Please DO NOT take away our freedoms - DO NOT add covid to WAC246.100.040.
PLEASE see the facts below:

Fact: From your data on your website, as of 1/8/2022, there is only a 1.1% of dying from covid. That is if the person actually died from covid and not a gunshot or auto accident or cancer or medical malpractice or etc., which have been classified as covid deaths. No other modern virus has caused freedoms to be taken away from THE PEOPLE.

Fact: United States government is not allowing successful/proven low-cost therapeutics, this is adding to the number of covid deaths and hospitalizations. Government is trying to murder its citizens by withholding less expensive therapeutics to help the drug companies make money with their expensive therapeutics. Sad world we are in.

Fact: Covid vaccines have injured over 1 million and killed over 20,000 people in the United States. Vaccines are supposed to DO NO harm. It was shown that Pfizer/FDA did not take vaccine injuries into consideration when given emergency use. Check out links below:

The Pfizer Inoculations Do More Harm Than Good (rumble.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Frumble.com%2Fvqx3kb-the-pfizer-inoculations-do-more-harm-than-good.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3373008ecea14cbdf99e08d9d452b062%7C11c>>

20,000+ deaths reported to VAERS following COVID vaccines - LifeSite (lifesitenews.com)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.lifesitenews.com%2Fnews%2Fdeaths-reported-to-vaers-following-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3373008ecea14cbdf99e08d9d452b062%7C>>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.lifesitenews.com%2Fnews%2Fdeaths-reported-to-vaers-following-covid-vaccines%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3373008ecea14cbdf99e08d9d452b062%7C>>

20,000+ deaths reported to VAERS following COVID vaccines - LifeSite

Fact: Covid tests cannot tell the difference between covid or the flu. This has caused the covid numbers to be overstated. Check out link below:

CDC test can't differentiate between COVID and the flu? That's wrong. – Poynter
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.poynter.org%2Ffact-checking%2F2021%2Fcdc-test-cant-differentiate-between-covid-and-the-flu-thats-wrong%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3373008ecea14cbdf99e08d9d452b062%7C11>>

There are so many more facts. Stop the fearmongering. Stop taking away the rights of the citizens of Washington. Please remember we live in a free country, and we have lived through many viruses.

Sincerely,
Darla Hale

I am appalled and outraged at the thought of becoming a criminal based on personal choices.

The "my body, my choice" movement with women's choice of abortion comes to mind.

This country is tearing itself apart, over the flu?

Spanish Flu More than 50 million people died of the disease worldwide

Why are we going crazy over the natural selection of a disease.

With the vax being available to those who want it, I'm at a loss for words of what's being proposed.

How else can I express this to anyone and have it actually be heard, recognized, and validated.

We appreciate the opportunity to work with you.

The very idea that you wish to gain more control over our lives is just not acceptable considering covid is the biggest world-wide HOAX ever put into play. A great deal of research by Dr. David Martin shows how this bioweapon was first thought out, we have the money trail, the patent history and a lot of names of those who helped birth this crime against humanity. The very fact that it has never been isolated means your "case numbers" are all just lies. There is enough research completed that now we know the "bioweapon" is in the jab. What kind of Medical madmen would push a deadly vaccine (which it is not) over proven medical treatments which save lives instead of ending lives. There are arrests being made, charges of murder and there will be "Nuremburg" trials, this has been stated by The Office of Military Commissions. No, we are not surrendering any more freedoms, in fact within the next year Nesara/Gesara will be fully on board and all governments will be downsized greatly. This is your opportunity to do your part and put an end to the GREAT LIE. Thank you,

Hello,

I am a concerned citizen of the state of Washington and today I am writing to protest the overstep of the government in regards to adding the covid virus to the infectious disease list and the consequences already in place for such diseases on the current list. It is a violation of our liberty and poses the threat of a tyrannical government. I implore you to think about all the consequences and unconstitutional loss of rights this would create

I refer to the WA Board of "health" and their proposal to apply current WAC infectious disease codes to include Covid to all WA residents.

On behalf of myself and extended family, I do not consent to this, or to anyone who represents my health or the health of my fellow citizens, applying such codes or orders onto the residents of WA. These codes while perhaps seemingly for the greater good, when applied or related to what we have witnessed in the last 30 months, where every human right has been destroyed in the name of "greater good" to the utter detriment of all that is truly about health and wellbeing and our most fundamental human rights, are alarming. How can we ever trust a department to consider individual human rights when recent history shows there is no respect for the wellbeing and rights of the residents of this state or this country - we have lost it all. We have lost all trust in your system. These proposed orders will destroy even more the rights of people to bodily integrity and health choices. Please do not support this move. It is a terrifying one in the face of all the freedoms we have already lost, and the crimes already being perpetuated against the people of Australia.

Thank you

A deeply concerned citizen

I do not agree with the proposed policies stripping us of our freedom and personal medical choice. Forcing Americans to inject something in our bodies is unconstitutional. We have rights and freedoms. So many that have had the covid vaccinations AND have been boosted are still contracting and spreading. So if your agenda is simply to protect the Americans, it is not being displayed. Control is being displayed. Say no to the agenda. Stand up for the American people.

Thank you,
Cariana Pelland

As a resident of Washington, I am in complete opposition of adding covid-19 to the 746-100 codes. With minorities as more hesitant to vaccinate from historical atrocities this is a racist action and a overstep. This action would also validate the message from groups that are spreading what to this point has been dismissed as conspiracy theories. To concentrate people in government facilities against their will if they do not comply is far to similar to what occurred in Germany 80 years ago, a vote for is blood on ones hands. Please vote against,
Thank you

Dear Caitlin Lang:

Please read the constitution of USA, then read the constitution of Washington. - short reads, you will be paid by the people while you read, consider it fundamental research.

If your decisions don't reflect the oath you have sworn, - that Genie cannot be put back in the bottle.

I believe if this ship doesn't right soon we all will have a full on mutiny on our hands here in Washington that none of us wants to deal with.

Choose wisely.

Sincerely,

Chris Beamis

<https://haltturnerradioshow.com/images/2022/01/10/SassoliEUParliamentPresident-Dead_large.png>

European Parliament President David Sassoli hospitalized since Dec.26 in Italy due to abnormal functioning of his immune system, has DIED.

Sassoli took all the COVID Vaccine shots and allegedly recently took the Booster shot. Apparently afterwards, his immune system completely collapsed.

How many more of the vaccinated will share his fate?

This is a developing story, check back for more information . . ."

Good afternoon

As a resident of Washington, I am in complete opposition of adding covid-19 to the 746-100 codes. With minorities as more hesitant to vaccinate from historical atrocities this is a racist action and a overstep. This action would also validate the message from groups that are spreading what to this point has been dismissed as conspiracy theories. To concentrate people in government facilities against their will if they do not comply is far to similar to what occurred in Germany 80 years ago, a vote for is blood on ones hands.

Please vote against,

Thank you

Charles Jameson

The facts: Covid numbers have been overstated due to bad testing, which is why FDA has recalled tests.
There wasn't much of a flu season in 2021 due to these bad tests falsely detected the flu as covid, which as overstated covid numbers.

Stop the fearmongering. Stop trying to take away the rights of the citizens of Washington. Please remember we live in a free country.

Subject: January 12 Proposal

External Email

To All Tyrannical Government Employees:

I am sickened that we even have to write these emails to you all to try to make you understand how your "proposal" on January 12 is completely illegal and absolute tyranny. We live in America, where our freedom has always and shall continue to come first. Forcing people to do anything they do not believe in goes against our fundamental rights. How is it that hard to understand? Covid-19 is not anywhere deadly enough to even think of calling for any of these measures. This is a blatant overstep and power grab and WE WILL NOT COMPLY. I urge you to truly think about your actions that have effects on all Washington citizens, before it's too late for us all. Have any of you studied history? Does any of this "requiring papers from the government, forceful internment of innocent people into camps" ring a bell?! WAKE UP!!! Be on the right side of history, do your part for the people, and TAKE A STAND FOR MEDICAL FREEDOM.

Absolutely dumbfounded,

Arley-Ann Matson
Wenatchee, WA

The current strain (Omicron) has been reported as causing 6 deaths in 100,000 cases which is roughly equal to the death rate of those who have had adverse reactions to the vaccine. More people die each year from the Flu than the current strain of Covid-19. This would be a major overreach by this board and do severe harm to the faith that people have in your judgement.

Sincerely,

Gary Wilson

Subject: Please vote No on adding Covid-19 to the list of infectious disease WAC Codes

External Email

The current strain (Omicron) has been reported as causing 6 deaths in 100,000 cases which is roughly equal to the death rate of those who have had adverse reactions to the vaccine. More people die each year from the Flu than the current strain of Covid-19. This would be a major overreach by this board and do severe harm to the faith that people have in your judgement.

Sincerely,

Gary Wilson

Subject: January 12th Advisory Board

External Email

Hello,

I am writing as a citizen of Washington State. I am writing, because frankly, I am appalled by what I am hearing you propose. The use of force to apprehend people and place them in detention/concentration camps all for a virus that has over a 99% survival rate for the vast majority of people. It has even been stated by experts that over 70% of fatalities had 4 or more comorbidities. Furthermore, the vaccine has already been proven ineffective. The vaccinated can spread, and contract covid, the same as the unvaccinated. A large portion of those hospitalized are vaccinated, not unvaccinated. To continue, the Omicron variant has already been shown to be less transmissible, and less potent--similar to a cold. Experts are even saying that this could be the end of the life cycle for this virus. Also, look at Israel--forced vaccination (over 4 doses) has not helped them get back to "normal". I'd like you to ask yourselves WHY you are doing this? What do you have to gain from this? Not only will you be taking people out of the work force and the economy of our state, but you will also be violating our constitutional rights of life, liberty and the pursuit of happiness, and violating the Nuremberg Code. Also, ask yourselves what side you wish to be on when future generations look back on this. When the Japanese Americans were forced into "camps" losing their homes and their businesses, their livelihoods-- It was considered the right thing to do at the time. Now we look back and see that it was incredibly wrong. When the Jews were forced into concentration camps no one knew how bad it would be. An us versus them mentality was fostered similar to what is happening now. And while I don't think it has gotten to that point, it is merely a hop, skip and a jump away and we all know it. Finally, the good always rise up. The righteous stand tall. And not only will you be wrecking Washington state and it's economy, and people's lives, but you will also be going against everything that the United States of America stands for. I suggest you think about that.

Kind regards,

~ a concerned citizen.

Subject: Nazi concentration camps in the USA

External Email

Good morning,

Through online advisement was I aware of new policies that the state of WA are trying to impose. Let me get this clear. If you start putting Covid concentration camps in the United States of America, WE THE PEOPLE will be at war with the government. And I, personally will make sure that those camps burn to the ground.

You do not have the right, in AMERICA to EVER create these types of camps. ESPECIALLY since the cdc changes their word on Covid every two weeks. The CDC is now stating that nurses who test positive for covid but are a-symptomatic can still go to work. Which would in turn, be spreading covid.

You will be brought by legal action lawsuits and then you will be presented with the American militia at your camps. And we will free everyone from your mentally deranged and Nazi like camps. Whoever is on the board to even THINK of putting together these camps needs therapy. WE THE PEOPLE stand tall under god. And I can promise you that you will forever burn in hell if you try to impose these camps
In American soil.

You are threatening Americans . And we will not stand for this. I don't know who you think you are, but you're clearly a domestic terrorist. You are not true Americans. Try us. See what happens.

I disagree with WA State's attempt to pass code to involuntarily detain persons that don't agree with you, specifically the vaccination issue. All persons, whether vaxxed or not, can contract and spread covid. This isn't in dispute. The Vax is a therapeutic at this point and should be a choice. Our lives should not be uprooted in the name of the Democrat party. Please stop this insanity before you see more residents leaving in droves. We are valued members of society and love our state.

I think you are crawfishing and were in fact trying to pass a legislation to force vaccine containment camps but got caught and the people of the world will not stand for it in any way shape or form. We have the right to govern ourselves and our bodies. No Government can force people to conform. Our bodies and what goes into them is our God Given Right not the governments. Government is supposed to work for the people not to control the people. You are thankfully waking up more people to the truth that we have lost sight of this and were negligent in trusting government. We will not be negligent anymore. This is will Not Now or EVER be allowed to happen.

A Natural and Sovereign Citizen with God Given Rights

Citizens are aware of your plans to issue a policy to allow public health authorities to put people in concentration camps for refusing to vaccinate, or comply with other demands from the authorities. You intend to pass this on Wednesday during regular work hours to avoid public comment.

This cowardly attempt to circumvent the democratic process will not prevent us from calling you out. I will not bother making moral arguments, since I do not believe that you care about morality. But be advised that patriots in the state of Washington are watching you, and we will remember the names of those who vote for this atrocious policy. We will use every means made available through the democratic process to see you removed and even prosecuted, since you are acting in violation of the constitutional prohibition on bills of attainder to violate the fundamental human rights of American citizens.

Furthermore, even if the democratic process fails, we still the final remedy the Founding Fathers gave us should the institutions of the Republic prove insufficient to protect our liberties. I do not own a firearm, and I do not believe in violence. But many people in Washington state are armed, and I have no doubt that they will be prepared to use their weapons to protect themselves, their families, and their communities. You are all morally despicable, but hopefully you are at least moderately intelligent. If you are, then you will recognize that your plans will spark civil war. World War II ended with the sentencing, and in many cases execution, of Nazi collaborators, and the coming war of liberation will end the same for you. You seek to use instruments of violence to harm others. Do not be surprised when your victims use the same means to bring you down.

The path of the universe brought about the American Revolution. I hope that it also brings about the revolution to restore our modern nation to the liberty purchased with the blood of patriots.

Good morning,

I write you today in regards to WAC 246-100-070, WAC 246-100-045, WAC 246-200-040, WAC 246-100, 246-105. These bills are of massive concern to all Washington state citizens yet few know they are even a topic of discussion. I idea that you would willfully discuss the notion of detaining the citizens you serve to impose a sense of "greater good" is not only counterintuitive, it's barbaric. The weight these bills carry would fracture the basis of freedom we enjoy in this state and forever damage the trust and confidence we have in any governmental entity. I implore you to see reason in this regard. Vote NO on imposing such tyrannical
Laws on the citizens you claim to serve.

Respectfully,

A concerned citizen

Hello as a mother of a child that attends a school in Washington state I would like to voice my opinion on the matter of mandating children to be vaccinated in order to attend public school. I do not feel it is fair to force anyone to chose between an education and a vaccine that is still in its early using on a child. There are no long term studies on what this vaccines may do to our children's growing body. Children tend to fair very well with the actual Covid 19 virus. If this becomes a mandate I will unenrolling him from the sequim school district and enroll him in a private school that is not associated with the school district. Thank you very much for taking the time to hear my voice.
Sincerely, Ashley Henning (Sequim Wa)

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Good morning!

We could not be more serious about the topic of this e-mail! We are 100% opposed to any medical mandates regarding Covid or any issue for that matter. The United States of America is a free country and what these new WAC laws propose threatens that for all of us.

Part of being free is the ability to make your own decisions regarding your own body! Natural immunity has been ignored here along with virus reporting. What you are proposing is forward push to communism, and we will not sit by and let it happen.

Please take a stand for Washington state's freedom, the United States freedom, and the worlds freedom! History rests on your decision!

Respectfully,

The Forsmans

I am protesting the actions being taken regarding vaccination requirements for school-aged children. I am deeply opposed to this mandate or question of this mandate for all children. I will not go into huge detail here, and agree with the comments that will be submitted by Informed Choice of WA. But in summary, all shots are EUA ONLY.

Comirnaty is the only COVID-19 product that has ostensibly received FDA licensure for any pediatric populations—namely those 16 and up; however, that licensure is limited to manufacturing and delivery. The FDA has stated that this product is merely “ready for approval for use in individuals 16 years of age and older . . .” [emphasis added]. August 23, 2021 Approval Letter - Comirnaty, from FDA to BioNTech, p. 4,

<https://www.fda.gov/media/151710/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710/download>>

Let me emphasize, the Comirnaty vaccine is not available anywhere in the United States, and there is debate about whether the vials of Pfizer’s EUA product are now “licensed” for those 16 and up, or if those are still EUA products. The FDA states that EUA Pfizer-BioNTech COVID-19 Vaccine and the Comirnaty (COVID-19 Vaccine, mRNA) “are legally distinct with certain differences that do not impact safety or effectiveness.” There is much debate over what “legally distinct” means, especially to consumers. If “legally distinct” means that the currently available Pfizer products in the U.S. are under EUA regulations, then there is no licensed product available for 16-18 year olds. Regardless of whether the Pfizer’s product is licensed for 16-18 year olds, the product lacks completed Phase 3 clinical trials, and the PREP Act still shields manufacturers for liability for injuries and deaths. As far as we can tell, never in history has the FDA licensed a product without completed clinical trials, nor when all the ongoing trials have been unblinded, subverting the ability to compare outcomes.

The federal code regarding emergency use authorization is clear and has longstanding history on how it came to be in place, all citizens should have informed consent and that means they have the right to refuse any EUA product including these shots.

Whereas: 1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states “the voluntary consent of the human subject is absolutely essential.” 2. All of the treatments being marketed as COVID-19 vaccines are still in Phase III clinical trials until 2023 to 2024 and hence qualify as medical experiments. People taking these

treatments are enrolled in clinical trials; 3. None of these treatments has been approved, but only granted emergency use authorization, hence cannot be mandated nor can informed consent be dispensed with; 4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year; 5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models; 6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death; 7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials; 8. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than deaths in the last 10 years from all vaccines combined; 9. Only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID vaccines is unknown as there is a significant delay in uploading reports to the VAERS database; 10. Breakthrough cases of COVID-19 infections in those who have received COVID-19 vaccines is on the rise; 11. The trials have not proven that COVID-19 vaccines prevent infection or transmission; 12. Safe and effective treatments and preventive measures exist for COVID-19; AND 1. Students are at nearly zero % risk of contracting or transmitting this respiratory illness and are instead buffers which help others build their immune system. The overall survival rate is 99.997% . 2. Children have already been exposed to unprecedented amounts of fear, instability, shaming, psychological trauma, and segregation through the COVID-19 measures and are therefore even more suggestible than their developmental stage would usually entail; 3. It is the job of parents or legal guardians, not of principals, teachers, teacher assistants, school board executives or other adults with influence on children, to make medical decisions for them; 4. Schools include vaccine and COVID-19 vaccine curriculum, which is biased, prejudicial and is a form of undue influence on any minor child which excludes full disclosure of the known risks of vaccination and the emerging evidence that vaccines do not provide protection as claimed; 5. Vaccine compliance elicited from children under threat of coercion, bullying, or suspension and who are not of fully informed consent that they have the legal right to refuse vaccination, constitutes extreme bullying and coercion and could be construed as a "battery" as well as a violation of constitutionally protected rights. 6. Contrary to misinformation spread by the World Health Organization, "implied consent" is not "informed consent," and "informed consent" is mandatory by law; 7. The Mature Minor doctrine cannot override the wishes and consent of the parents outside of preventing imminent harm or death. Vaccinations do not fall under the Mature Minor doctrine. 8. The engagement of medical experimentation without informed consent further constitutes the indictable offense of crimes against humanity. The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary. Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law. Any use of 'implied consent' by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence. Any party found to be involved in vaccination coercion when entrusted with the care of our children could be prosecuted to full extent of law.

Can you show that this is incorrect, the death rate among children? This is coming from the CDC's own data. The Washington Department of Health data supports the risk is very, very low. The risk of drowning or dying from influenza is greater than Covid for children. You can't reference the data and prove otherwise.

Furthermore, I am strongly opposed to any action towards having any type of quarantine camp.

There are many early treatments available to the public, if only our healthcare professionals would be encouraged to start prescribing. For all other illnesses including influenza early treatment is key. It is for Covid too, but our healthcare are not considering this and are in fact flying against this at all levels. There is evidence not just anecdotal that early treatments/therapeutics work.

Thank you,
Nikki Moser

Hello,

I live in Centralia WA and have been made aware of the proposed policies to be presented on January 12th.

I am writing to register my opposition to both mandated vaccines for school attendance and involuntary placement in quarantine camps for those who resist complying with unconstitutional medical interventions.

Please seriously consider what the enforcement of these WAC codes would mean for our free society. Because Covid-19 is a treatable and low risk illness for most individuals - especially children, these actions would be absolutely unnecessary and contrary to our state and federal constitutions, resulting in the loss of freedom for countless individuals. I heartily oppose these codes, and hope you do too.

Respectfully submitted,

Carmelita Hoogkamer

Regarding: =C2=A0

PROPOSED POLICIES:

=E2=80=A2 Allowing local health officers to use law enforcement (WAC 246-10-0-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-10-0-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Comment: =C2=A0This is illegal, immoral =C2=A0and unconstitutional and would take away freedoms given to us by God. =C2=A0Anyone supporting such control and loss of freedom should be removed from their job.

=E2=80=A2 Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Comment: =C2=A0There is no informed consent for this injection, therefore, it cannot be mandated. =C2=A0This injection is experimental, therefore, it cannot be mandated. =C2=A0There is no liability for damages caused by this injection, therefore it must not be mandated. =C2=A0There is no medical emergency except in the minds of those full of fear from a corrupt media and f=

rom those who want to profit financially from the injections. =C2=A0My body=
- My choice! =C2=A0

Thank you,
Tina M. Johnson

I am requesting this requirement to be stopped. This Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. The long term affects in children have not been studied and the side affects have shown to be a major concern. The virus hasn't shown to be exceptionally dangerous to children, therefore is unnecessary to children. Why are we not discussing natural immunity? It had been proven that individuals that have been vaccinated still pass the virus. This is unnecessary and unethical. Our school districts will see a large drop in number whether it be from relocating to a state without such mandates or to be schooled by parents. We need to keep medical freedom in our state. We don't need to mandate a vaccine that isn't proven to help anyone but the individual themselves, and that hasn't proven to be as efficient as advertised either. If individuals choose to be vaccinated themselves, then so be it. If not, that also needs to be recognized. Why force a vaccine on someone who can easily get the vaccine themselves if they choose to. Let's be part of the solution, not the problem. Mandates aren't working. They are causing an unnecessary division in our state and community. Let's maintain a state our children's children can be proud of.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998 <tel:99.997-99.998> % or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Mr. Thai,

I am writing to express my grave concern about the forced quarantine and counseling for members of the public using their own free will not to participate in the experimental vaccines currently offered for Covid 19 and forced vaccinations for children. My concerns about rolling out such a draconian policy that violates the fabric of this country's founding principles are many.

One of my largest concerns is that in watching the vaccines be given out over the last year, it is clear that they are not working. Almost half of the infection rate of Covid patients are already vaccinated. States with higher vaccine rates do not experience lower Covid rates. People who are fully vaccinated are not stopping the transmission of Covid either. It is also not proven to be a safe vaccine. People suffer at a higher rate from complications from the vaccine than they do from Covid itself. Forcing people to get vaccinated is clearly about power and submission, not about preserving public health. Statistically, children have a higher chance of dying or having an adverse reaction to the experimental Covid vaccine than they do from contracting Covid itself. At this point in history, many of the children you propose to force vaccinate have already had Covid and have valuable antibodies. Allow parents to choose what is the best decision for the individual health of their children, not the state.

As a mother, I know my children more intimately and fully than any health care professional, and certainly more than the state. I have witnessed their growth and development since I first felt them in my womb. I choose to make decisions for my children's health with information and discussion from professionals, not by coercion and fear. Inform parents and respect their rights and their timing to make the decisions necessary for protecting their families. Protecting that sacred right of a parent is a paramount responsibility of an elected official and member of public education. I know this well as a former public elementary school teacher. Please protect children's health, respect the fiber of the Washington family and protect democracy by fighting against the proposal to force vaccinations on children and force quarantine on non complying families.

Open Letter to WA Health Dept et al,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 bring used or amended to include COVID19.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

This is one of the most wreckless, dangerous and overreaching unconstitutional concepts and it's appalling that it's even on an agenda for consideration other than to be abolished.

We have learned by now early intervention is possible and best for infection of covid19.

Overcoming covid since the beginning has been 99% successful.

WA has partnered with what occurs conspiratorially with prohibiting drug distribution though our pharmacies in our state since the spring of 2021.

This is wrong. All the data shows benefit and the STATE showed force in pharmacies and out local hospitals.

Legal departments of our largest health systems have had on record discussions and have acted on behalf of the STATE in prohibiting prescribing known effective early treatments. Our medical system professionals have yielded to your direction, against better judgement. This is information, I have on factual authority can be legally attested.

Our literal instruction at the patient level upon diagnosis was go home and wait until you can't breathe.

I'm gravely concerned with the Depts instruction as it would occur these systems would have partnered in the demise of the patients and constituents as know we fully know this is radically inappropriate and ill-equipping.

Law enforcement is not medical nor should they be involved with detaining, isolating any person for any reason. If you haven't seen what's happened in Australia, detainment camps, fines, loss of freedom, it would be our almost certain future. Despite their radical concentration style camp, they are still while mostly vaccinated, spreading illness.

By survival rates including my own, this is not the plague.
You can not regulate a cold.

You can NOT prevent a cold from spreading.

At any given time there is 10x31m viral particles in any given space. That's 10x the amount of stars.

It's always been that way.

Its literally insanity to attempt to capture one viral particle or a "strain" call it "something" and create detention camps around it.

This is the absolute wrong course of action and will be met with opposition. My family and many families won't remain in WA if this type of force would be used on anyone.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Personal health decisions are personal.

You are the Health Dept. why have you YET to publish an FLCCC type protocol for prophylactic in early intervention?

<https://covid19criticalcare.com/wp-content/uploads/2020/11/FLCCC-Alliance-I-MASKplus-Protocol-ENGLISH.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcriticalcare.com%2Fwp-content%2Fuploads%2F2020%2F11%2FFLCCC-Alliance-I-MASKplus-Protocol-ENGLISH.pdf&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C24a292e67a5c47aaa2a908d9d204f>>

Our small community lost 14 young people to suicide in the "lockdowns" last year. Why is this not alarming, and clear this course of action is detrimental?

Not one mention has been made of healthy diet, proper vitamins and minerals, movement, mental health. All communication has been the marketing arm for vaccination which is

Not effective in preventing illness

Not effective in preventing transmission

Causing adverse reaction and death

Not every kid can eat gluten, walk on grass or have a peanut without anaphylaxis, it's fully unreasonable and unscientific to think a one size fits all. It does not. Let alone that many children have antibodies just from exposure to their parents during illness.

7 adults in my family got Covid in the spring. We did not quarantine our kids away from us.

Among our family was a

- 2x cancer survivor on heart medication

- Medicated T2 diabetic with a recent history of heart attack and stroke

- Thyroid/Hashimoto issue, CPAP user

- 4 average healthy adults

All recovered with early aggressive at home treatment.

The cancer survivor recovered first among us.

Of our 6 exposed children to all our (terrible) symptoms, zero contracted covid, got sick or had illness of any kind.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fphmppt.org%2Fwp-content%2Fuploads%2F2021%2F11%2F5.3.6-postmarketing-experience.pdf&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C24a292e67a5c47aaa2a908d9d204>>

This is not something the state department should be creating legislation, policy, detention, requirement or mandate around.

This is an obvious failure and will continue to come to light.

Do not move forward with this.

This information alone is enough to expose harm.

To proceed with this open available disclosure of information makes the state complicit.

Taking this course of action is knowingly partnering with potentially harming WA state residents and children.

Jaclyn Walker

Subject: RE: January 17 Discussion - Is the WSBOH trying to get the State sued?

External Email

If the Board of Health oversteps its authority, I am concerned that the State Board will be sued and that it will cost the State of Washington more money than it can afford.

A decision to strip people of their Washington State Rights by ignoring Section 1 and Section 2, and disregarding Section 3, 4, 7, and 11 would be catastrophic in the long run, as people in Washington have not voted on the measures proposed, so there is no valid legislation in place.

I am confused about the discussion planned at the Washington State Board of Health.

Is the WSBOH a legislative body?

Are the legislators in the process of making a law here?

Is there a law that subjects our State Constitution to the Washington State Board of Health?

Do you all need to be reminded that WAC's are subject to the State Constitution, and when challenged can be found invalid?

If you are unfamiliar with the Sections referred to, I have included them in this email.

Sincerely concerned,

Stephanie Orr

Subject: [STMHE] ACT THIS MORNING against tyrannical WA proposal

External Email

Good Afternoon,

It has come to my attention that some very alarming public policies are being proposed by the Washington State Board of Health regarding current infectious disease codes for COVID-19. I have a number of questions and comments that I hope can give us some perspective on the folly of the proposed application of these codes and finish with a comment on my conscience should this policy be enacted.

1) The first question that I have relating to WAC 246-100-045 is how and in what instances have we utilized this policy since it went into effect in 2003? The language used in the code is vague enough that there seems to be little definition on the severity of what an "infectious" disease is; disease is after all almost by definition infectious. Is it the death rate that determines the quarantine requirements? If so why have we not felt the need to enact this principle for the flu in years gone by? Is it the lack of medicine or treatments for a new illness? No we have had several treatments, vaccines and therapeutics that have been effective in diminishing the severity of COVID-19. Ultimately, what are our criteria for the implementation of this policy in regards to the COVID-19 virus? We have multiple diseases and outbreaks that this has not been necessary for and I for one do not trust that those tasked with enforcement would be able to apply an objective criteria that makes any sense.

2) Second, we have had two years to observe globally the effectiveness of quarantines, lockdowns, etc... in mitigating the spread of this virus. Do we honestly believe that forcing people into quarantine camps as they do in Australia will stop the spread of a disease that is global? Have we forgotten the pictures out of Wu Han of people being welded into their apartment buildings to slow or stop the spread of the virus? The disease persists and has not been deterred by our efforts to stop it. I have had this disease and my family and my extended family. We are none the worse for wear and I believe most people would agree that this state of fear and uncertainty is unsustainable. We need to live life and the risks posed by this virus do not justify the response we have submitted to. Much as we might try to mitigate or ignore this fact, we face death every day and yet we choose to live life according to each person's needs and concerns. In the reality we face of being unable to stop this virus in any meaningful way, each person should be free to respond in the manner they believe will meet their needs.

3) I noticed that the vaccination status was included in the wording of the proposed policy. Oddly enough it was the last in the list of items mentioned as things that could be requested my law enforcement; well last is not least as they say. The question before nearly every policy in this regard has been the pressure to get vaccinated. We have recorded the highest "cases" (life threatening or not) that we have ever had. The numbers that have been recorded of hospitalizations with COVID show us that those who have had the shot are still getting sick and are still getting hospitalized. I asked this question a number of years ago when there was a small outbreak of Measles in the state of Washington. If only those who choose not to get the vaccine are getting sick then why is everyone else worried about it? If on the other hand those who are getting the vaccine are worried because they are still at significant risk, then what is the point of having a vaccine in the first place? For a state that purports to be such an inclusive bastion of diversity of thought and accommodation for individual lifestyles, it is shocking the abuse that has taken place towards those who have the right to make their own decisions regarding their healthcare.

4) Apart completely from the effectiveness of the vaccine is the simple intrusion on our rights as citizens. There has been no consideration of medical privacy laws, the rights of citizens to litigate drug companies for harm done, there has not even been the right of full consent for the vaccine relating to the requirement to inform patients of effects of the drug, its contents or even the fact that we simply do not know the long term effects. To add injury to insult, we now have this excrement of a proposal by an unelected body of political appointees to force our local law enforcement to potentially incarcerate their neighbors in what I can only imagine is not a local area if the reports I have read about the various quarantine facilities being prepared around the state of Washington is true.

5) Finally, and as I said last is not least, there is the state of our children's health and well-being. We have seen across the world, that our children are not at risk for this virus in any meaningful way. What do I mean by any meaningful way? As of November of 2021, the total number of deaths in children under the age of 16 in the US due to COVID-19 was under 500. To put that in perspective your child is more likely to die from a dog attack than from COVID-19. Even more shocking, there has been no fatality linked to transmission of COVID-19 between students in school. There have been several transmissions linked to teachers passing the virus to other teachers, but that is a nonissue for the requirement of vaccinations and masking in our school system. If this policy is to be expanded to include COVID-19 as regards to our children I would first insist from our Governor, who loves data so much, for some concrete numbers on risk and effectiveness of the proposed mitigation policies. Not projections, not models, not predictions from our experts; we have more than enough experience at this point with lockdowns and masking that we should have some real data to make our decisions. If we don't, perhaps we need to get some new experts.

Speaking from my conscience now if this policy is enforced and enacted, I am very torn as to what I think we should do about it. I would encourage every possible litigation against the state of Washington; I would support in every way I am able law enforcement who refuses to obey the edicts of our Board of Health; I would grieve for my beautiful state that has allowed itself to fall into a tyranny of fear. It is evil that turns a person on his neighbor and that is what our policies are doing to us. I will try to love my neighbor in my very imperfect way, but I will resist with every fiber of my being he who would seek to turn me against my neighbor.

Blessed New Year to you All,

Riley James Workman

Subject: 1/12/22 Meeting Question regarding COVID antibody levels in children

External Email

To Whom It May Concern:

Why is proof of antibody levels not accepted in lieu vaccination?

I would like to express my extreme opposition to implementation of a COVID 19 "vaccine" requirement for schools in Washington State. Both of my children have had COVID twice. Both times they were very mild symptoms. We followed the guidelines and quarantined. We used common sense. Both kids have antibodies, yet they will be segregated if they are exposed to COVID, only because they do not have the "vaccine". They have the same if not more protection than a "vaccinated" person. Allow parents to provide proof of antibodies as an alternative to the "vaccine".

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors (americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Jennifer and Robert Gould
Puyallup, WA

Are you ready to be held fully responsible and personally liable for any potential trespass by harm to sons and daughters if this goes forth? I, along with many others, intend to hold you responsible for any irreversible health damage from the Covid 19 vaccine, so please vote from your innermost consciousness and the scientific data, assessing risks and benefits carefully.

Please PROTECT our children by NOT requiring the Covid 19 vaccination to attend childcare or school. Thank you for your consideration in this matter.

Kind regards,
Christiana Nelson

Subject: Vaccine Mandates for Children

To all of you,

These vaccines are ineffective and dangerous for our children. There is no upside, no "benefit" to experimenting our most vulnerable population. However, the costs of this overreach are innumerable. There is no doubt that even a cursory glance at the stacks and stack of data prove these vaccines and all other child-related mitigations are morally wrong, physically and emotionally dangerous and entirely unnecessary. Everyday, there is mounting evidence of fraud, bias and abuse in the process that brought us to this sad point in time. If you choose to mandate these vaccines or continue with ANY other Covid protocols, I will remove my children from school. You do not and will not control MY children.

Further and according to your own criteria, a vaccine must be fully FDA approved in order to make it mandatory for school attendance. The current Pfizer vaccine in use for children in this country is still an Emergency Use Authorization only vaccine, so beyond the logical arguments made above, the vaccine does not meet Board of Health requirements. I demand the vaccine be removed from consideration until and unless it proves immunity to stop transmission like other common vaccines do- which was the requirement under consideration in the 1905 Jacobson vs. Massachusetts SCOTUS case in which it stated mandates could only be considered which "prevent the spread of contagious disease." So far, it is evident that this vaccine does not stop transmission and, therefore, I am certain these mandates are illegal.

Yours in deep sincerity,

Vanessa Hansen 253-355-9751

A parent of two school age children, I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Do you know who Dr Robert Malone is? He is the inventor of mRNA technology. Here's what he has to say about COVID-19 vaccines in our children,

"First, is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. This protein can cause permanent damage in children's critical organs, including their brain and nervous system, their heart and blood vessels including blood clots, their reproductive system, and this vaccine can trigger fundamental changes to their immune system.

The most alarming part about this is that these damages, once they occur are irreparable. You can't fix lesions within their brains. You can't repair heart tissue scarring. You can't repair a genetically reset immune system. And this vaccine could cause reproductive damage that could infect future generations of your family.

The second thing that you need to know about this is the fact that this novel technology has not been adequately tested. We typically need at least five years of testing and research before we can really understand the risks of new medicines or vaccines.

Harms and risks from new medicines often become revealed many years later. So ask if yourself if you want your own child to be part of the most radical medical experiment in human history.

One final point. The reason they are giving you to vaccinate your child is a lie. Your children represent no danger to their parents or grandparents. It's actually the opposite. Their immunity after getting COVID is critical to save your family if not the world from this disease.

In summary, there is no benefit for your children or your family to be vaccinating your children against the small risk of this virus given the known health risk of the vaccine that is apparent you and your children may have to live with for the rest of their lives. The risk benefit for this vaccine isn't even close for children.

As a parent and grandparent, my recommendation to you is to protect your children and do not give them this unproven vaccine."

1. Children are statistically at zero risk of dying from COVID. Their survival rate is in the

range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

2. NO ONE (FDA, CDC, Pfizer, Moderna, J&J) knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

3. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

4. Physicians and scientists all over the world: Dr Robert Malone, Dr Michael Yeadon (former VP of Pfizer,) Dr Sucharit Bhakdi (published microbiologist,) Dr Geert Vandon Bossche (virologist/vaccine expert) Dr Peter McCullough (internist, cardiologist, epidemiologist,) Dr Pierre Kory (ICU Director, Pulmonologist, co-pioneer the research/treatment for sepsis,) and thousands more have spoken out against COVID vaccine mandates and future affects.

Our job as parents/society is to protect our children for they are our future. Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

-Heather Stratz

)

7. You may "enjoy" reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate (NNTV) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? (substack.com <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%33xja4Kt04K4pFuuwk_as4%26h%3DAT1E4uveNCNg-N9w24A0s4DDshaCmt7wVS9ZUdJLOxoXvN8fl_UKwUHXu234aCyLzeLqfwWSpC4R1IvuTcGcFBhxLdvjUvZHK1UK-R%26c%5B0%5D%3DAT0xP4BC48KJRKrI_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2IAdKuUpzHVhpT-EAKJAmT_K4Cu3mxL2z5gXOaT3isKwavk_AXi27V3S7GtQR-hN_HMinXDMIZ2m0IwLSo6kYEJBOV66U-mjIbVY0N0&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2>

)

8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3f664FSn4IgkqD0_M7CQ8tpQ4j_U5hGiPK4RxzsZSblQTEdu8nA%26__tn__%3D-UK-R%26c%5B0%5D%3DAT0xP4BC48KJRKrI_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2IAdKuUpzHVhpT-EAKJAmT_K4Cu3mxL2z5gXOaT3isKwavk_AXi27V3S7GtQR-hN_HMinXDMIZ2m0IwLSo6kYEJBOV66U-mjIbVY0N0&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2>

)

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website. Adverse Reactions | Real Not Rare These are real people. Their stories are real. At a minimum, why are these being hidden and why isn't Pfizer investigating why people have these types of reactions? If you only have time to watch one of these, how about this one: Ernest Ramirez (17 yr old son) (realnotrare.com

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3UK-R%26c%5B0%5D%3DAT0xP4BC48KJRKrI_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2lAdKuUpzHVhpT-EAKJAmt_K4Cu3mxL2z5gXOaT3isKwavk_AXi27V3S7GtQR-hN_HMinXDMIZ2m0IwLSO6kYEJBOV66U-mjIibVY0N0&data=04%7C01%7CNathaniel.Thai%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2

) Do you really want to force these injections on innocent children? Do you want to cause this kind of pain to parents?

I've listened to hours and hours of testimony and information from people on both sides of this issue and the only support I've heard from adults in support of COVID vaccines for children is that they will allow us to move past this pandemic and allow a return to normalcy.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern:

I am writing to you as a concerned citizen of Washington State. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to look into all aspects of this issue. Currently, the only accepted solution is that the vaccine is the one and only way to proceed in health for our communities and states.

However, in years past, we as individuals and parents, supported by the medical community, considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story, and a successful way through this, and your decision is an important part of it.

There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently, CDC Director Rochelle Walensky and Dr. Anthony Fauci, have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda. Why would push a vaccine that does not even prevent the virus it is designed for?

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted on? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during World War II? It may have seemed like the best option at the time, however it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of current tyrannical narrative. You have so many people cheering you on to stand for human rights, including medical freedom of choice.

Sadly, the push for mandating a vaccine, and the proposed policies which could follow, could place health officers in the position of managing a police state. We are not in an emergency situation which might justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. Continuing down this slippery slope, Washington State Board of Health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington. After all, maybe that is why you have this position at such a time as this. May God give you strength to make the wise decision.

Sincerely,
Heather Clinesmith

Hello there,

I am writing to you concerning the possible vaccine mandate in Washington state public schools. COVID-19 does not pose any serious risk to children or young adults and the most recent strain of the virus, Omicron, while being more contagious than the previous strains, comes with much less severe symptoms. Furthermore, I oppose a vaccine mandate for the students in our public schools systems. This vaccine is way too new and was developed way too fast to even consider mandating it, especially for the age group that it affects the least. Recent studies from the CDC have even shown that efficacy with specific COVID vaccines may be down to 20%. If you really care about the children in our state you will not require them to take this vaccine that they do not need. This does not even talk about the dangers to children in taking this "vaccine"

Furthermore, If I am understanding correctly there is potential debate about requiring government control of quarantining individuals who test positive for Covid. (I believe WAC 246-100) This is so beyond appalling that this would even be a serious conversation. The parents of the students in Washington state public schools can and should be able to determine when their child is safe to return to school if a child is exposed to COVID-19 just as has been the case with any other virus in our history. This is nothing more than a flu or cold, especially for children. We all know this , we all know that children are not seriously affected by this virus. We all know that the numbers of deaths due to Covid have been completely manipulated to induce fear in our society. As an example, Illinois Department of Health recently made it very clear that deaths attributed to Covid were any death for any cause as long as the person tested positive for Covid. Her words. Lets not dig a hole any deeper than has already been dug in politicizing something that should never have been political.

We are not fools, we will not be duped and we will not live in fear anymore. This overreach is appalling and anti-American. This should not even be up for debate. Do your jobs and act with integrity and a conscience and morals that are consistent with those of this great nation and those of this state that you have been appointed to represent..

Sincerely,
Megan L Oestriech

I am writing as a resident of Washington state to let you know my feelings on this unconstitutional and tyrannical overreach of power you think you have. Gov Inslee has obviously led you to believe you're more powerful than you actually are.

You have no right deciding what is best for our children. You are not the parent, grand parent or guardian. You are a public servant, hired and paid for by the people. and guess what, you're doing a very poor job and really pissing the people of Washington off.

Children have a 99.9% chance of surviving covid. They do NOT need an experimental drug injected into their innocent bodies due to your crazy beliefs that you are protecting them. AGAIN, not your job! Covid is being spread by both the vaxxed and unvaxxed, so what's the point? You're falling into the tyrannical beliefs of our government, leading you to false thinking that you're doing the best for everyone, when time and time again, it's proven to be not the case.

Over the years, many experimental drugs have been pulled off the market due to lack of study, illness or even death. But we don't like to talk about that because it might upset someone and cause them to think on their own. Nope, definitely don't want the people to do that!

Give this shot 10-20 years of long term effect studies and bring this idea back to the table. Our children are not guinea pigs and I refuse to allow you to act as if they are.

To date, 55000 children have been pulled out of public schools here. If this ridiculous idea is pushed through, I believe you will see a mass exodus from public schools and Washington state. At \$17000.00 dollars per enrolled child, do you really want to push it and see how many more will leave the public system?

We the people have the power to bankrupt your school system and I'm really not sure you want to see how far we will go to protect our children.

Please reconsider and drop this ridiculous notion of protecting our children. You're doing just the opposite.

Sincerely,

A concerned parent and tax payer.

Subject: "No!" To adding vaccine mandates to requirement list

External Email

Dear Board Member,

I ask the Board to exclude the COVID-19 from the list and NOT implement a Covid-19 Vaccination Mandate for Childcare and School admission. My logical reasons are as follows:

1.

The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.

2. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.

3. According to CDC & WHO data, their could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.

4. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by dis-enrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

5. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

I respectfully ask you to consider my logical points based on data and strong family values.

Kathy Varela

To Whom It May Concern:

This is overreach of power. It is the right of the parents, not the Board of Health, to determine whether or not a medical procedure is right for their children. It is also worth noting that the EUA approved "vaccines" have not been fully tested, with the FDA requiring a five year study into myocarditis for juvenile recipients. Also worth noting is that Comirnaty is not currently on the market as such and judges around the country are throwing out mandates because of this technicality, citing that one cannot mandate a product that is not available.

The parents in Washington will be a squeaky wheel and we will make sure that you hear our voices. Our children deserve better. Data shows that children are less likely to suffer serious cases or side effects from Covid-19 and its variants. The biggest risk at this point is an over-stepping group of unelected bureaucrats who see it as their responsibility to usurp the sovereign right of the parent.

Thank you for your time in reading this and I hope you hear us. We want what is best for our children. Please do the right thing and do not mandate the COVID-19 vaccine until there is more solid data.

To Whom it May Concern;

I am emailing everyone here due to the vaccine mandates. I hear its now coming down the line to our school aged children. I am hear to tell you now that if this is something you think that public schools need to do, you may want to think twice about that. Public schools are supported by a large part of our tax paying dollars. I will tell you now that if this is implemented into schools, there will be a lot of people out of jobs because there is a larger part of our communities that do not believe in vaccinating our children then you even think!

What happened to my body my choice...does that now only apply if we are picking our genders?

Trying to force this upon OUR children is sickening. They say history repeats itself well you all better read up on past history and trying to control people and segregate them. Instead of religion or race, now its by vaccination status!

There are lots of unknowns with this vaccine, we need at least 5 years to testing/research before we can really understand any risks. Peoples immunities after getting COVID, is critical to saving lives from this disease. I am telling you that there are a lot of parents who will not their child/children to part of the most radical medical experiment in human history. I'm willing and my family is willing to risk it because the analysis isn't even close to being done. There is no way anyone is going to force their beliefs on my child!

There is going to be a lot of schools without students!

Thank you for your time,
Dallas Simmons, Concerned parent

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Hello,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thank you.

To whom it may concern,

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of Washington state education is in store if this becomes mandatory.

Best regards-
Danyele

To Whom It May Concern;

As a mother, entrepreneur, and taxpaying citizen of the State of Washington, I am both disgusted and appalled that the upcoming discussion to remove a medical freedom of choice is even being considered. It seems the dominant party of the State would support the freedom of a woman's choice to abort (MURDER) an unborn fetus with no freedom inside the womb of it's own. So I'll keep my words brief... if it is required for children to get vaccinated for the COVID-19 virus, I WILL remove my children from public school, and homeschool my children. I refuse to inject my children with a poison, developed in haste to a virus no more deadly than the seasonal flu, and treatable with natural remedies. I have faith that I am making the most informed decision for my children and my family.

Sincerely,
Concerned Voting and Taxpaying Citizen

Hello,

As a parent of two elementary age children I am concerned that you are considering mandating Covid vaccines for children in school, and we the parents strongly oppose such a mandate. If vaccines are as effective as they say, everyone should be free to make their own decision. We now can see, after 2 years of living with many restrictions that the spread hasn't slowed, but also the kids have gotten Covid, it looked like a mild cold on them, they quickly recovered and now they have natural immunity. We ask that you would prioritize the good of the children, and their mental health, and rather lift restrictions, after such a long time, many already have immunity to the Covid virus, yet we see mental health and anxiety getting worse in young children, please consider this, and open the schools more, we advocate for local control, down to each school.

Thank you,

~Anca Rowland

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am appalled and outraged at the thought of becoming a criminal based on personal choices.

The "my body, my choice" movement with women's choice of abortion comes to mind.

This country is tearing itself apart, over the flu?

Spanish Flu More than 50 million people died of the disease worldwide

Why are we going crazy over the natural selection of a disease.

With the vax being available to those who want it, I'm at a loss for words of what's being proposed.

How else can I express this to anyone and have it actually be heard, recognized, and validated.

We appreciate the opportunity to work with you.

You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for taking all the measures necessary to keep our kids and teacher safe. I am in favor of requiring covid-19 vaccinations in school just like the other vaccines that we have been able to stop from killing or causing great harm to kids.

Thank you for all the hard work and time you have put into making sure everyone life and health is the top priority!

Dear Sir/Madam,

I am here to express my strong support to making Covid shots mandatory for child care and school admission.

Covid vaccine has been prove safe and effective. It is the most cost efficient tool to defeat the pandemic. The mandate will save thousands of lives, and they are our neighbours and kids.

Thanks.

Subject: PLEASE mandate COVID Vaccinations for public school students

External Email

To everyone here,

I noticed someone on Facebook posting about a possible mandate for requiring COVID Vaccinations for public school students. While anti-vaccination seems to have the loudest voice, I personally would like to say you have a great deal of support for this. As a parent, a teacher, someone who volunteers in theatre and soccer, and has several friends who own small businesses, I REALLY want to get back to some sort of normality. I have personally seen COVID cause deaths and mental health issues like never before. I trust the science. PLEASE DO NOT let people make this political.

Thank you,
Lena Cooley

Subject: Board Questions

External Email

Is there any consideration to 'risk level' based upon variables such as BMI, cardiovascular fitness, diet, sleep quality, and health history to determine their need for vaccination?

Does the government factor it's own interjection into the daily lives and free choices of individuals when it comments on 'declining mental health'?

If the vaccinated are still liable to spread the illness, is there any suitable retribution for wrongful termination if a person was fired or let go for being unvaccinated?

Does the weak protection and potential negative health effects of continual vaccination cause any sort of concern for the state government?

If the government is the perpetrator of 'systemic racism' wouldn't the best response of the government to remove themselves entirely from the situation?

I am against any covid19 vaccination mandates for children and adults. In no stretch of the imagination can there be full informed consent for these vaccines and boosters. Long term effects are unknown. Children are at almost zero risk. My children are mine, and under my authority. I am the only authority for my children and their health care, mental care and physical health. In no way would I consider continuing public school education if any vaccines are mandated for enrollment.

I am furious there is current mandatory covid testing for inside sports at schools. These mandatory testing is directed to only un-vaccinated children. This is divisive and have segregated children. This is not forward progress and the board of health should recognize this obvious discrimination. Recognize this as a mistake and correct this issue. We must think critically and consider the effects of rules that discriminate.

My children cannot participate in sports activities at our Enumclaw School District because we will not participate in covid testing of healthy athletes.

We must make healthy changes to enable our school age children to engage in healthy sports activities instead of subjecting them to unnecessary testing.

Masking children at school should absolutely be voluntary and individual choice. It is not the obligation of children to "keep the school open". Children are experiencing increased struggles with behavior and depression and anxiety. Trying to focus on school work and tasks are being overwhelmed by mask mandates. The school environment is very hostile. Teachers and staff are relentless in mask compliance and students are policing eachother instead of making friends or learning about eachother. The emphasis of mask wearing is way more important than actual school work or engagement of to fulfill educational standards. I am ashamed we are not encouraging high standards of education, instead the schools are demanding mask compliance or a student is dismissed to home. Is this the purpose of education?? Preventing children from being in their classroom?

Mandates are not the solution or answer to any current global problem.

Changes must be made soon, for the sake and sanity of our children.

Thank you,
Rachel Nelson

To whom it may concern,

I am absolutely against any of the proposed covid policies that are overreaching and against my religious freedoms and autonomous rights.
I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

It is absurd to think anyone should be forced to receive a vaccine that does NOT prevent contracting the virus nor spreading the virus. It is absurd to mandate a vaccine when Covid-19 has a low fatality rate. It is absurd to mandate a vaccine when most age groups, specifically children, do not have a high risk of serious illness due to Covid-19.

It is up to the PARENTS whether or not an emergency vaccine should enter any minor. There are zero long term studies of the side affects (due to the vaccine being new) of this vaccine which should worry any health department. All long term expectations of the vaccine are speculative and therefore should not be regulated for anyone.
No child should be subjected to an experiment. Especially a mandated experiment.

As parents, we are begging you to let us choose for our children. We do not want to take traditional schooling away from them as it is not us taking it away, but others that have never met the child.

Good afternoon,
I just learned of the agenda items on today's meeting, and realize by the time you see this the meeting will likely be over. I am writing to you now, in the event the decisions on the agenda items are tabled for later discussion.

I strongly oppose mandating COVID-19 shots for anyone, and strongly object to the formation of the Technical Advisory Group to review information about the shots with the intent to mandate the shots for school.

In addition, I support Informed Choice WA's petition asking for a new rule to prohibit BOH from requiring for school attendance any Emergency Use Authorized products, or licensed products that lack completed Phase 3 trial studies.

Thank you,

Please take the time to read this with an open mind. I thank you for your time and consideration.

Heavenly Father! Hear our cry, Abba Father!

You are sovereign and we are Your people whom You will protect. Your Word says where two or more are gathered You are in the midst and You hear.

Father God, You are mighty, powerful and just. You will have the final say in all of this, the chaos of the world today. You will repay those who seek to do evil, for Yours is the glory and the victory!

Father God, I pray for all those on the WA State Board of Health. I pray Lord God for their eyes to be open and their ears to hear all that You have to say to them. I pray for their souls to move them to do Your will and not the will of the evil one.

Lord God, your people were given a free will, a free choice over our lives and You declared that from the beginning of time and before creation.

Lord God, I have already lost my job along with so many others and You have proven that what the enemy meant for evil You have turned it around for our good and for Your glory.

Your remnant will stand fast in You Lord no matter what the enemy wants to throw at us next. We will stand for our God given right to make our choices on what to do with our body and for our children's bodies. We listen to You Father and not the ways of men.

I pray Father against this evil of the government trying to take initiative of telling us what is right or wrong for our children and our families and I rebuke those who are pushing this evil, in Jesus Mighty Name!

I pray for the salvation of Michelle Davis, Melanie Hisaw, Christy Hoff, Stuart Glasoe, Samantha Pskowski, Kaitlyn Donahoe, Caitlin Lang, Lindsay Herendeen, Tracy Schreiber, Hannah Haag, Kelie Kahler and Nathaniel Thai. I pray Father that they will fight this darkness and shine Your Light by voting against this evil of the enemy. Speak to them Father and touch their hearts and minds in such a profound way that they choose to do right by Your people. Let them know that their decision will bring great division and strife to our state and our country. That their decision could bring disaster and great turmoil, hurting innocent people and that they will pay great consequences if they do not listen. Lord God, people are divided, our state is divided, our country is divided and the world is divided and this virus is wreaking havoc on Your creation. The enemy has stolen so much from Your people, putting fear in their hearts and minds and is trying to take our freedom and liberties away, which our father's founded this great country, on. If we don't

come together in the body of Christ now and take back what has been lost, our country will fall.

Father God our country has already turned our back on You by accepting things that are ungodly, but if our country turns its back on the very people You love, You will protect us and God only You, know what that will take. We will trust in You and will never give in or give up, no matter what, for we lay down our lives for You and Your Kingdom.

Father God, as Jesus said on the cross, these people do not know what they do, for if they understood, they would stop. Give them understanding Father by touching each one in Yeshua's precious Name.

Father God, You have spoken to Your people, those who have been earnestly seeking You, You have told those who would listen, not to take this vaccine. Those who vote yes, our voting against more than Your people's right to choose, they are voting against You God!

I want to warn each one on this board, of Your Word and the Power that is in Your Word and the spiritual authority that is given to Your people to fight the evil one, as Jesus did in the desert. It is written! "Therefore, I say to you (Michelle Davis, Melanie Hisaw, Christy Hoff, Stuart Glasoe, Samantha Pskowski, Kaitlyn Donahoe, Caitlin Lang, Lindsay Herendeen, Tracy Schreiber, Hannah Haag, Kelie Kahler and Nathaniel Thai), every sin and blasphemy will be forgiven men, but the blasphemy against the Spirit will not be forgiven men.

God's Spirit is talking to You through His people, I implore You to heed what the Spirit has to say. Listen to Your heart and what God has to say and do not be part of this evil. Wash Your hands of it and dust off your feet, no matter the cost, listen to what the Lord is saying to you.

The things that may seem small, such as voting yes or no, can impact the spiritual realm in ways we may never understand.

What we do know is Jesus will return, the day and the time is unknown to us, but the decisions we make today could very well affect whether He comes sooner or later.

I urge each one of you to take this vote very seriously, for the Lord implored me to pray for you and I have prayed what was laid on my heart.

I ask You, all to vote, NO, in regards to the PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Obey God and leave all the consequences to Him. He will never leave us or forsake us, but He expects us to be ONE in Unity, in the Spirit and in the body of Christ, being bold and courageous in Him. Not looking at the seen but looking to the unseen things of God, keeping the faith and fighting against the principalities of darkness.

We each need to do our part and I pray Father that You bless this prayer, bless the people who read it and give wisdom, knowledge and understanding to all!

In Jesus Mighty Name, the Name above all Names, the Name, that one day, every knee will bow to and confess is Lord! We ask You, Holy Spirit move in and through Your people, in Jesus Name! And All the Saints say! Amen and Amen!

Subject: Camps

External Email

What are you doing or thinking? Has history not taught you anything? Did you realize that even vaccinated people are getting and spreading Covid? Your camp has nothing to do with stopping the virus...but everything to do with control over the American citizens. You all should be ashamed for even thinking this would be a good idea. Over half of the population has been vaccinated and guess what this so called vaccine is not stopping it. According to the media it is even worse, yet you want to take law abiding citizens and force them against their will to get a shot they do not want...that has proven itself not to work. If it did work then the cases would be at nil. This is a form of insanity and exactly what the Nazis did. I pray that the board will listen and be rational in there thinking as they possibly lead us down a very scary and dangerous road.

To the Washington State Board of Health:

Hello! Let me first start by stating how so very thankful I am to be back living in Washington State! I had moved away for a decade and resided in Kansas during that time. When it came time for me to decide where this next chapter of my life would take place, I was beyond thrilled to move my then 4 year old and tiny baby bump back to Washington where I grew up. I was so excited to raise my children in the same county in the same state my amazing childhood took place!

That tiny baby bump decided to make her grand entrance on March 10, 2020. Our state shut down within days of her birth. For her entire life we've stayed inside, worn masks, social distanced, gone without family, struggled financially as there was no unemployment or relief money for people like me, and other than food stamps (for which I'm extremely thankful) no financial assistance outside of my mother who has kept a roof over our heads. How could I work as a single mother with a child at home distance learning? The point? I have followed every rule the state has suggested or mandated I follow for myself and my children. This year we even all took covid tests just to go to my mom's (she and my step father are vaccinated) for Christmas dinner.

As we've moved on from the original covid, and the delta variant, the omicron variant is the current threat. A much more contagious but, per the data the state and my local county put out, is less likely to cause death. I have several friends who are home sick right now who are fully vaccinated and boosted, as required by their federal or state places of employment. Fully vaccinated and boosted, home sick, because the data shows the vaccine is not protecting from this current strain as hoped.

My 7 year old has been back to in person learning since last school year. She's ridden the bus with other children, had lunch at school with other children, and played on the playground at recess. All of whom were unvaccinated until recently. Her bus driver is even unvaccinated. No one in her class has been sick. No school days missed because of a positive test result. They are sitting close enough to share their lunches with other children, without masks, and not one has gotten sick.

But you know who did get sick? My 7 year old. When she was just 19 months old. From the Pentacel vaccine. Her reaction was severe enough that she was misdiagnosed 3 times. Each misdiagnosis equally terrifying, one requiring multiple surgeries and radiation that I'm eternally thankful didn't happen. She cannot get vaccinated again simply because they don't know which ingredient caused her reaction. Her pediatrician here in Washington cannot sign a medical exemption because of policy. Even with all my daughter's medical records, she didn't see it and the Washington State requirements can't be met this many years later.

Should my daughter be denied public education for something she has absolutely no control over? Should she lose her friends? Her ability to play soccer which she loves and intends to play for UW? What is the difference between her being excluded for something

she has absolutely no control over and someone who has no control over their skin color or gender of who they love? She has attended public school in Washington since September 2019 unvaccinated against the measles, mumps, rubella, whooping cough, etc. Without harm to herself or others. And she has several friends both from school and her soccer club that are also unvaccinated or only partially vaccinated. Should they all be left out of publicly funded education?

I'm begging you to be logical. The vaccine is not effective against the Omnicrom variant. The current threat to our population. Requiring children have an ineffective medical anything to participate in basic education is cruel. Please put your fear of the unknown to the side and really think about what you're asking of children like my daughter. Who have all already been through enough. Our children are social distancing, wearing masks, sanitizing constantly, and following the rules for safety and it's working! Please don't make it mandatory for children to be vaccinated for school!

I am 100% against the proposed COVID policies. They purposed policies are a government over reach.
There is not enough data to support this. The Trusted News Initiative has censored and pushed one narrative to the people.
I stand against these proposed WAC's : WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.
This goes against my constitutional rights. My personal beliefs as an American citizen.
If these pass, I will leave the state and relocate to a state which protect and honor our rights and freedoms.

Vaccinated people are still contracting and spreading COVID, they are filling up the hospitals. Also in fact dying of this virus after three shots.
This is America stand up and act like it!
Consider you're actions. We the people have the power. Government works for the people.

I am completely against any of the proposed Covid policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC, 246-100-040, WAC 246-100, WAC 246-105.

These are unconstitutional and completely against all that the United States stands for.

Subject: Comments for the advisory board regarding isolation camps

External Email

I am opposed to making isolation camps for any persons in our State for the following Reasons:

1. All persons have a right to freedom unless tried by a court and convicted by a jury of their peers.
2. No one has the right to detain any one just because they think they are contagious.
3. Theses camps are a huge expense and absolutely should not be builtthis type of expense requires over sight, review, and public input which clearly hasn't happened.

Do not add any new rules that restrict freedom or cost the taxpayers \$\$.

Subject: Comments for Board of Public Health meeting 1/12/22

External Email

Hello,

Very concerned as the board is not addressing and actively dismissing public comments and concerns that were supposed to be addressed today.

Isolation and detainment camps are unconstitutional.

Vaccine mandates are unconstitutional.

Why were their job descriptions for "Isolation and Detainment Strike Team Consultants" for the unconstitutional COVID quarantine camps? Why was the job description changed for softer language???

Why are you ignoring public concern?

It's not a false rumor, the board was supposed to address public concerns about vaccine mandates, child vaccination, and covid quarantine camps...I believe you changed your mind because of public outcry and you don't know how to handle the public concerns.

The Board must be "fair and unbiased" and provide answers to the public.

Normally virology dictates that a novel virus will go through many variants until a less severe and more communicable variant comes out on top. Then it becomes a normal endemic virus, like our normal cold and flu. Also, there will always be increased case numbers when we are doing more testing, this is not a valid measure of the current pandemic...it's a logical fallacy and really poor statistical analysis.

Children are less at risk than fully vaccinated adults, why would we risk our children's health and development when they have literally no risk?

NYT article states that "43% of covid hospitalizations are not there due to covid but have been admitted for another reason." You are lying that hospitals are overwhelmed due to covid, they are overwhelmed because you fired healthcare workers that didn't want the vaccine and because you closed down smaller hospitals that could have treated patients.

Natural immunity is stronger than vaccine immunity. Why can't we use natural immunity to keep our jobs?

Can you please address the 21,382 deaths vaccine deaths reported by VERS data from December 2020 to present?

Please address all of these concerns!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Constitutional: freedoms to choose the best choice for their family.
- 2.

Who says one medicine is healthy for everyone? Not even my doctor prescribes the same medication for me and my family.

3. How are we aware of the consequences of getting the shot?

Thank you for hearing my voice,
Resident of WA State.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

They are not effective. Vaccinated people are still getting sick. Meanwhile us unvaxed people are being harassed to get tested when there aren't enough tests for the students and parents.

I need legal representation to fight the mandatory testing forced on me and my-coworkers because we are unvaxed.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:
Too many vaccines!

In addition, when people read BOH Agenda Item #11, they note: "Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry – Possible Action"

When they search for that Chapter, they find the immunization code, and believe the Board of Health intends to take steps to add COVID-19 shots to the existing schedule. At this writing, it is frankly unclear what is intended to be considered in this regard.

Dear Washington State Board of Health

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Sincerely,

Juanita Kolbeck

Why are you not following the data from around the world regarding "covid" cases. The vast majority of covid patients in hospitals are FULLY VACCINATED. Scientists around the world have discovered and fully publicized that the vaccines produce the very spike protein and symptoms that Covid19 does. Are you unaware of this? If so, shame on you. If not, than you are obviously evil and have been bought by the powers that control the pandemic. Know that you wont get away with this.

Subject: comments - 1/12 meeting

External Email

Hello,

I was scheduled to speak at today's meeting, but I will have to drop for work related matters.

My main comment concerns the vaccine requirement/mandate for children. The science and the statistics of COVID all indicate that COVID-19 is a very low risk for health children. Further, the current vaccines are NOT fully-FDA approved, but rather are approved under an Emergency Use Authorization. No mandates of these vaccines (for children or even for adults) should be considered until these vaccines received full and final FDA review and approval (and not EAU). All the vaccines cited in your materials that are "required" for school age children (I think there are 11) are fully FDA approved.

You all need to follow the science and the facts. COVID-19 does NOT represent a significant threat to the health population, certainly not the health population 0-19. Stop being so fixated on control and government power, and start allowing people to apply risk based approach to this issue. COVID-19 will become (if it has not already) an endemic, and it will be with us (like the flu) for the foreseeable future. Draconian and totalitarian methods are not a long term solution.

Also, and I know this is a DOH issue, but why did DOH stop reporting COVID-19 deaths by age group?

Thanks for your time and service. Lets Make Washington a great place to live and work again, and lets protect liberty.

Subject: Comment to WSBOH 1.12.22

attachments\C2EC8FFCF2D64707_WSBOH COMMENTS 1.12.22.docx

External Email

Hello WSBOH,

I was not called on today so am sending my comments to the Board.

WSBOH COMMENTS:

My name is Henriët Schapelhouman and I am a King County resident, voter, business owner and influencer.

My comments are related to required vaccines for children and adults, involuntary treatment, and the rule making scope being not fair and biased.

Requiring vaccines for children and adults:

1. Vaccines considered for this rule as well as required for children are dangerous and unconstitutional.

* Note that Article 1 Section 1 of the Washington State Constitution says that "governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights." Individuals in Washington State have the right to freedom of religion as well as freedom of conscience.

* The condition is that the vaccine is for a preventable disease. Covid is NOT a preventable disease. Additionally, the vaccine is not effective or safe. In fact, studies show the vaccine makes things worse.

Please consider the research by Kyle A. Beattie entitled Worldwide Bayesian Causal Impact Analysis of Vaccine Administration on Deaths and Cases Associated with COVID-19: A Big Data Analysis of 145 Countries (the PDF version is here).

The study found that the COVID vaccines cause more COVID cases per million (+38% in US) and more deaths per million associated with COVID(+31% in US).

The abstract says:

The statistically significant and overwhelmingly positive causal impact after vaccine deployment on the dependent variables total deaths and total cases per million should be highly worrisome for policy makers. They indicate a marked increase in both COVID-19 related cases and death due directly to a vaccine deployment that was originally sold to the public as the "key to gain back our freedoms." The effect of vaccines on total cases per million and its low positive association with total vaccinations per hundred signifies a limited impact of vaccines on lowering COVID-19 associated cases. These results should encourage local policy makers to make policy decisions based on data, not narrative, and based on local conditions, not global or national mandates. These results should also encourage policy makers to begin looking for other avenues out of the pandemic aside from mass vaccination campaigns.

The vaccines are making this worse, not better. This is why we are not getting ourselves out of the hole. Mandating vaccines based on this information makes no sense. This is hardly the first study to reach those conclusions. These studies, all done independently, found the same thing—the more you vaccinate, the worse things get.

The Denmark study (which shows you have to boost every 30 days to maintain protection.) Also, 80% of the COVID deaths in the UK are those who were vaccinated.

* The Omicron explosion is proof that vaccines do not work because the majority of people are vaccinated, and the cases are greater than ever. More vaccinated, more Omicron.

* In a UK Government released data, it showed the vaccinated population accounted for 61% of all cases, 66% of all hospitalizations, and 81% of all Covid-19 deaths between October 25 and November 21, 2021. In contrast, the unvaccinated were 39% of cases, 34% of hospitalizations, and 19% of deaths.

* The vaccine is more dangerous than the disease:

Sucharit Bhakdi, MD, a microbiologist, and Arne Burkhardt, MD, a pathologist, performed autopsies on 15 people who all died within 7 days to 6 months after receiving a Covid vaccination. While the coroner and the public prosecutor didn't associate the vaccine as the cause of death in any of the cases, the analysis by Dr. Burkhardt and Dr. Bhakdi revealed that the vaccine was implicated in the deaths of 14 of the 15 cases. Killer T-lymphocytes were linked to micro clotting and inflammation. In the 14 cases, there was widespread evidence of the body attacking itself, and the heart was attacked in all 14 subjects, showing autoimmunity and breakdown of the innate immune system.

Fifteen bodies were examined (all died from 7 days to 6 months after vaccination; ages 28 to 95). The coroner or the public prosecutor didn't associate the vaccine as the cause of death in any of the cases. However, further examination revealed that the vaccine was implicated in the deaths of 14 of the 15 cases. The most attacked organ was the heart (in all of the people who died), but other organs were attacked as well. The implications are potentially enormous resulting in millions of deaths. The vaccines should be immediately halted.

EXCERPT: They discovered that in 14 of the 15 patients there was widespread evidence of the body attacking itself, something that is never seen before. The heart was attacked in all 14 cases.

A number of salient aspects dominated in all affected tissues of all cases:

- * inflammatory events in small blood vessels (endotheliitis), characterized by an abundance of T-lymphocytes and sequestered, dead endothelial cells within the vessel lumen;
- * the extensive perivascular accumulation of T-lymphocytes;
- * a massive lymphocytic infiltration of surrounding non-lymphatic organs or tissue with T-lymphocytes.

Lymphocytic infiltration occasionally occurred in combination with intense lymphocytic activation and follicle formation. Where these were present, they were usually accompanied by tissue destruction.

2. The approach of the Board of Health is not fair or unbiased in its rule making scope. There are unrepresented groups: the unvaccinated and the Covid-recovered.

* Unvaccinated: Those who are unvaccinated have a right to their position and may be making an informed choice based on their health. My 90-year-old mother has a heart condition. It is not safe or wise for her to be vaccinated. There are many other cases that warrant avoiding getting vaccinated. For children, who basically have no risk of death or long-term effect from Covid, they should be protected and not forced.

* Covid-recovered: They have immunity which lasts longer than vaccine immunity. An Israeli study of 35000 showed that natural immunity after having had Covid is 13 times greater and more effective than protection from vaccines.

3. Do not add Covid-19 vaccine as required for children to attend school. Do not require Covid-19 vaccines at all. They don't work. They are harmful.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons: #1. Children are very unlikely to have harsh reactions to Covid 19

#2 The risk factor of the disease is far less harmful than the possible side effects of an experimental Vaccine!

#3. The emotional and educational damage that is being caused by the forced masking of our children, etc is unimaginable.

How, do you people sleep at night!?

Subject: Citizen concern about January 12th, 2022

External Email

Please take the time to read this with an open mind. I thank you for your time and consideration.

Heavenly Father! Hear our cry, Abba Father!

You are sovereign and we are Your people whom You will protect. Your Word says where two or more are gathered You are in the midst and You hear.

Father God, You are mighty, powerful and just. You will have the final say in all of this, the chaos of the world today. You will repay those who seek to do evil, for Yours is the glory and the victory!

Father God, I pray for all those on the WA State Board of Health. I pray Lord God for their eyes to be open and their ears to hear all that You have to say to them. I pray for their souls to move them to do Your will and not the will of the evil one.

Lord God, your people were given a free will, a free choice over our lives and You declared that from the beginning of time and before creation.

Lord God, I have already lost my job along with so many others and You have proven that what the enemy meant for evil You have turned it around for our good and for Your glory.

Your remnant will stand fast in You Lord no matter what the enemy wants to throw at us next. We will stand for our God given right to make our choices on what to do with our body and for our children's bodies. We listen to You Father and not the ways of men.

I pray Father against this evil of the government trying to take initiative of telling us what is right or wrong for our children and our families and I rebuke those who are pushing this evil, in Jesus Mighty Name!

I pray for the salvation of Michelle Davis, Melanie Hisaw, Christy Hoff, Stuart Glasoe, Samantha Pskowski, Kaitlyn Donahoe, Caitlin Lang, Lindsay Herendeen, Tracy Schreiber, Hannah Haag, Kelie Kahler and Nathaniel Thai. I pray Father that they will fight this darkness and shine Your Light by voting against this evil of the enemy. Speak to them Father and touch their hearts and minds in such a profound way that they choose to do right by Your people. Let them know that their decision will bring great division and strife to our state and our country. That their decision could bring disaster and great turmoil, hurting innocent people and that they will pay great consequences if they do not listen. Lord God, people are divided, our state is divided, our country is divided and the world is divided and this virus is wreaking havoc on Your creation. The enemy has stolen so much from Your people, putting fear in their hearts and minds and is trying to take our freedom and liberties away, which our father's founded this great country, on. If we don't

come together in the body of Christ now and take back what has been lost, our country will fall.

Father God our country has already turned our back on You by accepting things that are ungodly, but if our country turns its back on the very people You love, You will protect us and God only You, know what that will take. We will trust in You and will never give in or give up, no matter what, for we lay down our lives for You and Your Kingdom.

Father God, as Jesus said on the cross, these people do not know what they do, for if they understood, they would stop. Give them understanding Father by touching each one in Yeshua's precious Name.

Father God, You have spoken to Your people, those who have been earnestly seeking You, You have told those who would listen, not to take this vaccine. Those who vote yes, our voting against more than Your people's right to choose, they are voting against You God!

I want to warn each one on this board, of Your Word and the Power that is in Your Word and the spiritual authority that is given to Your people to fight the evil one, as Jesus did in the desert. It is written! "Therefore, I say to you (Michelle Davis, Melanie Hisaw, Christy Hoff, Stuart Glasoe, Samantha Pskowski, Kaitlyn Donahoe, Caitlin Lang, Lindsay Herendeen, Tracy Schreiber, Hannah Haag, Kelie Kahler and Nathaniel Thai), every sin and blasphemy will be forgiven men, but the blasphemy against the Spirit will not be forgiven men.

God's Spirit is talking to You through His people, I implore You to heed what the Spirit has to say. Listen to Your heart and what God has to say and do not be part of this evil. Wash Your hands of it and dust off your feet, no matter the cost, listen to what the Lord is saying to you.

The things that may seem small, such as voting yes or no, can impact the spiritual realm in ways we may never understand.

What we do know is Jesus will return, the day and the time is unknown to us, but the decisions we make today could very well affect whether He comes sooner or later.

I urge each one of you to take this vote very seriously, for the Lord implored me to pray for you and I have prayed what was laid on my heart.

I ask You, all to vote, NO, in regards to the PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Obey God and leave all the consequences to Him. He will never leave us or forsake us, but He expects us to be ONE in Unity, in the Spirit and in the body of Christ, being bold and courageous in Him. Not looking at the seen but looking to the unseen things of God, keeping the faith and fighting against the principalities of darkness.

We each need to do our part and I pray Father that You bless this prayer, bless the people who read it and give wisdom, knowledge and understanding to all!

We would like to express our extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medial products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.
Michelle in Bellingham, WA

***OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about covid injections for consideration of mandating them for school required list

***SUPPORT the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list

It is extremely unsafe and unethical to mandate medical procedures of any kind that do not have a complete randomized controlled clinical trial. Medical Injuries are always under reported. The covid injections have record numbers of injuries that are reported, and since injuries from all injections are always under reported, the real number of injuries occurring from covid injections is unthinkable. It is imperative that all medical procedures are never mandated, especially when the randomized controlled clinical trial was never completed. The harm being done is inexcusable. Even more so, when the companies have no liability to produce a safe product.

To Whom This Concerns (which should be everyone),

As a resident of WA state, and a parent of a 5 year old who's had severe vaccine injuries, it is incredibly upsetting to know that there are people in favor of pushing through the proposed policy to include the Covid-19 injections as part of the school immunization requirements.

CONSIDERING:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

This is, in no way, listening to the TRUE science and is sheer domination of the masses for power and money.

I'm also NOT in favor of forcing, in any way, an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility, following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

These policies are flat out, attempts to strong-arm individuals who do not comply with the atrocious, ignorant leadership of the WA government.

Health and wellness have NEVER been prioritized - only pharmaceuticals and keeping people sick - mentally, emotionally and physically.

Mandate meditation, nutritious foods, proper sleep, physical exercise, and maintaining healthy relationships.

How about a policy to subsidize gyms & yoga studios and therapists?????

This state government is a disgrace.

IF you read this, thank you for your time. I hope one day, real health & wellness is considered, and prioritized, from the top down.

To The Board,

I am an employee of a public school receiving title funds and I do not want anyone to be asked to do anything with or to themselves or their children or others in their care in order to work for the children in our communities. I believe in medical freedom and a thriving public school system that serves all children. I should be unhindered by mandates to do my job no matter my medical choices or theirs or their parents or caregivers.

I see the effects of these things every day and you don't. Kids are suffering from these decisions and that can only worsen by continuing with forcing more medical care for them and their families. Keep your community free or see the degradation of society spiral downward. Bullying is preached down upon from our public schools, yet practiced regardless of what is preached. Research history please.

Regards for Freedom,
Citizen of King County

To whom it may concern,

I am writing to let you know that I am absolutely against any involuntary detention and/or quarantine! This is enough! COVID is a flu or a cold that is highly contagious, I get that, but the death rate and the rate at which people are hospitalized does not constitute this type of overreach by you and/or anyone else.

We, as citizens, are perfectly capable of making our own decisions about our healthcare. Especially when the vaccination doesn't even prevent you from contracting the virus to begin with. This isn't even rational thinking to consider this type of response. Not to mention that the vaccination is not even FDA approved. The one that is FDA approved isn't available anywhere and all those that are being offered are still under an Emergency Use Authorization.

I am also expressly opposed to the mandatory vaccination of children. There are a number of overwhelming reasons NOT to vaccinate children, but three that come directly to mind are:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I will definitely be joining the Zoom call next week, but wanted to get my opposition in on record before the meeting.

Thank you for your time and consideration.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

harm for the children of Washington. Further, this proposed Rule raises the question that if minors are harmed from the COVID-19 vaccine, who will take responsibility? Are you willing to be personally liable for any injured minors? Are you willing to bet the hard-earned money of the constituents of Washington to fund liability/compensation funds? I oppose adding COVID-19 to WAC 246-105-030 (or any other section of WAC 296-105) or requiring COVID-19 vaccine for children.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- *Medical treatment should never be mandated. It is between a person and their doctor
- *Health is not one-size-fits-all
- *There is no scientific evidence the vaccine has more benefit than therapeutics
- *Administering any medication without full disclosure of ingredients is immoral. Mandating it is illegal
- *the covid vaccines have by far the highest rate of injuries and deaths than any other medication on the market
- *the vaccines cause harm in that they give a false sense of security when in fact they neither prevent transmission nor contracting the virus
- *there are NO studies of the long term effects of these vaccines.
- *the government's roll is to educate and offer guidelines. Mandates are government overreach in the extreme.

It's shocking this even has to be said. Government does not have sovereignty over the people or the country.

□

On Jan. 12th at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

- To voice your concerns, register for the live webinar here:

https://us02web.zoom.us/.../reg.../WN_DjusY10WTj-EyQyDTdyxsw
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fus02web.zoom.us%2F...%2Freg.../WN_DjusY10WTj-EyQyDTdyxsw&data=04%7C01%7CW5BOH%40SBOH.WA.GOV%7Ce82f1aa5f1af49204f1b08d9d719ce3a%2F>

- You can also dial-in using your phone for listen-only mode: Call in: +1 (253) 215-8782 (not toll-free) Webinar ID: 894 7406 4216 Passcode: 957396

- Location: 101 Israel Rd. SE, Tumwater, WA 98501

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

DETAILS HERE: <https://sboh.wa.gov/.../MeetingInfor.../2022/January12Online>

Good afternoon,

I just learned of the agenda items on today's meeting, and realize by the time you see this the meeting will likely be over. I am writing to you now, in the event the decisions on the agenda items are tabled for later discussion.

I strongly oppose mandating COVID-19 shots for anyone, and strongly object to the formation of the Technical Advisory Group to review information about the shots with the intent to mandate the shots for school.

In addition, I support Informed Choice WA's petition asking for a new rule to prohibit BOH from requiring for school attendance any Emergency Use Authorized products, or licensed products that lack completed Phase 3 trial studies.

Thank you,

Johanna George

Woodland WA

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. I do not believe the science is clear regarding the efficacy of or the need for this inoculation, especially given the significant outbreaks in fully inoculated (with booster) members of the population.
2. The lack of adequate testing regarding children coupled with the knowledge they are at low risk for serious consequences.
3. Testing across the globe which indicates that naturally obtain antibodies are as or more effective at preventing or addressing infection than the so-called vaccine.
4. The rapid drop in the lethality of the virus/disease as it has mutated.

R,
Michael Clayton

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It is unconstitutional

It is against my freedom of the right to choose for my children what is right for them.

It is against my religious freedom

This is an emergency use only drug, it hasn't been fully tested.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- Risk of myocarditis and other health risk factors following EUA covid19vaccine;
- High survivability of school age children when exposed to covid19;
- Increasing risk of ostracization of children;
- Increased risk of disenfranchisement of children;
- Impairment of learning and development of socialization of children;
- increased risk of mental health disorders;

-

□

On Jan. 12th at 9:30 AM – 3:30 PM, the WA State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

- To voice your concerns, register for the live webinar here:

https://us02web.zoom.us/.../reg.../WN_DjusY10WTj-EyQyDTdyxsw
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fus02web.zoom.us%2F...%2Freg.../WN_DjusY10WTj-EyQyDTdyxsw&data=04%7C01%7CW5BOH%40SBOH.WA.GOV%7Ce1c95db110224c0c7eb008d9d6161583>

- You can also dial-in using your phone for listen-only mode: Call in: +1 (253) 215-8782 (not toll-free) Webinar ID: 894 7406 4216 Passcode: 957396

- Location: 101 Israel Rd. SE, Tumwater, WA 98501

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease
- * A decision in favor of this would prove gross overreach of power and cause a total loss of confidence in the board's ability to make reasonable decisions. - R Modderman

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The omicron variant is sweeping through vaccinated and unvaccinated populations equally.

