVID.
3. We can NEVER vaccine our way out of this pandemic. If the vaccines are so effective why has the CDC just recommended boosters for children? My entire East Coast family that are vaccinated and BOOSTED all came down with COVID! They gave it to each other!
4. We need to start following the science, and not the fear-mongering politicians.
5. NOVAVAX, which is a traditional Protein vector vaccine should be on the market in the US soon. That's the vaccine I will get annually and most of my vaccine hesitant friends and family will get, including children. Please allow the manufacturer enough time to bring NOVAVAX to the market

Thanks for your time and attention,

Seamus O'Brien

Dear Board Member,

I am AGAINST mandating the shot for children to attend school.

Children are at extremely low risk for Covid. The shots are still only EUA (emergency use authorization). The FDA approved drug is not being made or available in the US. This is an experimental drug and is covered by the Nuremberg Code.

Children are our most vulnerable and valuable asset. They should not be required to take an EXPERIMENTAL drug in order to attend school. The risk of lifetime damage from the drug during their formative years exceeds the risk of death from covid.

1. More children die of the flu than covid.

2. More children die in car accidents than from covid.

3. According to the CDC/VEARS reports, More children have died from the shot than from covid.

There are no long term studies to see the effects of this therapeutic on children. There have been cases of myocarditis ( a life shortening disease) that especially show up in children who participate in sports.

We need to protect them from possible life long damage.

AND the Shot/Therapeutic is NOT working for Omicron. It was made for Alpha.

The Health Department should NOT MANDATE a product with this FAILURE rate. The original claims for this product were WRONG. How many more problems may be on the horizon from this experimental drug??? What if myocarditis rates increase in children with time? What if neurological problems in children increase with time? How many other issues? Possibly fertility issues in both males and females?

Who will assume the liability for this mandated experiment for the damages to the children??? Are you were willing to pay for damages caused by a shot that doesn't work maybe even half of the time against a virus that kills less children than the flu or car accidents?

VOTE NO on the mandate to ensure the health and safety of our children.

Sincerely,

Marilyn Bennett

Government authority to involuntarily quarantine individuals is a very short step to internment camps like the ones used to intern the Japanese during WWII and violates the principles of the American and WA state constitutions. I'm pretty sure it also violates the Nuremberg code. Adding a COVID-19 vaccine to the already extensive list of required vaccines has risks that outweigh any hoped for benefits. Almost 30 years ago, I questioned the wisdom of giving my baby vaccines with a litany of possible side-effects, from rashes to death. I was told these never happened. But one of them did happen to my son, and I have spent years wrestling with guilt over what might have been. Children have an extremely low risk of severe illness from COVID and the vaccine can have very serious side effects, especially in young males. That's just in the short term. We have no idea what the long term effects of mRNA vaccines are on immune systems, etc. I personally am concerned about the increasing risks of autoimmune diseases.

Dear Tracy,

It has been brought to my attention that this board seeks to find a way to force children in Washington State to receive the experimental, emergency-use authorized mRNA vaccine in order to attend public school.

I am a paraeducator for the Lake Washington District. I have a degree in Nutrition and Food Science. I have 5 children. If this plan is implemented, I will quit my position and take my children from this district and return to home education, like so many other good, caring parents are doing now.

I'm sad to think that you aren't aware of the outcry in this state toward the governor's tyranny and his plans to bring force to bear along with quarantine camps.... This does not benefit America or honor our constitution, and I'm ashamed at the very suggestion of such segregation and discrimination.

Realize the fight is bigger than you know. You are joining the governor in destroying our economy, our well-being, and our way of life. Please reconsider your trajectory.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. Barring children from public school is enormously detrimental to children's learning and socialization and often to their parents' ability to earn a livelihood to support their family.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population.

Signed,

Roberta A Pagon MD

I am firmly against the mandatory vaccination of children. They are extremely low-risk for COVID-19, and this immunization is still only Emergency Use Authorized. To require vaccination of an EUA shot in minors--children--that are low-risk is unnecessary, not to mention an infringement upon HIPAA. We need to protect our children from mandatorily vaccinating them with a vaccine that is still in development for a disease that is not high-risk for them. We must protect the rights of our children to be able to attend school without having to be immunized. I am CON on the proposal. Thank you.

Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

A Covid-19 vaccine mandate clearly does not pass the criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. • The vaccine has been directly available to every vulnerable sub-set of the population for some time. 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public. While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. • Under 51% of Spokane County residents are vaccinated. (srdc.org) • Less than 40% of kids 12-17 are vaccinated. (srdc.org) • Only 36% of the entire black community in Spokane County is vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org) 8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable. • Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

---

Dear sirs: I am a mother and grandmother writing to urge your board to make no changes to our state's infectious disease code or childhood vaccine requirements. Our family has been following the subjects of COVID "vaccines" for many months. We are fortunate to have within our ranks a PhD researcher and an MD, both of whom have helped us understand that there should not be any state-coerced requirement for anyone to take these shots. We do not want the state to attempt to get between a doctor and patient, nor between a parent and child. Our pediatrician has advised that our grandchild will not benefit from a vaccine and in fact would be at statistically increased health danger by taking it, as would all healthy children and adults. In addition, our adult son's physician has cautioned against the emerging fad of getting 2, 3, 4, or more "boosters". Please understand that individuals have an ethical right at any time to refuse an injection. This is basic to all medicine and science at all times, but it is especially critical for something that is not a licensed vaccine and has an extremely limited history. We request that you resist the temptation to use coercion and "enforcement" punishments and instead give significant weight to the public's informed good judgment. As a family who supports vaccination in general, we expect that you intellectually acknowledge the difference between most vaccines and these mRNA products. Over time, as COVID diseases are better understood and real vaccines can be offered and opted for rationally by individuals--rather than demanded by politicians--the right balance will work itself out. Sincerely, Katherine Rowe (Please accept these written comments as I will not be speaking in person. Thank you.)

These proposed legislations are morally and ethically wrong. Specifically with Covid vaccination of children, children are not at risk and suffer a greater risk of adverse reactions from vaccination. This should be a parent/individual choice, not a state level mandate. It is utter insanity that this is even a proposed legislation for Washington State.

Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,

Melissa Alires

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Yasha Carpentier

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

First, there is substantial evidence that children are extremely low risk. In addition to this, the vaccine is still only EUA.

There is also research showing that people with and without the vaccine are still spreading the virus. For this reason it is clear that the vaccine does not keep the virus from spreading.

I hope that you will consider the accumulated data.

Respectfully,

Abigail McMillan

Subject: AGAINST covid shot requirement for school age kids

External Email

Dear Tracy,

I'm writing to express my extreme concern, and opposition, over the proposal to inject our school age children with the experimental covid shots, as a requirement for school admission. This is a decision that should be left to the parents. We know that the risk to children birth to 17 years is so small as to be inconsequential. The shots are harming people's immune systems. To invade children's developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage. Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after the covid shots, particularly in adolescents and young adults. WHY are we putting our kids' hearts at risk?

Health officials are telling parents that children should be vaccinated for the sake of herd immunity. What is largely ignored are the studies that show children are not driving the pandemic and, in fact, are less likely to transmit the virus than adults. We also see clearly that "vaccination" status has nothing to do with stopping transmission of the virus. Covid outbreaks on "100% vaccinated" cruise ships are a stark example. Bottom line – children are not the risk factors for covid. Leave them alone! It's WAY too early to know potential long-term side effects. They do not need to be forced guinea pigs for these shots. If the parents want that for their kids – that should be THEIR decision. Let parents decide either for - or against – the shots. NOT the government! Please – do NOT make these covid shots required. It's simply not necessary.

Sincerely,

Vicki Gillette

I am writing about the meeting you are having next week to consider a vaccine requirement for school aged children.

I can hardly believe that you are even considering this when children are at a very low risk from covid-19.

To take the choice away from parents is not only morally wrong, it is clearly unconstitutional.

I ask you to please say no to this requirement - I fear you would alienate many many families and leave them no choice but to take their children out of public schools.

Thank you for your consideration,

Only parents have the God-given responsibility and right to Make decisions about the health of their children. Vaccine Mandates are discriminatory. The State of Washington has seen record numbers of children removed from public schools. If this mandate passes, you'd better get ready for a tidal wave of kids leaving public school in this state.

---

I would like to thank the Board for their time and consideration in this matter. I am against requiring the Covid vaccine for children to attend school or child care centers. I object to this requirement on a moral, scientific and legal basis. The vaccine is broadly available to nearly the entire population and the choice to protect oneself with the vaccine should remain a personal choice based on an individual's health, spiritual and moral beliefs. I encourage the Board to recognize that the science behind Covid is still evolving as is evident by the continually changing guidelines put forth by the CDC and other government health agencies. To require a vaccine in our school-aged children now when the data and other guidelines are still in flux would be premature and short-sighted. My objection to this mandate is, in part, derived from an inability of the Covid vaccine to meet the criteria set forth in the IAC's Criteria for Reviewing Antigens for Potential Inclusion in WAC 256-105-030. I. Criteria on the effectiveness of the vaccine 4. Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects > Serious adverse health events following the Covid vaccination are rare; however, it has been observed that there is the possibility of potentially life-threatening side effects including myocarditis and pericarditis in children ages 12-17 years. > The Covid vaccine does not have full FDA approval for children ages 5-11, it is still only authorized under emergency use authorization. It would be premature and reckless to require a vaccine that does not have full approval of the FDA. II. Disease Burden Criteria 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. > Covid is not a vaccine-preventable disease. The Covid vaccine is designed to and functions only to lessen the symptoms of individuals who contract the virus that causes Covid. The Covid vaccine does not, and was not designed to, prevent the transmission of Covid. Vaccinated individuals do continue to transmit the virus. > Among children in the US, the death rate (fewer than 100 deaths in 28 million children) from Covid is so low that it does not warrant a vaccine mandate. The choice on whether to vaccinate children should remain with the parent and/or primary caregiver. School-aged children pose an incomprehensibly small risk to the transmission of Covid in the school or child care environment. III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public. > While the vaccine may be generally acceptable to the medical community where the likelihood of coming in contact with the virus (and contracting Covid) is much higher than for the general public, there is evidence that the vaccine is not broadly accepted across all communities. The acceptance of the vaccine varies greatly when socio-economic factors, race, and education level are considered. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. > Given the low rate of hospitalizations and deaths in school-aged children due to Covid, it is not reasonable for the Board to consider such extreme measures for a virus that has such a minimal impact on our children. Forcing parents to choose to violate their own moral, spiritual and health beliefs (many of whom have already been coerced into getting vaccinated or losing their jobs and well-being) is unacceptable and does not meet the criteria for a reasonable burden.

Please do not make Covid-19 shots mandatory for school admission or child care.

Children are at very low risk for Covid and if they do get it, it is usually mild.

The vaccines are for emergency use only. The variants are less potent than the original virus. The emergency is over. Covid 19 should be treated as an annual flu included in the flu shots which are optional for people.

Also, both vaccinated and non-vaccinated people are getting & transmitting the new variant. The vaccine is not stopping the spread of Covid 19 so it should not be considered as a mandatory vaccine for children.

Regards,  
Ruth

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

To Whom It May Concern~

I am unable to make the meeting Wednesday so this e-mail is my public comment in regards to agenda items 5, (246-100 WAC) 9 (246-100 WAC), and 11 (246-105 WAC).

It is alarming to know that the Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents with the proposed policies including:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I would like it to be known that I am against both of these possibilities becoming reality. Implementation of such a policy in the United States of America is against our rights and freedoms as Americans. There is nothing "voluntary" about these proposals.

Please seriously consider putting a stop to these policies.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

The vaccines are only emergency use authorized. There are no long-term studies to document any history of safety. Studies show that both vaccinated and unvaccinated can transmit Covid, therefore, the vaccine does not stop the spread of the disease.

Sincerely,

Sandra Morgan

Subject: Vaccine Mandate concerns

External Email

I was encouraged to write today that its wrong to mandate something that causes adverse reactions including death to some that take the vaccine. I completely understand the elderly need it most. The creator of the Moderna vaccine said children don't need it. I am against mandating children to become ginny pigs for your apparent experiment.

Further research is required before a state mandate should stay in effect for all of us. Enlarged hearts were reported in teens that took the vaccine for covid. Forgive me for not citing sources today, but due diligence in studying and reporting effects would be excruciatingly helpful before a mandate is enforced.

My child has had all of his immunizations up to date for school as the 11 standard ones had a proven record, that I understood was effective, such as the MMR (measles mumps, and rubella). Please get on board with accurate documentation including those who have been vaccinated that landed in the hospital and died. Dr. Malone disclosed if too many people got the vaccine, it can create superbugs, that make things worse. The entire population does not need it.

I would not threaten my childs life with an experimental Vaccine.

To whom it may concern:

This is the United States. This is not Australia. We know there have been COVID detainment centers built in our state. DO NOT allow these new "measures" to be put through. I can almost guarantee that passing this will create an atmosphere that WILL incite an actual push to split our great state into two separate states. On the topic of children being made to have the vaccine, we still have no long term data as what it will do to their precious little bodies. It has been proven that the vaccine does not stop the spread. Neither did the original 15 day lockdown. If anything the "vaccine" is CREATING super spreaders. We the people say enough is enough.

Subject: Vaccine requirements and medical kidnapping

#### External Email

I am begging the Washington State Board of Health to NOT require this vaccine for school children. They are at a higher risk of vaccine side effect than they are for covid 19. This is absurd that something that isn't even working or needed is being pushed into children. Long term studies have not been done, there are plenty of children who have been harmed or killed by this shot. Heart attack is not something I would ever subject my CHILD to. Do not pass this, parents will remove their kids from public schools so fast if you do.

Do NOT pass any sort of detention for medical, testing, or quarantine, reasons. This is again another absolutely absurd and power hungry move. This is America, NOT CHINA!

Please listen to We The People! We do NOT at all approve of these proposals!

Thank you for your consideration,  
Shelley

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Subject: Public Comments for WSBOH Members for January 12th meeting

External Email

Please include the comments below about inclusion of COVID-19 in WAC 246-105-030 for the January 12th Board meeting materials:

I think it is a mistake to add COVID-19 to the list of vaccine-preventable diseases in WAC 246-105-030 for the following reasons:

1. All vaccines for the diseases listed in the current WAC prevent those diseases on a scale far above any current COVID vaccine. In other words, today's COVID vaccine does not provide immunity on the same scale as any vaccine for diseases listed in the current WAC.

2. Today's COVID vaccine does not last like the vaccines for diseases listed in the current WAC: it wanes over time requiring a booster. This is too much of a burden on the populace to get a booster every six months to a year. This violates the Implementation guidelines "The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver" as written in Washington State Board of Health and Department of Health Technical Advisory Group Overview – Immunization Criteria December 29, 2021

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2F%2520TAG%2520Orientation%2520-%2520Process%2520Overview.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4dcdf035684a4eee3b>>

3. Today's COVID vaccine is too new and has not been studied enough to truly understand if there are any long-term side-effects, especially in children, therefore, COVID-19 should not be considered as a vaccine-preventable disease since the long-term side-effects of the vaccine are unknown. Who knows what kind of side-effects may be discovered in five, ten or more years! Forcing a new and unstudied vaccine on children and the populace in general is an abuse of power!

Please do not include COVID-19 in the list of vaccine-preventable diseases in WAC 246-105-030.

Sincerely,

Rick Rice

External Email

State Board of Health,

I have read the proposed policies, listed below, and must say that not only am I totally dismayed, but also alarmed at your irrational and immoral thought process.

I would simply remind all of you to stop for a moment and consider how you are being used. The term that comes to mind would be a 'useful idiot'. Please do not fall into that trap. Look at the big picture of what is happening in this state, in our country as a whole, and throughout the whole world. Do you really want to be remembered as playing a part in the total enslavement of humanity. Wake up! This is no longer a game. Please recall the Nuremburg code. I was just following orders did NOT stand as a defense during the last trials.

Thank you in advance for taking a moment to ponder.....not only your life and existence, but the one that you are leaving behind to your posterity.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Sincerely,

Steve Tapio

---

Adding covid vaccination as part of the required vaccinations; WAC 246-105

11.

Are you Pro or Con on the proposal?

2. Con

---

Covid should NOT be added to any lists as a required vaccination. We do not know the long term effects of this product and at this point, it has shown to be relatively ineffective in prevention and spread of infection. Those 19 years of age and under have been shown to be the least effected by this virus and allowing them to build natural immunity is one of the best ways to help create herd immunity; known to be most effective in bringing mass infections like this to an end. As the Spanish flu subsided within 2 years, we are seeing covid-19 also subsiding; evidence points to the resolve of the "pandemic."

Consider how long any of the current required vaccinations were in use before being required: MMR - 1971 - 1998 (27 years) DTaP - 1991 - 2011 (20 years) Polio - 1955 - unknown (67 years total) HepB - 1989 - 1997 (8 years) Varicella - 1995 - 2008 (13 years) The Covid-19 jab was emergency approved 1 year ago, and is in its second round of boosters - which means 4 shots. That's not a good track record for an effective vaccine. Please follow the science and social history. Give it some time - we can see the variants are getting weaker and with so many contracting this mild variant, (even with all our vaccinated, masked, and careful populace) we will reach the desired herd immunity before summer. Don't force more people to leave our schools, society, and state because of unnecessary and restrictive codes.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for severe covid disease.

There is clear documentation that both vaccinated and unvaccinated individuals can transmit Covid. The shots DO NOT STOP THE SPREAD OF THE DISEASE.

Even if shots MIGHT reduce severity of disease, then shots become a treatment modality and not a preventative.

As an untested treatment for Covid still under an EUA, these shots cannot be mandated for anyone.

Children are our future and our treasure. We all must first do no harm!

To the Washington Board of Health,  
We are firmly against the mandates for children to be vaccinated to attend schools or any other reason. True science findings have been suppressed during

this last year especially- look at the facts- children are the least susceptible to sickness or severe sickness from these CCP viruses. Along with gaining natural and much stronger immunities through enduring colds and flues, the evidence of counter productive consequences from these new vaccines is growing.

Thank you,

I am a school-based pediatric physical therapist of 28 years who has seen children's physical performance decline dramatically over my career. Sensory processing and emotional regulation in children has declined dramatically. Meanwhile, the number of immunizations given to children has increased dramatically, Often more than one at a time. There are many factors contributing to this decay in child development. A caring and adept parent who truly believes that vaccines are a contributing factor to this decay should not be forced to permit "harm" to there children. If you doubt this decay please go into any public school primary classroom and ask yourself if it even closely resembles that of your childhood. I think not. Please allow parents to protect their children from harm. Fight for and preserve this basic freedom over our own body. For heaven sake; you would defend the right of a parent to guarantee the death of a child via abortion but not defend the right of a parent to decline an unknown risk with little benefit to the child.

Good morning,

I am writing to ask that the Covid 19 vaccine not be required for entry into Washington state schools. I am a mother of 3 children, all who have recovered from Covid and now have the natural immunities to it. Nature immunity is by far greater for them than a vaccine.

It is an overreach of power and violates my rights to choose for my children and what they put into their bodies. They love their public school and would be devastated if they couldn't go as we will not vaccinate them. Please think about this and think about my children.

Thank you for your time,

Tia Taylor

Subject: Possible Vaccine Requirements for kids

External Email

Hi, my name is Randy Bicknell a lifelong Washingtonian. I grew up in Renton and now currently make my home in the great city of Bothell. My wife and I have two young kids and I own a business here in Washington. Mine and my wives whole immediate family all make Washington our home. There are many in our family who have taken the vaccine but also many who haven't. All of us extending to each other the freedom to choose whats right for each person individually. Among my family and friends who vary widely in opinion on the subject, all of them believe in this same model of freedom to choose whats right for each person or family but especially when it comes to kids and parents rights to choose for their children. Children are at an extremely low risk of adverse events from covid even less then seasonal flu. Our kids have been in school and there has been zero impact on kids or parents and extended families in our network among the many families in our school. I feel like Washington is a great state, my home state. Taking the right to choose away from people especially regarding their own children doesn't feel like the Washington I grew up in. Please consider the right to choose freely as an individual or as a family with future decision making regarding schooling for our kids. I hope you recieve the spirit with which I am writing this as one of respect and honor of your positions of authority and the difficult positions that you have with the many decisions facing our health. Thank you for your time in reading this, I want all of you to know that I sincerely wish you all the best.

God Bless,

Randy Bicknell

I am a WA state and Nationally Board Certified Teacher and have been teaching for 16 years. I love our schools and I love our kids! More dear to heart than my career in education, I'm a mom of two teenage children who are healthy and happy! I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It's a horrible idea for many reasons, such as:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical

records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I personally work in the childcare industry and believe it is parental/personal choice to be vaccinated with the COVID-19 vaccines. Children have over a 99% survival rate from COVID-19. Therefore there is no need for them to be mandated to get unnecessary and ineffective vaccines.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Because even if you are vaccinated it does not mean that you will not get COVID. The shot only ensures you will not get as ill and not require hospitalization. Also, if a vaccinated person gets COVID they can still pass to others. Statistics prove that the death rate if contracted is only at .5%. COVID is not going away any more than flu is going away. COVID shot should be a personal choice just like the flu shot.

I highly encourage the dismissal of the mask mandate in school. Our children need to return to a normal way of living. All of these restrictions are affecting our children's mental health.

I am adamantly against forced vaccines and forced quarantine for any person in the state of Washington!!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- \* Follow the science, children's risk is so low that the risk of adverse effects from the shot is higher than a child's adverse effects from covid.
- \* Mandates are not laws and every parent has the right to make medical decisions for their children.
- \* These shots are for emergency use. They do NOT have medical trials that are proven over a period of time.
- \* Covid is spread by vaccinated and unvaccinated.

There are no valid grounds for mass shots for children!!!

Sincerely,

Kristine Farley

Covid is not affecting children harshly. and it should be at the discretion of the parents.  
also the vaccine is not protecting anyone since those with the shot still get it and pass it  
on

Subject: NO VAX MANDATES FOR OUR KIDS!

External Email

Ladies & Gentlemen of WA State Department of Health:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> . Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. HOWEVER, young girls - our future mothers - are in danger of suffering irreversible effects to their ovaries and likewise young boys experience heart issues and some experience death, all due to the Spike Protein from the vaccine. Implementation of the radical policies YOU SEEK TO MANDATE are nothing more than Draconian, tyrannical controls which, over time, will cull the world's population.

4. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. I urge you to do right for the people of the State of Washington and DO NOT REQUIRE these vaccinations for school age children.

Respectfully submitted,

Sallie P Burhans

I am NOT in support of mandating Covid vaccines for children. Public schools are paid for through our taxes and must remain inclusive to all, regardless of medical decisions.

While the media continues to spread fear and panic, actual health data supports the following claim: Covid and its variants in no way pose a health emergency to our kids, but Covid vaccines may be detrimental to their health as they have not been proven safe or even effective. It would be criminal to force families to allow medical experiments on their children in order to receive a public education.

I am in support of ICWA's petition for a rule change.

Thank you,

Rebecca Porter

I am absolutely OPPOSED to all of the proposed Covid policies that will be discussed on January 12.

There should absolutely NEVER be an option to use law enforcement to involuntarily detain individuals, groups, or families in a quarantine facility for any reason. This is not NAZI Germany! No one should ever be detained involuntarily or not for any reason with regard to COVID status. I am absolutely opposed to WAC 246-0100-045.

I am absolutely OPPOSED to including the Covid 19 injections as part of school immunization requirements using WAC 246-105.

Sincerely,

Sue Schulz  
Lynnwood, WA

My research indicates that children are extremely low risk for COVID. I cannot condone giving them a vaccine that still authorized for emergency use only when they are at such low risk. The long-term effects of this vaccine have yet to be determined and I don't believe we should be giving it to children.

Involuntary detainment due to lawful personal choices made, forced healthcare, detention camps - these are the triggers of civil war, refugee crises and some of the greatest tragedies in human history. As an American who has read about, researched and intervened in these scenarios in developing countries, I have always been extremely grateful that I am fortunate to live in America where this is not our reality due to our constitution and value of individual freedom. It is surreal and shocking to read of this being considered here in my home state. If this proposal passes, I will see no choice but to remove my children from schools, leave our family's employment and business, sell our properties and leave this state for one that still aligns with our country's Constitution. I will also do everything I can to help others so the same, just as I have supported refugees and displaced persons around the world who were forced out by corrupt government overreach and tyranny. Don't do this. We are better than this.

Subject: Covid Vaccination for children

External Email

☐ To whom it may concern:

I am writing you to let you know that I vehemently oppose a Covid vaccine requirement for school age children. It is a gross abuse of power to mandate such a thing. This is a personal decision that should be made by parents. Some of us refuse to let our children be apart of this experiment, especially considering the vaccine and booster are proving to be completely ineffective in the prevention and transmission of Covid. In addition to that:

COVID vaccines remain under Emergency Use Authorization.

2. Children under the age of 18 have a 99.995% survival rate from COVID infection.

3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19.

The children of WA have suffered enough in the last two years at the hands of "leaders" who aren't looking out for their best interests at all. These decisions have hindered their education and ability to learn, caused unnecessary fear, and high levels of anxiety and depression. Enough is enough, trying to force them to be injected with an experimental, ineffective vaccine to get an education, is absolutely criminal.

Thank you.

External Email

Hello,

I have been a resident of Washington my whole life and have loved this place. Recently due to COVID I have seen lots of mandates that are extremely similar to what my parents and grandparents experienced when they sought asylum here in America. I completely against all of the proposed COVID policies that over reaching and immoral. I stand against these the proposed WAC's:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

Please hear the voices of the people. We were built on the basis of a free country. I've always had the right to look at vaccinations and decided if any of them were right for me or my children. It should be the same with this.

Thank you!

To the members of the WSBOH,

I am writing this letter to express how much I disagree with the possibility of the COVID shot becoming mandatory for children to attend schools. A large portion of people will not stand for this and it will definitely cause many issues within our state. Do not allow this to go thru.

Ask yourselves individually a few things:

- have I researched what doctors are really saying? ( ex. Dr. Robert Malone)
- am I putting my trust in only what the government is saying?
- what is the goal of this since kids have an extremely high survivability rate and the COVID shots haven't been proven to prevent the spread?
- do I care how the public feels on these issues and do I represent them?

PLEASE HELP STOP THIS. SAY NO TO MANDATORY COVID SHOTS.

Thank you for listening,

Vince Stremmler

It appears that you are going to allow local health officials to take actions against people who refuse medical treatment, testing or vaccination. The supreme court has upheld the individuals right to refuse medical treatment which I believe will make your rule unconstitutional. On the subject of requiring the vaccine for school children, I think you should not rush into this decision. All previous vaccines were tested for a minimum of 10 years to determine the long term effects/side effects. Could you live with yourselves if a long term side effect were sterility and you had forced a generation of Washington's children to take the vaccine? Maybe you should shelve adding this gene therapy to the required shots for school children especially since it does not prevent catching or passing on the disease.

Subject: Covid Vaccine and Masks for Children

External Email

The population vulnerable to Covid is the elderly and those with comorbidities. The risk of death from Covid for children is far less than many other infectious diseases they have been exposed to. The short-term and long-term effects of Covid vaccine have not been independently studied and since the vaccines are still only under emergency use authorization, I don't see the medical benefit for children.

Is the state willing to take full responsibility and liability to families for any adverse effects to their children? I know the vaccine manufacturers are not subject to liability, which makes know sense seeing every other kind of business has liability risks for the products they make or the services they provide.

Also regarding masking children in schools, Sylvia Burwell, HHS Secretary during the Obama Admin - "masks you buy in the store, the leakage around that doesn't really do much to protect you. Now in the United States , there is absolutely no reason whatsoever to wear a mask." From Dr Fauci.

The bottomline, is if we really care about the children why aren't we talking about a better nutrition foundation and hygiene?

Letter From A Concerned Person to WA BOH

On the 29th day of December 2021, a notification by way of the email was received that the Washington Board of Health Technical Advisory Group (BOH) is exploring adding COVID-19 vaccination to school admission requirements.

#### CLARIFICATION OF THE ISSUES

Any physical and/or tangible evidence that a medical pandemic as legally and medically defined has occurred anywhere around the world over the past two years (December 2019 to December 2021).

To allow the students of State of Washington to make an educated decision on this matter, it is hereby requested that the Washington Board of Health Technical Advisory Group (BOH) provide copies of any and all official and supporting documents in the BOH possession of:

1. Any physical and/or tangible evidence of medical isolation of the purported COVID-19 virus pursuant to the CDC and/or W.H.O. vaccine isolation protocols.
2. Any physical and/or tangible evidence that a "Medical Emergency" exists by statutory definition in the state of Washington.
3. Any physical and/or tangible evidence that any COVID-19 vaccine prevents infection by the COVID-19 virus and that any COVID-19 vaccine prevents the COVID-19 virus from spreading.

Please provide the exact legal and lawfully promulgated OFFICIAL procedure enacted by the legislature within the limits set by the Washington State Constitution and Washington State Law (enacting clause, statutes, session laws, legislative certification and Common Law Rules) that authorizes the BOH to administer medical advice and treatment and/or have any say on a student's medical health care choices.

This correspondence is seeking "validation" that is competent evidence and strict proof that the Washington Board of Health Technical Advisory Group (BOH) has a legal liability and lawful authority in relation to any "medical drug use injections" and/or medical health care choices and are truly acting within the scope of their fiduciary relationship to the students of Washington State concerting this matter.

Sincerely,

Tina McCorkle - Pastor and Grandparent

There is no reason for our children to have to be vaccinated against an virus that has an extremely low risk rate in children to begin with. Children are not the main demographic to get Covid and they are not spreading it as highly as other demographics. The vaccine is currently under emergency use authorization only and there is evidence that shows vaccinated personal are spreading the virus just as much if not more than the unvaccinated. They are more likely to spread the virus being vaccinated as they are more likely to be asymptomatic and that can cause a more serious threat to people with fragile health conditions. Please consider these points.

Subject: No Vaccines for Children

External Email

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State.

I do NOT want vaccines for my children. In fact, we have visited the children's pediatrician who even has recommended the children DO NOT get the vaccine and who also suggested that getting the vaccine is more dangerous than getting Covid. The following statements are being declared by many and are statements I fully support.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am a WA state and Nationally Board Certified Teacher and have been teaching for 16 years. I love our schools and I love our kids! More dear to heart than my career in education, I'm a mom of two teenage children who are healthy and happy! I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It's a horrible idea for many reasons, such as:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its

availability. (This “smoke and mirrors” approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer’s claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are ‘Interchangeable’ • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, “We are never going to learn about how safe this vaccine is until we start giving it” Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer’s studies: Ten red flags in the FDA’s risk-benefit analysis of Pfizer’s EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn’t affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Washington State Board of Health I oppose the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Vaccines prevent disease. Covid shots are NOT vaccines, they are experimental drugs that are NOT proven to be safe, therefore, everyone must be free to make their own personal healthcare decisions. Healthcare status is personal, private and federally protected information. To protect our population, flood our state and nation with therapeutics for early treatment, including HCQ that has a 60 year track record of safety for all ages including children and nursing mothers. Dr. Fauci is compromised by the Chinese Communist Party. He does not treat patients and has a reputation for lying. Fauci funded the creation of this virus bioweapon in the Wuhan China lab by the PLA (China's military). Vaccinologist, Dr. Robert Malone, creator of mRNA used in the shots is on the record saying that the manufactures are improperly using mRNA. He agrees with my first 3 paragraphs. Fauci lied to Dr. Malone. Learn more about Dr. Malone and his international reach on Gettr. Biologist and virologist, Dr. Stephen Hatfield, who has expertise in military biological warfare was involved in Ebola and AIDS epidemic, agrees with Dr. Malone and my first 3 paragraphs. Fauci lied to Dr. Hatfield. Dr. Hatfield authored a book about the pandemic threat. Learn more at DrStevenHatfield.com Reports in the VAERS database is sufficient to end use of the shots. The COVID Shots Are Killing People. More doctors, who treat patients, are joining Dr. Vladimir Zelenko, in speaking out for therapeutics for early treatment and against the shots as it is used today. More Children Die From the Covid Shot Than From Covid with cites to studies at <https://noqreport.com/2022/01/07/more-children-die-from-the-covid-shot-than-from-covid/> Children have little risk from Covid-19, but they do have considerable risk from the Covid shots. Please move AWAY from the policies under discussion, which are unconstitutional, and an overreach of government authority. The policies under discussion are moving our state towards a totalitarian government resembling the Chinese Communist Party. Nola Coston Newcastle WA

Subject: January 12th Board Meeting And Covid Requirements

External Email

Good evening,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

-During the October 26th FDA advisory committee meeting, 16 of the 18 members were very clear that they did not believe "otherwise healthy" children do NOT need this injection. It was specifically stated in their closing comments that they were recommending approval so that "high risk children in conjunction with their parents and doctors" could have it available. They also noted that though some states may try to "mandate" it, they couldn't let that deter them from making it available to high risk kids that may need it.

-Federal Emergency Use Authorization statutes prohibit school mandates of EUA products. The only FDA approved version is not yet available in the United States. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026. Source:<https://clinicaltrials.gov/ct2/show/NCT04816643>

-The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

-Not having language that recognizes and acknowledges innate immunity of the Covid 19 recovered is irresponsible medicine and employs a one size fits all medical approach that does not take into account the individual health needs of children.

-Children are the least affected by this virus regarding severity and most at risk of unknown long term effects.

Thank you for your consideration in this matter.

Kind regards,

Shawna Cosner

It was brought to my attention that you will be voting on covid vaccinations for school age children on January 12. I urge you to vote NO!

I am strongly opposed to this vaccine and I will not be vaccinating my children with this experimental untested Covid vaccine that is not even reliable. I am more worried about the vaccine side effects than I am of the low risk complications of the virus. We have had the virus and we have natural immunity.

This is the parents decision, not the governments. No more controlling our families.

Public schools are already experiencing a huge drop in enrollment because of parents pulling their children out. If you force this vaccine even more of us will be forced to homeschool our children. We will not let you make our children's health choices for us.

Vote no!

Thank you,

Please do NOT move forward with this!

It has been proven and announced by the CDC that the PCR test is faulty. Which in turn causes false positives. Which in turn causes inaccurate inflated numbers.

It is also a known scientific fact that a variant is weaker than the original strain.

It is also known that there is a 99.097% chance of recovery and an even better rate in children.

To our Elected and Non-Elected Public Officials:

The intent of my letter is to inform you that I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \*Young people are at extremely low risk for severe illness from Covid
- \* The vaccines are still not fully authorized for youth - they are under emergency use authorization
- \* There are absolutely NO long-term studies to document ANY history of safety for this drug
- \* Studies and anecdotal evidence now document that vaccinated AND unvaccinated can both transmit Covid. As such, the vaccine does not stop the spread of the disease.

I know many people that will pull their children from the public school system should these mandates be put in place. Schools will lose a significant amount of funding should this happen.

This decision is 100% up to parents, not the state or federal government.  
Thank you for taking the time to read these comments, and I hope you do take all of the comments you receive to heart and to thoroughly think through the consequences of any decisions made.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at very low risk for severe symptoms

The vaccines have been proven to not be able to prevent getting or passing the virus on

Parents should be allowed to make health decisions for their children

We do not yet live in a Marxist state.

We do not know the long term effects of these still experimental vaccines on our children

Many of us think the development of these vaccines is tainted with medical procedures that we oppose on religious grounds

Thank you ,

External Email

Sir/Ma'am -

Please oppose the following WA State Board of Health agenda items. Per the Washington State Constitution, our legislative representatives are elected to make these types of decisions via our legislative process.

1. Agenda Item 9 – Continuance – Communicable and Other Certain Diseases – WAC 246-100.

Please vote against any changes or extensions to this WAC code especially the following:

- \* WAC 246-100-079 – allowing local health officers to use law enforcement
- \* WAC 246-100-045 - to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility
- \* WAC 246-100-040 - following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling and vaccination.
- \*

2. Agenda item 11 – Rulemaking Petition – Chapter 246-105 WAC – Immunization criteria for child care and school entry.

Please vote against any changes to this WAC Code.

- \* Washington State Board of Health should be making no recommendations or requirements regarding immunizations for our Washington State children.

\* All decisions regarding children's health care should be decided by the children's legal parents/guardians.

\* It is irresponsible to suggest or require that our WA state children take a COVID Vaccine that was only released a year ago and has no long term (multi-year) studies completed.

\* The COVID vaccinations for children are still under a EUA (Emergency Use Authorization) status. Following EUA rules, these parents and students should be given full disclosure of risks and allowed the legal right to decline.

Respectfully,

Tracy Harker

External Email

Dear DOH Board Members,

As a constituent, a parent, and a community member of the State of Washington, I am writing to share my comments, great concern and opposition to trying to make COVID vaccinations mandatory for children of Washington State for childcare and school admission.

Among many reasons, including the firm belief of the importance of giving individuals, families and parents the freedom to make their own choices, these are the main reasons COVID vaccines should not be mandated for school age children:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I trust this will be shared and discussed before making any decisions.

Thank you in advance.

Sincerely,

Silvia Altobelli

I adamantly oppose requiring children to be vaccinated against Covid. Not only have the vaccinations been released in emergency basis, it is known that children are not seriously affected by Covid unless they have underlying health issues and the vaccination has been made available for those parents that see it necessary to vaccinate. The data also shows that there have been many adverse reactions, particularly for boys/young men.

☐ Dear Members or Who May be Concerned,

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period! I do SUPPORT Informed Choice Washington's Petition for Rule-making filed by on behalf of ICWA, to establish a new rule that prohibits the board from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

I am completely against any of the proposed Covid Policies that are over reaching, immoral, and unlawful including any and all policies that enforce vaccinations of any kind on all citizens!

I stand against/opposed on these proposed WAC's:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-105

Thank you for listening to the voice of the people!

Sincerely,

Tanya George

As a mother of three children. It is my responsibility to provide and protect them. We have prayed over the vaccines and we do not feel that it is right or safe for our family. This motion is for a vaccine that is still under emergency use and the adverse reactions are not openly being discussed. There are no medical debates happening. It is an overreach of the government and is not built to keep anyone more safe. If you get the vaccine you still get Covid, you still spread Covid and the narrative that it lessens symptoms should be a great benefit for anyone that would want to take the vaccine. I am thankful that for those living in fear over the virus have an option to get vaccinated. This should not divide the people. We are the people of this country United. We have progressed so much over the years to battle medical freedom, access to care, religious freedom, privacy for our medical records, working to provide equal opportunity. Do not be fooled by the pressure of the narrative, this is causing discrimination. This is causing hate. This is causing more fear. If our goal is to be healthy, happy and inclusive. This is not the way. This will only separate our communities. I beg you to read history, they had found reasons to cut out people from common areas and it was always injustice. My heart breaks for those blind to what is happening. I beg that you really take it all in and consider the cries of the people in your communities. This mandate will not solve anything but cause more pain and hardship for all.

Proposed involuntary quarantine / mandatory detainment / isolation in a quarantine facility and children's C-19 Vaccination by public school requirements using WAC code to enforce the rules. The WA State Board of Health will discuss applying WAC codes to include COVID-19 mandatory detainment for all WA State residents who are unvaccinated or refuse to quarantine.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Enacting mandatory detainment or quarantines is unallowable, unconscionable government over-reach. This is a huge breach of personal freedoms guaranteed by the US Constitution. Enacting mandatory detainment will cause many residents to leave WA and move to states that reject such government tyranny and abuse of power. Also, new employees will not want to move to beautiful WA with such tyrannical laws in force. Who is going to pay for police to force us into mandatory detainment camps? Where are these camps located and how are they funded? We want to live in the "FREE" state of Washington; we do not want a communist state where the governor forces mandatory detainment, and will immediately leave the state to live elsewhere.

To whom it may concern,

Please do not mandate the Covid 19 vaccine for school age children. The statistics do not make sense for this. Children have a VERY low rate of hospitalization or death for cases of Covid-19. I have a 6 and 4 year old and will never inject them with this experimental vaccine that doesn't even work. Both my kids have had Covid and they only had stuffy noses. I'm fully vaccinated as of three months ago and my wife is not. We both had Covid a couple weeks ago with the SAME minor symptoms. So please tell me how this vaccine makes sense or needs to be mandatory for children? This is a "pandemic" that has been totally blown out of proportion. If the mandate is made effective for public schools I will be removing my children immediately. We will be forced to pay for private school or we will move out of state all together.

Respectfully,  
Thomas

Why on earth would you try to force people to take a vaccine that has proven to do more harm than good, in the case of children. Children are statistically more likely to die on the playground during recess than from this disease or any of the variants to date. There is zero evidence that asymptomatic children pose a risk to anyone. Do not try to force children to be vaccinated, leave that decision with the parents.

Dear State of Washington Board of Health Members;

I learned today that you are considering a requirement of all students to show evidence of a Covid-19 Vaccine similar to the list of other vaccine requirements.

If the Covid-19 vaccine was a fully vetted tool with proven efficiency that would be one thing, however many of my colleagues who have received the vaccine have still contracted Covid 19. The vaccine does not stop the spread of the virus. I wish it worked, but it doesn't. This has been stated by our own CDC officials.

There are also various studies that show the vaccine is harmful. Several Doctors have testified that young children should not be required to take the vaccine.

I have great concerns about anyone being mandated to take this experimental vaccine and ask that you do not move forward with any requirement. Lives are at stake and it would be a great burden for you to bear if children were harmed.

Thank you for your consideration of this matter.

Sincerely,

Laura Hoggatt

Concerned Citizen and grandparent

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Mandating Covid vaccines for children

11.

Are you Pro or Con on the proposal?

2.                      Con

---

No emergency vaccines should be given to children. There are no long term studies. Sweden has banned these vaccines for anyone under 30! Why are we still giving them to young people at all. There are huge increases in myocarditis and pericarditis! I will do whatever is necessary to help my relatives leave the public school system.

The state government of Washington is overstepping its boundaries. I and my family are opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Covid isn't a threat, kids are not at risk. Mostly it is not the states place to decide what is right for me or my family.

External Email

Good afternoon,

As a Washinton state resident for over 50 years, this is the first time I have ever felt compelled to address decision making at the state level surrounding the laws and regulations regarding our youth.

It has come to my understanding the State Board of Health is meeting this month to determine whether or not to mandate the Covid Vaccine for school attendance next fall and moving forward.

According to the current criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine. I do not see how this meets the Board of Health requirements. I strongly recommend against mandating for school until the vaccine proves immunity to stop transmission like other common vaccines do. Such was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case, in which it stated mandates could only be considered to "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission. If it did, we would not have a surge in current Omicron cases.

Furthermore, long-term studies are void in all of the current vaccines being administered to adults and children alike. I shudder at the thought of a "recall" in five years due to an alarming number of negative vaccine-related outcome because of the hasty choice in mandating such medicine without the standard time in order to study safety. And thirdly, children have not, and are not, suffering needlessly from any of the Covid viruses. This has been confirmed over and over again by our own CDC data. To mandate a new and medicine for which there is minimal risk for a population that is essentially untouched by this virus leads us down a road of unnecessary measures and possible negative outcomes.

Legally, ethically, and morally I firmly a oppose such consideration for the children of Washington State.

Thank you for your time,

Heather Ancheta

Subject: Please do NOT require COVID vaccination for school children

External Email

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

As the mother of 3 school-age children in Bellingham, I can say with certainty that a decision to mandate kids to have this shot would wreak havoc on many families and within our schools.

I'm sure we can all agree that vaccines are an important and effective tool for preventing many diseases- and I have always been perfectly willing to utilize them to protect my own children, and our community. However, there are many reasons why (most) parents have chosen to wait on having their children receive these particular shots including, but not limited to:

\* In the scheme of things, the covid vaccines are still quite new and most parents, (while willing to receive the jabs themselves) are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light.

\* In terms of how the vaccines will effect public health- that science is still evolving as well. Considering that both vaccinated and unvaccinated individuals can contract and pass along the virus, many parents remain skeptical that any perceived or real risk is actually worth any perceived benefit. It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

\* Covid in otherwise healthy children is not a large risk- and the (extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the freedom to choose their own level of risk for their family.

\* There are MANY medical, religious, and other deeply personal reasons why parents are hesitant to give this shot to their children. Sadly, most of these reasons will not be covered by "exemptions"- forcing parents to choose between their children's health or their schooling. Please DO NOT force parents to make this choice.

For whatever reason, the covid vaccines- effective or not- have been profoundly politicized (on both sides), with most parents falling on one side or the other. Because of this, it is reasonable to assume that a decision to require this particular vaccine at this

time would directly cause a mass exodus from our schools, shattering our communities and negatively impacting public health across the state.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families- and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that no one cares more about a child's health than their parents. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community.

I sincerely appreciate your time and consideration.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed,

---

I am writing to express my concerns in regard to items on your meeting agenda. Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities? Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

11.

Are you Pro or Con on the proposal?

2.                      Con

---

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. My lack of support for this mandate stems from the following criteria not being met under sections II and III on the list of criteria: 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child-care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • Forcing parents to vaccinate their children (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, insignificant, rate of hospitalization or death, while claiming that this vaccine mandate will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Therefore, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

Greetings,

I am writing to have my statement included for in the upcoming board decision on requiring Covid vaccines for children attending public school.

I am in strong disapproval of the mandate for children under 18 to be required to receive the COVID vaccine. I believe children should have the right to access public education without being required to receive a vaccination that is still in emergency use standing, and does not have sufficient long term data to provide parent with adequate safety and efficacy information.

Please make the moral and right decision to allow parents to decide whether or not to provide their child with a COVID-19 vaccination.

Sincerely,

Aimee Bloom

There has been a number of testimonials that these injections, at a surprisingly high rate, lead to a number of short term health issues. Then, they may lead to long term issues, but we don't know yet. Due to the info available, and the info not made available, I believe parents should have autonomy on their child's health. Then, leaving up to a health officers discretion, the ability to detain a whole family for up to 30 days,... Terrible idea. After reading through this, it's full of ridiculous ideas. Just... No.

Hi,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thanks, Shannon Sauter

Subject: Please understand gravity if Jan 12 decisions

External Email

Regarding the decisions being made Jan 12. Please consider the voice of these people and the gravity of the decisions being made. This is unprecedented and extremely concerning. This response is disproportionate to the risk, and a dangerous overreach of government power, a slippery slope that is not easy to reverse once set into motion.

I strongly ask that this matter be considered in the most serious manner because this is a huge decision that changes the course of human rights and sets a precedence for dangerously increasing government power, which history shows is not easy to reverse when it gets out of hand.

The decisions being made to increase government enforcement rights, takes away the power of the people, and infringing on their human rights to an in appropriate, and dangerous level. This is a slippery slope we must stop. This is not in the interest of the people or public health, physical and mental.

Please do not mandate vaccinations for my children. I am pro-vaccination but more so pro-choice when it comes to any medical procedure especially one requiring injecting something into my or my child's body.

I am also against government overreach which this is absolutely, and the dangerous slippery slope this decision may open the door to, at the detriment of the people's rights, families rights, and children's rights.

These decisions of power being made are not proportionate to the risk at hand, and this type of government power is not in the best interest of the people. Covid is not affecting children more than some other illnesses that have come and gone, and the mandates being aimed for are suspicious and becoming criminal at best against the constitution of the United States of America.

Mandating injections as a requirement for a child to receive education is not in the best interest of children or the people of our state, and again, an overreach of government power, especially when there has been clear evidence of intentions to eventually not honor exemptions. While understand this is not the case now, one would be dense to not see it coming as the next step as power and control is obtained by the government and taken away from the people.

Of huge concern to me is, Is the idea that law enforcement could be involved in any manner with this health issue. That is a complete red flag. I am opposed to any law enforcement or any government agency obtaining the right to detain, reprimand or penalize any people on earth, especially in the United States of America, and Washington state, because they will not agree to a medical procedure, injection, or choose to be among people they choose to be among. This again is a private citizen and human right, and a right given to us in the Constitution of the United States of America that any state law would be in conflict with, and frankly this is not right.

This route is an completely inappropriate and dangerous overreach of government and what's most concerning is a slippery slope.

