Strongly against changing the rules of Chapter 246-100 WAC to include detainment and strike force for unvaccinated. As Americans and Washingtonians we are experiencing much different situations that your statistics provide in our own families. Including getting covid regardless of vaccination status. In my very large family included the unvaccinated individuals ended up with milder symptoms. Masks never helps or deterred anything. We also have seen throughout this 2 years of the pandemic many different situations of the vaccine causing more harm than if a child or individual had gotten the vaccine. We need to allow an alternative such as tither testing to prove immunity. We need to continue to uphold the civil liberties and freedoms that make our country one of the best including the freedom to choose what we put in to our bodies.

#### External Email

I urge you to VOTE NO to changes at this time and have free open Public Discussions designed to foster respect and human dignity for WA residents. Discussions designed to uncover the truth about what Covid19 studies' data reveal about the biological affects of Covid19. Wa State's rush to force vaccination and lock people up in Detention Centers for as long as Dr. Fauci proposes is absurd and gross overreach of Govt. Official powers. I am a WA Certified teacher with many science & math endorsements including Secondary Biology. I have taught health, biology, genetics, human physiology, immunity, biotechnology and forensic science for 11 years. I do understand immunity Increasing numbers of residents of WA see Public Health carrying out covid19 mandates are actually causing Public Ill Health, mentally and physically. Imo, it is unwise to be vaccinated with mRNA based substances for reasons based on science & personal health. FREE CHOICE is crucial for MENTAL HEALTH.

discussionsMandatory Vaccination Policy would create a huge grassroots oppositional uprising in WA. needs to con against many groups Chinese Medicine and Naturopaths who are as highly trained/similarly licensed as AMA Medical Doctors. Similarly, Alternative Medicine Industry has regulations to protect my IMMUNITY & HEALTH so patients rarely get Covid & when they do, they recover better than those sent to hospitals to be placed on ventilators. Officially released data is INCREASINGLY clearly showing that it is time for Boards of Public Health to WAIT & WATCH the Omicron variant because even the inventor of the mRNA technology that the Covid19 injection uses to make Spike Proteins is URGING Public Health to STOP THE insanity of pushing vaccination rates to this EXTREME of a level!! PAUSE & Shift your direction, please. Feel free to contact me via email. Most people in the United States STRONGLY object with the policy you are considering having enforced by Law Enforcement. ONE, it violates Constitutional Rights of the People of WA State. So, lawsuits will flourish. ALL WA State elected officials who try to enforce it would be violating their Oath of Office (Sheriff's won't enforce it or can't because of current increases in crime) and masses of people would definitely take to the public sidewalks (& streets) to protest much like BLM did in Seattle and other WA cities in 2020.

In short, if you pass this Administrative Code you personally will be complicit in a Crime Against Humanity, you might be included as defendants in filed lawsuits and you will be guilty of creating chaos, confusion & potential mayhem in what ought to be peaceful communities progressing in ECONOMIC RECOVERY.

If anyone grabs my body to force me to submit to Unconstitutional policies I will resist with everything within my power--legally, physically and Spiritually.

I was a WA State Commissioned Law Enforcement Officer, am formally educated & lab-trained in Biology and Human physiology.

The mRNA covid19 vaccine IS EXPERIMENTAL. President Biden & Governor Inslee know this and it is Criminal what they are doing in forcing you to help create Quarantine Detention Centers for forced Covid 19 testing, examination, counseling and injections & injection of students. Also, you are discriminating against people who choose to seek prevention/treatment through Alternative Medicine and medical experts in highly affective Traditional Chinese Medicine.

The policy you are considering implementing clearly discriminates against many groups of people in VERY complex ways & Public Health has not been transparent, honest & fair with the people who pay their salaries through taxes.

Subject: STOP THE ABUSE OF POWER!

External Email

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

These proposed laws are abuse of powers and unlawful. They do not consider the fact of natural immunity and that the Covid 19 infections can be passed to anyone even if you are vaccinated. A vaccinated person can also spread the virus. These threats are tyrannical! This not a virus of the unvaccinated it is fear that is be pushed!

Think about it and decide to be better then the fear mongers!

Regards

R. Thykkuttathil

Subject: Prepping for January 12 SBOH Meeting and Column Deadline

External Email

A number of readers have brought concerns over WAC 246-100 and the upcoming SBOH meeting agenda to my attention. I've reviewed the clarifying statement (here <https://sboh.wa.gov/News/Articles/ID/3050/Clarifying-Online-Misinformation-about-the-Jan-12-State-Board-of-Health-Public-Meeting>). My column deadline is January 12 and I am reading past minutes in preparation for the January 12th meeting. My hope is to provide clarity and rumor control.

I'll have a short turnaround time to write after the meeting ends. Are there any additional statements that have been released or a knowledgeable individual interested and available for a conversation prior to the meeting, on the record?

Blessings,  
Sue Lani

The proposed policies concerning the wac codes and Covid 19 are a terrifying violation of human rights. You cannot forcibly remove people from their homes with law enforcement for having an illness. It is horrifying that this is even being considered. This goes against everything I was taught we stand for as Americans. The supporters of these policies should be ashamed to call themselves Americans. Please stop succumbing to fear and imposing tyrannical policies on the people of this great state. This is an abhorrent overreach. I will not be forced into medical procedures that violate my free will and my religious beliefs. No one should be forced into compliance over these matters. I cannot sleep at night with the thought of armed people forcing themselves into my home to inject me with a substance I do not want in my body or the notion we could be taken away against our will to some camp. If the similarities to totalitarian overreach in the past do not strike you then I suggest brushing up on your history. I refuse to participate in tyranny and I will not comply with these insane and unconstitutional measures. No emergency is an excuse to override our rights as Americans under the law. I will not be subjected to unlawful searches and seizures. I will not give up my bodily autonomy so you can feel more comfortable. If someone chooses to quarantine or comply with the recommendations of the govt that is fine. Forcing it on people who wish not to comply goes against everything this country was founded on. Please consider our freedom and the consequences of taking it from us by force.

Greetings,

Please do not support mandating the COVID vaccine for children. It is important for parents to be able to make the choices that will best help their families. It would not make sense to mandate something that could have detrimental effects on an entire generation, as there have been no long term studies for this. Many European countries have put the mandate on hold as it has caused heart problems in many students under the age of 18. It would be unwise as a state or district to mandate something that has the potential to harm so many of its next generation.

Thank you,

Rachel

Subject: Please do not allow this unconstitutional bill- WAC 246-100-040

#### External Email

This bill is frankly unconstitutional, to hold people against their will for a choice that they should be free to make. Please do not be a part of the committee that ruins our state and consequently our country. Take a look at what is happening in Australia with their detention camps. The government will always abuse its powers as seen in every history book and every civilization that has every existed. If we allow them to take away this freedom of choice, it will be abused. Maybe not this year or the next year, but definitely in the future!

Thank you for your understanding

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason. Signed, Stacy Pelkie

We are supposed to be a free country and should be trusted to quarantine in our homes just fine. There is no data to support the need to have mandatory covid vaccines in students especially with no long term (10 years or more) data on adverse affects. Children are low risk and there is no proof that they spread this disease. On that there is no substantial proof that the vaccines do anything other then maybe prevent severe disease.

I am firmly against the covid quarantine/detention procedures mentioned in this bill. This is a violation of citizens rights as stated in the Constitution of the United States of America. Many people including myself are now aware of the Covid scam that is being used as an excuse to give people an experimental shot for a disease that is mostly survivable, a shot that is intended for depopulation! I am aware of the corruption in this state via Jay Inslee and many others, and this bill is an extension of their efforts to turn this state into a Marxist state. Many citizens of this state are armed and WILL defend themselves and their property which we have the right to do according to the Constitution! You all will be held responsible for all the deaths and injuries you have caused in modern- day Nuremberg Trials!!

The people are waking up!!

There's not enough proof out there to show that children are at risk or high transmitters of COVID-19.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Vaccinations for children requirement and use of law enforcement for forcing people to quarantine.

11.

Are you Pro or Con on the proposal?

2.           Con

---

There's not enough scientific proof to show that children are greatly affected by the COVID-19 virus also there is enough proof showing it with that if you get the virus as of now it is not as deadly just more transferable. The virus is mutating the way we want it to to be less deadly but yes more transmittable. Why would we need to make more rules require more people to get the virus if it is becoming less of a threat? Please take that into consideration. Also I fear if we give certain people Power to quarantine people under their discretion that would cause a lot of problems of abuse of power.

To whom it may concern,

I'm very concerned with the article addressing "misinformation". You clearly stated you won't take action at this meeting but that doesn't mean the action won't still be taken. What concerns me is the fact that these quarantine facilities sound just like internment camps. Have we learned nothing from Jewish citizens taken in to camps for "their own protection" or how about Japanese citizens housed in our own fairgrounds "to keep us all safe" or Native American inclusion schools to help "better their lives". Look in a history book and see where you are making your mistakes. The definition of insanity is doing the same thing over and over and expecting different results.

How it is even being considered using law enforcement to take people in to forced quarantine facilities is disturbing. The fact I stumbled across jobs for internment workers was even worse. Please take a moment and consider what if someone declares you or your spouse or your child a public health risk? Would you be fine with police showing up to your door and telling you to round your family up right now and come with them? I have a friend in health care that told me if someone has the vaccine they are told they don't have to Covid test them because it couldn't possibly be covid 19 then, if that's true your data is severely distorted. Just tell us the truth for once.

I am vaccinated, as is my family and I'm still sitting up at night wondering what was injected in me, wondering why I'm still forced to wear a mask, why "fully vaccinated" now means getting a ton of boosters, wondering why I have stance issues since the shot that everyone seems so fine with ignoring.

It is your fault for the "misinformation" as we haven't been provided correct and unbiased data, we have not seen long term effects of these shots, we have not been told what is actually going on and now you've decided to introduce the equivalent of an internment camp complete with morgues I'm sure.

If we do not learn from history we are doomed to repeat it.

-Samantha Merritt

Subject: January 12th Board Meeting

External Email

Dear Washington State Board of Health -

I'm writing with regard to the meeting to be held January 12th to discuss proposed actions concerning COVID-19 including mandatory vaccinations for children and the use of law enforcement (or any other form of enforcement) to detain persons for isolation in a quarantine facility due to noncompliance.

The attempt to dissuade public comment by labeling the true meeting agenda on the webpage as misinformation and then thinly veiling it as something other is abhorrent.

Any proposed action including the above are a violation of the freedoms we have guaranteed to us as American citizens by The Constitution of the United States - bought and paid for with the lives of men and women who fought to make us free -and a violation of the worldwide recognized Nuremberg Code.

Any forward movement on these proposals (detainment, isolation, and quarantining for COVID noncompliance or mandatory vaccines for children) will be considered a threat to our "certain unalienable Rights" of "Life, Liberty, and the pursuit of Happiness" and the people of WA state are ready to take action against this violation.

Sincerely,  
Danielle Fish  
Spokane, WA

Subject: Please Oppose injections added to school age children

External Email

To whom it may concern,  
I Valentina Harris, oppose the use of law enforcement to be used to detain those who are unvaccinated for covid injections.  
We are not second class citizens. Many of us have natural immunity. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and overall health. These are experimental shots. They are not safe!! It is against the law to mandate them. You will all be held accountable when children will be having life-threatening injuries and side effects. You will be held responsible. All parents will make sure of it.

These vaccines are not safe. They have never been used on humans before. There has been a filing in the International Crimes Court the ICC by Dr Michael Yerdon and others for crimes against humanity by pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus. Vaccinated still get it and spread it. These do not work, they will only harm the children. Please Do the right thing and oppose these WACs from being added to laws.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105

Dear State Board of Health Member

We are 'totally' against any move of our state representative to make this a 'law' . It is socialism at it's

core. We are not Germany or Russia.. We are the United State of America and are governed by the & quot ; Republic & quot ; .

This proposed law is unconstitutional.

We will fight this if it ever becomes 'law'.

I urge you to vote & quot ; NO '

THANK YOU

Carol & Gerald J. Weiler

I am writing in regard to the WA COVID DETAINMENT EMERGENCY. If implemented, law enforcement, public officials, and anyone else attempting to involuntarily kidnap entire families will be met with the same force the state is using - lethal force in defense of freedom.

You will cause bloodshed if you go down this road. Washington isn't just Seattle. Oregon isn't just Portland. These states are filled with mountain men and families who are perfectly capable of surviving on their own. They will not hesitate to defend their friends and families.

If you are looking for a war, try to detain non-violent, non-criminals for not getting a privately developed vaccine that is being forced on a peaceful population.

YOU WILL LOSE.

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health.

These discussion of changing health codes needs to understand the proposed changes involve vaccines that do not have sufficient health and safety clearances in that most have not recieved FDA approval, as well significant reports of vaccine injuries. In the name of freedom and the codes of world wide medicine, we should not be forcing this on our childrens health. It is forced experiments. We should not tolerate this, nor discriminate those who choose not to recieve it.

There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19.

Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

Perhaps this email is beyond the time frame of your hearing public concerns regarding the ridiculous and overreaching tyrannical law(s) of detaining and enforcing lockdowns and clot shots on the citizens of Washington State! I for one am appalled and disgusted at even the mere mention of these "procedures".

I have been a citizen of Washington State my whole life and have until recently been a proud and happy citizen. I now look forward to moving from this police State you have created.

Infuriated,

Theresa Smith

Hello there,  
I'm not sure where to email but I saw the devastating news about our horrible governments new covid policy. Please please reconsider, the government can not peak for everyone individually. You can not force everyone to comply to medical tarrantly. The past three years has devastated my family because of the governments way of handling things. I have had three family members who died of COVID and they were Vaccinated! You are messing with people's lives and livelihoods!!! I can not think of another place, where they would forcibly take children and put people in concentration camps or "FEMA camps" expect for NAtzi Germany and the Slave trade in third world countries! My husband has worked through the entire pandemic, NEVER had ANY time off! He worked the ENTIRE PANDEMIC AND WE NEVER GOT SICK! NATURALLY IMMUNITY WORKS! If this bill dosent change, we will be forced to move from Washington and find a different place home.  
Thank you  
Clarissa Hart

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Sue Stevenson

Please do not consider requiring school children to be vaccinated. There is plenty of evidence to suggest these shots do not work. And recovery rate is 97% with people over the age of 78 making up over half of serious cases. Anyone who needs to quarantine has that choice themselves. I suggest that you do not impose covid 19 mandates/restrictions any further for public schools and instead get rid of restriction. These kids are damaged. Are you apart of the problem?

Please add to record, I am completely against any of the proposed Covid Policies that are over reaching and against freedoms. I stand against all of the WACS proposed WAC-246-1---070, 246-100-045, 246-100-040, 246-100 246-105.

I am a Democrat and Liberal by the way and I have chosen to be vaccinated. That said, the information related to vaccines has changed since day 1 of their proposal: Cure, stop the virus, prevent transmission, keep people from dying, on and on. Triple vaccinated people getting covid left and right. This is crazy. I believe and follow science.... But science is a search not an arrival.

In any case, detaining people, forcing vaccines etc. Is over the line. The State should really consider how many may exit.

Yvonne Meziere

Covid does not need to be included in these definitions. Treatments are available and most people isolate at home. This is an unnecessary, unreasonable and unethical expansion of an already questionable WAC chapter. This kind of overreach into people's private lives must be stopped. Requiring papers to move about, and now concentrating people into "Isolation camps" has no place in our free society. Someone needs to stand up against the tyranny that's been imposed on the citizens of state and country. Please realize the damage you are committing by perpetuating these ridiculous and overreaching mandates. The currently required Vaccinations have had appropriate long term safety trials and results. These covid vaccines will not be through those trials for many more years. It is irresponsible for the Board of Health to require this new product be injected into ANYone, but especially small children. Children have been and could be harmed by this vaccine, either now or in their futures. We simply do not know at this point what the future effects will be. The effectiveness of these vaccines are proving to be much much less than we were initially told or expected. People who are vaccinated are still catching and spreading covid. How does having the vaccine make someone "safer" to be in public or school if they are still able to spread and catch covid? The answer is they are NOT any safer to be in a public space (restaurant, school or concert) than an unvaccinated individual. It is grossly negligent to even consider adding covid vaccination to the required school vaccines with this information. I know my comments won't help, inslee has his mind set on total domination and dictatorship of our state. The camps have been created, the workers have been hired. It's just a desperate plea to anyone who will hear, that will look inside themselves and at facts and realize THIS. IS. WRONG. Please stand up for us. For our children's future. For life liberty and the pursuit of happiness. We beg you. Jessica Holcomb Covid does not need to be included in these definitions. Treatments are available and most people isolate at home. External Email

Dear Washington State Board of Health,

I'm writing to oppose the TAG that WAC 246-100 be expanded to include COVID-19 vaccination as a requirement for school attendance, opposing item 9, and support item 11.

The Covid-19 vaccinations, while in widespread use, have generated a very large amount of adverse reports and reactions in VAERS. Mandating these shots relies on an unproven optimism that things will be fine for the many children who already have underlying health issues, ASD, or other chronic conditions. Those children have NOT been proven to be more in danger from COVID, but often are seriously adversely affected by vaccines that provoke the immune system in a way that goes around the normal functions of the immune system. Furthermore, regarding adding the emergency approved Covid vaccine to the childhood schedule, the science has shown that children are the least at risk and should not be forced to take an experimental product with unknown long-term effects. A mandate for an emergency use vaccine is dangerous and should be avoided, especially in light of how fast COVID is changing and the waning efficacy of the current vaccines.

As we are seeing, the vaccines and boosters are not protecting the vaccinated and are resulting in underreported yet still staggering vaccine injuries and deaths. A large percentage of the population already has natural immunity, yet the pro-vaccine community has been is completely ignoring this despite numerous studies showing the superiority of natural immunity.

I would like to Oppose Agenda Item 9 that looks at expanding the authority of the health board that is already in extreme overreach for additional communicable diseases. Forcing vaccination, counseling, or detention, at the sole discretion of anyone person with little to no regard for the medical, religious, or personal freedoms granted by our constitution is abhorrent to the reasons we fought so hard to separate ourselves from England. It's essentially force medical and prevention without representation.

I DO Support the new Petition for Rulemaking, Agenda Item 11, that would prohibit making any emergency use authorized product or a licensed product that lacks Phase 3 trial studies from being a on "school required" list.

Thank you for your time and consideration,

Lisa Howe

2. Con

---

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Many studies have shown that this vaccine has risen the incidence of a sever and/or deadly reaction to the virus with use of the vaccine. There is no medication, no therapy, no treatment, no medical procedure that is 100% effective on 100% of any population. This vaccine is no different. Secondly, this mandate and all discussion of the vaccine has not included or dealt with those who have already had natural immunity via having the virus. Thirdly, this violates both our State and Federal constitutions.j We don't lock people of for personal choices. This is not Nazi Germany or any other dictatorship.

Subject: Regarding Washington State Board of Health Meeting for January 12, 2022

External Email

Dear Samantha Pskowski,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R\\_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g)>  
where its stated that it is too soon to be requiring vaccinations for our children. Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 . The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical

community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,

May Lindsay

I'm against involuntary isolation of covid positive people. This is a waste of our tax dollar and infringes our rights as human beings. The cdc already has rules and jobs do as well. What is trying to be passed is reminiscent and following footsteps of an era that people shame and should not be repeated.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

If there are any plans to allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for a medical exam, testing, treatment, counseling, or vaccination then I STRONGLY object. While our family has been following vaccination guidelines, it is absolute NOT OK to do such a thing to people in the United States of America. Whoever came up with this should be ashamed and resign immediately.

There should also not be any law enforcement harassment of anyone not in compliance of COVID-19 school immunization requirements.

Sincerely,  
Ron Martinsen

I OPPOSE WAC 246-100 rule that would expand any authority to involuntary quarantine individuals. I oppose adding C-19 vaccine to the WAC schedule for children to attend school.

The vaccine that was approved by the FDA isn't even available in the United States! We the people are entitled to informed consent and having the manufacturers not disclosing the ingredients for 75 years is a major red flag that none of this is in the best interest of public health and safety.

It is Unconstitutional to force people to take an EXPERIMENTAL drug and/or send them to a concentration camp!

I need to voice my concern that it has been brought to my attention some very disturbing allegations . Is it true that there are plans in place to give the State Board of Health power to FORCE VACCINATIONS? And then power to have police arrest and detain people for observing their constitutional right to CHOOSE whether they are vaccinated or not? These allegations and plans are WAY OVER THE LINE of State government. There is so much scientific and medical evidence that Covid vaccines are harmful especially in CHILDREN. It is the Parents ,for children ,and adults individual right and responsibility to CHOOSE their health care. I am watching and holding each individual in Government responsible for their vote and position on this issue.

The Dept. of Health claims to exist for the benefit of the people. Since lying is such a normal part of the political process and healthcare is a political tool are you prepared to lie to the people in the name of healthcare? Of course you are, we see it everyday at the Federal level and they set an example for you. You can have a PhD., smile and lie well. These WACs you are considering Jan. 12 are made by fools with no regard to constitutional rights. People have the choice to put what they want in their body, it is not your decision, not your place to ask, not your place to bully, not your place for anything. Do you understand? The fact that these changes are even being considered showcases the departments lack of sanity and disregard for the law, but you do like that political flavored ice cream, don't you? Going to quarantine people under your false narrative of health? Show me where vaccines have fixed anything except pharmaceutical profits? Be careful what science you follow.

Subject: Please Oppose injections added to school age children

External Email

To whom it may concern,  
I Valentina Harris, oppose the use of law enforcement to be used to detain those who are unvaccinated for covid injections.  
We are not second class citizens. Many of us have natural immunity. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and overall health. These are experimental shots. They are not safe!! It is against the law to mandate them. You will all be held accountable when children will be having life-threatening injuries and side effects. You will be held responsible. All parents will make sure of it.

These vaccines are not safe. They have never been used on humans before. There has been a filing in the International Crimes Court the ICC by Dr Michael Yerdon and others for crimes against humanity by pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus. Vaccinated still get it and spread it. These do not work, they will only harm the children. Please Do the right thing and oppose these WACs from being added to laws.

External Email

I am categorically against any of the proposed Covid-19 policies changes to WA state code. First, mandatory vaccination for school aged children. Children are not even threated by death from Covid. They are 14 times more likely to die from automobile accidents or suicide than from this virus. They are more likely to suffer from adverse reactions and death resulting from the vaccine according to data. The argument that it will prevent transmission and catching the virus has been proven false. They can catch and transmit while being vaccinated. We are seeing this at a massive scale with Omicron. The vaccines are under emergency use authorization and have not been proven to be safe. There have been zero studies on the affects to fertility while the spike proteins are known to have negative effects on female egg production. Subjecting our children to a vaccine that is not proven safe and has known adverse reactions for a virus that does not threaten their lives is nothing more than child abuse.

Secondly, involuntary quarantine is an attack on basic human rights. It is frighteningly similar to Japanese interment camps in World War II and what happened to people of dissenting views in the USSR during Communist rule. Policies like this are a threat to the core of our freedoms and anyone in government positions who promote to subject people to this should be immediately relieved of their positions. You work for the people, and creating fear and isolating people for their views, rights, and personal choices is

constitutionally and morally bankrupt. Thank you for your time.

Subject: Proposed WAC 246-100-040 Change to include covid-19

External Email

Members of Washington State Board of Health:

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Now, the definition for being fully vaccinated will require regular booster shots potentially forever.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the experimental EUO Covid vaccines.

In America, health officers do not have the legal or moral authority to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the legal or moral authority to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Sincerely,

Russell Hensley

#### External Email

I am a Law Enforcement officer in Washington State. My wife is a fire fighter, who is being fired because of the rules this administration has put in place. We are working through that process now, but she has been threatened with arrest if she attempts to render aid to anyone in her jurisdiction if she is not vaccinated. Since the group of unvaccinated fire fighters have been taken off the line, the department is having to Mandate overtime to try to fill positions because so many VACCINATED firefighters still on the line have been sick with COVID. Additionally, multiple fire apparatus have been put out of service due to lack of manpower due to these decisions. Your policies and rules regarding these issues have failed.

I am not anti-vax in that nobody should take a vaccine, but your attempts at removing freedoms and criminalizing people who have a different opinion are a gross overreach of governmental authority. People have a right to choose, and be free from government intervention if they so-choose. Requiring people to take an experimental non-approved vaccine is in direct violation the of Nurenberg Code. And, according to our Constitution, they should be free of search and seizure as part of their freedoms. As an officer, I have spent my entire career working within these rules, and your laws clearly violate that very principle.

Now, you are attempting to go one step further down the same failed path. Washington State is once again attempting to escalate the situation. You are attempting to mandate Quarantine camps for citizens and families, with caveats that allow for separation of families if they are considered to be eligible for "isolation" rather than "quarantine." You are MANDATING law enforcement uphold the quarantine for the camps with such vague language as "suspected of being sick." At this point, with the spread of a cold that is called Omicron, couldn't every person potentially "suspected of being sick" due to the rhetoric being used for "asymptomatic transmission?"

The WAC 246-1 and all the subsequent enforcement and detail codes associated with it, are a complete overreach of government authority. I literally thought it was a complete joke when I first heard what was included thinking there was no way a state that had learned lessons from Japanese Internment Camps could possibly follow the same logic ("It is for the greater good to protect Americans") to enforce camps to imprison people with what is essentially a cold. It is cleverly written in that it does not specifically mention Covid by name, but it is clear the timing and the specifics related to covid (like 10 day quarantine times etc) are aimed specifically aimed at the current "pandemic." Treating this illness like a zombie plague is not helping our state, our citizen's mental health, or the nation as a whole.

This same state government has recently passed the HB1310 which necessitated DE-escalation from law enforcement. In fact, it required de-escalation to the point where we have had to walk away from people that are so mentally ill that they end up killing themselves or someone else because the law was so poorly written that they couldn't decide if "immediate" or "imminent" were the same, or what either term actually meant. In direct contrast to the HB, you are now demanding INCREASED use of force which is inherent in this law. You can't possibly believe that mandating Law Enforcement to enforce quarantine camps won't lead to increased uses of force for unwilling participants in your ill-conceived plan.

The kicker to this whole law is part two of the enforcement mechanism. The way it is written, you are ordering police "MUST" enforce these laws. Part two indicates a violation of this rule would be a misdemeanor, suggesting you could criminally charge law enforcement officers if they don't comply with the unconstitutional rules you are trying to

force upon our citizens and officers. So now, just like my wife, I may be threatened with criminal charges if I don't comply with Washington State's latest scheme.

These laws are Unconstitutional, Hypocritical, Immoral, and Un-American. I have worked my entire career to do good in my community. These laws don't fall anywhere near the definition of "doing good" and you should be ashamed for even proposing these laws. Vote these laws down!

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education \$\$\$ and they can go elsewhere.

I won't lie... the following has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

#### WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050(4) and 70.05.120.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,  
Susan Hastings

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

---

Subject: Need For Cancellation of the State Board of Health's January 13, 2022 Public Hearing

External Email

WASHINGTON STATE BOARD OF HEALTH

P.O. Box 47900

Olympia, Washington 98507-7990

SUBJECT: Need For Cancellation of The January 13, 2022 Public Hearing

Dear Board Members:

You have an upcoming public hearing on January 13, 2022 to consider quarantine policies and procedures relative to COVID 19 and its variants. My wife and I object to the subject matter of this hearing for the following reasons and number 1 is at the top of our list:

1. The Board is very disingenuous in its decision to proceed with a public hearing, when no notice has been given to the citizens of this state relative to the contents of the proposed ordinance/rule amendments. AT THE VERY LEAST, THIS OR ANY PROPOSED ORDINANCE SHOULD BE EASILY FOUND ON THE BOARD'S WEBSITE. If such is posted on the Board's website, it is not easily discovered.

Note: Because the specifics of the rule changes and/or amendments to WAC 246-100-040 or for an adjunct portion of WAC 246-100 or other subsection have not been properly noticed, this January 13, 2022 public hearing must be postponed until such proper notice is given to the citizens of Washington State. Such notice must be published, at a minimum, by the Board on its website, with the complete contents of the proposed rule changes and published by local State Health District agencies in every County of the State of Washington a minimum of 30-days prior to any public hearing held by the State Board of Health.

Even in a subsequently scheduled hearing, if the contents of the proposed rules or amendments to the WAC do not address and/or include the following measures we cannot and will not support such rule making.

2. We are opposed to any measure (read that to mean any and all) ordinance restrictions that would contravene or US and Washington State's Constitutional protected rights! Contravention of our's, an individual's or a group of individual's HIPPA rights is also grounds for opposition.

3. There can be no ability for a Health Officer to compel with the assistance of police, individuals or groups of people to be considered a health threat due to their unvaccinated status. Such a proposed rule or practice has no scientific basis to demonstrate the unvaccinated pose any greater risk to the population than those vaccinated or those

having had supplemental "booster shots." Further, if the Board is going to contend that there is "scientific basis" for their actions to incarcerate/quarantine a person or a group, the Board shall show how that scientific based decision has been collaborated by other scientists who have replicated the results of the science upon which the Board is using to take enforcement action against the will of the individual or group to proceed with quarantine measures. Said collaborated study by other scientists, must have had their work/findings published in either the New England Journal of Science or another national publication of equal reputation.

4. Any rule the State Board of Health might propose, especially one with provisions to support or enforce a Governor imposed mandate for vaccination or quarantine, is unconstitutional on its face as it deprives individuals or groups of individuals of their "due process" rights under both constitutions referenced in No. 2 above.

5. Any rules (existing or proposed) that might penalize a citizen or group of citizens by quarantine in a facility other than that individual's home or their homes, must provide for the immediate challenge in Superior Court or Federal District Court, within 48-hours of notification provided to an individual or group in writing delivered to the individual or group by certified mail (not by phone notification, e-mail or by any social media platforms). If the Superior Court or Federal District Court's schedule cannot accommodate such immediate challenge, quarantine, whether in a home or separate facility cannot commence until the Court hearing can actually take place. NOTE HERE THAT AN "ADMINISTRATIVE COURT OR PROCEEDINGS" SHALL NOT SUBSTITUTE FOR OR BE USED AS A SUBSTITUTE FOR EITHER A SUPERIOR COURT HEARING OR ONE HELD BY A FEDERAL DISTRICT COURT.

6. Any rule of the State Board of Health, whether allowing the enforcement of WAC 245-100-040 as might be implemented by an authorized agent or agency of the Board, or action pursuant to the Governor's mandate that would penalize individuals or groups of individuals by quarantine, must provide for the financial compensation of that individual or group in the amount of a sum of no less than \$400.00 per day, per individual, for every day of quarantine incarceration. Such monetary compensation must have its source in the State Board of Health's budget or in a special appropriation fund set forth by the Washington State Legislature. Failure of the State Board of Health to provide such compensation shall be grounds for suit against the Board in the amount of triple damages for however many days the quarantine lasts or extends.

7. Any individual or groups of individuals that a Superior Court or Federal District Court Judge has determined after a hearing to pose a threat to the general population of a community within or to the population of the State and is to be quarantined in a facility other than the individual's or groups of individual's respective homes shall be immediately released, at the end of a maximum 10-day quarantine stay and transportation provided back to their home or place of residence.

8. Any rule of the State Board of Health, whether allowing for the enforcement of a quarantine of an individual or groups of individuals shall be reviewed by the Washington State Legislature within one year of the Board's adoption of its regulations. The Washington State Legislature shall make findings in their review as to how the rule complies with the Washington State Constitution, weather the rule fairly implements the RCW pertinent to the issue covered in the rule and weather there is any need for the rule to continue to be enforced. Failure of the Legislature to conduct their review accompanied by these three-findings shall make the WAC provision of the State Board of Health null and void. Further, the Washington State Legislature must conduct a "rule compliance review" within two-years of the first review and every two-years after that.

Without the foregoing provisions, i.e., as found in Nos. 2-8 being included in any rule making by the State Board of Health with respect to forced quarantine in a facility other than an individual's home, is a dictatorial edict that takes away the rights of citizens of

this State and cannot stand. Further, if the State Board of Health is proposing to adopt new rules (of any supposed consequence) and has not involved citizens of this State in the review, construction and critique of such proposed rules, it is acting in a dictatorial and disingenuous manner and such rules cannot be considered an action on behalf of the citizens of this State.

Thus, we stand in opposition to this or any other rule proposed or as adopted by the State Board of Health.

Respectfully submitted,

Bill and Sandy Palmer

Dear WA Board of Health,

I am writing to oppose any and all WAC proposals that authorize the Dept of Health to involuntarily detain or sequester those persons who have chosen not to receive the Covid shot..

These proposals are in violation of the basic human right to choose one's own medical care

I request that any WAC suggestions permitting or requiring such measures receive no consideration of action by the WSBOH.

.

Sincerely,

William Singleton

to: Washington State Board of Health

I strongly, yes, vehemently object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. In any case, it is survivable more than the common flu.

Including Covid vaccines as a requirement for attending public school is completely unnecessary, and overwhelmingly restrictive! Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines, and from the paucity of human socialization in their education when so little facial response is possible.

In America, health officers DO NOT HAVE THE RIGHT to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

This is not about our health; it appears to be a criminal attempt for the government to control the population. Those who are proposing this plan are following a very dangerous and unconstitutional agenda given by those who desire to keep the public under fear and in agreement with the current "woke" narrative, apparently for financial gain, through closeted collaborations with the large pharmaceutical companies.

As an educator, I care deeply about the growth and development of our younger members of society! They are suffering enough already from the draconian measures which have created far worse statistics in crime and suicide than we have ever known. I have personal knowledge of the rise in suicides-more children have died from these than from Covid.

PLEASE think intelligently about the outcomes you could be creating!!

Sincerely and sorrowfully,

SHARYN PETERSON

Subject: WAC CODES INCLUDING COVID19 FOR WA RESIDENTS

External Email

To whom it may concern,

I am writing in regards to the meeting coming up on January 12, 2022 pertaining to the WAC codes which include covid19 and are threatening to lock us up if we do not comply with Covid testing and vaccine mandates. I am not only a Washington state resident but I am also a concerned American citizen and I must say that I reserve every right under our U.S. Constitution. These WAC codes are ridiculous and these codes DO NOT override our Constitutional rights!

I feel the need to remind our tyrannical wannabe dictator Jay Inslee AKA Hitler 2.0 of our rights to bear arms and form militias to defend ourselves and our loved ones from a government that seems hellbent on socialism and communism and wants to control us all. Well, WE THE PEOPLE will not stand for any of this and YOU WILL LOSE if you try to infringe on our constitutional rights as American citizens which not only protect us, but allows us to defend ourselves from any tyrannical government. Back off... and do it now! We know covid19 had a 97% survival rate, we know that these vaccines are doing more harm than good and many people still get Covid after being fully vaccinated and most hospitalized with Covid right now have gotten vaccinated. We are not stupid! This entire "plandemic" was never about a coronavirus, it is about this "Great Reset" to bring in a New World Order. Australia has already admitted they are doing this! We will NEVER comply! This is America! You want a war? You will get one if you start forcibly locking people up against their will for exercising their right to choose! We know all about the patents for these vaccines going back to 2000, there are tons of patents for covid19 prior to damn plandemic even starting! We are not brainwashed by the mainstream media machine which is pushing all the lies and fear surrounding Covid. We are free thinkers, we are patriots, we will never bow to tyranny or anybody trying to violate our Constitutional rights. Better think long and hard about what you are doing, you will not like the consequences! I expect my message to be included in this upcoming meeting on January 12th.

Signed by  
A very pissed off American citizen

This wide-open transferal of constitutional protections to others with nebulous criteria for exercising that authority to basically disappear people, has constitutionally minded liberty-loving Americans to ask - what's the big deal you think you need to trash liberty and even rule of law for?

What are you so afraid of and on what basis; fear itself manufactured by you and for you?

You are not solving any actual problem but are creating a climate of distrust - and deservedly so. Quit trying to be the people's savior. We already have that position filled.

Subject: Proposed WAC amendments

External Email  
To the Board:

I can't begin to say how vehemently opposed to your proposals regarding using law enforcement to detain people for quarantine and mandating the Covid vaccination for schoolchildren. The first thing I think about is Nazi Germany and how this will turn Washington into a 21st century Nazi state. This 'forced detention' didn't sit well in Australia either - we all saw how that got out of hand by involuntary placement of people in quarantine if they knew someone who had Covid. Don't think it'll happen - think again because this is the path you're going down.

What law enforcement are you going to get to enforce this? Defunding the police has already stripped our cities of needed law enforcement. Crime is rampant and you want to take the police away from that to put people in quarantine? Think about what you are saying.

I could go on, but this nonsense MUST STOP! No more! Gov Inslee's emergency powers need to be revoked and these proposals need to be stopped. We don't live in a police state - we live in a free nation to choose as you will. Why do you want to take that away from everyone. It's a slippery slope you're going down.

Sincerely,

Tim Gremlinger  
Pierce County

Subject: Wa State Board of Health Jan 12th Mtg

External Email

To whome it may concern,

I am a King County resident writing regarding the January 12th meeting of the WA State Board of Health.

Please DO NOT add Covid-19 to the current infectious disease list applicable to WAC 246-100-045, WAC 246-100-940, WAC 246-100, WAC 246-105. I believe these proposed policies a vast over reach, violate our rights as American citizens and go against medical freedom.

I especially oppose adding the Covid-19 gene therapy (referred to as "vaccine") to the lists of requirements for children to enter public school, based on the following reasons:

1. The long term safety is unknown.
2. What IS known is that the spike protein migrates to various places in the body, causing a variety of conditions, as seen in the increase in myocarditis & nervous system issues.
3. Children are not at high risk of dying from the disease.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

4. Immunity from these shots is waning, but immunity from natural infection is not.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Facademic.oup.com%2Fcid%2Fadvances%2Fdoi%2F10.1093%2Fcid%2Fciab884%2F6381561&data=04%7C01%7Cwsboh%40sbh.wa.g>

5. "Vaccinated" children can still spread the disease to others.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

6. Pre-pubescent medications often have unexpected impacts on various body systems, and so need to be well studied prior to approval. This has had no long-term safety studies.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscience>

7. The effect on reproduction is unknown. What IS known is that these shots often affect women's menstruation, and menstruation affects fertility.

8. There is another way. There are many other treatment options available.

The negative impact that this would have VASTLY outweighs the possible benefits. Please do what is right for the future of America. DO NOT add Covid-19 to this infectious disease list.

Thank you for your consideration.

To Whom it may concern,

I STRONGLY OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I OPPOSE COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

To Washington State Health Board,

Please see attached documents outlining the violations under the Nuremberg Code established under International Law. The Covid Vaccine is an experimental Gene Therapy so called vaccine. Therefore, if consent by individual is not given all officials that help pass this will be in violation of the Nuremberg Code under International Law. They can be found guilty and appropriate punishment can be the same as the Nazi's received after WWII.

**Count 7. 15 U.S.C. § 19 – interlocking directorates**

**Count 8. 18 U.S. Code § 2384 - Seditious conspiracy**

### The Proposed Indictment

Throughout the decade of the 90s Pfizer sought to research, develop and patent a coronavirus (CoV) vaccine. Their first patent filing specifically recognizing the S-protein as the immunologic target for vaccines was filed on November 14, 1990 (U.S. Patent 6,372,224). With a focus on swine and canine gastroenteritis, these efforts showed little commercial promise and the patent was abandoned in April of 2000. During the same period, the National Institute for Allergy and Infectious Disease (NIAID) under the vaccine obsession of Dr. Anthony Fauci, funded Professor Ralph Baric at the University of North Carolina Chapel Hill. This program designed to commercially weaponize a naturally occurring toxin is the beginning of the criminal conspiracy and **violates 18 USC § 175, 15 USC § 1-3, and 15 USC § 8** Dr. Baric's expertise was understanding how to modify components of the coronavirus associated with cardiomyopathy. NIAID Grants AI 23946 and GM63228 (leading to patent U.S. 7,279,327 "Methods for Producing Recombinant Coronavirus") was the NIH's first Gain-of-Function (GOF) project in which Dr. Baric created an "infectious, replication defective" clone of recombinant coronavirus. This work clearly defined a means of making a natural pathogen more harmful to humans by manipulating the Spike Protein and other receptor targets. A year after filing a patent on this GOF CoV, the world experienced the first outbreak of Severe Acute Respiratory Syndrome (SARS).

Under the guise of responding to a public health emergency, the United States Centers for Disease Control and Prevention (CDC) filed a patent application on the genome of SARS CoV on April 25, 2003. Accessing and manipulating the genomic data (which came from China making an “invention” claim by a U.S. entity illegal **violating 35 USC §101, 103**), Dr. Baric, Dr. Fauci, and the CDC **violated 18 USC § 175** (a felony). One year earlier, Dr. Baric and his team had already filed a patent which clearly the pathogen CDC claimed as novel in 2003. Three days after filing a patent on the genome, NIH-funded Sequoia Pharmaceuticals filed a patent for the vaccine on the virus invented a mere three days earlier. At the same time, in **violation of 15 USC § 19** Dr. Fauci was appointed to a board position with the Bill and Melinda Gates Foundation (a competitor in vaccine manufacturing) thereby beginning the interlocking directorate<sup>1</sup> anti-trust crime.

In 2005, the DARPA and MITRE hosted a conference in which the intentions of the U.S. Department of Defense was explicit. In a presentation focused on “Synthetic Coronaviruses Biohacking: Biological Warfare Enabling Technologies”, Dr. Baric presented the malleability of CoV as a biological warfare agent. **Violating 18 USC § 175** and inducing the non-competitive market allocation (**violating 15 USC § 8**) for years to follow, Dr. Baric and the U.S. Department of Defense spent over \$45 million in amplifying the toxicity of CoV and its chimeric derivatives.

From 2011 until the alleged COVID-19 pandemic, Dr. Fauci has routinely lamented about the inadequacy of public funding for his vaccine programs and the public’s general unwillingness to succumb to his insistence that everyone MUST be vaccinated against influenza. Despite repeated appropriations to advance vaccine dependency, his efforts have been largely unsuccessful. NIAID – under Dr. Fauci’s direct authorization – encouraged UNC Chapel Hill and Dr. Baric’s lab to ignore the GoF moratorium in a letter dated October 21, 2014. At that time, Drs. Fauci, Baric and EcoHealthAlliance’s Peter Daszak were in possession of an extremely dangerous Chinese pathogen identified a year earlier in Wuhan.<sup>2</sup>

While many illegal acts were committed by the conspirators leading up to 2015, the domestic terrorism program (**in violation of 18 USC § 2339**) was announced by NIAID-funded Daszak at the National Academy of Sciences. Here, he announced what was to become the domestic and global terrorism event branded COVID-19.

---

<sup>1</sup> We note that gain-of-function specialist, Dr. Ralph Baric, was both the recipient of millions of dollars of U.S. research grants from several federal agencies and sat on the World Health Organization’s International Committee on Taxonomy of Viruses (ICTV) and the *Coronaviridae* Study Group (CSG). In this capacity, he was both responsible for determining “novelty” of clades of virus species but directly benefitted from determining declarations of novelty in the form of new research funding authorizations and associated patenting and commercial collaboration. Together with CDC, NIAID, WHO, academic and commercial parties (including Johnson & Johnson; Sanofi and their several coronavirus patent-holding biotech companies; Moderna; Pfizer; Merck; BioNTech; AstraZeneca; Janssen; Ridgeback; Gilead (Dr. Baric’s alter ego); Sherlock Biosciences; and others), a powerful group of interests constituted what are “interlocking directorates” under U.S. anti-trust laws. Further, most of these entities, including the Federal Government ones **violated 35 USC § 200-206** by failing to disclose Federal Government interest in the remedies proposed.

These entities were affiliated with the WHO’s Global Preparedness Monitoring Board (GPMB) whose members were instrumental in the Open Philanthropy-funded global coronavirus pandemic “desk-top” exercise EVENT 201 in October 2019. This event, funded by the principal investor in Sherlock Biosciences (a beneficiary of the SARS CoV-2 EUA for CRISPR technology) and linking interlocking funding partner, the Bill and Melinda Gates Foundation into the GPMB mandated a respiratory disease global preparedness exercise to be completed by September 2020 and alerted us to anticipate an “epidemic” scenario. We expected to see such a scenario emerge from Wuhan or Guangdong China, northern Italy, Seattle, New York or a combination thereof, as Dr. Zhengli Shi and Dr. Baric’s work on zoonotic transmission of coronavirus identified overlapping mutations in coronavirus in bat populations located in these areas.