The current "vaccine" was not created to target this variant and is an experimental medical procedure proving to not afford any protection or lessen the spread of illness.

This action uses our innocent children, the lowest risk population as lab rats for big pharma profits.

Please use actual scientific data, common sense, sound judgment and long range planning instead of knee jerk reactions to this current situation.

Thank you,
L Ferrel

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1-the survival rate for COVID-19 for school age. Children is very close to 100%, making a vaccine mandatory does not make sense.

2-freedom of choice must come first.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

In a study of 5 year olds and up

* The children were not examined for mild, asymptomatic myocarditis, which might cause long-term damage, as by checking troponin levels or echocardiograms, or for blood clotting problems, as by checking platelet counts and D-dimers.

* The only FDA-approved product, BioNTech's Comirnaty (not yet available in the U.S.) is required to do studies on myocarditis

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F15171> lasting 5 years.

* Monthly safety report cards on the three available vaccines, which have different dosages, are supposedly required, but none have been produced or released.

* The claim of 91% relative effectiveness against symptomatic COVID in children is based on 16 cases of COVID in the placebo group and three cases in the vaccinated group over the brief follow-up period. This is an absolute risk reduction of about 2%.

* We do not and cannot know the long-term effects on cancer, fertility, or autoimmune diseases. "But we're never going to learn about how safe this vaccine

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.theblaze.com%2Fnews%2Ffda-panel-covid-vaccine-effects-in-children%3Futm_source%3Dtheblaze-breaking%26utm_medium%3Demail%26utm_campaign%3D20211027Trending-FDAKids%26utm_term%3DACTIVE%2520LIST%2520-%2520TheBlaze%2520Breaking%2520News&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7967e42351

is unless we start giving it. That's just the way it goes," stated committee member Dr. Eric Rubin, physician at Boston's Brigham

To whom it may concern,

I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their child's health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my daughter and will pull her from public school if this mandate is implemented.

Thank you for your consideration

Michelle Lea

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- 1) It is far too early in the vaccine rollout to mandate them for anyone. The vaccines are still in the trial phase and should be exempt from any mandatory ruling.
- 2) The collection and follow up of data on vaccine injury is not transparent to the public; causing a reduced trust in the messaging about the vaccines.
- 3) Children have neither high risk for bad outcomes from COVID or high viral loads (e.g. transmissibility) to give COVID to others.
- 4) I work for a local health jurisdiction as part of the Immunization Program. I am not anti-vaccine but, feel that there is just not enough known about the long-term effects of the vaccines to require them.
- 5) I would like to see more emphasis on early treatment of COVID. We know that there are medications that work to reduce duration of illness and the need for hospitalization.

Kind regards,

Kari Lidbeck

I am opposed to making COVID-19 inoculations mandatory for school admission or childcare in our State for the following Reasons:

It is a gross overreach of the board's power, ineffective (based on the data/SCIENCE), unnecessary, and will cause a mass exodus from our public schools, and from our state. This means everyone will suffer since our schools will lose tax revenue and diversity of students. The decision to require such unnecessary extremes would prove unbelievably poor decision making skills on the part of the committee and be detrimental to all citizens.

Please do not take this ill advised additional step toward unraveling confidence in the board and in the leadership of our state.

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Jordana Shumway

Dear Washington State Board of Health

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Sincerely,

Lara olsen

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-

benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors
(americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization. This should not be passed as it should 100% be up to us as parents what newly developed vaccinations should be allowed in our children's bodies. Especially ones with side effects that are still being explored.

Thank you for your time.

Sincerely,

Kathryn Lowry

As a future respiratory therapist and seeing what the insides of the hospital look like these policies are absurd. Covid has infected my whole family as of three weeks ago and it was nothing more than the flu. Considering people also die from the flu in certain circumstances, I think this whole thing is being blown put of proportion. Stop with the mandates! Let kids go to school! Allow people medical freedom! And enough with the masks that don't work anyways! Let people make their own choices!

Dear Ladies and Gentlemen,

I am opposed to the institution of a COVID-19 vaccine mandate for school children.

The vaccine for Covid-19 does not stop the spread of the virus or it's variants.

The variants are weakening and providing natural immunity to the majority of the public

At least two of the vaccines were tested on the cells of aborted babies an act of murder and

is a violation of the sanctity of human life.

The newest variant Omicron produces a considerably less severe illness than the prior variants

Dr. Anthony Fauci, recently said that it's important to note that many children are hospitalized with COVID-19, not because of COVID-19.

The pediatric hospitalization rate has remained much lower than that of other age groups. Note that data shows children have by far the lowest hospitalization and death rates among all age groups. The data shows that generally, individuals older than the age of 70 are considered to be the most vulnerable to the CCP (Chinese Communist Party) virus, which causes COVID-19.

The CDC Director, Rochelle Walensky, admits vaccines don't prevent transmission of COVID-19, and deaths are most commonly from people with co-morbidity issues and were unwell to begin with.

There are side effects from the vaccine that cause myocarditis and pericarditis.

It sets a dangerous precedent to the citizens of the United States of America to create a two tiered system based on vaccine passports for adults and children.

The unvaccinated will be segregated from the vaccinated.

Washington State doesn't even do this with AIDS patients or to those who suffer from Tuberculosis.

That is what will happen when children are forced to get this disputed vaccine.

These are my arguments against forcing a CCP/Covid-19 vaccination on Washington State's school children.

Sincerely,

Linda Evans

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These policies are about more and more about control. Again never about the science (like you have been saying).

First Fact both vaxed and unvaxed spread covid. Oh yeah and both die from covid. Yet your targeting the unvaxed.

Second fact. 5-18 are the least of any age groups to be hurt by this dease but you are still pushing Vax for them.

Third fact you're pushing a Vax that people cannot sue companies making the Vax if someone gets hurt from the Vax. Cause it is experimental Vax.

Jason ellis

Board Members,
The very idea that you have created a group to investigate the nessecary for encampments to quarantine individuals or families from thier own homes is indicative of the slippery slope the board is teetering on. Should this ever come across the desk - vote AGAINST such transgressions against the people of the state of WA.

The Vaccines have not met approval, any group, dept or governmental organization does not have a right to steal our God given and Constitutional rights as Washingtonians and Americans with our current Rights protected ever since America became the United States of America. The injections are not only experimental, but dangerous to ones health and include "death" as a side effect. I have a right as an American to decline putting poison into my or my family's bodies, and that is first and foremost. As elected official elected Representatives, you have sworn an oath to uphold our Constitution, you must do that or be in violation of your office and can be removed and tried for treason. "We the People" are the decision makers, and we give any of these types of groups their power(if any) to decide rules, suggestions etc...we did not give you permission to start implementing regulations and legislation that directly go against our Constitution! This is not still an emergency, as many early treatments and protocols are saving lives and bringing the liars and greedy, vaccine makers to light and to show overwhelming evidence of disabling adverse effects and even deaths, as the "VAERS" sight shows, and that is a very low %of actuality being experienced. You are not telling the real Truth, the Whole spectrum of all the science and are in conflict with our own State's Constitution, and our National Federal protections under our United States Constitution and you are violating the Nuremberg Code. You do not have my consent to move forward in anything which violates our Constitutions' and Bill of Rights and I will not stand for Draconeon measures or un-lawful mandates to continue. You are representative, you work for the People, we don't work for you and you don't have law enforcing power either. Don't over reach you place, start recognizing all early treatments and the VAERS statistics too!

Sincerely,
Kerry LaBrash
Citizen of USA and
Washington State

To whom it may concern with the people of Washington State I would say the majority of us do not want to be dictated to taking receiving or messing up with our health any shots!! If you are in force to doing so that's like being an dictatorship i'm not a free country! The shots are not making any difference in fact we the people have lots of stories of people around us what's really going on.

My brother-in-law took the shot end up with the virus gave the Virus to my sister. My daughter has a physical therapist they took the shot he has blood clots in his legs and an enlarged heart now!!

Person at my work her brother-in-law had the shot and a booster. He end up getting the virus he goes to the hospital they can't get him in he goes home and he died in the shower! Another person at my work had the shot had a poster and he end up catching it to the virus! Also the stuff that's in those shots I'm a guess for religion sake on top of it!! And I probably be allergic to it I'm allergic to milk cheese a lot of the antibiotics!!

Thank you that is my input please save United States i'm not pushing the shots especially on a little kids!!

Subject: My appeal- please save our children, save our grandchildren, and their children

External Email

Dear Dr. Shah,

I know there is a meeting tomorrow, and I pray you have been inundated with many, many appeals begging you to not harm our children and the potential of future generations. I must add my voice.

PLEASE, please, follow the science you scientists pride yourselves on and don't require the children of Washington to receive any of the Covid-19 vaccines (and I'm not even going to the fact that what is offered in this United States of America is NOT FDA approved anyway).

I can speak from personal experience. My twelve year old grandson tested positive Thursday morning and was already feeling 100% on Saturday. He was back in school the second his quarantine was up! Statistically our kids are being harmed more by the vaccines than they are by Covid-19! And statistically, the vaccines are NOT keeping people from getting sick. As you are aware, they are 'less sick' when they contract after receiving the vaccine, and go out and share it with more people. Fully vaccinated people, in isolation situations (no outside contact) are contracting and sharing Covid-19. Please read the attached. Please! vote with the science. We Do Not Know what these vaccines are doing to bodies, we do not know the implications for future generations. Please, do not experiment with our children!

I appeal to your fatherhood. I appeal to your grandfatherhood. I appeal to you as a protector. Please read the attached and please make a decision that you won't regret in the future- that you won't be judged on in the future and found wanting. I will be listening in the morning, and I am praying for your wise decision.

Most Sincerely,

Janice Carruthers
A grandmother of 7 and praying for future generations

Subject: Attn: WA State Board of Health RE: 1/12/2022 WA State Board of Health Public Meeting

External Email

To whom it may concern at the WA State Board of Health:

It sounded to me like the majority of folks commenting today on your meeting were definitely concerned about the ramifications of the EUA injections, and oppose ANY kind of decision any time in the future that would require ANY injections to be required in order for CHILDREN to attend school.

I urge you to research safe and proven protocols for preventing illness and treating any symptoms rather than relying on an unproven so-called "vaccine" that is NOT by definition even truly a "vaccine."

=====

I appreciated this comment by Zana Carver:

11:57:22

Hello, this is Zana Carver. Can you hear me. Yes, thank you.

11:57:25

Yes, um, I support Informed Choice Washington's petition that limits what you can mandate to only treatments that are not under emergency use, and those who've gone undergone phase three clinical trials.

11:57:40

Now the lack of testing with these vaccines is appalling. They have not undergone any genome toxicity travel generosity reproductive toxicity cardiac toxicity neurological toxicity renal toxicity toxicity, we cannot even consider mandating.

11:57:57

for children. We do not know the long term effects when it usually takes 10 to 15 years for vaccine to be developed. And these vaccines hit the market in six to eight months, we should all have a huge red flag.

11:58:09

And I also support what others have said about the various database, it is extremely concerning.

11:58:15

So please be cautious. Our children are precious, it should be a choice between families and their physician and in no way mandated to attend public school.

11:58:27

Thank you.

=====

Dawn Olmstead's comment was very good and worth your consideration!

12:03:40

Thank you. Dawn Olmsted from Medical Lake Washington.

12:03:45

I just want to say no one on the board. Today is discuss it there are other viable treatments and Preventative measures that can be taken to prevent or lessen the symptoms of the virus, such as ivermectin hcq vitamin D vitamin C, and no one is speaking

12:04:03

to the various system and the incredible amounts of vaccine Injuries and deaths that

have happened.

12:04:12

It appears there's only one avenue that this board is discussing.

12:04:17

And I just appeal to the board to legitimize other scientifically proven therapies, and other than Vaccines and start moving forward with this misinformation that vaccination masking and testing is the only way to navigate this virus.

12:04:33

Appreciate your time.

=====

I do want to commend Nathan, the moderator answering and unmuting the commenters, as well as the gentleman who was on camera listening for staying extremely calm and courteous throughout the comments.

Thank you!

Subject: About quarantine rules please oppose

External Email

Dear Washington Dept of Health

I'm writing in opposition to the quarantine measures that are on the books,

And the one you want to include covid 19 and to be able to quarantine people against their will and evaluating them medically against their will

I don't know what the intent is here but no is the answer, this is what Australia does and it is not freedom,

We don't hold people against their will in this manner in America.

Covid has mutated down and is nothing more than a cold flu so why address this now?

People have been not going anywhere if they are sick so they are staying home,

You don't need a facility to put people in vaccinated or non-vaccinated,

I know that you don't address or update a wac, without some day using it against the people of Washington.

Please do not go this route,

Thank you

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
 2. Children under the age of 18 have a 99.995% survival rate from COVID infection
 3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Hello,

I am completely against any of the proposed Covid Policies that are over-reaching and immoral. I stand against these WAC's: WAC 246-100-045, WAC 246-100-040, WAC 246-100-070, WAC 246-100, and WAC 246-105.

Please don't strip us off our God given rights! Stand up for what is right!

Thank you for your time.

External Email

Why is the DOH putting out misinformation that the 'approved' vaccine is available? Cormenity (Spelling? From (Pfizer)Biotech (SP)) is not physical available for use in the USA or Washington State and has not gone thru trials yet. Can the board of health correct this please.

Thank You!

I, as a citizen of Washington State do not approve of this agenda. As of yesterday, you were going to discuss K-12 vaccinations and the detention of non-compliant individuals. This is unacceptable and creates division as well as mistrust of our government. Are you going to discuss these issues behind closed doors and let the citizens know when you pass legislation??? Shame on you!

On Sat, Jan 8, 2022, 12:52 PM Jill Schwendeman <jillrschwendeman@gmail.com <mailto:jillrschwendeman@gmail.com> > wrote:

Dear Washington health board

I am writing to you to express my deepest concerns mandating children to receive a medicine that is controversial and not proven safe. It takes massive amount of time testing over time. Not just a 8 month process. No vaccine has been required and administered to all of humanity to live life. Especially in such a short period of time. . If you require this you shall also be required to cover all medical conditions in the future. You can not morally ask humanity to inject themselves on your request and you have no responsibility for the long term possible effects. You live in what we would of once called the Greatest Free Country to live in. Now we are home of the fearful, lonely, hopeless, depressed. Hospital's are not filled with critical covid patients but the fact is they are filled with mental health patients. Children are overdosing, losing faith and turning on their peers family and destruction of themselves as well as others. You think for one minute dosing a kid protects them. Absolutely not. Most who have covid statistically have the vaccine. You are creating segregation. We abolished segregation. It's not for you to bring it back. You are too bring health. Health physically and mentally. It's time for you to do your job morally and stand for the people. We need to educate on immunity, give help for mental stability and rehab. Address the morbid obesity consuming our society. Mental health plays role in the obesity, drug addiction, alcoholism, child neglect, child abuse, domestic violence and more. Mental health should be the top priority. Mental health is the gateway to humanity, living and allowing love to consume our souls. If covid was so contagious Seattle and surrounding areas would not have the abundance of freezing starving homeless.

Washington gives free drugs but does not prove free mental health, team building soul searching wholesome living. Stop creating panic. Start truly healing our people.

Educate health not injecting chemicals that give false security they are safe when really vaccine or not you can get covid. No different then the flu vaccine.

Look deep in your soul and remember you took an oath to serve and protect with honor.

Vote no to mandating or children to have the covid vaccine. If you do vote it in. You better be ready for a drop in public education, enrolled children will be pulled for homeschooling, families separating, children running away and fleeing families from Washington state. That will kill your budget and bring more heartache, sorrow and loss. Do you have a plan in place for that much loss?

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Do not mandate the covid vaccine. Not ok nor right to inject chemicals in our children. Reach deep and choose the people not the dollar.
Save your soul. It's the one thing you can't buy back.

Sincerely,
Jill R Schwendeman

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee famously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

As a resident of WA state, and a parent of a 5 year old who's had severe vaccine injuries, it is incredibly upsetting to know that there are people in favor of pushing through the proposed policy to include the Covid-19 injections as part of the school immunization requirements.

CONSIDERING:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

This is, in no way, listening to the TRUE science and is sheer domination of the masses for power and money.

I'm also NOT in favor of forcing, in any way, an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility, following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

These policies are flat out, attempts to strong-arm individuals who do not comply with the atrocious, ignorant leadership of the WA government.

Health and wellness have NEVER been prioritized - only pharmaceuticals and keeping people sick - mentally, emotionally and physically.

Mandate meditation, nutritious foods, proper sleep, physical exercise, and maintaining healthy relationships.

How about a policy to subsidize gyms & yoga studios and therapists?????

This state government is a disgrace.

IF you read this, thank you for your time. I hope one day, real health & wellness is considered, and prioritized, from the top down.

As I was not chosen for public comment.

Kärin Cummins, concerned, vaxed (my choice) tax paying, property owner and citizen of Sequim, Clallam County.

Thank you for listening to what must have been a long and exhausting process today. I know it was for me.

It should be extremely eye opening to the Health Department and the Board Members the number of citizens willing to take the day to be a part of this specific agenda. Even more eye opening should be that all who were granted time in the 65minutes allotted not one was for mandates, forced vaccinations or the required covid vaccine for our school children. The people are talking and talking loudly and telling their government what they want.

I wish you to really clear your minds and preconceived perceptions and step back. It's obvious what you and staff are doing is not working. I implore you to council Inslee into removing mandates and rehire all fired employees because of personal choice. We've seen the devastation to our state and citizens well being because of this. Healthcare, schools, small business and our police and fire force. What the board and the main stream media are doing is creating unrest and distrust. The board needs a much more honest and concise way of getting info out to the public. Staff and the Board make it difficult for the ordinary citizen. People get lost in all your grafts and charts. It literally is WAC (I do try humor to keep sane). We, the citizens have to be on top of "wording". We don't get paid to go to meeting after meeting after meeting on the same subject. I know I want common sense, straight forward information. Short, sweet, to the point, common sense and believable. No fluff like most paid public servants that include staff. You have an opportunity to turn this around.

We supposedly live in a republic not a socialist or marxist country. We should have choice. Its discrimination in my county based on Dr Berry's power play requiring to show vax status. This should never have been allowed. Blatant abuse of power. Don't be part of the problem, be part of the solution. Stop and rethink strategy.

On HIV wording:

The wording "Due process" is a huge concern. You get mob mentality and it goes out the

door. I personally don't trust our courts. Look at those in WaDC...just one of many examples of how our due process has been disregarded at the whim of the court based on political and mob mentality.

You could change hiv for covid. It has taken 40 yrs to de-stigmatize HIV positive status. Vax vs Un-VaxBlood pathogen to air born.... The words are interchangeable. Keep that in mind.

Learn from history and do what you are doing now for HIV for the vaccine. Stop Villainizing people.

The problem with the code is that it was written to protect HIV positive citizens in 2003. Respectfully, it is not 2003 anymore. We've seen things throughout the world in the past 2 years that many of us never dreamed would happen in our lifetime. Lockdowns, supply chain problems, school closures, vaccine mandates, people being removed from their homes in Australia for being unvaccinated, unvaccinated citizens in Austria not able to buy groceries. Given all of these things, it's not a large leap to think that this could happen in America, in our state - that's been under our governor's emergency order for 2 years with no end in sight. The concern about the false information online should give the board pause - why are people in this state so worried about lock downs and losing their freedoms? about being taken from their homes? about being forcibly vaccinated? We're afraid because we see this as a possibility because we don't trust you, your word, your work, the governor, or the people running the country. Trust is earned. You don't earn the trust of the people by taking away their livelihood, moving the goal posts constantly with vaccine participation rates, infection rates, masking rules, business opening and closing rules, schools open or closed rules.

So, expect more of this. The code is vague. It doesn't matter if there is due process involved or if it's only been used for TB. No one cares. Until it's fixed to exclude Covid, count on this issue sticking around. It's 2022 and it's again obvious that governments will exert control over their citizenry just because they can.

Dear Washington State Department of Health Board Members,

This message is to express my disagreement and protest to any rule to allow for health officials to order the arrest, quarantine and detention of anyone they want to have arrested because of any reason including COVID-19. I believe that the proposed rules that the board was originally planning on considering are completely contrary to promotion of good healthcare. These types of rules will only scare people, make people distrust the health department, and deprive citizens of liberty. I urge all members to never consider this kind of unreasonable action as originally scheduled again.

Respectfully,

Joseph Radmacher

Hello, thank you for taking the time out to respond to our questions. I believe a good deal of the confusion is due to the fact that there have been involuntary quarantine rules on the book since 2003. Considering the public concern surrounding that topic, In the future will there be any discussion of these rules that are already on the books? If not, how can community members bring this concern (again, about the rules that already exist) to their board? It seems it may be time to review those rules-- given the current situation, and the anxiety caused by stories of involuntary quarantine in other countries.

Can the board calm the public fears by ensuring citizens will not be subject to involuntary quarantine? I believe this would necessitate review and adjustment to the rules as they stand.

If not, and the board believes the rules on the books are necessary and important for public health, please take the time to publicly justify this policy. It is clear there are many community members who disagree with the rules as they were passed in 2003. If the board does not transparently explain these rules, and either amend, or justify them, public trust will continue to erode.

Please take the time to address specific concerns of your citizens.

Love and Light,
Mikayla

Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,
Nicole Hart

WSBOH,

Thank you for the ability to comment. I'll keep it short. I appreciate the clarity that has been given in regards to lack of desire or pursuit of implementation in regards to the use of law enforcement to persuade people or take people into custody as it pertains to ones vaccination status. We do not want to have a Chinese like authoritarian government here in the state of Washington, and the precedent that something like this may set could be dangerous.

Thank you,

John Osborne

I am Elizabeth and a citizen of Washington state. With a background in biology, women's studies and psychology. I view these issues through this lens.

What are the numbers of health care workers removed from their position or fired for not complying to vaccinations and how has that affected the strain on the health care system? I am hearing rationing of care while causing the health system issues with policies. I oppose required vaccination for any Washington state citizen.

Why hasn't there been any discussion on providing and securing treatments for those who contracted COVID? Whether vaccinated or not.

I for one, am interested in providing of resources and support (not mandates) to ALL Washingtonian's regardless of their personal preference of dealing with COVID. And not in support of any rules, laws, or policies that support, encourage, or solidify systems of oppression or hate/fear of the other. Please provide more comprehensive resources to citizens about non vaccine related support. I would like the board to recognize that there are systems of suppression (within large companies) that have been happening since the beginning of COVID, I have personally witnessed the deletion of the "other" view, this has led to a distrust of governmental entities because we have not received equity in health care or equality in our voices being heard. This has been caused by policy changes such as Zoom meetings, vaccination requirements to enter certain public buildings and complete closure of public offices while policies are being made that completely change our way of life. I do not agree to any policies that cause further oppression of any groups. Please stop supporting the systems of oppression, gate keeping and cutting people off after a minute is a system of oppression we have not agreed to. Thank you.

Subject: Against - Proposed Policies to Involuntarily Detain People in a Quarantine Facility & Mandate COVID Vaccination in Schools

External Email

Greetings,

Concerning your agenda for tomorrows, January 12, 2022 board meeting

I request you that you pull these offending policies from your agenda and put them to rest permanently

* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, and vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I'd like to remind the WA State Board of Health that the citizens of WA State have Constitutional Rights. These proposed policies are Authoritative and Unconstitutional. The science does not support requiring Covid-19 injections as part of school immunization requirements, nor should local health officers be able to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility.

Your Name: JENISE MUGLER

Your Email Address: JENCON@YWAVE.COM

Which of the following best describes your role as it pertains to your question today?

Question Category: Other

Your Question:

This is in regards to the BOH meeting on Jan. 12 considering the changes to the WAC 246-100, 246-105, 246-100045, 246-100-040. I strongly without prejudice recommend the BOH does not determine to include Covid-19 in the current infectious disease codes. Neither for Covid-19 experimental vaccines to be added to school immunization requirements.

Please forward this request and recommendation to the appropriate members.

The results of this submission may be viewed at:

As a resident of WA state, and a parent of a 5 year old who's had severe vaccine injuries, it is incredibly upsetting to know that there are people in favor of pushing through the proposed policy to include the Covid-19 injections as part of the school immunization requirements.

CONSIDERING:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

This is, in no way, listening to the TRUE science and is sheer domination of the masses for power and money.

I'm also NOT in favor of forcing, in any way, an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility, following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

These policies are flat out, attempts to strong-arm individuals who do not comply with the atrocious, ignorant leadership of the WA government.

Health and wellness have NEVER been prioritized - only pharmaceuticals and keeping people sick - mentally, emotionally and physically.

Mandate meditation, nutritious foods, proper sleep, physical exercise, and maintaining healthy relationships.

How about a policy to subsidize gyms & yoga studios and therapists?????

This state government is a disgrace.

IF you read this, thank you for your time. I hope one day, real health & wellness is considered, and prioritized, from the top down.

Dear State Board of Health Member

We are 'totally' against any move of our state representative to make this a 'law' . It is socialism at it's

core. We are not Germany or Russia.. We are the United

State of America and are governed by the "Republic".

This proposed law is unconstitutional.

We will fight this if it ever becomes 'law'.

I urge you to vote "NO"

THANK YOU

Subject: WAC-246-100-040 NO INTERNMENT CAMPS

External Email

Dear WSBOH,

I am responding to the online document "Clarifying Online Misinformation about the Jan. 12 State Board of Health Public Meeting."

The eyes of the world are on you right now, and it's no wonder you are attempting to backpedal about WAC-246-100-040 and to say it has nothing to do with Covid-19 and emergency detention orders would not be used against those unvaccinated for Covid-19.

The truth is, WAC-246-100-040 could easily be used to grant police powers to anyone in public health and could be used to quarantine and isolate anyone for any reason, against their will, for Covid-19 for an unlimited amount of time. I read this document. The language is vague and the powers are vast.

I stand against these proposed WACs: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These must be immediately scrapped, because the potential for misuse of emergency detention orders by public health officers due to vague language is great. The American people will always stand united against internment camps. Public opinion is now focused on the State of Washington. Do the right thing. No concentration camps for ANY reason!

Sincerely,

Jennifer Anderson

Please do not support WAC 246-100-040 procedures for isolation and quarantine. The Covid vaccines have proven their ineffectiveness as evidenced by the dramatic rise in Covid cases despite the majority of people in Washington having been vaccinated. Vaccines, masking, lockdowns clearly do not work. By supporting WAC 246-100-040, you would be inviting a repeat of history that is tantamount to concentration camps in Nazi Germany. Why is the government so eager to force people to take experimental vaccines that do not keep them from contracting Covid or passing it to others? Vaccinated people fill hospitals at greater rates than unvaccinated. Yet the vaccines are still being pushed as the solution to Covid. Why?

Board of Health-

I attended your meeting on zoom today but was not selected for public comment, my comments are in regards to potentially requiring the covid vaccine for K-12 students, at this time I am against this requirement, the covid vaccine has not been available to age 5 and up for very long, at this time I don't believe there is enough info on the long term effects of these vaccines to require them for school age children. Once this vaccine has been used for years 5-10 and you can begin to understand any side effects for children then I think you can consider requiring it. Secondly, Covid with this latest variant seems to be no worse than the common cold and it appears as we all end up with omicron this version of the virus provides natural protection against the delta variant which in turn should end Covid-19, if you put the Covid vaccine on 246-105-030 you may well be vaccinating kids for years past the actual virus being present and active, as fast as government moves you will add it to the list of vaccines and it will be on the list years past it actually being needed, please do not add Covid 19 vaccine to the list of required vaccines for K-12 until you have more information on the effects of this vaccine on children.

I am the Father of two children 8 and 11 that attend public schools and I am vaccinated, I am not an anti-vaxer I just don't want to subject my children to this vaccine since they have no medical issues and one child already had covid-19.

Thank you for your time.

External Email

Seriously, stop with the Covid shenanigans.

At no point in history have the parties "involuntarily detaining" lay citizens been recognized as anything other than oppressors. In every one of history's cases it was either upholstered under the guise of some nebulous idea of public health or it was political expurgation naked of pretense; and when the dust settled, humans looking back recognized the former was just a deceptive affectation of the latter--and those seeking justice after-the-fact saw no difference--in every case, in every generation, in every country.

More to the point, if you follow through with adding Covid-19 to the penumbra of WAC

246-100-070, -045, -040, -100, and -105, you will be inviting the scrutiny and direct legal action of an increasingly-angry citizenry on your organization and their constituent members. To the majority of people in this state who contribute to society and the economy, it appears as if those of you in the government only pay attention to the wealthy in Seattle and the single-variable information curated by tech executives and the UW--and their benefit is the only factor you have cognizance of.

The mandates Jay Inslee's government enacted crippled our economy, ruined the livelihood of many citizens, and put many of our fellow citizens on the streets. There isn't much more for us to lose, and everything for us to gain back and more--and it appears the bureaucracy of Inslee's government are standing in everyone's way. If you follow through with this, expect the mores of political activism in 2020 to be picked up and used by the other side.

Dear Ms. Haag,

I am a fully vaccinated (COV-19) Seattle, Washington resident.

I'm AGAINST applying WAC-246-100-040, 045, 070 and WAC 246-105 to the management of COVID-19.

I am completely AGAINST giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family in a quarantine facility if they refuse requests of medical examination, testing, treatment, counseling, and vaccination.

I am completely AGAINST Covid-19 injections as part of the school immunization requirements using WAC 246-105.

As a state with tremendous resources in the tech and data space, I would LOVE to see these resources redirected to reporting accurate data on COVID cases (as well as vaccine adverse events) with comparisons between vaccinated and unvaccinated. Please include this data on our state dashboards. I know not everyone makes data-based decisions. But, the vast majority do! If clear and compelling data were presented and publicized, I believe NONE of the above would be necessary.

Thank you for your consideration and for working to keep our state safe and healthy.

With gratitude,

Kim Wilson

To whom it may concern.

Part of the concern of many citizens is the way this was written. It never says a definite disease or virus, it IS about giving the state the ability to "take" people away. And the other concern is when clicking on the PDF version it is dated 10-25-2019. Just before the pandemic started. Coincidence ? I find it impossible to believe any information coming from the CDC or Inslee. How can any decisions be made when people are going to hospitals for something OTHER than Covid and not sick, but counted as a Covid positive. The matrix should be deaths and actual Patients seriously sick with Covid. It's estimated 56 million Americans have had Covid and have natural immunity. Go to the VAERS website. It's not up to date but shows 16000 deaths and thousands of adverse reactions. Research the numbers. Even I can find information but you have to dig a little. And there are protocols to help keep a person from getting Covid and protocols for when a person actually gets Covid, which work. I know several people that would rather stay healthy and get Covid naturally. And these vaccines, or actually gene therapy, are not working. Approximately 6 months of protection before fading. Even the boosters fade. Boosters every 5-6 months?! Many of the true hospitalizations are already vaccinated. How can you blame an unvaxxed healthy person for infecting a vaxxed person ? Think about it. It makes no sense. And stop mandating these vaccines. There are several new drugs coming soon without the adverse reactions. Thanks for your time.

I find this proposal abhorrent and downright evil. Those that are responsible for putting this to paper should be embarrassed and ashamed. 1984 much? I cannot imagine the distorted, disturbed and destructive mindset that potential legislation like this emanates from. Is this some kind of undiagnosed sickness, some sort of perversion or reality or shared delusion? The appropriate thing to do would be to shred and burn any indication this legislation was ever considered and terminate the employment of all those involved. The degenerate filth running the state of Washington have reached new lows with this one, lows I would never have thought possible. Disgusting!

To the WA State Board of Health,

I am a fully vaccinated (COV-19) Seattle, Washington resident.

I'm AGAINST applying WAC-246-100-040, 045, 070 and WAC 246-105 to the management of COVID-19.

I am completely AGAINST giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family in a quarantine facility if they refuse requests of medical examination, testing, treatment, counseling, and vaccination.

I am completely AGAINST Covid-19 injections as part of the school immunization requirements using WAC 246-105.

As a state with tremendous resources in the tech and data space, I would LOVE to see these resources redirected to reporting accurate data on COVID cases (as well as vaccine adverse events) with comparisons between vaccinated and unvaccinated. Please include this data on our state dashboards. I know not everyone makes data-based decisions. But, the vast majority do! If clear and compelling data were presented and publicized, I believe NONE of the above would be necessary.

Thank you for your consideration and for working to keep our state safe and healthy.

With gratitude,

Kim Wilson

I am aware you are having a meeting tomorrow morning to discuss new codes to present virus . I am against this forceful use to put experimental drug

in anyones body. and punishing those who choose not to do it by quarantining , loss of job, etc. Too much power to any one department to control people to do as health dept or government wants. You are not our parent or nanny, May I remind you, this is not Germany of the 30's or 40's and that this is the USA! Our constitution is the supreme law and any new law that goes against this, be it state or country , is null and void! Also the Nuremberg Code of 1947 Law shall not be broken ! You have failed to notify public of this meeting in a timely fashion so those can respond. Zoom meetings unacceptable. You work for us, we the people. We are your employers! You all need to remember that.

I am completely against any of the proposed Covid Policies that are over reaching, immoral and server to further segregate our community by singling out unvaccinated persons. There is already an uptick in mental illness, and deciding to lock people up because they did not like a treatment plan proposed by the government is a gross over reach in power. Needless to say this is for ages 5 and up?? Lets just scare the crap out of a bunch of minors, and take them away from their parents. People have the right to question treatment plans, ask for alternate opinions, ask for alternate treatment options, and the right to refuse treatment. Discussing someone's medical history is a violation of HIPAA Laws. Any body in the medical field has zero right to discuss your medical information with anybody. We stand against these proposed WAC's: WAC 246-100-070, WAC246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Subject: WAC CODES to include Covid 19

External Email

Good Afternoon,

I am writing to you this day to share my concerns about the upcoming voting regarding WAC 246-100. My understanding is that there will be a vote to allow law enforcement to detain/isolate and quarantine individuals and families in a quarantine facility when not voluntarily complying or refusing to comply to examination, testing, counseling and vaccination for Covid 19 or any other health issue.

In addition there is a proposal to add Covid 19 injections to school immunization requirements as stated in WAC 246-105.

I first express my extreme fear that this is complete government over reach! Our ancestors came through the Spanish Flu without infringing on the rights and freedoms of individuals! How can this board call themselves free Citizens and Americans when you are considering taking my health freedoms and rights away from me and the rest of the citizens of WA? Is this Cuba, Venezuela, Russia or is this free America. Sadly, this is not the America I want to live in!

I ask you to carefully consider how this will effect future generations! We are Americans, and according to the constitution of the United States we are free Americans with the right to pursue happiness. We have certain freedoms and choices, they should never be taken away from us!

Please vote no on these proposed changes!

Respectfully,
Marci

Hi, I am writing to provide a comment for the January 12th meeting and any future meetings discussing applying current infectious disease WAC codes to include COVID for all WA state residents. Me and my family stand fully against these proposals, which are over-reaching and deeply immoral. Individuals should have full medical autonomy and decision-making responsibility for their medical examinations, testing, treatment, counseling, and vaccination. These are areas of responsibility that should never fall under the government's jurisdiction. It is grievous and wrong to consider including COVID-19 injections in school immunization requirements as science has shown COVID to not be a serious threat against children. Requiring such would be a violation of parental rights.

We stand against WAC's:
WAC246-100
WAC 246-100-070
WAC 246-100-045
WAC 246-100-040
WAC 246-105

Sincerely
Jurene Gee

Seriously, stop with the Covid shenanigans.

At no point in history have the parties "involuntarily detaining" lay citizens been recognized by history as anything other than oppressors. In every one of history's cases it was either upholstered under the guise of some nebulous idea of public health or it was political expurgation naked of pretense; and when the dust settled, humans looking back recognized the former was just a deceptive affectation of the latter--and those seeking justice after-the-fact saw no difference--in every case, in every generation, in every country.

More to the point, if you follow through with adding Covid-19 to the penumbra of WAC 246-100-070, -045, -040, -100, and -105, you will be inviting the scrutiny and direct legal action of an increasingly-angry citizenry on your organization and their constituent members. To the majority of people in this state who contribute to society and the economy, it appears as if those of you in the government only pay attention to the wealthy in Seattle and the single-variable information curated by tech executives and the UW--and their benefit is the only factor you have cognizance of.

The mandates Jay Inslee's government enacted crippled our economy, ruined the livelihood of many citizens, and put many of our fellow citizens on the streets. There isn't much more for us to lose, and everything for us to gain back and more--and it appears the bureaucracy of Inslee's government are standing in everyone's way. If you follow through with this, expect the mores of political activism in 2020 to be picked up and used by the other side.

WAC 246-100-040

Opinion Regarding Procedures for isolation or quarantine.

I find it terrifying to see this happening in our state. It effectively removes our civil and constitutional rights. There is a name for it, a dictatorship. I see us moving toward the same horrors that are happening in Israel, Australia, Austria, and China.

This WAC allows the health department to be judge, jury and executioner based on "their" opinion and assessment? Who should have that amount of power over another individual? No one. What makes the employees of the health department so superior that they know what is best for another person?

I would not want to be the individual making decisions listed in this WAC. I would not even want to know the person who could justify taking the actions listed in this WAC. What is the moral and ethical character of the employee/enforcers? The only persons who could do such work must have a personality that is sociopathic and not with conscience. This can only lead to abuses. It has happened in the past many times.

10 stages of Genocide- Perhaps this will be a good reminder of the slippery slope we are on. I believe we are in stage #7 of this genocide and moving towards #8. Please review and maybe you can dismiss this in your own mind, and justify the actions listed in the WAC as just, "Protecting the population." Nothing like being the "Good German."

Dr. Gregory H. Stanton is Research Professor in Genocide Studies and Prevention at the Institute for Conflict Analysis and Resolution, George Mason University, Arlington, Virginia.

1. Classification: People divided into "Us" and "Them"
2. Symbolization: People are forced to identify themselves.
3. Discrimination: People begin to face systemic discrimination.
4. Dehumanization: People equated to disease, vermin, and animals
5. Organization: Government creates special groups to enforce the policies i.e. "Strike team" or police/military.
6. Polarization: Government broadcasts propaganda to turn the populace against the group.
7. Preparation: Official action to remove/relocate people begin.
8. Persecution: Beginnings of murder, theft of property, trials, massacres.
9. Exterminations: Wholesale elimination of the group. It is extermination and not murder because the group is not thought of as human.
10. Denial: The government denies it has created any crimes.

The verbiage of this WAC is vague. What will the criteria be for a health official to issue an emergency detention order? Will it be because the person or persons refuse to take a vaccine? Will it be because they have cold and flu symptoms? Gosh, I have had many of those. Maybe an elevated temp? Will it be because I write a letter against the CDC or FDA? What if I inform others about VEARS, that 21,000 people died because of the vaccine, which only represents 1% of the actual number reported (according to Harvard) or the 1,000,000 who have been injured? Will parents who refuse to vaccinate their children be vilified and the children taken away? There is plenty of words to describe the legal this and legal that, and we all know what a nightmare that would be. Nothing like being placed in a concentration camp or whatever nice word you wish to call it without representation, without committing a crime. Who will be helping the people who are being harassed and terrorized by these health officials? Who will be liable for damages done to people? Emotional trauma, financial loss, physical harm due to forced treatment, no one wants to be liable for the damages they cause. This will equal a crime against humanity and those who participate will be guilty.

This is a pathetic power grab and has nothing to do with public health. **Dictatorship**, form of government in which one person or a small group possesses absolute power without effective constitutional limitations. There should never, ever, be that much power given to an individual or agency based only on sole discretion.

I am writing to you to have my voice heard.... This is totally outrageous! You are responsible for the health of the people of WA State and yet you are doing everything to undermine that duty. We need leaders, not followers! You are not looking at the science and are just doing the political bidding of the Democratic Party.

Why was it okay for doctors, nurses, firefighters, police officers, medics, etc. to work in the midst of the Covid /China virus disaster at the beginning when we knew nothing about the virus? They gave their all, their time, their families time and sometimes their lives for the people in their cities, states and their Country! Now you want to use our great police officer to detain, arrest and even take citizens to be, "isolated in a quarantine facility" i.e., concentration camps at the direction of the WA State Board of Health?! And whatever information they trump up?! That's a NO!

You are destroying our Country and we will not agree to this!

And you also want to use our children as Ginny pigs?! There is no data to show that children are in any severe danger with this virus so why would you want to force them to take a vaccine that has been proven to cause harm to them?!

Why was the inventor and renowned Virologist of the MRNA for the Covid vaccine taken off of Twitter and Facebook? Why because he was voicing his concerns regarding giving the vaccine to children, our most vulnerable population, which you are not taking care of! You are trying to silence him! According to Dr. Robert Malone the Covid Vax can do more harm than good for children. Fauci even admits that the number of kids hospitalized for Covid is overcounted. And according to the CDC in the US there were 814,000 deaths at the end of 2021 and only 209 of those were children between 5-14 years old. And a lot of those had underlying conditions.

According to Dr. Ben Carson and other doctors that I have heard, Omicron is a blessing in disguise. It is extremely infectious but it's not particularly virulent and there is some evidence that if you contracted Omicron, you have contracted immunity to the Delta variant and possibly some other variants. So that could get us to herd immunity much faster than anybody expected. Even though NIH, CDC and all of our government officials are preaching doom and gloom, it doesn't matter what they think, if this is a natural phenomenon that's occurring and this is getting less and less virulent and spreading throughout our communities, it's going to take care of itself, regardless what they think. Let nature take its course!

Also, in Nigeria the mortality rate is 14 per million and in this Country it's 2200 per million. They take anti-malarials like Hydroxychloroquine. We should be looking into this; this is an effective treatment along with Ivermectin and Monoclonal Antibodies that according to the government you cannot give with an Emergency Use Authorization. Think about that, they are killing people because they do not want to let go of their power and control! The Emergency Use Authorization time is well past its prime! We should be looking at all types of Therapeutics to combat the effects of this virus, not rounding up our citizens and locking down our State! This is a virus and if you listened to the science, you would know that it mutates! So, it shouldn't have been a surprise to Biden's Administration! Also, there is a study in the Netherlands that the secondary

attack rate is higher in double vaccinated individuals than the unvaccinated. Canadian Researchers have stated, "We also observed negative vaccine effectiveness against Omicron among those who had received two doses compared to unvaccinated individuals."

Radiologists have also noticed a huge uptick in patients with the vaccine in Adenopathy, which is an enlargement of the lymph nodes. Where they were seeing one case per month, they are now seeing one case per day!

Coved numbers are totally fake! LA Times reports a majority of the people listed as Covid patients in hospitals in LA are actually in there for something else, they merely tested positive for the virus. This is the norm for all of the hospitals because they get Federal dollars for them... follow the money!

Vanity Fair reports that the Biden Administration rejected an October proposal for "Free Rapid Tests for the Holidays" Biden had the nerve to call Trump out when he was having people invent the testing and Biden had the tests given to him and he didn't think it important enough to get them to the people! Why should we believe the government/WA State Board of Health really has our best interest at heart?! Stop using Nazi tactics and bring our America back! I do not approve of the proposed change of the WACs for the Washington State Board of Health! Bless the people of Washington State and the United States of America!

The idea that this has to come up in a meeting and talked about what so ever, goes to show how doomed our state/country is! Your wanting to use law enforcement to "Involuntarily detain a person or persons" because of a virus the government created! A virus we can't outrun and a virus there's no cure for! Then you want to lock us in our homes, just like locking a dog that's misbehaved in a cage, you want to lock us in our homes for a false sense of security? Covid is never going away. It will be here long after ever single one of us is dead and the mere fact that you guys are even contemplating on putting experimental drugs into all of us as humanity is disgusting! There's no long term studies, and the creators don't even want to tell us what's in the damn drug for the next 55 years lol! Open your eyes, look at facts (not CNN, MSNBC, FB) Use the brain God gave you and help humanity get back some dignity and some integrity because this kind of meeting is throwing it all out the window! The fact we have to tell you about all this and reprove to you the #s and common sense in what's going on in the world, it really has me worried for mankind! #STOPtheTYRANNY

Dear Mr. Keith Grellner,

As a resident, taxpayer, and voter in the State of Washington, I ask you to throw out WAC 246-100-040.

This Administrative Code violates the US Constitution and is extremely reminiscent of the internment camps of Japanese American citizens during WWII. It was wrong to intern/isolate US citizens based on their race then, and it is wrong to quarantine/isolate people based on their medical status now: regardless of the threat of contagion. Both of these camps were built out of fear of our fellow man and indeed dehumanize those that would be sent to such camps.

Respectfully,
Maggie Janicki

Dear Ms. Herendeen,

I am a fully vaccinated (COV-19) Seattle, Washington resident.

I'm AGAINST applying WAC-246-100-040, 045, 070 and WAC 246-105 to the management of COVID-19.

I am completely AGAINST giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family in a quarantine facility if

they refuse requests of medical examination, testing, treatment, counseling, and vaccination.

I am completely AGAINST Covid-19 injections as part of the school immunization requirements using WAC 246-105.

As a state with tremendous resources in the tech and data space, I would LOVE to see these resources redirected to reporting accurate data on COVID cases (as well as vaccine adverse events) with comparisons between vaccinated and unvaccinated. Please include this data on our state dashboards. I know not everyone makes data-based decisions. But, the vast majority do! If clear and compelling data were presented and publicized, I believe NONE of the above would be necessary.

Thank you for your consideration and for working to keep our state safe and healthy.

With gratitude,

Kim Wilson

Seriously, stop with the Covid shenanigans.

At no point in history have the parties "involuntarily detaining" lay citizens been recognized by history as anything other than oppressors. In every one of history's cases it was either upholstered under the guise of some nebulous idea of public health or it was political expurgation naked of pretense; and when the dust settled, humans looking back recognized the former was just a deceptive affectation of the latter--and those seeking justice after-the-fact saw no difference--in every case, in every generation, in every country.

More to the point, if you follow through with adding Covid-19 to the penumbra of WAC 246-100-070, -045, -040, -100, and -105, you will be inviting the scrutiny and direct legal action of an increasingly-angry citizenry on your organization and their constituent members. To the majority of people in this state who contribute to society and the economy, it appears as if those of you in the government only pay attention to the wealthy in Seattle and the single-variable information curated by tech executives and the UW--and their benefit is the only factor you have cognizance of.

The mandates Jay Inslee's government enacted crippled our economy, ruined the livelihood of many citizens, and put many of our fellow citizens on the streets. There isn't much more for us to lose, and everything for us to gain back and more--and it appears the bureaucracy of Inslee's government are standing in everyone's way. If you follow through with this, expect the mores of political activism in 2020 to be picked up and used by the other side.

Hi Christy,

I have major concerns of what is going on in our state right now. You are going to be making a big decision on Wednesday, and I pray that God will give you the strength to do the right thing and stand up to tyranny. The government has no right to decide what kinds of medical procedures we will have or not. This is the people's choice, and we the people are protected by the Constitution. We live in the United States of America, the land of the free. I think people are forgetting what that means.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105.

Please do the right thing and stand up for people's liberties.

Thank you,

Melissa White

Hello ALL,

What a waste of time. Sat and listened to 2 hours of lies and propaganda before you allowed We The People to speak with a limited time of 1 minute. Washington state does not have a board of health ... it is a board of propaganda. All of you are disgusting creeps. You are not elected representatives by and for We The People. You have all sold your soles and are traitors to your own fellow neighbors. We The People do not take orders from any of you bought and sold criminals. VAERS is reporting over 21,000 deaths and over 1 million injuries from the poison needles that you criminals are trying to force on people. You are all guilty of crimes against humanity and accomplices in global mass genocide. Law enforcement is going to side with We The People and you will no longer be able to hide behind your computers and your pay checks. There are countless doctors and experts who are exclaiming this plandemic is MURDER. You all need to tell governor Inslee to check in to the nearest prison and you all need to come before We The People and BEG for forgiveness.

Dear Washington State Board of Health:

I am very concerned about the proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

This virus has a very low mortality rate in children. Their recovery is 99.985%. My children have natural immunity as well as myself. There are more than 140 studies that demonstrate that natural immunity is equal or better than what is achieved by vaccines. The new variant strains are evading the vaccine and that immunity is waning. Thus,

Please do not put our children as well as other citizens in this situation.

Sincerely,

MaryJane Healey

Dear Washington State Board of Health,

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Sincerely,

Jeffrey Harold Coult

Dear Member Hoff,

My name is Megan Mauch. I am a certified Speech Language Pathologist working in the public school system. I am an expert on child development and have worked both remotely and in person over the course of this pandemic. The impact lockdowns and mask mandates have had on kids' communication and social/emotional development is tragic. It has to stop.

I am writing to gain your attention to violations of moral and ethical treatment of children. Vaccines that are required for children should have completed Phase 3 trials and should be approved by the FDA. The fact that any individual would ever consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character, it borders on a level of evil that is unprecedented.

The data has empirically proven the following:

1. The vaccines do not prevent anyone from getting or transmitting COVID
2. Vaccines do not create any safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms
3. Children have almost no statistical risk of covid symptoms
4. Children do not have a high transmission rate to pass on COVID to adults, it is known to be lower than the flu.
5. There is ZERO long term testing on the impacts of the vaccines on children.

In addition, we can see across the world that places with fewer lockdown measures and mandates are experiencing fewer problems with COVID.

Given this data, I implore you to make an ethical decision on several of the discussion items at Wednesday's meeting.

For Item #8: Please OPPOSE the plan to form a TAG to consider mandating shots for kids to attend school. OPPOSE COVID shot requirements.

For Item #9: OPPOSE the extension. There is no longer a need to extend emergency quarantine or forced isolation and no need for law enforcement to be used to do so.

For Item #11: SUPPORT the petition by Informed Choice of Washington to establish a rule that prohibits them from adding any EUA products to school required vaccine lists.

Thank you for standing up for what is BEST for children!

Thank You,

Megan Mauch, MS, CCC-SLP

Hi Caitin,

I have major concerns of what is going on in our state right now. You are going to be making a big decision on Wednesday, and I pray that God will give you the strength to do the right thing and stand up to tyranny. The government has no right to decide what kinds of medical procedures we will have or not. This is the people's choice, and we the people are protected by the Constitution. We live in the United States of America, the land of the free. I think people are forgetting what that means.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105.

Please do the right thing and stand up for people's liberties.

Thank you,

Melissa White

Subject: Washington State Board of Health Meeting Materials January 12, 2022

External Email

Greetings,

It has been brought to my attention that a move is being made to attempt to make Washington State some reincarnation of Nazi Germany / Soviet Russia for the sake of Jay Inslee's evil Covid propaganda.

If this summary is anything close to what will be considered on the 12th of January:

PROPOSED POLICIES:

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Include the Covid-19 injections as part of school immunization requirements using WAC 246-105

Then whoever even brought this as an item for public policy should be utterly ashamed of themselves.

I hope and pray that the rest of those on the board are not so evil and depraved that they would even think to support such measures.

Oppose such evil and diabolical policies at all costs.

May God have mercy on your souls, and help you oppose the evil making decisions in Washington.

I am sitting here listening to the above meeting. People are now commenting with their opinions on these mandates you are trying to force on the Washington people. There are 7000 wanting to comment and only 50 or so are getting 1 minute to talk then cut off. Every single one of the public comments are that they do not want our state government to have these "forced mandates" on the people. Our government has went way beyond over reach! I took the vaccine, but by my own choice. Since when did Washington state become a communist government? I guess now. Please take note of what the people are telling you Mr. Inslee. They don't like what you are proposing.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I am one of the very few who is able to move out of this state to a free state. God Bless those who don't have that ability.

God Bless this state and country.

Subject: Washington state Board of health's new proposals

External Email

I am writing to express my great concern regarding the new proposed policies allowing local health officials to force an emergency order to involuntarily detain citizens to be isolated in a quarantine facility. Who would be determining why people would be detained and on what basis? People are not legally required to comply with requests for medical examination, testing, treatment, counseling or vaccination which you also propose. This goes against our Washington state constitution that declares our rights to protection and maintenance of our individual rights. No person shall be deprived of life, liberty or property without due process of law. My medical decisions are mine and not to be determined by bureaucrats. It is my choice if I want to be tested or receive an injection, not the government's. My private affairs shall not be disturbed or my home invaded without authority of law. You propose to have the authority to use law enforcement to involuntarily detain a person to be isolated in a facility. Do you propose to invade peoples homes to get them to go to a quarantine camp? How is that not denying my rights according to the Washington state constitution?

Another right you propose to disregard is my freedom of conscience in all matters of religious sentiment and beliefs. My religion is predicated on the protection and preservation of health. I choose to preserve my health and will not consent to an injection that has known adverse reactions and in some cases death as reported by VAERS. Studies have not been performed to evaluate long-term effects. I am also against the use of aborted fetuses in medical research to produce vaccines.

These proposals are to be discussed for a disease that kills less than one percent of the population? What is the justification of this power grab? I believe this is an unlawful power the government proposes and I for one will not stand for it. You are employed by the people of Washington and are in office to protect our rights, not steal them. This injection, as reported by VAERS, is known to have adverse effects and in some cases even death. This is extremely concerning. Voluntary consent is absolutely essential. Power of choice, without the intervention of any element of force, over-reaching is a person's right according to the Nuremberg code. The Covid injection has not been sufficiently studied over time to know what long-term side-effects are possible. Therefore sufficient knowledge and comprehension of this injection's effects are not known by the public in order to have an understanding of the risk involved.

You also propose to require innocent children, who have minuscule risk of having negative effects of the Covid-19 virus, to be injected in order to attend school. We parents are responsible for our children's safety and decide what happens to them. If this power was given to bureaucrats, what would be their next breach of the law to exert control of our children as well as all of the people residing in Washington state? I am informing your board of my grave concerns for these tyrannical, illegal proposals and I will fight to defend my constitutional rights. If that means filing a lawsuit, I have all intentions to do so.

Thank you for acknowledging my concerns.

Subject: Written Testimony/Public Comment as my name was not called during January 12th's BOH meeting

External Email

Good afternoon,

I registered to provide public testimony/comment, but as my name was not called due to the large number of people wishing to make comment, I am providing written testimony/comment which I would appreciate being added to the meeting's public record.

"I contracted COVID-19 in December of 2020. Nearly one year later, I chose to have my blood drawn to check for potential natural immunity. My COVID-19 antibody-positive index tops out the chart at 3.64.

The CDC has recently retracted their confidence in PCR testing, stating that PCR tests cannot distinguish between COVID-19 and the flu. The CDC has also walked back the recommended quarantine period from 14 days to 10 days and now to 5 days.

To make the claim that the unvaccinated - many who may have obtained natural immunity - are somehow more likely to contract COVID-19 and be hospitalized - is patently false. As for the hospital staffing crisis, it was created by removing professionals like me who choose to remain unvaccinated.

At one point during today's presentation, it was stated that COVID-19 testing would be available at schools. As a parent of young children, the concept of COVID-19 testing in schools is of concern. We the People, alone, have sovereignty over our bodies - and that includes testing.

Thank you.

Kelli Fiskum"

Subject: Written testimony per Covid webinar

External Email

Per the discussion on vaccines needed for Covid right now, specifically Omicron, while listening to the webinar:

The vaccine does not stop the spread. That is clear. No one is disputing that. Right now you talk about trying to keep the healthcare system from being overwhelmed. There are a lot of choices people make that can increase their odds of going to the hospital, things like smoking, drinking, being overweight, these are all choices. Since the vaccine doesn't stop the spread it should be a choice whether people receive it (booster etc). You say that no vaccine has 100% protection, which is true, but not at this rate. This vaccine is not stopping the spread. My measles vaccine is working, Covid not so much. It's not even as effective as the flu shot, which on a good year has a 40-60% efficacy rate. We do not mandate the flu shot nor should we for Covid. Especially given that you will need a shot every few months and probably will still contract Covid.

Also Inslee's vaccine mandate caused a lot of people to be fired. People we need right now. If you are worried about hospitals being overwhelmed due to staff being out sick, then admit you were wrong in firing the unvaccinated and bring them back if they actually stayed in this state. The vaccinated and unvaccinated are in the same boat in regards to being able to spread Covid. I know several firefighters who are out with Covid right now. They were vaccinated and had received a booster. Their departments are requiring masking and testing every day at work. This was the accommodation the unvaccinated asked for but we're denied and fired. When asked if the department would bring the unvaccinated back now that they are able to implement the requested accommodation the answer was no. This practice will open up the door to some costly lawsuits for these departments implementing discrimination practices.

You talk about the deaths that have been averted due to the Covid vaccine but you do not acknowledge the people that have been harmed by the vaccine. It's always brushed off as being low, but it is not low in young people when compared to the risk they had of dying of Covid, which was nearly 0 (especially when adding in comorbidities). Prior to vaccination, Covid had a 98% survival rate and that increased in younger age groups. We also now learned that death with Covid and from Covid are very different so the early statistics are misleading.

You keep pushing vaccination. If you have had Covid, that acts like a vaccine in regards to immunity and there is no need to vaccinate after that.

You have said that things are constantly changing. I agree. There is no reason to mandate policies in a situation that is constantly changing. Firing unvaccinated employees is a perfect example. A policy was implemented without any wiggle room and now we are feeling the effects (loss of WSDOT employees, healthcare workers, first responders, etc) and can clearly see it was the wrong approach. There are treatments for Covid for people that are high risk. When you tell people to live in fear of this virus for 2 years the moment someone gets a positive test they immediately feel like they need to go to the hospital right away or they will die. Most people will recover fine without needing the hospital. But this mentality will overwhelm the hospital as well.

You talk about trying to get the message out and to get people to trust you, but when

you force people to follow policies that are later shown to not work as promised then no one is going to want to listen to further mandates. Have humility, give people a choice, and be transparent. Good will goes a long ways to building trust but at this point you are probably stuck since you chose to go the route of dictatorship and a one size fits all policy so you have literally lost all trust and credibility.

WA is one of 9 states with a mask mandate still in place. The states without mandates (vaccine, masks, lockdowns) are doing fine. They may be trading off higher infections (not necessarily overwhelmed hospitals) for a better quality of life. Less depression, less stress, less disruption in learning (which will have long lasting effects), and children doing better than their masked peers academically. A study just came out saying children born during the pandemic are behind their peers cognitively and they are attributing that to masks. Children are visual learners and learn a great deal by being able to see people's faces and emotions.

Covid is here to stay. You said we are having trouble getting this virus under control. We cannot control this. It is a coronavirus. Now is the time to learn how to live with it like any other seasonal illness. If you're sick, stay home, there's no need to run out and try to get a test. Tests should be reserved for use in the hospital in order to figure out what a patient has in order to treat them. There is no need for mandatory masking. If you're sick stay home. If you have been around someone who was ill, then wear a mask. If you have a minor symptom, wear a mask, if you are high risk or want to wear one because it makes you feel better, than by all means wear one! But there is no need to mask everyone, especially our children. Let's adopt an approach of learning to live with this virus and give freedom back to the people.

Sincerely,

Lois Keller

Subject: Washington citizen's response to vaccination bill discussed in 2 days

External Email

To Washington State Health Dept officials:

I don't know what planet you're on but it's obvious that you are all (or most) either massively ignorant of the mortality rate of all the covid jabs—more deaths in one year than all the vaccine deaths put together for the last 30 years—or you've been bribed by pharma, the government, and/or the deep state. You MUST know that that would break at least a dozen laws. In either case, if you pass a vaccine mandate or law (which is automatically invalid since it goes against many state and federal laws not to mention the Nuremberg Code and our natural inalienable rights), you will all be on trial for crimes against humanity and/or instigate a civil war.

Washingtonians will not stand for this. They have guns. Lots of them. And alarm systems and militias, and a cadre of constitutional lawyers at the ready. I suggest you decide very carefully before you upset a "hornet's nest" and destroy your careers and lives. It's not too late to do the right thing.

Sincerely,

A man living in the State of Washington

TO: Washington State Board of Health

RE: What specific science is behind your Mask Mandate rationale????????????????

Washington state law may give the Department of Health broad authority to protect public health, but it doesn't permit the department "to act by whim or fiat in all matters concerning disease" without specific regulations that empower a mask mandate.

What specific, peer reviewed science is the foundation behind your mask mandate?

As an RN BSN, Critical Care Nurse, member of Front Line Critical Care Consortium, I know that masks do NOTHING TO STOP NOR SLOW airborne corona viruses, including COV19.

Covid 19 is airborne, not droplet spread. Why implement droplet precautions in public with healthy individuals??? Droplet precaution is used in a clinical setting to protect sick individuals, not healthy people out in public!!!!

I was trained by CDC years ago when, why, how, how long, and when not to where masks.

No mask on planet earth is certified to stop or slow any airborne corona virus.

Even N95 masks become worthless after 15 minutes of wearing one due to the warm moisture built up in them from normal respiration!!! Cloth masks are absolutely worthless!!!!!!

So, again I respectfully request the basis for the feckless, insane mandate to wear masks, in any public setting, for any length of time.

Please send me the links to your "science".

Thank you.

Hello,

When will the Board be talking about requiring covid-19 vaccines in children in order to attend school? Also, when will the board be discussing involuntarily containing positive or unvaccinated people in quarantine camps? Will the public be made aware of when these discussions will be happening?

Furthermore, why are you disabling comments during the public meetings?

When will you all start following actual science and start killing vaccine mandates? People who are vaccinated and boosted are catching and spreading covid. There is no reason for the continued push of covid-19 vaccines especially on children.

Scientific studies are proving that natural immunity offers way more protection than vaccine immunity: Protection afforded by prior infection against SARS-CoV-2 reinfection with the Omicron variant | medRxiv

Subject: You can not implement the vaccine mandate for Wa school kids.....

External Email

I vehemently oppose the implementation of a Covid 19 Vax requirement for schools in Washington State. For starter, based on reason #1 below and on so many other laws, this is flat out illegal. It would be harassment and coercion of the citizenry by those who are put in place by the citizens to protect the health of the citizens.

Secondly, it makes absolutely no sense and most people realize that, except the few that have been terrorized by the fear campaign and miss-information. It is clear now to everyone, and cited by the CDA, that the vaccinated are getting the virus, can spread it, and are getting sick from it (just as sick I might add), just like the unvaccinated. So the experimental shot makes zero sense to get, especially for children. Healthy children have literally no risk of getting hurt from this virus. On the other hand, there is a serious risk of injury or worse. The heart problems are real, the CDC has admitted that, VAERs injury and death are real and much underestimated, and people can clearly see all this is

happening... and who knows what other injuries and long-lasting effects these kids will get with clotting, etc. One thing is sure however, there will be some injuries to these kids and likely some worse outcomes. You do not want to be responsible for that, and there will be damage to some of these kids if you force them to take this experimental gene therapy. And I will reiterate, there is zero risk to these kids if they don't get the shot

This is wrong to even seriously consider, discuss, and threaten citizens with in so many ways.... it is not moral, it is against humanity. And it is no way necessary with the virus being much less virulent now. The vast majority of the country is doing nothing like this. For God sakes, please do the right thing and protect your citizens health and their rights. It is your responsibility. We know there is big money to schools involved in this, but that is not a reason to do an awful thing like this. The truth will come out and you will want to be shown standing up for it. Please do the right thing. Thank you.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these

vaccinations for school age children.

Sincerely,

Monty Chellis

Subject: WAC's that give the DOH police type powers

External Email

To whom it may concern

I am writing in regards to WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

It concerns me the above codes are written so ambiguously and open ended. This can lead to abuse of power.

Health is important but to which ends do we leave sweeping powers in the hands of such few people?

These codes empower a select handful of individuals (or less). They even allow for instructions to law enforcement in the performance of their duties, to detain the free people of this state.

There is not even a concise threshold as to when these powers are allowed to take effect.

Use Covid for example.

In 2020, approximately .02% of the American population died "while having Covid". (Not all died from Covid) This is the data set for 2020.

Of that .02%, the average age of death is reported to be 77 years old. (The average lifespan of an American is 78)

Covid in 2021 is not dramatically different, mathematically.

Is this the levels of data which begin a medical rule over the citizens of our state?

Does Covid rise to the levels of detaining healthy individuals because they do not wish to have these codes imposed on them?

Where is the triggering point?

Mandatory screening, mandatory medication, mandatory testing, or other arbitrarily and capriciously imposed temporary codes, against their will?

These codes seem to grant powers in conflict of constitutionally protected rights.

The one thing clearly memorialized in the codes is that they're absent clarity and could lead to abuse of power.

As a citizen of Washington I find these WACs to be poorly written and granting far too much authority.

Hello "Public Servants"

I am completely against any of the proposed COVID Policies; these are overreaching, unconstitutional and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. You will not take my family nor hold any of us against our will. We will not comply. You will not force any of my family to take the vaccine or any other medical procedure that is not wanted. We will resist!

And we will withhold tax revenue and any compliance action.

Signed,

A fully vaccinated but non-conforming citizen.

GLOBAL ALERT: An estimated 10 million people PER DAY are set on irreversible countdown to vaccine death that could exterminate BILLIONS if not stopped in the next year

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.naturalnews.com%2F2022-01-04-10-million-people-per-day-are-set-on-irreversible-countdown-to-vaccine-death.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ca497aa72ac3f488ed32e08d9d48945d7%7C11>

This is a red alert for humanity. We have less time remaining than you might think. I've done some rough math, and it's beyond alarming. It spells the end of human civilization if we don't stop the vaccine holocaust in the next 365 days. As estimates and projections show below,

If the Washington State Board of Health really care about the health of the people, they need to acknowledge what the world-renowned doctors who signed the Declaration to Cease and Desist the deadly Covid Shot that has been determined to not be a vaccine at all I, but not meant for human consumption and very deadly.

Here is the Declaration in Part:

"The World Council for Health declares that it is time to put an end to this humanitarian crisis. Further, the Council also declares that any direct or indirect involvement in the manufacturing, distribution, administration, and promotion of these injections violates basic principles of common law, constitutional law and natural justice, as well as the Nuremberg Code, the Helsinki Declaration, and other international treaties."

Please take heed to this. You are liable to violations of this declaration.-Kathie FitzPatrick, Yakima, WA

DECLARATION, CEASE AND DESIST AND NOTICE OF LIABILITY

WORLD COUNCIL FOR HEALTH CALLS FOR AN IMMEDIATE STOP TO THE COVID-19 EXPERIMENTAL "VACCINES"

A. CONSENSUS OF WORLD'S FOREMOST EXPERTS

Globally renowned experts, including Dr. Paul Alexander, Dr. Byram Bridle, Dr. Geert Vanden Bossche, Prof. Dolores Cahill, and Drs. Sucharit Bhakdi, Ryan Cole, Richard Fleming, Robert W. Malone, Peter McCullough, Mark Trozzi, Michael Yeadon, Wolfgang Wodarg, and Vladimir Zelenko, among many others, consistently warn the world about the adverse effects resulting from Covid-19 experimental injections; they also warn about their long-term effects, which cannot be known at this time since most clinical trials will be not completed until 2023, and some as late as 2025.

In June 2021, Dr. Tess Lawrie, co-founder of the World Council for Health and member of the Council's Steering Committee, courageously described the global crisis and called for urgent action: *"There is now more than enough evidence on the [UK] Yellow Card system to declare the COVID-19 vaccines unsafe for use in humans. Preparation should be made to scale up humanitarian efforts to assist those harmed by the COVID-19 vaccines and to anticipate and ameliorate medium to longer term effects."*

B. DECLARATION

The World Council for Health declares that it is time to put an end to this humanitarian crisis. Further, the Council also declares that any direct or indirect involvement in the manufacturing, distribution, administration and promotion of these injections violates basic principles of common law, constitutional law and natural justice, as well as the Nuremberg Code, the Helsinki Declaration, and other international treaties.

C. UNCENSORED FACTS

We now know that children are over one hundred times more likely to die from these experimental injections than Covid-19. Injected athletes, globally, are collapsing before our very eyes. In spite of the fact that reporting systems are limited and passive, millions of adverse effects have been recorded, which include death, paralysis, blood clots, strokes,

29th November 2021

www.worldcouncilforhealth.org

myocarditis, pericarditis, heart attacks, spontaneous miscarriage, chronic fatigue and extreme depression.

See: <https://coronavirus-yellowcard.mhra.gov.uk/>

See: <https://vaers.hhs.gov/>

See: <https://www.ema.europa.eu/en/human-regulatory/research-development/pharmacovigilance/eudravigilance>

See: <http://www.vigiaccess.org/> (search covid-19 vaccine)

D. VICTIM TESTIMONIES

The World Council for Health acknowledges and respects the experiences and testimony of the victims of this worldwide medical experiment. We also declare and confirm that safe, effective and affordable treatments for Covid-19 exist and should be made available to all who need them.

See: <https://www.wewanttobeheard.com/>

See: <https://nomoresilence.world/>

See: <https://www.vaxtestimonies.org/en/>

E. NOT SAFE, NOT EFFECTIVE

Recent studies confirm the risks associated with Covid-19 experimental injections. Emerging research establishes that the injections are neither safe nor effective, and, in fact, are toxic. While some of the known ingredients of the injections cause biological harm, it is even more concerning that the unknown and undisclosed ingredients may present an even greater threat to human health.

F. CEASE AND DESIST

The World Council for Health is ethically and lawfully bound to issue this Declaration, demanding that governments and corporations cease and desist from direct or indirect participation in the manufacturing, distribution, administration or promotion of Covid-19 experimental injections.

The Council declares that every living man and woman has a moral and legal duty to take immediate and decisive action to halt this unprecedented medical experiment, which continues to cause unnecessary and immeasurable harm.

29th November 2021

www.worldcouncilforhealth.org

G. NOTICE OF LIABILITY

The right of bodily integrity and the right to informed consent are inalienable and universal human rights, which have been trampled by government mandates and corporate imperatives. Thus, the World Council for Health declares that any person or organization directly or indirectly participating in the manufacturing, distribution, administration or promotion of Covid-19 experimental biologics will be held liable for the violation of principles of justice grounded in civil, criminal, constitutional and natural law, as well as international treaties.

Jessica Engel (You) 10:17 AM

How is it that our state is over 80% vaccinated but you are saying that all the jabs and masks aren't enough to stop this new wave? Do you hear yourself?

Jessica Engel (You) 10:25 AM

There is new data that shows the people who are getting vaccinated, have a much higher infection rate in the 2 weeks after vaccination. During this time, people are still considered "unvaccinated". How have you adjusted these numbers to show that people who have had the shot, have high infection rates?

Hello,

When will the Board be talking about requiring covid-19 vaccines in children in order to attend school? Also, when will the board be discussing involuntarily containing positive or unvaccinated people in quarantine camps? Will the public be made aware of when these discussions will be happening?

Furthermore, why are you disabling comments during the public meetings?

When will you all start following actual science and start killing vaccine mandates? People who are vaccinated and boosted are catching and spreading covid. There is no reason for the continued push of covid-19 vaccines especially on children.

Scientific studies are proving that natural immunity offers way more protection than vaccine immunity: Protection afforded by prior infection against SARS-CoV-2 reinfection with the Omicron variant | medRxiv

I am sad to see my state officials being so uninformed about early treatment of covid-19.

Please communicate more clearly about how long employees need to wait to return to work after recovering. The CDC is very inconsistent about this.

500,000 people have died unnecessarily due to restrictions of proven early treatment. Children recover 99.998 % of the time. They do not need to be part of the injection experiment.

It is immoral to force people to be injected with experimental chemicals against their consent or deprive them of jobs, Healthcare, freedoms and rights to their free speech and movement based on misinformation.

Dear Washington State Board of Health:

I am very concerned about the proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

This virus has a very low mortality rate in children. Their recovery is 99.985%. My children have natural immunity as well as myself. There are more than 140 studies that demonstrate that natural immunity is equal or better than what is achieved by vaccines. The new variant strains are evading the vaccine and that immunity is waning. Thus,

Please do not put our children as well as other citizens in this situation.

Sincerely,

MaryJane Healey

Subject: Why the Pfizer Inoculation Does More Harm than Good

Dear Washington State Department of Health staff,

Please do not require school children and preschoolers to be inoculated with a Covid "vaccine" in order to attend school in our state!

Why the Pfizer vaccine for Covid 19 Does More Harm Than Good

Source: www.CanadianCovidCareAlliance.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>>

The Pfizer trial only used:

- 1) Unexposed & inoculated, and
- 2) Unexposed & not inoculated.

They should have also included:

- 1) Exposed & inoculated, and
- 2) Exposed and not inoculated (aka natural immunity from having had Covid).

The fact that they avoided the latter 2 shows that they thought their Pfizer vax wouldn't perform well in those categories. A study should show how those exposed and not inoculated fare vs. inoculated & exposed. It didn't.

The clinical endpoints of the trial should have been: Do people who take the Pfizer vax have less illness and death? (It wasn't) Choosing the proper endpoint is well-known, as a result of testing of cancer drugs. In cancer drug testing, they had to switch to all-point mortality, and Pfizer should have done so.

They could easily have included biomarkers, but they didn't. We need to know how people exposed, but not inoculated compare with the exposed and inoculated. This is natural immunity, and we need to know how those with natural immunity fared.

They should have tested for: de-dimer levels (micro-clotting) before and after.

Other biomarkers Pfizer should have and easily could have tested for: inflammation, barrier permeability, hypoxia, cardiac damage, predisposition to Alzheimer's, predisposition to autoimmune disease.

They should have had biomarkers for thrombotic disease. This is a condition which would take time to surface, but could have been measured before & after in biomarkers. Many doctors are reporting thrombotic conditions in vaccinated patients.

Vaccine passports: The Pfizer vaccine was not tested for spread reduction: No evidence at all that they reduce transmission and disease, and that was never one of the endpoints of the study. All they measured for was, "Do people who take the vaccine test positive for Covid-19 less often?" and the study was designed so that they would get few "no" answers, and they then proceeded to a vax rollout.

Testing failures: Subjective testing: The study did not test all patients for Covid-19! Instead, they only tested for the Covid-19 symptom, and then left it up to the discretion of their investigators to decide what that was. So that means that asymptomatic infection would be missed entirely. And it introduced a high level of subjectivity to the trial, because an investigator could actually decide whether to test or not to test. This lack of systematic testing actually makes the results of the trial unreliable. All participants should have been tested.

There is considerable missing data in the study. The endpoint is all Covid cases: 8 inoculated vs 162 placebo. But it's such a small # of participants to begin with. But there

are 80 lost follow-up subjects in the inoculated group! They don't know whether they got sick or not, or even died. They don't know. That's 10x more than the # of Covid cases they had in the inoculated group. So if a significant proportion of those 80 had been positive, it would have dramatically changed the results. Also, all the suspected but unconfirmed cases: 1594 in the inoculated group, 1816 in the placebo. This means they were symptomatic, but the investigator never followed up with a Covid test! These are huge numbers compared to the confirmed cases! The fact that the suspected cases which weren't tested were significantly larger than the endgame results means that this data is unreliable. The study should not have been accepted.

What about the placebo group? There were also many unconfirmed cases. If all these cases, inoculated and placebo, were positive, the relative risk reduction would then only be 19%. That's not a high enough percentage to gain approval.

Adolescents: The inoculation is really all risk and no benefit.

Teens are statistically at 0% risk of death from Covid-19. But the vaccine does pose risk of serious events. But the study was not designed to find serious adverse events. A serious event that occurred at a rate of 1/800 might not even show up in a sample of 1,005 people.

In the tests, there was a serious event in at least one subject who was inoculated. A 12-year-old girl. She experienced multiple serious effects, including lost feeling from the waist down, lost bowel and bladder control, menstrual cycle issues, seizures, verbal and motor tics, dizziness, fainting, headaches, brain fog, erratic blood pressure, and more. And the last 10 months, she is wheel chair bound and fed by a feeding tube. Pfizer labelled her case "functional abdominal pain."

5-11 year olds: The inoculation is an unacceptable risk to this group. Pfizer, using predictive modelling, acknowledges that their inoculations WILL cause myocarditis, but optimistically claims there will be zero deaths from myocarditis in any of their modelled scenarios. It's speculative. Still, there's no justification for giving children myocarditis. But the government has actually normalized myocarditis in kids, publishing Sick Kids brochures of how to deal with myocarditis in kids. But how to deal with it is to not cause myocarditis in kids! It's very serious. It causes permanent damage. Severe myocarditis weakens your heart so that the rest of your body doesn't get enough blood. Blood clots can form in your heart, leading to a stroke or heart attack. And the mortality rate is up to 20% at 6.5 years. The risk of 4 in 20 children who contract myocarditis dying within 6.5 years is unequivocally an unacceptable risk for children. But the FDA maintains that it is an acceptable risk for children. They have actually abandoned the "do no harm" principle.

Dr Eric Rubin of the New England Journal of Medicine (NEJM) has said that the way to find if they do harm is by doing a roll-out on the population. He voted to roll out inoculations for ages 5-11, and suggested that a population level roll out as an appropriate way to test for adverse events. Of note, the NEJM is also the publisher of the Pfizer reports.

Governments are proclaiming the inoculations to be safe, yet the data is not there to back that up. Pfizer admits that their long term immune response, efficacy & safety data is limited and that their studies weren't powered to find "rare" side effect, as only about 1500 kids were in the testing group which received the inoculation. The law of informed consent says that parents should be told about these risks, but it's not happening.

On Nov 2, the British Medical Journal released an article about their investigation into Ventavia, one of the research companies Pfizer hired to conduct the trials. A whistleblower who was a Regional Director reported to the FDA that Ventavia: falsified data, unblinded participants, did not follow up and test participants who reported symptoms, and mislabeled some specimens. Several other employees backed up the Whistleblower's account. But Pfizer never disclosed the problems in its EUA application, and in fact, Pfizer has now hired the same researcher, Ventavia, to run more Covid-19 clinical trials.

So it's not surprising that we are seeing the issues we are in the 6-month report.

Manipulation of Data Cohorts: Pfizer took the results from their adult trial, which started July 27, 2020, and then added in the results from the 12-15 year olds' trial, despite the fact that the adolescent trial started four months later. Since it's well known that the

efficacy wanes over time, this gives a false boost to the efficacy numbers. The efficacy of the two groups should have been reported separately, not presented as one combined result.

Pfizer trials did not prove safety. They proved harm. The endpoints of the trial should have been illness and death, not a positive or negative Covid-19 test. But their test actually showed harm. They used younger, healthier groups than the vaccine would eventually be rolled out to. Here are some results of Pfizer's own randomized control trial: Related adverse event, +300% over placebo group; severe adverse event, +75% over placebo group; any serious adverse event, +10% over placebo group. Deaths in the vaccinated group: 20; placebo group, 14.

How is this harm playing out in the real world? Governments are assuring us that they are monitoring safety and will let the public know if there are problems. But once the vaccine was rolled out at the population level, the surveillance method for reporting is called "passive." It's difficult and time-consuming for overworked doctors and health workers to file the harm reports, and then it goes thru several levels of bureaucratic approval before the case is accepted as a vaccine-related injury.

"Active" surveillance was used for trial participants. They were given a phone app with choices of adverse events they experienced. 78% reported adverse reports, and 5% were serious. There was also journal entry options for the participants, and 30% reported adverse events thru that, and 2% were serious. But when the reporting method was switched to passive for the general population rollout the reporting fell way down. But some news is getting out: For example, the risk of myocarditis is becoming known. And it's occurring in younger, healthy population where there was previously a very low rate of myocarditis.

On Nov. 17, the FDA released the first batch of data to satisfy a Freedom of Information request. This is data used by the FDA to approve Pfizer's covid-19 vaccine. One report in which Pfizer tracked adverse events in the first 2.5 months after the EUA, reported 1,200 deaths and over 25,000 nervous system adverse events. Under "Safety Concerns" Pfizer listed Anaphylaxis and Vaccine-Associated Enhanced Disease. This document should be incriminating for any agency who saw it and called the vaccine "safe."

Pfizer's criminal past includes lying about a heart valve which fractured and killed hundreds; conducting clinical trials on African children without their parents' consent, after which some of the children died; bribing doctors; suppressing research; manipulating studies; withholding information that its products caused cancer; fraudulent marketing, and many more. They've literally paid billions in fines and settlements for their actions. So they are not a highly ethical corporation.

The CDC has redefined "vaccine" to suit political & pharmaceutical interests. The new definition of vaccine by the CDC is "A preparation that is used to stimulate the body's immune response against diseases." The new definition does not indicate there is any actual benefit derived from a vaccine.

Dear Christy,

As a member of the Washington Board of Health I'm sure you share my concern for the wellbeing of our populous. It is for this reason that I have taken the time to write to you. As a US citizen and resident of Washington State I want to express my strong objection to WAC 246-100. I understand that it will allow local health officers to use law enforcement (WAC 246-1-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination (WA 246-100-140).

I believe this is an unnecessary overreach by this State. It seems like we are heading toward a pattern of control that resembles Communism. Please reject this legislation and protect our freedoms.

I have lived in Washington most of my life. 6 generations of my family have called Washington home.
Washington Covid Drainment Emergency is an assault on the freedoms that I fought for when I served in the United States Marine Corps. If this is allowed to be even considered, then I would say Washington has now become a communist state, and I am ashamed to call this home, and it may be time to find another state to call home.

You are really conducting this out of your Minds! Now This has gone to far now. If you are reading this and have been vaccinated very sorry. You lost your rights according to the Supreme Court ruling of 2013. You are now property of the corporation. And you can not be on an independent advisory board as you are not independent. You are part of the corporation as they have a patent on you. You have outside Interest whether you like it or not that's a fact. The legislature and government are not this ignorant to not know these laws. Hope you cease all forms of this criminal activity as this thought now is liable as a crime against humanity. The criminal syndicate .05% of world population globalist and eugenics; doctor evil your masters have lied conned or payed you off to consider detaining American tax payers freedom of choice w/ experimental therapy that dosen't offer protection safety or effectiveness.

Fact is the canary or elephant pin the room?! FIFA Pro league over 100+ young strong best of the best Athletes world stage best soccer players Have lost their Lives in front of PACT stadiums on the pitch. Video after voided game after game dead. The elect our quasi-government because he who has the money makes the rules. Our elect have pandered long enough ran by ear marks unbacked treasury notes the sic bankers Print for their own agendas of control and oppression. We have currently a corrupted washington state Governor influenced by the real global pandemic the elite and Big pharma illegally paying of elected officials school boards delegates around the world. You shall not detain any unvaxxed human. No more vax cites the Governor can stop his mandates the evidence of scientific facts are available ph Pfizer court released documents prove that just First three months of gene therapy! As the listed SEC Pfizer filing describes exactly as a gene therapy.