Thank you for your time.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. The disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are opposing this plan should be charged with treason.

---

While COVID-19 is a legitimate health concern, for the vast majority of people it presents no more of a risk than the flu. For children, the risk of severe illness from COVID-19 is almost non-existent and should not call for emergency actions. In addition, the current COVID-19 "vaccines" are experimental, not well tested, and don't stop infection or the spread of the disease. To require the vaccine for anyone, especially children, is irrational and potentially dangerous.

Covid poses extremely low risk to younger children. They are most often asymptomatic or have very minimal symptoms. And since it has been proven that immunization does not stop contraction or spread of the virus the immunization poses more harm than good to the very young. Therefore we should not be forcing our youth to get a vaccine that is only cleared EUA when it doesn't pose great benefit to them.

To Whom It May Concern:

I am writing in response to the recommendation to require the covid-19 vaccination for public schools. There have been many things that have disgusted me with both our state government and our public school systems the last two years, but this has got to take the cake.

Requiring this vaccine would cripple an already declining school system. Declining in numbers, declining in morals, declining in education. As a mother of 4, I never once thought that I would homeschool our children. I was forced to homeschool my son in 2020 when he was supposed to enter kindergarten. Now I am preparing to homeschool my daughter as well. We have been holding out hope that perhaps things would get better and we could send our son into second grade. That I could be afforded the right to use the public school system that we pay thousands for in taxes every year. Instead it seems as though we will be carrying into another year of financial sacrifice and a heavy burden on me to provide my children an education. To try to educate my oldest two with a newborn baby and a toddler running around. It has not only been a financial and time sacrifice but it has effected our quality of life and my health as I struggle to accomplish all the government has put on my plate.

I, along with many families, will not vaccinate our children against a disease that for most kids is a minor cold, if they even have symptoms at all. I also personally know many families effected by life-altering vaccine injuries from this vaccine. This includes children.

If this passes, we may be required to move in order to have the life that we worked so hard for, that you are stripping from us. To sell our home that we saved our lives to build. The home we planned to grow old in and raise our children near family. We may need to give up the dream career my husband worked a decade for..all to protect our children. I am disgusted that this is even on the table. I hope and pray that the elected leaders will actually represent us. That I can actually have a voice in my own state and life. That you protect Washingtonians instead of allowing a continued mass exodus as many have already fled the persecution of our state in hopes to once again live in freedom.

Thank you for your time.

---

I am against mandating children for Covid shot because children are extremely low risk of dying OF Covid it's still under EUA. Vaccinations should be the decision between the Parent of the child and the Doctor! Where there is risk there HAS to be Choice! Every medicine has a risk component. As an RN I had to give patients an informed consent. Which included adverse side effects. If a vaccine is mandatory a patient can't properly be informed, because by definition it is being coerced.

This is an unnecessary medical procedure for most children. This is like requiring all of them to remove their tonsils to go to school. If your child is at risk, you can help make that decision. This disease does not have the ramifications on children that it does on the elderly. Requiring it is foolish, wasteful, and untested long term.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

I am in support of the informed Choice Washington's Petition for Rulemaking. Item 11 on January 12th agenda. Asking the board to establish a new rule that prohibits them from

adding any Emergency Use Authorized product, or any licensed product that lacks completeleted Phase 3 trial studies, to the school required list.

11.

Are you Pro or Con on the proposal?

1. Pro

---

No Emergency Use Authorized product shall be put into our childrens or any persons bodies by force through our government or health department or school districts. I support this proposal as no person shall be forced to put something into their body that is against their personal, religious, and medical choices. We are not NAZI Germany and our Government and our Health Department is not Adolf Hitler.

COVID shots should absolutely NOT be a requirement for our children. The vaccines are still only EUA (emergency use authorization). New variants continue to change the outlook for COVID and many have natural defenses already in their system. Please keep this a parents choice, not a mandate.

Using law enforcement to detain and forcibly quarantine those who have chosen not to participate in the injection trials is 1) a poor use of law enforcement agents, especially when they are already in such short supply; 2) a violation of our right to private medical choice (see Roe v Wade which was a decision based on a woman's right to make private medical choices concerning what she believed was the best choice for her body); 3) violates our right to freely travel as protected by the US Constitution; and 4) is such a horrifying and obvious repeat of history I am ashamed to even have to write this. It is absolutely shocking that this is even being entertained. Requiring Children to be injected with drugs that are not tested is wrong. I know we have done it in the past, but that hasn't always turned out ok. A major reason anyone trusts the FDA is that they protected thousands and thousands of women and babies from seemingly harmless drugs that ended up causing life threatening development issues in babies. Why would we voluntarily inject our children with a mRNA vaccine that does not have the necessary years of testing to find out if it causes major medical issues. I have a right to protect my body from harm and a responsibility to protect my children. You have a responsibility to govern per rule of law, which you have been grossly neglecting by giving the Gov Inslee unlimited emergency power. Again. I am so disgusted that even have to write this. Please do the right thing and protect our God given rights.

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates, PERIOD. The science does NOT support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals. Children are statistically at ZERO risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. ([www.fda.gov/media/151710/download](http://www.fda.gov/media/151710/download)...the <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710/download>> required studies on children will not even be completed until May 31, 2027!!!!!! And that is only one of the required pediatric assessments!) There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed. STOP USING OUR CHILDREN AS TEST SUBJECTS!!!

Sincerely,

Amy Voges

To: DOH WSBOH  
Cc:  
Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

To Whom it May Concern,

I am writing to the board to express my belief in not forcing anymore COVID vaccines on our youth and the person not wanting the vaccine.

My name is Scott Dawson. I am a four year Marine Corps Veteran, with one tour in a combat theater in 04. I graduated from Richland High School in 01. After serving my country and defending the constitution of The United States of America, I went to college and majored in Environmental Science and Minored in Biology. I work as a Health and Safety Professional and teach Hazardous Waste for the three prime contractor out at Hanford.

From all that I have read, heard and seen, there is absolutely no need to force a vaccine against something that has a relative high survival rate. This is not more deadly than Influenza A (H1N1). The numbers have been dramatically overblown with actual deaths directly related to COVID. In my 39 years of being alive I have never seen such force of a vaccine that doesn't prevent infection, that does kill people, that does leave people with other ailments. I know we have always mandated vaccines for kids in school, but some kids, they get a pass on having to get them. Those vaccines were created to stop or extremely limit the infection or effects from the infection and actually help. COVID vaccines don't do a thing in stopping infection or death. COVID is just another flu, and we all need to start living our lives as such, cause no matter how many vaccines and booster are given out, it will never go away. I have never seen a vaccine pushed so hard on the people against a virus that has a .02% chance of dying from. Enough is enough. This state should follow the likes of Florida and every other state that is wide open. People need to build an immunity to this virus. Also, from my understanding, from what I have seen and read, the virus changes and mutates in the vaccinated people. I see a rise in cases of COVID and looks to me like a lot of the cases are people vaccinated.

Second thing. I keep hearing about forced quarantine camps for those unvaccinated, just like in Australia, maybe not as severe as Australia, but none the less forced. That is not going to fly in this state or any other state. That is the most abusive force of power ever. It is extremely unconstitutional and absolutely absurd to even bring it up. That would only cause more problems in this state and the whole country. To quarantine people due to their stance against COVID, and COVID vaccines, is not only unethical but very much discrimination to all of them. By segregating people due to their vaccine status is disgusting and wrong.

Not one person on this committee or board have the right to tell me what I can do with my body and what I chose for my medical treatments. Especially when it comes to an experimental EAU vaccine.

Thank you,

Scott Dawson

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine does not stop the spread of the disease.

Sincerely

Randy S.

Board Members:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

This vaccine is authorized for Emergency Use ONLY. The one that is FDA approved is not available here, please be honest and thorough in your understanding of that.

More risk/reward testing and evaluation is needed on children. There is no emergency need to use our precious resource of Washington state children as an extended mandatory scientific experiment.

Wait. Please wait for ALL levels of testing to be completed before requiring this vaccine for our children and grandchildren.

I am NOT an anti-vax person. I am a supporter of vaccines that have been THOROUGHLY tested long-term and are approved safe, along with informed consent of all possible side effects. I have had many vaccines personally, as have my children and grandchildren. The SAFETY of this particular vaccine is what is in question.

Respectfully,  
Ranita Goodin

Hello!

I am a parent of three children ages from 5 to 14 and I am against any type of vaccine mandates especially for kids. There is almost no chance for them to get any serious complications after being sick with Covid-19 according to data and science. Yet the risks associated with vaccination is high considering lack of studies and long term effects.  
Thank you!

Sent: 1/7/2022 9:13:33 AM  
To: DOH WSOH  
Cc:  
Subject: forced quarantine/isolation and forced vaccine

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State and ANY forced vaccine requirements for any person. Additionally, forcing anyone to quarantine or isolate against their will is a direct violation of their basic human rights. Asking to use local law enforcement to conduct such vile, inhumane and illegal acts is preposterous at best.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. Who is going to pay for any death or disabilities that arise from these mandates? Are YOU?

---

Any new medication takes a minimum of five years to fully understand the risks and benefits. There are plenty of examples where a new medication that was thought to be safe ended up proving to be harmful many years later. So taking away a parent's autonomy in this situation, where a child is more likely to die in a car accident than from COVID, is irresponsible and unethical.

Subject: Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children!!

External Email

Good Morning,

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents, like myself, are already about to Home School our kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and would take away more of American's constitutional rights and God-given freedoms!!

Thank you,

Ryan Pasibe

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest against recommending a vaccine for Covid for school aged children who attend school in Washington State. I am a 36-year veteran teacher. I am against imposing this vaccine on our children. I believe this to be a horrible abuse of power.

The available Covid vaccines are still of an experimental nature and have not been tested to prove their value and lack of long-term consequences. Never have we been forced to inject our children with a vaccine that has not undergone years of safety trials. Never have we forced children to receive a vaccine for a disease that primarily poses a risk for adults with comorbidities or are elderly.

School aged children have a 99.9998% survival rate from Covid. The vaccines do not provide protection against getting Covid as is seen by the number of "breakthrough" cases of those already vaccinated and boosted. Why require it?

The vaccines currently available are still only EUAs. Congress permitted the FDA to grant Experimental Use Authorization (EUAs) so that any American in a personal emergency can choose whether to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the

individual right to access experimental treatments, not of government right to compel such treatments.

It is irresponsible to impose covid vaccines on children when there are side effects as grave as myocarditis already being reported and no long-term tests have been done. Parents must be able to make this decision for their children. You must honor their right to choose what is best. You must not marginalize parents' rights to take care of their children.

I live in Spokane, and I believe my side of the state is certainly underrepresented on this panel. Please look long and hard at what long term consequences of this kind of recommendation could have on our children, our school system and our communities.

Sincerely,

Barbara Miller

Subject: Coercion is not consent

External Email

To whom it definitely concerns!

I am a resident of Pierce County. I am writing in today to oppose these outrageous proposals. Specifically WAC 246-100, 246-100-040, 246-100-045, 246-100-070, 246-105.

I know from reading these proposals it does not specify coronavirus nor does it specify the experimental coronavirus shot. However, they do state that the forced quarantine and/or forced vaccination for specified communicable diseases including but not limited too... which obviously leaves it open ended. This virus has proven over the past two years that there is no stopping it. Locking up your residents won't change that.. look at Australia... has had the strictest lockdowns.. high vaccination rates....even has these quarantine camps you're proposing... And yet... covid is still running wild.

This shot was created based of the original strain of the virus, which is essentially extinct at this point.. it is proving over and over to not prevent the spread of the virus... why is this continuing to be pushed!!?

Especially on to children! Children have been, since the beginning of this "pandemic" at lowest risk for severe illness.. we have no idea the long term effects this experiment has on full grown adults.. we do however know for a fact that it is causing heart complications and more issues in previously healthy adults.. so again, why would we mandate this for our completely healthy children? Forcing parents to enroll their children into a medical experiment just to attend school or child care is absolutely disgusting and goes against the Nuremberg Code.

Coercion is NOT consent.

This is America.. a free country.. let's try and keep it that way!

Tracie McGlothern,

I am taking an oppsoing position on this proposal for many reasons. First and foremost I am not ok with a vaccine that was produced much faster than vaccines should be produced, and not enough studies being done on it to see if it's safe for our kids, or any adult. I have many family members who have gotten the vaccine and have had horrible side affects. My sister developed a massive hematoma inside of her liver. My friend recently got the vaccine and his heart rate instantly shot up, and is now on a heart monitor monitoring his heart rate. I've had 2 family friends die, within a few weeks of recieving the vaccine, otherwise healthy adults. This is just a few I am listing, and there are many, many more individuals that I know that have had awful side effects from this "safe" vaccine that the state of is proposing mandatory on our children and citizens of the state of Washington. I ask the state of WA to throw the proposal of mandatory vaccines for our children out, for the simple reason that it is completely UNSAFE!

External Email

Greetings,

Thank you for the invitation to offer public comment regarding your upcoming discussion on implementing involuntary quarantine and children's C-19 Vax mandates on children on Wednesday, January 12, 2022.

I am writing to register my strong opposition to WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also strongly oppose adding a C-19 "vaccine" to the WAC 246-105 schedule of required vaccines for children to attend schools.

Please resist the urge to "do something" that tramples individual choice in a misguided attempt to combat a virus that has an extremely high survival rate for all but the aged and infirm.

These proposed expansions of authority are simply not warranted given the facts and are in fact an affront to body autonomy and parental rights when it comes to our children.

Now is not the time to continue to allow fear to dictate public policy. REJECT these proposals.

Cordially,

Shawn Jensen

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. ---

This is a viral gene that is injected into a child's cells. The gene forces the body to make toxic spike proteins. These proteins can cause permanent damage in a child's critical organs, including the brain, nervous system, heart and blood vessels, reproductive system, and immune system. Once these damages have occurred, they cannot be repaired. Additionally, this novel technology has not been adequately tested. At least 5 years of testing are necessary to really understand the long term risks. Harms and complications from new medicines often take time to reveal themselves. I do not want my children forced into being a part of the largest medical experiment in human history. Lastly, the entire reasoning behind child vaccination is a lie; children represent no danger to adults of any age. It's actually the opposite; their immunity after overcoming Covid is critical to saving our families and our entire world from this disease. The risks posed by Covid for our children is minute. The risks of even the KNOWN health risks surrounding child vaccination is significant. The risk/benefit analysis is not even close. Please consider this viewpoint when making your decision on mandatory child vaccination.

To: DOH WSBOH  
Cc:  
Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

Dear WSBOH Members,

I am writing to express my grave concern about the forced quarantine and counseling for members of the public using their own free will not to participate in the experimental vaccines currently offered for Covid 19 and forced vaccinations for children. My concerns about rolling out such a draconian policy that violates the fabric of this country's founding principles are many.

One of my largest concerns is that in watching the vaccines be given out over the last year, it is clear that they are not working. Almost half of the infection rate of Covid patients are already vaccinated. States with higher vaccine rates do not experience lower Covid rates. People who are fully vaccinated are not stopping the transmission of Covid either. It is also not proven to be a safe vaccine. People suffer at a higher rate from complications from the vaccine than they do from Covid itself. Forcing people to get vaccinated is clearly about power and submission, not about preserving public health. Statistically, children have a higher chance of dying or having an adverse reaction to the experimental Covid vaccine than they do from contracting Covid itself. At this point in history, many of the children you propose to force vaccinate have already had Covid and have valuable antibodies. Allow parents to choose what is the best decision for the individual health of their children, not the state.

As a mother, I know my children more intimately and fully than any health care professional, and certainly more than the state. I have witnessed their growth and development since I first felt them in my womb. I choose to make decisions for my children's health with information and discussion from professionals, not by coercion and fear. Inform parents and respect their rights and their timing to make the decisions necessary for protecting their families. Protecting that sacred right of a parent is a paramount responsibility of an elected official and member of public education. I know this well as a former public elementary school teacher. Please protect children's health, respect the fiber of the Washington family and protect democracy by fighting against the proposal to force vaccinations on children and force quarantine on non complying families.

Not enough is known about long-term effects of mRNA therapy. Children are not at risk for death or long-term effects from Covid and are not carriers or spreaders of the disease. Parents should have the right to make this choice for their children.

I have 4 kids-i am an expert in caring for them and deciding what is right for them.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The unconstitutional proposal of focusing school aged children to get the experimental Covid vaccination

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I am 100% against forced covid vaccinations of school aged kids to attend public schools, for a virus that they have a 99.98% survival rate of. The science has proven that kids are NOT at risk of catching, dying or spreading the virus. On the other had the science is proving that the risk associated with taking the experimental vaccine is much greater! They have a 1-70 chance of developing heart problems. There is no long term studies done on the effects it will have on them in the future, like infertility, cancer, lowered immune systems etc. If this unconstitutional idea is passed, I would expect a mass exodus of families from the WA public school systems immediately. I know that my children will never be a part this, even if that means we have to move. This should be a decision that is made by each individual family, not the government. I ask you to please vote against this for the sake of our children and their future!

Subject: NO FORCED COVID SHOTS FOR CHILDREN

External Email

As a parent and a concerned citizen of this state, I am passionately opposed to the implementation of mandating the experimental vaccine on school aged Children. I am also VEHEMENTLY opposed to the unconstitutional acts of detaining and forcing medical testing and/or treatment upon our citizens.

After viewing your recent TAG meeting, I feel that your panel is one sided and wondering how you came up with this group of individuals? Where are the naturopaths and holistic providers? Where is the opposition? In order to make an INFORMED decision, you must have ALL the information.

School aged children are NOT the reservoir for the virus. They have never been the issue and DO NOT need this EXPERIMENTAL injection. If you require this, you will see the largest mass exodus of children from the public school system ever.

The ONLY reason I finally, after hours of deep thought and conversation, sent my children back to school in a stupid mask all day (Psychological CHILD ABUSE!) is because they are older and are enrolled in our local CHOICE school. If masks and vaccines are mandated next year. My decision will be easy. GOOD-BYE GOVERNMENT \$\$\$\$ FOR MY KIDS: HELLO HOMESCHOOLING!

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Subject: Do NOT involuntarily detain individuals or mandate Covid vaccines for children

External Email

Hi there,

As a 38 year resident of Washington state I implore you to not move forward with mandatory child covid vaccinations or use law enforcement to involuntarily detain individuals and families.

There are innumerable reasons why mandating child covid vaccines is wrong, but for the sake of brevity, here are my top 4.

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. Children aren't main drivers of covid transmission.

Also, do NOT move forward with using law enforcement to detain people involuntarily. Again, there are many reasons why but my top 2 are below.

1. Omicron (the most prevalent variant) is nothing more than the common cold, with the most common symptoms being cough, sore throat and fatigue.
2. Our law enforcement is already stretched thin with fewer officers than ever before (I live in Seattle). Law enforcement should be focusing their time on protecting citizens from real threats and problems, not the common cold.

A very concerned WA resident,

Tiffany

To Whom it May Concern:

I am sending you my Public Comment in OPPOSITION of Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose any COVID-19 injection mandates, period!

Additionally, I am in full SUPPORT of Agenda Item #11, which is Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA) asks that the Board establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product or treatment, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

This is my official stance on these issues, and I would like them documented as legal Public Comment.

Thank you for taking the time to recognize that the public is indeed a massive part of any decision-making that will be taking place in the matters of informed choice, informed consent, and parental rights.

When has the government putting individuals in camps ever been a good idea? Forcing someone to do something against their bodily autonomy goes against our rights granted to us via the constitution as well as Nuremberg Code. If you are allowing the state to make law enforcement do these things in what they consider is complying then where do you draw the line for what is considered OK or not? This is an extremely slippery slope and gray area. This is a power grab and is extremely dangerous. Viruses will continue to be around forever. Forcing people to isolate, quarantine, take tests, get a shot, etc against their will is not the answer.

Requiring school children to get the vaccine to attend school is wrong. The amount of severe cases in children is very small. If it becomes a law I will be pulling my kids from school and either home schooling or moving out of state. I work in a department where i was required to get it and it has done nothing to stop people from getting covid. There has no t been enough research to require children to get it. We don't know the full long term effects of the vaccine. Also detaining people in a quarantine facility is just wrong. This is a free country. What happened to free choice!!

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

EUA vaccines should not be made mandatory for any of our children. We are still in trials and have no idea what the long term affects are of this vaccine. Children have a very low risk of dying or getting severely ill from Covid. We need to focus on accurate testing and preventing the spread of covid some other way. If the vaccine is mandated there will be a mass exodus of children from schools. If you mandate EUA vaccines then you the board will be liable for any future lawsuits, medical bills, and a lifetime of knowing that you were the cause of sterility, heart disease, etc. Also the covid vaccine will not "prevent" the disease from spreading, nor does it stop you from contracting covid. Parents are strongly opposing this mandate and I have been told that if the state mandates this for our children that they will pull kids from school. Leaving our state at higher risk for lower education, poverty, and children not graduating.

To whom it may concern,

I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding COVID-19 vaccines to the WAC 246-105 schedule of required vaccines for children to attend schools for the following reasons:

1. During the October 26 FDA advisory committee meeting, 16 of the 18 members were very clear that they did not believe "otherwise healthy" children do NOT need this

2. Federal Emergency Use Authorization statutes prohibit school mandates of the EUA products. The only FDA approved version is not yet available in the United States. Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007 - the main clinical trial in children and young adults with BNT162b2 - has an estimated completion date by May 5, 2026. Source: <https://clinicaltrials.gov/ct2/show/NCT04816643>

3. The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation.

5. The vaccine has no long term testing and has not been tested enough to ensure its efficacy and safety in children. Myocarditis in young boys being of grave concern.

7. The vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission. It is not on the recommended Childhood Adolescent Immunization Schedule.

<https://pulse.seattlechildrens.org/should-schools-require-covid-19-vaccinations-an-ethics-expert-weighs-in/>

Are you ready to be held fully responsible and personally liable for any potential trespass by harm to sons and daughters if this goes forth? I, along with many others, intend to hold you responsible for any irreversible health damage from the Covid 19 vaccine, so please vote from your innermost consciousness and the scientific data, assessing risks and benefits carefully.

Children have gone through 2 years of a major pandemic (Covid-19, Delta, Omicron and H1U and survived with natural immunity. There is no common sense or scientific reason to pass this proposal. Secondly, based on the FDA and CDC websites, the vaccine does not protect nor prevent transmission. This vaccine never was clinically tested and is only permitted to be used because of the EUA. There is evidence of serious adverse effects from this inoculation from studies all over the world. This so called genetic engineered vaccine shows no information upon informed consent. This would be a travesty if passed.

Dear Board Members,

I am appreciative of the notices going out to residents who've signed up about the meetings taking place regarding the health of Washingtonians. I thank each of you for your service, I know that it would be a difficult spot to serve in during a pandemic, especially when there are two different sides to this.

I would like to comment on the requirement for vaccinations for school-aged children and those in childcare settings. First of all, overwhelming data shows that thankfully children are spared from severe illness from SARS-CoV-2. There is NO data available from any country, peer-reviewed or in preprint, that shows that children are suffering from high hospitalizations or death rates from this disease. Even Dr. Fauci commented just this week that the data that shows children in hospitals are there WITH Covid, not BECAUSE of Covid. Our society is so quick to sacrifice children for the sake of adults, and that just is not the way that we ought treat children. We are here to raise them up, not stuff them into a corner until its convenient for us to include them in society. Parents who want to vaccinate their children, thankfully, have access to the vaccine and are able to do so freely. There are many parents who do not want to vaccinate their children against Covid because while there are some studies, there is no way for anyone to definitively say that there will be no ill effects to their bodies long-term. I will never sacrifice my children's long-term health for something that has shown not even a smidge of short-term efficacy. When we daily see the "famous" in our society who have been vaccinated and boosted coming down with Covid (and many in our own communities!), it does not play well for science that the vaccine does any good, and we just don't know the damage that is possible long-term since this vaccine has only been out for just over one year. The cost does not outweigh the benefits to anyone but the elderly.

Additionally, according to the purpose of WAC 246-105, it states: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers."

The CDC has changed the definitions during the pandemic that vaccines don't prevent disease, they reduce symptoms. If you pass this vaccine mandate for children, you are over-riding your own laws because it is explicitly stated that the covid vaccine DOES NOT PREVENT Covid-19. The CDC website states that the vaccine "is effective at helping protect against severe disease and death." That is NOT the same as preventing illness. This vaccine does not prevent disease.

I ask this board to trust parents, to realize that the government's role is to protect our rights from being infringed upon, NOT to give us ultimatums and purposely cause destruction. Citizens rights are to life, liberty and the pursuit of happiness; we are all given the responsibility to make life and medical decisions for ourselves when we become adults. We aren't too stupid to read data and come to our own conclusions. If we cannot force the homeless who clearly need care to be housed in a place where they receive medication, food and shelter, then we cannot force children who cannot consent to receive vaccines with no long-term safety studies.

Thank you.  
Sarrah Burnett-Lisle

To whom it may concern,

I am writing to express my complete disagreement with the discussion on January 12 regarding WAC 246-100-070. It is a travesty to even consider the forced quarantine of people who have the nerve to follow the constitution and rule of law regarding bodily autonomy and right to feel safe and secure in our own home.

Just a few reasons:

- \* This is illegal
- \* It is totally unnecessary, and dangerous
- \* VAERS already reports over one million adverse reactions to the COVID vaccines and 21,000 deaths.
- \* Lastly, children are at greater risk from vaccine injury, but little risk of infection or transmission. It is beyond illegal to vaccine kids with this experimental vaccine, and truly criminal.

Stop this illegal, immoral nonsense.  
Sincerely, Roy Holman, Everett, WA 425-303-8150

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following :

Regulators cut 3 year clinical trials at 6 months and unblind the study. We will never know whether vaccinated individuals suffered long-term injuries including pathogenic priming- vaccinating children and you're actually enhancing the infection that the vaccine was supposed to protect but actually makes it worse and can kill children. Eliminating the control group indicates government is working to hide injuries. Mass vaccination is the imposing of tyrannical controls !

Government has no right to take over the roll and responsibility of a parent.

To Washington State Government,  
I love our state. I've lived here for the majority of my life. I want our children to continue growing up in our beautiful state with ALL it has to offer. Since Covid all our state has to offer has gotten more and more restrictive especially for our kids. They are the least at risk for Covid and unfortunately have suffered the most socially because of it. The long term consequences for the vaccine are unknown. I will not put our girls at risk of the unknown side affects if their health is not in danger. If you mandate the vaccine for schools we will move out of the beautiful state that I love so dearly for the well-being of our family. I am not anti vaccine. I am an incredibly strong advocate for the long term health of our girls who have their whole lives ahead of them.  
Kindly,  
Shelley McCanna

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There is no known documentation regarding this vaccine, and even less about boosters. Parents should be the decision makers on their kids medical health - not mandated by Government.

I will not support subjecting our kids to any COVID vaccination.

There should NO such law passed or required. Let our kids go to school the way it was intended - not mandates that could risk our kids lives. Kids are resilient and also need to build immunity, not suppress it.

To that end, if this is forced, I can see a mass exit of students from our schools.

Please do not force children to take a drug that has not been approved by the FDA. Approved for emergency is not the same as being approved as a drug. Children are at minimal risk for hospitalization or death from COVID 19. It remains to be seen just how much risk the vaccine poses for children over time. A good immune system is the best defense against this virus, so let's focus on that.

Please do what is right for children and don't force this injection on them. Let parents decide what's best for their children.

Thanks.

As a mother of a child in the Mead School District; please reference the below attachment for the Washington State Board of Health related to WAC 246-105-030 for their deliberation about requiring a COVID 19 vaccination for Washington schools/child care on January 12, 2022.

Sarah Peters

January 6, 2022

Comments presented to the Immunization Advisory Committee for the Washington State Board of Health related to WAC 246-105-030 for their deliberation about requiring a COVID 19 vaccination for Washington schools/child care on January 12, 2022.

My initial comments are related to general information known to all about this pandemic. First, the only vaccines, even for adults, available in the US are all Emergency Use Authorization types. The Pfizer Biontech FDA approved vaccine Cominarity is only available in Europe and this is only available to adults not children anyway. Second, since there are many new treatments that appear to be effective in preventing morbidity and mortality at the same time as Omicron is rampantly being passed by both vaccinated and unvaccinated it doesn't make much sense to try to prevent spread by further vaccination. Third, the research gathered over the past two years suggests that children are at very low risk of morbidity or mortality from the virus, and at least with previous variants not effective spreaders. Children who have been infected and recovered have a robust immune response to prevent reinfection. We don't know about Omicron yet. The research on the vaccine in children only had 2 months of data and the FDA even reported that there wasn't really a strong relative risk difference between acquiring the virus vs vaccine adverse events in the 5-11 age group. Finally, by the time this would go into effect there could be even more variants that the vaccine doesn't even stop the disease at all. What is the rush to vaccinate children with something that may not be effective and may cause lifelong problems? I don't believe any of you want our children to be an ongoing medical experiment with unknown outcomes.

The following are specific responses to the nine criteria you are to use for your deliberations:

## Nine Criteria to Consider in Evaluating Antigens

### I. Criteria on the effectiveness of the vaccine

1. A vaccine containing this antigen is recommended by the Advisory Committee on Immunization Practices and included on its Recommended Childhood & Adolescent Immunization Schedule.

The vaccine for all children of school age is currently only being used under Emergency Use Authorization (EUA). To that end, unless the FDA changes that to approved it cannot legally be required for children.

2. The vaccine containing this antigen is effective as measured by immunogenicity and population-based prevention data in Washington State, as available.

Since there were only two months of data presented to the FDA for the 5-11 age group before EUA authorization, there have been no data presented as to its effectiveness in Washington State so any mandate is definitely premature.

3. The vaccine containing this antigen is cost effective from a societal perspective.

Because the Federal Government is paying Pfizer for all vaccines being used this criteria is moot.

4. Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects.

Using the VAERS data for 6-17 year olds in the state of Washington in 2021 (as of December 24<sup>th</sup>) the total reported is 652 events. In Spokane County since the start of the pandemic there have been 117 hospitalizations in the 0-19 age groups and only 3 deaths. Since the vaccines have only been available for about 6 months 652 events compared to 3 deaths in two years the risk benefit ratio does not suggest there is an acceptable level of side effects.

## **II. Disease Burden Criteria**

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

The data from Spokane County Health District from the start of the pandemic to this week for the 0-19 age group as stated above is only 117 hospitalizations and 3 deaths. Because the data isn't broken down by school age, the breakdown by 0-9 and 10-19 is 6,461 and 10,673 cases, 54 and 63 hospitalizations, and 0 and 3 deaths. The hospitalizations are 1.2% and 1.4% of the total, and deaths are 0% and 0.3% of the total. If seniors were your population of interest, it would make sense, but we are talking about children who have essentially 0% risk of morbidity or mortality.

6. Vaccination against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority.

Data reports from all countries is consistent that the Omicron variant is not prevented by vaccination. Those vaccinated and boosted are equally able to spread the disease as those who are unvaccinated so at the present time when over 90% of cases are reported as Omicron this criteria fails. Unless there is a new variant that becomes dominant there is no reason to require a vaccine mandate for school age children.

## **III. Implementation of the Criteria**

7. The vaccine containing this antigen is acceptable to the medical community and the public.

Because these are EUA vaccines it doesn't matter whether they are acceptable at this time.

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

Unless someone on this board is able to give effective informed consent (including anything included in the VAERS report) of an EUA vaccine, which includes liability protection for the manufacturer, and is willing to take on the liability of any adverse effects that may occur, the costs incurred for any adverse effects could be cost prohibitive to the state.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

While the accessibility of the vaccine does not create a burden for the parent/caregiver, if there were to be an adverse effect it could create a significant burden.

Thank you for your consideration of these comments, I sincerely hope you will make the correct decision realizing that this is way too soon to require a COVID 19 vaccine for our children.

I absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children. It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! Thank you for your time!

Subject: personal experience with COVID-19 shots

External Email

Hello,

I hope you had a nice holiday. Mine was very sad. I spent the time trying to help two moms in a small Washington town whose school-age daughters have developed severe POTS disautonomia from the COVID-19 medical product shot.

Both girls have been asked not to come to school again until they are healthier. One is a senior and was captain of her cheer team, but after the school had to call an ambulance five times in the two weeks after she received the Covid- 19 medical product, she was asked not to come back. It has stolen her health, education and athletic ability. The other girl has also had to leave school and has chronic daily convulsions and unconsciousness. Will these girls ever be healthier again?

The odds are not in their favor. You could ask Maddie de Garay. She was in the Pfizer trial for 12 to 15 year olds. She is now disabled, has a feeding tube and is paralyzed from the waist down. Pfizer listed her reaction as functional abdominal pain, as if she merely developed a stomach ache. This is deceptive and hides from parents and public health officials the true dangers of these medical products.

POTS is a debilitating autoimmune disorder. I know because I have it. Mine was brought on by a reaction to a flu shot 15 years ago. Vaccine reactions are real and they are devastating and they are frequent. In fact in 2011 the Supreme Court declared that vaccines are "unavoidably unsafe".

It currently appears that more children are reacting to the Covid-19 medical product than are harmed from the infection. For some reason girl's reactions tend toward neurological autoimmune disorders, but boys instead seem to develop heart damage. These from a medical product that does not even stop transmission or infection, and is completely unnecessary for children who have very low risk from COVID-19.

Do not mandate the COVID-19 medical product shot to children for school attendance or any other function. If you do so, you will be responsible for unnecessary and irreparable damage.

Finally, do not add COVID-19 to the WAC. People who are sick can stay home freely just as they do for any other cold or flu. Authorities should not quarantine people away from their own homes and medical resources.

Sincerely,  
Wendy Miller

January 7, 2022

Dear Members of Washington State Board of Health,

I implore you to reject the current pressure for vaccinating children, especially as a requirement for attending school.

It is well known that children are at low risk for the Covid viruses, and recover quickly in most cases. If you or someone

In your household required antibiotics for a bacterial infection would you require everyone in your extended family

To take your same medicine even though they are not sick?

Surely it is better to let parents and doctors decide when and if children are vaccinated. Denying school attendance

As a punishment for disagreement on health issues is way beyond reasonable.

Children are already highly vaccinated and their bodies have much to cope with already. The present vaccines are

(In spite of FDA approval ) still experimental. Please consider that the same government that is causing people to lose their

Jobs over mandatory vaccination is pushing everyone to the limit with over reach of authority.

I hope you will choose instead to encourage families to strive for healthier choices in food selection.

And stick with requiring children who show symptoms to stay home, and making available known treatments

For the virus.

Mandating more vaccines will only put more money in the Drug companies pockets and cause people to pull their kids from school.

Again, please do not impose mandatory vaccination for school children or younger.

Sincerely,

Sandra Gilbreath

DO NOT enact a covid vaccine mandate for children of any age. If you do you will be responsible for the deaths and injury of hundreds to thousands of children. Don't be fooled by the federal government's propaganda. If you do your research, you'll understand that the covid vaccines are responsible for tens of thousands of deaths worldwide and over 1 million adverse effects. They are causing more harm than good. The vaccines have been proven to be ineffective. There are more people getting covid who have been "fully" vaccinated than those who are unvaccinated. There is no point other than for financial reasons for greedy pharmaceutical companies and state and local government agencies clambering for federal funds to get vaccinated.

Keep the government at all levels out of the family decision making process and out of the doctor patient relationship. Family decisions and medical decisions are personal and private.

What you should be spending your time on is enabling early treatment solutions that are widely available to all Washingtonians. The biggest crime of this century is that the government at all levels and medical administrations at all levels have failed to recognize that Covid can be treated early with existing medications that are already widely available.

DO NOT MANDATE VACCINES FOR CHILDREN OF ANY AGE.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Comments for the Immunizations Technical Advisory Group

External Email

I don't know if I already provided comments for the meeting on the 12th so I am sending these comments today.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

\* Children are at extremely low risk for contracting COVID19. There is no emergency!

\* The vaccines are still only authorized for Emergency Use. Again, there is no emergency.

\* There are no long-term studies that can show they are safe. This is extremely important to consider.

Since you care for the health of our children please do *\*not\** require vaccination for them to enter childcare or the schools.

Thanks for the opportunity to comment.

Rick Grunewald

Subject: Vaccine mandates for children; detaining and forcing medical treatment

External Email

Attention Board of Health,

I strenuously disagree with the current direction of the Board of Health which is considering requiring the C19 shot for children as well as the possibility of using law enforcement to detain and force medical treatment. This is way beyond the jurisdiction of our state and federal constitutions.

RCW 42.30.010 states "The people of this state do not yield sovereignty to the agencies which serve them. The people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know. The people insist on remaining informed so that they may retain control over the instruments they have created." While in this regards to public records, it shows that the agencies get power from the people.

This, however, is a huge power grab and not about health. However, even if it was, the Supreme Court has said that no emergency overrides our rights. Our state constitution Article 1 section 1: All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are estab[1]lished to protect and maintain individual rights. YOU DO NOT HAVE OUR CONSENT and are infringing on our rights. Right to life, liberty and the pursuit of happiness. The state doesn't get to decide how that is played out.

As you well know, this "vaccine" is still under Emergency Use Authorization and it is incredible that you would consider using our children as a testing ground. We do not tolerate having forced treatments – this is coercion and is a violation of the Nuremberg Code that carries very serious punishments.

Sincerely,

Samantha Zistatsis

Subject: Comments for the Immunizations Technical Advisory Group regarding Covid shot

External Email

Hello,

I am 100% opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The risk and # of children experiencing side effects doesnt outweigh the benefits
2. Most children have now built natutal immunity due to wide spread infection
3. Against mine and many others deep religious beliefs and conscious
4. The death rate is very very low in children
5. The effects it has on female menstrual cycles has noy been studied enough to understand link to infertility

I am an Advanced Practice Registered Nurse who is well educated on this topic and working at a hospital in the state of Washington. I also am a mother of 6 children. My entire family was infected with Covid a year ago, which it effected us all a little different amd mild symptoms. None of us have been re-infected despite numerous exposures and my children play multiple sports. This shows our natural immunity has been working.

please consider this stop the madate request.

2.                      Con

---

I am vaccinated. My children (3) are all fully vaccinated, two except for covid. As I understand Covid is an ongoing pandemic we are all working to end. Covid is much like the flu and ever changing. I see the covid vaccine similar to the flu vaccine which is not required. My husband and I allowed our 12 year old to get the covid vaccine. I wouldn't have chosen this for her in lack of long term research but as she is old enough to understand the current affairs, she wanted the vaccine. I think this vaccine as it is so new should be the choice of a family or individual.

I'm writing to voice my concerns to the WA State Board of Health concerning your agenda for the meeting next week.

I strongly oppose the following:

- 1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100
- 2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

WAC:  
246-100-070  
246-100-045  
246-100-040  
246-105

These proposed policies are immoral and a complete over reach and I stand against them.

☐

☐

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

I fail to understand why you are talking about or considering making it mandatory for the following reasons.

- Studies show children are at extremely low risk for Covid and children have low transmittal rate.

- The vaccines are still only EUA (emergency use authorized).

There are no long-term studies to document any history of safety.

Studies do now document that vaccinated and unvaccinated can both transmit Covid; therefore, the vaccine apparently does not stop the spread of the disease.

I strongly hope that you consider these reasons and don't make vaccines mandatory for children.

Thank you for the work that you do and for your consideration.

We can't understand why you would want to mandate child vaccines for a flu that is over 99.9% survivable for them? This does not make any sense. The safety, not to mention the efficacy, of the vaccines needs to be studied long-term (i.e. 10+ years) before any such mandates are even considered. Also, a non-elected body should not be making decisions for the entire populace of WA. This will not be allowed in a constitutional republic such as ours!!

Hello,

I would like to comment on the Jan. 12, 2022, agenda. This is directed to not allow vaccine mandates to take place for school children or anyone else. The covid vaccines are not preventing one from being sick nor from spreading the virus. There are people with covid antibodies that are better than shots. The adverse reactions to the shots even outweigh any benefits. I am asking the Technical Advisory Group to not proceed any further with this matter.

Thank you,  
Terina

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The Covid virus poses minimal risk to children. 2. The vaccine does not stop transmission. 3. The vaccine has had more than typical new vaccine side effects and much of these side effects have been serious according to the CDC VAERS reporting numbers. 4. Parents need to be able to make informed consent concerning giving their child a vaccine. Imposing a mandate takes this choice away.

Respectfully,

Valerie Hentzschel

January 6, 2022

RE: Proposed WAC code changes relating to COVID and other infectious diseases

To whom it may concern,

The proposed changes that give tyrannical unrestricted power to unelected health officials to enforce, without due process, fines, confinement, police power, forceable removal, quarantine, isolation, forced examinations, counseling, immunizations and other invasive, restrictive measures all on the subjective, potentially abusive whim is complete insanity. I do not know who you think you are that you can implement these types of measures on a FREE people, but you are WRONG.

It is very clear that the gene therapies and vaccine do NOT stop infections or the spread of COVID. Meanwhile, people who were previously infected and recovered have stronger immunity yet are completely discounted and ignored under the global push for vaccinations. Why?

These proposed actions, if implemented, will result in a mass exodus of Washington state citizens like has never been seen before. Businesses, already under strain, will fail leading to more economic devastation.

There is absolutely NO science behind this thinking. The Covid pandemic is virtually over. Children are at the LOWEST risk. I follow the language used and "cases", "hospitalizations" and "deaths" are all tracked separately. The recent spike in "cases" is easily justified by the large increase in testing. However, the cases have NOT led to more hospitalizations or deaths. So STOP the fear mongering. I'm sick of it, as are many, many others..

Tyranny has been tried before and it always fails in the end. We, the PEOPLE, will NOT tolerate it. This is NOT Australia or Germany in 1933.

Why doesn't Washington State take the lead on therapeutics and save lives? Patients can opt to use the "Right to Try" Executive Order to use treatments like Ivermectin, Hydroxychloroquine and Monoclonal Antibodies. Be a LEADER, not a follower.

I wanted to let you know that I think it is very irresponsible to mandate vaccines for young people. According to Johns Hopkins 0% of healthy children will die of covid 19. Not only that, if the vaccine works then it will be protecting all who get it so this expectation that it is helping people is completely false

There is no reason to mandate something with basically no data concerning reproduction, long term affects, myocarditis etc. especially on young people under 25

Stop this nonsense immediately. If people want it, they should get it but it should not be required.

---

Public health efforts and trust in organizations cannot be maintained by authoritarian measures that seek to purposefully scare and intimidate persons into complying with health recommendations. Covid-19 no longer poses an immediate threat to those who have been vaccinated and the pandemic is becoming endemic. To force individuals and their families to make a personal medical decision that goes against their conscience is tone deaf at best and heinous at worst. The vast majority of people who choose not to get themselves or their children vaccinated will fair well and will not place undue burden on the healthcare system. For the minority that do, they will face the ramifications of their decision and may learn through experience. They cannot, however, be forced into "healthfulness", just as a person cannot be forced to give up red near and eat kale and exercise, though their decision may give them heart disease and wind them up in the ER.

To Whom It May Concern~

I am unable to make the meeting Wednesday so this e-mail is my public comment in regards to agenda items 5, (246-100 WAC) 9 (246-100 WAC), and 11 (246-105 WAC).

It is alarming to know that the Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents with the proposed policies including:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I would like it to be known that I am against both of these possibilities becoming reality. Implementation of such a policy in the United States of America is against our rights and freedoms as Americans. There is nothing "voluntary" about these proposals.

Please seriously consider putting a stop to these policies.

Brian Trembley

Forcing children to take an experimental vaccine for a virus that has a 99%+ survival rate for that age group is inhumane and evil. It is far more dangerous to administer the vaccine to children than it is for them to get the virus. It's evil and robbing them of their freedom!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

I fully agree with no mask and no mandates for vaccines for anyone especially children.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

1/6/21

To the Washington State Board of Health,

I am appalled with the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is not a threat; the Omicron variant is little more than a cold, its symptoms being so mild. All forms of Covid-19 are manageable if treatment is started early. Moreover, more than 90% of the entire population survives this disease. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some with booster shots. Being fully vaccinated will require regular booster shots, forever! That is the very definition of a worthless vaccine.

Including Covid vaccines as a requirement for attending public school is completely unnecessary and a threat to the health of our children. Covid-19 presents little risk to children, but they do face considerable risk from the unapproved Covid vaccines. There are just too many unknowns with these vaccines, with little obvious benefit.

In America, health officers do not have the right to quarantine a person or family in a prison-like facility for refusing the Covid vaccination. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason and put in jail.

Signed,

Val Mullen

No to COVID vaccine for children, if you truly follow the science you will see that the risk for children having serious outcomes from COVID is extremely small. On the other hand this is still a experimental vaccine which is still and long term effects on children are unknown. Let this be between parents and their doctors.

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration.

Renee Patzer

Concerning the new proposed Covid-19 policies:

There is no scientific data available to support the proposed policies. Statistics show that children are at low risk of serious illness or transmission from Covid-19. On another point, the vaccines/shots have no studies to show long term effects on anyone, especially developing children's bodies, but there have been plenty of instances to advocate against them.

This is a massive expansion of state power via administrative law that we, The People, should be able to have a say in. Bring the proposed policies before the legislature. Let people make their own medical/health decisions. Let parents decide what they feel is best for their children. Washington is quickly becoming a state of restrictions rather than rights and freedoms as the founders of our country intended for each state in the Union, and each that would join the Union in the future.

Thank you for your time,  
Tricia Walkup

I have two kids, ages 3 and 6. They acquired natural immunity to Covid. They did fine and their immune systems did the job God designed them to do. We pulled our 6 year old out of public school this year but we are hoping to put her back in next year. If the vaccine is mandated we will NOT put her back in public school. This is government overreach and medical decisions are made by parents. We are a free people and the constitution is the law of the land which declares of personal rights. Our tax dollars are paying for public school and we deserve a say.

Subject: Fwd: Comments for the Immunizations Technical Advisory Group

External Email

WSBOH,

Please see the questions/comments below pertaining to the subject:

1. I am an engineer by profession and am not a doctor so am unable to provide any professional comments regarding changes to WAC 246-105. Dr. Robert Malone on the other hand, is an internationally recognized scientist/physician, a pioneer of the original mRNA technology used in the COVID-19 vaccine, who has always believed in the development of vaccines to preserve human life. Dr. Malone has serious specific concerns regarding vaccines, particularly for children.

2. Have you consulted with Dr. Malone to properly understand his (and other doctors like him) concerns to be absolutely certain about the overall safety of the children of this great State of Washington?

3. What are the results of consulting Dr. Malone?

4. Dr. Robert Malone website; <https://www.rwmalonemd.com>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.rwmalonemd.com%2F&data.com>

5. If you have not consulted with experts like Dr. Malone, why not? And then, what evidence do you have that would support the benefit vs the risk of requiring children to receive the COVID-19 shot?

6. If the SBOH were to require a COVID-19 shot to allow admittance, who assumes all the risk from medical complications from creating this requirement? Is it the director? Is it the board?

7. Has the SBOH considered that the COVID-19 shot is evidently not effective?

8. Has the SBOH looked at the low risk of death to children due to infection specifically by Covid-19?

9. When the SBOH looks at the data pertaining to school age children and the risk of death due specifically to infection by COVID-19, how much quantified risk is there to those children? Also, how does that risk of death compare to other childhood death risks?

10. I believe that the parents of the children of this great state deserve the SBOH to do their due diligence to understand the risk versus reward prior to considering requiring a COVID-19 shot for children because number 1, we're talking about protecting the innocent, and number 2 because the long term liability for the SBOH and its actors if this immunization does not stand the test of time would be devastating. This is why I (along with countless other Washington State parents) urge you to consult with Dr. Malone to understand his concerns.

Very Respectfully,

Ryan Frank

To Whom it may concern,

I do not believe this vaccine should be added to the state school vaccination requirements.

This shot has a high percentage of side effects including death and heart injury. It has also not been proven to prevent COVID. The shot only appears to be a huge money maker for the drug industry. It promotes suspicion as finding out real information about its side effects is difficult due to media censorship and confused information from government organizations that are supposed to protect our health and the health of our children. The Board of Health is here to protect our health, but instead seems only to be shielding drug developers and their agents from prosecution for crimes against humanity.