<sup>2</sup> By October 2013, the Wuhan Institute of Virology 1 coronavirus S1 spike protein was described in NIAID’s funded work in China. This work involved NIAID, USAID, and Peter Daszak, the head of EcoHealth Alliance. This work, funded under R01AI079231, was pivotal in isolating and manipulating viral fragments selected from sites across China which contained high risk for severe human response. (Ge, XY., Li, JL., Yang, XL. *et al.* Isolation and characterization of a bat SARS-like coronavirus that uses the ACE2 receptor. *Nature* **503**, 535–538 (2013).) The GoF work NIAID allowed to persist in the face of the moratorium was Dr. Baric’s work with this pathogen

***“...until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated.”<sup>3</sup>***

It is not surprising that one year later NIAID’s funding paid off with Dr. Baric’s lab announcing that the Wuhan-derived pathogen was “poised for human emergence”.<sup>4</sup>

Knowing that the U.S. Department of Health and Human Services (through CDC, NIH, NIAID, and their funded laboratories and commercial partners) had patents on each proposed element of medical counter measures and their funding, Dr. Fauci, Dr. Gao (China CDC), and Dr. Elias (Bill and Melinda Gates Foundation) conspired to commit acts of terror on the global population – including the citizens of the United States – when, in September 2019, they published the following mandate in **A World At Risk**:

*“Countries, donors and multilateral institutions must be prepared for the worst. A rapidly spreading pandemic due to a lethal respiratory pathogen (whether naturally emergent or accidentally or deliberately released) poses additional preparedness requirements. Donors and multilateral institutions must ensure adequate investment in developing innovative vaccines and therapeutics, surge manufacturing capacity, broad-spectrum antivirals and appropriate non-pharmaceutical interventions. All countries must develop a system for immediately sharing genome sequences of any new pathogen for public health purposes along with the means to share limited medical countermeasures across countries.*

*Progress indicator(s) by September 2020*

- *Donors and countries commit and identify timelines for: financing and development of a universal influenza vaccine, broad spectrum antivirals, and targeted therapeutics. WHO and its Member States develop options for standard procedures and timelines for sharing of sequence data, specimens, and medical countermeasures for pathogens other than influenza.*
- *Donors, countries and multilateral institutions develop a multi-year plan and approach for strengthening R&D research capacity, in advance of and during an epidemic.*
- *WHO, the United Nations Children’s Fund, the International Federation of Red Cross and Red Crescent Societies, academic and other partners identify strategies for increasing capacity and integration of social science approaches and researchers across the entire preparedness/response continuum.”<sup>5</sup>*

As if to confirm the utility of the September 2019 demand for “financing and development of” vaccine and the fortuitous SARS CoV-2 alleged outbreak in December of 2019, Dr. Fauci began gloating that his fortunes for

<sup>4</sup> Menachery VD, Yount BL Jr, Sims AC, Debbink K, Agnihothram SS, Gralinski LE, Graham RL, Scobey T, Plante JA, Royal SR, Swanstrom J, Sheahan TP, Pickles RJ, Corti D, Randell SH, Lanzavecchia A, Marasco WA, **Baric RS**. 2016. SARS-like WIV1-CoV poised for human emergence. **Proc Natl Acad Sci U S A**. 2016 Mar 14. pii: 201517719

<sup>5</sup> [https://apps.who.int/gpmb/assets/annual\\_report/GPMB\\_annualreport\\_2019.pdf](https://apps.who.int/gpmb/assets/annual_report/GPMB_annualreport_2019.pdf) (page 8)

additional funding were likely changing for the better. In a February 2020 interview in **STAT**, he was quoted as follows:

*“The emergence of the new virus is going to change that figure, likely considerably, Fauci said. “I don’t know how much it’s going to be. But I think it’s going to generate more sustained interest in coronaviruses because it’s very clear that coronaviruses can do really interesting things.”<sup>6</sup>*

In November 2019 – one month before the alleged “outbreak” in Wuhan, Moderna entered into a material transfer agreement – brokered by the Vaccine Research Center at NIAID (at which UNC Chapel Hill alum Dr. Kizzy Corbett worked) – to access Dr. Baric’s Spike Protein data to commence vaccine development. In his own written statement obtained by the **Financial Times**, he refers to this agreement as being the foundation for the mRNA Moderna vaccine.<sup>7</sup>

To finalize the nature of the racketeering and anti-trust criminal conspiracy, when it came time to commercialize the NIH and DARPA owned spike protein and pass it off as a “vaccine” (in conflict with the standard for vaccines in statutory and scientific application), the Operation Warp Speed contract was awarded to DoD contraction ATI, a subsidiary of ANSER. In a graph reminiscent of the anti-trust hearings at the formation of the Clayton Act in the early 20<sup>th</sup> century, the identity of the interlocking conflicts of interests are presented in graphic relief. It is with no surprise that the result of this price-fixing conspiracy was the enrichment of the conspiring parties and the harm of consumers.

<sup>6</sup> <https://www.statnews.com/2020/02/10/fluctuating-funding-and-flagging-interest-hurt-coronavirus-research/>

<sup>7</sup> <https://pubmed.ncbi.nlm.nih.gov/32756549/>

Indeed, *the money followed the hype* and they *used the hype to get to the real issues*. *Investors follow where they see profit at the end of the process*.

And real Americans are dying each day because a criminal organization unleashed terror resulting in the deaths of Americans.

**18 U.S.C. § 2331 §§ 802 – Acts of Domestic Terrorism resulting in death of American Citizens**

**Pub. L. No. 107-52 expanded the definition of terrorism to cover "domestic," as opposed to international, terrorism. A person engages in domestic terrorism if they do an act "dangerous to human life" that is a violation of the criminal laws of a state or the United States, if the act appears to be intended to: (i) intimidate or coerce a civilian population; (ii) influence the policy of a government by intimidation or coercion;**

Every single Act, the declaration of the State of Emergency, the Emergency Use Authorization, the fraudulent face masks, the business closures, and the OSHA and CMS vaccine mandates are ALL admitted by the conspirators to be acts to coerce the population into taking a vaccine. Further, these acts disrupted the democracy of the United States of American and resulted in the violation of 18 USC § 2384. The conspirators announced it in 2015, then prepared the pathogen in 2016, and laid out the terror campaign in September 2019. And now they profit from the death of Americans.

# THE NUREMBERG CODE

1. The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study, that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted, where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment, the human subject should be at liberty to bring the experiment to an end, if he has reached the physical or mental state, where continuation of the experiment seemed to him to be impossible.

10. During the course of the experiment, the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgement required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

["Trials of War Criminals before the Nuremberg Military Tribunals under Control Council Law No. 10", Vol. 2, pp. 181-182. Washington, D.C.: U.S. Government Printing Office, 1949.]

Subject: Survey Response: Testify Online \*

The following survey response is submitted:

1.

State Board of Health Meeting Date:

---

January 12, 2022

2.

Agenda Item or Issue:

---

vaccine mandates and quarantine camps

3.

Your Name:

---

Julie Oline

4.

Do you have a professional title?

2. No

5.

Are you representing an organization?

2. No

---

Oline Properties

6.

Address:

---

3220 E Mason Lake Dr. W Grapeview

7.

Email:

---

juliebritto@comcast.net

8.

Phone Number (Include Area Code):

---

3608705161

9.

Do you have any special expertise relevant to this topic?

2. No

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Allowing local health officers to use law enforcement to arrest a person or families who do not wish to be vaccinated and haul them off to a quarantine camp.

11.

Are you Pro or Con on the proposal?

2.           Con

---

Do you know that proposing to "allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling or vaccination" is illegal under federal law? Are you willing to violate the US Code of Regulations? US Code 21 of federal regulations section 50.23 and 50.24 states that it is illegal to make anybody participate in an experimental program using coercion. Are you willing to violate US code 18, Section 2331 subsection 802? Are you willing to commit this felony which has a penalty of a 99 year prison term? Do you know that according to the CDC the COVID vaccine will NOT prevent infection or transmission of COVID? Do you know that according to the CDC and FDA the covid vaccines pose risks of myocarditis, blood clotting, neurological damage and death? Do you know that the American Heart Association states the vaccines pose a dramatic risk of inflammation of the heart? Therefore, the vaccines are not safe and it is illegal to mandate them or force them upon the citizenry of our state. And it is illegal to punish or harm in any way any citizen who refuses to be vaccinated. The government has no role or right to take away the health care rights of its citizens. The government can inform. The government can encourage. But the ultimate choice for health care resides with each individual citizen and not the government.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105

Thank you,

Dear State Board of Health,

We are opposed to extending or enacting in any way Chapter 246-100 WAC regarding communicable and other certain diseases.

We are opposed to furthering any state of emergency or enabling any certain powers of either state or local health officials to do anything or enforce any action against an individuals will. This is completely unconstitutional and absolutely unethical.

Please consider this opposition and note it in the record.

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. ++++++ Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. ++++++

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. ++++++ This is not about +our +health;+ +it ++++++is +an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: WAC 246-100-040 --- Nuremburg Code Violation --Covid19 & Variants

External Email

To Whom It May Concern:

We the free and united people of America and the world are writing in regards to the unlawful and corrupt actions taken by the healthcare industry, bureaucrats, and media regarding COVID-19. The actions taken for nearly two years now have stripped people of their rights, decimated the US Constitution, violated the principles of international law embodied in the Nuremburg Code, and ignored basic and inalienable human rights. The people behind this have leveraged their privileged positions to make billions of dollars at the expense of humanity and we are unwilling to allow this to continue.

For decades, the field of public health has researched the use of fear as a tool to manipulate people into action. The use of that tool has now been perfected and implemented against the people of the world with COVID-19. Evidence of this knowledge can be found in a CDC presentation, other DHHS materials, and in numerous academic journals. The intentional use of fear to sow hate, division, and discord is unethical, unacceptable, and must stop immediately.

The reality is that COVID-19 has a 99%+ recovery rate in most of the population and approximately a 94% recovery rate in the most vulnerable. Compare this to the original SARS which had approximately a 9% case fatality rate and the original MERS which had over a 30% case fatality rate. We did not lockdown, mask, or even widely acknowledge these diseases when they were prevalent despite the fact that they had similar rates of spread to COVID-19.

This fear has been used as a marketing tool to attempt to justify previously unthinkable actions by bureaucrats and public health figures around the world; the most egregious of which is the forced injection of gene therapy drugs into healthy people. Gene therapy literally alters the genetic makeup of a human being and simply cannot legally, morally, or ethically be forced on anyone, ever. If the decision to alter one's own genetic makeup does not rest with the individual then there can be no argument that freedom is lost.

Not only are the COVID "vaccines" admittedly a gene therapy, they are inarguably unsafe. The swine flu vaccine was pulled from the market after just over 20 deaths, the Chevy Volt was recently recalled over the potential for battery fires, but the Pfizer shot was given expanded authorization despite the high recovery rate from COVID-19 and the

fact that Pfizer's own documents, submitted to the DHHS show that over 1200 people died in less than the first 3 months of authorization. This is nothing more than corruption.

The COVID shots are also ineffective. A recent Department of Defense document stated that 71% of new cases of COVID-19 in the Medicare population are in fully vaccinated individuals and 60% of hospitalizations are in the fully vaccinated. This same document also stated that the injections are even less effective in North American Natives, Hispanics, and "Blacks" (the document apparently was unconcerned with political correctness). If the "vaccines" do not stop the spread, do not stop hospitalization, alter our genes, and have not even existed long enough for long term testing, why are we attempting to violate people's inalienable rights by forcing them?

The fact is that we are now moving ahead as quickly as possible with these COVID shots. We are even authorizing them in children despite the fact that people under 30 are at ZERO statistical risk of death from COVID-19 and the shots appear far more dangerous to children than the disease. Further, we are doing this with no transparency. The DHHS has done everything possible to cover up the side effects and dangers of these injections, even going so far as to request 55 years to release the documents they relied upon to authorize/approve these deadly injections. How can informed consent be given without a true understanding of the risk?

This situation is untenable and we demand that it be remedied. We the free people of this nation and world will no longer comply with mandates that fail to consider our inalienable rights. In the spirit of Martin Luther King, Gandhi, and Jesus Christ we will spread our message through peace and we will resist peacefully, but make no mistake, we WILL resist. The accompanying presentation found at [www.renz-law.com](http://www.renz-law.com) supplies you with additional data to demonstrate everything stated here.

We now demand the following from our elected leaders, and vow to remember your actions or inaction when it comes time to vote and donate:

1. The resignation/termination of Anthony Fauci and civil/criminal investigation of his actions by a truly INDEPENDENT prosecutor;
2. The criminal and civil investigation of those involved with any gain of function research that may have been responsible for the creation of SARs-COV2;
3. Investigations – criminal and civil – into the deceptive and misleading push for the gene therapy injections that have been falsely labeled as vaccines (only after the definition of "vaccine" was changed);

\* This should include RICO and fraud claims (as is appropriate) involving the "Trusted News Initiative", the drug companies, hospital systems, and some government actors;

4. Transparency legislation that gives the public immediate access to the raw data and submitted documents related to the shots and COVID "pandemic" – If there is nothing to hide NO ONE should oppose transparency;

\* This should be passed on the state level as well;

5. Liability for injury from vaccines under the same rules as any other product – if they are safe there should be no opposition to liability to help those that have been injured;

6. Legislation that recognizes the absolute right to reject medical treatment or vaccination of any type for ANY reason;

7. NO funding or state/federal contracts with ANY organization that discriminates based on vaccination or health status;

8. Funding for the hundreds of thousands of individuals injured by job loss and "vaccine" injury;

9. NO on vaccination status tracking legislation; and

10. Our local law enforcement to uphold their oaths to uphold the Constitution and refuse to enforce unconstitutional mandates and rules.

Dear Ms Pskowski,

I am writing to express my grave concern about the forced quarantine and counseling for members of the public using their own free will not to participate in the experimental vaccines currently offered for Covid 19 and forced vaccinations for children. My concerns about rolling out such a draconian policy that violates the fabric of this country's founding principles are many.

One of my largest concerns is that in watching the vaccines be given out over the last year, it is clear that they are not working. Almost half of the infection rate of Covid patients are already vaccinated. States with higher vaccine rates do not experience lower Covid rates. People who are fully vaccinated are not stopping the transmission of Covid either. It is also not proven to be a safe vaccine. People suffer at a higher rate from complications from the vaccine than they do from Covid itself. Forcing people to get vaccinated is clearly about power and submission, not about preserving public health. Statistically, children have a higher chance of dying or having an adverse reaction to the experimental Covid vaccine than they do from contracting Covid itself. At this point in history, many of the children you propose to force vaccinate have already had Covid and have valuable antibodies. Allow parents to choose what is the best decision for the individual health of their children, not the state.

As a mother, I know my children more intimately and fully than any health care professional, and certainly more than the state. I have witnessed their growth and development since I first felt them in my womb. I choose to make decisions for my children's health with information and discussion from professionals, not by coercion and fear. Inform parents and respect their rights and their timing to make the decisions necessary for protecting their families. Protecting that sacred right of a parent is a paramount responsibility of an elected official and member of public education. I know this well as a former public elementary school teacher. Please protect children's health, respect the fiber of the Washington family and protect democracy by fighting against the proposal to force vaccinations on children and force quarantine on non complying families.

To Whom It May Concern:

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105.

Sincerely,  
Sandy Barber

Subject: NO on Unconstitutional Vaccine Agenda

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable. Moreover, more than 99 percent of the population survive. Covid vaccines have little effect on Covid, and in fact, most people who get Covid and spread it have been fully vaccinated, some have even received booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee.

These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Lynn Seulean

Subject: [STMHE] ACT THIS MORNING against tyrannical WA proposal

External Email

Good Afternoon,

It has come to my attention that some very alarming public policies are being proposed by the Washington State Board of Health regarding current infectious disease codes for COVID-19. I have a number of questions and comments that I hope can give us some perspective on the folly of the proposed application of these codes and finish with a comment on my conscience should this policy be enacted.

1) The first question that I have relating to WAC 246-100-045 is how and in what instances have we utilized this policy since it went into effect in 2003? The language used in the code is vague enough that there seems to be little definition on the severity of what an "infectious" disease is; disease is after all almost by definition infectious. Is it the death rate that determines the quarantine requirements? If so why have we not felt the need to enact this principle for the flu in years gone by? Is it the lack of medicine or treatments for a new illness? No we have had several treatments, vaccines and therapeutics that have been effective in diminishing the severity of COVID-19. Ultimately, what are our criteria for the implementation of this policy in regards to the COVID-19 virus? We have multiple diseases and outbreaks that this has not been necessary for and I for one do not trust that those tasked with enforcement would be able to apply an objective criteria that makes any sense.

2) Second, we have had two years to observe globally the effectiveness of quarantines, lockdowns, etc... in mitigating the spread of this virus. Do we honestly believe that forcing people into quarantine camps as they do in Australia will stop the spread of a disease that is global? Have we forgotten the pictures out of Wu Han of people being welded into their apartment buildings to slow or stop the spread of the virus? The disease persists and has not been deterred by our efforts to stop it. I have had this disease and my family and my extended family. We are none the worse for wear and I believe most people would agree that this state of fear and uncertainty is unsustainable. We need to live life and the risks posed by this virus do not justify the response we have submitted to. Much as we might try to mitigate or ignore this fact, we face death every day and yet we choose to live life according to each person's needs and concerns. In the reality we face of being unable to stop this virus in any meaningful way, each person should be free to respond in the manner they believe will meet their needs.

3) I noticed that the vaccination status was included in the wording of the proposed policy. Oddly enough it was the last in the list of items mentioned as things that could be requested my law enforcement; well last is not least as they say. The question before nearly every policy in this regard has been the pressure to get vaccinated. We have recorded the highest "cases" (life threatening or not) that we have ever had. The numbers that have been recorded of hospitalizations with COVID show us that those who have had the shot are still getting sick and are still getting hospitalized. I asked this question a number of years ago when there was a small outbreak of Measles in the state of Washington. If only those who choose not to get the vaccine are getting sick then why is everyone else worried about it? If on the other hand those who are getting the vaccine are worried because they are still at significant risk, then what is the point of having a vaccine in the first place? For a state that purports to be such an inclusive bastion of diversity of thought and accommodation for individual lifestyles, it is shocking the abuse that has taken place towards those who have the right to make their own decisions regarding their healthcare.

4) Apart completely from the effectiveness of the vaccine is the simple intrusion on our rights as citizens. There has been no consideration of medical privacy laws, the rights of citizens to litigate drug companies for harm done, there has not even been the right of full consent for the vaccine relating to the requirement to inform patients of effects of the drug, its contents or even the fact that we simply do not know the long term effects. To add injury to insult, we now have this excrement of a proposal by an unelected body of political appointees to force our local law enforcement to potentially incarcerate their neighbors in what I can only imagine is not a local area if the reports I have read about the various quarantine facilities being prepared around the state of Washington is true.

5) Finally, and as I said last is not least, there is the state of our children's health and well-being. We have seen across the world, that our children are not at risk for this virus in any meaningful way. What do I mean by any meaningful way? As of November of 2021, the total number of deaths in children under the age of 16 in the US due to COVID-19 was under 500. To put that in perspective your child is more likely to die from a dog attack than from COVID-19. Even more shocking, there has been no fatality linked to transmission of COVID-19 between students in school. There have been several transmissions linked to teachers passing the virus to other teachers, but that is a nonissue for the requirement of vaccinations and masking in our school system. If this policy is to be expanded to include COVID-19 as regards to our children I would first insist from our Governor, who loves data so much, for some concrete numbers on risk and effectiveness of the proposed mitigation policies. Not projections, not models, not predictions from our experts; we have more than enough experience at this point with lockdowns and masking that we should have some real data to make our decisions. If we don't, perhaps we need to get some new experts.

Speaking from my conscience now if this policy is enforced and enacted, I am very torn as to what I think we should do about it. I would encourage every possible litigation against the state of Washington; I would support in every way I am able law enforcement who refuses to obey the edicts of our Board of Health; I would grieve for my beautiful state that has allowed itself to fall into a tyranny of fear. It is evil that turns a person on his neighbor and that is what our policies are doing to us. I will try to love my neighbor in my very imperfect way, but I will resist with every fiber of my being he who would seek to turn me against my neighbor.

Blessed New Year to you All,

Riley James Workman

---

To the WA State Board of Health, These are my oppositions to your action items on the current or future agendas: 1) I oppose COVID Vaccination mandates on children. Children are not threatened to the degree that warrants a COVID Vaccination. Also, the present COVID vaccinations that are available DO NOT prevent transmission. They are more akin to being a medication that lessens the severity of the COVID symptoms. Please instead, concentrate on treatments and therapeutics, because COVID is here to stay just like the flu. 2) I oppose the state enacting quarantine and isolation tactics against people that have COVID. COVID is now so prevalent like the cold that we are all exposed to it. It has a high survival rate.

Washington State Board of Health,

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!  
Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.  
In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: AGAINST ALL Covid proposed policies

External Email

To whom it may concern,

I am completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of Washington state education is in store if this becomes mandatory.

Best regards,  
Sidney Simmons

I am completely against ANY of the Covid Policies that are over reaching and immoral. Of which they most certainly ALL are. I stand against any and all of these WAC's. Words like mandate seem to be more accurately described as dictates, deriving from the words dictatorship/ dictatorial/dictator. If Jay Inslee can "dictate" to the WA State Board of Health, such mandates, cleverly disguised as dictatorial, we have a serious problem on our hands. These, said, mandates, are an infringement on the rights of every Washingtonian, young and old. Forcing such mandates is incredulous. Who does these things? Think WA-BOH members, long and hard, before you cast your vote on January 12, 2022. Setting aside the intense pressure from Governor Inslee, you most likely are experiencing, please, THINK for yourself, I beg you! Don't fall into line and succumb to political & dictatorial pressure from the powers that be. The potential for unleashing the "Pandora's Box" of Civil-Unrest, will be the likes of protest you, me, and the residents of Washington, have never witnessed. Listen, please, to us! We, the people of Washington State, absolutely stand against these WAC's.

WAC 246-100, WAC 246-105, WAC 246-100-070, WAC 246-100-045, WAC 246-040  
PLEASE consider this a plea from a residing Washingtonian for 46 years.

Sincerely,

M.Teresa Vinup

Please do not allow this to happen. WE the People do not consent!! Please do not vote yes for the following to be made into law:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

We need to come together and stand up for our privacy and medical freedom.

In response to these outrageous proposed policies:

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

To Whom It May Concern,

It is outrageous that this is even being considered (for a "virus" with a near 100% survival rate). I put that in quotes because evidence suggests Dr. Fauci helped create it in a Wuham lab which could suggest purposeful intent. Your efforts should be focused there. Plus, these jabs do not work. The double and triple jabbed are still getting infected and spreading/shedding it. This "pandemic" is of the vaccinated.

We citizens of Washington and of these United States of America have constitutional, God-given rights that you cannot alter. Anyone who took an oath to uphold and defend these constitutional rights should be prosecuted to the full extent of the law.

all of these listed above are reckless abuse of power. And you all know that. I do not need anyone to keep me safe from a flu virus, the vaccines have proven that they do not prevent the spread, they do nothing, they should not even be called vaccines, and also they are not even approved by the FDA for use in anyone. Look at the data out there, cruise ships have had cruises that are fully vaxxed and hundred on board have gotten the so called flu. There are plenty of therapeutics out there, but it appears no one wants to prescribe them for fear of getting their medical license pulled.

It also just came out that masks do Not work, why are our children still wearing them????? We all know the truth~

All of these measures you want to implement are Draconian fascist policys.

Our once beautiful state ran by a governor that thinks he and the government knows what is best for me, why not focus on

Washington States real issues, instead of taking everyones freedoms away for a cold/flu~

The variants are mild that is also fact~ WHY ARE YOU WANTING TO IMPLEMENT THESE MEASURES WHEN ILLEGALS ARE COMING INTO OUR

COUNTRY WITHOUT BEING VETTED FOR DISEASE, AND FLOWN AROUND THE COUNTRY AND DROPPED OFF~

This is all an ABUSE OF POWER ~ IT NEEDS TO STOP AND IT NEEDS TO STOP WITH YOU ALL!

I CHOOSE WHAT GOES IN MY CHILDRENS BODYS AND MY OWN NOT THE GOVERNMENT!! QUIT BULLYING PEOPLE INTO THIS TO KEEP THEIR JOBS~ Its is unethical and against the CONSTITUTION OF THE UNITED STATES~ IF YOU LOOK IT UP.

THE NUREMBERG CODE (1948) DOES THAT RING A BELL?? ALL THOSE PUSHING THE COVID 19 ILLEGAL VACCINE ARE IN VIOLATION AND ARE SUBJECT TO ARREST

ALL WHO VIOLATE THE CODE ARE ALSO SUBJECT TO OTHER PENALTYS~

I PRAY YOU STICK TO YOUR OATHS TO THE CONSTITUTION AND TO THE PEOPLE IN THE STATE OF WASHINGTON NOT TO IMPLEMENT ANY OF THESE CODES AND HOPE YOU COME TO YOUR SENSES ABOUT MASKING OUR CHILDREN~ YOU WILL ALL BE HELD ACCOUNTABLE! CRIMES AGAINST HUMANITY.

T HANNING

Hi,

I am writing to provide a comment for the Jan 12th meeting discussing applying current infectious disease WAC codes to include Covid for all WA state residents. I and my family stand fully against these proposals, which are over-reaching and deeply immoral. Individuals should have full medical autonomy and decision making responsibility for their medical examinations, testing, treatment, counseling, and vaccination. These are areas of responsibility that should never fall under the government's jurisdiction. It is grievous and wrong to consider including Covid-19 injections in school immunization requirements as science has shown Covid to not be a serious threat against children. Requiring such would be a violation of parental rights.

We stand against these proposed WAC's:

WAC 246-100

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-105

Concerned Parent

Washington state board of health,

The citizens of Washington are frustrated. I am disappointed to say the least that I would even need to write this letter to you.

Mandates are NOT helping. One size does not fit all.

What we need is to be building trust and connections in our communities. We need less federal and state government involvement especially in private medical decisions. Local communities should be working to do what makes the best sense for their communities.

Use of WAC 246-100, WAC 246-100-040, WAC 246-100-045, WAC 246-100-070, WAC 246-105 to:

First, consider adding the Covid-19 vaccine to the list of required vaccines to attend school. This is disturbing. We are endemic. Covid will not disappear and the vaccination can be compared to the flu shot. It does not prevent someone from getting or transmitting the disease. With the adverse reactions being so well documented, this is irresponsible to add as a requirement.

Second, forced quarantine or detainment for those who may be unable or unwilling to accept and comply with medical examination, counseling, testing, the Covid-19 vaccination. This is deeply concerning.

Both of these are UNACCEPTABLE and UNAMERICAN policies that violate our United States Constitution. Therefore, I am completely against the Covid policies that are immoral and over reaching.

You are all leaders in your field. Many leaders are struggling with doing what they feel pressured to do versus what is right.

You can do the right thing.

I urge each of you to do what is right, both morally and ethically.

Thank you,  
Robert Kaelin

Subject: Immunization Criteria for Children of Washington State

External Email

Hello Washington State Board of Health,

Is this still on the 1/12 State Board of Health public meeting agenda and given that before the Covid vaccines cardiac arrest for a healthy 13 year old was rare and after it is becoming commonplace, all illegal 4th amendment to the US constitution infringements and Nuremburg Code violations used in the Covid pandemic emergency era must be halted and punished for humanities sake. An estimated 800 kids have been killed by the Covid vaccines to date:

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e1.htm>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fmmwr%2Fvolumes%2F70%2Fwr%2Fmm7031e1.htm>>

Amendment IV

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

How can we justify legally proposing language to:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

?

Thank you for your reply to this matter.

Steve Abramowicz

Good morning,

I am writing to you as a concerned parent and citizen in our community. To detain people against their will and mandate this vaccination for children is not only wrong, it is unconstitutional and I hope you choose not to move forward with this agenda.

I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank you for helping maintain freedom.

Good afternoon,

As a Washinton state resident for over 50 years, this is the first time I have ever felt compelled to address decision making at the state level surrounding the laws and regulations regarding residents and the constitutional freedoms we attain.

It has come to my understanding the State Board of Health is meeting this month to determine and discuss WAC -246-405, 246-100-070, 246-100-040, and 246-105.

I am fervently against any and all of the proposed Covid policies that are highly unethical and immoral and possibly unconstitutional. They are an overreach and should not be considered worthy of consideration in any form.

Thank you for your time,

Heather Ancheta

Subject: BOH Meeting 1/12/2022

External Email

January 12 you are meeting to discuss applying current infectious disease WAC codes for all WA state residents. Some of the proposed policies are extreme and quite concerning to myself and many other families in my area. These include:

\* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

\* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

During the last year Washington State has imposed draconian laws that have violated our right to bodily autonomy. Inslee continues to point to "lives saved," a statistic that we can never quantify. We can, however, quantify the number of jobs lost, the number of reports to VAERS for vaccine injury, the increase in suicides and overdoses, and the number of businesses that have shuttered under his orders. Meanwhile, the majority of other states have moved forward, we are only one of 10 states that continued the mask mandates. Washington State was the only state that refused to give government workers a testing option in lieu of the vaccine.

Implementing these new WAC codes for all WA residents would be devastating. The result in my area specifically would be a dramatic decrease in school enrollment for those privileged enough to pull their children from public school. These laws unfairly discriminate against the underprivileged and force them to vaccinate their children for a disease that we know does not have the same effects on healthy children as it does on the elderly. We now know this vaccine does not prevent transmission, we also know that the immunity from the vaccine is waning and may only last months. There is no end in sight for the number of boosters we will need. Requiring school aged children to be vaccinated every year or every quarter is not reasonable.

Quarantine camps... Where do I even start on that issue? This is the United States of America. We have the right to refuse medical services if we choose. CHOICE, that what our country was founded on. Will we be using the same internment camps that were used in WA for Japanese immigrants after World War II? We were on the wrong side of history then and we will be on the wrong side again if we do not stand up and say no.

I am asking you to vote against these measures during the meeting on January 12 and stand up for the citizens and children of Washington State.

Thank you,

Terra Lower

Subject: Opposition to WAC's 246-100-etc

External Email

Dear Servants of the people,

I am gravely concerned about the proposed legislation to render our state a police state. If you think this a strange statement, consult history!

I am against WAC246-100-070, WAC246-100-045, WAC246-100-040, WAC246-100-070, WAC246-100-105, and WAC246-100.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family onto a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Please consider that your decision is fully your responsibility...credit or discredit. Be true to yourself and let no other influence your action. The people put trust in their public servant to protect and carry out their wishes in alignment with the constitution.

Respectfully,

Sandra S. Skinner-Young

Subject: OPPOSE PROPOSALS!

External Email

Good morning,

I am a resident of Pierce County. I am writing in today to oppose these outrageous proposals. Specifically WAC 246-100, 246-100-040, 246-100-045, 246-100-070, 246-105.

I know from reading these proposals it does not specify coronavirus nor does it specify the experimental coronavirus shot. However, they do state that the forced quarantine and/or forced vaccination for specified communicable diseases including but not limited too... which obviously leaves it open ended. This virus has proven over the past two years that there is no stopping it. Locking up your residents won't change that.. look at Australia... has had the strictest lockdowns.. high vaccination rates....even has these quarantine camps you're proposing... And yet... covid is still running wild.

This shot was created based of the original strain of the virus, which is essentially extinct at this point.. it is proving over and over to not prevent the spread of the virus... why is this continuing to be pushed!!?

Especially on to children! Children have been, since the beginning of this "pandemic" at lowest risk for severe illness.. we have no idea the long term effects this experiment has on full grown adults.. we do however know for a fact that it is causing heart complications and more issues in previously healthy adults.. so again, why would we mandate this for our completely healthy children? Forcing parents to enroll their children into a medical experiment just to attend school or child care is absolutely disgusting and goes against the Nuremberg Code.

Coercion is NOT consent.

This is America.. a free country.. let's try and keep it that way!

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

PROPOSED POLICIES: • Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).  
• Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

11.

Are you Pro or Con on the proposal?

2. Con

---

I am completely against any of the proposed Covid Policies and I feel that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. " I will not support or allow our medical freedoms and right to choose for myself and my children be stripped away from us.

Dear Washington State Board of Health,

I am writing to share reasons why you should vote against implementing new policies WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, and WAC 246-105.

The COVID-19 vaccines available in the United States are not fully approved by the FDA. The only label that has received approval is Pfizer-Comirnaty, which is not available in the US. By federal emergency use authorization law, products that have only EUA require dispensers of such products to know and share the costs and benefits of using the experimental products to potential recipients. Recipients, once receiving the required information to make informed consent, must by the definition of informed consent, have the right to refuse the product. In addition, it is the consensus of the medical community that while these vaccines may help reduce the risk of severe illness (in certain age groups), it does not prevent the spread of the virus. Vaccinated individuals are getting and spreading the virus. Because of this, the vaccines do not meet the long-standing definition of a "vaccine" and are merely a treatment to manage symptoms. A treatment cannot be mandated. This is a major argument of the case being heard by the Supreme Court against OSHA's ETS vaccine mandate today. If the vaccines do not prevent spread and treatments are private individual choices between patients and doctors, then there should not be law enforcement, forced quarantine, or forced treatments. Enacting these codes to restrict freedom of choice in the face of a virus with a lower death rate than seasonal influenza in most age groups would be an overt abuse of power. "Voluntarily" complying with requests for treatment of any kind requires the ability to refuse. Involuntarily detaining someone for refusing to voluntarily comply inherently removes the ability to choose.

Additionally, children are at a statistically nil risk of hospitalization and death from COVID-19. In fact, it appears children and young adults are at a higher risk of an adverse event like myocarditis from COVID-19 vaccination than from getting COVID-19. If children are not at risk and the vaccines do not prevent them from spreading the virus, it makes no sense to require vaccination for school.

I only heard about this vote last night; otherwise I would include more citations for these statements. Thank you for considering these points. I hope you will seek to make a wise and just decision based on objective truth.

To the WSBOH.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These proposals are beyond immoral. They are inhumane. Covid is being used as an excuse to control people from exercising their freedom to make religious, cultural and personal medical decisions. Do not strip the citizens of their freedom to choose (as we have done in the past) Do not make the same mistakes that humans have made before. Do not partake in evil doing. Do not treat humans like animals.

I have done my homework and have been studying the negative effects of vaccines over the past 20 years. Respect peoples rights to make their own educated decision that may be different than yours. Be at peace with the fact that people have different avenues for obtaining wisdom and good health. Do not segregate and strip people of their dignity.

Regards

Subject: Proposed policies

External Email

Regarding the proposed policies for the upcoming meeting, I STRONGLY oppose them. To involuntarily detain people over something that has a 99% survival rate is unconstitutional and just not something that should even be considered, purr act of evil.... to mandate kids receive a vaccine that has high risks of myocarditis and teachers having to be taught signs of symptoms of cardiac arrest and yet actual Covid has less effects on them, is not right... it should be parent choice what happens to their children, they are the ones to birth them, raise them, feed them, etc.. they should be the ones to decide on vaccines...NOT THE GOVERNMENT!

NONE OF THIS IS OKAY. STOP THIS INSANITY NOW!

AGAINST THE PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Subject: Opposition of Covid Policies

External Email  
Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

This is illegal and in violation of the Nuremberg Act.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,  
Perry Fernau

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

---

This proposal is absolutely unconstitutional. Further more, is absurd that a proposal of such magnitude would even be considered to pass without a vote of the people. This proposal demonstrates the lack of representation and care of Washitonians by government officials and offices. To put the public at such a risk and/or to consider any sort of detainment pertaining to COVID is reckless. We have seen history happen in cases lile this before. We call that genocide.

I strongly disagree with wac-246-100-040, wac-246-100-070 & wac246-100-100. We the people make our own choices as we are Americans where's its land of the free. We will not comply. It's our choice to be vaccinated not the governments. Covid vaccine shouldn't be a requirement for school as the current immunization are not required to go to school or have a job. Those diseases are far worse than Covid.

Subject: Proposed Policies

#### External Email

I am absolutely against each and every one of the following proposed policies. These are not in accordance with our rights guaranteed by the Nuremburg Codes.

They are illegal.

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

#### Nuremburg Code #1:

"The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision."

The key words in the above quote are "voluntary consent" free from "form(s) of constraint or coercion." No medical procedure, therefore, can be made mandatory. As time passed after the 1947 creation of the Nuremberg Code, addendums were made that enhanced our individual rights. Such ratification occurred in 1964 when the World Medical Association met in Helsinki, Finland and established the "Helsinki Declaration."

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.wma.net%2Fpolicies-post%2Fwma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cdfd5e4a6e9e14ee3c23008d9d219bf1a%7C1>>

This document restricted human experiments for medical research to even tighter degrees than we had previously known. Keep in mind that this meant there was increased burden and liability on researchers even though they were working with voluntary subjects. In short, even after consent was given by an individual to be a subject, the researching body had to adhere to strict ethical guidelines and if they did not, they could be found guilty in a court of law.

No single legislation has been passed in North America that challenges any line item of either the Nuremberg Code or the Helsinki Declaration. A citizen's body is strictly under their own sovereign control and no entity, government, corporation or individual is given legal power to supersede the individual's right to freely choose or reject any and all medical procedures, medications or advice. These guarantees exist in one form or another in the healthcare regulations of all Western nations.

Subject: COVUD 19 VACCINATIONS FOR SCHOOL AGED CHILDREN

External Email

I am writing in regards to the policies listed below that are being considered by the Washington state board of health. Please see content below.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

WAC CODE LAWS:

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-070>

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-045>

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-040>

<https://apps.leg.wa.gov/wac/default.aspx?cite=246-100>

<https://apps.leg.wa.gov/wac/default.aspx?cite=246-1>

I am deeply concerned with these proposals as mother and health care provider. There are not scientific findings showing the need for these mandates. There are several concerns as to the long term effects of these vaccines that are unknown at this time. Our children are not highly effected by the COVID 19 virus as evidenced by the extremely high survival rate of 99.995% survival rate.

Also, the COVID vaccines remain under Emergency Use Authorization

Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19.

I have personally known children who have gotten the vaccine, mostly males, that have had blood clots after the vaccine and myocarditis.

Please be extremely cautious when considering putting these policies into law. They are absolutely unconstitutional and threatening our freedoms and the health of our children.

Sincerely,

Shantay DaBell RDH

Washington State Board of Health Directors,

Do you recall waking from a bad dream and upon reviewing it, you realize it didn't make sense?

Somehow, that is what THIS seems like, something that doesn't make sense.

I feel I am being told I must take this vaccine or I could be arrested and put in detention. If I ask "Why?" The only logical answer would be, "It will keep you from getting covid and it will keep you from transmitting covid to others."

I have to admit those are two very good reasons IF they are true.

"It will keep you from getting covid."

We all know the answer to that due to the number of vaccinated who died from covid.

"It will keep you from spreading covid to others."

As AFLDS' recent lawsuit against OSHA details

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>  
, these injections are merely "treatments" that, for some people, may reduce symptoms.

The importance of this cannot be overstated.

For example, the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission."

Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated."

With this testimony and over 50 other citations, AFLDS' case against OSHA

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>  
breaks new legal ground by proving Covid-19 "vaccines" are mere treatments and therefore have no legal grounds for forced use.

This case ends all justifications for the OSHA to segregate injected and non-injected people.

Their mandate is a reckless abuse of power without justification in case law.

Since the only two LOGICAL reasons to take the vaccine have been proven UNTRUE, then "Why am I REALLY being forced to take the vaccine?"

THINK ABOUT YOUR ANSWER FOR A WHILE BEFORE YOU VOTE and what part YOU play in this bad dream...

Thank you for your consideration,  
Larry Ohman

Dear members of WSBOH,

Re: WAC 246-105, WAC 246-100-070, WAC 246-100-040, WAC 246-100-045

I am a Washington voting resident of this state and am appalled by these proposed Covid-19 measures which will be discussed on January 12th. As a person who has a job and works for a living, I will be only able to listen at times to the Webinar that regards these illegal proposed policies. I have sent the attached letter in regard to WAC 246-105 with requirements of the Covid-19 vaccination included as school immunization requirement. In reality, Covid-19 is a flu, unlike Polio. In addition, this vaccine is unlike any other vaccine in the past with the mRNA technology used in its formulation. For those who are most vulnerable I support those who choose to receive the Covid-19 vaccine. Children are not generally in the high percentages of infection rate of Covid-19 unless they have underlying serious conditions, as per the documented info listed on my previous E-Mail (attached). At the time I wrote that email, I was not aware of the additional proposed policies that further destroy the constitutional rights of our medical choices. One example is the use of the police force to enforce WAC 246-100-070. Thereby, this would enforce an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with request for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). This again is in violation of our personal constitutional rights and involves enforcement by police, in which this detainment would not be lawful given our rights as citizens of the United States. I would be surprised if any police department would support these policies as well. This is complete overreach by this state and if this set of proposed policies is accepted, I and many others who appreciate our freedoms, will join a constitutional lawsuit to stop your unconstitutional overreach.

Signed,

Ray Fernandez

Dear Washington State Board of Health:

I have lived in Washington for 53 years and have been a registered voter since I was 18 years old. I am a mother and wife in addition to being a concerned citizen. I am a small business owner, home owner, and investment real estate owner in Washington; more specifically Snohomish and King Counties.

I am writing regarding the proposed policy changes to "Communicable and Other Certain Diseases" you will be discussing on January 12, 2022. Specifically:

\* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

\* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This is NOT in Washington's best interest. Do not make the proposed changes. There is absolutely no justification for such a drastic reaction to a positive Covid-19 test result. I would suggest a better use of the Washington State Department of Health's time, expertise, and money be spent looking at preventing the 68,700 miscarriages reported on VAERS as of 1/1/2022 or the 442,340 cases of Myocarditis/Pericarditis?

There have been 60,413,059 Covid cases in the US and 858,312 have died according to <https://www.worldometers.info/coronavirus/country/us/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoronavirus/country/us/>>. That means Covid-19 has a death rate of 1.42%. It's hard to find the statistics on how many people have been vaccinated but VAERS reports that 420,040 have died due to the Covid-19 injection and 20,004,540 people have injuries including 713,000 on permanent disability all due to the Covid-19 injection. And those numbers are low as it is common knowledge that VAERS is underreported.

Specifically addressing making Covid-19 injections required in school immunizations. The Covid-19 injection is not FDA approved. You cannot mandate or require a vaccine or injection that has a conditional Emergency Use Authorization; that's not lawful. The repercussions to such a complete overreach regarding the continuing Covid-19 scare will be devastating to Washington and will cost taxpayers big time; think class action lawsuits.

There has been a health scare world wide, no doubt. Covid-19 is not going back in the box and is here to stay. We need to live with it like we do the flu.

Sincerely,

Shannon Cunio

Subject: WAC COVID Propositions

External Email

Respected Members of the Board of Health,  
I write this email to inform you that I am against the proposed COVID policies that are being brought to the table. They are governmental overreach, immoral and unconstitutional. I stand against the following proposed WAC's:

- \* WAC 246-100-070
- \* WAC 246-100-045
- \* WAC 246-100-040
- \* WAC 246-100
- \* WAC 246-105

These policies are against our medical freedom and we the people will not stand for this tyrannical attempt by the state government to control its people. It is not the government's job to take care of the people, it is that of each individual to do so, as our founding fathers intended. Please do what is right and throw these propositions out.

Sincerely,  
Todd Raynes  
Spokane, WA

Subject: Proposed Changes to WAC 246-100-070; WAC 246 -100-045; WAC 246-100-040

External Email

I would like to comment on the proposed changes regarding Covid restrictions and enforcement for noncompliant people.  
(WAC 246-100-070; WAC 246-100-040; WAC 246-100-040).

These changes would violate our Right of Conscience and violate our H.I.P.P.A. laws.

The first amendment to the Constitution of the United States states, "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof."

H.I.P.P.A. laws have been painstakingly established to protect our personal medical information. An informed conscience will reveal that these Covid injections, as per CDC information, have killed over 20,000 people, and millions have experienced negative side effects as a result of taking this experimental injection. The proposed changes to WAC 246-100 would lead us down the same path similar to the process used in Nazi Germany, and Communist nations to control its population, to the detriment of its people.

I strongly urge you to NOT adopt the proposed changes!

Ronald Higginbotham, Washington State voter

Subject: Comment for January 12th

External Email

Hi,

I am writing to provide a comment for the Jan 12th meeting discussing applying current infectious disease WAC codes to include Covid for all WA state residents. I and my family stand fully against these proposals, which are over-reaching and deeply immoral. Individuals should have full medical autonomy and decision making responsibility for their medical examinations, testing, treatment, counseling, and vaccination. These are areas of responsibility that should never fall under the government's jurisdiction. It is grievous and wrong to consider including Covid-19 injections in school immunization requirements as science has shown Covid to not be a serious threat against children. Requiring such would be a violation of parental rights.