I wonder "if" the Crimes Against Humanity Judges are familiar with this ruling, with regards to people who agreed to be vaccinated : mRNA vaccinated people worldwide are products, patented goods, according to US law, "no longer human".Esme Coetzee 10 Dec 2021 at 4:55 PM #63403 GMO HUMANS

[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fambassadorlove.wordpress.com%2F2022/01/08/19-patent-horrors%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b6ae6a750f34cc590bd08d9d28bf969%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fambassadorlove.wordpress.com%2F2022/01/08/19-patent-horrors%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b6ae6a750f34cc590bd08d9d28bf969%2F)

All the Covid-19 "vaccine" patents mention gene deletion. All the patents except one, mention "complimentary DNA" (cDNA). cDNA is a chimeric mRNA cocktail that's being coded into Human cells using artificial genetic sequences in cross-species genomics. According to the US Supreme Court ruling in 2013, altering Humans with cDNA makes them patent eligible. The court documents show that cDNA is made using modified bacterium and Supreme Court judges ruled it patent eligible. This means that a plant, animal or Human, could be patented and owned if first genetically modified with cDNA. Mark Steele summarized it perfectly by stating: In the US, the Supreme Court has ruled that vaccinated people worldwide are products, patented goods, according to US law, no longer human. Through a modified DNA or RNA vaccination, "the mRNA vaccination", the person ceases to be human and becomes the OWNER of the holder of the modified GEN vaccination patent, because they have their own genome and are no longer "human" (without natural people), but "trans-human", so a category that does not exist in Human Rights. The quality of a natural person and all related rights are lost. This applies

To whom it may concern,

I oppose WAC 246-100 rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

We will stand up! Majority of citizens do not agree with your policies and we will make a stand.

Sincerely,
Heidi Chrisman

Hi, the board members of WA health,

Since the Omicron is like a common cold then we don't need to worry so much. We just need to stay home and rest like what we used to be doing before 2020. We don't need so many testings, vaccinations quarantines and forced "care" and mandate and we will not cause so many fears in people and will release the public healthcare resources to whoever really needs. And the pandemic will come to an end.

Respectfully, Sir/Madam,

I'm writing to let you know that I am uniting with many people in Washington State to stand against the tyranny we are facing.

This letter is regarding the WSBOH meeting scheduled for Jan. 12, 2022.

According to information I have seen on the web in recent days, it appears that WSBOH will be discussing proposed policies that pertain to -WAC 246-100-070, WAC-246-100-045, and WAC 246-105.

You do not have our permission.

You need our permission.

Our kids are not your property.

Our bodies are a temple of the Holy Spirit and is not owned by the government

We are born with free will and we will retain that until death.

Thank you,

Sharlene A. Greene

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I am opposed to making COVID-19 vaccinations mandatory for school admission or childcare in Washington.

The data has shown that, luckily, this virus does not pose a large threat to children. Since these vaccines are brand new, there is no way to know the long-term effects they may have on children, and adults should not put children at risk for their own protection. It is our job to protect them. Additionally, since vaccinated individuals can now easily spread covid, I cannot understand the reasoning for this mandate.

Since there is a risk of harm to children from the vaccine, it should be the parents responsibility to weigh the risks of the virus versus the vaccine and make that decision, since they will be the ones having to live with any negative consequences, and there will be many.

My son graduated from the Tumwater school district in 2014. His schooling prepared him well and he received a degree in Mechanical Engineering 3 years ago. He was required by his work and received his first Pfizer vaccine in May. He had a negative reaction to the vaccine and has been ill and unable to work ever since. It has been 8 months now. He was healthy and active before this happened. We have seen a multitude of doctors that have not yet been able to help and he is now filing for disability. His story is not unique. There are many who have been negatively affected by these vaccines, but it is a fact that is not well publicized or allowed to be discussed. Also, it is well known that once a person has had covid, they are more likely to have a negative reaction to a vaccine. Are you planning on giving a vaccine pass to those who have natural immunity? Once these mandates result in children becoming injured, the lawsuits are sure to follow.

I know of one family already who is moving out of state this month because they have 3 children, knew this mandate would be coming, and will not vaccinate their kids against this particular virus. Many more good families will be following them.

I hope you reconsider instituting this mandate as I do not believe these vaccines should be forced onto our children.

Katie Waldron (personally vaccinated but against mandates, especially for our kids)

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Dear Ladies and Gentlemen of the board,

I would like to express my extreme opposition to the implementation of a COVID-19 vaccine requirement for schools in Washington State. The proposed Covid policies are over reaching and immoral!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Forced vaccination of healthy children, for a disease that does not affect them, to make adults feel safe, is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Respectfully,

Carol L. Pratt

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. The Covid vaccine does not prevent transmission of the virus and is only supposed to lessen the severity of symptoms and prevent severe illness and hospitalization

<https://www.youtube.com/watch?v=TKFWGvvIVLI>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>

.

2. This vaccine does not meet the 9 criterion updated in 2017 that must be met in order to add this vaccine to the required immunization for child care and schools.

Namely, the ACIP did NOT recommend a COVID-19 shot licensed by the FDA for use in ages 5-11 or 12-15, nor did it place such a shot on the CDC Recommended Schedule.

This vaccine is not FDA approved and is only for use under EUA. Federal Emergency Use Authorization statutes indirectly prohibit school mandates of EUA products by requiring recipients be informed they have the option to accept or refuse the vaccine:

<https://www.fda.gov/media/153717/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153717>

.

3. Instead of basing their claims on long term studies, modelling is being used to predict the safety and benefit of the vaccines. "Therefore, the FDA conducted its own benefit-risk assessment using modelling to predict how many symptomatic COVID-19 cases, hospitalizations, intensive care unit (ICU) admissions and deaths from COVID-19 the vaccine in children 5 through 11 years of age would prevent versus the number of potential myocarditis cases, hospitalizations, ICU admissions and deaths that the vaccine might cause. The FDA's model predicts that overall, the benefits of the vaccine would outweigh its risks in children 5 through 11 years of age." <https://www.fda.gov/news-events/press-announcements/fda-authorizes-pfizer-biontech-covid-19-vaccine-emergency-use-children-5-through-11-years-age>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fnews-events%2Fpress-announcements%2Ffda-authorizes-pfizer-biontech-covid-19-vaccine-emergency-use-children-5-through-11-years-age&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C184d1a8a685d4830e53e08d9d1a34132%7C11d0e21>

This is not science. This is hope that the risks outweigh the benefits with no proof that

this will actually be the case 10 years down the road,(or longer). Where there is a risk, there must be a choice. This risk isn't even based on science.

4. We cannot base the urging to add this vaccine to the requirements because of children being in the hospital with a positive covid test. Anthony Fauci himself said on December 31, 2021, " . . . [I]f a child goes into the hospital, they automatically get tested for COVID, and they get counted as a COVID-hospitalized individual, when in fact they may go in for a broken leg or appendicitis of something like that, so it's overcounting the number of children who are . . . hospitalized with COVID as opposed to because of COVID." MSNBC interview,

<https://twitter.com/TheEliKlein/status/1476917049435856925>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftwitter.com%2FTheEliKlein%2Fsta](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftwitter.com%2FTheEliKlein%2Fstatus/1476917049435856925&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C184d1a8a685d4830e53e08d9d1a34132%7C11d0e21)

narrative-on-covid-is-beginning-to-change-and-ben-shapiro-has-the-receipts&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C184d1a8a685d4830e53e08d9d1a34132%7C11d0e21

.

5. Last, natural immunity needs to be honored and is consistent with Board Rule -

Chapter 246 - 105 WAC that states that a child is required to be vaccinated against or "show proof of acquired immunity for." This link gives 141 studies showing the robust, long lasting natural immunity that many children quite possibly already have:

<https://brownstone.org/articles/79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2F79-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C184d1a8a685d4830e53e08d9d1a34132%7C1>

Thank you for your time and for doing the right thing and allowing families to make the best decision for their children. An unvaccinated individual is not more harmful than a vaccinated individual and so you cannot consider making this mandatory with the framework of preventing harm to others.

-Heidi Hartnell

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Vaccines should remain a personal choice.
Kids are less affected by this particular virus.
COVID is a virus and will continue to mutate.
Kids are far more in danger riding the school bus than the virus.
Flu shots are voluntary and covid should be too.
There is not significant evidence that the vaccine will not cause long term consequences for kids.
The covid shot does not prevent anyone from getting covid.
Kids likely have been exposed to covid and would then have natural antibodies.
If covid shots become mandatory, what's next for our poorly operating government to say is mandatory.
If the vaccine "saves lives", are cancer treatments, insulin, inhalers, heart transplants, organ transplants, blood fusions etc. going to be mandatory and "available" at any local medical facility any time soon?
The states who lifted the mask mandate and do not require covid vaccination proof for public outings have not been depleted of population.
Masks and the covid shot should all be personal choice.
Kids should not be made mandatory for the covid shot. Period. End of story.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- > This vaccine has not been through the trials or had enough time to know the long term effects it's having on our children and their health.
- >
- > Children are at a very low risk from getting or dying from covid.
- >
- > This vaccine is still under emergency use and has not been approved in this country.
- >
- > Informed consent had not been properly given to people or families.
- >
- > Myocarditis is a side effect, especially in boys. Once the heart is damaged, it's damaged for good. Why put children at risk for this when they are at such a low risk of getting covid.
- >
- > I strongly urge you to decline adding this covid vaccine to the list of childhood vaccines.
- >
- > Sincerely,
Paul Monsen

More VC Nurses Blow Whistle on 'Overwhelming' Numbers of Heart Attacks, Clotting, Strokes

By Joel Kilpatrick

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fconejoguardian.org%2Fauthor%2>>

December 14, 2021

After the Conejo Guardian's report on alarming trends in Ventura County hospitals

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fconejoguardian.org%2F2021%2Fcounty-nurses-blow-the-whistle-on-crisis-in-local-health-care%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1dd3f7e2c943462154d408d9d17b7ab4%7C11d>>, more nurses have come forward to affirm the rise in unexplained heart problems, strokes and blood clotting in local vaccinated patient populations. They also say doctors refuse to consider that these could be adverse reactions to Covid shots.

Sam, a critical care nurse at an ICU in a Ventura County hospital, came forward because, "I'm tired of all the B.S. that's going on," he told the Guardian. "It's crazy how nobody questions anything anymore."

"NONE [OF THE DOCTORS] QUESTION WHETHER THE VACCINE CAUSES MYOCARDITIS, PERICARDITIS AND THE STROKES THAT ARE COMING IN. IF THEY DON'T TOE THE LINE, THEY COULD LOSE THEIR MEDICAL LICENSE."

He has witnessed a surge in numbers of young people experiencing severe health problems after receiving Covid shots.

"We've been having a lot of younger people come in," Sam says. "We're seeing a lot of strokes, a lot of heart attacks."

One 38-year-old-woman came in with occlusions (blockages of blood flow) in her brain.

"They [doctors] were searching for everything under the sun and documenting this in the chart, but nowhere do you see if she was vaccinated or not," Sam says. "One thing the vaccine causes is thrombosis, clotting. Here you have a 38-year-old woman who was double-vaccinated and she's having strokes they can't explain. None of the doctors relates it to the vaccine. It's garbage. It's absolute garbage."

Another woman, age 63, came in the day she took the Moderna Covid shot. With no previous cardiac history, she suffered a heart attack. Tests revealed her coronary arteries were clean.

"One doctor actually questioned the vaccine, but they didn't mention it in the chart because you can't prove it," Sam says.

While hospitals are seeing more myocarditis, an associated side effect of the Covid shots, "Everyone wants to downplay it — 'It's rare, it's rare,'" Sam says. "Doctors don't want to question it. We have these mass vaccinations happening and we're seeing myocarditis more frequently and nobody wants to raise the red flag. When we discuss the case, they don't even discuss it. They don't mention it. They act like they don't have a reason, that it's spontaneous."

'Survival mode'

"I FEEL LIKE OUR HOSPITAL IS ... BARELY ABLE TO FUNCTION RIGHT NOW. THAT'S HOW BAD IT IS."

Dana, another ICU nurse, says the number of sick, critically ill people in her Ventura County hospital has become "overwhelming," pushing her facility's patient census to the highest levels she has ever seen.

"It has never been this busy, and none of it is Covid-19," Dana says. "We don't normally see this amount of strokes, aneurysms and heart attacks all happening at once. ... Normally we'll see six to ten aortic dissections a year. We've seen six in the last month. It's crazy. Those have very high rates of mortality."

But doctors almost never bring up the possibility of adverse reactions due to Covid vaccinations.

"Doctors are like, 'It's probably the holidays,'" Dana says. "I don't understand how you can look at what's going on and come up with just, 'Yeah, it's the holidays.' There's been a big change in everybody's life, and it's the vaccine."

Covid infection numbers remain small, and most patients who come in with Covid have already been vaccinated, she says. Rather, an unprecedented number of patients are "on pressers to keep their blood pressure up, people on ventilators, clotting issues, so we have a lot of Heparin drips to make sure they don't stroke out," Dana says.

Meanwhile, "Everybody's in survival mode because of staffing."

Nurse shortages, caused by people fleeing California and the health care profession, have local hospitals scrambling to provide care. Dana has been "out of ratio" for the last three shifts, based on the State of California's maximum allowable nurse-to-patient ratio for safely delivering care.

That is leading to serious lapses.

"Because we're short-staffed, they are hiring new nurses and I'm seeing mistakes in the hospital that are not even funny — medical errors," Dana says. "[Hospitals] are trying to fill these spots and are getting any warm body to do the bare minimum. I think it's terrible what's happening."

Recently, Dana took care of a patient who was mistakenly given massive amounts of a certain hormone by a different nurse.

"Now their brain is fried," she says. "The patient is screwed."

Unfortunately, most newly-hired nurses "are not capable of safely managing patients," and yet are being thrust early into this environment, she says.

"The hospital is like, 'We need to fill these spots. We're getting killed.' So they release all these people who've been training for two to three months. Normally you train four to six months," Dana says. "To be honest, I feel like our hospital is on the brink of — we're barely able to function right now. That's how bad it is."

Even the physical space is taxed by the influx of patients with life-threatening health conditions. Dana's hospital is so packed that they are putting patients in staging areas of operating rooms.

As a result of crowding, equipment is not always where it should be and "when someone takes a dump on you and goes into cardiovascular collapse, you don't know where your stuff is — and time is tissue," she says. "Their blood pressure starts dropping, their respiratory rate goes up, and because we're having to shuffle patients and staff around, equipment is in different spots. Sometimes you need to respond in minutes, and if a nurse doesn't know where stuff is and is not used to dealing with the numbers of people and the types of critical problems — every second of delay in therapeutic treatment causes more tissue to get damaged and die, whether it's heart tissue, brain tissue, muscle tissue. Every second counts."

Green nurses managing more patients, with more serious problems, is forcing unpleasant choices.

"It's setting up the patients for failure," Dana says. "How can you manage four to five critically ill patients effectively? You have to pick winners and losers."

Pressuring the 'unvaccinated'

Meanwhile, doctors seem obsessed with getting people to take Covid shots.

Sam took the first two Covid shots while working in Los Angeles during the pandemic, but is shocked at how medical professionals and political leaders are demanding universal acceptance of what he says is "not really a vaccine. It's experimental."

"They shouldn't be forcing it on everyone," he continues. "There isn't a lot of data. There are risks associated with it and you should be able to turn it down. Now if you don't take the vaccine, people shun you."

Hostility toward those who don't go along runs high among medical co-workers.

"You're not allowed to say you don't want it," Sam says. "Coworkers will talk [trash] about you, they're so adamant about it. It's frustrating. ... You always hear the conversations behind their backs. 'She's not vaccinated, blah blah blah.' I'm like, who gives a [care]? It's none of your business. It's their choice. Before, medical information was really private. Now it's like, 'What's your Covid status?'"

Even patients coming into his hospital who have not taken the Covid shots are flagged and treated with disdain, he says.

"The first thing [nurses] say in the history and physical is, 'He's not vaccinated. He's got Covid,'" he says. Meanwhile, "The Covid numbers in ICU are zero."

As for the Vaccine Adverse Event Reporting System (VAERS), it may as well not exist. In his hospital, "There's no protocol [for reporting to VAERS]. Nobody ever talks about that," he says.

Even those who have strong natural immunity after overcoming the virus naturally are being pressured to take Covid shots.

"If this is about science, why on earth are we pushing people to get the vaccine?" Sam says. "We have rights, but they've taken that away. If you don't get the shot, you lose your job."

Informed consent also seems to have gone by the wayside.

"When you give someone informed consent, you are supposed to give them all the risks and benefits, and all options," he says. "I feel like with the vaccine, they don't give you the risks. They say, 'Take this vaccine. It's for the good of the community.' They won't be honest about it because it will drive down vaccination numbers. Every other medical product we give, we inform them fully. I don't understand what it is about the Covid vaccine. They are so adamant about giving it."

'No boosters'

"I DON'T WANT TO KEEP INJECTING MYSELF WITH SOMETHING EVERY SIX MONTHS WHEN I DON'T HAVE DATA."

Sam is most disappointed with doctors and nurses.

"The doctors don't question anymore," he says. "None question whether the vaccine causes myocarditis, pericarditis and the strokes that are coming in. If they don't toe the line, they could lose their medical license. They do what they do because they have bills to pay. I'm disappointed because you have a handful of doctors who will question the narrative, but the rest go along."

The level of propaganda, in his view, is "out of control."

"Propaganda creates doubt," he says. "Half the country buys it and the other half distrusts the system. They [doctors] are smart people but they don't think for themselves anymore. It's the propaganda, the repetition of the lie. It's very effective."

For his part, Sam has decided not to take any boosters.

"I don't want to keep getting this thing. What if I clot off and get a heart attack?" he says. "Health care professionals are evidence-based people — or we used to be — and there's just no evidence what this thing's going to do in 10 years. We have no evidence what it does to the immune system and clotting system. I don't want to keep injecting myself with something every six months when I don't have data."

He and his wife have decided they will leave the state if they can't afford to homeschool their child, when the child reaches school age.

"My [child] will never get the vaccine. We will leave," Sam says. "They are out of their minds to vaccinate these children. Their immune systems are immature. They are

growing. I'm not willing to take the risk. No way. Me and my wife feel the same way."

Florida, which is maintaining medical freedom and privacy, is also their preferred destination if and when he loses his job once governments change the definition of "vaccinated" — leaving him in the same category as those who never took Covid shots in the first place.

"I may end up getting a lawyer if they change the definition of 'vaccinated' and you need a third shot," he says. "California law allows for religious exemptions and hospitals are denying them. That's discrimination."

Like all the nurses interviewed by the Guardian, he says he is "sick and tired of the coercion."

"If you're vaccinated and I'm not, what the heck are you worried about? It's my choice, right?" he says. "If I get sick and die, that's the price of freedom. That's what we're built on. In America, we don't force people to take injections and medical products against their will."

Cheers,

J.D.

Dear Ladies and Gentlemen of the board,

I would like to express my extreme opposition to the implementation of a COVID-19 vaccine requirement for schools in Washington State. The proposed Covid policies are over reaching and immoral!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Forced vaccination of healthy children, for a disease that does not affect them, to make adults feel safe, is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Respectfully,

Jeffrey L. Pratt

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid;
- The vaccines are still only EUA (emergency use authorized);
- There are no long-term studies to document any history of safety;
- Studies do now document that vaccinated and unvaccinated can both transmit Covid;
- Therefore, the vaccine does not stop the spread of the disease.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Those are not vaccines.
They are injections with fire side effects .

You have no power legal or otherwise to force anyone to accept an injection. It is illegal to coerce or force anyone to take the injections and by making them a condition of being able to participate in education is an act of coercion for which you will be sued, and forced to pay millions of dollars to those you have caused harm by inflicting this condition.

You are servants of the we the people , and we the people did not come and ask you to mandate these injections as a condition of participating in education.

You are being paid by the Govenment to implement unconstitutional rules and follow protocols by the cdc which violate the Nuremberg Code of ethics for which you will be tried and sent all to prison for crimes against humanity specifically children and their parents .

We know that is a corrupt game plan through which you are all being paid - has zero to fo with the health of our children let alone prevention of transmission which these injections do not do.

It is the right of every child and their parents alone to choose to take an injection or not, it is not yours to force .

The fact that you are even considering this only goes to show to your ignorance and your corruption.

You should all be removed ftt try om your positions as you clearly fo not have the children's not their parents well being in mind - in fact the opposite is true.

You should all hand on your resignations for failing to be righteous people who are in service of the people .

Sincerely

Keren Retter

- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid
- * The vaccine apparently does not stop the spread of the disease

Because we do not know the long term effects of the vaccine but we do know there are severe side effects for some, particularly teens/young adults, it is wrong to mandate the vaccine for children. It should be a personal choice for each person. No shame and no blame to those that choose to get the vaccine or not. Do not discriminate.

Except for children that have serious health issues, children are the most resilient against virus of all age groups. There is more chance of complications from a vaccine that has not had multiple years of testing to gather long term data, compared to letting a child's own natural immune system fight the virus.

Please do not mandate the vaccines. It is hurting our children's mental health and potentially their physical health It is beyond sad what WA state has done to our precious young with the mask mandates too. We are frightening and harming our youth in many ways that will become more evident in years to come.

Please do the right thing and let family's make the decision for their own children to be vaccinated or not. Making it a mandate, is discriminatory against a child's right to be educated in the public school system. Making a mandate will causes division among children, families and the community.

Please say no to mandates.

Thank you.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These are experimental RNA treatments and cannot be undone. The risk is too great.

The latest variants are mild to extremely mild, so any benefit that the RNA treatments provide (which is known to be very short lived) is minimal. The Benefit of treatment are too low.

We should be teaching our children about and helping them experience Freedom. Mandatory shots are Communists and Nazis do, not what a free society does.

The shots do not limit transmission, so they do not help socially.

The shots do not stop the spread of the disease.

Thank you,

John Ellis

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Covid poses ZERO threat to my children! Driving them to school in the morning is a bigger risk factor than them getting covid.

Covid Vaccines provide no measurable protection for my children.

This is all propaganda and funded by big tech – SO CORRUPT!!

You will lose many more people from this state. They will go elsewhere where there is freedom of choice

What ever happened to my body my choice?

How about educating parents on how to keep a healthy immune system? Worry more about what they are eating that will cause life-long health issues.

Vaccine is not stopping or slowing the spread of this "disease". Why mandate something that DOES NOT WORK?

There are no long term studies yet. This is hardly a vaccine is its' intended form. CDC changed definition of a Vaccine back in August to better fight their fight.

Worry about yourself and all your health issues, not mine! I am the parent of my children, You have NO SAY!

Jennie Oswald

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at a much lower risk for getting covid. If they do get it they have very strong and robust immune systems to fight it off.

These vaccines are still under Emergency Use authorization only. I do not want to see our children experimented on.

There are still no long term studies on the safety of these vaccines.

There is still no informed consent. We do not even know what is in these vaccines.

Pfizer does not want to reveal what is in these vaccine for another 50 yrs.

What are we doing here?

Studies now show that the vaccinated and the unvaccinated can transmit covid.

The vaccine does not stop the spread.

Also we should not be forcing people into quarantine facilities against their will. This feels like tyranny. Are we going to end up looking like Nazi Germany. This goes against the Nuremberg code.

Please consider the facts.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccines are not safe and have not been proven safe.

Dr. Malone chief architect of the MRNA vaccine has already publicly announced that the vaccine has multiple side effect to include hypertension, narcolepsy, high blood pressure, and birth defects.

He has also stated that the vaccine does not stop the virus, prevent the virus, alleviate systems or protect anyone from getting the virus.

All said, WHY would anyone mandate such a controversial vaccine for use among our most import assets, our children!

The vaccine is slowing proving that it's worth DOES NOT out weigh the side effects. Especially in children, what is the point? Whom are we trying to protect? And don't say the kids, because Covid between all strains has had the least impact on children and adolescents.

If it's the protection of the teachers...and they're vaccanated, and the teachers believe that thier vaccine works, then what does it matter if the children are vaccanated or not?

In conclusion, I'm not a anti-vax activist. My children have thier measles, mumps, rubella, chickpox vaccinations. PLEASE...not enough is known about the effectiveness verse side effect of the covid vaccinations to make them mandatory.

If we're already seeing side effects and hearing testimony from individuals that engineered the vaccines concerning possible side effect or effectiveness; why in the world would we make this mandatory for ours kids or even the public to take?

Respectfully,
Nicholas Howard

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It is a proven fact that children have a near zero chance of harm from COVID. However, the danger of harm from an experimental shot is unknown, and getting the Shot is not worth the risk.
Please research information from concerned reputable doctors about this issue. FLCCC is a good resource for you... please check it out.
We have been lied to and totally misled for too long now by corrupt political "experts". Do the research, and do not cave in to political pressure.
Pay attention to real scientific evidence, and DO NOT give COVID shots to kids.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It has been a well established, international fact throughout this pandemic that children are at almost no risk, whatsoever, to any serious illness or death from COVID. There is NO SCIENTIFIC BASIS for mandating that children get vaccinated. Here are some links to articles stating the well known facts about the risks COVID poses to children:

England finds COVID death rate a "2 per Million" in England - all of which had serious underlying co-morbidities

(<https://www.bbc.com/news/health-57766717>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bbc.com%2Fnews%2Fhealth-57766717&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf251ee5367274fdfcbf108d9d18d3990%7C11d0>
)

Unvaccinated children at less risk of serious COVID illness than vaccinated 70 year old

(<https://www.nytimes.com/2021/10/12/briefing/covid-age-risk-infection-vaccine.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nytimes.com%2F2021%2F10%2F12%2Fbriefing%2Fcovid-age-risk-infection-vaccine.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf251ee5367274fdfcbf108d9d18d3990%7C11d0>
)

Age-specific Infection Fatality Rates ranged from 0.001% in those aged 5–9 years

(<https://sfamjournals.onlinelibrary.wiley.com/doi/10.1111/1462-2920.15377>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsfamjournals.onlinelibrary.wiley.com%2Fdoi%2F10.1111%2F1462-2920.15377&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf251ee5367274fdfcbf108d9d18d3990%7C11d0>
)

According to the CDC, children at lower mortality risk from COVID THAN THE FLU

(<https://nymag.com/intelligencer/2021/07/the-kids-were-safe-from-covid-the-whole-time.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnymag.com%2Fintelligencer%2F2021%2F07%2Fthe-kids-were-safe-from-covid-the-whole-time.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf251ee5367274fdfcbf108d9d18d3990%7C11d0>
)

Everyone is losing their patience with the blatant anti-scientific views being promoted by politicians, media organizations and unions. It has become painfully obvious that whatever bad news can be found will be promptly EXPLOITED to keep the public fear levels at a maximum. You can talk about hospitalizations until you run out of air, but the facts show that, barring serious co-morbidities, children are at no risk whatsoever from COVID.

There is also very little patience for the feeble arguments about other vaccinations that are already required by schools - those vaccines provided IMMUNITY. Not "protection", IMMUNITY. The companies making those vaccines were not granted blanket immunity over any vaccine related injuries and they were reviewed thoroughly and approved by the FDA with no political pressure whatsoever.

Since the vaccines deployment, the stated benefits of being vaccinated have undergone numerous revisions.

At first they were described as giving immunity - THIS HAS BEEN PROVEN FALSE.

At first it was explained you only needed to get one or two shots - THIS HAS BEEN PROVEN FALSE.

Then they were described as eliminating transmission - THIS HAS BEEN PROVEN FALSE.

They were designed to be effective against the original strain of COVID - WHICH IS NOW THE LEAST CIRCULATING STRAIN.

And now the benefits of being vaccinated have been scaled back to merely "reducing risk of illness and hospitalization", of which children are at virtually no risk whatsoever.

Teachers also have the right to be vaccinated and boosted as they see fit. No one is debating that. What is really at stake here is that unscientific fear mongering be used as a weapon to threaten parents with their children livelihood - and I guarantee you that will not sit well with citizens across the state.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Health is a personal issue and healthcare needs to be a personal decision between the person, parent and child, and their healthcare provider.

Parents are the ones responsible for their children.

These shots have not been proven safe and the adverse reactions are disproportionately large.

Children have very low risk of adverse reactions or death from Covid, less than from the shot. This is proven statistically.

Getting the shot does not protect anyone from the spread of the virus as both vaccinated and unvaccinated can pass it on. Another proven fact.

I am joining many other people in opposition to making COVID-19 shorts mandatory for school admission or childcare in our State.

Hospital reports indicate that both vaccinated and unvaccinated people can be infected, and both can transmit the disease. Vaccination does reduce the risk of hospitalization or death, but data shows that children are at very low risk to get the disease. At this point in time there is not a conclusive indicator that vaccinating children has any value.

In addition, there is a valid point that there are no long-term studies on possible unintended effects of the vaccine. In the long history of medicine, some well-intentioned drugs resulted in birth defects or other problems that did not become evident until long after they were initially prescribed.

We also do not know if the current vaccines will necessarily be any more, and possibly even less, beneficial against any future variants that may arise.

I think it would be well to wait for more real evidence about the efficacy of these vaccines, and the transmission of the many variants, and possibly future variants, before rushing to require the vaccination of children as a requirement to attend school.

Respectfully
Michael Post

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. There are no long term safety studies on these gene therapy vaccines.
2. These COVID jabs do nothing to stop infection.
3. These COVID jabs are a new technology and SHOULD not be injected in kids.
4. Kids are recovering easily from COVID and should not be mandated for these products.
5. These are liability free products. It is unethical to demand parents inject this into their children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

According to Pfizer's website, Pfizer's vaccine trials on children began in just March of this year. They are going to follow their test subject group of fewer than 3,000 children for two years, which only started in March. This is not enough time to see long-term effects on adolescent children. These are NOT blind trials, so they can be biased.

This is very different from the historical development of vaccines -- on the History of Vaccine website, it states that in 1954 it took a blind trial of 1.3 million children before the polio vaccine efficacy was determined.

The risk of myocarditis in males from the second dose of vaccines is real. A study out of UC Davis has found that "boys aged 12 to 15[sic], with no underlying medical conditions, are four to six times more likely to be diagnosed with vaccine-related myocarditis than ending up in hospital with Covid over a four-month period" (Sample).

In fact, Moderna is pausing its EUA in children because of the myocarditis findings in children (Calabrese).

By October 8, 2021, there had been less than 700 deaths in the US that had occurred since the pandemic began in children below eighteen years of age (Bajak).

There is so much more research to back up these claims. We must NOT risk the health of our children to appease the fear of adults. This is not an outbreak that poses a risk to children.

Thank you,

Jaymie Pennington

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: We should 100% have the freedom and right to determine whether or not our child needs a vaccine and when...not the government. Our children do receive vaccines, but only ones that have gone through the regulation, the trials and the necessary testing that ensures safety. This vaccine is intended to keep the person receiving it out of the hospital...not from getting covid itself. Children are more in danger from a untested, faulty trialed & emergency use authorized shot, then they are from covid itself. Making this mandatory also sets legal precedence for future governing bodies to determine & make health related decisions for our children. This is no longer about the health of our children...this is about a narrative, this is about politics, this is madness and should be considered a form of child abuse for every child the suffers adverse reactions from being forced to take this shot. - Kendra, mom of 2 girls

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Kid's immune systems have been PROVEN to be stronger and more effective than the vaccine. This drug destroys the immune system.
2. Children were never at risk in the first place. There is no need for them to subject their bodies to an unproven drug that could cause long-term side effects.
3. One of the side effects of this drug is infertility. Why would we take away the possibility of our future generations?
4. It is up to the PARENTS to decide what their children medically are given, NOT the schools!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

<https://stevekirsch.substack.com/p/we-are-killing-our-kids-does-anyone>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fwe-are-killing-our-kids-does-anyone&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e>>

We are killing our kids. Does anyone care?

Kids that would have never died from COVID are now dying after getting the vaccine. Will it ever end?

Recently, Dr. Toby Rogers did a risk-benefit analysis showing we'll kill 117 kids for every kid we save from COVID with the vaccines aged 5 to 11
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fwe-will-kill-117-kids-to-save>>

one&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e21

The ratio doesn't really change if they change the dose, e.g., to a third of the adult dose. It means fewer kids saved and fewer kids killed, but Toby estimates the ratio would be about the same. Whether it is 117 or 10, it doesn't matter. We will kill a lot more kids than we will ever save with these vaccines.

What Toby predicted is now coming true.

We can't show it is 117 to 1, but we can show for sure we are killing more kids than we are saving because kids that would have never died before are now dying

With COVID, only children with pretty severe health problems would die: we don't know of a single kid, 5 to 11, who died from COVID who didn't have some pretty serious health issues before they got COVID.

Those days are now gone. We're now killing the healthy kids.

The vaccines rolled out for kids 5 to 11 starting on November 7. It is now just 12 days later and we are now killing perfectly healthy kids.

I just got this text:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcdn.substack.com%2Fimage%2Ffe05bbc84-baa3-437e-9518-adb32be77984.s3.amazonaws.com%252Fpublic%252Fimages%252Fb6afe728-e38b-4c03-800e-c3d7149fd31c_799x391.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d

That's hardly an isolated incident.

These deaths simply are never ever going to be reported in the NY Times or on CNN. So you're never going to hear about them except from alternate media sources like this substack article. So only around 20,000 people will ever see these deaths.

Here's another example. Another canary in the coal mine.

First time in her 14-year career: seeing an 8 year old with myocarditis

I saw this Tweet from one of my followers. First time in her 14 year career she has ever seen an 8 year old child with myocarditis. Welcome to the "new normal."

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcdn.substack.com%2Fimage%2Ffe05bbc84-baa3-437e-9518-adb32be77984.s3.amazonaws.com%252Fpublic%252Fimages%252Fe71f867c-c226-4fc3-ad44-64b70bcc95cf_1081x635.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d

It's happening for older kids too, not just the youngest. Here's a video of Ernest Ramirez who lost his only child

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bitchute.com%2Fvideo%2F...>, his 16-year old son. I've talked to Ernest. His son had zero health issues. He got the first dose of Pfizer and just 5 days later his heart had doubled in size and he died of cardiac arrest while in the park. Dr. Peter McCullough, one of the nation's most respected cardiologists reviewed the autopsy report and determined the vaccine killed the child. But the CDC simply ignores that because the medical examiner who did the autopsy (after a huge amount of pleading by the father) just said his son died of heart failure, not the vaccine.

Please click the image to watch the video, it's only 2 minutes long:

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftwitter.com%2FStrongholdAlexa%2F...>

This phenomenon isn't just unique to the US. I got this from one of my UK readers about increase mortality among the young:

Here some analysis of excess mortality in UK teens as the 2nd vax jabs started:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftruthsleuth.substack.com%2Fp%2Fthe-vaccines-killing-uk-teens%3Futm_source%3Dsubstack%26utm_campaign%3Dpost_embed%26utm_medium%3Dweb&data=0

Sleuthing from Down Under

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftruthsleuth.substack.com%2Fp%2Fthe-vaccines-killing-uk-teens%3Futm_source%3Dsubstack%26utm_campaign%3Dpost_embed%26utm_medium%3Dweb&data=0

Are the Vaccines Killing UK Teens?

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftruthsleuth.substack.com%2Fp%2Fthe-vaccines-killing-uk-teens%3Futm_source%3Dsubstack%26utm_campaign%3Dpost_embed%26utm_medium%3Dweb&data=0

There has been a bit of commentary about the risk Covid-19 poses to UK teens and the merit or otherwise of vaccinating them in light of this risk. The Telegraph recently reported Covid killed just six healthy children during the pandemic, while lockdowns have fuelled a timebomb of health disorders among the young, new data showed...

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftruthsleuth.substack.com%2Fp%2Fthe-vaccines-killing-uk-teens%3Futm_source%3Dsubstack%26utm_campaign%3Dpost_embed%26utm_medium%3Dweb&data=0

teens%3Futm_source%3Dsubstack%26utm_campaign%3Dpost_embed%26utm_medium%3Dweb&data=0

Once these kicked in excess mortality switched from negative to positive where it has stayed. Unlike unvaxed children.

A summary article confirms the shots make no sense for kids in the UK

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdailyexpose.uk%2F2021%2F09%2Freasons-why-you-should-not-allow-your-child-to-get-the-covid-19-vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e2b5bcc2a27126_491x768.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e2b5bcc2a27126_491x768.png>
and points out this inconvenient truth about the myocarditis rates are higher after vaccination than before vaccination. The vaccines clearly made things worse, not better:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcdn.substack.com%2Fimage%2Ffile%2F055bbc84-baa3-437e-9518-adb32be77984.s3.amazonaws.com%252Fpublic%252Fimages%252F62de2407-bd98-4587-abc7-b5bcc2a27126_491x768.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e2b5bcc2a27126_491x768.png>

So how we handle this? Our government will ignore all of this data push even harder to vaccinate every child in sight as soon as possible. In just 10 days, they've vaccinated 10% of our kids.

It's really tragic. I'm 65 years old and I've never seen anything like this. It's like mandating that your kids play Russian Roulette and if they survive, there is virtually no benefit since they weren't going to die anyway.

All my calls to members of Congress I know go unreturned: Anna Eshoo, Ro Khanna, Bill Foster, John Garamendi, Jackie Speier, Zoe Lofgren, to name a few. None of them care enough to return any of my calls. They are all convinced the vaccines are safe and effective and will do nothing to stop this. They refuse to listen to anything unless it supports "narrative." If you aren't on board, you're evil and will not be listened to.

The only people in Congress who can see the truth are Ron Johnson and Thomas Massie. Everyone else is pro-vaccine AFAIK.

The data clearly says the vaccines is unsafe, but nobody has time to look at the data themselves. If most of the doctors say it is safe, then it must be safe, no matter how many kids die.

Even the experts who are trusted to look at the data simply turn a blind eye to deaths of our kids. Deaths that are completely abnormal are dismissed without comment. I wrote a long article about how to this day, we still don't know the cause of death of the 14 kids that the CDC investigated

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fpost%2Fcant-anyone-explain-how-these&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e2b5bcc2a27126_491x768.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0e2b5bcc2a27126_491x768.png>
. They simply list the causes and then change the topic. For example, two of the 14 kids died from intracranial hemorrhage. Kids never die from intracranial hemorrhage after getting a vaccine. In the entire 30-year history of the VAERS system, there are no reports in that age range dying from intracranial hemorrhage. Zero. Zip. Nada.

So you'd think that THAT would raise a red flag? You'd be mistaken. The crack CDC team didn't miss a beat and kept right on going as if nothing had happened. And if you can gloss over that one, then the others are easy to gloss over. And that's exactly what they did.

The CDC and FDA have been so successful on spotting safety signals that they haven't found a single serious adverse event so far (they admitted that DoD found myocarditis). So the fact that "acute cardiac failure" is elevated by more than 475X over the average year in VAERS doesn't seem to generate a signal.

Here are a list of just the cardiac symptoms alone that are elevated by 200X normal or more.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcdn.substack.com%2Fimage%2Ffe05bbc84-baa3-437e-9518-adb32be77984.s3.amazonaws.com%252Fpublic%252Fimages%252F608fb3c0-6ef0-4a41-9fb8-337bd3aafdec_802x641.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d

Does that look like a safe vaccine to you? Of course not!

Does it matter? Of course not!

I made a short presentation which summarizes how dangerous the vaccines are

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.skirsch.com%2F covid%2Fva>
to people of all ages, but nobody really wants to look at it:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcdn.substack.com%2Fimage%2Ffe05bbc84-baa3-437e-9518-adb32be77984.s3.amazonaws.com%252Fpublic%252Fimages%252Fc8531903-40bd-44e3-8947-2d1b339b371d_1133x638.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d

If you have an open mind, you will find the presentation very compelling. If you don't have an open mind, you'll just say, "Was it peer reviewed? If not, I'm not going to look at it" even though it references peer-reviewed studies.

The people on the advisory committees are never going to look at that presentation. They'd all prefer to keep their head in the sand to avoid the cognitive dissonance. They all believe COVID is more dangerous than the vaccine still. This isn't based on actual numbers. It is based on their belief system. So even though we have evidence like this showing the vaccines are massively more dangerous than the virus,

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcdn.substack.com%2Fimage%2Ffe05bbc84-baa3-437e-9518-adb32be77984.s3.amazonaws.com%252Fpublic%252Fimages%252F201b2309-80fa-4cbf-ab0d-17a229846052_825x156.png&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d

it just does not "register" with people since it is contrary to what they were told. So it gets ignored as a "fabrication" or as an "anecdote."

Not only that, but I am labelled by the medical community as an "evil person" who is spreading information that is causing the death of people. This is an attempt at gaslighting, but it doesn't work because I am focused solely on what the data is showing and not how other people choose to misinterpret that data.

I find it telling that nobody who is a prominent proponent of vaccination is willing to sit down and have a recorded discussion with my team of experts

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fteam-of-vaccine-safety-experts&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24bddc6a86e544bc587b08d9d17cb551%7C11d0>

. As shown below, I even offered them a million dollars to come have a discussion

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftwitter.com%2Fstkirsch%2Fstatus>
with us and nobody was interested.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftwitter.com%2Fstkirsch%2Fstatus>

Someday they will figure this out. I hope it is soon.

Signed,

J.D. Bonnar

As a concerned parent in Washington state I wanted to make sure I spoke with you about some important upcoming decisions.

It has come to my attention that there may be a formation of a Technical Advisory Group to review information about mandating COVID vaccines for school. I am 100% OPPOSED to this.

It is not the job of the state or the school to make decisions for a child's well-being. That is the role of the parent. If this is the route that is taken, I will without a doubt pull my child from the states school system and homeschool. I oppose COVID vaccine mandates, period!

I also want to add that I support Informed Choice Washington's petition for rule making and wish for this to be established.

Sincerely,

Jessica White

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- This shot has not been out long enough, I am not sure on any potential long term effects. Once the shot is in their bodies, it cannot be removed.
- The shot has not proven effective against stopping or slowing the virus. The virus is still spreading rampantly

Thanks,

Mike

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The United States is a Republic with a special emphasis of the rights of the individual. These rights are delineated under the US Bill of Rights and the Washington State Declaration of Rights. The idea of making an experimental shot mandatory is a blatant violation of my children's right to an education.

This is a violation of Article 1 of the Washington State Declaration of Rights

SECTION 1 POLITICAL POWER.

All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights.

Children are at an extremely low risk for Covid. To require them to have an experimental mRNA shot with no long-term studies documenting safety is reckless to say the least.

Many studies have clearly documented that vaccinated and un-vaccinated transmit Covid. More recent studies point toward the vaccinated being bigger spreaders than the unvaccinated since they can spread more asymptotically. Therefore the vaccine apparently does not stop the disease.

I urge you to withdraw the matter of mandatory Covid shots for school admission.

Thank you

Michael F.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Medical decisions for children are parental responsibility, taking parental responsibility away is counter productive to society. Educate parents, allow parents to seek the advice of their pediatricians based on their child's health profile, empower parents to actually parent.

Parents are legitimately concerned about the long term effects of this vaccination, no data exist to argue either way at this point. The only thing we know for sure is the severity of the current variant (which has diminished) and the effectiveness of the vaccine to prevent illness (which also has diminished). Risk benefit analysis leads me to choose to wait to vaccinate pending more information.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Covid 19 has not been deadly for children. The risks of giving them this vaccine that is not been thoroughly tested for an adequate amount of time is far more dangerous to them. We do not mandate the flu we should not mandate this!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Unlike traditional "enrollment shots" the COVID-19 shot is not something that is needed to be administered to children who have no say in what is placed into their bodies. The formulations of the traditional shots have several decades of research behind them. It should be the choice of each individual to receive these shots, when and if they feel it necessary. I believe that enforcing a shot mandate places every man, woman, and child's health at risk. Especially since there is legislation protecting pharmaceutical companies from being sued or having any legal actions taken against them for up to 75yrs. Taking the choice out of the hands of the individual and placing it in the hands of the government or pharmacology is a gross overstep of authority and power. It goes against god given free will, and personal and civic liberties, and is a violation to the likes of discrimination of those persons with the autoimmune diseases such as HIV AIDS. We can not ask people their status in those regards, let alone place any type of discrimination against them. Yet, a system of bias and suppression is being created to discriminate against those who wish not to undergo a "medical treatment" thus causing an "Us vs Them" rift within the community and the nation. These actions are a slippery slope. It is one that should not be engaged, or enforced.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do not document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. I feel our children are at more risk taking a vaccine that hasn't been proven effective.
2. We don't know what the long term effects could be to their health.
3. As it stands now, it has been proven that vaccinated and non vaccinated are both getting covid and the effects are the same for both? So, what is the big saving grace to vaccinate our children.
4. And our children would have shots every 6 months? What are you going to give them every 6 months till they reach 70, 80 so 140+ vaccines till they die???? If they live that long.

More Kids Dying From Vaccines Than From COVID, Nurse Tells Louisiana Lawmakers

A registered nurse who last month testified at a hearing of the Louisiana House Health and Welfare Committee said her hospital is seeing “terrifying” reactions to COVID vaccines, but hospital officials are failing to report them.

A Louisiana nurse last month told state lawmakers her hospital is seeing “terrifying” reactions to COVID vaccines

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fkids-dying-vaccines-colette-martin-nurse-louisiana%2F%3Futm_source%3Dsalsa%26eType%3DEmailBlastContent%26eId%3D61f9010e-fad0-4aa2-b4aa-d509af44e9b4&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cce544a88cede4d5239ff08d9d17b3c5c%7C>, but hospital officials are failing to report them.

Colette Martin, R.N., a practicing nurse for 17 years, said her Louisiana hospital is witnessing blood clots

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdefender/kids-dying-vaccines-colette-martin-nurse-louisiana%2F%3Futm_source%3Dsalsa%26eType%3DEmailBlastContent%26eId%3D61f9010e-fad0-4aa2-b4aa-d509af44e9b4&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cce544a88cede4d5239ff08d9d17b3c5c%7C> jacobson-cerebral-venous-sinus-thrombosis-johnson-covid-vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cce544a88cede4d5239ff08d9d17b3c5c%7C11 , heart attacks, strokes, encephalopathy and heart arrhythmia following COVID vaccination, and staff are failing to report anything to the Vaccine Adverse Event Reporting System (VAERS).

Martin, testifying at a Louisiana House Health and Welfare Committee hearing, told State Rep. Lawrence Bagley that most medical professionals in her hospital aren’t even aware VAERS exists.

“The majority of our nurses, nurse managers and some doctors do not even know what VAERS is,” Martin said. “I’ve spoken to our chief medicine managers and other nurses on why we’re not reporting to VAERS, and the most common response is: ‘What is VAERS?’”

Martin said she raised concerns about adverse reactions

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdefender/kids-dying-vaccines-colette-martin-nurse-louisiana%2F%3Futm_source%3Dsalsa%26eType%3DEmailBlastContent%26eId%3D61f9010e-fad0-4aa2-b4aa-d509af44e9b4&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cce544a88cede4d5239ff08d9d17b3c5c%7C>

cdc-covid-vaccine-injuries-fda-pfizer-booster-kids%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cce544a88cede4d5239ff08d9d17b3c5c%7C11d0e to COVID vaccines and the failure to report them to hospital administrators, but she was "repeatedly dismissed."

Martin made clear to the legislators that VAERS was reporting, at the time of her testimony, more than 18,000 deaths post-COVID vaccination, and how it's her belief only a fraction of deaths are being reported because her hospital and other hospitals in the area "are not reporting anything."

Martin also told legislators she is concerned about mandating COVID vaccines for children.

She said:

"We are not just seeing severe acute [short-term] reactions with this vaccine, but we have zero idea what any long-term reactions are. Cancers, autoimmune [disorders], infertility. We just don't know.

"We are potentially sacrificing our children for fear of maybe dying, getting sick of a virus, a virus with a 99% survival rate."

Martin said her hospital has seen "more children die from the COVID vaccine than COVID itself."

"It's maddening, and I don't understand why more people don't see it. I think they do, but they fear speaking out and, even worse, being fired," Martin said.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Pandemic of the Vaccinated: Two Studies Show New Evidence that Covid-19 Vaccines "Cause MORE ILLNESS than they Prevent" – After 3 Months, Pfizer Jab Recipients are 76.5% MORE LIKELY than the Unvaxxed to Contract Covid

Two newly released studies show that – after a brief period of moderate protection – the experimental Covid-19 vaccines actually end up causing more illness than they prevent – especially when it comes to new variants like the now-predominant, and highly-mild Omicron.

The first study, a pre-print

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2022.01.05.22010001>>
that was released on MedRxiv

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2F&data=04%2F01%2F2022%2F01%2F05%2F10.1101%2F2022.01.05.22010001>>
by a team of researchers in Denmark, shows that the experimental vaccines provide absolutely zero protection against Omicron beginning two months after vaccination (which they refer to as "peak" protection).

After just three months, fully vaccinated individuals begin to experience sharp negative protection. Researchers found that those who received the Pfizer vaccine were an astounding 76.5% more likely to have a breakthrough infection than their unvaccinated counterparts once 90 days had passed – those who received Moderna's were 39.3% more likely.

According to the study, the spread of the new Omicron variant was "likely" caused by "super-spreader events" "among young, vaccinated individuals."

Only those who had taken a complete two-dose vaccination or a two-dose vaccination and a booster were counted as vaccinated in the study.

As if that wasn't enough proof that this is the 'pandemic of the vaccinated,' the Canadian Covid Care Alliance

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>>
– a non-profit government watchdog group of independent health care professionals –

released a separate report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/resources%2Fthe-pfizer-inoculations-for-covid-19-more-harm-than-good%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>>
this week that came to similar conclusions.

After examining Pfizer's own vaccine clinical trial data, the CCCA team of experts also found that the Pfizer vaccine had serious negative protection against Covid, and so much so that they concluded the "vaccine causes more harm than good."

"The Pfizer 6 month data shows that Pfizer's COVID-19 inoculations cause more illness than they prevent."

The CCCA panel conducted a thorough analysis

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/content%2Fuploads%2F2021%2F12%2FThe-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/content%2Fuploads%2F2021%2F12%2FThe-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e)

2021.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>
of Pfizer's vaccine trial report from December 31st, 2020. The Pfizer report claims that the inoculations were safe and showed a robust 95% efficacy 7 days after the 2nd dose. But what researchers failed to mention was that the 95% was actually Relative Risk Reduction

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Frumble.com%2Fvobcg5-relative-vs-absolute-risk-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Frumble.com%2Fvobcg5-relative-vs-absolute-risk-reduction.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e)

reduction.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>
. Absolute Risk Reduction, which is what should have been factored in – especially if this vaccine is going to be mandated across the board, was less than one percent.

"The claim was that the inoculations were safe and showed 95% efficacy 7 days after the 2nd dose. But that 95% was actually Relative Risk Reduction. Absolute Risk Reduction was only 0.84%."

For context, relative risk reductions only relate to a percentage reduction in one group compared to another, which can easily be misleading and over-exaggerate how helpful something is. Absolute risk reductions give the actual difference in risk between one group and another.

The report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/resources%2Fthe-pfizer-inoculations-for-covid-19-more-harm-than-good%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>>

also shows that Pfizer had recorded an increased risk of illness – and even an increased risk of death – in individuals who had taken the vaccine compared to those who were in the placebo group – something that was also backed up by Pfizer's latest clinical trial data that was published last month.

From CCCA:

"Pfizer's most recent report indicates an Efficacy of 91.3%. (Which means a reduction in positive cases compared to placebo group.)

But it also showed, compared to the placebo group, an increase in illness and deaths.

There is no benefit to a reduction in cases if it comes at the cost of increased sickness and death."

"Severe adverse events" were up by 75% in the trial group that had received the vaccine.

Overall, adverse events that were attributed to the vaccine were an astounding 300% higher than in the placebo group.

As for deaths, there were more who died in the vaccinated group – 20 out of 34 total. What's even more concerning is that 9 of the vaccinated deaths were related to "cardiovascular events.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/content%2Fuploads%2F2021%2F12%2FThe-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>

The CCCA panel also found

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/content%2Fuploads%2F2021%2F12%2FThe-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>

several questionable and corrupt practices that were used when Pfizer compiled their report.

Not only did the vaccine maker downplay the side effects of the experimental jab, but they also did not follow established clinical trial protocols, had inadequate control groups that were mixed and unblinded early, and tested the jab on misleading demographics in order to generate the best results.

Instead of focusing the trials on the target population who could most benefit from a Covid-19 vaccine – a la the elderly and those with severe comorbidities – Pfizer chose participants from younger demographic that would be a) less likely to need a vaccine, b) less likely to suffer an adverse event during a trial, c) more likely to respond well to a vaccine, than the elderly who need protection against this virus.

Keep in mind, children and young adults have a whopping 99.995% recovery rate

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2021%2F12%2Fstudy-reveals-99-995-children-young-people-survive-covid-19-two-million-chance-fatal-much-lower-risks-vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cf59eb1e97d9f48ceb3cc08d9d17c3ff9%7C11d0e>

from this nominal virus.

Additionally, because Pfizer unblinded their clinical trial groups early, they are unable to produce any relevant long-term safety data because they don't have a control group for reference anymore.

By early 2021, nearly everyone in the study, even the placebo group had been vaccinated, which effectively ended any hope for meaningful data.

In what's probably a glowing testament to its credibility, Dr. Robert Malone – the inventor of the mRNA vaccine – was permanently kicked off of Twitter for sharing the CCCA report earlier today.

If it's getting censored, you know they are over the mark.

This is just the latest evidence that Pfizer and the public health bureaucracy fully knew the dangers of these experimental vaccines, but pushed them out to the world anyways. A few weeks back, the Gateway Pundit reported on how the FDA granted an extension to Pfizer's EUA despite recording an astounding 1,200-plus vaccine-related deaths in just the first 90 days of its availability.

This is criminal. Where is the accountability?

Signed,

J.D. Bonnar

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The Covid 19 vaccines are still under emergency use authorization. They are not fully approved.

Children have a larger risk of being hospitalized from vaccine injury than being hospitalized from Covid 19.

There are no 5-7 year studies on possible long term or side effects of this vaccine.

Requiring this for people is an infringement on our rights.

If this vaccine becomes mandatory for school children, I will not have my children attend school in this state. I own two business and employ 17 people full time. I will take my businesses elsewhere and will take my 5 children to be educated somewhere else.

To whom it may concern,

I sent in an email earlier, and would like to update my submission to include that I, and my family oppose Agenda Item #8 the formation of a Technical Advisory Group (TAG) for COVID-19 shot consideration and mandating for school. Also, I would like register our support of Agenda Item#11 Informed Choice Washington's Petition for Rulemaking.

My earlier public comments and questions are below.

I don't understand why you are even considering this "vaccine" when our children are at ZERO risk for death from Covid?

What is the rush? There are safety signals for myocarditis and pericarditis. These are our children, our most precious commodity. These vaccines take a lot of time to see if they are safe. There is no way around time, so rushing is to our children's peril.

Initially, we were promised that the Spike/MRNA/lipids would stay in the arm, and the body would dispose of these lipids/MRNA quickly. Unfortunately, this isn't the case; the lipids and MRNA are being found to be crossing the blood-brain barrier, it's found attacking the heart (myocarditis/pericarditis). Since this is a significant flaw, why are we moving forward? Wouldn't we be concerned that these particles are free-floating throughout the body and the effect of that?

This shot doesn't prevent you from catching or transmitting Covid, nor does it reduce viral loads. Viral loads in vaccinated and unvaccinated are the same. So what is the purpose of vaccinating with a "warp speed vaccine" with no long-term safety data on children? Dr. Fauci and the CDC have said this themselves.

Since the shot's effectiveness is only a couple of months, are you going to require boosters as well? The CDC is now considering boosters for 12-17-year-olds because this is not a vaccine one and done. Its effectiveness is very short-lived. This can be dangerous because new research shows the spike protein from vaccines stays in the body for up to 15 months.

Are any panel members being paid, or is their place of business receiving grants from Gavi, Bill & Melinda Gates Foundation, NIH, NAID, or Big Pharma?

Are you aware the FDA/CDC takes almost half of its budget from Big Pharma, which does not make them unbiased?

How many people on the board do not agree? Do you have a rounded board, or is it just an echo chamber/rubber stamp?

If you are worried about vaccine-preventable illness and the costs, how does this vaccine fill that since it does not prevent transmission, catching, or viral loads? This seems like a complete failure right here, so this is just a rubber stamp, and you aren't aware that Fauci/CDC said this themselves.

Did you and our Governor already purchase these vaccines before it was even approved?

Dear WSBOH,

My public comments and questions are below.

I don't understand why you are even considering this "vaccine" when our children are at ZERO risk for death from Covid?

What is the rush? There are safety signals for myocarditis and pericarditis. These are our children, our most precious commodity. These vaccines take a lot of time to see if they are safe. There is no way around time, so rushing is to our children's peril.

Initially, we were promised that the Spike/MRNA/lipids would stay in the arm, and the body would dispose of these lipids/MRNA quickly. Unfortunately, this isn't the case; the lipids and MRNA are being found to be crossing the blood-brain barrier, it's found attacking the heart (myocarditis/pericarditis). Since this is a significant flaw, why are we moving forward? Wouldn't we be concerned that these particles are free-floating throughout the body and the effect of that?

This shot doesn't prevent you from catching or transmitting Covid, nor does it reduce viral loads. Viral loads in vaccinated and unvaccinated are the same. So what is the purpose of vaccinating with a "warp speed vaccine" with no long-term safety data on children? Dr. Fauci and the CDC have said this themselves.

Since the shot's effectiveness is only a couple of months, are you going to require boosters as well? The CDC is now considering boosters for 12-17-year-olds because this is not a vaccine one and done. Its effectiveness is very short-lived. This can be dangerous because new research shows the spike protein from vaccines stays in the

body for up to 15 months.

Are any panel members being paid, or is their place of business receiving grants from Gavi, Bill & Melinda Gates Foundation, NIH, NAID, or Big Pharma?

Are you aware the FDA/CDC takes almost half of its budget from Big Pharma, which does not make them unbiased?

How many people on the board do not agree? Do you have a rounded board, or is it just an echo chamber/rubber stamp?

If you are worried about vaccine-preventable illness and the costs, how does this vaccine fill that since it does not prevent transmission, catching, or viral loads? This seems like a complete failure right here, so this is just a rubber stamp, and you aren't aware that Fauci/CDC said this themselves.

Did you and our Governor already purchase these vaccines before it was even approved?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid;
- The vaccines are still only EUA (emergency use authorized);
- There are no long-term studies to document any history of safety;
- Studies do now document that vaccinated and unvaccinated can both transmit Covid;
- Therefore, the vaccine does not stop the spread of the disease.

*

* The currently available vaccines in the US are only those that have approval under an EUA (Emergency Use Authorization). How can the DoH possibly make it a requirement to inject our children with an EUA substance? Comirnaty is the trade name of the product that received full panel approval, but there is nowhere in the US where this is the drug that is being injected into our population as of the writing of this message. Furthermore, the EUA version and Comirnaty are not interchangeable as recognized by a US Federal District Court:

*

* Please consider the rate of deaths and adverse events that are being reported via the VAERS Database (considered to be underreported by up to 90% / <https://openvaers.com/covid-data> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2F covid-data&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8ad44242c34a4592e84008d9d1a6ece9%7C11d0e21>);

*

Opinions have been and will continue to be expressed both in support of and in opposition to vaccination mandates. What is inarguable in this discussion is that our children have virtually a 0.0% rate of mortality from this virus. What is to be achieved by mandating injections for our school-age population? There is quite literally more harm than good being done when forcing those that are at incredibly low risk to get an injection that has absolutely zero long-term risk profile established, and has resulted in more deaths and permanent disabilities than in all other recorded vaccinations in history.

In light of the data that has been presented, I respectfully request that you do not support forced injections for our children.

Jason Triche, RDCS

Sammamish, WA

Has Covid vaccine efficacy turned negative?

Data from highly vaccinated countries suggests strongly that the answer is yes; vaccinated people are at higher risk of infection from Omicron.

Alex Berenson

Jan 6   

Denmark has fewer than 6 million people - 1/60th as many as the United States.

Nearly its all adults are vaccinated, mostly with the Pfizer mRNA vaccine that is the world's supposed gold standard. Half have received third "booster" doses.

On Wednesday Denmark reported 28,000 Covid infections - equal to about 1.7 million in the United States.

The figures are similar in the United Kingdom, and all over Western Europe. Many countries are at 90 percent adult Covid vaccination levels, with boosters soaring. And they are all now in the midst of an epidemic of Covid contagion that dwarfs any that has come before.

The vaccines sure seem to have failed.

That's wrong, though.

The reality is worse.

The data from several countries now show clearly that infection rates are higher in vaccinated people.

Iceland has a 91 percent vaccination rate (and an over 50 percent booster rate) in its population over 12. This is its chart of cases per-capita by vaccination status. Not absolute, per-capita. Dark blue is fully vaccinated, light blue is unvaccinated, black is boosted.

Look at what has happened to the dark blue line since Dec. 21, since Omicron became dominant.

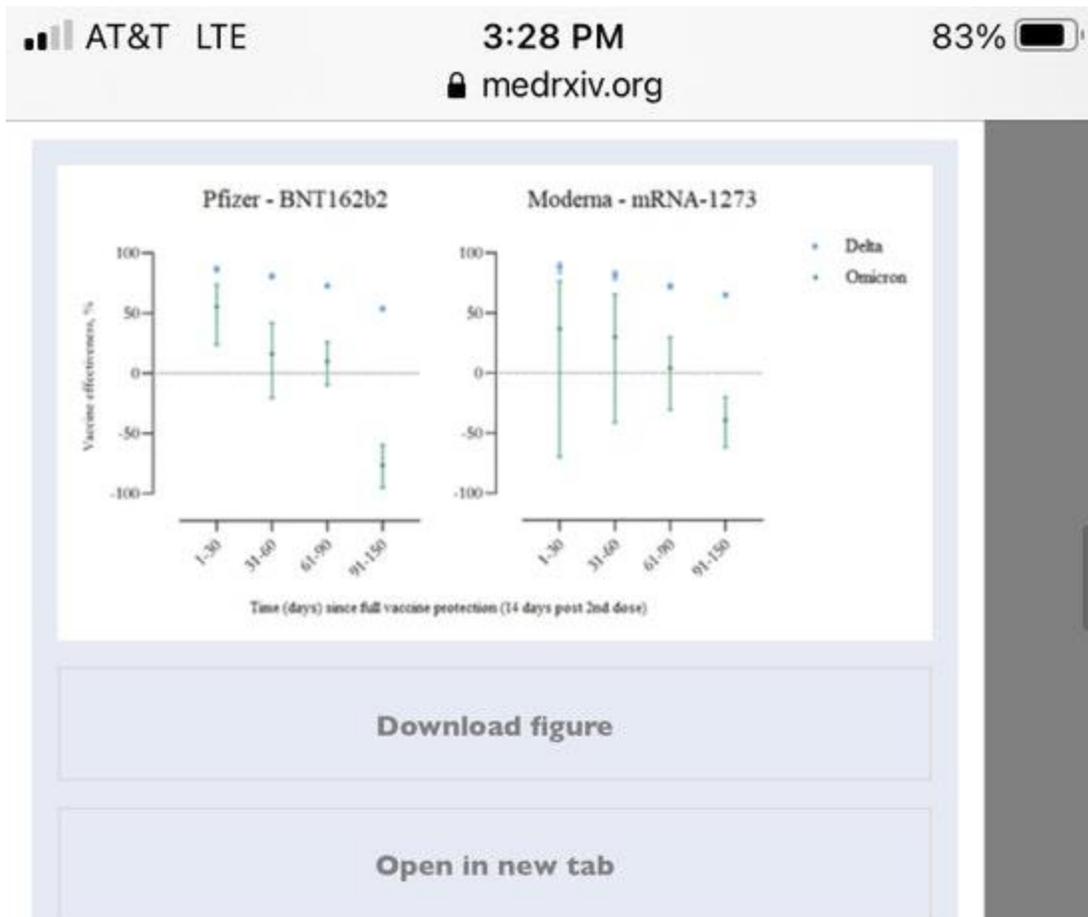

Children*, not fully vaccinated
*Born 2006 or later
s after primary series vaccination
oster 14 days after the third dose

SOURCE: <https://www.covid.is/data>

We already know vaccine protection against earlier variants of Sars-Cov-2 falls sharply within months of the second dose, as the vaccine-generated antibodies fade.

But the new data go a step further, showing that previously vaccinated people are actually *more* likely to contract Omicron.

The government of Ontario has reported exactly the same pattern. So have Danish researchers, in a paper two weeks ago, when they found protection against Omicron turned *negative* three months after the second dose.

SOURCE: <https://www.medrxiv.org/content/10.1101/2021.12.20.21267966v3.full-text>

The vaccine fanatics have said that boosters are the answer against Omicron, that people who receive a third dose will regain protection.

This is - at best - a highly optimistic view.

Remember the happy vaccine valley?

During the 2021 mass vaccination campaigns, Covid infections (whether Delta or the original strain) fell close to zero in the four months after the second dose, as antibodies peaked.

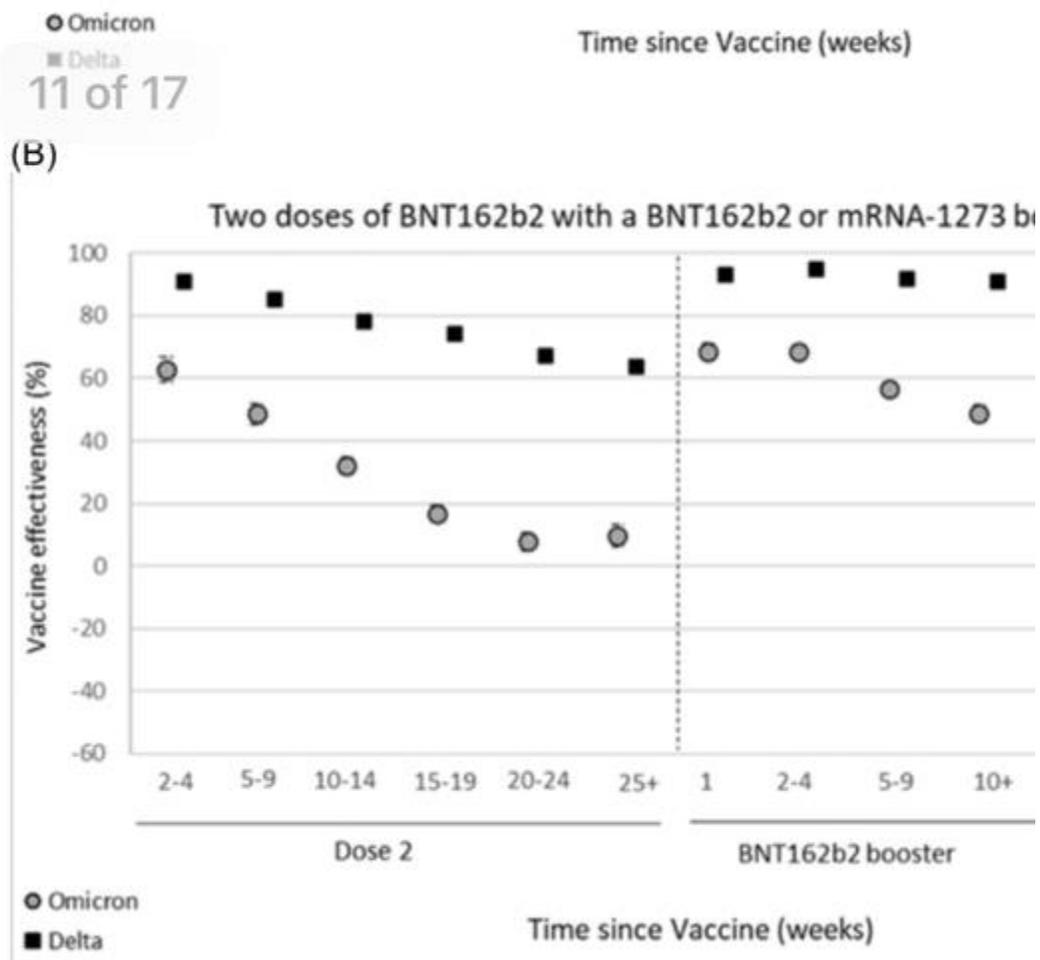

The happy vaccine valley no longer exists. Boosters begin to fail essentially immediately against Omicron, despite the massive (and potentially dangerous) increase in anti-spike-protein antibodies they produce.

Here's the most recent report on vaccine protection from the United Kingdom, from last week.

The black boxes represent protection against the Delta variant (which is overstated because of the healthy vaccine user bias, but put that fact aside). As you can see, peak protection against Delta starts around 90 percent two weeks after the second dose. It remains at 60 percent six months out. A third dose pushes it back to 90 percent, and it barely budes for the first 10 weeks.

But what's true for Delta is NOT true for Omicron.

Even at their absolute peak, two doses of mRNA vaccines offer only 60 percent protection against Omicron. Within four months protection has fallen almost to zero. A booster returns protection to 70 percent, but two months later it has fallen to about 50 percent.

SOURCE:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1044481/Technical-Briefing-31-Dec-2021-Omicron_severity_update.pdf

That's a decline to 50 percent protection from Omicron (at most, because the unseen confounders will tend to *overstate* vaccine efficacy) within 10 weeks of a *third* dose. We have every reason to expect it too will plunge to zero within a few more weeks.

What then? A fourth dose? A fifth a few weeks after that? How much mRNA do the public health authorities intend to cram in us?

—

And what about the real terror, antibody-dependent enhancement?

Are the vaccines only driving infection with Omicron, or are they increasing the risk of serious illness too?

We don't really know yet, in part because Omicron is milder across the board. In addition, the wave of cases has hit so fast that it will take time for serious illness to catch up. Finally, the problem of incidental hospitalizations (*with, not from Covid*) is worse and will further muddy the data.

That said, hospitalizations of vaccinated people with Omicron are rising very fast, and the gap between vaccinated and unvaccinated people is shrinking. The Danish government reported on Jan. 3 that only 24 percent of the people hospitalized with Omicron during late November and December were unvaccinated - while 76 percent were vaccinated, including 18 percent who were boosted. During the same period, unvaccinated people made up 45 percent of those hospitalized with earlier variants - yet more proof the vaccines simply do not work as well against Omicron as earlier variants.

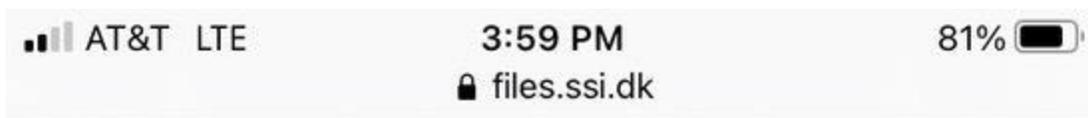

Table 7. Vaccination status for individuals infected with Omicron compared to other variants, from 21st of November to 28th of December 2021. The table only includes samples with a known variant.

Tabel 7. Vaccinationsstatus for personer med omikron-infektion sammenlignet med andre varianter i perioden fra 21. november 2021 til 28. december 2021. Tabellen indeholder kun data på prøver med en kendt variant.

Vaccination status among individuals tested positive prior or within 48 hrs after admission	Other variants (No. of cases)	Other variants (%)	Omicron (No. of cases)	Omicron (%)
Not vaccinated	641	45.4	109	24
Received first dose	39	2.8	24	5.3
Completed primary vaccination schedule	617	43.7	239	52.6
Revaccinated	116	8.2	82	18.1
Total	1,413	100.1	454	100

SOURCE: <https://files.ssi.dk/covid19/omikron/statusrapport/rapport-omikronvarianten-03012022-9gj3>

(By the way, I have to rely on data from other countries because the United States figures are untrustworthy; American hospitals are in the habit of reporting every Covid patient for whom they do not have complete two- or three-dose data as unvaccinated.)

Why are we encouraging people to get “vaccinated” or “boosted” with a “vaccine” that within a few weeks probably increases their risk of becoming infected with the newly dominant variant of Sars-Cov-2?

We were lucky with Omicron; it is apparently quite mild.

But we are now in a world where Sars-Cov-2 cannot be contained and where it will continue to mutate in both humans and animals in ways we cannot predict (some scientists believe that Omicron underwent most of its mutations in mice before before jumping back to humans).

Nor do we yet know whether and how vaccines will interfere with the development of immunity *after* Sars-Cov-2 infection and recovery; will they prevent our immune systems from developing antibodies to other parts of the coronavirus, or interfere with B- and T-cell maturation?

All we really know is that the vaccines don't prevent infection for very long and for many healthy people have side effects that are significantly worse than coronavirus infection. Both those facts were true before Omicron. Both are doubly true now.

Yet the drive to vaccinate - and boost - continues.

Why?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

First and foremost, children do not have many of the receptors the virus uses to gain entry to a cell - they cannot support infection. We develop those receptors as we age. The risk of a child dying from the virus is almost 0 - Dep't. of HHS statistics from Sept. 2021 - Dec. 2021: 3 children/100,000 were hospitalized with covid 19/week. According to CDC statistics, of 73 million children in the U.S., fewer than 700 have died from covid 19.

Second, according to the VAERS statistics, there is an alarming increase in the number of myo/periocarditis in middle school through young adult males who have received the Covid 19 shot.

Third, 70% of the population has an anaphylactic response to polyethylene glycol, which is present in the Pfizer shot. A test should be done for that before the covid 19 shot is administered.

Fourth, though children (and adults) may test positive for covid 19, actual hospitalization rates are low, according to a recent Dep't. of HHS report.

Fifth, and possibly most important, the Nuremburg Code on Medical Experimentation, which the U.S. agreed to, makes efforts to "coerce, intimidate, persuade, trick or compel (mandate)" any person to receive any experimental medication or procedure will implicate the State of Washington as aiding and abetting in the "Capitol Offense of a Crime Against Humanity", which carries a maximum penalty of "death" for those responsible.

Sincerely,
mrs. nancy parks

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State and strongly encourage you to oppose the measure for the following reasons:

1. There are no long term data on the long term efficacy or safety of mRNA vaccines.
2. The current mRNA vaccines do not immunize and prevent catching or transmitting COVID-19.
3. Children are at extremely low risk for serious illness or hospitalization from COVID-19.
4. These mRNA vaccines are still under Emergency Use Authorization.
5. The number of vaccinated individuals getting breakthrough infections continues to grow daily demonstrating that the vaccines do not stop the spread of the disease.

Since these vaccines do not serve the primary purpose of a vaccine which is to prevent you from catching or spreading the disease, there is no compelling reason to mandate these vaccines for school or childcare in our state.

Thank you for your consideration.

Regards,

Michael

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1) We are unsure of the long term effects of the vaccine. Having only been created less than 2 years ago there has not been adequate time to conduct long term trials of the side effects of the vaccine. What we already know is that upon injection, the vaccine has been found to travel to the ovaries. Whether or not there are any ill effects is unknown. How can we know if the reproductive health of young girls has been damaged if they have yet to reach the age of reproductive maturity. By instituting vaccine mandates for school admission and childcare you are potentially compromising the health of every young girl to get the vaccine. Boys on the other hand are at risk for myocarditis. Nearly 13,000 cases of myocarditis have been correlated to the vaccine in young boys in the US.

2) Children are the least at risk for hospitalization or death. We already know that the vaccines do not prevent transmission. If children are at the least risk of becoming infected and harmed from that infection, why impose the vaccine?

3) Mandates are a form of control. By mandating health requirements for children you are saying that parents are not capable of making health decisions for their family.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I Oppose the addition of Covid vaccines to the child/school entry list of products. The DoH only began the evaluation process to evaluate the added shot on 29-Dec-2021. ALL evidence points to children NOT being susceptible to COVID. Furthermore, the vaccine has been proven to be very ineffective. Our children DO NOT NEED more chemicals injected into their bodies. They don't need to be dealing with sterility, myocarditis - both proven to be an issue with these "vaccines" and in too many cases DEATH. PLEASE DO NOT ADD ANOTHER VACCINE TO THE LONG LIST OF WHAT IS REQUIRED TO GET AN EDUCATION. I OPPOSE COVID-19 SHOT MANDATES PERIOD and we DO NOT NEED THIS FORCED - IT SHOULD BE VOLUNTARY.

But I SUPPORT Informed Choice Washington's Petition for Rulemaking. Their petition is item #11 on your agenda. It was filed by Xavier Figueroa, PhD on behalf of ICWA that asks, you, the Board to establish a new rule that prohibits adding ANY Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

All,

Mr. Keith Greliner, in your introduction to the meeting you said, there is false information being circulated on social media about the purpose of today's meeting. You used words to suggest that these were unfounded claims and false. LET ME SET THE RECORD STRAIGHT. THIS IS NOT A RUMOR IT IS BASED SOLELY ON YOUR AGENCIES PUBLIC NOTICE.

YOUR NOTICE ON THE WEEK ENDING JAN 07, 2022, WAS THAT THERE WAS TO BE A MEETING ON JANUARY 12TH TO DISCUSS:

"Allowing local health officers to use law enforcement (WAC 2460100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, and vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Including the Covid-19 injections as part of school immunization requirements using WAC 246-105."

To imply and state that the public was misinformed about the intent for this meeting is both untrue and antagonistic. The agenda that was identified in the meeting notification was impossible to find. I only found it over the weekend after searching for some time. You are correct in saying that these issues were not on the agenda - SO WHY ON EARTH DID YOU ANNOUNCE TO THE PUBLIC THAT YOU WERE GOING TO BE TAKING THESE DRACONIAN MEASURES??? DON'T BLAME RIGHT-WING ANTI-VAXXERS FOR THIS - BLAME YOURSELF.

Your final introductory comments seemed to be filled with contempt for the public at large when you stated that, "for those of you who have joined this zoom meeting in anticipation of hearing your board address these rules, you will be disappointed" and may have wasted your time"

Thank you for allowing me to participate in the process.

Regards,

John Cowan

To whom it may concern,
We explore you, we demand from you that you do what is honest and true for the citizens of this great state. We have lost so many great people already to neighboring states and the flow will continue until someone puts their foot down. We have never in the history of our great nation demanded that any free person do something against their will. That is slavery and coercion at its best. That is illegal. Do not give us your rhetoric for it being for the greater good. This virus business is no worse than any other in our nations history. People are not dying in the streets, only in our hospitals from bad protocols. We need only refer to the Nuremberg codes. I am sure you are well versed that any further action by your board to force our good people against their will, will indeed be illegal and against our very Constitution. Lay any further hands on our children and a greater wrath than ours will be at your doorstep. You are toying with treasonous behaviors and the price of this ends at the end of a swinging rope. Do not toy with these good people. They will rise up and defeat you. You are poking the giant and you must see this cannot end well for you. Take no further action against our people. Let them all decide for themselves if they want to take any further actions against this bioweapon. I urge you to remain neutral and keep your hands out of it or suffer the inevitable repercussions.

Subject: Comments regarding today's meeting

attachments\FEE7CD5EA7F94C57_Screenshot_20220112-104913.png

External Email

Included is an attachment of my comments on the Q&A box for today's meeting.

I, as well as many others, would appreciate it if the intent of all speakers is as clear as possible. I find it very concerning that the meeting started by dismissal of "disinformation" floating around on social media pertaining to forced quarantine and mandatory vaccines for K-12, implying that neither of which were true, yet in fact these two concerns are to be discussed, just at a later time. It is extremely disingenuous to assert such language without clarity in the fact that these are actually going to be discussed.

Was the meeting agenda modified as soon as it was found out about the overwhelming support against such measures?

Stop beating around the bush and speak plainly.

Also, please have someone explain

Why should we trust Pharmaceutical companies that have repeatedly put profits over healthcare?

What are we going to do about all the people in every town and city across this state/country that got hooked on their products, yet as a board of public health, you are pushing an unknown/unapproved drug from those same companies that you have no proof of long term affects?

Why are you NOT promoting individual health by ways of such simple things as Vitamin D/C/Zinc, proper hydration, and others that have been widely shown to be contributing factors on severity of infection or the prevention of contracting the virus?

Kelie,

Please note that I, Rachelle Boone a resident of Washington state am sending my disapproval for any Covid vaccine mandates for anyone and most especially anyone under the age of 18 per the reasons that follow:

Children are at extremely low risk for covid.

The vaccines are still only EUA.

There are no long-term studies to document any history of safety with the vaccines.

Studies do now document that the vaccinated and unvaccinated can both transmit Covid therefore the vaccine isn't proving effective in stopping the spread of covid.

Thank you for hearing the voice of the residents of Washington State.

Sincerely,

Good morning,

I am emailing to let you know that I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

To pass this mandate considering the above reasons is criminal and those kids that die or have major health complications due to the vaccine will be on you. To subject our kids to potential long term health issues for something that is not a major risk to them is beyond wrong. There is plenty of data and statistics proving that kids do not need to be vaccinated. You need to stand up and do what is right. Our kids need to be protected from this vaccine until further studies and longterm history can prove it is safe.

Please do your part in taking a stand against the mandate for our children.

Thank you,

Robynn Langley

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State because the government has no right to violate bodily sovereignty simply because a tyrannical government is capitalizing on a situation that is of no significant risk to children or even most reasonably healthy adults. WA needs to realize the pandemic is over and needs to stop jeopardizing the health and futures of our youth. Ruin your own lives living in fear if you like but don't bully the kids into accepting WA's COVID agenda that has never saved or protected a single life and has only become another industrial complex.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The shots have side effects that could be much more hazardous than Covid for children. More longitudinal studies need to be performed. Also, people who have had the vaccinations plus a booster, still can get and pass on Covid. Studies about reduced symptoms are inconclusive.

Thank your for your consideration,

Julie Cini

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at a lower risk of a serious problem if they get Covid than they are from the shot, based on the CDCs VEARS -Vaccine Adverse Event Reporting System data. The VEARS reporting statistics show that the COVID vaccine has the highest numbe, by a factor of 10 or more, than of adverse reports for any previous vaccine.
2. Kids are generally asymptomatic, and asymptomatic people do not transmit the virus.
3. The vaccine does not prevent transmitting or getting the virus.
4. There are no long term studies of the side effects of the vaccine.

Thank you

Subject: comments regarding covid vaccine requirement for public schools

External Email

Caitlin,

STOP! just stop what you are doing to our children.