Please do the job you are hired to do and reject this questionable vaccine as a requirement for our children.

Thank you,

Terri L. Marshall

AGAINST required Covid vaccination for public school attendance. AGAINST involuntary quarantine camps. Both of these issues ignore personal autonomy, the Against Medical Advice form/record signed by individuals in good faith, the Numberg Code and the Constitution. Leaders, voted in office by the people, need and are required to represent the people and uphold the law of the land. Forced quarantine camps violate that. In your good conscience, honor our Constitution and individual, God-given rights.

Subject: Vaccine Mandate

External Email

To Whom it may concern,

I am writing you as a concerned parent about the possibility of having a vaccine mandate for public schools. Given the lack of history and data regarding this vaccine on children we will not vaccinate. The only longer-term studies that they do have shown that children are at less risk for having severe symptoms and bounce back much quicker.

Unfortunately a large portion of my family has moved outside of Washington state because of the current mandates and we have stayed, and if you push for the mandate for kids in the schools for this vaccine, we will remove our children from the school district. Is the state willing to see kids leave. If my children get sick I will handle it this is not some thing that the state should have any say in these choices our OUR rights for OUR children. My children have all the other vaccines up-to-date because they have backed research the Covid vaccine does not so why would you even consider this?

I would also like to know if you are willing to have the liability and be responsible for children that have a negative reaction to this vaccine? Will you help with their medical bills? Will you takeoff work to take care of them.

I understand the state wanting people to have this vaccine and I respect that but I just ask that you please do not mandate this for our children. Please do not bully parents so that their children can have an education.

Thank you for your time,

concerned parent

2.                      Con

---

These vaccines are not preventing the transmission of covid and children are not at risk for severe illness. Therefore, it fails one of the key criteria for being on the immunization chart as set out by the board of health and the RCW. We cannot continue to state this is for the health and wellbeing if it is not actually doing anything for these children. The drug companies are not being held liable for any damage to these children and therefore the risk of covid is lower than the risk of this experimental drug to their well being. Wait until there is more adequate studies performed and more data on the virus and the impact to children before adding it to the immunization requirements. If you truly care for children you will not expose them to a vaccine that has no long term studies and could kill them when the virus it is supposed to protect them from won't even kill them.

External Email

1/7/22 – 9:15am PST

I am a citizen parent and educator and engineer that has worked in a vaccine manufacturer in Washington state.

Please do not support nor make law/RCW to allow health officials to use law enforcement (WAC246-100-070) to detain people or families or any person/people to be isolated in quarantine (WAC 246-100-045) nor vaccinate/inject the covid-19 injection as a part of the school immunizations by using WAC 246-105. Nor do I support WAC 246-100-100 or specifics from WAC 246-100.

1. The health department officials are not elected officials and too much power/policy making is being afforded that was never intended.
2. The health department of Washington is, in my view and that of millions of other citizens politicizing covid-19 and seemingly to be ignoring the medical professionals that oppose vaccinating school aged children.
3. The covid-19 vaccine/injections are not proven in history in validation to their safety and benefits like the pallet of vaccines currently in force.
4. Washington State regarding covid-19 has been acting like its own nation rather than one of 50 States in the United States of America.
5. The covid-19 vaccine has not been tested in time to support making this a required injection.

Russell Neff

I am strongly opposed to making covid shots mandatory for children. I beg of you to think about the risk you are intentionally posing on children's health. It is public knowledge that children are at extremely low risk for Covid and that the vaccines are still only authorized for emergency use. Who are you trying to benefit by forcing children to get this shot? It seems the goal is to protect older individuals at the expense of our youth. How utterly selfish.

Children are not at high risk for Covid-19 in addition that these "vaccines" are not yet FDA approved and are only authorized for Emergency use. Not enough time, study, or data has been tested on the long term effects of these injections to the know the long term outcomes. The risk doesn't outweigh the supposed benefit since these have not been thoroughly and properly tested. Since the current injections are not thoroughly even protecting a person from contracting and or spreading the virus this idea of mandatory "vaccination" would be unconstitutional to force someone to inject their child without absolute fully knowing all of the long term effects.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I work at St. Joseph Medical Center. Currently I am on a rotation that is populated primarily with patients that have Covid. They are not in the hospital because of Covid. They have numerous co-morbidities necessitating their hospitalization. Their Covid symptoms are mild, if they have any, and not worthy of hospitalization. 50% of them are fully vaccinated. Many of the patients I am working with are from other areas of the hospital and have been contaminated by fully vaccinated hospital staff.

Discussing making an experimental, EUA, mRNA "vaccine" mandatory for children is preposterous. There are no long term studies demonstrating the safety or effectiveness of these injections, and the adverse events are being swept under the rug. Frankly, pushing this forward is criminal. Anyone voting for this does not represent the voice of the people, only of the misinformed, uninformed, and misled. They will be held responsible and accountable for this heinous transgression against what used to be a free people.

Sincerely,  
Rob Hand, MPT

External Email

Good Morning,

It has been brought to my attention you are meeting today to determine if a Covid vaccine requirement is to be made for school age children.

I am writing to let you know I OPPOSE this idea entirely. Children are extremely low risk for Covid. We know this. We also know kids are not big spreaders. And if they do happen to get sick, their symptoms are mild and they recover quickly without issues.

It is also well documented that these "vaccines" do not stop the spread of Covid. What is the point of giving an experimental jab to our kids when they experience mild symptoms (if any at all!) and it does not stop the spread of this virus?

It is absolutely insane to even consider making the Covid vaccine a requirement for children to attend school when the vaccine itself is still being issued under an EUA. And what about the long term side effects of this vaccine? We do not know those either. The risk of blanket administration of this vaccine to kids far outweighs any benefit. And where there is risk there must choice.

Adults have been forced to get this vaccine as a condition of employment and many had no choice but to comply. When it comes to our children, I can guarantee you there will not be mass compliance. Parents who want their kids to get vaccinated have already done so. Our public school system is a strained disaster. And this will likely cause an implosion if you force the rest.

Please DO NOT make this a condition in which kids must meet to attend school.

Thank you,  
Skye

To Whom It May Concern:

As a Washington state public school teacher I encourage the Washington State Board of Health to not mandate child vaccinations for attending school. It is not the responsibility of the government to determine an individual's medical decisions and this mandate would infringe on the personal freedoms & rights of American citizens. Children are at an extremely low risk of covid & even the CDC Director, Dr. Fauci, as well as others have stated that the vaccine does not prevent transmission of this virus. It should be the responsibility of the parent to determine if the vaccine is the right action for their child. It would be a shame for the Washington State Board of Health to remove the personal freedoms & rights of individuals.

Sincerely-

Ross Stremcha

Parents should not be required to vaccinate their children with an EUA vaccine that has undergone NO long-term studies to demonstrate their safety. There have been over 1 million adverse events reported on the VAERS system maintained by the Dept of Health & Human Services. There have been over 20,000 deaths reported on the VAERS system and several hundred thousand severe injuries. There are well-documented instances of healthy young people suffering from myocarditis directly related to the MRNA vaccines. The severity of covid and likelihood of death are so minute among our young people that it makes absolutely no sense to mandate this shot for them, at this time. It's time to stop listening to the fear-mongering among the politicians and main-stream media, and listen to the worldwide studies and experts that present alternative facts that refute the need for mandated covid vaccines.

I vehemently oppose this suggested encroachment on medical, health, parental and human rights. The scientific research and data for these vaccines is NON-longitudinal, going directly against all that is the scientific research method. Everything about this appears politically motivated. Children are not at increased risk from the Covid-19 virus, however they are at increased risk from these proposed injections. Involuntarily quarantines are the beginning of walking down a very dangerous historical road that leads to vile, horrifying, and unconstitutional events of the past that we have worked extremely hard to overcome. You speak of health and healing, yet I suggest few citizens at this point wholly believes those reasons are the pure motivation for these ideas. There have too many changes, recommendations, half-truths, guidelines, rules, and mandates for citizens to barely trust or believe anything that is said by authorities anymore. I fear the BOH makes the mistake of thinking that the general public still trusts it's government. Recent surveys show a predominant distrust and distaste for governmental authorities, is the goal to continue such decline? We sure hope not. Outside of science and with prayerful intention, I ask that may God help you all if you do this. Has history taught us nothing? Have none of you felt or cried the intense pain of harm by oppression and marginalization? Have none of you heard your elders tales from the dark past? My words are intentionally dramatic with the hopes of waking you up. You know not what you do. The children must remain off limits until we know more and have longitudinal data to support such preemptive tactics and methods. WHY THE UNSEEMLY RUSH? Not to mention the ruse around actual FDA approval. There are too many inconsistencies for citizens and parents to trust it. You speak of protecting the vulnerable through these means, yet these means create undue vulnerability and the violation of human rights. The makers of these vaccines have an irrefutable history of mass harm, criminality, and failure to protect for the sake of their own financial gain. If someone with that history was in your family, would you put your child's life in their hands? Would you? We do not know what the long-term consequences of these injections will be. Why don't we just slow down? Especially considering that children are not at high risk and it is NOT their responsibility to protect US. It is OUR responsibility to protect them. We mustn't force involuntary quarantine on any human being. We mustn't EVER willfully oppress, marginalize, threaten, scare, or bully fellow citizens to bend under the wills of misguided attempts to control populations. That, my fellow professionals, is called abuse. You know not what you do. Be it noted, I never share things of this nature. Yet, I feel compelled as I, and countless others, truly believe that you think you are doing good. Please use that motivation to do good, to truly hear our pleas... Please hear us as we tell you that you mustn't contribute to all of our futures in this rushed, unsafe, and misguided way.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Tammara Kuntz

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Hello-

We are in a public health crisis and also a crime crisis. Police officer shortages are at an all time high. It is asinine to think we should utilize our law enforcement to detain people over covid. Furthermore, what kind of sick law is this? Detaining people over making their own medical decisions? Please. No. And requiring it for kids for schools is a hard no. Look at the data on children. The mandates don't do anything except cause more division when we need to come together. None of these options are they way "out" of this mess.

Thanks.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Tyler Evans,  
Prosser, WA

Hello,

I'm writing in regards to the proposal to make Covid-19 vaccines mandatory for children for school admission and child care in Washington State.

As children are extremely low risk for Covid-19 and the vaccines are still only EUA, I strongly oppose this action.

Thank you for your heavy consideration.

Sara Romines

1. Yes

---

The proposal being discussed on 1/12/2022 promoting covid vaccine mandate on school children.

11.

Are you Pro or Con on the proposal?

2. Con

---

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. 1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory. 2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit. 3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org)) Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Hello,

COVID-19 vaccines SHOULD NOT be required for school and/or daycare. These unproven vaccines that were introduced without proper research should not be required by the government in any fashion.

Law enforcement should not be used to enforce any aspects related to any vaccination. That is not the purpose of law enforcement and it is a perverted view of government control.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: first and foremost this is 100 percent illegal while being what our constitution is to represent! People of choice, freedom liberty! I do not support any forced mandates that affect the low income, middle class to lose everything while immigrants coming seeking citizen ship at hoards people don't have to while getting all the great welfare from our hard working American people that now will lose everything! We are talking about vaccinations for young children now? For a inconsistent number of statistics provided by the CDC? Failed COVID tests resulting in false positives time and time again. We the people don't support your goals and will be prepared to do what's right by our choice and freedom under gods will!

At a press conference on August 12th, 1986, US President Ronald Reagan said, "The nine most terrifying words in the English language are 'I'm from the government and I'm here to help.'"

Do not and I mean do not violate our constitutional rights and our families freedom of religion. Do not criminalize us Americans and our families for making our own choices based on religious beliefs. Other countries have taken measures to shut down for longer periods of time and put protective gear on their children also spraying them down before they enter school and after leaving. This is a more realistic and inexpensive alternative. Consider that instead of forcibly removing people who may have handicaps or be home bound because they did not comply with your mandate which is NOT a law. Don't try and play God. This isn't morally right. This should not be called the land of the free if you will FORCIBLY hold our families in order to vaccinate. There are other measures to protect us. Once people are your prisoners they become your property and are at your disposal. NO THANK YOU! You don't own us Americans we are free to make are own medical decisions. Thank you for reading this in it's entirety. I'm disappointed on the deception and secrecy sorrounding this issues and the late notice at the ability to speak against it.

A Covid-19 vaccine mandate clearly does not pass the nine criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact, continue to encourage vaccination in my family. I am vaccinated and boosted as well as my wife. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria: II. Disease Burden Criteria 5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population. • The vaccine has been directly available to every vulnerable sub-set of the population for some time. 6. Vaccinating against this disease reduces the risk of person-to-person transmission, with the transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus. III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public. While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. • Under 65% of Pierce County residents are vaccinated. (cdc.gov) • Only 57% of of Pierce County residents aged 12-17 have been vaccinated. (from Tacoma Pierce County Health Dept, tpchd.org) • Only 53% of the entire Black community and 46% of the Hispanic community in Pierce County are vaccinated, and it is reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (tpchd.org) 8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable. • A vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking in our public and private schools. 9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver. • As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thus, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it. The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.

This is not medically necessary for our children and the risks (short term and long term are too high). The risk do not outweigh the benifits especally for a virus that is becoming less virilent and will continue to do so.

. Could this potentially increase the risk for a younger child

Subject: Comments for upcoming meeting

External Email

Hi there! Just submitting my comments for the meeting on Jan 12, 2022

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in

Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The proposal of health officers enforcing involuntary quarantine as well as adding the C-19 vaccine to the existing vaccine requirements to attend public education

11.

Are you Pro or Con on the proposal?

2.                      Con

---

The Nuremberg Code for one. - where there is risk, there should be a choice. There has not been enough time to see what the effect this vaccine will have on the development of children. The data and science show that children are not at a high risk of having bad symptoms or dying from this virus...therefore a required vaccine is not needed. And the constitution of the United States gives me the right to make decisions regarding my own health!

## Considering Recommending adding the Covid-19 Vaccine to Mandatory Vaccine Schedule for School Children

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I implore you to TRULY consider our children's actual health outcomes and do NOT recommend the experimental Covid-19 vaccines as mandatory for school children! There are NO long-term studies and no vaccine created in this way and this quickly has ever been used. Don't force our kids to be an experiment! Our children are not at high risk for Covid-19 - not getting it, not transmitting it, and no child has had detrimental outcomes from Covid that didn't already have serious health issues. Don't make so many children suffer as experimental guinea pigs for so little in return. The Covid vaccines DO NOT stop the transmission of Covid! They are not effective and they are not safe. There are many extremely troubling reports of myocarditis and other serious heart conditions (including death!) from young, healthy individuals whose only common factor is the Covid vaccines. Please due your true due diligence and look at the real facts, not just the ones provided by those benefiting from the vaccines financially. The vaccine industry is dependent on our being and staying sick. They have no motive to actually improve our health. Actual natural immunity from Covid-19 will protect our children much better and much longer and without the toxic, life-altering, and unknown side effects of the vaccines. It would be better for our kids to have Covid when they are young and can handle it best -- just like Chicken Pox. Then they will likely have life-long immunity... Rather than life-long side effects from the vaccines. And these vaccine injuries are REAL. Take a look at the Vaccine Adverse Event Reporting System (VAERS), please visit - <https://openvaers.com/> These numbers are very likely only a tip of the iceberg, as vaccine injury is extremely under-reported. Those injuries are very real and devastating to the individuals they effect. There are over 1.8 million adverse vaccine events reported. It is not rare... And those numbers are not just statistics - they are real, human lives that are forever changed for the worse ... or taken away altogether. Where there is RISK there must be CHOICE! If parents want to vaccinate their children against Covid, that should be their choice. And they can! But it is wrong - morally, ethically, and medically to force this untested and experimental vaccine upon the children of Washington by threatening them with the loss of their education! I urge you, please, do the right thing and keep this decision in the hands of the parents! Where will it all end if you don't? How many dozens of boosters will be needed after that? With each shot there is more compounded risk. Please, keep your hands and your conscience clean and DO NOT recommend the Covid-19 vaccines be required for our students! Respectfully, Melanie Robbins

Fwd: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Send an email to these people by tomorrow!! This is the one I sent. They are trying to use the WAC's to set up camps in WA to force people into and to require the vaccine for ALL WA schools.

Subject: January 12 Meeting- Current infectious disease WAC codes to include Covid-19 for all WA State residents.

Hello,

I'm concerned about the WAC's being reviewed to possibly be revised and add to them. You don't have the right to decide if a child gets vaccinated or to decide if you can use law-enforcement to detain me and or my family if you choose to do so. The following proposed policies/WAC's are unconstitutional! .

**PROPOSED POLICIES:**

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC

This blatant abuse of power needs to stop. I am NOT in support and oppose these possible changes. Please don't do this.

Thank you,

---

Subject: Comment: NO Covid vaccine mandate for school children!

External Email

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state! The parents and their physicians are the ones to decide what is best for their particular child. Not the government!

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine ([www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>> ) far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: [www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org)  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after. Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease. They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated, a 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain." Is not one child's ruined life enough? What if that was your daughter?

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Thank you for your time and consideration of my vote.

Sincerely,

Teresa DeGraaff

"As you are likely aware, the medical consensus on the COVID-19 "vaccine" effectiveness is that they do not prevent the spread of SARS-CoV-2. As you also may know, AFLDS recently filed a brief

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>> with the Supreme Court noting that these injections are merely a personal treatment choice, and not a public health measure at all. With over 50 other citations, AFLDS' brief <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>> breaks new legal ground." Dr. Simone Gold America's Frontline Doctors

I previously worked for a large State Agency and witnessed hundreds if not thousands of COVID cases spread throughout the population. While this is true, It is also true that I and Thousands of other State workers have not contracted the disease. This was accomplished through individual health and safety measures we took to protect ourselves. After being separated from State service for lawfully declining your so called "vaccine" I have MORE public contact than ever before and am still COVID free. I am more educated on this topic than anyone I know and I refuse to allow anyone to inject me or my children with an unapproved injection that is already proven to be ineffective.

I have three (3) school age kids who have hardly missed a day of school due to COVID concerns. Between private Montessori and now public school they have been in class since May 2020 after the initial lockdowns eased up. While I am aware of a very few isolated cases of kids out due to COVID, my kids have NEVER had to quarantine, their classes have NEVER closed and there has NEVER been a single notification from their schools concerning a COVID outbreak. This disease just isn't having the impact on our kids the way it did on VULNERABLE individuals in early 2020. If this unapproved ineffective injection is forced on my kids they will be removed from your schools just as I was removed from my 24 year career with the State of Washington. That will be the catalyst to force me to move my family to a FREE State. It's time to stop this insanity and get back to doing the things that made Washington a great State to live in. Instead of focusing on the number of citizens with the disease, consider the millions of us that have not contracted the disease. We are the majority and we should have some say in how this is handled. Do not force this injection on these kids. With all the reports of myocarditis and pericarditis, you will unnecessarily do more HARM than good. This has already been proven, time and time again, case after case.

Thank you,

WA State had become a joke to the country. How COVID is being handled is absurd, unsafe, and only feeding the mental health pandemic. We, the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Unlike previous vaccinations that are mandatory for the attendance of school, the Covid-19 vaccine is completely lacking in long-term data and the manufacturer enjoys total immunity from litigation in the case that a child is harmed by severe reactions to the vaccine (which have occurred and can be referenced by the CDC VAERS system). Would the school district be liable if this vaccine caused a severe reaction in a child?

Furthermore, never in our history have we mandated a vaccine in a child in order to ultimately provide increased protection for an older adult. The facts and numbers do not lie. Covid-19 is extremely low-risk to children 18 and under. The CDC reports nearly double the amount of pediatric mortalities with kids infected by non-covid pneumonia, is that vaccine required? My child is not an experiment. They should not be forced or compelled to get a vaccine with the the ultimate goal of protecting older individuals and even the science supporting this notion is lacking. If this disease targeted children I would support a vaccine mandate however and fortunately this disease is mild in children and has a very-low risk of severe complications. This is my line in the sand. Mandate this vaccine for my children and I will remove them from public school immediately.

---

I am a Pediatric Registered Nurse. It is wrong to mandate Covid 19 immunizations for anyone under 18 years of age who cannot make the decision to receive the vaccination. It is wrong to force parents to have their children immunized. I am not against the vaccine and if parents wish to vaccinate their children, it is their decision. There is not enough information or testing of the current vaccinations to determine the longterm effects. Vaccinations should not be forced on anyone much less children who have no voice!!

Cc:  
Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

I Randie Radke oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding the COVID-19 vaccine to WAC 246-105 schedule of required vaccines for children to attend school.

I have been in the health care field for 21 years the last 4 of those being an RN. From the beginning of my career it has always been reiterated and drilled into healthcare workers head that you can force any patient to receive any treatment against their will. Starting with things as little as forcing a shower to as large as life saving measures. If a patient is requiring a treatment to save their life and they decline, I am required to honor their wishes and not administer the treatment. My opinion in their life saving decision has no bearing. I honor their wishes and informed decision. I believe if this new code is passed it will be taking away the right to make an informed decision that individuals now have. I hope that public comments are taken into consideration.

Vaccination Mandates in Children

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Please do not mandate vaccination of the Covid 19 vaccine for children. Let the parents decide what is correct for their child. Schools need to be open and children and parents decide what is right for them and what their level of risk may be. Masks should not be mandatory, Vaccines for covid should not be mandatory. No long term studies have been preformed do not let our children be part of some experiment that we don't know the conclusion of.

Subject: No mandatory injections

External Email

I am opposed to making covid-19 shots mandatory for school admissions or in childcare or frankly in any circumstance. Mandating medical interventions is a violation of human rights and freedom.

I am opposed specifically to these shots since they were designed to lessen the symptoms of Covid-19 and not to prevent SarsCov2. Since these shots do not protect from SarsCov2 transmission, a mandate serves no societal function.

I am opposed to these shots because they contain brand new technology with zero long term safety studies in humans, and using our children as test subjects is both abusive and violates international treaties.

Thank you,  
Tara Johnson

Covid vaccine mandates and involuntary detainment for isolation

11.

Are you Pro or Con on the proposal?

2. Con

---

There is a 99.9 percent survival rate of covid in children, there is known adverse reactions of hypertension and seizures in children who have gotten the vaccine making the risk greater than the reward. The vaccine does not prevent covid it decreases severity which is not high in children and there for should be a choice

Subject: My Public Comments

#### External Email

I am writing to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State AND for adding it to WAC 246-100 as cause to implement emergency measures to the extent of detainment, etc. (Essentially detaining healthy people over the flu. When does it end?)

#### Requirements for schools/children:

1. NUREMBERG CODE. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. According to VAERS children are statistically more at risk from adverse events and dying from the COVID-19 Vaccine than from COVID in EVERY ANALYSIS. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. The long term risks of these vaccines are still unknown and ZERO true blind studies have been done as those who received the placebo were given the product right after

phase one!! HOW CAN YOU EVEN THINK TO FORCE THIS ON OUR CHILDREN?? You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM said the studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children or anyone else who's decided it's not in the best interest of their own personal health. We KNOW the vaccine does NOT stop the spread of COVID. We also know we gain herd immunity through a virus' spread through the population--of which omicron is proving to reveal as it is milder and will have traveled through our population soon enough now to create a true shield for the vulnerable instead of a cheap, synthetic, imitation that does nothing of the sort.

This whole fiasco will be over soon due to the natural course of viral infection in spite of the interference and Pharma peddling of Washington State health officials.

The implementation of these two measures are extreme and unnecessary. They will cause more harm than any imaginary good being dreamt up by those desperately trying to hold onto their emergency powers.

We see through you.

Subject: Do NOT mandate the vaccine for entry into school

External Email

Dear Members,

I am writing as a parent of school aged children that have been burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why.

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extremely detrimental and profound on OUR children and our future.

Hello,

I am opposed to making the COVID-19 vaccine mandatory for school admission and for childcare in the state of Washington because children have been proven to be at a low risk for Covid. The vaccines are still only in an emergency authorized use. There have been no long term studies to document the safety of this vaccine. The vaccinated and unvaccinated are still both able to transmit the Covid virus according to recent studies. Based on these recent studies, the vaccine is not stopping the spread of Covid. Therefore parents should not be forced to inject our children with a seemingly experimental vaccine. I appreciate your time in viewing a concerned parents thoughts on such a huge decision.

Thank you,

Subject: STOP the vaccine mandate for children

External Email

Stop this ridiculous mandate on our children. They are not at risk. This vaccine is not proven to be safe for our children. It takes years for a vaccine to be proven safe and if you understand science you would know this. This vaccine is not like any other and you know that, so why the push. You are messing with fire when you start pushing an illegal mandate on our children. Most parents are not going for it and are getting tired of all this BS. Remember who voted you in. Why aren't we seeing how many adult deaths from the vaccine (20,000) and the adverse reactions are over 1,000,000. Do not use our children as lab rats. If this mandate happens about 60% of our parents in our district will pull their kids. From Jim and Vicky Pettet

These are wrong and never should be mandatory. We live in America which was created on free choice. There is no reason to put people in isolation camps if the vaccinated transfer and carry the same viral load as unvaccinated. People should be able to take there own risks in life. Parents also should be able to choose the risk for their kids. These vaccines have not been fully tested and should not be forced upon our children. They have minimal risk of complications at that age group. Stop the mandates and forcing things against peoples will.

Thank you for your careful consideration of the Covid policies before you today. I myself am triple vaxxed and am very pro vaccine. I am concerned though if the proposed WACs being discussed in regards to Covid may go to far in limiting individual autonomy. It's probably just fear mongering but I've heard rumors of possible forced detentions and quarantine camps. I myself am super frustrated at people that won't wear masks when it's warranted but there must be a middle of the ground answer. I especially think peoples concerns about not wanting the Covid vaccine forced on their children are justified as it is such a new vaccine and most children don't get as sick with Covid ( I know having said that there are thousands who have died ). I just don't want to see us go the way of Australia with forced quarantine camps.

Thank you so much for your service to us at this difficult time. May God bless you in 2022 as you serve all of us

I've lived in Washington state all my life. As the father of three children, I can assure you that if this state forces my children to take this Covid vaccine to attend school, I'm leaving. My wife and I will pull our three kids from public schools and move to our property out of state. To a state that actually understands medical freedom and doesn't endorse tyranny. There is still too much we don't know about the long term effects of the Covid vaccine and children. I, as a parent, should have the right to decide what goes into my child's body, not some unelected bureaucrat in Olympia or King County.

I will leave this state in a heartbeat if you do what I think you're about to do. It doesn't give me any joy or happiness to say that. I love Washington. My wife and children love Washington. It is my home. I didn't move here from California or the east coast like I'm sure many of you have.

Our children have been jerked around enough in the last few years to accommodate know-it-all teacher unions, pushy school nurses, and all those with political agendas who perpetuate victimhood and false Covid narratives. Covid isn't dangerous and most of America is waking up to this clown show. Myself and others like me have had enough. Our kids belong in school. They should have the freedom to take off their masks and be normal. They don't need this vaccine.

To: DOH WSBOH  
Cc:  
Subject: Public comments for WSBOH members for January 12 meeting

External Email

To WA State Board of Health Members –

Thank you for your time and your service on the WS Board of Health. I appreciate your willingness to serve in this way. I also appreciate the ability to comment on decisions and policy the Board is making. In a democratic, free society, it is crucial that citizens are given this opportunity and, in turn, that policy makers listen to the will of the people they serve.

In regards to the upcoming meeting on Jan 12, specifically agenda item #9 Rules Hearing Continuance– Communicable and Other Certain Diseases, Chapter 246-100 WAC: I believe it is extreme government overreach and unnecessary to add the COVID-19 virus to this statute. While the statute may be a necessary measure in RARE instances, the threat of the COVID-19 virus does not rise to the level required to justify the extreme measures outlined in 246-100. It is putting it on par with HIV and Tuberculosis, which is ridiculous and medically unsound. The COVID-19 virus is now so wide-spread, affecting more people mildly than seriously, which means we will soon be reaching the point at which more people have either natural immunity or have been vaccinated (or both) than is required to justify the possible use of a statute like 246-100. Adding this to 246-100 also increases the risk of misuse by officials and the abuse of civil liberties.

In regards to agenda item #11 Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry: Per the WA State Legislature website, the title of this chapter is "IMMUNIZATION OF CHILD CARE AND SCHOOL CHILDREN AGAINST CERTAIN VACCINE-PREVENTABLE DISEASES." Considering it is a medical fact based on current empirical evidence that a person who is vaccinated (and even boosted) can not only contract the virus, but also pass it on to others, it is clear that the COVID vaccine should not be eligible for consideration for this statute. Taking also into consideration that so many now have natural immunity AND that children, in general, are impacted far more mildly with COVID, it is, again, government overreach to demand that the COVID vaccine be one of the mandated vaccines for school attendance.

Thank you for reading and considering my comments.

Sincerely,

Rebekah Lacy

Subject: Writing opinions opposing to school mandate

External Email

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

Subject: Forced vaccines

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a

hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

(americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To Whom it may concern,

As a Washington State resident and tax payer, I find it unbelievable that the health authorities are discussing medical interventions against the will of citizens. Children's health and medical choices should be solely the responsibility of the parents. Private citizens health choices should be private, and no concern of the state. This is overstepping of authority on the part of the health department and should not even be up for consideration. I want my voice of concern to go on record that I am against the tabled proposals for this meeting. I hope common sense and honest respect of individuals prevails in all involved in these discussions.

Sincerely,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

The vaccine has been proven to not be a "vaccine" by clinical definition, but a treatment, given that it does not prevent the spread of the disease, or the ability to contract it, therefore "herd immunity" isn't possible. Also, there have been many studies done on covid and children, and they are clearly not vulnerable to extreme cases of covid. The vaccine should be taken by whomever feels they would benefit from a more mild case of covid, but having a treatment forced on somebody who isn't even sick or at risk is quite medically strange. Thank you for your consideration.

Subject: Vaccine mandates.

External Email

To whom it may concern:

I am writing to ask that the state board of health REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. Vaccines DO NOT prevent, nor stop the spread of COVID-19
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19
4. The COVID-19 vaccine is new. Many parents do not feel comfortable giving this to children without years of testing, studies and long term effects being known.

I personally will remove ALL my children from Washington state public schools before I will comply to a COVID-19 vaccine mandate for my children.

Thank you for your time,

Robert Bordner

Covid-19 has absolutely no serious medical and physical effects on children who have had it. Most of the time, they don't even know they have it. There is absolutely no reason to vaccinate a child whose symptoms to an illness are no more critical than the common cold. I have 3 school age children and will not be giving them an experimental vaccine.

Children should not be mandated to take any experimental vaccine for a virus that has over a 99% survival rate for that age group. It is more dangerous to vaccinate children than it is for them to contract covid.

Subject: NO COVID-19 shots for kids

External Email

Hello,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State .

As a parent, and a member of the community, I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid 19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading C19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of C19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccine effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing C19 nor is it preventing the spread of C19. The vaccine is not cost effective for our nation.

Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate.

"Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive autoimmune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people. Even the FDA board that was approving those vaccines to their young kids did it with the impression that it would be absolutely voluntary and will never be mandated which CDC guaranteed. Will you take upon you the responsibility for the health and well being of innocent children who you will be subjecting to unknown risks in order to receive education which is an ingrained right of every child? Will you create segregation and discrimination based on the medical choices made?

Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Best,  
Olena Smirnova.

To: DOH WSBOH  
Cc:  
Subject: Comments on Agenda items for WSBOH

External Email

As concerned citizens of Washington state we write to implore you to consider the following:

Please reject the formation of a Technical Advisory Group to mandate shots for Covid for school-age children. Medical freedom is a right that should not be infringed, especially on vulnerable children and for a virus to which they have little to no risk. Furthermore, there should never be consideration of mandating a shot that has not been tested or subjected to years of trials and high efficacy standards. You cannot ignore the number of heart issues in youth who have taken the Covid shots and the countless other adverse reactions those that have take this experimental shot have suffered. Furthermore, the results of the rollout have already demonstrated the shot does not prevent transmission or infection. The majority of the 'Covid' patients in our hospital are fully vaccinated. We the people are watching, there will be accountability at some point.

Please support establishment of a new rule that would prohibit requiring EUA products or any licensed product that doesn't have completed Phase 3 clinical trials for schoolchildren.

Subject: Vaccine mandate recommendation for school age

External Email

To whom it may concern,

I'm writing this correspondence in regards to Washington State Board of Health possible vaccine mandate recommendation for school age children. How can this even be considered when:

- 1) These are gene therapy vaccines which could have possible long term medical issues that may arise, and at which time are unknown.
- 2) After inoculation takes place, this is irreversible!
- 3) VAERS as many cases of Myocarditis, which is very concerning.
- 4) How is this ethical? To be able to attend school? This should ultimately be a parents decision on whether their child should be injected with pretty much an experimental product. This is approved under EUA with only minimal trials being done, which is also very concerning.
- 5) Children are at very low risk of death from Covid.

Please do NOT approve this to be mandated. Thank you for your time.

---

Proposal to apply current infectious disease WAC codes to include COVID-19

11.

Are you Pro or Con on the proposal?

2. Con

---

In my opinion, based on the information I have read provided by the Main Stream Media and other sources, despite all their fear mongering, COVID-19 and its variants appear to warrant the same concern I give to seasonal flu and common cold. The official response of the past two years is totally out of proportion to the danger presented and therefore; my concern that any proposal to apply current infectious disease WAC codes to include COVID-19 may lead, due to fear and ignorance, to the abuse of the aforementioned WAC codes. That said: Local Health Officers have the same responsibility as medical professionals regarding the Hippocratic Oath to Do no Harm. It is unethical and morally wrong to mandate/compel/force any irreversible procedure upon any free man or woman, or their children. Forcing a vaccine/medication is just as irreversible as forcing an amputation. After informed consent, the choice to accept treatment must be the sole responsibility of the individual that is to receive treatment, or in the case of a minor with undeveloped or inadequate reasoning skills, the responsibility of the parent(s). Should the State, under its current authority, involuntarily detain or quarantine for any communicable disease, the State must ensure the detainee(s) suffers no irreparable physical, mental, emotional or financial harm due to the State's actions.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Application of WACs to COVID

External Email

To the board:

As an American and Washington state citizen, I urge you to vote no against the proposal to allow the 'local health officer' to use law enforcement to detain individuals or families by force for exercising their rights to not comply with DOH requests.

As American citizens, each person has freedom of choice and holds sovereign right to their bodies and the right to raise their children as they see fit. An administrative rule that coerces compliance by threat of detention, isolation and punishment is contrary to that freedom and must be opposed. COVID is no longer the threat it was believed to be, and with remedies for those who choose them, it is unnecessary and wrong to lock people down, force vaccination, close schools, and induce panic. This proposal allows the health officer's sole discretion to be the determinant, with only the requirement that they have 'reason to believe' a person poses a risk - with no checks and balances. That is unacceptable and too easily lends itself to abuse and discrimination.

Do not allow the administrative state to abridge God-given, individual rights. The board or administration may feel justified now in targeting COVID non-compliance, but eventually the tables turn and the rules will be applied differently, to different groups, with unintended consequences.

Sincerely,

Rebecca Phillips

Subject: I am against WAC 246-105 and specifics from WAC 246-100

External Email

Hello,

I am writing this letter to share my voice against the unconstitutional COVID-19 injections as part of school immunization requirements using WAC 246-105 AND cruel fascist specifics from WAC 246-100.

According to the CDC, Children 17 and under account for 0.057% of all COVID-19-Involved Deaths in the United States. This enormously small percentage clearly shows that children are not in any way in danger because of the covid, HOWEVER, they are endangered by the cruel requirements being proposed. Children cannot be forced to take the experimental drug with a proven inability to protect from Covid. It is immoral to place parents and caregivers at a position where they must choose between their children's health and their children's education, to choose between two choices that will impact children's future and more than that, their ability to have a future in the first place.

For this reason, WAC 246-105 is a cruel, immoral, and unconstitutional regulation that has no place for existence even as an idea.

WAC 246-100 specifics are a cruel design to take the basic human right of a choice. Last century 6 million Jews were killed a fascist regime of the same nature. Can more be said? In no way, shape, or form government has a right to impose such a horrific regulation and put regular people under danger of forced medicine that is, once again, proven to negatively impact human health that even leads to death, by stealing an individual's freedom and right to choose.

These unhuman regulations should not exist under any circumstances.

Sincerely,  
Tatsiana Ankuda

It's against our rights to mandate a vaccine especially children! Also to involuntarily detain someone based of the refusal of taking said vaccines. I deny this motion and previous mandates in place! There is no scientific evidence that even proves that this mandate will help prevent the spread of Covid. The fact that vaccinated or non vaccinated people are contracting and passing covid along proves the vaccine is useless against the transmission of COVID, so to mandate a vaccine that doesn't work is ridiculous!

We now know you still get and spread Covid even if vaccinated so you're unable to use that argument to justify any mandate. Since we now know the vaccine is a treatment and not a real vaccine like measles vaccine that can eradicate a virus. Science also shows kids have statistically no risk. Compare that to the flu, walking to the bus, bus ride to school, trip and fall on playground. It's up to parents and their doctors to make decisions for their kids.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++ In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed,

To whom this may concern,

This is unconstitutional to place these orders upon us!! In regards to immunizations for our children we should have the right to choose what our own children should have in there bodies. God made us in his likeness and image and with a miraculous natural immune system. So by placing man made shots in us we compromise those systems and alter them, not healthy or natural. We are made to have colds and build up our immune systems!! We should have our God given right to choose what we do to our own bodies just as everyone else thinks they do. This is criminal to have law enforcement to detain or use there law enforcement power to isolate us at there discretion. This is INHUMAN!!!! Don't allow any of these proposals to pass!! We will never have freedom again, that all history has ever fought for!! This is not of God this is pure evil!!!

---

Dear DOH committee, No doubt that Covid illness is a heavy burden on health and financial stance of our country. Though, I would like to ask State board of Health to weigh in pros and cons of vaccination mandate on public schools in our State. 1) Please consider that 1st vaccine was available in December 2020, It didn't become a mandate with adults until October 2021. and Vaccine for children got emergency authorization November 2021. As you know, dr Pendergrass and dr Lutz, "kids are different species", they respond to illnesses and treatments different then adults do. I urge you not to rush the mandatory vaccination in kids yet. Give it time for vaccine studies in kids to be more objective by observing bigger group of kids who are going to be vaccinated on voluntarily bases. 2) Based on recent studies posted and Covid infection surge in fully vaccinated population it becomes obvious that vaccine works less then a year in majority of population. There is no studies as of yet, that booster will provide a benefit for a prolonged time since virus has been rapidly mutating. Per article posted in Medscape/WebMD on December 27,2021"Covid booster Protection may wane in about 10 weeks, New Data Show" - the sum up(copy/paste): "U.K. health official shared the data ... after 10 weeks the Pfizer booster was 35% effective and Moderna 45%" 3)I would like to attract your attention to the conflict of interests in the most prominent articles published: ex: Jornal of New England, November 9th 2021 "Evaluation of the BNT162b2 Covid-19 Vaccine in Children 5 to 11 Years of Age" Funded by BioNTech and Pfizer; The Lancet , October 4, 2021 "Effectiveness of mRNA BNT162b2 COVID-19 vaccine up to 6 months in a large integrated health system in the USA: a retrospective cohort study" Funded by Pfizer "Safety and immunogenicity of seven COVID-19 vaccines as a third dose (booster) following two doses of ChAdOx1 nCov-19 or BNT162b2 in the UK (COV-BOOST): a blinded, multicenter, randomized, controlled, phase 2" Supported by Pfizer and Biontech There is a strong believe among medical authorities that vaccines keep people from hospital and decrease death rate and I don't oppose vaccination , though I do believe making it mandatory is unethical. Ethics in healthcare is one of the logos. Patient is always involved in their own medical decision making and I truly hope DOH committee will make a correct decision and let parents and kids get fully involved in educated medical decision making. with all due respect, Alena Izhokhina PA-C

Children are not at. Great risk from Covid-19. The shot doesn't prevent the illness and the long term issues from the shot are not known. Also, the shot is not fully authorized by the FDA. It is still an experimental drug.

To Whom It May Concern:

I ask that you read, respect and respond to the deep concerns that I have listed below regarding a possible change to Washington State Department of Health's vaccination requirements for public school children.

My concerns come from my first-hand experiences as a Licensed Clinical Social Worker at the Sheridan Clinic of Jefferson Health Care in Port Townsend and experiences of local neighbors and friends.

1. COVID 19 possess a minimal health risk for children. So why vaccinate them?

In Spring of 2020, I attended a presentation to Jefferson Health Care employees by Dr. Tom Locke, then Deputy Health Officer for Jefferson County Public Health. Dr. Locke stated, "children are not getting COVID 19 due to having a natural immunity to it from having previous exposures to other COVID virus." Although we have found that children do become infected with COVID 19, they are not at a high risk for serious illness and death from the COVID 19 virus.

Deaths from COVID 'incredibly rare' among children (nature.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F021-01897-w&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ceccef41623f840a4035808d9d2102c83%7C11d0e21726>

The Kids Were Safe From COVID the Whole Time (nymag.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnymag.com%2Fintelligencer%2F2021-01-07%2Fkids-were-safe-from-covid-the-whole-time.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ceccef41623f840a4035808d9d2102c83%7C11d0e21726>

2. There is no evidence that vaccinating children will alter the course of the pandemic. So why vaccinate children?

Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Since there is no claim that the vaccination prevents getting or spreading the COVID. Rather the claim is that the vaccination was developed and is marketed as a vaccine that will reduce "severe symptoms and hospitalization". How can the State justify a medical intervention that will only reduce severe symptoms and hospitalizations when this is not even a health problem for children to begin with?

In fact a recent law suit by America's Frontline Doctors is challenging that these injections are "vaccinations" since there is no claim that they create immunity.

"It is the consensus of the medical community that the currently available Covid-19 vaccine injections do not prevent the spread of SARS-CoV-2. Relevant federal agencies have repeatedly acknowledged this consensus. Therefore, there is no scientific or legal justification for OSHA to segregate injected and un-injected people. Indeed, since the Covid-19 injections do not confer immunity upon the recipients, but are claimed to merely reduce the symptoms of the disease, they do not fall within the long-established definition of a vaccine at all. They are instead treatments and must be analyzed as such under the law."

<https://americasfrontlinedoctors.org/2/files/aflids-amicus-brief-in-support-of-emergency-applications-for-osha-ets-cases/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Famericasfrontlinedoctors.org%2F2Famicus-brief-in-support-of-emergency-applications-for-osha-ets-cases%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cecce41623f840a4035808d9d2102c83%7C11d>

Additionally, what is the logic of requiring a vaccination for children who are of little risk to become seriously ill from the Covid virus. Especially now when the Omicron variant, with very mild symptoms, is the prevailing variant in our community; presently most people who test positive for COVID experience a runny nose for a day or two, or no symptoms.

WHO sees more evidence that Omicron causes milder symptoms | Reuters

3. If we want parents, not the State, to be responsible for their children's health then wouldn't it be more effective to empower parents not the State to choose HOW to care for their children's health? So why MANDATE medical interventions?

A Chimacum neighbor shared with me that her son's friend's cousin recently died after getting the Pfizer COVID vaccination. What a tragedy! Why would a responsible parent choose this risk? The CDC VAERS website reports that all three of the COVID vaccines result in various medical side effects including death. I myself am still experiencing significant adverse effects from my J & J vaccination on May 21, 2021. This type of vaccine has a relatively brief history; we cannot know the long-term effects of any of the vaccinations presently available for COVID. Involved parents who have in past years chosen not to get their children vaccinated for legitimate health concerns or religious convictions are already fleeing the public school system. This new experimental mRNA "vaccine", is not trusted by an even larger population of concerned parents and certain to decrease the enrollment population even more. Each of us has different health needs, this is why, until this pandemic, the privacy of the patient-doctor relationship has been protected by law. Isn't it then logical to protect "public health" by giving parents, as advised by their doctors, the decision of whether and when to vaccinate, not politicians?

4. Our children's mental health is drastically affected by the State's narrative that their behaviors are responsible for the health of others. Can DOH please change their use of this narrative?

Much of the argument for getting children vaccinated has been that they are "carriers" of the virus. If the State is truly concerned about our children's health wouldn't the State be focusing on their mental health as well as them being a transmitter of a virus? Accidents, assault/homicide and other diseases are the leading causes of death for children under 11 years old; suicide is equal to COVID deaths!

-- Between January 1, 2020 and October 16, 2021, only 94 children ages 5-11 have died of COVID, which is 0.00012 percent of the 723,880 total U.S. COVID deaths through the week ending Oct. 16, 2021; and it is 17.34 percent of the 542 children ages 0-17

who have died of COVID since the pandemic began.

-- During the 12-month period October 2, 2020 through October 3, 2021, there were 66 COVID-19 associated deaths in children 5-11, making COVID the eighth leading cause of death for this age group, behind accidents (969 deaths); malignant neoplasms (525); Congenital malformations, deformations and chromosomal abnormalities (274); assault/homicide (207); heart disease (115); chronic lower respiratory diseases (107); influenza and pneumonia (84); intentional self-harm/suicide (also 66 deaths)." CDC: 94 Children Ages 5-11 Have Died of COVID; 0.00012% of All COVID Deaths | CNSNews <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cnsnews.com%2Farticle%2Fjones%2Fcdc-94-children-ages-5-11-have-died-covid-000012-all-covid-deaths&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ceccef41623f840a4035808d9d2102c83%7C11d0e2>

As a Child Mental Health Specialist during the pandemic, I witnessed firsthand the tremendous emotional strain that our children suffered due to messages from the media and public officials that they could spread a fatal virus and therefore be responsible for "killing "a loved one. Examples are: a 14-year-old who moved out of her mother's home and was afraid to even visit her mother due to the risk of giving her mother COVID; a 12-year-old unable to visit, even online, her best friend due to having no internet service; young children's weekly stays with their father discontinued due to his new wife's fears of them spreading the virus to step-siblings; my neighborhood children unable to play together due to parental concerns' about "the children spreading COVID." These connections are essential protective factors for a child's mental health denied them as they struggled with so much of their daily life has disrupted.

Reports document an alarming increase of suicidal ideation, attempts and successful suicides. The mental health hospital beds for children and family therapists are mostly unavailable still due to being already full. The Benj Project, a local non-profit, conducted a survey at our two local high schools and found 1/3 of the students experienced increased anxiety and suicidal ideation (some with suicide attempts) during the year 2020.

<https://www.nbcnews.com/news/us-news/youth-suicide-attempts-soared-during-pandemic-cdc-report-says-n1270463>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbcnews.com%2Fnews%2Fyouth-suicide-attempts-soared-during-pandemic-cdc-report-says-n1270463&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ceccef41623f840a4035808d9d2102c83%7C11d0e2>

Please instead proposing that our children are the reason we still have a pandemic, champion the "End of the Pandemic". At this time, it is a flu with most cases less severe symptoms than the Common Cold. Government has used a narrative of fear to control the populace due to their own inability to effectively treat this deadly virus, focusing the problem on "irresponsible individuals" and offering an ineffective vaccine as the answer. Lame. I would like to see our governmental agencies take some responsibility by ending this crisis that has destroyed our economy and the mental health of us all. Declare it over. We need not fear the COVID 19 virus any longer. We have had more deadly flues than the Omicron variant in past flu seasons. We are no longer dying of COVID 19; it has been a successful ride through some extremely dangerous mutations of a virus to this final almost benign variant. We can celebrate this outcome and let our children return to school free of masks, social distancing and most importantly free of the risk of ANY adverse vaccine side-effects. Obviously, we will not know the adverse effects for these children for decades! How can you justify this unknown risk for our children?

Please address these concerns at the January 12th Public Meeting. I will attend and hope to understand how a policy mandating COVID vaccinations for our children would be considered at this time by intelligent public servants. I find no logic in such action that

benefits the public, and so unless convinced otherwise I must conclude that such an action is being taken to serve political and/or economic interests.