We stand against these proposed WAC's:

WAC 246-100

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-105

Thank you, Tasha McPherson

Subject: Oppose the COVID vaccine being added to the school and daycare schedule

External Email

Hello,

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms. Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

Are you Pro or Con on the proposal?

2. Con

---

Washington State Board of Health I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever! Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them. This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

To Whom It May Concern,

As a Registered Nurse for over 11 years and a mother, I am very concerned to hear that WA state is proposing quarantine camps. No human being should ever be forced to do any form of medical intervention or be detained for not agreeing to a medical intervention. It is a basic human right to choose for themselves and their children what is to be or not to be injected/ingested, etc, into the human body. This is extremely unethical and unconstitutional. I am against any of the proposed covid policies that are over reaching and immoral. I stand against these proposed WACS: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-105 and any of the WAC 246-100 policies.

Sincerely,

Val Artamonova, BSN, RN

Washington State Board of Health,

I am writing to share my opposition to WAC 246-100-070 which is being proposed. This new law/bill will remove constitutional freedoms from the public. Encouraging the public to be vaccinated is something I support, but removing freedoms and forcing people to do things against their will is not something I agree with. Please vote against it. Thank you.

Regards,  
Sarah Pyke

Members of the Board,

Is Australian-stye, authoritarian seizure of citizens the path you really want to travel down? The State has NO RIGHT to lay claim to the title of citizens' lives and persons in exchange for "protection". Furthermore, no such authority, morally or legally exists to delegate powers to give "lawful orders" to un-elected, and unaccountable bureaucrats. Do NOT pass rules requiring vaccinations we know to be ineffective and that do more harm than good to children under 16. The risks are not worth it, in more ways than one.

What do you think will happen when the State starts snatching people and forcibly quarantining them for refusal to accept an experimental "vaccine"? Have you thought that through, or is there literally no limit to the power of government in the minds of the members of the board?

Sincerely,

Robert Holt

Citizen and Veteran

I am completely against all of the proposed Covid Policies that are over reaching and entirely immoral! I stand against these proposed WAC's, in particular:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100 -105  
WAC 246-100

These are unconstitutional overreaches of power against the citizens of the state. I stand with the protections of the federal Constitution against tyrannical government.

I am calling on you to represent the population of Washington that you swore to be a voice for and to reject all such proposed policies in the items listed above.

Thank you,

Robert Benton  
Eatonville WA

On Friday, January 7, 2022, 11:55:56 AM PST, WENDY BENTON  
<7wendy@comcast.net> wrote:

I am completely against all of the proposed Covid Policies that are over reaching and entirely immoral! I stand against these proposed WAC's, in particular:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100 -105  
WAC 246-100

If you FORCE anything like this on free Americans you are looking for dissension, strife and more! We are protected by the Constitution and we WILL hold the line against any tyrannical mandates and proposed policies that violate our civil liberties AND our fundamental rights as human beings!

I stand with the federal Constitution. Will you?!?

I also stand with God and pray for you, our leaders.

"Daniel answered and said: "Blessed be the name of God forever and ever, to whom belong wisdom and might. He changes times and seasons; he removes kings and sets up kings; he gives wisdom to the wise and knowledge to those who have understanding; he reveals deep and hidden things; he knows what is in the darkness, and the light dwells with him."

Daniel 2:20-22

Whether you stand with the Word or not, it is all inspired by God. It's everlasting, unshakable and pierces the soul with Truth. Each of us will one day meet our Maker and be responsible for what we've done on earth. Are you comfortable with your actions? If not, seek God while He may be found! Do not fall for lies from the Enemy.

I am calling on you to represent the population of Washington that you swore to be a voice for and to reject all such proposed policies in the items listed above.

Also please "Ensure justice for those being crushed." Proverbs 31:8b

Tell me, is not "ensuring justice" part of the role you are in, the position you ran for? Please give serious consideration to the control over individual bodies you are seeking and to the constitution of the United States. Thank you.

Regards,

Wendy Benton

Subject: Covid Polocies

I am completely against ANY of the Covid Policies that are over reaching and immoral. Of which they most certainly ALL are. I stand against any and all of these WAC's. Words like mandate seem to be more accurately described as dictates, deriving from the words dictatorship/ dictatorial/dictator. If Jay Inslee can "dictate" to the WA State Board of Health, such mandates, cleverly disguised as dictatorial, we have a serious problem on our hands. These, said, mandates, are an infringement on the rights of every Washingtonian, young and old. Forcing such mandates is incredulous. Who does these things? Think WA-BOH members, long and hard, before you cast your vote on January 12, 2022. Setting aside the intense pressure from Govenor Inslee, you most likely are experiencing, please, THINK for yourself, I beg you! Don't fall into line and succumb to political & dictatorial pressure from the powers that be. The potential for unleashing the "Pandora's Box" of Civil-Unrest, will be the likes of protest you, me, and the residents of Washington, have never witnessed. Listen, please, to us! We, the people of Washington State, absolutely stand against these WAC's.

WAC 246-100, WAC 246-105, WAC 246-100-070, WAC 246-100-045, WAC 246-040  
PLEASE consider this a plea from a residing Washingtonian for 46 years.

Sincerely,

M.Teresa Vinup

I am writing in regards to the policies listed below that are being considered by the Washington state board of health. Please see content below.

**PROPOSED POLICIES:**

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

**WAC CODE LAWS:**

I am deeply concerned with these proposals as mother and health care provider. There are not scientific findings showing the need for these mandates. There are several concerns as to the long term effects of these vaccines that are unknown at this time. Our children are not highly effected by the COVID 19 virus as evidenced by the extremely high survival rate of 99.995% survival rate.

Also, the COVID vaccines remain under Emergency Use Authorization

Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19.

I have personally known children who have gotten the vaccine, mostly males, that have had blood clots after the vaccine and myocarditis.

Please be extremely cautious when considering putting these policies into law. They are absolutely unconstitutional and threatening our freedoms and the health of our children.

Sincerely,

Shantay DaBell RDH

Subject: Proposed Policy Concern

External Email

Hello and thank you for considering this message from me.

My name is Steven Easton and I'm a resident of Pierce County.

I am deeply concerned that the proposed policies / policy changes regarding WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 will not, and cannot, have the desired, beneficial effects sought with their design.

We are in the middle of a medical experiment, the effects of which will not be fully known for months or years. The only thing worse than allowing bad things to occur is to artificially force an uncontrollable action that becomes an aggravating factor in the further development of a hazard. The cost/reward analysis does not support the intent of these proposed amendments and additions to our governing policy. Exposing our young to a permanent personal physical health burden (the as of yet unknown permanent effect of the vaccine's spike protein introduction within a developing body, for one) as a potential solution to a temporary problem that does not imperil their lives (Covid-19 death rates for healthy children is effectively non-existent - and soo incredibly low for all humans - less than 1% of the TOTAL population ever infected within my county, per Johns Hopkins University tracking map updates) is hard to reconcile with common reason and is truly unwise.

Can we instead protect and inform the most vulnerable in our midst? Let us be honest about personal health - including obesity - in the way we are able to naturally defend ourselves from viral invaders. Then, let us please suggest - not demand - protective action for the elderly, sick, otherwise compromised neighbors we love. That is supportive and effective governance - this is knee-jerk, reactionary, power-grabbing policy change. Government is supposed to ensure liberty as we live and pursue happiness, not dictate those terms to us.

Please help design a plan of action and support for those who are most vulnerable and thereby lead us with effective and transparent plans that actually can yield collective benefit. The unhealthy and elderly are scared and in need of leadership from those they've elected or have been appointed to serve them. Forcing people outside of that group into jeopardy to placate your need to "do something" helps no one, wastes the opportunity to actually lead and provide truly valuable guidance, and only obscures the intent and trustworthiness of those in positions to serve the good of all they represent (read: do not rule).

No to these changes please, and attend with clarity and purpose to the education and protection of those who actually need it from you.

Thank you,

Steven Easton

Hi,

I am writing today in complete shock that I have to even write these words. As an American citizen and a citizen of Washington state, I adamantly oppose the proposed Covid policies that will be voted on next week. They are an overreach, unconstitutional and morally wrong. I stand against all of the below WAC's being proposed:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

Kind Regards,  
Sable Parker

To whom it may concern:

As a born and raised citizen of Washington state, I am completely against any Covid-19 mask mandates, Covid-19 vaccine mandates, and especially the policies of current discussion. Those policies include, but are not limited to, WAC 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> , WAC 246-100-040 <tel:246-100-040> , WAC 246-100, WAC 246-105.

Thank you for taking my input into consideration and listening to the voices of the people of Washington.

I am completely against any of the proposed Covid Policies that governor inslee is attempting to use falsy for the sole purpose of locking people away from their families and their lives. They are beyond immorally rancid and overreaching and promote a tyrannical agenda. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

There is no mistaking the attempted tyranny involved here to take away human rights for life!!! My husband got the vaccine because he is a first responder, yet the people I know who have gotten the covid have all been vaccinated. That fact in itself is an eye opener for thousands. I personally have an 80% plus chance of a brain bleed/blood clot and have lost people to this same issue who get the vaccine because they're FORCED to in the "name of public health" and died. Dead forever. People like myself and those who have the natural immunities and religious belief against it should be pardoned completely yet you would rather they die or lock them away! Choosing to lead with a tyrannical fist; creating a psychological divide of hate and fear amongst the people of Washington is not a solution. Vaccination deaths, the amount of people vaccinated and still getting sick, as well as permanent disabilities caused by the vaccine are ignored and pushed aside in the name of political agendas on high. Natural occurring antibodies are completely ignored and should be given immense consideration, and the people have lost faith in the actual number of covid cases reported are in fact true. As a state we watch Governors like Ron DeSantis and others who don't have to threaten these tyrannical policies to keep their people safe and as a state we have to seriously question the its leadership. Instead Washington residents are stuck living with policies that attempt to silence, spread hate and increase divisional divide. Our moral only get worse while others fair much better. And our leaders think this is the answer, wow. This only leads us to the conclusion that the actual goal is to continue to make life worse and not better for the people of Washington state. Even holding this meeting seems a farce rather than an actual fact/opinion finding mission. Medical freedom is a private choice, and not a choice to be made by anyone but that individual. That decision is between you, your family, and your creator, God Almighty. This is nothing but COMPLETE TYRANNY! The only thing these so called infectious disease WAC codes do is enforce this tyrannical agenda and set the stage for a civil war in our state. It's disgusting and blatant and people will not stand for it.

Dear Governor Inslee

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I worked in the medical field and I chose to be vaccinated. In no way shape or form should anyone be forced to be vaccinated as it has been proven it does not stop the virus from spreading or getting Covid. Wearing masks, distancing us is our best defeanse. It is against many religious beliefs and health reasons far beyond your exemption criteria to be vaccinated.

Let people make their own choices, with reasonable quarantine 5 days vaccinated or not upon exposure or positive testing.

Thank you  
Sandy

Subject: January 12 public hearing

External Email

Dear WSBOH,

It has recently come to my attention that on January 12, 2022, the Washington State Board of Health will conduct a public hearing to discuss, in part, the following policies:

1. Allow local health officials to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, and vaccination (WAC 246-100-040).
2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105

Are these two (2) specific policies actually, and insanely being considered? I am a lifelong Washingtonian and if these policies are in fact being considered, I am utterly disgusted and outraged at the overreach by the State of Washington. I am a father to 2 beautiful school age girls and I can tell you without hesitation, that you will not use your unilateral, self-gifted power to force a vaccination on my children that has neither been approved by the FDA or gone through extensive peer reviewed studies for efficacy and potentially dangerous/deadly side effects, particularly in children. Furthermore, I will not allow you to trample on my God-given, unalienable rights and submit to these unconstitutional mandates. The notion that you would force my family into an internment camp, against our will because we choose to follow the guidance of our own medical professionals that doesn't suit the State of Washington is unconscionable and crosses a line in the sand. You will not tell me, my wife, or my kids what will be put into their bodies. My wife and I at our sole discretion, will decide what is best for our children.

If you insist on moving forward with you evil, Un-American and unconstitutional policies, my family and I will leave this once great state in the rear view mirror for good and head for a state where they actually still care about its people. I hope you will take careful consideration of these overreaching polices before you implement them.

Sincerely,

Robert Chadek

Life Long Washington Resident and Father

Subject: NO EXPERIMENTAL VACCINES FOR CHILDREN

External Email

" I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

This experimental mRNA technology is absolute madness of the white supremacist mindset of Big Pharma that narcissistically ASSUMES a "one size forced to all" unconstitutional medical tyranny upon free American citizens who wish our DNA and our children's DNA to remain NON GMO and ORGANIC for the remainder of this human life on this one planet we share. I trust God/billions of years of evolution over patent profits of the hundreds of billions by Moderna and Pfizer.

300 children have died of Covid worldwide. One MILLION people have had either serious injury or DEATH (20,000) from the Covid "vaccine", WHICH IS MORE DEATHS AND SERIOUS INJURIES THAN ALL VACCINES COMBINED ADMINISTERED OVER THE LAST 30 years!!! I read the VAERS data with my own eyes. I suggest you do the same. We the people sees who believes in freedom, and who supports medical slavery, forced medical experimentation, tyranny, blackmail, segregation and Nuremberg code violations due to unconstitutional Covid mandates.

Yours sincerely,  
Sabryna Chase

I have witnessed the painful struggle of a beloved grandson and his family because of his experience with vaccines.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

I OPPOSE the proposed policies that would allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

11.

Are you Pro or Con on the proposal?

2. Con

---

When my children were younger in the 1970s, I followed all the vaccine protocols, making sure the children were up to date. Fast forward to the early 2000s, both my daughters were now themselves mothers; both followed vaccine protocols for their children. One of the greatest family tragedies we experienced was watching my grandson succumb to vaccine injury. He went from being a happy, babbling, almost-walking toddler to suffering from autism, severe neurological and digestive problems, aphasia (non-verbal), and seizures. He has been unable to attend regular school and still wears diapers. It has been 19 years since that injury occurred. He has been diagnosed with genetic mitochondrial defect. In the opinion of neurologist who made the diagnosis, the defect may have lain dormant all his life, but likely the vaccines he received at 15 months triggered the defect and its damages. I was devastated to learn that the defect is on the maternal line, e.g., grandmother to mother. I have been cautioned not to be vaccinated unless absolutely necessary because of my own autoimmune condition and the history of my grandson. I am appalled by SBOH proposed policies that would consider law enforcement to make me comply with state mandates without examining the physical and health consequences to the individual. Equally appalling is the fact that this tyranny is being driven by a Covid death rate of 1.1% (<https://www.doh.wa.gov/Emergencies/COVID19/DataDashboard>). A disease survival rate of 98.9% does not appear to rate pandemic-level destruction of our constitutional rights of due process and freedom of choice regarding our health care. But please, if you have facts that contradict what is being reported, I would like to know. Thank you for the opportunity to offer my input.

I am completely against any of the proposed Covid Policies that I believe are over reaching and immoral!! We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I stand for medical freedom!! What kind of America do we live in that something like this is even being CONSIDERED?!!?!!?

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

---

I am writing to you to have my voice heard.... This is totally outrageous! You are responsible for the health of the people of WA State and yet you are doing everything to undermine that duty. We need leaders, not followers! You are not looking at the science and are just doing the political bidding of the Democratic Party. Why was it okay for doctors, nurses, firefighters, police officers, medics, etc. to work in the midst of the Covid /China virus disaster at the beginning when we knew nothing about the virus? They gave their all, their time, their families time and sometimes their lives for the people in their cities, states and their Country! Now you want to use our great police officer to detain, arrest and even take citizens to be, "isolated in a quarantine facility" i.e., concentration camps at the direction of the WA State Board of Health?! And whatever information they trump up?! That's a NO! You are destroying our Country and we will not agree to this! And you also want to use our children as Ginny pigs?! There is no data to show that children are in any severe danger with this virus so why would you want to force them to take a vaccine that has been proven to cause harm to them?! Why was the inventor and renowned Virologist of the MRNA for the Covid vaccine taken off of Twitter and Facebook? Why because he was voicing his concerns regarding giving the vaccine to children, our most vulnerable population, which you are not taking care of! You are trying to silence him! According to Dr. Robert Malone the Covid Vax can do more harm than good for children. Fauci even admits that the number of kids hospitalized for Covid is overcounted. And according to the CDC in the US there were 814,000 deaths at the end of 2021 and only 209 of those were children between 5-14 years old. And a lot of those had underlying conditions. According to Dr. Ben Carson and other doctors that I have heard, Omicron is a blessing in disguise. It is extremely infectious but it's not particularly virulent and there is some evidence that if you contracted Omicron, you have contracted immunity to the Delta variant and possibly some other variants. So that could get us to herd immunity much faster than anybody expected. Even though NIH, CDC and all of our government officials are preaching doom and gloom, it doesn't matter what they think, if this is a natural phenomenon that's occurring and this is getting less and less virulent and spreading throughout our communities, it's going to take care of itself, regardless what they think. Let nature take its course! Also, in Nigeria the mortality rate is 14 per million and in this Country it's 2200 per million. They take anti malarials like Hydroxychloroquine. We should be looking into this; this is an effective treatment along with Ivermectin and Monoclonal Antibodies that according to the government you cannot give with an Emergency Use Authorization. Think about that, they are killing people because they do not want to let go of their power and control! The Emergency Use Authorization time is well past its prime! We should be looking at all types of Therapeutics to combat the effects of this virus, not rounding up our citizens and locking down our State! This is a virus and if you listened to the science, you would know that it mutates! So, it shouldn't have been a surprise to Biden's Administration! Also, there is a

study in the Netherlands that the secondary attack rate is higher in double vaccinated individuals than the unvaccinated. Canadian Researchers have stated, "We also observed negative vaccine effectiveness against Omicron among those who had received two doses compared to unvaccinated individuals." Radiologists have also noticed a huge uptick in patients with the vaccine in Adenopathy, which is an enlargement of the lymph nodes. Where they were seeing one case per month, they are now seeing one case per day! Coved numbers are totally fake! LA Times reports a majority of the people listed as Covid patients in hospitals in LA are actually in there for something else, they merely tested positive for the virus. This is the norm for all of the hospitals because they get Federal dollars for them... follow the money! Vanity Fair reports that the Biden Administration rejected an October proposal for "Free Rapid Tests for the Holidays" Biden had the nerve to call Trump out when he was having people invent the testing and Biden had the tests given to him and he didn't think it important enough to get them to the people! Why should we believe the government/WA State Board of Health really has our best interest at heart?! Stop using Nazi tactics and bring our America back! I do not approve of the proposed change of the WACs for the Washington State Board of Health! People fight against this any way you can! Bless the people of Washington State and the United States of America!

Subject: covid overreach

External Email

I am completely against any of the proposed Covid Polices that are over reaching and immoral and go against our human rights.

We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-046, WAC 246-100, WAC 246,105.

Summary outline

1. Understand the risk of the current variants compared to all the known diseases, viruses and or flus in the world today.....Currently it is minimal – compare to list below

- \* Coronary Heart Disease
- \* Stroke
- \* Lung disease

All cancers and the standard list already in use from WAC 246-105-030

- (1) Chickenpox (Varicella);
- (2) Diphtheria;
- (3) German measles (Rubella);
- (4) Haemophilus influenzae type B disease;
- (5) Hepatitis B;
- (6) Measles (Rubeola);
- (7) Mumps;
- (8) Pneumococcal disease;
- (9) Polio (Poliomyelitis);
- (10) Tetanus; and
- (11) Whooping cough (Pertussis).

2. Is the Vaccine proven effective? Is the disease vaccine preventable? The answer is

no

3. Is natural immunity and a person carrying the antibodies exempt? Yes – of course, this is the Gold standard when it comes to all diseases
4. Lifestyle choices – eating, smoking, drinking, exercising...etc – always the best choice
5. Understand you will all be held accountable for falsifying statistics for personal gain

WAC 246-105-040.

10) "Full immunization" or "fully immunized" means an immunization status where a child has proof of acquired immunity or has been

vaccinated with immunizing agents against each of the vaccine-preventable diseases listed in WAC 246-105-030 according to the national immunization guidelines described in WAC 246-105-040.

Are you Pro or Con on the proposal?

2. Con

---

Bearing in mind that existing COVID-19 vaccines do not stop the spread of infection, the I oppose the measures outlined above on the following grounds: 1. Existing COVID-19 vaccines do not stop the spread of infection and therefore detainment of or fines given to unvaccinated person for refusing vaccination as a measure towards protecting the broader public is self contradictory. 2. As of January 3, 2022 70.6% of Washingtonians 5 and older are fully vaccinated. This on top of the large portion of the state's population which has already caught and recovered from COVID-19 places us well within the window of herd immunity which has been outlined by many within the Department of Health, The Mayo Clinic, etc. Thus, to evoke law enforcement to compel vaccination at this point in the pandemic is irrational. 3. A considerable number of the unvaccinated are those who have caught and recovered from COVID-19 and who now have ample, natural, antibodies to protect them against future infection or the onset of severe symptoms in future infections. Such people are sufficiently protected and should not be compelled to get vaccinated. Such people know how their bodies reacted to COVID-19 but are unaware of how their bodies may react to the vaccines. 4. Ample evidence shows that the risk that COVID-19 poses to children is negligible. While adverse reactions to the vaccines are few and far between, they are a reality and thus requiring parents to vaccinate their children in order for them to attend public school is requiring them to take a completely unnecessary risk on vaccines which are not backed by long term studies. Thank you for your consideration.

Subject: upcoming policy proposals

External Email

Washington State Board of Health,

I am writing this email to inform you as a voter and resident of Washington State, & the United States of America, these proposed Washington Advisory Codes coming before a vote on the 13th go against Federal law, our rights as Americans.

I am completely against these covid-19 policies that go too far and are against my freedoms to choose for myself.

I have had covid in 2019, and in 2021 the Delta variant. I have tested for antigens. I also had success with Ivermectin, as well as over 300 others I am aware of. I know no single person that has died of covid, and my scope is vast. I only know upward of 30 (personally) who have died of the vaccine. About 6 who were hospitalized and put on respirators and given remdesivir, a treatment that has over and over again shown to be detrimental. If the health department wishes to benefit the people remove that drug. It didn't work for Ebola. It has shown effective for covid, and it certainly has shown any benefit in all the research I can get my hands on.

I am aware of many, and I mean many in to the thousands who are maimed or permanently ill. One of which is my close blood relative who has been having heart attacks for an entire year, within the hour of receiving his shot. My great aunt, her daughter, son in law, and 3 adult grandchildren all got their shot on the same day. 14 days later they all died within hours of each other. I know a coworker who is paralyzed within the hour after getting the shot. Another died in their sleep. The health department needs to check into these things. Not the people who are exercising their American rights to choose for their body their GOD given freedoms.

We are not Nazi Germany. Yet everything about this virus and the pandemic echos a melody similar. To use law enforcement to detain and place Americans in a detainment camp for this is a gross misuse of power and authority. That is exactly what the Germans did. They thought what they were doing was a good thing. Until they saw it wasn't and it was too late to reverse their actions.

I think of the terror that was brought on Japanese Americans during the war. They were made to live in internment camps. They lost their belongings and homes because someone thought it was "safer" and got a few more to agree. Which we have seen the sorrow & heart break it has sown into America.

People who are actively living and being an integral part of society or simply trying to survive should not be sidelined for their beliefs.

I believe people are being lied to. I know 2 lovely octogenarians personally that had covid. They took Ivermectin and are continuing in their lives as the wonderful instruments of God. I knew a young nurse, took the shot to save her job, and was in perfect health. 24 hrs. later she died of liver failure. Another young woman of good health recently got her shot, and yesterday reported that she has blood clots. If I was not already against this shot because of my religious beliefs, science, facts and the truth certainly would dissuade me.

Reading the facts from the Injunction against the US government brought forth by Theresa Long MD. She & the doctors that helped in the fact findings, state that she knows of no medical use for antifreeze to be used topically, ingested or injected, of which the shot is 50%. Being Health Department officials, you know that antifreeze shouldn't even be left on the skin.

Another MD, exposed strains of HIV in the shot in medical reports that were sent to the CDC.

CDC death reports have been altered. I have downloads of the information I directly downloaded and facts were changed in 24 hrs. Facts pertaining to face masks and their safe use.

Studies have shown in other countries, and in the U.S., mask serve only water droplets being transferred. Not the virus. I can attest through my job I was exposed to 2 people in close quarters that had gotten the vaccine, and they were the only people I was in contact with during the duration of 2 weeks and I came down with Covid Delta.

In the 1800's with the Spanish flu they discovered mask wearing caused respiratory issues and weakened the immune system. Why are we still demanding masks to be worn?

As an office manager it was my duty to make sure all the people who worked in the shop knew the dangers of the personal protective equipment issued to them, as well as monitor they safe use of said equipment. One of those being N95 masks and that they were only to be worn for 20 minutes at a time with 30 minutes of without before using again. Or they would get CO2 poisoning. I pulled this information from internet at the beginning of the mask mandates. September 2021 it can no longer be found anywhere on the internet. This grieves me, and reminds me yet again of Nazi Germany and the tactics they used to cull people from existence. Or the studies the German doctors did on Jewish children forcing them to wear masks and the psychology of it and the illnesses that came upon them because of the masks.

Since I was a young child, I have been an autonomous learner. I avidly read. I enjoy medical journals and science, & history , the bible and law. I have many articles that support the things I have written you. I hope that you can see I am not someone who jumps to conclusions, or that does not research or study things in depth before determining a decision.

WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, are unjust, & unlawful under the constitution.

Covid, honestly has not presented as the life threatening virus it is purported as (unless you are treated with remdesivir). We should take a page from the other states that are enjoying health and remove our masks, make Ivermectin the treatment commonly used. In the states that have done this their numbers are minimal. Other countries have done this & their numbers are down as well.

I hope that the information I presented was clear, and my request that the Health Department vote these policies down is met with thoughtful inquiry on the impact that this would have and the legacy it would leave behind.

Thank you,  
Rachel Short

To whom it may concern, I am adamantly opposed to any legislation, regulation, administrative code that forces me and my family to act in accordance to a government overreach in any capacity: specifically covid shots, the refusal to inject my person and my family with a substance, and the proposed Isolation/Quarantine Facilities.

Many have self-quarantined until results came in and self-isolated once known to be infected; as we the people were instructed to do which was reasonable. To use force: physical or by way of retaliatory means; i.e. fines and other punishments/restriction in a free society is immoral.

I stand against proposed WAC 246-100, WAC 246-100-040, WAC 246-100-45, WAC 246-100-070 and WAC 246-105.

From a member of the government of the people, by the people, and for the people.

---

I am writing to ask you to vote against all vaccine mandates. Vaccine mandates violate fundamental human rights, notably the right to prior, free and informed consent for medical interventions. In a free society, everyone should have complete power and control over their own bodies. I urge you to do all in your power to ensure a return to the democratic principles upon which this country was founded. Especially, when the chances of survival from COVID is 98.23% for adults and even higher for children at 99.985%. I realize your role is to maintain the legislation that "it is necessary to protect the health of the public and individuals by providing a means for the eventual achievement of full immunization of school-age children against certain vaccine-preventable diseases" (RCW 28A.210.060 through 28A.210.170). Furthermore, your responsibility is to make decisions for public health for the "immediate preservation of the public peace, health, and safety, the support of the state government and its existing public institutions" ([ 1979 ex.s. c 118 § 13). Unfortunately, the current inoculations have not proven to protect the public from transmission or infection of the Covid-19 virus . The inoculation concoctions still have an EUA status and have not completed Phase III safety trials. EUA products are, by definition, experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. No healthy adult or child should be injured or die from a vaccine imposed upon them by their government. What we know now about COVID-19 and children: · Almost 100% of kids don't suffer from severe COVID. In fact, many have no symptoms at all. Thus, they may have already had COVID which is another excellent reason not to get the vaccine. · The World Health Organization (WHO) has announced that young people should not take the vaccine. · A concerning number of young people, especially those under 30, are suffering from myocarditis (heart inflammation), blood clots, low platelets and more following COVID-19 vaccination. · The risks of COVID-19 vaccination adverse outcomes certainly outweigh the benefits to children and young adults who are considered low risk populations. · Parental rights to make independent, informed decisions regarding their children's medical interventions, including vaccines, are being threatened. · Some scientists have raised concerns that the safety risk of COVID-19 vaccinations have been underestimated. As of October 29th UPDATE, there have been 856,919 vaccine injuries including 18,078 deaths following COVID-19 vaccination. · Clinical trials in children and young adults are ongoing and will not be completed for at least one year. · Not a single published study has demonstrated that patients who have had a prior COVID-19 infection benefit from the vaccination. So why recommend all kids get the shot? It's time to end the use of COVID-19 as a pretext for governmental coercion and mandates. The public is waking up to the cascading negative impacts upon society from elected officials wielding unprecedented power over the citizens of this country. As a resident of Washington state, and a concerned citizen, I urge you: -- Do not support any legislation or directive coercing people or mandating medical interventions--including vaccines -- Do not support any legislation or directive

requiring people to wear masks -- Do not support any legislation or directive that deprives people of the right to congregate -- Do not support any legislation or directive establishing lockdowns -- Do not support any legislation where employers can enact coercive tactics to overrule a person's rights to body autonomy There is a reason many people in our current administration are demanding that you negate any and all personal morals, defy our constitution, harm others, create public fear, and avoid encouraging effective means of immunity. Money. It may not be the root of all evil, but it can certainly feed those roots. These companies, including our government agencies that are financially benefitting from these inoculation mandates, are making approximately \$1,000 per second from injecting people with questionable and life threatening substances. Many members of our community and state, who have been inoculated by the Covid "vaccine" are still becoming infected with the virus. This is not proven protection. This is experimental drug use. Is corrupt money and power, in the name of a science experiment, more important than the health and welfare of the people of our state? The very people you serve to protect? May quality judgment and moral perspective be the lens through which you make your decisions, and may fraudulent claims by those who have personal and financial agendas not obscure your ability to make determinations for the good people of our state. Sincerely, Merri Lee Keatts

External Email

To whom it may concern,

I want to voice my opposition to the inclusion of Covid-19 to the WAC. The codes I'm referring to are:

- \* WAC 246-100-070
- \* WAC 246-100-045
- \* WAC 246-100-040
- \* WAC 246-100
- \* WAC 246-105

It is staggering to me that the WA board of health would even consider such overreach as using law enforcement to quarantine families against their will. It's obvious you have lost most, if not all understanding of the personal liberties afforded every US citizen through the Constitution of The United States of America. You do not have the constitutional right to any of the ideas proposed. They are not only unconstitutional they are tyrannical.

I urge whoever reads this email (if anyone) to please uphold personal liberties above all else.

On a personal note, I do not trust you or the WA State legislature to make health decisions for me or my family.

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest recommending a vaccine for Covid for school aged children who attend school in Washington State. I am against imposing this vaccine on our children. I believe this to be a horrible overreach of state government.

The Covid "vaccine" is experimental. There have been no studies on the long-term health side effects on children or even on adults. We have never required an untested drug to be used on our children. Making it required to attend public school is criminal and against our constitution.

If you decide to follow through with this abuse of state power, you will be held accountable for the consequences whether they are unintentional or not. You are taking the decision to monitor a child's health out of the hands of its parents. You must then face the repercussions that happen when this trial "vaccine" begins causing health problems way beyond the symptoms of Covid itself.

We do not need this requirement to protect our children or our communities. We need you to consider the constitutional rights we have been guaranteed by our founding fathers to stay free, to live and care for our families and our friends, and our communities based on our religious and moral beliefs.

With respect,

Ron Laycock

Washington State Board of Health,

I am writing to share my opposition to WAC 246-100-070 which is being proposed. This new law/bill will remove constitutional freedoms from the public. Encouraging the public to be vaccinated is something I support, but removing freedoms and forcing people to do things against their will is not something I agree with. Please vote against it. Thank you.

Regards,  
Sarah Pyke

I am completely against ANY of the Covid Policies that are over reaching and immoral. Of which they most certainly ALL are. I stand against any and all of these WAC's. Words like mandate seem to be more accurately described as dictates, deriving from the words dictatorship/ dictatorial/dictator. If Jay Inslee can "dictate" to the WA State Board of Health, such mandates, cleverly disguised as dictatorial, we have a serious problem on our hands. These, said, mandates, are an infringement on the rights of every Washingtonian, young and old. Forcing such mandates is incredulous. Who does these things? Think WA-BOH members, long and hard, before you cast your vote on January 12, 2022. Setting aside the intense pressure from Governor Inslee, you most likely are experiencing, please, THINK for yourself, I beg you! Don't fall into line and succumb to political & dictatorial pressure from the powers that be. The potential for unleashing the "Pandora's Box" of Civil-Unrest, will be the likes of protest you, me, and the residents of Washington, have never witnessed. Listen, please, to us! We, the people of Washington State, absolutely stand against these WAC's.

WAC 246-100, WAC 246-105, WAC 246-100-070, WAC 246-100-045, WAC 246-040  
PLEASE consider this a plea from a residing Washingtonian for 46 years.

Sincerely,

M.Teresa Vinup

Subject: Against the Covid 19 vaccine mandate for children

External Email

Dear. Committee Members

Hello, I am a mother who has sent my children to ECS.  
Please stop the Covid19 vaccine mandate for children.  
First of all, the Covid19 vaccine was made in a short period of time and has not been fully tested in clinical trials. So, the side effects are increasing not only in the United States but also in other parts of the world.  
Secondly, children are not at high risk at Covid 19. Even if children get Covid19, most of them are asymptomatic or pass through like a mild cold.  
Thirdly, the Covid19 is getting weaker and now it's almost same as a cold.  
In conclusion, it seems that children are more likely to suffer from the side effects of vaccination than to benefit from it. So, I sincerely ask that you prevent the Covid19 vaccine mandate for children.  
Thank you for your time.

Sincerely,  
Grace, One of ECS parents

To whom it may concern,

I am completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of Washington state education is in store if this becomes mandatory.

Best regards,  
Sidney Simmons

Sirs - There were 10 in our family who have had covid-19 and we are all alive and well. Science for years have proven that natural immunity is the best way to keep from getting the disease again. Our country has always stood for people's right to make their own medical decisions. Government has no right to force us to take unproven vaccinations that even doctors say doesn't prevent you from getting covid. We would appreciate your voting against this bill or whatever you call it. We are not a danger to anyone. Thank you - Ward And Carole Larsen - Everson

Regarding: =C2=A0

PROPOSED POLICIES:

=E2=80=A2 Allowing local health officers to use law enforcement (WAC 246-10-0-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-10-0-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Comment: =C2=A0This is illegal, immoral =C2=A0and unconstitutional and would take away freedoms given to us by God. =C2=A0Anyone supporting such control and loss of freedom should be removed from their job.

=E2=80=A2 Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Comment: =C2=A0There is no informed consent for this injection, therefore, it cannot be mandated. =C2=A0This injection is experimental, therefore, it cannot be mandated. =C2=A0There is no liability for damages caused by this injection, therefore it must not be mandated. =C2=A0There is no medical emergency except in the minds of those full of fear from a corrupt media and f=

rom those who want to profit financially from the injections. =C2=A0My body=  
- My choice! =C2=A0

Thank you,  
Tina M. Johnson

Dear Washington State Board of Health,

Concerning the proposals being considered on January 12, 2022, I would like to share my thoughts and concerns.

The Covid19 vaccines have not proven to be effective at preventing the virus nor in the spreading of the virus. Something ineffective should NOT be mandated.

The vaccine does not have a record of long term effects, so we do not know how it will affect us in the future. Something unproven should NOT be mandated.

Children are at extremely low risk for Covid19. Why should our children (or anyone) be vaccinated when it is ineffective and unproven concerning the long run effects?

Cases around the world have proven that those countries without vaccines do much better overall than countries/states with strict mandates.

The greatest reason of all to NOT create strict mandates is that it is unconstitutional. Each of us should have the right make our personal health and medical choices for ourselves and our families.

Thank you for deciding against mandates.

Sincerely  
Rhonda Sanders

Dear Ms Pskowski,

I am writing to express my grave concern about the forced quarantine and counseling for members of the public using their own free will not to participate in the experimental vaccines currently offered for Covid 19 and forced vaccinations for children. My concerns about rolling out such a draconian policy that violates the fabric of this country's founding principles are many.

One of my largest concerns is that in watching the vaccines be given out over the last year, it is clear that they are not working. Almost half of the infection rate of Covid patients are already vaccinated. States with higher vaccine rates do not experience lower Covid rates. People who are fully vaccinated are not stopping the transmission of Covid either. It is also not proven to be a safe vaccine. People suffer at a higher rate from complications from the vaccine than they do from Covid itself. Forcing people to get vaccinated is clearly about power and submission, not about preserving public health. Statistically, children have a higher chance of dying or having an adverse reaction to the experimental Covid vaccine than they do from contracting Covid itself. At this point in history, many of the children you propose to force vaccinate have already had Covid and have valuable antibodies. Allow parents to choose what is the best decision for the individual health of their children, not the state.

As a mother, I know my children more intimately and fully than any health care professional, and certainly more than the state. I have witnessed their growth and development since I first felt them in my womb. I choose to make decisions for my children's health with information and discussion from professionals, not by coercion and fear. Inform parents and respect their rights and their timing to make the decisions necessary for protecting their families. Protecting that sacred right of a parent is a paramount responsibility of an elected official and member of public education. I know this well as a former public elementary school teacher. Please protect children's health, respect the fiber of the Washington family and protect democracy by fighting against the proposal to force vaccinations on children and force quarantine on non complying families.

In response to the scheduled meeting by our authorities to implement forced covid regulations.

I am completely against any of the proposed Covid-19 policies that are over reaching and immoral. I join with the others in standing against these forced proposals:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

My freedom and democracy is at risk. My freedom is at stake. But it must be cherished, because that is what makes this Nation desirable over others. I sincerely ask that these rules would not be forced upon residents of the state of Washington.

Sincerely WA State Resident,  
Svetik Polevoy

Please do not allow this to happen. WE the People do not consent!! Please do not vote yes for the following to be made into law:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

We need to come together and stand up for our privacy and medical freedom.

Subject: [STMHE] ACT THIS MORNING against tyrannical WA proposal

External Email

Good Afternoon,

It has come to my attention that some very alarming public policies are being proposed by the Washington State Board of Health regarding current infectious disease codes for COVID-19. I have a number of questions and comments that I hope can give us some perspective on the folly of the proposed application of these codes and finish with a comment on my conscience should this policy be enacted.

1) The first question that I have relating to WAC 246-100-045 is how and in what instances have we utilized this policy since it went into effect in 2003? The language used in the code is vague enough that there seems to be little definition on the severity of what an "infectious" disease is; disease is after all almost by definition infectious. Is it the death rate that determines the quarantine requirements? If so why have we not felt the need to enact this principle for the flu in years gone by? Is it the lack of medicine or treatments for a new illness? No we have had several treatments, vaccines and therapeutics that have been effective in diminishing the severity of COVID-19. Ultimately, what are our criteria for the implementation of this policy in regards to the COVID-19 virus? We have multiple diseases and outbreaks that this has not been necessary for and I for one do not trust that those tasked with enforcement would be able to apply an objective criteria that makes any sense.

2) Second, we have had two years to observe globally the effectiveness of quarantines, lockdowns, etc... in mitigating the spread of this virus. Do we honestly believe that forcing people into quarantine camps as they do in Australia will stop the spread of a disease that is global? Have we forgotten the pictures out of Wu Han of people being welded into their apartment buildings to slow or stop the spread of the virus? The disease persists and has not been deterred by our efforts to stop it. I have had this disease and my family and my extended family. We are none the worse for wear and I believe most people would agree that this state of fear and uncertainty is unsustainable. We need to live life and the risks posed by this virus do not justify the response we have submitted to. Much as we might try to mitigate or ignore this fact, we face death every day and yet we choose to live life according to each person's needs and concerns. In the reality we face of being unable to stop this virus in any meaningful way, each person should be free to respond in the manner they believe will meet their needs.

3) I noticed that the vaccination status was included in the wording of the proposed policy. Oddly enough it was the last in the list of items mentioned as things that could be requested my law enforcement; well last is not least as they say. The question before nearly every policy in this regard has been the pressure to get vaccinated. We have recorded the highest "cases" (life threatening or not) that we have ever had. The numbers that have been recorded of hospitalizations with COVID show us that those who have had the shot are still getting sick and are still getting hospitalized. I asked this question a number of years ago when there was a small outbreak of Measles in the state of Washington. If only those who choose not to get the vaccine are getting sick then why is everyone else worried about it? If on the other hand those who are getting the vaccine are worried because they are still at significant risk, then what is the point of having a vaccine in the first place? For a state that purports to be such an inclusive bastion of diversity of thought and accommodation for individual lifestyles, it is shocking the abuse that has taken place towards those who have the right to make their own decisions regarding their healthcare.

4) Apart completely from the effectiveness of the vaccine is the simple intrusion on our rights as citizens. There has been no consideration of medical privacy laws, the rights of citizens to litigate drug companies for harm done, there has not even been the right of full consent for the vaccine relating to the requirement to inform patients of effects of the drug, its contents or even the fact that we simply do not know the long term effects. To add injury to insult, we now have this excrement of a proposal by an unelected body of political appointees to force our local law enforcement to potentially incarcerate their neighbors in what I can only imagine is not a local area if the reports I have read about the various quarantine facilities being prepared around the state of Washington is true.

5) Finally, and as I said last is not least, there is the state of our children's health and well-being. We have seen across the world, that our children are not at risk for this virus in any meaningful way. What do I mean by any meaningful way? As of November of 2021, the total number of deaths in children under the age of 16 in the US due to COVID-19 was under 500. To put that in perspective your child is more likely to die from a dog attack than from COVID-19. Even more shocking, there has been no fatality linked to transmission of COVID-19 between students in school. There have been several transmissions linked to teachers passing the virus to other teachers, but that is a nonissue for the requirement of vaccinations and masking in our school system. If this policy is to be expanded to include COVID-19 as regards to our children I would first insist from our Governor, who loves data so much, for some concrete numbers on risk and effectiveness of the proposed mitigation policies. Not projections, not models, not predictions from our experts; we have more than enough experience at this point with lockdowns and masking that we should have some real data to make our decisions. If we don't, perhaps we need to get some new experts.

Speaking from my conscience now if this policy is enforced and enacted, I am very torn as to what I think we should do about it. I would encourage every possible litigation against the state of Washington; I would support in every way I am able law enforcement who refuses to obey the edicts of our Board of Health; I would grieve for my beautiful state that has allowed itself to fall into a tyranny of fear. It is evil that turns a person on his neighbor and that is what our policies are doing to us. I will try to love my neighbor in my very imperfect way, but I will resist with every fiber of my being he who would seek to turn me against my neighbor.

Blessed New Year to you All,

Riley James Workman

Subject: Covid vaccine mandate

External Email

To whom it may concern:

Please read this article, especially the part about children being affected by the vaccine vs their chances of severe covid. With the vaccine proven to no longer stop the spread of Covid I do not see how you can make this a mandatory vaccine for school children. Please keep it as an option for parents to make the choice as to what is best for their families. By having the children vaccinated it will not stop the spread throughout the schools which is the main reason for all previous required vaccines. I beg you to please take into consideration that each person and their medical needs differ and this cannot be a one size fits all issue. I implore you to REALLY look into these issues that are starting to come to light and think about all of the previously "trusted" FDA approved medications (close to 4,500 drugs and devices EVERY YEAR are recalled after previous FDA approval) that have since been recalled due to devastating side effects. Do not be part of making Covid a required vaccine and later regret the possibility of a disastrous outcome. Leave it to personal choice.

Greetings,

Please do not support mandating the COVID vaccine for children. It is important for parents to be able to make the choices that will best help their families. It would not make sense to mandate something that could have detrimental effects on an entire generation, as there have been no long term studies for this. Many European countries have put the mandate on hold as it has caused heart problems in many students under the age of 18. It would be unwise as a state or district to mandate something that has the potential to harm so many of its next generation.

Thank you,

Rachel

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Thank you for your time,  
Jim & Shea Craver  
Longview/Kelso residents

Please do not allow this to happen. WE the People do not consent!! Please do not vote yes for the following to be made into law:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

We need to come together and stand up for our privacy and medical freedom.

Good Morning,

I have major concerns!!!

I have lived in Washington over 60 years.

Worked in School districts for over 30 years.

I am writing you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following.

- \* Any involuntary isolation/quarantine of the people as described in parts of WAC 246.100
- \* Any mandate on COVID vaccines for children as a requirement to attend K-12 public or private school.