I will pull my children from public school the minute that this or any further vaccines without full phase 3 testing is required. Do not subject them to "Test to Stay" either. Testing to prove they are healthy will have lasting psychological impacts. These children are not guilty of being unhealthy until proven innocent by a test...they are already innocent.

You have absolutely no standing to make these current vaccines a requirement.

This would be crossing a line you could never come back from. All public trust in you as an entity would be lost forever.

Using children to "save elderly" is an absolute disgrace. Subjecting young bodies to yet unknown side effects is beyond reprehensible.

Trading parental choice for education is absolutely a nonstarter.

I hope you have common sense enough to see what a slippery slope you are standing above with this decision.

Stand up for our parental choice to know what is best for our individual children and do not deprive our children of education for an untested vaccine with a small efficacy. Which side are you on? Pharma or children's education?

There are too many unanswered questions to trade my child's health for their education.

Sincerely,

Kbr Patrick

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

At this time we technically are dealing with a flu shot, not a vaccine and until the long term studies are in adding this to the immunization list in my opinion is irresponsible. The shot does not stop the spread only lessens symptoms.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. Forcing anything on free Americans protected by the Constitution is asking for strife and dissension. We will hold the line against tyrannical mandates and proposed polices that violate our civil liberties and fundamental rights as human beings. I stand with the Constitution - will you? I stand with the Word of God:

"Praise the name of God forever and ever, for he has all wisdom and power. He controls the course of world events; he removes kings and sets up other kings. He gives wisdom to the wise and knowledge to the scholars. He reveals deep and mysterious things and knows what lies hidden in darkness, though he is surrounded by light."

□□Daniel 2:21□□

Whether you stand with the Word or not, It's Everlasting, Unshakable, and pierces the soul with Truth.

I call on you to represent the population of those whom you swore to be a voice for and reject all such aforementioned policies.

"Speak up for those who cannot speak for themselves; ensure justice for those being crushed."

□□Proverbs 31:8□□

"Ensure justice" - isn't that the key to the position you are in?

Kind Regards,

Melissa Pace

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Vaccines should prevent illness, stop viral transmission without harming recipients. None of this has been entirely true. Medical freedom must remain free! Children are generally not at risk.

If vaccine makers were held accountable for death and injury caused by experimental covid shots they would not be in business today.

There is an agenda at play and debate has been censored. This would normally be considered evil intent.

Threatening loss of livelihood to get an experimental shot is coercion and illegal. A judge can refute that, but the fact remains. Personal choice is the American way. Acting against the time tested law of the land is an affront to any who dwell here!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The vaccines are approved by emergency use authorization and children do not present an emergency medical threat whatsoever.

As more data is accumulated it is being shown that the vaccines are not as effective against the latest variant as was once thought so concentrate on therapeutics as has West African nations have with great success because of their use of widely distributed anti malarial that is also very effective against Covid.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Children have a very small chance of contracting a serious case of Covid 19. We now know that the health risks from the Covid 19 vaccination to children, outweigh the benefits if any from the vaccination. The Covid 19 vaccine simply has not had enough time to be thoroughly tested, and we do not know the extent of all the risks. Cardiac issues for my boys and reproductive issues for my girls are not something I'm willing to risk over a .02% chance that my children will contact a severe case of Covid, a virus that they have already had with minor symptoms.

Good morning,

I am emailing to let you know that I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for Covid
- The vaccines are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety
- Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- The vaccine apparently does not stop the spread of the disease

To pass this mandate considering the above reasons is criminal and those kids that die or have major health complications due to the vaccine will be on you. To subject our kids to potential long term health issues for something that is not a major risk to them is beyond wrong. There is plenty of data and statistics proving that kids do not need to be vaccinated. You need to stand up and do what is right. Our kids need to be protected from this vaccine until further studies and longterm history can prove it is safe.

Please do your part in taking a stand against the mandate for our children.

Thank you,

Robynn Langley

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The vaccine has not been approved for children under the age of 16

This is an experimental treatment and should not be forced according to the Nuremberg codes.

Children have an infinitesimal chance of being seriously ill or dying of Covid. They have a greater chance of being injured by huge vaccine. Myocarditis, changes in the ovaries, and other future damage that are unknown. Testing needs to be conducted for five to ten years and some of those questions still won't be answered. Think Thalidomide and DES.

Medical decisions need to be made between a doctor and the patient. These mandates need to stop! One size does not fit all!

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Very Sincerely,

Stephanie Newcomb

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Lack of evidence that the vaccine is less risky than the virus itself in children
2. FDA approval of only one vaccine at this time without longer term data of potential side effects of repeated doses
3. Lack of trust amongst the public, Inslee and WA State has politicized this issue repeatedly. leading to distrust

To the WS Board of Health, I am writing about my concern for the welfare of the children in our schools. The children are at low risk for Covid. Very few children get severely ill. The emergency vaccines have proven to be very ineffective. They do not prevent the disease or its transmission. There have been very high numbers of adverse effects from the vaccine as well as death. Both vaccinated and unvaccinated have been getting ill. The children also are at high risk for multi system organ failure. I listened in on your first meeting and from what I heard from your own presentation this injection does not meet the criteria for being mandated. Please reconsider and make a wise decision. Do research beyond what you are hearing from mainstream sources. Thank you.

Hello All,
Attached is yet more proof that the Washington Department of Health is nothing but a department of liars. Why WAS NOT this information presented in the meeting on January 12th? ... see attached video. Even main stream media is now being forced to report the truth. You are an insult to We The People's intelligence. The internet is full of videos of people dying and injured from the poison needles. This poison is still in test phase until the end of 2022 and HAS NOT been approved. Yet you continue to lie about fake tests and variants and push this poison on people. You use the word "cases" as a ploy. The CDC has admitted the fake PCR test cannot distinguish between the flu and your fake virus. You cannot prove a virus or its variants exist.

How much longer are you liars going to continue your campaign of mass genocide? You are all guilty of crimes against humanity.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Fund each family so they can have their children attend whatever school they choose.
I think there is enough rules in the school.

I bet the majority of people will go where their rights are not ripped apart.

Unfortunately the parents who don't care about their children will go with the most economical option. No matter what the rules are. (example; sex education for kindergarten?) That's some sick ideas from some perverted minds.

Seriously, the death rate for Covid does not warrant all this hype.

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: REJECTION OF PETITION TO REMOVE ANY EUA BIOLOGICS FROM SCHOOL VACCINE SCHEDULES

External Email

Members of WSBOH,

It is with utter disbelief that I read that you have rejected the ICWA petition regarding the Covid experimental bioweapon. That you would even CONSIDER approving a substance (NOT a vaccine) for children, that actually instructs a human body to manufacture a spike protein, the harmful toxin in Covid, is insanity. It has been proven without a doubt to cause great harm, not only to adults, but to children.

As an employer in Washington I have watched 3 employees become disabled and severely damaged by these Covid bioweapons, (let's call them what they really are), as well as numerous other acquaintances, two of whom died of strokes. These were NOT coincidences, they were a direct result of the Covid bioweapons.

In any other circumstance this would be called assault with a deadly weapon and murder. I only pray that in the future it is prosecuted as such.

Every one of you are enablers and accomplices. Every one of you who are afraid to lose your positions and choose to compromise your ethics, to commit evil upon your fellow human beings and their CHILDREN.

There are numerous US codes and laws that are being broken, including the Nuremburg Code, besides the Bill of Rights, original Constitution, and our inherent and immutable God given rights.

May you and your governor be held accountable for every harm done, and every death resulting from, this biological weapon you are pushing on our population.

That will be your legacy.

Breaking: The UK government admits that vaccines have damaged the natural immune system of those who have been double-vaccinated. The UK government has admitted that once you have been double-vaccinated, you will never again be able to acquire full natural immunity to Covid variants - or possibly any other virus. So let's watch the "real" pandemic begin now! In its Week 42 "COVID-19 Vaccine Surveillance Report", the UK Department of Health admits on page 23 that "N antibody levels appear to be lower in people who become infected after two doses of vaccination". It goes on to say that this drop in antibodies is essentially permanent. What does this mean? We know that vaccines do not prevent infection or transmission of the virus (indeed, the report elsewhere shows that vaccinated adults are now much more likely to be infected than unvaccinated ones). The British now find that the vaccine interferes with the body's ability to make antibodies after infection not only against the spike protein but also against other parts of the virus. In particular, vaccinated people do not appear to form antibodies against the nucleocapsid protein, the envelope of the virus, which is a crucial part of the response in unvaccinated people. In the long term, the vaccinated are far more susceptible to any mutations in the spike protein, even if they have already been infected and cured once or more. The unvaccinated, on the other hand, will gain lasting, if not permanent, immunity to all strains of the alleged virus after being naturally infected with it even once.

Source: https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/105442/covid-19-vaccine-surveillance-report-week-42.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb693b73e575b43a7c22608d9d7de278e%7C1

The first insurance companies are backing down because a huge wave of claims is coming their way. Anthony Fauci confirms that the PCR test cannot detect live viruses. Anthony Fauci confirms that neither the antigen test nor the PCR test can tell us whether someone is contagious or not!!! This invalidates all the foundations of the so-called pandemic. The PCR test was the only indication of a pandemic. Without PCR-TEST no pandemic For all the press workers, doctors, lawyers, prosecutors etc. THIS is the final key, the ultimate proof that the measures must all be lifted immediately!

To Washington State Board of Health

I am a grandmother of a child in Washington and am very concerned that you would even consider injecting this experimental poison into a child! I have no doubt that there will be law suits against any and all who try, much like the Nuremberg Trials. I copied the message below but I encourage you to read it and do more research before you make this life changing rule, for our kids and generations to come.

The population of the planet of being taken through the gates of hell over a probably partly-invented virus, which is not unusual in its lethality.

I agree these 'vaccines' were never appropriate & there was ample evidence of global fraud by fear long before that vaccine was prematurely considered for emergency use authorization.

Re-reading Dr Peter Doshi's blog post in BMJ, referencing Pfizer's regulatory submission to FDA, he made some striking observations.

Specifically, he pointed out how THOUSANDS of suspected 'cases' from the vaccine arm of the trial had been "removed from statistical analysis because of "unspecified protocol deviations".

When Doshi reanalyzed the data with all the subject included, 'efficacy' fell to 19% (and not significant).

I know enough about clinical trials & the many conventions that ensure you don't carry undeclared conflicts of interest.

What was done in that trial was clearly improper. In reality, the Pfizer / BioNTech product never even worked in the closely controlled trial.

I also think there is a virus. I'm no longer convinced it's as described but is a blend of genetic material from several different sources.

Three key questions:

1. Do these vaccines work?

I suspect none of them do. Paul & Howard lay out some of the evidence.

2. Are these vaccines safe?

They are absolutely not safe. They are responsible for huge numbers of horrific injuries & deaths in completely unprecedented numbers, based on review of public vaccine safety monitoring systems in the US, U.K. & Europe.

3. Are these vaccines necessary?

No, not at all. If anything, deaths rise immediately after mass vaccination started almost everywhere when the data was good enough to examine. On the other side of the medical ledger, excellent treatments have been identified & used, 85-90% of severe illness & death was prevented.

Given the foregoing, that these are not vaccines, they don't work as vaccines, they're massively far away from any acceptable safety profile & there are low cost, well understood drug treatments, why would you allow anyone to stick a needle in your arm?

I beg of you: if you've not been vaccinated, do not capitulate now. If you've been vaccinated, reject the bribe of some of your freedoms bank (aka vaccine passport).

Giving in to tyranny always leads to more tyranny.

We must not cooperate with our own entrapment. I keep a good eye out on many countries. It is clear that one objective is to lure us all into a VaxPass database. Then we'll have to show it in order to buy food. Now you cannot protest, or you'll go hungry. Ultimately, it's my deduction that the evil perpetrators will exploit their tyrannical powers to kill off the majority of the human race.

Something like this has been planned for close to 40 years. See The Georgia Guidestones

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons: No trust in Inslee, he is a dictator. He called his own citizens terrorists. He's the terrorist. No mandates anymore. Washington government and Inslee needs to admit they were wrong with mask mandates, schools closures, vaccine mandates. Most normal Americans are living normal lives again, but not us. Under Inslee's authoritarian rule it's awful. I hope you all lose your jobs and have to work minimum wage, weekends, nights, holidays, etc.

I would strongly urge you to not make this decision based on one county in our state (King County) Please take into consideration over half of this great state is strongly opposed to this and will stand to lose a tremendous amount of students if this implicated. The state has already received the Covid relief funds and the only people standing in the way of our right to choose for our children is you. The science shows that children are less effected by the virus than adults. And with the highly contagious Omicron varient most people have immunity now. This madness needs to stop! I am encouraged by the amount of parents who have written in to you. Please listen to us, the children have to get enough vaccinations to be in school as is.

Thank you for the opportunity to participate in this zoom call. It truly was an eye opener that confirmed why the WA State Board of Health can't be trusted along with other government agencies. It was good to hear and see that the public is not putting up the tyranny, it was truly refreshing. Clearly you were not prepared that the public would stand up and fight for our constitutional rights.

The propaganda push of the "vaccine" was strong (changing the definition in the dictionary is not fooling the public). The numbers you showed were so blatantly wrong and manipulated. It is a fact that more 'vaxxed' folks are the ones that are sick since their immune system is now compromised. We all know that the PCR test is faulty and had to be pulled by the end of 2021. To this date NOBODY has been able to isolate the actual 'SARS-COV2' virus, the best you can come up with are two flu-strains! With that said, there is no way to decipher any 'variants' either. Perhaps you should call various REAL doctors (that are not owned by the hospitals and/or big pharma – or local politicians) and ask what type of tests they are using to figure out which 'variant' anybody is sick off. Fun fact – there is no such test! All these 'variants' are made up simply to push fear into the public and bullying them into taking a 'vaccine' that is deadly for many. The VAERS report was brought up numerous times during the call. Your slide show did not refer to these facts when the 'vaccine' was pushed as safe and effective. You are supposed to protect the public, not harm us!! Here is the link to the report, in case you have misplaced it <https://vaers.hhs.gov/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2F&data=04%7C>

. Another fun fact is that only about 1% of the adverse reactions/death are being reported thanks to doctors being bullied into NOT reporting them. It is unbelievable the amount of vaccine injuries that you, the board, so blatantly and willfully ignore. What is worse is all the folks that died from this 'vaccine'. This jab alone has killed more citizens than all other vaccines that have come out in the last 20 years COMBINED. Yet here you are pushing the public to get jabbed! I for one, am looking forward to seeing this board on trial for crimes against humanity. It is time for you to stand up against the bully Inslee and stop forcing Washingtonians to wear a mask (so worthless!) and remove any discussion about forcing people into getting the death shot. It should be entirely up to the individual to decide if they want the 'vaccination' or not. You have failed to provide real data as to who actually died OF covid! Not WITH covid! The CDC finally admitted that over 75% of the folks that passed have died with up to 4 co-morbidities. The virus was NOT the cause for these people to die. You guys made up the number so spread the fear. Paying hospitals an insane amount for every virus death is crazy and has caused many of folks to lose their lives unnecessarily. Your refusal to allow Ivermectin, HCQ and other remedies in also unbelievable. These should be the very thing to prescribe to ANY

virus/flu patient because they work (I can personally attest to that). YOU, the board, along with Inslee and Ferguson, have DESTROYED the lives of children, every resident of this state along with the economy – all for money and power. This is absolutely sickening and you will be held accountable for this. With this said – stop the vaxx mandate immediately, stop enforcing masks, stop the vaxx passport nonsense immediately and remove the awful WAC 246.100 and 105 immediately because we all know Inslee will use it against the public. You also need to set the hospitalization/staff overload issue straight – fact is that we have less nurses and doctors because you either fired them for not being jabbed or they left on their own to protect their health. This alone should be an eye opener for you that this job is NOT good for our health. More fun facts - our own healthy immune system is by far better than any of your jabs. Insinuating that the 'vaccine' will last longer than our immune system is absurd. Mine lasted for 60 years now and is getting stronger by the day. If you really want to help the public (like you were elected to) then perhaps stop the public from going to any fast food 'restaurants' or buy 80% of the crap that is being sold as 'food' in the grocery stores. Quit discriminating against the vaccine-free folk, we will not wear a David star no matter how hard you push Hitler's old agenda (I have studied the Hitler disaster at length in a German school, just FYI. American schools have removed facts from history books and will not teach the truth).

Detainment camps! How dare you claiming there is no such thing when you own/lease hotels that are used to push the sick into it. The state also owns many places like the one located at 375 SW 11TH ST, Centralia. You either blatantly LIED during the call or you are blatantly IGNORANT on what is going on within your organization! You have job listings out looking for employees! Isolation/Quarantine Site Manager (Program Supervisor I) King County \$33.73-\$42.75/hr, Isolation & Quarantine Facility Staffing – COVID-19 Response Thurston County \$22/hr, Temp Emergency Management Worker – Snohomish County (salary)

In closing – start working FOR the Washington citizens like you are supposed to, stop the 'vaccine' madness immediately along with the mask mandate. Stop your propaganda as the public is on to you!

Thank you for taking the time to read this! I am looking forward to the next zoom call which I hope will be better organized and will not just cut off the citizens when they have the floor and/or you don't want to listen to them anymore.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I am OPPOSED TO ALL COVID SHOTS, a DIABOLICAL \$ making scheme greater than any PONZI scheme the USA/world has ever been DELUDED with! Time for all Judeo-Christian organizations to boldly declare: WE're in the END TIMES! Many world-wide leaders , WEF-World Economic Forum , are loudly calling for ONE WORLD GOV'T! This fits SCRIPTURE: Books of: Daniel, Revelation, Matthew ch 24, Mark ch 13, Luke ch 22! In JESUS' Words, all is before us!

Wan-a-be TYRANTS, like Inslee, must be told!

He, all Dem elites, all so-called judges/lawyers/SCOTUS in the USA, have/had NO AUTHORITY to cancel our States/CONSTITUTIONAL REPUBLIC!

Thomas Jefferson proclaimed all AUTHORITY for LAW/Jurisprudence rests firmly with of-by-for-through our CREATOR GOD JESUS CHRIST! The first paragraph of the DECLARATION OF INDEPENDENCE proclaims "the Laws of Nature," and "of Nature's God." Jefferson quoted Sir William Blackstone's COMMENTARIES OF THE LAWS OF ENGLAND , which clearly, concisely define the true basis for LAW (for all people, nation's, kingdoms, tribes, etc)

SCOTUS of 1960's violated GOD's AUTHORITY! The USA has been on a descending roller coaster since! Recently, through SCOTUSBLOG, I contacted them to rectify our collapse into chaos they must: overturn all past court rulings which VIOLATE GOD's ETERNAL,IMMUTABLE LAWS (enshrined in all human's □□): 1- LIFE sacred from conception till natural death. 2- MARRIAGE one man-one woman; male-female. 3- PRAYER, BIBLE, 10 COMMANDMENTS taught for all schools/universities as they were from the 1700's till 1960's!!!

Nation /all Americans, state by state , on hands & knees , beg JESUS' forgiveness and REPENT: 2 Chronicles 7:14!

WA STATE, all states must end computer voting; all the machines have a Chinese imbedded ALGORITHM! Return to paper ballots; cancel early voting; must register no later than one month ahead with proper picture ID. Count votes manually with cameras present throughout and citizen observers!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

WAC 246-105-060 gives health officers power to exclude unvaccinated children from school during outbreaks regardless of any granted exemptions, while at the same time, there are studies being conducted surrounding homeschooling including Harvard whose preliminary reports have been published in magazine articles. A member of the Harvard study groups said " parents shouldn't have 24/7 authoritarian control of their children". Unelected beaurocrats will have the power to force children to get vaccinated to attend school, deny exemptions to unvaccinated children and exclude them from attending school, while at the same time outlawing homeschooling. Homeschooling has already been outlawed in Germany. Remember the large homeschooling family from Germany who came to America to keep their kids from being taken? Our country denied them and forced them to return to Germany.

I don't trust our govt. to do anything right regarding our children. I am a retired public schoolteacher and multigenerational WA resident, and I don't trust our govt regarding our childrens health or education.

Elizabeth Rohr

P.s. your religious exemption class I attended in Graham, Wa was awesome and I was able to type the letter that helped my daughter receive her religious exemption at Centralia College in the IT Dept. She kept her job and we thank you for that.

Subject: interview with Dr. R. Malone, creator of mRNA

External Email

Greetings to the members of the Washington State Board of Health,

Here is a link to an interview with the renown Dr. Robert Malone, who as you know, was the creator of the mRNA which is in the Covid 19 shots.

<https://www.bitchute.com/video/RbEtHaVCeNYs/?fbclid=IwAR0S2F-BXgfoXHpap9w4y44q39Zn0si8IPhXEKZxUvSsf8rG0AdZ2-jQrrY>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bitchute.com%2Fvideo%2FRbEtHaVCeNYs%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ccef90d5f8223469fef5a08d9d7d3772a%7C11d0e217>>

This is submission part of my public comment for the SBOH zoom meeting next Wed. Jan. 12, 9:30-3:30. I ask that you all watch this interview in advance and responsibly consider the information here in preparation for the discussion of vaccinating school children with the COVID19 product and other agenda items on Jan. 12.

Thank you very much!

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Ms. Haag,
Please consider the federal law (and hear the people, the citizens of this nation) as you consider the rule that gives DOH power to involuntarily quarantine or inject citizens of the US, children on up. This rule is in direct violation of federal law under Title 21 CFR (Code of Federal Regulations), Section 50.23 & 50.24. It is illegal to coerce someone into compliance when giving an experimental medical treatment. It is a felony to do so, actually- UNLAWFUL- and constitutes an act of domestic terrorism (which, if passed, would legally make you a domestic terrorists).

That unlawful-by-definition rule will also violate the WA State Constitution, Article 1 Section 7, which speaks to the right to privacy.

This leaves only one option for your decision on this rule, and that is for you to reject it and to abolish all and any consideration of such a rule, or face criminal charges of Domestic Terrorism and/or Conspiracy to Commit Domestic Terrorism.

Thank you,

Kristen Cormick

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,
Kelly Joyce

Misinformation? Good lord, has that become a buzzword.

The statement you issued trying to "reassure" everyone that you are not going to vote on anything was real cute. When you tell a kid not to touch the stove but they take one step closer to it, do you just say "well, gosh I guess you didn't actually touch the stove" or do you tell the kid to get the heck out of the kitchen and stop being such a smart-ass?

We do not care if you "aren't voting on anything". You shouldn't be talking about it either. The fact that these topics including the use of force to involuntarily detain those who refuse testing, vaccination, treatment and counseling in addition to requiring schools to add the injection is unacceptable. All of you should be ashamed of yourselves.

In my eyes, each one of you is a disgrace to what it means to be an American. We are a free people and we will remain free whether you like it or not. Molon Labe.

On Fri, Jan 7, 2022, 11:42 AM Lainey F <lainey497@gmail.com <mailto:lainey497@gmail.com> > wrote:

Thank you for taking the time to consider my comments on the proposed policies regarding covid and vaccination.

To start, I would like to ask each of you a simple question: Have you completely lost your minds?

What this board is proposing is akin to martial law. When did making or refusing personal medical treatments become a crime, and at what point did that become acceptable in the United States of America? Ours is a culture founded on the very basis of freedom and liberty because our founding fathers understood that the individual knows best for themselves. I do not belong to the government, but rather, the government belongs to me and my fellow citizens. These policies are tyrannical in nature so it makes me wonder what the goal of our current governor, senators and representatives really is. Does Mr. Inslee really want to be known as Dictator Inslee? By supporting or passing these policies, that is exactly how he will be known.

There is no world where blanket medical requirements are beneficial to the population as a whole. People have many reasons why they need the ability to refuse medical treatments including allergies, medical conditions, religion and natural immunity. As a woman who is currently pregnant, I would not take any vaccine because it is not advised to do so during gestation. Not only am I currently pregnant and unwilling to risk my baby for your silly little mandates, but I also have natural immunity from recovering from an active infection one month ago. And yet, I am supposed to believe that a vaccine that has a FIOA request for 55 years from now is supposed to be safe, risk free and still needed despite natural immunity? Again, you must be completely out of your mind.

I personally know four women who have had their menstrual cycles disrupted directly after receiving the vaccine. One of these women has not had her cycle return despite receiving the vaccine five months ago. Are you trying to sterilize the population and gain dictatorial power in the process? My own mother has been suffering circulatory issues and severe migraines since receiving the injection. She never had a migraine in her life until the day she received the injection and now she suffers from them about three days out of every week.

Why in the world are you proposing this for kids? Study after study has shown that children are not at risk from the virus, but they are at significant risk from vaccine side effects. Boys and young men especially have been shown to have an increased risk of myocarditis from the vaccine. Why would you push this crap onto children? Are you afraid your child will give covid to you? Well, since the vaccine has shown zero ability to prevent spread, there is not a single benefit to injecting our kids. Little Jimmy is still going to bring it home to you anyway, vax or no vax like it or not. And since the vaccine does next to nothing to prevent infection regardless of how many boosters you have, you will still get covid regardless of how many needles you shove in your arm.

The worst of this is that when the vaccine came out, Fauci told us all that once boosters became available, people should receive a new injection once every eight months. There are currently three boosters that we are supposed to line up for and the original vaccine is less than one year old.

I do not understand how people like you do not see the writing on the wall here. People do not trust this injection because policy pushers like you have sewn mistrust through your incessant nagging. Why is it so important to you that I receive an ineffective and potentially dangerous to my health injection? So that you can strengthen your illusion of safety? Guess what: I do not care at all about whether you "feel" safe. I care about whether I feel safe and I do not feel safe with your covid needle hanging out of my arm.

This is not going to go over well. Have you seen the backlash to this kind of tyrannical overreach in Australia and in many countries around Europe? No one wants this and it is wrong of you, no evil of you, to force this upon us.

We are a free people as defined by the Constitution of the United States of America. We do not belong to you. Keep your medical tyranny off of my body.

Y'all are starting to look like a bunch of heroin addicts with all those vaccine injection sites on your arms. Get over yourselves and leave us alone. We will not comply.

Hello,

I am writing concerning adding Covid to WAC 246-100-070 to be voted on tomorrow. I am extremely concerned about the gross overreach and extreme measures that are being taken for a virus that does not warrant such measures. Covid does not present an imminent threat to most healthy adults (99% survival rate) and presents almost no threat to children (data and facts have proved this). This absolutely should not even be on the docket, much less a consideration. I am disturbed to even see this is an option for our state. Please listen to the people and get rid of this nonsense. Thank you.

Subject: meeting on the 12th, on child vaccines, opposing covid shots for children and why.

External Email

Dear Washington Dept of Health and whom this may concern,

I'm a grandparent and I oppose mandatory covid vaccinations In order to be in school.

Here are some reasons children should not get vaccinated against covid,

1 when children get covid it is mild,

2 a high rate of adverse reactions and death,

3, there is no long term data proving it won't harm them or if it does any good at all,

4, children are not in the high risk category for covid

Back a few months ago Sweden stopped their vaccinations due to heart issues they saw happening, heart issues are forever it is not temporary so you will be subjecting children with a mandate against the parents and grandparents wishes, and they could have problems the rest of their life and be put on heart meds from grade school on, that is not a risk parents want to take.

Also the world health organization talks about stopping the vaccinations on children as well,

Back in June of 2021, they say there is lack of evidence for children and not enough data to prove anything.

In all ages the vaccination should not be mandated on the public to keep your job, should be everyone's choice, due to not enough evidence and looks like now the data is proving to be you can still get covid regardless of vaccination.

But if adults want to get the vaccine that is there choice but children have no choice and it goes against most parents wishes. This should not be mandated to attend school or anything else.

The virus has now mutated down like all viruses do to a mild cold flu symptoms.

So this virus is on it's way out so there is no more emergency and we all should be able to go back to normal no masks and let the public decide,

Masking children is also bad for them, in learning how to read they need to see faces and see their teacher's face to sound out words etc , masks according to the cdc, don't work, and to put a n95 mask on children in school hrs a day is not good for them either, how would you like to wear one several hrs a day as a child? I wear one at work all day and I as an adult have problems now wearing one, and several of my co-workers do to, we get dizzy off and on through out our day but we are told by our employers we have to because of the mask mandate,

We are two years into this and this needs to stop,

States with no lockdowns and no mask mandate have done better than those states that locked down and constant mask wearing.

With all of our regulations with covid the government has hurt more people than covid has, by loosing jobs houses and having to move out of state to work and live normal lives.

Also our businesses have suffered greatly and a lot of businesses have gone under due to the heavy handed mandates from the governor and dept of health.

I encourage you to stop the mandates for our children and all tax payers in this state ,

And boosters should be choice also, and should not be mandated in order to keep your job, this will again do more harm than good if people loose their jobs and houses and have to move out of state in order to live. I know this may not be on the agenda but I know with the cdc and dept of health comes the mandates.

So when it comes time to vote on these issues please vote no and vote for our state to be free of mandates and give us back our freedom, this is America after all, not china

I won't be able to attend the meetings I will be working to help put food on the table for my family.

Thank you please put this on record as opposing children's forced covid vaccinations to attend school and other events.

Dear Ms. Hannah Haag,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements. One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you,

Scott and Leigh Larsen

Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you,
Scott and Leigh Larsen

Dear Member Herendeen,

My name is Megan Mauch. I am a certified Speech Language Pathologist working in the public school system. I am an expert on child development and have worked both remotely and in person over the course of this pandemic. The impact lockdowns and mask mandates have had on kids' communication and social/emotional development is tragic. It has to stop.

I am writing to gain your attention to violations of moral and ethical treatment of children. Vaccines that are required for children should have completed Phase 3 trials and should be approved by the FDA. The fact that any individual would ever consider such a heinous, evil and morally bankrupt approach is beyond a lack of moral character, it borders on a level of evil that is unprecedented.

The data has empirically proven the following:

1. The vaccines do not prevent anyone from getting or transmitting COVID
2. Vaccines do not create any safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms
3. Children have almost no statistical risk of covid symptoms
4. Children do not have a high transmission rate to pass on COVID to adults, it is known to be lower than the flu.
5. There is ZERO long term testing on the impacts of the vaccines on children.

In addition, we can see across the world that places with fewer lockdown measures and mandates are experiencing fewer problems with COVID.

Given this data, I implore you to make an ethical decision on several of the discussion items at Wednesday's meeting.

For Item #8: Please OPPOSE the plan to form a TAG to consider mandating shots for kids to attend school. OPPOSE COVID shot requirements.

For Item #9: OPPOSE the extension. There is no longer a need to extend emergency quarantine or forced isolation and no need for law enforcement to be used to do so.

For Item #11: SUPPORT the petition by Informed Choice of Washington to establish a rule that prohibits them from adding any EUA products to school required vaccine lists.

Thank you for standing up for what is BEST for children!

Thank You,

Megan Mauch, MS, CCC-SLP

Dear WA State BOH,

Please review the attached link & consider it when making decisions & policies on covid & covid vaccines.

#WeThePeople are awakening to the many truths & lies. The truth is coming out.

Politicians, government bureaucrats, the medical community, the msm, big tech, big pharma & many others have been full of propaganda & lies. They will be held accountable for their lies, crimes against humanity & the Nuremberg codes.

Sincerely,

#WeThePeople

I am "Very Strongly" requesting you, the Senate and House Representatives, also the WA State Board of Health, to listen to millions of Washington State citizens, "Do Not Force Vaccination" and "Not to Force anyone to a quarantine facility"! It is "Not Your Right"! Neither did God of Heaven, appoint you to be an "Authoritarian", invoking fear, drama, bullying, mandating, forcefulness, coercion, power, control and the like! This Is Not Of and From our Loving God! This is evil and from the devil, who is a liar and a destroyer! The battle we are all up against, is Spiritual! Turn to God of Heaven, who created you and us all! Repent of your sins, as God desires us all to do! He gave us all a "Free Will"! It is "Not Your or anyone's Right" to take away what God has given us, "The Gift of Freedom!"

Thank you,

Nancy Weiss

Subject: New proposals regarding COVID-19 for residents of Washington
To: <michelle.davis@sboh.wa.gov <mailto:michelle.davis@sboh.wa.gov> >

I am writing to express my great concern regarding the new proposed policies allowing local health officials to force an emergency order to involuntarily detain citizens to be isolated in a quarantine facility. Who would be determining why people would be detained and on what basis? People are not legally required to comply with requests for medical examination, testing, treatment, counseling or vaccination which you also propose. This goes against our Washington state constitution that declares our rights to protection and maintenance of our individual rights. No person shall be deprived of life, liberty or property without due process of law. My medical decisions are mine and not to be determined by bureaucrats. It is my choice if I want to be tested or receive an injection, not the government's. My private affairs shall not be disturbed or my home invaded without authority of law. You propose to have the authority to use law enforcement to involuntarily detain a person to be isolated in a facility. Do you propose to invade peoples homes to get them to go to a quarantine camp? How is that not denying my rights according to the Washington state constitution?

Another right you propose to disregard is my freedom of conscience in all matters of religious sentiment and beliefs. My religion is predicated on the protection and preservation of health. I choose to preserve my health and will not consent to an injection that has known adverse reactions and in some cases death as reported by VAERS. Studies have not been performed to evaluate long-term effects. I am also against the use of aborted fetuses in medical research to produce vaccines.

These proposals are to be discussed for a disease that kills less than one percent of the

population? What is the justification of this power grab? I believe this is an unlawful power the government proposes and I for one will not stand for it. You are employed by the people of Washington and are in office to protect our rights, not steal them. This injection, as reported by VAERS, is known to have adverse effects and in some cases even death. This is extremely concerning. Voluntary consent is absolutely essential. Power of choice, without the intervention of any element of force, over-reaching is a person's right according to the Nuremberg code. The Covid injection has not been sufficiently studied over time to know what long-term side-effects are possible. Therefore sufficient knowledge and comprehension of this injection's effects are not known by the public in order to have an understanding of the risk involved.

You also propose to require innocent children, who have minuscule risk of having negative effects of the Covid-19 virus, to be injected in order to attend school. We parents are responsible for our children's safety and decide what happens to them.

If this power was given to bureaucrats, what would be their next breach of the law to exert control of our children as well as all of the people residing in Washington state?

I am informing your board of my grave concerns for these tyrannical, illegal proposals and I will fight to defend my constitutional rights. If that means filing a lawsuit, I have all intentions to do so.

Thank you for acknowledging my concerns.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: No K-12 covid vaccine mandate

External Email

Good Evening,

I am writing you (albeit a bit late) in regards to the discussion of mandating Covid vaccines for students. If you were to look at the data about the negative side effects from the vaccine you would realize that this is a decision that could have potentially devastating outcomes to the children of our state. I will not risk my childrens' health/lives by having them participate in an experiment. It has been shown that myocarditis is possible side effect (especially in boys). Along with the slew of other potential adverse effects. My boys will not receive the vaccine. If it is mandated I (among many others) will pull my children from the public school system.

Sincerely
Nicole

Subject: Meeting dates for public input on vaccine requirements

External Email

As mentioned during the January 12, 2022, meeting about the process to come to a decision regarding Covid 19 as a school vaccine requirement for young children, the Board indicated numerous representatives would be consulted to make a final recommendation on the issue. This would involve various meetings.

My question:

When will the meetings be scheduled and when will the public be able to view these discussions and be able to participate?

Public input should be involved in this process Prior to the final recommendation. Free thinking, unbiased individuals need to be involved.

After listening to public comments today and reviewing comments made, the citizens of the state of Washington are informed with facts and have strong opinions that need to be honored and included in the discussions.

These proposals are to be discussed for a disease that kills less than one percent of the population? What is the justification of this power grab? I believe this is an unlawful power the government proposes and I for one will not stand for it. You are employed by the people of Washington and are in office to protect our rights, not steal them. This injection, as reported by VAERS, is known to have adverse effects and in some cases even death. This is extremely concerning. Voluntary consent is absolutely essential. Power of choice, without the intervention of any element of force, over-reaching is a person's right according to the Nuremberg code. The Covid injection has not been sufficiently studied over time to know what long-term side-effects are possible. Therefore sufficient knowledge and comprehension of this injection's effects are not known by the public in order to have an understanding of the risk involved.

You also propose to require innocent children, who have minuscule risk of having negative effects of the Covid-19 virus, to be injected in order to attend school. We parents are responsible for our children's safety and decide what happens to them.

If this power was given to bureaucrats, what would be their next breach of the law to exert control of our children as well as all of the people residing in Washington state?

I am informing your board of my grave concerns for these tyrannical, illegal proposals and I will fight to defend my constitutional rights. If that means filing a lawsuit, I have all intentions to do so.

Thank you for acknowledging my concerns.

Am reading from Bellingham Metro News that there will be new policies proposed on Wednesday, Jan. 12,

2022. I am writing to let you know I am completely opposed to: WAC 246-100-070, WAC 246-100-045,

WAC 246-100-040, WAC 246-100, WAC 246-105.

United States citizens should always have the freedom to make their own health and medical decisions, should not be coerced, or scared into doing what they do not believe is safe or appropriate, or maybe just not the best time for them or their children for their own various reasons.

I am completely and utterly opposed to enforcing mandates on having our children injected by a new technology or drug that has not been studied on them. The death rate from this vaccine is higher than any other that's ever been used in the history of our country. The rate of infection has not dropped since the introduction of this mRNA drug, other viral pathologies are up by 25% and new variances keep appearing. Are we going to have to keep injecting with something new every three months. This does not seem to be our answer. Children have a less than 1:100,000 chance of having a problem from this virus. I ask why are we putting them at risk? This decision does not follow science and seems to follow a narrative that has some other motive. In addition, 75% of the country is back to normal except for Washington. I am asking you to look at the big picture. Let's not look at the moment thinking that this vaccine will shut down omicron. What will happen over the next five years. These children who do get infected will have immunity and be able to fight better for all the future coronavirus's. In my practice most of the children that get it have a runny nose and move on in life or they don't get anything at all. Let's not put our children at risk and destroy our freedoms in Washington.

I vehemently oppose any and all mandates that are being voted on tomorrow. It is unconstitutional immoral and illegal. I'm 62 yrs old and have never ever felt disgusted, angry and let down by Washington State. What is the hidden agenda? My father was a Korean War Veteran and if he were still alive he would be appalled at what's going on! If Inslee is looking to get rich or 'world domination' he will eventually run into a brick wall pushing back I was taught respect for our country and a love of our freedom many people died defending our country or to help other country's never ever considering having the enemy within Stop the mandates and respect the constitution

Subject: New proposals regarding COVID-19

External Email

I am writing to express my great concern regarding the new proposed policies allowing local health officials to force an emergency order to involuntarily detain citizens to be isolated in a quarantine facility. Who would be determining why people would be detained and on what basis? People are not legally required to comply with requests for medical examination, testing, treatment, counseling or vaccination which you also propose. This goes against our Washington state constitution that declares our rights to protection and maintenance of our individual rights. No person shall be deprived of life, liberty or property without due process of law. My medical decisions are mine and not to be determined by bureaucrats. It is my choice if I want to be tested or receive an injection, not the government's. My private affairs shall not be disturbed or my home invaded without authority of law. You propose to have the authority to use law enforcement to involuntarily detain a person to be isolated in a facility. Do you propose to invade peoples homes to get them to go to a quarantine camp? How is that not denying my rights according to the Washington state constitution?

Another right you propose to disregard is my freedom of conscience in all matters of religious sentiment and beliefs. My religion is predicated on the protection and preservation of health. I choose to preserve my health and will not consent to an injection that has known adverse reactions and in some cases death as reported by VAERS. Studies have not been performed to evaluate long-term effects. I am also against the use of aborted fetuses in medical research to produce vaccines.

These proposals are to be discussed for a disease that kills less than one percent of the population? What is the justification of this power grab? I believe this is an unlawful power the government proposes and I for one will not stand for it. You are employed by the people of Washington and are in office to protect our rights, not steal them. This injection, as reported by VAERS, is known to have adverse effects and in some cases even death. This is extremely concerning. Voluntary consent is absolutely essential. We, as constituents and community members of Washington state, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization and as such are experimental.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank you ,
John and Carmen Mayo

Subject: MY Public Opinion

External Email

Board of Health,

I am writing to provide my comment on the January 12th meeting agenda. Specifically on the topics of:

- * Applying WAC-246-100 to include COVID-19
- * The addition of the COVID-19 injections are part of school immunization requirements

Consideration of either of these proposals alone is wrong and I, along with the majority of the population, am strongly opposed to both.

It is evident that vaccination against COVID-19 has failed to effectively suppress it from spreading. One has to only note the high rate of infection observed in some of the most vaccinated places on Earth to see that this is the case. More recently, we have seen that infection due to the omicron variant is almost entirely unattenuated by the vaccination and there is no reason to believe that omicron will be the last variant of concern we have to contend with. Mandating vaccination of our children or forcefully detaining and isolating citizens of this state will not stop the spread of this disease. COVID-19 is here to stay, and this is not a fringe opinion. It is, in fact, the view of many infection disease experts worldwide. This includes immunologist Dr. Robert Malone who played a large role in the development of mRNA technology. There is not a professional in this state that has more expertise than someone who developed mRNA technology, so why is this board even considering policies that incrementally erode the freedoms that our Constitution entitles us to? The justification of "protecting" our children through forced vaccination is patronizing and absurd, as is the application of COVID-19 to WAC-246-100. We know vaccines and quarantine cannot contain the virus, that is a fact that this board cannot argue with. Furthermore, vaccinations currently required for children actually prevent children from getting the serious viruses where the current "covid vaccinations" need boosters constantly or you're considered "not vaccinated". Why are YOU suggesting we continuously provide OUR children with a "vaccine" that they don't need. Most children have minute symptoms yet we have NO PROOF of the long term effects this said vaccine will have. I suggest you allow natural immunity be built just as we do for the common viruses and colds.

I am disappointed with the arrogance of this board for even considering these two proposals. This is a cynical manifestation of the will to power. The citizens of this state are fed up and this board needs to stop infringing on us. We will not comply.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

This is being pushed through way too fast. Many questions have not been answered regarding the severity of Covid and the fact that doctors are not allowed to treat patients until they can't breath and need to be hospitalized. Then the protocol in the hospital is to get them on a ventilator to get more money from medicare via the federal government. People see thru this. These vaccinations have not been proven and only one of the vaccines has FDA approval while all three are being distributed. AND people are dying from them. All this is happening to the demise of the citizens of the State of Washington. Please use the critical thinking skills that I hope you learned in your education. If you really care about the citizens of this state then you will not change the WAC.

I am "Very Strongly" requesting you, the Senate and House Representatives, also the WA State Board of Health, to listen to millions of Washington State citizens, "Do Not Force Vaccination" and "Not to Force anyone to a quarantine facility"! It is "Not Your Right"! Neither did God of Heaven, appoint you to be an "Authoritarian", invoking fear, drama, bullying, mandating, forcefulness, coercion, power, control and the like! This Is Not Of and From our Loving God! This is evil and from the devil, who is a liar and a destroyer! The battle we are all up against, is Spiritual! Turn to God of Heaven, who created you and us all! Repent of your sins, as God desires us all to do! He gave us all a "Free Will"! It is "Not Your or anyone's Right" to take away what God has given us, "The Gift of Freedom!"

Thank you,

Nancy Weiss

Subject: NO on Unconstitutional Vaccine Agenda

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable. Moreover, more than 99 percent of the population survive. Covid vaccines have little effect on Covid, and in fact, most people who get Covid and spread it have been fully vaccinated, some have even received booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state

employee.

These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Lynn Seulean

11623 1st Ave

Seattle, WA 98168

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

I ask you to please not mandate vaccination for Covid 19 for K-12 students!
They are at low risk of complications if they do contract the virus and I believe them getting the virus naturally is one good way for us to reach herd immunity.
I personally do not want my child to get a vaccine that has not had LONG TERM studies and that we just don't know how they will affect children long term. I'm not comfortable with that.
Thank you for your consideration,
Jackie Purvis

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State. These policies are overreaching and immoral. I stand against these proposed WAC's.

246-100-070

246-100-045

246-100-040

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FchILC5yWqqtZo0JYpfyn0pC%3Fdomain%3Dchildrenshealthdefense.org&data=0) <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FchILC5yWqqtZo0JYpfyn0pC%3Fdomain%3Dchildrenshealthdefense.org&data=0>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FJM-2C680rrTrEoNI0T5oTUF%3Fdomain%3Damericasfrontlinedoctors.org&data=04%7C01%7CWSBOH%40SBO>)

I disagree with mandatory vaccines, especially for school age children in grades K-12.

I am vaccinated, have had COVID-19. Why isn't there credit for people who have the antibodies??

I am not an expert or a doctor, yet have read many, many articles written by doctors and experts in the medical field regarding the benefits and harms of the vaccine.

We, as constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Jan. 10, 2022

wsboh@sboh.wa.gov

Please make a copy for all Board members and put this on public record.

I am quite disturbed that you would consider adding these experimental COVID19 vaccines to the school children's current vaccine schedule. There should be NO mandates! The masks don't work! The PCR test doesn't work, too many false positives! The COVID-19 Vaccines don't work or only briefly!

1) **The COVID-19 vaccine experiment is not over.** We have yet to find out the long-term effects. It violates not only the **Nuremberg Code** but the **Constitution** as well. We are supposed to have the right to make our own medical decisions. **Coercion is a felony!**

2) **You can't prove these vaccines are safe.** Can you provide the safety data results? Doubtful since the experiment is not over. I don't believe these vaccines are safe judging by the **VAERS website**. **Most children survive the virus but the adverse effects from the COVID19 vaccines such as Myocarditis can create lifelong health problems or death.** You can't guarantee a child won't be vaccine injured, nor do you take on any liability if they are.

3) **Doctors take a Hippocratic oath to do no harm.** Your current policy of telling patients to come when they have difficulty breathing or dehydrated, then hospitalizing them putting them on a ventilator and giving Remdesivir does harm! Hospitals make a fortune with this protocol. (\$13,000 for admission and \$39,000 if placed on a ventilator for starters.)

A serious side effect of Remdesivir is kidney disorders and can be potentially fatal. Remdesivir was pulled from the Ebola trial shortly after because of the 4 trial drugs it had the highest death rate. Why would the FDA approve this for treatment? Was it because they could not push the EUA vaccines if there was an effective treatment?

4) Most people aren't aware that **Ivermectin is on the NIH Table 2f. Characteristics of Antiviral Agents.** It says that not approved by the FDA and not recommended by the panel for treatment of COVID-19 under investigation in clinical trials. Most people don't know about **the Right to Try Act**. **Why aren't people being treated early?** Many frontline doctors had great success using the **Zelenko Protocol**. India's cases peaked in May of 2021 and dropped significantly after administering **Ivermectin**. India has 4.2 times the population of the USA and 483,790 deaths from COVID-19 compared to the USA with 837,264 deaths. The USA has 63.27% fully vaccinated compared to India's 45.89%. Why aren't you looking at India's statistics? Different people have told me that the pharmacies won't fill Ivermectin prescriptions if it is for COVID-19. Aren't they liable if a doctor prescribes Ivermectin and the patient dies because the pharmacy refused to fill the prescription?

The FDA, CDC, and WHO said not to use Hydroxychloroquine based on an article put in the Lancet and later retracted because they could not produce the data to support it, yet the FDA didn't give the ok to use it, why? Both Hydroxychloroquine and Ivermectin are FDA approved for other use. Ivermectin is sold over the counter in many 3rd world countries. Its side effects are less dangerous than both aspirin

and Tylenol. Approximately 20-30% of prescription drugs are used **Off-Label** (repurposed) which is perfectly legal. People need to know their rights. **Attorney General Jeff Landry says "laws are in place that require doctors and pharmacists to fill prescriptions regardless of what they think of it. Same for doctors and nurses to treat people with COVID-19 who aren't vaccinated. It is in their Hippocratic Oath."** (Congressional Post 10/2/21)

5) **Masks don't work for the virus, why do you insist on them?** Even the doctor on CNN referred to them as facial decorations! They also deplete oxygen and increases the carbon dioxide, causing **headaches and difficulty breathing. Moisture trapped can cause bacteria to grow. This is not healthy!**

6) **CDC head Rochelle Walensky admitted the PCR test have too many false positives and can remain positive 12 weeks after an infection. She also shortened the isolation to 5 days.**

Right now, the CDC, FDA, NIH, NIAID, and HHS heads either looks like a bunch of liars or are completely incompetent. It is time to end all mandates! It is time for doctors and nurses to renew their Hippocratic Oath to do no harm! Hospitals should not be taking advantage of their patients. The more people that die from bad policies, the less income hospitals will receive in the future. It's time for the Medical Board to do what is best for the people in this state. If you don't, one day you will be held accountable. Gates, Fauci, and Big Pharma have a case against them filed before the International Criminal Court for Crimes Against Humanity.

Kidney disorders as serious adverse drug reactions of remdesivir in coronavirus disease 2019: a retrospective case–noncase study

Laurent Chouchana,^{1,*} Laure-Hélène Preta,¹ Mylène Tisseyre,¹ Benjamin Terrier,² Jean-Marc Treluyer,¹ and François Montastruc³

PMC, US National Library of Medicine, National Institutes of Health Feb. 26, 2021

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7907730/>

.....Our findings, based on postmarketing real-life data from >5000 COVID-19 patients, support that kidney disorders, almost exclusively AKI, represent a serious, early, and potentially fatal adverse drug reaction of remdesivir. These results are consistent with findings from another group.⁴ Physicians should be aware of this potential risk and perform close kidney monitoring when prescribing remdesivir. Further data are needed to confirm that safety signal.

Remdesivir and Acute Renal Failure: A Potential Safety Signal From Disproportionality Analysis of the WHO Safety Database

Clin Pharmacol Ther. 2021 Apr;109(4):1021-1024. doi: 10.1002/cpt.2145. Epub 2021 Jan 16.

<https://pubmed.ncbi.nlm.nih.gov/33340409/>

Abstract

Remdesivir is approved for emergency use by the US Food and Drug Administration (FDA) and authorized conditionally by the European Medicines Agency (EMA) for patients with coronavirus disease 2019 (COVID-19). Its benefit-risk ratio is still being explored because data in the field are rather scant. A decrease of the creatinine clearance associated with remdesivir has been inconstantly reported in clinical trials with unclear relevance. Despite these uncertainties, we searched for a potential signal of acute renal failure (ARF) in pharmacovigilance postmarketing data. An analysis of the international pharmacovigilance postmarketing databases (VigiBase) of **the World Health Organization (WHO) was performed, using two disproportionality methods. Reporting odds ratio (ROR) compared the number of ARF cases reported with remdesivir, with those reported with other drugs prescribed in comparable situations of COVID-19 (hydroxychloroquine, tocilizumab, and lopinavir/ritonavir). The combination of the terms "acute renal failure" and "remdesivir" yielded a statistically significant disproportionality signal with 138 observed cases instead of the 9 expected.** ROR of ARF with remdesivir was 20-fold (20.3; confidence interval 0.95 [15.7-26.3], $P < 0.0001$) that of comparative drugs. Based on ARF cases reported in VigiBase, and despite the caveats inherent to COVID-19 circumstances, we detected a statistically significant pharmacovigilance signal of nephrotoxicity associated with remdesivir, deserving a thorough qualitative assessment of all available data. Meanwhile, as recommended in its Summary of Product Characteristics, assessment of patients with COVID-19 renal function should prevail before and during treatment with remdesivir in COVID-19.

NIH COVID-19 Treatment Guidelines

Table 2f. Characteristics of Antiviral Agents

Last Updated: December 16, 2021

<https://www.covid19treatmentguidelines.nih.gov/tables/antiviral-characteristics/>

[**The Right to Try Act**, or the Trickett Wendler, Frank Mongiello, Jordan McLinn, and Matthew Bellina Right to Try Act, was signed into law May 30, 2018. This law is another way for patients who have been diagnosed with life-threatening diseases or conditions who have tried all approved treatment options and who are unable to participate in a clinical trial to access certain unapproved treatments.]

The Lancet published an article online May 22, 2020 titled "Hydroxychloroquine or chloroquine with or without a macrolide for treatment of COVID-19: A multinational registry analysis." It stated, "Hydroxychloroquine or chloroquine, often in combination with a second-generation macrolide, are being widely used for treatment of COVID-19, despite no conclusive evidence of their benefit."

Horowitz: Louisiana AG Jeff Landry Warns Pharmacies Against Blocking COVID Treatment

Congressional Post By Daniel Horowitz September 27, 2021

<https://congressionalpost.com/horowitz-louisiana-ag-jeff-landry-warns-pharmacies-against-blocking-covid-treatment/>

Dr. Russell Blaylock MD wrote an article, [Face Masks: A Remedy or a Health Risk?](#) Vol 17, No. 9 September 2020 in the Blaylock Wellness Report.

A cluster randomised trial of cloth masks compared with medical masks in healthcare workers

NIH National Library of Medicine April 22, 2015

C Raina MacIntyre 1, Holly Seale 1, Tham Chi Dung 2, Nguyen Tran Hien 2, Phan Thi Nga 2, Abrar Ahmad Chughtai 1, Bayzidur Rahman 1, Dominic E Dwyer 3, Quanyi Wang 4

<https://pubmed.ncbi.nlm.nih.gov/25903751/>

Results: The rates of all infection outcomes were highest in the cloth mask arm, with the rate of ILI statistically significantly higher in the cloth mask arm (relative risk (RR)=13.00, 95% CI 1.69 to 100.07) compared with the medical mask arm. Cloth masks also had significantly higher rates of ILI compared with the control arm. An analysis by mask use showed ILI (RR=6.64, 95% CI 1.45 to 28.65) and laboratory-confirmed virus (RR=1.72, 95% CI 1.01 to 2.94) were significantly higher in the cloth masks group compared with the medical masks group. Penetration of cloth masks by particles was almost 97% and medical masks 44%.

Conclusions: This study is the first RCT of cloth masks, and the results caution against the use of cloth masks. This is an important finding to inform occupational health and safety. Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection. Further research is needed to inform the widespread use of cloth masks globally. However, as a precautionary measure, cloth masks should not be recommended for HCWs, particularly in high-risk situations, and guidelines need to be updated.

Effectiveness of N95 respirators versus surgical masks against influenza: A systematic review and meta-analysis

Youlin Long 1, Tengyue Hu 2, Liqin Liu 2, Rui Chen 3, Qiong Guo 1, Liu Yang 1, Yifan Cheng 1, Jin Huang 4, Liang Du 1

Pubmed PMID: 32167245 PMCID: PMC7228345 DOI: 10.1111/jebm.12381 March 3, 2020

<https://pubmed.ncbi.nlm.nih.gov/32167245/>

Conclusion: The use of N95 respirators compared with surgical masks is not associated with a lower risk of laboratory-confirmed influenza. It suggests that N95 respirators should not be recommended for general public and nonhigh-risk medical staff those are not in close contact with influenza patients or suspected patients.

CDC Head Admits PCR Tests Produce False Positives [Video]

The Liberty Beacon Europe Reloaded by TLB Staff: Steve Watson Dec. 31, 2021

<https://www.thelibertybeacon.com/cdc-head-admits-pcr-tests-produce-false-positives-video/>

CDC head Rochelle Walensky admitted Wednesday that the agency has rejigged its guidance, including cutting COVID isolation times in half, based on the fact that PCR tests are producing massive amounts of false positives.

Noting that PCR tests for COVID can stay positive for up to 12 weeks after infection, Walensky stated “we would have people in isolation for a very long time if we were relying on PCRs.”

Covid-19: Pharmaceutical giants, Gates, Fauci, UK officials accused of crimes against humanity in International Criminal Court complaint

By The Rio Times December 19, 2021

<https://www.riotimesonline.com/brazil-news/modern-day-censorship/covid-19-pharmaceutical-giants-gates-fauci-uk-officials-accused-of-crimes-against-humanity-in-international-criminal-court-complaint/>

RIO DE JANEIRO, BRAZIL – UK officials and the most influential public health figures are accused of genocide, citing a series of statistics on the impact of “vaccines” and policies imposed under the guise of “mitigating COVID.”

A group including former Pfizer vice president Dr. Michael Yeadon filed a complaint with the International Criminal Court (ICC) (worth reading) on behalf of U.K. citizens against Boris Johnson and U.K. officials, Bill and Melinda Gates, CEOs of major pharmaceutical companies, World Economic Forum executive chairman Klaus Schwab, and others for crimes against humanity.

The ICC has acknowledged the case and has attributed the following reference number **OTP-CR-473/21.**

To the Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! The vaccines have not been held to the same high standards of research protocol and were released on an emergency basis. There is a huge problem when the Pfizer/Moderna won't release their safety and side effects seen. No other pharmaceutical could get away with this flagrant disregard for human life and make BILLIONS in return. They are not at all transparent.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. This smells of the government take over of the people in Australia.

Signed,

Melinda Straub

To Whom it May Concern,

We are now hearing about all the "misinformation" being spread through social media concerning the plans for the upcoming meeting on January 12th. Since we were all able to read the agenda clearly and see exactly what was planned, I am going to take this as a good sign that you are listening to the people.

We will not waver in our stance for freedom and we will continue to hold all those in public office accountable. You are there to be a voice for the people, not to give over to control and tyranny. We will stand for medical freedom.

A Washington State Citizen,
Marleen Payment

Please, read our comments. We are sorry this late but we just got "wind" of this important meeting. We are very against forced vaccinations with this new technology of the mRNA and the DNA vaccines. It has not been studied long enough and the VAERS website cannot begin to keep up with the adverse effects of these vaccines. Our family has medical issues that prohibit a few of us from getting these shots. We are waiting and hoping for the protein based vaccines, for example the Novavax vaccine, to get US approval. It is approved in Europe and by the WHO. This is the vaccine we CAN take. But please do not force these shots (Moderna, JJ, and Pfizer) onto our children and us. Please!

With our most sincere regards,

Kirk and Michelle Rector

wsboh@sboh.wa.gov

Please make a copy for all Board members and put this on public record.

I am quite disturbed that you would consider adding these experimental COVID19 vaccines to the school children's current vaccine schedule. There should be NO mandates! The masks don't work! The PCR test doesn't work, too many false positives! The COVID-19 Vaccines don't work or only briefly!

1) **The COVID-19 vaccine experiment is not over.** We have yet to find out the long-term effects. It violates not only the **Nuremberg Code** but the **Constitution** as well. We are supposed to have the right to make our own medical decisions. **Coercion is a felony!**

2) **You can't prove these vaccines are safe.** Can you provide the safety data results? Doubtful since the experiment is not over. I don't believe these vaccines are safe judging by the **VAERS website**. **Most children survive the virus but the adverse effects from the COVID19 vaccines such as Myocarditis can create lifelong health problems or death.** You can't guarantee a child won't be vaccine injured, nor do you take on any liability if they are.

3) **Doctors take a Hippocratic oath to do no harm.** Your current policy of telling patients to come when they have difficulty breathing or dehydrated, then hospitalizing them putting them on a ventilator and giving Remdesivir does harm! Hospitals make a fortune with this protocol. (\$13,000 for admission and \$39,000 if placed on a ventilator for starters.)

A serious side effect of Remdesivir is kidney disorders and can be potentially fatal. Remdesivir was pulled from the Ebola trial shortly after because of the 4 trial drugs it had the highest death rate. Why would the FDA approve this for treatment? Was it because they could not push the EUA vaccines if there was an effective treatment?

4) Most people aren't aware that **Ivermectin is on the NIH Table 2f. Characteristics of Antiviral Agents.** It says that not approved by the FDA and not recommended by the panel for treatment of COVID-19 under investigation in clinical trials. Most people don't know about **the Right to Try Act**. **Why aren't people being treated early?** Many frontline doctors had great success using the **Zelenko Protocol**. India's cases peaked in May of 2021 and dropped significantly after administering **Ivermectin**. India has 4.2 times the population of the USA and 483,790 deaths from COVID-19 compared to the USA with 837,264 deaths. The USA has 63.27% fully vaccinated compared to India's 45.89%. Why aren't you looking at India's statistics? Different people have told me that the pharmacies won't fill Ivermectin prescriptions if it is for COVID-19. Aren't they liable if a doctor prescribes Ivermectin and the patient dies because the pharmacy refused to fill the prescription?

The FDA, CDC, and WHO said not to use Hydroxychloroquine based on an article put in the Lancet and later retracted because they could not produce the data to support it, yet the FDA didn't give the ok to use it, why? Both Hydroxychloroquine and Ivermectin are FDA approved for other use. Ivermectin is sold over the counter in many 3rd world countries. Its side effects are less dangerous than both aspirin

and Tylenol. Approximately 20-30% of prescription drugs are used **Off-Label** (repurposed) which is perfectly legal. People need to know their rights. **Attorney General Jeff Landry says "laws are in place that require doctors and pharmacists to fill prescriptions regardless of what they think of it. Same for doctors and nurses to treat people with COVID-19 who aren't vaccinated. It is in their Hippocratic Oath."** (Congressional Post 10/2/21)

5) **Masks don't work for the virus, why do you insist on them?** Even the doctor on CNN referred to them as facial decorations! They also deplete oxygen and increases the carbon dioxide, causing **headaches and difficulty breathing. Moisture trapped can cause bacteria to grow. This is not healthy!**

6) **CDC head Rochelle Walensky admitted the PCR test have too many false positives and can remain positive 12 weeks after an infection. She also shortened the isolation to 5 days.**

Right now, the CDC, FDA, NIH, NIAID, and HHS heads either looks like a bunch of liars or are completely incompetent. It is time to end all mandates! It is time for doctors and nurses to renew their Hippocratic Oath to do no harm! Hospitals should not be taking advantage of their patients. The more people that die from bad policies, the less income hospitals will receive in the future. It's time for the Medical Board to do what is best for the people in this state. If you don't, one day you will be held accountable. Gates, Fauci, and Big Pharma have a case against them filed before the International Criminal Court for Crimes Against Humanity.

Kidney disorders as serious adverse drug reactions of remdesivir in coronavirus disease 2019: a retrospective case–noncase study

Laurent Chouchana,^{1,*} Laure-Hélène Preta,¹ Mylène Tisseyre,¹ Benjamin Terrier,² Jean-Marc Treluyer,¹ and François Montastruc³

PMC, US National Library of Medicine, National Institutes of Health Feb. 26, 2021

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7907730/>

.....Our findings, based on postmarketing real-life data from >5000 COVID-19 patients, support that kidney disorders, almost exclusively AKI, represent a serious, early, and potentially fatal adverse drug reaction of remdesivir. These results are consistent with findings from another group.⁴ Physicians should be aware of this potential risk and perform close kidney monitoring when prescribing remdesivir. Further data are needed to confirm that safety signal.

Remdesivir and Acute Renal Failure: A Potential Safety Signal From Disproportionality Analysis of the WHO Safety Database

Clin Pharmacol Ther. 2021 Apr;109(4):1021-1024. doi: 10.1002/cpt.2145. Epub 2021 Jan 16.

<https://pubmed.ncbi.nlm.nih.gov/33340409/>

Abstract

Remdesivir is approved for emergency use by the US Food and Drug Administration (FDA) and authorized conditionally by the European Medicines Agency (EMA) for patients with coronavirus disease 2019 (COVID-19). Its benefit-risk ratio is still being explored because data in the field are rather scant. A decrease of the creatinine clearance associated with remdesivir has been inconstantly reported in clinical trials with unclear relevance. Despite these uncertainties, we searched for a potential signal of acute renal failure (ARF) in pharmacovigilance postmarketing data. An analysis of the international pharmacovigilance postmarketing databases (VigiBase) of **the World Health Organization (WHO) was performed, using two disproportionality methods. Reporting odds ratio (ROR) compared the number of ARF cases reported with remdesivir, with those reported with other drugs prescribed in comparable situations of COVID-19 (hydroxychloroquine, tocilizumab, and lopinavir/ritonavir). The combination of the terms "acute renal failure" and "remdesivir" yielded a statistically significant disproportionality signal with 138 observed cases instead of the 9 expected.** ROR of ARF with remdesivir was 20-fold (20.3; confidence interval 0.95 [15.7-26.3], $P < 0.0001$) that of comparative drugs. Based on ARF cases reported in VigiBase, and despite the caveats inherent to COVID-19 circumstances, we detected a statistically significant pharmacovigilance signal of nephrotoxicity associated with remdesivir, deserving a thorough qualitative assessment of all available data. Meanwhile, as recommended in its Summary of Product Characteristics, assessment of patients with COVID-19 renal function should prevail before and during treatment with remdesivir in COVID-19.

NIH COVID-19 Treatment Guidelines

Table 2f. Characteristics of Antiviral Agents

Last Updated: December 16, 2021

<https://www.covid19treatmentguidelines.nih.gov/tables/antiviral-characteristics/>

[**The Right to Try Act**, or the Trickett Wendler, Frank Mongiello, Jordan McLinn, and Matthew Bellina Right to Try Act, was signed into law May 30, 2018. This law is another way for patients who have been diagnosed with life-threatening diseases or conditions who have tried all approved treatment options and who are unable to participate in a clinical trial to access certain unapproved treatments.]

The Lancet published an article online May 22, 2020 titled "Hydroxychloroquine or chloroquine with or without a macrolide for treatment of COVID-19: A multinational registry analysis." It stated, "Hydroxychloroquine or chloroquine, often in combination with a second-generation macrolide, are being widely used for treatment of COVID-19, despite no conclusive evidence of their benefit."

Horowitz: Louisiana AG Jeff Landry Warns Pharmacies Against Blocking COVID Treatment

Congressional Post By Daniel Horowitz September 27, 2021

<https://congressionalpost.com/horowitz-louisiana-ag-jeff-landry-warns-pharmacies-against-blocking-covid-treatment/>

Dr. Russell Blaylock MD wrote an article, [Face Masks: A Remedy or a Health Risk?](#) Vol 17, No. 9 September 2020 in the Blaylock Wellness Report.

A cluster randomised trial of cloth masks compared with medical masks in healthcare workers

NIH National Library of Medicine April 22, 2015

C Raina MacIntyre 1, Holly Seale 1, Tham Chi Dung 2, Nguyen Tran Hien 2, Phan Thi Nga 2, Abrar Ahmad Chughtai 1, Bayzidur Rahman 1, Dominic E Dwyer 3, Quanyi Wang 4

<https://pubmed.ncbi.nlm.nih.gov/25903751/>

Results: The rates of all infection outcomes were highest in the cloth mask arm, with the rate of ILI statistically significantly higher in the cloth mask arm (relative risk (RR)=13.00, 95% CI 1.69 to 100.07) compared with the medical mask arm. Cloth masks also had significantly higher rates of ILI compared with the control arm. An analysis by mask use showed ILI (RR=6.64, 95% CI 1.45 to 28.65) and laboratory-confirmed virus (RR=1.72, 95% CI 1.01 to 2.94) were significantly higher in the cloth masks group compared with the medical masks group. Penetration of cloth masks by particles was almost 97% and medical masks 44%.

Conclusions: This study is the first RCT of cloth masks, and the results caution against the use of cloth masks. This is an important finding to inform occupational health and safety. Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection. Further research is needed to inform the widespread use of cloth masks globally. However, as a precautionary measure, cloth masks should not be recommended for HCWs, particularly in high-risk situations, and guidelines need to be updated.

Effectiveness of N95 respirators versus surgical masks against influenza: A systematic review and meta-analysis

Youlin Long 1, Tengyue Hu 2, Liqin Liu 2, Rui Chen 3, Qiong Guo 1, Liu Yang 1, Yifan Cheng 1, Jin Huang 4, Liang Du 1

Pubmed PMID: 32167245 PMCID: PMC7228345 DOI: 10.1111/jebm.12381 March 3, 2020

<https://pubmed.ncbi.nlm.nih.gov/32167245/>

Conclusion: The use of N95 respirators compared with surgical masks is not associated with a lower risk of laboratory-confirmed influenza. It suggests that N95 respirators should not be recommended for general public and nonhigh-risk medical staff those are not in close contact with influenza patients or suspected patients.

CDC Head Admits PCR Tests Produce False Positives [Video]

The Liberty Beacon Europe Reloaded by TLB Staff: Steve Watson Dec. 31, 2021

<https://www.thelibertybeacon.com/cdc-head-admits-pcr-tests-produce-false-positives-video/>

CDC head Rochelle Walensky admitted Wednesday that the agency has rejiggered its guidance, including cutting COVID isolation times in half, based on the fact that PCR tests are producing massive amounts of false positives.

Noting that PCR tests for COVID can stay positive for up to 12 weeks after infection, Walensky stated “we would have people in isolation for a very long time if we were relying on PCRs.”

Covid-19: Pharmaceutical giants, Gates, Fauci, UK officials accused of crimes against humanity in International Criminal Court complaint

By The Rio Times December 19, 2021

<https://www.riotimesonline.com/brazil-news/modern-day-censorship/covid-19-pharmaceutical-giants-gates-fauci-uk-officials-accused-of-crimes-against-humanity-in-international-criminal-court-complaint/>

RIO DE JANEIRO, BRAZIL – UK officials and the most influential public health figures are accused of genocide, citing a series of statistics on the impact of “vaccines” and policies imposed under the guise of “mitigating COVID.”

A group including former Pfizer vice president Dr. Michael Yeadon filed a complaint with the International Criminal Court (ICC) (worth reading) on behalf of U.K. citizens against Boris Johnson and U.K. officials, Bill and Melinda Gates, CEOs of major pharmaceutical companies, World Economic Forum executive chairman Klaus Schwab, and others for crimes against humanity.

The ICC has acknowledged the case and has attributed the following reference number **OTP-CR-473/21.**

I understand that you have confidence in the current vaccines for reducing serious illness, however, why do you keep spreading the misinformation that the vaccines mean less spread?

It is a choice for personal protection. It is a leaky vaccine (check NIH definition).

It would be great if you gave people your information, based on science, then also gave them information on how to stay healthy and treat the illness, should they get it. There are ways and that info is not well known. Early treatment is the answer at this point. The vaccines are no longer hitting the variant.

Respectfully,

Laura Kett

TO: Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early and I have personally witnessed this dozens of times. The success of early treatment is widely documented. Moreover, it is survivable by more than 98% percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. Again, this has been widely documented.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population.

I am fully vaccinated and have also just received a booster. That was my choice. I am a firm believer that everyone should have a choice. Science doesn't support the idea that unvaccinated people are a threat to anyone else. Vaccinated or not, we all can carry and spread this virus. A vaccine mandate is a huge step in the wrong direction for many reasons. I vehemently oppose this proposal to apply WAC infectious disease codes to Covid 19.

Thank you.

Subject: Neutral, with Questions about adding COVID-19 Vaccine to WAC

External Email

One of your professionals said that vaccine immunity is better than natural immunity. Can you please provide a reference? All the scientific literature I can find says the opposite... Did you lie to us on purpose, on accident, or am I missing some authoritative body of scientific evidence?

Natural Immunity Study from Israel. Natural immunity is 13x more protective against Delta. <https://www.medrxiv.org/content/10.1101/2021.08.24.21262415v1>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101%2F2021.08.24.21262415v1>>

And here is a (pretty misleading) study from the CDC showing that the vax offers better protection... but only from reinfection. That means that natural immunity PLUS vaccine is more protective from natural immunity alone.
<https://www.cdc.gov/media/releases/2021/s0806-vaccination-protection.html>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmedia%2Freleases%2Fs0806-vaccination-protection.html&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C0d87418c237e420b586a08d9d60b6967>>

The Israel study compares reinfection to breakthrough infection, which is a much more relevant study and less deceptive in my opinion. But read them for yourself

Also, here is the study referencing that there is no positive correlation between vax rates and infection rates. In fact they found an inverse correlation:
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8481107/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2Farticles%2FPMC8481107/>>

Conclusion: For instance, in a report released from the Ministry of Health in Israel, the effectiveness of 2 doses of the BNT162b2 (Pfizer-BioNTech) vaccine against preventing COVID-19 infection was reported to be 39% [6], substantially lower than the trial efficacy of 96% [7]. It is also emerging that immunity derived from the Pfizer-BioNTech vaccine may not be as strong as immunity acquired through recovery from the COVID-19 virus [8]. A substantial decline in immunity from mRNA vaccines 6-months post immunization has also been reported [9]. Even though vaccinations offers protection to individuals against severe hospitalization and death, the CDC reported an increase from 0.01 to 9% and 0 to 15.1% (between January to May 2021) in the rates of hospitalizations and deaths, respectively, among vaccinated.

Oh and I love all of you, very much. Stay free, WA!

Also... look at the initial Pfizer data for their first trial, more people died in the vax group than the control group, mostly due to cardiac arrest and other heart issues. There is evidence that vaccines increase all-cause mortality, while reducing relative mortality associated with COVID-19. Look it up, friends!

I'm happy to share a LOT more studies. But a collation of all early therapeutic treatments is available here: c19study.com

Subject: No Covid vaccine for school aged kids

External Email

Please don't require children to get the covid vaccine. I have two children ages 3 and 6 and they have natural immunity to covid. They did exceptionally well and their God given immune systems did the job they were designed to do. All medical choices should be left to the parents. We already pulled our child out of public school this year but were hoping to put her back in next year. We will NOT put her back in if the vaccine is mandated. This is government overreach at its finest. ALL the mandates must not continue. People are being hurt daily by them. I have worked since I was 15 yrs old. I am now 42 and was terminated for the first time in my life due to the mandates. I practiced dental hygiene for 18 years and gave top treatment to all my patients. I am no longer practicing after working during the entire pandemic. I am educated and will make decisions for my family. With an extremely high survival rate for covid, especially for children, it is NOT necessary to vaccinate them with a vaccine that has no long term trials. We are a free people and the constitution is the law of the land which declares our personal rights.

Sincerely,

Jamie Bumgarner

Good day,

Thank you for your time. I am writing to say I am OPPOSED to any cov19 mandatory vaccine for children to enter schools or daycare in WA State (or any State for that matter). There is zero scientific proof that says children need the cov19 vaccine to be "safe" from the virus. Deaths in children from Cov19 infections are extremely rare, according to the CDC and current science. Follow the science DOH and stop mandatory Cov19 vaccines.

In two years' time, the death rate of children is extremely low. See CDC stats. link below.

Provisional COVID-19 Deaths: Focus on Ages 0-18 Years | Data | Centers for Disease Control and Prevention (cdc.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCCHS%2FProvisi%2FCOVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-ujj3&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ce6a287efcaac4676f9e008d9d388679f%7C11d0e2>>

In addition, nearly the entire country is OPEN and operating without masks, and mandatory vaccines and living normal lives. You can drive to any number of States from WA all of which are open and you can feel how not oppressive it is to be there. WA State continues to push the agenda against science and reason but most importantly WA State is not following the science.

Respectfully,

Julie Mosey

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that

one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors

(americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,
Jacqueline Delgado

Subject: NO on Unconstitutional Vaccine Agenda

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable. Moreover, more than 99 percent of the population survive. Covid vaccines have little effect on Covid, and in fact, most people who get Covid and spread it have been fully vaccinated, some have even received booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee.

These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Lynn Seulean

Subject: My Public Comment

External Email

Board of Health,

I am writing to provide comment on the January 12th meeting agenda. Specifically on the topics of:

- * Applying WAC-246-100 to include COVID-19
- * The addition of the COVID-19 injections are part of school immunization requirements

Consideration of either of these proposals along is wrong and I, along with the majority of the population, am strongly opposed to both.

It is self-evident that vaccination against COVID-19 has failed to effectively suppress its dissemination. One has to only note the high rate of infection observed in some of the most vaccinated places on Earth to see that this is the case. More recently, we have seen that infection due to the omicron variant is almost entirely unattenuated by the vaccination and there is no reason to believe that omicron will be the last variant of concern we have to contend with. Mandating vaccination of our children or forcefully detaining and isolating citizens of this state will not to stop the spread of this disease. COVID-19 is here to stay, and this is not a fringe opinion. It is, in fact, the view of many infection disease experts worldwide. This includes immunologist Dr. Robert Malone who played a large role in the development of mRNA technology. There is not a professional in this state that has more expertise than someone who developed mRNA technology, so why is this board even considering policies that incrementally erode the freedoms that our Constitution entitles us to? The justification of "protecting" our children through forced vaccination is patronizing and absurd, as is the application of COVID-19 to WAC-246-100. We know vaccines and quarantine cannot contain the virus, that is a fact that this board cannot argue with.

I am disgusted with the arrogance of this board for even considering these two proposals. This is a cynical manifestation of the will to power. The citizens of this state are fed up and this board needs to stop infringing on us. We will not comply.

Dear Ms. Christy Hoff,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements. One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you,

Scott and Leigh Larsen

Hello again.

Vaccines have proved to be ineffective against Omicron. Will you admit that and then use common sense to admit also that mandating vaccines make no sense if they do not work against Omicron - which is the latest strain? Also, the CDC has admitted that only tight fitting (N95) masks might help stop a virus - and that the vast majority of masks do not stop Covid. With that information, will you stop the insane mask mandates, as I'm guessing you wouldn't dare mandate those oxygen restricting masks which no person will be able to wear all day every day - especially children? These are common sense questions that need to be answered - to say nothing about the unconstitutional problems with these mandates!

Thank you,

Margaret Fast

Michelle,

Thank you for your email and the detailed insight. I truly appreciate you taking the time to share that information with me.

I will say re: ESHB 1551, I understand SBOH is making HIV related updates due to the law passed. However, I do want to make sure we're all clear about the truth of what is taking place. By not calling HIV by its known name, these changes will make it so people can talk about HIV without calling it by its formal name and therefore, misguide people about the real potential danger and harm that a person with HIV can do to another if they are intimate, etc.

When the term "defelonize HIV exposure" is used it may sound good, but the truth is, and what should be used instead is: legal to knowingly and intentionally infect a person with HIV. It's one thing to try not to hurt people's feelings, but it's entirely another to put

the public population at risk of a serious disease known to cause lifelong challenges and/or death.

I'm writing to appeal to SBOH and our health officials to work to maintain the truth and reality of the seriousness of HIV in how it's referred to in the future in WA state so people can be aware of it and deal with it appropriately.

Thank you for your time and again for the information on the Jan. 12 meeting. I hope you have a good weekend.

Best,

Vicki

Subject: RE: Legislative Letter - Concerning possible Covid-19 vaccine mandates

CAUTION:External email.

Representative Kraft: Attached is the agenda for the January 12 Board of Health meeting.

Item 9 does not pertain to COVID-19 response or vaccine mandates. Item 9 is the continuation of our November hearing on updating WAC 246-100 to assure consistency with ESHB 1551

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2Fbillssummary%2FChapter%2F76%2F2020>>. That legislation modernized the state's control of communicable disease laws by helping to end statutory HIV/AIDS exceptionalism, reduce HIV-related stigma, defelonize HIV exposure, and remove barriers to HIV testing. The law took effect June 11, 2020, and we've been working to update the communicable disease rules to reflect the law. This rulemaking has always been narrowly focused on assuring consistency with the recently passed legislation. We continued the hearing from November based on public comment we had received focused on certain exposures to blood borne pathogens. Specifically, the changes include

- * Editorial revisions throughout the chapter to remove gendered language (e.g., his or hers), use people-first language (e.g., people living with HIV), and provide clarity.
- * Adding and removing definitions, consistent with ESHB 1551.
- * Removing references to HIV/AIDS training and counseling, including pre- and post-test counseling, consistent with ESHB 1551.
- * Updating references to law (RCW) and rule (WAC).
- * Clarifying provisions related to the use of identifying information of persons living with HIV.
- * Revising the effective length of written health orders from three to 12 months, consistent with ESHB 1551.
- * Replacing certain references to "HIV" with "blood-borne pathogen."
- * Establishing and clarifying the criteria for what constitutes a substantial exposure and possible risk of transmission of a blood-borne pathogen in occupational

settings, local jail facilities, and Washington State Department of Corrections facilities.

With regard to other items on the agenda that are related to the topic of immunizations,

Item 8 is an update on the work underway to convene a technical advisory group to review the Covid 19 vaccine. There is no Board action associated with this item.

Item 11 is a petition for rulemaking filed on behalf of Informed Choice Washington. I have attached it for your convenience. All materials related to the meeting will be posted to the website this evening. Our posting has been delayed due to the volume of public

comment we've received.

I hope you have a good weekend.

Michelle,

At the Jan. 12, 2022 SBOH meeting, will the issue of possible Covid-19 vaccine mandates for all Washingtonians be discussed as part of the agenda #9.)? Was it ever previously planned to be on the agenda? As you are aware, there is considerable concern by people all across the state that this might be the case. I'd like to clarify what is actually planned to take place.

My understanding is that the possibility of Covid-19 vaccine mandates for K-12 students and kids in child care is going to be discussed under # 11.), is this correct?

Thank you in advance, for clarifying these items.

Best,

Vicki

Vicki Kraft

Subject: Mandatory Vax and Forced Quarantine - WA State

External Email

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State. These policies are overreaching and immoral. I stand against these proposed WAC's.

246-100-070

246-100-045

246-100-040

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FchILC5yWqqtZo0JYpfyn0pC%3Fdomain%3Dchildrenshealthdefense.org&data=0)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of

the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fprotect-us.mimecast.com%2Fs%2FJM-2C680rrTrEoNI0T5oTUF%3Fdomain%3Damericasfrontlinedoctors.org&data=04%7C01%7CWSBOH%40SBO>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

External Email

Dear Members of the Washington State Board of Health,

I am writing today because I am extremely concerned about the proposition to add SARS-COV-2 to the list of communicable diseases in Chapter 246-100 WAC. I strongly urge you to NOT add SARS-COV-2 (Covid-19) to the list. SARS-COV-2 is indeed an infectious disease with a high transmissibility rate, but it does not have a high death rate. Like many influenza viruses, it will work its way through the population as more and more people contract it, leading to herd immunity.

What concerns me most about the addition of SARS-COV-2 to the list of communicable diseases is the involuntary quarantining of people who have, who have been exposed to, or who have possibly been exposed to the virus. American citizens are free citizens and choose to come and go as they determine. Every time we leave our homes, we risk sickness and accidents as we interact with others. SARS-COV-2 is not a serious enough of a virus to warrant such draconian measures. Let the people decide if they are willing to take the risk of exposure to the virus. DO NOT FORCE QUARANTINE.

As you are well aware, there are many cases of Covid-19 in our state. There would certainly be capacity issues in the quarantine facilities. Have you considered questions like: How will the State pay for the quarantining of so many persons? Where will everyone be detained? How will the people be transported to such quarantine facilities? Opening and operating quarantine facilities will be very expensive.