With hope and trust in your humanity-

Sol Riou, MSW, retired LICSW

---

The current science no longer supports the original narrative that children require this experimental shot to avoid infecting and killing their parents and grandparents. We now know for a scientific fact that both the vaccinated and unvaccinated can both contract and spread COVID. This shot does not help an individual who receives it protect any individuals around them. We also know that only those who are high risk need the vaccine. Currently, .15% of WA state is infected. .15%! and most are likely unhealthy with co-morbidities. They are the demographic who require the shot. The infected are a tiny fraction of the population and almost no one is dying with the current variant. 59,000 cases in FL and one death. Nearly 8,000 cases in WA and 6 deaths as of yesterday. People keep saying this is a pandemic of the unvaccinated. That is not true It is a pandemic of the unhealthy. So why on earth would we require this shot for the healthiest population in our community? That's like giving someone NyQuil when they don't have a cold. It's unhealthy and even worse, dangerous.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I don't believe you should vaccinate children. The vaccinated people are getting sick and spreading it too. So obviously ITS NOT WORKING.

If they are of age to vote they can make their own choice.

It's my responsibility as a parent to have my child's best interest at heart. I feel vaccinating my child is my choice as his mother. Not the corrupt government we are under now.

We don't know what the long term affects will have on them. I'm sure the government does, that's why they want everyone vaccinated.

Thank you

Subject: Comments for the Immunizations Technical Advisory Group

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. It is not effective at stopping the student from spreading the disease. The Covid injection does not stop the child from transmitting the disease. It does not really protect the person medicated with mRNA concoction. It is not effective.
2. It is not effective at stopping contraction of the disease. The Covid injection does not stop the child from contracting the disease. It is not effective.
3. It is not approved for mandatory use in anyone by the FDA. The Covid injection is only Authorized for Emergency Use. You have no legal right to require the intake of this experimental drug. The alleged Covid medication/injection that was approved by the FDA is not even available in the United States, if anywhere. It is not legal to require submission to this medication.
4. The injection is demonstrably unsafe. There are no studies of the safety of this drug, long or short term. However, there are tens of thousands of adverse reactions and unexplained early injuries and deaths, in the VAERS database, due to heart and organ damage. When H1Ni vaccine had 59 adverse reaction, the vaccine was removed from the market. It is insane to push forward with this insistence by the current political administration on the Federal and State levels in light of the vast number of injuries and deaths proximate to the time of the infection. Many of the adverse reactions occur within the first two weeks. Therefore, CDC 'arbitrarily' decided that no adverse reactions occurring within two weeks of injection are 'deemed' by them to be unrelated to the injection. This is a ridiculous appeal to superstition and does not serve our children, or anyone else. It is not safe.
5. It is not necessary. Children have a recovery rate of better than 99.995. There are more child deaths per year from automobile accidents or pedestrians walking . If this recovery rate is too low to suit you, then we need to outlaw automobiles and walking, rather than adding this dangerous medical regimen to the child's risk load. It is

unnecessary and unsafe.

6. Those mandating this illegal injection would be liable and could successfully be sued, not only in their capacity as government officials. Those mandating this illegal injection could be successfully criminally sued as individual persons for breaking the Nuremburg Code which forbids administration of any medical procedure without the informed consent of the patient.

7. Informed consent prior to medical procedure is impossible because the injection manufacturers and the FDA will not release the information required for informed consent for at least 75 years. Everyone vaccinated would likely be dead by the time they could possibly give 'advised consent'. Without full disclosure there can be no advised consent.

Cordially,

Ron Hardy

There is no way my young grandchildren will be vaccinated for Covid. This is an emergency released vaccination. There is no information on the effects this vaccination may cause. My school age grandchildren are healthy and there is no reason to give them a vaccination where there is no understanding the effects. You'll see one quick exit from public schools if this goes through and diminished funding to public schools!

When I read this I really had to do a double take. This is criminal it's almost like the Nazis. We are in America the land of the free. These kids are not criminals. W what you're proposing is going to have lasting affects on families and children.

Please would you do this to your own family or friends?

My name is Tonya Hirn and there is no way my kids will be getting vaccinated to go to school or going to camps if they get it. When they can quarantine at home and feel safe around people they know!! This is ridiculous. There's plenty of people that are vaccinated so why aren't the number going down huh? That's what I want to know. Why you pushing so hard for this Covid vaccination? That don't really work in the 1st place. I have friends that are vaccinated and unvaccinated and got Covid and their symptoms were the same so it all depends on how your body reacts and how healthy you take care of yourself. And we don't even know what's in these vaccinations and they're pushing them so hard people die from them get really sick and who knows what it'll do to these kids I'm not taking a chance of my kid dying from a shot nor even myself. We all have rights!!

In regards to the policies being proposed I am VERY STRONGLY opposed to them. This includes but not limited to WAC-246-200-070, WAC-246-100-045, WAC-246-105, WAC-100-040.

ANY and ALL proposals regarding covid health procedures including vaccines, testing and any other "protocols" shall not be implemented as they are contrary to our constitutionally guaranteed rights! Furthermore, there is no evidence children (or anybody for that matter) are at risk to the extent of needing an experimental drug that has ZERO long-term effects research done!

It should be the right of the parents to decide the medical needs of their children. Absolutely NO way should the school or government be mandating vaccination of a unproven and not long term tested shot. Especially when that illness has such little effect on most children and many have already had it. There is NO need to vaccinate for an illness my kids already had and are highly unlikely to catch again. It is an absolute NO from me!

Subject: Vaccine mandates for WA schools is WRONG

External Email

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets the vaccine, one group gets a placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The exact text from 21 U.S. Code Sec.360bbb-3(e)(1)(A)(ii)(III) reads "of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks".

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Consider additionally, the greater alienation of a growing population of Washington homeschoolers this decision could bring. Our children need a government and health officials they can trust to put their best interest first. How will families who choose to homeschool because of this proposed COVID vaccine mandate be supported in their freedom to opt-out of public school? So far I have personally only encountered red tape and a general lack of concern for the education of any child whose parent un-enrolls them from the public school system.

It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Subject: No mandates

External Email

In 1976, when the swine flu vaccine caused 25 deaths in Americans, the program was halted. In 2022, we now have tens of thousands of deaths attributed to these COVID shots. A million injuries have been reported. These shots should no longer be allowed, much less mandated.

Children are at a statistically zero chance of dying from COVID. The shots, even if we were to ignore the side effects, are less than 1% effective. (That is, according to the "absolute rate reduction" -- see references below.) For all age groups, the chance of dying from the shot is greater than the chance of dying from COVID.

Please do not institute mandates for school children in our beloved state. If you do, and if children are injured, you will be responsible for those injuries.

Please stop coercion. Coercion is rarely the right path, and it is certainly not the case here. Please do not force children into taking a shot that is neither safe nor effective nor necessary. Allow people to exercise informed consent, which is their legal and moral right.

I am opposed to making COVID-19 shots/ vaccinations mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine does not stop the spread of the disease
- \* We are opposed for religious reasons.
- \* We are opposed for Constitutional reasons.
- \* There are well-known and well-tested therapies that are curative.
- \* Vaccines under an EUA status must be voluntary due to experimental nature of this "vaccine."

To State Board of Health,

As a parent, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Sincerely  
Travis Kincaid  
A concerned citizen

Please oppose or put a halt to this requirement for students that attend public schools. This is such a new vaccine that have limited time on their safety data that we have no clue what the long terms affects are and should not be using our children as an experiment. The science has been constantly changing and I'm not comfortable as well as other parents to putting this into our children. We should have a choice with what happens to our children and it is not up to the government to decide what we or our children do with our bodies. Why is " my body my choice" only allowed in certain situations but not what happens with ourselves or our children. Please take a look at a parents perspective on this. This is so important that we halt this and take time to think clearly on something that could later on be harmful to our children no matter what the government is pushing on us. We've already been doing what we were told we needed to do to stay safe and that's as force our children to mask 8+ hours a day. Now what? Do the masks not work because covid is still around and even though 78% of Washington is fully vaxxed covid is still here and affects vaccinated. This will never end vaccination or no vaccination. Please give us a choice.

To whom it may concern:

Please DONOT mandate the covid vaccine for school aged kids. Overall our kids have a very high survival rate if they did contract this virus. Parents have valid concerns about this and our poor children have suffered enough by not having in person learning and the changes they have to adapt to on a daily basis. Our kids have a high survival rate. They are not the issue and they are not where it is spreading!!! COVID is part of our world now, we need to just move on. Let it play out however it is going to play out. This is NOT the answer. I fear it will further shut down schools in our state, our children will suffer! Our state will suffer!!!!

Please, listen to us!!!

Thank you, a very concerned parent:

Subject: PLEASE READ!!! This is so important for my kids!

External Email

Dear WA Board of Health,

I'm writing to you with major concern regarding the upcoming vote to mandate COVID vaccinations for children to attend public school. I am a proud father of 2 boys (11 & 13) who are my legacy and deserve every opportunity to have a healthy long life. Let me be crystal clear that I am not against vaccines that have gone through the proper trials/testing and have been fully approved. I am a believer in medicine, science and facts. I am however strongly opposed to mandating the COVID vaccine for my children when it has not gone through the appropriate trials to be "fully approved". Despite the narrative being pushed to the general public, the factual truth is the COVID vaccines are "only approved for Emergency Use" because they have not gone through the proper trials like all fully approved vaccines have (it states this clear as day on the FDA EUA documents as well as [www.doh.wa.gov](http://www.doh.wa.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.doh.wa.gov%2F&data=04%7D> ).

Children have a 99.9% survival rate of this virus. This has been the case since the beginning. There are zero long term studies on the effects of the vaccine simply because it's not possible. Not enough time has passed. This is the first mRNA vaccine ever given to humans. It will take 4-5 years for this new mRNA technology to be properly tested.

I support the right for parents to decide what is best for their child. With this potential mandate you would be stealing our parental rights and backing us into a corner. This is a misguided abuse of power by completely ignoring the factual truth. My family, including my children have recently all been infected with COVID and recovered just as we do from the seasonal flu. Currently we have antibodies providing natural immunity (which nobody is talking about due to the media narrative). There's 140+ studies showing the protection of natural immunity from further infection.

Adverse reactions to the vaccine, especially heart issues like myocarditis are being swept under the rug. In 2021 there were 22,256 cases of Myo/pericarditis, with the most vulnerable to this reaction being in young/healthy males between 12-20.

Those 22,256 hearts are damaged forever. The writing is on the wall that this vaccine does not stop people from contracting or spreading the virus. I personally know dozens of people who are vaccinated and recently contracted COVID. Some had mild cases and others were hit a little harder. Where is the logic behind pushing more experimental

vaccines that aren't working? The potential damage it can cause is irreversible.

What you should be mandating in our public schools is healthy food choices, more physical activity and actual real world financial education to prepare our youth for the future.

As I stated, I'm not anti-vaccine. I am pro parental choice.

Do the right thing!

Travis Kalamakis

Any new medication takes a minimum of five years to fully understand the risks and benefits. There are plenty of examples where a new medication that was thought to be safe ended up proving to be harmful many years later. So taking away a parent's autonomy in this situation, where a child is more likely to die in a car accident than from COVID, is irresponsible and unethical.

I am communicating my immediate concern regarding the conversation surrounding the mandated COVID vaccine for school age children. My concerns are two-fold in my personal life where I am a parent of three children ages 8, 13 and 15. Professionally, I am a school counselor and have been on the front lines of the COVID implications for high school students.

I have a child with an Autoimmune Disease. There were NO children tested in any of the trials for any of the vaccines where a Type 1 Diabetic was monitored. If you know anything about Diabetics, you would know that their body does not break down, react or function the way 'healthy' bodies do. To mandate that my son receive a vaccine that has not yet been approved by FDA is irresponsible and dangerous. You have no right to make a decision as important as this for my child. Or anyone else's children for that matter. The vaccines have been readily available and accessible. At our school we have walk in vaccination clinics often. If a parent and student have chosen to get the vaccine, that is great! That is their choice. Those of us that are still researching, processing, and evolving should have a right to do just that. Introducing a new vaccine into the body MUST be studied for more than the one year to understand the true side effects. The rush to get this vaccine mandated is simply irresponsible. This has been a fluid process and we are often hearing and seeing first hand experiences where the vaccine side effects have been worse than COVID itself. This is to be expected when we rush a vaccine; more importantly, when we rush a vaccine for a population of people that have a 0.078% survival rate. That means that a school age student has a higher chance of fatality by the average flu, tuberculosis, car accidents, opioid overdose, cancer, suicide, and heart disease.

I was indifferent about the vaccine initially and like many people, wanted to observe the effects. Devastatingly, my father who received the vaccine also passed away from the vaccine. Upon meeting with his long time Dr. to go over his autopsy, we learned that there are four types of blood cancer that do not react well with the vaccines. In my dad's case he had stage 0 leukemia. He had had the diagnosis for years and many people can live 20 plus healthy years with that prognosis. With leukemia, your body has an over abundance of white blood cells that your body is constantly trying to fight. The vaccine that my dad received caused (as it's meant to) an even more abundance of white blood cells to the point that his body couldn't fight it. This caused him to go into 'Richters transformation' which took his life 18 days after his second dose. When we asked his Dr. why we didn't know this, he said 'that's the hard question to answer'. Even Doctors don't know how these vaccines react within each person. Furthermore, the Hospital told us that a person would NOT receive life insurance if in fact the cause of death was caused because of the vaccine. BECAUSE when you sign away your right to receive life insurance when you get the vaccine because IT IS AN EXPERIMENTAL VACCINE. Think about that for a second.....

My point is, this vaccine may be the answer but it may also not be. It's too soon to mandate this in our children when what we do know, without any discrepancies, is THEY ARE NOT AT RISK! They do not need to risk their bodies until we absolutely know and understand all the side effects of this vaccine. We aren't there yet..... to risk our children's health is not worth it. And it certainly should not be taken out of the parents hands.

Sincerely,  
Tasha Landram

Requiring a child of any age to be vaccinated using such a new vaccine in order to have care or an education seems ridiculous to me. Maybe once the vaccine has been around for several years it should be reconsidered with exemptions allowed. Right now as it stands very very few qualify for an exemption. If a child starts daycare at 6 weeks of age then you would be requiring a newborn to be vaccinated within a day or two of birth. I understand the need and want to stop covid 19 from spreading however you can still spread and come down with covid being fully vaccinated. Let's not put a mandate on our children without knowing any long term side effects, nor create a huge gap in care & education for those families that are not ready to have this specific vaccination.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. This is over reaching
2. Abuse of the systems "emergency"
3. Children are not experiments, nor should they ever be made to be.
4. These proposed solutions are not proving to work in the first place. Using these powers in this way is grievous and truly threatens constitutional freedoms.

Please stop! This isn't the right way to do things

I'm going to start this with , I am all for vaccines. For those who are vulnerable. You and everyone else should have an education session with actual facts , data and statistics on who actually should or shouldn't get a vaccine. Based solely on all the data , facts and statistics. Kids are not vulnerable. Most healthy adults aren't vulnerable. There is a very notable sub group of people who are vulnerable. Educate those people. The ones who have compromised immune systems. Diabetes. Obesity. Serious heart conditions. Something actual science based. A one size fits all policy for people isn't right and my children , who are not vaccinated against covid Because of data and science showing me they don't need it , will not be at school because of this potential policy. The potential for risk is actually higher with vaccine side effects is slightly worse than the risk of side effects of covid itself. Why don't you try education. Promote exercise and nutrition. You know , crazy things that truly benefit children and adults. Boost your immune system. Make you healthy and happier.

Mandating COVID-19 vaccines for school aged children as a requirement for attendance in private and public schools and childcare centers.

11.

Are you Pro or Con on the proposal?

2. Con

---

1. Children are not at risk for severe illness or death from COVID-19. 2. It is shown that the side effects of Covid-19 vaccines are a greater risk than effects of COVID-19 for this age group. 3. There is NO fully approved vaccine for this age group. All are still under EUA. 4. CDC admits that COVID-19 vaccines do not prevent transmission or infection. 5. All parents that decide to vaccinate their school age children for COVID-19 have the ability to do so on their own, without coercion from mandates. 6. The long term effects of COVID-19 vaccines for any age group are unknown, therefore they ethically should not be mandated. Thank you for your attention to this matter. I hope a logical, reasonable and conscientious decision is reached.

Subject: I oppose WAC 246-100 and oppose adding Covid 19 Vaccine to WAC 246-105 schedule

External Email

To whom it may concern;

I oppose the idea of WAC 246-100 allowing any authority to involuntarily quarantine individuals. Our Country and State was founded on liberty and freedom. The idea to detain someone over covid-19 is ridiculous and gives way too much power to Authority. This is a stepping stone to more severe actions that can be taken in the future. This is a very dangerous slope that has not ended well for any other country that has tried to unlawfully detain.

I oppose adding Covid-19 vaccine to the WAC 246-105 schedule for requiring vaccines for children who attend school. These vaccines are only authorized by the FDA for emergency use only. These have not gone through the 5-10 year studies to allow full authorization. You will jeopardize the safety of our children who have been the least susceptible to this virus with a vaccine that we know nothing about. We do not know long term side effects and are not willing to admit the short term side effects that this vaccine has. This is a danger to our children and needs to be the choice of the parent if their child will be vaccinated for Covid-19.

I hope you can put the people's needs before the power grab this government is trying to overreach on.

Thanks for your time!

Subject: Tyranny

External Email

Talking points for my email:

- What test will be used to determine SARS-COV-2 infection?
- CDC withdrew the request to the U.S. Food and Drug Administration (FDA) for Emergency Use Authorization of the current test being used.
- Does the testing isolate only for the SARS-CoV-2?
- Where is the data that isolates a live sample of the SARS-CoV-2 for these tests?
- A testing device would need to be proven reliable against a reliable isolated live sample with verified repeated data and studies
- Where is the data that shows the science for the accuracy for these tests? There are so many False Positives and False Negatives.
- How can anyone make a decision that "One size fits all" for SARS-COV-2?
- With a population that is supposedly 80-90% vaccinated how can we still be having such outbreaks?
- With each new variant, the symptoms lessen, as with Omicron; most say it's no more than a cold.
- Why is Natural Immunity from a SARS-COV-2 infection not noted or taken into consideration?
- Isolating anyone involuntarily for quarantining for such a high survival rate is unthinkable. This is America, not Australia.
- Our Government should not take place of parents making choices for their children, or for themselves either.
- People are waking up and understanding that the science with no published studies for SARS-CoV-2 is more about Control vs. Health.

People end up in quarantine by mistake. Tests are often incorrect. People have families, children, jobs, lives . Are you all crazy? Give me liberty or give me death. Don't force your monkey ideas on people . This has nothing to do with health issues but with total control of the people. If I'm gonna die from covid then I will because my days are numbered by the Lord. And so is everyone else's. And setting up these nonsense laws won't fix the problem but repenting and seeking God will stop all this. This nation has done just fine with living by the constitution don't come in and change our laws and add nonsense ones. Quarantine camp is another word for jail so you can control our lives. Stop this Bill!!!

My children are MY responsibility, NOT the government's. The government has already undermined the parent's role in their children's lives to the point that our society is losing structure and integrity. If my teenager has the right to get an abortion without permission, or refuse counseling when he is addicted to drugs and alcohol, then to be consistent, the government should also allow them the freedom to choose to be vaccinated or not. If you decide to remove that choice, it invalidates your stance on their body, their choice. I have a civic and moral responsibility, to my children and others, to stand up against tyranny and ensure they also will have that right in the future. I refuse to put a substance that I do not believe in, do not believe will benefit me, in fact have grave doubts regarding the long term effects of, into my person. God tells us to "render unto Caesar what is Caesar's and to God the things that are God's Mark" 12:17, Luke 20:25, Matthew 22:21. I follow the legitimate laws of this country and the moral laws in Scripture. Ultimately my body, my person, my soul belong to Jesus Christ, the resurrected, living Savior. My children deserve to make that choice for themselves, or if they are too young, then the parents that God has given them to be responsible for them should be able to. Thank you for considering a differing opinion.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

To: DOH WSBOH  
Cc:  
Subject: Washington Board of Health seeking parental input on potential vaccine mandate for students

External Email

Hello Washington Board of Health,

Concerning potential vaccine mandate for students, I am asking that you do not mandate a COVID-19 vaccine for students.

My concern is that you are taking away the responsibility of the parent to take care of their own child. A parent

is responsible for the well being of their child and I feel that this is just another way to say to the parent that you are not responsible enough to know what is best for your child so the government is going to mandate that your

child needs to have this vaccine.

Schools do not need another responsibility to take care of that should be the parents responsibility. Schools are

already overloaded with responsibilities that should be done by parents.

I also feel that this will hurt schools in the long run. Parents will start taking their children out of school and start

teaching them at home. This will decrease the number of students in the schools and will cause de-funding of

monies to these schools do to lack of students attending.

Again I am asking that you do not mandate a COVID-19 vaccine for students.

Thank you for considering my concerns.

Subject: Regarding January 12 BOH meeting agenda items

External Email

To whom it may concern:

I am a concerned parent who would like to voice my opinion for you to be informed as you go forward into your January 12 BOH Meeting.

I am opposed to the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I believe the COVID -19 shot should be left up to the choice of the parent and not mandated for children to go to school (also, the COVID-19 shot should not be mandated for anyone-it should be the choice of the individual).

Also, I support the Informed Choice Washington's Petition for Rulemaking (Item 11 on your January 12 agenda) that asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you,  
Sharon Floyd

I am against any Covid-19 vaccine mandate. I am very opposed to mandating our children get Covid-19 vaccinated. Time and again we have been told that if only "x" percent of the population would get vaccinated, we would acquire herd immunity, that we could curb this virus, that life could go back to normal. The only true method of deterring this virus that I have witnessed is cleanliness and distance. If we limit the spread of germs (by reasonable methods) we stay healthier, this would include washing our hands often and cleaning high touch surfaces. I believe this is also a great fight against the flu and common cold. I will not subject my children to a vaccine that has not withstood the test of time (minimum of 5 years), nor do they fit a profile of "at risk" individuals. These wide swept blanket approaches merely aid in virus mutations, and for a virus that we have a mortality rate of less than 1% AFTER infection, it is unacceptable that such drastic approaches be mandated upon the American citizens.

RE: Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

Comment by Seth L. Cooper, Attorney at Law

Dear Washington State Board of Health,

I strongly urge the Board to deny any petition requesting that COVID-19 experimental drugs be mandated for children to attend public schools in the State of Washington. Or at the very least, the Board should take no action at this time on any such petition.

It would be an unwise, radical step to adopt a rule requiring children to take injections of experimental drugs in order to attend public schools. A state-imposed mandate would be dangerous to children and unduly coercive toward parents who count on the public school system to educate their children. Ultimately, it is the right of parents to determine whether the use of experimental drugs best furthers the health and well-being of their children.

As the Board is aware, COVID-19 mRNA drugs actually being administered to adults and to children have received only emergency use authorization (EUA) by the U.S. Food and Drug Administration. Those drugs have not been subject to long-term safety testing. Public health officials have acknowledged that those experimental drugs do not prevent a person from contracting COVID-19 and that they do not prevent a person from transmitting it. Moreover, there is no evidence of likely danger to healthy children from COVID-19. Parents do not need to have medical expertise in order to make a common-sense cost-benefit determination that those experimental drugs pose no net benefit to their healthy children and that they instead pose unknown and potentially devastating harms.

There is also a legal distinction between experimental mRNA drug mandates and historically recognized vaccination requirements (with exceptions) for things like small pox. That distinction is reflected in the Common Rule, 45 C.F.R. § 46, among other sources of law. An experimental drug mandate for children would violate the constitutional rights of bodily autonomy and conscience of children and parents. Do not impose any COVID-19 drug mandate.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at an extremely low risk from Covid 19. They should not be forced to take an EXPERIMENTAL drug to protect adults. Adults should be protecting their futures. We have no long term studies to show they will not be harmed.

The vaccines do NOT prevent the spread of Covid. So the entire stated purpose of such a requirement is false.

Hello,

I am writing to you to ask you to not approve the mandate for covid vaccination. This vaccine does not prevent you from getting the covid virus, it will help with lessening the severity of symptoms. I believe in medical freedom for my family. If this passes the state will lose money from the federal government as many parents will pull their kids from schools. The vaccine is not even approved by the government. It is still in the EUA stages and not enough research has been done with the vaccine to prove it is safe.

PLEASE DO NOT APPROVE THE MANDATE!!!!!!!

Concerned Parent,

Subject: COVID 19 Vaccination Requirement for School in Washington State

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for your attention on this important matter.

Joe Toche

Seattle, WA

To Whom It May Concern:

I absolutely oppose the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I vehemently oppose COVID-19 shot mandates. COVID-19 shots have no place on the list of mandated shots for school.

I completely support Informed Choice Washington's Petition for Rulemaking. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks you, the Board, to establish a new rule that prohibits the Board from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. All product must successfully complete Phase 3 trial studies, failing to do so is negligent.

Thank you for your time,  
Stephanie Anderson

To the Washington State Board of Health.

The idea to impose a mandate for Covid vaccines on children is wrong. The likelihood of them having symptoms more serious than the flu or common cold are very low. The likelihood of them developing problems with the vaccine are too unknown for parents to feel safe putting that vaccine in their bodies. It does NOT make sense! As a parent of two young children I would pull my child from the school systems before taking that risk. Imposing this vaccine on them will have far more consequences than benefits for EVERYONE including the public school system. Our country is so divided and there is no trust left, imposing this vaccine mandate will tear that even more open than it is.

Sincerely,  
A protective father

I am writing to comment on item 11 (Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry) on the January 12, 2022 Washington State Board of Health [WSBOH] Agenda, regarding potential inclusion of COVID-19 vaccination on the schedule under WAC 246-105-030.

The COVID-19 vaccine from Pfizer is the most dangerous vaccine ever approved by the US Food and Drug Administration [FDA]. It is a vaccine of new type, never before used on humans, tested (if the word can even apply to the limited science that was done prior to Emergency Use Authorization [EUA] submissions) and approved by the CDC and FDA violating almost every standard of analysis applied to previous vaccination products. Over 1 million adverse events from this vaccine are now reported in the VAERS database (as of CDC 12/24/2021), a database that by the CDC's own methodology under-reports events by a factor of approximately 41 times (the CDC in their 12/31/2021 Mortality and Morbidity Report admits to at least a 6.5 times under-reporting in VAERS, which should be considered best case).

Competent outside reviewers have estimated that this vaccine will kill substantially more children than children prevented from dying from COVID-19 (with a ratio as high as perhaps 100:1). A poorer risk/benefit ratio is difficult to imagine. The previous most dangerous vaccine (Smallpox) at least had the excuse that the disease it was intended to prevent has a 30% fatality rate, even with modern medicine. For our youth, COVID-19 is of similar danger as the flu, so the risk profile of any vaccination must be very low. Serious outside observers have estimated that to-date, the Pfizer COVID-19 vaccine (the only approved product for 5–18-year-olds in the US, though only the EUA version is available) has killed approximately 1300 children, more than have died of the disease itself by CDC records (757 [from CDC 12/3/2021 VAERS reporting], though we can assume that many of those were with COVID-19, rather than as a consequence of the disease itself).

I strongly oppose the effort to include this vaccination on the vaccination schedule under WAC 246-105-030, regardless of approval status by any Federal Agency. It is unnecessary and more dangerous to the children of Washington State than COVID-19 itself.

Regards,

Timothy Fellows

Hello,

My name is Katie Walsh and I am a first grade teacher at Coulee City Elementary and a mother of 2 current elementary students and one future student. I strongly support medical autonomy and choice when it comes to people's right to choose what is best for their bodies and their children's bodies. I urge you to allow individual freedoms in this area and discourage the recommendation for COVID-19 vaccinations of children to attend school or any person for that matter to live a life of their choosing. I believe it is complete discrimination to segregate students based on their medical status. I also believe that science has now shown that vaccinated individuals can indeed contact and spread this virus and that the affects of the virus on children are minimal and do not warrant the risks of the vaccine. All of my children and I have had the virus and our natural antibodies are alive and strong to offer us and others protection.

Education has come a long way in offering a free, appropriate, public, education for students across the nation. Unfortunately, with policy around COVID-19, I have seen that fall by the wayside and this potential mandate will force families to choose between what they feel like is in their child's best interest physically versus what they know is in their child's best interests emotionally, socially, and academically. This is not a free, appropriate, public education for ALL. Families and teachers that have options WILL withdraw their students from public institutions and WILL resign over this issue.

Enrollment is already on the decrease and continues to decrease due to, what in my

opinion is, poor policy around managing COVID-19. The state is already going to have to pick up a big tab due to this. I can foresee public education in WA state turning into what it is in some developing countries with the "haves" opting for private or home-school and the "have-nots" being left in the public system due to no other option. Quality Educators will leave and public schools will become institutional islands that are poorly staffed and underfunded. WE CAN DO BETTER FOR OUR STUDENTS AND FAMILIES. You are in a position of influence and I ask that you use your influence to protect the whole child and family autonomy when it comes to making decisions of well-being for their child. Protect diverse, quality, flourishing public education and protect the right to a free, appropriate, public education.

Thank you,

Katie Walsh

Covid vaccination should not be a requirement for children to attend school or daycare. It is well known that children have an extremely low risk for covid. Our current vaccines are still only authorized for emergency use. Doctors and parents do not have long-term safety data simply because not enough time has passed. Please do not create any covid vaccination mandates at this time. Thank you, Amber Timmerman

Subject: comments on requiring minors to have COVID vaccine

External Email

I OPPOSE the formation of the Technical Advisory Group that is considering the feasibility of mandating COVID vaccine for our minor youth. I have two daughters, ages 11 and 15. They are healthy and have already had a mild case of COVID. Arbitrary mandates such as these are government overreach and are only seeing the big picture (in their mind) and not each individual affected. Vaccine compliance (75% of those over the age of 12 are fully vaccinated in my county) has not stopped the flow of COVID. So why risk our kids with experimental vaccines? The benefits don't outweigh the risks. The virus is becoming weaker and weaker as it spreads.

I SUPPORT the petition proposed by Xavier Figueroa, Ph.D. that asks the Board to establish a new rule that prohibits the board from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. Our kids deserve to have their health considered as well. The new vaccines are experimental and don't work the same as other vaccines in the past. We need to see more evidence of the risks.

Sincerely,

Rob Wagy.

Vaccinating children with the covid vaccines should not be allowed and certainly not mandated. The number of children who developed myocarditis or thrombosis after having received the vaccine is alarming. We should not risk the health of children by forcing them to get vaccines when their risks are so low, both of getting the disease for which the vaccines are given and of having life-threatening symptoms. Another valid reason not to mandate the vaccines for children is that the vaccines are not working. People are still contracting covid after receiving the 1st, 2nd and 3rd doses. My final reason for objecting to mandatory vaccinations for children is the fact that children are under the authority of their parents, and their parents, not the government, should make the decisions pertaining to their children's health and medical care.

Washington State Board of Health,

It is my understanding that these are some of the proposed policies for the Zoom meeting scheduled for 1/12.

Here are my, basically, yes or no questions to please consider.

- 1) Are these policies based on Science? If yes,
- 2) Are these proposed policies aimed at what's best for the health of every Washington citizen regarding their health as related to Covid?

If yes,

- 3) Since, according to science, the vaccine does not prevent anyone from getting Covid or spreading Covid will these policies apply to every single person in Washington since every single person is a danger to others, whether vaccinated or not?

If yes,

- 4) Since, according to science, age and obesity are the two major co-morbidities associated with death related to Covid, and since we can't impact age, do these policies apply to every obese Washington resident and are you going to force them to do what's best for their health as relates to Covid and force them to lose weight since it's best for their health?

- 5) According to science, children have an incredibly low risk of death, are you really going to expose every child to risk associated with a novel vaccine? I certainly hope not. ( See just one study attached, there are many more.)

<https://www.ncmd.info/news/covid-deaths-children-rare/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncmd.info%2Fnews%2Fcovid-deaths-children-rare%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cca22b67d87ab47ffadd808d9d18dbe65%7C11d0>>

And finally,

- 6) According to science, natural immunity from having contracted Covid is better than immunity provided by the vaccine and are you going to acknowledge natural immunity? According to science?

Sincerely,  
Kerri Hunt

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To the WA state superintendent of schools, WA state secretary of health and their boards,

I implore you as a mom of 3 boys and a person who has worked with children for 32 years, do not make the experimental covid vaccine mandatory for school attendance. I am NOT anti-vaccine. My children and I are fully vaccinated with every tried and true vaccine. I am confident we will not get tetanus, whooping cough, measles, etc. These vaccines have been vetted and long term studies have been done to maximize effectiveness and minimize side effects.

There have been numerous studies around the world showing that the covid vaccine is much more harmful than covid itself to boys. At minimum, the UK found that boys are 6 times more likely to suffer myocarditis from the vaccine than covid itself. Since the vax has been approved for kids 5 to 11, 1 in 100 has a documented adverse reaction in VAERS. These numbers have never been seen and the drug still allowed to be used.

Please do not mandate the covid vaccine for all children. Children are at greater risk of harm from vax side effects than covid itself.

Thank you for your time and consideration,

Patty Johanson

To whom it may concern:

I am a parent, grandparent and member of the community. I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid 19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of Covid 19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do not accept this vaccine as safe.

Please protect our children by NOT requiring Covid 19 vaccinations to attend child care or school.

Thank you,

Kim Bentz

To the Washington State Board of Health,

Please note that I, Rachelle Boone a resident of Washington state am sending my disapproval for any Covid vaccine mandates for anyone and most especially anyone under the age of 18 per the reasons that follow:

Children are at extremely low risk for covid.

The vaccines are still only EUA.

There are no long-term studies to document any history of safety with the vaccines.

Studies do now document that the vaccinated and unvaccinated can both transmit Covid therefore the vaccine isn't proving effective in stopping the spread of covid.

Thank you for hearing the voice of the residents of Washington State.

Sincerely,

Rachelle Boone

Covid-19 is running rampant in Washington State. There are clearly a number of individuals in a small but outspoken group that have decided everything Covid-19 is some sort of a ridiculous conspiracy theory, vaccinations don't work and masking is infringing on your rights. After I roll my eyes at this group of people, I would like to thank Washington State for continuing to do the best they can to protect our fellow Washingtonians. I absolutely support putting a requirement for the Covid-19 vaccine on the school vaccine requirement list. We have spent time urging our elderly to get vaccinated, now it's time to protect our children too.

My name is Shyann Cruz, I reside in Pateros Washington. I oppose mandatory COVID vaccines for children in school districts. This should be a choice for parents for the fact there has not been adequate testing for long term health effects. There is higher rates of adolescent suicides from the lasting effects of lockdowns and mask mandates then deaths from COVID-19 and adverse vaccine reactions to the COVID vaccine. The scientist, Dr. Robert Malone CD who in fact created the MRNA technology for MRNA vaccines has released statements that it could be detrimental for children and he is against children taking the vaccine until there has been more rigorous testing. If this in fact passes I will immediately be pulling my son out of the Pateros school.

Thank you for your time and consideration,

Subject: Appose the mandates that will KILL children; Governor and the Health Board will be Responsible!

External Email

Subject: Appose Vaccine Mandate and Any type of Forced Quarantine

Date: January 7, 2022 at 9:55:19 AM PST

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It is not enough that you have kept our state locked down as if you have a right to do so. False assumptions and error at every step is the way this board and our Poor Governor has handled the Covid issue. You do not understand the Constitution and you do not understand FREEDOM as granted to us by GOD. Get in the game and quit trying to protect yourselves from the PEOPLE and do your RESEARCH on what is going on with the vaccine. You are going to contribute to killing more innocent children with any vaccine mandate so drop it now! I have included some of the facts below, but because of censorship in the media the facts given are rarely seen by the public.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID

deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

(americasfrontlinedoctors.org

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. Your agreeing to any mandate together as a body politic against all law is another step towards COMMUNISM. If that is what you want there will be problems that YOU create by these policies.

External Email

Dear Tracy,

My name is Stacey Simon, I'm writing to you about the possibility of mandating the Covid-19 vaccine in our schools.

I want to advocate for my children and for the children of Washington State. This isn't about anti-vax, but for everyone's right to choose what goes into their bodies.

This vaccine is still new, and there aren't any long term studies on its effects. It should be left up to the parents and their physician whether or not to get the vaccine, not the government. No one should be forced to take anything in order to attend school, hold a job, or continue to be a member in society. Studies have shown that our kids are not at risk for serious illness, and to date, Covid-19 still has over a 99% survival rate.

Clearly the vaccine isn't working to keep this virus at bay, and those that are vaccinated are still getting sick and spreading the virus. So why at this point would mandating this for our students be necessary or make any logical sense?

I can appreciate the fact that the world's attention is currently hyper-focused on Covid 19. Health and Public Safety organizations feel the need to show some sort of response, warranted or not. Please keep in mind the flawed logic of the vaccines and our children's well-being and health when making these policy decisions.

Thank you,

Stacey Simon

2. Con

---

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: -During the October 26th FDA advisory committee meeting, 16 of the 18 members were very clear that they did not believe "otherwise healthy" children needed this injection. It was specifically stated in their closing comments "From CDC reports, we can expect that for every 18 child hospitalizations prevented at least 43 will end up in the hospital for all causes following vaccination." This is an alarming number of hospitalizations that would be created by forcing a vaccine on young individuals. -Per Chapter 9 of the Federal Food, Drug, and Cosmetic Act, Subchapter 5 Section 360bbb-3(e) Conditions of authorization Section (1)(A)(ii) Appropriate conditions designed to ensure that health care professionals administering the product are informed- (III) of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks. -Phase 3 clinical trials of COVID-19 vaccines are not yet completed. C4591007—the main clinical trial in children and young adults with BNT162b2—has an estimated completion date of May 5, 2026. Source:<https://clinicaltrials.gov/ct2/show/NCT04816643> -The vaccine formulation now being given to U.S. children aged 5-11 is NOT the same formulation used in the clinical trials, and NOT the same formulation that has been administered to all other age groups under EUA. So even when current ongoing clinical trials are complete, the results cannot be assumed to be relevant to the safety or effectiveness of the new formulation. -Children are the LEAST affected by this virus regarding severity and MOST at risk of unknown long term effects. Thank you for your consideration in this matter.

Yes, I'm a parent....I suggest that gives me "special expertise" related to the topic of my child being required to receive an experimental (EUA) vaccination to participate in what are normal childhood activities.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

WSBOH considering COVID vaccination mandatory for children to enroll in school and child care.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

As a parent I am strongly and adamantly against requiring children to receive an experimental vaccination for an illness (COVID) that to date has had a very limited impact on children's health, an illness that they are the least likely group to get sick from. Current vaccinations that are being provided in this country are still EUA (experimental) with limited testing, and really no long term testing, of effects on children. There is evidence coming to light that some children are having some adverse affects to the COVID vaccination. I wholeheartedly believe that vaccination for COVID should be a parents decision; not a state mandate required so that your child can participate in what would otherwise be "normal" childhood activities. Thank you.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at a low risk for Covid complications, a risk we know. We DO NOT have enough data on the long term risk of this vaccine. We cannot make a well thought out decision if we do not have the facts of safety and side effects.

This vaccine is not FDA approved. Only EUA approved.

We also have proof from studies that the vaccine does not stop transmission of Covid.

As parents we hold our children's future in our hands. We do everything for our children, including making the best decision we can as parents. Do not take this decision away from parents when you do not even have facts to support the long term effectiveness and safety of this vaccine.

Please allow more time to confirm that the vaccine is a safe option for our children's health!

Thank you,  
Tessa

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

I support the petition for rulemaking (item 11 on the Jan 12 agenda). I support establishing a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

From: Terri Griego  
Sent: 1/7/2022 9:58:11 AM  
To: DOH WSBOH  
Cc:  
Subject: January 12 Meeting

External Email

Members of the Board,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

I oppose Agenda item #8, and support Agenda item #11.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Please let parents make these decisions. Making children line up to get injected with a vastly unproven and untested substance, one for which we have no way of knowing long-term effects for them, to protect them against a disease from which they have an extremely minuscule risk of any adverse outcome, is cruel. By requiring this, you will then be responsible for whatever happens to all those children as a result of the vaccine. Are you prepared to accept that responsibility?

Sincerely,  
Terri Griego  
Washington State citizen

There is absolutely no reason to force vaccinating our school children. Influenza is more dangerous and deadly than Covid for children under the age of 18 (according to CDC statistics). The vaccines are only under an Emergency Use Authorization and the side effects of the vaccine on young children is still unknown. Why would we risk the possible negative side effects of a vaccine when the likely hood of our children being hospitalized or dying from Covid 19 is essentially nil. Also, with the current outbreak of the Omicron strain, it has been shown by the CDC and other independent analysis that breakthrough cases of vaccinated people are skyrocketing. This indicates that the vaccine won't even stop the transmission of the virus nullifying any reason to force my children to get it. Washington has already lost over 60,000 public school students over mask mandates so how many more will we lose if vaccines become mandated. I can say for sure that you will lose 3 more if it does, because my children will not be vaccinated and therefore will be unplugging ourselves from the public school system. There is absolutely no reason to force this on children other than incompetence, at best, of our state health officials.

Covid (19) is per many experts and statistics not dangerous for the vast majority of children and teenagers. The current vaccines have shown severe side effects and seem to do more harm than good. We do not have any long term studies for any age group. In my eyes it is irresponsible to even use these vaccines for children and teenagers. Myocarditis, pericarditis and other illnesses have shown up after Covid vaccines (CDC data). These diseases often have long term consequences. We don't know for sure, where the spike protein settles in the body, but it has been found in the brain, ovaries and organs (studies from Israel and other countries). Pfizer themselves reported a high number of stillbirth and miscarriages in women enrolled in the trial. There are fully authorized vaccines that I support. Please refrain from mandating the Covid vaccine for anyone, especially children and teenagers. We have successful early treatment options (protocols for Ivermectin, Hydroxychloroquine, Monoclonal Antibodies, et al). Thank you

Please reconsider mandating vaccines for children!

These are not approved vaccines! EUA approval is emergency ONLY we do not know enough about them! They are still developing in early stages of life why would you want to add some thing you don't even know what the effects will be! Please do not do this to our children!

Taylor Johnson

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Allowing local health officers to use law enforcement to force emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine

facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling & vaccination. Including Covid-19 injections as part of school immunization requirements.

11.

Are you Pro or Con on the proposal?

2. Con

---

This is an abuse of power & authority. By allowing health officers special powers to use law enforcement to do their bidding, this is actively turning Washington into a police state. This is taking away rights of the individual protected under the Constitution of the United States of America under Amendment 14, section 1. Police officers swore an oath to serve & protect & if they willingly choose to enforce this new protocol should it go through, they will lose the little support they have left. The state doesn't have a right to tell people what to do with their bodies. Taking people against their will to a quarantine facility when covid-19 has a 99% recovery rate for the majority of the population makes absolutely no sense. There is now proof that cloth face masks don't work, the vaccine doesn't prevent infection or stop transmission, and the 6 feet social distancing does nothing. Covid-19 is here to stay, it's not going anywhere, and quarantining people to make people "feel safe" won't change that fact. It is a mistake to think that this is the answer to Covid-19, considering all of the information that's been coming out about the vaccine efficacy & talks of now needing a 4th booster shot. This will not solve the states Covid-19 problem, but in fact will cause more problems for the state stemming from the individuals themselves. People will not comply. They will not allow themselves to be taken from their homes to be quarantined, especially since they can quarantine at home. This is plainly a violation of our rights as American citizens. I urge you to to rethink this decision. Considering the CDC has admitted that the Covid-19 vaccine doesn't prevent transmission or infection, the requirement for schools frankly makes no sense. It is not protecting anyone. Enforcing this on children who have little risk to covid-19 is abuse of power. It does not prevent them from getting or spreading covid-19 so I am failing to see the point. Making people "feel safe" is not our children's responsibility.

---

Due to the fact that scientific information is changing rapidly, I am requesting that the Washington State Board of Health do not include the covid vaccine on the current vaccine schedule for children. Currently, we are seeing high rates of transmission among fully vaccinated and boosted adults, demonstrating that these vaccines are not capable of stopping community spread. Moreover, the current primary benefit of covid vaccination involves reduction of symptoms and severe outcomes, and thus is not applicable to the vast majority of healthy children who do not experience severe effects. In addition, vaccine manufacturers and other countries are now calling for a fourth booster shot. As such, it is unknown how many doses per year will be required to maintain efficacy and a 3-4 dose per year regimen will prove extremely onerous for many families, especially low income and immigrant families. It should be noted that this decision also has significant implications for trust in public health systems and the traditional vaccine schedule for children. There is a real possibility that the inclusion of an emergency use only vaccine that requires multiple doses per year but neither prevents community transmission nor provides significant health benefits to the majority of children will dissolve public trust in the entire process and lead to a significant decline in standard childhood vaccination rates. And that would be a true public health nightmare for our children.

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death. The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine. The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs. Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu. Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children. Thank you for your time.

I know 2 young dads who developed ongoing issues from the vaccines. One is a firefighter but both felt it the right thing to get the vaccine. Now their views have changed . I also know of a 12 year old: boy who ended up in the hospital 3 days with heart issues. His mom a teacher and dad a scientist we're both for the vaccine. There are too many unknowns regarding short term and long term Repercussions. We are panicked, in a rush to say these vaccine drugs are FDA certified when they are not. It takes years to complete the test trials for FDA approval. These vaccines are in the process to get FDA certification and approval We are putting our greatest treasure our children in their early developmental stages: physically mentally neurologically emotionally , at risk in the testing and experimental phase of these drugs. . Researchers scientists Drs. Do not know . Parents have the right of choice for themselves and their children. I am the grandmother of a 4 1/2 yr. old grandson who is in preschool .

External Email

I, Kati Spencer, a registered Voter and resident of Spokane WA wholeheartedly oppose any and all CoVID vaccine requirements for any minor child in WA state. I oppose any medical treatment, medical examination or counseling (WAC 246-100) without parental consent. I will not allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC-246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) This includes the requirement of the covid-19 injection as a part of school immunization requirements using WAC 246-105.

It is an infringement on our rights as citizens and our ability to do what is best for our children and ourselves. The government doesn't have the right to tell us as parents or US citizens what we can and cannot do with our own bodies. We have the right to medical autonomy and it needs to stay that way. The government needs to get out of our medical decisions.

This is an atrocious abuse of power and we will not stand for it.

Subject: OPPOSE Agenda Item 8, SUPPORT Item 11

External Email

To Whom it May Concern:

I am writing to say that I am absolutely opposed to mandatory Covid-19 shots for children to attend school. There are a myriad of reasons to refer to to show that this is too much, too soon. However, I will only reference two of those reasons:

1. This vaccine is still EUA, which means that it has not gone through the full safety standards that are normally required of vaccines for full approval. Therefore, we are forcing children to be experimental subjects for not only a new "vaccine," but also a new technology, in order to obtain what they are constitutionally entitled to - an education.
2. When the committee recommended to the FDA to allow EUA, that committee had significant debate about whether or not to approve, but ultimately approved it, saying that "we won't know the impact or dangers of the shot until we start giving it to them." This in and of itself shows that the FDA has not done enough research to determine whether this vaccine is safe. Asking children to risk their lives or serious injury for an as-yet still experimental drug when they have a .007 percent (at most) chance of dying from the disease is ludicrous. Not only that, we actually know that several children have died from this shot. The government should not be allowed to say which risk children should take.

I also SUPPORT Item #11. As I stated above, a new technology without long term studies backing its application should NEVER be mandated. Please approve Item 11 and DENY Item 8.

Thank you,

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
  
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration.

Rebecca Pagotelis,

Spokane, WA

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Kids are at low risk.

The vaccine does not stop the spread of the disease.

There have been no long-term studies and I do not want my child as a trial run.