This reminds be of the Japan interment camps right here in the U.S.

Please have some common sense

Sincerely,

Karla Atwood

2. No

11.

Are you Pro or Con on the proposal?

2.           Con

---

I am a teacher and a class concerned parent. I have 6+ years of full time teaching experience. During these current years of teaching I have learned to collaborate with the parents of my students to best serve the child. I have learned over the years that if the school and the parent work together rather than apart then the student fairs much better in the long run of their school and personal lives. We need to respect everyone's personal choice on this matter just like we do when individualizing a student plan of learning for the classroom. There are always going to be people on both sides of the fence when it comes to vaccinations. Students are already allowed to be exempt from other vaccines so why is this any different? The more the vaccine is forced the more push back you're going to see. If it truly is the best thing for everyone and really necessary than the vaccine will sell itself. Give it some time and do not be so forceful.

Board members,

I am writing for you to do the right thing and let people make their own choices on vaccines.

All of these:

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-070&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b3f48fa63024266448908d9d24663f4%7C11d0>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-045&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b3f48fa63024266448908d9d24663f4%7C11d0>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FWAC%2Fdefault%2F100-040&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b3f48fa63024266448908d9d24663f4%7C11d0>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2Fwac%2Fdefault%2F100&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b3f48fa63024266448908d9d24663f4%7C11d0>

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2Fwac%2Fdefault%2F105&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3b3f48fa63024266448908d9d24663f4%7C11d0>

all of these listed above are reckless abuse of power. And you all know that. I do not need anyone to keep me safe from a flu virus, the vaccines have proven that they do not prevent the spread, they do nothing, they should not even be called vaccines, and also they are not even approved by the FDA for use in anyone. Look at the data out there, cruise ships have had cruises that are fully vaxxed and hundred on board have gotten the so called flu. There are plenty of therapeutics out there, but it appears no one wants to prescribe them for fear of getting their medical license pulled.

It also just came out that masks do Not work, why are our children still wearing them????? We all know the truth~

All of these measures you want to implement are Draconian fascist policys.

Our once beautiful state ran by a governor that thinks he and the government knows what is best for me, why not focus on

Washington States real issues, instead of taking everyones freedoms away for a cold/flu~

The variants are mild that is also fact~ WHY ARE YOU WANTING TO IMPLEMENT THESE MEASURES WHEN ILLEGALS ARE COMING INTO OUR

COUNTRY WITHOUT BEING VETTED FOR DISEASE, AND FLOWN AROUND THE COUNTRY AND DROPPED OFF~

This is all an ABUSE OF POWER ~ IT NEEDS TO STOP AND IT NEEDS TO STOP WITH YOU ALL!

I CHOOSE WHAT GOES IN MY CHILDRENS BODYS AND MY OWN NOT THE GOVERNMENT!! QUIT BULLYING PEOPLE INTO THIS TO KEEP THEIR JOBS~ Its is unethical and against the CONSTITUTION OF THE UNITED STATES~ IF YOU LOOK IT UP.

THE NUREMBERG CODE (1948) DOES THAT RING A BELL?? ALL THOSE PUSHING THE COVID 19 ILLEGAL VACCINE ARE IN VIOLATION AND ARE SUBJECT TO ARREST

ALL WHO VIOLATE THE CODE ARE ALSO SUBJECT TO OTHER PENALTYS~

I PRAY YOU STICK TO YOUR OATHS TO THE CONSTITUTION AND TO THE PEOPLE IN THE STATE OF WASHINGTON NOT TO IMPLEMENT ANY OF THESE CODES AND HOPE YOU COME TO YOUR SENSES ABOUT MASKING OUR CHILDREN~ YOU WILL ALL BE HELD ACCOUNTABLE! CRIMES AGAINST HUMANITY.

T HANNING

Washington state board of health,

The citizens of Washington are frustrated. I am disappointed to say the least that I would even need to write this letter to you.

Mandates are NOT helping. One size does not fit all.

What we need is to be building trust and connections in our communities. We need less federal and state government involvement especially in private medical decisions. Local communities should be working to do what makes the best sense for their communities.

Use of WAC 246-100, WAC 246-100-040, WAC 246-100-045, WAC 246-100-070, WAC 246-105 to:

First, consider adding the Covid-19 vaccine to the list of required vaccines to attend school. This is disturbing. We are endemic. Covid will not disappear and the vaccination can be compared to the flu shot. It does not prevent someone from getting or transmitting the disease. With the adverse reactions being so well documented, this is irresponsible to add as a requirement.

Second, forced quarantine or detainment for those who may be unable or unwilling to accept and comply with medical examination, counseling, testing, the Covid-19 vaccination. This is deeply concerning.

Both of these are UNACCEPTABLE and UNAMERICAN policies that violate our United States Constitution. Therefore, I am completely against the Covid policies that are immoral and over reaching.

You are all leaders in your field. Many leaders are struggling with doing what they feel pressured to do versus what is right.

You can do the right thing.

I urge each of you to do what is right, both morally and ethically.

Thank you,

To the WSBOH.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

These proposals are beyond immoral. They are inhumane. Covid is being used as an excuse to control people from exercising their freedom to make religious, cultural and personal medical decisions. Do not strip the citizens of their freedom to choose (as we have done in the past) Do not make the same mistakes that humans have made before. Do not partake in evil doing. Do not treat humans like animals.

I have done my homework and have been studying the negative effects of vaccines over the past 20 years. Respect peoples rights to make their own educated decision that may be different than yours. Be at peace with the fact that people have different avenues for obtaining wisdom and good health. Do not segregate and strip people of their dignity.

I disagree with mandatory vaccines, especially for school age children in grades K-12.

I am vaccinated, have had COVID-19. Why isn't there credit for people who have the antibodies??

I am not an expert or a doctor, yet have read many, many articles written by doctors and experts in the medical field regarding the benefits and harms of the vaccine.

Subject: Regarding C19 Mandate for School Children

External Email

To whom it may concern:

I wanted to voice my STRONG opposition to the WA BOH / WA State Legislature even considering this C19 shot as mandatory for our school children.

1.) Why did the FDA break its own requirements and violate its own protocol to "approve" this experimental gene therapy?

A.) Why were no animal trials were conducted for safety first?

B.) Why was only a small number of cherry-picked participants, not representative of broad population, were used for the trial sample?

Why was data insufficiently collected and documented to represent true outcome? (This includes causal harm— there is a child, Maddie de Garay, who has been wheel-chair bound and on a feeding tube since her second dose nearly a year ago, and her damage was logged as "functional abdominal pain"; and the study does not seek ANY other data, including injury, except the single question of whether or not the participant has tested positive for C19. How then, are risks being being scientifically evaluated?

Why was there no double-blind placebo group for this study (placebo group was unmasked WEEKS later, and documentation scrapped, and a portion of the former placebo group received the injection)? How is this scientific to not have a control group?

And why was the study cut short by YEARS? How can we scientifically ascertain long-term outcome if we conclude the study after a few months?

Is there a way to categorically determine the long term effects of this experimental treatment?

Why are the spikes in juvenile myocarditis and strokes being tolerated?

Why aren't you concerned about significant alteration in A MAJORITY of our girls' menstrual cycles, and the possible indications of that, post-vaccination?

Why are counts of C19 spiking UPWARDS in our children post-vaccination, compared to pre-vaccination? Is that not contrary to the goal of reducing Covid infections?

Where is the intelligence, science and common sense in this? Where is the concern for the well-being of our children's health in this?

C.) VAERS data continually demonstrates that these shots are the deadliest vaccines of all time, with tens of thousands of deaths (more DEATHS for these shots in the last 12 months than all vaccines COMBINED since VAERS was established); there are also a MILLION vaccine-related injuries.

Why are these not being included in the informed consent?

Why are you trying to eliminate our right to consent at all?

2.) Where are the peer-reviewed scientific studies showing that children are the main source of communicating this disease?

There aren't any.

Why are we subjecting OUR CHILDREN, to whom this virus poses no risk (99.9% survival rate), to a brand new, virtually untested, PERMANENT medical treatment, when there are NO studies demonstrably proving (or even vaguely indicating) that "asymptomatic spread" can occur?

Studies DO prove that if the viral load is insufficient to produce symptoms, the virus isn't being communicated.

3.) Why are we forced to take a product from a source that has refused to release the contents of that product for public viewing?

Why are we being forced to take a possibly harmless treatment, and have there be no way for us to hold pharmaceutical companies accountable for any damage or death?

(But we can, and WILL, hold YOU accountable for any damage done if you coerce us into this, and we receive any harm, OR if you force us to withdraw from our publicly-funded marketplace.)

3.) Why are no other FDA-approved, long-studied therapeutics allowed for treatment? Not only are these enormously effective, safe and inexpensive drugs being denied, but instead are being aggressively banned?

4.) Why are you forcing a "leaky vaccine" into our children as a viable option to combat C19? There are countless studies strongly showing, and CDC, NIH and FDA have all conceded this point, that these vaccines are ineffective for preventing infection from and continued transmission of this virus.

There are many studies showing the danger of using leaky vaccines in the middle of a pandemic, however; it forms the perfect environment for accelerating viral mutations and forcing the most virulent to compete with the wild type.

Leaky vaccines not only create variants, but cultivate deadlier versions of them. (In nature, it has LONG been established that variants become milder over time compared to the wild type/alpha strains.)

Isn't this a very ignorant and reckless approach, and it is not doing the OPPOSITE of protecting public health?

5.) Why isn't natural immunity being considered? Natural immunity has been documented for DECADES (and since C19 has broken out) to be long-lasting and robust.

Where are the PEER-REVIEWED, large sample scientific studies showing that natural immunity is inferior to vaccine "stimulation of the immune system"?

6.) Isn't Omicron making this a moot subject? Aren't even news and government agencies admitting that we are at/ nearing ENDEMIC, not pandemic, levels?

So how is this about public health?

Isn't the vaccine for the Alpha strain, anyway? So why would that be the mandate, when it's the variants causing case numbers (not hospitalizations and deaths) to go up?

7.) How can you mandate for Corminaty when it isn't available? The only vaccine available is the one under the EUA— which cannot be mandated.

This is illegality on top of illegality, and we will hold you responsible for the damage caused by this bait-and-switch.

8.) Is not bodily autonomy is the most basic human right (LONG-established human and Constitutional rights, and emphasized by the Nuremberg Code)?

Why would we tolerate medical fascism?

How can you all reconcile this irrational behavior, and proceed with actions identical to the NAZIS and the Communists of the 20th Century?

When in the history of civilization have the ones forcing medical procedures against another's will EVER been on the right side of history?

When have the ones forcing experiments onto (into) the children EVER been right?

How does it usually go when a minority group attempts to seize the children as property of the state?

You are violating our most basic human rights to force an unknown substance into OUR CHILDREN.

Why would we submit to an unconstitutional coercion that gives us all risk and no gain? Especially for our CHILDREN, who would have to live with the consequences for the rest of their (perhaps damaged) lives?

Why would we tolerate this "baby step" of totalitarianism, when we know it can activate the State to implement other coercive/aggressive statutes, including involuntary detainment, quarantine, separation of children from parents, removal from the marketplace and blatant segregation?

Please consider these points. As time goes on, the truth only continues to justify our concerns— and we will be seeing you in court if you proceed.

Regards,  
Sophia Wilson

Subject: COVID19 Injections for Children

External Email

Pfizer to Study 3rd Dose of COVID Vaccine for Toddlers . . . But Why?

The push to inject children with a genetic experiment may be one of the worst public health offenses perpetrated on a population of people who are unable to speak for themselves, do not have a legal voice and depend on adults to protect them.

Story at-a-glance:

- \* Pfizer announced their experiments on children 6 months and older were unsuccessful in 2- to 5-year-olds  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeftest-third-covid-shot-kids-under-five%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0>>  
as they didn't produce an immune response, leading to a recommendation for a third shot and delaying the Emergency Use Authorization (EUA) for the youngest citizens.
- \* Although the experiments produced a strong response in children 6 months to 24 months and 5 to 12  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeftest-third-covid-shot-kids-under-five%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0>>  
years, the company announced they were evaluating increasing these doses as well.
- \* The study is listed as a phase 1, 2 and 3 model, evaluating the safety, dose and efficacy simultaneously, a strategy seldom, if ever, used. Data collection and analysis will be completed in one year on a population with little risk of the illness.
- \* Despite the readily available and public data, some continue to call for a shot for children for the sake of herd immunity. Yet, according to a recent engineering analysis more people have died from the shot in less time than from the disease.

Children are the future. Over the centuries, many have suffered atrocities  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeftest-third-covid-shot-kids-under-five%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0>>  
pigs, AIDS, and the experiments at the hands of adults.

Yet the recent push  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeftest-third-covid-shot-kids-under-five%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0>>  
to inject children with a genetic experiment may be one of the worst public health offenses perpetrated on a population of people who are unable to speak for themselves, do not have a legal voice and depend on adults to protect them.

In the push to ensure there is a shot in every arm, Pfizer  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeftest-third-covid-shot-kids-under-five%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0>>  
CDC, FDA, and Pfizer are causing injuries and deaths.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline-farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C1>>  
Pfizer recently announced “non-inferiority was not met for children between the ages of 2 and 5 when compared to older teenagers in the current trial.”

Originally, the company hoped to apply for an emergency use authorization (EUA) for the youngest by the end of December 2021. However, since the data have not proven successful, they hope to submit for the EUA “in the first half of 2022

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline-farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C1>>,” one short year after starting the experiment.

The company said

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pfizer.com%2Fnews%2Fpress-release%2Fpress-release-detail%2Fpfizer-and-biontech-provide-update-ongoing-studies-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>>  
it has made a shift to giving three doses in smaller amounts to raise the immune response. They explain the decision this way:

“Compared to the 16- to 25-year-old population in which high efficacy was demonstrated, non-inferiority was met for the 6- to 24-month-old population but not for the 2- to under 5-year-old population in this analysis ...

“The decision to evaluate a third dose of 3 µg for children 6 months to under 5 years of age reflects the companies’ commitment to carefully select the right dose to maximize the risk-benefit profile ...

“Pfizer and BioNTech also plan to evaluate a third dose of the 10 µg formulation in children 5 to under 12 years of age.”

If the two-dose regimen makes the changes to the immune system in the 6- to 24-months group and 5- to 12-year age groups that the company is looking for, why move to a three-dose regimen for them if not for financial gain?

\*

\* Email\*

\*

He then found 32 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fnow-killed-close-to-twice-as&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e2172>>  
from the vaccine in VAERS data ending Dec. 3, 2021. Using the URF of 41 and the data Kirsch took from VAERS and the CDC, this suggests there have been 1,312 deaths that likely were caused by the injection as compared to the 757 deaths caused by the illness.

If you do the math, this means the shot has killed roughly 173% more children than the illness.

Using the same URF of 41 and the VAERS data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fp%2Fdata&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e2172>>  
ending Dec. 10, 2021, we can estimate there are likely 39,599,481 adverse events and 830,004 deaths caused by the injection.

This is vitally important as the total number of deaths recorded for COVID-19 as of Dec. 22, 2021

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fp%2Fncchs%2Fp%2Fvss%2F>>  
, is 807,787. This means the shot possibly has killed more children and adults than the virus, and in less time.

Additionally, when you look at the data from the CDC

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fp%2Fncchs%2Fp%2Fvss%2F>>  
, you note that there were 36,931 more deaths recorded in 2021 after the release of the vaccine than in 2020 when the illness first emerged from Wuhan.

Although WHO didn't declare the pandemic until March 2020, the U.S. has reclassified

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.livescience.com%2Fp%2Ffirst-us-covid-19-death-january-2020.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e2172>>  
deaths before that, finding the first from COVID happened Jan. 9, 2020.

Vaccinating children for herd immunity is unethical

Despite the readily available data, the American Academy of Pediatrics, CDC, FDA and others continue to call for vaccination in the most vulnerable in the population: our children. Their developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage.

Sadly, medical professionals who express their concern are roundly ignored, despite the growing number of those health care professionals who are stepping forward. Among them is cardiac surgeon and patient advocate Dr. Hooman Noorchashm, who sent a public letter

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcitizenwells.substack.com%2Fp%2Fletter-of-warning-to-fda-and-pfizer&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e2172>>  
to the FDA commissioner in January 2021.

In it, he detailed the risks of vaccinating individuals who have previously been infected with SARS-CoV-2, or who have an active SARS-CoV-2 infection. It was subsequently removed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnoorchashm.medium.com%2Fa->>

Doshi was even more blunt in his June 10, 2021, public comment

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F>  
to the FDA's Vaccines and Related Biological Products Advisory Committee. There, he pointed out that "the FDA can only authorize the use of a medical product in a population if the benefit outweighs the risk in that same population." - Outweighs the risk!

This means that even if adults were to benefit, the COVID shots cannot be authorized for children unless children will actually benefit from it themselves. In the case of COVID-19 injections, children cannot benefit, seeing how they only have a 0.005% risk of death in the first place.

Healthy children have died shortly after the jabs and dozens of cases of heart inflammation have been reported.

Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis. Historically, vaccines have been pulled after reported damage

At no other time in history have "vaccines" been created and distributed with such impunity.

The closest scenario occurred in 1976 when one young soldier died from a new form of flu that triggered fear and the subsequent development of a flu vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsm>  
[news%2Flong-shadow-1976-swine-flu-vaccine-fiasco-180961994%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsm)  
aimed at 80% of the American public. While the World Health Organization (WHO ) took a "wait and see" approach, the Centers for Disease Control and Prevention (CDC) jumped in with both feet.

It was a pandemic that never materialized and those who were the real victims were the roughly 450 people who developed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde>

who died from the vaccine.

The rush to produce the newest vaccine iteration ostensibly began in early 2020 after the WHO announced SARS-CoV-2 would produce a worldwide pandemic

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Flabs%2>  
and an early, flawed mathematical model

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cato.org%2Fblog%2Fhow-one-model-simulated-22-million-us-deaths-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
predicted millions of deaths in America. Yet, this was not a medical product that fit the definition of a "vaccine."

It was something never heard of before in vaccinology, based on an experimental mRNA technology that triggers your body to produce a spike protein

, the COVID-19 injection will have a different history.

According to data from the Vaccine Adverse Events Reporting System (VAERS), collected by the CDC and U.S. Food and Drug Administration (FDA), there have been 21,002 deaths recorded

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeaths-cdc-covid-vaccine-injuries-fda-pfizer-booster-kids%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>  
in conjunction with the COVID jabs as of Dec. 24, 2021

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fdata&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>  
, 12 months after the first shot

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Fnews/health/covid-vaccines-new-york%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>  
was given in the U.S.

According to Bloomberg

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bloomberg.com%2Fgraphics/interactive/vaccine-tracker-global-distribution%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>  
, as of Dec. 23, 2021, there have been 499 million doses given in America.

It is difficult to compare these numbers since two of the three available COVID shots require a double shot, so there haven't been 497 million people vaccinated. Yet, the adverse events and deaths are also occurring after just one shot.

Taken at face value, the U.S. shut down the vaccination program in 1976 after 0.000117% of people died, while the VAERS estimate is that 0.00407% of people have died after a COVID injection (using Bloomberg's Dec. 21 dose numbers of 497 million).

In other words, based on the percentage of people who have died, 3,378% more died after the COVID injection than from the swine flu injection. There have been 965,841 adverse events reported, including permanent disabilities and heart attacks in young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeaths-moderna-pfizer-covid-vaccine-teens-myocarditis%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>  
. And yet, stakeholders in the shot insist the next generation of Americans must take it.

Pfizer announced youngest kids not responding to the shot

Pfizer has been working on a clinical trial

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2Fstudy/NCT04411121%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>  
to evaluate the safety of the mRNA jab in healthy children, intending to create a dose for children 6 months and older. Endpoints reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline-farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>

Pfizer recently announced "non-inferiority was not met for children between the ages of 2 and 5 when compared to older teenagers in the current trial."

Originally, the company hoped to apply for an emergency use authorization (EUA) for the youngest by the end of December 2021. However, since the data have not proven successful, they hope to submit for the EUA "in the first half of 2022

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline-farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>

its-timeline-

farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C1  
," one short year after starting the experiment.

The company said

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pfizer.com%2Fnews%2Fpress-release%2Fpress-release-detail%2Fpfizer-and-biontech-provide-update-ongoing-studies-covid-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pfizer.com%2Fnews%2Fpress-release%2Fpress-release-detail%2Fpfizer-and-biontech-provide-update-ongoing-studies-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217)

19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217  
it has made a shift to giving three doses in smaller amounts to raise the immune response. They explain the decision this way:

"Compared to the 16- to 25-year-old population in which high efficacy was demonstrated, non-inferiority was met for the 6- to 24-month-old population but not for the 2- to under 5-year-old population in this analysis ...

"The decision to evaluate a third dose of 3 µg for children 6 months to under 5 years of age reflects the companies' commitment to carefully select the right dose to maximize the risk-benefit profile ...

"Pfizer and BioNTech also plan to evaluate a third dose of the 10 µg formulation in children 5 to under 12 years of age."

If the two-dose regimen makes the changes to the immune system in the 6- to 24-months group and 5- to 12-year age groups that the company is looking for, why move to a three-dose regimen for them if not for financial gain?

Vaccinating children for herd immunity is unethical

Despite the readily available data, the American Academy of Pediatrics, CDC, FDA and others continue to call for vaccination in the most vulnerable in the population: our children. Their developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage.

Sadly, medical professionals who express their concern are roundly ignored, despite the growing number of those health care professionals who are stepping forward. Among them is cardiac surgeon and patient advocate Dr. Hooman Noorchashm, who sent a public letter

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcitizenwells.substack.com%2Fp%2Fletter-of-warning-to-fda-and-pfizer&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
to the FDA commissioner in January 2021.

"Moreover, this number would likely compare unfavorably to the number of children that would be harmed, including for rare serious events. A separate, but crucial question is one of ethics. Should society be considering vaccinating children, subjecting them to any risk, not for the purpose of benefiting them but in order to protect adults? We believe the onus is on adults to protect themselves."

Doshi was even more blunt in his June 10, 2021, public comment <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3F> to the FDA's Vaccines and Related Biological Products Advisory Committee. There, he pointed out that the FDA can only authorize the use of a medical product in a population if the benefit outweighs the risk in that same population.

This means that even if adults were to benefit, the COVID shots cannot be authorized for children unless children will actually benefit from it themselves. In the case of COVID-19 injections, children cannot benefit, seeing how they only have a 0.005% risk of death in the first place.

Healthy children have died shortly after the jabs and dozens of cases of heart inflammation have been reported.

Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis. Historically, vaccines have been pulled after reported damage

At no other time in history have "vaccines" been created and distributed with such impunity.

The closest scenario occurred in 1976 when one young soldier died from a new form of flu that triggered fear and the subsequent development of a flu vaccine <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsmithsonianmag%2Flong-shadow-1976-swine-flu-vaccine-fiasco-180961994%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217> aimed at 80% of the American public. While the World Health Organization (WHO) took a "wait and see" approach, the Centers for Disease Control and Prevention (CDC) jumped in with both feet.

It was a pandemic that never materialized and those who were the real victims were the roughly 450 people who developed <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fpediatric-safety-review-eu-regulators-pfizer-moderna-astrazeneca-more-data%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217> Guillain-Barre syndrome <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsmithsonianmag%2Flong-shadow-1976-swine-flu-vaccine-fiasco-180961994%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>, a rare neurological disorder, and the roughly 53 <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.foxnews.com%2Fopinion%2Fcarlson-how-many-americans-have-died-after-taking-the-covid-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217> who died from the vaccine.

The rush to produce the newest vaccine iteration ostensibly began in early 2020 after the WHO announced SARS-CoV-2 would produce a worldwide pandemic <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpubmed%2F32179634> and an early, flawed mathematical model <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cato.org%2Fblog%2Fhow-one-model-simulated-22-million-us-deaths-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>

juj3&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21 casualties.

He then found 32 deaths

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstevekirsch.substack.com%2Fp%2Fnow-killed-close-to-twice-as&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>>  
from the vaccine in VAERS data ending Dec. 3, 2021. Using the URF of 41 and the data Kirsch took from VAERS and the CDC, this suggests there have been 1,312 deaths that likely were caused by the injection as compared to the 757 deaths caused by the illness.

If you do the math, this means the shot has killed roughly 173% more children than the illness.

Using the same URF of 41 and the VAERS data

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fp%2Fdata&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>>  
ending Dec. 10, 2021, we can estimate there are likely 39,599,481 adverse events and 830,004 deaths caused by the injection.

This is vitally important as the total number of deaths recorded for COVID-19 as of Dec. 22, 2021

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fp%2Fncchs%2Fp%2Fvss%2F>>  
, is 807,787. This means the shot possibly has killed more children and adults than the virus, and in less time.

Additionally, when you look at the data from the CDC

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fp%2Fncchs%2Fp%2Fvss%2F>>  
, you note that there were 36,931 more deaths recorded in 2021 after the release of the vaccine than in 2020 when the illness first emerged from Wuhan.

Although WHO didn't declare the pandemic until March 2020, the U.S. has reclassified

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.livescience.com%2Fp%2Ffirst-us-covid-19-death-january-2020.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>>  
deaths before that, finding the first from COVID happened Jan. 9, 2020.

Urgent: 3 Ways to Help Stop Biden's Vaccine Mandates

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fp%2Fstop-biden-vaccine-mandates%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>>

to the FDA commissioner in January 2021.

In it, he detailed the risks of vaccinating individuals who have previously been infected with SARS-CoV-2, or who have an active SARS-CoV-2 infection. It was subsequently removed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnoorchashm.medium.com%2Fpublic-letter-to-fda-commissioner-dr-c2728667c0bb&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7>>  
from Medium.com.

Immunologist Dr. Bart Classen also warned in early 2021 there is troubling evidence suggesting some mRNA shots may cause prion diseases

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fscivisionpub.com%2Fpdfs%2Fcov-rna-based-vaccines-and-the-risk-of-prion-disease-1503.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d>>

such as Alzheimer's and ALS, and Dr. J. Patrick Whelan, a pediatric rheumatologist specializing in multisystem inflammatory syndrome, has expressed concern about mRNA shots' ability to cause

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fwp-content%2Fuploads%2FWhelan-FDA-letter-re-EAU-Pfizer-.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e21>>

"microvascular injury to the brain, heart, liver and kidneys in a way that is not currently being assessed in safety trials."

Health officials are telling parents that children should be vaccinated for the sake of herd immunity. What is largely ignored are the studies that show children are not driving the pandemic and, in fact, appear less likely

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpublications.aap.org%2Fpediatrics%2F19-Transmission-and-Children-The-Child-Is&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e2172>>

to transmit the virus than adults. Children's Health Defense, The Defender notes

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde-immunity-myth-covid-vaccines-kids-deceptive-dangerous%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7>>

:

"In short, public health leaders say, parents must 'vaccinate the young to protect the old.' Given the federal government's estimate that one vaccine injury results from every 39 vaccines administered, it seems clear that officials expect children to shoulder 100% of the risks of COVID vaccination in exchange for zero benefit."

An opinion piece in The BMJ

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fblogs.bmj.com%2Fbmj%2F2021%2F19-vaccines-for-children-hypothetical-benefits-to-adults-do-not-outweigh-risks-to-children%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>>  
by Peter Doshi, Elia Abi-Jaoude and Claudina Michal-Teitelbaum highlight why we must not force children to take the COVID shot simply because it might help vulnerable adults.

They write

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fblogs.bmj.com%2Fbmj%2F2021%2F19-vaccines-for-children-hypothetical-benefits-to-adults-do-not-outweigh-risks-to-children%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>>  
:

“Even if we were to assume this protection does exist, the number of children that would need to be vaccinated to protect just one adult from a bout of severe covid-19 — considering the low transmission rates, the high proportion of children already being post-covid, and most adults being vaccinated or post-covid — would be extraordinarily high.

“Moreover, this number would likely compare unfavorably to the number of children that would be harmed, including for rare serious events. A separate, but crucial question is one of ethics. Should society be considering vaccinating children, subjecting them to any risk, not for the purpose of benefiting them but in order to protect adults? We believe the onus is on adults to protect themselves.”

Doshi was even more blunt in his June 10, 2021, public comment

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=to-the-FDA%27s-Vaccines-and-Related-Biological-Products-Advisory-Committee>>. There, he pointed out that the FDA can only authorize the use of a medical product in a population if the benefit outweighs the risk in that same population.

This means that even if adults were to benefit, the COVID shots cannot be authorized for children unless children will actually benefit from it themselves. In the case of COVID-19 injections, children cannot benefit, seeing how they only have a 0.005% risk of death in the first place.

Healthy children have died shortly after the jabs and dozens of cases of heart inflammation have been reported.

Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis. Historically, vaccines have been pulled after reported damage

At no other time in history have “vaccines” been created and distributed with such impunity.

The closest scenario occurred in 1976 when one young soldier died from a new form of flu that triggered fear and the subsequent development of a flu vaccine

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsmithsonianmag%2Flong-shadow-1976-swine-flu-vaccine-fiasco-180961994%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>>  
aimed at 80% of the American public. While the World Health Organization (WHO ) took a “wait and see” approach, the Centers for Disease Control and Prevention (CDC) jumped in with both feet.

It was a pandemic that never materialized and those who were the real victims were the roughly 450 people who developed

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdefenders%2Fthe-safety-review-eu-regulators-pfizer-moderna-astrazeneca-more->>

data%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d  
Guillain-Barre syndrome  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.smithsonianmag.com%2Fsmithsonianmag%2Fnews%2Flong-shadow-1976-swine-flu-vaccine-fiasco-180961994%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
, a rare neurological disorder, and the roughly 53  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.foxnews.com%2Fopinion%2Fcarlson-how-many-americans-have-died-after-taking-the-covid-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
who died from the vaccine.

The rush to produce the newest vaccine iteration ostensibly began in early 2020 after the WHO announced SARS-CoV-2 would produce a worldwide pandemic  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpubmed%2F32328738&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
and an early, flawed mathematical model  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cato.org%2Fblog%2Fhow-one-model-simulated-22-million-us-deaths-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
predicted millions of deaths in America. Yet, this was not a medical product that fit the definition of a "vaccine."

It was something never heard of before in vaccinology, based on an experimental mRNA technology that triggers your body to produce a spike protein  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdepression%2Fvaccine-spike-protein-travels-from-injection-site-organ-damage%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
. It was so new, in fact, that the CDC decided the definition of "vaccine" had to be changed  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.citizensjournal.us%2Fthe-cdc-suddenly-changes-the-definition-of-vaccine-and-vaccination%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
and scientists were unsure of how the body would react to the genetic therapy injection.

While the swine flu injection was pulled after 45 million shots were given when 53 people died  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.foxnews.com%2Fopinion%2Fcarlson-how-many-americans-have-died-after-taking-the-covid-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
, the COVID-19 injection will have a different history.

According to data from the Vaccine Adverse Events Reporting System (VAERS), collected by the CDC and U.S. Food and Drug Administration (FDA), there have been 21,002 deaths recorded  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdepression%2Fcdc-covid-vaccine-injuries-fda-pfizer-booster-kids%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
in conjunction with the COVID jabs as of Dec. 24, 2021  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fopenvaers.com%2Fcovid-data&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
, 12 months after the first shot  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Fnational%2Fcoronavirus%2Fcovid-vaccines-new-york%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
was given in the U.S.

According to Bloomberg  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.bloomberg.com%2Fgraphics%2Fvaccine-tracker-global-2021%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>

distribution%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%  
, as of Dec. 23, 2021, there have been 499 million doses given in America.

It is difficult to compare these numbers since two of the three available COVID shots require a double shot, so there haven't been 497 million people vaccinated. Yet, the adverse events and deaths are also occurring after just one shot.

Taken at face value, the U.S. shut down the vaccination program in 1976 after 0.000117% of people died, while the VAERS estimate is that 0.00407% of people have died after a COVID injection (using Bloomberg's Dec. 21 dose numbers of 497 million).

In other words, based on the percentage of people who have died, 3,378% more died after the COVID injection than from the swine flu injection. There have been 965,841 adverse events reported, including permanent disabilities and heart attacks in young people

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde-moderna-pfizer-covid-vaccine-teens-myocarditis%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
. And yet, stakeholders in the shot insist the next generation of Americans must take it.

Pfizer announced youngest kids not responding to the shot

Pfizer has been working on a clinical trial

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fclinicaltrials.gov%2Fct2%2Fshow%2Fstudy%2F00000001%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>  
to evaluate the safety of the mRNA jab in healthy children, intending to create a dose for children 6 months and older. Endpoints reports

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline-farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>

Pfizer recently announced "non-inferiority was not met for children between the ages of 2 and 5 when compared to older teenagers in the current trial."

Originally, the company hoped to apply for an emergency use authorization (EUA) for the youngest by the end of December 2021. However, since the data have not proven successful, they hope to submit for the EUA "in the first half of 2022

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fendpts.com%2Fpfizer-plans-to-trial-a-third-shot-for-its-covid-19-vaccine-in-the-youngest-kids-pushing-back-its-timeline-farther%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>

, " one short year after starting the experiment.

The company said

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pfizer.com%2Fnews%2Fpress-release%2Fpress-release-detail%2Fpfizer-and-biontech-provide-update-ongoing-studies-covid-19&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C11d0e217>

it has made a shift to giving three doses in smaller amounts to raise the immune response. They explain the decision this way:

"Compared to the 16- to 25-year-old population in which high efficacy was demonstrated, non-inferiority was met for the 6- to 24-month-old population but not for the 2- to under 5-year-old population in this analysis ...

"The decision to evaluate a third dose of 3 µg for children 6 months to under 5 years of age reflects the companies' commitment to carefully select the right dose to maximize the risk-benefit profile ...

## Children are not at risk from COVID

Despite low rates of infection and death, the American Academy of Pediatrics calls "vaccines our best hope to end the COVID-19 pandemic"

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhealthychildren.org%2FEnglish%2Ftools%2Fask-the-pediatrician%2FPages%2Fwhen-can-children-get-the-COVID-19-vaccine.aspx&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>.> However, we do know that the risk to children birth to 17 years is so small as to be inconsequential.

The CDC reports

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2Fdata%2F2020%2F19%2F19-000001%2Ftable\\_0101a.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fnchs%2Fnvss%2Fdata%2F2020%2F19%2F19-000001%2Ftable_0101a.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C)> a total number of deaths in 2020 and 2021 from COVID-19 in this age group as 668 as of Dec. 23, 2021. One study

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.researchsquare.com%2Farticle%2Frsos210689684%2Fv1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> posted July 7, 2021, looked at deaths in the U.K. during the first 12 months of the pandemic and found that 99.995% of children survived.

Between March 2020 and February 2021 only 25 children under the age of 18 had died in the U.K. as a direct result of the infection. The researchers found there were 61 children with positive test results, but 36 deaths were attributed to other causes. This is a 2-in-1 million

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.researchsquare.com%2Farticle%2Frsos210689684%2Fv1&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> absolute mortality rate for children.

More children have died from the shot than the illness

To compare the number of deaths from COVID illness against those who have died from the genetic therapy injection, we must address the known under-reporting factor (URF) in VAERS

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Freportevent.htm&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> , which is a passive reporting system

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdebtv-doctors-scientists-brian-hooker-jessica-rose-vaers-system%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> and the only area where the public can voluntarily report adverse events, including death.

The VAERS document

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2FuploadFile%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> is long and time-consuming, and while much of the information is necessary, the form can easily become overwhelming when doctors have multiple patients with adverse events

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.catholicworldreport.com%2Farticle%2Fblow-the-whistle-on-vaccine-deaths-and-injuries%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> from the COVID-19 shot.

Several factors likely contribute to the URF, including the length of the form, lack of knowledge of the system and a growing physician shortage

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.aamc.org%2Fnews-insights%2Fus-physician-shortage-growing&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>> 11d0 .

One investigative team updated the URF

by Peter Doshi, Elia Abi-Jaoude and Claudina Michal-Teitelbaum highlight why we must not force children to take the COVID shot simply because it might help vulnerable adults. They write

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fblogs.bmj.com%2Fbmj%2F2021%2F19-vaccines-for-children-hypothetical-benefits-to-adults-do-not-outweigh-risks-to-children%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C34b35479232a4125455e08d9d240a03f%7C>>

“Even if we were to assume this protection does exist, the number of children that would need to be vaccinated to protect just one adult from a bout of severe covid-19 — considering the low transmission rates, the high proportion of children already being post-covid, and most adults being vaccinated or post-covid — would be extraordinarily high.

“Moreover, this number would likely compare unfavorably to the number of children that would be harmed, including for rare serious events. A separate, but crucial question is one of ethics. Should society be considering vaccinating children, subjecting them to any risk, not for the purpose of benefiting them but in order to protect adults? We believe the onus is on adults to protect themselves.”

Doshi was even more blunt in his June 10, 2021, public comment <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv=to-the-FDA%27s-Vaccines-and-Related-Biological-Products-Advisory-Committee>>. There, he pointed out that the FDA can only authorize the use of a medical product in a population if the benefit outweighs the risk in that same population.

This means that even if adults were to benefit, the COVID shots cannot be authorized for children unless children will actually benefit from it themselves. In the case of COVID-19 injections, children cannot benefit, seeing how they only have a 0.005% risk of death in the first place.

Healthy children have died shortly after the jabs and dozens of cases of heart inflammation have been reported.

Since when, in the history of public health, have children been sacrificed to protect the sick and elderly? Public health authorities have completely reversed the conventional risk/reward analysis.

To board WA state health,

I'm very concerned about the implementation of WAC 246-100-040 in the State of Washington.

This new law is an egregious overstep of the government. These are draconian measures that come too close to Nazi Germany and the deportation of millions of people into concentration camps.

I'm very disappointed with the Democratic party and will NEVER support a Democrat again in my lifetime if this law passes. The government has lost its mind and sanity in this battle against COVID.

Subject: Rules Hearing re: Communicable and Other Certain Diseases

External Email

Dear Washington State Board of Health:

I have lived in Washington for 53 years and have been a registered voter since I was 18 years old. I am a mother and wife in addition to being a concerned citizen. I am a small business owner, home owner, and investment real estate owner in Washington; more specifically Snohomish and King Counties.

I am writing regarding the proposed policy changes to "Communicable and Other Certain Diseases" you will be discussing on January 12, 2022. Specifically:

\* Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

\* Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

This is NOT in Washington's best interest. Do not make the proposed changes. There is absolutely no justification for such a drastic reaction to a positive Covid-19 test result. I would suggest a better use of the Washington State Department of Health's time, expertise, and money be spent looking at preventing the 68,700 miscarriages reported on VAERS as of 1/1/2022 or the 442,340 cases of Myocarditis/Pericarditis?

There have been 60,413,059 Covid cases in the US and 858,312 have died according to <https://www.worldometers.info/coronavirus/country/us/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.worldometers.info%2Fcoronavirus/country/us/>>. That means Covid-19 has a death rate of 1.42%. It's hard to find the statistics on how many people have been vaccinated but VAERS reports that 420,040 have died due to the Covid-19 injection and 20,004,540 people have injuries including 713,000 on permanent disability all due to the Covid-19 injection. And those numbers are low as it is common knowledge that VAERS is underreported.

Specifically addressing making Covid-19 injections required in school immunizations. The Covid-19 injection is not FDA approved. You cannot mandate or require a vaccine or injection that has a conditional Emergency Use Authorization; that's not lawful. The repercussions to such a complete overreach regarding the continuing Covid-19 scare will be devastating to Washington and will cost taxpayers big time; think class action lawsuits.

There has been a health scare world wide, no doubt. Covid-19 is not going back in the box and is here to stay. We need to live with it like we do the flu.

Sincerely,

Shannon Cunio

I commented earlier about how mandated quarantine is a violation of freedom and forgot to mention how forcing our kids to vaccinate to attend school is a violation of freedom as well. Kids are low risk and the vaccine has risk as well. It should be up to parents not government!

Thank you

Hello,

Please reconsider enforcing the Covid vaccination on school age children. We do not know enough about the long-term effects of this drug to be putting it into our children's bodies. If and when a child gets covid, their recovery rate is way too high to even consider them to be vaccinated. If the teachers are already vaccinated and the vaccination works then what is the reasoning behind vaccinating the children when they are the least at risk? There isn't any. Leave the children alone and keep them in school.

Concerned Mother,

Stacey Eagle

This is to inform you of my objections to proposed WACs from DOH.

Vaccines are emergency use authorization only. Mandates are not laws. Masks don't work. Vaccines are not working. People, adults and children are dying from the vaccines. Check the news & the VAERS REPORTS. Subscribe to Robert F. Kennedy's newsletters: "Children's Health Defense" - Children have a 99%+ chance of surviving flu, Covid19, delta, omicron and whatever other disease you come up with. Most of us have a huge chance of surviving anything out there unless it's manufactured and injected into a person.

What happened to two weeks to flatten the curve? Two years later we are still Wearing those masks that don't work. What happened to herd immunity? What happened to suggesting, AS YOU SHOULD, good healthy eating, supplements of vitamin C, D, zinc, etc. and good exercise? Love and family is naturally healing as well.

You're still separating everyone!?!?! What is wrong with you people???. Have you lost your collective minds?????

This is The United States of America. We are free citizens. You work for us. This is not 1940 Nazi Germany. You're guilty of crimes against humanity. The consequences are Nuremberg Trials 2.0.

I do not submit. I will not comply.

America is waking up !!! Stop ☐The NONSENSE !!

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Sandra K. Dodgson and Robert G. Dodgson  
21230 Damson Road, Bothell, WA 98021

Please do what is best for our children and vote no to Covid vaccines being required to attend school. Parents should be able to make these choices for & with their kids. It should not be made mandatory.

1. COVID vaccines remain under Emergency Use Authorization. This is not a proven vaccine. We don't know what all the side effects will be in 3, 5 or 10 years. We have already witnessed some terrible reactions & deaths in adults & children.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection. Covid does not react the same way with kids. Why would you give your kids a vaccine that has unknown & harmful side effects, when they have a 99.995% survival rate from Covid.
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. Plus the unknown & already known side effects & deaths.

I am a retired teacher & I would absolutely not be part of giving this vaccine to students. This is not the schools job. I would not want to be responsible for these side effects or even deaths to our children. This decision should be made by the individual families.

Thank You for your time & please do what is best for our kids. Vote no to this mandatory vaccine rule for our kids to attend school. I'm expecting to see many home school families, if this requirement goes through. I hate for kids to miss out on learning experiences & the fun of their school days.

We, as constituents and community members of Washington state, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization and as such are experimental.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank you ,  
John and Carmen Mayo

Dear Freedom Fighters,

<data:image/gif;base64,R0lGODlhAQABAIAAAP///wAAACH5BAEAAAAALAAAABAAEAAAICRAEAOw==>

Together with Dr. Vladimir Zelenko I have been working very hard the past months to create a report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>>  
that shows how millions of people have died from the injections.

The Vaccine Death Report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>>  
is unique in the world, as it shows virtually everything we should know about these injections: how many have died, how many are permanently disabled, what techniques the government uses to hide this, what the agenda is behind this worldwide vaccination push, and so much more.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>>

A first draft version of the report was sent to Dr. Zelenko for review, and he liked it so

much that he shared it right away - and it went viral. With all the typos in it!

The World Doctors Alliance shared it, among many other organizations.

If you saw that first rough unedited version already, please disregard it and download the final version

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>  
. It has a lot of extra information, like testimonies from several whistleblowers who confirm that the government is hiding vaccine injuries by all possible means, and the expert testimony of funeral directors who see firsthand how innumerable people are dying from the shots.

The Vaccine Death Report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>  
has an amazing amount of information and is the most powerful piece of evidence anywhere in the world, that shows how there is a real genocide happening.

The millions of deaths are just the short term wave of destruction. The coming years this number will explode, as most adverse events only show up after a few years.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>

The Vaccine Death Report

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>  
is currently being translated in many languages which will be posted online soon.

Download it now

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>  
, and send it to people in your community who have any kind of responsibility: law enforcement, political authorities, nurses and doctors, school directors and teachers, church pastors, etc.

The report is 100% fact based and has hundreds of references. Every bit of information can be checked.

Don't let this pass you by. The world needs to know! Download the Vaccine Death Report now and share it far and wide.

<https://www.stopworldcontrol.com/report>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.getresponse.com%2Fclick.htm>

If we don't stand up now, we will never be able to stand at all anymore. We have to act now.

Covid vaccines should absolutely NOT be mandatory, especially for kids to attend in-person school. As a parent of children who will be affected by this requirement and as a teacher who is around kids on a daily basis, science does not support this and it is a personal choice.