Have you considered the situation in Australia? We are not a police state. DON'T MAKE US INTO ONE. Adding SARS-COV-2 to the list of communicable diseases will certainly lead to situations like the ones in Australia. Washington State is not ready for the pushback that its citizens will most certainly give.

As the Board of Health, you should be promoting healthy lifestyles and diets heavy in fruits and vegetables. Spend money educating the citizens on ways to secure and consume foods that are beneficial to their bodies.

Speaking of education, DO NOT ADD COVID-19 VACCINES TO THE LIST OF REQUIRED VACCINES for students to attend public schools. We have had almost two years to determine that children do not get nearly as sick as adults, and there have been very, very few deaths in children from Covid-19 alone. You will have blood on your heads for the children who die as a result of the vaccine (which is currently being illegally mandated), because they had no other school choice or because the parents did not know they had a choice.

I am adamantly opposed to adding SARS-COV-2 to the communicable diseases list. It is an unnecessary and way too drastic. I DO NOT CONSENT.

Sincerely,
Heather Friesen, Camas

Subject: No detentions for unvaccinated!!!!

External Email

Dear Washington State Board of Health,

I am writing to oppose WAC proposals that authorize the Dept of Health to involuntarily detain unvaccinated persons.

These proposals are tyrannical and stand in opposition to 1) the US Constitutional guarantees of freedom of speech and freedom to choose one's own medical care and 2) The Nuerenberg Code that prohibits involuntary participation in medical procedures.

I request that these WAC suggestions be refused immediately.

Sincerely,
Julie Martinoli

Subject: Mandating vaccines for covid

External Email

I'm a parent of a 10 year old boy. Both my husband and I are vaccinated. I have significant concerns over mandating the vaccine for kids. I would like to have 5 years of long term studies prior to vaccinating him against Covid which has such a low risk to him. The risk of him having serious issues from Covid are so minimal. I do not trust pharmaceutical companies who have had to pay out the largest settlements because of misleading the medical community and causing the opiate epidemic. Imagine if they find out that this vaccine causes serious issues that will affect these kids for the rest of their lives? Irreversible affects that cannot be undone? What harm is there in waiting for more long term studies? Imagine how you would feel if your decision 5 years from now resulted in permanent heart issues in kids.

I cannot stress enough how upset I am about this potential mandate. It makes me sick to my stomach.

Hello,

I am writing to inform you that I 100% disagree with and do not support vaccine mandates. As for the meeting coming up on January 12th I:

OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

AND I:

SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — the petition regarding item 11 on the January 12th agenda. And I agree with the petition that asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

I urge you to support medical freedom.

Sincerely,
Jennifer Groen

Subject: board of health meeting on Jan 12th | topic of Covid Vaccine Requirement for Kids

External Email

Hello. I am a citizen of Washington state, a parent, and hearing that this topic is even being considered is shameful and its unlawful. I am highly educated like all of you, just as intelligent, and been employed in the education system since 2002. However, it appears that common sense is being set aside and I am highly qualified to make this comment. Although I have personally chosen to obtain the Covid Vaccine and its booster, the fact remains is that the Pfizer Vaccine for children is still under "emergency use authorization" and its only been approved for emergency use for a couple of months. To mandate it to be required for children to attend school, earn an education, and compare it to vaccines like MMR, chicken pox, polio, etc, is absurd and demonstrates a lack of common sense and reasoning by all who are considering it. All those vaccines have been around for decades and are fully FDA approved. There is no comparison. None.

There is not enough data on the Pfizer vaccine and its impact on children, its being offered under Emergency Use only, and its not FDA approved. The fact that this is even on the agenda is offensive and I am asking that it not be considered or mandates for the three reasons previously mentioned. Do the right thing and leave it up to the parents based upon those three talking points. If not, there will be massive pushback and lawsuits coming the state/boards way...we all know it. Now is not the right time for this as there are a lot of questions and concerns about the vaccines and whether they are even fully working let alone the adverse impacts they may be having on our kids. On this particular topic and for the reasons I mentioned, it is the parents choice...not yours.

I apologize in advance if any of this comes across disrespectful, but I am a very direct person and speak the truth in all circumstances which is something that most Washingtonians lack as I've come to find out over the years I've lived here. Once again, I reiterate that as an adult I have received the full covid vaccine and a booster, so I am not an anti-vaxer. However, I will not allow or support the government or the board to tell us as parents that our children have to take the Covid Vaccine in its current status in order to earn an education. Please meditate on this and be the leaders you are purposed to be.

Thank you, Matt Hanusa - Auburn, WA 913 209 2502

Subject: Child Vaccine mandate

External Email

To the Washington State Board of Health.

The idea to impose a mandate for Covid vaccines on children is wrong. The likelihood of them having symptoms more serious than the flu or common cold are very low. The likelihood of them developing problems with the vaccine are too unknown for parents to feel safe putting that vaccine in their bodies. It does NOT make sense! As a parent of two young children I would pull my child from the school systems before taking that risk. Imposing this vaccine on them will have far more consequences than benefits for EVERYONE including the public school system. Our country is so divided and there is no trust left, imposing this vaccine mandate will tear that even more open than it is.

Sincerely,
A protective mother.

Subject: Appalled in Kitsap

External Email

Good afternoon, Public Servants of WS Board of Health:

My wife and I are lifelong residents of Washington State.

I understand that legislation/direction will shortly be considered which gravely infringes on the rights of myself, my family, and frankly all residents of Washington State (not to mention Federal law/precedence).

For an innocent law-abiding citizen to be unlawfully detained based on his/her PERSONAL health decision is objectively absurd.

Based on the facts we now know, it is also ridiculous to make a cov*d -19 vaccine a condition of education.

As citizens of the United States, we are guaranteed the right to "life, LIBERTY, and the pursuit of happiness" (think the American dream).

Our State (and the state our kids are growing up in) is unpleasantly different than the place we grew up in. Good citizens are leaving our State- my own brother included- citizens who rightfully don't stand for recent discriminatory policy ("mandates", etc.) adopted by the current State administration.

Please don't contribute to the adoption of unethical, discriminatory, and illegal health policy in my/our/your state.

Thank you.

Subject: Agenda Concerns

External Email

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,
Kirra White

Subject: Anti-Mandate

External Email

Good Morning,

I am not "anti-Vax", as both my husband and I have been fully vaccinated however I do not support a mandate for all school age kids to be required to be vaccinated for a number of reasons.

1. COVID vaccines are still under EUA. Vaccinations should be a decision between patient and doctor and not a requirement of the schools. I understand that other vaccines are required, however they are all FDA approved while COVID vaccines are not approved by the FDA.

2. COVID in children is generally mild and therefore the risk of COVID related infection does not necessitate requiring children to be vaccinated and expose them to the risks of the vaccine. My kids have all had COVID and all of them responded well and thankfully had a very minor case.

3. At a minimum natural immunity should be allowed as an alternative to vaccination. This is only common sense. There are a huge number of studies that demonstrate natural immunity is better than the vaccine and especially against Delta and Omicron. Here is one study out of Israel that demonstrates that natural immunity is vastly superior to vaccination

(<https://www.medrxiv.org/content/10.1101/2021.08.24.21262415v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

)

4. There are risks of cardiac adverse events in kids post vaccination which are well known and documented. Are schools really willing to take on the responsibility of long-term effects on a child if they develop any of these ailments as a result of being vaccinated? (<https://www.medrxiv.org/content/10.1101/2021.08.30.21262866v1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F>

)

5. This same study indicates kids are 4-6 times more likely to develop myocarditis than end up in the hospital for any reason associated with COVID. Think about that for a second - 4-6x risk of a terrible heart disease versus being admitted to the hospital due to COVID. Again, do the school/state want to be responsible for these adverse effects on a child with a vaccine that is not fully FDA approved?

The bottom line is that requiring vaccination is trying to solve a problem that barely exists and exposes children to potential health challenges as a result of the vaccine. Parents and doctors should be allowed to make risk reward decisions for their children and schools are not a significant at risk environment for COVID 19 related illness.

Thank you for your time and consideration.

Subject: Childhood vaccine schedule and other WAC codes

attachments\97F7F5D81400491A_image.png

External Email

Hello WA State Board of Health,

I am writing to you today because I am sincerely concerned you are considering adding the covid 19 vaccine to the childhood immunization schedule. I cannot fathom adults willing to sacrifice children for the sake of the elderly. That is entirely unnatural in the whole of the animal world. Children are not at risk for serious disease and requiring them to take the risk of this experimental shot which does not prevent disease or stop transmission is UNCONSIONABLE!

When my husband and I had Covid, it was rough but we treated it and recovered. Our children were with us the entire time and never had a single cough, sniffle or anything. This has been the same story I have heard over and over from everyone I speak with. Children have such a dramatically low impact from covid that it is 100% clear that the vaccine risks of adverse events and unknown long term side effects present a FAR GREATER DANGER!

If you are interested in finding resources that will be helpful to you, please check out this website - <https://unityprojectonline.com/>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Funityprojectonline.com%2F&data=who's goal is to bring people together to protect children from covid 19 mandatory vaccination](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Funityprojectonline.com%2F&data=who's%20goal%20is%20to%20bring%20people%20together%20to%20protect%20children%20from%20covid%2019%20mandatory%20vaccination)

And check out this article representing 13,000 physicians and scientists concerned about covid policies. <https://flccc.substack.com/p/flccc-joins-13000-concerned-physicians>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fflccc.substack.com%2Fp%2Fflccc-joins-13000-concerned-physicians&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C252c15b40b4c472a9eae08d9d1fe39e0%7C11>

We all know that any parent who wants the vaccine for their children has more than enough options to get it, but putting it on the childhood schedule in any form for attendance to school is nothing but coercion.

I pray that you all take this off the table because it will do nothing for public health and only put children at risk.

Thank you for your attention!

Sincerely,

Laura Dentone

Dear WSBOH,
Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus

The Covid virus is changing and as we have seen quite frequently many vaccinated folks are still getting the virus and can be carriers. The answer does not lie in mandating vaccines.....it behooves everyone to focus on illness prevention and education rather than more vaccines.

Sincerely
Julianne Mai

Subject: Agenda January 12, 2022

External Email

Good morning,

I am a resident of Pierce County. I am writing in today to oppose these outrageous proposals. Specifically WAC 246-100, 246-100-040, 246-100-045, 246-100-070, 246-105.

I know from reading these proposals it does not specify coronavirus nor does it specify the experimental coronavirus shot. However, they do state that the forced quarantine and/or forced vaccination for specified communicable diseases including but not limited too... which obviously leaves it open ended. This virus has proven over the past two years that there is no stopping it. Locking up your residents won't change that.. look at Australia... has had the strictest lockdowns.. high vaccination rates....even has these quarantine camps you're proposing... And yet... covid is still running wild.

This shot was created based of the original strain of the virus, which is essentially extinct at this point.. it is proving over and over to not prevent the spread of the virus... why is this continuing to be pushed!!?

Especially on to children! Children have been, since the beginning of this "pandemic" at lowest risk for severe illness.. we have no idea the long term effects this experiment has on full grown adults.. we do however know for a fact that it is causing heart complications and more issues in previously healthy adults.. so again, why would we mandate this for our completely healthy children? Forcing parents to enroll their children into a medical experiment just to attend school or child care is absolutely disgusting and goes against the Nuremberg Code.

Coercion is NOT consent.

This is America.. a free country.. let's try and keep it that way!

Thank you for your time,
Macie Pendley

Subject: Attention Board- Related to 1/12 meeting

External Email

7 January, 2022

To all board members,

I am writing this email pleading you to reconsider some upcoming actions that are being explored by this group. I am a resident of Washington State, and I feel obligated to express my concerns about the upcoming DOH discussions regarding COVID-19 policy and proposed policy changes to WAC 246-100, specifically sections 070, 045 and 040 on January 12, 2022.

As research indicates, the virus continues to mutate and lessen in virulence, as viruses do. Therefore, I want to caution the members of the board and urge you NOT to make any "permanent" changes to the current infectious disease WAC codes. I also urge you to consider closely the amount of conflicting data on the effectiveness of the shots and adverse reactions that are being reported.

At this point in the pandemic, I believe it is time to look for ways to rebuild the confidence in the great people of Washington. Washingtonians have proven their commitment, steadfastness and willingness to be cautious and helpful over the past 2 years. It is extremely important, now than ever before, for the people of Washington State to begin their return to "normal". Continued mandates, threats of quarantine camps and forced vaccinations are NOT what Washingtonians want or need. It would be more effective to give priority to the study and the use of effective treatment methods available; and to look for ways to fund healthy living programs FOR our State by emphasizing exercise, healthy eating, appropriate vitamin D levels, better sleep and stress management.

I ask that you do NOT make policy changes to the WAC in regards/response to Covid and I do NOT support any efforts to make any changes. I DO believe that you will consider this request, keeping in mind the rights of citizens under the First Amendment to choose for themselves what they feel is best for themselves and their families.

Thank you for your time and consideration,

Loretta Rose

To State Board of Health,

As a parent, teacher, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Kristy Miller

Subject: Chapter 246-100 WAC Public Meeting - Comment of Dissent

External Email

-
-

Dear Washington State Board of Health and Staff,

My Name is Nicole Burbank. I attended western Washington university where I got my degree in Sociology. I've lived in Washington all my life. I was born and raised in Bellingham. I currently live in the Seattle area where I moved about a year ago to accept a new job position after graduating. I love this state and the people in it and want to continue to live here feeling like I have the opportunity to be able to do what's best for me and my family one day.

I am writing to you regarding the upcoming public meeting, scheduled for January 12, 2022 to discuss including COVID-19 vaccination as part of school immunization requirements.

This policy consideration is against reason. It is a violation of individual liberty. It will disproportionately target Hispanic, Black, and Multiracial communities and is therefore an affront to justice. I am writing to you to encourage you to take just and reasonable action in rejecting this policy.

None of the currently available COVID vaccines prevent infection or transmission of COVID-19. This statement alone makes mandating of vaccines one-sided and impractical. Studies have shown children ages 0-19 infected with COVID have a 99% survival rate and neither children nor school have been shown to be sources of high viral spread. The FDA advisory panel members openly admit to not having data necessary to make statements regarding long-term risks to children. Are you willing to risk children's lives based on zero data that could cause them detrimental harm? If so, you must hold everyone on the school board accountable for any reaction that can occur. Parents that would like to get their children vaccinated have the freedom and ability to do so.

As for teachers, there are also studies showing that unvaccinated 18-30 year olds have the same low risk of covid-19 symptoms as 50 year olds with vaccination. There should be zero requirements of vaccination in schools for all persons.

Furthermore, data from the Washington State Department of Health (DOH), released in 2021, shows that vaccination rates are lowest among Hispanic, Black, and Multiracial people when compared to those groups' proportion of the state population.

Denying minority communities the right to public education, on the grounds of exercising their bodily autonomy, is unjust.

The Fourth Amendment of the US Constitution protects our bodily autonomy by stating "the right of the people to be secure in their persons". Our constitution does not grant us rights, rather it acknowledges and secures the rights innate in personhood. Bodily autonomy, the inviolability of the human body, self-ownership, is innate human right, meaning born that way, not given by state officials or members of a board.

Forced vaccination or vaccination under duress (the denial of access to a free education) violates the innate freedom of families in Washington to make their own decisions regarding their bodies and health. You must consider the basic, but important idea that it is not good to compel people to violate their convictions.

I am not requesting this Board give children bodily autonomy nor am I asking for the freedom to choose what medical treatment they receive.

I am demanding you respect the freedom I innately possess as a human being and an American. I urge you to make a policy that reflects reality and acknowledges the humanity of children in Washington state.

Reject totally the inclusion of COVID-19 vaccination in school immunization requirements.

Sincerely,
Nicole Burbank

Subject: Children's Vaccine

External Email

Dear Washington State Board of Health,

I urge you to vote NO to any COVID vaccine mandate for our children, and adults alike in our state. Our children are being pulled from public schools at the highest rate ever due to the current COVID requirements and restrictions. A mandate or law requiring all children to be vaccinated to attend schools/daycares will not only create an even higher rate, but also an additional economic disaster in homes of all our Washington State citizens.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccines adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

Cheers,
Jenn Edelbrock

The WSBOH is about to meet to consider (a) requiring experimental Covid-19 vaccinations for school age children and (b) to extend the power of WA state to determine what treatments (experimental vaccines) citizens should receive to prevent or treat Covid-19. As a WA state citizens, I find either course of action to be not only unconstitutional (and thus illegal) but morally repugnant.

Attached is a copy of the Nuremberg Code (1947), which addresses the morality of forcing people of any age to participate in experiments against their will. Below is a bare-bones version:

Nuremberg Code - Bare Bones

1. Voluntary consent is ESSENTIAL.
2. Results must be "unprocurable" by other means.
3. Study design must make scientific sense.
4. There can be no unnecessary physical & medical suffering.
5. Studies are cause death or disabling injury are not permitted.
6. The risks must NEVER exceed the benefits.
7. Participants must be protected again even the REMOTE possibility of harm.
8. The study must be conducted by qualified people.
9. Participants must have the power to withdraw from the study at any stage.
10. The scientist in charge must terminate any study that causes harm.

The measures you are considering are in clear violation of this Code -- a code that was intended to prevent re-enacting the horrible experiments conducted on prisoners of the Nazi Reich. Is this really something you wish to do?

Subject: Childhood Covid-19 Vaccine Mandates

External Email

Dear Washington State Board of Health Member,

I am writing as a concerned citizen and a parent of school-age children to ask you to consider soberly and conscientiously the known facts about Covid-19 vaccination for young people and say NO to Covid vaccine mandates for kids in Washington State.

Consider the following well- established realities (some sources included below):

1. Children are at the lowest risk of severe outcomes from Covid-19 of any age group, with risk factors a thousandfold lower than those in the oldest age groups. Nearly every child with a severe or fatal outcome from Covid has had correspondingly severe preexisting health issues. Parents of these children are likely to keep them at home for the duration of the pandemic, vaccine mandates or not.

2. Covid-19 vaccines DO NOT stop the spread of Covid-19. Breakthrough cases are exceedingly common and increasingly so as the omicron variant expands through our country. Vaccine mandates will NOT effectively stop in-school spread; thus, they serve no public health purpose. At this point, vaccines seem at best to decrease the risk of a severe case of Covid-19; but children are the group in LEAST need of this decrease (see above), and even if they were to benefit from them, weighing and choosing such benefit against the risks should be entirely between the child, the parents, and the physician. It is emphatically not the government's appropriate role to intervene in a person's private medical decisions, especially when those decisions do not have an appreciable impact on public health.

3. Children, particularly young and teenage boys, are the age group MOST at risk of severe injury from Covid-19 vaccines, including myocarditis and pericarditis. If you

mandate vaccines for school-age children in Washington State, children will be severely injured who did not need to be. Children will die who should not have died. For no appreciable impact on public health.

Just given these facts, Covid-19 mandates for school-age children would be a travesty and an abdication of your responsibility as public health authorities, as well as an affront to the Hippocratic Oath that underlies the practice of medicine. However, I also invite you to consider the following:

4) Washington State children have undergone an extreme and prolonged disruption of their education over the last two years. As a parent and a friend of many parents, I have a front-row seat to witness the increases in depression, despair, hopelessness, and educational damage that has been inflicted upon them. Requiring vaccination for school attendance WILL result in more disruption, especially for the lowest-income families in our state, who tend both to be the most vaccine-hesitant and to have the fewest resources to educate their children outside of the school system.

In addition, you would have a mass exodus of students from the school systems into private schools, or, if that's not possible, effective homeschooling. Parents outside of Seattle and Olympia are NOT comfortable with injecting their children with a still-experimental medication, without any long-term safety information, for a disease that poses an overall low risk to them. That is why vaccine uptake among the youngest age groups has fallen so far short of expectations. If you think the school system is hurting now, imagine when all those parents have pulled their children out.

Covid-19 vaccine mandates for school-age children violate all available scientific evidence and common sense, overstep the bounds of appropriate government intervention, and would result in incredible harm done to families and schools. I urge you not to consider such a step and, if you have considered it, to reconsider.

Thank you,

Megan Minnick

To Whom it may concern,

I oppose mandatory Covid vaccines for students to attend school .This is not necessary as statistics show children are at an extremely low risk of getting Covid, and an even lower risk of becoming seriously ill.

There is LITTLE DATA showing that injecting children with the vaccine actually benefits them NOR is there ANY data on long term adverse effects that children might suffer. A mandate would only place all WA state students into an experimental trial without informed consent.

A mandate would exert greater state control over families and children's health to benefit some adults' peace of mind and give a false sense of security rather than truly looking out for innocent children's best interests. The policy would be a violation of parental rights and conscience. Parents should have the right to vaccinate or not with the injection. Parents know if their children are at risk, co-morbidity, and can make the appropriate decisions.

The risks of the many known side effects that are starting to become apparent when giving the vaccine to children far outweighs the possible benefits.

Please do not force children to be vaccinated without parental consent. Please OPPOSE Agenda Item 8.

Additionally, please SUPPORT Agenda Item 11 asking the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you,

My husband, my community, my CHILDREN say NO TO THE MANDATE FOR SCHOOL AGE CHILDREN TO GET THE COVID VACCINE! "My body my choice!" Where are the leftist "Karen's" getting their way on THAT cry? Oh, it only works on murdering innocent unborn children? How about the children that are alive and living? MY BODY MY CHOICE! The government is grossly abusing their "power" on a 99.89% survival rate FLU! STOP this now! We WILL pull our children from public school, we demand EQUAL rights for all! Black Lives Matter? What about OUR lives matter?!! STOP THE MANDATE NOW! What happened to natural immunity?! We have it! A year later our blood tests STILL state that we have what your disgusting "vaccine" is claiming to do: we have the antibodies! This is all disgusting beyond belief! Listen to us and hear our cries! Enough is enough! Put your foot down now! Government, back the OFF of our children! WE WILL NOT COMPLY!

An outraged parent of 3 innocent children who will not be receiving the "vaccine." EVER.

Subject: Call to Vaccinate

External Email

Mr. Seigel,

To recommend parents have their children receive a vaccine for a virus that does not affect them (or minimally) and that has irreversible damages, is criminal. The vaccine, once injected, causes the child's body to make toxic spike proteins. These proteins are what causes permanent damage to their brain (lesions), nervous system, heart (myocarditis and scarring), blood vessels (blood clots), reproductive systems and changes their immune system (genetical reset). This vaccine has not been adequately tested - it requires at least 5 years of testing/research to affirm that it does not cause further harm and risks. Our children represent zero danger to adults. If teachers and school staff are in fear of their health, they, as adults, have options to wear masks and receive a vaccine themselves. Why subject our children to irreparable danger when there are measures THEY can take to protect themselves? Our children's NATURAL immunity is critical to save future generations.

I have lived in WA state my whole life. I was a student of the Bethel School District K-12. My daughter was a student of the school district for Kindergarten and 1st grade. Effective this year (2nd Grade), I pulled her and committed my family to homeschooling in fear of the power pulls this district was leaning towards. Your recent email confirms AGAIN that my family made the right choice. I feel for the parents who do not have this option and are at this districts mercy. I hope parents completely disregard your email and respond in similar fashion. What you're asking of parents is unforgivable, knowing the risks of what this vaccine could do to our future generations.

Subject: Agenda item # 9 & 11

External Email

To State Board of Health,

As a parent and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Jill Luke

Subject: Re: Board meeting regarding child vaccination requirements

External Email

Please excuse earlier spelling/grammar mistakes. I sent accidentally before proofing. Please consider updated version!

Hi all,

As a mother of a school age child I urge you to not force children to get this vaccine in order to attend school. I am in no way anti vaccination, my child is fully vaccinated with proven vaccinations that rid the viruses all together.

Every person that I know personally who has gotten the covid vaccine has gotten covid. My family, who has been exposed and took proper precautions all have tested negative on multiple occasions. We have yet to get covid after being exposed. While vaccinated friends and family have all tested positive at one point or another.

I personally do not know a single vaccinated person who has not gotten covid. And even our unvaccinated friends who have gotten covid described it as a typical cold.

I do know that covid negativity impacts some individuals, some even pass away or suffer life long effects, the same goes for the flu. The people who suffer the worst tend to have underlying conditions or their age group is higher risk, normally these people choose to get vaccinated. The key word is choose. The flu vaccine is not a requirement, it is a suggestion, the covid vaccine is a similar type of vaccine, therefore I do not see why it should be mandatory.

When I vaccinate my children, I look at the benefits, no polio, no chicken pox, no hepatitis, these vaccines do not lessen the symptoms of these viruses, they eliminate the possibility of even contracting the viruses.

Why would I give my child a vaccination that makes them feel sick and gross for days (some suffer weeks) when they can still contract covid and be sick again? Especially when the symptoms of covid are mild and no worse than a flu for most.

As a family who is generally healthy and again have been exposed and have yet to contract it, we have chosen not to get vaccinated since we are using the same logic as we have used for the flu vaccine for many years.

My child loves school, she excels, is motivated, gets great grades, has lots of friends, and is challenged and growing in so many ways. Please do not take this away from her by making the vaccination mandatory for children to go to school. Should the vaccine become a requirement we will be moving to a homeschooling situation, and it will strengthen our urge to move out of state. We love Washington but are very upset with the Tyranny that has been taking place.

Thanks for your consideration,

Jamisyn

Board,

The proposed policies, WAC 246-100-070, 246-100-040, and 246-100-045, are appalling and we reject them with prejudice.

The fact that these policies are even up for debate are disgusting and reveal the level of monstrosity you and others proposing such policies are capable of. You disgust me.

Your thirst for power and lack of humanity is appalling. Your appeal to police power to enact your rule shows a combination of stupidity and ignorance. You either do not know the immoral line you are crossing and the harm you are creating (ignorance) or you display a lack of understanding of how the creation of such power usually turns out for those that create it.

You may not fear a higher power, but you should fear the outcome of these policies as they create not what you think.

Stop this, now.

Subject: C-19 vaccine requirement

External Email

To whom it may concern,

I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their child's health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my young daughters and will pull them from public school if this mandate is implemented.

Thank you for your consideration

Subject: Board Meeting re Immunization Criteria for Children of Washington State

External Email

Dear members of the Washington State Board of Health,

We are writing to ensure that COVID vaccinations/shots are NOT made mandatory for children to attend public schools in Washington State. We are opposed to many of the COVID rules and restrictions that have been imposed upon us since this pandemic began, but forcing our children to receive any COVID vaccine in order to attend school is against our parental rights.

Our names are Erik and Kristi. We were both born and raised in Washington State, and are raising our four children here. We both earned bachelor degrees at Washington universities, and I continued my education at the University of Washington where I earned my professional doctorate degree.

Our four young children attend public school in Snohomish County. The safety, well-being and health of our children is of paramount importance, and as parents, we have the right and responsibility to make healthcare decisions for our children. The government and other state agencies should NOT force parents to vaccinate their children. The Washington State Board of Health should provide guidance and advice, but do not intervene and take away our parental rights by mandating the COVID vaccine for our children. This mandate would be discriminatory against those who do not vaccinate their children; this act of discrimination would target the unvaccinated children who will suffer the consequences.

If public schools mandate the COVID vaccine, we will unfortunately remove our four children from the public school system completely.

Thank you,

Erik and Kristi

Subject: Chapter 246-100 WAC Public Meeting Comment of Dissent

External Email

Dear Washington State Board of Health and Staff,

I am writing to you today as a concerned citizen that lives, works and recreates in the North Mason and Kitsap county area. It has been brought to my attention that there will be a vote on January 13, 2022 to implement changes to WAC's to include COVID-19 in the policies. The WAC's in question include the following:: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 .

Speaking as an elementary educator for the past 24 years, I find it morally reprehensible that anyone would mandate a vaccine that is free, readily available, and honestly controversial, be included in the WAC's. Mandates are losing in courts, they are discriminatory and do not represent the values of Washington State. Let's encourage vaccination for the immunocompromised, elderly, and those with comorbidities, rather than forcing unconstitutional mandates, creating policy change that is against reason, and a violation of individual liberty. Do you want to contribute to the division of our beautiful communities, one against another, creating suspicion of our local and state level leaders, and unjustly discriminating against those who have a moral, ethical, or other reason (such as natural immunity) for rejecting a vaccine? One that does not prevent infection or transmission of COVID-19?

For this reason I am asking you to soundly reject any policy changes to include COVID-19. My sincerest hope for the Washington State Board of Health is to respect the citizens of the great state of Washington by voting no. A NO vote is a vote for personal liberty and preserving unity.

Respectfully,
Nancy Kauahi

Subject: Re: aplying current infectious disease WAC codes to include Covid-19.

External Email

To whom it may concern:

I am addressing my concerns over applying Covid-19 to our Washington State current infectious disease WAC Codes.

Washingtonians have been living under the Covid-19 mandates for approximately 2 years.

We have either had the vaccine or have had Covid itself. I am not in dispute of those who have the vaccine; however, those of us who have already had Covid 19 have natural immunity. I do not support the overall blanket vaccine for everyone. I do not support your attempt to remove our rights to decide what is best for our bodies and our children. I do not support the vaccine for children, who have little or no risk, over parental objections.

I do not take my responsibilities lightly; I have the freedom to research and make informed decisions.

There is a matter also of religious freedom which has factored into many peoples' decisions to refuse the vaccine.

In the United States Constitution it states:

ARTICLES IN ADDITION TO, AND AMENDMENT OF, THE CONSTITUTION OF THE UNITED STATES OF AMERICA, PROPOSED BY CONGRESS, AND RATIFIED BY THE LEGISLATURES OF THE SEVERAL STATES, PURSUANT TO THE FIFTH ARTICLE OF THE ORIGINAL CONSTITUTION 12 ARTICLE [I.]

13 Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; of the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

We must as a people respect the rights of our citizens.

These are God given inalienable rights. Do not disregard them for power and control. We are not a monarchy or oligarchy but a country that has sacrificed many of our family for the freedoms we enjoy. Do not make a mockery of this dear cost.

Sincerely,

Marylynn Eltrich

To All concerned with freedom liberty and the constitution.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early, by using remedies that are safe, effective and inexpensive. Moreover, it is survivable by more than 90% of the population. These Covid mRNA gene-altering vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots indefinitely!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. The current BioNTech by Pfizer is NOT the item that was granted an approval. Comirnaty was approved, but it is NOT being used now and wont be until 2023.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Using threats, intimidation and bullying to FORCE someone to "voluntarily" receive a drug or procedure is unconstitutional and violated the Civil Rights acts of 1964 and Title VII. Any state governor cannot supersede the US Constitution and make up overreaching rules that have no scientific or ethical basis. The governor is acting on ill-advised influences that are unfair, unscientific, and illegal. No one can mandate a drug while during an Emergency Use Authorization when last ditch emergency drugs are being pushed. Any EUA drug MUST be voluntarily accept or refused by free-will and that only after full information of side effects and dangers as outlined in the FDA slide page 16 from Oct 22, 2020.

*

Hi,

We are writing to ensure that COVID vaccinations/shots are NOT made mandatory for children to attend school in Washington State.

Our names are Erik and Kristi and we were both born and raised in Washington State, and are raising our family here. We both earned bachelor degrees at Washington universities, and I continued my education at to the Unibersity of Washington to earn my professional doctorate degree.

We have four young children who attend public school in Snohomish County. As parents, the safety,well-being and health of our children is of paramount importance. is our The children's welfare must be seen as paramount. it is our Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Subject: Child vaccination -

External Email

Hello, I am voicing my concerns over the child vaccine mandate in the state of WA. I can think of so many reasons this is not right. According to statistics, there is not even a 1% chance of a child dying from Covid. I do not know any child that's even come down with symptoms, besides that of a common cold. I support anyone who chooses to get their own child vaccinated, but this medical procedure should be a right for the parents to choose and the child. Not the state or the government. Children are the LEAST among those who pose threat to society. In fact, they are more likely to get sick and die of the flu- and that's not mandated or forced. We have a constitutional right to choose for ourselves what medical procedures we do.

Please take this under consideration, as a very concerned parent over her children's medical health and future impact.

Thanks so much,
Jennifer

I am against mandating Covid vaccinations for children. First, children are at extremely low risk of catching Covid. Second, parents should make health decisions for their children. Third, Covid vaccinations are still under the Emergency Use Authorization and should be used with due caution.

Sincerely,
Judith Termin

Subject: Applying current infectious disease WAC 246-100 to COVID

External Email

Hello to all of you.

I would like to express my grave concern regarding the WA State Board of Health's consideration of extending WAC 246-100-070/WAC 246-100-045 to apply to COVID-19. I strongly believe it is inappropriate and morally wrong to allow involuntary detention and isolation of people in a quarantine facility for refusing COVID related examination, testing, and/or vaccination.

There are many valid medical, moral, and religious reasons why individuals should not be forced by law enforcement to submit to COVID related examination, testing, and/or vaccination. Ongoing side effects/deaths related to vaccinations are real and are documented on the CDC's own website here: <https://vaers.hhs.gov/data/datasets.html> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Fdata%2Fdataset>>. It is also well documented that even fully vaccinated individuals can contract COVID, can pass it along to others, and can be hospitalized and die. It is incorrect to say that vaccinating everyone will result in COVID going away. There are also many other states in the US that have many fewer restrictions around COVID and those areas are not seeing crisis level COVID cases. There is no need for such drastic measures like this to be enacted in WA State.

I am aware that multiple different quarantine facilities have already been constructed and staffed in WA, and this is not just a theoretical exercise. This is a very serious issue!

I strongly urge you to not enact policies that go against our fundamental rights as American citizens. Please look at the example of Australia and their forced isolation policies, the damage to those citizen's rights, and the violence their law enforcement personnel have been forced to inflict on their citizens.

Thank you.

I am vaccinated and am against a forced vaccination on kids currently.

1. Kids will be fine if they do get it
2. The vaccine has been out and ready forv people who want it to get it. If older or at risk people don't get it, it's their fault
3. I do believe more people will get it in the years to come but forcing it is going to make alot more people to not be for it.
4. Teachers are vaccinated for the most part and may get sick but not have any serious issues.

Thank you

I am completely AGAINST any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-45, WAC 246-100-040, WAC 246-100, WAC 246-105.

We the people will NOT allow our medical freedom to be stripped away from us.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

I am protesting the actions being taken regarding vaccination requirements for school-aged children. I am deeply opposed to this mandate or question of this mandate for all children. I will not go into huge detail here, and agree with the comments that will be submitted by Informed Choice of WA. But in summary, all shots are EUA ONLY.

Comirnaty is the only COVID-19 product that has ostensibly received FDA licensure for any pediatric populations—namely those 16 and up; however, that licensure is limited to manufacturing and delivery. The FDA has stated that this product is merely “ready for approval for use in individuals 16 years of age and older . . . ” [emphasis added]. August 23, 2021 Approval Letter - Comirnaty, from FDA to BioNTech, p. 4,

<https://www.fda.gov/media/151710/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710/download>>

Let me emphasize, the Comirnaty vaccine is not available anywhere in the United States, and there is debate about whether the vials of Pfizer’s EUA product are now “licensed” for those 16 and up, or if those are still EUA products. The FDA states that EUA Pfizer-BioNTech COVID-19 Vaccine and the Comirnaty (COVID-19 Vaccine, mRNA) “are legally distinct with certain differences that do not impact safety or effectiveness.” There is much debate over what “legally distinct” means, especially to consumers. If “legally distinct” means that the currently available Pfizer products in the U.S. are under EUA regulations, then there is no licensed product available for 16-18 year olds. Regardless of whether the Pfizer’s product is licensed for 16-18 year olds, the product lacks completed Phase 3 clinical trials, and the PREP Act still shields manufacturers for liability for injuries and deaths. As far as we can tell, never in history has the FDA licensed a product without completed clinical trials, nor when all the ongoing trials have been unblinded, subverting the ability to compare outcomes.

The federal code regarding emergency use authorization is clear and has longstanding history on how it came to be in place, all citizens should have informed consent and that means they have the right to refuse any EUA product including these shots.

Whereas: 1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states “the voluntary consent of the human subject is absolutely essential.” 2. All of the treatments being marketed as COVID-19 vaccines are still in Phase III clinical trials until 2023 to 2024 and hence qualify as medical experiments. People taking these treatments are enrolled in clinical trials; 3. None of these treatments has been approved, but only granted emergency use authorization, hence cannot be mandated nor can informed consent be dispensed with; 4. Most vaccines are trialed for at least 5-10 years

and COVID-19 vaccines have been in trials for less than one year; 5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models; 6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death; 7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials; 8. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than deaths in the last 10 years from all vaccines combined; 9. Only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID vaccines is unknown as there is a significant delay in uploading reports to the VAERS database; 10. Breakthrough cases of COVID-19 infections in those who have received COVID-19 vaccines is on the rise; 11. The trials have not proven that COVID-19 vaccines prevent infection or transmission; 12. Safe and effective treatments and preventive measures exist for COVID-19; AND 1. Students are at nearly zero % risk of contracting or transmitting this respiratory illness and are instead buffers which help others build their immune system. The overall survival rate is 99.997% . 2. Children have already been exposed to unprecedented amounts of fear, instability, shaming, psychological trauma, and segregation through the COVID-19 measures and are therefore even more suggestible than their developmental stage would usually entail; 3. It is the job of parents or legal guardians, not of principals, teachers, teacher assistants, school board executives or other adults with influence on children, to make medical decisions for them; 4. Schools include vaccine and COVID-19 vaccine curriculum, which is biased, prejudicial and is a form of undue influence on any minor child which excludes full disclosure of the known risks of vaccination and the emerging evidence that vaccines do not provide protection as claimed; 5. Vaccine compliance elicited from children under threat of coercion, bullying, or suspension and who are not of fully informed consent that they have the legal right to refuse vaccination, constitutes extreme bullying and coercion and could be construed as a "battery" as well as a violation of constitutionally protected rights. 6. Contrary to misinformation spread by the World Health Organization, "implied consent" is not "informed consent," and "informed consent" is mandatory by law; 7. The Mature Minor doctrine cannot override the wishes and consent of the parents outside of preventing imminent harm or death. Vaccinations do not fall under the Mature Minor doctrine. 8. The engagement of medical experimentation without informed consent further constitutes the indictable offense of crimes against humanity. The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary. Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law. Any use of "implied consent" by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence. Any party found to be involved in vaccination coercion when entrusted with the care of our children could be prosecuted to full extent of law.

Can you show that this is incorrect, the death rate among children? This is coming from the CDC's own data. The Washington Department of Health data supports the risk is very, very low. The risk of drowning or dying from influenza is greater than Covid for children. You can't reference the data and prove otherwise.

Furthermore, I am strongly opposed to any action towards having any type of quarantine camp.

There are many early treatments available to the public, if only our healthcare professionals would be encouraged to start prescribing. For all other illnesses including influenza early treatment is key. It is for Covid too, but our healthcare are not considering this and are in fact flying against this at all levels. There is evidence not just anecdotal that early treatments/therapeutics work.

Thank you,
Nikki Moser

Subject: Chapter 246-100 WAC Public Meeting Comment of Dissent

External Email

Dear Washington State Board of Health and Staff,

I am writing to you today as a concerned citizen that lives, works and recreates in the North Mason and Kitsap county area. It has been brought to my attention that there will be a vote on January 13, 2022 to implement changes to WAC's to include COVID-19 in the policies. The WAC's in question include the following:: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 .

Speaking as an elementary educator for the past 24 years, I find it morally reprehensible that anyone would mandate a vaccine that is free, readily available, and honestly controversial, be included in the WAC's. Mandates are losing in courts, they are discriminatory and do not represent the values of Washington State. Let's encourage vaccination for the immunocompromised, elderly, and those with comorbidities, rather than forcing unconstitutional mandates, creating policy change that is against reason, and a violation of individual liberty. Do you want to contribute to the division of our beautiful communities, one against another, creating suspicion of our local and state level leaders, and unjustly discriminating against those who have a moral, ethical, or other reason (such as natural immunity) for rejecting a vaccine? One that does not prevent infection or transmission of COVID-19?

For this reason I am asking you to soundly reject any policy changes to include COVID-19. My sincerest hope for the Washington State Board of Health is to respect the citizens of the great state of Washington by voting no. A NO vote is a vote for personal liberty and preserving unity.

Respectfully,
Nancy Kauahi

Subject: Child Covid vaccines, wac rules for detention centers.

External Email

Dear Sirs and Madams,

I hate to write this letter. I had hoped that more people would be standing up for our children. First it was 15 days, then masks. Now we want to "vaccinate our children", with a vaccine that has been spotty at best.

First off there is not enough evidence period that this vaccine does not have adverse side effects long term for our children.

Two parents have no way to seek compensation with anyone when there child has an adverse effect, whatever the problem is. This is a very poor decision for everyone and could have some very adverse problems for families.

Three - I though the point of a vaccine was to prevent a disease, from most of the reports I've seen of late and from everyone I personally know that have been vaccinated they have also now had the disease. So how come these vaccines are not working?

Shouldn't we be doing more research before we agree to give our children these vaccines??. Among all of the reports I've seen of late Dr.Malone that invented the mRNA vaccines is even saying we need to stop and do more research.

In the end why can't we leave it up to parents to make the choice of whether they want their child vaccinated. This has worked well for all the rest of the vaccines and we have had way more people vaccinated for diseases like polio,ect..

I've also heard a rumor that the health dept. now want to pass a wac allowing local police to detain people, families in centers if we refuse the vaccine. How is this lawful? We live in a country with a check and balances for a reason.. By instating this wac you are going against Nuremberg code. You have also not gone through congress, with a majority vote, nor has it been adopted by our state. This is ludicrous , it reminds me all to well of Ww2, and Natzi's. How painful it is to watch history come full circle.

Please do us all a favor and do not make these requirements for our children and families. It is simply not in anyones best interest.

Best Regards,

Bruce and Kellie Henning

Subject: Board meeting regarding child vaccination requirements

External Email

Hi all,

As a mother of a child age child I urge you to not force children to get this vaccine in order to attend school. I am in no way anti vaccination, my child is fully vaccinated with proven vaccinations that rid the viruses all together.

Every person that I know personally who has gotten the covid vaccination has gotten covid. My family, who has been exposed and took proper precautions all tested negative on multiple occasions. We have vet to get covid when while being exposed. While vaccinated friends and family have all tested positive at one point or another.

I personally do not know a single vaccinated person who has not gotten covid. And even our unvaccinated friends who have gotten covid described it as a cold.

I do know that covid negativity impacts some individuals, some even pass away or suffer life long effects, as does the flu. These people tend to have underlying conditions or their age group is higher risk, normally these people choose to get vaccinated. The key word is choose. The flu vaccine is not a requirement, it is a suggestion, the covid vaccine is a similar type of vaccine , therefore I do not see why it should be mandatory.

When I vaccinate my children, I look at the benefits, no polio, no chicken pox, no hepatitis, these vaccines do not lessen the symptoms of these viruses, they eliminate the possibility of even contracting the viruses.

Why would I give my child a vaccination with a vaccine that makes them feel sick and gross for days (some suffer weeks) when they can still contract covid and be sick again? Especially when the symptoms of covid are mild and no worse than a flu for most.

As a family who is generally healthy and again have been exposed and have yet to contract it, we have chosen not to get vaccinated since we are using the same logic as we have used for the flu vaccine for many years.

My child loves school, she excels, is motivated, gets great grades, has lots of friends, and is challenged and growing in so many ways. Please do not take this away from her by making the vaccination mandatory for children to go to school. Should the vaccine become a requirement we will be moving to a homeschooling situation, and it will strengthen our urge to move out of state. We love Washington but are very upset with the Tyranny that has been taking place.

Thanks for your consideration,
Jamisyn

To all the board members

I am writing in regards to the implementation of the PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am pleading with you to not in act this for covid 19. I will up and move my family to a state that honors my choice of what I put in my body and my kids. The Shot is not a vaccine. It does not stop transmission and does not stop infection. Up until recently that was the definition of a vaccine. My husband works at stores keeping our food cold and frozen. He has done so for 2 years with out taking time off work even in the lockdown as he is essential. I left my job in childcare. So if you really want to make a difference why are you not having all of our schools with all the money they have been handed put in ventilation that will truly make the most impact? Our teachers did their best last year but failed our kids big time. I home schooled my son last year and this year when they did testing he was the highest in math of all the 6th graders in his school. He also was above average in English. So needless to say my kids and family will NOT be taken from our home and given a shot that does not stop infection or transmission.

Please add this to comment for this meeting as I did not see any other place to do so when registration was done.

Thank you respectfully

Melissa Fisher

Subject: Child Covid Vaccination Policy

External Email

I strongly oppose mandatory Covid vaccinations for children.

Children are at statistically zero risk for death or serious sickness due to Covid, and we know they're not a danger to adults.

These vaccines carry significant risks for them. Subjecting children to risky vaccines to make adults feel safer is criminally insane.

Adults are supposed to protect children, not endanger them.

Parents are the ones to make this decision, not the state.

Sincerely,
Monnie Matthews

I am absolutely against any mandate that takes away a parents right to choose whether their children should be vaccinated or not.... The government should not be taking away the medical freedom from any American. It is inexcusable for them to think they Should take it away from the parent! Forcing Vaccine mandates on our children , who are at the lowest risk of covid complications is absolutely unnecessary and risky. Children are proven to have a higher risk of severe adverse reactions from the Covid vaccine, Including heart conditions that can cause permanent and life threatening damage. Covid on the other hand poses little or no threat to children. These vaccines are for EMERGENCY USE ONLY! There is no emergency covid problem with our children.... if this becomes mandate, people will be pulling their children out of public schools In droves.

Sincerely opposed to vaccine mandates,
Nicole Blackburn

Subject: Children's risk

External Email

Hello, please consider the actual risk to a child of Covid compared with the potential risk of a vaccine that has not been utilized in the market for very long, relatively. I urge you to not require our school-age children to be vaccinated, as they are not old enough for informed consent to this risk. More and more parents are seen as partners and raising their children vs. the primary authority in their lives. We need leadership that will make wise decisions for these children. Please be at the leader and voice that these children need in this unusual environment. Thank you for your consideration.
Kelli De Vight

Subject: Chapter 246-100 WAC Public Meeting - Comment of Dissent

External Email

Dear Washington State Board of Health and Staff,

My name is Micaela Ngo. I've lived in Washington all my life. I attended the University of Washington in Seattle, where I met my husband, and have since settled in his hometown, Tacoma. Washington is my home. I love this state and the people in it.

I am writing to you regarding the upcoming public meeting, scheduled for January 12, 2022 to discuss including COVID-19 vaccination as part of school immunization requirements.

This policy consideration is against reason. It is a violation of individual liberty. It will disproportionately target Hispanic, Black, and Multiracial communities and is therefore an affront to justice. I am writing to you to encourage you to take just and reasonable action in rejecting this policy.

None of the currently available COVID vaccines prevent infection or transmission of COVID-19. Studies have shown children ages 0-19 infected with COVID have a 99% survival rate and neither children nor school have been shown to be sources of high viral spread. The FDA advisory panel members openly admit to not having data necessary to make statements regarding long-term risks to children. Parents that would like to get their children vaccinated have the freedom and ability to do so.

Furthermore, data from the Washington State Department of Health (DOH), released in 2021, shows that vaccination rates are lowest among Hispanic, Black, and Multiracial people when compared to those groups' proportion of the state population.

Denying minority communities the right to public education, on the grounds of exercising their bodily autonomy, is unjust.

The Fourth Amendment of the US Constitution protects our bodily autonomy by stating "the right of the people to be secure in their persons". Our constitution does not grant us rights, rather it acknowledges and secures the rights innate in personhood. Bodily autonomy, the inviolability of the human body, self-ownership, is innate human right, meaning born that way, not given by state officials or members of a board.

Forced vaccination or vaccination under duress (the denial of access to a free education) violates the innate freedom of families in Washington to make their own decisions regarding their bodies and health.

I am not requesting this Board give my children bodily autonomy nor am I asking for the freedom to choose what medical treatment they receive.

I am demanding you respect the freedom I innately possess as a human being and an American. I urge you to make a policy that reflects reality and acknowledges the humanity of children in Washington state.

Reject totally the inclusion of COVID-19 vaccination in school immunization requirements.

Thank you,

Micaela J. Ngo

1/7/2022-PERSONAL NOTE: I must add that thiE letter that follows, produced by the concerned citizens of the Longview Kelso area perfectly reflects my concerns and fears. I AM A 40 YEAR PUBLIC EDUCATOR, both here in WA and in CA. The damage done by ILL-APPLIED HEALTH POLICY in our state and communities is devastating for the adult population. We have spent nearly two years under "emergency orders" doled out by the governor at his pleasure, without representation. But, as an educator I have watched first-hand the IRREVERSABLE DAMAGE DONE TO OUR CHILDREN in the name of health and public safety. STOP THIS MADNESS! We are losing a whole generation of children who are not able to develop the skills both academic and social to become whole, functioning American citizens to whom we will pass this nation. The misapplication that is being discussed is not only unconstitutional regarding the Washington state constitution but also a direct threat to our First Amendment rights as delineated in the Constituion of the United States. STOP THE TYRANNY! WE ARE NOT AUSTRALIANS OR EUROPEANS, WE ARE DISTINCTLY AND UNIQUELY AMERICANS. DO NOT DIVIDE US ANY LONGER!

Jan M. Rush, SLP
148 Mountain Reign Road
Kalama 98625

Dear Board of Health Members,
Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19.

This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Jan M. Rush, SLP

I support the petition to change 246-105 WAC that would prohibit the Board of Health from adding any product to a mandated list unless it has successfully completed Phase III trials for proper licensure. Federal law prohibits mandating EUR use, unlicensed vaccines. The Nuremberg Code of 1947 upholds the ethical principle and the US Constitution guarantees our individual rights to personal integrity.

I oppose any mandated medical procedures. As for vaccines, none have been safety or efficacy tested. They do cause harm, even death. Our children should not be subject to such threats.

Subject: Child vaccinations

Hello.

I'd like to speak up for the children in this consideration of mandating covid vaccines. It is very clear that the risk for children being harmed by covid is extremely low, almost to the point of non existent. Conversely, the risk involved with the reactions of covid vaccines have been shown to be quite high and in many cases severe. I ask that you take note of this common concern and take action to eliminate all considerations to mandating covid vaccinations for our children. Thank you for your time to hear me and others who are reaching out to you to favorably take action regarding this request.

Sincerely
James Rolfe

It has been brought to my attention that there will be a meeting Friday 1/7 at noon regarding some very serious issues that as a parent of young, school aged children in WA state feel it's very important to let you know that I support the freedom of CHOICE. Growing up in medical families with many family members in the medical field, Medical care has always been front and center but these mandates are absolute lunacy and a grave risk to our children. One which I do not support and will not subject them to. I believe it is NOT the state, Board, or schools place to impose such mandates with higher risk in younger ages among those who get the shot as well as one that is in EUA. Science and data is not being properly disclosed and informed consent is not being made On these products. (Happy to provide and science upon request) Pfizer does not have an APPROVED version being distributed commercially in the United States and this liability will fall on those who choose to mandate with such extreme adverse reactions. As such On the following topics I stand as follows—

1. OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. You oppose COVID-19 shot mandates, period!
2. SUPPORT Informed Choice Washington's Petition for Rulemaking (see below) — our petition is item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Subject: BOH meeting January 12th

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. item #8 on the agenda for January 12th meeting.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I do want to encourage you to support item #11 on the agenda that Xavier Figueroa, PhD, on behalf of ICWA, asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks

completed Phase 3 trial studies, to the school required list.

Sincerely,
O.J. Marston

I/We the constituents and community member(s) of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

I appreciate your time,

Jennifer Meusy

The government is out of line.

I am 100% against any and all of the proposed covid policies trying to be introduced. They are over reaching, immoral, and more importantly unconstitutional. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

The government has no place intruding on individuals personal health care. Every individual is different and reacts differently to different treatment. This is between the individual and their trusted doctor. Furthermore, the latest variant has proven to be far less of a threat. With the strongest variant we had a 98% chance of being fine so with this latest one we are certainly well above 99%.

This madness needs to stop. Quit feeding a fire that is dying out.

Sincerely,

Kyle

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

This plan is nothing based in science and you all know that perfectly well. You know These shots are not even approved fully and the adult version that is approved is still not available in the US. And even if they were and it was all 100% approved there is no long term studies or proof of efficacy and safety. This is appalling and you will all answer for your acts someday.

Be on the right side of history. I know I am.

Stop this abuse of power now.

We will not comply

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State .

As a parent, and a member of the community, I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid 19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading C19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of C19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing C19 nor is it preventing the spread of C19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks or balance issues. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people. Even the FDA board that was approving those vaccines to the young kids did it with the impression that it will be absolutely voluntary and will never be mandated which CDC guaranteed. Will you take upon you the responsibility for the health and well being of innocent children who you will be subjecting to unknown risks in order to receive education which is an ingrained right of every child? Will you create segregation and discrimination based on the medical choices made?

Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Thank you,

Julia Kulyk

External Email

To Whom it May Concern,

I am writing this as a concerned Washington resident, and further a concerned Washington mother and Washington teacher. In regards to the agenda items to be heard on the 12th, I vehemently oppose agenda item #8 (eight) mandating COVID shots for school. Further, I oppose the Covid shot mandates presently in place. I oppose agenda item #9 (nine). Furthermore, I fully support agenda item #11.

Thank you.

Subject: Comments on January 12 State Board of Health Public Meeting

External Email

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at low risk from COVID. Shot risk is ??

We do not know long-term effects of the shot, therefore experimental.

Transmission of COVID has been shown between vaccinated subjects therefore, what is the use of the shot?

Thank you and regards,
Lizabeth BENNETT

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. They are under EUA only
2. Have not been tested for long term side effects
3. These shots are NOT fda approved.
4. NOT COMIRNITIY
5. So many deaths have been reported
6. Thousands of side effects have been reported
7. Children are having heart attacks after being injected!!!!
8. Known fact that children have almost 100% chance of recovery from Covid w minimal to no side effects
9. Our dictatorial governor is a criminal trying to push through these unconstitutional mandates through. They are not laws written by legislature. So Inslee has no legal right to enforce. Therefore, neither do you.

What more data, facts, and victims statements do you need before you finally realize this toxic injection DOES NOT work for the betterment of society.

All future adverse reactions and deaths will be on your hands!

Lifelong Washington resident and very concerned citizen

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid. please look at NUMBERS for this... you will see this statement is true.

The vaccines are still only EUA (emergency use authorized).

There are no long-term studies to document any history of safety. And the short term info we do already have on them, shows on vaers the huge amounts of adverse effects that adults have suffered, can't imagine children.

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease. Again look at data and numbers for this.

Thank you,

Joel & Mallory H.

I oppose Agenda Item #8

I support Agenda Item #11

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies.

As a parent in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery. In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge.

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

- 1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).
- 3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) provide evidence of asymptomatic spread of SARS CoV2.
- 5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.
- 8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is one of the side effects affecting people who have received the Covid Vaccine. Heart muscle does not regenerate. How many are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen?

Most children by now have been exposed to the virus and have developed immunity without difficulty.

Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,
Maureen Said

WA State Board of Health:

I write to formally object to your proposed policies that require WA state law enforcement to force involuntary detainment of individuals and groups for quarantine, forced isolation, and forced compliance with medical treatment, as laid out in WAC 245-100-080, WAC 246-100-045, WAC 246-100-040 and other policies under WAC 256-105. Not only is this proposed action illegal, it is also unhelpful in COVID mitigation measures according to current scientific understanding of Omicron transmissibility and sets a horrible precedent for dismissing bodily autonomy and personal freedoms.

Please confirm receipt of this objection.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. It is illegal under EUA. There's a difference between Authorized for use and FDA approved. Also, Corminaty has been recently ruled in Federal court that it's legally distinct from the EUA Pfizer shot.
2. As a taxpayer and a property owner who helps fund the schools, I don't believe children should be experimented on. The Nuremberg Code ruled it illegal to mandate experimental drugs on citizens and as a parent, I do not approve.
3. The side effects and dangers of these drugs are well documented and as more information comes out, it's being revealed that these shots have statistically do nothing to prevent COVID like their supposed to. The risks do not outweigh the benefits.

Very Respectfully,

Julando Samson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Studies now document that the vaccinated and unvaccinated can both transmit Covid, therefore the vaccine does not stop the spread of the disease. For this reason alone it seems ridiculous to require anyone to get this experimental shot. There are no long term studies to document safety or efficacy of these Emergency Use Authorized shots. Natural immunity is highly effective in building our immune systems and moving forward. It would be more dangerous for children to get the vaccine shot than to have a rare serious bout with Covid. Children are at extremely low risk for Covid.

Please strongly consider NOT making these potentially high danger shots required for school attendance.

Respectfully,
Leanne Washburn

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid and its variants.

Studies do NOW document that vaccinated and unvaccinated can both transmit Covid; that being said the vaccines do not stop the spread of the disease.

I believe that unless there are underlying conditions the person should have a choice.

I also believe that parents are the ultimate authority when it comes to their children period and mandating vaccines that neither prevent someone from contracting and or spreading the virus should be forced upon anyone.

This country has had its problems in the past as has every country, we are still a free republic and no governmental body should be able to infringe on a persons liberty.

After all, the government works for me and you not the other way around!

Respectfully,

James Tipton

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely low risk for COVID, and have been from the beginning.
2. The vaccines are still only EUA (emergency use authorized), and therefore should not be "routine."
3. There are no long-term studies to document any history of safety. In fact, there is plentiful documentation of the opposite--detrimental, permanent side affects in children of varying ages and in both sexes.
4. Studies do now document that vaccinated individuals not only have breakthrough sickness, but also can spread COVID. So what's the point of getting a "vaccine"?
5. The vaccine apparently does not stop the spread of the disease, which is the purpose of a vaccine (as is the case with small pox, measles, chicken pox, etc)
6. And most importantly, NO ONE should be forced to inject something into their body, or their child's body. It's abuse, as is wearing masks.

To the Immunizations Technical Advisory Group,

Covid vaccines should not be required for children to attend school. They are still so new and there has not been significant research done that proves these vaccines are safe for children at this point. Not only that, break through cases of covid continue to happen at high rates, causing the efficacy of these vaccines to come under question. Parents should be able to choose whether or not they want their child to have this vaccine. It should not be a condition of enrollment in our schools.

Please do not make this a requirement for children to attend school in Washington state.
Thank you,

Sincerely,
Marisa Kellcy

To Whom It May Concern,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in Washington state for the following reasons:

Children are at an extremely low risk of problematic outcomes for COVID.

The vaccines are still in the "emergency use authorized" status.

There is not enough long-term information for these shots. Do we need to make our children guinea pigs? Their developing bodies could be unintentionally altered by these shots.

It is now clear that both vaccinated and unvaccinated persons can transmit the disease. The vaccine is clearly best for those who are elderly, are immunocompromised, or have underlying conditions. Most children do not fall into these categories.

Thank you for your time!

--

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

It is a parents decision not a bunch of corrupt people decision what is right for children.

I'm writing to state my opposition to making COVID-19 shorts mandatory for school admission or childcare in Washington State.

First, children are at an extremely low risk for contracting COVID.

Second, it is now obvious the vaccine does not stop the spread of COVID as there are hundreds of adults infected who have already received the injection.

Thank you,

Traci Klein

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

In the bylaws for allowing a vaccine to be required for school it must prevent the disease and we have seen that the covid vaccine does NOT do this.

This is a EUA and therefore NOT a valid vaccine and the actual vaccine will not be available until 2024 the earliest.

This is a therapy NOT a vaccine.

There is NOT enough longterm data to see what type of affects this will have on us, let alone our children!!

Sincerely,
Michelle Ventura

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Kids barely feel the sickness and they've proven that they're not huge spreaders
This vaccine hasn't been proven too to be safe for children you people are crazy to shoot up our kids or even suggest it
And bask on their face clearly do not work or there wouldn't be a breakout in liberal King County think about it!
The division and control needs to stop now!
herd immunity ?
Early treatment

99% survival rate what are you people doing?
Scaring people for political control
I've lived in Washington State all my life And I'm getting ready to pack up and leave in March

Protect the old and vulnerable

We the people are so tired of being locked down and treated like little children
I raised 4 children I know how to avoid sickness
we do not need mask mandates and all this other bullcrap
vaccine cards and more stress put on the people
Washington State is one of the worst States for mandates lockdowns and a dictator governor

STOP IT PEOPLE ARE LOOSING THEIR MINDS HERE
STOP IT!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: IT HAS NOT BEEN PROVEN THAT THIS IS NECESSARY. THE PARENT IS THE ONLY ONE TO DECIDE IF THEIR CHILD SHOULD GET THE SHOT. THE RISK TO THEM IS SO LOW, IT'S NOT WORTH ANY UNKNOWN AFFECTS. EACH PERSON NEEDS TO MAKE THE DECISIONS NOT THE TEACHERS UNIONS. WE ALREADY DON'T KNOW THE LONG TERM AFFECTS OF MAKING THEM BREATHE IN THERE OWN SWEATY BREATH. IF TEACHERS WANT TO WEAR MASKS FOR THE REST OF THEIR LIFES, THAT'S IS THEIR RIGHT, BUT LEAVE OUR KIDS ALONE.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: There is no need for it. Children are low risk for getting seriously ill from Covid. The shot has not been fully approved, therefore the risks have not been fully evaluated. Many parents are uncomfortable with their children receiving this injection. California attempted to make it mandatory and did not have enough parental support. They had to drop the mandate. There will no doubt be much of the same concerns here, why push something so unpopular, especially when it is now a known fact the shot does not stop transmissions?

- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease
- * Recent insurance analytics report a 40% increase in pre-mature non Covid death.
- * Insurers also report a 40% increase in heart problems — acute coronary syndrome, sudden heart attacks and cardiac arrest — over the previous six to eight months”
- * We have now topped over 1,000,000 adverse reactions on the VAERS database.

The potential negatives far outweigh the positives when considering a vaccine mandate on our children.

External Email

To all legislators addressed above:

I urge you strongly to reject the passage of the policy proposal (WAC-100-070) to allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility (WAC 246-100-045). People are not cattle. There's no reason for this. MANY people have natural immunity from covid and it's mutations which are essentially 99.7 the same as covid-19. This is insanity. Being detained for refusing to voluntarily comply DEMONSTRATES that this is not a question of voluntary compliance, but coercion. It's flat out wrong and there is no justification for passing such a blatantly coercive measure. Same with any refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These proposals confuse requests with demands. They're a violation of the rights of those who disagree with those making these DEMANDS.

I also urge you to vote against proposals to adjust WAC 24-105 to include EXPERIMENTAL Covid-19 injections as part of school immunization requirements. This is TOTALLY unjustified as young people are not susceptible to serious covid infections except in absurdly rare cases. Even when infected, they are not vectors for the infection of anyone else, but even if they were, it would be unjust to expose a young healthy person to an experimental vaccine under the pretext of protecting an old moribund person. This proposal has one reason only, and that is to indemnify vaccine companies from damages caused by these vaccines (consult the VAERS data base). Under the law, no one [OF ANY AGE] injured from a vaccine on the school immunization requirements has recourse to damages. This is nothing less than child sacrifice to big pharma. If you do this, good luck looking at yourselves in the mirror for the rest of your life. Please do not along with the lies of big pharma. Please do your job and stand up for the citizens of WA state. This is not complicated.

Please view the information in the below 3 short paragraphs:

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Thank you for doing the right thing on the behalf of your constituents rather than following the directives of the people pushing the Covid-19 pandemic narrative. Covid-19 is also carried by many animals, and for this reason it will NEVER be eradicated by a vaccine program, especially one that has already done incalculable damage. ENOUGH!!!

Sincerely yours,
Michael McTigue
13 Cambridge Dr
Lynden, WA

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

> ☐
> Hello,
> A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.
> I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule.
> Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms.
> Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Forcing individuals to have a medical procedure in order to attend school, just for the sake of a mandate, is not sound grounds for making the shot compulsory.
- * Individuals are not all alike with regards to their physical needs and/or sensitivities, one size does not fit all.
- * Concessions and counsel need to be made by medical doctors/practitioners who are professionals in the field of medicine who know better than school boards.
- * Children as well as adults may react with life-altering side effects of the contaminants in the vaccination as is stated by the product insert in the package for the shot.
- * There is no proof that the shot has any efficacy for preventing the spread of or controlling COVID 19.
- * COVID 19 is transferable through animals so the mantra that world-wide eradication of COVID 19 via "vaccination" is false.

Subject: Comments on Proposed changes to infectious disease WAC codes

External Email

January 7, 2022

To Washington State Department of Health and anyone else concerned:

I am writing in Opposition to Proposed Legislation for WAC 246-100-070, WAC 246-100-045, 246-100-040, WAC 246-100 and WAC 246-105.

As a resident of Washington State, a parent and a US citizen, I DO NOT agree with these propositions. If anything, rather than expanding these legislations to include the Covid-19 vaccinations, they should be repealed.

I do not consent to our government dictating personal medical choices and locking up citizens. This is unconstitutional overreach. Our forefathers would never have tolerated this type of legislation! America was founded on the premise of personal freedom. As Benjamin Franklin wisely coined, "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety." This is America, land of the free and home of the brave! We do not consent to this intrusion into our private lives. What has happened to our country that this is even on the books and being considered for expansion? Instead of adding Covid-19 to these laws, they laws should be eliminated.

Whether a parent chooses to vaccinate their children is a personal choice. All should be free to decide either TO get it or NOT to get it. I am OPPOSED to making COVID-19 vaccination mandatory for schools or childcare in our State. There are studies that show both vaccinated and unvaccinated can and do get and transmit COVID. And there are studies showing harm and death from the vaccine, as well as no long term safety studies so far. Children are also EXTREMELY low risk for dying from COVID. This should be a personal choice up to each family and parent. The vaccines have been proven to cause death. No one should be forced or coerced to take something that might kill them!

I believe these laws are unconstitutional and violate the 4th amendment. Remember that Title 18 of the United States Code, Sections 241 and 242 criminalize conspiracy against rights and the deprivation of rights under color of law. In other words, they make it a criminal offense for public officials to go beyond the limits of their authority to strip away the public's rights. The law applies to police, judges, elected officials, and yes, public health officials as well as health care providers at public facilities.

When I worked with HIV/AIDS patients, I provided them with education and support as they weighed the treatment options and the risks of choosing not to accept treatment as well as risks of behaviors that may spread the disease. It was their choice whether to accept these risks or not and my responsibility to support them as individuals even though it was hard for me to watch when they chose not to accept choices I would have made. Likewise, it was the choice of those joining them in risky behaviors to accept the chances that they may also contract this illness. In listening, I would begin to understand the complications should they choose differently and began to realize that they were

aware of more consequences than most could comprehend looking on from the outside. It is unfair to expect people to deal with the consequences of which we can never fully understand without fully living in their shoes (an impossible thing to do). The same occurs now that I am working in dentistry. For example, we educate patients when disease is found in their mouths and inform them of the risks of choosing to leave it unattended (which can lead to infections throughout the body and at times lead to death). Ultimately it is the individuals choice and should always be, even though it may be sad and hard to watch.

We have always had the choice between good and evil. Any time evil is chosen, many others are impacted. However, if this choice is removed, what are we each living for? I have a problem with laws that remove choice. These laws insinuate that humans are foolish and do not know what is best for them and that those in authority always know better. This is far from the truth! It is interesting to me that you would even consider supporting such laws with these implications while not accepting all other responsibilities that individuals have for their lives, children and families. The government is not ready to take on the falling out of these laws if they are ever actually implemented. It would not be able to preserve the dignity of all human beings and it never should be put in this position. If these laws are expanded, regretfully, some of you are likely to experience the negative consequences that these laws would bring if implemented.

Please do not include Covid-19 vaccinations into these laws and bring further disgrace upon our nation, a world leader for its founding principles of freedom. Let us remember that "all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." And when we read the Declaration of Independence further, we see that when our government attempts to make laws that are destructive to personal freedoms such as bodily integrity and informed consent." Please remember our history as well as the history of other countries and peoples throughout time, and do not pass these horrendous laws in Washington State!

Thank you for your consideration of my request.

Sincerely,

Andrea Stafford

I am opposed to making COVID-19 shots mandatory for school admission or childcare in Washington State for the following Reasons:

- We need more long term studies to better understand the effects of the Covid-19 vaccine.
- These are still emergency use authorization vaccines. Please see reason number one.
- Children are far less likely to be negatively affected by COVID-19 than adults.

Please don't subject children to this child abuse all in the name of political power. If you do this, I will be moving from this state at the earliest convenience. I will not let you force this onto my children. I doubt I will be alone, and the state can't afford more losses to their tax base. Thank you.

Subject: Comments on Your Agenda for 1/12/22

External Email

Ladies and Gentlemen:

I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-10 shots for consideration of mandating the shots for school. I OPPOSE any mandate for COVID-19 vaccinations for Washington State's school children. Children are more likely to die from the experimental vaccines than from COVID-19.

I SUPPORT Informed Choice Washington's Petition for Rulemaking, item 11 on your 1/12 agenda, which asks you to establish a new rule that prohibits you from adding any Emergency Use Authorized (EUA) product, or an licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you for taking my views into account!

Jan Stuart

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

This is an overreach and some constitutional. There is an abundance of overwhelming evidence that children are at extremely low to no risk.

Mandatory vaccines for our children in this particular case is clearly unwarranted.

I strongly oppose the Board's formation of a Technical Advisory Group to consider Covid-19 shots for school. I oppose Covid-19 shot mandates altogether. How can you consider that when the safety of the shots has not been proven and lack Phase 3 trial studies. In light of the recent documentation on the Pfizer trial results that violated all clinical and ethical trial procedures, you would be committing serious, life threatening decisions for our children who you know are not at risk from the disease unless they have other serious medical complications.

I heartily support Informed Choice Washington's (ICWA) Petition for Rulemaking on Item #11 on the January 12th agenda. This was filed by Xavier Figueroa on behalf of ICWA to establish a new rule that prohibits you from adding any Emergency Use Authorization (EUA) product or any licensed product that lacks completed Phase 3 trials studies to the school required list of immunizations.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Studies indicate that children pose the lowest risk group
2. The COVID shots are still under the experimental authorization and no long term studies are completed on side effects though many are reported
3. There are numerous unresolved suits regarding blanket mandates that will likely be expanded to include this issue as well without any clear evidence of need or effectiveness
4. No one is investigating "natural immunity" and no one is making any reasonable accommodations for those with natural immunity based on test results
5. Making shots mandatory for both school admissions or childcare will only further alienate a large portion of the voting population. Those people will likely seek alternative which remove more children from the mainstream – further crippling public school enrollment and the funding tied to attendance.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) science and data has shown children are at low risk
- 2) science and data collected through sources like the CDC's VAERS and the speedy analysis conducted under the FDA emergency use authorization process indicates administration is not without side effects.
- 3) Mandated school vaccines routinely go through a thorough review process that can take years to insure they are safe and effective. As the government is now pushing boosters after months, the effectiveness of these shots has been questionable and is not largely limited to reducing the severity of individual infections not reducing transmission.
- 4) until shots can be thoroughly analyzed through a complete process, administration should be encouraged and best be performed by qualified medical professionals that have evaluated the patient. If a shot with known side effects will be mandated, liability immunity should be waived or schools should be fully responsible for any medical expenses resulting.

I, a woman, who lives in Washington State, urge that the Washington State Board of Health (WSBOH) NOT make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission due to the following reasons:

1. All COVID vaccines remain under Emergency Use Authorization (irrespective of many people believing that the Pfizer one has been approved; it hasn't);
2. Children under the age of 18 have a 99.995% survival rate from COVID infection;
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19;
4. There are no long-term studies to document and history of safety;
5. Studies now document that both the vaccinated and unvaccinated can both transmit Covid; and therefore
6. The vaccine does not stop the spread of the disease.

I support Agenda Item #11, the Petition of Xavier Figueroa prohibiting adding any EUA product that lacks Phase 3 studies to the required list of vaccines.

I oppose Item #8 on the Agenda regarding the formation of a Technical Advisory Group to review information about Covid-19 shots for consideration of mandatory shots for school age children.

Signed and delivered this 5th day of January, 2022

To whom it may concern:

To preface my story I want to be clear I am not anti vax but I am for informed consent and continued long term studies on the affects of Covid vaccinations on our population in particular our elderly with comorbidites and our general population of all ages with comorbities. I also support strong public debates with established experts in the fields of epidemiology on both sides of the fence.

Today I buried my parents. Writing this tonight with a deadline looming tomorrow was not on my agenda. Given my personal experiences I think I have very valuable points of view to share.

Mom and dad lived in a retirement home, Mom was nervous about the vaccine but it was required so she complied. Immediately following the Pfizer vaccine she developed severe diarrhea, a known side effect. Following visits to urgent care she ended up in St. Josephs hospital. She was determined to be seriously low in magnesium and potassium and had developed heart arrhythmia due to this. She had no history of heart problems before this. The diarrhea was not under control when she was released. After her release to the retirement home she received her second vaccination. Again she ended up in the hospital. Again she was released without controlling her diarrhea. Three days later she died of heart failure.

April mom died. There was no investigation that I'm aware of. My understanding is any adverse affects following a vaccine should be reported to VAERS.

Dad had his booster shot in October. Within a few weeks he developed symptoms such as being unable to dress himself, shower himself, incontinence. Then he started falling early Nov. Ended up in the ER but they found no symptoms of stroke or brain bleeds. He declined quickly. Went from totally mobile to in a wheelchair and could not hold his head up. Due to his desires not to be treated the cause of his rapid decline are unknown but appear to be consistent with Gillian Barre syndrome, known to be brought on by Covid vaccinations. He died mid Dec. Five weeks after he fell. Again I'm not aware of any reporting to VAERS on his death despite the circumstantial questions.

Dad was a very proud Navy veteran and loved our country dearly. Mom was a very proud Navy wife and took great care of our family as we travelled from one duty station to another. They took their roles seriously even when concerned about the outcome.

I had Covid in August. Became very sick. Double pneumonia, dehydration, didn't eat for 2 weeks, nearly died. Am still recovering months later.

What about people with natural immunity?

What about people who are immune compromised as in transplant patients and cancer patients?

My request from this body is to seriously consider the consequences of your proposed actions. The vaccines are emergency authorized and there are no ongoing studies on the affects. I have comorbities including cancer (diagnosed post covid diagnosis). I want to

know the risk benefit analysis. I want to know if vaccination increases cancer risk. I want to know what the affects are on our elderly. I want to know if a child is vaccinated that they have a lower risk of complications and death from the vaccination than from the illness.

Currently there is hope that the pandemic may actually be in it's end stage due to omicron. Before instituting life altering recommendations it seems prudent to wait and see what the near future brings.

Please do not make life altering decisions without full information.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at an extremely low risk. The vaccines are still only authorized under emergency use. There are no long term studies to document any history of safety. The vaccines do not stop the spread as evidenced by the cases among the vaccinated and unvaccinated. Furthermore, there is no emergency as defined by the intent of the original writers of the Washington Constitution. Current emergency actions are an abuse of power. Additionally, the government is not responsible for nor is required to be involved with my personal health care choices.

Sincerely,
Keith P. Dimeler

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- This vaccine does not stop the spread of COVID.
- we have decided to homeschool or move out of state if this is mandatory when our children start schooling in next few years.
- there are no long term studies to document any history of safety!
- children are at VERY low risk for COVID
- the vaccines are still only EUA

Subject: Comments Re Your Involuntary Quarantine Policy and Adding Covid Vaccine to School Requirements

attachments\79F4FAADD38041D6_image003.png

External Email

To the Washington State Board of Health:

Regarding Your January 12th Policy Meeting

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I want to point out that these policies violate:

- 1) The Nuremberg Code (worldwide code which includes the USA)
- 2) The US Constitution (4th and 10th Amendments)
- 3) All US health care laws, including the Patient Bill of Rights and the HIPPA laws.
- 4) The US Supreme Court has already said that NO emergency can violate or nullify the rights of any American guaranteed under the US Constitution. That's because the Constitution was written during an emergency. Dr David Martin has discussed this case in multiple videos. You will NOT be protected for these actions as they are against the US Constitution and the Nuremberg Code. No administration policy can protect you in court.
- 5) The US Constitution states that all laws, mandates, or policies by any State or Congress which are not in compliance with the Constitution are null and void.
- 6) These policies are therefore 1) treasonous, since they violate the US Constitution and 2) are crimes against humanity, since they also violate the Nuremberg Code.

Should you decide to approve and implement these policies after being warned that they are treasonous and/or crimes against humanity, you will be in conscious violation of the Nuremberg Code, the US Constitution and multiple US health laws. You can be charged, indicted, and arrested for treason by the Common Law Juries being formed in this state now. If you are not familiar with Common Law Juries, you should do your homework. Those juries absolutely have the power to indict and have public officials arrested who have committed acts against the Constitution and citizens (treason), and they are being formed throughout Washington State now. Do not underestimate this consequence.

In no way are you or any other public official being threatened. You are being warned that these proposed policies are illegal and unconstitutional in multiple ways. You are being warned of the serious consequences for approving and implementing these policies. You are not protected from the consequences of violating the Nuremberg Code, the US Constitution, and the US health laws. No emergency can protect you, per the US Supreme Court's ruling that no emergency can violate the freedoms and rights of any American.

I recommend you vote against these policies, and reconsider any other policies that could be in violation of these laws and the Constitution.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. COVID_10 and it's variants have had MINOR impact on children. It is around 99.8% recovery rate! THE VACCINE IS AN "EXPERIMENTAL" VACCINE. The Vaccine Companies are "PROTECTED". WHY IS THAT?
2. Plus it is RARE that they pass along this to their family members.
3. Last year the state did not even acknowledge the flu. This year the omicron is so similar to the flu with MINIMAL issues.
4. Over a one-year period, that rate of death would translate into an annual mortality rate of about 2.5% a year — 1 person in 40 — almost three times the overall Swedish average. In a typical year, about 1 in 115 Swedes dies.
5. Multiple studies of Omicron infections published in recent weeks showed decreased lung damage and decreased mortality rates in both animal and human tissue, though the studies confirmed the greater transmissibility of the Omicron
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde-surges-fda-vaccine-strategy-question%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4f8858c09ad3464bb45c08d9d159ed58%7C>> variant.

A consortium of Japanese and American scientists on Dec. 29, 2021, released a study
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.researchsquare.com%2Farticle/1211792%2Fv1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4f8858c09ad3464bb45c08d9d159ed58%7C>>
on hamsters and mice that had been infected with either Omicron or one of several earlier variants.

6. The Centers for Disease Control and Prevention (CDC) is not investigating the death of a 13-year-old Michigan boy who died
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeaths/13-year-old-jacob-clynick-dies-pfizer-vaccine-myocarditis%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4f8858c09ad3464bb45c08d9d159ed58%7C>>
June 16, 2021, of myocarditis three days after his second dose of Pfizer's COVID vaccine, emails obtained by Judicial Watch confirmed. Jacob Clynick.

7. VACCINES have NOT been fully researched and is causing issues with young men. Though the article below is a 25 year old the more we vaccinate children the more this will happen.

25-Year-Old Soccer Star Suddenly Collapses, Dies During Training

A 25-year-old Guatemalan soccer star collapsed during training and tragically died shortly after being rushed to hospital.

Marcos Menaldo, a defender who played for Deportivo Marquense, reported suffering breathing difficulties during the training session on Monday.

"The tragedy occurred at the Marquesa de la Ensenada Stadium where Menaldo received emergency CPR treatment on the pitch in San Marcos before being transferred to the Hospital de Especialidades where he died," reports the Mirror.

Menaldo was a fan favorite after leading his team to the second division title last month.

"A young, dynamic and jovial person, this happens to him. It is quite strong and shocking because you lose not only a player, you lose a friend," remarked Hernan Maldonado, Deportivo's club president.

"They transferred him to the assistance centre where they did everything possible. But unfortunately, the death was confirmed," he added.

The report notes that Menaldo's death tragically followed that of Croatian footballer Marin Cacic, who died in similar circumstances just before Christmas after suddenly collapsing during training.

The 23-year-old was diagnosed with heart failure before being rushed to a nearby hospital but died on December 23rd.

Back in November, German newspaper Berliner Zeitung published a report seeking to

Diamond Mine of Data? Insurance Companies Report 40% Increase in Premature Non-COVID Deaths

Insurers in Indiana and India report similar rates of non-COVID-related premature deaths. "I'm sure I'm one of many who wonder what kind of diamond mine of data the insurance companies are sitting on," said educator and statistician Michael Crawford.

External Email

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Please do not make shots mandatory for schools and childcare. I have 4 children and I do not believe that this is necessary for the following reasons.

- 1: Children are at extremely low for Covid.
- 2: The vaccines are still only emergency use authorized (EUA).
- 3: There are no long term studies to document any history of safety. These vaccines were put out to quickly and we do not know the ramifications if any.
- 4: Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Due to these reasons that are scientifically proven, it does not make any sense for the state to mandate getting the vaccine shot.

Thank you for your time,

Mark Korsak

To whom it may concern:

I am very concerned about the proposed mandate to make the Covid vaccine mandatory for school admission. Here's why:

Children are at a very low risk for Covid.

Little research has been done to prove the safety of the vaccine, with numerous incidents of cardiomyopathy being reported in young males.

The vaccine is still Emergency Use Authorization, which should concern us all.

Both vaccinated and unvaccinated people are contracting and/or transmitting Covid.

Doesn't this raise an eyebrow?

Until further studies have been done to prove the efficacy of the vaccine and little to no side effects, children should be protected, especially since they are at such low risk for contracting it and there are effective treatments available if they do.

Thank you for your consideration.

To whom it may concern,

I am writing in regards to the upcoming Washington State Board of Health Meeting. I would like to state that I am against the proposed COVID policies of involuntary detainment and mandatory injections for school students.

The involuntary detainment is overreaching. The police force is already maxed out and can't even keep up with current crimes, dealing with car thefts, homeless, break ins, drunk drivers. Besides wasn't the whole point of getting vaccinated to protect yourself. So those that have chosen to get vaccinated should be good, those that haven't have made their choice. Where does it stop? Do we start detaining overweight people and forcing them to diet? According to the CDC, about 659,000 people in the US die from heart disease each year. Some would argue that their choices don't affect others but doesn't it? Aren't they more likely to raise children that also make similar health choices?