Thank you,

Siri Brekkaa

---

The short answer is this. COVID shots are only approved under an EUA. This is shot is still very much experimental. There are no long term studies on their effects. They have proved largely ineffective in preventing transmission and infection which is given as their purpose. Children are statistically not at risk for hospitalization or death from this virus. Any honest study of the data will bear this out.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Leslie Peterson

---

Follow the science, there is zero evidence that vaccinating children will slow down the virus. There is evidence that vaccinated persons are becoming ill as much as the unvaccinated. The Omicron variant has shown that vaccinations have zero effect on transmission. Children have a minuscule chance of hospitalization with the virus. There is more chance of sickness from the ingredients in the Experimental vaccine than from the virus. NO Mandates and NO Recommendations for the vaccine.

I am writing to strongly condemn the idea of applying the Washington disease codes to COVID-19 for all Washington State Residents. This would be a complete infringement of personal freedoms and rights by a small board that should not have ANY authority over millions of people's lives. Furthermore, mandating vaccinations for children will materially change our state and economy and there will be a mass exodus of families from this state because they simply do not want a government agency telling them what is best for their children. There are documented risks for children with the vaccine that are undeniable. You should compel somebody to get vaccinated but you should not mandate it, it is unAmerican.

Subject: "No!" To adding Covid-19 vaccine mandates to requirement list

External Email

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1. The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.
2. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.
3. According to CDC & WHO data, there could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.
4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by disenrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family values.

Kathy Varela

I am writing about the meeting you are having next week to consider a vaccine requirement for school aged children.

I can hardly believe that you are even considering this when children are at a very low risk from covid-19.

To take the choice away from parents is not only morally wrong, it is clearly unconstitutional.

I ask you to please say no to this requirement - I fear you would alienate many many families and leave them no choice but to take their children out of public schools.

Thank you for your consideration,

Terry Rude

---

I have a vaccine injured child who had learning disabilities. The current mnra vaccines are not finished with clinical trials and are under emergency use. Forcing these on kids who rarely have severe symptoms is outrageous and unconstitutional. Over 55 k students have left public school and more follow daily. We will not be returning our 10 year old to public school as we had hoped if this mandate goes into effect. Wa has lost 500 million in revenue for public schools already. Thousands of parents are ready to pull their kids out over this. I strongly oppose violating people medical privacy as well.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low health risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term safety studies
- \* Several studies show kids have greater risk with the Covid inoculation than they do benefit
- \* Studies document vaccinated and unvaccinated can both transmit Covid
- \* The vaccine does not stop the spread of the disease
- \* Informed Consent is the law and the safety data is not adequate or even publicly available in full
- \* Myocarditis is a greater risk to adolescents than Covid health risk

You are responsible to know the data if you are making recommendations that guide policy.

Children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to “protect” them. They were needlessly kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won’t get back. They continue to be required to wear masks in school which is an undue burden given the lack of evidence to support this requirement. We are one of few states still imposing such needless measures, Washington needs to figure it out, and stop doing it at the expense of children and the those you are supposed to serve and protect.

Concerned parent and WA citizen

I oppose forced vaccinations, especially for children to attend school, and for any other reason. Where is the data on the Wa DOH dashboard showing how many school aged children ( 5-18 ) that have died in WA state from Covid-19 ? All I can find is a national number from the CDC website of 573 in all of the United States since January 2020 to January 2022. According to the Population Demographics for Washington 2020, there are 1,162,270 school aged children ages 5-18 in our state. There is zero reason to mandate forced vaccination for covid-19 based on the data I have found.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

\* The vaccine side effects are known to be dangerous to several. \* The long-term side effects of the vaccine are unknown to everybody. \* There have been many drugs in history that have been deemed safe, then proven not (Thalidomide for one large example). \* The efficacy of this vaccine has proven to be minimal. I know several vaccinated & boosted people that have gotten very sick with covid. \* A vaccine mandated imposed on our children will cause many parents to pull their children from school & extracurricular events, leading to more mental health problems & suicide amongst our children. \* Removal of students will remove public school funding, lead to the denial of levy passings, and everybody will suffer: students, teachers, administrators and community members. \* The way I view this - a vaccine mandates is a lose/lose for all parties involved. Parents & individuals deserve a choice, as is our American right ... you are denying people the right to choose for themselves, and their own bodies, what is safe and worth the risk. And there are risks...many! I will expand further in an email. This screen is very difficult to read & review. Thank you, Camisha

Subject: NO TO VACCINE MANDATE!

External Email

To whom it may concern,

I am a Washington State resident and taxpayer, also a wife and mother of ten children. I am opposed to our state mandating residents to be vaccinated for Covid-19. I agree that this is a communicable disease. This disease has hurt many people. However, most people are not harmed by it, the long term effects of the vaccine are yet undetermined, the vaccine has proved to harm people, some States have chosen to ban Covid—19 mandates, and there are continued improvements in treating people with Covid-19. The majority of residents in WA have been vaccinated. Children get very little benefit from the vaccine and have been harmed by it. The vaccine and boosters have proven not to stop the transmission of the virus. Furthermore, WA residents and all US citizens should not have invasive medical procedures forced upon them. For over 200 years the US has fought for freedom for ourselves and other countries around the world.

Washington State should not mandate the Covid-19 injection to all its residents and the mandates that are in place should be lifted.

THE MAJORITY OF RESIDENTS HAVE BEEN VACCINATED. YOUR PAST MANDATES HAVE SUCCEEDED! Be content with that victory and take this unnecessary burden off of all the people.

Sincerely,  
Shirlee E. Mosiman

"Immunization Criteria for Child Care and School Entry." There is a big push from WA state to force the Covid vaccines on all citizens, including children.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

This is an unproven vaccine created in a hurry to address fear. Vaccines that have been proved by long studies of science are more widely accepted, but they have still caused health issues for some children. Forcing vaccines, especially the Covid vaccine, are what is being proposed without unbiased consideration of long term scientific research.

COVID vaccination mandates for school children

11.

Are you Pro or Con on the proposal?

2. Con

---

COVID vaccine mandates for school age children are inappropriate because of limited risk to children from the disease and inadequate assessment on the risks of the vaccine for this group. Children under the age of 18 are at extraordinary low risk for death or serious illness. As of Dec 15, 2021, 655 Americans aged 0-17 died from COVID-19, all of those had significant co-morbidities. Children and schools have not been a significant cause of spread in the US or elsewhere. COVID-19 is not a childhood disease, so vaccination is not justifiable for their protection. Vaccination in children, especially those under 12, has not been adequately evaluated. Testing for emergency use authorization consisted of roughly 2,000 children, of which only 1,000 were given the actual vaccine. There are known, serious adverse reactions and other side effects. Also, vaccine adverse reactions are 2-4 times more likely for those with natural immunity from prior COVID exposure. Given the children who are known to have had the disease plus those who were exposed, but asymptomatic, there is a large childhood population at real risk of harm from COVID vaccination. Ignoring both the low risk of the disease to children and the real risk of harm from existing vaccines is not only anti-scientific, it is immoral. Since COVID vaccination impose risks on children not present in the disease, the only remaining reason to mandate it is to protect adults. Risking the health of children to safeguard adults is unethical and must be rejected unequivocally.

Dear SBOH,

Please do not force people who would be more harmed than helped to get vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for but the vaccination has an increased chance of causing myocarditis and other terrible side effects

(<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>) is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to covid from having contracted the disease and are now immune to it. The risks of the vaccine far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Thank you for your time

To: 'wsboh@sboh.wa.gov' <wsboh@sboh.wa.gov>  
Subject: Why the Pfizer Inoculation Does More Harm than Good

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source:

<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org%>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

1) Exposed & inoculated, and

2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should

have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down.

But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: Possible Covid Vaccine Requirements

External Email

I completely am in disagreement with the possible requirements for children to be vaccinated to be in public schools.  
It is unlawful and cruel to to inject our children with no known extended repercussions and side effects. It must be at least at least 5 years to know any side effects. For you to tell me what to do with MY children is no ones business, but the parents or guardianship. If I ask for insight and wisdom then I will ask.  
I disagree with the proposal and hope you see all sides and each person and families right to do what's best for their family.  
Thank you,

Shanelle DeVore  
A concerned mother

---

Allowing Wa State Medical Board to weaponize law enforcement against the people of Wa state by forcing compliance to medical testing, injections of dangerous, gene-altering,

non FDA approved substances, and quarantines. And, in addition, forcing the children of Wa State to endure the same.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

The proposal is a blatant violation of civil rights and violates the long-established Nuremberg Code and Patient's Civil Rights that were written and established for decades to protect the people from government over-reach like this. Forcing residents to succumb to injections of gene-altering substances that are causing death and injury and now proven to not be efficacious in stopping the spread of covid is not working. Indeed, quite the opposite. The gene-altering injections are a failure at protecting against covid because they are not really "vaccinations", thus necessitating "boosters". These covid injections are experimental, gene-altering drugs with no data on long-term effects. What we know is that they killed all test animals and now we humans are the new test subjects. The government has no right to enforce this and punish those who don't comply through quarantining, counseling, and testing which has also been proven faulty and unreliable. This proposal is the return of Nazi tactics employed by the Third Reich in 1930s-40s Germany. And it didn't end until the Nuremberg Tribunals convicted and executed those responsible for Crimes Against Humanity. That's exactly what this proposal is, Crimes Against Humanity.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

---

I REQUEST THIS COMMENT BE READ OUT LOUD TO THE BOARD MEMBERS DURING THE COMMENT PERIOD thank you. Any mandates or laws approved during an emergency status does not void the Constitution. Any laws made that violate the Constitution are not lawful. Therefore, these proposals will be unlawful and can not be upheld in the court of law. Therefore can not be enforced by any federal, state or local agents or law enforcement agencies. Therefore, I will stand against any proposals set forth by this government as per the CONSTITUTION. Also, The proposed vaccines that are currently under the emergency use authorization are not tested and approved for safety as we are seeing the horrendous cases of adverse events and adverse events of special interest. We should wait until Pfizer releases all of the 460,000 documents that the courts have ordered to be released within the next eight months. I have read the accumulative report from Pfizer. The data is suggesting high rates of adverse events such as myocarditis, TTS , CVST and other debilitating conditions caused by the vaccine. TTS is a new diseased caused directly from the vaccine. The efficacy is grossly exaggerated as per the documents put out by Dr. Robert Malone who was reecently banned and his Twitter account taken down. Americans are not given the proper precautionary information to give them the ability to have an informed decision based on the risks involved. There's a lack of transparency. The refusal to except natural immunity and other therapeutics that have been known to treat COVID-19 disease has lead to a decline in the willingness for people to take the vaccine. We are seeing boys coming up with high rates of myocarditis. Women that are 50 and below are experiencing high rates of TTS and CVST. The massive campaign to drive everyone to a vaccine solution gives rise to caution. We also know that big Pharma is making massive profits. We also know that big tech is involved. Our children are in grave danger from taking experimental mRNA chemical computer software injection. These injections have graphing oxide and other components that are dangerous to the human body. A great cover-up is happening in regards to the fact that the unvaccinated are being blamed which is completely untrue. We have Covid- 19 breakthrough cases and also breakthrough deaths in places where there's high vaccination rates that has nothing to do with the unvaccinated. Governor Inslee is overreaching and is acting out of accordance to the Constitution. The health department and the governor do not have the authority to mandate any kind of medical treatments or medical devices. And they certainly do not have the authority to detain or treat without the consent of the individual. Thank you. K. Fitzgerald

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration.

Subject: WA State Board of Health Agenda Items 01/12/22

External Email

Sir/Ma'am -

Please oppose the following WA State Board of Health agenda items. Per the Washington State Constitution, our legislative representatives are elected to make these types of decisions via our legislative process.

1. Agenda Item 9 – Continuance – Communicable and Other Certain Diseases – WAC 246-100.

Please vote against any changes or extensions to this WAC code especially the following:

- \* WAC 246-100-079 – allowing local health officers to use law enforcement
- \* WAC 246-100-045 - to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility
- \* WAC 246-100-040 - following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling and vaccination.
- \*

2. Agenda item 11 – Rulemaking Petition – Chapter 246-105 WAC – Immunization criteria for child care and school entry.

Please vote against any changes to this WAC Code.

- \* Washington State Board of Health should be making no recommendations or requirements regarding immunizations for our Washington State children.
- \* All decisions regarding children's health care should be decided by the children's legal parents/guardians.
- \* It is irresponsible to suggest or require that our WA state children take a COVID Vaccine that was only released a year ago and has no long term (multi-year) studies completed.
- \* The COVID vaccinations for children are still under a EUA (Emergency Use Authorization) status. Following EUA rules, these parents and students should be given full disclosure of risks and allowed the legal right to decline.

Respectfully,

Tracy Harker

Dear Sirs,

The COVID-19 Vaccine Experimentation on children from 1-18 years old is not science and is wrong. Why is the Washington State Health Department considering mandating experimental vaccines for children under the Emergency Use Authorization? This is not backed by sufficient medical trials and research.

There is no scientific reason for the Washington State Health Department to even consider requiring the Covid vaccination for the lowest risk age group of COVID-19 when the American Academy of Pediatrics website reports that

The available data indicates that COVID-19-associated hospitalization and death is uncommon in children (age 20 and under there is 1 death in a million).

And as of 12/30/2021

In 46 states reporting, 0.00%-0.02% of all child COVID-19 cases resulted in death

Stop these attacks on the children by foolish bureaucrats, fear mongering media, and sinister adults who want to use them for Big Pharma medical experiments. Insanity is doing the same thing over and over and expecting different results. The vac did not halt COVID19 nor the Delta strain, nor the Omicron strain. Stop the jab insanity and leave the low risk kids out of our adult world fear-fueled stupidity. Let the children live a normal life.

To Whom it May Concern,

I am fully vaccinated. Because I work in healthcare, I followed the mandate - Because I don't credibility qualify for an exemption.

I do NOT support the government intrusion of sending in strike teams and detaining people involuntary due to any illness, COVID or otherwise.

Furthermore, FORCING vaccinations is a blatant overreach on citizens and parents rights.

Stop intruding on our rights. Parents have the right to choose what us best for their children, themselves, and their families.

Thank you for time,

Do NOT mandate the vaccine for schoolage children. When students get the virus it is not as serious in most cases, as to the more vulnerable population in the elderly. Let parents make choices for their own children and families. We live in a free country that many have fought and died for that freedom. There is no reason to make the vaccine a mandatory immunization for school age children or for anyone that does not to take the shot. We are Americans with rights and freedoms that should not be striped away for a virus.

Thank you for your time,

Ruth Michael

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I believe that forcing vaccinations on any person, let alone a child is unethical. Schools have been handling the pandemic just fine without it, minimal exposures. I feel that there is not enough long term research on this vaccine to feel comfortable enough putting it into myself or my child. As long as parents are following proper safety precautions, as they should with all viruses (common cold, influenza) I do not think that vaccines should be enforced for something that is reoccurring and no for sure way to prevent. We have not been able to eradicate colds and flu, and those viruses have also related to bigger illnesses and even deaths in various age groups with differing immunity issues, but there was never a mandate for flu or colds despite the amount of deaths tallied per year. They say it's because for many years we have built up immunity to flu strains, but we have also seen coronaviruses before as well. As soon as the science and statistics seem to make sense, then I may reconsider my stance. But for now, please do not force my child to take this rushed vaccine just to get her education!

Dear Tracy,

I strongly disagree with any vaccine mandate and or allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100□□□□□□

DO NOT Include the Covid-19 injections as part of school immunization requirements ! ! !

Thank you,

To whom it may concern:

As a constituent of Washington state I wanted my opinion to be clearly presented to those making unconstitutional policies in our state. I am completely against all the new proposed Covid policies including but not limited to: allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. I also am against requiring COVID-19 injections as part of school immunization.

The government was never created to be able to tell us what to do and decide the course of our life for us; rather it is the people (which is me) that have the right to tell the government (you) what I want done, and the government is to carry those deeds out. There has been enough overstep, cheating, lying, and deceit from our government in Washington state. Stand for right, truth, and freedom!

<michelle.davis@sboh.wa.gov <mailto:michelle.davis@sboh.wa.gov> >

I am a WA state and Nationally Board Certified Teacher and have been teaching for 16 years. I love our schools and I love our kids! More dear to heart than my career in education, I'm a mom of two teenage children who are healthy and happy! I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. It's a horrible idea for many reasons, such as:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.
3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I oppose any vaccine mandate, I oppose forced vaccine on anyone. We have a Federal Constitution and a Washington State Constitution and it's being ignored.

This "vaccine" has no long term testing on adults or children. Also, children have a statistically zero chance of dying from covid. We also know that this "vaccine" does not stop the spread of covid nor does it protect the person receiving the jab.

Thank you

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.+++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.+++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.+++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: NO VACINE MANDATES

External Email

State Board of Health,

Please understand that it is illegal to mandate injections that are mere "treatments". These "injections" have been proven to be ONLY TREATMENTS that, for "some people, may reduce symptoms of covid-19.

CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission."

Dr. Anothny Fauci says, "We know now as fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Since these injections are only treatments, there is NO LEGAL GROUNDS FOR FORCED USE. Any mandate would be a reckless abuse of power without justification in case law.

This doesn't even address the crime against humanity that using an unapproved drug ON CHILDREN is! WHERE THERE IS RISK, THERE MUST BE CHOICE!

I BEG OF YOU, DO NOT ALLOW UNLAWFUL MANDATES, ESPECIALLY WHERE OUR CHILDREN ARE CONCERNED.

Thank you,

Edward Kilcup

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There is absolutely no factual and practical reasoning for any child to be vax'd. Natural immunity has been proven to be 27% more effective than any vaccine. You absolutely have no right to mandate anything on anyone what so ever. You are only setting yourself to serious conflict. Last I checked we have over a 97.99% survival rate so why are you dragging this out when only 27 children in the entire state have died or have been recorded under who knows jurisdiction. I find that number to be disputable. You should be more concerned with teenage suicide rates skyrocketing and drug use. Put this nonsense to bed and look into the more important support for the kids. Your political nonsense has reached the end....

---

Mandating Covid immunization on children under 12 has had a lack of thorough test case planning, testing and transparent test results. The New England Journal of medicine hasn't even published a study for vaccination for children under 12. Research and testing takes time and good testing for those with varying degrees of internal development will take longer to understand the impacts of these immunizations. For our children's sake, please consider a pause until proper testing is done, documented, and shared with the medical community to reach a consensus.

To whom it may concern,  
I beg you to please not approve any of these proposed policies to give health authorities even more power than they already hold over our children. It is my job as a parent to make medical decisions for my children, and an experimental Covid vaccine that we know very little about in terms of long-term side effects ESPECIALLY when it comes to children. To mandate such a thing is absolutely outrageous and a blatant abuse of power. We have already changed our entire lives around and the lives of our children, their school schedules have been flipped around, their social lives are suffering, we're masking them, some parents are making the decision to vaccinate and that's fine but that should be their decision alone and not a factor in a child having access to public education. The other vaccines that are required have been around for years and have tons of data to backup efficacy and side effects for parents to weigh the pros and cons. This vaccine is TOO NEW and I can't believe we're even entertaining this when our children are not at risk when it comes to Covid-19. The FDA's approval doesn't mean much to me this early on into the game, especially considering that they have to recall over 4,500 drugs and devices that they previously approved off the shelves due to various issues. I don't want to pull my children from public school but I will not hesitate to do so if this policy is enacted.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for WA residents.

Similar to other viruses, COVID is manageable with early treatment and it is survivable by more than 99 percent of the population. Covid vaccines have low effectiveness, and most people who get Covid and spread it have been fully vaccinated, many have received booster shots. Being fully vaccinated will require regular booster shots, forever. Just like the yearly flu virus, the vaccine should be offered but not required.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19.

In America, health officers do not have the right to quarantine people for refusing the Covid vaccination or any other medical intervention. They also don't have the right to force vaccines on citizens who decline them.

The decision to receive a vaccine is the right of every citizen. No law, mandate, code or policy can override this.

The State is required to protect our rights and not infringe on them.

Your agenda is fostering a police state. This is completely against our constitutional rights!

We have the right to make our own choices regarding our body and we should not be forced to take a vaccine that is proving to be detrimental to many people even if the main screen media does not advertise it.

Our children should not be forced to take a vaccine that is detrimental to their health and something that they could easily recognize recover from if they did happen to get covid with the natural immunity that God has given them in their own bodies.

If the vaccine is so effective, why are you so worried if I take the vaccine or not?

If I get sick from covid and then have harm from it, it's my own fault. It's not up to you to decide that I need to take a vaccine.

The agenda is pure evil!

Subject: Opposition to mandatory COVID Vaccination in Children

External Email

To The Members of the Washington Board of Health-

I am a mother of two small children in Seattle and I am writing because I to urge you to encourage education around vaccination and not mandate COVID vaccination or any other vaccinations. My kids are up to date on their vaccines but have not had the COVID vaccine at this point. We all had COVID in our house last year and it was mild for the kids and my husband and I. Complications from COVID in children are sooooo rare and the recovery for children is quick. Transmission from children to adults is also very rare- we know 4 families who just had COVID and none of the parents got COVID from the kids who originally tested positive.

According to UNICEF data 12,000 children under the age of 20 have died with COVID. This is of course devastating anytime a life is lost. HOWEVER, we have to look at the big picture - more kids are dying from drowning and mental illness than from COVID.

I am asking as a United States citizen, resident of Washington, tax payer in King County, mother, employee and wife that you DO NOT mandate vaccination in our children.

Thank you and please reach out for any further questions or comments- I am happy to talk to whomever.

To whom it may concern:

I strongly oppose these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. They are in complete opposition to our constitutional rights to freedom of medical choice. There is no reason that any government agency should have the right to force any citizen to get medical treatment if they don't want to, and certainly shouldn't be forcing children to. The vaccine has proven ineffective against covid and carries a dangerous risk of side effects. I strongly oppose the covid vaccines being added to school vaccine requirements. I strongly oppose the use of police to enforce people getting vaccinated and strongly oppose the requirement of people to be vaccinated. This is a free country and within that freedom includes freedom to chose medical treatments we want or don't want.

Board of Health,

I am against any WAC that goes against our God given rights, as well as goes against our Constitutional Rights.

The vaccine is not FDA approved and is still an Emergency Use Authorization (EUA).

When looking up the definition of a vaccine, it defines it as preventing a virus which this shot does not do. vaccine [vak-sēn ']

a suspension of attenuated or killed microorganisms (viruses, bacteria, or rickettsiae), administered for prevention, amelioration, or treatment of infectious diseases(Webster). .

How can you even call this a "vaccine"? Also, why would you force a vaccine that has over a 99.9% recovery rate. As well as approved treatments, with many peer reviewed studies, such as Ivermectin as per

<https://www.covid19treatmentguidelines.nih.gov/tables/table-2e/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.covid19treatmentguidelines.2e%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd435f38089a34b3e714008d9d216e355%7C11d0e>>  
to help with symptoms and treat people. Have you looked at the underreported VAERS data?

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F covid-data%3Ffbclid%3DIwAR3ixiLcZ0zJpJXDfh3hst9DAu14h01UC40vH5cAy2snHY0CVSka-pAkugM&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd435f38089a34b3e714008d9d216e355%7C11d0e>>

.

I would think long and hard before deciding to force people or kids in camps or force "vaccination" on anyone. Not only will there be an uprising if you decide to try to throw people in camps and vaccinate our children. The bloodshed will be on your hands! Have you heard about the Nuremberg Code? I am giving you notice of the Nuremberg Code. Please research the consequences of violating this.

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility AGAINST Amendment 4 in the Constitution

(WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). AGAINST

GOD GIVEN RIGHTS!!

These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105. Against Amendment 14 as well as our God given Rights!

In closing, I am going to pray for all of you to make the right decision. Absolutely no one has the right to inject us with a shot that changes our God Given DNA.

Thank you for your time,

Traci LaRoche

# THE NUREMBERG CODE

1. The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study, that the anticipated results will justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted, where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.
9. During the course of the experiment, the human subject should be at liberty to bring the experiment to an end, if he has reached the physical or mental state, where continuation of the experiment seemed to him to be impossible.
10. During the course of the experiment, the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgement required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

I COMPLETELY DISAGREE with mandating Covid vaccines for children and adults!!! This vaccine is not a vaccine!!! It is gene therapy (mRNA) and an experimental injection that does NOT have FDA approval!!! I refuse to let you experiment on MY CHILD!!! The new data has shown that you can get the new mutation whether you're vaccinated, you're unvaccinated, or if you previously had the first three Covid Variants!!!! This is pure evil if this gets passed!!! It is hard to believe that my tax dollars go to this "public health" organization!

Sincerely,

WA STATE ELECTED OFFICIALS --

I am opposed to making COVID-19 vaccinations mandatory for school admission or childcare in our State for the following reasons:

Children are at extremely low risk for Covid and there are no long-term studies to document any history of safety. Studies now document that the vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine does not stop the spread of the disease and at this point is merely a "medical treatment." Medical treatments or vaccines are private and personal medical decisions that need to be made between parents and medical providers for what is best for our children. The government, department of health, or schools do not have the authority to mandate / force medical decisions upon our children that supersede a parent's rights/choices. This is a violation of our constitutional rights as American citizens and I OPPOSE and request this is immediately halted!

Sincerely,

Sarah Goins,

Kent, WA 98030

To Tracy Schreiber,

Vaccine Mandate Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate in Pierce County. I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org)

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

If the Washington State Board of Health rules in favor of this mandate you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Don't force people to do things they are not comfortable doing. I fear the school systems will fail should the majority of students be pulled due to the fact thir pare don't want to vaccinate their children with an experimental injection. Not only are they not safe, but they are also showing to not be effective. The numbers of breakthrough cases is increasing every day. Right now Vaers is showing the following: 30,250 Deaths, 192,000 hospitalizations, and over 1,000,000 Adverse reactions. SARS -cov 2 has a 99.97% survival rate. The benefits does NOT outweigh the risk in this scenario. At this point we witnessing crimes against humanity. Do the right thing and let people make their own choices. Which has been the American way since 1865 and doesn't need to be changed.

Best Wishes  
Sarah Perez

Subject: My Public Comments

External Email

To whom it may concern,

I am writing to you tonight out of complete desperation. I strongly and adamantly OPPOSE this proposed WAC. I am shocked and appalled that this state is seriously about to try and impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual prevention. No one can tell me what the effects may be on my child in 5 years, 10 years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for my child. The children are not at risk of death or serious illness from this virus. The deaths rate in the 2 years of Covid is under 1,000 according to the CDC. Why are we doing this? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for themselves.

I am a native of Washington State and have always loved my state. It was a wonderful place to grow up but things have significantly changed. As a tax paying citizen, I should be the only one who makes a decision on where and how my daughter attends school. It is absolutely critical that she be able to attend school in person. We had moved to a new neighborhood when Covid started and she was not able to start her first year at her new school in the district. She spent her entire 4th grade virtually and it had a huge impact on her health and wellbeing. She is an only child, had no friends in the area and is a product of a new divorce. The connections she has made by going back to school and being back has been critical. She has thrived, came out of her shell, made friends, got involved, etc. I can't imagine a world where she would have to be at home 100% of the time. Nor can I afford private school. As I mentioned I am a single mom who works full time. The 20-21 school year was the hardest year of my life. Trying to work my own job (which suffered) and basically teach my child at the same time. Something I would not be able to do long term. Again, the rate of infection with kids who actually end up hospitalized or in death is very, very small. The kids are doing exactly what they need to without complaints. Social distancing, wearing their masks the entire day, washing hands. Yes, the new virus strain has spread rapidly but the type of illness and symptoms are significantly different from when this started. A cold at best. Who doesn't get a cold at least once a year.

I am sure my story is one of 1000's that are similar. I implore you and frankly beg you to vote against the proposed WAC.

Thank you for your time.

Tara Shanaman

To Whom It May Concern,

I oppose WAC 246-100 rule making that would expand any authority to involuntarily detain and quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

We saw what this led to in Germany and Poland in the 30's and 40's as well as in this country for Japanese Americans during WWII. Please oppose this highly damaging and discriminatory policy consideration.

If I told you 5 years ago that the government was considering forcing you to take multiple shots that you did not think you needed and that in the event you had adverse effects from those shots that you had no desire to take that there was no means of legal restitution from either the maker or the government agency that was forcing these medical mandates you would have thought I was crazy. This is what is currently being considered by the Board of Health. Not only is this wrong, it also sets a precedent for future wrongs as well.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

This C-19 experimental shot endangers children more than having the illness.

Statistically more children will be harmed from the vaccine than if they were to contract the virus.

The C-19 shots are unnecessary and risky for children and youth and should NOT be mandatory.

I am encouraging you to not make covid vaccines mandatory for children. The risk for illness or spreading the disease is so minimal it does not justify a mandate.

Thank you,  
Rea C Rude

#### External Email

I'm against the forced Covid-19 vaccination for kids as a condition for child care and school admission. I have four key concerns.

First: Each of the manufacturers of the Covid vaccines currently available developed and confirmed their vaccines using fetal cell lines(\*1) which originated from aborted fetuses. Partaking in a vaccine made from aborted fetuses makes me complicit in an action that offends many religious faiths and personal choice. As such, in good conscience and in accord with religious faiths and our freedom to control our own decisions Covid-19 vaccines should NOT BE A REQUIREMENT for our children to continue their education.

Second: The right to refuse forced injections, such as the Covid-19 vaccine, stems from the internationally agreed legal requirement of Informed Consent established in the Nuremberg Code of 1947. (The Nuremberg Code ). As the Nuremberg Code established, every person must "be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision" for any medical experimental drug, as the Covid-19 vaccine currently is. No Covid-19 vaccine currently available on the market has FDA approval. All are still under Emergency Use Authorization.

Third: Making childcare and school admission dependent upon a mandatory Covid shot necessitates participating in a medical experiment and demanding disclosure of private, personal medical information to non-authorized personnel may also create school administration liability under other federal and state laws, including HIPAA, FMLA, and applicable state tort law principles, including torts prohibiting and proscribing invasions of privacy and battery.

Fourth: Forced vaccines constitute a form of battery, and the Supreme Court long made clear "no right is more sacred than the right of every individual to the control of their own person, free from all restraint or interference of others."

Fifth: The vaccine is not as effective against the new variant and people are not dying from the new variants. This was predicted. The evolution of a virus is that it gets more transmissible but less deadly, and the trend will continue. Further, the vaccine does not seem to work against the new variant, so why risk kids' health with an experimental vaccine? The cost/benefit analysis does not support mandatory vaccination.

Please respect the rights of citizens including parents and children.

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

The proposal I am commenting on is requiring a Covid vaccine for children to attend school by adding Covid to WAC 246-105-030 Vaccine-preventable diseases children must be protected against for full immunization "In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a child care center"

11.

Are you Pro or Con on the proposal?

2. Con

---

I would like to thank the Board for their time and consideration in this matter. I am against requiring the Covid vaccine for children to attend school or child care for the following reasons. 1. Covid is not a vaccine-preventable disease. The Covid vaccine is designed to and functions only to lessen the symptoms of individuals who contract the disease. The Covid vaccine does not prevent transmission of Covid. 2. Covid symptoms in children are mild and not life threatening. If a child contracts Covid, he/she is no more dangerous to other children than had he/she contracted a cold or the flu. It is okay for children to get sick. When children get sick, their natural immune system is the best defense to build immunity. 3. The science behind Covid is still evolving and changing as is evident by the continually changing guidelines put forth by the CDC and other government health agencies. To require a vaccine now when the data and other guidelines are still changing would be premature and short-sighted. 4. In the US, the death rate (0.000357%) and even the hospitalization rate (0.0296%) in children from Covid are so low that they do not warrant a mandatory vaccine. It should remain a family choice similar to the choice for other vaccines available. On the CDC website it states "There are approximately 28 million children between the ages of 5 and 11 years old in the United States. As of mid-October 2021, children ages 5 through 11 years have experienced more than 8,300 COVID-19 related hospitalizations and nearly 100 deaths from COVID-19." While every loss of life is tragic, it is not reasonable for the Board to consider such extreme measures for a virus that has such a minimal impact on our children. 5. The Covid vaccine does not have full FDA approval for children ages 5-11, it is still only authorized under emergency use authorization. It would be premature and reckless to require a vaccine that does not have full approval of the FDA.

Dear Tracy,

Please note that I, Rachelle Boone a resident of Washington state am sending my disapproval for any Covid vaccine mandates for anyone and most especially anyone under the age of 18 per the reasons that follow:

Children are at extremely low risk for covid.

The vaccines are still only EUA.

There are no long-term studies to document any history of safety with the vaccines.

Studies do now document that the vaccinated and unvaccinated can both transmit Covid therefore the vaccine isn't proving effective in stopping the spread of covid.

Thank you for hearing the voice of the residents of Washington State.

Sincerely,

Rachelle Boone

Subject: Covid mandates

External Email

To whom this may concern,

I'm writing today in opposition of the propose covid vaccine mandates for school children and the unconstitutional, communist internment (quarantine) camps.

There is mountains of science from countries all over the world, including here in the US, showing and PROVING covid is NOT deadly to children. There have only been a handful of deaths, world wide, of children from covid. In fact, more children are shot and killed in Chicago on an average weekend then have died from covid in the US during the entire pandemic. The VEARS website from the CDC has over 1 MILLION reports of adverse effects. As of Jan 7 2022 there are over 23000 reported DEATHS reported to the CDC.

Just over 206 million people have been vaccinated in the US. With that statistic in mind, 1 in every 206 people experiences an adverse reaction to the vaccine, for a virus that kills 1 in every 500 people. To force an experimental, gene therapy vaccine, that the inventor of the technology has gone in record to say is unsafe, is criminal. Why would I give this vaccine to my children? They have a better chance of being struck by lightning then dying from COVID.

On top of this insult, there is a proposition to arrest and inter citizens of the US in camps for violations of Heath mandates. Mandates are NOT laws. Incarceration is innocent people is unconstitutional. Sending law enforcement to arrest sick people is cowardly and criminal. It puts not only the victims lives in danger but that of law enforcement as well.

This is America, not Nazi Germany, communist Russia or China! We do not strip away freedoms because of fear. Americans stand upto fear and oppression, and will continue to stand up to it as long as we have breath in our lungs. To impose the cowardly and communists mandates is unamerican and wrong. I WILL NOT comply, nor will any of my family. I'm sure there are thousands more that feel the same. Do not enact these preposterous mandates. Our children and our freedoms are more important than fear of a virus that the average age of death is over 70 with two or more co-morbidities. Don't let fear and greed steal the freedoms that so many before us have fought and died for.

Thank you for your time,

A pissed off Washington voter.

This proposal is absurd. This vaccine is not affective in preventing anything. It is still being used under emergency use and death for children due to covid is extremely low. Look at CA and how effective this mandate was. Over 30,000 vacancies in the schools and they reversed their decision. Health decisions are personal and This is government overreach. If this proposal gets passed, we will pull our children from Kittitas school district and it will lose all funding for my 4 children, 1 who gets extra funding being on an IEP. This idea shouldn't even be considered.

The Citizens of Washington State

clots, low platelets and more following COVID-19 vaccination.

\* The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations.

\* Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened.

\* Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination.

\* Clinical trials in children and young adults are ongoing and will not be completed for at least one year.

\* Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot?

It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you:

-- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines

-- Do not support any legislation or directive requiring people to wear masks

-- Do not support any legislation or directive that deprives people of the right to  
congregate

-- Do not support any legislation or directive establishing lockdowns

- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy

There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect? I also support the petition prohibiting the Washington State Board of Health from adding any EUA product to the required vaccination list. This has never been done and should never happen now or in the future.

May quality judgment and moral perspective be the lens through which you make your

decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state.

Sincerely,

Colfax Youth Soccer

us%2Fnews%2Fpolitics%2Fhundreds-join-lawsuit-challenging-washington-s-vaccine-mandate-for-state-healthcare-workers%2Far-AAOJ3Ct&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C753d4a89c9664bcfc25508d9d217c174%7C11d0

In the retirement area where I live in Olympia, there are about 50 residents who have taken the Covid vaccine. Of these people 18 have already died from the vaccine, and I expect more people to die during this winter from the negative effects of the vaccine in the coming months. This has resulted in a 30 percent death rate in just the last six months.

In Seattle, where Mayor Jenny Durkan has employed the Fire Department to forcibly vaccinate all nursing home residents, there is also a thirty+ percent death rate among all nursing home residents, with many thousands of people death, disabled, or dying from the Covid vaccines.

None of the Covid vaccines were tested on humans before they were released for "Emergency Use Authorization", but the Pfizer vaccine was tested on animals, and when they were, all of the animals died as a result.

Scientific studies have documented how dangerous these so called "vaccines" are. For example, a shocking new study reveals covid vaccine terminates 4 out of 5 pregnancies – see: <https://www.brighteon.com/89677c54-51e3-4139-9af1-093fe160a3a1>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.brighteon.com%2F89677c54-51e3-4139-9af1-093fe160a3a1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C753d4a89c9664bcfc25508d9d217c174%7C11d0>  
According to this article, "a shocking new study published in the New England Journal of Medicine reveals that when pregnant women are given covid vaccinations during their first or second trimesters, they suffer an 82 percent spontaneous abortion rate, killing 4 out of 5 unborn babies. Out of the 127 women receiving vaccines during their first or second trimesters, 104 spontaneous abortions occurred before their pregnancies hit the 20-week mark. All this means that live births may plummet by 3.2 million over the next year, in the USA alone, if every pregnant woman is vaccinated during the first 20 weeks of pregnancy. The number of unborn babies being murdered in the womb, in this case, is reaching "holocaust" levels, which is why this is being called a medical "atrocities."

In Turkey, babies born of parents who have taken the so called "vaccine" are having babies born without normal eye pupils – the babies have black eyes because they do not have any soul, and hence, they have no compassion, no love, and no emotions. See: <https://thebiblefiles.com/2021/10/01/hybrid-transhuman-black-eyed-babies-pandemic-babies/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fthebiblefiles.com%2F2021%2F10%2Fhybrid-transhuman-black-eyed-babies-pandemic-babies%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C753d4a89c9664bcfc25508d9d217c174%7C11d0>  
Other babies from vaccinated parents are being born with dog tails and up to five or six arms and legs, and they resemble octopuses. (See attached picture)

I have enclosed the following list of the following medical and scientific studies, which all indicate that the Covid vaccines are dangerous (see studies below in Appendix A).

In 1917 Rudolf Steiner Foresaw a Vaccine that Would 'Drive All Inclination Toward

Spirituality Out of People's Souls' – May 29, 2020 – see:

<http://www.renegadetribune.com/in-1917-rudolf-steinerforesaw-a-vaccine-that-would-drive-all-inclination-toward-spirituality-out-of-peoples-souls/>

<[https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.renegadetribune.com%2Fin-1917-rudolf-steinerforesaw-a-vaccine-that-would-drive-all-inclination-toward-spirituality-out-of-peoples-](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.renegadetribune.com%2Fin-1917-rudolf-steinerforesaw-a-vaccine-that-would-drive-all-inclination-toward-spirituality-out-of-peoples-souls%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C753d4a89c9664bcfc25508d9d217c174%7C11d)

All the Covid vaccines separate the soul from your physical body. The vaccines also shut down all of people's eight Chakra's and destroys the pineal gland, so they cease to be human. People who take the vaccines become biological robots, unable to have any compassion. Pfizer is now targeting children with their Covid vaccines so they can not only kill these poor children, but also turn them into biological robots without any compassion, or connection to spirituality or God. Rudolf Steiner wrote, ". . . a way will finally be found to vaccinate bodies so that these bodies will not allow the inclination toward spiritual ideas to develop and all their lives people will believe only in the physical world they perceive with the senses. ... [P]eople are now vaccinated against consumption, and in the same way they will be vaccinated against any inclination toward spirituality".

In 2021, according to Nobel Peace Prize Laureate Luc Montagnier stated that all vaccinated people would die within 2 years. Nobel laureate Luc Montagnier has confirmed that there is no chance of survival for people who have received any form of the vaccine. In the shocking interview, the world's leading virologist stated bluntly: "There is no hope and no possible treatment for those who have already been vaccinated. We must be prepared to cremate the bodies." The scientific genius backed up the claims of other eminent virologists after studying the ingredients of the vaccine. "They will all die from antibody-dependent enhancement. That is all that can be said." [https://coe-](https://coe-llc.com/2021/05/22/covid-vaccinated-people-within-2-years/)

(Natural News August 9th, 2021)

According to the article, "When the US government dropped an atomic bomb on a mostly civilian population of women and children in World War II, it proved that the United States government is willing to commit mass killings of targeted ethnic groups to achieve its strategic goals.

The internment of Japanese Americans in U.S.-based concentration camps is yet another crime against people of Japanese descent, and it proves again that the United States government is ready and willing to throw its own citizens into concentration camps in order to achieve its own strategic aims.

Remember this: If the US government was willing to throw people into war-time concentration camps based on the color of their skin, it is also willing to throw people into covid camps based on the status of their vaccine passports. Today's feature article and podcast delve into the how covid vaccines have already killed more people than the bombing of Hiroshima, and the world's vaccine zealots are just getting warmed up". See:

(16) The mRNA vaccines from Pfizer and Moderna completely change your DNA forever to become subservient and to obey government and authority. The vaccines also completely destroy of of your eight Chakras and your pineal gland, destroying your God gene and making it impossible to connect with God and become spiritual. The current plans by Pfizer, Moderna, AstraZenica, and Johnson and Johnson to vaccinate children is an attempt to stop children from becoming spiritual and believing in God or the Supreme Being. The mortality or death rates from these vaccines will ultimately be greater than 50 percent within the next three or four years, with only 15 or 20 percent surviving. Of

those who survive, they will be controlled by nanobot technology where they will lose their free will & become robots without any emotion or compassion. This is the future for those who take the vaccine – death (up to 80 percent), and for those who survive, a future where people lose their humanity.

Subject: Please Oppose the Mandatory COVID Vaccine for Children

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* This should be a parent decision, not the state
- \* Children are at much lower risk
- \* This is too far and would be taking too much control

Thank you for doing what is right and not making the COVID shot mandatory. I pray you make the right decision before God.

Subject: FW: comments against Item 9 and 11 on upcoming agenda

External Email

I am requesting the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. In addition I would like to comment on item 9 and 11.

My husband is in remission from Bladder cancer and currently has a medical exemption from his physician. His doctor fears the vac would trigger cancer cells. My 85-year-old neighbor has Bells Palsy and has been instructed by her doctor never to get the vaccine as it could cause her symptoms to become more severe. Both item11 and 9 on the upcoming meeting agenda are very troubling and unconstitutional! People have the right to make their own medical decisions. Please do not extend this WAC. The current Governor's unconstitutional excesses have already created an exodus of accomplished medical personal and teachers who believe in health choice to leave our state. Regarding item 11, why would we subject children to vaccinations when they have virtually no risk of getting covid? Yet we do know there are proven risks and death with the vaccine. Earlier this year a young man in his early 20's in Touchet WA died from a heart attack a day after receiving the vaccination. This Government data I attached reveals over 946K injuries or death from the COVID-19 vacs. Please take time to read this study before making a decision. Thank you

Subject: I oppose WAC264-105

External Email

To The Board Members of the WA state Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual Prevention. No one can tell me what the effects may be on my child in 5 years or 10 Years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in US during this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and deserve to have choices and the ability to advocate for them since they are unable to do so for themselves.  
Thank you for your time.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The CDC's own statistics show that children are NOT at great risk of becoming seriously ill from C-19. It has also been shown that those who have received the shot can contract C-19 as well as spread it to others. Long-term studies have not been done to determine potential side effects of the C-19 shot. Requiring that children receive the C-19 shot is unnecessary and unconscionable.

Respectfully,

Terrie Wilder

Subject: Our Future in Washington

External Email

Good Morning,

I am writing as a concerned Washingtonian in regards to new statutes being looked at for vaccine requirements and forced protective measures.

Any law that seeks to use law enforcement or any agent of the state to forcefully relocate people, in the name of disease mitigation, is not only immoral, but unconstitutional. Any law that seeks to add an experimental therapeutic to the childhood vaccination schedule, when no long term trial data or full FDA approval is available, is immoral and unconstitutional.

Do not pass new proposals regarding these items. If you do, it will be viewed as a direct threat to our way of life in Washington State by millions of citizens here.

If passed, it will guarantee my family's departure. We work critical infrastructure jobs and pay an exorbitant amount of taxes to be here. I have no problem picking up and leaving, and will seek to do so immediately if these laws are passed.

Thank you,  
Tim

I do not believe the covid vaccines should be required for public school. It is a non-sterilizing vaccine, and will have no effect on preventing transmission between kids and teachers. Kids are at minimal risk from covid and there are serious side effects that need more time to be studied. Where there is risk, there must be choice. Thank you for considering my comment.

Medical Background with BSN and 16 years in clinical trials

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

---

This clinical trial with experimental vaccines has be horribl mismanaged. Follow up side effects from the vaccine have not been reported in an ethical manner. Long term effects on children will not be know for years. This vaccine should not be required of any children.

Subject: Do not mandate vaccine

External Email

I am a mother and a tax paying citizen in the state of Washington I am absolutely against the mandate of vaccines I against you trying to poison my children with the vaccine. If you do this you will force me to close my business here in Washington which is less money for you, and homeschool my children. You will leave me no choice. I am not antivax I am anti-mandate. I do not believe that BASED ON THE SCIENCE this vaccine is safe and effective. I will not put it in my children. Not only will I not out it in my children i will NOT take it for the rest of my family. We dont deserve this. This is America where we are free to make our own choices stop trying to take that from us. My children are terrified they see the propaganda on the news they see that America is no longer a free country! Stop doing this to us. Please start looking at the real science. The science says this vaccine is not safe. I cant believe we are in a time where i have to stop what i doing and beg the elected officials to not make us hate you. Please don't make us go this far You are asking for a war!

Subject: Meeting 1/12/22

External Email

I am writing to express concern about topics for consideration at your meeting next week.

The Covid 19 vaccine should NOT be added to the required list of vaccines for children. This is still an emergency use vaccine and has not been tested long enough for most parents to feel safe giving it to children. Also children are at very little risk of serious illness or hospitalization from this virus. This could be a very damaging rule for families and children. Children must have access to public school. This would especially hurt minority families who may not be able to afford homeschooling or private school. Please vote no.

In addition, to even consider involuntary detainment of people with Covid in quarantine sites seems like something that should be considered in a communist country. Not America. We are free people and cannot and should not be forced somewhere against our will. We are all law abiding citizens and we must be treated as such. Do not consider implementing this.

Also, Vaccine mandates are unconstitutional and should not be allowed in Washington state or any state in the U.S.

Please do the right thing.

Thank you for listening

Stacy and Clifton Cowin

1. Yes

---

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I implore you to broaden your scope of focus on the health of Washingtonians. Consider the following: 1. Death by overdose increased 28.5% nationwide in 2021 according to the CDC, it is now the leading cause for the middle-aged. 2. Suicide is a threat. To those who are not overdosing, "double digit increases in suicide rates in 2020" have occurred for groups like Hispanic people between the ages of 25 and 34, according to NPR. 3. Depression has tripled from 2018 to 2020, according to a recent Boston University School of Medicine study. Draconian measures are counter-productive to our long-term health.

To whom it may concern;

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

This is an overreach of state government. The vaccines should not be experimental in nature and should be tested for a longer period of time before becoming available for children, let alone mandatory. There are also medical and religious issues that should be allowed to be considered before making them mandatory. There should be a longer period of time for the public to be made aware of the issues and allowed to comment on and ask questions regarding the ramifications of such rulings.

Thank you,

Subject: Covid shoot

External Email

"I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Here are some:

Children are at extremely low risk for Covid

The vaccines are still only EUA (emergency use authorized)

There are no long-term studies to document any history of safety

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease

Have a wonderful day

Subject: Covid Camps and Mandated Vaccines

External Email

To The Washington Board of Health,

I urge you to not only vote against Covid Camps and Mandatory Vaccines, but also to destroy the proposed legislation. It is UNCONSTITUTIONAL! The CDC numbers for recovery of covid are 99.98%. This number is a better recovery than those recovering from the flu, which has since disappeared. Children almost NEVER get covid! The vaccine has shown that it causes heart problems and clots in adults. It also causes termination in pregnancy as well as infertility problems. Why would we force this on our children??? UNACCEPTABLE!! Based on this science, why would such legislation be proposed unless it is for the demise of decent citizens and their kids. According to the CDC the 1% reported adverse reactions to the vaccine are 1,000,227, with over 21,000 deaths!!! UNACCEPTABLE!