I myself decided to get the "vaccine" so my symptoms might be lessened if I contract Covid, but only after it was not emergency approved. Kids are not affected the same way as adults (especially with underlying conditions) are. Vaccinated people are getting Covid- not just in breakthrough cases anymore. Mandating the Covid vaccine does not follow the science anymore.

This is a personal family choice that should not be mandated. It will also affect our schools as parents pull kids out of school and are forced- yes- forced- to have their children go remote or home schooled. Non-vaccinated people, especially kids, should not be viewed as second class citizens. This will deny the rights of so many Americans and is absolutely disgusting that it is even being considered.

This is an embarrassment to Washington state.

The Centers for Disease Control and Prevention today released new data showing a total  
of 1,017,001 reports of adverse events

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%  
following COVID vaccines were submitted between Dec. 14, 2020, and Dec. 31, 2021, to  
the Vaccine Adverse Event Reporting System (VAERS). VAERS is the primary  
government-funded system for reporting adverse vaccine reactions in the U.S.

The data included a total of 21,382 reports of deaths

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%  
— an increase of 380 over the previous week — and 166,606 reports of serious injuries

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%  
, including deaths, during the same time period — up 4,100 compared with the previous  
week.

Excluding "foreign reports

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwonder.cdc.gov%2Fwonder%2Fhe  
" to VAERS, 715,857 adverse events

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffin  
, including 9,778 deaths

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffin  
and 63,089 serious injuries

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffin  
, were reported in the U.S. between Dec. 14, 2020, and Dec. 31, 2021.

Foreign reports

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwonder.cdc.gov%2Fwonder%2Fhe  
are reports foreign subsidiaries send to U.S. vaccine manufacturers. Under U.S. Food and

Drug Administration (FDA) regulations, if a manufacturer is notified of a foreign case  
report that describes an event that is both serious and does not appear on the product's  
labeling, the manufacturer is required to submit the report to VAERS.

Of the 9,778 U.S. deaths reported

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%  
as of Dec. 31, 20% occurred within 24 hours of vaccination, 24% occurred within 48  
hours of vaccination and 61% occurred in people who experienced an onset of symptoms

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffin  
19%26STATE%3DNOTFR&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C2d97fc2777a74fed488408d9d2  
within 48 hours of being vaccinated.

The most recent death involves a 15-year-old girl from Minnesota (VAERS I.D. 1974744 <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F1974744>), who died 177 days after receiving her second dose of Pfizer from a pulmonary embolus. An autopsy is pending.

\* 62 reports  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F62>  
of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening, required treatment or resulted in death — with 96% of cases attributed to Pfizer’s vaccine  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F62>

\* 579 reports  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F579>  
of myocarditis and pericarditis with 573 cases  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F579>  
attributed to Pfizer’s vaccine.

\* 146 reports  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F146>  
of blood clotting disorders, with all cases attributed to Pfizer.

U.S. VAERS data from Dec. 14, 2020, to Dec. 31, 2021, for all age groups combined, show:

\* 19% of deaths were related to cardiac disorders.

\* 54% of those who died were male, 41% were female and the remaining death reports did not include the gender of the deceased.

\* The average age  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medalerts.org%2Fvaersdb%2Ffind%2Faverage%2Fage>  
of death was 72.7.

\* As of Dec. 31, 4,730 pregnant women reported adverse events related to COVID vaccines, including 1,499 reports of miscarriage or premature birth.

\* Of the 3,386 cases of Bell’s Palsy  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmedalerts.org%2Fvaersdb%2Ffind%2F3386>

I strongly disagree with wac-246-100-040, wac-246-100-070 & wac246-100-100. We the people make our own choices as we are Americans where's its land of the free. We will not comply. It's our choice to be vaccinated not the governments. Covid vaccine shouldn't be a requirement for school as the current immunization are not required to go to school or have a job. Those diseases are far worse than Covid.

Subject: COVUD 19 VACCINATIONS FOR SCHOOL AGED CHILDREN

External Email

I am writing in regards to the policies listed below that are being considered by the Washington state board of health. Please see content below.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

WAC CODE LAWS:

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-070>

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-045>

<https://app.leg.wa.gov/WAC/default.aspx?cite=246-100-040>

<https://apps.leg.wa.gov/wac/default.aspx?cite=246-100>

<https://apps.leg.wa.gov/wac/default.aspx?cite=246-1>

I am deeply concerned with these proposals as mother and health care provider. There are not scientific findings showing the need for these mandates. There are several concerns as to the long term effects of these vaccines that are unknown at this time. Our children are not highly effected by the COVID 19 virus as evidenced by the extremely high survival rate of 99.995% survival rate.

Also, the COVID vaccines remain under Emergency Use Authorization

Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19.

I have personally known children who have gotten the vaccine, mostly males, that have had blood clots after the vaccine and myocarditis.

Please be extremely cautious when considering putting these policies into law. They are absolutely unconstitutional and threatening our freedoms and the health of our children.

Sincerely,

Shantay DaBell RDH

Subject: STOP THE ABUSE OF POWER!

External Email

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

These proposed laws are abuse of powers and unlawful. They do not consider the fact of natural immunity and that the Covid 19 infections can be passed to anyone even if you are vaccinated. A vaccinated person can also spread the virus. These threats are tyrannical! This not a virus of the unvaccinated it is fear that is be pushed!

Think about it and decide to be better then the fear mongers!

Regards

R. Thykkuttathil

Subject: COVID-19 Vaccine

External Email

Good morning,

I am writing to let you know my opinion and feelings regarding adding the COVID-19 vaccine to the list of required immunizations for school. Is the flu vaccine mandatory? No! It isn't! This is a virus and much like the flu it can cause pneumonia which causes damage to the lungs is not a required vaccine but somehow this is being tossed around that it should be makes zero sense. This is a virus not a disease. Which I do understand TB isn't a disease but TB is deadly. Of course COVID-19 is running rampant, because it is newer. Not enough people have built up antibodies for this virus. It is unethical to force this vaccine on parents and put them in an even harder situation to make the choice of quitting their jobs in order to keep THEIR children safe and go without or potentially harm their children say a reaction happens. And you know parents with pull their children out of the school district. I know I will. You can count on me to pull my 4 children out of the public school system to ensure I keep them safe and I am still the one to decide what goes in their bodies not the government!!!! And think about all those families that will struggle even more because now only one parent is working. Oh but yes they have a choice you will say. But do they really? What a choice to put something into their children's body or keep food on the table. Sounds more like a bribe to me.

So I ask that you please think about my email and all the others and actually put your heart and thoughts into them and make it a choice to have the COVID-19 vaccine just like the flu vaccine.

Thank you,

Sheila Brown

To whom it may concern:

Please read this article, especially the part about children being affected by the vaccine vs their chances of severe covid. With the vaccine proven to no longer stop the spread of Covid I do not see how you can make this a mandatory vaccine for school children. Please keep it as an option for parents to make the choice as to what is best for their families. By having the children vaccinated it will not stop the spread throughout the schools which is the main reason for all previous required vaccines. I beg you to please take into consideration that each person and their medical needs differ and this cannot be a one size fits all issue. I implore you to REALLY look into these issues that are starting to come to light and think about all of the previously "trusted" FDA approved medications (close to 4,500 drugs and devices EVERY YEAR are recalled after previous FDA approval) that have since been recalled due to devastating side effects. Do not be part of making Covid a required vaccine and later regret the possibility of a disastrous outcome. Leave it to personal choice.

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest recommending a vaccine for Covid for school aged children who attend school in Washington State. I am against imposing this vaccine on our children. I believe this to be a horrible overreach of state government.

The Covid "vaccine" is experimental. There have been no studies on the long-term health side effects on children or even on adults. We have never required an untested drug to be used on our children. Making it required to attend public school is criminal and against our constitution.

If you decide to follow through with this abuse of state power, you will be held accountable for the consequences whether they are unintentional or not. You are taking the decision to monitor a child's health out of the hands of its parents. You must then face the repercussions that happen when this trial "vaccine" begins causing health problems way beyond the symptoms of Covid itself.

We do not need this requirement to protect our children or our communities. We need you to consider the constitutional rights we have been guaranteed by our founding fathers to stay free, to live and care for our families and our friends, and our communities based on our religious and moral beliefs.

With respect,

Ron Laycock

Subject: January 12th Board Meeting

External Email

Dear Washington State Board of Health -

I'm writing with regard to the meeting to be held January 12th to discuss proposed actions concerning COVID-19 including mandatory vaccinations for children and the use of law enforcement (or any other form of enforcement) to detain persons for isolation in a quarantine facility due to noncompliance.

The attempt to dissuade public comment by labeling the true meeting agenda on the webpage as misinformation and then thinly veiling it as something other is abhorrent.

Any proposed action including the above are a violation of the freedoms we have guaranteed to us as American citizens by The Constitution of the United States - bought and paid for with the lives of men and women who fought to make us free -and a violation of the worldwide recognized Nuremberg Code.

Any forward movement on these proposals (detainment, isolation, and quarantining for COVID noncompliance or mandatory vaccines for children) will be considered a threat to our "certain unalienable Rights" of "Life, Liberty, and the pursuit of Happiness" and the people of WA state are ready to take action against this violation.

Sincerely,  
Danielle Fish

External Email

I would like to comment on the proposed changes regarding Covid restrictions and enforcement for noncompliant people.  
(WAC 246-100-070; WAC 246-100-040; WAC 246-100-040).

These changes would violate our Right of Conscience and violate our H.I.P.P.A. laws.

The first amendment to the Constitution of the United States states, "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof."

H.I.P.P.A. laws have been painstakingly established to protect our personal medical information. An informed conscience will reveal that these Covid injections, as per CDC information, have killed over 20,000 people, and millions have experienced negative side effects as a result of taking this experimental injection. The proposed changes to WAC 246-100 would lead us down the same path similar to the process used in Nazi Germany, and Communist nations to control its population, to the detriment of its people.

I strongly urge you to NOT adopt the proposed changes!

Ronald Higginbotham, Washington State voter

Subject: Comment for January 12th

External Email

Hi,

I am writing to provide a comment for the Jan 12th meeting discussing applying current infectious disease WAC codes to include Covid for all WA state residents. I and my family stand fully against these proposals, which are over-reaching and deeply immoral. Individuals should have full medical autonomy and decision making responsibility for their medical examinations, testing, treatment, counseling, and vaccination. These are areas of responsibility that should never fall under the government's jurisdiction. It is grievous and wrong to consider including Covid-19 injections in school immunization requirements as science has shown Covid to not be a serious threat against children. Requiring such would be a violation of parental rights.

We stand against these proposed WAC's:

WAC 246-100

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-105

Thank you, Tasha McPherson

To Whom It May Concern,

As Covid is a big concern the topic of a vaccine mandate has been brought up. I have two boys under 10 years old and I am strongly against the vaccine for my kids. I DO NOT think it should be mandated for school or in general. IT SHOULD BE THE FAMILIES DECISION! Both my boys tested positive over the summer with no symptoms. The vaccine just came out and you can not say it's been tested long enough to know the long term effects. Not just in children but adults. My own father got his first vaccine dose and ended up in the hospital 3 weeks later with bleeding in his brain tissue. He now requires a caregiver 24 hours a day. Side effects are coming out daily. You need to stop taking peoples rights away!!!

I hope you REJECT VACCINE MANDATES!

Sincerely,  
Vantha Larson

To whom it may concern:

I have reviewed the agenda to be discussed regarding changing the rules regarding Department of Health codes in relation to "communicable disease". This is my attempt to dissuade you from considering such changes in enforcement related to citizens' health.

These discussion of changing health codes needs to understand the proposed changes involve vaccines that do not have sufficient health and safety clearances in that most have not recieved FDA approval, as well significant reports of vaccine injuries. In the name of freedom and the codes of world wide medicine, we should not be forcing this on our childrens health. It is forced experiments. We should not tolerate this, nor discriminate those who choose not to recieve it.

There will be no end to forcing citizens to make health choices that they do not want if rules like this are put in place. I implore you to continue to support citizen's rights over their own bodies and medical choices by NOT considering detention for non-compliance with health codes related to COVID-19.

Please do NOT consider refusal to provide equal education services to those abstaining from COVID-19 vaccination for school aged individuals.

PLEASE DO NOT APPROVE THESE CHANGES TO THE HEALTH CODE ENFORCEMENT.

Thank you, Concerned Voting & Tax Paying Citizen

Subject: No to Dangerous Vaccine Mandates!!

External Email

Dear Washington State Board of Health,

Assuming the health and well-being of our children are indeed your highest priority COVID vaccines must NOT be mandated for children in any way as they are causing irreparable and irreversible physical harm to growing numbers of otherwise healthy youth and destroying their lives! Our children are NOT lab rats and their health is not to be prostituted for anyone's financial and/or political gain. The VAERS data is indisputable that these rushed biological products called "vaccines" have killed and disabled more people in one year than ALL other vaccines combined over a 30-year period. This madness must be stopped immediately and help for those who have been physically harmed must be made a high priority.

It is truly insane that there's even a question that mandates are even being considered for anyone, and especially CHILDREN, given the vast information available on the harms created by these injections and the tens of thousands of real experts railing against the continued use of these dangerous medical experiments that violate our civil and constitutional rights and all 10 tents of the international Nuremberg Code. The vaccine program should be halted indefinitely until a comprehensive independent investigation involving a credible team of experts are able to investigate the deaths and health claims of the more than 1 million VAERS reports claiming adverse reactions to the vaccines with a focus on the deaths, disabilities, and severe reactions. Unbiased expertise is needed from doctors and researchers having no financial or political incentives toward outcomes in either direction.

Furthermore, an unbiased investigation into the legitimacy of the initial drug trials of all three EUA-approved COVID vaccines are necessary, as significant and alarming information has come to pass recently regarding outright fraud on the Pfizer vaccine trials that both failed to follow proper protocols for human trials and purposely left out or omitted severe adverse reaction information in order to ensure their drug provided data to get their drug approved despite severe harms known.

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.

---

Children are at extremely low risk from covid. Children have a robust immune system already. All at risk people of covid have already been vaccinated. We should stop pretending like vaccines will protect or children from heavily variated strains like omicron and start educating people to simply live healthy lifestyles with diet, excercise and stress management. And also start focusing on early treatment. Please do not force our children to be vaccinated for covid with a vaccine that by any other definition is not a vaccine at all. Also it is still in emergency use authorization.

☐ PLEASE DO NOT DO THIS!!! The "vaccine" does not work and is not necessary for most healthy children. It has not stopped people from getting the virus and there are so many unknowns about its long term affects. Let's not "experiment" on our children! If parents want to have their child given the shot it should be our CHOICE!!

I have a 3 year old son who I do not want to receive this shot nor does he want to receive it. He is an extremely healthy boy and had Covid and fought it in a matter of hours. The majority of our children are resilient and are not adversely affected by this virus. We need to treat it like we do the cold and flu, which this new version basically is.

Gov Inslee has not made good decisions during this pandemic. He has isolated us and caused hatred among people, including friends and family. His decision to keep businesses closed forced many to close permanently. His unemployment compensation has created a lazy bunch of young people who do not want to work which is creating another problem for business and consumers!

If our state legislature and acting agencies continue to push for this mandate, my family will have to consider pulling our son from Spokane schools. I pray that you will very seriously consider the affect this decision can have on Washington school population and enable people to continue to have a choice over their bodies in this matter. Again, this "vaccine" has a lousy track record for stopping the virus.

Let's work towards bringing all these mandates to an end! Including masking up our children! What a joke! Let them be children and not teach them fear! Let our society get back to normal by stopping all these mandates and let the good citizens of Washington make their own choices.

I appreciate your consideration and pray that you vote for freedom!

Sincerely,  
Valerie Ward  
Born and raised Spokane Citizen

Please say no to these continued tactics of fear and control. We cannot control this virus. We need health, exercise, community, nutrition and love.

Pumping children full of experimental drugs and endless boosters, masking smiles and inhibiting a child's right to breathe fresh air. These methods are not working. Please read The Real Anthony Fauci which is a #1 bestseller so you can be informed on what is going on.

Together we can end this by ensuring medical freedom, insuring community and real health - nutrition, fitness, friendship. Enough of fear, propaganda, mandates, concentration camps. Enough.

Thank you!

Subject: This is NOT OK in WA

External Email

I refer to the WA Board of "health" and their proposal to apply current WAC infectious disease codes to include Covid to all WA residents.

On behalf of myself and extended family, I do not consent to this, or to anyone who represents my health or the health of my fellow citizens, applying such codes or orders onto the residents of WA. These codes while perhaps seemingly for the greater good, when applied or related to what we have witnessed in the last 30 months, where every human right has been destroyed in the name of "greater good" to the utter detriment of all that is truly about health and wellbeing and our most fundamental human rights, are alarming. How can we ever trust a department to consider individual human rights when recent history shows there is no respect for the wellbeing and rights of the residents of this state or this country - we have lost it all. We have lost all trust in your system. These proposed orders will destroy even more the rights of people to bodily integrity and health choices. Please do not support this move. It is a terrifying one in the face of all the freedoms we have already lost, and the crimes already being perpetuated against the people of Australia.

Thank you

A deeply concerned citizen

Wendy S.

To Whom It May Concern,

I am a nurse who recently had to make the decision to take a "vaccine" for covid in the next few months. I did some research to find out what I may be putting into my body.

There are so many medical professionals, government officials and opinions involved in requiring me to take this shot, whom I do not trust, therefore my research gave me pause.

Secondly, I saw that nobody in authority was talking about treatment! Why not? In the past, a new diagnosis that comes out has a flurry of studies to find treatments.

And lastly, I looked at the new technology in the shot, has it successfully run through trial, is it approved by those in authority? No to all of those.

I have spent a day exploring the VAERS government reporting site and I am completely appalled that this much death and injury has occurred. And our government still wants to mandate it? There were so many deaths in young people just hours and days after receiving a second dose of the shot. Page after page were the same stories of severe vomiting, cerebral hemorrhage, cardiac arrest, clotting, all resulted in death. I focused my search on young people ages 17-40 because there were too many in the older population to go through.

My concern is now for what the government wants to do to our children. Wow, that was a scary sentence. There are millions of concerned parents that do not want our children and grandchildren to receive this shot. Children do not need the covid vaccine and it will kill and injure more of them than it will help as revealed in my research.

- Children only have a .02% chance of dying from this illness and the children that died had other comorbidity. Most children have only mild cold or flu like symptoms. The shot will have worse effects than covid.

- The total count of death and injury by the shot from the VAERS reporting site has, as of Jan 7, 2022 exceeded one million injured and dead.

- Hundreds of thousand that have had the shot series, even up to 3 shots have still contracted covid.

- There are effective treatments that are proven to work for covid and will work for our children. Natural immunity has not been taken into consideration by the government, which has proven to be effective.

Please consider these words and do not subject our children and grandchildren to harmful injections.

Sincerely,

Shauna Sams, now retired RN who has a new job of fighting for our future generation,

2.           Con

---

My Comment to the SBOH: RE: Policies In my opinion, based on the information I have read provided by the Main Stream Media and other sources, despite all their fear mongering, COVID-19 and its variants appear to warrant the same concern I give to seasonal flu and common cold. The official response of the past two years is totally out of proportion to the danger presented and therefore; my concern that any proposal to apply current infectious disease WAC codes to include COVID-19 may lead, due to fear and ignorance, to the abuse of the aforementioned WAC codes. That said: Local Health Officers have the same responsibility as medical professionals regarding the Hippocratic Oath to Do no Harm. It is unethical and morally wrong to mandate/compel/force any irreversible procedure upon any free man or woman, or their children. Forcing a vaccine/medication is just as irreversible as forcing an amputation. After informed consent, the choice to accept treatment must be the sole responsibility of the individual that is to receive treatment, or in the case of a minor with undeveloped or inadequate reasoning skills, the responsibility of the parent(s). Should the State, under its current authority, involuntarily detain or quarantine for any communicable disease, the State must ensure the detainee(s) suffers no irreparable physical, mental, emotional or financial harm due to the State's actions. The lack of a definition of public health risk is extremely troubling. There is no limit on such degree just behavior and no repercussions for the state. This is not a preview of law-enforcement and is not an appropriate use of already limited resources. This is entirely out of proportion to the situation and completely lacking appropriate definitions and limitations. It is a threat to the public good and everyone civil liberties. This must not happen.

My boys have a right to an education and it should never be contingent on them bring vaccinated for Covid. There was never a mandate for the flu shot and this is just another flu. People have had severe reactions to this vaccine and until they know more about it should be a choice not a mandate. People still get Covid even though they have been vaccinated. I would rather have them take the risk of covid over the risk of the vaccine. Their body my choice. I saw this coming months ago.

I would like to express my strong disagreement with the proposal to make COVID-19 vaccines mandatory for school and childcare admission in our county, as well as state.

As a parent and a member of the community, I implore you to please stop pushing to require Covid-19 vaccinations for ANY child in child care or school.

1. All COVID-19 vaccines currently administered in USA are still under emergency approval. Meaning, that FDA still has not enough scientific evidence to grant a full approval.
  2. Children and young people have a mostly mild or asymptomatic presentation when infected with SARS-CoV-2. They are at near-zero risk of death from COVID-19.
  3. There is an unusually high rate of reported adverse events and deaths following the COVID-19 vaccines compared to other vaccines. Some adverse events are more common in the young, especially myocarditis. Where potential harm exists from an innovation and little is known about it, the precautionary principle dictates to first do no harm. Better safe than sorry.
  4. Medium and long-term safety data about the COVID-19 vaccines are still lacking. Children and young people have a remaining life expectancy of 55 to 80 years. Unknown harmful long-term effects are far more consequential for the young than for the elderly.
  5. Vaccination policies rely on expected benefits clearly outweighing the risk of adverse events from the vaccination. The risk-benefit analysis for the COVID-19 vaccines points to a high potential risk versus no benefit for children and young people.
  6. Transmission of SARS-CoV-2 from children to adults is minimal and adults in contact with children do not have higher COVID-19 mortality.
  7. It is unethical to put children and young people at risk to protect adults. Altruistic behaviors such as organ and blood donation are all voluntary.
  8. Several prophylactic treatments as well as the COVID-19 vaccines are available to high-risk individuals so they can protect themselves.
  9. Natural immunity from infection with SARS-CoV-2 is broad and robust and more effective than vaccine immunity, especially in combating variants. Children and young people are safer with natural immunity.
  10. There are several prophylactic (preventive) protocols and effective treatments available to children and young people with comorbidities.
  11. Vaccinating children and young people is not necessary for herd immunity. After a year and a half of the pandemic, most people either have pre-existing immunity from other coronaviruses, have recovered from COVID-19 or have been vaccinated.
- THERE IS THUS NO MEDICAL OR PUBLIC HEALTH CASE FOR THE MASS VACCINATION OF CHILDREN AND YOUNG PEOPLE, OR FOR COERCIVE OR RESTRICTIVE MEASURES AFFECTING THOSE WHO ARE UNVACCINATED

Will you take upon you the responsibility for the health and well being of innocent children, whom you will be subjecting to unknown risks, in order to receive education (paid for by the taxpayer -their parents) which is an ingrained right of every child? Will you create segregation and discrimination?  
Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Thank you,  
Ulyana

I need to voice my concern that it has been brought to my attention some very disturbing allegations . Is it true that there are plans in place to give the State Board of Health power to FORCE VACCINATIONS? And then power to have police arrest and detain people for observing their constitutional right to CHOOSE whether they are vaccinated or not? These allegations and plans are WAY OVER THE LINE of State government. There is so much scientific and medical evidence that Covid vaccines are harmful especially in CHILDREN. It is the Parents ,for children ,and adults individual right and responsibility to CHOOSE their health care. I am watching and holding each individual in Government responsible for their vote and position on this issue.

Sincerely

I am completely against any of the proposed Covid Policies that governor inslee is attempting to use falsy for the sole purpose of locking people away from their families and their lives. They are beyond immorally rancid and overreaching and promote a tyrannical agenda. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

There is no mistaking the attempted tyranny involved here to take away human rights for life!!! My husband got the vaccine because he is a first responder, yet the people I know who have gotten the covid have all been vaccinated. That fact in itself is an eye opener for thousands. I personally have an 80% plus chance of a brain bleed/blood clot and have lost people to this same issue who get the vaccine because they're FORCED to in the "name of public health" and died. Dead forever. People like myself and those who have the natural immunities and religious belief against it should be pardoned completely yet you would rather they die or lock them away! Choosing to lead with a tyrannical fist; creating a psychological divide of hate and fear amongst the people of Washington is not a solution. Vaccination deaths, the amount of people vaccinated and still getting sick, as well as permanent disabilities caused by the vaccine are ignored and pushed aside in the name of political agendas on high. Natural occurring antibodies are completely ignored and should be given immense consideration, and the people have lost faith in the actual number of covid cases reported are in fact true. As a state we watch Governors like Ron DeSantis and others who don't have to threaten these tyrannical policies to keep their people safe and as a state we have to seriously question the its leadership. Instead Washington residents are stuck living with policies that attempt to silence, spread hate and increase divisional divide. Our moral only get worse while others fair much better. And our leaders think this is the answer, wow. This only leads us to the conclusion that the actual goal is to continue to make life worse and not better for the people of Washington state. Even holding this meeting seems a farce rather than an actual fact/opinion finding mission. Medical freedom is a private choice, and not a choice to be made by anyone but that individual. That decision is between you, your family, and your creator, God Almighty. This is nothing but COMPLETE TYRANNY! The only thing these so called infectious disease WAC codes do is enforce this tyrannical agenda and set the stage for a civil war in our state. It's disgusting and blatant and people will not stand for it.

Subject: DO NOT implement

External Email

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Shana Busby

9.

Do you have any special expertise relevant to this topic?

1. Yes

---

I'm a parent of a child that is K-12.

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

As a parent, having to decide between a vaccine that has no long-term testing under its belt vs. access to education puts me in precarious position. Do I give my child a vaccine that could alter her menstrual cycle or have effects on her fertility just so she can receive education? What needs to happen is to halt mandates and do more testing. The chicken pox vaccine was studied for 15 years before it was given to the public. And then it was heavily debated for almost 10 years before it was made a requirement for school admission. Shouldn't the same diligence be made for all vaccine requirements? What are the long-term effects? We don't know the answer to that question - yet. And until we do, a COVID-19 vaccine mandate for K-12 shouldn't even be considered or discussed.

11.

Are you Pro or Con on the proposal?

2.                      Con

---

The risks of the COVID-19 vaccination for this age group, K-12, outweigh the benefits. Myocarditis and pericarditis are a few of the side effects. Long-term side effects are unknown since vaccine clinical trials only started in the summer of 2020. It is yet unknown how the COVID-19 vaccine effects menstrual cycles in females or if there are any fertility issues that may happen later for both females and males. I'm not anti-vaccine, but answers to these questions need to be provided before a vaccine is mandated for our young people. Adopting this requirement would further promote the hate and fear against those that remain unvaccinated and allow only those that comply to have access to education. Bottom line - should a COVID-19 vaccine become a requirement then we will pull our child out of public school.

Washington State Board of Health Directors,

Do you recall waking from a bad dream and upon reviewing it, you realize it didn't make sense?

Somehow, that is what THIS seems like, something that doesn't make sense.

I feel I am being told I must take this vaccine or I could be arrested and put in detention. If I ask "Why?" The only logical answer would be, "It will keep you from getting covid and it will keep you from transmitting covid to others."

I have to admit those are two very good reasons IF they are true.

"It will keep you from getting covid."

We all know the answer to that due to the number of vaccinated who died from covid.

"It will keep you from spreading covid to others."

As AFLDS' recent lawsuit against OSHA details

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351>, these injections are merely "treatments" that, for some people, may reduce symptoms.

The importance of this cannot be overstated.

For example, the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission."

Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else."

Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated."

With this testimony and over 50 other citations, AFLDS' case against OSHA

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsable.madmimi.com%2Fc%2F351> breaks new legal ground by proving Covid-19 "vaccines" are mere treatments and therefore have no legal grounds for forced use.

This case ends all justifications for the OSHA to segregate injected and non-injected people.

Their mandate is a reckless abuse of power without justification in case law.

Since the only two LOGICAL reasons to take the vaccine have been proven UNTRUE, then "Why am I REALLY being forced to take the vaccine?"

THINK ABOUT YOUR ANSWER FOR A WHILE BEFORE YOU VOTE and what part YOU play in this bad dream...

Thank you for your consideration,  
Larry Ohman

Subject: No on Unconstitutional Vaccine Agenda

External Email

to: Washington State Board of Health

I strongly, yes, vehemently object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. In any case, it is survivable more than the common flu.

Including Covid vaccines as a requirement for attending public school is completely unnecessary, and overwhelmingly restrictive! Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines, and from the paucity of human socialization in their education when so little facial response is possible.

In America, health officers DO NOT HAVE THE RIGHT to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

This is not about our health; it appears to be a criminal attempt for the government to control the population. Those who are proposing this plan are following a very dangerous and unconstitutional agenda given by those who desire to keep the public under fear and in agreement with the current "woke" narrative, apparently for financial gain, through closeted collaborations with the large pharmaceutical companies.

As an educator, I care deeply about the growth and development of our younger members of society! They are suffering enough already from the draconian measures which have created far worse statistics in crime and suicide than we have ever known. I have personal knowledge of the rise in suicides-more children have died from these than from Covid.

PLEASE think intelligently about the outcomes you could be creating!!

Sincerely and sorrowfully,

SHARYN PETERSON

Subject: K-12 Vaccine Mandate is government outreach.

External Email

To whom it may concern,

Our family include three (3) people – my husband, myself and our 11 years' old son. Both my husband and myself have tested positive on this week (Tuesday and Friday respectively), our son tested negative today but we thought this is a "false negative" as he started to have all the symptoms and he still has fever till now, his second report will be ready in 2-5 business days.

Anyway, there will be two possible outcomes for my son's second report.

1. Positive. Which means my son has the Covid antibodies, if that's the case, Vaccine should not be Mandated, as we all understand the basic biology.
2. Negative. If my son exposed himself to two parents who tested positive for 2 weeks and still being healthy, what's the point for him to get the vaccine? He has the natural immunity.

There are no sound reports and evidence to show Covid is fetal to children, the death rate is so minimal among healthy children, why the government has to push the vaccine mandate to K-12? Each person is different, parents should talk to the doctor and make informed decisions based on each family's situation. Vaccine Mandate is totally government outreach, unbelievable!

Subject: Vaccines for K-12

External Email

To the Washington State Board of Health,

I write to express my deep concern over mandating the COVID-19 vaccine for children. From the beginning, children formed a different category when it came to the virus. They are far less likely to contract the disease or to spread it. Most quintessentially, the risk of death is practically non-existent.

The Covid vaccines are emergency approved. They have not undergone the rigorous testing that such an injection ought to endure. Why would anyone mandate injecting a product that is not essential for survival when its lasting effects have yet to be determined? The VAERs database documents an alarming list of vaccine harm. This must not be ignored. Do not put our children at risk.

Ultimately, parents ought to be free to decide if they want their child vaccinated against Covid. It is not the state's role to force a medical decision. One size does not fit all. Parents know their children best and are the ones called to look out for their welfare not the state. Mandating a vaccine violates medical freedom and parental rights. You must not allow the state to become a medical tyrant. Health choices are basic human rights best left to the individual.

I urge you, refuse to mandate vaccinating our rising generation with an experimental vaccine. Our children are precious gifts we ought to protect and parents are most qualified to make health decisions for their own flesh and blood. America's strength stems from individual liberty. Liberty to pursue happiness and health without an authoritarian government.

Sincerely and with urgency,

Vanessa Vis

Tracy,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be

no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Please use common sense, follow the facts, the science, the data. Do not harm our children and communities. This is the United States of America, NOT a communist tyrannical nation state!

Sincerely,

David Kelly

Concerned Citizen, highly motivated to stop this ILLEGAL ACTION

From: Scott Rice  
Sent: 1/7/2022 6:17:25 PM  
To: DOH WSBOH  
Cc:  
Subject: Concerned Parent

External Email

Hi WSBOH-

My name is Scott Rice. I lead a data analytics team for one of the most prominent data-focused tech companies in the world, and I'm also the proud parent of 2 young children. I'm writing to you today to ask you not to add COVID-19 to the list of required vaccines for K-12 education.

Broadly speaking, I'm in favor of our non-COVID vaccine requirements for kids. When we were searching for a daycare for our daughter prior to our current pandemic, we specifically sought one that required the normal array of vaccines. I took a COVID vaccine because the risk-reward profile made sense to me for a 29 year old. However, I have serious concerns about mandating the COVID-19 vaccine in young children.

1) The cost-benefit ratio is not clear.

Benefits: While the adult studies measured what matters (mortality), the Pfizer study in kids didn't study mortality between the control and test groups

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.pfizer.com%2Fnews%2Fpress-release%2Fpress-release-detail%2Fpfizer-biontech-announce-positive-topline-results-pivotal&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C97c3d5c630ed42ab27ea08d9d24cf956%7C11d0e2>>

This is absolutely ridiculous. If you're going to force a vaccine on children, the burden is on you to prove that mortality substantially decreases, which has not been shown. Using the excuse that effect size is too small to capture in a study means you need a bigger study, because that is THE QUESTION at stake. When the polio vaccine was created, we enrolled 600k kids in a study and tested to see if it stopped kids from dying, and it did. This made it easy to convince parents to vaccinate their children, because parents do actually want what's best for their kids.

Costs: The vaccines appear to be largely safe in the short-term. It is unlikely that long-term effects could appear that aren't yet known, but not impossible. This risk makes sense to accept if the vaccine significantly reduces mortality, but that evidence does not exist. Unintended bad consequences can happen. Thalidomide babies happened.

2) There is significant and growing evidence that those vaccinated with COVID vaccines are able to contract and pass along COVID, so it would be untrue to argue that vaccinating students prevents them from passing it on to their family.

3) When you implement a requirement like this, you give parents two choices

Choice 1) vaccinate their child with a vaccine that hasn't been shown to reduce mortality and also hasn't been studied for even a year in children

Choice 2) remove them from school. Admittedly, if we homeschooled, my kids would learn enough statistics to understand why the Pfizer study was poorly designed, so I guess it's not a terrible option. But it's not right for every kid or every family.

4) Exemptions don't solve this. My objections meet the criteria for neither a medical or religious exemption, because the medical situation is not unique to my children, and because my concerns are not driven by religious beliefs (unless you consider it a religious belief to care about children).

Please do what's right and vote against requiring COVID vaccines for school aged children.

Scott Rice

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. The disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are opposing this plan should be charged with treason.

If you want to "follow the science," on the need for Covid vaccination for children, there is virtually no reason statistically that children should be required to take the vaccine for Covid. From day one of this pandemic, children and young adults have virtually no chance of having damaging affects. The risk in administering the vaccine far outweighs natural contraction and immunity. This is not just from my own research from the beginning of this pandemic. You just have to listen to the doctor who invented the vaccine. He would agree with my comments. He made the very same ones.

I am completely against ANY of the Covid Policies that are over reaching and immoral. Of which they most certainly ALL are. I stand against any and all of these WAC's. Words like mandate seem to be more accurately described as dictates, deriving from the words dictatorship/ dictatorial/dictator. If Jay Inslee can "dictate" to the WA State Board of Health, such mandates, cleverly disguised as dictatorial, we have a serious problem on our hands. These, said, mandates, are an infringement on the rights of every Washingtonian, young and old. Forcing such mandates is incredulous. Who does these things? Think WA-BOH members, long and hard, before you cast your vote on January 12, 2022. Setting aside the intense pressure from Governor Inslee, you most likely are experiencing, please, THINK for yourself, I beg you! Don't fall into line and succumb to political & dictatorial pressure from the powers that be. The potential for unleashing the "Pandora's Box" of Civil-Unrest, will be the likes of protest you, me, and the residents of Washington, have never witnessed. Listen, please, to us! We, the people of Washington State, absolutely stand against these WAC's.

WAC 246-100, WAC 246-105, WAC 246-100-070, WAC 246-100-045, WAC 246-040  
PLEASE consider this a plea from a residing Washingtonian for 46 years.

Sincerely,

M.Teresa Vinup

I am completely against any of the proposed Covid Policies that I believe are over reaching and immoral!! We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I stand for medical freedom!! What kind of America do we live in that something like this is even being CONSIDERED?!!?!!?

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

Subject: NO on Unconstitutional Vaccine Agenda

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable. Moreover, more than 99 percent of the population survive. Covid vaccines have little effect on Covid, and in fact, most people who get Covid and spread it have been fully vaccinated, some have even received booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee.

These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Lynn Seulean

Good morning,

I am writing to you as a concerned parent and citizen in our community. To detain people against their will and mandate this vaccination for children is not only wrong, it is unconstitutional and I hope you choose not to move forward with this agenda.

I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank you for helping maintain freedom.

You all need to back off. You need to stand up for the facts and the truth. The truth is covid was here before March lockdowns and no one gave a fuck. They only cared about impeachment. Several of my family members had covid in January 2020 before it was supposedly even here. We got the anti bodies test a year and a half later and we have the antibodies still. Plus non of us have been sick in 2 years. I personally have done my own research and everyone I know that had covid and did not get vaccinated have not been sick since. Those I know who have been vaxxed have continued to get sick or have other health issues. So if you wanna do the right thing to stop covid, stop the mandates stop trying to force the Vax because you won't win. If you keep trying to force you will have thousands that will fight back as well as you will never stop covid if you continue to try to mandate vaccines. The flu has never been stopped so what makes you think you can stop this by forcing vaccines

I was appalled when I was made aware of this on your agenda.

All Americans were given their freedoms from God not Man and upheld but the Bill of rights and Construction.

What you are proposing is against this and you will be help accountable in the planned Nuremberg 2 trials. Quarantine camps, really?!

All free people of Washington, America and the world are again this for a virus that has many knows cures including NATURAL immunity! No we do not want to be Australia as it working badly there.

You need to justify this. Mandatory and FREEDOM don't mix.

Zoom Webinar ID 894 7406 4216 question,

With the breakthrough infections spiking and CDC data showing a person can still transmit the virus and be hospitalized with severe systems, why are the unvaccinated with natural immunity being targeted so hard ? Fauci and the CDC have admitted the antibodies in the vacced fades in a few months, do you see this ever changing? I worry about pushing this on the kids right now, evidence of myocarditis is beginning to pop up, this damage is irreparable..I hope the kids vaccine can be delayed until we have more data. This is being rushed without the normal testing studies...

Thank you  
Scott Storch

External Email  
To the Board:

I can't begin to say how vehemently opposed to your proposals regarding using law enforcement to detain people for quarantine and mandating the Covid vaccination for schoolchildren. The first thing I think about is Nazi Germany and how this will turn Washington into a 21st century Nazi state. This 'forced detention' didn't sit well in Australia either - we all saw how that got out of hand by involuntary placement of people in quarantine if they knew someone who had Covid. Don't think it'll happen - think again because this is the path you're going down.

What law enforcement are you going to get to enforce this? Defunding the police has already stripped our cities of needed law enforcement. Crime is rampant and you want to take the police away from that to put people in quarantine? Think about what you are saying.

I could go on, but this nonsense MUST STOP! No more! Gov Inslee's emergency powers need to be revoked and these proposals need to be stopped. We don't live in a police state - we live in a free nation to choose as you will. Why do you want to take that away from everyone. It's a slippery slope you're going down.

Sincerely,

Tim Gremlinger

1. Yes

---

1. WAC 246-100 Rulemaking that would expand any 2.C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

11. Are you Pro or Con on the proposal?

2. Con

---

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. Many studies have shown that this vaccine has risen the incidence of a sever and/or deadly reaction to the virus with use of the vaccine. There is no medication, no therapy, no treatment, no medical procedure that is 100% effective on 100% of any population. This vaccine is no different. Secondly, this mandate and all discussion of the vaccine has not included or dealt with those who have already had natural immunity via having the virus. Thirdly, this violates both our State and Federal constitutions.j We don't lock people of for personal choices. This is not Nazi Germany or any other dictatorship.

Subject: Public comment of WAC 246-100-040

External Email  
Dear Wsboh:

Please enter these comments into the public record and I would like to request a receipt of this letter because I simply do not trust your office to enter this letter into the record and I need to establish some sort of paper trail to at least try to confirm it. I am unable to speak during the public comment period as I work nights and will need to be asleep during the comment section.

My comments pertain to the meeting being held on 1/12/22 in which a proposal to add "emergency detention orders" and mandating that kids be vaccinated against Covid in order to attend school is being discussed and is known as WAC 246-100-040.

Thank you for clarifying what the meeting being held on this date is supposed to be about as opposed to what was being said on social media. However, your decision to even discuss adding this 'addition' to Washington's Administrative Codes is reprehensible. You know, as well as I do, that you have every intention of implementing this blatant policy of discrimination despite what the public comments may say. To you and your political party, the public comment period is just a formality in order to give the illusion that the public was actually involved in its decision-making when the decision has already been made.

As I vaccinated person I want to be on record as being 100 % opposed to what is purely a communist policy at best, or a fascist policy at worse. Discriminating against people who chose not to take a vaccine, which is proving each and every day to be completely ineffective as more and more vaccinated people are coming down with Covid, is disgusting. You, Democrats, are blaming the failure of the treatment on those who did not take the treatment. It makes no logical sense and proves beyond a shadow of a doubt that this policy has nothing to do with the disease process and is only about control. Has not history taught you anything? These 'proposed' policy changes are the exact same thing that the 1930's Germans did to the Jews. There is no difference as the exact same rationale is being used to justify the policy, and you are actually calling for people to be placed in concentration camps. The Democratic party is certainly making Hitler proud, even Stalin would agree with your methods of creating a Gulag.

Therefore, I demand that this policy of "emergency detention orders" and the child abuse of mandating kids be vaccinated be rejected.

Thank you'

#### External Email

From the beginning of this pandemic, the risk of Covid to young people has always been extremely low, a finding public health officials have downplayed instead of acknowledged. According to the American Academy of Pediatrics, children have represented 0.00%-0.27% of all Covid-19 deaths.

In other words, a total of 803 American children have died from Covid or with Covid over the last two years. That's less than the number of total deaths from both influenza and RSV infection in a typical year before the pandemic. A recent study of children in Germany found that no healthy child between the ages of 5 and 17 died of Covid during a 15-month period when nearly all were unvaccinated. Zero. In the whole country. And yet there is very much a public health crisis facing young people. It is a crisis that's been created by these draconian Covid policies—a crisis that's the result of depriving young Americans of the basic enjoyment of life and the benefits of human connection. A study conducted by The Jed Foundation, a nonprofit that combats suicide among young people, found that, over the course of 2020, 31% of parents said their child's mental health was worse than before the pandemic. There has been a surge in hospital visits for self-harm, a surge that was particularly acute among adolescent girls. The U.S. Surgeon General recently declared a mental health crisis among young people globally, citing 25% of youth experiencing depressive symptoms and 20% experiencing anxiety symptoms.

---

It is my understanding that the Covid-19 related topics of quarantining, isolation and inoculation of minors as a pre-condition to attending school are being discussed in this board meeting. Id like to express my views on these three topics. All three of these proposals should be soundly rejected. First, quarantining and / or isolating the unvaccinated accomplishes nothing. It would be a policy driven by irrational fear rather than reason. Remember that these gene therapy vaccines do not provide immunity, only a reduction in severity of the disease, so a vaccinated person who catches Covid-19 would be just as contagious as an unvaccinated person. In fact studies are showing a greater viral load in vaccinated persons who catch Covid 19. Second, the Omnicron variant is proving to produce a mild illness comparable to the common cold so quarantine and isolation make even less sense. Here is a link to a medical lecture by Dr. Mobeen Syed MD, a much followed medical educator:

<https://www.youtube.com/watch?v=VfF43zt42Jw&t=178s>, In addition, we must not forget that the mRNA and Vector DNA vaccines are experimental and have proven to be high risk already. One only need to look at the VAERS reporting system to see that adverse advents from vaccines have skyrocketed since the introduction of these inoculations. I could cite numerous sources, but a very recent finding is extremely alarming and clearly indicates the true extent of the adverse impact of these vaccines is likely hidden. I speak of course of the findings of the two eminent pathologist professors from Germany, Dr. Sucharit Bhakdi and Dr. Arne Burkhardt. Here is a link to their findings.: <https://stevekirsch.substack.com/p/bhacdiburkhardt-pathology-results> Under no circumstances should education be denied to unvaccinated children. Children have a robust immune system and experience has clearly indicated that cases of Covid-19 are extremely mild. It would be the height of carelessness to coercively subject them to these inoculations in light of the known risk. A risk / benefit analysis would clearly indicate that they should not be subjected to the risk of the vaccines. The decision of whether to inoculate or not should be left solely to fully informed parents with no threat to deny their children access to education if they don't comply to vaccination for their children. Thank you for considering my concerns.