And in regards to the children, that is a very personal decision that every parent has to decide whether to vaccinate them or not. I think passing these laws will cause a chain reaction of people pulling their kids out of school and/or moving out of state. Travel to pretty much any other state in the US and you will see that they are wide open, no masks, no social distancing, life is back to normal. However here we are still locked down with no greater success of controlling the virus than other states that are wide open. It's been 2 years, we are beyond the point of controlling it, it's time to just accept that this is something we live with now and move on as best we can.

Thank you for your consideration,

Kelly Garcia

COVID-19 injections should not be part of the school immunization requirements.

1. This is still under emergency use authorization. It has not been tested long enough. We must have informed consent. There is no liability against the drug manufacturers if there are adverse events.
2. Over 99% of kids and people in general recover from COVID.
3. The shot does not stop the transmission.
4. More children and young adults have been damaged mentally, emotionally and physically by the masking, testing and shot mandates than from the virus.

Why do you continue to use case counts to make decisions rather than hospitalization and death rates?

For almost two years you have masked our kids at schools and require multiple testing/week to participate in school activities. It has not worked. It is a virus and will continue to spread just like the cold and flu virus. Most of our States have fully opened and dropped the mandates, yet our State continues to damage our kids, families, health care workers by requiring something that does not work. Give people the information so they can make their own choices with their doctors. A one size fits all does not work!

Local health officials should not be allowed to use law enforcement to force emergency orders to involuntarily detain a person or families to be isolated to a quarantine facility. This sounds very similar to the internment camps that were used in our country for the American citizens of Japanese descent during WWII. This is not ok.

The mandates need to stop!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

* Covid is a ridiculously low risk for kids. In fact, we still do now have any children in the US who have actually died from covid without also having other co-morbidities.

* Both vaccinated and unvaccinated individuals can acquire AND transmit covid.

* The current vaccines available are on only EUA vaccines. Corminaty is NOT available right now in the US. This actually then makes any vaccination mandates ILLEGAL.

* We still have NO longterm SAFETY studies identifying the safety of this vaccine.

Thank you for taking a moment to consider the above statements.

Best,

Karen Rudd

To Whom it may concern,

I am shocked to learn that you are considering measures to legalize the use of law enforcement officers to:

1. Support local health officers in the involuntary detention of persons or groups of persons (families) to be isolated in a quarantine facility (concentration camp) following refusal to voluntarily comply with requests for:
 - a. Medical examination
 - b. Testing
 - c. Treatment
 - d. Counseling
 - e. Vaccination
2. Include Covid-19 injections as part of school immunization requirements.

I am a father and a grandfather; I have worked for almost 40 years as a scientist and engineer. I know how to read data and understand how numbers can be manipulated to show pretty much whatever you want people to see. I seek transparency at all levels and most importantly, the truth.

When I read through this proposed rule, I was mortified! I was not aware that we have such a draconian law in the state of Washington. Nor was I comfortable with the sneaky way the Department of Health is bypassing the legislature and the people – I find this reprehensible and wonder what you are so afraid of. This ruling violates the rights of every person in this state, rights afforded by the US Constitution and our state constitution. Additionally, it violates the very tenants of the 1947 Nuremburg Code, and it is a direct violation of the Rome Treaty, which the International Criminal Court in the Hague has the jurisdiction of.

What you are proposing in this rule brings an image to mind of the unchecked power that led to people being objectified (unclean, dirty, pestilence, mentally ill, etc.,) and then loaded into railcars and exported to their deaths in concentration camps – maybe because their neighbor was irritated and so reported on them out of anger. This rule appears to give unlimited authority to health officers and people are presumed guilty and infectious. If we have learned anything in this last year, it is that Covid-19 tests are unreliable. We have also learned that these vaccines do not prevent transmission,

infection, hospitalization, or death – this is called a failed vaccine. Why are even considering mandating these for children, according to a member of FDA’s own advisory panel, Dr. Eric Rubin, “we’re never going to learn about how safe this vaccine in unless we start giving it.” As a father and grandparent, I am disgusted that you would even be considering the forced vaccination of our children when the risk of them dying from Covid-19 (CDC’s own data) is statically zero. So, now we are going to mandate a failed vaccine? The passage of this proposed rule will do nothing for your credibility, and further erode trust that people have in their government, appointed officials, doctors and hospitals, in fact, it will further break apart the fabric of our society.

I could go on. but I suspect that you will not read this in its entirety. I believe that you need to think long and hard about supporting this new rule and ask yourself if you are prepared to stand before the International Criminal Court (ICC) in the Hague and defend your actions. The ICC has the jurisdiction to enforce the Rome Treaty among which is the prosecution of individuals and governments for crimes against humanity, which are serious violations committed as part of a large-scale attack against any civilian population. I consider you to be on the brink of violating this Treaty and, I consider this proposed new rule to be the evidence required to launch an investigation into each of you.

In closing, I urge you to not pass this rule, discard this in its entirety, before it’s too late.

Regards,

John G Cowan, MS, CHMM

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The science and data does not support the need to have children vaccinated; the proportion of covid deaths have not been healthy children--at all. There's not one shred of evidence to suggest the vaccine will not have long term detrimental side effects on my children's health. I already know one child that had a significant reaction and was hospitalized after receiving the covid shot.

Who will be held liable for adverse reactions (including death) to the vaccine my kids will be forced to take just to attend school? The state, school, DOH, dire??? Who?

Aren't teachers already immunized from the virus??? Why is this insanity even being considered?

Furthermore,

Subject: Comments regarding Jan 12th discussion of vaccines and forced quarantine

External Email

To the WA State Board of Health,
to whom it may concern,

I am writing to voice my opposition to the proposed policies regarding the use of law enforcement to forcibly quarantine people refusing to comply with medical testing, exams, procedures, vaccinations and more, and also to the proposal to make the covid shot mandatory for school and day care children.

The 4th Amendment of the U.S. Constitution states :

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

Both of your proposals violate this right.

You do not have the right as health officials to remove people from their homes, you do not have the authority to do this. You are proposing kidnapping people and holding them hostage. That is evil and wrong.

Our children are not under your authority either, and you do not have the right to violate their rights and our parental rights to force this experimental shot into them either. And there is proof that they are more likely to experience harm from this shot.

Do not proceed with either of these proposals. If you do, you are participating in criminal acts.

Sincerely, Kayla DeWaard

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

-Vaccination doesn't keep people from getting the virus or spreading the virus. Both vaccinated and unvaccinated individuals catch and spread the virus.

-The virus has mutated so much that the symptoms have reduced. CDC data shows a DECREASE in deaths from covid, despite what positive case numbers are doing.

-It is known all throughout the world that children do not transmit the virus at the rate adults do.

-There are no long term effects studies regarding the vaccine.

- The vaccine is still in EUA.

Thank you,

To whom it may concern,

I am very opposed to making Covid-19 shots mandatory for school admission or childcare in our state for the following reasons,

1- our children have amazing immune systems and having natural immunity from any virus is more durable and will give them more protection from any variant that could come along because of the all different spike proteins they are exposed to gaining natural immunity where with the vaccines only used the single alpha spike protein which doesn't protect them from future variants (as we are seeing with omicron)

2- our children should not be test subjects, with no long term studies we don't know what this vaccine can do to them in the future. We have had vaccines in the past history that also did not have long term studies and many children have died from the negligence.

3. Short term side affects are not encouraging. Being a mother of two little boys knowing that my boys have a higher chance of getting myocarditis is not a risk we should be willing to take since their chances of recovering from the virus with no side affects is much greater.

4. Health decisions are and always should be made within a family alongside a trusted physician who knows the child's health history to make the best decision for each child. School boards and government should not be making any health decisions for our children. They do not know their past health history and a one size fits all mentality in health decisions is irresponsible.

5. Who is going to be liable if something happens with one of these children? Unless the school board is willing to take on that liability (which I believe they do not want to) and the vaccine companies are not responsible for any side affects or death and have zero liability if one of their products harm one of OUR children. Who is going to take responsibility for forcing the shot on that family? Who will take care of the financial/medical obligations of the child if injured from this mandatory shot? Is the school board going to be there day and night to take care of even a single injured child from the vaccine that they made mandatory? If there is no liability and zero responsibility from all parties trying to make this a requirement we should not be having this conversation on mandatory Covid-19 shots. It's the parents who will be taking on any and all things that happen with this vaccine so it is the parents informed decision on if their child should or should not take this vaccine.

We shouldn't let our own fear of a virus make irresponsible decisions for our future generations. Thank you!

WSBOH,

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- Children are at an extremely low risk for COVID and other complications from COVID, which is well-documented from many studies around the world over the past 1.5 years.
- Many studies document that vaccinated and unvaccinated can spread covid and the vaccine apparently does not stop the spread of the disease as we are now seeing across the country. In many cases the vaccinated are getting covid at higher rates and still have severe covid symptoms.
- The vaccines still are largely EUA only and there are no longer term studies on side effects on children. The widespread use of the experimental vaccine is something we have never seen at this scale in history and many corners have been cut. I know this because my wife works with pharmaceutical drug companies daily doing clinical trials for cancer EUA drugs for children. She is appalled at the corners that have been cut and she said no drugs have ever been approved for widespread use in the general population, much less children, this fast. She will not get the vaccine because of this and the long term side effects that are unknown.
- It is the parents' choice what is and what is not injected into their child's body, they should not be mandated to inject their child in order for their child to get an education or receive childcare.
- The "vaccine" is not a vaccine, it is a temporary treatment and is not preventing people from getting COVID or spreading COVID. Vaccines work and give you immunity, the current injections are not working.

I am a clinical doctor and a track coach of children who has been looking at all the medical research, since the beginning of COVID in the state, in peer-reviewed journals and research that is about to be published in peer-review journals around the world. From the research I have read about kids and COVID, I have come to the conclusion that it is not in the best interest of the children to be mandated to get the COVID vaccine injections in order to attend daycare or school. It should be the choice of the parents.

Thank you for your time.

Respectfully,

Dr. Nathan Carlson

To Whom It May Concern:

I am fully opposed to the proposed changes. Individuals faced with illness should not have their rights violated by being forced into isolation against their will. No person should be coerced into being vaccinated against their will. While I understand the concerns regarding the health and well being of the community, the violation of individual rights is a threat to the community as a whole.

I'm also opposed to any mandates, bills, or laws that would require children to be vaccinated against Covid-19 in order to attend public or private school. Children under the age of 18 are at extremely low risk from the disease and evidence from multiple countries shows that schools are not super spread locations. The vaccine is also no guarantee against infection or dissemination of the disease. It is unethical and unscientific to require children to be put at risk for harmful side effects from the vaccine when the risks from the disease is so low for their demographic as a whole.

Sincerely

Gabriel Sovereign

Dear Sirs and Madams,

We are opposed to mandatory COVID-19 vaccines for school admission or childcare in Washington State for the following reasons:

The data has shown that children are at extremely low risk for serious illness and death from COVID-19.

The current COVID vaccines are "experimental" and only administered under Emergency Use Authorization by the FDA. No "emergency" exists regarding the vast majority of children.

Long-term studies regarding the overall safety of these experimental drugs have yet to be completed. As such, these experimental drugs are a huge unknown as to the long-term side effects, especially for our children. Will these drugs eventually cause grave health concerns in the years to come, especially for children whose bodies and brains are still growing and developing? Will these experimental drugs cause cancer? Infertility? Compromised immune systems? We ask you to consider the Thalidomide tragedy from the 1950s/1960s – an experimental drug widely distributed throughout Europe to treat "morning sickness," among other ailments. Tens of thousands of babies born to mothers who were given this drug either died as a result or were born horribly deformed. Thankfully, in America, the FDA never approved the experimental drug Thalidomide, so the impact to our citizens was significantly minimized. <https://usthalidomide.org/our-story-thalidomide-babies-us/>

It has become abundantly clear that both vaccinated and unvaccinated people are transmitting COVID-19. Because the vaccines do not prevent the spread of the COVID-19 virus, and because children are at extremely low risk of serious illness/death from the COVID-19 virus, there is NO absolute necessity to mandate the vaccines for anyone, but especially the children.

Thank you for your time and consideration in this monumentally important matter.

Sincerely,

Kerry & Debbie Horner

Subject: Re: Comments on the Washington State Board of Health consideration on COVID-19 vaccine requirement for K-12 students

External Email

Dear Board Members,

I am the grandmother of four school age children age 6-13. I have lived in Washington State my entire life and all my children and grandchildren live here as well. Three generations of our family have been educated in Washington. Multiple members of our family have taught at the University of Washington, and elsewhere in the state. As a family value we hold access to education in very high regard, along with the rights of parents to make decisions as to the health care of their children.

I urge you to vote against the mandate which would require COVID-19 vaccinations for K-12 students. Requiring an experimental vaccine against an illness that poses little to minimal risk to children creates an unacceptable risk to our children's health and to their access to education. Many, many families are opposed to vaccination of their minor children. Parents should not be forced to make a decision regarding the COVID-19 vaccine which would require them to vaccinate their children even though they are not comfortable with making that choice. Being put in the position to vaccinate or lose their current access to education is unnecessary, and it puts both the children and their parents in a terrible position and threatens their access to equal educational opportunities.

Please vote against the mandate. It is unnecessary, potentially dangerous, removes the right of parents to make decisions for their children, and will, without a doubt, result in the loss of educational opportunities for a very significant portion of our students, along with the departure of citizens from our State with a corresponding negative ripple effect on our schools, economy, neighborhoods, and businesses.

Thank you for your consideration of my comments in your deliberations.

Sincerely yours,

Janis Cunningham

I am opposed to making COVID-19 vaccination mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Thank you,

Melissa Fagan

Dear Advisory Group Members:

I am writing to express my opposition to making COVID-19 shorts mandatory for school admission or childcare in our State for the following reasons:

1. Children are at extremely low risk for Covid
2. The vaccines are still only EUA (emergency use authorized)
3. There are no long-term studies to document any history of safety
4. Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
5. The vaccine apparently does not stop the spread of the disease

I believe parents, in consultation with their own medical advisors, are the only appropriate ones to make crucial decisions for their own children's healthcare and medical safety.

Thank you for your attention to this matter.

Very truly yours,

Tom

Dr. Thomas D. Jonez

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: children are at very low risk for spreading, even showing symptoms, or hospitalization from Covid. Regarding the vaccine... there have been no long-term studies on children receiving these emergency use vaccines. And I have heard some health officials say that it is FDA approved which is incorrect since the USA is only using emergency use vaccines because that is all that is available in our country at this time. In addition calling it a vaccine is incorrect as it is actually gene therapy and no one especially children should be forced to put this in their body when they are at very low risk and if they are exposed Science has always shown natural immunity is the best defense especially when there is low risk of complications. In addition the studies have shown that the vaccinated are being tested as Covid positive, capable of spreading the disease, and even being hospitalized! Therefore calling into question the actual benefits of the vaccine . I am surprised that with the current results of the vaccinated coming down with and spreading Covid this is even a topic for discussion at this level! Do the right thing and actually protect our children don't use them as guinea pigs!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Sent from my iPad

There are no long term studies to document any history or safety of the vaccine. Studies have documented vaccinated and unvaccinated can both transmit covid, thus, it shows the vaccine does not stop the spread of the disease. It is not up to anyone else to decide one's personal medical decisions for them! Making covid shots mandatory will ruin the school system!

Subject: Comments Regarding Vaccine Mandate for Children

External Email

To the WA State Board of Health,
My husband and I have been residents of Washington for the past 18 years. All of our 5 children were born in this beautiful state, and we have had no plans to leave. Until the mandates started. My husband and I are both in the healthcare field, and we have worked hard throughout the pandemic. My husband never missed a single day of work. Even in the beginning when we were told fatality rates could be as high as 6%, he willingly went to work every day, risking his own health and potentially life. As time has passed and more data has surfaced, we see clearly that this virus is not nearly as dangerous as once thought, and we are tired of the ongoing fear-based mandates. Masks and mandated vaccines for working adults is going quite far enough. If the state comes after our children, that will be the last straw, for us and many, many other people we have talked with. The Covid-19 virus has proven to be no more danger to our children than any other common cold or flu virus that circulates every year. Have you done the research? There is no data to support a decision to mandate a covid vaccine for kids. It's insanity. It's not keeping anyone safer. The danger to kids from the vaccine is higher than the danger from the virus. We will NOT be told what our children have to have injected into their bodies in order to live a free and normal life in Washington. We will pull our kids out of school and leave this state without hesitation. Please carefully consider your actions, and how they will affect the many families across the state.
Sincerely,
Jeri Sturdivant

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: vaccines DO NOT PROTECT YOU FROM GETTING COVID! I know a few vaccinated people that got covid and hospitalized they were very ill. This vaccine does NOTHING to stop covid but have caused issues in kids. I personally know a few that went to hospital from vaccine! Myocarditis, couldn't walk and got very sick. So NO NO NO on mandatory vaccines for children or anyone!

Subject: Comments Regarding Mandating Trials in Human Experiments

attachments\530CB7B0C4E54AB0_kcpdbkgbedaekinm.png

External Email

Hello,

You have zero authority to mandate human experiments. Attempting to seize such authority is a violation of Federal and International law.

21 U.S. Code § 360bbb-3 - Authorization for medical products for use in emergencies

The right to refuse participation is required for any medical product receiving Emergency Use Authorization. By mandating consumption of an EUA product you will be in violation of this law.

<https://www.law.cornell.edu/uscode/text/21/360bbb-3>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.law.cornell.edu%2Fuscode%3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cda998579bde54ebecebc08d9d1fa8574%7C11d0e21726>>

We fought World War 2 to establish the Nuremberg Code, which you are intending to violate.

<<https://external-content.duckduckgo.com/iu/?u=http%3A%2F%2Fimage2.slideserve.com%2F4510306%2Fnuremberg-code1-n.jpg&f=1&nofb=1>>

If you choose to break the law that is on you. We the people are watching and taking notes. There will be trials, do you understand the maximum penalties for violations of these laws?

Make the right decision and stop your attempts at medical tyranny before it is too late for you.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The risk of children getting Covid is very low.
Vaccines are only Emergency Use Only,
We do not have any Long Term Studies on the efficacy of the vaccine.
Studies show that both the vaccinated and unvaccinated can transmit Covid so therefore taking the vaccine does not prevent the spread of Covid 19.

Thank you!

Subject: Comments for WA State Board of Health RE: January 12th, 2022 Meeting

External Email

Hello,

I am submitting the following comments related to the January 12th, 2022, State Board of Health meeting:

1. I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration in mandating the shots for school (item #8 on the January 12th agenda). Further, I oppose COVID-19 shot mandates, period.
2. I SUPPORT Informed Choice Washington's Petition for Rulemaking (item #11 on the January 12th agenda), filed by Xavier Figueroa, PhD, on behalf of ICWA, requesting the Board establish a new rule that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you,

Jana Crawford

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid. The vaccines are experimental and are only authorized through emergency use. No one knows the short or long term risks of these vaccines. There are no studies showing history of safety. Why experiment with children? Turn on the TV news or read social media to see that these vaccines do not stop Covid infections or transmission of Covid to others vaccinated or not. There is absolutely no reason to try to force these experimental vaccines on anyone especially children.

Subject: Comments on Jan 12 BOH meeting

External Email

To whom it may concern,

I am writing to inform you of my opinion regarding two BOH upcoming policy discussions:

1. Chapter 245-100 WAC - The consideration to grant powers to health officers using law enforcement for involuntary detainment, quarantine, forced testing or treatment/vaccination is completely unacceptable and unconstitutional. I completely oppose this idea and it should be rejected. Granting this power to health officers is dangerous and sets a terrible precedent. The health department's role should be to advise and inform and help track down sources of health problems. It should not have authority to be an enforcement arm of whatever health policies are determined (whether there is an emergency or not). Individuals have rights and these rights cannot be trampled upon by some unelected officer determining an individual to be a health risk (especially when that risk is not well defined or scientifically proven). I urge you not to try and codify these amendments into law.

2. Chapter 246-105 - Regarding school immunization requirements, it is completely unacceptable and I wholeheartedly oppose the idea of incorporating the current Covid-19 mRNA vaccines as a requirement for children to attend school. There is almost no basis for pushing this as a mandate. Unlike other childhood diseases such as measles, Covid has very little impact on children and is not causing excess mortality. Other respiratory viruses such as Influenza have historically affected more children than Covid. We do not mandate flu vaccines on this same basis. Other required vaccines also have a long proven safety record. Covid vaccines, especially for children, are experimental and we have no long term safety data to deem it suitable for everyone to take. It should be up to the individual parents and family to decide what is appropriate. There are many potential adverse effects such as myocarditis and pericarditis, which can be very serious, even if it is not common. Ethically, since there are potential risks, it should be up to the individual and their doctor to decide based on informed consent rather than being mandated. We also know now, based on recent data and statements made by the CDC, that Covid vaccinated individuals do not stop or slow the spread of Covid. Given this fact, there is no basis for requiring this experimental vaccine as a requirement to attend school. There is very little benefit and a huge potential of drawbacks and negative impact to students if this were to be adopted.

Please consider my comments and know that I represent the opinion of many others in my local community in Washington.

Thank you,
Israel Slobodkin

To Whom It May Concern:

I oppose proposed Covid WAC's:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I oppose mandating COVID-19 shots for school admission and/or childcare in WA; I oppose involuntary detainment of person(s) refusing voluntary testing, medical treatment, counseling, or vaccination, for the following reasons:

- There are no long-term studies for safety, making it impossible to make an enlightened decision.

- The vaccines available are still EUA (emergency use) and therefore still experimental.

- Studies now show both vaccinated and unvaccinated people transmit virus, so the vaccine does not stop spread.

- WAC proposals are over-reaching, employ force and coercion, and subject citizens to duress, which violate the First Principle of the Nuremberg Code of Medical Ethics (see footnote).

Respectfully,
Myla Dalton

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at much less risk to issues from covid, in fact the flu is more dangerous to children and the flu vaccine is not mandatory.

Forcing all children to take the covid shot removes a parents right to make decisions for their own child based on that child's personal medical history, and their own instinct as to what is the best course of action to protect their own child from severe illness.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children of school age have a greater than 99.95% chance of survival if they in fact acquire the illness caused by the virus.

The covid "vaccines" are under false emergency use for a virus that has proven to have many alternative therapies.

The covid "vaccines" are under emergency use for a state of emergency that has far surpassed its actual emergency. There is not public threat of overwhelming cases in our state.

The covid "vaccines" prove to show no decline in acquiring or spreading the virus. Only limiting symptoms. When children of school age report the most minimal of symptoms of any age group, the mandate on an experiment injected into their bodies is neglectful, cowardly, and classified as abuse and coercion.

The covid "vaccines" have proven to be the most risky and have the most negative and extreme side effects for the youngest population that has taken the experiment injections. If we are looking to preserve the health of our children and our community, shoving neurotoxins into these growing bodies is most definitely NOT in favor of their best interest in health.

Our community has the ability and power to think for themselves. Parents have the RIGHT to make the best decisions for their children based off individual circumstances. People of our community have the ability to take care of their health. They don't need governmental powers to tell them that a chemical cocktail of neurotoxins is their ticket to health. A chemical cocktail by the way, that has proven to be nothing of benefit to prevent our community members of actually getting sick this season.

Votes in favor of this mandate to pass are only in a place of fear or evil. No in between. Which side are you on?

My prayers are with you all.

The Vaccines are NOT TESTED AND APPROVED. You MUST have a conscience, don't you?

Look at the adverse reactions in these poor kids!! This is insanity

There are no long term studies. Are these kids going to be able to HAVE kids? Or is that the point.. Hmm.

The vaccinated are now scientifically proven to spread it greater than the non vaccinated. Your science isn't making any sense.

Clearly, according to the CDC numbers, the vaccine is not stopping the spread of the disease.

You want actual science, look at the countries that are beyond this nonsense. India? Take a look. Educate yourselves and stop trying to pass communistic laws!

Washington State Board of Health

I oppose the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. Vaccines prevent disease. Covid shots are NOT vaccines, they are experimental drugs that are NOT proven to be safe, therefore, everyone must be free to make their own personal healthcare decisions. Healthcare status is personal, private and federally protected information.

To protect our population, flood our state and nation with therapeutics for early treatment, including HCQ that has a 60 year track record of safety for all ages including children and nursing mothers.

Dr. Fauci is compromised by the Chinese Communist Party. He does not treat patients and has a reputation for lying. Fauci funded the creation of this virus bioweapon in the Wuhan China lab by the PLA (China's military).

Vaccinologist, Dr. Robert Malone, creator of mRNA used in the shots is on the record saying that the manufactures are improperly using mRNA. He agrees with my first 3 paragraphs. Fauci lied to Dr. Malone. Learn more about Dr. Malone and his international reach on Gettr.

Biologist and virologist, Dr. Stephen Hatfield, who has expertise in military biological warfare was involved in Ebola and AIDS epidemic, agrees with Dr. Malone and my first 3 paragraphs. Fauci lied to Dr. Hatfield. Dr. Hatfield authored a book about the pandemic threat. Learn more at DrStevenHatfield.com

Reports in the VAERS database is sufficient to end use of the shots.

The COVID Shots Are Killing People. More doctors, who treat patients, are joining Dr. Vladimir Zelenko, in speaking out for therapeutics for early treatment and against the shots as it is used today.

More Children Die From the Covid Shot Than From Covid with cites to studies at <https://noqreport.com/2022/01/07/more-children-die-from-the-covid-shot-than-from->

covid/

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnoqreport.com%2F2022%2F01%2Fchildren-die-from-the-covid-shot-than-from-covid%2F&data=04%7C01%7CWSBOH%40sboh.wa.gov%7Cd671a89751da4f48c22908d9d2165eb3%7C11>

Children have little risk from Covid-19, but they do have considerable risk from the Covid shots.

Please move AWAY from the policies under discussion, which are unconstitutional, and an overreach of government authority. The policies under discussion are moving our state towards a totalitarian government resembling the Chinese Communist Party.

Nola Coston

Newcastle WA

Subject: Comments for the Washington State Board of Health Meeting - January 12th 2022 - COVID-19 and WAC 246-100

External Email

I am writing to you from South Kitsap as a concerned WA state citizen, homeowner, tax payer and health care provider. I have read the draft agenda for the upcoming meeting on 1/12/22 and I am wondering why you are discussing acting on including COVID-19 to the current infectious disease WAC codes and discussing adding the COVID-19 vaccines as part of the school immunization requirements?

The past year has been a big push from the state to get vaccinated with claims that if we reach 70% then herd immunity will likely occur, and we can all go back to normal. These claims were false, and no herd immunity has occurred at all from the vaccines even though as of 12/20-21 there are 75.6% of WA residents who are vaccinated against COVID-19. Yet we are seeing large numbers of fully vaccinated individuals getting COVID-19. There is no protection being provided and everyone, whether vaccinated or not, can still transmit and spread COVID-19.

A proposal of involuntary isolation and quarantine for a virus with an enormously high survival rate is unthinkable. Ebola outbreaks of the past have ranged 25% to 90% fatality rates based on World Health Organization information, similar numbers for Marburg virus outbreaks. Smallpox killed one out of every three infected. Two Stanford University professors, Catherine Axfors and John P.A. Ioannidis published the stats of survival rate for COVID-19 by age group [<https://www.medrxiv.org/content/10.1101/2021.07.08.21260210v1> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F10.1101/2021.07.08.21260210v1>>]. Based on data from 14 countries, the only group with less than a 99.41 % survival rate was those over 70+ years of age. Covid-19 is NOT a grave danger to the public warranting Communist Regime tactics to coerce and intimidate the populace to conform to a corporate agenda. While respecting the God given right of Americans, while protecting the religious freedoms of families, or while preserving the foundational pillars of our Washington State Constitution, you should also consider whether a greater risk of injury to another is even occurring.

With the new Omicron variant, the death rate is even lower, and we are seeing people get more or less severe cold like symptoms. But we still need to ask ourselves, why are these Covid-19 outbreaks still happening?? Is it maybe because these vaccines are not vaccines at all? The definition of a vaccine is

“A preparation of a weakened or killed pathogen, such as a bacterium or virus, or of a portion of the pathogen's structure that upon administration to an individual stimulates antibody production or cellular immunity against the pathogen but is incapable of causing severe infection.”

There is no data to show that “vaccinated” people have cellular immunity and are any less likely to slow transmission than “un-vaccinated” In fact, there is no long-term data to suggest that the gene therapy that is labeled as “COVID-19 vaccines” are effective against viruses. RNA vaccines and adenovirus vector vaccines have only been studied

long term against cancer or diseases caused by genetic disorders, but the COVID-19 vaccines are the first licensed drugs to prevent infectious diseases using RNA vaccine technology. Although these vaccines are highly effective in preventing COVID-19 for a short period, safety and efficiency evaluations should be continuously monitored over a long time period. Development of COVID-19 vaccines utilizing gene therapy technology - PubMed (nih.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F337>

Yet the Department of Health is not stating the facts that there is no immunity with the COVID-19 vaccines and so there are places like King County and Clallam County that are requiring people to show their vaccine cards to get into businesses as well as large events and concert venues. You have WA schools that are requiring unvaccinated kids to get tested before sports and if they've been in close contact with a positive case but not the vaccinated kids. These policies are based on outdated and since-debunked ideas that the vaccine gives you sterility from COVID-19. It is the job of the Department of Health to update their message as the data updates to keep the public INFORMED. To keep saying that the vaccines are effective is not true because the vaccinated are still getting it and spreading it.

Now everyone is being told to get a COVID19 booster shot. Why? The first two didn't prevent the spread or flatten the curve like the state claimed that it would so why just keep injecting these Covid products into people when they are not effective? Why is the health board not recognizing and calling for studies on natural immunity? If you have got COVID-19 can you get it again? Will it be much less severe? When we look at the flu virus we know that you can get it again because of variants. Is the same true for COVID19? If so, then the COVID-19 vaccine is only good for the original virus which is no longer present. With the new Omicron variant the illness is much less severe but still very contagious. So more people will have antibodies to fight off future variants. These antibodies in combination with educating the public on utilizing healthy regime of vitamins and exercise would seem to be a much better solution than injecting them with a vaccine that we don't even know the long term effects of the injections.

Since VAERS was established, we are seeing more vaccine injuries being reported for COVID-19 vaccines than any other vaccine to date. There has been little to no public education on the VAERS system or how to interpret the data. How many Covid-19 vaccine injuries have we seen in WA State? How many vaccinated people are contracting Covid-19 and to what severity? This is information that needs to be shared to properly inform the public on the safety and efficacy of the vaccine and the reality that there is no way of knowing the long term effects and with that comes some risk of more medical problems in the future coming to light. That is why we cannot force people to get a vaccine without more long term data.

The board makes zero effort to freely and situationally approach an issue. Your solution must be in Lockstep with big government's approved talking points, your narratives must be in Lockstep with big government narrative, and your research, studies or data must be provided by big government. That is you staying in line with the corporate agenda, which is "Prevent vaccine hesitancy at all cost". Never admit a mistake was made, never admit there was a failure in a theory, and never go back on what you said. If you were to ever admit publicly you were wrong, it means you are no longer infallible, and people might question your authority. That is a big government corporate management style. There is no regard for religious or Constitutional rights. The WAC 246-100 codes are unconstitutional and should be revoked.

Please ask yourself that what you are considering is really what is best for the health of the people of WA State. The greatest danger to our children, our safety and our Constitutional Republic is when policies are enacted with zero regard for individual liberties and unalienable rights, gifted to us by our Creator and by the Supreme Law of

the Land, the United States Constitution. Unelected officials being tasked with directing law enforcement to rip families from their homes based on hearsay, rumors or conjecture borders on a totalitarian pedigree reserved for the most heinous criminals in human history.

Thank you,

Jessica

Hello to all of you,

I hope your inboxes are being flooded with emails on this matter. I find myself stuck somewhere between wanting to be polite & screaming at the top of my lungs when voicing my absolute outrage on these matters. I honestly don't even recognize the world that we are living in right now. How are these matters even on the table for discussion? It's a complete violation of human rights and you should be ashamed of yourselves for even considering it. It's denying our children access to school & an education if we choose not to give them a vaccine.

You are proposing taking away our rights as parents to do what we feel is right for OUR children. These are OUR children not your children!

You are proposing adding Covid to the list of illnesses where a person can be removed from their home involuntarily and taken to a facility. How is this any different than the atrocities that occurred during WW2 or Trump taking away children from their parents. It's a slippery slope and this is how these things start. It's honestly something that I never thought that I'd see here in Washington state. It's absolutely unbelievable and needs to STOP!!!

ENOUGH IS ENOUGH!!! THIS IS WRONG!!!

Thank you for your time.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

We need long term data in order to be able to evaluate risk vs. benefit for our children.

It is clear that despite vaccination covid will continue to mutate and cause massive infections.

It is time that we get back to life as usual with extra precautions in hand washing and distancing. We don't need to force our children into a vaccine

Hello

I am writing about the State Board of Health considering a Covid-19 vaccine requirement for school children. Do not do this. I'm appealing to your sense of real data that shows:

- * Kids have never been at risk (deaths and hospitalizations are lower than most other illnesses, like the flu)
- * The drugs available do not have time to consider the full short term and long-term side effects
- * Anyone that can, has had the shot because it is already available
- * As we've all seen, vaccinated and unvaccinated are getting and spreading Covid – these drugs don't make a difference on stopping the spread

You can look at other countries that operated and had kids in school since the beginning of the pandemic and did not have health consequences as a result. Countries like the UK always had their schools open and their children were fine.

There continue to be studies published showing that myocarditis is something that can affect kids more so after getting the shot. If you are thinking about protection, their heart is what you should be thinking about. Some more recent studies show that the risk of myocarditis is greater with each shot taken.

The risk reward does not show that forcing kids to take this will make them any safer, and could put them in greater health risks.

We are far enough along in this that we can see children are safest among any other age group. Forcing healthy kids to take a drug that is still considered experimental is indefensible, and should be considered dangerous. If you pass this, you are arguably putting kids at very real health danger by forcing them to take an experimental drug (still under emergency use authorization).

If you do it, I will NEVER put my child in the public school system, will consider moving out of state and/or work hard at legislation to make sure my real estate taxes don't go towards schools that put kids at medical risk by forcing them to take an experimental drug for a disease that does little to no harm to them.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at very low risk of covid.
- Immeasurable damage has already been given to them through the lockdowns and remote learning. The suicide call rates and mental damage done to our children cannot continue.
- The shots are still only EUA (emergency use authorized)
- There are no long-term studies to document any history of safety. Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease and implementing a requirement is unnecessary.
- This mandate is also in violation of RCW 18.130.190 and RCW 2.48.180

Ultimately the well being of our children is paramount and that decision is one the parents should make NOT the schools.

Thank you

Jim Rice

To whom it may concern,

We are writing to express our concerns about adding the controversial Covid shot to the list of required school vaccines.

We have 2 adult children and 8 grandchildren which 7 of the 10 have had the Covid virus. Severity for some were more than others but all have done well and now have natural immunity.

Here are some of our concerns;

Covid vaccines remain under EUA and our children should not be used as test subjects.

Children under the age of 18 have a 99.995% survival rate from Covid infection. Our bodies are designed to fight infection so we should be concentrating on healthy lifestyles, exercise, healthy eating, etc. to boost our bodies immune system.

Children have higher chance of death or adverse reaction to Covid vaccines than from Covid-19 virus. We are playing Russian roulette with this vaccine. You can not guarantee that my grandchildren will not be one of the many thousands that will die or be injured from this experimental vaccine.

Because of these and other freedom concerns this should be a decision that parents are allowed to make for their child/children. These mandates must not continue, we are free people and the constitution is the supreme law of the land which declares our personal rights.

Sincerely,

Dr. James Oosterwyk

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Let's follow the Science shall we?

The instances of young kids getting and NOT dying from Wuhan Corona Virus is around 99.85%

The CDC VAERS System reports over a million cases of adverse drug reactions due to the Experimental Drug being passed off as a true vaccine, and over 21,000 deaths.

Never before in American History have so many died from this injection. In the "old days" there are four instances of vaccines that caused damage to patients and were immediately pulled from use! Why not now?

This insistence on folks getting "The Jab" smells of Control versus Medicine.

The proposition of injecting young kids with this experimental drug is as ridiculous as thinking a mask prevents one from getting the Wuhan or that this drug prevents you from getting the virus or cures you if you have caught it.

Best Regards,

Neil Stewart

Subject: Comments regarding Proposed Policy

External Email

I am extremely opposed to the Proposed Policy "to allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination".

This is an extremely dangerous, Communistic policy that would be in direct violation to the laws of the land and the Constitution of the United States. The medical statistics both nationally and globally show that the vaccinated are the MAJORITY of the cases now in the hospital with COVID, and therefore transmitting the virus which would negate the statement in this policy to "comply with requests for vaccination". The vaccines are NOT preventing the infection and spread of the virus and therefore cannot be part of a required treatment plan. This policy does NOT follow the CDC statement that there are no known cases of a non-vaccinated individuals with natural immunity (previous infection) that has been re-infected and transmitted the disease, because it does not provide allowance for natural immunity. The Proposed Policy is not following science but rather is a bullying opportunity for officials to use at their discretion.

There is no FDA approved COVID-19 vaccination available (Comitry is NOT available in the USA) and therefore it is illegal to require an experimental vaccine and therefore the law enforcement and health officials would be the ones facing punishment, not the citizens refusing the vaccination as stated.

To forceably detain and isolate individuals or groups/families based on a very vague outline of requirements is giving carte blanche control to departments of state, that can lead to crimes against humanity as occurred in Nazi Germany. It is a RIGHT of the citizens of the United States to be able to live according to their personal religious and health convictions, and it is NOT a matter of government to control the population with threats of harm and punishment.

The proposed policy is vague and allows for dangerous interpretation and leeway. This is endangering the citizens of WA State and would create a dangerous situation for both citizens and officials.

I implore you NOT to pass this proposed policy or any form of it.

Subject: Comments Regarding School Mandates

External Email

To whom it may concern:

I am writing to state my strong OPPOSITION the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. COVID-19 shot mandates are unethical, period, as defined by the Nuremberg Code, especially for minors!

Additionally, I am in SUPPORT of Informed Choice Washington's Petition for Rulemaking, filed by Xavier Figueroa, PhD, on behalf of ICWA, which asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

The reasons for my advocacy are as follows:

Federal Emergency Use Authorization statutes prohibit school mandates of EUA products

The FDA admits the ultimate safety of these injections remains unknown.

The International Alliance of Physicians and Medical Scientists has declared that children should be excluded from vaccine mandates:

HEALTHY CHILDREN SHALL NOT BE SUBJECT TO FORCED VACCINATION BECAUSE OF THE FOLLOWING:

*

*

* Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.

* Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.

* Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.

* Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It is a violation of personal freedom of choice. On top of it, both the vaccinated and unvaccinated can both transmit and get Covid. Therefore, it makes no sense to require vaccination since it doesn't eliminate transmission or infection! As a reminder- covid is a VIRUS just like the flu. Therefore it will never go away. Just like the flu vaccination, it will not prohibit an individual from getting the flu. The same applies to covid. As demonstrated by the omicron variant- it is getting less serious in terms of hospitalizations. In addition, the vaccination is still considered experimental. How can you mandate a vaccine that is not officially approved? It is reckless and dangerous for the health of people. Please allow individuals to use their God given common sense in this area. There needs to be some level of trust that people will do the right thing.

Thank you,
Jenny Primm

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid
The vaccines are still only EUA (emergency use authorized)
There are no long-term studies to document any history of safety
Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
The vaccine apparently does not stop the spread of the disease
The disease will become endemic and will normalize within the population given time regardless of any vaccine use.

Thanks
Matthe Benson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State because the only FDA approved COVID-19 vaccine is Comirnaty, which is NOT available in WA State, and therefore any COVID-19 vaccine available is only administered under the Emergency Use Authorization. It is illegal to require/mandate an experimental drug or medical treatment that has not been issued FDA approval. For WA State to make the COVID-19 vaccination mandatory for school admission would be in breach of the laws of the land and would be subject to lawsuits. Not to mention the insanity of using our future leaders, our school children, as guinea pigs for a drug that has not completed the necessary long-term trials and studies.

It is imperative this mandate does NOT come to fruition.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We do not know that Covid 19 will always have a devastating effect on those that are infected. To make the vaccine a requirement is over kill for future generations. Flu shots are not currently mandatory for children as flu changes its spots every year. There is every chance that this Covid will run its course as it continues to mutate into different variants.

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest against recommending a vaccine for Covid for school aged children who attend school in Washington State. I am a 36-year veteran teacher. I am against imposing this vaccine on our children. I believe this to be a horrible abuse of power.

The available Covid vaccines are still of an experimental nature and have not been tested to prove their value and lack of long-term consequences. Never have we been forced to inject our children with a vaccine that has not undergone years of safety trials. Never have we forced children to receive a vaccine for a disease that primarily poses a risk for adults with comorbidities or are elderly.

School aged children have a 99.9998% survival rate from Covid. The vaccines do not provide protection against getting Covid as is seen by the number of "breakthrough" cases of those already vaccinated and boosted. Why require it?

The vaccines currently available are still only EUAs. Congress permitted the FDA to grant Experimental Use Authorization (EUAs) so that any American in a personal emergency can choose whether to explore potentially lifesaving treatments that have not gone through the full testing regime. In other words, the legal basis for EUAs is a matter of the individual right to access experimental treatments, not of government right to compel such treatments.

It is irresponsible to impose covid vaccines on children when there are side effects as grave as myocarditis already being reported and no long-term tests have been done. Parents must be able to make this decision for their children. You must honor their right to choose what is best. You must not marginalize parents' rights to take care of their children.

I live in Spokane, and I believe my side of the state is certainly underrepresented on this panel. Please look long and hard at what long term consequences of this kind of recommendation could have on our children, our school system and our communities.

Sincerely,

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I am not convinced that children suffer the same effect of covid as adults do. The science is not convincing.

It is my right as a parent to give permission to vaccinate my children not the state or federal government or a school district.

You will not vaccinate my children; I will remove them from the public schools, and I will home school them.

I also will not vote for any school bonds or levies.

Hello this is a parent of two school-age children whom I am advocating for. I am 100% against mandating these Covid immunizations. There has been no long-term studies done and they are a emergency use authorized medical procedure that will we will not be partaking in. I feel this mandate will be detrimental to not only the health of those who receive it but to those who are discriminated against who choose not to receive it. A child's livelihood is their school experience and this governmental overreach has gone to far.

Covid is nothing more than a seasonal flu and children are not a direct threat to anyone's health and furthermore are barely affected by it at all.

The most recent studies show that vaccinated can still catch, spread and die from Covid.. complications are the exact same for an unvaccinated individual...therefore this immunization does not even stop the spread of said virus.

Viruses have been around for thousands of years and will always be...man cannot control these flu like viruses... they have to run their course. The simple stay at home when you have a cold is a lost art.

If this mandate gets pushed through both my kids will be pulled from the public school system.

Best regards
Jennifer Crum

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.
2. Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.
3. Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.
4. Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether COVID-19 vaccines assist herd immunity.
5. There is no compelling reason to risk harm to our children by mandating the vaccine. The harm far exceeds the risk. In my opinion a mandate would be a violation of the Hippocratic Oath and the Nuremberg Code.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The long term effects of the covid vaccine have not been through extensive testing. We have no idea what the long term or even short term repercussions may be. Children are the least likely to be affected by Covid 19. Children pose NO threat to society.

Covid 19 has over a 99% survival rate.

As covid 19 is mutating it is becoming weaker and weaker as symptoms now line up with something close to the common cold.

We have human rights. To take those rights Away and push something that has NOT gone rigorous testing is Wrong and will NOT be accepted.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We know there is NO benefit to vaccinating children, and feel if you make this mandatory you are violating the nuremburg code. Officials were personally liable for this and many paid the ultimate price. Both victims and officials. We would like to avoid this whole thing and keep our children healthy, and when this began it was only for elderly that were "high risk".

The data has proven this is LESS deadly than the regular flu, but we ALL suspect you already know that. I personally feel you already know that....and it doesn't matter because this is no longer about "safety" or science. But culling and control.

We look forward to your decision

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I do not see any evidence whatsoever that children need to be immunized for Covid. In fact, they haven't done enough testing and I consider it harmful until that has proven. It needs to be up to the parents to vaccinate their own children or not. I do not believe this is constitutional for anyone in America to be able to make this mandatory!

Kind Regards, Lori L

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- We have freedom of choice in this country
- There are no FDA approved vaccines in the entirety of the United States (call them and ask them yourself)
- The flu is more harmful to children than Covid is
- The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Vaccines by their original definition and nature are to PREVENT one from contracting an illness (ie smallpox, measles etc). This vaccine neither prevents nor reduces ones chance of contracting the Covid-19 virus. As such it should NOT be made mandatory for children to attend public school or daycares.

This is a virus like the common cold or flu!

The use of these Vaccine/s are still under "The Emergency Use Authorization Act" and therefore no-one is or will be liable in the event of ANY adverse reactions as a result of the vaccine/s.

The data now coming in from around the globe shows that this vaccine poses a higher risk of children ages 6-18 developing adverse inflammatory responses in some children in that age group. We do not yet know what the long term implications would be on this most vulnerable group.

If anyone of you are willing to step up and accept liability for every student that you are going to require to get these vaccines, then by all means move forward. However, I don't think that anyone with any good or rational conscience would impose this on the students in WA public schools. Yet you are about to do that very thing without having full knowledge and information. I shutter to think what would, can or will happen to these innocent children because of the politics of this VIRUS!

Respectfully,
Jessica Hansen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. At the end of the day, this is vaccine research on a mass scale, we don't know what the side effects are in 5 years. That is a fact.
- 2.) It poses undue hardship on parents who don't want to vaccinate their kids. Forcing parents into homeschooling and the potential financial repercussions to that family is not good for a society trying to find its economic foothold again.
- 3.) It's been proven that the vaccines are not "safe and effective." There's been a marked increase in myocarditis (heart inflammation) post Covid vaccine shot. The treatment for myocarditis, amongst other things is up to 6 months no strenuous physical activity. Imagine telling your 9 year old he can't run, climb, play with his friends, go to soccer practice for half a year. Sounds like the cure is worst than the disease. Further, the "vaccines" do not prevent the spread of covid and one can still get covid after getting the vaccine. This is a fact. I am currently deployed military personnel and 12 guys, fully vaccinated, just popped hot for Covid 19.
- 4.) The state has no place in making health decisions for my child.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

There is no long term studies on these vaccines and those that are out are shown to sterilization as being a risk.

The vaccine has prove to be ineffective as both vaccinated and unvaccinated as both still get and transfer it.

The data doesn't support that it actually lessons symptoms as most people don't have a severe reaction and a 98% survival rate. And our hospitals have been filled with both vaccinated and unvaccinated, with hardly any children.

Children aren't a high risk category.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at little to no risk of dying from Covid-19 and are not transmitting it to adults.

Children's bodies are still developing and could be put at risk by the experimental vaccine.

There are many cases of children and young adults developing heart problems as a result of being injected with the vaccine.

The vaccine could pose a harm to a girl's reproductive health.

The Pfizer vaccine that is being injected into children isn't even the version approved by the FDA. The vaccine being injected into children is the still-experimental vaccine, which has not been proven safe. In fact, Pfizer is unwilling to reveal the ingredients in the vaccine and refuses to submit evidence of its safety.

Children look to adults for protection. It is our job to ensure they are protected. It is irresponsible and inhumane to experiment with our children. We cannot undo the damage once harm has been done. If damaged, our children will suffer the consequences for the rest of their lives.

Reckless, is the one word that encompasses this issue. An issue I still can't believe is even a discussion. I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Recklessness for trying to coerce families and kids to continue with this experiment. An experiment, where no one knows the long term effects. An experiment for a virus that does not affect any healthy kid more than what we knew as the "normal flu".

Last I saw, the experimental jab (or what the government has tried to change multiple times to be considered a "vaccine") was causing more harm to kids than the actual virus. This is eye opening and something that really needs to be taken into account. Why put our youngest generation of hope AT RISK for something so minor to them. It does not matter if ANYONE is vaccinated or not vaccinated, they still can transmit this virus. While kids are less likely to transmit this virus altogether, they are the ones suffering the most during this time of non-socialization, seeing people with masks covering a majority of the face, of being alone.

This jab, in my mind and in the minds of a majority of WA, is useless and extremely unnecessary for kids. Sure, schools can get government funding for each kid that follows the "guidelines".....is it worth, folks?

Please keep our kids clean and clear of whatever this experimental jab has within it, which is still a mystery, as these pharma companies are holding back on providing all the ingredients.

Kids need bacteria and viruses in their system, it's a part of our human lifecycle. They have the strongest immune system and are taking covid like champs...naturally...the way it ought to be!

Thank you for hearing all of our thoughts. We really do appreciate you taking it to heart and understanding the severity of this potential "mandate"

One love,
from all of WA

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It's not necessary for children and
It has not been adequately tested to be safe.
There has not been sufficient data to prove efficacy

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Freedom of health care,

Long term effects of the vaccines is unknown,

Covid has morphed multiple times yet we are treating at the same. Different people with different scenarios have been affected differently by the three different strains. I don't believe one vaccine is doing anything. I believe this is just towing the line because somebody said we should.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for these reasons: children have very strong immune systems, the vaccinations are experimental and long term effects are not known, they also have a 99.9% recovery rate.

It is the choice of the individual parent to make the decision to vaccinate. Medical freedom is what makes us a free country and should not be regulated by a government agency. The human body is uniquely made and what works for one individual does not necessarily work for another and again God gave us wonderfully strong immune systems which are able to fight illnesses. We do not yet know what the long term effects of the vaccinations are but there have been many immediate adverse reactions recorded to date. Please do not mandate these vaccines for children or any human being. To do so is an extreme overreach of power and a wreck less approach of medicine. I am absolutely opposed to the Cov 19 encampments for the unvaccinated. It is against our Constitutional rights!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

These COVID-19 mandates are totally unconstitutional, against parents rights and against human rights!

It's proven to not Prevent spreading of COVID-19.

It's only approved for emergencies.

Children that have received the "vaccine" have already been having adverse effects.

Some people Have existing health problems that this experimental "vaccine" would be detrimental if taken.

Many people already know that this is not about COVID-19 this is about a political agenda!

Where is your conscience? Like it or not, believe it or not, you are accountable before God for the actions you do here on earth! We all are!

I hope and pray you make the right choice and do not mandate this on humans.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at very, very low risk for Covid
- * The vaccines in use are still only authorized for emergency use
- * I am very concerned about the fact that there are no long-term studies to document any history of safety or impact of these vaccines.
- * Studies do not document that vaccinated and unvaccinated can both transmit Covid, therefore
- * The vaccine apparently does not stop the spread of the disease.

Do not make our kids take a vaccine we don't know the effects of to attend school.

Thank you for your time.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

There is no evidence that children are at high risk for contracting or spreading COVID-19

The vaccine is not stopping people from contracting or spreading the virus so it makes zero sense to put this into our children when they are at low risk anyway of suffering severe illness from the virus.

There needs to be much more long term research on the effectiveness of this vaccine before we start injecting our children. We no nothing about the long term effects and since the virus is not fatal to children we should not be giving it to them until and unless it has been fully studied.

There are still so many unknowns about this virus. The data keeps shifting. Our children do not need to be guinea pigs and potentially cause long term harm to them with an experimental vaccine for a virus that is not a serious threat to them.

Thank you,
Laurie Smith

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * The risk of children developing serious illness due to Covid-19 is extremely low.
- * The vaccines are experimental and have not completed the clinical trials
- * There are documented adverse reactions to the vaccines
- * The risk of Myocarditis and Pericarditis is too great
- * There are documented cases of children dying due to the vaccines
- * There are medical treatments available without having to give the vaccines

Please do not mandate this. It is not reasonable or necessary.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

First it is against the law to force anyone to get any medical procedure. Second children have a natural immunity. If the governor goes forward with this it will cause the schools to collapse as parents will pull their children and home school.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Because this vaccine hasn't been around long enough or even been tested long enough to know the effects it will have on children. Some children that get it end up getting more sick or dying. If you are going to mandate it give it more time just like the other vaccines that are required. They did not get mandated as soon as they came out, it took time to make sure it worked and was safe.

Thank you for your listing,

A double vaccinated 13-year-old boy from Voorhees, New Jersey suddenly died in an “unexplainable cardiac arrest while playing with his friends” according to a now-deleted Facebook post by his father.

Jack Thomas O’Drain suffered a sudden cardiac arrest on New Year’s Eve and was on life support in Children’s Hospital in Philadelphia. He passed away on Tuesday. Jack Thomas O’Drain’s burial will be held on Monday, January 10th.

There’s still little information known to the public on the cause of his death and that made people question what precipitated the tragedy.

People on social media can't stop linking his sudden cardiac arrest to the COVID-19 vaccine. On June 6, 2021, his mother posted on Facebook a photo
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.facebook.com%2Fphoto.php>
of him showing a thumbs up after receiving his second shot.

Fast-forward less than seven months and Jennifer's husband Trent wrote in a now-deleted Facebook post, "Dear family and friends. Our son Jack had an unexplained cardiac arrest on New Year's Eve shortly after the ball dropped while playing with his friends."

"He is on life support at Children's Hospital in Philadelphia," the father continued. "Jennifer and I have been by his side, holding his hand and praying for healing and hope. The outpouring of support has truly been what is keeping us going. I love you all and please pray for our son. God help us."

Days later, Jack tragically passed away.

His obituary

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bradleyfhmarlton.com%2Fmthomas-odrain%2F4821019%2Fobituary.php%3Ffbclid%3DIwAR266oINyj3sXMxgvu7tqNmR0Tfo_YJTz8i6gpcmogr9
page reads, "Jack will always be remembered for his big heart, love of learning and loyalty to family and friends. He was extremely bright; he attended Voorhees Middle School and was a part of the Science Olympiad Organization. Jack enjoyed playing the saxophone and practiced at the NJ School of Music in Medford. He loved the outdoors; hiking, camping and fishing were some of his favorite activities. Jack loved game nights playing monopoly, rummy 500 or watching a good movie but most of all it was the time he spent with his family and friends that he treasured the most."

Since the FDA approved

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2-panel-approves-pfizer-covid-vax-kids-ages-5-11-concedes-doesnt-know-long-term-risks-children-video%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c1929d9878a4049237708d9d204f056%7C11>
the experimental covid-19 vaccine for children cases of myocarditis
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2-panel-raises-concerns-vaccine-induced-myocarditis-children-age-5-11-8-confirmed-cases-quickly-show-vaers-less-2-months-jab-approved-age-group%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c1929d9878a4049237708d9d204f056%7C11>
have been reported in children after taking the Pfizer jab, according to CDC officials.

Keep in mind, 5-15-year-old children have only been eligible to take the Pfizer vaccine as it's the only vaccine authorized by the FDA

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fvaccines%2Frecommendations%2Fchildren-teens.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c1929d9878a4049237708d9d204f056%7C11>
.

The Gateway Pundit published a report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2-2-canada-covid-care-alliance-analysis-shows-pfizers-vaccination-kids-risk-no-benefit-pfizer-acknowledges-will-cause-myocarditis-children-video%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c1929d9878a4049237708d9d204f056%7C11>
released by the Canadian COVID Care Alliance
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.thegatewaypundit.com%2F2-watch-canadian-covid-care-alliance-explains-pfizer-shots-can-harm->

good%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9c1929d9878a4049237708d9d204f056%7C11c
explaining why Pfizer shots can do more harm than good to people.

According to page 24 of their in-depth analysis, the vaccination for adolescents is really all risk and no benefit. Adolescence are at statistically zero risk of death from COVID-19 and very low risk of severe illness.

Signed,

J.D. Bonnar

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. A) Children are at extremely low risk of contracting or having a serious reaction to the Covid 19 virus.
B) All school employees have already been required to get vaccinated against Covid 19 in order to keep their jobs, therefore they should be at low risk of contracting it.
C) Forcing children to get vaccinated would be an extreme reaction, and severe invasion of our rights, to a very low risk situation

2. A) Vaccinated individuals have been proven to be just as capable of spreading Covid 19 as unvaccinated individuals thus there is no benefit to the greater community when a person chooses to get vaccinated, only to that specific person.
B) A person should be allowed to choose (or a parent for their minor) whether or not to get vaccinated.

Please protect our children, their rights, and their futures by opposing mandatory Covid 19 shots.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * There are no long term studies on the effect these vaccines have on children. Our children are our future and their lives are simply too important to risk with unknown possible impacts on their heart, brain and reproductive systems;
- * Children have an EXTREMELY low risk for Covid;
- * A mandate does not account for the many have antibodies that provide far better protection than a vaccine;
- * The vaccines are still only EUA (emergency use authorized);
- * It is extremely clear that both the vaccinated and the unvaccinated can transmit covid and the vaccine does not stop the spread of the disease;
- * Creating a mandate will force significant hardship on many families who simply will not vaccinate their children and who will be forced to pull their children from the school system and/or relocate to a state that does not have such unnecessary mandates.

Thank you for your consideration and for your anticipated willingness to act in the best interests of our children.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Aborted fetal tissue was used in the development of Covid vaccines

My 6 children are at low risk to being harmed by Covid and the vaccines may be riskier to youth than the virus

The elderly are more at risk and I am not in favor of sacrificing the health of your lath for the health of the elderly. 1 out of 1 individuals will die eventually. Let's let our children live.

The vaccine is still for emergency use and the one being administered is not FDA approved.

I love my kids and I am glad they are in public school, but if pressed, we will find alternate means of education.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It is absolutely senseless to require mandatory COVID-19 shots since it has been proven over the past six months that this vaccine does not prevent transmission of the virus, nor does it prevent the recipient from developing the disease.

Children are not susceptible to COVID-19 the same way elderly adults are. Fewer children die of COVID-19 than die of the flu. It is a travesty for public health officials to push this vaccine on children ages 5 - 11 which all the data show will do more harm than good.

First and foremost, as public health officials, you need to do no harm. If you vote to mandate this dangerous experimental mRNA treatment for children to be able to attend school you will be doing harm and will be held accountable.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are not at great risk for severe reaction to Covid-19. I say this as a parent of 3 young children.
2. The shots do NOT stop the spread of the virus. This is common wide spread know now. Therefore, it should be a personal health decision.
3. There have not been long term studies on the shots and therefore the risk/cost analysis weighs heavily on the potential of risk from the vaccine. We just don't know how they will affect our children in the long run.

Please PROTECT our children. Do NOT mandate Covid vaccines.

Sincerely,
Kimberly Anderson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: the vaccines are experimental and have not been studied for long term effects. The vaccine is not effective, it is no more than a flu shot. Children do not transmit the virus as easily and it is rarely deadly for them. The use of stem cells in the vaccines are concerning. Terrible side effects can be seen in children who have taken the vaccine.
Thank you

Public Servants,

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The numerous so-called vaccine shots are dangerous and have led to unintended medical problems and even deaths. In many cases the so-called vaccine shot has done far more damage, including deaths, than if the individual treated the Covid symptoms with conventional treatment regimens for the flu.

This proposed mandate is forcing free citizens to take part in actions that are ultimately risky and detrimental to their health.

This proposed mandate exceeds the legal authority of the body attempting to codify it into law.

Any legislated action that is contrary to the rights of the citizens or the restrictions placed on the government by our U.S. Constitution or the Washington State Constitution is "NULL AND VOID", as decided by the U. S. Supreme Court in Marbury v Madison. Look it up.

The NAZI Party passed laws that violated the rights of German citizens in the 1930's. The same socialist party that isolated a segment of society and persecuted that demographic is no different than the current "democratic socialist" party controlling the Washington Legislature and attempting to enact into law clear violations of our Constitution.

History has demonstrated that singling out a demographic of the population as a scape goat for problems faced by the population leads to horrific crimes and destruction. Attempting to force healthy individuals, children in this case, but adults as well, is nothing short of criminal. Those who knowingly take part in promoting this kind of punitive and coercive action are manifestly criminal.

I urge you to avoid the inevitable chaos, suffering, and conflict that this proposed legislation will wreak on the citizens of Washington State.

If your intent is truly based on concern for public health, and not on controlling the populace, then treat the sick with effective and inexpensive compounds that have been rightly approved for decades, like Hydroxy-Chloroquine and Ivermectin. And leave the healthy people alone to go about their lives contributing to the productivity and mutual benefit of our communities.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in WA State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I have three children of school age, and I cannot in good conscience subject them to such treatments with no long term studies, much less such diminishing efficacy as we are seeing with each successive variant.

Please feel free to contact me for additional comments or clarification.

Respectfully,
Nick Heermann.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Children are extremely low risk for Covid and when they do have it they have mostly mild symptoms.
2. The vaccines are still only Emergency Authorized use and therefore not enough is known about them.
3. There are no long terms studies because of the above. Therefore we do not know what types of issues the children will have down the road from this vaccine. The most recent reports of boys experiencing inflammation of the heart is disturbing. This may lead to further issues. Also I have read studies showing autoimmune diseases are on the rise and our children may then become ill with other things because of this vaccination.
4. Studies Now document that both vaccinated and unvaccinated people can transmit covid, therefore there is no reason to press the issue. Those who wish to can and others can choose not to do so.

Our children are of vital importance. It is absolutely important that we take the best care of them as they need us to be aware of all the issues surrounding this. My own children are grown but I have concerns over my grandchildren and wish for them to live long and healthy lives. I hope you will research all the information available and not just the items you have been given. It is your duty to do this. It is all too easy to just listen to those things they want you to know. Do your own research and see if these things are not true. I have done lots of research and feel our children should be protected for the future and not harmed by giving them the vaccine.

Thanks for reading.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These vaccines are still only EUA and as children are at a very low risk for COVID19, it simply does not make sense to require it. There are no long term studies that confirm and document safety of the vaccines and it has not been found to stop transmission. Children should be protected, not subjected to experimental testing.

Thank you.

A concerned citizen and parent,
Heidi

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- * These shots or as the President refers to them "vaccines" are not truly a vaccine against the COVID-19 virus. These "vaccines" barely are a treatment in that they may lessen the symptoms of the disease but even that has not been proven.
- * These "vaccines" are still only authorized for emergency use only.

- * There are have been no long term studies to document the effects of the safety of these shots. You can't compare instituting this "vaccine" with others that are given to children. True vaccines, such a Polio or Mumps, Measles, Rubella were not instituted until after years of long term studies.

- * Studies do show that both the vaccinated and unvaccinated can both transmit COVID-19 so clearly the "vaccine" does not stop the spread of the disease. In fact, what we are seeing now with the Omicron variant, is that vaccinated individuals are becoming infected with the disease at a higher rate than the unvaccinated.

- * Children are at extremely low risk for contracting the disease and if there is no co-morbidity, and the child does get the disease, they recover very quickly.

Please do not force our children, in order to get an education, to put their lives and future at risk!

Sharon Boggs

Now, with the rollout of the COVID vaccines, it is becoming commonplace.

Remember Jacob Clynick, the 13-year old from Minnesota who died of cardiac arrest on June 20, 2021, just 3 days after his second Pfizer shot?

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Femail.mg2.substack.com%2F%2FVJwiKLq5HmN1AehtJCwiShd3q_flxYjRTZji370OfE2wpzym-zp1KbjxnrewcT4busUCvk5iiQxyUYqQkXfOBNM CJQLXWzIHHKAJtdVIPzAc1-uHXxti4pnh1Ccy mau2EycEqcJ2rqJeecUq0Z0YRYrrgK9gK2R1ggejDwgvxOEZrV3Gvdy41_3dhvPD7ErhyuVOufgurvH49jarqxX3-ugH_NKQW8T-u45zRnKGV5AeZLBdix44Jg8gMiPzBo3OGfgPXcApHOeS1aZy1vBVfQDpLq1gbHmQOIBi26wju72Z8U7Xe59sIZLSuo6h47zM1iGGGMUKLIwFCAjnVy4J5S2RNrkU7dd4_3D9-OWdwe2Wb2H0dNNi7FaPMjYHX-iHWmcb0R_XbEpb5HiNatEC4Z6_UbTmHHGSJk_CVhtNXQXIAplBgIPuJSDXUWvcLle9YgbkjYFQ2S-4Lnkou__wNlecU0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9694b2d64e5840c8685e08d9d1f0d556>

. It references emails which indicate that the autopsy had been completed prior to June 28, 2021. Silence from the CDC regarding the cause of death. Seriously?!?!? Jacob dies just 3 days after the jab due to cardiac arrest and six months later, despite the myocarditis link that they admit, they cannot figure this one out? WTF? Where is the accountability?

Ernest Ramirez's son died of cardiac arrest as well, but he was 16. Dr. Peter McCullough looked at the death records and determined the death was caused by the vaccine. No acknowledgement from the CDC. Again, where is the accountability? Does the CDC have a better qualified expert than Peter McCullough? Did McCullough goof? Well, we don't know because nobody is talking.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Not only are many children I know, amongst others, allergic to immunization and could potentially die from one, Covid- 19 is still transferable with vaccine, children are at very low risk for covid 19 problems, the vaccine has not been proven safe and immunization are not for everyone. Everyone's body is different and only ones self knows thier own body best. Everyone should have the freedom to make what they decide is best for their own body. Requiring all children to be forced a vaccine is simply irresponsible, inhumane and not caring for the individual persons they are and we need to protect everyone's rights and choices. Whether we agree or disagree, only ones self is responsible for thier choices and thier own body .Discriminating people by taking everything away unless the comply is not a choice, in all my years working in Healthcare ,seeing peoples health history , I was never allowed to treat them different no matter what they may have been dealing with and we should be doing the same. I AM OPPOSED .

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid and many children have also been harmed by the vaccines. Parents have the right to decide if their child gets a vaccine, period.

Since the technology is incredibly new, there are no long term studies.

Both unvaccinated AND vaccinated transmit Covid, so mandates like this will not do anything to prevent transmission.

Vaccines are still only EUA.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are not at high risk and are not dying from the virus. This covid shot on the other hand, does have high and extreme side effects that have resulted in death. Children should not be sacrificed for the adult's safety by inheriting life long biological damage, especially when 99% of all who are infected by the virus recover. This risk does not outweigh the reward. The covid injection is an experiment and children should not be experimented on ever.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The numerous so-called vaccine shots are dangerous and have led to unintended medical problems and even deaths. In many cases the so-called vaccine shot has done far more damage, including deaths, than if the individual treated the Covid symptoms with conventional treatment regimens for the flu.

This proposed mandate is forcing free citizens to take part in actions that are ultimately risky and detrimental to their health.

This proposed mandate exceeds the legal authority of the body attempting to codify it into law.

Any legislated action that is contrary to the rights of the citizens or the restrictions placed on the government by our U.S. Constitution or the Washington State Constitution is "NULL AND VOID", as decided by the U. S. Supreme Court in Marbury v Madison. Look it up.

The NAZI Party passed laws that violated the rights of German citizens in the 1930's. The same socialist party that isolated a segment of society and persecuted that demographic is no different than the current "democratic socialist" party controlling the Washington Legislature and attempting to enact into law clear violations of our Constitution.

History has demonstrated that singling out a demographic of the population as a scape goat for problems faced by the population leads to horrific crimes and destruction. Attempting to force healthy individuals, children in this case, but adults as well, is nothing short of criminal. Those who knowingly take part in promoting this kind of punitive and coercive action are manifestly criminal.

I urge you to avoid the inevitable chaos, suffering, and conflict that this proposed legislation will wreak on the citizens of Washington State.

If your intent is truly based on concern for public health, and not on controlling the populace, then treat the sick with effective and inexpensive compounds that have been rightly approved for decades, like Hydroxy-Chloroquine and Ivermectin. And leave the healthy people alone to go about their lives contributing to the productivity and mutual benefit of our communities.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our state for the following Reasons: Children have a 99.997% survival rate. This is an Emergency Authorized Gene therapy program that we do not know the long term effects. How can you in good faith require something that could possibly maim or sterilize children down the road? Dr. Robert Malone the inventor of MRNA gene technology is strongly advising that children do not take this vaccine. How can you go against the person who has been researching and inventing this technology with a clear conscience? There is no guarantee that this will not do major harm to the children.

Thank you

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Vaccinated people can and are getting and spreading the virus as well.

Children are at an extremely low risk for Covid.

It is still an experimental vaccine with no long term safety studies.

Many people are being harmed by the vaccine. It has resulted in death or long term disability claims. Insurance companies are sharing this concerning data that the government health organizations and media are shamefully not sharing.

Everyone has a right to make their own medical decisions and still be educated.

Medical doctors specializing in virology are opposed to mandating vaccines and have many concerns about this specific vaccine.

Those same medical specialists say it is harmful to vaccinate someone with natural Covid immunity.

Please make the just and right decision. Let people make their own health decisions. This virus is now like the flu, very transmissible but not very harmful for most people. Everyone will get it. Big is now part of life. Release your overreaching control of others now.

I am opposed to making COVID-19 shots mandatory for school children! The vaccines do not provide protection from getting or spreading the virus. I know this because I AM VACCINATED and was infected with the Delta variant in the fall—specifically, I was infected by a person who was also vaccinated. It is clear now that these vaccinations do not stop the spread of the illness. It is also clear that children rarely get the virus. With that said, the risks of forcing children to get these shots to attend public schools is just wrong and nonsensical from a public health standpoint.

Yes, the shots have shown to lessen the severity of the virus, therefore if school children and their parents want to get the shot, that should be available to them.

There have been no long term studies on the safety of these drugs, therefore forcing children to take them into their body to attend school is dangerous and not scientifically justifiable.

I strongly urge you NOT TO ENACT this rule going forward. Let's wait and see how the virus plays out before we potentially harm our children with long term health affects of an untested drug for a virus that is less dangerous for their population than the seasonal flu.

Dear Ladies and Gentlemen of the board,

I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State, and forced quarantine. The proposed Covid policies are over reaching and immoral!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Forced vaccination of healthy children, for a disease that does not affect them, to make adults feel safe, is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Respectfully,

Jameson N. Pratt

I am opposed to making COVID-19 mRNA mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do not document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

In addition I oppose law enforcement being able to pursue individuals or families who are not vaccinated and implement designated locations for those to reside. This is the a pitta me of Tierney. This country was established or founded on the idea of freedom. Each freedom that is removed from an American is a step in the wrong direction.

Thank you,
Maria Peterson

Hello,

Thank you for reading this important message. I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- Children are at extremely low risk for covid.
- The vaccines are still only for emergency use authorized (EUA)
- There are no long term studies to document ANY history of safety.
- Studies do not document that vaccinated and unvaccinated can both transmit covid. Therefore,
- The vaccine apparently does not stop the spread of the disease.
- This potential mandate violates the personal rights of the parent to make personal medical choices for their children and family.

In light,

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

My rights as a citizen of the United States to determine my health and my families health options, not the government responsibility. That should be all you need to here. With that said, this vaccine is only in the EUA phase, no long turn studies available on future health risk, to many hands reaching into the money pit deciding what's needed. In other words no non profit oversight!

Lastly, I got the shot and booster and I'm now having lymphatic issues. Medically documented and from the start of the pandemic and now they want me to do biopsy on my lymphatic system!

So if you decide to make it mandatory for me to tell my kids "daddy does not have a choice" you better provide a alternative school option like my tax money staying with me or private school so we can keep my kids out of public schools and truly safe!

Respectfully,

Jared Goodson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * natural immunity is far superior
- * the 'vaccines' do not stop the disease or the spread of the disease
- * the 'vaccines' are causing harm and even death in people
- *there is minuscule risk for healthy adults and especially children who get covid
- *there are no safety studies
- *long term side effects are unknown
- *the 'vaccines' have the potential to cause even worse autoimmune disease
- *there is literally no benefit to 'vaccinating' children for covid, only potential harm

Thank you,

Cory and Jamie Bostick

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State and allowing Health Officers powers to enforce unlawful detainment for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are current peer reviewed studies indicating they cause more physical harm than good
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of Covid

Please take into consideration how supporting such measures will continue to contribute to our spiraling economy, mental health crisis and emerging civil unrest that puts our children and other residents of Washington at great risk. Ultimately, I do not give consent for anyone to make medical decisions for my children other than myself and spouse. I will exercise my rights and defend my children against discrimination, civil rights violations and irreparable harm posed by these unlawful attempts of control and abuse of power.

Thank you,

Mallory Fisher

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Both vaccinated and unvaccinated catch the virus

Children are at low risk and the unproven effect of this virus over time has yet to be shown, making this a high risk practice for our children.

The vaccines are still in Emergency use status, not approved long term.

This is a complete overreaction to the situation, and putting our kids even MORE at risk long term by giving them an unnecessary vaccine because of short term fears.

I OPPOSE THIS! THIS IS NEITHER WISDOM NOR GOOD SAFETY PRACTICE.

L. Eide, Blaine

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons: There are no long term studies to see how this will affect the children. Not to mention they are at very low risk for the virus. It's a cold. That is what a coronavirus is. This is unacceptable and unconstitutional to force our children and parents to make this choice. If you proceed with this, it's almost guaranteed that people will pull their children out of the public educational system in this State. Please vote NO!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:
There are no long term studies detailing the implications for taking it. It is STILL being administered under the EUA. You can't mandate something that is still under an EUA! The emerging data appears to show that the efficacy is very low (and short term). There is also emerging data that brings into question the harm the vaccine can do. Bottom line: it's too early to mandate this drug.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. There are not enough studies to show how the ingredients in the vaccines impact children's growth, development, and fertilization. We do NOT know how this vaccine will impact children's overall health and well-being especially as they grow and develop.
2. Parents should have the ultimate say regarding what medications their child receives. Taking this decision away from parents denies liberty and personal freedom to make decisions about their children bodies and how to make sure they develop in the healthiest way possible.
3. Children need to attend school for social skills. I think if the vaccine is mandated a lot of parents will pull their children from school. This will negatively impact their social skills and put children with poor home environments with no one to check on them on a regular basis at greater risk of danger.
4. School districts will lose money if less children attend school. This will impact the economy of each city in our region. The economy is suffering already enough with inflation, staffing issues, and supply chain issues. This will only add to an over-stressed economy.

I am opposed to making COVID-19 shots mandatory for school admission and/or childcare in our State for the following Reasons:
Our children are at low risk for COVID. Children's recovery rates from COVID are tremendous. The side effects (especially those long term) of COVID vaccinations has not been well researched or documented. And the vaccinated and unvaccinated both transmit COVID. Therefore the COVID vaccine is not stopping the spread of COVID. The possible reward of public health or health to adults in no way outweighs the risks presented to our children if the State of Washington mandates COVID vaccinations for all our youth. COVID vaccinations could be worse for the long term health of our children putting their future's at great risk!
This is a serious matter and there is hope that the WSBOH will make the right decision and leave COVID vaccinations to the discretion of each individual and decide against mandatory COVID vaccinations.
Thank you.

To Whom It May Concern:

Please let the record show that I DO NOT support a mandatory vaccine for children. Please keep in mind that children are at an *extremely* low risk for covid and that the vaccines are still only EUA (emergency use authorization). Forcing a vaccine that is one, extremely controversial with absolutely zero long term data, and two, very clearly does not stop the spread of the virus, is a gross misstep of power.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

This is RIDICULOUS! This is NOT the government's choice to make. This is the PARENTS' choice to make - and theirs alone. The government is getting way too greedy with this covid control and not everyone is a submissive little sheep like you want us to be.

It's legal for MINORS to get abortions, but then you want to MANDATE a shot that has been out for less than 2 years to "save lives?" You allow people to KILL unborn babies, but at the same time you're SO concerned with "saving" lives that you want to mandate a shot? And you know this shot doesn't save lives - even Biden gave up the covid fight because he can see the vaccine isn't working like he promised it would. So stop playing games and leave WE THE PEOPLE alone! The parents know best - not some power hungry pervert trying to put chemicals, without knowing the longterm affects - into our kids' bodies. Your hypocrisy and double standards are appalling. Stop trying to control our lives. Your job is to stay out of the CHURCH and HOUSEHOLD. This is America - and if you don't like it, you're welcome to leave. BACK OFF OUR KIDS!!! This is 100% unacceptable.

I am strongly opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * First and foremost, there have been and are no long-term studies documenting any history of safety with the shots.
- * Children are at extremely low risk for both contracting or suffering death from Covid.
- * The vaccines are still ONLY authorized for emergency use - they are not FDA approved, having gone through years and years of studies and testing.

- * There are studies that document both vaccinated and unvaccinated can equally transmit Covid.
- * It therefore stands to reason that the vaccine does not stop the spread of Covid.

Please do not make our children guinea pigs!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I have reason to believe, based on factual evidence, that children are at an extremely low risk for COVID. With recent updates regarding transmission between both vaccinated and unvaccinated, evidence shows the vaccine does not stop the spread of COVID. I believe vaccination status should be a choice and not mandated for children. I personally have a 10-year-old niece that does not want to be vaccinated, and I believe that she has a choice. I am standing for her voice, including the rest of our future generations that deserve to live with freedom of choice.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: The vaccination was only allowed due to emergency circumstances. There has not been enough study trials to consider it safe for children. It is also unconstitutional. We are a country that prides its self on freedom of choice. Like previous vaccinations, parents had a choice of whether their child took the vaccination or not. I would to see children forced to get vaccinated especially when we do not know how their bodies will react from lack of testing.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

*Children are the least affected by Covid 19 and any of it's variants. They typically have only mild to no symptoms.

*Studies have revealed that even Fully vaccinated people do contract and spread COVID 19. (We personally know many people Fully vaccinated that have gotten the virus)

*There have been thousands of young people who have received this Vaccine who now suffer from Myocarditis. (Documented)

*The risks of receiving this minimally studied vaccine Far outweigh any risk of non-vaccinated status.

*The government has no right to "mandate" citizens to receive an injection against our will and decision.

*Parents have sole responsibility for making medical decisions for their children along with their doctor. Not any government entity.

Thank you for siding with Constitutional American Freedoms and Liberty.

Sincerely,

Larry Howe

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Please read the attached.

Open Letter from UK doctors: Safety and Ethical Concerns Surrounding COVID-19 Vaccination in Children to Dr June Raine, Chief Executive, MHRA

We wish to notify you of our grave concerns regarding all proposals to administer COVID-19 vaccines to children. Recently leaked Government documents suggested that a COVID-19 vaccine rollout in children over 12 years old is already planned for September 2021, and the possibility of children as young as 5 years old being vaccinated in the summer in a worst-case scenario.¹

We have been deeply disturbed to hear several Government and SAGE representatives calling in the media for the COVID -19 vaccine rollout to be “turning to children as fast as we can”.² Teaching materials circulated to London schools contain emotionally loaded questions and inaccuracies³. In addition, there has been disturbing language used by teaching union leaders, implying that coercion of children to accept the COVID-19 vaccines through peer pressure in schools was to be encouraged, despite the fact that coercion to accept a medical treatment is against UK and International Laws and Declarations.⁴ Rhetoric such as this is irresponsible and unethical, and encourages the public to demand the vaccination of minors with a product still at the research stage and about which no medium- or long-term effects are known, against a disease which presents no material risk to them. A summary of our reasons is given below and a more detailed fully referenced explanation is available.⁵

Risks and benefits in medical treatments

Vaccines, like any other medical treatment, come with varied risks and benefits. Therefore, we must consider each product, individually, on its merits, and specifically for which patients or sections of the population is the risk/benefit ratio acceptable. For COVID-19 vaccines, the potential benefits are clear for the elderly and vulnerable, however, for children, the balance of benefit and risk would be quite different. We are raising these concerns as part of an informed debate, which is a vital part of the proper, scientific process. We must ensure that there is no repeat of any past tragedies which have occurred especially when vaccines are rushed to market. For example, the swine flu vaccine, Pandemrix, rolled out following the pandemic of 2010, resulted in over one thousand cases of narcolepsy, a devastating brain injury, in children and teenagers, before being withdrawn.⁶ Dengvaxia, a new vaccine against Dengue, was also rolled out to children ahead of the full trial outcomes, and 19 children died of possible antibody-dependent enhancement (ADE) before the vaccine was withdrawn.⁷ We must not risk a repeat of this with the COVID-19 vaccines, which would not only impact on the children and families affected, but would also have a hugely damaging effect on vaccination uptake in general.

No medical intervention should be introduced on a ‘one size fits all’ basis, but instead should be fully assessed for suitability according to the characteristics of the age cohort and of the individuals concerned, weighing up the risk versus benefit profile for each cohort and the individuals within a group. This approach was outlined last October, by the head of the Government Vaccine Task Force, Kate Bingham, who said “We just need to vaccinate everyone at risk. There’s going to be no vaccination of people under 18. It’s an adult-only vaccine, for people over 50, focusing on health workers and care home workers and the vulnerable.”⁸

Children do not need vaccination for their own protection

Healthy children are at almost no risk from COVID-19, with risk of death as low as 1 in 2.5 million⁹. No previously healthy child under the age of 15 died during the pandemic in the UK and admissions to hospital or intensive care are exceedingly rare¹⁰ with most children having no or very mild symptoms. Although Long-Covid has been cited as a reason for vaccinating children, there is little hard data. It appears less common and much shorter-lived than in adults and none of the vaccine trials have studied this outcome^{11 12}. The inflammatory condition, PIMS, was listed as a potential adverse effect in the Oxford AstraZeneca children's trial¹³. Naturally acquired immunity will give broader and better lasting immunity than vaccination¹⁴. Indeed, many children will already be immune¹⁵. Individual children at very high risk can already receive vaccination on compassionate grounds¹⁶.

Children do not need vaccination to support herd immunity

Already, two thirds of the adult population have received at least one dose of a COVID-19 vaccine¹⁷. Models that assume vaccination of children is required to reach herd immunity have failed to account for the proportion who had immunity prior to March 2020 and those who have acquired it naturally¹⁸. Recent modelling suggested that the UK had achieved the required herd immunity threshold on 12 April 2021¹⁹.

Children do not transmit SARS-CoV-2 as readily as adults, moreover adults living or working with young children are at lower risk of severe COVID-19²⁰. Schools have not been shown to be the focus on spread to the community, teachers have a lower risk of COVID -19 than other working age adults²¹.

Short-term safety concerns

As of 13th May, the MHRA²² has received a total of 224,544 adverse events, including 1,145 deaths in association with SARS-CoV-2 vaccines. Reports of strokes due to cerebral venous thromboses were initially in low numbers but as awareness increased, many more reports led to the conclusion that AstraZeneca vaccine should not be used for adults under 40 years of age and this unpredicted finding has also led to the suspension of the Oxford AstraZeneca children's trial.