The statistics tell us plainly that the vaccines are dangerous and covid camps are not necessary. So the question is, why would there be such dastardly measures proposed unless it is for the demise of the good citizens of Washington State. This legislation goes against the Nuremburg Humanity Codes. This resembles what the Germans did in WW2, rounding up citizens and putting them in camps with forced science experiments. Satan has no new games, just different packaging. Should you continue this garbage legislation, you stand on a strand of webbing that if it broke would take you into the deepest part of hell. I once again urge you not to go this dangerous route. There is a God who will judge every decision you make. He is always for life and love, but HE is just and will not let the guilty go unpunished. Beware this legislation is on very shaky ground.

So again, I urge you to vote against Covid Camps and Mandatory Vaccines, destroy the legislation and never propose such a dastardly thing again.

Rhonda Creech

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgo.microsoft.com%2Ffwlink%2F%  
for Windows

for Windows

According to CDC, the contagiousness of vaccinated and unvaccinated persons infected with COVID-19 is similar.

[https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s\\_cid=mm7031e2\\_w](https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s_cid=mm7031e2_w)  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7031e2.htm%3Fcid%3Dmm7031e2\\_w](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7031e2.htm%3Fcid%3Dmm7031e2_w)

Therefore, the vaccines are not effective in stopping the spread of COVID-19.

According to CDC & FDA, COVID vaccines pose risks of myocarditis, blood clotting, neurological damage and death, to name a few, predominantly in adolescents

[https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html;file:/C:/Users/pfish/Downloads/5.3.6-postmarketing-experience%20\(1\).pdf](https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html;file:/C:/Users/pfish/Downloads/5.3.6-postmarketing-experience%20(1).pdf)  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fvaccines%2Fsafety%2Fadverse-events.html%3Bfile%3A%2FC%3A%2FUsers%2Fpfish%2FDownloads%2F5.3.6-postmarketing-experience%20\(1\).pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd1726ce54eeb4c9b635808d9d2](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fvaccines%2Fsafety%2Fadverse-events.html%3Bfile%3A%2FC%3A%2FUsers%2Fpfish%2FDownloads%2F5.3.6-postmarketing-experience%20(1).pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd1726ce54eeb4c9b635808d9d2)

Therefore, the vaccines have significant risks.

According to VAERS (Vaccine Adverse Effects Reporting System), excluding "foreign reports" to VAERS 9,136 deaths were reported in the U.S. between Dec. 14, 2020, and Dec. 3, 2021 in America.

<https://openvaers.com/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd1726ce54eeb4c9b635808d9d2>

<https://vaers.hhs.gov/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cd1726ce54eeb4c9b635808d9d2>

Therefore, the vaccines have significant risks.

According to the WHO, there have been at least 2,457,386 adverse events worldwide. This is over 1,000,000 more cases than all adverse events reported over the last 53 years of all vaccines administered since 1968 combined.

- \* This vaccine can cause reproductive damage that could affect future generations of your family

The second thing you need to know about is the fact that this novel technology has not been adequately tested.

- \* We need at least 5 years of testing/research before we can really understand the risks

- \* Harms and risks from new medicines often become revealed many years later

Ask yourself if you want your own child to be part of the most radical medical experiment in human history

One final point: the reason they're giving you to vaccinate your child is a lie.

- \* Your children represent no danger to their parents or grandparents

- \* It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives.

The risk/benefit analysis isn't even close.

As a parent and grandparent, my recommendation to you is to resist and fight to protect your children.

Do you have any special expertise relevant to this topic?

1. Yes

---

Define special expertise? I am a Registered nurse. We vaccinate adults who want the Covid 19 vaccine. I support their choice. Please do not impose your belief on the parent, who should have the Right to decide this vaccination status for their own child. A person receiving this vaccine should be informed and provides informed consent to the vaccine. A child cannot understand. A parent needs to consent. It should be the parent's consent if obtained and not yours.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

11.

Are you Pro or Con on the proposal?

2.                      Con

---

There is not enough data supporting the safety of this vaccine for children. Covid 19 cases are still showing as positive, to those vaccinated and to those unvaccinated. I personally have had a very severe reaction to my second Covid-19 vaccine. I also have had one family member die the same day, after her second Covid 19 vaccine. I also have had another relative get A-fib and end up in the ED after his first Covid 19 vaccine. It is not within a clear conscience that I can say I would agree for children to get this vaccine. Please, I am asking you to examine your conscience, to please allow the parent to make the Choice of whether or not they wish their child to receive this vaccine. I do NOT support this, but I also consider the choice of the parent and I lay their decision in their hands. One day we will all have to meet our maker. To force any parent to give this vaccine to their child is Wrong. Allow more time, more data and let the Parent decide for their child. Thank you for your time.

As a grandmother with 15 grandchildren and taxpayer in Washington State, I wish to state my opposition to required vaccines in schools for Covid. First of all, children do not have severe illness from Covid. Second, my son, a trained general surgeon, explained that he learned that a real vaccine takes 4 years to develop. These shots have not been through the proper testing. Third, these shots do not prevent or heal covid. Medical evidence from Israel, which required vaccines, shows that vaccinated people were hospitalized with Covid even when they had the shots. For the sake of our children, do not require the shots for children in our schools.

The proposal attempts to end the basic human right to make health care decisions for me and my family, and seeks to penalize me for asserting that right via involuntary internment at an isolation camp. This is fundamentally wrong, and a violation of the human rights agreements made after the end of the Nazi era. Do not adopt these proposals. The vaccines are obviously ineffective and their dangers are becoming increasingly clear. Do not adopt these proposals.

Subject: Re: Decision about Recommending Covid-19 Vaccine for School Children

External Email

Each member of the Washington State Board of the Health has a grave responsibility to set practices and make policies that affect individual citizens and families of the State of Washington. Parents have the right and responsibility to make decisions for their children. A vaccine of any kind is putting a substance into a body that has either wanted efficacy against disease or unwanted short-term or long-term damage. I ask the board to rule against any recommendation of the Covid-19, Novel Coronavirus Vaccine for children in Washington State schools or anyone else.

As Americans we have sovereign jurisdiction over our bodies. Parents know their children best and should make ultimate medical decisions for their children. They can consult their doctors or faith leaders. Parents want to make informed choices about what goes into their children's bodies. Children are not at great risk of Covid-19 or of spreading it. I urge the Board to vote No or Against the Covid-19 vaccination recommendation for Washington's school children.

Sincerely,

Janet M. Young

I believe that it is outside the scope and authority of this board to force children, who are low risk of illness, to be required to take an experimental vaccine. This vaccine has injured thousands of people. It has not been properly tested and studied for safety and it's long term effects are unknown. The liability protection for a time frame of 70 plus years, the manufacturers request to hide safety data for 75 years should call questions to the forefront of all of your attention. 1. Who's paying for medical bills for injuries. 2. Who's caring for those Injured. 3. Why is the sbob being given police authority. 4. Why have politicians and sbob official not required and enforced policies that would prevent the spread of the illness. It is widely accepted that these rules are a government overreach into the personal medical decisions of individuals. It has NEVER been about health. Masks do not work over 40 studies prove this. I have not seen inspection of food or other gathering places insuring that proper cleaning is taking place. STEP BACK AND LOOK AT THE SCIENCE OF SAFETY AND RISK. WRITE POLICIES THAT CAN HAVE AN IMPACT. SCHOOLS AND OTHER GATHERING PLACES SHOULD BE USING COVID FUNDS TO PURCHASE AND IMPLEMENT USE OF EQUIPMENT THAT ACTUALLY KILLS THE VIRUS. Stop the government overreach. Inform the governor that your going to side with actual science and put the care of citizens and their children in the hand of the doctors.

2. Con

---

Covid-19 and its variants are still evolving and we are on a continual learning curve as it progresses through the population. The same applies to the current and potential new vaccines. While we have some relatively short-term data, we are unable to predict the long-term implications of an experimental vaccine technique. Requiring individuals to take a vaccine, especially children who have their whole lives before them, when we have yet to fully determine the impact to human life, is irresponsible. The WAC as it currently stands, provides ample latitude for interpretation and application by health officials without 'fine tuning' to include CoVid-19 at this time. If WA residents are vaccine hesitant, then similar to the H1N1 breakout in the 70's, the fault should lie at the feet of public health officials in not using every means available to provide detailed information and data to the public. As a citizen, I want to see the data and convincing arguments for the position the WA Board of Health has taken or wishes to take. My own research does not lead me to the conclusion that the CoVid-19 outbreak is of the level of concern that it is being portrayed by some and certainly not to the level that I am willing to risk my well-being or that of my family. I respectfully request that the WSBOH postpone amending any portion of the WAC at this time to include CoVid-19. Thank you.

The vaccines may do more longterm harm to children than the virus. It is not the government's job to dictate these draconean measures. It is a parent's job to look after their child's best interest, not the government's. The government, teachers' unions and many school boards are out of control!

It is unconstitutional and not right to deny children an education. We are the United States of America, and this is not the idea that this country was built on. The death rate of children for Covid is less than 1%, so how could we do this to them? How could we deny them the right to their education?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

there are reported injuries from this vaccine some very serious just shows this vaccine isn't for everyone i agree with everything else wash hands social distancing mask if people want the vaccine it's perfectly fine for them to get it but it should never be mandated and other alternatives should be provided for people who are skeptical about this vaccines  
thanks

Subject: Upcoming meeting on 1/12/22

External Email

To State Board of Health,

As a parent, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

I am opposed for mandating Covid vaccines for kids. For many reasons. The current vaccine does not do much for healthy kids it and in many cases can make it worse. But most important people think it protects them and offer a false sense of security: and what we are seeing now is even if vaccinated they get Covid or they are asymptomatic and spread it to the adults. This is not our normal measles vaccine and we don't know the impacts to kids long term either the risk of having heart inflammation or other is real. While having issues from a healthy Child from getting Covid is very rare more rare than the flu. We don't mandate the flu vaccine. This will also cause huge discrimination issues. Are you going to have unvaccinated kids wear a mask? Why is Europe not even vaccinating kids many Europe countries feel the risk is too high. Why do we not value our kids risk as many countries in Europe do. We should not be vaccinating kids to protect adults.

Subject: Vaccine for all the Covid variants

External Email

Dear Washington State Department of Health staff,

My name is Rene Polda of Friday Harbor, WA. I have seen first hand the damaging effects these mRNA vaccines have had on young people. Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state! You will be held responsible for the physical and mental damage to children if you force compliance!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source:

[https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org%](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org%2F)

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8

inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

1. Yes

---

Requiring the Covid 19 inoculation in children to attend school is unsafe and not necessary. Following the science, children do not transmit the virus, children are likely to

the asymptotic and have a mild case. The Covid 19 inoculation has not be in use long enough to know the long term affect from the vaccine. Lastly, the Covid 19 vaccine is not a vaccine at all if it isn't stopping the spread and eradicating the disease. Yes, it may be Lessing symptoms and keeping some out of hospitals but that is not what a vaccine does. The Covid 19 inoculation is just another flu shot.

Yes, it may be Lessing symptoms and keeping some out of hospitals but that is not what a vaccine does. The Covid 19 inoculation is just another flu shot. Please let parents decide what is best for their own children and families. Stop pushing the one size fits all solution to the pandemic when it isn't working. The Covid 19 inoculation has been around for about a year and yet we are seeing a spike in cases....I though once we hit 70% vaccinated we would be in the clear....why does the target keep moving? The science is clear, the Covid 19 inoculation is not effective in stopping the spread of Covid 19. Please consider the long term damage this requirement could have on student health, public school enrollment and our state as a whole.

Do not apply current infectious disease WAC codes to include Covid-19 for Washington State.

The still not-FDA-approved vaccines have been shown to have little effect on the Omicron variant.

Making the experimental Covid vaccines a requirement for attending public schools is dangerous.

Through the course of the pandemic, children have been shown to be at little risk of the infection, but health risks of the experimental vaccines are considerable.

There have been no long-term studies on the effects of these vaccines. Over the decades, many sanctioned "miracle" drugs have been shown to have detrimental effects on people years after government approval. It is unconscionable to force these unapproved vaccines on the public and resort to communist-style tactics for people who refuse to comply by imprisoning them in quarantine facilities.

Please scrap this plan.

Sincerely,

Sandra Stokes

To whom it may concern:

I am a Firefighter in Washington State, the husband of a nurse in the operating room, and a father. I oppose WAC 246-100 Rulemaking that would expand any authority to involuntary quarantine individuals. I also oppose adding a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. It is unconstitutional and violates HIPPA. As a firefighter I have been trained in my profession to advocate for my patients and their right to make their own medical decisions. I am doing the same now for myself, my family, and all fellow Washingtonians! It is not appropriate for the government to have this much control over the citizens they serve! I believe both of these proposals go well beyond the limits of the government's duties. It is government over-reach and an unconstitutional infringement on our rights.

From a sincerely concerned WA resident,  
Firefighter Tyler Parnell

COVID Vaccination products including the Jansen, Pfizer and Moderna immunizations carry unknown long-term risks to children. As we have seen in adults, proper dosage for long-term efficacy is still unknown, and even less understood in children. Given rates of myocarditis in young adults, there is good reason to question whether the vaccines could pose a higher risk to children as compared to the risk of contracting the virus. The risk to a healthy child of severe illness or death with COVID is astronomically LOW. Requiring our children to take a therapeutic drug with little understood risks for their age groups is a usurpation of the rights of parents and children.

To whom b it may concern. Our children are an extremely low risk from covid and very high chances of recovering. There is no need for the therapeutic to be given to children. Furthermore vaccines should be voluntary not mandatory Givin the high survivability rate.

As knowledgeable medical officers, I am confident that you may believe that the right (potential benefit) of the many outweighs the right of the one. But as Americans, the constitution gives the right (potential) one to outweigh the rights of the many. As physicians, you are aware that we have no true vaccine developed at this point, truly cures or prevents, at a 100% guarantee. Getting infected, hospitalized or even death from the various strains of this virus. We are still under a possible illegal "Emergency Doctrine," living under probable "Emergency Mandates," with numerous exemptions justified by commerce, friendships and events. Should you strongly recommend, or vote for, policing the population for standing up, with the backing of the U. S. Constitution, refusing to bow to illegal mandates, leaves this board with a difficult decision, either back the governor for future political reimbursement, or the rights of citizens to choose what they believe by religious convictions, or by them knowing what's best for themselves and / or their own health or their family's health. I hope that you vote as an American by using true data, not what's being reported by the media and false Olympia speech writers, about hospitalizations and death CAUSED by the virus vs who was hospitalized with the virus also detected upon testing. Please stand up for honesty for Washingtonians by not stepping or falling in to the pressure to lean one way or the other, just be honest.

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest recommending a vaccine for Covid for school aged children who attend school in Washington State. I am against imposing this vaccine on our children. I believe this to be a horrible overreach of state government.

The Covid "vaccine" is experimental. There have been no studies on the long-term health side effects on children or even on adults. We have never required an untested drug to be used on our children. Making it required to attend public school is criminal and against our constitution.

If you decide to follow through with this abuse of state power, you will be held accountable for the consequences whether they are unintentional or not. You are taking the decision to monitor a child's health out of the hands of its parents. You must then face the repercussions that happen when this trial "vaccine" begins causing health problems way beyond the symptoms of Covid itself.

We do not need this requirement to protect our children or our communities. We need you to consider the constitutional rights we have been guaranteed by our founding fathers to stay free, to live and care for our families and our friends, and our communities based on our religious and moral beliefs.

With respect,

Ron Laycock

I am writing as a parent of five school-age children in Auburn, WA to express my concern that the Washington State Board of Health is considering mandating the COVID 19 inoculation for school children. Please do not impose this medical experiment on our children. It is not a vaccine like the others in the current childhood schedule. It does not confer immunity which basically makes it a therapy. The CDC, in fact, had to alter the definition of a vaccine in order to accommodate the COVID inoculation (and receive the legal impunity of a vaccine).

Significantly, it has not been proven safe and effective as it has been so thoroughly touted. An alarming number of young people have had adverse reactions, life-altering ones like myocarditis. A young person has a greater than 99.9% survival rate from COVID 19. In light of this, why would we put our children at any risk? Any mandated treatment should be bulletproof-safe, not experimental and flawed. The COVID inoculation does not even prevent transmission. Dr. Walensky of the CDC admitted this. Inoculating our children (at their risk) cannot "protect grandma".

Please consider viewing the attached links.

In the first link Dr. Malone, the inventor of the mRNA technology, addresses parents and warns them against the COVID inoculation.

We do not need to live in a police state or in fear of detainment. Please work to end the pandemic powers of the state rather than enhance them.

Thank you for your consideration,

Suzanne Auld

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Susan Heid

Subject: Comments OPPOSED to new rules for WAC 246-100

External Email

Date: 1/7/2022

To: WA State Board of Health Officials

From: Sara Light-Waller, MA, Centralia, WA

Dear Board Members,

As is customary, I will begin with a brief introduction. I have been an alternative health care practitioner since the 1990's. In 2000, I moved to Washington state and in 2001 finished all additional accreditations to become an LMP in the state. I have been an educator since that time, as well as a practicing massage therapist with additional training in several other alternative modalities including acupressure. For several years, and until the school was sold, I was a department head at Seattle's prestigious Brenneke School of Massage. I have published articles on massage theory, practice, and morals in journals such as the "Washington Massage Journal." I have also lectured in smaller venues across the country. I retired from active practice just before the Covid lockdowns began. However, I keep an eye on the doings of the Department of Health through the email list. I've understood, from my early days as an LMP, that taking part in the rules-making process was important, never more so than now.

I will give you two reasons, one psychological and one moral, why you must not institute the new policies proposed in WAC 246-100 (various chapters) and 105. I'll begin with the psychological reasoning. These endless lockdowns and mandates for masking, testing, social distancing, at-home isolation, and now possibly to mandate injections have caused a tremendous amount of psychological damage to the population. At first, I recognized it as P.T.S.D. but now it's become more of a mass delusional state. People are afraid to interact, even with family members. They are terrified to remove their masks, and now they've started policing their neighbors to make sure everyone follows orders. Children are self-harming and even committing suicide due to the stress of lockdowns and the isolation. The Department of Health exists for what purpose, is it to create harm? I understand the need to hold practitioners to a high standard, but this is something else. Have you considered how we will all recover from these damaging states of mind? Perhaps looking ahead would be of value to the Board. Or are these stringent protocols are meant to be perpetual?

Now you're considering creating a strong arm force within the D.O.H.. You suggest detaining people and forcing them into camps if they don't comply with orders? Forcing a needle into the arms of children? Everyone? What do you think this is going to do to the population of the state? Create more health? No. It will create mass hysteria, higher delusional states, and even higher suicide rates. You will then have people for whom the delusion is so entrenched they won't take off their masks even if you ordered them to. Nor will they stop punishing those who don't follow all the rules. More, you'll have morally-minded practitioners quit or leave the state. The remains will be people who are so entrenched into a delusional state of mind that the mental health of state residents will continue to decline. This must not be allowed to happen.

Now to the moral reason. There have been several governments during the 20th century which enforced their will upon the people through violence, bringing shameful and deadly results. Let's look at the mass psychosis which overswept Germany in the 1920's and 1930's leading up to World War II. Isn't it amazing that this could even occur? That an entire population of intelligent people could turn into a pack of deluded and crazy, racist killers? People went along with it because the group think was incredibly strong. They were brainwashed. Horrible experiments and other atrocities were the results. I need not go into more detail, you are all intelligent people. If people feel morally opposed to doing something then there's probably a good reason for it. The idea of forcing men, women, and children to do anything they're morally opposed to for the good of the state should horrify you. Where does this lead? I can tell you. It goes beyond the totalitarian state Orwell describes in "1984." It leads, ultimately, to the destruction of the human race. But this is such a small step, you say. What harm? They're always small steps. And no one realizes how far they've gone until it's far too late.

I lost an entire branch of my family in Germany during WWII. Poof! Gone, without a trace. We don't even remember their names. Now you propose, for the good of the state, that we comply in all ways which our better judgement may protest? We must always listen to our moral compass in all things. To deny it, or have it denied to us, is morally reprehensible. These proposed actions will put blood on your hands. Vote them down now before it's too late to save our good state's people. And, to save your own souls.

Sincerely,

Sara Light-Waller

The powers that be are USING YOU AS PUPPETS. You are doing their dirty work! Do you really want to be instrumental in the United States of America becoming communistic. Do you even care about you children and grandchildren living under communism? This is what you are doing if you support these camps and mandates. You know how many people have died or permanently injured from these experimental jabs. Think for yourself. Don't let these powers think for you. You are in your employment positions to protect America from communism. Are you doing your part keeping Washingtonian free? When you face God on your judgment day will God say "Well done, good and faithful servant?"

You are in my prayers to do what is right for America.

Thank you,

Debbie Baril

Hi,

I am a father of 3 children, all of whom have received their recommended vaccinations. I believe vaccinations are the most important medical tool in human history and have saved more lives than any other human intervention. That being said, I do not support the novel mRNA vaccine for children.

This new technology was rushed through the trials and had only a 2 month safety analyst. Then we injected it into millions of people only to learn that it wanes in 6 months and that it causes heart inflammation, mostly in people under the age of 40. This discovery of side effects will certainly last another 20 years, and if we force it on our children now, by the time we realize what we've done, it will be too late. Remember it took 10 years before the FDA recognized that Vioxx caused heart attacks?

Keep in mind, children under the age of 17 are 3X more likely to drown than to die from covid. Their risk profile is ridiculously low, so if you force them get the shot to attend school, every single side effect that they encounter for the rest of their lives, is on you.

Here is a new study from the UK showing that "the risk of myocarditis almost doubled after the first Pfizer shot in men under 40. Then it doubled again after the second and doubled again after the third - to almost eight times the baseline risk."

<https://www.medrxiv.org/content/10.1101/2021.12.23.21268276v1.full.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

And this is just the tip of the iceberg, warning signs are everywhere and if you ignore them, the blood will be on your hands.

Do the right thing; protect the future of the children rather than the final years of the elderly.

Thanks,

Ryan

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,  
Scott Farley

It is with great restraint that I set aside my outrage and anger to express my opposition to the following laws being proposed.

WAC's: WAC 246-100-070<tel:246-100-070>, WAC 246-100-045<tel:246-100-045>, WAC 246-100-040<tel:246-100-040>, WAC 246-100, WAC 246-105.

The people proposing these measure are completely off the rails and need to take step back. As policy makers, how could there have been consideration for the consequences and precedence that will be set by laws permitting the forceful detainment of law abiding citizens in quarantine camps? This is truly incredibe!

A large and growing number of parents and citizens of this state are already fed up with the ineffective and nonsensical policies that have been getting pushed for almost 2 years now. Passing extreme control laws such as these are going to illicit an even more extreme response.

I am opposed to any of the proposed policies related to detaining individuals in quarantine facilities, involuntary medical exams, testing, or treatments. I am also vehemently opposed to including COVID-19 injections as part of school immunization requirements using WAC 246-105.

I stand against the following proposed WAC's: WAC 246-100-070<tel:246-100-070>, WAC 246-100-045<tel:246-100-045>, WAC 246-100-040<tel:246-100-040>, WAC 246-100, WAC 246-105.

- \* This violates our rights associated with informed consent and disclosure.
- \* This violates the personal freedoms and right in which the United States of America was founded.
- \* Children dying or suffering serious illness from Covid is extremely low.
- \* The vaccines are STILL EUA status.
- \* The many vaccine injuries that are occuring have not been adequately studied and peer reviewed at this time.
- \* It is undeniable that vaccinated individuals(including children) transmit COVID. The vaccine is not preventing the spread of infection or disease.
- \* The "solution" of continuous boosters for all persons is unacceptable.

Please do not allow these acts of oppression to take hold in our state. PLEASE STOP treating people like they are uneducated, uninformed, reckless individuals that can't think for themselves. PLEASE STOP the overreach and attempting to coerce and manipulate the public.

Without trust we have NOTHING...

Tyson Harvey

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Orwellian overreach of our knee-jerk government. I can not say that "nobody wants your cradle to grave, poorly executed, oversight" because you socialist loving left wing democrats keep getting re-elected ever since Washington went to all mail-in ballots (smells fishy) but everyone I know and talk to don't want it. Your "Newspeak" and "double think" become evermore obvious and discernible with every outrageous thing you push on freedom loving Americans. You left wingers say "we believe in science" (as if everyone who doesn't agree with your spew are ignorant fools) then why do you not following the science on this issue? Because science is not the issue is it? Its money and unions.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid. The vaccines are still only EUA (emergency use authorized). There are no long-term studies to document any history of safety.

Studies now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine absolutely does not stop the spread of the disease.

Thank you for your time.

Washington resident for 34 years, Rebekah Jackson

I am writing to strongly oppose and disagree with this vile quarantine camp business to be forced on free american citizens for a very treatable virus. And for not taking an experimental mrna injection that is not even a vaccine. That injection is deadlier than the virus itself, according to 'deaths.' This is the trouble you get into from counting infections instead of deaths. And then padding the numbers of people who did not die from the virus.

This injection does not even prevent anyone from getting this virus, passing it on further or dying from it. According to the CDC itself. And according to the mass infection that has been happening to all vaccinated people. So WHY. Why is this being done? And why are you even considering such a thing? The children weren't even getting sick before the injections started. This is absolutley despicable and WRONG.

Sincerely Rhonda Uhrich

Shocked that in our free country such an item as quarantining individuals is even being spoken about. Didn't we experience that with the Japanese internment camps here already? And let us not forget to mention the holocaust. There is zero evidence supporting C 19 vaccines for kids. It is not safe nor effective, it's still under an EUA. Look at the rest of the country and the world. Please read and research. You all are somehow in this position for a reason. Everyone will be held accountable for the decisions they make especially imposing their "beliefs" on innocent people. TOO MANY OF US CITIZENS KNOW THIS IS NOT, NOT based on science. There needs to be evidence. The evidence we have does not support these extreme options.

The proposal is question calls to add the Covid-19 shot to the list of mandatory vaccines required for school aged childrenbtobattend school.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

I am not at all in favor of the Covid-19 shot being mandatory. This shot is still under EUA for many ages and will take several more years for all the trials and safety data to be accesible to the public. Parents should have full access to that data before a shot is required. This shot has not proven to eliminate transmission of Covid so that is a false premise to use in making it a requirement. There have been less than 900 deaths in 2 years for the under 18 year old group due to Covid. I believe that the risks of the shot far out way the benefit of forcing a child in this age group to get the shot. If the shot is going to be required I believe that naturally acquired immunity needs to be included as a way to opt out. The shots have been made readily available. The public has free access and those that want the shot to protect themselves are welcome to get it. I strongly oppose making the Covid 19 shot mandatory and will with out hesitation remove my children from school if this becomes a requirement.

11.

Are you Pro or Con on the proposal?

2. Con

---

The first and most important reason is that shot mandates violate our constitutional rights. We have sovereignty over our body according to the bill of rights endowed by our creator. Secondly, the overall mortality numbers in 2021 was 448,560 (higher than 2020), and the number of young adults and youth deaths was roughly 290. This was noted in New England Journal of Medicine (NEJM) studies. This amounts to a whopping 0.06% of all US COVID deaths. While it is tragic that these 290 children died, all of these children had comorbidities. The shot itself has injured, and sadly killed way more people. If you are truly worried about children, it would be better to focus your attention on the 42 million children aborted in 2021. It is truly sick and twisted how you allow abortions because it is "Their body, their choice" when it is not their body that they are killing, then have nerve to say that we don't have the right to put a chemical into OUR body. I urge you to truly follow the science, quit following science fiction, and let us make our own decisions on what's best for us.

1. Yes

---

The proposal to mandate Covid vaccination for school age children as well as enforced isolation of all people who refuse to be vaccinated.

11.

Are you Pro or Con on the proposal?

2. Con

---

The overwhelming medical evidence is that children are at extremely low risk of any serious illness due to contracting Covid. Parents, in consultation with their doctor, should be the only ones to make the decision to vaccinate their children. The choices of parents who refuse the vaccine for themselves and their children should be respected whether they object on the grounds of medical choice, constitutional freedom of privacy, or religious convictions. The government should absolutely not be allowed to infringe on parental rights by mandating vaccines for children. In addition, the government's responsibility to provide education for all of our children, including those who refuse the vaccine remains. The proposal to enforce mandatory isolation of anyone who exercises their constitutional rights by refusing the vaccine is immoral and illegal.

## Development of Rules and Regulations for State Covid Vaccinations for School Age Children

11.

Are you Pro or Con on the proposal?

2.                      Con

---

Dear Sirs; There are several glaring problems with the SBOH and the Technical Advisory Board attempts to set rules for Covid Vaccination Mandates for children age 5 and older. In your zoom meeting on December, 29, 2021, it was stated that you want subject matter experts. It is important that experts for and against vaccine mandates be shared. One of the glaring problems with your TAG is that there are no school board members with a diverse representation across the state on your committee. There are also no parents on this committee represented from across the state. 1). There needs to be a thorough risk assessment between the risk of harm to school age children from covid verses the risk of harm to school age children from the vaccine. Data is readily available showing the risk of harm of covid to school age children is negligible. For example, King County Dashboard shows 1 death or 0.4 deaths per 100,000 and 112 hospitalizations or 44 per 100,000 in the 0-9 age group. There are 6 deaths or 2.3 per 100,000 and 154 hospitalizations or 60 per 100,000 in the 10-19 age group. CDC has reported that all deaths in these age groups had comorbid conditions such as leukemia, obesity, or other conditions. Children 5 and under, are more likely to be taken to a hospital by concerned parents than older children, due to their obvious vulnerability. This must be considered in hospital data numbers. Additionally, Dr. Fauci recently reported that hospitals are "over counting" children as covid. Could there be a monetary reason for them to do so. This could also subtly suggest a glaring conflict of interest by much of the health care industry. This "overcounting" could skew the data used to base mandates or rules thereof. This is all over nearly a two- year span with most of the incidences early in the pandemic. In December 2021, there have been no deaths and only 9 hospitalizations in these age groups in the last 30 days, which suggests that the variants are less lethal. 3). There is a lack of definitive data on vaccination studies. The pharmaceutical companies have legal immunity for law suits for 70+ years. There is also evidence that the CDC wants to hide post-licensure safety data for 75+ years. What can be found on a clinical trial is reported in a mayoclinic.org article. In this article, it was reported that In the 5-11 age group, there were 3100 children that got the vaccine, and 1500 got the placebo. In the 12-15 age group, 1100 got the vaccine and 1100 got a placebo. It is curious that only a portion of the children in each age group were monitored for two months after the second dose. It was reported that side effects were mild to moderate. However, there were severe side effects on children that went unreported or simply omitted. There was also a reported increase in myocarditis and pericarditis after the vaccine, particularly in males 12-17. One study showed 5.4 cases of myocarditis or pericarditis per 100,000. Because covid vaccine clinical trials only began in the summer of 2020, it was stated in

the article, "it is not clear if the vaccines will have long term side effects". (The early trials were only on adults; the children trials are even more recent!) In summary, definitive vaccine data is hard come by and there is effort to suppress it. This lack of definitive data does not justify a mandated vaccine or a need to adopt any rules except voluntary vaccination for children. The testing of children also lacks definitive results as it is a well-known fact that test procedures are incorrect or inaccurate. 4.) Future implications need to be considered. Are you willing to answer to parents whose children become disabled or permanently harmed by not understanding the risk of the vaccine? 5). Regarding the transmission of COVID, children do not present a significant risk to society. Most children are asymptomatic and asymptomatic transmission is not proven and in fact, transmission by children may be weak because their viral load is low. They DO NOT represent a threat to society as a whole and therefore, does not justify a mandate or the need to develop rules for the vaccine in children. 6.). All pandemics have a three-year cycle. We are already in the second year and as in other pandemics, the variants are becoming less lethal. By the time the vaccine rules are implemented, the pandemic will be over. The expense of implementation and risk of harm to children will be unnecessary. In summary, the board of health and the rules committee are jumping the gun when there is such a paucity of definitive data and a combined ignorance of vaccine risk. Thiis committee should stop their proceedings immediately.

Subject: I stand for medical freedom! Please stand with me!

External Email

To whom it may concern:

I am writing to you as a concerned citizen of Washington state, along with my family of 11. We plead with you to support our rights as WA state citizens and US citizens. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust.

We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them.

There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted on?

You have so many people cheering you on to stand for human rights including medical freedom of the people of WA and the US.

We are not in an emergency situation which would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention.

If this continues, the Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.  
Thank you!

Subject: No to camps; no to medical coercion on children

External Email

To Whom It May Concern:

I am writing in regard to your meeting of January 12. Specifically, I am voicing opposition to the proposals to use local law enforcement to coerce illegal and unwanted medical treatment, including interment, as well as coercing public school students as a condition of attendance to take the COVID 19 injections.

Both measures violate federal law on the necessity of informed consent by a citizen for any medical procedure. Specifically, coercion in any form is a felony punishable by imprisonment of the guilty official and fine of the institution. US code 21, Sections 50.23 and 50.24 spell this out.

<https://www.law.cornell.edu/cfr/text/21/50.23>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fcf%2Ftext%2F21%2F50.23>

<https://www.law.cornell.edu/cfr/text/21/50.24>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fcf%2Ftext%2F21%2F50.24>

The United States has codified the provisions on informed consent of the international Nuremburg Code of 1947.

<https://history.nih.gov/download/attachments/1016866/nuremberg.pdf?version=1&modificationDate=1589>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhistory.nih.gov%2Fdownload%2F1016866%2Fnuremberg.pdf%3Fversion%3D1%26modificationDate%3D1589>

Any official violating these established laws deserves prosecution under the law and eternal judgment. That includes those who enact illegal legislation as well as those who implement it. There also is God who will judge us all in eternity.

Say no to medical coercion in WA, not for adults nor for kids.

Thank you,  
Stuart Quint

Dear Board Members

The injections currently in use in the US are still unapproved.  
Only Comirnaty (not used in the US) was approved by the FDA.  
Therefore they are experimental under EUA and cannot be mandated for adults or children.

Changes that support uninformed consent of injections are government overreach and unethical.

Sincerely  
A concerned Washington State Citizen

I absolutely oppose mandating school children vaccinations for these reasons:

- 1.) Need: Our children do not NEED this vaccine as they are in the lowest risk of death category with a 99.9% survival rate.
- 2.) Risk: The vaccinations are still under emergency use protocols, and have not been properly studied for long term effects. Data is showing our children are more likely to have an adverse reaction to the vaccine than be harmed from Covid.
- 2.) Efficaci: The data shows the vaccine does not prevent people or kids from getting Omicron, and Omicron is actually a better protector from the Delta variant than the vaccine.

Dear Tracy

Today I am writing to you to express my express my concerns on hearing that the Department of Health is considering mandating COVID Vaccines for children to attend school. I am completely AGAINST such a mandate.

The COVID Vaccines in the USA are NOT FDA approved and are being administer under and Emergency Use Authorization. According to the Nuremberg Code EUA products can not be mandated.

The risk of children dying from COVID are statistically at zero risk. The survival rate is from 99.997 – 99.998%. There can not be a benefit to mandating children to be vaccinated as there is no risk. No one knows what the long term risks of the vaccines are. We should not react out of fear.

Do not allow this mandate to move forward, Please.

Mr. James Deady

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

I see that there is discussion and potential action regarding the requirement of COVID vaccines for public school on the agenda.

11.

Are you Pro or Con on the proposal?

1. Pro

---

First, I have two school age children. Second, the vaccines are safe and scientifically proven to reduce infection and transmission. We need this requirement in place for our children to return fully to a "normal" school environment. We require vaccination for other childhood diseases and COVID should be no different now that the vaccines have held up to real-world and scientific scrutiny.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* It is solely the parents responsibility to make the decision if a vaccine is safe or not to be put into their childs body.
- \* There are no long-term studies to document any history of safety or what long term effects of the vaccine would do to the children.
- \* Studies now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease.

Sincerely,  
Teresa

I completely oppose the WAC 246-100 rule that would expand any authority to involuntary quarantine individuals. It is absolutely ridiculous to take the power of choice out of the hands of the people. We do not live in communist country, we should be TOLD what we have to do, but be given the choice. People know the importance of this pandemic, and how important quarantining is. They take that seriously, they don't need to be forced to do something or have the threat of going to jail, or some other awful penalization.

I also unwaveringly oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. There has not been enough research done on these vaccines and they are causing harm. People are dying after receiving them! How do you expect us parents to blindly go and just let our children get these vaccinations without the proper research being done? What happened to my body my choice? What happened to parents right to choose? Or delayed vaccinations? And now this JUST comes out and you are going to force us to give it to our children or they cannot get the education they deserve?! It is absolutely disgusting! And as leaders of our state you should be ashamed of yourself!

Subject: Public Comments for WSBOH Members from March EH Committee Special Meeting

External Email

Hello,

This email is to comment that I am not in favor of mandating a COVID vaccination for WA public schools that is still only under an Emergency Use Authorization.

My concerns are as follows:

All three available shots are only approved under an EUA currently. This is easily verifiable on the FDA's own website. The FDA approval letter for BioNTech Comirnaty a Legally distinct vaccine <https://www.fda.gov/media/151710/download> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710/download>> and the FDA Comirnaty FAQ that is included in the product packaging <https://www.fda.gov/vaccines-blood-biologics/qa-comirnaty-covid-19-vaccine-mrna> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fvaccines-blood-biologics%2Fqa-comirnaty-covid-19-vaccine-mrna&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2be917e9110e447c528a08d9d2155b8f%7C11d0e2>> clearly states that the Pfizer – BioNTech shot which is offered in the US is still approved for use under an EUA only and it is legally distinct from the BioNTech shot that received the FDA approval and is not available. Easily verifiable with a phone call to Pfizer for confirmation. Therefore of the three shots available to meet a possible vaccine mandate (Johnson & Johnson, Pfizer, and Moderna) none of the available options are legally approved by the FDA and are in fact still only available under an emergency use authorization. Further, a FDA approved Comirnaty shot is not available anywhere at this time. Again this is an easily verifiable fact.

I would remind you that there are distinct legalities surrounding vaccines and the differences between EUA approval and FDA approval and that even though you are in a fiduciary responsibility making this decision you are not immune from potential future financial lawsuits resulting from this decision and outcomes.

Further.

1. There is no long term data on this type of vaccination (mRNA-based).
2. Children fare well with COVID and the vaccine and is clearly reflected in all statistics from the CDC.

It is my belief based on these points that it would be highly irresponsible to mandate vaccinations for children. I also believe that if this becomes a requirement for school attendance you will see a significant number of families looking for alternative education options, and my family would be one of them.

Thank you for your time,

Ryan Tracy

External Email

I'm writing this email as a concerned and appalled citizen of Whatcom County and Washington state.

I'm a lifelong resident of Whatcom/Skagit Counties and when I saw the Facebook/Instagram images showing some information regarding the ability of a Health Officer's use of Law Enforcement to "involuntarily detain a person or group to be isolated in a quarantine facility" is beyond concerning.

For 1, it's not LAW to get a vaccine. Therefore, you CANNOT use LAW enforcement to enforce a LAW that does NOT exist!!! This is creating a fear tactic to get more people vaccinated. I'm neither for or against the vaccine. I believe it's someone's choice. Just like the flu shot. It seems to be just as effective and ineffective at this point.

Second, how can this even be on the list of topics to discuss. People are leaving this county and state at record rates because of the inability of our public representation to do what's best for it's citizens. We have had record breaking weather challenges and school challenges that should be much higher up the agenda than this use of negligence and fear mongering.

All in all, I'm just disappointed with how things have been going and I'm appalled by the disregard of human rights and social decency.

Dear Governor,  
I am deeply grieved that you are preparing to force our children to receive the Covid 19 vaccine. Science has not yet proven the safety of this type of vaccine for children's long term development.

I consider this kind of demand on children inhumane, turning our children into lab rats.

Please do not do this... I beg you.

☐

As a resident and voter in WA state, I would like to state the following:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

As noted in the Petition Filing, we are requesting the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials. This new rule request pertains to any and all avenues through which the Board has authority to add medical intervention requirements, including through regular or emergency rule-making.

We are requesting this Rule because despite the absence of an FDA licensed COVID-19 vaccine formulation with completed Phase 3 trial studies in children, and despite CDC-acknowledged risks of myocarditis and blood clots and the data showing children are not at high risk of severe disease or death from COVID-19, the BOH has gathered a Technical Advisory Group (TAG) to examine adding COVID-19 vaccines to daycare & school requirements. This new rule is needed immediately to ensure that federal EUA regulations are upheld & to protect fully informed consent, which prohibits the use of coercion or undue influence, such as can be exerted by state requirements.

Thank you for your consideration,

G. Denise Henry

Are you Pro or Con on the proposal?

1. Pro

---

We have relied on vaccine science and mandates to keep our vulnerable populations safe for 50 years. After all of the evidence we have gathered, there is no reason to deter from our wealth of scientific knowledge that indicates vaccines are the most effective and appropriate mechanism for transmittable disease. I'm concerned that a failure to impose an appropriate vaccine mandate for COVID, could open the door to overturn The other vaccine mandates that have helped keep our children and vulnerable populations safe. I implore our elected and appointed leaders to follow the science and rely on peer reviewed evidence. Personal freedoms should not come before the right to life, liberty and the pursuit of happiness. Without vaccine mandates in schools, our vulnerable populations will die at alarming rates. That's not justice.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \*These shots are experimental
- \* These shots do not stop the spread of transmission
- \* These shots do not prevent a child from acquiring covid
- \* We have bodily autonomy and should be able to choose what we put into it
- \*There is no way to know what reactions may occurs from these shots
- \*There are no long term studies available for review
- \*Children are not at high risk from covid
- \*There is no accountability on the part of the pharmaceutical company if an adverse reaction occurs
- \*There is no accountability on the part of the school requiring the shot if an adverse reaction occurs

Please stop and consider these red flags before moving forward with this proposal

Sincerely,

Concerned parent, tax payer, US Citizen,  
Shannon Halls

Subject: Immunization criteria

External Email

Washington State Board of Health,

I believe the Covid vaccine should not be a requirement for children to attend school or childcare in this state.

The science and data show that children are at very low risk for contracting or transmitting Covid or any of its variants. CDC data shows that since Jan 2020, in the state of WA 10 children (age 0-17) have died with (not from) Covid. As unfortunate as that is, it is less than the number of WA children dying of the flu on an average year.

Deciding to vaccinate a child against a virus with a 99.7% overall survival rate is the parent's responsibility, not that of the State.

A vaccine requirement would also be an infringement upon the religious freedom of people of faith in WA State. Section 11 of our state constitution states "Absolute freedom of conscience in all matters of religious sentiment, belief and worship, shall be guaranteed to every individual, and no one shall be molested or disturbed in person or property on account of religion . . ."

Thank you.

Steve Surface

Good Evening,  
Implementing COVID immunization requirements for children's education will have profoundly negative impacts to our state and local communities.

I am writing to express my opposition to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease.

Regards,  
Sean

You cannot deny my children their education because of a medical reason. My children are not at risk of dying from covid and therefore I refuse to vaccinate them against it. I am vaccinated and so is my wife. We are pro vaccine for adults, especially those at risk. However, children are having terrible adverse effects due to the vaccine when it comes to their hearts and when it comes to fertility. I will not risk my child's life by giving them the vaccine especially when they are not going to die from getting Covid. It is our constitutional right to have an education for our children and it is not constitutional to require a vaccination for them to go to school.

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Dear Washington State Board of Health,

As a parent, I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. Please do not apply this measure.

Also, I object to including Covid vaccines as a requirement for attending school or childcare facilities. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. There have been no clinical studies about the efficacy, or negative side affects, of the vaccine on children. At best, its unnecessary, and at worst, its unsafe for our most vulnerable population (who, ironically, have not been shown to be particularly vulnerable to any of the Covid-19 variants so far).

Sincerely,

Rachel Fink

To whom it may concern

I am opposed to any kind of emergency orders where the public can be detained per the health department. This is tyranny. This is not freedom. You are far over reaching your boundaries of control over the public. There is zero reason to enforce something like this especially for something with the severity of covid.

I am also opposed to requiring the vaccine for children in school. This vaccine still only has emergency use authorization, it has not been around long enough for parents to know how it will long term effect their children, and covid is not severe enough to require this. People deserve the freedom to make these decisions for themselves and their families. We do not need the government making them for us.

Thank you for your time

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Authorization of this shot is still only approved under emergency use. There haven't been tests on long term effects on children, let alone anyone.

This isn't a vaccine. We are not given the polio vaccine to get a "less dangerous" version of polio.

Children are not at risk of serious illness with this disease.

The disease has been proven to spread regardless of vaccination status.

Dear Board Members,

I am a resident of Pierce County, WA, with several children in the public school system. I am strongly opposed to making COVID-19 shots mandatory for school admission or childcare in our State for several reasons.

First off, the COVID-19 vaccines are currently in the "experimental" phase, with the long-term effects still undetermined.

Second, it is without dispute that those who are fully vaccinated can still get COVID-19, and, can still transmit the disease.

Third, children are at very low risk for severe reactions to the disease.

Fourth, studies are ongoing and initially positive regarding the protection provided by natural immunity for those who have recovered from Covid-19.

The bottom line, I am not "anti-vaccine", but I am strongly opposed to a vaccine mandate at this time. The science does not support a mandate. My children have had COVID-19 and fully recovered from the disease with minor impact. I personally do not know any person who has died from the disease, but I have 2 close friends, and one acquaintance (a teenager) who have had severe reactions to the vaccines, requiring hospitalization. If the Health Board requires mandatory vaccination for School admission, I will be forced to pull my children from public schools. This will cause undue hardship on my family during a time when life is challenging enough.

I strongly urge the Health Board to abstain from mandating COVID-19 vaccination for school admission.

Respectfully,  
Steve Mathisen

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I oppose WAC 246-100 Rule making that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

---

I am a fully vaccinated urgent care physician and am writing to share my thoughts regarding a COVID vaccine mandate in Washington. While I support every parent's right to choose whether to vaccinate their children and I encourage high risk individuals to get vaccinated, I stand strongly against a vaccine mandate. It's very obvious that the vaccine will not prevent COVID or infection transmission, failing one of the qualification criteria for mandated vaccines set forth by the BOH. I experienced a breakthrough case in November. Several of my boosted colleagues and urgent care staff have fallen ill from the virus. Almost all of our neighbors are sick. In the clinic we have seen boosted parents spread the infection to their vaccinated children. The vaccine certainly prevents severe illness, as I have witnessed personally through my job, and works similarly to the flu shot in that sense. Thankfully COVID poses low risk to children, even though pediatric cases are rising. Flu is far more risky to children, yet our schools have never mandated the flu shot for attendance. Vaccine mandates make more sense when the associated illness can be eradicated, but that is impossible with COVID. This virus is a zoonosis and has infected deer and other animals. Scientists say COVID-19 outbreak in deer could mean trouble for humans | TheHill I read that it's suspected omicron originated from a rodent. There was recently an outbreak in Antarctica, on a base where individuals were vaccinated and/or boosted, and tested prior to arrival. COVID outbreak in Belgian research station in Antarctica - ABC News (go.com) You can't mandate a vaccine for an illness that can't be eradicated. Pediatric cases are rising, but lots and lots of testing is taking place due to testing requirements by sports teams, test to stay at schools, and anxious parents bringing their children in for evaluation when they have a sore throat or nasal congestion. The cases we detect are very mild, and in many cases are asymptomatic—as has been the case throughout the pandemic. Pediatric hospitalizations have been overestimated as well, perhaps by as much as 40% according to this Stanford study. COVID-19 hospitalizations among children likely overcounted, researchers find | News Center | Stanford Medicine Even Anthony Fauci and Rochelle Walensky recently acknowledged that hospitalizations might be inflated. This social media post from Jackson Health in Florida underscores the degree to which even adult hospitalizations related to COVID may be inflated. Jackson Health System on Twitter: "Jackson Health System hospitals currently have 516 patients who have tested positive for COVID-19. Of those, 255 patients - or 49% - are admitted to the hospital primarily for non-COVID reasons. Of the 516, 123 are vaccinated, 63 of whom are immunocompromised transplant patients."