Subject: Mandating covid injections

External Email  
America...Land of the FREE!!

There is no freedom with coerced/forced/ mandated injections that people don't want.

Even the makers of covid jabs aren't even taking them. ☐☐☐☐ That pretty much says it all.

The Chinese, and the Russians aren't covid jabbing their military.☐☐☐☐

The Chinese have already claimed to have won the biohazard war.

Covid injections do absolutely nothing beneficial for humans.  
They ruin your immune system, and organs .

Covid injections cause heart attacks, seizures, thrombosis, unstoppable bleeding, death, COVID, Aids, mumps, shingles, paralysis, brain hemorrhaging, lung collapse, exacerbate cancers, strokes, inability to talk, clots, unstoppable bleeding, lung collapse, and more.

True vaccines prevent. Covid jabs don't prevent. That means they aren't vaccines. They are toxic.

I watched my best friend across the hall from my apartment die a miserable, dragged out death after her 2nd covid injection.

I saw her leg swell up extremely painful, huge, and red; from blood clots after her covid injections.

I watched her foot turn black from lack of blood (blood clots) causing her to lose her ability to walk. Only after her covid injections.

I watched her lose her strength. To the point that she was no longer even be able to move her wheelchair. She could no longer get up to go to the restroom on her own. After the injections.

I listened to her sounds of excruciating pain daily, caused by the covid injections.

I loved her dearly. So, as her friend; I cleaned up her body fluids when she was unable to get out of bed.

I fed, and cared for her regularly without pay, when nobody else was around to care for her.

I took care of her, cat because she was no longer able to...after her covid injections.

I listened to her beg me to kill her several times..because she was in so much pain. After her covid injections.

She was my best friend. Watching her suffer, literally to death has been extremely hard on me. She is gone forever now. Her stuff needs to be emptied from her apartment.

Her brother got his 2nd covid injection at the same time as her. He has suffered with shingles from the waist down for months. Only after getting his covid injections. Now he is dying of liver failure, with severe pain. Which he didn't have until his covid injections.

Another neighbor a couple of doors down the hall also died this past week. After taking the covid injections. His girlfriend also went to the hospital with a 50/50 chance of survival.

That's 3 people out of 8 apartments units, in just a week, and a half who I will never see again. Suffering, and dying needlessly. The 4th person is the brother who came to bring his dying sister groceries, even though he is very ill himself.

I took care of my best friend who believed the covid jabs would protect her from getting covid. The injections didn't protect her from anything. They killed her painfully, needlessly, and prematurely. In the end, the covid injections didn't prevent her from getting covid; and dying.

Now her brother is in severe pain, with his liver failing. Only after his covid injections.

Massive cruise ships with only covid injected people are coming home with covid. That alone says a lot.□□

Covid injections are medical procedures. Hitlers Doctors were hung for forcing unwanted medical procedures on people who didn't want them.

This is still America. If people don't want to be injected with experimental gene therapy, toxic jabs. They shouldn't be forced/coerced/ mandated on them. In my opinion forcing them on anyone is pre meditated murder.

Please please help in anyway possible to continue to keep America land of the FREE.

God gave us basic freedoms. Since the Government works for the people.. The Government shouldn't be trying to take away any of those freedoms. We should learn from history, and not repeat horrific mistakes.

Thank you for your time.  
Sincerely

If there are any plans to allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with requests for a medical exam, testing, treatment, counseling, or vaccination then I STRONGLY object. While our family has been following vaccination guidelines, it is absolute NOT OK to do such a thing to people in the United States of America. Whoever came up with this should be ashamed and resign immediately.

There should also not be any law enforcement harassment of anyone not in compliance of COVID-19 school immunization requirements.

Sincerely,

Subject: No mandatory covid vaccine for students

External Email

I heard that you postponed your discussion about mandating the covid vaccine for students. I want to share my feedback, for consideration whenever you have this discussion.

The covid vaccine is not preventing transmission of covid 19, as evident by the current outbreaks among fully vaccinated school staffs. For this sole reason, it should not be mandated. Isn't the point of school vaccine mandates to stop the spread of communicable diseases at school? Well, this vaccine will not do that.

I am vaccinated, and so are many others I know. Nevertheless, so far I personally know 12 vaccinated people who got covid (this includes me and my family), and that's everyone I know who was exposed, plus 7 unvaccinated people who live with them and got it too.

Sure, we could get a philosophical exemption (well, I would hope, even though it was taken away for the MMR), but do you know how hard it is to find a doctor willing to sign an exemption?

Since the vaccine is not preventing transmission, but only severity (although the disease is generally mild for children, which was definitely true for my own), then it should be left as a personal choice, not a mandatory one.

Thanks,  
Rachel Nicholson

Subject: WAC proposals covid 19

External Email

Dear Board of Health Members,

I've recently become aware of the Washington Administrative Code (WAC) proposals regarding Covid-19 requirements for school age children. I am in complete OPPOSITION to this proposal, and disappointed in our state leadership for allowing this infringement of our rights to even be considered. Science proves that Covid-19 is as much a threat to our children as the common cold, and yet you've allowed fear and mob mentality to dictate your legislation. The possible side effects of this vaccine, which science shows to be ineffective at eradicating Covid-19 and has not received adequate long-term testing, outweigh the risks of the disease, but you are seeking to overturn the rightful responsibility and judgment of parents. This is NOT a childhood disease, and does not compare to the other diseases that we've largely eliminated through vaccines. While I am thankful for access to a vaccine, I fully support the CHOICE to vaccinate against Covid-19 or not. As we have equal access to a vaccine, allow each individual to assess their own assumed risks and make the necessary decisions for their own family.

The WAC proposals regarding quarantine and forced exams, testing, treatment and vaccines are unnecessary and over-reaching. The death rate for Washington state has been steadily declining for the past four months. While the cases have increased, the number of asymptomatic and low sickness vs. extreme cases have not been provided. The only data is deaths and cases, and based on these numbers, while many people have contracted the illness, not many are dying; certainly not in numbers that require you to force people to be quarantined, examined, tested, treated or vaccinated. I am OPPOSED to any forced actions and extremely disappointed that it is being considered.

Washington state residents should be able to make the choice for themselves. We have all had or seen extreme illness in our lives, this is not being taken lightly. Trust your citizens to make the decision that is right for them and their family.

I appreciate your consideration.

To whom it may concern, I am adamantly opposed to any legislation, regulation, administrative code that forces me and my family to act in accordance to a government overreach in any capacity: specifically covid shots, the refusal to inject my person and my family with a substance, and the proposed Isolation/Quarantine Facilities.

Many have self-quarantined until results came in and self-isolated once known to be infected; as we the people were instructed to do which was reasonable. To use force: physical or by way of retaliatory means; i.e. fines and other punishments/restriction in a free society is immoral.

I stand against proposed WAC 246-100, WAC 246-100-040, WAC 246-100-45, WAC 246-100-070 and WAC 246-105.

From a member of the government of the people, by the people, and for the people.

Subject: Proposed Covid-19 codification

External Email

To whom it may concern,

I want to voice my opposition to the inclusion of Covid-19 to the WAC. The codes I'm referring to are:

- \* WAC 246-100-070
- \* WAC 246-100-045
- \* WAC 246-100-040
- \* WAC 246-100
- \* WAC 246-105

It is staggering to me that the WA board of health would even consider such overreach as using law enforcement to quarantine families against their will. It's obvious you have lost most, if not all understanding of the personal liberties afforded every US citizen through the Constitution of The United States of America. You do not have the constitutional right to any of the ideas proposed. They are not only unconstitutional they are tyrannical.

I urge whoever reads this email (if anyone) to please uphold personal liberties above all else.

On a personal note, I do not trust you or the WA State legislature to make health decisions for me or my family.

Tobin

I am firmly against the covid quarantine/detention procedures mentioned in this bill. This is a violation of citizens rights as stated in the Constitution of the United States of America. Many people including myself are now aware of the Covid scam that is being used as an excuse to give people an experimental shot for a disease that is mostly survivable, a shot that is intended for depopulation! I am aware of the corruption in this state via Jay Inslee and many others, and this bill is an extension of their efforts to turn this state into a Marxist state. Many citizens of this state are armed and WILL defend themselves and their property which we have the right to do according to the Constitution! You all will be held responsible for all the deaths and injuries you have caused in modern- day Nuremberg Trials!!

The people are waking up!!

I'm writing to state you as WA Health Dept representing me, thst I do not want enforced mandates for students for a covid vaccine. As you represent citizen health decisions you understand there hasn't been sufficient research or testing in this vaccine. There is well documented cases of students who have myocardium in males and issues with sterilization for females.

It should be a parents choice for their children in regards to masks or vaccines.

Please reconsider all information and do the right thing for student health.

External Email  
To Staff and Board Members,

I've grown up in Washington and have lived here my entire life. Family values are very strong within me. When my Grandpa passed one of the last things he said was, "Family is Everything." My Kids and my Family are Everything to me. I think everyone understands the importance of family. A lot of times, whether one's family is supportive/present or not, friends can become like family too. So what it means to be part of a "family" is well understood.

Parents are the sole protectors of their children, and have a say in what can and cannot go into their bodies. This is in line with our constitutional rights and is instinctive in nature. I grew up with so much freedom and security in the world around me. I think a lot of that sense of security came from the security my parents and family felt in the world then, and their ability to protect us. Now things are seemingly drifting from our foundational constitutional rights as humans and as parents. That security I felt, gone. Now, as a parent, I feel fear and distrust in our governing bodies. This makes me grieve with so much sadness for people currently and for our children and their future.

I was in the pharmaceutical industry for nearly 10 years. Everything was highly scrutinized for safety and efficacy. People had the choice of what they put into their bodies. The goal was to treat people early to help keep them out of the hospital. Talking about the importance of early treatment and preventative measures to keep people healthy and out of the hospital was encouraged. Less hospitalization equaled better outcomes for patients and lower cost to healthcare. With Covid, early treatment and preventative measures are being suppressed, their importance is not being emphasized enough, and patients have been waiting until they are so sick that they have to go to the hospital to be treated. With Covid, there is now a fear that I as a parent could be mandated to consent to having my children vaccinated in order to attend school. Mandates are unconstitutional in themselves, especially mandates to take a vaccine without knowing the full side effect profile and long term side effects. A vaccine that could cause permanent damage to children's/human's organs. A vaccine that doesn't stop people from getting or transmitting Covid. A vaccine that doesn't make sense for low risk children. All the unvaccinated kids in my family that have had Covid have either been asymptomatic or have had very mild symptoms and recovered quickly.

Please no Covid vaccine mandates, no mandates for children to get the Covid vaccine to attend school, and no adding Covid to the required vaccine list for school age children.

These are our babies and the future of our world. A lot of people's Everything.

Thank you for your time thoughtfulness,

Heather Vaughan

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education \$\$\$ and they can go elsewhere.

I won't lie... the following has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

#### WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050(4) and 70.05.120.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,  
Susan Hastings

Subject: No detention of unvaccinated!

External Email  
Dear Board of Health,

I am shocked to hear legislation has been proposed that calls for detaining unvaccinated people. This is completely authoritarian and unacceptable. It would be shocking at any time, but it is especially shocking because it is now abundantly clear that even vaccinated people can get and spread covid. There is no justification for mistreating unvaccinated people (many of whom have already had covid).

There are actually some indications that \*vaccinated\* people are contracting Omicron at higher rates than unvaccinated.

It is past time to stop this obsession with "vaccines," since they don't actually stop people from contracting the illness--and instead focus on treatments. Stop dividing people into two classes, one that can move about freely and the other that is restricted and subjected to government harassment campaigns. Speak up more about obesity as a risk factor.

Focus on treatments, not vaccines. No detaining of people or preventing them from moving about freely.

Sincerely,  
Sharon Damoff

You all need to back off. You need to stand up for the facts and the truth. The truth is covid was here before March lockdowns and no one gave a fuck. They only cared about impeachment. Several of my family members had covid in January 2020 before it was supposedly even here. We got the anti bodies test a year and a half later and we have the antibodies still. Plus non of us have been sick in 2 years. I personally have done my own research and everyone I know that had covid and did not get vaccinated have not been sick since. Those I know who have been vaxxed have continued to get sick or have other health issues. So if you wanna do the right thing to stop covid, stop the mandates stop trying to force the Vax because you won't win. If you keep trying to force you will have thousands that will fight back as well as you will never stop covid if you continue to try to mandate vaccines. The flu has never been stopped so what makes you think you can stop this by forcing vaccines

Strongly against changing the rules of Chapter 246-100 WAC to include detainment and strike force for unvaccinated. As Americans and Washingtonians we are experiencing much different situations that your statistics provide in our own families. Including getting covid regardless of vaccination status. In my very large family included the unvaccinated individuals ended up with milder symptoms. Masks never helps or deterred anything. We also have seen throughout this 2 years of the pandemic many different situations of the vaccine causing more harm than if a child or individual had gotten the vaccine. We need to allow an alternative such as tither testing to prove immunity. We need to continue to uphold the civil liberties and freedoms that make our country one of the best including the freedom to choose what we put in to our bodies.

---

As a parent of a child that has been in day care, Public School, Private School as well as homeschool due to health issues I 100% strongly oppose mandating a vaccine that we do not know the long term effects of for a minor of any age. My son is 15 and has been

through Chemotherapy, Radiation as well as has a complicated medical history and this would force him to receive an ill advised shot that is unknown as to what it would do to him. Seeing as he could go to public school should we choose this would affect many other children that may have underlying conditions where the vaccine would negatively affect them that have not been uncovered yet. There could be genetic heart problems that a child and parent are unaware of that this would negatively affect. Have we even considered that this may affect any autistic/add/or other learning disabled individual in a negative fashion beyond what an IEP plan could assist with? This needs to be turned down and not a forced requirement as we do not have another other options in vaccine, or proof of immunity that it being considered. Children have a low symptomatic response to Covid on average so why are we forcing something we do not know the implications of 5 to 10 years down the road on?

Subject: Proposed WAC 246-100-040 Change to include covid-19

External Email

Members of Washington State Board of Health:

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Now, the definition for being fully vaccinated will require regular booster shots potentially forever.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the experimental EUO Covid vaccines.

In America, health officers do not have the legal or moral authority to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the legal or moral authority to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Sincerely,

Russell Hensley

External Email

I and many others are prepared to travel to Washington to stop the unconstitutional proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. If these are to take place be assured resistance will be matched or returned with greater force and the people will take their freedoms back forcibly.

Subject: No to COVID mandates and restrictions

External Email  
To whom it may concern,

I urge you to decide NOT to move forward with specific covid policies that come from WAC 246-100. This is a gross violation of human rights and should not be considered.

Also, I plead with you to say NO to mandatory Covid injections for schools regarding WAC 246-105. These injections do not stop spread, as demonstrated by this research study which in fact found that more inoculations in a community means MORE spread (not less) - <https://link.springer.com/article/10.1007/s10654-021-00808-7>.

Also given that children are at extremely low risk from COVID, mandates of these jabs make no sense. (Indeed, CDC data shows they are more at risk for drowning, car accidents, and many many other causes than COVID.)

Please be brave and do the right thing here. Please reject these bad policies.

Sincerely,  
Wendi Modarelli

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

External Email  
Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

This is illegal and in violation of the Nuremberg Act.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,  
Perry Fernau

Subject: Prepping for January 12 SBOH Meeting and Column Deadline

External Email

A number of readers have brought concerns over WAC 246-100 and the upcoming SBOH meeting agenda to my attention. I've reviewed the clarifying statement (here <https://sboh.wa.gov/News/Articles/ID/3050/Clarifying-Online-Misinformation-about-the-Jan-12-State-Board-of-Health-Public-Meeting>). My column deadline is January 12 and I am reading past minutes in preparation for the January 12th meeting. My hope is to provide clarity and rumor control.

I'll have a short turnaround time to write after the meeting ends. Are there any additional statements that have been released or a knowledgeable individual interested and available for a conversation prior to the meeting, on the record?

Blessings,  
Sue Lani

attachments\4B9534857A284F87\_image.jpg

External Email  
Greetings,

I just learned of this public forum, focusing on the imposed plan to use fear, intimidation, bullying, gaslighting, and mass formation psychosis to cull the world. I did realize how many educated and non-educated people don't have a clue about science. Spell Live backwards and you have Evil, against life.

I submit that "No one is as smart as all of us, or better than any of us. Though some people think they are."

Einstein said "If you cannot trust someone with little things, how can you trust them with big ones?" I add "If you cannot trust them with big things, then how can you trust them with anything?" Given a person or agency is known as a liar big or small, how do you know if they are lying to you? Their lips are moving.

We are all spiritual beings, sharing a human experience here in Earth School. We all come with gifts, and a mission. Then the veil of forgetting removes our knowledge of who we really are. So we can learn by experience. Imagine you were Hellen Keller. Our five senses are not who we are, they simply help us enjoy this (as Stephen Hawking said in his last paper, published posthumously April last year) hologram. You can listen to a story, read a book, see action maybe a movie. But there is no learning like first person learning.

Each and every one of us are students in God's classroom "Earth School" there are savants, bullies, high achievers, dropouts, leaders, followers, and too many who blame their condition on others. We each have personal responsibility for our actions, and how we touch others lives. Whether we like it or not. We are all sovereign spiritual beings, with free will. To violate another's free will is to condemn yourself to suffer all the ills which rise from it. In first person during your life review on the other side.

It is well documented for those willing to learn

Love and Compassion (Love with no judgement), lead to higher Consciousness.

Greed, Ego, and Fear lead to the darkest corners of our minds. There has never been a better trap than a persons own mind.

Pedophilia is used by the CABAL to prove an individual has no love in their heart, by their own free will. They know what they're doing, and they choose darkness.

To harm a child is one of the worst things a soul can do. These people will enjoy a special place on the other side, where souls/entities have no love for themselves or each other. They spend their time doing horrible things to each other. A near death experience (NDE), told by a man running for sheriff said "There are entities (souls without a body, take a form representing their energy) so ugly, that to look at them makes you want to vomit." I guess that gives new meaning to the beast within. As he left the area with his escort (Big Angles, sorry if you are atheist you have a spark of God inside as well. It is by everyone's free will to believe as we choose.), they asked "Did you notice anything there?" He said what do you mean? They said "There is no love." These entities (souls without their Earthly bodies) have no love inside, and since they violated the rules against harming children. Who are off limits until adulthood from being harmed, souls who harm children are placed in what the man called second heaven (he called Earth first Heaven) and are not allowed to leave, until they learn to love. It is a choice, and we all have free will to choose.

I challenge you and all of those wishing to harm others to view the links below. Then ask yourself, why have these people been working so hard for thousands of years, against others. Imagine what we could do working together to help each other.

It is your choice, we are all sovereign spiritual beings. Omicron is God's answer to the biological weapon SARS-CoV-2 and the poison COVID-serums being injected world-wide. Real scientific studies are showing, once a person is exposed to Omicron (like cow pox) they are no longer vulnerable to the delta-variant of SARS-CoV-2. Given Fauci and so many others have been working diligently for a long time to develop the biological weapons, and strategies used to apply mass formation psychosis. To deliver SARS-CoV-2, and more importantly the selective (directly targeted) patented biological weapon serums (aka by the main stream media COVID "Vaccine"). Actually the US Patent Office had it right in 2005~2008 when they denied Fauci's crew and DARPA from patenting the serums as a Vaccine. They simply said "If you want to patent it as a vaccine, you must prove there's a health benefit." Well it was designed to kill covertly, check the link below on (Graphene Hydroxide), and it killed all the laboratory animals they tested it on. A zookeeper wanted to protect three Giraffes from COVID, so he had them injected. Within a month all three were dead. Need more proof? Don't believe anything you hear, and only half what you see. Do your own research! If someone is bullying you, or gaslighting. You're probably listening to a sociopath, or psychopath. At least Epstein could keep a straight face, B. Gates giggles when he talks about what they are doing with "vaccines" and efforts to murder billions of people.

There are only two paths to choose from, one is to awaken to the truth. The other is to remain asleep, some call them zombies. In the west we don't have a proper word for the energy that flows through our body. You may have heard of Chi, or Prana.

How do you feel?

This life is short, do you wish to suffer the torment of existence beside others with no love in their heart, doing unspeakable things to you, and others trapped in God's reeducation experience?

By no means is this list exhaustive. Waking up is hard to do. One of the hardest things is to realize they are lying to us, and lying to you. We must help each other to wake up. You, and everyone here sharing a ride around the sun are sovereign spiritual beings. Earth is one of God's rare experiments to see, how far away from source (the central sun, heart of God, the most concentrated love) we can incarnate (animate a body of download to a 3D avatar, body for experience on the world stage), and still thrive! Think of it as a military confidence course, are you willing, and able to love others for who they are? Even though you don't remember we are all one family with God our father? Crazy sure!

But I lived my life as a super analytical science person, ignoring my intuition, even after my life was saved at 22, in the middle of the night, outside a club. My guardian Angel picked up the microphone so to speak, inside my head "it's dangerous you need to move" 10-minutes later... an elderly lady driving 65 mph fell asleep about a half-block from where I was leaning against the rear drivers side fender, 5~8 feet from US-1 just north of the Florida Keys. After driving straight for hours, it's easy for anyone to fall asleep. She hit where I had been standing by 2-feet, which would have clipped me in two. I wouldn't have been here today to reach out to you, from my heart, and spark of God inside. To your heart, and spark of God in you. We are all threads in the same cloth...

Namaste (I see the God in you) ☐☐Steven

This "vaccine"/gene therapy does NOT stop infection or transmission so it is not accurate to consider it a public health measure. It's a personal health treatment choice. Getting the vaccine doesn't effect anyone but the recipients. This is not rational, constitutional, or lawful. To vote in favor of this is without conscience. There are many dangers associated with this EXPERIMENTAL "vaccine" and it is against the Nuremberg code to force this on anyone. You will be guilty of crimes against humanity. Think long and hard about what you're doing to people for a virus comparable to the flu.

Dear Ms. Schreiber,

I am a fully vaccinated (COV-19) Seattle, Washington resident.

I'm AGAINST applying WAC-246-100-040, 045, 070 and WAC 246-105 to the management of COVID-19.

I am completely AGAINST giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family in a quarantine facility if they refuse requests of medical examination, testing, treatment, counseling, and vaccination.

I am completely AGAINST Covid-19 injections as part of the school immunization requirements using WAC 246-105.

As a state with tremendous resources in the tech and data space, I would LOVE to see these resources redirected to reporting accurate data on COVID cases (as well as vaccine adverse events) with comparisons between vaccinated and unvaccinated. Please include this data on our state dashboards. I know not everyone makes data-based decisions. But, the vast majority do! If clear and compelling data were presented and publicized, I believe NONE of the above would be necessary.

Thank you for your consideration and for working to keep our state safe and healthy.

With gratitude,

Subject: Children DO NOT need the Covid-19 Vaccine

External Email  
Dear Sirs,

Washington State does not need a law requiring students to have the Covid-19 Vaccine because they do not need it. Covid-19 is not a childhood illness. It mostly effects older people and those with comorbidities, as we have seen from the statistics. There are also studies that show that the Covid-19 Vaccine does more harm than good in children. Please see the following link for more information:

To: DOH WSBOH  
Cc:  
Subject: Regarding mandatory Covid injections for K-12

External Email  
Hello,

I would just like to add my concerns about the conversation on making the Covid shots for children in grades K-12. My household recently had covid on Dec 1, 2021. My 3 girls, (grade 6, 3, & 1), had none to minimum symptoms. My 6th grader who is healthier than her younger sisters was negative. As for my 3rd and 1st grader, they had very mild symptoms such as a head ach, a slight fever, mild cough with phlegm and a running nose for about 2-4 days. We all didn't receive the covid shot and had very different results from the corona virus. And that's the thing, results from the covid shot will vary and not immune many.

I happened to be hospitalized and was the only patient on the floor who didn't receive the covid shot. There's no guarantee for this covid shot since the hospitals are still and continue to be filled. The definition of vaccination is treatment with a vaccine to produce immunity against a disease which this covid injection is not.

I understand that many people are dying from this virus regardless of being injected or not but there's honestly nothing you can do to end this pandemic quickly. It will carry on just like other viruses such as the flu. It is our responsibility to take care of ourselves the best way we can.

If you make this covid shot mandatory, this will infuriate many parents who will pull their children out of school and will protest at your door. Please consider that mandatory means future repercussions. No one likes to be told what to do.

Thank you.

Veronica Gilbert

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

10. Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Whether school age children should be mandated to have covid vaccine

11. Are you Pro or Con on the proposal?

2. Con

---

Parents of children should have the final say on any and all covid vaccines administered. Not the state not the health department. As we are seeing with the omicron variant the vax doesn't care if a person has been fully vaccinated or not. To make this mandatory is a complete overreach of our state government. This vaccine is still very new no one can honestly say what side effects may come in the future. Why put the future of these children at possible risk. Please do not make this vaccine mandatory to attend school.

It is simply not appropriate to require the covid vaccine for children to attend school. Or for children at all. This illness does not affect them in the same way as adults. If parents want to have their children vaccinated that's fine but it should be our options are not the government's.

I respectfully ask that you vote against a any mandatory requirements for children to get any COVID vaccine for school or otherwise. There is a reason vaccines and medicines are vetted an extended period of time and this vaccine should be no different. At this point in time, no one has any idea what the long term effects are from this vaccine and until that data is available, this should not be a requirement (especially for our children). I feel requiring the vaccination of children with a vaccine that has not met this rigorous vetting process is not only dangerous, but reckless and irresponsible on the part of our system that is supposed to be looking out for the welfare of our children. This vaccine should be categorized and tested the same as all other vaccine's for children.

To Washington State Health Board,

Please see attached documents outlining the violations under the Nuremberg Code established under International Law. The Covid Vaccine is an experimental Gene Therapy so called vaccine. Therefore, if consent by individual is not given all officials that help pass this will be in violation of the Nuremberg Code under International Law. They can be found guilty and appropriate punishment can be the same as the Nazi's received after WWII.

# THE NUREMBERG CODE

1. The voluntary consent of the human subject is absolutely essential.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study, that the anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted, where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment, the human subject should be at liberty to bring the experiment to an end, if he has reached the physical or mental state, where continuation of the experiment seemed to him to be impossible.

10. During the course of the experiment, the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgement required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

["Trials of War Criminals before the Nuremberg Military Tribunals under Control Council Law No. 10", Vol. 2, pp. 181-182. Washington, D.C.: U.S. Government Printing Office, 1949.]

**Count 7. 15 U.S.C. § 19 – interlocking directorates**

**Count 8. 18 U.S. Code § 2384 - Seditious conspiracy**

### The Proposed Indictment

Throughout the decade of the 90s Pfizer sought to research, develop and patent a coronavirus (CoV) vaccine. Their first patent filing specifically recognizing the S-protein as the immunologic target for vaccines was filed on November 14, 1990 (U.S. Patent 6,372,224). With a focus on swine and canine gastroenteritis, these efforts showed little commercial promise and the patent was abandoned in April of 2000. During the same period, the National Institute for Allergy and Infectious Disease (NIAID) under the vaccine obsession of Dr. Anthony Fauci, funded Professor Ralph Baric at the University of North Carolina Chapel Hill. This program designed to commercially weaponize a naturally occurring toxin is the beginning of the criminal conspiracy and **violates 18 USC § 175, 15 USC § 1-3, and 15 USC § 8** Dr. Baric's expertise was understanding how to modify components of the coronavirus associated with cardiomyopathy. NIAID Grants AI 23946 and GM63228 (leading to patent U.S. 7,279,327 "Methods for Producing Recombinant Coronavirus") was the NIH's first Gain-of-Function (GOF) project in which Dr. Baric created an "infectious, replication defective" clone of recombinant coronavirus. This work clearly defined a means of making a natural pathogen more harmful to humans by manipulating the Spike Protein and other receptor targets. A year after filing a patent on this GOF CoV, the world experienced the first outbreak of Severe Acute Respiratory Syndrome (SARS).

Under the guise of responding to a public health emergency, the United States Centers for Disease Control and Prevention (CDC) filed a patent application on the genome of SARS CoV on April 25, 2003. Accessing and manipulating the genomic data (which came from China making an “invention” claim by a U.S. entity illegal **violating 35 USC §101, 103**), Dr. Baric, Dr. Fauci, and the CDC **violated 18 USC § 175** (a felony). One year earlier, Dr. Baric and his team had already filed a patent which clearly the pathogen CDC claimed as novel in 2003. Three days after filing a patent on the genome, NIH-funded Sequoia Pharmaceuticals filed a patent for the vaccine on the virus invented a mere three days earlier. At the same time, in **violation of 15 USC § 19** Dr. Fauci was appointed to a board position with the Bill and Melinda Gates Foundation (a competitor in vaccine manufacturing) thereby beginning the interlocking directorate<sup>1</sup> anti-trust crime.

In 2005, the DARPA and MITRE hosted a conference in which the intentions of the U.S. Department of Defense was explicit. In a presentation focused on “Synthetic Coronaviruses Biohacking: Biological Warfare Enabling Technologies”, Dr. Baric presented the malleability of CoV as a biological warfare agent. **Violating 18 USC § 175** and inducing the non-competitive market allocation (**violating 15 USC § 8**) for years to follow, Dr. Baric and the U.S. Department of Defense spent over \$45 million in amplifying the toxicity of CoV and its chimeric derivatives.

From 2011 until the alleged COVID-19 pandemic, Dr. Fauci has routinely lamented about the inadequacy of public funding for his vaccine programs and the public’s general unwillingness to succumb to his insistence that everyone MUST be vaccinated against influenza. Despite repeated appropriations to advance vaccine dependency, his efforts have been largely unsuccessful. NIAID – under Dr. Fauci’s direct authorization – encouraged UNC Chapel Hill and Dr. Baric’s lab to ignore the GoF moratorium in a letter dated October 21, 2014. At that time, Drs. Fauci, Baric and EcoHealthAlliance’s Peter Daszak were in possession of an extremely dangerous Chinese pathogen identified a year earlier in Wuhan.<sup>2</sup>

While many illegal acts were committed by the conspirators leading up to 2015, the domestic terrorism program (**in violation of 18 USC § 2339**) was announced by NIAID-funded Daszak at the National Academy of Sciences. Here, he announced what was to become the domestic and global terrorism event branded COVID-19.

---

<sup>1</sup> We note that gain-of-function specialist, Dr. Ralph Baric, was both the recipient of millions of dollars of U.S. research grants from several federal agencies and sat on the World Health Organization’s International Committee on Taxonomy of Viruses (ICTV) and the *Coronaviridae* Study Group (CSG). In this capacity, he was both responsible for determining “novelty” of clades of virus species but directly benefitted from determining declarations of novelty in the form of new research funding authorizations and associated patenting and commercial collaboration. Together with CDC, NIAID, WHO, academic and commercial parties (including Johnson & Johnson; Sanofi and their several coronavirus patent-holding biotech companies; Moderna; Pfizer; Merck; BioNTech; AstraZeneca; Janssen; Ridgeback; Gilead (Dr. Baric’s alter ego); Sherlock Biosciences; and others), a powerful group of interests constituted what are “interlocking directorates” under U.S. anti-trust laws. Further, most of these entities, including the Federal Government ones **violated 35 USC § 200-206** by failing to disclose Federal Government interest in the remedies proposed.

These entities were affiliated with the WHO’s Global Preparedness Monitoring Board (GPMB) whose members were instrumental in the Open Philanthropy-funded global coronavirus pandemic “desk-top” exercise EVENT 201 in October 2019. This event, funded by the principal investor in Sherlock Biosciences (a beneficiary of the SARS CoV-2 EUA for CRISPR technology) and linking interlocking funding partner, the Bill and Melinda Gates Foundation into the GPMB mandated a respiratory disease global preparedness exercise to be completed by September 2020 and alerted us to anticipate an “epidemic” scenario. We expected to see such a scenario emerge from Wuhan or Guangdong China, northern Italy, Seattle, New York or a combination thereof, as Dr. Zhengli Shi and Dr. Baric’s work on zoonotic transmission of coronavirus identified overlapping mutations in coronavirus in bat populations located in these areas.

<sup>2</sup> By October 2013, the Wuhan Institute of Virology 1 coronavirus S1 spike protein was described in NIAID’s funded work in China. This work involved NIAID, USAID, and Peter Daszak, the head of EcoHealth Alliance. This work, funded under R01AI079231, was pivotal in isolating and manipulating viral fragments selected from sites across China which contained high risk for severe human response. (Ge, XY., Li, JL., Yang, XL. *et al.* Isolation and characterization of a bat SARS-like coronavirus that uses the ACE2 receptor. *Nature* **503**, 535–538 (2013).) The GoF work NIAID allowed to persist in the face of the moratorium was Dr. Baric’s work with this pathogen

***“...until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated.”<sup>3</sup>***

It is not surprising that one year later NIAID’s funding paid off with Dr. Baric’s lab announcing that the Wuhan-derived pathogen was “poised for human emergence”.<sup>4</sup>

Knowing that the U.S. Department of Health and Human Services (through CDC, NIH, NIAID, and their funded laboratories and commercial partners) had patents on each proposed element of medical counter measures and their funding, Dr. Fauci, Dr. Gao (China CDC), and Dr. Elias (Bill and Melinda Gates Foundation) conspired to commit acts of terror on the global population – including the citizens of the United States – when, in September 2019, they published the following mandate in **A World At Risk**:

*“Countries, donors and multilateral institutions must be prepared for the worst. A rapidly spreading pandemic due to a lethal respiratory pathogen (whether naturally emergent or accidentally or deliberately released) poses additional preparedness requirements. Donors and multilateral institutions must ensure adequate investment in developing innovative vaccines and therapeutics, surge manufacturing capacity, broad-spectrum antivirals and appropriate non-pharmaceutical interventions. All countries must develop a system for immediately sharing genome sequences of any new pathogen for public health purposes along with the means to share limited medical countermeasures across countries.*

*Progress indicator(s) by September 2020*

- *Donors and countries commit and identify timelines for: financing and development of a universal influenza vaccine, broad spectrum antivirals, and targeted therapeutics. WHO and its Member States develop options for standard procedures and timelines for sharing of sequence data, specimens, and medical countermeasures for pathogens other than influenza.*
- *Donors, countries and multilateral institutions develop a multi-year plan and approach for strengthening R&D research capacity, in advance of and during an epidemic.*
- *WHO, the United Nations Children’s Fund, the International Federation of Red Cross and Red Crescent Societies, academic and other partners identify strategies for increasing capacity and integration of social science approaches and researchers across the entire preparedness/response continuum.”<sup>5</sup>*

As if to confirm the utility of the September 2019 demand for “financing and development of” vaccine and the fortuitous SARS CoV-2 alleged outbreak in December of 2019, Dr. Fauci began gloating that his fortunes for

Washington (DC): National Academies Press (US); 2016 Feb 12. 6, Developing MCMs for Coronaviruses. Available from: <https://www.ncbi.nlm.nih.gov/books/NBK349040/>

<sup>4</sup> Menachery VD, Yount BL Jr, Sims AC, Debbink K, Agnihothram SS, Gralinski LE, Graham RL, Scobey T, Plante JA, Royal SR, Swanstrom J, Sheahan TP, Pickles RJ, Corti D, Randell SH, Lanzavecchia A, Marasco WA, **Baric RS**. 2016. SARS-like WIV1-CoV poised for human emergence. **Proc Natl Acad Sci U S A**. 2016 Mar 14. pii: 201517719

<sup>5</sup> [https://apps.who.int/gpmb/assets/annual\\_report/GPMB\\_annualreport\\_2019.pdf](https://apps.who.int/gpmb/assets/annual_report/GPMB_annualreport_2019.pdf) (page 8)

additional funding were likely changing for the better. In a February 2020 interview in **STAT**, he was quoted as follows:

*“The emergence of the new virus is going to change that figure, likely considerably, Fauci said. “I don’t know how much it’s going to be. But I think it’s going to generate more sustained interest in coronaviruses because it’s very clear that coronaviruses can do really interesting things.”<sup>6</sup>*

In November 2019 – one month before the alleged “outbreak” in Wuhan, Moderna entered into a material transfer agreement – brokered by the Vaccine Research Center at NIAID (at which UNC Chapel Hill alum Dr. Kizzy Corbett worked) – to access Dr. Baric’s Spike Protein data to commence vaccine development. In his own written statement obtained by the **Financial Times**, he refers to this agreement as being the foundation for the mRNA Moderna vaccine.<sup>7</sup>

To finalize the nature of the racketeering and anti-trust criminal conspiracy, when it came time to commercialize the NIH and DARPA owned spike protein and pass it off as a “vaccine” (in conflict with the standard for vaccines in statutory and scientific application), the Operation Warp Speed contract was awarded to DoD contraction ATI, a subsidiary of ANSER. In a graph reminiscent of the anti-trust hearings at the formation of the Clayton Act in the early 20<sup>th</sup> century, the identity of the interlocking conflicts of interests are presented in graphic relief. It is with no surprise that the result of this price-fixing conspiracy was the enrichment of the conspiring parties and the harm of consumers.

<sup>6</sup> <https://www.statnews.com/2020/02/10/fluctuating-funding-and-flagging-interest-hurt-coronavirus-research/>

<sup>7</sup> <https://pubmed.ncbi.nlm.nih.gov/32756549/>

Indeed, *the money followed the hype* and they *used the hype to get to the real issues*. *Investors follow where they see profit at the end of the process*.

And real Americans are dying each day because a criminal organization unleashed terror resulting in the deaths of Americans.

**18 U.S.C. § 2331 §§ 802 – Acts of Domestic Terrorism resulting in death of American Citizens**

**Pub. L. No. 107-52 expanded the definition of terrorism to cover "domestic," as opposed to international, terrorism. A person engages in domestic terrorism if they do an act "dangerous to human life" that is a violation of the criminal laws of a state or the United States, if the act appears to be intended to: (i) intimidate or coerce a civilian population; (ii) influence the policy of a government by intimidation or coercion;**

Every single Act, the declaration of the State of Emergency, the Emergency Use Authorization, the fraudulent face masks, the business closures, and the OSHA and CMS vaccine mandates are ALL admitted by the conspirators to be acts to coerce the population into taking a vaccine. Further, these acts disrupted the democracy of the United States of American and resulted in the violation of 18 USC § 2384. The conspirators announced it in 2015, then prepared the pathogen in 2016, and laid out the terror campaign in September 2019. And now they profit from the death of Americans.

The Dept. of Health claims to exist for the benefit of the people. Since lying is such a normal part of the political process and healthcare is a political tool are you prepared to lie to the people in the name of healthcare? Of course you are, we see it everyday at the Federal level and they set an example for you. You can have a PhD., smile and lie well. These WACs you are considering Jan. 12 are made by fools with no regard to constitutional rights. People have the choice to put what they want in their body, it is not your decision, not your place to ask, not your place to bully, not your place for anything. Do you understand? The fact that these changes are even being considered showcases the departments lack of sanity and disregard for the law, but you do like that political flavored ice cream, don't you? Going to quarantine people under your false narrative of health? Show me where vaccines have fixed anything except pharmaceutical profits? Be careful what science you follow.

Subject: No On Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Covid vaccine mandate

External Email

To whom it may concern:

Please read this article, especially the part about children being affected by the vaccine vs their chances of severe covid. With the vaccine proven to no longer stop the spread of Covid I do not see how you can make this a mandatory vaccine for school children. Please keep it as an option for parents to make the choice as to what is best for their families. By having the children vaccinated it will not stop the spread throughout the schools which is the main reason for all previous required vaccines. I beg you to please take into consideration that each person and their medical needs differ and this cannot be a one size fits all issue. I implore you to REALLY look into these issues that are starting to come to light and think about all of the previously "trusted" FDA approved medications (close to 4,500 drugs and devices EVERY YEAR are recalled after previous FDA approval) that have since been recalled due to devastating side effects. Do not be part of making Covid a required vaccine and later regret the possibility of a disastrous outcome. Leave it to personal choice.

Good afternoon,

Please consider the data, scientific data, and scientific evidence that shows COVID vaccine is not needed, or effective against the COVID disease.

The physical effects are so negative to children that we should not place or allow such a mandatory requirement on our children.

The rights of citizens in according to the constitution, and private property (My Body My Choice) should be the standing ground for not allowing this vaccine to be mandatory for anyone!

Thanks for listening

External Email  
Hi Tracy,

I have major concerns of what is going on in our state right now. You are going to be making a big decision on Wednesday, and I pray that God will give you the strength to do the right thing and stand up to tyranny. The government has no right to decide what kinds of medical procedures we will have or not. This is the people's choice, and we the people are protected by the Constitution. We live in the United States of America, the land of the free. I think people are forgetting what that means.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105.

Please do the right thing and stand up for people's liberties.

Thank you,

Cc:  
Subject: WAC 246-100-040 --- Nuremburg Code Violation --Covid19 & Variants

External Email

To Whom It May Concern:

We the free and united people of America and the world are writing in regards to the unlawful and corrupt actions taken by the healthcare industry, bureaucrats, and media regarding COVID-19. The actions taken for nearly two years now have stripped people of their rights, decimated the US Constitution, violated the principles of international law embodied in the Nuremburg Code, and ignored basic and inalienable human rights. The people behind this have leveraged their privileged positions to make billions of dollars at the expense of humanity and we are unwilling to allow this to continue.

For decades, the field of public health has researched the use of fear as a tool to manipulate people into action. The use of that tool has now been perfected and implemented against the people of the world with COVID-19. Evidence of this knowledge can be found in a CDC presentation, other DHHS materials, and in numerous academic journals. The intentional use of fear to sow hate, division, and discord is unethical, unacceptable, and must stop immediately.

The reality is that COVID-19 has a 99%+ recovery rate in most of the population and approximately a 94% recovery rate in the most vulnerable. Compare this to the original SARS which had approximately a 9% case fatality rate and the original MERS which had over a 30% case fatality rate. We did not lockdown, mask, or even widely acknowledge these diseases when they were prevalent despite the fact that they had similar rates of spread to COVID-19.

This fear has been used as a marketing tool to attempt to justify previously unthinkable actions by bureaucrats and public health figures around the world; the most egregious of which is the forced injection of gene therapy drugs into healthy people. Gene therapy literally alters the genetic makeup of a human being and simply cannot legally, morally, or ethically be forced on anyone, ever. If the decision to alter one's own genetic makeup does not rest with the individual then there can be no argument that freedom is lost.

Not only are the COVID "vaccines" admittedly a gene therapy, they are inarguably unsafe. The swine flu vaccine was pulled from the market after just over 20 deaths, the Chevy Volt was recently recalled over the potential for battery fires, but the Pfizer shot was given expanded authorization despite the high recovery rate from COVID-19 and the

fact that Pfizer's own documents, submitted to the DHHS show that over 1200 people died in less than the first 3 months of authorization. This is nothing more than corruption.

The COVID shots are also ineffective. A recent Department of Defense document stated that 71% of new cases of COVID-19 in the Medicare population are in fully vaccinated individuals and 60% of hospitalizations are in the fully vaccinated. This same document also stated that the injections are even less effective in North American Natives, Hispanics, and "Blacks" (the document apparently was unconcerned with political correctness). If the "vaccines" do not stop the spread, do not stop hospitalization, alter our genes, and have not even existed long enough for long term testing, why are we attempting to violate people's inalienable rights by forcing them?

The fact is that we are now moving ahead as quickly as possible with these COVID shots. We are even authorizing them in children despite the fact that people under 30 are at ZERO statistical risk of death from COVID-19 and the shots appear far more dangerous to children than the disease. Further, we are doing this with no transparency. The DHHS has done everything possible to cover up the side effects and dangers of these injections, even going so far as to request 55 years to release the documents they relied upon to authorize/approve these deadly injections. How can informed consent be given without a true understanding of the risk?

This situation is untenable and we demand that it be remedied. We the free people of this nation and world will no longer comply with mandates that fail to consider our inalienable rights. In the spirit of Martin Luther King, Gandhi, and Jesus Christ we will spread our message through peace and we will resist peacefully, but make no mistake, we WILL resist. The accompanying presentation found at [www.renz-law.com](http://www.renz-law.com) supplies you with additional data to demonstrate everything stated here.