Similar events have been noted with Pfizer & Moderna vaccines on the US adverse reporting system (VAERS)²³ and it is likely that this is a class effect related to production of spike protein. New UK guidelines on managing Vaccine-Induced Thrombotic Thrombocytopenia (VITT)²⁴ include all COVID-19 vaccines in their advice. The possibility of further unexpected safety issues cannot be ruled out. In Israel, where the vaccines have been widely rolled out to young people and teenagers, the Pfizer vaccine has been linked to several cases of myocarditis in young men²⁵ and concerns have been raised about reports of altered menstrual cycles and abnormal bleeding in young women following the vaccine.²⁶

Most concerning with regard to possible vaccination of children, is that there have now been a number of deaths associated with vaccination reported to the VAERS system in the US, despite the vaccines only being given to children within trials and a very recent rollout to 16-17 year olds²⁷.

Long-term safety concerns

All Phase 3 COVID-19 vaccine trials are ongoing and not due to conclude until late 2022/early 2023. The vaccines are, therefore, currently experimental with only limited

short-term and no long-term adult safety data available. In addition, many are using a completely new mRNA vaccine technology, which has never previously been approved for use in humans²⁸. The mRNA is effectively a pro-drug and it is not known how much spike protein any individual will produce. Potential late-onset effects can take months or years to become apparent. The limited children's trials undertaken to date are totally underpowered to rule out uncommon but severe side effects.

Children have a lifetime ahead of them, and their immunological and neurological systems are still in development, making them potentially more vulnerable to adverse effects than adults. A number of specific concerns have been raised already, including autoimmune disease and possible effects on placentation and fertility.²⁹ A recently published paper raised the possibility that mRNA COVID-19 vaccines could trigger prion-based, neurodegenerative disease³⁰. All potential risks, known and unknown, must be balanced against risks of COVID-19 itself, so a very different benefit/risk balance will apply to children than to adults.

Conclusion

There is important wisdom in the Hippocratic Oath which states, "First do no harm". All medical interventions carry a risk of harm, so we have a duty to act with caution and proportionality. This is particularly the case when considering mass intervention in a healthy population, in which situation there must be firm evidence of benefits far greater than harms. The current, available evidence clearly shows that the risk versus benefit calculation does NOT support administering rushed and experimental COVID -19 vaccines to children, who have virtually no risk from COVID -19, yet face known and unknown risks from the vaccines. The Declaration of the Rights of the Child states that, "*the child, by reason of his physical and mental immaturity, needs special safeguards and care, including appropriate legal protection*".³¹ As adults we have a duty of care to protect children from unnecessary and foreseeable harm.

We conclude that it is irresponsible, unethical and indeed, unnecessary, to include children under 18 years in the national COVID-19 vaccine rollout. Clinical trials in children also pose huge ethical dilemmas, in light of the lack of potential benefit to trial participants and the unknown risks. The end of the current Phase 3 trials should be awaited as well as several years of safety data in adults, to rule out, or quantify, all potential adverse effects.

We call upon our governments and the regulators not to repeat mistakes from history, and to reject the calls to vaccinate children against COVID-19. Extreme caution has been exercised over many aspects of the pandemic, but surely now is the most important time to exercise true caution - we must not be the generation of adults that, through unnecessary haste and fear, risks the health of children.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

COVID is less of a threat to kids than the annual Flu
It's NOT approved by the FDA as a vaccine but is, in fact, still in experimental testing by millions of people.
Children are statistically MANY time more likely to be hospitalized from the Vaccine than from the virus...

Thanks you for your time. Jim Craft

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our state for the following reasons:
Since the number of and severity of cases of COVID-19 in children has been very low, there is really no justifiable reason for such drastic action.
The vaccine does not have sufficient history at this point to be certain that there will not be widespread problems associated with reactions caused by it in the future.
Parents, not the government, should be the primary decision makers for their children.
Societies that have relied on the government to control their lives, have been doomed to failure.
Please don't force people with sincerely held beliefs to be forced into an untenable position.

WA STATE ELECTED OFFICIALS --

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid and there are no long-term studies to document any history of safety. Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine does not stop the spread of the disease and at this point is merely a "medical treatment." Medical treatments or vaccines are private and personal medical decisions that need to be made between parents and medical providers for what is best for our children. The government, department of health, or schools do not have the authority to mandate / force medical decisions upon our children that supersede parent's rights/choices. This is a violation of our constitutional rights as American citizens and I OPPOSE and request this is immediately halted!

Concerned Parent/Citizen,

Lori Hughes

Maple Valley, WA 98038

- *There are no long-term studies to document any history of safety
- *Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- *The vaccine apparently does not stop the spread of the disease

So if vaccinated and unvaccinate can both transmit covid what is the point of getting the JAB especially because it doesn't not stop the spread of the disease instead it is killing people who before they got the JAB were perfectly healthy individuals!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

*There has been insufficient time and testing to determine the safety and long term health consequences of this immunization in children.

*Stem cell lines from aborted babies have been used in the production of this immunization which is against our beliefs both morally and religiously.

*Our children will not under any circumstances receive this immunization, and as such will be immediately removed from any school facility requiring it for admission, which will have long term consequences to their lives. We will fight this with every option we have.

Sincerely,

Allan & Laurie Pilger
Longview, WA

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It is not constitutional to take away our right to refuse what gets injected into our body or our kids body.

We the people, parents, tax payers, who pay your wages, are the legal guardians of our kids. NOT THE GOVERNMENT!

This has turned into a Democratic shit show with lies all along. Just for political power and profits for BIG pharma.

You pick on and take away the rights of American citizens, but allow illegals to enter without testing to take away our American jobs and tax payer resources.

What the hell is wrong with you people at the top? Does any body up there have any common sense any more?

This vaccine has not even been around long enough to be tested for long term side effects, nor approved by FDA. The risk is too high.

Natural immunity is far more effective in coverage than man made synthetics, but we won't hear about that because BIG tech will cancel you out and sensor out what they don't believe we need to know. The powers that be, that were voted in by lying to us, want us to live in fear.

BIG TECH, BIG PHARMA and government are in together for bottom line profit.

I ask you to Please back off and let the people make their own choice for their kids.

Thank you for your consideration,

Marty Peterson

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

-Children are statistically not susceptible to the dangers posed by covid; especially this new variant

-This sets a very dangerous precedent for the future. What's next? Everyone needs a flu vaccine for school? This is beyond stepping on personal liberty and constitutionally protected rights and you have a responsibility to RECOGNIZE AND PROTECT THEM. That is the reason you are elected.

- As of now we do not even have 1 year's worth of long term study datum to study the effects of these vaccines.

To mandate vaccines and THIS specific vaccine for an illness that has more than 99% survival rate is not only irresponsible, it is purposefully invasive on our rights. Truly how dare anyone attempt to strip American's of our liberties. May God guide you and you come to realize just how wrong and irresponsible this proposal is. Thank you for your time.

-Justin H.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- children remain a low risk group for covid.
- the CDC website reports less than 1000 children have died FROM COVID since the start of the pandemic until now.
- the VAERS website has reported over 1700 serious adverse reactions to the covid vaccine (all types) in children ages 6-17.
- latest numbers of children being infected have been overinflated. This has been confirmed by CDC and Fauci.
- there is no data on the vaccine long term effects on children.
- the vaccine has not undergone Phase 3 testing.
- the vaccines are not as effective since fully vaccinated/boosted people can become infected and spread covid.
- many countries are reporting enormous spikes in covid cases but not among children and the majority of those hospitalized are FULLY VACCINATED/BOOSTED ADULTS. The vaccine would have the potential to do more damage to children than have any positive effect.
- what is the purpose behind making the vaccine mandatory? Is it to protect the children or adults? It is disturbing and disgusting that you are deciding to mandate injecting a potentially dangerous vaccine into kids to soothe the fears of adults.

I would urge that the TAG recommend that the decision to vaccinate a child remain with the parents. We are capable of consulting with our children's doctors and making that decision.

We know what is best for our children, not some faceless government policy advisory group.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Not enough long term research on these vaccines

Children aren't at high risk for severe symptoms

Efficacy is unproven and too low to risk adverse health effects.

Drug companies and government aren't listening to parents concerns, they bulldoze over anyone with a different experience or opinion.

No choice no freedom.

Vaccinating children will NOT end the pandemic.

This is not right

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

*The vaccines are only approved for emergency use.

*There isn't any data, short, medium or long term studies or science to justify giving injections to children.

Vaccinated and unvaccinated people can get and transmit Covid so the vaccine does not stop the spread.

Until the liability protection for the vaccine developers is removed no one should take the vaccine.

According to the Nuremberg Code all medical procedures and therapies must have fully informed and freely given consent, to the greatest extent possible. Children are under the care of their parents, no medical treatment should be allowed without the consent of the parents.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These experimental vaccines should not be mandated for children or anyone. Each person has a God-given and constitutional right to choose their own medical care here in the United States. Trying to hide this political propaganda behind a so-called vaccine isn't fooling true Americans.

It is very evil to impute these mandates on humans for your political agenda!

Take this as a warning, there will be a day of reckoning by Almighty God to those that do evil to others especially to the innocent.

Praying for you to make the right decision.

Sincerely, Todd Martin

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Thanks you,
Kelly Goodson

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The number of COVID-19 cases among children has been extremely low and therefore such extreme measures are uncalled for.

The whole concept that government should usurp parents in making decisions for their children is wrong.

What if the vaccine does produce some unseen problems in the future? We certainly have not had enough time to be certain that won't happen.

Stop trying to force people into doing things that they sincerely feel are wrong.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The Biden administration's single-track focus on vaccination rather than therapeutics for COVID is telling. We know that none of the COVID vaccines prevent you from contracting the disease, and they don't prevent you from passing it on to someone else. Mandating a vaccine for workers that accomplishes neither of those things is not only unconstitutional, but incomprehensible.

We are opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are not susceptible to the virus and the shots have many adverse effects--that can be deadly to children.

This vaccine has not been tested long term and it doesn't stop people from getting it. In fact, more people are getting and spreading the new variant who have been vaccinated than from the unvaccinated.

It is not a deadly virus to children. Many of the unintentional consequences that have occurred during the lockdowns have been way worse for children and their physical, mental and emotional health than the virus could have caused the average young person.

This is actually ignoring the science when time after time it has been proven that children are not susceptible to this virus but their body is susceptible to the negative effects of the shot. Even Dr. Malone, one of the inventors of the mRNA vaccine believes this shot is not beneficial.

There are numerous more items we could list but one final one is that you are taking the decision out of the hands of the parents. So our question is this, if something happens to the child after having to take a shot that they and their parents do not want them to take, are you and the state willing to take responsibility for your decision and be sued?

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons...

- * This is a personal decision for a family to make and it should never be required
- * The COVID vaccination has not been found to work
- * The COVID vaccination does not make you immune – in the last 2 weeks, this is no longer a problem of the unvaccinated but a problem, people with the vaccination and all boosters are all getting COVID
- * The more people that obtain COVID we will be closer to herd immunity
- * Children have one of the strongest immune systems, they have a higher 99% rate to recover that we will take our chances with rather than give our child the vaccination and possibly kill or hospitalize them and never be able to live with ourselves
- * If this passed, I know for fact people will be taking their children out of the WA school system and either be home schooling, moving or for us since we are close to Idaho we will put our son in a school in Idaho if this was to pass and we pay for private school already.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children and youth have a 99.9+ % chance of not even getting covid, or having a very light case, so why put a drug in their system for which we DO NOT KNOW THE LONG TERM REPERCUSSIONS! It is morally wrong and more of a danger to their health than covid. There are thousands of adverse effects of this vaccine, which IS STILL EXPERIMENTAL! WE SHOULD NOT BE EXPERIMENTING ON OUR CHILDREN!!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: My granddaughter 7 just tested positive for Covid. She now has natural immunity. The virus is weakening, and kids who have gotten Covid are not even showing symptoms. Covid spread through our whole household at Christmas. There were 15 of us here at Christmas and Everyone except the kids have been vaccinated and received boosters. In our Christmas gathering, we all tested positive for Covid, and some had no symptoms while others had a mild cold like illness, that cleared up in 4 days. We had people at the gathering from a 7 year old to 2 90 year olds. The 90 year olds kids get colds. It's normal. please do not make vaccines for children mandatory. A lot of parents already used to remote learning will pull their kids out of school.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There will be much lower funding due to districts losing a great portion of their student base because parents will not participate in injecting their children with emergency use authorized, experimental vaccines that have not been properly studied and assessed over a long enough trial period to determine long term effectiveness or side effects, especially in children.

Thank you for your time.

Good Afternoon,

I am writing the board to explain why I oppose making COVID-19 vaccinations mandatory in our schools at this time.

First, there is insufficient testing over time to study the long term affects of these vaccines. I am quite simply not willing to risk my children's future for something this experimental for a virus that is proven to be fairly insignificant in healthy patients. I understand there are outliers.

The main reason I oppose this is, the vaccine has proven incapable of preventing the vaccinated from contracting and/or spreading the virus. Why should we risk our children for a vaccination that is essentially ineffective in all categories except lessening symptoms in some.

Thank you for your consideration.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1.

Children are at extremely low risk for Covid. The recovery rate for adults is 98.5%,, therefore there should be no requirement for anybody to get the vaccine.

2.

The vaccines are still only EUA (emergency use authorized).

3.

There are no long term studies to document any history of safety.

4.

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, that in itself shows the vaccine does not work and should not be used.

5.

It is quite apparent that the vaccine does not stop the spread of the disease.

6.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid. The median age for death by Covid is 80 years old.

The vaccines are still labeled "emergency use authorized". There are no long term studies to document any history of safety. Therefore, you could be altering children's genetics.

There are studies that document that both vaccinated and unvaccinated people can transmit Covid, therefore the shot does not stop the spread of the virus. So it is not a true vaccine.

It is a political move, more government overreach into our lives.

Sincerely,
Kathleen Dwyer

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children have an extremely low risk of contracting Covid.
2. The Covid 19 vaccines are still only Emergency Use Authorized (EUA) and are not a "one size fits all" solution. It is illegal to mandate them for everyone when there are other treatments available.
3. There are no long-term studies that document ANY history of safety without harmful and even deadly side effects. This so called vaccine is purely experiential gene therapy.
4. The scientific data now proves that both vaccinated and unvaccinated can spread the virus, which defeats the purpose of the vaccine.
5. The vaccine has not been successful at stopping the spread of Covid as it was promised to do. There should be focus on early treatment of Covid and consideration of whether or not a person has already had Covid before a vaccine is given. Natural immunity is more robust and long-lasting than the vaccine.

I urge you to consider these reasons and vote "NO" for mandatory vaccines for students, staff and families. Thank you for your consideration.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The mandate is a government usurpation of a parents right to determine what is best for their child and an encroachment upon their constitutionally guaranteed right to life, liberty and the pursuit of happiness.

Children in general have a much higher survival rate and seem to do better with the effects of Covid-19. We know this for a fact but do not know the long term effects of the vaccine. Should we really be gambling with the lives of our children by injecting them with a foreign substance that may cause them more harm than good. And the vaccine is no guarantee that they won't get Covid-19.

This is simply an overreaching of unauthorized government power to suppress we the people.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

First, I believe everyone has the right to make their own choice. Also, the vaccine has not been fully evaluated and tested long enough for people to know how safe or unsafe it is. The people deserve to know all the pros and cons about any vaccine before being expected to put it into our bodies and I feel we aren't being told the truth. Many scientists have come forward to tell the truth, but their voices have been silenced, not only by social media, but by our government and they tell us it's just conspiracy theories . There are people who have suffered both minor and horrific results after receiving the vaccine; even death.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Requiring use of experimental drugs and vaccines is a violation of international law and a violation of multiple international accords. Doing this only opens the state to more lawsuits. We still haven't paid the multi-billion dollar judgement we owe to the school system, how can we afford to pay other lawsuits? Also, a large portion of parents don't want to be forced into giving this to their kids. Consider the number of people who will pull their kids in favor of home school over this issue. Consider the number who pulled their kids in favor of homeschooling because of the pandemic mandates. This is all lost revenue with fewer children in school seats. Now consider the ramifications of mandating(no legislation means it wasn't approved by the populace) medical treatment without cause in a Democratic Republic. It isn't anyone's job beside the parents to decide what is best for their children medically. Stay in your lanes!

To The Immunizations Technical Advisory Group:

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely low risk for Covid and at even lower risk for complications from Covid.
2. The vaccines are still only emergency use authorized.
3. There are no long-term studies to document any history of safety.
4. Studies now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine does not stop the spread of the disease.
5. Where there is risk there should be choice.

I have already pulled all 3 of my children from public education because of government mandates, over-reach and fear mongering. Nothing Washington State has done regarding this pandemic has been in the best interest of the people. Facts and science have been completely ignored and We The People are done with our children being political pawns. Our children have suffered because of your irresponsible mandates and policies. My children will not be going back to public school with these conditions in place and I can promise many will follow if COVID-19 shots become mandatory.

At the very minimum, I am asking you to do the right thing and say no to mandatory COVID-19 shots for school admission or childcare.

Thank you,
Jenifer Williams

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Government bureaucrats should not be making decisions that should be the decision of parents and the child's medical advisor/doctor.
- * According to statistics and studies children are at a greater health risk from the mRNA injection ("vaccine") than the "virus".
- * Why risk a child's health and future for a minimal, if any, benefit to the general public?
- * If you force this idea where would the tyranny end??

More Kids Dying From Vaccines Than From COVID, Nurse Tells Louisiana Lawmakers

A registered nurse who last month testified at a hearing of the Louisiana House Health and Welfare Committee said her hospital is seeing “terrifying” reactions to COVID vaccines, but hospital officials are failing to report them.

A Louisiana nurse last month told state lawmakers her hospital is seeing “terrifying” reactions to COVID vaccines

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde>
, but hospital officials are failing to report them.

Colette Martin, R.N., a practicing nurse for 17 years, said her Louisiana hospital is witnessing blood clots

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde>
jacobs-cerebral-venous-sinus-thrombosis-johnson-covid-
vaccine%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb8e4e7fce24f09874908d9d16b0a16%7C11d0
, heart attacks, strokes, encephalopathy and heart arrhythmia following COVID
vaccination, and staff are failing to report anything to the Vaccine Adverse Event
Reporting System (VAERS).

Martin, testifying at a Louisiana House Health and Welfare Committee hearing, told State Rep. Lawrence Bagley that most medical professionals in her hospital aren't even aware VAERS exists.

“The majority of our nurses, nurse managers and some doctors do not even know what VAERS is,” Martin said. “I’ve spoken to our chief medicine managers and other nurses on why we’re not reporting to VAERS, and the most common response is: ‘What is VAERS?’”

Martin said she raised concerns about adverse reactions

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde>
cdc-covid-vaccine-injuries-fda-pfizer-booster-
kids%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb8e4e7fce24f09874908d9d16b0a16%7C11d0
to COVID vaccines and the failure to report them to hospital administrators, but she was
“repeatedly dismissed.”

Martin made clear to the legislators that VAERS was reporting, at the time of her testimony, more than 18,000 deaths post-COVID vaccination, and how it’s her belief only a fraction of deaths are being reported because her hospital and other hospitals in the area “are not reporting anything.”

Martin also told legislators she is concerned about mandating COVID vaccines for children.

She said:

"We are not just seeing severe acute [short-term] reactions with this vaccine, but we have zero idea what any long-term reactions are. Cancers, autoimmune [disorders], infertility. We just don't know.

"We are potentially sacrificing our children for fear of maybe dying, getting sick of a virus, a virus with a 99% survival rate."

Martin said her hospital has seen "more children die from the COVID vaccine than COVID itself."

"It's maddening, and I don't understand why more people don't see it. I think they do, but they fear speaking out and, even worse, being fired," Martin said.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:
It violates basic freedom of choice.
Huge overstep of parental rights.
Low chance of children contracting it.
Extremely low percentage of death.
Has nothing to do with education.
Schools were never meant to be hospitals.
School districts keeping this date and time on the downlow, inspires no trust or confidence.
A Concerned Citizen,
Linda Eaton

We do not have information on the long term affects on kids, I fear some where in the future the stupidity of this "mandate" may be very detrimental to these kids. I think many kids will not attend school and go to online . They will not have the benefit of being social and their mental health will suffer. People have legitimate reasons for questioning these vaccinations and you need to stop jamming it down parents throats. These vaccinations are too new...just because you tell me to jump over a cliff because you say so does not mean I will do it nor would it be a good idea just because YOU said so. Do not do this. Some kids cannot have the vax because of medical reasons. My grandson has seizures and has been told he should not have them by a reputable pediatric doctor. The mandate would mean he would have to go online and he needs to be around other kids...One size fits all is not an option. My grandson did get covid and was not very sick with it and his doctors still say no to the vax. There are some complications with the vax which are not good but are not publicized and hidden, banned from social media.. Truthfulness by the medical community and the so called news media would help immensely in allowing people to want the vax, it would do much more than just mandating . I have lost confidence in it all. I had covid and it was terrible. It is not a joke and as soon as my antibodies decrease I will get the shot but I am not confident in that decision. I am still scared but I will get it. Kids do not generally get as sick and I really think it a bad ideas to PUNISH them by making them get it. The teachers and support staff are either vaccinated or have testing so I am not sure why you want to force this on the kids..If the vaccine is so effective then what is this about????? I think you need way m.ore information before doing this.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: there is no long term studies and these are our children (AKA our future) we have no idea of the long term effects of these experimental injections. Kids are at low risk for this virus which has been in the United states since at LEAST 2015 when they found recruits in boot camp with Covid, Ryno virus and bronchitis...AKA the recruit crud. This is a big government power grab and the states are the only ones standing between big pharma, the politicians in their pockets and our children.

Please don't poison our youth. Save the vaccines for the immune compromised, mandatory anything is anti American. Since when did forcing medical procedures on people become part of the American way?

Respectfully,

SSgt Jon Sheets USMC/EOD

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: Our children are not at risk but more importantly this doesn't make any sense. The FDA even made a comment that they are winging it with the kids vaccine and we will know more in the coming years. Follow the actual science. Vaccinated or Non-Vaccinated get COVID and can spread it to someone else just as easy. There is no difference. In fact some would say Vaccinated are more at risk to spread because they may have milder symptoms than a non-vaccinated person, so they may not even know they have COVID. This would mean they are in school spreading it without knowing instead of being at home for 5-10 days under quarantine. I would never subject my children to this vaccination since there are no more health risk to them than the normal flu. More kids die of the flu than they have with COVID, and that is a very low number.

I am opposed to making COVID-19 vaccine mandatory for school admission or childcare in our State for the following Reasons:

1. MEDICAL FREEDOM. This is the United States - the land of the free. No one should be forced to put something in their body or ostracized for not putting something in their body.
2. Kids are at very LOW risk of serious illness, hospitalization or death from covid.
3. The vaccine has NOT been proven to prevent covid or transmission of covid. I was recently at a gathering where there was covid exposure, and the vaccinated picked up the virus within the same time frame and severity as the unvaccinated.
4. In my opinion, the vaccine is not safe. Many people have had serious medical issues and death shortly after receiving the vaccine.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons: It has been proven that this demographic is not at high risk for contracting COVID-19. With the lack of long term effects from these vaccines I do not feel it is prudent to require vaccines for children.

Parents have the right to make this decision for their child. It makes no sense to me that a parent can fight to be unvaccinated and yet you would be forced to have their child subjected to it.

I pray that these parents have the strength and finances to home school their child vs. putting them in a traditional school environment if this is pushed through.

For those parents and teachers that have a difference of opinion, I would say to them, if your concern and fear requires you to enforce wearing a mask and taking any other number of precautions then by all means do so.

People have been living with this pandemic for two years now. Parents, kids and teachers alike are having to navigate lots of changes but to enforce vaccination is not the answer.

Regards,

Kim Hooper

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The data doesn't show it's necessary. Children aren't dying and symptoms are mild if any. No one should be forced to receive anything they don't want. I believe in freedom from government control. Our Constitution and Bill of Rights don't seem to matter anymore!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons: I think that a child can have more damage done to them by wearing the mask. They need fresh air and the mask don't really protect them, it only satisfy a group of people who are fearful.

I am opposed to making COVID-19 vaccines mandatory for school admission or childcare in our State for the following Reasons:

- * The vaccine does not prevent transmission
- * The vaccine was only designed to lessen the severity of symptoms and reduce hospitalizations
- * Childrens symptoms are very mild without vaccination
- * School have never been super spreaders
- * The vaccine is still only approved under emergency authorization
- * The vaccine doesn't work!

Please tell me how mandatory vaccinations of students would keep schools safe? The vaccine does not prevent transmission!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Studies DO now document that vaccinated and unvaccinated can BOTH transmit COVID, therefore the vaccine apparently does not stop the spread of the disease!

Children are at extremely low risk of contracting COVID.

The vaccines are still only EUA, emergency use authorized.

IMPORTANT: There are no long-term studies to document any history of safety!

It is incorrect to call the shot a vaccine. A vaccine has not been developed yet. That would evoke a different response.

Sincerely,

Kristi Buchman

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I believe children are low risk and we simply do not know long term how this might affect their future health. Family members friends (several fully vaccinated) are dealing with Covid issues so I don't understand how vaccinations are really so essential. Those not vaccinated really aren't even as sick as the vaccinated. I think the unknown risks to children is very real and mandates not effective in controlling the spread. Please don't do this to our children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely low risk for Covid in general as well as complications from COVID,
2. Having only EUA only - We should NOT be requiring that children be vaccinated.
3. Where are your long term studies showing that it is safe to use this vaccination for children? So long as you don't have any long-term data indicating its effectiveness and its safety, I am opposed to making COVID-19 shots mandatory for school admission or childcare in Washington State.
4. In addition, studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Sincerely,
Jeanne Purdum

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- #1 My kids already had Covid and recovered giving them natural immunity!
- #2 This is not a vaccine and does not stop you from getting covid nor does it stop you from spreading it!
- #3 Children are at a very low risk of death or severe complications from Covid! My children barely had a sore throat, headache and fever that is all!
- #4 This is still experimental and for emergency use, no one knows the long term effects of this "vaccine" there for it should be a personal choice!
- #5 If you believe women should have MY BODY MY CHOICE for terminating pregnancies, then all people should have MY BODY MY CHOICE for experimental vaccines that dont have a long lasting efficacy and do nothing to prevent or stop the spread!

Thank You,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Covid vaccines are experimental and remain under Emergency Use Authorization.
2. Children under the age of 18 have a 99.995% survival rate from Covid infection.
3. Children actually have a higher chance of death or adverse reaction to Covid vaccines than Covid-19.

Please do the right thing for the lives of children and do not mandate these vaccines.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The side effects of the drug are unknown. There are no scientific studies that have been processed with enough time and due diligence to determine a statistically reliable outcome. The side effects on adult women and their reproductive system has been horrific. I will not risk the potential sterilization of my 3 daughters for a virus that has virtually no threat to their livelihood. Those that are more comfortable with the shot have them freedom of that choice for themselves and their children. I am no and will not be forced to give my children the Covid 19 shot. Let me remind you that the shot is still in emergency use. The approved FDA shot is not even in production yet. We will not be forced to take experiential drugs. In addition to its current status, the shot (by definition) is not even a vaccine. The federal courts have denied the forceful compliance of these shots based on our constitutional. We will not comply with this suggested mandate.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The Vaccines are still emergency use authorized only and children are at extremely low risk of getting infected with Covid. Please look at the rate of infection and death in children before you make any mandates.

There are also no long-term studies that document the any long-term side effects of this vaccine and the safety of taking the vaccines

The vaccine does not stop the spread of the Covid and both vaccinated and unvaccinated people can both transmit Covid.

Why are children, teens being mandated to take vaccines when the above steps have not been taken. Also is mandate a way to handle a pandemic? When we were children, we took the polio vaccine once and never again and polio was eliminated. Here we are hearing about two shots, boosters and now four shots, when will this madness end?

I am opposed to making Covid-19 shots mandatory for school admission or children in WA state..

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

* The vaccine is, and has been, widely available to those who choose to vaccinate themselves. This is an individual choice and parental choice for the vaccination.
*

According to statistics children are at low risk for Covid.

* Please be reminded that the vaccines are still only under emergency use authorized ONLY and that there are no long term studies that document any history of safety with this vaccine.

* There are studies out now that do document the fact that BOTH the vaccinated and unvaccinated transmit Covid, therefore, you can see that the vaccine does not stop the spread of the disease unlike others that are mandated for school.

Completely unethical. Do you understand how much bacteria is even carried in masks period. The government doesn't get to mandate or make unconstitutional decisions for children that are NOT theirs. It's a choice, parents have the right to choose. It's not your decision to be made. Unfortunately illness is apart of every day life. The common cold, flu, etc. it's life. How do you think immune systems work? Don't you think you've done enough damage to the western side of the state with unconstitutional mandates state wide. Those will not be "mandated" I'm my household. Thanks.

Respectfully,
Mikeal

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

If the flu shot isn't mandatory this shouldn't be either. Influenza A has been shown to be more deadly to school aged children and Covid has not. Herd immunity is not possible with 100% vaccination of the population so please stop. This vaccine is still under EUA and needs more research and retrospective studies done on it.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at an incredibly low risk of hospitalization or death if contracting covid-19. Not only are they low risk for covid, their young bodies are developing and could be at risk of harm caused by the vaccination which has no long term studies to state otherwise.

It is the parents right to decide if their children receive a shot, not the state.

Requiring the covid vaccine for school and childcare entrance is incredibly inequitable. Families who don't want their children to get the covid 19 vaccination will face keeping them home, which means potential job loss.

Please consider the deepest ramifications to our community, long term unknown side effects for vaccinated children, potential income inequality for families forced to homeschool and deeper divisions in our community.

Sincerely,

Jeanna Snyder

It is completely illogical, unscientific, and just plain wrong to make COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. By the CDC's own admission (and numerous other US Govt health agencies now), the injection DOES NOT prevent transmission nor infection of COVID-19, thereby making vaccine mandates pointless (other than to possibly reduce symptoms, but at what risk?).
2. Adults have a 99.7 or greater survivability rate, and Children are virtually at ZERO risk from COVID 19. The detrimental effects of getting COVID-19 injections are proving to far outweigh any possible benefits.
3. In the light of much scientific evidence, these unscientific and draconian mandates prove it is more about governmental overreach and stripping away parents say-so, than about health. Any governmental official promoting mandates is either guilty of overstepping their authority, or naive. In either case, not good, and they will be held accountable for their decisions.

If the board needs any supporting info or documentation, please don't hesitate to contact me. I can direct you to hundreds of studies and factual scientific reports supporting, and in addition to, these points above.

Thanks for your consideration,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

Children are proven to have an extremely low risk of getting seriously ill from Covid-19. Also, getting vaccinated for Covid-19 does not stop the spread. There have been no long term studies that have proven these vaccines, which are still in emergency use, safe for children.

Making these vaccines a requirement would also be detrimental to our school system and funding, as many parents will pull their children out of public system.

Please protect our children and leave their health decisions in the hands of their parents, not the drug companies.

Thank you for your consideration,

To whom it may concern,

I am absolutely and vehemently opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- It is discrimination and a Violation of my, and my child's rights to be sovereign over our own bodies.
- Studies show that both vaccinated and unvaccinated can contract and transmit Covid 19. Therefore this vaccine doesn't stop the spread of Covid.
- It is not actually a "Vaccine" but unproven, experimental gene therapy.
- There are no long term studies to document any history of safety. In fact, I personally know MANY individuals suffering from heart conditions as well as other condition from taking this vaccine. TWO OF WHICH HAVE DIED. And you want to force this on my children!?
- Children are at extremely low risk for Covid in the first place.

DO NOT DO THIS!

Sincerely,

Joel Kirtley

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. There is no medical justification for making the shot mandatory
2. There are dozens of studies worldwide showing the near zero mortality rate for children associated with COVID-19
3. The shot does not prevent transmission nor infection and as such, cannot be used as a justification to "slow the spread" as it does not do so
4. The shot does not have a single commercially available or distributed dose in the United States that has passed FDA approval
5. There has been zero release as to the actual ingredients in the vaccine
6. There are no long-term efficacy studies to determine risk
7. Parents and legal guardians retain the legal rights to all medical decisions for their children
8. There are several therapeutic and reasonable options for early treatment, including for children, that would be more effective than a shot that does not reduce transmission or infection

Thank you,
Jennifer Matthews

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1.

You can still get and transmit covid after getting a shot.

2.

There is VERY little risk for kids. Not enough reason to inject something into their bodies that we don't know that much about.

3.

The shot has not been around long enough to mandate people to get it.

4.

The whole thing is fishy. They don't even recognize that after you have covid, you have better immunity than the shot.

5.

Why are the people who have had the shot worried about covid? Isn't the shot supposed to protect them?

6.

Many parents will take their kids out of school and homeschool. It's the poor who will be affected the most.

7.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at low risk when contracting covid.
There is substantially more risk with the vaxx vs the virus. See years reporting for details. I am very concerned about myocardial events which are serious.
Children already get vaxxed about 60 times by the time they are 18.....there are unintended consequences with this. Reports of harm are under reported according to some. I would demand more info before adding a new vax.

Stop the vaxx mandate.....all of them. We should always have a choice. All this coercion is causing people to reject all vaccines.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- #1 The vaccines is still in emergency use status
- #2 Whether you are vaccinated or not, you can still spread it
- #3 Long term side effects on children have not been studied
- #4 The vaccine does not create 100% immunity
- #5 Children are not the group that are taxing the healthcare system. It is the adults.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

This vaccine does not protect children from getting COVID.

It also has not been around long enough or studied in length to show the impact on children. Our children are not science rats at the government disposal. We should be able to make choices that can alter and greatly impact our children health, development and longevity.

EAU approval is not FDA approval. Especially for a vaccine that was developed and out to the public within months of COVID onset.

The vaccine changes and impacts on developing children's cells due to this being a mRNA vaccine.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The risk of the inoculation is way higher than the risk from Covid. I have two grandsons and my wife and I will gladly homeschool them if you make this mandatory. There is more and more science and studies coming into light concerning these so-called vaccines. If a person truly cares in finding the truth, then they can seek it out and find it. Shame on anyone that is willing to put children at risk to protect the adults. Seems like society has backslidden so far that they fail to realize that we are supposed to protect the children before ourselves (adults). It is the law of nature and the law of God to protect our children first. It's now proven that this so-called vaccine does not protect from getting or transmitting the virus. If not, then I find it ironic that society can even give it any credit by calling it a vaccine. The only ones that still believe in it are government doctors and their followers. This great country was never founded on mandatory anything. It was founded on the principal that we were allowed by nature and God to make our own decisions concerning what we put into our bodies. Noone knows what is best for my children but me and my family. We live by that principal daily with true love in our hearts.

Mark Klein

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The vaccine is still under emergency authorization use and not fully approved.

The vaccine has not be researched among children long enough to show long term effects

The virus covid-19 does not pose a significant risk to children

Vaccinated and non-vaccinated individuals can spread the virus.

I am a fully vaccinated individual and my kids are fully vaccinated however I oppose any mandate of this sort at this stage for the above reason.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Covid is not a disease which can be eradicated. Due to the rapid mutation rate of the disease it will be impossible to vaccinate ourselves out of covid. We must learn to live with the disease.

Children are at extremely low risk of becoming seriously ill from covid.

The vaccines are still un-proven, without long-term studies to prove safety, especially in children.

Mandating covid vaccines for school admission and for childcare is a bad idea and it is not a good option for Washingtonians.

As a voting resident of Washington state I urge you to vote no on mandatory vaccinations for children to attend school and/or childcare.

Thank you.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at an extremely low risk from this virus.

Vaccines do not prevent the spread of this virus. There are some high profile cases recently in the news, Elizabeth Warren, Whoppi Goldberg. Both of these were so called fully immunized and took precautions suggested by CDC. These shots are more "feel good" than effective. And there needs to be more long term testing.

Stop this insanity.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Vaccines do not prevent transmission. Please see recent studies out of Denmark, Canada, as well as recent statements made by Joe Biden, Dr Fauci and The CDC Director. Please see also the cases of the fully vaxxed SEAL team, cruise ships, Gibraltar etc.
2. If vaccines do not prevent transmission, then why would kids need to be vaccinated? To prevent hospitalization and death? Kids are not at risk for either. The death rate is statistically 0%. And as Dr Fauci noted recently on CNN, child hospitalizations are grossly over counted.

There is simply no reason to mandate a product whose safety studies will not be unsealed for 75 years for children who are not at risk of serious illness or death.

Thank you,

Krissy Alonzo

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid

The vaccines are still only EUA (emergency use authorized)

There are no long-term studies to document any history of safety,

The vaccine has shown a mortality rate in children that is hundreds of times higher than the mortality rate for the disease itself in those age groups.

The side effects of the Mrna drugs in children are much more severe than in adults and even include permanent nerve damage and paralysis and severe cardiovascular conditions. These are all well documented.

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease

If vaccines are mandated for children in schools I and most parents that I know will remove our children from public schools and resort to private or home schooling.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I was never forced to have to vaccinate myself as a child for a virus, I'm not going to put my children in a situation like that either. Vaccinating my child for a virus that needs to make its run through our nation so we can build immunity for it makes no sense. My child was born with an uncompromised immune system and has the ability to fight for itself. While some assistance might be necessary just like any other type of a cold or a virus vaccinating for one that mutates and it will always require a booster, Would be a brainless decision.

Years down the road when this vaccine has been tested and trialed over and over that will not cause any heart complications to my children or cause any type of neurological problems, I might reconsider.

Forcing my children to get this vaccine or not attending public school is not a hard decision for me to make. But taking the right to choose away from the American citizens is a sin, should be charged with a felony, And should have never even been an option.

People that have been forced to leave their employment due to the vaccine, should have never happened.

The fact that I'm even having to send this email to contest the vaccine should be eye-opening to the people of the United States.

What are we trying to become the next China? Give me a break.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children have been proven to be statistically zero risk of dying from the Virus. There is also very little evidence that the viral load is large enough for children to even pass the virus on to adults. With zero risk of dying from or having long term injuries from the virus, there is no benefit to outweigh the risk of this untested injection on children - which has already had enormous amounts of side effects and injuries (many of which are long-term). I have no problem with the current vaccine schedule, but I draw the line at experimental, unnatural injections that do nothing to stop the spread or infection rate. I say no to treating children like pin cushions and lab rats to test what bodies will do when you tell the mRNA to create something the body consistently tries to destroy. Let the parents decide what is best for their child, not the State. The State does not need to parent. The State does not know the child like a parent does. Let the parents parent.

John

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It's my job as my children's parent to decide what medicines and treatments my child should receive.

If the Covid vaccine is made mandatory I will pull all 4 of my elementary aged children from public education. This state will lose millions in government and federal funding based on this poor decision alone.

I do not support making the Covid-19 vaccine mandatory for anyone! Especially children.

Sincerely consider the implications this will have.

Samantha
Pierce county tax payer and mother of 4.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are extremely low risk, it's still an emergency use authorized, studies have documentation that vaccinated and unvaccinated can spread COVID and it is discriminatory towards one particular group of people and will punish them and cause great hardship because they make a personal choice to not be vaccinated and their children don't have equitable access to free in person public education.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Lastly as we have always been allowed to make our own personal choices about own personal health and the health and well being of our children, which is why we live in America and are allowed freedom of choice
- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stopthe spread of the disease

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Please remember today that I hired you. I know you know the Constitution of the United States.

As a WA State Parent, Grandparent, TAXPAYER, Voter and Advocate, I am requesting you say, "NO!" to Any Criteria for Pre-Care, Pre-School or School Immunization Program. In my opinion, the State Board of Health has overstepped into Parental Jurisdiction. You need to be supporting realistic treatment options (even if 'off label') and using State Funds (that are available) to help families raise healthy children.

EUA is for Emergency Use - Short Term ONLY! We are No Longer accepting that as relevant to this or any other Emergency!

I am Advocating for HB 1772 and request that you do, also! This IS Abuse of Governmental Power. Sixty Days is enough! We need our Legislators to function as elected!

As far as I know, you have run NO Long Term Studies. You have Not called for realistic counts of those who have Recovered at every age level, nor have you required Autopsies or Documented deaths of Children and reported to CDC AVERS System or to us!

Since COVID has NO Approved "Vaccine", nor is there proof yet that any "vaccine " Stops the spread of Covid since March of 2020, please Release our children from further trauma!

PLEASE DROP the Vaccine and Mask Mandates NOW. Return Sanity to our Schools, Pre-schools and Pre-care providers! We know the numbers for the Risk. This Criteria is not justified. Thank You. Linda Woerman, Puyallup, WA

To WSBOH,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State.

According to the CDC, children are at low, or no, risk of disease from Covid19. Parents should have control over their child's health care choices.

I have three children and it has become ever increasingly apparent to me, that through 2020 and 2021, children and teens are at very low risk of severe illness due to Covid 19. Likely because that population most actively 'exercises' their immune system...

It has also become apparent that those who do not actively exercise their immune systems or have comorbidities, are the most at risk of severe illness or death. (Also note that a vast majority of 'comorbidities' are self induced and always lead to death or premature death whether it be Covid or Cancer.)

I am also asked to remind you:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

On this last note, the Covid vaccine does make sense for adults, especially high risk populations. It does mitigate and minimize serious illness for those who are at risk.

Quotes from the CDC website:

"Compared with adults, children and adolescents who are infected with SARS-CoV-2 are more commonly asymptomatic (never develop symptoms) or have mild, non-specific symptoms (e.g. headache, sore throat)."

"Children are less likely to develop severe illness or die from COVID-19"

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The so-called vaccines are not working, 60% and more cases of covid patients have been vaccinated.

No cases of massive amount of kids dying from covid.

No tests done on vaccine effects on children.

1000's of people dying from vaccine yet not pulled from shelves till further tests are done.

Subject: Opposition to Involuntary Detain Unvaccinated People

External Email

Dear Washington State Board of Health,

I am writing to oppose any and all WAC proposals that authorize the DOH to involuntarily detain or sequester those individuals who have chosen not to receive the Covid-19 shot(s).

The proposals violate the rights of humans to choose one's own medical care and are in direct violation of the Nuremberg Code which forbids forced coercion of any medical procedure.

There are many medical reasons to not take these shots, including but limited to having natural immunity and/or having had adverse reactions to prior immunizations.

The data has proven that currently-available vaccinations have shown to neither prevent people from getting Covid nor stop transmission of the virus, that the protection the shots may provide is so far showing to be short-lived, requiring additional boosters which have varying degrees of effectiveness against new strains. No studies have been done on the adverse effects of receiving so many vaccinations in such a short period of time. Their long -term safety and efficacy has not yet been determined.

In conclusion, the choice of getting Covid vaccinations and boosters should be between patients and their health care providers who are aware of each individual's medical needs. Each person should have the right to weigh the advantages and disadvantages of getting vaccinated and should not be mandated by the government. It is my request that any WAC suggestions or regulations permitting or requiring such measures should not receive any consideration of action by the Washington State Board of Health.

Sincerely,
Karen Coult

Caitlin,

I am extremely opposed to our WA state making Covid vaccination mandatory for child care and school admission. As a parent who researches all vaccines, even before Covid, I have always taken more than an interest in what is going into my child.

The vaccine is simply too new and experimental for me to feel comfortable putting it into my three healthy children. As parents our responsibility to our children is to make the best possible health decisions for them. I believe that a year old "emergency use" vaccine, that doesn't have 99-100% effectiveness, where we also do not yet understand the future health ramifications, is not the best for my children.

If vaccines are made mandatory in WA state, a state I have always loved and lived in, there is no doubt we will either homeschool our children, or move to a state that does not require such action.

Thank you for your time.

What is being proposed and already forced is as you know, unconstitutional, immoral, unethical, barbaric, power grabbing, irresponsible, and greedy as I'm sure the schools will get money for forcing poison into kids and already are making them sick slowly with suffocation of masks (YOUR decisions are doing this- bit can also save kids and families) which are scientifically unhealthy to wear and do no good only harm physically, psychologically, emotionally as certain teachers punish perfectly healthy kids that they are supposed to teach educate and protect because they exercise a sane, mindful healthy dare I say normal approach to live life and breathe oxygen at appropriate levels. According to OSHA a mask is a confined space, not meant to be inhabited. Period. You need permits to enter confined spaces and constant monitoring of gases flammability etc. Gases such a CO2- what we exhale and O2 oxygen which we breathe. Oxygen levels below 19.5% are O2 deficient as is the area under a mask. Add stuffy nose and some anxiety, how does one breathe and function? Not well, not at their best. Increased fatigue, headaches, etc. Surely as parents and grandparents you want better fate and care and protection of your kids your and their rights and freedoms. Govt has overreached. They are out to take everyone down. All of you, your families, friends, people and anything you like enjoy or care about. Freedom gone. That is the issue. You all have not only a choice but an obligation in your capacities as professionals and sons, daughters, parents, grandparents to protect the future and stop what's happening now.

Have you seen Australia? Take a look. They want to remove all freedom all over the world. You mean nothing to the govt and you owe them nothing. The kids the parents yourselves. You have a duty to do what's right, not pressured, persuaded or threatened, or paid off. I implore you to do the right thing.

The only thing for tyranny to win is for good men/women to do nothing...or
compitculate/sell out. Don't continue to sell out one more moment. Literally the now
immediate and near future and distant future of kids rests on your decisions. Do you love
your paycheck or a sum of money from feds to sell these innocent kids down the river?
I'm sure you teach them.to.do.whats right, even if it's unpopular. I'm pleading that you
live by example and do the same.

This, whole thing, all.of it matters. More than anything has in your life til now. Will you
protect these kids, give them a fighting chance and our city and push back for our nation
or will you continue to cave? God knows and sees all, even if we don't. There's none to
fear but Him.

We as Americans, people need to unite against tyranny. Proposed policies to kidnap kids,
families, innocent people bc they choose to not put Cancer causing and other poison in
their bodies? Because they support freedom and real science that shows and proves
masks and the EXPERIMENTAL jabs are harmful. More harmful. Detrimental than good?
That they cause cancer [infertility miscarriages stillbirths (96%)] myocarditis- IN KIDS,
Multiple sclerosis, paralysis, POTS, immnosupression through various diseases known like
hiv/aids (yes in and from.jabs) and unknown. And on and on and on. THIS is what you
want to FORCE into kids? Your families? Its murder plain and simple. It's genocide of
all.peoples who are not elitists. They think we are all ants, not even people.

Go to America's frontline Doctors online and Dr Ryan Cole in Idaho and 15,000+ Drs who
are starting to speak up and stand up for truths. Review the studies from Drs all over the
world who have been fired, gag ordered, silenced threatened killed for speaking truth
about dangers of this experimental experiment. Educate yourselves, make informed
decisions. If you fail to do this, how hypocritical are you?

Thank you for your time. Do the right thing. The kids need you to, your families need you
to, our city, state and nation needs you too.

Subject: Notice of maladministration

External Email

Dear public servants of the Washington State Board of Health.

As one of The People, I speak in authority and I urge you to take notice and turn to serve The People and protect our rights and freedoms.

You have lied to The People regarding WAC 246-100 and have committed criminal misconduct and maladministration. Because of this, any duties you perform cannot be trusted and thus you do not have consent.

There is an underlying concern to this January 12th meeting regarding implied consent. By the Board proposing changes to Chapter WAC 246-100, you have put the Chapter as a whole before the public and can claim implied consent by silence even if it's more concerning section (WAC 246-100-040) regarding involuntary detention is not edited (the section allows for involuntary detention upon refusal of vaccine compliance). You can claim consent because WAC 246-100-040 is included in the chapter (which is the agenda item) and if the chapter is edited and accepted you can claim both public notice and consent of the chapter as a whole. The portions you have chosen to edit may be publicly acceptable. This is irrelevant without trust. You have lied to the public about what else is in the chapter " nor does it suggest law enforcement be used to enforce any vaccination requirements", and by doing so, You can position yourselves to activate the most grotesque and lied about portions under the guise of consent.

I do not mean to suggest that WAC 246-100-040 is new. I understand this overreach was put in place back in 2003 (<https://app.leg.wa.gov/wac/registerfiling.aspx?cite=246-100-040>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2Fwac%2Fregist100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11d0e217>>).

By placing "Chapter 246-100 WAC" on your agenda (item 9 - WSBOH-Agenda-2022-01-12-Final.pdf (wa.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FAgenda-2022-01-12-Final.pdf%3Fver%3D2022-01-05-175008-690&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11d0e217>>, you technicality (and by definition) include the whole "chapter", making Chapter 246-100 > Section 246-100-040 an agenda item. By listing "possible action" underneath the agenda item, you can claim public notice for any changes made to this chapter and it's sections.

On your page Clarifying Online Misinformation about the Jan. 12 State Board of Health Public Meeting > Washington State Board of Health

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FNews%2FArticles](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FNews%2FArticles%2FOnline-Misinformation-about-the-Jan-12-State-Board-of-Health-Public-Meeting&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11d0e)

, The Board of Health lies to the public, breaching trust and diminishing any confidence in the Board's intentions (especially regarding this Jan 12th meeting). On the "Clarifying" page regarding "chapter 246-100 WAC" you state " nor does it suggest law enforcement be used to enforce any vaccination requirements" which is a blatant lie as you can see in Chapter 246-100 > Section 246-100-040:

"Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

(a) Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with requests for medical examination, testing, treatment, counseling, vaccination, decontamination of persons or animals, isolation, quarantine, and inspection and closure of facilities, or has determined in his or her professional judgment that seeking voluntary compliance would create a risk of serious harm; and

(b) Has reason to believe that the person or group of persons is, or is suspected to be, infected with, exposed to, or contaminated with a communicable disease or chemical, biological, or radiological agent that could spread to or contaminate others if remedial action is not taken; and

(c) Has reason to believe that the person or group of persons would pose a serious and imminent risk to the health and safety of others if not detained for purposes of isolation or quarantine.

(2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx%2F43.20.050>

(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx%2F70.05.120>

(3) If a local health officer orders the immediate involuntary detention of a person or group of persons for purposes of isolation or quarantine:"

Referring back to the Board of Health page mentioned above which claims to clarify misinformation and actually is itself misinformation;

You state; "The Board will receive a briefing on the progress of the technical advisory group (TAG), which is convened to consider COVID-19 for inclusion in chapter 246-105

WAC, at next week's meeting (agenda item 8). The Board will not take action on this agenda item at the meeting."

If we look back at your agenda; item 8 is listed as a briefing by TAG with no action listed. If you look at item 11 you will find the code mentioned above regarding TAG's briefing "Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry —Possible Action" . This allows you to claim public notice for any changes made to this chapter and it's sections.

- WSBOH-Agenda-2022-01-12-Final.pdf (wa.gov)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FAgenda-2022-01-12-Final.pdf%3Fver%3D2022-01-05-175008-690&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C0a418f3a161f4477d06008d9d5940edf%7C11d0e217>

The Washington State Board of Health is both obscuring information (246-105 WAC) and directly misinforming the public (246-100 WAC) regarding this January 12th meeting. This is no less than criminal. We The People can not trust a Board that lies to us. You have lied and have placed yourselves in a position to claim that public notice has been given regarding changes to the above chapters which include; involuntary detention for non compliance with vaccination (a code that does in fact include the use of law enforcement) and Immunization Criteria for Child Care and School Entry (a code that is on the agenda for possible action).

Without question I have shown at a minimum that we The People have reason to be concerned with the criminal misconduct and maladministration of our Washington State Board of Health regarding the January 12th meeting.

Some of you will lock into place reading this (although I hope none of you do) but all of you are called in your humanity (just as I am) to love one another and care for the concerns of other people. Turn with The People and protect our rights and freedoms.

Thank you,

Michael Loutsis

Good Day Michelle,

On January 6, 2022 I sent you a public comment, at this time I have not heard back from you regarding having read my comment.

I have all of the delivery receipts from sending the email on January 6, 2022.

Since I have not heard back from you or from the Washington State Board of Health, I am sending you a "Notice of Liability and Affirmation and Demand for Rebuttal or Remedy".

You have now been formally served.

I am writing to OPPOSE the boards formation of a Tech. Adv Group to review Covid19 information. As a board certified physician have read deeply into the science of these yet experimental unapproved vaccines and with 200,00 people dying form these vaccines, AND a few days ago a major Life insurance company stating that his billion dollar company is noting a 40% increase in deaths during this past year 2021 and this is industrywide not just his company. This is something he has not seen in his career. He states that a one and 200 year catastrophic event would lead to a 10% increase in mortality and yet they are witnessing 40% increase. Fauci's experiments as well as the other mRNA studies prior to Covid all lead to disasters with massive inflammation of death.

This is an agenda to create billions of dollars for the vaccine industry with no supervision safety studies and manipulation of data.

Mandating this for our kids is essentially tantamount to destroy our future reproductive years.

Please support Informed Choice Washington's petition for rulemaking item number 11 on the January 12 agenda filed by Xavier Figueroa PhD.

Subject: Public Comment on Covid Vaccine Mandates for School Children

External Email

Dear Washington State Board of Health:

My name is Jerod Edington and I am a resident of WA State in Spokane County. I own multiple businesses and have two children ages 12 and 14 in public school, particularly the Mead School District in North Spokane.

I wanted to briefly oppose my STRONG opposition to the proposed vaccine mandate for WA school children (as well as adults). My children have had Covid and recovered easily with very little symptoms. Naturally induced antibody proliferation is a subject being unreasonably ignored.

Although covid has in some extreme cases been more dangerous to people than the common influenzas, children have had little problems with building a natural immunity and fully recovering from Covid. CDC recently stated there are only 3,500 children currently hospitalized in the U.S. from Covid, and I have read countless personal stories of children being harmed or killed by the Covid "vaccine" side effects.

It is common knowledge that vaccinated individuals spread Covid just as much as non-vaccinated. I do have a serious issue of mandating a completely new technique in the mRNA "vaccine" that has ZERO long term studies completed. I could cite many articles and studies if you like.

This issue is so important to me that I would heavily consider moving my family and businesses to Idaho or Montana if it were to become law.

Most Sincerely,
Jerod Edington
Resident of Spokane County

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Rubin, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

You are teaching children to live in fear and it must end.

+

Members of the WA State Board of Health,

During your January 12, 2022 meeting I urge you to oppose Agenda Item #8 which would allow for the formation of a Technical Advisory Group; a group which would then make decisions regarding vaccination enforcement for children, mandatory quarantines, etc. Please inform yourselves as to the nature of the corona virus, the impact of the mass vaccination policies, as well as the effect of the virus on the very young and the impact of another required vaccination on our children.

I ask you to support Agenda Item #11 which wisely prohibits additional use of EUA products until Phase III trial studies have been completed.

The State of WA has not the right nor the duty to impose upon its citizens mandatory medical procedures. It is particularly abhorrent that WA State is considering mandating children receive experimental injections, and for a virus whose impact on children is minimal.

Sincerely,

Laurel L Berger, BSN, RN

Rules Hearing Continuance – Communicable and Other Certain Diseases, Chapter 246-100 WAC

I would like to voice my concern and opposition to the restrictive - restriction (potentially equivalent of internment) timeline being extended from 3 month to 12 months. Also, it is concerning to me that you are changing STD to STI. With that change, I see it as a slippery slope and an easy transition for a politician with a political agenda to apply these laws to someone who has an infection, such as a COVID infection.

Thank you,
La Jean

Subject: Potential Mandate for School Children

External Email

To whom it may concern,

We are writing as concerned parents about the possibility of COVID-19 vaccine mandates for school attendance.

Data has consistently shown children to be at low risk for severe disease from COVID-19 and the extent of the risk from the vaccine is yet to be understood. With the lack of long-term data regarding side effects or efficacy of the currently available vaccines, most specifically in children, parents have the right to weigh the risks and benefits and decide what is right for their own children. This is not "just another vaccine". Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects and risks.

We do not feel at all comfortable giving this vaccine to our children and will pull them from public school if this mandate is implemented.

Thank you,

James and Lisa Zimmerman

To: Hoff, Christy Curwick (SBOH) <Christy.Hoff@sboh.wa.gov>
Subject: Opinion against COVID-19 vaccine mandates for children

External Email

Dear ma'am,

I am the parent of a private school student in Bellevue. I absolutely disagree with the COVID-19 vaccine entering the mandatory vaccine, even though I support the existing school mandatory vaccine.

First, the COVID-19 vaccine does not meet the purpose and role of mandatory school vaccination at all.

In CDC, the definition of a vaccine has been changed to a protective meaning from immune formation. According to global statistics so far, the COVID-19 vaccine has not been seen at all to prevent transmission by forming mass immunity and has been used to comfort individuals by not exacerbating their symptoms.

School-mandated vaccinations are intended to form mass immunity and prevent transmission, but currently, COVID-19 vaccines do not meet these two important aspects at all. Therefore, it is natural that the vaccination of the COVID-19 vaccine should be left to the individual's choice.

Second, the COVID-19 vaccine is only an emergency approved vaccine that is not sufficiently clinical and has many side effects. There has been no study at all on what side effects will occur a year or 10 years after children are hit. For this reason, many experts and doctors in the United States are currently opposed to vaccinations for children and adolescents.

Therefore, I think it is irresponsible to force children and adolescents to match dangerous vaccines that have not been proven safe for more than 10 years.

Thank you for listening to my thoughts. I sincerely ask you to consider this for the health and future of our children.

To whom it may concern,

Today I was informed by a fellow mother and friend that the Washington State Board of Health was meeting to discuss policies dealing with the current covid situation. These policies seem to basically amount to the government forcing people to give up their right to bodily autonomy.

Therefore, I have to express my deep concerns for the agenda and state that I DO NOT agree with the proposed policies. They infringe on the rights of a person and the rights of a parent to make the best decisions for THEIR children. Again, I'd like to state I am in full disagreement with the proposed policies. I can not support the agenda regarding COVID vaccinations requirements in school when there is no long term study on the effects of the vaccine especially on young children.

I feel the way I do for many reasons but the strongest reason, as a person and as a mother, is that the numbers and the studies do not support the decision of these policies. I implore you to think about what these policies would really look like if passed because, I for one, do not see a bright future for the state of Washington if the board of health passes this agenda during the meeting.

Respectfully,

K. Harmon

Subject: On covid vaccinations for children

External Email

Hello and thank you for listening to a discussion on this matter.. Due to the experimental nature of this medication and lack of reliable testing due to time constraints, I would ask you to delay a mandate on these vaccines for kids. We have had little testing, research and studies to determine possible adverse effects from this gene therapy on children and those under age 25 in general. With the mild cases of Covid in children and in others due to the nature of the Omicron strain, we can afford to take more time to do studies and give space to testing for treatment options.. Too much is unknown to risk our childrens' precious hearts, reproductive potential and general health. Please read up and learn as much as possible about the effects of the vaccines on various groups. Have symposiums with a variety of speakers. Science is " the intellectual and practical activity encompassing the systematic study of the structure and behaviour of the physical and natural world through observation and experiment."

We can engage in more true scientific observation and experimentation through studies to learn more about the efficacy and safety of this treatment before we mandate it for our precious children. Let's air a variety of points of view, sources and studies in this very important matter.

Thank you for your consideration of the families who are wanting to protect our children from possible error and for which we may very well be sorry years from now.

Sincerely,
JoAnn Grambush

As a citizen, parent, and teacher of Clark County I oppose vaccines for children. I oppose any vaccine using the current vaccines.

I encourage the medical community to do a better job at preventative and initial care of covid patients. Currently there is no protocol. Doctors hands are tied or they are ignorant of preventive and initial care protocol.

Sincerely,

Jerilyn Braskett

Hello,

As a parent to two young children, one about to be school aged, I strongly oppose mandating this vaccine. As an American citizen, member of this community, state and society I also strongly oppose INVOLUNTARILY detaining fellow members of society in quarantine facilities.

CDC themselves have said that the vaccine does not prevent transmission, and with a recovery rate of 97-99.75% especially amongst young children and healthy adults, I see little backing to require this vaccine as a mandatory one for school, and little reason to withhold citizens involuntarily.

As a prior member of the healthcare community; I understand that COVID-19 is a virus that will continue to mutate and become less severe; thus, treating this like the flu makes more sense.

There is little to be gained from implementing these conforms and much to be lost; including individual autonomy, family's constitutional rights to chose what is best for their body and their child's DEVELOPING body. The long term studies have not been conducted (we are the long term studies). The extended risks of Pfizer, Moderna and J&J have not been assessed. That reason alone should be enough to allow us to chose what is right for us and our healthy family.

Thank you,

Janay Kidder

To whom it may concern:

As a constituent of Washington state I wanted my opinion to be clearly presented to those making unconstitutional policies in our state. I am completely against all the new proposed Covid policies including but not limited to: allowing local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination. I also am against requiring COVID-19 injections as part of school immunization.

The government was never created to be able to tell us what to do and decide the course of our life for us; rather it is the people (which is me) that have the right to tell the government (you) what I want done, and the government is to carry those deeds out.

There has been enough overstep, cheating, lying, and deceit from our government in Washington state. Stand for right, truth, and freedom!

The covid vaccine should not be mandated for children. At the very least, a long term study (3-5 years) of data and open debate should occur before we introduce a drug universally to children. The rush to vaccinate children is imprudent.

I express my concerns in forcing quarantines and vaccination for the following reasons:

- Under Emergency Use Authorization, Covid-19 tests do not prove infections or infectiousness in people.
In some test kits, it is said only a few percent of case positivities had culturable virus. Thus, it is not constitutional to detain people based on faulty case positivities.
- Under Emergency Use Authorization, Covid-19 vaccines are not proven safe. No one would admit vaccination injuries, and no one is liable at the moment.
- In 2021, Washington state saw a significant increase in excess mortality from 2020 and it is not proven that mass vaccination did not contribute to it. Until it is proven safe and excess mortality is understood, forcing vaccination may increase more excess mortality.

<https://www.usmortality.com/excess-absolute>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.usmortality.com%2Fexcess-absolute&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C8ee2ebc0d1734fb71bee08d9d2fe6ee1%7C11d0>>

Please do not enforce based on premature test kits and premature vaccines.

Hideki Mizutani
A resident of King County, WA

requiring COVID-19 vaccine for children.

The vaccine is not fda approved for children and it's effectiveness is in question as well. People who are vaccinated and boosted are getting and spreading Covid-19. The idea that children should get vaccinated to protect the vulnerable is a concept that is crumbling as we see a significant rise in cases among the vaccinated and boosted. Children are not at high risk of becoming seriously ill or dying from covid-19 and requiring them to be vaccinated does not give them individual benefits of fighting a covid-19 infection. I highly oppose this proposed expansion.

Thanks,
Jessica

Hello,
Please take into consideration the choice of free American citizens to choose whether they or their children are vaccinated against Covid and or any other vaccine. Americans prior to Covid didn't even have to vaccinate their children against ANYTHING for them to attend public school, now the Covid vaccine could be the only thing preventing children from receiving an education. We have a right to choose for ourselves. #mybodymychoice right?

I am not ok with any mandatory covid shots. These are not vaccines, these are gene therapy. Vaccines keep one from getting what the vaccine is for, these shots do not do that. Why are we not testing people for the antibodies for the people who have had covid and recovered. We will not comply with these dictator rules. The state will never get to 100% vaccination rate. This is not a pandemic, we need to drop the mandates and get people back to work. it is unconstitutional to make people take a shot or lose your job.

It is the 14th amendment for citizens rights: All persons born or naturalized in The United States, and subject to the jurisdiction thereof, are citizens of The United States and the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of The United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of its laws.

4th Amendment: The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularity describing the place to be searched, and the persons or things to be seized.

Members of the Board of Health:

To very briefly introduce myself, my name is Kevin Gemeroy, and I'm a 4th generation West Seattleite, local entrepreneur and small business owner, a Covid data guru, and a Covid policy refugee.

I am not and do not claim to be a scientist or a medical doctor. What I am is a Tech CEO, parent of two young boys, and a concerned citizen. I am both trained and heavily experienced in reading data & charts, reviewing results with a critical eye, understanding their true meaning, and making critical decisions based off of limited information available to me.

I am also fully vaccinated with the Pfizer vaccine, with moderate complications, and was subsequently infected with a breakthrough Covid case in August of last year. That infection was passed along to my fully vaccinated wife and to both of my young children, who now have "natural immunity" to Covid-19.

I am here today to discuss my findings on the Pfizer trial and urge the board NOT to adopt a requirement to vaccinate children for childcare or school entry. As someone who is inherently a critical thinker, I naturally reviewed the Pfizer study on 5-11 year olds myself. I was somewhere between surprised and shocked with what I found and wanted to share the highlights with the board and attendees.

- * The Pfizer vaccine was administered to a very small number of children
 - * Only 1518 children total during the Phase 2/3 trial
 - * In the phase 1 trial, all children with a previous Covid-19 diagnosis were completely EXCLUDED
 - * In the phase 2/3 trial, only 135 children had evidence of prior Covid-19 – less than 9% of the total test group
- * Side effect data for those with prior infection is extremely limited
 - * As mentioned previously, a very small number of children who were previously infected were studied (135)
 - * The study has a total of one sentence and ZERO data on the side effects for those with prior infection

* Data on non-severe adverse events was only collected for one month after the second dose was administered – meaning we have no long-term safety data

* Immunogenicity data was NOT analyzed on those who had prior Covid-19 infections

* Efficacy of the vaccine was LOWER than natural immunity during the study period

* Efficacy against transmission was 90.7% in the vaccine group against transmission (of older variants) - 95% CI 67.7 to 98.3

* Yet, not a single child who had evidence of prior Covid-19 infection was reinfected during the Pfizer trial – meaning prior natural immunity was 100% effective during the trial

* No children in either the vaccine nor the placebo group were hospitalized as a result of Covid-19 infections

* The CDC estimated that approximately 40% of children have had prior Covid-19 infections.

* This estimate came in September of 2021 which was before the current Omicron wave, which is likely to increase that number by orders of magnitude

I provided an annotated copy of this study with my findings along with my letter. I hope the board will read and consider the points that I made.

Finally, my letter concluded with the low-reward yet unknown risk factor involved that comes with mandating this vaccine for children. But rather than conclude with that, I would like to conclude with newly released data from yesterday:

That data show the impact of our local educational disruptions on children - especially those with disabilities and those who come from low-income families and/or the BIPOC community, who saw by far the greatest impacts of last winter's lockdowns and closures.

* Children enrolled in Special Education programs saw a 50% drop in achieving state standards in Math and 23% in English from the Spring of 2019 until the fall of 2021

* For low income children, the drop was 53% in Math and 28% in English

* For Native American children, the drop was 61% in Math and 36% in English

* For Black children, the drop was 53% in Math and 25% in English

* And finally for Hispanic children, the drop was 52% in Math and 27% in English

While Governor Inslee may claim that disinformation is the cause of vaccine hesitancy amongst parents of children, I would argue the opposite is true - mistrust - not disinformation is the cause of this hesitancy.

Mandates will only further this mistrust, and in many cases, these groups have among the lowest vaccination rates and highest prior Covid infection rates to begin with.

We cannot afford to keep our kids away from school any longer. We will already have to spend years trying to right the wrongs of last year's school closures. We need our schools to be open and available to all, especially those who were the most heavily impacted by

last winter's lockdowns and closures.

Please do not require this vaccine, even with the existing exemptions allowed. Parents who want their children to be vaccinated already have that choice. Those who don't should continue to have that right and should not have to file for exemptions to exercise it.

Thank you for your time and consideration.

Subject: Please Vote NO on MANDATORY VACCINES FOR ANYONE, LEAST OF ALL CHILDREN!

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA
"vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

Please refrain from passing any additional infectious disease policies.

We have always been afflicted with various diseases and will continue to cope at times with disease. This is part of life and people react differently – not one solution fits everyone's need.

It is the responsibility of individuals to determine along with their doctors and health advisors of choice on how to best manage their health or address disease.

It is not an administrative problem that requires public health policies to control and oversee people's health management.

At a time of crisis, when it appears that public health is at risk, we need 'all hands-on deck' and jointly develop a common-sense approach on how to best respond and how to best protect the vulnerable and how to best ensure that all damage is kept to a minimum, not just potential damage coming from a health threat.

Far too many epidemiologists, virologists, doctors, scientists who are more than qualified to weigh in on the discussion have not been included in the development of prescribed and now more and more mandated solutions.

This is undemocratic and not a good indicator of the direction where we as a society are moving.

As a German citizen I am aware of what damage top-down medical experiments can cause. That is why 74 years ago the Nuremberg Code was passed.

Vaccine mandates based on new mRNA technology with unproven track record are definitely in violation of that code. Some aspects that come to mind are the following:

* All medical experiments require a voluntary, fully informed consent of every person participating in such experiments. Do you really believe the public has been appropriately educated about the potential harm done by the proposed solution

compared to the harm and threat posed by the virus?

* A medical experiment undertaken (not unlike the current world-wide experiment with the vaccines) has to be to the benefit of society and cannot be measured by a myopic view of a theoretical COVID 19 disease or death reduction of relative 95% that in absolute terms is a reduction of less than 1% mortality without consideration of potential increase of mortality and harm in other categories that likely far exceeds that benefit

* The experiment has to avoid all unnecessary physical and other harm of all kind... It is unclear whether much of the collateral damage, especially inflicted upon the development of children can be justified with the underwhelming result of the COVID 19 measures taken to date

* No experiment shall be conducted where it is clear in advance that death or lasting damage might ensue.... Pfizer's trial data as well as VAERS records and other vaccine side-effect tracking systems around the world clearly indicate that there is non negligible harm done by the vaccines that has never been neutrally assessed in an adequate risk-benefit analysis that takes ALL CAUSE MORTALITY and HARM into account.

The proposed pieces of legislation: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 foresee excessive power of local health officials who will be enforcing policies that are inadequately evaluated.

Therefore, please refrain from passing any such legislation.

Please educate yourself about the 6-months trial results from the Pfizer injections put together by the Canadian Covid Care Alliance here:

When you scroll down a bit, there is a video taking you through the information of the attached presentation.

<https://www.canadiancovidcarealliance.org/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/>

If people understood what Pfizer is saying and finding, and if regulators were independent and knowledgeable, they should acknowledge that it is time to include other health experts into the discussion and revisit our approach to deal with the current crisis.

Kind regards,

Irmgard Tank

Dear Sir or Ma'am,

I write with grave concern for the very real potential for serious abuse and discrimination if you amend this law to include COVID-19. Please do NOT amend it this way, or include any form of involuntary detention or quarantine protocol.

The science on Omicron is showing it is extremely mild, following the evolutionary path predicted ahead of time by numerous epidemiologists, that it would become more transmissible over time and variants, as it becomes more harmless. They are having difficulty even accurately ascribing single digit mortality *worldwide* to this variant.

This amendment is flat out wrong, as well as unnecessary.

Please allow for me to speak. Thank you

Here is my timeline:

1. 9/22 Submitted Religious exemption
2. 9/29 Religious exemption approved by COS
3. 10/6 Email states the exemption will not be accommodated (SFDHR)
4. 10-13 Consequent email states the option for telework is possibly while exemption is decided 10/13: Requests accommodation suggestions from me. (SFD division not willing)
5. 10/15 Email recants 10/6 email and that when a final decision is made, I will receive a letter. 10/15 (HR)
6. 10/18 Forced to make the mandate decision. Last day on site.
7. 10/19 Remote work accommodation until I am fully vaccinated.
8. 10/19/21 to 10/29/21, calls to my medical team to request baseline labs.
9. 11/1 1310 Sat in observation area. Had a warm uncomfortable sensation come across my arm, chest, neck and head. Had vitals checked. Sensation lasted 58 minutes.
10. 11/2 0300 Insomnia with a bizarre surge of energy. Startled out of sleep with heart palpitations. Heart rate 100-120 appx. Woke with swollen eyes, intermittent burning lip.
11. 11/3 General fatigue: night sweat, woke with swollen eyes.
12. 11/4 Swollen lymph nodes all through my chest, armpits and posterior neck.
13. 11/10 0700 While in the shower, became very dizzy and shortness of breath. With consistent breath for about 10 minutes, I was able to crawl out of the shower. Elevated my feet and tracked my elevated heart rate of 120-130 for 90 minutes.
14. 11/12 Gnawing pain in my right upper chest
15. 11/14 0130 Startled out of sleep with heart racing. Left hand paralysis for appx. 8 minutes.
16. 11/15 EKG and blood tests to rule out myocarditis.
17. 11/19 Heart palpitations, full body sweat, brain fog, vertigo
18. 11/20 to – present. Treated underwhelming with Kaiser. Questioned about the

validity of my effects.

I believe the entire mandate agenda caused an insurmountable amount of confusion, chaos and a steady ripple effect that has employees still retiring even after they have received full vaccination. The mental anguish and systemic coercion.

It is unconstitutional. Based on Judge Dave Larson letter to fellow Chief Justice Gonzalez, there is no place in our government for our leaders, to create laws into effect, emergency or not. They can waive them or suspend them. That is all! The Supreme Court has no legislative or executive authority to pass vaccine mandates. Likewise, my choice to follow a very effective naturopathic lifestyle creates the need for me to never have a prescription from the money driven pharmaceuticals that have been married to government since the Flexnor report. On the contrary, I seek what Asian (Qi), Indian (Ayurveda), and First Nation (Wisdom keepers) people have perfected over centuries of time. Let's go back it time and have a history lesson. In 1910, Rockefeller paid a host of people to produce this book. But mainly, he so divisively used Andrew Carnegie's popular influence to market. It shut down many apothecaries, indigenous clinics, which resulted in many proprietary formulas and plant medicines to be entirely forgotten about. These were very tried and true practices and modalities, deeply rooted in the sacred tribes. All in the name of petro-chemicals. Which, moreover, was the cause of the first plastic, which we are now back pedaling to remove out of society.

For me, personally, and the legacy that I will leave, there is absolutely no reason to bring home steroids, statant, antibiotics, chemotherapy, what not. They are all going against our natural biorhythm and should only be used in a hospital level need. There is a time and place for synthetic chemicals. But not in prevention and optimum maintenance of health.

PLEASE STAND UP FOR THE CARE TAKERS OF THIS WORLD. KEEP IT SACRED AND TEACH OUR CHILDREN THIS AWARENESS FOR THEIR BRIGHT FUTURE.

To whom it may concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about Covid-19 shots for consideration of mandating the shots for school. I OPPOSE Covid-19 shot mandates, PERIOD. The science does NOT support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals. Children are statistically at ZERO risk of dying from Covid (their survival rate is in the range of 99.997 - 99.998%); where there is no risk, there can be no benefit. Furthermore, there are numerous studies now that support adverse affects of the vaccine on our children. Even the FDA has doubts about the safety of a vaccine for an individual under the age of 16. (www.fda.gov/media/151710/download...the required studies on children will not even be completed until May 31, 2027!!!!!! And that is only one of the required pediatric assessments!) There has been enough time now to find out the truth about what is going on with Covid, and there is no excuse for draconian measures to be inflicted on our children just to be able to attend school.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EAU) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. As noted in the FDA link above, the required pediatric studies required are not yet completed. STOP USING OUR CHILDREN AS TEST SUBJECTS!!!

Sincerely,

Amy Voges

I do not support the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I feel that these proposed policies are unconstitutional. This is not the role of the Health Department.

Please do not require vaccination of children for admission to school and day care! Please do not take authority away from parents, especially since this vaccine is still only approved as Emergency Use and no one really knows the long term side effects. All one need do is look at the government's own website (VAERS) for vaccine related adverse effects to know that these vaccines are not without risks. Thousands have been injured and many have died, having taken the shot under duress.

This latest variant is proving to be mild in its symptoms and the "vaccine" is not proving to be effective or efficient in eradicating Covid so why should anyone take the risk of injecting themselves or least of all their children with an unproven solution.

Please listen to Dr. Robert Malone who is one of the founding scientists for the mRNA "vaccine!"

JRE #1757 - Dr. Robert Malone, MD (rumble.com)

As a mother and a grandmother, I implore you to vote NO on mandatory vaccinations for Covid19.

Subject: Please do NOT require COVID vaccination for school aged children

External Email

Please do NOT require COVID vaccination for school aged children

To the Washington State Board of Health,

I'm writing to implore you to NOT include the covid-19 shot on the list of required vaccinations for schools.

As the grandmother of 4 school-age children in Bellingham, I can say with certainty that a decision to mandate kids to have this shot would wreak havoc on many families and within our schools.

I'm sure we can all agree that vaccines are an important and effective tool for preventing many diseases- and I have always been perfectly willing to utilize them to protect my own children, and our community. However, there are many reasons why (most) parents have chosen to wait on having their children receive these particular shots including, but not limited to:

* In the scheme of things, the covid vaccines are still quite new and most parents, (while willing to receive the jabs themselves) are not at all willing to risk their children's health before knowing much more about the long- and short-term side effects of this new vaccine. These feelings are completely justifiable as the science on these vaccines is still evolving and coming to light. Don't you understand that many people are DYING from this vaccine as well as having horrible side effects. Why would I subject my children to this poison?

* In terms of how the vaccines will affect public health- that science is still evolving as well. Considering that both VACCINATED and unvaccinated individuals can contract and pass along the virus, many parents remain skeptical that any perceived or real risk is actually worth any perceived benefit. I personally know 5 family members who have had COVID after receiving the vaccine, please tell me what is the point?? It serves no one to preemptively force parents into a decision they aren't ready to make when there is still so much confusion circulating.

* Covid in otherwise healthy children is not a large risk- and the (extremely low) hospitalization rate of healthy children supports this. Therefore, the risk/reward of getting this shot does not balance when you consider the mild nature of the virus and the possible side effects of the vaccine. Parents should be given the FREEDOM to choose their own level of risk for their family. Isn't this still a free country?

This will directly go against my rights as a native American citizen.

* There are MANY medical, religious, and other deeply personal reasons why parents are hesitant to give this shot to their children. Sadly, most of these reasons will not be covered by "exemptions"- forcing parents to choose between their children's health or their schooling. Please DO NOT force parents to make this choice. How dare you, force us into this. You should all be ashamed of yourselves that this is even a topic of discussion in a country that has fought and died for its freedom.

For whatever reason, the covid vaccines- effective or not- have been profoundly politicized, with most parents falling on one side or the other. Because of this, it is reasonable to assume that a decision to require this particular vaccine at this time would directly cause a mass exodus from our schools, shattering our communities and negatively impacting public health across the state.

At this stage of the pandemic, we find ourselves at a pivotal moment when every protection we can possibly hope for from this virus is in place. We have the tools to protect ourselves and our families- and everyone should have the right to choose which protections are best for them. You, as the health board, are in a unique position to renew public trust in our state government by demonstrating trust in the people of Washington.

Please consider that NO ONE cares more about a child's health than their PARENTS. No one knows their medical history or the ins-and-outs of each individual child better than their parents. PLEASE allow parents- the ones who care the most- to make the determination for their own children. It is what is best for the health of every family, every school, and every community.

I sincerely appreciate your time and consideration.

Subject: Please DO NOT mandate vaccines for our kids

External Email

Dear Lindsay,

I appreciate your time in reading this note. I am writing you regarding the decision you are considering to mandate our children to receive COVID injections as a requirement for school entrance.

I am a registered nurse (20 years) with expertise in nutrition, natural health, and healing autoimmunity. I am also a concerned parent of five children, four of whom attend public

school and one who will in a few years.

For many years I believed fully in the vaccine model and was reared in the western medicine framework that we should never question vaccine safety or efficacy. That all changed when I nearly lost my daughter to vaccine injury as a toddler. She developed a severe petechial rash all over her body, which means she was hemorrhaging all over. I knew exactly what it was and we rushed her to the ER. Her platelets were so low that she was borderline brain hemorrhage and we nearly lost her. Her life was miraculously spared but she went on to experience a vast spectrum of symptoms in every body system and developed autoimmune celiac and other allergies that have absolutely changed the course of our entire lives.

I have spent the past 12 years studying vaccines and learning how to heal from vaccine injury. I have researched in depth their safety profiles and the truth about vaccines is that they are unavoidably unsafe. Vaccines are full of harmful adjuvants that expose our children to the most dangerous, carcinogenic, toxic substances known to man such as mercury, aluminum, polysorbate 80, and many other poisons, leading to toxic heavy metal buildup in our children's brains and other organs that FAR exceeds any safety threshold. Vaccines are known to open the gut barrier and brain barrier causing immune system reactions and alterations leading to asthma, allergies, autoimmune diseases of all kinds, cancers, and neurological disorders of all kinds such as ADHD, epilepsy, anxiety, autism, developmental delay and many others. We currently have the worst health report card for our pediatric population that has ever been known and it only gets worse as the vaccination schedule continues to ramp up. It is absolutely absurd that we now have 72 + vaccines currently on schedule.

Vaccines are unavoidably unsafe for every child. This is especially true for the current COVID MRNA and viral vector "vaccines." These are not traditional vaccines. These new therapies are being rushed to market. No vaccine was EVER brought to market this quickly. These vaccines are still experimental and CANNOT, therefore, be mandated to children. You cannot approve and continue to tote the line that something is "safe and effective" when it is experimental. By mandating this therapy for children, you will be imposing the greatest human experiment the world has ever seen, and you will have on your hands the blood of the innocent, as deaths and injuries soar, and as you cannot assure ANYONE that things won't go wrong.

U.S. VAERS data from Dec. 14, 2020, to Dec. 31, 2021, for 5- to 11-year-olds show:

* 6,005 adverse events

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffindings%2F5-11%2F2020-2021>, including 126 rated as serious

of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening,

required treatment or resulted in death — with 96% of cases

attributed to Pfizer's vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffindings%2F62%26life-threatening>>

.

* 579 reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffindings%2F579%26myocarditis-and-pericarditis>>

of myocarditis and pericarditis with 573 cases

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffindings%2F573%26myocarditis-and-pericarditis>>

attributed to Pfizer's vaccine.

* 146 reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffindings%2F146%26blood-clotting-disorders>>

of blood clotting disorders, with all cases attributed to Pfizer.

It is unlawful for you to mandate or force anyone to get a vaccine, especially a child. Children have next to zero risk from Covid. Who are we trying to protect by vaccinating them? It's certainly not them. Why is there only one solution for this pandemic? What about the amazing success of early treatment? What about natural immunity? Why are we not educating people about how to strengthen their immune systems instead? I have not seen your board say anything regarding boosting natural immunity with Vit D, Vit C, or scientifically proven herbs or natural remedies. Why??