/ Twitter If a vaccine is going to be mandated, we need to base that decision on sound data and, as you can see, COVID hospitalization data are not very accurate. Our state requires that the illness prevented by a vaccine must cause significant morbidity and mortality in the population in question. If children have incidental COVID diagnoses upon admission to the hospital, it's apparent that that is not the case. While the majority of vaccine recipients suffer no adverse effects, there have been reports of issues such as post-vaccine myocarditis that must weigh heavily on the decision to mandate this vaccine. More and more data indicate that the risk of myocarditis is far higher than we previously realized. Risks of myocarditis, pericarditis, and cardiac arrhythmias associated with COVID-19 vaccination or SARS-CoV-2 infection (nature.com) The benefits of the vaccine must outweigh the risks and we don't have enough data to show benefits to healthy children. I have seen multiple other adverse effects in the clinical setting besides myocarditis. Patients have presented with menstrual issues, neurologic problems, severe abdominal pain and diarrhea, headaches, and blood clots. I can tell you from my personal experience after 18 years in practice that I have never seen a vaccine cause side effects to the extent that this one does. We also do not have long term safety data available for this vaccine. 28.1% of children between the ages of 5-11 in Washington have initiated vaccination. Only about 20.0% of children in this group are fully vaccinated as of today. 51.2% of children 12-15 are fully vaccinated and 59.2 of 16-17 year olds are fully vaccinated. I think this demonstrates that this vaccine is not accepted by the public, especially to parents of younger children. Many, many parents (including my husband and I) will withdraw our children from the public school system if this vaccine is mandated. You need to consider the impact that a mandate will have on our educational infrastructure from that point as well. Thank you for your time and I hope you take parents' comments about this topic very seriously. All of us want the best for our children. Please do the right thing and do not mandate this vaccine at this time. We can revisit the issue in a few years after we have more data.

Good day Board Members,

First I'd like to start my email with your authority is not absolute and "We the People" do not consent to your heavy handed approach to our health. We do not give you the authority to force any medical procedures on our children, our elderly, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial.

Our bodies are not owned by our government.

We do not give you permission to operate in an authoritarian way nor do we approve of you attempting to use broad rule making powers to force the Covid-19 shots that are NOT currently FDA approved on anyone. Only "Comirnaty" is approved and yet it is not offered in the USA at this time. The current Pfizer-BioNTech Vaccine is the one given in the US, but it is still under "EUA", not "Authorized." (See leaflets given by pharmacists - attached to this email or this link)

Labeling of Pfizer Vaccines:

<https://labeling.pfizer.com/ShowLabeling.aspx?id=14471>

EUA approval letter from FDA also includes Authorization for Comirnaty:

<https://www.fda.gov/media/151710/download>

>> Congress Using the wrong information:

They are making it sound like "Pfizer/ BioNTech" and "Comirnaty" are the same. They are legally not and should not be represented as such. Technically Pfizer and BioNTech are manufacturers, but they have one legal name for an FDA approved vaccine "Comirnaty" and one that is only under EUA. There is a misconception that this is about semantics, but it is not - legal names and legal approvals for drugs in the US are supposed to follow specific procedures, clinical trials, and they hold important legal obligations and regulations.

<https://crsreports.congress.gov/product/pdf/R/R46913>

<https://lynnwoodtimes.com/.../federaljudge-rejects.../>

PREP Act

Based upon the projected numbers of Covid-19, "on January 21, 2020 the former

Secretary, Alex M. Azar II, declared a public health emergency pursuant to section 319 of the PHS Act, 42 U.S.C. 247d, effective January 27, 2020, for the entire United States to aid in the response of the nation's health care community to the COVID-19 outbreak. Pursuant to section 319 of the PHS Act, the Secretary renewed that declaration effective on April 26, 2020, July 25, 2020, October 23, 2020, and January 21, 2021."

"On March 10, 2020, former Secretary Azar issued a Declaration under the PREP Act for medical countermeasures against COVID-19 (85 FR 15198, Mar. 17, 2020) (the Declaration). On April 10, the former Secretary amended the Declaration under the PREP Act to extend liability immunity to covered countermeasures authorized under the CARES Act (85 FR 21012, Apr. 15, 2020)."

This declaration is all based upon projections as the time and not actual deaths. The first case to enter the US was shared as January 23, 2020, and although by the date of the first declaration of "public health emergency" (January 31, 2020) there were less than 10 cases. (Please see the attached graphs of cases and deaths with the oldest at the bottom of the list) We are told to trust the "science" yet, declarations of emergency were declared with less than 10 cases in the US on a new virus and the first death didn't even happen until February 27, 2020. The mistrust the public is experiencing is due to the extreme measures that have been taken against the people and the very heavy handed measures that have not been supported by the actual data.

[https://covid.cdc.gov/covid-data-tracker/#trends\\_dailycases](https://covid.cdc.gov/covid-data-tracker/#trends_dailycases)

<https://crsreports.congress.gov/product/pdf/LSB/LSB10443/7>

Please also review Pfizer's 6 month data. I've attached the document along with the link under "breaking news" called "More Harm Than Good." Although this is from Canada, we share lots of information, because we are all using the same vaccines.

<https://www.canadiancovidcarealliance.org/>

We have more strains, since the shots have been administered than we did prior to the shots being administered. The year of 2021 alone had "Mu", "Delta" and "Omicron" that were highly publicized and now "IHU" detected in France (January 2022.) Yet the first variant publicized was the "Gamma" in November 2020 in Brazil, but still not of concern until January 2021. The people of Washington have been more than compliant for the past 670+ days of our governor's emergency powers and yet the masks, shots, and lockdowns have not stopped the virus from spreading between vaccinated individuals, causing death, or causing vaccine injuries amount those that chose to be apart of the vaccine trial.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8342008/>

Please review some of the stories of the vaccine injured as their lives matter as well.

<https://www.covidvaccinevictims.com/>

<https://www.habingfamily.com/obituary/michael-mike-granata>

<https://www.realnotrare.com/realstories>

Understanding the VAERS reporting system:

<https://openvaers.com/>

Also you need to see what people think of the mandates by OSHA that President Biden issued. With over 119,830 comments, people are very unhappy that medical procedures

are being mandated and yet have not proven to stop the spread, stop transmission, nor stop hospitalization as was touted in the beginning of rolling out these vaccines.

<https://www.regulations.gov/document/OSHA-2021-0007-0001>

Also another interesting point is that since Covid has entered the scene, the CDC shows that essentially the seasonal flu has mostly not impacted any children. That seems very untrustworthy and is causing many people to mistrust those in our public health.

<https://www.cdc.gov/flu/weekly>

Right now you are facing a big decision to "force" medical procedures upon people that do not freely choose to participate in this trial. One day soon, you may be against something (politically, ethically, morally, or otherwise), and you may have already given up your freedoms to choose, because you didn't take this opportunity to speak up against "force" being perpetuated on those you serve.

We are asking you to consider the repercussions of force, mandates, and new laws that hurt the freedoms afforded us by our Creator; God or the ones supported by the US Constitution. Our children are our most treasured gem and it is our job given to us by God that we must protect them from any and all harm.

Please consider the points, data, and research I've shared when you consider a heavy handed approach to mandates and forced medical procedures. In real life, not everyone can wear size 7 shoes, yet with all these mandates - we essentially are attempting to force everyone to have the same medical procedures when not every body is the same.

No.

I am appalled these measures are even being considered.

These proposals are tyrannical, authoritarian, immoral, inhumane and completely wrong. Do not condone arresting and condemning citizens to internment camps. Have we learned nothing from the horrors of our past?

No to "Allowing local health officers to use law enforcement WAC 246-100-070 <tel:246-100-070> to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045 <tel:246-100-045> ) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 <tel:246-100-040> ). These specifics come from WAC 246-100."

No to "Including the Covid-19 injections as part of school immunization requirements using WAC 246-105."

Absolutely not.

Respectfully,

Sarah E. Bliesath

On Jan. 12th at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

---

As a physician, I have had first-hand knowledge of the impact Covid has had on our community in Kitsap County and the difference between someone being vaccinated and not-vaccinated. I am also a mother with four children in middle and high school. I am writing to urge you to strongly considered adding the Covid vaccine to the current required vaccinations for children to attend public schools in WA state. The two mRNA-based COVID-19 vaccines approved and available at present are highly safe and effective in reducing the risk of severe illness, hospitalization, and death. Pertaining specifically to pediatric vaccines, no severe side effects or deaths have been documented. We are tremendously fortunate to have these high-quality vaccines now widely available. COVID-19, without the protection provided by vaccination, is highly contagious and can cause severe illness and death in all age groups and demographic segments. Within a vaccinated population, we know that the rate of spread and contagion decreases. In congregate settings such as K-12 schools and childcare facilities, therefore, it is imperative that these vaccines be required for in-person attendance. Sufficient accommodations (online schooling, for example) already are available for those wishing to opt out due to personal convictions. Furthermore, populations in need of in-person instruction such as special education are at an increased likelihood of requiring herd immunity due to comorbid conditions and so mandating vaccination status for continued attendance is necessary for those most at need of maintaining in-person instruction.

Please understand the gravity of the decision to mandate the Covid vaccine on this low risk, pediatric population. After weighing out all the data, and risks vs benefits, I am vaccinated myself as an adult healthcare worker, however, with the current data, we will not be vaccinating our young daughter who is considered low risk. If you mandate that this younger age group be required to be vaccinated, then you would force us to pull her out of her public school and have my husband homeschool her (which consequently means the Conway school system loses their frequently used substitute teacher... who was required 4 out of 5 days this week for instance). And beyond that, on principle, we would likely move out of Washington, which would mean not only the loss of a teacher, but also, a health care provider (both of which WA can't afford to lose right now). And frankly, considering all of the lawsuits that are being filed and winning against Biden's vaccine mandates in other states, I'm surprised that you want to put the WA BOH in a possibly similar liable position for litigious action. Thank you for considering these concerns, and hopefully you will reach the conclusion to NOT mandate the vaccine for school in this low risk pediatric population.

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Rick

As a Washington State resident, parent and grandparent, I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

External Email

As a 3rd and 4th grade teacher I have seen no transmission of COVID in my classroom. Students who have become sick got it from home.

We require children to have vaccines that eradicate the disease like polio. COVID's impact on children is similar to the flu and we do not require a flu shot.

Students have lost so much time in school already and parents who disagree with the requirement will be denied a public education for their children. That would be a disaster!

We should not mandate/require the COVID-19 vaccine for children!!!

Our family is vaccinated and supports the option for others to do so if they choose. However, even with the vaccination, we have had family members still contract COVID. It is a well established fact that the vaccine does not prevent infection. The vaccines which children currently are required to receive are ones which prevent diseases, while vaccines for the flu remain optional as they are not a guarantee one will not get the flu. COVID vaccines should remain optional as well.

Subject: Comments on January 12th Meeting

External Email

Washington State Board of Health:

I am writing out of concern regarding the topics that will be discussed in the January 12th meeting. These concerns are in regards to the vaccine mandate for children as well as the involuntary quarantining of citizens via 'emergency measures.' These are both huge topics that need to be addressed with sound judgment as well as common sense.

Considering the two years of experience we have behind us, it's safe to say there are many well known facts about this vaccine. Not only does it not prevent illness, but vaccinated individuals can still spread the illness to others. The CDC and others have stated this, not to mention that there are countless studies which show these facts as well. Setting all the facts aside, even if this was a miracle vaccine, that doesn't, and never will, justify the loss of Constitutional Freedoms, for one's own self as well as their children. Do you desire to have a say in the raising of your children? Then you should allow each parent to make that decision in their own children's lives.

Regarding involuntary quarantines, and the quarantine sites that are known to exist in this state; while I wasn't alive in the 1940's, this reminds me of the Japanese internment camps. Are we moving along those lines, and depriving citizens of our rights, just as we did with the Japanese-American community of World War 2?

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons to isolation camps or covered medical interventions, Washington board of health is playing with medical tyranny. This is a violation of the Washington State and United States constitutions, as well as the Nuremberg code. No government can mandate or force medical treatment without individual consent.

Please let us not become another Germany, or China. People have rights to govern their body and raise their children in freedom. Stand up for this freedom.

Sincerely,

Sofia Contreras

This shot is absolutely uncalled for and we parents are tired of our children being the pawns of this game the schools are playing with the government.

In the event that our child reacts poorly or dies due to this vaccine, who will be held accountable? Children are the least likely to be affected by covid and if teachers are vaccinated, there should be nothing to worry about.

You need to remember that you are supposed to be working for us, and should be focusing on the actual health problems we have faced the last two years, and for children, covid is not one of them. A failing education system, depression, abuse, obesity, and even suicide are the issues we should be addressing.

To mandate a vaccine with no long term studies proving or disqualifying efficacy or more harmful side affects that may not show up for many years... is not something that should be forced on our children in exchange for education and possibly the only stable place some have to look forward to being at.

This is completely Un-American and parents will wake up and you will be held accountable whether it is a few years from now, or on judgement day. Are you ready for that?

I am strongly opposed to mandatory COVID-19 mRNA shots of anyone, and especially of children for school admission, attendance, or childcare in our State.

The data shows children are at minuscule risk from covid-19 of any serious symptoms or death, but there are significant mRNA injection side-effect risks to some children. Further, the long-term risks and consequences of these injections upon children are not known. Requiring Covid-19 shots for children may likely injure or kill more children than covid-19 itself. See this recent medical article attached:

Additionally, most children likely already have good natural immunity to covid-19 serious illness or death by means of natural recovery (after usually mild or no symptoms experienced during covid-19 infection) or their own healthy young natural antibody immunity level.

Finally, to require Covid-19 shots, especially for public school attendance or childcare, would likely be unconstitutional and/or unlawful discrimination (against unvaccinated children and their parents) under both federal and Washington State law.

### ABSTRACT

This article examines issues related to COVID-19 inoculations for children. The bulk of the official COVID-19-attributed deaths per capita occur in the elderly with high comorbidities, and the COVID-19 attributed deaths per capita are negligible in children. The bulk of the normalized post-inoculation deaths also occur in the elderly with high comorbidities, while the normalized post-inoculation deaths are small, but not negligible, in children. Clinical trials for these inoculations were very short-term (a few months), had samples not representative of the total population, and for adolescents/children, had poor predictive power because of their small size. Further, the clinical trials did not address changes in biomarkers that could serve as early warning indicators of elevated predisposition to serious diseases. Most importantly, the clinical trials did not address long-term effects that, if serious, would be borne by children/adolescents for potentially decades.

A novel *best-case scenario* cost-benefit analysis showed *very conservatively* that there are five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially.

### 1. Introduction

Currently, we are in the fifteenth month of the WHO-declared global COVID-19 pandemic. Restrictions of different severity are still in effect throughout the world [1]. The global COVID-19 mass inoculation is in its eighth month. As of this writing in mid-June 2021, over 800,000,000 people globally have received at least one dose of the inoculation and roughly half that number have been fully inoculated [2]. In the USA, about 170,000,000 people have received at least one dose and roughly 80 % of that number have been fully inoculated [2].

Also, in the USA, nearly 600,000 deaths have been officially attributed to COVID-19. Almost 5,000 deaths following inoculation have been reported to VAERS by late May 2021; specifically, “Over 285 million doses of COVID-19 vaccines were administered in the United States from December 14, 2020, through May 24, 2021. During this time, VAERS received 4,863 reports of death (0.0017 %) among people who received

a COVID-19 vaccine.” [3] (the Vaccine Adverse Events Reporting System (VAERS) is a passive surveillance system managed jointly by the CDC and FDA [3]. Historically, VAERS has been shown to report about 1% of actual vaccine/inoculation adverse events [4]. See Appendix 1 for a first-principles confirmation of that result). By mid-June, deaths following COVID-19 inoculations had reached the ~6000 levels.

A vaccine is legally defined as any substance designed to be administered to a human being for the prevention of one or more diseases [5]. For example, a January 2000 patent application that defined vaccines as “compositions or mixtures that when introduced into the circulatory system of an animal will evoke a protective response to a pathogen.” was rejected by the U.S. Patent Office because “The immune response produced by a vaccine must be more than merely some immune response but must be protective. As noted in the previous Office Action, the art recognizes the term “vaccine” to be a compound which prevents infection” [6]. In the remainder of this article, we use the term

‘inoculated’ rather than vaccinated, because the injected material in the present COVID-19 inoculations prevents neither viral infection nor transmission. Since its main function in practice appears to be symptom suppression, it is operationally a “treatment”.

In the USA, inoculations were administered on a priority basis. Initially, first responders and frontline health workers, as well as the frailest elderly, had the highest priority. Then the campaign became more inclusive of lower age groups. Currently, approval has been granted for inoculation administration to the 12–17 years demographic, and the target for this demographic is to achieve the largest number of inoculations possible by the start of school in the Fall. The schedule for inoculation administration to the 5–11 years demographic has been accelerated to start somewhere in the second half of 2021, and there is the possibility that infants as young as six months may begin to get inoculated before the end of 2021 [7].

The remainder of this article will focus on the USA situation, and address mainly the pros and cons of inoculating children under eighteen. The article is structured as follows:

Section 1 (the present section) introduces the problem.

Section 2 (Background):

- 1) provides the background for the declared COVID-19 “pandemic” that led to the present inoculations;
- 2) describes the clinical trials that provided the justification for obtaining Emergency Use Authorization (EUA) from the FDA to administer the inoculations to the larger population;
- 3) shows why the clinical trials did not predict either the seriousness of adverse events that have occurred so far (as reported in VAERS) or the potential extent of the underlying pre-symptomatic damage that has occurred as a result of the inoculations.

Section 3 (Mass Inoculation) summarizes the adverse events that have occurred already (through reporting in VAERS) from the mass inoculation and will present biological evidence to support the potential occurrence of many more adverse effects from these inoculations in the mid-and long-term.

Section 4 (Discussion) addresses these effects further

Section 5 (Summary and Conclusions) presents the conclusions of this study.

There are four appendices to this paper.

Appendix A provides some idea of the level of under-reporting of post-inoculation adverse events to VAERS and presents estimations of the actual number of post-inoculation deaths based on extrapolating the VAERS results to real-world experiences.

Appendix B provides a detailed analysis of the major clinical trials that were used to justify EUA for the inoculants presently being administered in the USA.

Appendix C summarizes potential adverse effects shown to have resulted from past vaccines, all of which could potentially occur as a result of the present inoculations.

Appendix D presents a novel *best-case scenario* cost-benefit analysis of the COVID-19 inoculations that have been administered in the USA.

## 2. Background

### 2.1. Pandemic history

In December 2019, a viral outbreak was reported in Wuhan, China, and the responsible coronavirus was termed Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) [8,9]. The associated disease was called Coronavirus Disease 2019, or COVID-2019. The virus spread worldwide, and a global pandemic was declared by the WHO in March 2020 [10,11]. Restrictive measures of differing severity were implemented by countries globally, and included social distancing, quarantining, face masks, frequent hand sanitation, etc. [12,13]. In the USA, these measures were taken as well, differing from state-to-state [14]. At

the same time, vaccine development was initiated to control COVID-19 [15]. In the USA, non-vaccine treatments were not encouraged at the Federal level, but different treatment regimens were pursued by some healthcare practitioners on an individual level [11,16,17].

By the end of May 2021, the official CDC death count attributed to COVID-19 was approaching 600,000, as stated previously. This number has been disputed for many reasons. First, before COVID-19 testing began, or in the absence of testing, after it was available, the diagnosis of COVID-19 (in the USA) could be made by the presumption of the healthcare practitioner that COVID-19 existed [4,18]. Second, after testing began, the main diagnostic used was the RT-PCR test. This test was done at very high amplification cycles, ranging up to 45 [19–21]. In this range, very high numbers of false positives are possible [22].

Third, most deaths attributed to COVID-19 were elderly with high comorbidities [1,22]. As we showed in a previous study [22], attribution of death to one of many possible comorbidities or especially toxic exposures in combinations [23] is highly arbitrary and can be viewed as a political decision more than a medical decision. For over 5 % of these deaths, COVID-19 was the only cause mentioned on the death certificate. For deaths with conditions or causes in addition to COVID-19, on average, there were 4.0 additional conditions or causes per death [24]. These deaths with comorbidities could equally have been ascribed to any of the comorbidities [22]. Thus, the actual number of COVID-19-based deaths in the USA may have been on the order of 35,000 or less, characteristic of a mild flu season.

Even the 35,000 deaths may be an overestimate. Comorbidities were based on the clinical definition of specific diseases, using threshold biomarker levels and relevant symptoms for the disease(s) of interest [25,26]. But many people have what are known as pre-clinical conditions. The biomarkers have not reached the threshold level for official disease diagnosis, but their abnormality reflects some degree of underlying dysfunction. The immune system response (including pre-clinical conditions) to the COVID-19 viral trigger should not be expected to be the same as the response of a healthy immune system [27]. If pre-clinical conditions had been taken into account and coupled with the false positives as well, the CDC estimate of 94 % misdiagnosis would be substantially higher.

### 2.2. Clinical trials

#### 2.2.1. Clinical trials to gain FDA Emergency Use Authorization (EUA) approval

The unprecedented accelerated development of COVID-19 vaccines in the USA, dubbed Operation Warp Speed, resulted in a handful of substances available for clinical trials by mid-2020 [28]. These clinical trials were conducted to predict the safety and efficacy of the potential vaccines (which have turned out to be treatments/inoculations as stated previously), and thereby gain approval for inoculating the public at large [29]. An overview of the Pfizer clinical trials is presented in this section, and a more detailed description of the main clinical trials is shown in Appendix B.

Two types of inoculants have gained FDA EUA in the US: mRNA-based inoculants and viral vector-based inoculants, with the mRNA inoculants having the widest distribution so far. Comirnaty is the brand name of the mRNA-based inoculant developed by Pfizer/BioNTech, and Moderna COVID-19 Vaccine is the brand name of the mRNA-based inoculant developed by Moderna [30]. Both inoculants contain the genetic information needed for the production of the viral protein S (spike), which stimulates the development of a protective immune response against COVID-19 [31]. Janssen COVID-19 Vaccine is the brand name of the viral vector-based inoculant developed by Johnson and Johnson. Janssen COVID-19 vaccine uses an adenovirus to transport a gene from the coronavirus into human cells, which then produce the coronavirus spike protein. This spike protein primes the immune system to fight off potential coronavirus infection [32].

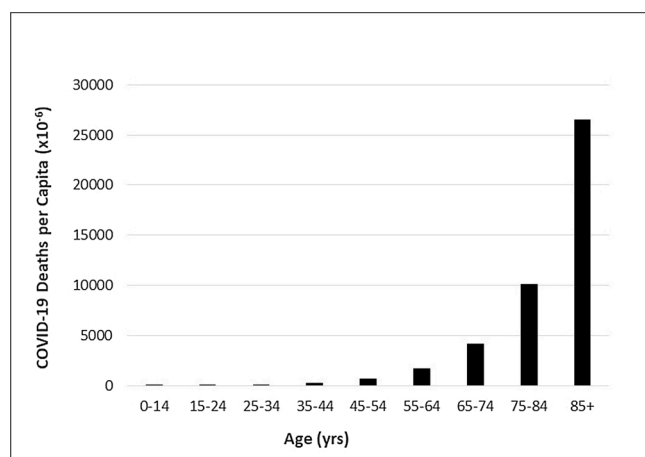

The results of these trials that allowed granting of EUA by the FDA

**Table 1**

Demographics (population for the primary efficacy endpoint). The number of participants who received vaccine and placebo, stratified by age.

AGE GROUP	Pfizer-BioNTech COVID-19 Vaccine (N = 18,242) n (%)	Placebo (N = 18,379) n (%)
≥12 through 15 years <sup>b</sup>	46 (0.3 %)	42 (0.2 %)

**Symbols:** b: “100 participants 12 through 15 years of age with limited follow-up in the randomized population received at least one dose (49 in the vaccine group and 51 in the placebo group). Some of these participants were included in the efficacy evaluation depending on the population analyzed. They contributed to exposure information but with no confirmed COVID-19 cases, and did not affect efficacy conclusions.”; N: number of test subjects, n: number of controls.

**Fig. 1.** COVID-19 Deaths per capita by age in the United States (as of Jun 5, 2021). Population-based on U.S. CDC WONDER Bridge-Race Population Estimate 2019. Data obtained from <https://wonder.cdc.gov/bridged-race-v2019.html> on 6/15/2021. Provisional COVID-19 deaths based on CDC data provided by the National Center for Health Statistics for the period 1/1/2020 – 6/5/2021. Data obtained from <https://data.cdc.gov/NCHS/Provisional-COVID-19-Deaths-by-Sex-and-Age/9bhg-hcku> on 6/10/2021.

can be found in the inserts to the inoculation materials. For example, the Pfizer inoculation trial results are contained in the fact sheet for healthcare providers administering vaccine (vaccination providers) [33].

There were two clinical trials conducted to gain FDA EUA for Pfizer: a smaller Phase 1/2 study, and a larger Phase 1/2/3 study. The age demographics for the larger clinical study are as follows (from the Pfizer insert): “Of the total number of Pfizer-BioNTech COVID-19 Vaccine recipients in Study 2 (N = 20,033), 21.4 % (n = 4,294) were 65 years of age and older and 4.3 % (n = 860) were 75 years of age and older.” Additionally: “In an analysis of Study 2, based on data up to the cutoff date of March 13, 2021, 2,260 adolescents (1,131 Pfizer-BioNTech COVID-19 Vaccine; 1,129 placebo) were 12 through 15 years of age. Of these, 1,308 (660 Pfizer-BioNTech COVID-19 Vaccine and 648 placebo) adolescents have been followed for at least 2 months after the second dose of Pfizer-BioNTech COVID-19 Vaccine. The safety evaluation in Study 2 is ongoing.”

The relevant demographics are presented in Table 7 on p.31 of the Pfizer insert. The age component of those demographics is shown below in Table 1.

There are very minor differences between most of the data in the above table and the preceding narrative shown, and they are probably due to different time horizons. The major difference is the number of adolescents used and appears to result from a much later reporting time.

Fig. 1 uses the official large CDC numbers (coupled with USA census data estimates from CDC Wonder) to show the COVID-19 deaths per capita as a function of age, circa early June 2021. Unfortunately, the most critical range, 85+, has the least resolution. It is obvious that most of the deaths occurred in the 55 to 100+ range, and the remaining individuals in the other ranges (especially under 35) have negligible risk of dying from the disease.

The age distribution in Fig. 1 differs substantially from the age distribution in Table 1. Why is this important? When designing a trial for the efficacy and safety of a potential treatment, the focus should be on the target population who could benefit from that treatment. There is little rationale for including participants in a trial for whom the treatment would not be relevant or warranted.

For the COVID-19 Pfizer trials, based on the data from Fig. 1, the trial population should have been limited at most to the 45–100+ age segment, appropriately weighted toward the higher end where the deaths per capita are most frequent. That was almost the exact opposite of what was done in the Pfizer clinical trials. In Fig. 1, approximately 58 % of the deaths occurred in the age range 75+, whereas 4.4 % of the participants in the Pfizer clinical trial were 75+. Thus, the age range most impacted by COVID-19 deaths was minimally represented in the Pfizer clinical trials, and the age range least impacted by COVID-19 deaths was maximally represented in the Pfizer clinical trials. This skewed sampling has major implications for predicting the expected numbers of deaths for the target population from the clinical trials.

Besides age, the other metric of importance in determining COVID-19 deaths is the presence of comorbidities. The more comorbidities, and the more severe the comorbidities, the greater the chances of death or severe adverse outcomes from COVID-19. It is not clear how well the number and severity of comorbidities in the clinical trial sample matched those reflected in Fig. 1, but the insert does mention the large number of conditions that excluded participation in the trials. In sum, the results from the clinical trials could not be expected to reflect the results that could occur (and have occurred) from mass inoculation of the public, given the unaffected nature of the bulk of the trial population from SARS-CoV-2 exposure.

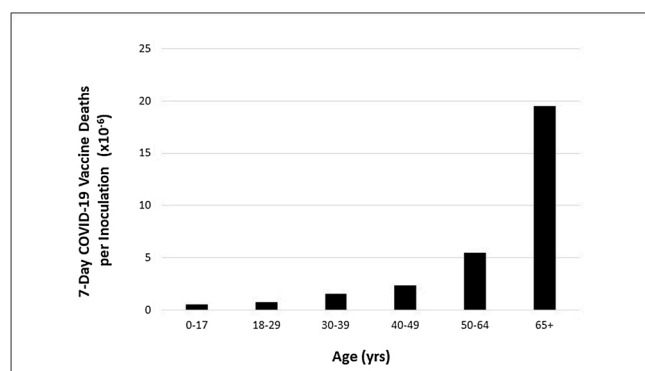

The prior discussion on the clinical trials has focused on the efficacy and safety of the inoculants, and the relationship of the trial test population to the total target population. We have limited the focus so far to the safety and efficacy issues since these constituted the core of what was presented to the FDA for EUA approval. We have not focused on the trials from an early warning indicator perspective.

We will address summarily the science/early warning indicator issues associated with the Pfizer trials, and how the neglect of these issues has translated into disastrous consequences during the mass inoculation rollout. Standard practice for determining and understanding the impact of new technology (such as mRNA “vaccines”) on a system involves measuring the state and flux variables of the system before the new technology intervention, measuring the state and flux variables of the system after the new technology intervention, and identifying the types and magnitudes of changes in the state and flux variables attributable to the intervention. This would be in addition to evaluating performance metrics before and after the intervention.

In Pfizer’s proposed clinical trials for the mRNA “vaccine” (Study to Describe the Safety, Tolerability, Immunogenicity, and Efficacy of RNA Vaccine Candidates Against COVID-19 in Healthy Individuals - <https://clinicaltrials.gov/ct2/show/NCT04368728>), the focus was on determining 1) adverse events/symptoms, 2) SARS-CoV-2 serum neutralizing antibody levels, 3) SARS-CoV-2 anti-S1 binding antibody levels and anti-RBD binding antibody levels, and 4) effectiveness. These metrics are all related to safety at the symptom level and performance.

However, symptoms/diseases are typically end points of processes

**Fig. 2.** Post-inoculation deaths per dose of inoculant. 7-day COVID-19 vaccine deaths per inoculation by age in the United States (as of 5/28/2021). Data shown includes the total number of all deaths up to 7 days after receiving the vaccine for both those administered 1 dose and the complete series of doses by age in the United States as of 5/28/2021 reported in VAERS (updated on 5/28/2021). COVID-19 Vaccinations (Inoculations) based on CDC data provided by ISSInfo up thru 5/28/2021. Data obtained from <https://data.cdc.gov/Vaccinations/COVID-19-Vaccination-Demographics-in-the-United-St/km4m-vcsb> on 6/10/2021. COVID-19 Vaccinations Deaths based on CDC WONDER VAERS Database as of 5/28/2021, obtained from <https://wonder.cdc.gov/controller/datarequest/D8.jsessionid=4B5522C8D1DA68F1A364646B0DA5> on 6/9/2021.

that can take months, years, or decades to surface. During that symptom/disease development period, many biomarker early warning indicators tend to exhibit increasing abnormalities that reflect an increasing predisposition to the eventual symptom/disease. Thus, serious symptoms/diseases that ordinarily take long periods to develop would be expected to be rare events if they occurred shortly following an inoculation. If the clinical trials that were performed by Pfizer and Moderna were designed to focus on efficacy and *only adverse effects at the symptom level of description* as an indicator of safety, the trial results would be limited to the identification of rare events, and the trial results would potentially under-estimate the actual pre-symptom level damage from the inoculations.

Credible safety science applied to this experiment would have required a much more expansive approach to determining effects on a wide variety of state and flux metrics that could serve as early warning indicators of potentially serious symptoms/disease, and might occur with much higher frequencies at this early stage than the rare serious symptoms. The only mention of these other metrics in the above proposal is in the Phase I trial description: “Percentage of Phase 1 participants with abnormal haematology and chemistry laboratory values”, to be generated seven days after dose 1 and dose 2.

A paper published in NEJM in December 2020 [34] summarized the Phase 1 results. The focus was on local and systemic adverse events and efficacy metrics (antibody responses). The only metrics other than these reported were transiently decreased lymphocyte counts.

We view this level of reporting as poor safety science for the following reasons. Before the clinical trials had started, many published articles were reporting serious effects associated with the presence of the SARS-CoV-2 virus such as hyperinflammation, hypercoagulation, hypoxia, etc. SARS-CoV-2 includes the S1 Subunit (spike protein), and it was not known how much of the damage was associated with the spike protein component of SARS-CoV-2. A credible high-quality safety science experiment would have required state measurements of specific biomarkers associated with each of these abnormal general biomarkers before and after the inoculations, such as d-dimers for evidence of enhanced coagulation/clotting; CRP for evidence of enhanced inflammation; troponins for evidence of cardiac damage; occludin and claudin for evidence of enhanced barrier permeability; blood oxygen levels for evidence of enhanced hypoxia; amyloid-beta and phosphorylated tau for

evidence of increased predisposition to Alzheimer’s disease; Serum HMGB1, CXCL13, Dickkopf-1 for evidence of an increased disposition to autoimmune disease, etc. A credible high-quality safety science experiment would have required flux measurements of products resulting from the mRNA interactions, from the LNP shell interactions, from dormant viruses that might have been stimulated by the mRNA-generated spike protein, etc., emitted through the sweat glands, faeces, saliva, exhalation, etc.

Most importantly, these types of measurements would have shown changes in the host that did not reach the symptom level of expression but raised the general level of host abnormality that could predispose the host to a higher probability of serious symptoms and diseases at some point in the future. Instead, in the absence of high-quality safety science reflected in these experiments, all that could be determined were short-term adverse effects and deaths. This focus on symptoms masked the true costs of the mRNA intervention, which would probably include much larger numbers of people whose health could have been degraded by the intervention as evidenced by increased abnormal values of these biomarkers. For example, the trials and VAERS reported clots that resulted in serious symptoms and deaths but gave no indication of the enhanced predisposition to forming serious clots in the future with a higher base of micro-clots formed because of the mRNA intervention. The latter is particularly relevant to children, who have a long future that could be seriously affected by having an increased predisposition to multiple clot-based (and other) serious diseases resulting from these inoculations.

### 3. Mass inoculation

#### 3.1. Adverse events reported for adults

This section describes the adverse effects that followed COVID-19 mass inoculation in the USA. The main source of adverse effects data used was VAERS. Because VAERS is used to estimate adverse event information by many other countries as well, a short overview of VAERS and its intrinsic problems is summarized in Appendix 1.

The period in the present study covered by the reported inoculations is mid-December 2020 to the end of May 2021. The population inoculated during this period is mainly adults. Child inoculations did not begin until mid-May. Because the different age groups were inoculated starting at different times based on priority, the elapsed times after inoculation will be different, and any adverse event comparisons across age groups will require some type of elapsed post-inoculation time normalization.

We examined VAERS-reported deaths by age group, normalized to:

- 1) the number of inoculations given
- 2) the period within seven days after inoculation.

This allows a credible comparison of very short-term adverse effects post-inoculation for all age groups. During this period, which is eight days post-inoculation (where day zero is the day of inoculation), sixty percent of all post-inoculation deaths are reported in VAERS.

Fig. 2 below shows the results circa late May 2021 [3]. The age band ranges are different from those in Fig. 1 because the CDC provides inoculation after-effect age bands differently from COVID-19 death age bands. In general, the inoculation deaths by age per inoculant roughly parallel the COVID-19 deaths by age per capita (the curve structures are very similar), with one exception: the 0–17 demographic. In the normalized COVID-19 death graph (Fig. 1), the deaths per capita in the 0–17 demographic are negligible, while in the normalized inoculant death graphs (Fig. 2) the normalized deaths are small, but not negligible. The members of the 65+ demographic, where the bulk of deaths are occurring in Figs. 1 and 2, have been receiving inoculations for five months, whereas the members of the youngest demographic have been receiving inoculations only for a few weeks. More time needs to pass

before more definitive conclusions can be drawn about the youngest demographic, and how its members are impacted adversely following the inoculations.

The high death rates from both COVID-19 and the inoculations in the 65+ demographic should not be surprising. In both cases, the immune system is challenged, and in both cases, a dysfunctional immune system characteristic of many elderly people with multiple comorbidities cannot respond adequately to the challenge.

### 3.1.1. Specific short-term adverse events reported in VAERS

The most comprehensive single evaluation of VAERS-reported adverse events (mainly for adult recipients of the COVID-19 “vaccines”) we have seen is a non-peer-reviewed collection of possible side effects by Dr. Ray Sahelian [35]. We recommend reading this short data-rich summary of the broad types of events reported already, in the context that these events are very short-term. Dr. Sahelian identifies five mechanisms he believes are responsible for most of these events, with research potentially uncovering other mechanisms. These five mechanisms include:

- 1 “An overreacting inflammatory response is known as systemic inflammatory response syndrome (SIRS). This SIRS reaction, perhaps a cytokine storm, can range from very mild to very severe. It can begin the very first day of the shot or begin days or weeks later as a delayed reaction.”
- 2 “Interaction of the spike proteins with ACE2 receptors on cell membranes. Such cells are found widely in the body including the skin, lungs, blood vessels, heart, mouth, gastrointestinal tract, kidneys, and brain.”
- 3 “Interaction of spike proteins with platelets and/or endothelial cells that line the inside of blood vessels. This can lead to clotting or bleeding (low number of circulating platelets in the bloodstream). Some of the clots, even if tiny, cause certain neurological symptoms if the blood supply to nerves is compromised.”
- 4 “Immediate or delayed release of histamine from mast cells and basophils (mast cell activation syndrome, MCAS).”
- 5 “Swelling of lymph nodes in various areas of the body could interfere with blood flow, put pressure on nerves causing pain, or compromise their proper function.”

These reactions can be classified as Hyperinflammation, Hypercoagulation, Allergy, and Neurological, and can contribute to many symptoms and diseases, as VAERS is showing.

An excellent review of acute and potential long-term pathologies resulting from the COVID-19 inoculations [36] showed potential relationships to blood disorders, neurodegenerative diseases and autoimmune diseases. This review discussed the relevance of prion-protein-related amino acid sequences within the spike protein.

### 3.1.2. Potential mid- and long-term events and serious illnesses for adults and children from past vaccines

A detailed description of potential mid- and long-term events and serious illnesses for adults and children from past vaccines is presented in Appendix C. Most of these events and illnesses are not predictable, and most, if not all, would be possible for the COVID-19 inoculations in the mid- and long-term for adults and children.

### 3.1.3. Potential short-, mid-, and long-term risks of mass COVID-19 inoculation for children

**3.1.3.1. Intrinsic inoculant toxicity.** Children are unique relative to COVID-19. They have negligible risks of serious effects from the disease, as shown in Fig. 1. Given that the COVID-19 inoculants were only tested for a few months, and mid-or long-term adverse effects are unknown, any mid- or long-term adverse events that emerge could impact children

adversely for decades.

We believe that mid-or long-term adverse effects are possible based on the recent emergence of evidence that would support the probability of mid-and long-term adverse effects from the COVID-19 inoculants, such as:

- 1) The spike protein itself can be a toxin/pathogenic protein:
- 2) S protein alone can damage vascular endothelial cells (ECs) by downregulating ACE2 and consequently inhibiting mitochondrial function [37].
- 3) it is concluded that ACE2 and endothelial damage is a central part of SARS-CoV2 pathology and may be induced by the spike protein alone [38].
- 4) the spike protein of SARS-CoV-1 (without the rest of the virus) reduces ACE2 expression, increases angiotensin II levels, exacerbates lung injury, and triggers cell signaling events that may promote pulmonary vascular remodeling and Pulmonary Arterial Hypertension (PAH) as well as possibly other cardiovascular complications [39].
- 5) the recombinant S protein alone elicits functional alterations in cardiac vascular pericytes (PCs) [40]. This was documented as:
- 6) increased migration
- 7) reduced ability to support EC network formation on Matrigel
- 8) secretion of pro-inflammatory molecules typically involved in the cytokine storm
- 9) production of pro-apoptotic factors responsible for EC death. Furthermore, the S protein stimulates the phosphorylation/activation of the extracellular signal-regulated kinase 1/2 (ERK1/2) through the CD147 receptor, but not ACE2, in cardiac PCs, the S protein may elicit vascular cell dysfunction, potentially amplifying, or perpetuating, the damage caused by the whole coronavirus [40].
- 10) “even in the absence of the angiotensin-converting enzyme 2 receptors, the S1 subunit from SARS-CoV-2 spike protein binding to neutral phospholipid membranes leads to their mechanical destabilization and permeabilization. A similar cytotoxic effect of the protein was seen in human lung epithelial cells.” [125].
- 11) The LNP layer encapsulating the mRNA of the inoculant is highly inflammatory in both intradermal and intranasal inoculation [41] and “Polyethylene glycol (PEG) is a cause of anaphylaxis to the Pfizer/BioNTech mRNA COVID-19 vaccine” [42]. “Humans are likely developing PEG antibodies because of exposure to everyday products containing PEG. Therefore, some of the immediate allergic responses observed with the first shot of mRNA-LNP vaccines might be related to pre-existing PEG antibodies. Since these vaccines often require a booster shot, anti-PEG antibody formation is expected after the first shot. Thus, the allergic events are likely to increase upon re-vaccination” [43].
- There is also the possibility that the components of the LNP shell could induce the ASIA Syndrome (auto-immune/inflammatory syndrome induced by adjuvants), as shown by studies on post-inoculation thyroid hyperactivity [44] and post-inoculation subacute thyroiditis [45].
- 12 The spike protein has been found in the plasma of post-inoculation individuals, implying that it could circulate to, and impact adversely, any part of the body [46].
- 13 The spike protein of SARS-CoV-2 crosses the blood-brain barrier in mice [47], and “the SARS-CoV-2 spike proteins trigger a pro-inflammatory response on brain endothelial cells that may contribute to an altered state of BBB function” [48].
- 14 The spike proteins manufactured in vivo by the present COVID-19 inoculations could potentially “precipitate the onset of autoimmunity in susceptible subgroups, and potentially exacerbate autoimmunity in subjects that have pre-existing autoimmune diseases”, based on the finding that anti-SARS-CoV-2 protein

antibodies cross-reacted with 28 of 55 diverse human tissue antigens [49].

- 15 “The biodistribution of ChaAdOx1 [Astra Zeneca’s recombinant adenovirus vaccine candidate against SARS-CoV-2] in mice confirmed the delivery of vaccine into the brain tissues [50]. The vaccine may therefore spur the brain cells to produce CoViD spike proteins that may lead to an immune response against brain cells, or it may spark a spike protein-induced thrombosis. This may explain the peculiar incidences of the fatal cerebral venous sinus thrombosis (CVST) observed with viral vector-based CoViD-19 vaccines” [51,52].

A complementary perspective to explain adenovirus-based vaccine-induced thrombocytopenia is that “transcription of wildtype and codon-optimized Spike open reading frames enables alternative splice events that lead to C-terminal truncated, soluble Spike protein variants. These soluble Spike variants may initiate severe side effects when binding to ACE2-expressing endothelial cells in blood vessels.” [100].

- 16 A Pfizer Confidential study performed in Japan showed that “modRNA encoding luciferase formulated in LNP comparable to BNT162b2” injected intramuscularly concentrated in many organs/tissues in addition to the injection site [53]. The main organs/sites identified were adrenal glands, liver, spleen, bone marrow, and ovaries. While damage to any of these organs/sites could be serious (if real for humans), adverse effects on the ovaries could be potentially catastrophic for women of child-bearing or pre-childbearing age.

The main objective of credible biodistribution studies (of inoculants for eventual human use) is to identify the spatio-temporal distribution of the actual inoculant in humans; i.e., how much of the final desired product (in this case, expressed protein antigen/spike protein) is produced in different human tissues and organs as a function of time. That’s not what was reported in the Pfizer Confidential study.

Rats were used for the *in vivo* studies; the relationship of their biodistribution to that of humans is unclear. They were injected in different locations (hindpaw/intramuscular); the relationship to human injections in the deltoid muscle is unclear. They were injected with “modRNA encoding luciferase formulated in LNP comparable to BNT162b2”; it is unclear why they weren’t injected with BNT162b2, it is unclear why spike protein expression wasn’t evaluated rather than LNP concentration, and it is unclear how well the biodistribution from the actual inoculant used in the experiments compares to the biodistribution from BNT162b2.

They were injected once per rat. Given that a second injection would not be in the same exact location as the first, and that the circulatory system might have changed due to clotting effects from the first injection and other potential vascular complications, it is unclear how the biodistribution change with the second injection would compare with the first. If a booster injection is given to counter variants, it is unclear how its biodistribution would be altered as a consequence of the preceding two injections.

Clotting will occur with the highest probability where the blood flow is reduced (and more time is available for LNP-endothelial cell interaction). It is unclear whether the clotting process would show *positive feedback* behaviour where the initial inoculation constricts the flow in low-velocity regions even further by enhanced clotting, and subsequent inoculations further amplify this reduced flow-enhanced clotting cycle.

The rats were injected under pristine conditions; how that compares with humans, who have been, are being, and will continue to be exposed to multiple toxic substances in combination, is open to question. We know these combinations can act synergistically to adversely impact myriad organs and tissues throughout the body [23]. We don’t know how these toxic exposures in humans affect the permeability of the blood/tissue barriers, and especially the ability of the injected material to diffuse into the bloodstream (and also the ability of the manufactured

spike proteins to diffuse from the bloodstream into the surrounding tissue).

Higher-level primates should have been used for these short-term experiments, to obtain a more realistic picture of the biodistribution of inoculant in human organs and tissues. In other words, these laboratory experiments may be just the tip of the iceberg of estimating the amount of inoculant that concentrates in critical organs and tissues of human beings.

The many studies referenced above indicate collectively that the mRNA-based COVID-19 inoculations (the most prolific inoculations used in the USA for COVID-19 so far) consist of (at least) two major toxins: the instructions for the spike protein (mRNA) and the mRNA-encapsulating synthetic fat LNP. The vaccine is injected into the deltoid muscle, at which time it contributes to inflammation at the injection site due in part to the LNP and potentially to anaphylaxis from the LNP PEG-2000 component. Some of the injected material stays at the injection site, where it combines with cells through endocytosis to express spike protein on the cell surface, stimulating the adaptive immune system to eventually produce antibodies to the spike protein [54].

The remainder of the injected material enters the lymphatic system and the bloodstream, and is distributed to tissues and organs throughout the body: e.g., “Drugs administered by the intramuscular (IM) route are deposited into vascular muscle tissue, which allows for rapid absorption into the circulation” [55]. The basis of this process is that the bulky muscles have good vascularity, and therefore the injected drug quickly reaches the systemic circulation and thereafter into the specific region of action, bypassing the first-pass metabolism [56]. The widespread distribution is greatly enhanced by the LNP PEG-2000 coating as follows: building from the success of PEGylating proteins to improve systemic circulation time and decrease immunogenicity [57]. PEG coatings on nanoparticles shield the surface from aggregation, opsonization, and phagocytosis, prolonging systemic circulation time. [57]. PEG coatings on nanoparticles have also been utilized for overcoming various biological barriers to efficient drug and gene delivery associated with other modes of administration. [57]

In the bloodstream, one possible outcome is that the LNPs coalesce with the endothelial cells on the inner lining of the blood vessels and transfer the mRNA to the cells through endocytosis. The endothelial cells would then express the spike protein on their surface. Platelets flowing by the spike protein express ACE2 receptors on their surface; therefore, one possible outcome would be activation of the platelets by the spike protein and initiation of clotting. Another possible outcome would be the modified endothelial cells being recognized by innate immune system cells as foreign. These immune killer cells would then destroy parts of the endothelium and weaken the blood-organ barriers. The LNPs would inflame the endothelium as well, both increasing barrier permeability and increasing the blood vessel diameter. This weakening of the blood-organ barriers would be superimposed on any inflammation due to the myriad toxic contributing factors operable [4]. The newly-formed cells with spike proteins would penetrate the blood-organ barriers and bind to tissue with expressed ACE2 receptors. Any LNPs that did not coalesce with the endothelial cells, but remained intact, could also pass through the permeable blood-organ barrier, and coalesce directly with the organ cells. This could lead to an attack by innate immune system cells, and be a precursor to autoimmunity [4].