We now demand the following from our elected leaders, and vow to remember your actions or inaction when it comes time to vote and donate:

1. The resignation/termination of Anthony Fauci and civil/criminal investigation of his actions by a truly INDEPENDENT prosecutor;
2. The criminal and civil investigation of those involved with any gain of function research that may have been responsible for the creation of SARs-COV2;
3. Investigations – criminal and civil – into the deceptive and misleading push for the gene therapy injections that have been falsely labeled as vaccines (only after the definition of "vaccine" was changed);

\* This should include RICO and fraud claims (as is appropriate) involving the "Trusted News Initiative", the drug companies, hospital systems, and some government actors;

4. Transparency legislation that gives the public immediate access to the raw data and submitted documents related to the shots and COVID "pandemic" – If there is nothing to hide NO ONE should oppose transparency;

\* This should be passed on the state level as well;

5. Liability for injury from vaccines under the same rules as any other product – if they are safe there should be no opposition to liability to help those that have been injured;

6. Legislation that recognizes the absolute right to reject medical treatment or vaccination of any type for ANY reason;

7. NO funding or state/federal contracts with ANY organization that discriminates based on vaccination or health status;

8. Funding for the hundreds of thousands of individuals injured by job loss and "vaccine" injury;

9. NO on vaccination status tracking legislation; and

10. Our local law enforcement to uphold their oaths to uphold the Constitution and refuse to enforce unconstitutional mandates and rules.

I respectfully ask that you vote against a any mandatory requirements for children to get any COVID vaccine for school or otherwise. There is a reason vaccines and medicines are vetted an extended period of time and this vaccine should be no different. At this point in time, no one has any idea what the long term effects are from this vaccine and until that data is available, this should not be a requirement (especially for our children). I feel requiring the vaccination of children with a vaccine that has not met this rigorous vetting process is not only dangerous, but reckless and irresponsible on the part of our system that is supposed to be looking out for the welfare of our children. This vaccine should be categorized and tested the same as all other vaccine's for children.

External Email

Dear Mrs. Herendeen,

I Erin Kranzlet oppse the use of law enforcement to be used to detain those who are unvaccinated.

We are not second class citizens. Many of us have natural immunity by now. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and over all health. You will be held accountable if it comes out in yeaes to come that the vaccine is not safe.

There has been a filing in the International Crimes Court the ICC by dr Michael Yerdon and others for crimes against humanity bt pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus.

Please so the right thing and oppose these WACs from being added to laws.

---

Please look at all the facts for children. The risk to children from covid is statistically zero. The risk to children from a vaccine that has not had any long term studies could potentially be high. If you do mandate the vaccine you need to ensure that the ability to sue for damages is open.

Ms Herendeen:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

This vaccine is authorized for Emergency Use only. The approved Comirnaty is not available here, please be honest and thorough in your understanding of that as you evaluate.

More risk/reward testing, evaluation, and approval are needed on children.

WAIT. Please wait for ALL levels of testing to be completed before requiring this vaccine for our children and grandchildren.

I am NOT an anti-vax person. I am a supporter of vaccines that have been THOROUGHLY tested long-term and are approved safe, along with informed consent of all possible side effects. I have had many vaccines personally, as have my children and grandchildren.

The LONG-TERM SAFETY of this particular vaccine is what is in question. There simply has not been enough passage of time yet to know. Please wait.

Respectfully,

Ranita Goodin

Subject: Vaccine Requirement for School Children

External Email

Dear Lindsay Herendeen,

Please don't make vaccinations mandatory for all school children. There are numerous sincerely held reasons parents don't want their children vaccinated that are VERY important to them. They will be forced to take their children out of school if the mandate is imposed. Children have suffered enough because of this pandemic. Please don't make it worse.

The National Vaccine Injury Compensation Program is in place for those who may be injured by a lot of vaccines and The Countermeasures Injury Compensation Program is in place to compensate people injured by the Covid-19 vaccine in particular (which is not a vaccine in the way all other vaccines that I have ever heard of are). Since Covid-19, especially the Omicron variant which is the main variant at this time, has such low incidence of injury to children; I believe the vaccine may well be more dangerous than the disease. Where there is a risk there should be a choice.

It makes me SHUDDER to think the federal government can force people to make medical decisions they don't believe are good for them. Being forced to wear a mask is bad enough but being forced to have your children injected with something that has a potential for harm is just too much. Where have our rights to make medical decisions gone? You can't see people's medical records because of HIPPA regulations but you can demand whether or not they have had an injection, and how many. It does not make sense, it seems to me it should be illegal.

Sincerely,

Rosina Robbins

Mother and grandmother

Hello-

You need to be aware that your website offered testimony as a choice- but the ONLY drop down choice was the Communicable Diseases topic- there was NO drop down choice for the vaccine conversation for children. This certainly caused issues with people being on topic. Chair Grellner, I think you need to look into this and address it for the next time.

Thank you.

Scott Heiner (You): Do you're not going to discuss about mandating kids to be vaccinated, but as soon as comment is over you discuss the mandating of kids taking this vaccine! How misleading is that!!! In fact it appears to be outright lying! You should be ashamed for pushing this untested vaccine! The vaccine doesn't stop the spread of contracting or spreading the virus!! You're not looking at the science! Start doing that!

January 6, 2021

RE: January 12, 2022 meeting

- Opposition to Agenda Item #8, the Board's formation of a Technical Advisory Group
- Support for Agenda Item #11 Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

Ladies and Gentlemen,

I am sure others have provided you with sound research, properly conducted, to demonstrate why we should not be mandating vaccinations particularly in children. As such, there is no need for a Technical Advisory Group on this matter; thus Agenda item 8 pertaining to this should be voted down. To form such a group results in a very small

number of people steering decisions for children and their extended families statewide. As of July 2021, the US Census Bureau indicates the state population over 7.7 million with 21% being under age 18. You are making decisions on behalf of 1,625,125 children plus several million other family members, for that which affects one person affects the whole family.

Now what type of information would these decisions be based upon? What has been the quality and accuracy of public information given to the WA state government and citizens received these two years? It has been a rollercoaster of bait-and-switch actions. The issuers of official guidance—FDA, CDC, NIH, etc. referred to collectively as “Federal officials”—told us the vaccines would prevent people from becoming ill with Covid-19. Once enough vaccinated people caught Covid, they switched to saying it doesn’t prevent infection but prevents death, and that people will suffer much less if vaccinated prior to being infected. Meanwhile, they deny Covid deaths amongst the vaccinated, spreading for many months the soundbite that the vaccinated have a 1 in a million chance of dying from Covid. This is a rare outlier figure that cannot be substantiated and defies common sense. More realistically:

“[...] the exact definition of rare disease, or orphan disease, varies from country to country. The National Institute of Health classifies a rare or orphan disease as one with fewer than 200,000 cases in the country. The European Union defines it as any disease that affects five or fewer people out of every 10,000. Whichever definition you use, the answer is the same: Thousands of rare diseases affect millions of people every day.”

The guidance from the Federal Officials later dropped to 1 in 250,000. However, you can still see by the NIH own definition that this is an outlier figure, one that would not pertain to a general population. And the Federal Officials in collaboration with the media do not accurately depict the increasing rates of Covid deaths amongst the vaccinated. Meanwhile, the CDC still promotes adverse effects like Guillain-Barré Syndrome as rare when at the same time the American Neurological Association is following the significant occurrences of post-vaccine incidents . The lists could go on and on, as for two years we have had very specific messages intentionally aimed to conditioning the general public through collaboration with media outlets.

In spite of various legal actions nationwide against mandating vaccination, Washington state has chosen to expedite vaccinations, modeling for organizations statewide to terminate thousands of workers by accepting but not accommodating exemptions. While at the same time various officials speak of the ‘unknowns’, they advance controls with penalties to citizens at a rapid speed based on insufficient and even faulty science. For example, just this week, the National Comprehensive Cancer Network® updated their Pre-exposure Prophylaxis recommendations:

“research shows many immunocompromised people develop inadequate immune responses from vaccines. Thankfully, we now have additional tools to help people in active treatment for cancer, solid organ transplant recipients, engineered cellular therapy (e.g. CAR T-cell) or stem cell transplant recipients (a.k.a. hematopoietic stem cells), and those with other immunodeficiency-causing conditions (such as HIV, DiGeorge syndrome, or Wiskott-Aldrich syndrome).” [...] “The Food and Drug Administration (FDA) has issued an emergency use authorization for the monoclonal antibody combination of tixagevimab plus cilgavimab for pre-exposure protection from COVID-19 in adults and children starting at age 12 (weighing at least 40 kg) who have moderate to severe immune compromise and may not be responsive to vaccination. Patients with blood cancers (including those receiving stem cell transplantation or engineered cellular therapy) are more likely to have inadequate responses to COVID-19 vaccination” {...} “We have new agents to prevent and treat COVID-19 that will benefit patients with cancer”

Meanwhile, "the CDC Director Walensky herself stated, "What the vaccines can't do anymore is prevent transmission." [...] Dr. Anthony Fauci says, "We know now as a fact that [vaccinated people with Covid-19] are capable of transmitting the infection to someone else." [...] Moderna's Chief Medical Officer Dr. Tal Zaks agrees, "There's no hard evidence that it stops [the Covid-19 vaccinated] from...potentially infecting others who haven't been vaccinated." In contrast to the narrative espoused in collusion with media outlets, vaccinated persons do carry the same, and sometimes higher, viral load as the unvaccinated, thus the unvaccinated are not the super-spreaders.

Now we face Omicron which is 95% of Covid-19 cases; experts agree it is milder than previous Delta and will not result in as many hospitalizations nor deaths. Yet the public remains conditioned to believe the deaths occur amongst the unvaccinated, and WA state government continues driving policies and taking actions with this presumption as well. In addition to VAERS data (which has been demonized in the narrative) and reports from many countries, an example of our government's own data would be the HHS' Countermeasures Injury Compensation Program (CICP) Data of the 4751 Covid injury claims. The program only has 5200 claims of which 4751 claims pertain to Covid-19 treatments. The Epoch Times earlier reported that out of this 4751, 2297 are claims of adverse effects from vaccination with over 600 deaths in these claims. Forbes reported that the HHS states there were only 1357 vaccine claims and 53 of these were deaths. That is 3.9% of the claims. The article also demonstrates how the government is not paying compensation for Covid vaccines and the new limitations it has placed upon them.

Adult Americans have been the human experiments for these vaccines for too long. Officials in the FDA and CDC have made statements that go without recourse such as males under age 40 have greater chance of suffering debilitating damage from the vaccine than from the Covid virus itself. There have been many studies substantiating that. Last month, a panel of advisers to the Centers for Disease Control and Prevention unanimously recommended people do not take the Johnson and Johnson vaccine due to adverse effects and deaths. Unfortunately, this came after 16 million Americans had already had J&J. Other countries had already banned the J&J vaccine and have banned mandates as well.

Now we suffer the move to experiment on our children despite that a systematic review of the research found:

"five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially"

Last October, FDA panelist and Editor in Chief of the New England Journal of Medicine Eric Rubin said "We're never gonna learn about how safe the vaccine is until we start giving it. That's just the way it goes." Given that the tweet had 1.8 million views, I assume you are already aware of this. Since last spring, the death rate associated with Covid-19 in Whatcom county has run at or just under 1% for all ages. Meanwhile, the obituaries and testimonials of vaccine survivors increase as tens of thousands of people, with all good intentions to serve their country, are maimed and killed by the vaccines. And who could ignore athletes in their prime, particularly soccer players, collapsing on the field? With 183 deaths so far and hundreds more injured, young adults have suffered.

You can now see the need not only to vote down item 8 Technical Advisory Group but also to approve and move forward item 11 Rulemaking Petition that prohibits the addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

While it is a dearth of information, I ask that you take time to seriously review in detail the resources provided by me and others prior to Monday's meeting. Thank you in advance for doing so.

Sincerely,  
Renee M. Baranek

Washington State Board of Health Members,

I wish to STRONGLY OPPOSE allowing local health officers to use law enforcement (WAC 246-100-070 <<tel:246-100-070>> ) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045 <<tel:246-100-045>> ) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040 <<tel:246-100-040>> ). These specifics come from WAC 246-100 and including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

The government has no right to force anyone to take anything into their bodies they do not choose to take. This idea is equal to the taking of God-given freedoms in Nazi Germany. It also is criminal to punish or detain anyone for their choice of medical

freedom. Reference the NUREMBERG Code! A Quarantine facility where people are forced to stay is absolutely wrong, especially in the face of the Covid disease and its variants which only have a tiny fraction of risk of death to the average person. Even those with comorbidities have a very high chance of surviving this virus. Several of my friends ages 40 up to 75, (all unvaccinated), some with several comorbidities have had Covid (including Delta variant) have all survived. Our God-given natural immunity kicked in and we successfully navigated the disease and are now stronger for it. Allowing people's natural immunities to fight this virus is the ONLY way to reduce its strength. The mRNA vaccines are EXPERIMENTAL and should not be forced on anyone, period! These vaccines have been proven to carry more of a health risk than getting Covid! Look at the VAERS reports!

Also, I have the same opinion about not mandating children to be vaccinated against Covid. Almost ALL children survive the virus as easily as the common cold or flu virus. Again, these vaccines are EXPERIMENTAL and have not yet proven to be safe! Heart, nervous system, and other systems in the bodies of young people receiving these vaccines are being affected in atrocious ways! The risk FAR OUTWEIGHS any benefit! It is truly WRONG to mandate these vaccines when natural immunity is very effective against this virus!

Please accept my concerns and recommend AGAINST these proposals being presented.

Sincerely,  
Pamela Coffell

External Email

Children are at extremely low risk for Covid 19. There are no long-term studies to document any history of safety. Studies do not document that vaccinated and unvaccinated can both transmit Covid. Therefore the vaccine apparently does not stop the spread of the disease.

Mandatory Covid 19 Vaccines will segregate many children from an equal education. This mandate does not support equity diversity and inclusion.

Thank you,

Alicia Villa

Subject: Stop Covid for WA School

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=0>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: Childhood Vaccine

External Email

Dear Washington State Board of Health,

You are reviewing an experimental vaccine with no liability protections and no long term testing.

It is telling that you all might be great medical professionals, but you have no other disciplines represented on the board. No economist, business professionals, or any member of any other critical infrastructure professionals to bring another viewpoint to the table.

It also appears the board only is comprised of one political viewpoint that also makes it an echo chamber instead of a critical thinking deliberative body to balance societal needs for all the population of Washington.

I encourage the board to evaluate my above statements as this has been the most politicized pandemic in world history. The damage that has been done to kids is often justified by the school board and administration that they are following WSBOH policy.

Science cannot prevail when it does not allow scientific debate and or involve other societal needs in society.

I did not get Covid until the Delta variant and tested a month after recovery and my antibodies were maxed out. Not recognizing natural immunity erases 100 years of actual science. Based on your own presentation today any 0 to 17 youth has a 5 in 100,000 rate of hospitalization or expressed as a percentage .005 %

Sincerely,

Tim Caldwell

Re.: PROPOSED POLICIES:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Bottom Line: A long-time WA resident, I am adamantly opposed to official's forcing involuntary detention for responsible citizens who exercise their right to determine what they will/won't inject into their own bodies. You propose "involuntary" detention for "voluntary" noncompliance. Sadly, these two mutually-exclusive descriptors ("involuntary" and "voluntary") belie the subplot of what's being advanced. And I object to it.

As a retired educator, I am equally appalled at the thought of forcing experimental injections into the arms of children and youth. Too many questions are yet unanswered. A FDA advisor reminds us that there is no expectation that the lower dose in children will behave similarly to the higher adult dose. This, of course, begs the question: Do we really want to experiment on our children?

One of the most academically cited American epidemiologists alive today says he would pull a healthy child out of public school before he administered this vaccine. Harvard University professor of medicine, Martin Kulldorff, agrees with Dr. Harvey Risch. Data and scientific studies he's reviewed show that children are more likely to contract serious disease or die from the annual influenza, or the flu, than COVID-19.

Covid injections are experimental. Simple as that. Dr. Eric Rubin, who sits on the administration's vaccine advisory panel, said in part, "We're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines, like the rotavirus vaccine." Never mind that safety data are lacking! Rep. (and Doctor) Greg Murphy (NC) responded rightly in noting that Ruben's comment "is literally the most dangerous statement" he had ever heard in medicine." I agree.

Re.: Too many questions are yet unanswered.

The CDC openly acknowledges that for 30 years since creation of the VAERS reporting system, reporting of adverse vaccine DEATH reports remained very low and constant. However, beginning in December 2020 with the first COVID19 vaccines hitting the open market, and escalating every day since, the adverse event DEATH reports have skyrocketed to levels never before seen in 30- years of vaccine adverse event reporting. Before mass-enforcing an experimental injection, especially on children, these questions (and countless more) must be answered (with peer-reviewed science):

1. The CDC admits there are no peer-reviewed studies, yet it's okay to take these injections deemed "safe and effective." But by what standard? There is no longitudinal history from which to draw.

2. Just what's in these injections? We know that the mRNA Moderna experimental injection contains SM-102 designated "for research use only, not for human or veterinary use" (See: Cayman Chemical Safety Data Sheet acc: OSHA HCS. Trade Name: SM-102.) What else is in these injections, and why pump them into humans (especially children)?

3. Salk researchers confirmed that the main damage from Covid is caused by the clot-generating spike protein, not the virus. It's unclear how long these potentially lethal proteins remain trapped in the lining of the blood vessels, or what damage they might eventually do, so why inject people with a substance that teaches their cells to make spike proteins?

4. Why the Covid surge (which, on a per-capita basis, was higher than the surge that devastated India) in 4 out of 5 of the most vaccinated countries (Forbes)?

5. Why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020?

6.

7. Researchers noted: "Overall, our data provide strong evidence that SARS-CoV-2 infection in humans robustly establishes the two arms of humoral immune memory: long-lived B cells and memory B cells." This is perhaps the best available evidence of long-lasting immunity. Yet natural immunity is downplayed in the media narrative. Why?

8. To encourage pharmaceutical companies to manufacture ground-breaking new medicine, governments use no-fault indemnity against lawsuits. Where's the protection for individuals injured from the vaccine?

9. Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before. Shouldn't the magnitude of side effects compared to other vaccination programs concern us? This is especially true in that adverse events are broadly known to be seriously under reported!

10. One's right to informed consent mustn't be bypassed. But the mainstream media narrative is quite silent about adverse effects. According to the CDC, Myocarditis, a rare condition, is occurring at a higher than expected rate in vaccinated individuals.

Researchers used data from the Vaccine Safety Datalink, run by the CDC, to find 21 potential cases, 11 of which were confirmed, of Guillain-Barré syndrome (GBS) in people who got the shot. Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines. The Covid injection is also paired with Creutzfeldt-Jakob (prion) disease. Shouldn't the public be fully informed of these risks and, then, decide for themselves?

A local ABC News Station posted a request on Facebook for people to share their stories. In five days, over 200K people

posted comments, all of which addressed vaccinated loved ones who died shortly after being injected, or who are permanently disabled. Shouldn't this at the very least be looked into?

The Informed Consent Action Network (ICAN) reported that a study showed that the actual number of anaphylaxis is 50 to 120 times higher than claimed by the CDC.

Re.: Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

In September, the Singapore government awarded a teen \$225K for having a heart attack following a Pfizer shot. Over in Taiwan, second doses of the Pfizer-BioNTech jab

for children, aged 12 to 17, have been temporarily halted due to myocarditis concerns. Meanwhile, in America, the director of the CDC advocates approving the jab for children, aged 11 to 15 years old; and WA wants to include Covid-19 injections as part of school immunization requirements.

So why inject healthy children when their risk is statistically insignificant? Metrics among the unvaccinated rise across age groups, but data clearly illustrate that younger, healthy people are at little risk from the disease. Fact is, unvaccinated 18- to 29-year-olds saw deaths lower than most fully-vaccinated age groups.

Most Covid patients (70.6 percent) have one or more underlying health conditions. Nearly 36 percent infected are obese. 31 percent suffer from chronic lung disorders, and just over 14 percent suffer neurologic disorders. COVID-19- associated hospitalization rates in children were found to be overcounted when, in fact, 45 percent of the patients admitted to Lucile Packard Children's Hospital in California were not about Covid. There is no logical reason for forcing risky, untested injections on healthy children. Consider instead the youth who are vaccinated. In June, the CDC reported higher-than-expected rates of myocarditis among vaccinated (not

unvaccinated) youth. There were 117 cases among males 12 to 15 (when no more than five were expected).

Dr. Nicola Klein of the Kaiser Permanente Vaccine Study Center presented data regarding post-vaccination heart inflammation from the Vaccine Safety Datalink, a database from the CDC, and nine other healthcare groups, including five Kaiser Permanente facilities. Data also showed higher than expected cases among youth following vaccination.

Yet we are expected to ignore facts and summarily dismiss legitimate concerns, as these, as misinformation perpetrated by quacks. Even if such claims ring true, who gets to decide? The answer is best found in the cliché, "Follow the money." Throughout the pandemic, nine new billionaires have been hatched. Pfizer alone estimates to profit at least 33.5 billion dollars from the Covid injections; and many medical professionals receive financial incentives to promote injections. In the United Kingdom, for example, nurses get

£10 per needle they put into a child.

Our charge is to protect children, not to use them for monetary gain. They are not guinea pigs, nor should they be treated as such.

Good morning,

I am writing to let you know that I am opposed to the proposed WAC's

246-100-070

246-100-045

246-100-040

246-100

246-105

I am adamantly opposed to giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

We are the United States of America, the land of liberty and freedom. We are not Nazi Germany.

I am completely opposed to COVID-19 injections as part of the school immunization requirements using WAC 246-105.

Please be careful with the decisions you make. You will be held accountable one day.

Kathy Higbee

Subject: Against the Covid19 vaccine mandate for children

External Email

Dear. Committee Members

Hello, I am a mother who has sent my children to ECS.

Please stop the Covid19 vaccine mandate for children.

First of all, the Covid19 vaccine was made in a short period of time and has not been fully tested in clinical trials. So, the side effects are increasing not only in the United States but also in other parts of the world.

Secondly, children are not at high risk at Covid 19. Even if children get Covid19, most of

them are asymptomatic or pass through like a mild cold.

Thirdly, the Covid19 is getting weaker and now it's almost same as a cold.

In conclusion, it seems that children are more likely to suffer from the side effects of vaccination than to benefit from it. So, I sincerely ask that you prevent the Covid19 vaccine mandate for children.

Thank you for your time.

Sincerely,

Grace, One of ECS parents

Subject: Vaccine Mandates

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=0>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Teresa Johnston

Subject: Mandatory Vaccines for Students

External Email

Good morning,  
I was not aware a board meeting was being held to discuss the mandatory vaccination against COVID-19 for students in Washington state otherwise I would have made a statement prior to the meeting. I would like to express my concern at this time in mandating vaccination of students against COVID-19.

First and foremost I am absolutely for vaccination and have even given my five-year-old son a first dose of his Covid vaccine. However, he has still contracted Covid as of this week. Because of this and because of the side effects of a second dose so we will likely not be obtaining it.

Due to the nature of the current variant I would like to encourage the board to consider natural immunity as an option that would count towards immunity status. Although the CDC does not recognize natural immunity there are numerous high profile scientists and physicians that believe natural immunity should be considered when discussing whether to vaccinate or not.

Thank you for your time,  
Chelsea

Hmmm. Ivermectin.

27 controlled trials available in January 2021, 15 of which were randomized controlled trials (RCT's), the preferred trial of the World Health Organization, U.S. National Institutes of Health, and the European Medicines Agency. Consistent with numerous meta-analyses of ivermectin RCT's since published by expert panels from the UK, Italy, Spain, and Japan, they found large, statistically significant reduction in mortality, time to recovery and viral clearance in COVID-19 patients treated with ivermectin.

I am writing this to convey my concerns on discussions within health districts on Covid vaccines for our kids. I also am aware of Mead having a proposal and a rejection of the Covid vaccine requirement for their district.

As we know, Covid has shown very little percentage in severity for kids. We also know that in the younger kids the vaccines have not shown effectiveness, pausing the trials at age 5 and under with Pfizer and Moderna, does it make it better for effectiveness for age 6, 7 etc ?

Per the AAP ...week ending 1/6/22

Cumulative Hospitalizations (24 states and NYC reported)\*

\* Among states reporting, children ranged from 1.7%-4.3% of their total cumulated hospitalizations, and 0.1%-1.6% of all their child COVID-19 cases resulted in hospitalization

Cumulative Mortality (46 states, NYC, PR and GU reported)\*

\* Among states reporting, children were 0.00%-0.27% of all COVID-19 deaths, and 5 states reported zero child deaths

\* In states reporting, 0.00%-0.02% of all child COVID-19 cases resulted in death

Many children were admitted for other procedures, testing positive which then counts as a hospitalization.

"The number of young children admitted to the hospital who test positive for the coronavirus rose precipitously last week to the highest levels since the beginning of the pandemic, according to data released on Friday by the Centers for Disease Control and Prevention.

The increase was observed in children aged 4 and younger, who are not eligible for vaccination, and the data include those admitted to hospitals for reasons other than Covid and then tested positive.

The rise may at least be partly explained by the overall surge of Omicron cases, which

affects all populations, as well as the spread of other respiratory infections. And officials said there was no sign of an increase in severe cases.

More than four in 100,000 children aged 4 years or younger admitted to hospitals were infected with the coronavirus as of Jan. 1 — double the rate reported a month ago, and about three times the rate this time last year. " Published Jan. 7, 2022

Updated Jan. 11, 2022, 5:12 a.m. ET NYTimes

Partly why we have higher numbers is we have less restrictions and more gatherings with higher numbers allowed to gather. Our very own governor has not canceled concerts or large venues for sports like Seahawks games, if the danger is so concerning why has he not canceled these events? I can guess revenue ...at the same time if we have the vaccines, pills for treatment isn't it time to end the pandemic and our governors emergency state? When this wave is lessened it is time, especially since the quarantine time also was cut.

Many adults chose to get vaccinated or had to for work. This is a layer of protection for kids and for the adults, elderly and workers.

This article talks about natural immunity and the studies done and even the CDC may be reconsidering natural immunity.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Foutlook%2Fimmunity-vaccine-mandate%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cef16e2c50fc34ec4a0b408d9d62671b9%7C1>

Natural immunity to covid is powerful. Policymakers seem afraid to say so. - The Washington Post

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Foutlook%2Fimmunity-vaccine-mandate%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cef16e2c50fc34ec4a0b408d9d62671b9%7C1>

KEY POINTS

- \* "The two doses, they're not enough for omicron," Pfizer CEO Albert Bourla said.
- \* Bourla said the two-dose vaccine does not provide robust protection against infection and its ability to prevent hospitalization has also declined.
- \* He said third shots are providing good protection against death, and "decent" protection against hospitalization.

Now we must create a new vaccine to help with omicron .

When do we stop and say enough is enough?

The data shows we have a large percent vaccinated, and previously infected...

"Actual Covid-19 case count could be 6 to 24 times higher than official estimates, CDC study shows"

July 21, 2020

I am not an anti vaxxer. I am a parent wanting more data long term for these vaccines. I waited on hpv vaccines for my kids per my doctor until more data was out. I also know that with a close family relative passing with heart inflammation at 17, I am not willing to have my kids get them, along with their dad having one of the blood clotting factors. I will not risk it.

We also know several countries have preferred Pfizer over moderna due to myocarditis and that some countries have said 25 years of age and younger will only receive one dose to avoid the heart inflammation. Our own cdc has recommended Pfizer over moderna for ages 5-11.

Side effects can be myocarditis, pericarditis, blood clotting, and long term we still don't have the information of what could be an issue in the coming years.

We know the risks when we make the choices. We will live with those choices.

I say this even though our family paid a very high price. Our kids lost their grandparents to Covid, they passed 3 days apart in January of 2021.

Let us make our own decisions in regards to our children, not a mandate or forced vaccination.

Hey, thanks for clarification, and dispelling misinformation. There are a lot of good people who feel like government is not listening to the people, and lot of others who just want to stir the pot.

Most people love hearty debate before we make new rules.

So thanks for taking time to communicate. We all want the best for our families and communities.

Thanks again

Susan Fleming

I OPPOSE the use of illegal force to detain ANY family OR children. This is insane!! Have we not learned about the holocaust and internment camps? What you are trying to pass is illegal and unconstitutional! There were thousands of us trying to leave comments on this matter and we will continue!

WE THE PEOPLE SAY NO!

R Berry

Lindsay,

STOP! just stop what you are doing to our children.

I will pull my children from public school the minute that this or any further vaccines without full phase 3 testing is required. Do not subject them to "Test to Stay" either. Testing to prove they are healthy will have lasting psychological impacts. These children are not guilty of being unhealthy until proven innocent by a test...they are already innocent.

You have absolutely no standing to make these current vaccines a requirement.

This would be crossing a line you could never come back from. All public trust in you as an entity would be lost forever.

Using children to "save elderly" is an absolute disgrace. Subjecting young bodies to yet unknown side effects is beyond reprehensible.

Trading parental choice for education is absolutely a nonstarter.

I hope you have common sense enough to see what a slippery slope you are standing above with this decision.

Stand up for our parental choice to know what is best for our individual children and do not deprive our children of education for an untested vaccine with a small efficacy. Which side are you on? Pharma or children's education?

There are too many unanswered questions to trade my child's health for their education.

Sincerely,

Kbr Patrick

I am writing as a parent of five school-age children in Auburn, WA to express my concern that the Washington State Board of Health is considering mandating the COVID 19 inoculation for school children. Please do not impose this medical experiment on our children. It is not a vaccine like the others in the current childhood schedule. It does not confer immunity which basically makes it a therapy. The CDC, in fact, had to alter the definition of a vaccine in order to accommodate the COVID inoculation (and receive the legal impunity of a vaccine).

Significantly, it has not been proven safe and effective as it has been so thoroughly touted. An alarming number of young people have had adverse reactions, life-altering ones like myocarditis. A young person has a greater than 99.9% survival rate from COVID 19. In light of this, why would we put our children at any risk? Any mandated treatment should be bulletproof-safe, not experimental and flawed. The COVID

2. SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Finally, I believe another item is on your agenda that I strongly oppose:

1. Please DO NOT include COVID 19 in the existing WAC Codes for involuntary detaining. We do not need to live in a police state or in fear of detainment. Please work to end the pandemic powers of the state rather than enhance them.

Thank you for your consideration,

Suzanne Auld

Subject: No Covid Vaccine Requirement for School Aged Children

External Email

Hello,

I was recently notified that your board is considering requiring the Covid Vaccine for school aged children.

As a concerned parent, I ask that you vote no on this requirement. The incoming reports of this vaccine on children have not been studied enough for not only long-term effects (i.e., 10-20 years) on children and their growing bodies, but also the side effects reported at this point for those who have taken the vaccine should be concerning for everyone. Incidents of myocarditis and sudden heart attack in children post vaccine is NOT normal. Also, to date, there have been more deaths from adverse events of the

vaccine in children than there have been deaths due to the Covid virus in children.

This is concerning, at this point, and with the highest incidence of how infectious the recent Omicron Variant is, to require a vaccine that does not stop transmission of the virus. For example, my husband and I are fully vaccinated, continued to practice social distancing, and have been very limiting on who we have been seeing the past 2 years, and we still contracted the Omicron variant of Covid. Not only that, we inadvertently passed it on to others before we were aware we were infected. If the vaccine does not stop transmission, then why should this be a requirement to attend school?

Thank you for your time in reading this email. Once again, I implore you to vote no in consideration of making a Covid Vaccine Requirement for our children to attend school.

Regards,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

To whom this concerns:

It is very concerning you are making decisions today regarding an experimental vaccine that hasn't had enough data to support anything it purports to do, in fact all the data coming out says the opposite. Does it make you wonder why no informed consent is provided for this vaccine? Does it make you wonder that all these drug commercials tell about all the possible side effects but the Pfizer/Biontech commercials push getting the vaccines and boosters only. Funny how they don't mention ANY already known side effects, after all, they have had at least a year. Does it make you wonder that Pfizer requested 75 years in which to reveal vaccine ingredients and a judge recently said they had 8 months? Doesn't this concern you at all that children have a very high survival rate for Covid-19 (usually very mild symptoms as well): somewhere between 98-99% yet a vaccine is being pushed? Since when is a vaccine pushed on children when not enough

trials have been done, let alone survival rate of disease is higher than usefulness of vaccine to "protect?" What is an acceptable amount of children to be hurt or dead in the name of "public good?" Would you be willing to sacrifice your own children?

Also, why are drug companies, physicians, nurses/techs administering the vaccine immune from any prosecution/lawsuit when people do die, are maimed, can't reproduce, or have long-term health issues?

Why are vaccines and booster shots needed when the data is coming out saying that natural immunity is more effective?

I write to ask you to put yourselves in the parents' shoes. It should be their discretion to allow their children to be vaccinated (specifically with an experimental vaccine) not the government. Some parents will choose to, some don't believe it is in their child's best interest to be vaccinated with this vaccine.

If this doesn't resonate with you, think of anything you most definitely feel strongly about regarding your own children, then think about the government telling you that you will do the opposite. Or else.

If you can't think of anything right now, believe me, something will come up.

I hope each one of you realize that your credibility in the public eye is already waning. If you decide to go through with this will you be able to live with yourself or is the almighty dollar or power more important to you than the people (especially children) you purport to protect?

Thank you for your time. I do hope you will actually ponder the questions I have asked.

Sincerely,

Colleen Young

Subject: No covid vaccination for schools

External Email

To the Washington State Board of Health,

I'm a mom of three young school children. These past two years have been extremely difficult. We have seen a rapid deterioration in our local community as well as our school. It has been heart wrenching to see. This has been due to how highly politicized covid-19 and the vaccination have been made. I'm asking you today to please NOT allow the covid vaccine to be required for schools. This action will further tear apart our communities and schools and FORCE many parents to make a life altering decision. Whether a parent will be FORCED to quit their job to homeschool their children or FORCED into giving their child(ren) a vaccination that they're not comfortable having them receive.

All of my children are up to date on the vaccines that are required for school. I'm not an anti-vaxer. I understand the importance of vaccines being used to prevent diseases. At this time however, the covid vaccine is not proven to work the way that most other vaccines do. At this time the science is showing that both vaccinated and unvaccinated

can contract and pass along this virus. It has been said from the beginning that children seem to have a much lower risk of severe complications from this virus than adults. The side effects from the vaccine could very well outweigh the risks of the virus for children.

Right now we have a great understanding of what we can do to protect ourselves and our families from this virus. Washing our hands, social distancing, wearing a mask in public spaces, and getting vaccinated if that is something you choose. Please DO NOT FORCE this on parents and allow them to decide what is best for their children.

I believe you have a great opportunity here to bring our communities back together instead of letting the hate of "vaccinated vs unvaccinated" hysteria continue in our great state of Washington.

Thank you for your time and consideration

- You can also dial-in using your phone for listen-only mode: Call in: +1 (253) 215-8782 (not toll-free) Webinar ID: 894 7406 4216 Passcode: 957396

- Location: 101 Israel Rd. SE, Tumwater, WA 98501

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I strongly oppose the proposed changes to the WAC 246 codes being brought forward related to covid-19 including use of detainment, and/or use of forced examination, testing, treatment, counseling and vaccination.  
I also strongly oppose the proposed requirement for the covid vaccine for school aged children.

Please do not bring these changes forward, it is a huge government overreach.

Thank you,

Dear Lindsay,

Thank you for serving in the position of board member for the state health board. I know it's not easy to make decisions for other people's health, especially in this day and age. I also know that there is not enough research to verify the efficacy of the "vaccinations". Even the CDC says that the vaccines cannot prevent Covid-19. Interestingly enough it seems the cases began to increase as more and more people began to obtain the vaccination.

Please do not encourage and enforce the mandate to vaccinate the population of the great state of Washington.

A registered voter in the county of Pierce,

Vawna Gary

Dear Ms. Herendeen,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization

requirements using WAC 246-105.

Sincerely yours,

Robyn Grether

External Email

Good morning,

I am writing this e-mail regarding the proposed COVID-19 policies that would be a complete overreach of the government and are at best a threat to our freedoms as American citizens. This is besides the fact that the vaccine is more of a risk to children than actually getting COVID. It's absolutely senseless. It's not right - you know it and we know it. I, and my other 4 family members, stand in complete opposition of the following proposed WAC's:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

Sincerely,

Jana Bajema

Subject: Consideration of covid vaccine for children to attend school

External Email

To Whom It May Concern,

I am absolutely against a decision to require the covid vaccine for in person learning. Not only would this be a detriment to our school, it would be to our entire community. If you were to recommend that children get the covid vaccine for school it would ultimately mean shutting down schools.

There are no long term studies saying the covid vaccine is safe for our children. Why aren't we discussing natural immunity? Why does that not matter anymore? Covid doesn't affect children the way it does adults and there is no reason to subject them to a shot that we just don't know enough about.

I urge you to really consider the small potential upside and the devastating downsides to this situation if you were to recommend the vaccine for children in order to attend school.

A Concerned Parent,

Terry Larson

Subject: K-12 COVID VAX

External Email

Hello,

We would like to express our extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are

interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for your consideration-

David and Stephanie Pond

Auburn, WA

I am writing in regards to the extreme attempts of the Washington state government and health department to completely control the public due under the guise of Covid-19 as it has reached alarming levels. It smacks of the beginnings of what has been seen in other countries (ie, Germany and Hitler). Our liberties and freedoms are being removed piece by piece and it has been allowed and encouraged due to the fear mongering of the media and exploitation of the uneducated masses.

Doing the same thing over and over and expecting different results (ie the definition of insanity) is what is happening here. Masking isn't working, vaccines are not working or slowing the spread, the virus is becoming more contagious/stronger and the vaccines aren't preventing it, the side effects are frightening and damaging not only our adult population but our youth in ways that we have not yet been able to be measure.

What has happened to medical freedom? What has happened to the right to choose for your own body and your own children? This is not the United States of America that I grew up in and I am afraid of the progression towards control by the state of all of our freedoms and liberties, including our own bodies. The idea of quarantining people in a state run facility is terrifying, as well as forcing questionable vaccinations in children for the first time in my lifetime.

As a medical professional I find it suspicious that the FDA is requestingAs a medical professional I find it suspicious that the FDA is requesting 55 years to turn over clinical data... Never in history has this ever happened nor been allowed. This tells me that there is definitely information they do not want the public to have, and in 55 years it will be too late. There is not even a recourse for people who followed the mandates and have damaged their bodies permanently since the FDA/government is not holding the vaccine companies responsible for lifelong damages (pericarditis, myocarditis, neurological disorders, autoimmune and others). This is setting a precedence that the government knows better than the individual person what is right for their bodies and their children and their lives.

To summarize, my family and I are completely against any of the proposed Covid policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-

100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 2.

Sincerely,

Andrea Seeley

Please do NOT mandate Covid vaccine for children. Some prefer natural immunity and should be allowed the choice.

As an adult, I chose to vaccinate. I still got Covid. My son got Covid from a vaccinated child. The vaccine is NOT minimizing spread. Clearly the vaccinated population is spreading it, so there is NO logic in requiring it for the benefit of others.

Subject: Opinion against COVID-19 vaccine mandates for children

External Email

Dear sir,

I am the parent of a private school student in Bellevue. I absolutely disagree with the COVID-19 vaccine entering the mandatory vaccine, even though I support the existing school mandatory vaccine.

First, the COVID-19 vaccine does not meet the purpose and role of mandatory school vaccination at all.

In CDC, the definition of a vaccine has been changed to a protective meaning from immune formation. According to global statistics so far, the COVID-19 vaccine has not been seen at all to prevent transmission by forming mass immunity and has been used to comfort individuals by not exacerbating their symptoms.

School-mandated vaccinations are intended to form mass immunity and prevent transmission, but currently, COVID-19 vaccines do not meet these two important aspects at all. Therefore, it is natural that the vaccination of the COVID-19 vaccine should be left to the individual's choice.

Second, the COVID-19 vaccine is only an emergency approved vaccine that is not sufficiently clinical and has many side effects. There has been no study at all on what side effects will occur a year or 10 years after children are hit. For this reason, many experts and doctors in the United States are currently opposed to vaccinations for children and adolescents.

Therefore, I think it is irresponsible to force children and adolescents to match dangerous vaccines that have not been proven safe for more than 10 years.

Thank you for listening to my thoughts. I sincerely ask you to consider this for the health and future of our children.

Subject: advisory board meeting

External Email

Dear Advisory Board for the Washington State Board of Health:

I am writing to voice my concerns about the Board of Health proposing a policy change to WAC 246.

WAC 246-100 states: Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

This is a frightening idea that feels like it comes straight out of Nazi Germany. It would be the most discriminatory action taken by our nation to date. The very idea that the state could detain people for refusal to comply with vaccine mandates flies in the face of common sense. The Covid "vaccine" does not prevent transmission or protect one from getting Covid. It is also not considering the large percentage of the population that have already acquired natural immunity through having had Covid. Would you think it was ok to use law enforcement to involuntarily detain vaccinated individuals as well? Are we turning into a police state?

We must not usurp the rights of individuals' freedom to take care of themselves in a manner that reflects their religious and moral beliefs.

Please stand for our freedoms. Please consider that action to support the use of law enforcement in this way will most certainly create a divided population that will not stand together. I fear the negative ramifications will be far greater than any intended good it will have.

With respect,

Barbara Miller

Well, thank you for the thank you.

As a citizen of Washington State, it's important to me WE ARE HEARD and ABIDED BY. Government at any point right now is SUSPICIOUS AND CORRUPTION. AND IT'S OUR FAULT FOR BEING COMPLACENT. NOW, WE TAKING BACK THE REINS! Inslee has proven he can't be TRUSTED AND WANTS TO DO AS MUCH DAMAGE AS POSSIBLE. INSTEAD OF LEADING, HE'S DIVIDING.

HE CAN NOT BE TRUSTED. PERIOD!

Not sure why HIV is the main topic these days. I felt like I was in the 80s. Your agenda is headed somewhere sinister and we're not having it. You know, building a house of cards. THE MESSAGE IS CLEAR. MANDATE OUR CHILDREN AND WE PULL THEM FROM SCHOOL.

OK, THANK YOU WAHAN FOR THE ENGINEERED VIRUS, NOT. WHY AREN'T WE FOLLOWING SWEDEN LEAD?

INSLEE SOLD HIS SOUL AT OUR EXPENSE! WE'RE NOT HAVING IT!

THANK YOU FOR YOUR TIME PLEASE DON'T FORGET YOU WORK FOR US.

External Email

Dear Washington State Board of Health,

Our state government should NOT be mandating Covid vaccines on our children. Children are at extremely low risk for Covid and these medical decisions should be left in the hands of parents.

Sincerely,

The Citizens of Washington State

Subject: extreme opposition to COVID 19 vaccine requirement for schools in Washington State

External Email

Hello, I would like to express my extreme opposition to the implementation of a COVID 19 vaccine requirement for schools in Washington State!

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org))  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for listening,  
Tim

Subject: Vaccine Mandate

External Email

Dear Lindsay,

My name is Stacey Simon, I'm writing to you about the possibility of mandating the Covid-19 vaccine in our schools.

I want to advocate for my children and for the children of Washington State. This isn't about anti-vax, but for everyone's right to choose what goes into their bodies.

This vaccine is still new, and there aren't any long term studies on its effects. It should be left up to the parents and their physician whether or not to get the vaccine, not the government. No one should be forced to take anything in order to attend school, hold a job, or continue to be a member in society. Studies have shown that our kids are not at risk for serious illness, and to date, Covid-19 still has over a 99% survival rate.

Clearly the vaccine isn't working to keep this virus at bay, and those that are vaccinated are still getting sick and spreading the virus. So why at this point would mandating this for our students be necessary or make any logical sense?

I can appreciate the fact that the world's attention is currently hyper-focused on Covid 19. Health and Public Safety organizations feel the need to show some sort of response, warranted or not. Please keep in mind the flawed logic of the vaccines and our children's well-being and health when making these policy decisions.

Thank you,

Stacey Simon

Subject: Ongoing discussions and upcoming meetings about mandatory vaccinations

External Email

Washington State Board of Health,

Thank-you for inviting public input from my household (two voting people). This huge topic should have been advertised longer and broader, due to the tremendous relative importance.

No, NO, NO! Do not even think of requiring mandatory vaccinations for kids or the general population. Period. We will be watching and listening; and ready to engage in MUCH MORE POLITICAL ACTION - as needed, if this topic starts to creep along. Let people continue to make their own well-informed decisions. This large government overreach must stop. Again, NO!

Also, we fully oppose WAC 246-100 or any rulemaking that might seek to expand ANY authorities to involuntarily quarantine any individuals. We also oppose adding anything similar to a Covid-19 vaccine to the WAC 246-105 schedule of required vaccines for children at public schools.

Do not displace or harass kids, school workers, valued health care workers, critical government workers, elected representatives or regular tax payers. They are not serfs and the Governor is not king. This is a representative republic – where the government should work for the people.