PLEASE educate yourself regarding these vaccines. If you are not informed on VAERS you

owe it to every citizen in this state to get informed. These "vaccines" have been by far more injurious than ALL OTHER vaccines COMBINED. VAERS data released Friday by the Centers for Disease Control and Prevention included a total of 1,017,001 reports of adverse events from all age groups following COVID vaccines, including 21,382 deaths and 166,606 serious injuries between Dec. 14, 2020, and Dec. 31, 2021.

This is absolutely absurd that we are still recommending these vaccines. Any other pharmaceutical, at just a handful of reported deaths, would be blacklisted and pulled from market immediately. Mandating these vaccines for children is dangerous, irresponsible, and wrong.

As a parent of a vaccine injured child, I know firsthand the devastation and unnecessary heartache an injury can bring. My child can NEVER get this vaccine, as it would likely take her life. If you mandate it, she, and countless others like her, would be prevented from going to school and that is completely outrageous and unlawful.

Please do the right thing and do not impose vaccine mandates on our school children.

Thank you,

Lindsay Clark, RN

Subject: Proposed Policy Changes.

External Email

I am writing to add my voice to the thousands of comments you have already received in advance of the State Board of Health Hearing on January 12. I am strongly OPPOSED to your proposed policies that would allow local health officers to use law enforcement in any way regarding my health and that of my family to force us to do things that are against our conscience and our religion. I have lived in Washington State for over sixty years, and have never seen such draconian measures proposed. Please DO NOT pass these measures, especially for the safety and future of our children. Let parents decide what medical procedures or vaccines that they want to allow for their children.

Margaret Sackett

Subject: Opposition to Proposed WAC's

External Email

Hello.

I am completely against any of the proposed Covid Policies that are an example of government over reach, specifically these listed below:
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

COVID-19 is not so dangerous or deadly a pandemic as to necessitate the forfeiture of our sovereign rights as US citizens.
It is best to let each person decide how they will protect themselves from this virus.
There is no need for our government to intervene in our lives concerning this.
I will not stand for our country to devolve into the totalitarian police state that Australia has become.

Subject: Oppose Forced School Vaccinations

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Hi,

We are against any of the proposed Covid Policies you are planning to vote on January 12th, 2022. Those policies are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

For your information me and my family are vaccinated. We are not against vaccination but against locking people down because are not vaccinated.

Sincerely,

Laszlo Mayer

January 7, 2021

RE: January 12, 2022 meeting

Opposition to Agenda Item #8, the Board's formation of a Technical Advisory Group
Support for Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC,
Immunization Criteria, Child Care and School Entry
Ladies and Gentlemen,

I am sure others have provided you with sound research, properly conducted, to demonstrate why we should not be mandating vaccinations particularly in children. As such, there is no need for a Technical Advisory Group on this matter; thus Agenda item 8 pertaining to this should be voted down. To form such a group results in a very small number of people steering decisions for children and their extended families statewide. As of July 2021, the US Census Bureau indicates the state population over 7.7 million with 21% being under age 18. You are making decisions on behalf of 1,625,125 children plus several million other family members, for that which affects one person affects the whole family.

Now what type of information would these decisions be based upon? What has been the quality and accuracy of public information given to the WA state government and citizens received these two years? It has been a rollercoaster of bait-and-switch actions. The issuers of official guidance—FDA, CDC, NIH, etc. referred to collectively as “Federal officials”—told us the vaccines would prevent people from becoming ill with Covid-19. Once enough vaccinated people caught Covid, they switched to saying it doesn’t prevent infection but prevents death, and that people will suffer much less if vaccinated prior to being infected. Meanwhile, they deny Covid deaths amongst the vaccinated, spreading for many months the soundbite that the vaccinated have a 1 in a million chance of dying from Covid. This is a rare outlier figure that cannot be substantiated and defies common sense. More realistically:

“[...] the exact definition of rare disease, or orphan disease, varies from country to country. The National Institute of Health classifies a rare or orphan disease as one with fewer than 200,000 cases in the country. The European Union defines it as any disease that affects five or fewer people out of every 10,000. Whichever definition you use, the answer is the same: Thousands of rare diseases affect millions of people every day.” The guidance from the Federal Officials later dropped to 1 in 250,000. However, you can still see by the NIH own definition that this is an outlier figure, one that would not pertain to a general population. And the Federal Officials in collaboration with the media do not

accurately depict the increasing rates of Covid deaths amongst the vaccinated. Meanwhile, the CDC still promotes adverse effects like Guillain-Barré Syndrome as rare when at the same time the American Neurological Association is following the significant occurrences of post-vaccine incidents. The lists could go on and on, as for two years we have had very specific messages intentionally aimed to conditioning the general public through collaboration with media outlets.

In spite of various legal actions nationwide against mandating vaccination, Washington state has chosen to expedite vaccinations, modeling for organizations statewide to terminate thousands of workers by accepting but not accommodating exemptions. While at the same time various officials speak of the 'unknowns', they advance controls with penalties to citizens at a rapid speed based on insufficient and even faulty science. For example, just this week, the National Comprehensive Cancer Network® updated their Pre-exposure Prophylaxis recommendations:

"research shows many immunocompromised people develop inadequate immune responses from vaccines. Thankfully, we now have additional tools to help people in active treatment for cancer, solid organ transplant recipients, engineered cellular therapy (e.g. CAR T-cell) or stem cell transplant recipients (a.k.a. hematopoietic stem cells), and those with other immunodeficiency-causing conditions (such as HIV, DiGeorge syndrome, or Wiskott-Aldrich syndrome)." [...] "The Food and Drug Administration (FDA) has issued an emergency use authorization for the monoclonal antibody combination of tixagevimab plus cilgavimab for pre-exposure protection from COVID-19 in adults and children starting at age 12 (weighing at least 40 kg) who have moderate to severe immune compromise and may not be responsive to vaccination. Patients with blood cancers (including those receiving stem cell transplantation or engineered cellular therapy) are more likely to have inadequate responses to COVID-19 vaccination" {...} "We have new agents to prevent and treat COVID-19 that will benefit patients with cancer"

Meanwhile, "the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission." [...] Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else." [...] Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated." In contrast to the narrative espoused in collusion with media outlets, vaccinated persons do carry the same, and sometimes higher, viral load as the unvaccinated, thus the unvaccinated are not the super-spreaders.

Now we face Omicron which is 95% of Covid-19 cases; experts agree it is milder than previous Delta and will not result in as many hospitalizations nor deaths. Yet the public remains conditioned to believe the deaths occur amongst the unvaccinated, and WA state government continues driving policies and taking actions with this presumption as well. In addition to VAERS data (which has been demonized in the narrative) and reports from many countries, an example of our government's own data would be the HHS' Countermeasures Injury Compensation Program (CICP) Data of the 4751 Covid injury claims. The program only has 5200 claims of which 4751 claims pertain to Covid-19 treatments. The Epoch Times earlier reported that out of this 4751, 2297 are claims of adverse effects from vaccination with over 600 deaths in these claims. Forbes reported that the HHS states there were only 1357 vaccine claims and 53 of these were deaths. That is 3.9% of the claims. The article also demonstrates how the government is not paying compensation for Covid vaccines and the new limitations it has placed upon them.

Adult Americans have been the human experiments for these vaccines for too long. Officials in the FDA and CDC have made statements that go without recourse such as males under age 40 have greater chance of suffering debilitating damage from the vaccine than from the Covid virus itself. There have been many studies substantiating that. Last month, a panel of advisers to the Centers for Disease Control and Prevention unanimously recommended people do not take the Johnson and Johnson vaccine due to adverse effects and deaths. Unfortunately, this came after 16 million Americans had already had J&J. Other countries had already banned the J&J vaccine and have

banned mandates as well.

Now we suffer the move to experiment on our children despite that a systematic review of the research found:

"five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially"

Last October, FDA panelist and Editor in Chief of the New England Journal of Medicine Eric Rubin said "We're never gonna learn about how safe the vaccine is until we start giving it. That's just the way it goes." Given that the tweet had 1.8 million views, I assume you are already aware of this. Since last spring, the death rate associated with Covid-19 in Whatcom county has run at or just under 1% for all ages. Meanwhile, the obituaries and testimonials of vaccine survivors increase as tens of thousands of people, with all good intentions to serve their country, are maimed and killed by the vaccines. And who could ignore athletes in their prime, particularly soccer players, collapsing on the field? With 183 deaths so far and hundreds more injured, young adults have suffered.

You can now see the need not only to vote down item 8 Technical Advisory Group but also to approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

While it is a dearth of information, I ask that you take time to seriously review in detail the resources provided by me and others prior to Monday's meeting. Thank you in advance for doing so.

Sincerely,
Lisa Dykstra

Subject: Please, no vaccine for school aged children.

External Email

I want to voice my opinion to please don't force our children into getting the vaccine....all children, all ages. Please, don't allow a vaccine requirement for school aged children. Let the parents make the decision!

Subject: Potential Vaccine Mandate for School Entry

External Email
Dear Members,

I am writing as a parent of school aged children that have burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why.

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extreme detrimental and profound on OUR children and our future.

Sincerely,

Sarah Karr

To whom it may concern,

I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their childrens health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects.

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my young sons and will pull them from public school if this mandate is implemented.

Thank you for your consideration

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

to the Department of Health and ANYONE else making decisions regarding children's health and safety in the state of Washington:

I am a lifelong resident of Washington state, born and raised and am now raising my two children in my beautiful state. I am writing to you in regards to the agenda topic in which the DOH and other members will discuss whether the covid-19 vaccine should be mandatory for school children.

WITHOUT A DOUBT, IT SHOULD NOT BE MANDATORY. As a citizen, resident, tax payer and MOTHER of this state, I demand that the DOH NOT make this covid vaccine mandatory for schools. I will remove my children from the school system if this happens. I also know many members in my community that will do the same. We will take our kids out. We don't want to give any more funding to an institution that does not put the health and safety of children in school first and foremost. My decision and reason for opposing this VERY UNNECESSARY rule are as follows:

1. Covid-19 vaccines REMAIN under Emergency Authorized Use and therefore are NOT fully approved. Administering a vaccine that is not authorized for a virus that has over a 99% survival rate in children is UNNECESSARY and MORALLY WRONG. There is ZERO evidence to show that the EUA vaccine is necessary for children and adolescents. BOTH of my children have been in school, daycare, etc during the ENTIRE pandemic and we have followed the necessary steps. During this time, my children have not experienced severe illness nor have they spread illness and I firmly believe that there is NO scientific evidence that warrants a NEED to require this EUA vaccine mandatory in school.

2. Children under the age of 18 have a 99.995% survival rate from covid-19 infection. According to the CDC and WHO, they have a higher risk of death from the flu. Why are we requiring a vaccine that has almost 100% survival rate in children and lower than the flu?

Let's review the data from the CDC: In the 2017/2018 flu season (Nov-March), 643

Make the right decision for OUR children and their health and safety and DO NOT MAKE THIS VACCINE MANDATORY.

Thank you, Kristina Mashek

Let's review the data from the CDC: In the 2017/2018 flu season (Nov-March), 643 children (under 18) died <https://www.cdc.gov/flu/about/burden/2017-2018.htm>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2017-2018.htm&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ce841124a287e4497ec4a08d9d38854f6%7C>>

. In the 2018/2019 flu season, 477 children died

<https://www.cdc.gov/flu/about/burden/2018-2019.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2019.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ce841124a287e4497ec4a08d9d38854f6%70>

. In the 2019/2020 flu season, 434 children died

<https://www.cdc.gov/flu/about/burden/2019-2020.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fflu%2Fabout%2F2020.html&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ce841124a287e4497ec4a08d9d38854f6%70>

. Comparatively, out of over 3.6 million cases of COVID-19 in children in the US, 423 have reportedly died of it as of 8/11/21 <https://data.cdc.gov/.../Provisional-COVID-19-Death.../nr4s-juj3>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdata.cdc.gov%2FNCHS%2FProvisi%20COVID-19-Deaths-Focus-on-Ages-0-18-Yea%2Fnr4s-juj3&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Ce841124a287e4497ec4a08d9d38854f6%70>

. That is less child deaths from C-19 than from each of the last three flu seasons. The links above showing 423 reported deaths in children from C-19 is over a period of 20 months (since January 2020), not over a 4-month winter flu season. This means the risk of death for children from C-19 per season is even lower than the flu, perhaps half as low. And the CDC's C-19 death count at the link above includes 18 year-olds, whereas the CDC's seasonal flu death count does not. It's ages 0-17. It's important to keep in mind that children who die from the flu or COVID-19 often have serious pre-existing conditions. Children with co-morbidities have nearly double the risk of severe COVID-19 than healthy children. And children with underlying conditions including obesity were found to have nearly triple the risk of COVID-19-associated death.

Children have proven to have strong innate immunity. They are safe, resilient and not at risk of death. They are critical to establishing long term sustainable and most effective

her immunity.

3. Adverse reactions from the vaccine in young children. The FDA and VAERS system have reported a significant number of reactions in children, including death from the vaccine. Over 80%+ of children who have received the vaccine have had an adverse reaction. Additionally, the mortality rate of vaccine deaths has sky rocketed since introducing the covid-19 vaccine. The CDC claims that less than 1% of children have an adverse reaction, which is false and significantly contradicts data from VAERS. If you make the decision to make this a mandatory vaccine, you are directly contributing to thousands of children getting very ill and DYING from this vaccine. That will be your fault and only yours.

Make the right decision for OUR children and their health and safety and DO NOT MAKE THIS VACCINE MANDATORY.

Thank you, Kristina Mashek

This may be too late but I want to voice my complete objection to applying the infectious disease WAC codes to Covid-19.

I stand against adding Covid-19 to the proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

This is government overreaching their authority and encroaching on our personal freedoms.

I work in the healthcare field and I am NOT an anti- Vaccer. I have had all of the Covid-19 vaccinations and booster. I also get an annual influenza vaccine.

Respectfully,
Lynnette Bower

and forced lockdowns.

The Center for Disease Control (CDC) nationwide statistics consistently show that COVID survival rates for people between the ages of 1 and 69, is 99.997%. People ages 70+ have a 94.6% survival rate nationwide. Compare this with about a 5% annual death rate for influenza and pneumonia nationwide for ALL ages. (Note: one cannot readily find statistical data for influenza mortality rates for 2020 or 2021 ... quite curious).

You all are supposed to be 'public servants,' not dictators. Please STOP this nonsense immediately.

To whom it may concern,

We are writing as concerned parents about the possibility of COVID-19 vaccine mandates for school attendance.

Data has consistently shown children to be at low risk for severe disease from COVID-19 and the extent of the risk from the vaccine is yet to be understood. With the lack of long-term data regarding side effects or efficacy of the currently available vaccines, most specifically in children, parents have the right to weigh the risks and benefits and decide what is right for their own children. This is not "just another vaccine". Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects and risks.

We do not feel at all comfortable giving this vaccine to our children and will pull them from public school if this mandate is implemented.

Thank you,

James and Lisa Zimmerman

Dear Lindsay Herendeen,

I am a parent of a third grader and a fifth grader in the Peninsula School District in Vaughn Washington. Last year we homeschooled with book curriculum to keep normalcy and structure as we did not know what to expect during the school year due to the pandemic. My children although flourished academically, we grew as a family and enjoyed our time together; it did not replace the childhood experience of going to school with peers and teachers.

My children are doing amazing being back at school socially, academically and developmentally. Children need children for healthy mental and social emotional development, it is crucial.

I am desperately asking you to please not mandate the EUA Covid-19 Vaccine product for children to attend school in Washington State. We believe in keeping the community healthy and support keeping others safe, but in our core as parents we cannot ignore many unknowns of the Covid-19 vaccine for children.

It is parents jobs to keep their kids safe, our number one priority and we do this with informed decisions. It is difficult to make a decision to give a young child a vaccine when the FDA will not release their report for the \product for 50 years. The risk of myocarditis is very concerning, it is permanant scarring of the heart muscle, possibly predisposing children to premature cardiovascular disease. The testing for this product was done on a very small group of less than 2,000 participants and even at the FDA stated that "we wouldn't know the true risk of serious side effects until it is rolled out onto a larger population". There are noted vaccine injuries such as the 12 year old female who has a feeding tube and cannot walk, numerous reports of young athletes collapsing due to heart issues that led to death. We do not know or test what biomarkers for future disease the vaccine may cause for our younger precious popluation. The benefit versus risk for this population is not proven.

This is the information us concerened parents have to process as we make the best

decisions for our children. We have also been living the last 2 years in a pandemic, trying to keep life going normal, balance jobs, health and our family's well being. It is life changing and terrifying to think that we may have to choose to provide our children with an education that meets their mental health needs, social emotional and academic needs, or give them an inoculation that we feel may be unsafe. It literally breaks my heart privately, when I see their happy faces and know it may all be gone, due to a mandate.

Whether you agree with parents like me or not, we are out here. Our feelings are very strong and we will not comply with a Covid-19 Vaccine mandate for our children to attend school. Some will be ok, some may have lasting mental health and academic consequences that could lead to other health crisis such as depression, substance abuse, suicide and future unemployment. WE MUST FACTOR THE RISK VERSUS BENEFIT.

Please hear my Prayer.

Sincerely,

Sharay A, Nickles, MA, LMHC

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Subject: Proposed Vaccine Mandate for School Children

External Email

To Whom It May Concern:

I am a registered voter and concerned citizen of the state of Washington. I strongly urge our governmental leaders...DO NOT impose a vaccine mandate on school children. It is widely known that COVID-19 poses very little risk to children and young people. The decision whether or not to vaccinate children belongs to parents, not government. The risk of a bad outcome for children receiving an experimental and unproven injection far outweighs the risk of harm and illness from the COVID-19 virus, especially the Omicron variant which has become the dominant strain infecting the population. Children are not at risk, nor are they a threat to the adults around them.

Respectfully,

Jennifer Peterson

Hello. I am a parent of a public school child who opposes the Covid vaccine to be included in the mandatory vaccine list for entry into public school, particularly if it is being considered for the 2021/2022 school year. The vaccine for 5-11 year old is still under emergency use only and the risks long term are still not known. Fortunately a lot of kids will also get natural immunity with the omicron variant which should last a couple months at least so please consider holding off on adding the Covid vaccine. There are too many questions and the majority of parents are obviously not ready to vaccinate so you will be responsible for lots of Washington students being forced into homeschool situations or to give their children a vaccine that is still under EUA. Isolating children from in person learning has been said is detrimental to mental health. Our kids should not be part of the divide and exclusion our country is experiencing. Thank you for your time,
Melody Cook
Vaccinated Mom

Dear Christy,

I appreciate your time in reading this note. I am writing you regarding the decision you are considering to mandate our children to receive COVID injections as a requirement for school entrance.

I am a registered nurse with expertise in nutrition, natural health, and healing autoimmunity. I am also a concerned parent of five children, four of whom attend public school and one who will in a few years.

For many years I believed fully in the vaccine model and was reared in the western medicine framework that we should never question vaccine safety or efficacy. That all changed when I nearly lost my daughter to vaccine injury as a toddler. She developed a severe petechial rash all over her body, which means she was hemorrhaging all over. I knew exactly what it was and we rushed her to the ER. Her platelets were so low that she was borderline brain hemorrhage and we nearly lost her. Her life was miraculously spared but she went on to experience a vast spectrum of symptoms in every body system and developed autoimmune celiac and other allergies that have absolutely changed the course of our entire lives.

I have spent the past 12 years studying vaccines and learning how to heal from vaccine injury. I have researched in depth their safety profiles and the truth about vaccines is that they are unavoidably unsafe. Vaccines are full of harmful adjuvants that expose our children to the most dangerous, carcinogenic, toxic substances known to man such as mercury, aluminum, polysorbate 80, and many other poisons, leading to toxic heavy metal buildup in our children's brains and other organs that FAR exceeds any safety

threshold. Vaccines are known to open the gut barrier and brain barrier causing immune system reactions and alterations leading to asthma, allergies, autoimmune diseases of all kinds, cancers, and neurological disorders of all kinds such as ADHD, epilepsy, anxiety, autism, developmental delay and many others. We currently have the worst health report card for our pediatric population that has ever been known and it only gets worse as the vaccination schedule continues to ramp up. It is absolutely absurd that we now have 72 + vaccines currently on schedule.

Vaccines are unavoidably unsafe for every child. This is especially true for the current COVID MRNA and viral vector "vaccines." These are not traditional vaccines. These new therapies are being rushed to market. No vaccine was EVER brought to market this quickly. These vaccines are still experimental and CANNOT, therefore, be mandated to children. You cannot approve and continue to tote the line that something is "safe and effective" when it is experimental. By mandating this therapy for children, you will be imposing the greatest human experiment the world has ever seen, and you will have on your hands the blood of the innocent, as deaths and injuries soar, and as you cannot assure ANYONE that things won't go wrong.

U.S. VAERS data from Dec. 14, 2020, to Dec. 31, 2021, for 5- to 11-year-olds show:

* 6,005 adverse events

and 35 reported deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F19%26DIED%3DYes%26STATE%3DNOTFR%26WhichAge%3Drange%26LOWAGE%3D12%26HIGHAGE%3D18&data=04%7C>

The most recent death involves a 15-year-old girl from Minnesota (VAERS I.D. 1974744 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind>), who died 177 days after receiving her second dose of Pfizer from a pulmonary embolus. An autopsy is pending.

* 62 reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind> of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening, required treatment or resulted in death — with 96% of cases attributed to Pfizer's vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind> .

* 579 reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind> of myocarditis and pericarditis with 573 cases

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind> attributed to Pfizer's vaccine.

* 146 reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind> of blood clotting disorders, with all cases attributed to Pfizer.

It is unlawful for you to mandate or force anyone to get a vaccine, especially a child. Children have next to zero risk from Covid. Who are we trying to protect by vaccinating them? It's certainly not them. Why is there only one solution for this pandemic? What about the amazing success of early treatment? What about natural immunity? Why are we not educating people about how to strengthen their immune systems instead? I have not seen your board say anything regarding boosting natural immunity with Vit D, Vit C, or scientifically proven herbs or natural remedies. Why??

PLEASE educate yourself regarding these vaccines. If you are not informed on VAERS you owe it to every citizen in this state to get informed. These "vaccines" have been by far more injurious than ALL OTHER vaccines COMBINED. VAERS data released Friday by the Centers for Disease Control and Prevention included a total of 1,017,001 reports of adverse events from all age groups following COVID vaccines, including 21,382 deaths and 166,606 serious injuries between Dec. 14, 2020, and Dec. 31, 2021.

This is absolutely absurd that we are still recommending these vaccines. Any other pharmaceutical, at just a handful of reported deaths, would be blacklisted and pulled from market immediately. Mandating these vaccines for children is dangerous, irresponsible, and wrong.

As a parent of a vaccine injured child, I know firsthand the devastation and unnecessary heartache an injury can bring. My child can NEVER get this vaccine, as it would likely take her life. If you mandate it, she, and countless others like her, would be prevented from going to school and that is completely outrageous and unlawful.

Please do the right thing and do not impose vaccine mandates on our school children.

Thank you,

Lindsay Clark, RN

Subject: Proposed Health Policies

External Email

Good Afternoon,

As a Washington Resident, I am against the below proposed COVID-19 policies and believe they are over-reaching of the state's authority. Utilizing law enforcement to solve a public health crisis is the wrong instrument/tool.

It wasn't too long ago that similar quarantining was used against another group that was feared (the Japanese that were interned during WWII out of fear). When will the West Coast learn that fear-based legislation doesn't stand the test of time and will be CRITICIZED by future generations. We cannot let fear of COVID override our basic sense of human decency and lead us into reactionary policies that are weakly thought out in their consequences.

<https://www.wsj.com/articles/pandemic-struggle-patients-who-dont-have-covid-11639668552>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wsj.com%2Farticles%2Fpandemic-struggle-patients-who-dont-have-covid-11639668552&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C66eefa69857743b2324f08d9d2d7dd4a%7C>>

Please read the article linked above. An important quote from this doctor out of Bellingham, Washington (the Sea Mar Community Health Clinic) reads as follows: "So far in 2021, Dr. Hancock has seen more than three times as many deaths among her patients as she did in all of 2020, and none have been from Covid-19." The reactionary policies of public health officials and the FEAR of COVID, not COVID itself, led to the increased deaths in her patients. Many were too afraid to seek medical attention so they lapsed back into drug abuse or experienced or other illnesses progressed as a result of delaying treatment.

I disagree with the following proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. These are reactionary policies that while well-intentioned no doubt, will result in poor outcomes.

Thank you for your time and attention in this matter.

V/r,

K. Foor

Subject: Public Comment on Washington State Board of Health Meeting

External Email

I would like to address a press release the Washington State Board of Health released, claiming to address misinformation about the January 12th state board of health public meeting. The press release states that the "WSBH is not voting to require a COVID-19 vaccine for school aged children at its meeting on Jan. 12." The release goes on to state that "the Board will receive a briefing on the progress of the technical advisory group (TAG), which is convened to consider COVID-19 for inclusion in chapter 246-105 WAC, at next week's meeting (agenda item 8". In bold, it is stated that the board will not take action on this agenda at the meeting. The release continues to state that "The purpose of the TAG is to evaluate a vaccine against the established criteria to develop and provide a recommendation. The recommendation is then presented to the Board at a future regularly scheduled meeting for consideration."

This press release is incredibly deceptive. By using the terms "Clarifying Online Misinformation" in its very title, it seeks to discredit every statement that is being currently circulated on social media about the meeting. While the words "The Board will not take action on this agenda item at the meeting" are stated clearly and in bold. In the very next sentence, it is plainly stated that while no vote will be taking place at this meeting, a vote WILL take place at a meeting at a certain date. While it may be inaccurate state that a vote will be taking place at this meeting, to claim that stating so is misinformation is to discredit the idea that the WSBH is considering a school vaccination mandate at all. The Washington State Board of Health absolutely is considering a vaccination mandate in schools today. Chapter 246-105 WAC is the part of our state code that specifically gives our state the power to require certain vaccinations in order to attend public schools. It is clearly stated that it is being discussed to include COVID-19 in Chapter 246-105, which in plain words, means that the COVID-19 vaccination is being considered as a requirement to attend Washington State public schools.

In this press release, the Washington State Board of Health did what I would refer to as "lying with facts". Yes, the information presented in this press release was factual, but it was presented in a way that many readers would draw an inaccurate conclusion from it, based off of its wording choice, and the choice to emphasize certain passages above others. In this fast page age of information overload, many people find they do not have the time or energy to read the small print, and will only glance at the bolded passages and headlines. To anyone who couldn't give this press release the time they needed, they would have left it drawing an inaccurate conclusion.

Every single one of you is a public servant. Our country is founded on the principal that government is of the people, by the people, and for the people. For the Washington State Board of Health to release an official statement that is phrased in a manner I would classify as willfully deceptive, is a disgrace to the very principals our country is based on. No matter your position on vaccination mandates, all of us here today should be able to agree that our government should be beholden to our citizens, and that it has a responsibility to communicate clearly, openly, and honestly with them. Every respected board member here today should be ashamed that their name is directly associated with a blatant attempt by a government agency to deceive the voting public. I sincerely hope every one of you today take my words to heart, and strive to work together with the people of Washington, to create a more open and honest government. A government

that is of the people, by the people, and for the people, as is enshrined in our constitution

Subject: Opposition to vaccine mandates

External Email

The medical professionals resisting the vaccine are not selfish ignoramuses. They have first hand reasons for their decisions. My sister saw in her health care facility that many people dying were listed as Covid deaths who died from other causes.

I know 2 people in Bellingham who had episodes of mini strokes who had no history of strokes in their families and w were previously in excellent health. Why hasn't the VAERS reports been released?

Every time there are problems with the vaccine, the vaccine resistant are blamed.

Mass Formation has also been denigrated and Google actually manipulated access to information about this phenomena. This condition has been studied and presented in coursework to students by Desmet Mattias at Ghent University. Even with this, mainstream narratives have altered information contrary to the mainstream narrative.

I am concerned about the deception that has occurred in the pandemic. There is even information and proof that Gain of Function research was still occurring at Wuhan.

I would like to bring up the issues I've outlined here to show that concentration camps is not something out of the question with the hysteria instilled in people.

Another defining issue is with the demonization of the prestigious group of doctors with FLCCC and their effective activism protocols. The deaths and hospitalizations could have been avoided.

Board Members,

Thank you for serving in our beautiful state of Washington. I am a father of 3 children, who lives in Vancouver WA along with many other families. We the people here, who elected you to represent us and our families do not support WAC 246-100-070 and 246-100-045. This is unconstitutional. You stand with woman to protect their bodies when they want to abort the baby, but now you force people who want to protect their body from vaccine. This is hypocrisy. Do not take away the freedom that our fathers fought for, the freedom given by God. Stop telling us how to live our lives. We elected you to represent us, please do so. We are wholeheartedly oppose WAC 246-100-070 and 246-100-045, please vote against it.

Respectfully yours,

Families of Vancouver, WA.

To Lindsay,

I am writing you to voice my opposition to any sort of mandated vaccines for school children. I have 3 children who will be attending school in WA in the next few years.

It is discriminatory for ethnic and religious groups, goes against science because clinical trials have not been completed or successful in showing the efficacy and safety of Covid 19 vaccines, and goes against freedom of choice. The shots are dangerous for many individuals as you can readily see in the VAERS reporting. Even if it only harms ONE person, where there is risk of harm, there must be choice. I have multiple family members and friends who have suffered effects ranging from heart races to severe life long tremors that there is no remedy as a direct result of the Covid 19 vaccine. It is outrageous that mandating vaccines for ANYONE but especially children is an option. One size does not fit all. This is not science. This is tyranny. Please fight for our children. Do what is right, not what you feel pressured to do.

All it takes for evil for triumph is for the good men to do nothing. Please be a good person. Do something. Fight for our freedom even if you personally support Covid 19 vaccines.

Please please take heed!

Subject: NO to Invasive Policies & Misuse of Law Enforcement - WAC 246-100-070 & More - NO, in the name of GOD

External Email

ATTN: Public Servants in All Seats & Departments of WA State, Health &

WA Law Makers:

In the name of YAHWEH, you need to know that I oppose the proposed COVID-affiliated policies being discussed and expect to be represented well by my elected representatives with votes against this unconstitutional set of attempted power abuses.

I do not want these made into laws which would be over reaching and immoral impositions on people like myself and our human rights given to us by our Creator. You can not remove our rights no matter what you think you can do. You are deceiving yourselves if you think you can.

We are on to these schemes being pushed and rushed through and the answer is, "NO!"

I stand against these proposed WACs along with millions of others.

Any public officials, elected or appointed with the responsibility of working in the public health interests should vote NO on these, and any unethical plans like them.

To be clear:

NO to WAC 246-100-070

NO to WAC 246-100-045

NO to WAC 246-100-040

NO to WAC 246-100

NO to WAC 246-105

Human beings and United States citizens have a right to make their own decisions and we will all be accountable to God, including yourselves, whether you choose to believe it or not.

Those of you in positions of responsibility should not even begin to presume to try to disregard my rights or the rights of any of my neighbors in the State of Washington.

May God Almighty guide you to do what is right with respect to human rights for myself and all of us living here together.

In Truth,

Jayne Ulander

Subject: Oppose covid shot mandate for school

External Email

To the board,

My name is Jennifer Rowse and I am a long time resident of Washington living in Bothell. I have two school aged children. I wanted to express my deep concern over possible legislation to impose a covid shot as mandatory for school in Washington state. Vaccine injuries are serious including death.
[Openvairs.com/covid-data](https://openvairs.com/covid-data)

If you follow this link you will see that we presently have over 1,016,999 reports including 21,382 deaths. These EUA are not appropriate and no level three studies have been completed on children.

I am asking you to remove covid vaccine mandates for schools in Washington state.

Sincerely
Jen Rowse
Physical therapist and
Health care worker who works with covid patients

Subject: PCR test is invalid making "rising numbers" tainted

External Email

FIRSTLY, this is not a deadly "disease" There are deadly toxins used in every case or key therapeutics withheld to create death for various nefarious reasons. No one has to die!

You will face charges under the Nerumberg code for participation in any of this fear, lock down or stolen freedoms. You may not authorize any authority to locate private citizens using private medical data or relocate any human being against their will...

Isolation protects NO ONE!

Your mission states you are to gain the trust of the public. Start by reading real data and making recommendations based on fact, not propaganda. Saying you didn't know, will not be an excuse at your trial.

The PCR test does not isolate C19. It cannot distinguish between a cold, the flu or any SPECIFIC variants. It is calibrated to produce a positive or negative result in advance of any patient. Notice the low-no FLU rates 2020-2021. Of course the flu is back now that the tests are changing!! This is not a new thing.

Not a single statistic on C19 can be trusted to make any determine on what % is an actual C19 case.

Until you AUTHORIZE IVERMECTIN, HYDROCHLOROQUIN, and BUDESINIDE treatments for public use you may NOT FORCE any injectable drug or location of choice, and violate our free will.

The UNVAXINATED are not having cardiovascular or autoimmune dysfunctions which are rampant in hospital admissions.

Look at the Adverse reports!

The FDA has no approval fir any drug that is not still in EXPERIMENTAL STAGES... so why are you participating with their data and lockdown/lock up mandates for an EXPERIMENT?

Have you read the Nuremberg code?

All 10 have been violated and lawsuits underway... you will play a part for treasonous actions and ignorance is no excuse.

Why would J&J want to take 75 years to make its research public knowledge?

STOP the mandates of all kinds and stop pretending there are reasons for any emergency authorizations.

Resign and reduce your sentence but do not touch the children, the elderly or those with a voice to cancel your actions and bar you from society.

Subject: Potential Mandate for School Children

External Email

To whom it may concern,

We are writing as concerned parents about the possibility of COVID-19 vaccine mandates for school attendance.

Data has consistently shown children to be at low risk for severe disease from COVID-19 and the extent of the risk from the vaccine is yet to be understood. With the lack of long-term data regarding side effects or efficacy of the currently available vaccines, most specifically in children, parents have the right to weigh the risks and benefits and decide what is right for their own children. This is not "just another vaccine". Using the comparison of currently required vaccines is not appropriate with this EUA vaccine.

Again, there is no long term data or listed potential side effects and risks.

We do not feel at all comfortable giving this vaccine to our children and will pull them from public school if this mandate is implemented.

Thank you,

James and Lisa Zimmerman

I AM OPPOSED TO ALL MANDATES FOR PUBLIC SCHOOLS AND EMPLOYEES IN THIS STATE!!

I have been exposed to COVID by 4 members in my home, and while not vaccinated, I have never contracted the virus in the three separate instances I was exposed. I never wear a mask and have not exposed anyone due to my NATURAL IMMUNITY. I have tested NEGATIVE for over 50 weekly tests on my private-sector job, and have had my Dr check me for COVID antibodies. THEY FOUND NONE!! I AM IMMUNE, NATURALLY!!

I am also in the HIGH-RISK category being over 65, a minority, male, several health issues that the idiot doctors in this administration say would kill me, yet here I am, COVID FREE, VACCINE FREE and writing this letter to you demanding YOU STOP THIS UNCONSTITUTIONAL ABUSE OF THE EMERGENCY POWERS ACT AND MANDATING MY PERSONAL HEALTH AND THAT OF MY FAMILY!

- 1) You don't have our permission
- 2) YOU HAVE NO LEGAL STANDING TO OVERTURN THE PEOPLE'S PROTECTION BY THE WA STATE CONSTITUTION OR THE U.S. CONSTITUTION.
- 3) Our kids are not your property, so you have no authority over them. Let's let the people mandate your children's health and education or make them do something you don't agree or approve of.
- 4) Our bodies are a temple of the Holy Spirit and are not owned by the government
- 5) We were born with free will and we will retain that until death. And you control neither!
- 6) THIS IS A FREE COUNTRY AND A FREE STATE, AND WE WILL REMOVE ALL OF YOU POLITICIANS WHO DO NOT REPRESENT THE CITIZENS OF YOUR DISTRICT FAITHFULLY AND HONESTLY!

Good luck in your next election run, if you go against the will of the people.

A VETERAN, PARENT, AND CITIZEN OF THE STATE OF WASHINGTON. (Not the state of socialist democrats and RINOs.)

I oppose the Proposed policies that would allow health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of individuals to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, and vaccination, including the Covid-19 injections as part of school immunization, because they would violate both the U.S. Constitution and the Washington State Constitution. In addition, they would take away one's individual right to make intelligent and well informed decisions regarding one's individual health.

It is my understanding that the Covid-19 related topics of quarantining, isolation and inoculation of minors as a pre-condition to attending school are being discussed in this board meeting. I'd like to express my views on these three topics. All three of these proposals should be soundly rejected. First, quarantining and / or isolating the unvaccinated accomplishes nothing. It would be a policy driven by irrational fear rather than reason. Remember that these gene therapy vaccines do not provide immunity, only a reduction in severity of the disease, so a vaccinated person who catches Covid-19 would be just as contagious as an unvaccinated person. In fact studies are showing a greater viral load in vaccinated persons who catch Covid 19. Second, the Omicron variant is proving to produce a mild illness comparable to the common cold so quarantine and isolation make even less sense. Here is a link to a medical lecture by Dr. Mobeen Syed MD, a much followed medical educator:

[https://www.youtube.com/watch?v=VfF43zt42Jw&t=178s,](https://www.youtube.com/watch?v=VfF43zt42Jw&t=178s)

In addition, we must not forget that the mRNA and Vector DNA vaccines are experimental and have proven to be high risk already. One only need to look at the VAERS reporting system to see that adverse events from vaccines have skyrocketed since the introduction of these inoculations. I could cite numerous sources, but a very recent finding is extremely alarming and clearly indicates the true extent of the adverse impact of these vaccines is likely hidden. I speak of course of the findings of the two eminent pathologist professors from Germany, Dr. Sucharit Bhakdi and Dr. Arne Burkhardt. Here is a link to their findings.:

<https://stevekirsch.substack.com/p/bhakdiburkhardt-pathology-results>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fbhakdiburkhardt-pathology-results&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cb6daf7913f03490b6b6e08d9d4a6d4c6%7C11d0e2>>

Under no circumstances should education be denied to unvaccinated children. Children have a robust immune system and experience has clearly indicated that cases of Covid-19 are extremely mild. It would be the height of carelessness to coercively subject them to these inoculations in light of the known risk. A risk / benefit analysis would clearly indicate that they should not be subjected to the risk of the vaccines. The decision of whether to inoculate or not should be left solely to fully informed parents with no threat to deny their children access to education if they don't comply to vaccination for their children.

Thank you for considering my concerns.

I would like to go on record that COVID vaccination should not be placed on the list of required vaccinations for children before they can attend school. The current vaccinations are not approved FDA vaccines that actually prevent the actual disease. Children are not at risk of injury or death from contracting this disease. Please stop putting this on any requirements for children for any reason.

I also want to go on record to require that the DOH begin recognizing citizens natural immunity to COVID after contracting and surviving the disease. This immunity should not only be recognized but celebrated as the ultimate in stopping the spread and issues regarding this illness. Once a person has had it and gotten over it that person shall be labeled fully immune to this illness and any other variants, with no requirements for mask, vaccine or any isolation of any kind. This person can return to normal life and engage in any and all public activities that they had the freedom to do prior to the pandemic.

Thank you for allowing us the opportunity to comment.

Washington State Board of Health:

I am very concerned about the policies that are going to be discussed at the meeting next Wednesday, in particular, the policy to involuntarily quarantine people who refuse test, examination, or vaccine for COVID-19. I believe that this removes the freedom and choice that the constitution affords us in this country. Everyone should have medical choice. COVID-19, in particular the omicron variant that is most widespread, has been proven to be mild and not cause many deaths, as well as fewer hospitalizations than Delta. To require a vaccine that doesn't prevent spread and to quarantine those who don't comply doesn't make sense when we look at the actual data. There are credible studies that show that vaccinated and unvaccinated people have the same viral load, therefore, they spread the disease the same. The only thing the vaccine does is reduce symptoms, and this only affects the person who received it, not anyone else. It should be everyone's personal choice to evaluate their personal risk and make a decision from there. If we continue to compromise the Constitution, we are going to threaten our democracy and the freedom we have in this great country. Please consider rejecting these new policies, as they don't make sense with the direction things are going, as well as the current science/data.

Thank you for reading!

When will these vaccine makers be held Liable for their destruction of life, and they should have the monetization be removed from their own gain, it is a gross conflict of interest?

I want to make it crystal clear that I am 100% opposed to having unelected officials make any decisions regarding involuntary commitments for "public health" reason.

Specifically for Covid or any other flu like virus with a 99% + survival rate!

This rule needs to be completely removed and is something only used in China/N. Korea/Russia! Not our state, where we have a Constitution and rules of law.

Please remember who pays the taxes that support your agency and respect the strong will of the people.

Sincerely, Norman Klein, Aberdeen, Washington.

To whom it may concern,

I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their childrens health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects.

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my young sons and will pull them from public school if this mandate is implemented.

Thank you for your consideration

Jill Hannem

Subject: Please DO NOT mandate vaccines for our kids

External Email

Dear Caitlin,

I appreciate your time in reading this note. I am writing you regarding the decision you are considering to mandate our children to receive COVID injections as a requirement for school entrance.

I am a registered nurse (20 years) with expertise in nutrition, natural health, and healing autoimmunity. I am also a concerned parent of five children, four of whom attend public school and one who will in a few years.

For many years I believed fully in the vaccine model and was reared in the western medicine framework that we should never question vaccine safety or efficacy. That all changed when I nearly lost my daughter to vaccine injury as a toddler. She developed a severe petechial rash all over her body, which means she was hemorrhaging all over. I knew exactly what it was and we rushed her to the ER. Her platelets were so low that she was borderline brain hemorrhage and we nearly lost her. Her life was miraculously spared but she went on to experience a vast spectrum of symptoms in every body system and developed autoimmune celiac and other allergies that have absolutely changed the course of our entire lives.

I have spent the past 12 years studying vaccines and learning how to heal from vaccine injury. I have researched in depth their safety profiles and the truth about vaccines is that they are unavoidably unsafe. Vaccines are full of harmful adjuvants that expose our children to the most dangerous, carcinogenic, toxic substances known to man such as mercury, aluminum, polysorbate 80, and many other poisons, leading to toxic heavy metal buildup in our children's brains and other organs that FAR exceeds any safety threshold. Vaccines are known to open the gut barrier and brain barrier causing immune system reactions and alterations leading to asthma, allergies, autoimmune diseases of all kinds, cancers, and neurological disorders of all kinds such as ADHD, epilepsy, anxiety, autism, developmental delay and many others. We currently have the worst health report card for our pediatric population that has ever been known and it only gets worse as the vaccination schedule continues to ramp up. It is absolutely absurd that we now have 72

+ vaccines currently on schedule.

Vaccines are unavoidably unsafe for every child. This is especially true for the current COVID MRNA and viral vector "vaccines." These are not traditional vaccines. These new therapies are being rushed to market. No vaccine was EVER brought to market this quickly. These vaccines are still experimental and CANNOT, therefore, be mandated to children. You cannot approve and continue to tote the line that something is "safe and effective" when it is experimental. By mandating this therapy for children, you will be imposing the greatest human experiment the world has ever seen, and you will have on your hands the blood of the innocent, as deaths and injuries soar, and as you cannot assure ANYONE that things won't go wrong.

U.S. VAERS data from Dec. 14, 2020, to Dec. 31, 2021, for 5- to 11-year-olds show:

* 6,005 adverse events

attributed to Pfizer's vaccine.

* 146 reports of blood clotting disorders, with all cases attributed to Pfizer.

It is unlawful for you to mandate or force anyone to get a vaccine, especially a child. Children have next to zero risk from Covid. Who are we trying to protect by vaccinating them? It's certainly not them. Why is there only one solution for this pandemic? What about the amazing success of early treatment? What about natural immunity? Why are we not educating people about how to strengthen their immune systems instead? I have not seen your board say anything regarding boosting natural immunity with Vit D, Vit C, or scientifically proven herbs or natural remedies. Why??

PLEASE educate yourself regarding these vaccines. If you are not informed on VAERS you owe it to every citizen in this state to get informed. These "vaccines" have been by far more injurious than ALL OTHER vaccines COMBINED. VAERS data released Friday by the Centers for Disease Control and Prevention included a total of 1,017,001 reports of adverse events from all age groups following COVID vaccines, including 21,382 deaths and 166,606 serious injuries between Dec. 14, 2020, and Dec. 31, 2021.

This is absolutely absurd that we are still recommending these vaccines. Any other pharmaceutical, at just a handful of reported deaths, would be blacklisted and pulled from market immediately. Mandating these vaccines for children is dangerous, irresponsible, and wrong.

As a parent of a vaccine injured child, I know firsthand the devastation and unnecessary heartache an injury can bring. My child can NEVER get this vaccine, as it would likely take her life. If you mandate it, she, and countless others like her, would be prevented from going to school and that is completely outrageous and unlawful.

Please do the right thing and do not impose vaccine mandates on our school children.

Thank you,
Lindsay Clark, RN

Honorable Board member,

I am asking you to OPPOSE any mandate on Covid shots for children as a requirement to attend K-12 public schools. Children are at extremely low risk for Covid. There are no long-term studies to document any history of safety. Studies do now document that vaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

Thank you,
Violina Pimonenko

Attn people who's income I Pay for:

RE: COVID 19 vaccine requirement for schools in Washington State.

1. FACT; No covid VAX in the United States has received FDA approval. You are all lying to Americans and people around the world. Are you so stupid that you are willing to risk your life and at bare minimum your freedom for a the corrupt government you work for? Do you as government employees understand what you are even doing? IF so, you will be punished for your crimes against humanity. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

In addition:

Your attempt to enforce mandates for masks, poison Vaccines, etc. would be in violation of the Nuremberg Code 2.0, Article 6, Section 3, and subject to being a "WAR CRIME"...which subjects you to Tribunals, Do you even know what a Tribunal is? Your penalty could include the death. So, if your actions to support these unlawful "mandates", you are knowingly submitting yourself for a de-population agenda, which has already been written and verifiable and put forth by CCP/Deep State/Rockefeller Foundation in 2010... THE Agenda 21 & 2030 is all available as a reference in writing showing the "plan" that you are now implementing, so what are you thinking? I urge you to follow the U.S. Constitutional Republic (of 1776), which upholds the Sovereignty, Rights, and FREEDOMS for Americans... it is your job and your crimes against humanity are exposed. Is your pittance of a job, really worth your freedom and possibly your life?

Do the right thing!!

Subject: Opinion against COVID-19 vaccine mandates for children

External Email

Dear ma'am,

I am the parent of a private school student in Bellevue. I absolutely disagree with the COVID-19 vaccine entering the mandatory vaccine, even though I support the existing school mandatory vaccine.

First, the COVID-19 vaccine does not meet the purpose and role of mandatory school vaccination at all.

In CDC, the definition of a vaccine has been changed to a protective meaning from immune formation. According to global statistics so far, the COVID-19 vaccine has not been seen at all to prevent transmission by forming mass immunity and has been used to comfort individuals by not exacerbating their symptoms.

School-mandated vaccinations are intended to form mass immunity and prevent transmission, but currently, COVID-19 vaccines do not meet these two important aspects at all. Therefore, it is natural that the vaccination of the COVID-19 vaccine should be left to the individual's choice.

Second, the COVID-19 vaccine is only an emergency approved vaccine that is not sufficiently clinical and has many side effects. There has been no study at all on what side effects will occur a year or 10 years after children are hit. For this reason, many experts and doctors in the United States are currently opposed to vaccinations for children and adolescents.

Therefore, I think it is irresponsible to force children and adolescents to match dangerous vaccines that have not been proven safe for more than 10 years.

Thank you for listening to my thoughts. I sincerely ask you to consider this for the health and future of our children.

WA State Board of Health,

I am strongly in opposition to the formation of the Technical Advisory Group to review information about the COVID-19 shots for school aged and child care aged children. It is profoundly premature to consider these vaccine candidates that are still under an EUA for broad use in our children. I and my colleagues will closely follow your proceedings in this matter.

Please look at the scientific publications regarding the adverse events associated with the COVID-19 shots in children. Dr. Fauci finally admitted that the hospitalizations for children has been overstated as they were hospitalized with COVID not from COVID. Children have more risk of severe adverse reactions or death from the injection than from COVID. Please do exhaustive research of all the science not just what the governmental agencies are saying. Are you aware of the Insurance CEO who revealed that his company is seeing a 40% increase in mortality among 18-64 year olds. This is unheard of and you should think about what he is saying and what their analytics are showing.

Dear Lindsay Herendeen,

I am a parent of a third grader and a fifth grader in the Peninsula School District in Vaughn Washington. Last year we homeschooled with book curriculum to keep normalcy and structure as we did not know what to expect during the school year due to the pandemic. My children although flourished academically, we grew as a family and enjoyed our time together; it did not replace the childhood experience of going to school with peers and teachers.

My children are doing amazing being back at school socially, academically and developmentally. Children need children for healthy mental and social emotional development, it is crucial.

I am desperately asking you to please not mandate the EUA Covid-19 Vaccine product for children to attend school in Washington State. We believe in keeping the community healthy and support keeping others safe, but in our core as parents we cannot ignore many unknowns of the Covid-19 vaccine for children.

It is parents jobs to keep their kids safe, our number one priority and we do this with informed decisions. It is difficult to make a decision to give a young child a vaccine when the FDA will not release their report for the \product for 50 years. The risk of myocarditis is very concerning, it is permanant scarring of the heart muscle, possibly predisposing children to premature cardiovascular disease. The testing for this product was done on a very small group of less than 2,000 participants and even at the FDA stated that "we wouldn't know the true risk of serious side effects until it is rolled out onto a larger population". There are noted vaccine injuries such as the 12 year old female who has a feeding tube and cannot walk, numerous reports of young athletes collapsing due to heart issues that led to death. We do not know or test what biomarkers for future disease the vaccine may cause for our younger precious popluation. The benefit versus risk for this population is not proven.

This is the information us concerened parents have to process as we make the best

decisions for our children. We have also been living the last 2 years in a pandemic, trying to keep life going normal, balance jobs, health and our family's well being. It is life changing and terrifying to think that we may have to choose to provide our children with an education that meets their mental health needs, social emotional and academic needs, or give them an inoculation that we feel may be unsafe. It literally breaks my heart privately, when I see their happy faces and know it may all be gone, due to a mandate.

Whether you agree with parents like me or not, we are out here. Our feelings are very strong and we will not comply with a Covid-19 Vaccine mandate for our children to attend school. Some will be ok, some may have lasting mental health and academic consequences that could lead to other health crisis such as depression, substance abuse, suicide and future unemployment. WE MUST FACTOR THE RISK VERSUS BENEFIT.

Please hear my Prayer.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105

I oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will. I also oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school.

Subject: Opposition to Involuntary Detain Unvaccinated Individuals

External Email

Dear Washington State Board of Health,

I am writing to oppose any and all WAC proposals that authorize the DOH to involuntarily detain or sequester those individuals who have chosen not to receive the Covid-19 shot(s).

The proposals violate the rights of humans to choose one's own medical care and are in direct violation of the Nuremberg Code which forbids forced coercion of any medical procedure.

There are many medical reasons to not take these shots, including but limited to having natural immunity and/or having had adverse reactions to prior immunizations.

The data has proven that currently-available vaccinations have shown to neither prevent people from getting Covid nor stop transmission of the virus, that the protection the shots may provide is so far showing to be short-lived, requiring additional boosters which have varying degrees of effectiveness against new strains. No studies have been done on the adverse effects of receiving so many vaccinations in such a short period of time. Their long -term safety and efficacy has not yet been determined.

In conclusion, the choice of getting Covid vaccinations and boosters should be between patients and their health care providers who are aware of each individual's medical needs. Each person should have the right to weigh the advantages and disadvantages of getting vaccinated and should not be mandated by the government. It is my request that any WAC suggestions or regulations permitting or requiring such measures should not receive any consideration of action by the Washington State Board of Health.

Sincerely,
Karen Coult
King County, Washington

I oppose the bill filed in Washington State that would authorize a strike force to involuntarily detain unvaccinated families. What is being proposed is something you only hear in totalitarian/communist countries like Cuba, Venezuela and others. This is outrageous. I never thought in my lifetime I would see something like this happening in the United States, which hasn't happened yet, but is being proposed by left wing socialist/communist elected government leaders disguised as democrats. Our WA State elected government leaders before taking office have sworn to support the Constitution of the United States and the Constitution and laws of the state of Washington, and that they will faithfully discharge the duties of the office to the best of their abilities. What I see is a betrayal of the trust of We The People who elected these government leaders to represent us. This bill that is being proposed was designed to violate our US Constitutional rights which is a betrayal of their oath and is treason against the American people. We are supposed to be living in a free Constitutional Republic created by our Founding Fathers, not a government that wants to impose their will on the American people by force. What is being proposed is morally reprehensible and a violation of our US Constitution

Henry Callahan,
Concerned Citizen

Please vote NO on these proposed

policies:

Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

IF passed they are a violation of medical privacy and freedom.

Thank you,

Karen Meyer

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health. There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19. Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

Subject: Opposition to Implementation of a Covid 19 Vaccine Requirement for Schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C>>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&data=04%7C>>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,
Jessica Storton

Dear Health Officials,

We absolutely do NOT believe that the Covid 19 vaccine should be required for children to gain entry to child care or school! PLEASE vote 'NO' on the states effort to mandate the vaccine for children! It is currently only an EUO {Emergency Use Only}, and quite clearly not efficient or effective for stopping Covid; the possible dangerous side effects resulting in permanent disability & even death, {Listen to the people who have experienced deep loss after loved ones have taken the vaccine in good faith!!}, create the need for people to make their own medical decisions in regards to any medicine put into their bodies & the bodies of the children they are charged to protect! We urge you to make the moral & humane decision with the power that has been entrusted to you.
Thank you!!

Most sincerely,

Dear Washington State Board of Health member,

With respect, I am vehemently opposed to the proposed mandates for vaccination of school-aged children. "Following the science" has become a mantra, but it is important to actually see the science, the data and the statistics, which all show that children and young people in general have a statistically zero chance of dying from Covid-19. Yes, a handful across the world have died with Covid-19, but this simply does not equate to a threat that deserves this type of response.

There must not be a "one-size-fits-all" remedy in health care. People are different, and their bodies react in different ways. It is unconscionable to force this experimental mRNA gene therapy, that has not been fully tested, on anyone ... as a condition for attending school, or participating in other activities in our free American society.

Please may I refer you to the VAERS (vaccine adverse effect reporting system) data at openvaers.com

The current strain (Omicron) has been reported as causing 6 deaths in 100,000 cases which is roughly equal to the death rate of those who have had adverse reactions to the vaccine. More people die each year from the Flu than the current strain of Covid-19. This would be a major overreach by this board and do severe harm to the faith that people have in your judgement.

Sincerely,

Gary Wilson

Subject: Public Comment About Forced Vaccination and Detainment

External Email

To Whom It May Concern:

I am extremely disturbed by the Public Board of Health even considering forcing our children to get vaccinated with the MRNA C-19 vaccine. I believe it is unsafe and the forced vaccination of us our children are equal to murder or attempted murder and I feel if you pass this type of legislation that you should be prosecuted to the full extent of the law. We will not stand for you hurting our children. I would not want to stand in front of our Lord God and be you if you have passed such evil legislation.

I fully and completely have lost respect for our government, our hospitals and you based on even considering doing this, let alone the remdesivir that you have allowed our health care providers to kill people in the hospital for numbers.

In 2019 a study was done with remdesivir and 54% of the test subjects in Africa died over this drug that Fauci has determined to be the best protocol to treat the virus for Americans. This drug was pulled from the study. I also am aware that the government is paying the hospitals "extra" to use this protocol. This is disturbing and unacceptable. It is murder.

As for using law enforcement to detain us, this is unacceptable. This is what is going on in Austrailia from a friend experiencing it:

Kids are dropping over here in Australia. Check out my fb stories, I have shared there. They started the Vx rollout for 5-11yo children yesterday and they are dying. Please keep my name blacked out if you share my screenshots. We are experiencing extreme food shortages and patients are being laid outside on the concrete without treatment. It is horrific <<https://static.xx.fbcdn.net/images/emoji.php/v9/t40/1/16/1f62d.png>> We cannot travel to our neighbouring states without double and triple <<https://static.xx.fbcdn.net/images/emoji.php/v9/t30/1/16/1f910.png>> . The border barricades are still up. It's like the twilight zone in the worst way.

We are on to you. We are onto the Great Reset and what you and the elites are trying to do to us. It is unacceptable and may God have mercy on your souls. I will fight or die fighting for our freedom, with every breath I take.

Shame on each of you!

□Hi-

I have a Master's degree in Health Administration, was a healthcare research analyst and have spent over 1,000 hours researching Covid, the vaccines, and alternative treatments.

HEALTHY children have a 0% chance of dying from Covid. The vaccines are much more deadly for them. 6% of the children's vaccine batches are causing almost all of the deaths and disabilities. This issue is not covered by the media. See the article below from CDC data. The vaccines are Not safe for children.

<https://lorphicweb.com/6-of-the-covid-19-vaccine-batches-produced-100-the-vaccine-injuries-deaths-among-children-according-to-official-government-data/>
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Florphicweb.com%2F6-of-the-covid-19-vaccine-batches-produced-100-the-vaccine-injuries-deaths-among-children-according-to-official-government-data%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C15bbd5d30521464aa34108d9d33797f7%7C11d>>

The vaccines cause death, cardiac issues, blood disorders, neurological disorders and may cause autoimmune diseases and cancer in the future. These vaccine injuries and deaths are Not as rare as the media would like you to think. The long term effects of these new MNRA vaccines are still unknown. Past MNRA vaccines developed for SARS-COV 1 in 2002 and MERS in 2012 did Not have good long term outcomes.

The vaccines are not doing a good job of preventing the spread of variants. People who are vaccinated are just as likely to catch Omicron and spread it as the unvaccinated.

So Why would we submit our children to these experimental drugs? Especially since many- likely 40-50% have already developed natural immunity to Covid which is far superior to vaccine immunity. Also children who have natural immunity are more likely to suffer negative reactions to the vaccine.

I believe we have a moral duty to protect the children from these vaccines. It has Never been the job of a child to protect an adult to their own detriment. We are to protect them!

Let adults who are at high risk, decide to take the risk of getting the vaccine to protect themselves...

Thank you,

Melissa Schober

To whom it may concern,

i am completely against any of the proposed Covid policies that are over reaching and immoral! i stand against these prososed WAC's:

WAC 246-100-070
WAC 246-100-045
WAC 246-100-040
WAC 246-100
WAC 246-105

Sincerely,
Heidi McDaniel

Whether you are voting on a Covid vaccine mandate for schools tomorrow or only discussing it for a future vote, I oppose it. Let parents make decisions for their own children. There is not enough information/data on long term affects of the Covid vaccine. Please don't even consider a mandate at this time. Thank you.

I have two comments to make today regarding BOH meeting

1. I am aware of what your focus is today on WAC 246-100, regarding modernizing HIV language: An RCW is a law and a WAC is a rule based on law, WACs are not legal but I am aware they guide how things are implemented and carried out across the state. You have asked an advisory group to the BOH, advising if the board should adjust their rule to allow for greater detainment. I want it on the record that I oppose Covid-19 being added to a potential disease warranting isolation or quarantine or detainment. Will this be discussed and considered at a later BOH meeting? If so which meeting? Please make that readily available to the public and respond to this email.

2. I attended the TAG group via Zoom, which I was only allowed to listen with no way to comment or send comments to any of the members in the group. Nor was the next meeting date made available.

As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". It is NOT preventable! Statistics are also clear that mortality for children are extremely low and not significant but yet adverse effects to the vaccine are more significant than mortality of the virus. In addition, last month at your BOH meeting, "Ms. Davis shared a letter the state's local health officers and the executive board of the WA State Association of Local Health Officials (WSALPHO). She said the letter shares WSALPHO's position that full FDA approval of a vaccine product should be a prerequisite for consideration of a requirement for child-care or school entry."

Requiring the vaccine for children to attend school is clearly outside the authority of the criteria set for this WAC. Discussing and considering adding this vaccine as a requirement to attend school only serves to put a further strain on the education system, and to continue DIVIDING families and students. Bottom line, this is NOT your decision. This is between parents, caregivers, healthcare providers and their children.

My questions about TAG:

How was this TAG formed? I only see one Eastern Washington member which is not a good representation of our entire state.

How can I be involved in this Technical Advisory Group? How do I submit comments or data to be considered?

When will the BOH make a decision based on the TAG recommendation?

Kind Regards,
Natalie Poulson
Spokane Washington

- What is going on ?
- Are you going to gather all the homeless people under this horror show?
- What happened to my body my choice?
- Can you all or even a few not see that This is totally unconstitutional?
- If there really is a pandemic why do you fire Health care workers that you need in a pandemic? That alone proves that we do not have a pandemic. Imo if You have full hospitals it's from not having enough caregivers and people who have not had needed medical care for over a year.
- Look at Florida why are they doing so well? The speaker of the US house bought a home in Florida.
- Why are you destroying this state by putting people out of work, closing businesses and driving out business?
- Why do you not get counter narrative medical information from Doctors who have successfully been treating patients with therapeutics?
- Why using a PCR test that gives false negatives and that the inventor himself said this should not be used for this purpose and then running it on high cycles.
- Lastly why do you not encourage all therapeutics like monoclonal antibodies that have been proven to work?

What you all are proposing is illegal under the constitution so I hope some sanity prevails and this does not pass.

Thank you.

Carol

I heard about this a few days ago. Got a text a few days ago re this "involuntarily detainment" (which used to be a misdemeanor") and "vaccine mandates for school kids". I knew I couldn't watch a 6 hour meeting. And was wondering how the dept of health could change these rules without going thru the state legislature. Also didn't have the info re writing to the WSDOH at the time. Anyway, somehow, would like to find out if the WSDOH can implement these changes or do they have to go thru the legislature, then I would know who to write to.

This whole thing is making me angry and anxious for our us AND our kids!!!

Dear Washington health board

I am writing to you to express my deepest concerns mandating children to receive a medicine that is controversial and not proven safe. It takes massive amount of time testing over time. Not just a 8 month process. No vaccine has been required and administered to all of humanity to live life. Especially in such a short period of time. . If you require this you shall also be required to cover all medical conditions in the future. You can not morally ask humanity to inject themselves on your request and you have no responsibility for the long term possible effects. You live in what we would of once called the Greatest Free Country to live in. Now we are home of the fearful, lonely, hopeless, depressed. Hospital's are not filled with critical covid patients but the fact is they are filled with mental health patients. Children are overdosing, losing faith and turning on their peers family and destruction of themselves as well as others. You think for one minute dosing a kid protects them. Absolutely not. Most who have covid statistically have the vaccine. You are creating segregation. We abolished segregation. It's not for you to bring it back. You are too bring health. Health physically and mentally. It's time for you to do your job morally and stand for the people. We need to educate on immunity, give help for mental stability and rehab. Address the morbid obesity consuming our society. Mental health plays role in the obesity, drug addiction, alcoholism, child neglect, child abuse, domestic violence and more. Mental health should be the top priority. Mental health is the gateway to humanity, living and allowing love to consume our souls. If covid was so contagious Seattle and surrounding areas would not have the abundance of freezing starving homeless.

Washington gives free drugs but does not prove free mental health, team building soul searching wholesome living. Stop creating panic. Start truly healing our people. Educate health not injecting chemicals that give false security they are safe when really vaccine or not you can get covid. No different then the flu vaccine. Look deep in your soul and remember you took an oath to serve and protect with honor.

Vote no to mandating or children to have the covid vaccine. If you do vote it in. You better be ready for a drop in public education, enrolled children will be pulled for homeschooling, families separating, children running away and fleeing families from Washington state. That will kill your budget and bring more heartache, sorrow and loss. Do you have a plan in place for that much loss?

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Do not mandate the covid vaccine. Not ok nor right to inject chemicals in our children. Reach deep and choose the people not the dollar. Save your soul. It's the one thing you can't buy back.

Sincerely,
Jill R Schwendeman

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Finally, as this is an experimental drug that you will be forcing on our children, I will close with the 10 points to the Nuremberg code. I strongly urge you to read over these as YOU will be the ones held responsible for these crimes if you push these mandates through.

The ten points of the code were given in the section of the judges' verdict entitled "Permissible Medical Experiments":[6]

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]
2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.
9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.
10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

1. There are no long term scientific studies to document the safety of the vaccines in children. There has been plenty of studies indicating the high risk of myocarditis, especially in teen boys, as well as many other injuries now being documented in children.
2. These vaccines are still only emergency authorized, not legal to mandate as seen recently in courts in another state.
3. Children have always been at extremely low risk for Covid. This has always been the case since day 1 and has not changed.
4. Current scientific studies now document that these vaccines DO NOT stop the spread of this virus in vaccinated individuals. This is seen everywhere.
5. There is no need for any child to be forced to take an unnecessary vaccine(s) to get a public school education. The WA State school system may see a drastic loss of funding due to parents finding better educational alternatives to the WA public schools. Our children have suffered enough with the closure of schools and the downward slide since of the WA public school system and pushing a vaccine with no long term studies and an apparent ineffective vaccine on the children furthers this downward spiral.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

January 6, 2022

Washington State Board of Health Members,

I am writing this letter to oppose mandatory Covid-19 mRNA vaccinations or nasal swab testing for school attendance. I have personally have a medically complex child that has under gone several medical interventions including heart surgery as an infant in the Neonatal Intensive Care Unit (NICU). My child has neurological conditions from premature birth including cerebral palsy, uses a wheelchair for mobility, hydrocephalus with VP shunt. Also has chronic lung disease (asthma), autism and many additional diagnoses. My child had prolonged, direct exposure in the home before Covid-19 mRNA vaccinations were available to the general population from a symptomatic and lab confirmed Covid positive immediate family member. None of the other family members contracted Covid even with sharing living spaces in the same home environment.

I am concerned about myocarditis, bells palsy, blood clots or death from the vaccination. The risk of a blood clot, neurological and vascular side effect in a child with a known history of neurological disorders (CP and hydrocephalus with VP shunt) is risky. A family member's mother in law died from a blood clot post Johnston and Johnston vaccination. A friend of mine for several years, fully vaccinated and boosted died a few days before Christmas 2021 in an ICU in a different state from Covid-19. Some friends have required ER or urgent care medical interventions including but not limited to IV fluids 3 days after receiving the first dose. Some medical providers in their 20's have reported wide spread muscle aches after second dose even 1 year after the vaccination series was started. Medical treatments, interventions or choosing a medication, surgical procedure or a vaccination is the decision of each individual person or guardians for minors and not the local or Federal government's decision.

I also oppose nasal swab testing of children to attend school. Having this testing done in a developmentally delayed, medically complex child is too traumatic especially if done in the school environment. This child would require testing to be done by trained and skilled pediatric nursing personnel. My other child had daily bloody noses after the nasal swab for a week and half. Ideally the testing would only be done if it guides the medical treatment of the person's condition. If there is no change in medical treatments or modalities then why require it? If testing does become mandatory for school children please make it mandatory regardless of vaccination status. Otherwise this will cause bullying and segregation. Please devote efforts to development a less traumatic way to

test for Covid-19.

Sincerely,

A concerned parent of a medically complex,
developmentally delayed child

I'm opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- 1) The vaccines do not stop the spread of the disease. This is undeniable. No one should be mandated to take a medication that doesn't work.
- 2) Children are at extremely low risk of serious complications or death from COVID-19.
- 3) The vaccinations have not been adequately tested on children, nor are there any long term safety studies. Our children should not be made into guinea pigs.
- 4) Unreasonable mandates will force even more parents out of the work force.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State. How many students will you loose if this happens? People will either opt for private homeschool or families will move out of state. I for one will look at those options and my children will never be in school in Washington state again. I'm a 5th generation Washingtonian and I live in my family's homestead. The street I live on is named after my great grandfather's horse. I'm FROM here and I'm willing to give all though if this is put in place. The following Reasons are just the tip of the iceberg:

- * The vaccine does not stop the spread of the disease
- * The vaccines are still only EUA (emergency use authorized)

- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- *

- * Children are at extremely low risk for Covid

Thanks for your time.

To whom it may concern:

I am opposed to making COVID-19 shots mandatory for school admission or childcare in the state of Washington for the following reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies now document that fully vaccinated can, and do, transmit Covid, therefore,
- * The vaccine does not stop the spread of the disease

My Best,

Kerrienne D Gregg

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1- It is still emergency use authorized so any side effects that happen, and there are many of them, the manufacturer cannot be held responsible.
- 2- The Nuremberg code does NOT allow for human testing without the person's permission.
- 3- It will be 55 years until Pfizer can release any info on this, which is risky for all who take it.
- 4- It is experimental and mandating it is wrong on many accounts.
- 5- The long term effects of it are unknown being that it is still new and requires data in order to know.

Please do not do this. America is supposed to be free yet things have gotten really bad with so many rules around this and the fact that being "vaccinated" you can still spread it and unknowingly have it because you have no symptoms. People have had bad side effects as well as dying because of this. Many virologists are against this as well and they actually know of the Nuremberg code.

Best Regards,
Merrie Armour

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1.

Children are at extremely low risk for Covid. The recovery rate for adults is 98.5%,, therefore there should be no requirement for anybody to get the vaccine.

2.

The vaccines are still only EUA (emergency use authorized).

3.

There are no long term studies to document any history of safety.

4.

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, that in itself shows the vaccine does not work and should not be used.

5.

It is quite apparent that the vaccine does not stop the spread of the disease.

6.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are very low risk to get COVID.

Still only emergency use.

No long term studies to show data long term on the impact of the vaccine.

Studies show both unvaccinated and vaccinated individuals can pass COVID to others.

So...the vaccine does not stop the spread of COVID.

This needs to be a parent and family decision on choosing to get the vaccine for their children.

Thank you for your consideration.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. There is no emergency. The survival rate proves this and children rarely get this virus. If we kept track of those with other viruses, we would always think there is a pandemic. The testing cannot even be trusted.

2. This is unconstitutional! We have the right to decide what goes into our bodies and our children's.

3. The vaccine does not prevent you from getting Covid-19. Children are not at risk of dying and neither is most of the population.

4. Those with natural immunity do not need the vaccine.

5. Many will pull their children out of public schools if this is put in place.

6. This sounds like communism!

7. Follow the money! Who is profiting from all this?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We should all have the choice and control over our own bodies and that of our children.

Children are not at risk with COVID

The future safety of this vaccine is in question. I do not want to hear a few years from now how sorry our government or school boards are that this vaccine was indeed harmful and they were not aware of it. But here is a bunch of money and too bad for your injured child.

The vaccine does not stop you getting the virus or keep you from spreading the virus so what is the point.

You will look back on this and wish you had done differently. Someday even you will be forced to do something that you don't want to do. This is opening a Pandora's box for sure.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: It is becoming increasingly obvious that the people who have been vaccinated are spreading the virus. In our hospital in Wenatchee there are currently 24 people being treated for the virus and out of that total 13 are fully vaccinated. By subjecting the young to the experimental gene therapy we could be harming their natural immunity through a process called reverse transcriptase. We could be increasing the dangers to the entire population if the shots are somehow responsible for causing mutations in the virus. It is never wise to force an experimental vaccine product on a large segment of the population before many years of testing have proven it to be safe and effective. Thank-you for your consideration of my perspective. Mike Kullman Wenatchee

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are not at risk for COVID. These shots are not proven to be safe, but have set off many alarm bells with children who do take them having adverse reactions. The most highly vaccinated areas have the highest levels of COVID, whether in the US or abroad, so the shots are not effective in stopping the spread of COVID.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

There is no proven science that says kids benefit from this.

These are not FDA approved and only EUA approved for emergency use. To "test" this on kids is absolutely an overreach of the WSBOH.

We are at the point that vaccinated and unvaccinated people transmit COVID. Vaccinated people are at the same risk of catching COVID as unvaccinated. At this point you need to look at the science that has developed over the course of the last year and base your decision on that. It should not be based on public opinion or false data.

It is clear that the vaccine does not stop the spread of COVID. That is now recognized by scientists and the WHO and CDC. That is why testing has become the primary tool to stop this.

This action would be a complete overreach by the WSBOH and is not in the best interest of children, and will do nothing to stop the spread of COVID.

Respectfully,

Jim Ribail

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

American founding father Benjamin Franklin said:

Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety.

This request goes against:

- Free will
- Faith of kids and their parent (children are not even able to decide and express their own choice)
- Constitution.

Please stop protecting people from themselves: no one has right to decide for others, let responsible authorized parents decide for their kids.

Just think how many other things to be banned based on the same logic: alcohol, drugs, suicides, games (any kind of danger and addiction).

If vaccines are truly working, there is nothing to be afraid of for vaccinated.

Blessings and the sane reasonable state of mind to all of us.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children like some adults are not all vulnerable to these Bio-Warfare viruses. You are bringing more harm mentally to them by forcing face masks and having them watch their parents live in fear.

Vaccines are experimental and yes even two years into this foreign mess. For years the public walked around with upper respiratory symptoms but now that you have labeled them deadly, people are standing shoulder-to-shoulder in line waiting to be tested or to get a home test.

Stop the Psychological Manipulations and remind everyone to stay home if they feel ill and do not congregate with others during these crucial times. Be honest and stop spreading only one narrative among yourselves.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

There is not enough history behind the vaccine to ensure it is safe for children and children are not high risk enough from covid to take the risk of being vaccinated. Vaccination doesn't ensure covid won't spread.

My 4 year old picked up covid at daycare. He had a mild fever and runny nose for a day.

My 2 year old got covid from him and had head congestion like a cold for 5 days.

I got covid from them while vaccinated and had severe cold type symptoms for a week.

My 7 year old lived in close contact with 3 confirmed positive and symptomatic cases for over a month and never caught covid. It makes no sense for him to be required to get vaccinated to attend school.

Why is no consideration being given for natural immunity and previous exposure without severe reaction?

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid. The median age for death by Covid is 80 years old.

The vaccines are still labeled "emergency use authorized". There are NO long term studies to document any history of safety. Therefore, you could be altering children's genetics. (mRNA)

There are studies that document that both vaccinated and unvaccinated people can transmit Covid, therefore the shot does not stop the spread of the virus. It is not a true vaccine. So why is this step even under consideration?

It is a political move, more government overreach into our lives. To what end?

Sincerely,
Michael Dwyer

Dear WSBOH,

I am writing to inform you that I am completely against newly proposed COVID policies. These policies are overreaching and unethical.

Even as a Washington State teacher, currently teaching in person, I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State. I am especially opposed to the policy that would remove American freedoms by involuntarily detaining and isolating people in quarantine facility for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

Along with my family and friends, I (we) stand against the proposed WAC policies: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I request that you listen to the citizens of Washington and make the correct choice that reflects our freedoms.

Thank you for considering my view on the matter,

Michelle Comstock

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: The main reason is that the determination of whether or not to have an emergency authorized injection for a child must be a parent's decision. It is a terrible thing to force a parent to decide between their child's education and what they believe is safest for their child. And especially when the parent's are paying for the education with their tax dollars. It is very upsetting that the WA State Board of Health is considering unreasonable actions such as these. Please don't mandate covid vaccines for all public school children.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1) It is now certain that fully vaccinated individuals still test positive for covid, still spread covid, still can get sick and hospitalized from covid.

Even if a child was fully vaccinated, the child could catch covid, the child could still get sick from covid, the child could still spread covid the same as if the child had been unvaccinated.

2) the covid vaccines are approved ONLY for emergency use authorization and have not been properly gone through animal testing prior to being used in humans.

3) covid vaccines are actually experimental gene therapy. The short term and long term side effects are unknown.

4) children have over a 99.998% full recovery rate. Given that survivors who recovered from SARS corona virus 1 still have full immunity many years later, science supports that it is likely that long term natural immunity is likely achieved from Covid 19 as well. Many children in the United States may likely already be fully immune to covid 19 and taking an experimental gene therapy vaccine would likely be more harmful than good and likely unnecessary.

5) There are documented cases of many children having severe adverse reactions to this covid 19 vaccines. VAERS shows thousands of severe reactions and even deaths in children. There was a 12 year old girl in the original covid vaccine trial that is now suffering from severe reactions on feeding tubes, in pain, neurological, gastro, urological, hormonal and much much more problems from her reaction.

6) these vaccines offer zero informed consent to anyone. No parents are able to receive informed consent because it is all experimental and side effects are not known. All the informed consent safety data inserts are missing from all the vials of vaccines. This is wrong and does not allow a person to have informed consent.

7) Experts and scientists around the world are now saying that the newest variant called "omicron" is the dominant variant and will wipe out the other variants: they state that the vaccine has zero protection against this omicron variant so there is no reason to get the current vaccines since it will not protect a person against the omicron variant.

Secondly, it is becoming widely supported that omicron will cause this pandemic to be over and also over very soon. It is called "endemic" and everyone in the world will likely be exposed to it. This, this pandemic is soon to be over due to the fast and high fly contagious variant spreading everywhere in the world. The corona virus is likely to be a thing of the past in this world very soon.

Therefore it makes no sense to give a child these vaccines.

Who are we protecting to give a child this corona virus vaccines? The vaccines don't protect against the dominant omicron variant. The vaccinated can still get the virus, get sick from the virus, get hospitalized and die from the virus, spread the virus. If these vaccines work the way vaccines are supposed to work then the most vulnerable people who are likely to have serious complications or die from the virus would be the ones that need to be vaccinated, not children. Why should a child who has little to no risk get such an experimental product when there is little risk of getting complications from the virus. Why would a child need to get this vaccine to protect others that could get serious complications if the others that could have serious complications already received the vaccine and it actually did its job and protected them from others who may be contagious

such as a child then there would be no reason to have a child get the vaccine to protect the people who are already so called protected...

- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

What you're trying to do is sick and wrong.

Sincerely,

McKenna Kalahar

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) The shots being used are for emergency use authorization.
- 2) Covid is low risk for youth.
- 3) There is no documentation on long-term safety for the Covid shots.
- 4) There is documentation that Covid spreads among vaccinated & unvaccinated populations.

There is no reason for government enforcement of vaccinations that do not help prevent the spread.

Thank you for your time.

Kurt Bigbee

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The Supreme Court on Friday January 7th will be deciding if mandatory vaccinations are constitutional for companies with over 100 employees!

The biggest reason, it seems to me, is that parents will continue pulling their children out of public schools!

Mandates do not work in a free society!

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at low risk of having severe Covid

Or micron makes Covid hospitalization and death risk minuscule for children.

My kids have already had Covid and have natural immunity without getting the shot, which should count!

Vaccines have not been around long enough, kids are at low risk, vaccinated people can still pass the virus so it is pointless.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I do not believe the shot is safe and it doesn't work. Let families make their own decision.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The level of danger for Covid has dropped considerably in the past few months. Some predict the virus is on the wane.
2. The risk to children is so low, it does not make sense to require a vaccination at this time.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. There has not been enough time for a reliable study conducted on the potentially adverse affects of this vaccine on young children.
2. The mortality rate for young children is so incredibly low to mandating this as a requirement without knowing the first reason outweighs the risk of the future harms it could cause.
3. Studies have already shown that vaccinated or not you can catch and pass this virus along to others, so mandatory vaccinations remove our fundamental freedoms we live by in America.
4. We need to consider into decisions of kids who already have had this virus before and what natural immunity they have against the virus.
5. Medical choice should be with the parents and not the government.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It has been proven that children are at an extremely low risk for contracting Covid and for passing it along. To mandate an untested experimental vaccine on children is absolutely criminal and must not be allowed. Research is showing terrible side effects already in many children, and we have no idea what this vaccine will cause long-term. Children are at greater risk of harm from this vaccine than they are from covid. Please, we cannot allow this mandate to happen. It's time for people to actually look at the science and quit being bullied by the CDC, Fauci, and our government. The only group that would benefit from this mandate is the pharmaceutical companies.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * The risk factor from Covid for children is extremely low
- * The risk factor from the shot itself is not fully known yet, but there are thousands of recorded adverse reactions, even deaths that have been associated with the shot.
- * Even the FDA has requested 75 years to assess the risk factors of the shot -- why would we as a society rush to risk the health and well being of our children?
- * The shot is becoming increasingly more known to be ineffective in preventing the spread of Covid-19. Vaccinated people continue to get sick.
- * Parent's rights to decide what is best for their children must be preserved in this state. This is a fundamental freedom of the highest order and must not be taken away!

Sincerely Submitted,

Michael L. Keith

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- 1 They have been proven NOT safe,
- 2 Vacc shots have not been proven.
- 3 Mandates are against the Constitution, do not take away our freedom of choice.
- 4 What you are doing is against the Constitution and will be help responsible,
- 5 Nuremberg Code Addresses Experimental and is a NOT Vaccines ,
- 6 I am against mandatory vaccines. I have a right to choose .
7. God gave us antibodies to fight off infections, Vaccines destroys our natural antibodies.

Thank you Lois Smith

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It is against our constitutional rights to force a human to do something to their body.

AND

THE REAL REASON YOU ARE FORCING THIS ON CHILDREN IS TO EXCUSE PHARMACEUTICAL CO.'s LIABILITIES FOR ALL DEATHS and SERIOUS DISABLING INJURIES to BOTH ADULTS and CHILDREN and TO BE ABLE TO CONTINUE TO DO SO IN THE NAME OF GETTING RICHER AND CONTROLLING THE POPULATION, in my opinion.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Citizens have a constitutional right to control what is placed in their bodies.

The injection has not proven to be safe nor is it effective in preventing COVID-19 or variants.

Children rarely have a bad reaction to the flu & don't require injections.

Please allow individuals to choose.

Thank you,

J. Rudnick

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- 1- Children are at low risk.
- 2- The vaccine is only an EUA.
- 3- No long term studies.
- 4- Vaccinated or not, both can transmit COVID-19 .
- 5- Vaccines do NOT stop the spread of COVID.
- 6- You nor science can Provide that the vaccines are safe.... and cause no harm. This has been taken to a court already and the vaccines LOST all and any credibility....
- 7- I strongly suggest that you stop any and all ideas of vaccinating the kids. Unless you enjoy lawsuits.....