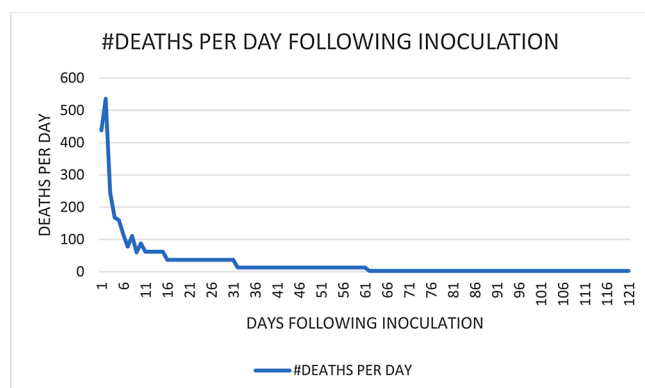

In the preceding discussion of the Pfizer biodistribution studies, the issue of multiple inoculations on changes in biodistribution was raised. Similarly, the alteration of effects as described above by multiple inoculations must be considered. Each inoculation will have positive aspects and negative aspects. The positive aspects are the formation of antibodies in the muscle cells and lymphatic system. The negative aspects include, but are not limited to, the potential clotting effects and permeability increases for that fraction of the inoculant that enters the bloodstream. The first inoculant dose can be viewed as priming the immune system. The immune response will be relatively modest. The second inoculant dose can be expected to elicit a more vigorous immune

**Table A1**

Expected deaths from non-COVID-19 causes for inoculees (Thousands).

Potential covid deaths/# non-covid expected	Mean time location/five months									
	0	%REP	1/3	%REP	1/2	%REP	2/3	%REP	1	%REP
0	723	0.5	482	0.74	362	0.98	242	1.47	4.77	75
.5	1085	0.33	723	0.5	543	0.66	363	0.98	7.14	50
1	1446	0.25	964	0.37	724	0.49	484	0.74	9.51	37

**Fig. A1.** Figure A1-1 is a plot of number of deaths from COVID-19 inoculation (reported to VAERS and obtained from the CDC search engine CDC Wonder) as a function of days from inoculation (zero reflects day of inoculation). If there were no effect from the inoculation, as claimed by the CDC and other official government agencies, the curve would be essentially a straight horizontal line, reflecting normal expected deaths in a non-COVID-19 year. The curve is stepped past the tenth day because the data after that point is provided in bands by CDC Wonder. The knee of the curve, which will denote the beginning of the transition of 1) deaths from inoculation to 2) deaths expected, appears somewhere in the range between day ten and day thirty.

**Table A2**

response. This will enhance the desired antibody production in the muscle cells and lymphatic system, but may also enhance the immune response to both the blood vessel-lining endothelial cells displaying the spike protein and the platelets, causing more severe damage. If a booster (s) inoculation is also required, this may further enhance both the positive and negative immune responses resulting from the second inoculation. While the positive effects are reversible (antibody levels decrease with time), adverse effects may be cumulative and irreversible, and therefore injury and death rates may increase with every additional inoculation [58].

These effects can occur throughout the body in the short term, as we are seeing with the VAERS results. They can occur in the mid- and long-term as well, due to the time required for destructive processes to have full effect and the administration of further inoculations. For example, micro-clots resulting from the inoculation that were insufficient to cause observable symptoms could in effect raise the baseline for thrombotic disease [92]. Lifestyle activities that contribute to enhanced blood clotting would have less distance to travel to produce observable symptoms, and thus the serious effects of clotting would have been accelerated [59,60]. As an example: the risk of venous thrombosis is approximately 2- to 4-fold increased after air travel [61]. How much this rate would increase after the inoculations, where microthrombi have formed in some recipients, is unknown. These potential baseline-raising effects could impact the interpretation of the VAERS results, as we show at the end of Appendix 1.

**3.1.3.2. Adverse inoculant effects on children.** What are the potential mid- and long-term adverse health effects from the COVID-19 inoculation on children specifically, taking into account that they will be exposed not only to the spike protein component of the SARS-CoV-2 virus but also to the toxic LNP encapsulating-shell? This toxic combination will have bypassed many defensive safeguards (typically provided by the innate immune system) through direct injection [62]. As we have shown, the main reasons why we believe the spike protein could be harmful to children even though they don't seem to get sick from exposure to SARS-CoV-2 are 1) the bypassing of the innate immune system by inoculation, 2) the larger volume of spike protein that enters the bloodstream, and 3) the additional toxic effects of the encapsulating LNP layer.

**3.1.3.2.1. Potential mid-term adverse health effects.** Examination of the myriad post-COVID-19 inoculation symptoms/biomarker changes for the 0–17 age demographic reported to VAERS circa mid-June 2021 provides some indication of very early damage [84]. Main regions/systems affected adversely (VAERS symptoms/biomarkers shown in parentheses) include:

- Cardiovascular (blood creatine phosphokinase increased, cardiac imaging procedure abnormal, echocardiogram abnormal, electrocardiogram abnormal, heart rate increased, myocarditis, palpitations, pericarditis, tachycardia, troponin I increased, troponin increased, fibrin D-Dimer increased, platelet count decreased, blood pressure increased, bradycardia, brain natriuretic peptide increased, ejection fraction decreased, migraine)
- Gastrointestinal (abdominal pain, diarrhoea, vomiting, alanine aminotransferase increased, aspartate aminotransferase increased.)
- Neural (gait disturbance, mobility decreased, muscle spasms, muscle twitching, seizure, tremor, Bell's Palsy, dyskinesia)

- Immune (C-Reactive Protein increased, red blood cell sedimentation rate increased, white blood cell counts increased, inflammation, anaphylactic reaction, pruritis, rash, lymphadenopathy)
- Endocrine (heavy menstrual bleeding, menstrual disorder)

In addition, there were large numbers of different vision and breathing problems reported.

All the major systems of the body are impacted, and many of the major organs as well. Given the lag times in entering data into VAERS and the fact that inoculations of children started fairly recently, we would expect the emphasis to be immediate symptomatic and biomarker reactions. More time is required for organ and system damage to develop and emerge. Cardiovascular problems dominate, as our model for spike protein/LNP circulation and damage predicts, and it is unknown how reversible such problems are. Many of the VAERS symptoms listed above were also found in COVID-19 adult patients [64].

Consider the example of Multisystem Inflammatory Syndrome in Children (MIS-C). It has emerged in VAERS with modest frequency so far, and it also occurred about a month after COVID-19 infection [65]. In both cases, the presence of the spike protein was a common feature. Many of its characteristic symptoms are those listed above from VAERS. MIS-C has similarities with known disease entities like Kawasaki Disease (KD), toxic shock syndrome (TSS) and macrophage activation syndrome (MAS)/secondary hemophagocytic lymphohistiocytosis (HLH) [66]. One presentation of MIS-C is in adolescents with a high disease burden as evidenced by more organ systems involved, almost universally including cardiac and gastrointestinal systems, and with a higher incidence of shock, lymphopenia, and elevated cardiac biomarkers indicating myocarditis [67]. Since the first reports of children developing MIS-C, it was evident that others presented with some of the classic symptoms of the well-recognized childhood illness KD [68]. Further, despite KD being ordinarily incredibly rare in adults, patients with MIS-A have also been reported with KD-like features. [68] Thus, an examination of the adverse effects from COVID-19 as evidenced through these diseases might shed some light on what can be expected further down the line from the inoculations.

The following section addresses Kawasaki disease (KD) and Multisystem Inflammatory Syndrome in Children (MIS-C) [65].

KD is an acute vasculitis and inflammation that predominantly affects the coronary arteries and can cause coronary artery aneurysms. Other KD manifestations include systemic inflammation of arteries, organs, and tissues, with consequent hepatitis and abdominal pain; lung interstitial pneumonitis, aseptic meningitis due to brain membrane inflammations; myocarditis, pericarditis, and valvulitis; urinary tract pyuria, pancreatitis; and lymph-node enlargement [69]. In general, although almost all children fully recover, some of them later develop coronary artery dilation or aneurysm [70]. Etiologically and pathologically, numerous studies indicate that KD is triggered by an abnormal autoimmune response caused by an infection [71]. The infection hypothesis is supported by epidemiology data showing that an infectious disease is involved at least as a starting point. Previously proposed infectious agents include Herpesviridae, retroviruses, Parvovirus B19, bocavirus, and bacterial infections such as staphylococci, streptococci, Bartonella, and Yersinia infections [72].

SARS-CoV-2 adds to these infectious agents by eliciting autoantibodies likely via molecular mimicry and cross-reactivity with autoantigens [72,73].

Then, the formation of antigen–antibody immune complexes can lead to KD symptoms via activation of the receptors of mast cells, neutrophils, and macrophages with consequent release of pro-inflammatory cytokines and increase of blood vessel permeability; activation of the complement system, stimulation of neutrophils and macrophages to secrete proteases and more proinflammatory cytokines [74], thus merging into the “cytokine storm” that characterizes MIS-C [75]. Indeed, features of KD are raised levels of Interleukin (IL)-6, IL-8, IL-15, and IL-17, with the cytokine level predicting coronary aneurysm

formation in KD patients [76,77]

**3.1.3.2.2. Potential long-term adverse health effects.** In the long-term, SARS-CoV-2-induced KD vasculitis can lead to severe pathologies. Vasculitis has a predilection for coronary arteries with a high complication rate across the lifespan for those with medium to large coronary artery aneurysms [78]. The cytokine-induced inflammation produces endothelial dysfunction and damage to the vascular wall, leading to aneurysmal dilatation. Successively, vascular remodeling can also occur, but this does not imply resolution of the disease or reduction of risk for future complications. A rigorous follow-up to detect progressive stenosis, thrombosis and luminal occlusion that may lead to myocardial ischemia and infarction becomes mandatory [78]. Of equal importance, among other long-term outcomes, children with KD may have increased risks not only for ischemic heart disease, but also for autoimmune disorders, cancer as well as an increased all-cause mortality [71].

Additional questions regarding mass inoculation of children and adolescents include:

- a) Do children, being asymptomatic carriers of SARS-CoV-2, transmit the virus?
- b) Do recently vaccinated people, infected with SARS-CoV-2, transmit the virus?

There is evidence of children transmitting SARS-CoV-2 in community settings, but the existing literature is heterogeneous with regards to the relative rate at which they do so compared to adults [79].

Studies from South Korea and Thailand found a very limited number of secondary cases [80,81]. On the contrary, a large contact tracing study from India concluded that the highest probability of transmission was between case-contact pairs of similar age and that this pattern of enhanced transmission risk was highest among children 0–4 years of age as well as adults 65 years of age and older [80].

With regard to the second question, it was shown that household members of healthcare workers inoculated with a single dose of either Pfizer or Astra Zeneca COVID-19 inoculant were at significantly reduced risk of PCR-confirmed SARS-CoV-2 infection but at non-statistically significant reduced risk of hospitalization, compared to household members of uninoculated healthcare workers, fourteen days after inoculation [82]. This finding again underlines the association of severe disease to the characteristics of the infected person and not directly to the transmission, implying that the elderly should be inoculated and not the children.

### 3.2. Novel best-case scenario cost-benefit analysis of COVID-19 inoculations for most vulnerable

Traditional cost-benefit analyses are typically financial tools used to estimate the potential value of a proposed project. They involve generating cost streams over time, benefit streams over time, and then comparing the net present value of these two streams (including risk) to see whether the risk-adjusted discounted benefits outweigh the risk-adjusted discounted costs. Appendix D presents a detailed non-traditional *best-case scenario* pseudo-cost-benefit analysis of inoculating people in the 65+ demographic in the USA. In this incarnation of a cost-benefit analysis, the costs are the number of deaths resulting from the inoculations, and the benefits are the lives saved by the inoculations. The time range used was from December 2019 to end-of-May 2021. No discounting was done; an inoculation-based death occurring immediately post-inoculation was given the same importance/weighting as an inoculation-based death months after inoculation.

Why was this non-traditional approach selected for a cost-benefit analysis? In a traditional non-financial cost-benefit analysis relative to inoculations, the adverse events prevented by the inoculations would be compared with the adverse events resulting from the inoculations. Presently, in the USA, definitions, test criteria, and reporting incentives

for COVID-19 and its inoculants have shifted over time, and we believe a standard approach could not be performed credibly. Appendix Da presents some of the problems with the COVID-19 diagnostic criteria on which the above statements are based.

In contrast to the pandemic buildup phase, where many who died *with* COVID-19 were assumed to have died *from* COVID-19 by the medical community and the CDC, the post-inoculation deaths reported in VAERS are assumed by the CDC to be mostly from causes other than the inoculations. We wanted to use a modified cost-benefit analysis that would have less dependence on arbitrary criteria and subjective judgments.

The approach selected can be viewed as a *best-case scenario* pseudo-cost-benefit analysis. We assume the inoculations prevent *all* the deaths *truly* attributable to COVID-19 (these are the total deaths attributed to COVID-19 officially minus 1) the number of false positives resulting from the PCR tests run at very high amplification cycles and 2) the number of deaths that could have been attributed to one of the many comorbidities that were typical of those who succumbed, as shown in our results section) over the period December 2019 to end-of-May 2021, and relate that number to the deaths *truly* attributable to the inoculation (from January 2021 to end-of-May 2021) based on our computations in the results section. The results show *conservatively* that there are five times the number of deaths *truly* attributable to each inoculation vs those *truly* attributable to COVID-19 in the 65+ demographic. As age decreases, and the risk for COVID-19 decreases, the cost-benefit increases. Thus, if the best-case scenario looks *poor* for benefits from the inoculations, any realistic scenario will look *very poor*. For children the chances of death from COVID-19 are negligible, but the chances of serious damage over their lifetime from the toxic inoculations are not negligible.

#### 4. Discussion

Two issues arise from these results.

First, where is the data justifying inoculation for children, much less most people under forty? It's not found on Fig. 1, where the most vulnerable are almost exclusively the elderly with many comorbidities [83]. Yet, in the USA, Pfizer has been approved to inoculate children 12–17, and the goal is to accomplish this by the start of the school year in the Fall. As stated previously, there are plans to inoculate children as young as six months starting before the end of 2021.

What is the rush for a group at essentially zero risks? Given that the inoculations were tested only for a few months, only very short-term adverse effects could be obtained. It is questionable how well even these short-term effects obtained from the clinical trials reflect the short-term effects from the initial mass inoculation results reported in VAERS.

Figs. 1 and 2 reflect only these very short-term results. A number of researchers have suggested the possibility of severe longer-term autoimmune, Antibody-Dependent Enhancement, neurological, and other potentially serious effects, with lag periods ranging from months to years. If such effects do turn out to be real, the children are the ones who will have to bear the brunt of the suffering. There appear to be no benefits for the children and young adults from the inoculations and only Costs!

The second issue is why the deaths shown on Fig. 2 were not predicted by the clinical trials. We examined the Pfizer trial results (based on a few months of testing) and did not see how (potentially) hundreds of thousands of deaths could have been predicted from the trials' mortality results. Why this gap?

As we showed in the clinical trials section, 17.4 % of the Pfizer sample members were over 65, and 4.4 % were over 75. When the later phases of the trials started in late July 2020, the managers knew the COVID-19 age demographics affected from the July 2020 analog of Fig. 1. Rather than sampling from the age region most affected, they sampled mainly from the age region least affected! And even in the very limited sampling from the oldest groups, it is unclear whether they

selected from those with the most serious comorbidities. Our impression is that the sickest were excluded from the trials, but were first in line for the inoculants.

It is becoming clear that the central ingredient of the injection, the recipe for the spike protein, will produce a product that can have three effects. Two of the three occur with the production of antibodies to the spike protein. These antibodies could allegedly offer protection against the virus (although with all the "breakthrough" cases reported, that is questionable), or could suppress serious symptoms to some extent. They could also cross-react with human tissue antigen, leading to potential autoimmune effects. The third occurs when the injected material enters the bloodstream and circulates widely, which is enabled by the highly vascular injection site and the use of the PEG-2000 coating.

This allows spike protein to be manufactured/expressed in endothelial cells at any location in the body, both activating platelets to cause clotting and causing vascular damage. It is difficult to believe this effect is unknown to the manufacturer, and in any case, has been demonstrated in myriad locations in the body using VAERS data. There appears to be modest benefit from the inoculations to the elderly population most at risk, no benefit to the younger population not at risk, and much potential for harm from the inoculations to both populations. It is unclear why this mass inoculation for all groups is being done, being allowed, and being promoted.

#### 5. Overall conclusions

The people with myriad comorbidities in the age range where most deaths with COVID-19 occurred were in very poor health. Their deaths did not seem to increase all-cause mortality as shown in several studies. If they hadn't died with COVID-19, they probably would have died from the flu or many of the other comorbidities they had. We can't say for sure that many/most died from COVID-19 because of: 1) how the PCR tests were manipulated to give copious false positives and 2) how deaths were arbitrarily attributed to COVID-19 in the presence of myriad comorbidities.

The graphs presented in this paper indicate that the frail injection recipients receive minimal benefit from the inoculation. Their basic problem is a dysfunctional immune system, resulting in part or in whole from a lifetime of toxic exposures and toxic behaviors. They are susceptible to either the wild virus triggering the dysfunctional immune system into over-reacting or under-reacting, leading to poor outcomes or the injection doing the same.

This can be illustrated by the following analogy. A person stands in a bare metal enclosure. What happens when the person lights a match and drops it on the floor depends on what is on the floor. If the floor remains bare metal, the match burns for a few seconds until extinguished. If there is a sheet of paper on the floor under the match, the match and the paper will burn for a short time until both are extinguished. If, however, the floor is covered with ammonium nitrate and similar combustible/explosive materials, a major explosion will result! For COVID-19, the wild virus is the match. The combustible materials are the toxic exposures and toxic behaviors. If there are no biomarker 'footprints' from toxic exposures and toxic behaviors, nothing happens. If there are significant biomarker 'footprints' from toxic exposures and toxic behaviors, bad outcomes result.

Adequate safety testing of the COVID-19 inoculations would have provided a distribution of the outcomes to be expected from 'lighting the match'. Since adequate testing was not performed, we have no idea how many combustible materials are on the floor, and what the expected outcomes will be from 'lighting the match'.

The injection goes two steps further than the wild virus because 1) it contains the instructions for making the spike protein, which several experiments are showing can cause vascular and other forms of damage, and 2) it bypasses many front-line defenses of the innate immune system to enter the bloodstream directly in part. Unlike the virus example, the injection ensures there will always be some combustible materials on the

floor, even if there are no other toxic exposures or behaviors. In other words, the spike protein and the surrounding LNP are toxins with the potential to cause myriad short-, mid-, and long-term adverse health effects even in the absence of other contributing factors! Where and when these effects occur will depend on the biodistribution of the injected material. Pfizer's own biodistribution studies have shown the injected material can be found in myriad critical organs throughout the body, leading to the possibility of multi-organ failure. And these studies were from a single injection. Multiple injections and booster shots may have cumulative effects on organ distributions of inoculant!

The COVID-19 reported deaths are people who died **with** COVID-19, not necessarily **from** COVID-19. Likewise, the VAERS deaths are people who have died **following** inoculation, not necessarily **from** inoculation.

As stated before, CDC showed that 94 % of the reported deaths had multiple comorbidities, thereby reducing the CDC's numbers attributed strictly to COVID-19 to about 35,000 for all age groups. Given the number of high false positives from the high amplification cycle PCR tests, and the willingness of healthcare professionals to attribute death to COVID-19 in the absence of tests or sometimes even with negative PCR tests, this 35,000 number is probably highly inflated as well.

On the latter issue, both Virginia Stoner [85] and Jessica Rose [86] have shown independently that the deaths **following** inoculation are not coincidental and are **strongly related to** inoculation through strong clustering around the time of injection. Our independent analyses of the VAERS database reported in Appendix 1 confirmed these clustering findings.

Additionally, VAERS historically has under-reported adverse events by about two orders-of-magnitude, so COVID-19 inoculation deaths **in the short-term** could be in the hundreds of thousands for the USA for the period mid-December 2020 to the end of May 2021, potentially swamping the *real* COVID-19 deaths. Finally, the VAERS deaths reported so far are for the very short term. We have no idea what the death numbers will be in the intermediate and long-term; the clinical trials did not test for those.

The clinical trials used a non-representative younger and healthier sample to get EUA for the injection. Following EUA, the mass inoculations were administered to the very sick (and first responders) initially, and many died quite rapidly. However, because the elderly

who died following COVID-19 inoculation were very frail with multiple comorbidities, their deaths could easily be attributed to causes other than the injection (as should have been the case for COVID-19 deaths as well).

Now the objective is the inoculation of the total USA population. Since many of these potential serious adverse effects have built-in lag times of at least six months or more, we won't know what they are until most of the population has been inoculated, and corrective action may be too late.

## Appendix A

### EXPECTED DEATHS IN 65+ DEMOGRAPHIC VS COVID-19 INOCULATION DEATHS

The goal of this appendix is to estimate the number of actual deaths from the COVID-19 inoculation based on the number of deaths following inoculation reported in VAERS [93,94,101]. The approach used will:

- 1) identify the number of deaths following COVID-19 inoculation that would have been **expected** without COVID-19 inoculation (i.e., pre-COVID-19 death statistics);
- 2) relate the VAERS **expected** death data to the actual number of deaths **expected** based on historical death statistics; and
- 3) apply this ratio to scale-up the deaths attributed to COVID-19 inoculation reported in VAERS to arrive at actual deaths attributable to COVID-19 inoculation.

For example, if ten deaths could be shown in VAERS to reflect expected pre-COVID-19 deaths, and the actual number of expected pre-COVID-19 deaths from historical data was 100, the scaling factor of deaths would be ten to translate VAERS-reported deaths to actual deaths. Then, the deaths reported in VAERS that can be attributed to the COVID-19 inoculation will be multiplied by the expected deaths scaling factor, ten, to arrive at the actual number of deaths resulting from the COVID-19 inoculation. Thus, if VAERS shows fifty deaths that can be attributed to the COVID-19 inoculation, then the actual number of deaths attributed to COVID-19 will be 500 with these assumptions [3].

The basis for our approach is the following statement from the USA Federal government: "Healthcare providers are required to report to VAERS the following adverse events after COVID-19 vaccination [33] and other adverse events if later revised by FDA" [96,102,103]. "Serious AEs regardless of causality.", including death [3,95].

If there had been full compliance with this requirement in VAERS, then the VAERS-reported deaths would have equaled the sum of

- 1) actual expected deaths (based on past statistics)

2) actual deaths over and above expected deaths that could be attributed to the COVID-19 inoculations.

Based on this requirement, we will generate a rough estimate (in the simplest form possible) of the number of deaths that would have occurred in the 65+ demographic if there had been no COVID-19 “pandemic”. Then, we will relate this number to the number of deaths reported to VAERS following COVID-19 inoculations in the 65+ demographic. This would provide a “floor” for estimating the fraction of actual deaths reported to VAERS. This will be followed by parameterizing potential deaths attributable to the COVID-19 inoculations and displaying the effects on ratio of reported deaths to actual deaths. We will perform a global analysis and a local analysis, to see whether major or minor differences occur. The local analysis (Section A1-a2) may be somewhat easier to comprehend than the global analysis, but both come to similar conclusions.

#### A1-a Deaths Following COVID-19 Inoculations Reported to VAERS Compared to Expected Deaths

##### A1-a . Problems with VAERS

Before we discuss numbers of adverse events reported by VAERS, we need to identify potential shortcomings of, and problems with, VAERS, so these numbers of adverse events can be understood in their proper context. As stated previously, VAERS is a passive surveillance system managed jointly by the CDC and FDA, and historically has been shown to report about 1% of actual vaccine/inoculation adverse events (confirmed by the first principles analysis that follows in this appendix). There is no evidence that even the 1% reported have been selected randomly.

Some of this gross underreporting of adverse events reflects a major conflict-of-interest of CDC with respect to VAERS. CDC provides funding for administration of many vaccines, including the COVID-19 inoculations. Prior to COVID-19, the CDC provided about five billion dollars annually to the Vaccines for Children Program alone [102].

For COVID-19, the CDC has received many billions of dollars in supplemental funding for myriad activities, including vaccine distribution. It is difficult to separate out the CDC funding available for vaccine distribution from other CDC COVID-19 related activities, but one budget item (of many) should illustrate the magnitude of the effort: “Coronavirus Response and Relief Supplemental Appropriations Act, 2021 (P.L. 116–260): P.L. 116–260 provided \$8.75 billion to CDC to plan, prepare for, promote, distribute, administer, monitor, and track coronavirus vaccines to ensure broad-based distribution, access, and vaccine coverage.” [3]. Low reporting rates of actual adverse events in VAERS should not be surprising, since the same organization that receives multi-billions of dollars in funding annually for promoting and administering vaccines also has responsibility for monitoring the safety of these products (whose liability has been waived).

In addition, the 1% reporting rates came from a thirty-day tracking study [22], and therefore are strictly applicable to *very near-term* adverse events. For mid-term and especially long-term events, the reporting rates would be much lower, since the links between inoculation and adverse events would be less obvious. That doesn’t mean these non-very-short-term adverse events don’t exist; it just means they haven’t been tracked. Absence of evidence is not evidence of absence. Thus, the VAERS numbers should be viewed as a very low “floor” of the numbers and types of adverse events from COVID-19 inoculations that exist in the real-world.

##### A1-a2 Global analysis

We used 2019 death statistics from CDC to start the analysis. According to search results from CDC Wonder [104] obtained 11 June 2021, there were 2,117,332 deaths from all causes for people aged 65+ in the United States in 2019. Assuming uniformity throughout the year, there would have been 882,000 deaths occurring the first five months of the year, and that number will be used as the expected deaths for the first five months of 2021. From the same source, the population estimate is 54,000,000 for the 65+ age range. From CDC COVID-19 data tracker, the number of people 65+ vaccinated with at least one dose is 44,000,000 [24].

For those who were inoculated somewhere in the time frame 1 January 2021 to 31 May 2021, the number who would have been expected to die in the period from inoculation to 31 May will be a function of the duration of this period. For example, if all 44,000,000 people had been fully inoculated on 1 January 2021, then the number expected to die post-inoculation from non-COVID-19 inoculation causes would be simply  $(44,000,000 / 54,000,000) \times 882,000$ , or 723,000 deaths. Conversely, if all 44,000,000 people had been fully inoculated on 31 May 2021, then the number expected to die post-inoculation from non-COVID-19 inoculation causes would be extremely small [24].

For an accurate estimation of the number expected to die post-inoculation from non-COVID-19 causes, one would need to integrate the time between inoculation and 31 May over the inoculation temporal distribution function. For present purposes, we will do a very rough approximation by modeling the inoculation distribution function as a delta function occurring at a mean temporal location. In other words, we compress all inoculations an individual receives into one, identify the mean temporal location from the actual inoculation distribution function, and compute the expected deaths based on the distance from 31 May to the temporal mean point.

From a graph of inoculation trends in the CDC data tracker [101] the distribution appears to be non-symmetrical pyramidal, rising to a peak in mid-April. This is slightly over the 2/3 point in the five-month range of interest. We will approximate the mean time point as 2/3 of the distance.

Table A1 displays the mean time normalized to the five-month study window vs potential deaths from COVID-19 inoculation (not expected from prior census data) normalized to the deaths expected from prior census data. Each cell represents the percent of deaths reported in VAERS following inoculation relative to total deaths (number of deaths expected from prior census data plus number of deaths following COVID-19 inoculation not contained in the expected death group). The model on which the table is based is as follows: there are two classes of deaths for the period following COVID-19 inoculation. One is the deaths expected from prior census data, and the other is deaths attributable mainly to COVID-19 inoculation. There would be potentially substantial overlap between the two in this age group (and perhaps other age groups as well). We assume that we can tag those individuals who would be expected to die based on prior census data. The remaining deaths attributable to COVID-19 inoculation not contained within the tagged group are classified as potential COVID deaths in Table A1.

Consider the cell (2/3,0). The mean time is about mid-April 2021 and the only deaths occurring are those expected (some may have died because of the inoculation, but they were sufficiently ill that they would have died during that period without the inoculation). There were 723,000 expected deaths and 3560 reported, yielding a ratio of deaths reported in VAERS to actual deaths of ½%.

Consider the cell (1/2,1). The mean time would have been about mid-March 2021 and the inoculation distribution would have resembled an isosceles triangle. The total deaths occurring are those expected and an equal number whose deaths were attributed to COVID-19 inoculation but did not overlap with those in the tagged expected group (there still could have been some/many in the latter group that may have died because of the

inoculation, but they were sufficiently ill that they would have died during that period without the inoculation). There were 724,000 total deaths that occurred during that period and 3560 reported, yielding a ratio of deaths reported in VAERS to actual deaths of  $\frac{1}{200}$ . [3]

So, according to Table A1, focusing on the parameter most closely reflecting the actual inoculation distribution (2/3), the reporting percentages of actual to total are about 1%. This mirrors the Harvard Pilgrim study results (referenced in our vaccine safety study) which were obtained through an entirely different empirical approach [4]. At least for deaths reporting, there appears to be an approximately two order of magnitude difference between actual and reported deaths in VAERS.

Table A1 used two parameters to examine a broad spectrum of possible results, the mean time and the number of deaths solely attributable to COVID-19 inoculation. The mean time parameter was fairly well known and constrained in interpretation, because it was based on an empirical inoculation distribution function. The number of deaths solely attributable to COVID-19 inoculation is completely unknown.

As will be shown in the next section, the numbers of deaths reported in VAERS are strongly related to the inoculation date by clustering, but those who died might also have been those who would have died anyway because they were expected to die. There were probably some of each in that group reported. But we have no idea of the total number whose death could be directly attributed to COVID-19 inoculation and who were not in the group expected to die. For all we know, there could have been ten million people in that group, and only an extremely small fraction of that total group was reported in VAERS.

Suppose, for example, that the actual number of deaths reported in VAERS came from two groups: 90 % were from the inoculation-attributable death group and 10 % were from the expected death group. Assume there is no overlap between the two groups. In that case, what VAERS shows is not that 1% of actual expected deaths were reported, but rather that 1/10 of one percent of the expected deaths were reported. If that metric is used as the standard to scale up to total deaths, then the number in the actual inoculation-attributable death group is not 100 times the VAERS reported deaths, but rather 1000 times the VAERS-reported deaths! The point is we can't "reverse-engineer" the reported VAERS death numbers to get the actual inoculation-attributable deaths because it depends on the unknown contribution of each of the two groups (expected deaths and inoculation-attributable deaths) to the VAERS reported deaths, and we can't separate those out.

All this analysis shows is that, at best, only about 1% of the number expected to die was reported, and because the number reported in VAERS included deaths from both groups, the fraction from each actual group of deaths could not be determined. Realistically, we may have to wait until mid-2022, when the 2021 total deaths for each age group are finalized, to ascertain whether we can see increases in all-cause mortality that could have come from the inoculation-attributable deaths.

### A1-a3 Local Analysis

Another way of estimating VAERS reporting efficiency is to perform a local analysis, focused on clustering about date of COVID-19 inoculation. For the 65+ demographic, the post-inoculation deaths cluster near the vaccination date, providing evidence of a **strong link to the inoculation**.

Following the approach in the first section of this appendix, we calculate the deaths expected in any ten-day period based on 2019 pre-COVID-19 death statistics. For the inoculated group, the number of deaths expected for any ten-day period are (2,117, 332 deaths/per year)  $\times$  (44,000,000/54,000,000 fraction of population in age range inoculated)  $\times$  (10/365 fraction of year), or 47,270 deaths.

---

#### BEST-CASE SCENARIO

Consider the ten days following inoculation (including day of inoculation). Approximately 2,000 deaths were reported in VAERS. Assume hypothetically that all these deaths were in the expected category; this can be viewed as a *best-case scenario*. In this *best-case scenario*, where the concentration of deaths is the highest and is normalized to the expected number of non-COVID-19 inoculation deaths (excluding deaths due solely to COVID-19 inoculation), 2,000/47,270 % of actual deaths (inoculation-related or not), or 4.23%, are reported in VAERS. Thus, at best, VAERS is underreporting by a factor of 20.

---

Suppose in that ten-day interval there had been 10,000 deaths that could be directly attributed to COVID-19 inoculation in addition to the expected deaths. This would have given a ratio of 2,000/57,270 actual total deaths, or 3.5 % reported in VAERS. This latter approach requires less assumptions than the former approach, but still yields results of only a few percent actual deaths reported in VAERS.

The Harvard Pilgrim electronic tracking study of post-vaccination events reported to VAERS performed in 2010 [4] showed a 1 % reporting rate for a thirty-day period. In the present case, 2900 post-inoculation deaths were reported to VAERS within thirty days of inoculation, or 82 % of total deaths for the 65+ demographic. Substituting thirty days for ten in the above computation yields 141,810 expected non-COVID-19 post-inoculation deaths for the thirty-day period, or 2% that are reported in VAERS. The Harvard study used an electronic system that automatically tracked every event that occurred, no matter how small. Because of the effort (time and cost) required to submit event reports to VAERS, we suspect that only the more serious events, such as death, would be reported, and even in this case, the numbers reported are miniscule.

We also did an analysis for sixty days post-inoculation. In the present case, 3300 post-inoculation deaths were reported to VAERS within sixty days of inoculation, or 93 % of total deaths for the 65+ demographic. Substituting sixty days for ten in the above computation yields 283620 expected non-COVID-19 post-inoculation deaths for the thirty-day period, or 1.2 % that are reported in VAERS. Remember, this normalization is based only on expected deaths. If 100,000 deaths attributable mainly to the COVID-19 inoculation beyond those that overlapped with the expected group occurred during this period, then the denominator would have to be increased by 100,000, yielding a VAERS reporting rate of 0.86 %.

Thus, both the global and local analyses, and the Harvard Pilgrim empirical analysis, are converging on the same two orders-of-magnitude difference between the actual number of deaths that occurred in the USA and those reported in VAERS. Depending on how many people have really died as a result of the COVID-19 inoculation, this reporting rate could well be a fraction of a percent!

### A1-a3a Local Clustering Analysis

We end this appendix with one more example from the local analysis. Some background perspective is required. In the buildup to the pandemic (putting aside the issue of high false positives from PCR tests run at high numbers of amplification cycles), almost anyone who died **with** COVID-19 was assumed to have died **from** COVID-19, irrespective of the number of potentially lethal comorbidities they had. The CDC admitted later that about

94 % of the deaths attributed to COVID-19 would ordinarily have been attributed to one of the comorbidities.

For this example, we adopt a similar philosophy for the COVID-19 inoculations. People in the 65+ demographic who have died following inoculation are divided into two groups: those who died **from** the inoculation and those who died as **expected** based on pre-COVID-19 death data. The two groups range from being entirely separate to completely overlapping. We will examine two cases: entirely separate and completely overlapping.

How are the members of each group determined? The death **from** inoculation group consists of those whose deaths cluster significantly around the date of inoculation. The deaths expected group are the number who would have died in the absence of COVID-19. We allow for overlap, where each person who died can be double-valued (a member of both groups), but not double-counted.

To obtain a relatively precise estimate of expected deaths, we would want to select a region of time where the distribution function has substantially leveled off. From Fig. A1, the thirty-sixty-day range appears reasonable. However, there is a time issue here. Given the lag time in data reported by VAERS, most of the data in this range will probably have come from inoculations in January and February, and early-mid March, approximately 35 percent of the total inoculations. Therefore, we could multiply the thirty-sixty-day average number of deaths by 3 to obtain 40 expected deaths per day. An even simpler way to estimate the expected deaths reported in VAERS is to use the 15–30-day average shown, which will represent most of the range. This value is 37, which is close to the 40 obtained with the above approximation. This analysis should be re-run in three-four months, when more of the long-range data has been filled in.

Table A2 shows the results of our analysis. As stated previously, two separate cases were analyzed: completely separate groups and completely overlapping groups. Two values of daily expected deaths were used: the 37 as described above, and 20 to account for potentially lower expected death reporting when the VAERS data has filled in more completely.

Thus, based on the deaths reported in VAERS following COVID-19 inoculation, and assuming the inoculation-related deaths are reported in the same ratio as expected deaths, the actual number of deaths strongly related to the COVID-19 inoculation should be scaled up by factors of 100–200. For the broadest definition of VAERS coverage provided by CDC Wonder, which includes the USA and all territories, protectorates, and possessions, the total deaths following COVID-19 were 5200 in early June 2021. Using our scaling factors, this translates into somewhere between one-half million and one-million deaths, and this has not taken into account the lag times associated with entering data into VAERS. Compared with the 28,000 deaths the CDC stated were due to COVID-19 and not associated morbidities for the 65+ age range, the **inoculation-based deaths are an order-of-magnitude greater than the COVID-19 deaths!** It should be remembered these are only the **very-short-term inoculation-based deaths**, and could increase dramatically if mid- and long-term adverse effects come to fruition.

We end this appendix with an even more unsettling possibility. The main assumption upon which the results in Table A2 were based is that the post-inoculation temporal distribution function shown in Fig. A1 could be divided into two regions. The strongly varying region originating from the inoculation date reflected deaths from the inoculation, and the essentially flat region that followed reflected expected deaths (that flat region also started at the inoculation date, and formed the base on which the highly varying region is positioned). This model excludes the possibility that deaths from the inoculation extend well beyond the limits of the highly varying region.

We know in general this is not true. There can be lag effects such as ADE in the Fall viral season, and longer-term effects such as autoimmune diseases. We postulate that there are other effects from the inoculation that could result in the same flat death profile as that for expected deaths.

Consider the following. Some of the damage we have seen following the inoculations in VAERS includes coagulation/clotting effects and neurological effects of all types [63]. If these effects are not lethal initially, they raise the level of dysfunction. Thus, platelet aggregation has increased to a new base level, and micro-clots have raised the probability of serious clots forming from other lifestyle factors [105]. Death of specific neurons can increase the risk of Alzheimer's disease or Parkinson's disease, and can accelerate the onset of these and many other diseases. Thus, the adverse impacts of the COVID-19 inoculations could be viewed as raising the level of expected deaths in the future. Any deaths of this nature reported in VAERS would need to be viewed as inoculation-driven, and the expected deaths used in the computations would be reduced accordingly.

Consider Table A3 below. The “expected deaths reported” have been reduced below their counterparts in Table A2 to illustrate parametrically how the total inoculation-based deaths would change from VAERS reporting if this baseline effect is operable. While Table A2 used values of 37 and 20 for expected deaths, Table A3 uses values of 10 and 15.

Thus, if the baseline of the host for coagulation/clotting, inflammation, hypoxia, neurodegeneration, etc., has been raised by the inoculations, translating into an increase in expected deaths and accelerated deaths, then it is entirely plausible that the VAERS death numbers reflect over a million deaths from COVID-19 inoculations so far. These are very short-term-effects only, and time will tell whether the large potential waves of ADE-driven deaths and autoimmune-driven deaths come to pass.

## Appendix B

### DETAILED ANALYSIS OF MAJOR COVID-19 INOCULANT CLINICAL TRIALS

#### A2-a Clinical Trials in the Mainly Adult Population

**Definitions.** *Efficacy* is the degree to which a vaccine prevents disease, and possibly also transmission, under ideal and controlled circumstances – comparing a vaccinated group with a placebo group [106].

*Effectiveness* refers to how well a vaccine performs in the real world [107]

*Relative Risk (RR)* is computed by dividing the percentage of patients that contracted disease in the vaccine arm by the percentage of patients that contracted disease in the placebo arm.

*Relative Risk Reduction (RRR)* is computed by subtracting the RR from 1.

*Absolute Risk Reduction (ARR)* is computed by subtracting the percentage that contracted disease in the vaccine arm from the percentage that contracted disease in the placebo arm.

*Absolute Risk* = probability = incidence.

*Cumulative Incidence* represents the number of new cases in a period of time / population at risk.

*Incidence Density* is the number of new cases of a given disease during a given period in specified population; also, the rate at which new events occur in a defined population.

**Immunogenicity** is the ability of a molecule or substance to provoke an immune response or the strength or magnitude of an immune response. It can be a positive (wanted) or negative (unwanted) effect, depending on the context.

**Immune Response** is an integrated systemic response to an antigen (Ag), especially one mediated by lymphocytes and involving recognition of Ags by specific antibodies (Abs) or previously sensitized lymphocytes [108]

Safety data for Pfizer and Moderna trials:

There were two major COVID-19 inoculant clinical trials: Pfizer/BioNTech and Moderna.

The Pfizer clinical trials were titled officially “a phase 1/2/3, placebo-controlled, randomized, observer-blind, dose-finding study to evaluate the safety, tolerability, immunogenicity, and efficacy of sars-cov-2 rna vaccine candidates against covid-19 in healthy individuals” [98]. The “Actual Study Start Date” was 29 April 2020, the “Estimated Primary Completion Date” was 2 November 2020, and the “Estimated Study Completion Date” is 2 May 2023. Thus, the mass inoculation rollout so far has been conducted in parallel with the Pfizer Phase III Clinical Trial. For all practical purposes, the mass global inoculation of the Pfizer inoculant recipients can be considered Phase III 2.0 of the Clinical Trials! The inclusion criteria for the official Phase III Clinical Trials incorporated (as stated in the title and in the protocol document) healthy individuals, while the criteria for mass inoculation went well beyond healthy individuals. In essence, we have an official Phase III Clinical Trial with 73,000+ healthy individuals, and an unofficial Phase III Clinical Trial with billions of individuals covering a wide spectrum of health levels [98].

The Pfizer Phase III trials were initiated July 2020, the efficacy data were submitted to the FDA for EUA approval in November 2020, and FDA approval was granted in December 2020. Six deaths occurred in the Pfizer trial, two in the inoculated group and four in the placebo group (which received saline) [33]. The two inoculated, both over the age of 55, died of cardiovascular causes. One died three days after inoculation and the other died 62 days after inoculation [109]. These two deaths were comparable (in frequency and cause) to placebo group deaths and perhaps more importantly, similar to the general population at that age. In the case of Moderna, there were 13 deaths, six in the inoculated group, seven in the placebo group (normal saline placebo, a mixture of sodium chloride in water 0.90 % w/v) at 21–57 days after the inoculation ([103]b).

In a report by the Norwegian National Medicines Association, published on 15 January 2021, there were 23 elderly people (all over the age of 75 and frail) in nursing homes, who died at various intervals from the time of inoculation with mRNA inoculant. The report then suggested that, following the assessment, 13 of the 23 deaths would have been a direct result of the side effects of inoculation. It is possible that the other 10 deaths were post-inoculation, but not directly related to side effects, so not necessarily related to the inoculant itself [109].

It is no surprise that frail elderly people can be fatally destabilized by adverse reactions associated with post-inoculation inflammation, which in a young adult would have been considered minor. It is also no surprise that frail elderly people with comorbidities can be fatally destabilized from COVID-19 infection, which in a young adult or child would have been considered minor. A frail elderly person can be fatally destabilized by a simple coughing fit! This does not mean that these deaths are not events that need to be taken very seriously; on the contrary, if confirmed, they should guide inoculation policies in this category of patients from now on. Specifically, each case should be carefully assessed and an inoculation decision made based on the risk-benefit ratio [110].

In light of these data, the question may arise as to why there were no inoculant-attributed deaths in clinical testing of inoculants. The answer is that neither Pfizer nor Moderna included frail patients and included only a small number of very elderly patients - those over 75 accounted for 4.4 % of the total tested for Pfizer and 4.1 % for Moderna. While they could not in fact determine a causal relationship between inoculation and death, they also could not rule out that the inoculations had accelerated the deterioration of the condition of those patients [33].

Effectiveness data

As defined previously, the effectiveness of a vaccine lies in its ability to prevent a particular disease. If designed, tested, and administered correctly, authorized vaccines are effective in preventing disease and protecting the population. Like medicines, vaccines are not 100 % effective in all vaccinated people. Their effectiveness in a person depends on several factors. These include: age; other possible diseases or conditions; time elapsed since vaccination; previous contact with the disease.

To be declared safe and effective, a vaccine against COVID-19 infection must pass a series of tests and must meet regulatory standards, like any other vaccine or drug approved on the pharmaceutical market [111].

Regarding Pfizer and Moderna trials:

The first important note is that maximum efficiency does not come immediately, because the immune response needs time.

In the case of Pfizer, the chance of developing COVID-19 becoming virtually the same between the inoculated and placebo groups increases up to 12 days after the first inoculation, then gradually decreases for those inoculated. The inoculum efficiency between the first and second doses is 52 % [106], but it is unclear what long-term protection a single dose provides. After the second dose, the effectiveness rises to 91 % and only beyond 7 days after the second dose is 95 % reached. However, the ARR for the latter case is only 0.7 % [112]. In other words, within 12 days after the first dose we can get COVID-19 as if we had not been inoculated. Another important aspect is that we still do not know if the Pfizer inoculant prevents severe cases. Seven days after the second dose, there were four severe cases of COVID-19, one in the inoculated group and three in the placebo group, which is far too low for us to make a statistical assessment. There are as yet no data on the inoculant’s ability to prevent community transmission. Realistically, the effectiveness of the inoculant in preventing asymptomatic cases has not been tested.

For Moderna, the effectiveness is only 50 % in the first 14 days after the first dose and reaches a maximum of 92.1 % on the edge of the second dose (ARR of 1.1 %, which is 28 days, not 21 as in the case of Pfizer) [46]. Moderna also did not test the long-term efficacy of a single dose. Then, 14 days after the second dose, the effectiveness rises to 94.1 %, with the amendment being an average. Thus, in people over 65 it was 86.4 %, compared to 95.6 % in the 18–65 age range ([103]). It is a minor difference from Pfizer, which declares equal efficiency in all age groups. An important observation is the statement by Moderna that their inoculant prevents severe cases, but only more than 14 days after both doses [126]. All 30 severe cases were in the placebo group, suggesting 100 % efficacy. After a single dose, there were two severe cases among those inoculated and four in the placebo group [33]. Last, but not least, unlike Pfizer, Moderna tested the presence of asymptomatic infection by RT-PCR before the second dose: there were 39 asymptomatic cases in the placebo group and 15 in the inoculated group. It is difficult to draw definitive conclusions due to the small number of cases. These data suggest that the inoculant reduces, but does not prevent, asymptomatic transmission [126].

#### A2-b Ongoing Clinical Trials in the Pediatric Population

In a recent Phase III study performed in the pediatric population, Comirnaty (Pfizer) was tested on a group of 2,260 children, aged 12–15, years who had no previous clinical signs of SARS-CoV-2 infection. They were divided into two groups, one placebo (978 children) and the other with Comirnaty (1005 children). In the Comirnaty group, of the 1005 children in whom the serum was administered, none developed COVID-19 disease,

compared with the placebo group in which 16 children in 978 had clinical signs of the disease. The Pfizer study showed that the children's immune response was comparable to the immune response in the 16–25 age group (measured by the level of antibodies against SARS-CoV-2). It could be concluded that in this study, Comirnaty was 100 % effective in preventing SARS-CoV-2 infection, although the actual rate could be between 75 % and 100 %. [63]. The results will be evaluated by the FDA and EMA.

The predictive value (for mass inoculation results) of the Comirnaty trial for the children aged 12–15 years is questionable. There were 1005 children who were inoculated with Comirnaty. Using the rule of three in statistics, where to obtain a predictive result of 1/x with high confidence (e.g., 1 in a thousand), 3x participants are required for the test sample. For the Comirnaty test sample of 1005, an adverse event of about 1/340 could be detected with high confidence.