We will watch you on January 12th, and into the future. Thank-you.

Greg Roberts

Greetings,

Please do not support mandating the COVID vaccine for children. It is important for parents to be able to make the choices that will best help their families. It would not make sense to mandate something that could have detrimental effects on an entire generation, as there have been no long term studies for this. Many European countries have put the mandate on hold as it has caused heart problems in many students under the age of 18. It would be unwise as a state or district to mandate something that has the potential to harm so many of its next generation.

Thank you,

Rachel

This is in response to an unsolicited email requesting comments.

Your presentation amounted to an infomercial for the "vaccine", cooked facts and figures, and self-congratulations.

Glaringly absent from your presentation was ANY acknowledgement of the adverse reactions to the "vaccines".

It is obvious that no one at the Board of "Health" has an independent thought in their head. Do you encourage diverse opinion or do you mandate "group think"? It's the latter, obviously. I'll bet you mocked the public commenters on your lunch break.

I have precisely zero confidence in the Washington State Board of "Health".

Who dictates your marching orders? Are you bribed by Big Pharma? You ought to be vigorously investigated.

First I would like to thank you for putting this on zoom for all to listen and hear. It would have been difficult for us to attend if we had to attend at a meeting place in Olympia.

I would like to say, that I believe, I'm open minded and there is nobody on this panel that would want do harm to others and would do all they could to help someone. With that said, I don't think the panel was looking at ALL the facts and data. The data that was being presented was basically data that the media has been showing us. My question is how was this data collected? What were the questions asked to collect this information? Even the death rate caused by Covid is the data accurate or inaccurate by the type questions? What happened to the normal flu and pneumonia? Is that included with the Covid testing? Why all of sudden, it is all Covid including car accidents victims? The data does not seem to be complete as it is. Where was the data for use of alternative medicines? The data presented was basically adult data nothing on child or the unborn. It all seems incomplete. There is a lot of questions that just seemed to be assumed and not thoroughly presented.

The public's comments were the voice of the people as a whole. I don't believe there was one that spoke for mandatory vaccinations. However, the portion that was proposed was shot down almost instantly. Dr. Tom Pendergrass likened it to polio. I get that polio is a serious disease and a vaccination was able to help eradicate it. However, it was never discussed as to the content of the Covid shot vs the Polio shot. The polio virus is only carried in humans, not in animals. So you can make a vaccine for it. If it was carried by animals it would mutate like flu and reappear over and over again. Every doctor should know this. This vaccine has no part of covid virus in it. Covid or Coronavirus is found in animals so you can never eradicate it, it will always mutate and return and infect again if you contact it. What they call a vaccine for Covid is not a vaccine, it is gene therapy. It is messenger RNA. What they have in these shots make a pathway into your cells and changes the natural DNA makeup of your cells to fight the disease. This was tested in animals, and in the long run they all died. The testing was never tested in humans. When people are told they have to take a shot, they want to know how it's going to effect their body. The current information that is coming over media is bias and not telling everyone the full truth. The Medical field and scientists who oppose this, say, it is set up to fail, at what cost and who's expense. (Not to mention what Microbiologists under the glass are seeing in these shots.)

Please let the parent decide for themselves what is best for themselves and for their families.

Thank you,

---

Subject: BOH Agenda

External Email

Hello,

I am writing today to tell you that I OPPOSE the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period! As a country founded on the premise of freedom and the ability to choose with informed consent, this strikes at the very core of who we are. We are a diverse and unique people, and a one-size-fits-all narrative simply does not apply. Mandates of any kind effectively strip us all of these rights and freedoms we are inherently entitled to, and instead continue to divide us. United we stand, divided we fall.

In addition, I SUPPORT Informed Choice Washington's Petition for Rulemaking, which will be item 11 on the January 12th agenda. It was filed by Xavier Figueroa, PhD, on behalf of ICWA, and asks the Board to establish a new rule that prohibits addition of any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list. This is crucial in fostering our trust with the board in regards to our most precious assets of all, our children. They are the true victims in all of this and are relying desperately on our protection and advocacy. We need to know more and cannot go about this blindly. It is in everyone's best interest to rely on the gift of time and better information before making a sweeping decision that could, and most certainly will, have detrimental and fatal results. We all deserve better, but most especially, our children and their futures.

It is our sole duty to protect our children and see to it that their chance of a better future is possible. This means working to ensure they are continually fought for, so that each generation is a little better than the last. They are the future of this country and the face of our nation. I plead with you to advocate for them and hold fast to protecting them by rejecting these mandates. If nothing else, this continued controversy has awakened lions. Our children will not be your victims or your science experiments.

Respectfully,

Elisabeth Stewart

Subject: Proposed WACs on Quarantine and Mandated Public School Vaccines

External Email

Hello Lindsay,

I'd left a message this morning with you, asking you to call me on my home landline to discuss the proposed WACs, above. I would appreciate your call today, or emailing me with a good time to talk today, before I send my comments on to the Board of Health for review before the January 12 hearing.

Thank you,

Pietra Gaebel

Everett

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Subject: Wa State Board of "Health" & Inslee's proposed tyrannical & unconstitutional quarantine camps!

External Email

It's come to our attention that the WA Board of Health & Dictator Inslee is considering passing UNCONSTITUTIONAL bills for Quarantine Camps & forced vaccines with:

\*WAC 246-100-040

\*WAC 246-100-105

\*WAC 246-100-070

\*WAC 246-100-045

If you pass these bills you WILL BE IN VIOLATION of the NUREMBERG CODE & YOU WILL BE INDICTED for CRIMES AGAINST HUMANITY for your participation. Currently there are Common Law juries being formed ALL around WA State which have the power to do this to YOU! If you have't heard about this, you ought to look it up before you vote. WE THE PEOPLE will hold you accountable for YOUR actions, & we will NOT let you get away with this CRIME!

These bills not only violate our precious & beloved Constitution but several other health laws including:

\* PATIENT BILL OF RIGHTS

\* HIPPA LAWS

\* THE Supreme Court ALREADY RULED THAT NO EMERGENCY CAN ELIMINATE ANY RIGHTS GUARANTEED BY THE CONSTITUTION

If your "Health" Board & Inslee proceed to pass these bills after being warned of these facts you are KNOWINGLY VIOLATING, YOU will be considered to be intentionally committing TREASON against the Constitution & against We the People of the United States of AMERICA!

The covid Omicron variant is contagious HOWEVER, VERY MILD...HEALTHY PEOPLE ARE NOT DYING OF IT. Actually it will help us reach herd immunity quickly for anyone interested in REAL SCIENCE. However, our government officials don't seem to be interested in real science. Instead you all only use data that goes alongside of your AGENDA.....& are fully focused on THE GREAT RESET & destroying our state & country for a virus with a 99.997% SURVIVAL RATE, so you'll be able to pass the Vaccine Passport to take over control our assets if we don't comply with your every whim. You are EVIL!!!!

We are actively ORGANIZING & WE THE PEOPLE will PEACEFULLY fight you on this. We are thankful for the 2nd Amendment during times like these when our government has become tyrannical — this is exactly WHY our founders made the 2nd amendment so we the people if need be could defend ourselves from governmental TYRANNY. \*\*\*Canada & Australia sure wished they hadn't surrendered their guns....they NOW have no defense against their tyrannical DICTATOR government officials & are now a communist police state. This is not a threat...it is a simple fact.

Never have I understood the importance of the 2nd Amendment UNTIL BIDEN & INSLEE have gone CRAZY MAD & now our own Wa State Board of Health too over covid restrictions taking ALL OUR FREEDOMS AWAY .... Again for a very survivable virus for healthy people of all ages.

You act like we don't talk with friends from other states. ALL RED STATES ARE WIDE OPEN. Our daughter goes to college in Arizona, & they don't even mask up there! Dear friends moved to Florida & they said Covid is NON-EXISTENT there!!!

WE THE PEOPLE OF WASHINGTON STATE WLL NOT ALLOW YOU TO FORCE ANYTHING INTO OUR BODIES OR OUR CHILDREN'S THAT WE HAVEN'T FREELY CHOSEN FOR OURSELVES.

There are MILLIONS OF US IN WA STATE & only a few hundred or thousand of you. We are AWAKE to your tyranny & stomping all over our Constitutional Rights. WE WILL WIN THIS BATTLE....not you! We will rise up against you & protest every minute of everyday against this until you make the right decisions to OPPOSE THESE BILLS & any others in the future!

Subject: Washington State Board of Health Recommendation

External Email

We have been made aware that Washington State Board of Health will be discussing mandating the Covid-19 shots and recommending detaining 'by force' citizens who do not comply with a variety of actions deemed necessary regarding Covid-19 and/or other medical situations. We are the parents of 2 minor children and 2 adult children, born & raised in the State of Washington. WE STRONGLY ENCOURAGE YOU NOT MOVE FORWARD WITH THESE RECOMMENDATIONS.

We have personally been touched by this virus as we know so many others have been. We understand the seriousness of the virus. We also believe strongly in the fact that we must remain free to make medical decisions for ourselves and for our children, considering the unique circumstances of each individual in our family.

As Board members of Health in the State of Washington you are OBLIGATED to provide us with facts/evidence that support all guidelines and recommendations:

- 1) There needs to be transparency about current rates of mortality for Covid-19 with comorbidities and age groups represented;
- 2) There needs to be transparency about current rates of positive test results of those vaccinated and those vaccinated with a booster;
- 3) There needs to be transparency about the accuracy of testing available;
- 4) There needs to be transparency about how current mandates have consistently prevented the spread of Covid-19; and
- 5) Explain why there has been little focus on making the public aware of how Covid-19 is treatable and how hospitals are successfully treating patients.

It is our hope that as Washington State Health Board members, you still hold deeply the virtues and desires that led you into medicine and that you have not allowed yourself to become a political player. It is our hope that you truly do serve in your capacity with honesty and a desire to truly protect the citizens of Washington State, ALL Washington State citizens. We also hope you know that by recommending these actions, you will give countless citizens of Washington State no other choice, but to move out of the state. We personally have known 32 families who have moved out of state in the last 1.5 years and will see another 9 more move this year. We understand this is small, but exponential, given we are only one family. Passage of these recommendations into law will be where the line is drawn for our family when it comes to moving and many other families we know.

Do not continue this barrage of assaults on individual rights of your citizens, causing a mass exodus of this beautiful state that has been home to so many for so long! Be the person that stands up and truly protects your citizens, by giving them the inalienable rights and dignity they deserve as a citizen of this state and this country.

Concerned Citizens,

Doug & Lauren Wozeniak

Good afternoon,

I am a parents of 3 children in the CKSD in Washington state and I am email you wondering if there is a recording of the meeting today. As a parent and a working one at that I don't have the opportunity to watching and or attend this meeting. I also don't understand why there wouldn't be a recording of this as so more people may watch it.

I record all of the school board meetings At my kids schools because I feel it is hard to many to be able to attend. I then post them online for people to watch.

recording these meeting for more parents to be able to watch shows a transparency that

I feel would help.

An active parent in my children's lives,

Daniel Fuller

Dear Lindsay,

I know your time is valuable and you are probably receiving numerous comments. I will keep this very short.

Any notion at this time of added Covid shots as mandatory for attending school is unprecedented and potentially extremely dangerous until we have some long term data on any adverse effects of these experimental drugs for our children. Moreover, evidence is mounting – with significant breakthrough cases, the need for boosters and new variants - that the drugs are not really working like originally claimed.

Thank you for considering these thoughts.

Subject: Vaccine requirements for School Children

External Email

Good afternoon.

I am sending this email in response to the upcoming board meeting that includes the subject of vaccinating our children with a gene therapy that is still under Emergency Use Authorization. No COVID vaccine available in the United States has received FDA approval.

It is a violation of International Law to force the involvement of unwilling individuals in any medical experiment. The consent forms that participants agree to, when getting the vaccine, stipulates that they are agreeing to participate in clinical trials.

The lack of full FDA approval and the absence of Informed consent are violations of Federal Regulations.

In addition, there is a serious question as to the necessity of such a vaccination for a subject group that has virtually 0 risk of death from the virus. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. These are CDC statistics.

No one knows the long-term risks of these vaccines! You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe their vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. This is unconscionable.

I am going to expand upon these points. You have been made aware of the precedence's established by the Nuremburg Code, the needlessness of vaccinating a subject group that is not at risk, and the illegality of mandating an EAU drug treatment on our most vulnerable.

It will be my focus to hold you and fellow board members, that ignore these legal, ethical, and moral restrictions, personally accountable for your decisions.

As members of the Board of Health and a Public Official, by Statute, you are required to maintain a Surety Bond.

Your failure to uphold your responsibilities to the citizens of Washington State and reject these illegal, unethical, and immoral mandates will prompt a challenge to that Bond.

Respectfully,

KL

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org))

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=0>>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors (americasfrontlinedoctors.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Subject: reg the upcoming health care board meeting

External Email

Hi Lindsay,

I want to express my opinion for your upcoming board meeting...

I think the most important thing is for people to have a choice about their own body and health. I think children should not be forced to be vaccinated .. their bodies are healthy with a great immune system that with proper food and care will protect them.

I had my boss die last year after taking the second shot of the Pfizer vaccine, my friend

in the office got Bell's Palsy after her first vaccine shot and my other friend's son wife who was pregnant got a miscarriage right after the shot ... so I think with so many people having side effect and dying ... you as the health care department should absolutely not force people to get this vaccine and give people a choice of what each person wants to do.. the risk and consequences of this experimental drug are way too big to enforce it on people.

Why does being healthy not mean anything anymore.. having a healthy body with a good immune system should be the greatest thing. I'm from Switzerland originally and over there people who have had Covid and have anti-body .. that is good enough to live life and not have to get the vaccine. Why can we not do this hear. The healthy people should not be forced to be vaccinated.

So I would like that you

1. OPPOSE Agenda # 8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for children of ANY age
2. SUPPORT AGENDA # 11, Informed Choice Washington's Petition for Rulemaking -- this is item 11 on the agenda! This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Alice Bossart

As I watched the meeting yesterday, I was very disappointed in how the BOH misled the audience with its statistics in regards to Covid and vaccines. The BOH used flat numbers without giving a relational perspective. The BOH also used groupings of individuals such 12-34 to suggest that individuals 30 and younger were at the same risk as someone 31-34 which is inaccurate and dishonest. Had the BOH used groups 30 and younger, 31-65, and 65 +, there data would show that individuals under 30 have virtually no risk of a fatal outcome or hospitalization from Covid. The BOH also has solely focused on vaccines which are only 50% effective and to continue pushing for boosters, masks and distancing is irresponsible. The rest of the nations children are being educated while ours are losing vital parts due to rigid mask mandates and policies. The rest of the nation has less cases of Covid (as seen by the BOH map yesterday) and their citizens are able to flourish due to freedom. The BOH is responsible for acceptable discrimination which is toward unvaccinated individuals and that is morally, ethically and legally wrong.

Therefore, I propose that the BOH bring in an unbiased third party to depict the data in regards to Covid.

I respectfully request an answer to this email.

Sincerely

Becca

Good afternoon,

The fact that nobody can reach you or your colleagues through phone or email is concerning. It appears that you and your colleagues do not want to hear from the public.

I want you to consider the consequences of your actions and decisions. Mainly, the meeting today where I understand you and your colleagues will consider imposing forced isolation for individuals and families. It is my understanding you and your colleagues will be deciding whether to demand all public school students are vaccinated.

I want you to consider the consequences of your actions. Do you know the public school attendance is on a steady decline? Citizens are losing trust in public schools. Sit down and critically think what problems this may cause to the safety and well being of children.

Furthermore, if you or your colleagues vote for any type of forced isolation, you will be voting against the Constitution. Have you read that lately? It seems that if you have, you would not consider any thing that is on your agenda.

Speaking of agendas, the public has lost faith in you as well for considering these unconstitutional demands. WE ARE NOT against science. WE ARE AGAINST AGENDA SCIENCE. We are not against vaccines. We are against FORCED VACCINES, especially when the data does not support them as a common good. Insurance companies are reporting a spike in deaths, not after Covid came but after vaccines came. The vaccine doesn't stop you from contracting "Covid" or spreading "Covid".

Consider the actions of YOUR INDIVIDUAL decisions and actions. The public is not happy with the tyranny being imposed in WASHINGTON state. We are fed up with all the dead small businesses, the suicide and the agenda science.

The public is fed up. It's up to you to do the right thing and think critically, not under an agenda. These two topics you consider imposing, consider how the public will react. The public trust is teetering, legal action will be brought forth against you and your board, you will sever any lasting threads of trust in the public schools and you will infuriate many parents and citizens. We see outrageous suicides, even of one entire family. This doesn't need to happen. Look at all science, not just agenda science. Follow the Constitution, not money.

Thank you,

Tatyana S.

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and

vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault.aspx?cite=70.290.010>>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

Dear Lindsay,

As you prepare to sit down with members of the Washington Board of Health members on January 12th, please consider the many words you have received from other concerned citizens of Washington State as well as my words. Please do not force people to be detained or forced into quarantine facilities if they choose, for their own health and safety, to not be vaccinated against COVID-19. What happened to the people having the freedom to make their own choices for their own bodies? By forcing something like this, you would be taking away the basic freedoms that our country is founded on and throw them down the drain. By doing this, you would force people like my parents who are in their upper 70's, who have already had COVID and fully recovered and now have antibodies and natural immunity, to forcibly be detained because they choose not to be vaccinated. THEY DON'T NEED TO BE VACCINATED. And neither does anyone who

already has natural immunity. SO DON'T FORCE THEM. OR ANYONE.

And in the case of requiring kids to be vaccinated in order to go to school, well that's just utter and complete nonsense. Kids aren't dying right and left from COVID. Omicron is a cold. Kids get colds ALL THE TIME. With no studies in place AT ALL to show that vaccinating children is even helpful, why would you force parents to vaccinate their kids in order to go to school? It doesn't make any sense whatsoever. Let the kids be kids and not alter their DNA when there is ABSOLUTELY NOTHING to show that it will do them any good.

Again, I ask you as an American and a native Washingtonian, please do not force the people of Washington State to go against their given freedoms but allow them to make the best decisions that they can make for themselves and their families.

Thank you.

Sincerely,

Jacinta Rupprecht

## Abstract

### **Background:**

Repurposed medicines may have a role against the SARS-CoV-2 virus. The antiparasitic ivermectin, with antiviral and anti-inflammatory properties, has now been tested in numerous clinical trials.

### **Areas of uncertainty:**

We assessed the efficacy of ivermectin treatment in reducing mortality, in secondary outcomes, and in chemoprophylaxis, among people with, or at high risk of, COVID-19 infection.

### **Data sources:**

We searched bibliographic databases up to April 25, 2021. Two review authors sifted for studies, extracted data, and assessed risk of bias. Meta-analyses were conducted and certainty of the evidence was assessed using the GRADE approach and additionally in trial sequential analyses for mortality. Twenty-four randomized controlled trials involving 3406 participants met review inclusion.

### **Therapeutic Advances:**

Meta-analysis of 15 trials found that ivermectin reduced risk of death compared with no ivermectin (average risk ratio 0.38, 95% confidence interval 0.19–0.73; n = 2438; I<sup>2</sup> = 49%; moderate-certainty evidence). This result was confirmed in a trial sequential analysis using the

same DerSimonian–Laird method that underpinned the unadjusted analysis. This was also robust against a trial sequential analysis using the Biggerstaff–Tweedie method. Low-certainty evidence found that ivermectin prophylaxis reduced COVID-19 infection by an average 86% (95% confidence interval 79%–91%). Secondary outcomes provided less certain evidence. Low-certainty evidence suggested that there may be no benefit with ivermectin for “need for mechanical ventilation,” whereas effect estimates for “improvement” and “deterioration” clearly favored ivermectin use. Severe adverse events were rare among treatment trials and evidence of no difference was assessed as low certainty. Evidence on other secondary outcomes was very low certainty.

## Conclusions:

Moderate-certainty evidence finds that large reductions in COVID-19 deaths are possible using ivermectin. Using ivermectin early in the clinical course may reduce numbers progressing to severe disease. The apparent safety and low cost suggest that ivermectin is likely to have a significant impact on the SARS-CoV-2 pandemic globally.

## INTRODUCTION

To date, very few treatments have been demonstrated to reduce the burden of morbidity and mortality from COVID-19. Although corticosteroids have been proven to reduce mortality in severe disease,<sup>1</sup> there has been little convincing evidence on interventions that may prevent disease, reduce hospitalizations, and reduce the numbers of people progressing to critical disease and death.

Ivermectin is a well-known medicine that is approved as an antiparasitic by the World Health Organization and the US Food and Drug Administration. It is widely used in low- and middle-income countries (LMICs) to treat worm infections.<sup>2,3</sup> Also used for the treatment of scabies and lice, it is one of the World Health Organization’s Essential Medicines.<sup>4</sup> With total doses of ivermectin distributed apparently equaling one-third of the present world population,<sup>5</sup> ivermectin at the usual doses (0.2–0.4 mg/kg) is considered extremely safe for use in humans.<sup>6,7</sup> In addition to its antiparasitic activity, it has been noted to have antiviral and anti-inflammatory properties, leading to an increasing list of therapeutic indications.<sup>8</sup>

Since the start of the SARS-CoV-2 pandemic, both observational and randomized studies have evaluated ivermectin as a treatment for, and as prophylaxis against, COVID-19 infection. A review by the Front Line COVID-19 Critical Care Alliance summarized findings from 27 studies on the effects of ivermectin for the prevention and treatment of COVID-19 infection, concluding that ivermectin “demonstrates a strong signal of therapeutic efficacy” against COVID-19.<sup>9</sup> Another recent review found that ivermectin reduced deaths by 75%.<sup>10</sup> Despite these findings, the National Institutes of Health in the United States recently stated that “there are insufficient data to recommend either for or against the use of ivermectin for the treatment of COVID-19,”<sup>11</sup> and the World Health Organization recommends against its use outside of clinical trials.<sup>12</sup>

Ivermectin has exhibited antiviral activity against a wide range of RNA and some DNA viruses, for example, Zika, dengue, yellow fever, and others.<sup>13</sup> Caly et al<sup>14</sup> demonstrated specific action against SARS-CoV-2 in vitro with a suggested host-directed mechanism of action being the blocking of the nuclear import of viral proteins<sup>14,15</sup> that suppress normal immune responses. However, the necessary cell culture EC<sub>50</sub> may not be achievable in vivo.<sup>16</sup> Other conjectured mechanisms include inhibition of SARS-CoV-2 3CLPro activity<sup>17,18</sup> (a protease essential for viral replication), a variety of anti-inflammatory effects,<sup>19</sup> and competitive *binding* of ivermectin with the viral S protein as shown in multiple *in silico* studies.<sup>20</sup> The latter would inhibit viral binding to ACE-2 receptors suppressing infection. Hemagglutination via viral binding to sialic acid receptors on erythrocytes is a recently proposed pathologic mechanism<sup>21</sup> that would be similarly disrupted. Both host-directed and virus-directed mechanisms have thus been proposed, the clinical mechanism may be multimodal, possibly dependent on disease stage, and a comprehensive review of mechanisms of action is warranted.

Developing new medications can take years; therefore, identifying existing drugs that can be repurposed against COVID-19 that already have an established safety profile through decades of use could play a critical role in suppressing or even ending the SARS-CoV-2 pandemic. Using repurposed medications may be especially important because it could take months, possibly years, for much of the world's population to get vaccinated, particularly among LMIC populations.

Currently, ivermectin is commercially available and affordable in many countries globally.<sup>6</sup> A 2018 application for ivermectin use for scabies gives a direct cost of \$2.90 for 100 12-mg tablets.<sup>22</sup> A recent estimate from Bangladesh<sup>23</sup> reports a cost of US\$0.60—US\$1.80 for a 5-day course of ivermectin. For these reasons, the exploration of ivermectin's potential effectiveness against SARS-CoV-2 may be of particular importance for settings with limited resources.<sup>24</sup> If demonstrated to be effective as a treatment for COVID-19, the cost-effectiveness of ivermectin should be considered against existing treatments and prophylaxes.

The aim of this review was to assess the efficacy of ivermectin treatment among people with COVID-19 infection and as a prophylaxis among people at higher risk of COVID-19 infection. In addition, we aimed to prepare a brief economic commentary (BEC) of ivermectin as treatment and as prophylaxis for COVID-19.<sup>25</sup>

## METHODS

The conduct of this review was guided by a protocol that was initially written using Cochrane's rapid review template and subsequently expanded to a full protocol for a comprehensive review.<sup>26</sup>

### Search strategy and selection criteria

Two reviewers independently searched the electronic databases of Medline, Embase, CENTRAL, Cochrane COVID-19 Study Register, and Chinese databases for

randomized controlled trials (RCTs) up to April 25, 2021 (see **Appendix 1–3, Supplemental digital content 1**, <http://links.lww.com/AJT/A95>); current guidance<sup>25</sup> for the BEC was followed for a supplementary search of economic evaluations. There were no language restrictions, and translations were planned to be performed when necessary.

We searched the reference list of included studies, and of two other 2021 literature reviews on ivermectin,<sup>9</sup> as well as the recent WHO report, which included analyses of ivermectin.<sup>12</sup> We contacted experts in the field (Drs. Andrew Hill, Pierre Kory, and Paul Marik) for information on new and emerging trial data. In addition, all trials registered on clinical trial registries were checked, and trialists of 39 ongoing trials or unclassified studies were contacted to request information on trial status and data where available. Many preprint publications and unpublished articles were identified from the preprint servers MedRxiv and *Research Square*, and the International Clinical Trials Registry Platform. This is a rapidly expanding evidence base, so the number of trials are increasing quickly. Reasons for exclusion were recorded for all studies excluded after full-text review.

## Data analysis

We extracted information or data on study design (including methods, location, sites, funding, study author declaration of interests, and inclusion/exclusion criteria), setting, participant characteristics (disease severity, age, gender, comorbidities, smoking, and occupational risk), and intervention and comparator characteristics (dose and frequency of ivermectin/comparator). The primary outcome for the intervention component of the review included death from any cause and presence of COVID-19 infection (as defined by investigators) for ivermectin prophylaxis. Secondary outcomes included time to polymerase chain reaction (PCR) negativity, clinical recovery, length of hospital stay, admission to hospital (for outpatient treatment), admission to ICU or requiring mechanical ventilation, duration of mechanical ventilation, and severe or serious adverse events, as well as post hoc assessments of improvement and deterioration. All of these data were extracted as measured and reported by investigators. Numerical data for outcomes of interest were extracted according to intention to treat.

If there was a conflict between data reported across multiple sources for a single study (eg, between a published article and a trial registry record), we contacted the authors for clarification. Assessments were conducted by 2 reviewers (T.L., T.D., A.B., or G.G.) using the Cochrane RCT risk-of-bias tool.<sup>27</sup> Discrepancies were resolved by discussion.

Continuous outcomes were measured as the mean difference and 95% confidence intervals (CI), and dichotomous outcomes as risk ratio (RR) and 95% CI.

We did not impute missing data for any of the outcomes. Authors were contacted for missing outcome data and for clarification on study methods, where possible, and for trial status for ongoing trials.

We assessed heterogeneity between studies by visual inspection of forest plots, by estimation of the  $I^2$  statistic ( $I^2 \geq 60\%$  was considered substantial heterogeneity),<sup>28</sup> by a formal statistical test to indicate statistically significant heterogeneity,<sup>29</sup> and, where possible, by subgroup analyses (see below). If there was evidence of substantial heterogeneity, the possible reasons for this were investigated and reported. We assessed reporting biases using funnel plots if more than 10 studies contributed to a meta-analysis.

We meta-analyzed data using the random effects model (DerSimonian and Laird method)<sup>30</sup> using RevMan 5.4.1 software.<sup>27,31</sup> The results used the inverse variance method for weighting.<sup>27</sup> Some sensitivity analyses used other methods that are outlined below and some calculations were performed in  $R$ <sup>32</sup> through an interface<sup>33</sup> to the *netmeta* package.<sup>34</sup> Where possible, we performed subgroup analyses grouping trials by disease severity, inpatients versus outpatients, and single dose versus multiple doses. We performed sensitivity analyses by excluding studies at high risk of bias. We conducted further post hoc sensitivity analyses using alternative methods to test the robustness of results in the presence of zero events in both arms in a number of trials<sup>35</sup> and estimated odds ratios [and additionally RR for the Mantel–Haenszel (MH) method] using a fixed effects model. The models incorporate evidence from single-zero studies without having to resort to continuity corrections. However, double-zero studies are excluded from the analysis; so, the risk difference was also assessed using the MH method as this approach can adequately incorporate trials with double-zero events. This method can also use a random-effects component. A “treatment-arm” continuity correction was used, where the values 0.01, 0.1, and 0.25 were added where trials reported zero events in both arms. It has been shown that a nonfixed continuity correction is preferable to the usual 0.5.<sup>35</sup> Other methods are available but were not considered due to difficulty in interpretation, sensitivity of assumptions, or the fact they are rarely used in practice.<sup>36–40</sup>

## Trial sequential analysis

When a meta-analysis is subjected to repeated statistical evaluation, there is an exaggerated risk that “naive” point estimates and confidence intervals will yield spurious inferences. In a meta-analysis, it is important to minimize the risk of making a false-positive or false-negative conclusion. There is a trade-off between the risk of observing a false-positive result (type I error) and the risk of observing a false-negative result (type II error). Conventional meta-analysis methods (eg, in RevMan) also do not take into account the amount of available evidence. Therefore, we examined the reliability and conclusiveness of the available evidence using trial sequential analyses (TSA).<sup>41–43</sup> The DerSimonian–Laird (DL) method was used because this is most often used in meta-analytic practice and was also used in the primary meta-analysis.<sup>30</sup>

The TSA was used to calculate the required information size (IS) to demonstrate or reject a relative reduction in the risk (RRR) of death in the ivermectin group, as found in the primary meta-analysis. We assumed the estimated event proportion in the control group from the meta-analysis because this is the best and most representative available

estimate. Recommended type I and II error rates of 5% and 10% were used, respectively (power of 90%),<sup>43</sup> powering the result on the effect observed in the primary meta-analyses. We did not identify any large COVID-19 trials powered on all-cause mortality, so powering on some external meaningful difference was not possible. Any small RRR is meaningful in this context, given the scale of the pandemic, but the required IS would be unfeasibly high for this analysis if powered on a small difference. The only reliable data on ivermectin in its repurposed role for treatment against COVID-19 will be from the primary meta-analysis. Therefore, assuming it does not widely deviate from other published systematic reviews, a pragmatic decision was therefore made to power on the pooled meta-analysis effect estimate for all-cause mortality a priori. This is more reflective of a true meaningful difference. We used a model variance-based estimate to correct for heterogeneity. A continuity correction of 0.01 was used in trials that reported zero events in one or both arms. The required IS is the sample size required for a reliable and conclusive meta-analysis and is at least as large as that needed in a single powered RCT. The heterogeneity corrected required IS was used to construct sequential monitoring boundaries based on the O'Brien–Fleming type alpha-spending function for the cumulative z-scores (corresponding to the cumulative meta-analysis),<sup>43</sup> analogous to interim monitoring in an RCT, to determine when sufficient evidence had been accrued. These monitoring boundaries are relatively insensitive to the number of repeated significance tests. They can be used to further contextualize the original meta-analysis and enhance our certainty around its conclusions. We used a two-sided test, so also considered futility boundaries (to test for no statistically significant difference) and the possibility that ivermectin could harm. Sensitivity analyses were performed excluding the trial of Fonseca,<sup>44</sup> which was a cause of substantial heterogeneity (but retained in the core analysis because it was at low risk of bias). Its removal dramatically reduced  $I^2$  and  $D^2$  (diversity) estimates, thus reducing the model variance-based estimate to correct for heterogeneity. Two further sensitivity analyses were performed using 2 alternative random effect models, namely the Biggerstaff–Tweedie (BT) and Sidik–Jonkman (SJ) methods.<sup>43</sup>

All outcomes have been assessed independently by 2 review authors (T.D. and A.B.) using the GRADE approach,<sup>45</sup> which ranks the quality and certainty of the evidence. The results of the TSAs will also form part of the judgment for the primary all-cause mortality outcome. The results are presented in a summary of findings table. Any differences in judgments were resolved by discussion with the wider group. We used Cochrane Effective Practice and Organisation of Care guidance to interpret the evidence.<sup>46</sup>

## RESULTS

### Search results and risk-of-bias assessment

The combined and preliminary deduplicated total was  $n = 583$ . We also identified 11 records from other sources (reference lists, etc). See PRISMA flow diagram for inclusion and exclusion details of these references ([Figure 1](#)).

**FIGURE 1.:**

Study flow diagram from search on 25 April 2021.

The supplementary search for the BEC identified 17 studies, of which 4 were retrieved in full. No full trial- or model-based economic evaluations (cost–utility analyses, cost–effectiveness analyses, or cost–benefit analyses) were identified.

Twenty-one trials in treatment and 2 trials in prophylaxis of COVID-19 met review inclusion. One further study<sup>47</sup> reported separate treatment and prophylaxis components; we label this study “Elgazzar” under both questions. In effect, there were 22 trials in treatment and 3 in prophylaxis. All of these contributed data to at least one review outcome and meta-analysis. Fifteen trials contributed data for the primary outcome for ivermectin treatment (death); 3 studies reported the primary outcome for prophylaxis (COVID-19 infection). Characteristics of included studies are given in [Table 1](#). Seventeen studies<sup>47–63</sup> were excluded as they were not RCTs and we identified 39 ongoing studies<sup>64–102</sup> and 2 studies<sup>103,104</sup> are awaiting classification.

**FIGURE 2.:**

Risk-of-bias summary: review authors' judgments about each risk of bias item for each included study.

Ten trials reported adequate blinding of the participants/personnel and/or the outcome assessors.<sup>23,24,44,105,107,109,110,111,113,114</sup> The others were either unclear or high risk for blinding. We considered blinding to be a less important criterion for evaluation of evidence related to

the review's primary outcomes, namely death and laboratory-confirmed COVID-19 infection, which are objective outcomes.

We did not consider publication on preprint web sites to constitute a risk of bias because all studies were scrutinized and peer reviewed by us during the review process and, where additional information was needed, we contacted the authors for clarification.

## Main findings

Twenty-four RCTs (including 3 quasi-RCTs) involving 3406 participants were included, with sample sizes ranging from 24 to 476 participants. Twenty-two trials in treatment and 3 trials in prophylaxis met review inclusion, including the trial of Elgazzar et al, which reported both components. For trials of COVID-19 treatment, 16 evaluated ivermectin among participants with mild to moderate COVID-19 only; 6 trials included patients with severe COVID-19. Most compared ivermectin with placebo or no ivermectin; 3 trials included an active comparator ([Table 1](#)). Three RCTs involving 738 participants were included in the prophylaxis trials. Most trials were registered, self-funded, and undertaken by clinicians working in the field. There were no obvious conflicts of interest noted, with the exception of two trials.<sup>85,139</sup>

## Ivermectin treatment versus no ivermectin treatment

Twenty-two trials (2668 participants) contributed data to the comparison ivermectin treatment versus no ivermectin treatment for COVID-19 treatment.

## All-cause mortality

Meta-analysis of 15 trials, assessing 2438 participants, found that ivermectin reduced the risk of death by an average of 62% (95% CI 27%–81%) compared with no ivermectin treatment [average RR (aRR) 0.38, 95% CI 0.19 to 0.73;  $I^2 = 49\%$ ]; risk of death 2.3% versus 7.8% among hospitalized patients in this analysis, respectively (SoF [Table 2](#) and [Figure 3](#)). Much of the heterogeneity was explained by the exclusion of one trial<sup>4</sup> in a sensitivity analysis (average RR 0.31, 95% CI 0.17–0.58,  $n = 2196$ ,  $I^2 = 22\%$ ), but because this trial was at low risk of bias, it was retained in the main analysis. The source of heterogeneity may be due to the use of active comparators in the trial design. The results were also robust to sensitivity analyses excluding 2 other studies with an active treatment comparator (average RR 0.41, 95% CI 0.23–0.74,  $n = 1809$ ,  $I^2 = 8\%$ ). The results were also not sensitive to the exclusion of studies that were potentially at higher risk of bias (average RR 0.29, 95% CI 0.10–0.80, 12 studies,  $n = 2095$ ,  $I^2 = 61\%$ ), but in subgroup analysis, it was unclear as to whether a single dose would be sufficient. The effect on reducing deaths was consistent across mild to moderate and severe disease subgroups. Subgrouping data according to inpatient and outpatient trials was not informative because few outpatient studies reported this serious outcome. The conclusions of the primary outcome were also robust to a series of alternative post hoc analyses that explored the impact of numerous trials that

reported no deaths in either arm. Extreme sensitivity analyses using a treatment arm continuity correction of between 0.01 and 0.5 did not change the certainty of the evidence judgments (Table 3).

Table 2. - Summary of findings table of ivermectin versus no ivermectin for COVID-19 treatment in any setting.

| Outcomes                                                                  | Illustrative comparative risks* (95% CI)                                                                                  |                                  | Relative effect (95% CI)    | No. of participants (studies) | Quality of the evidence (GRADE) |

FE, fixed effects; IV, inverse variance; M-H, Mantel-Haenszel; RD, risk difference; RE, random effects; TACC, treatment arm continuity correction.

## Trial sequential analysis

TSA, using the DL random-effects method, showed that there may have been sufficient evidence accrued before the end of 2020 to show significant benefit of ivermectin over control for all-cause mortality. The cumulative z-curve in [Figure 8](#) crossed the trial sequential monitoring boundaries after reaching the required IS, implying that there is firm evidence for a beneficial effect of ivermectin use over no ivermectin use in mainly hospitalized participants with mild to moderate COVID-19 infection.

The TSA was used to calculate the IS required to demonstrate or reject a 62% RRR of death in the ivermectin group, as observed in the primary meta-analysis. This estimate is similar to effect estimates reported in other reviews.<sup>10</sup> We assumed a 7.8% event proportion in the control group, which was the average control group event rate from the primary meta-analysis. We used a model variance-based estimate of 49.1% (diversity estimate) to correct for heterogeneity. The required IS was 1810 participants ([Figure 8](#)),

which was exceeded by the total number of observed participants in the meta-analysis ( $n = 2438$ ). In the TSA plots, the red dashed lines in [Figure 8](#) represent the trial sequential monitoring boundaries using the O'Brien–Fleming alpha-spending function. The solid blue line is the cumulative z-curve and represents the observed trials in the cumulative meta-analysis. The adjusted significance boundaries for the cumulative z-curve were constructed under the assumption that significance testing may have been performed each time a new trial was added to the meta-analysis. In [Figure 8](#), the z-curve crosses the boundary after reaching the required IS, thereby supporting the previous conclusion in RevMan 5.4.1<sup>31</sup> using the DL method that ivermectin is superior to control in reducing the risk of death.

## Sensitivity analyses

Sensitivity analysis excluding the trial of Fonseca<sup>44</sup> significantly reduced heterogeneity in the meta-analysis and thus the diversity estimate in the TSA using the DL model. This strengthened the suggestion in the primary core analysis that the required IS had been reached ([Figure 9](#)). Because the DL estimator could potentially underestimate the between-trials variance,<sup>43</sup> we performed further sensitivity analyses using 2 alternative random-effects model approaches. The results of the primary TSA analysis were robust to sensitivity analysis using the BT method with the same parameters, excluding the Fonseca<sup>44</sup> trial, which was a cause of substantial heterogeneity ([Figure 10](#)). The TSA comprehensively confirms the result of the conventional meta-analysis. **The required IS was 1064.**

The required IS was not reached in the TSA using the SJ method, largely because diversity from the model was high ([Figure 11](#)). The SJ estimator may overestimate the between-trials variance in meta-analyses with mild heterogeneity, thus producing artificially wide confidence intervals.<sup>43</sup> When the diversity estimate was reduced to the same as in the DL model, the required IS was reached in the SJ model (data not shown). **There was no evidence of futility using the SJ method in any scenario.**

## Certainty of the evidence for all-cause mortality

**Overall, death from any cause, taking into account all composite analyses, was judged to provide moderate-certainty evidence (SoF [Table 2](#) and [Figures 4–11](#)). A funnel plot corresponding to the primary outcome of death from any cause did not seem to suggest any evidence of publication bias ([Figure 7](#)).** Furthermore, the ease with which trial reports can be uploaded as preprints should reduce this risk.

**FIGURE 10.:**

Sensitivity analysis excluding an outlier study responsible for the heterogeneity, showing trial sequential analysis using Biggerstaff-Tweedie random-effects method with parameter estimates of  $\alpha = 0.05$ ,  $\beta = 0.1$ , control rate = 7.8%, RRR = 62%, and diversity = 14.2%.

**FIGURE 11.:**

Sensitivity analysis excluding an outlier study responsible for the heterogeneity, showing trial sequential analysis using Sidik–Jonkman random-effects method with parameter estimates of  $\alpha = 0.05$ ,  $\beta = 0.1$ , control rate = 7.8%, RRR = 62%, and diversity = 71.9%.

## Secondary outcomes

Secondary outcomes provided low to very low certainty evidence (SoF [Table 2](#)). Low-certainty findings suggested that there may be no benefit with ivermectin for “need for mechanical ventilation,” whereas effect estimates for “improvement” and “deterioration” favored ivermectin but were graded as low certainty due to study design limitations and inconsistency ([Figures 12–14](#)). All other secondary outcome findings were assessed as very low certainty.

**FIGURE 12.:**

## Need for mechanical ventilation.

**FIGURE 13.:**

## Improvement.

**FIGURE 14.:**

## Deterioration.

Meta-analysis of 11 trials, assessing 1533 participants, found that there was no significant difference between ivermectin and control in the risk of severe adverse events (aRR 1.65, 95% CI 0.44–6.09;  $I^2 = 0\%$ ; *low certainty evidence*, downgraded for imprecision and study design limitations). Seven severe adverse events were reported in the ivermectin group and 2 in controls. The SAEs were as follows: 2 patients in the Mahmud trial<sup>107</sup> had esophagitis (this is a known side effect of doxycycline, which was coadministered with ivermectin in this trial); one patient in the study by Krolewiecki et al<sup>106</sup> had hyponatremia (this trial used high-dose ivermectin for 5 days); and 2 patients in a study from Turkey<sup>115</sup> had serious “delirium-like behavior, agitation, aggressive attitude, and altered state of consciousness,” which the authors attributed to metabolic insufficiencies in MDR-1/ABCB1 or CYP3A4 genes, screening for which was a study feature. In the Lopez-Medina et al<sup>85</sup> trial, there were 2 SAEs in each arm (SoF [Table 2](#)).

### Ivermectin prophylaxis versus no ivermectin prophylaxis

Three studies involving 738 participants evaluated ivermectin for COVID-19 prophylaxis among health care workers and COVID-19 contacts. Meta-analysis of these 3 trials, assessing 738 participants, found that ivermectin prophylaxis among health care workers and COVID-19 contacts probably reduces the risk of COVID-19 infection by an average of 86% (79%–91%) (3 trials, 738 participants; aRR 0.14, 95% CI 0.09–0.21; 5.0% vs. 29.6% contracted COVID-19, respectively; *low-certainty evidence*; downgraded due to study design limitations and few included trials) ([Figure 15](#)). In 2 trials involving 538 participants, no severe adverse events were recorded (SoF [Table 4](#)).

**FIGURE 15.:**

events

GRADE working group grades of evidence; High quality: Further research is very unlikely to change our confidence in the estimate of effect; Moderate quality: Further research is likely to have an important impact on our confidence in the estimate of effect and may change the estimate; Low quality: Further research is very likely to have an important impact on our confidence in the estimate of effect and is likely to change the estimate; Very low quality: We are very uncertain about the estimate.

\*The basis for the assumed risk (eg, the median control group risk across studies) is provided in footnotes. The corresponding risk (and its 95% CI) is based on the assumed risk in the comparison group and the relative effect of the intervention (and its 95% CI).

†Downgraded -2 for study design limitations.

NNT, number needed to treat.

## DISCUSSION

The findings indicate with moderate certainty that ivermectin treatment in COVID-19 provides a significant survival benefit. Our certainty of evidence judgment was consolidated by the results of trial sequential analyses, which show that the required IS has probably already been met. Low-certainty evidence on improvement and deterioration also support a likely clinical benefit of ivermectin. Low-certainty evidence suggests a significant effect in prophylaxis. Overall, the evidence also suggests that early use of ivermectin may reduce morbidity and mortality from COVID-19. This is based on (1) reductions in COVID-19 infections when ivermectin was used as prophylaxis, (2) the more favorable effect estimates for mild to moderate disease compared with severe disease for death due to any cause, and (3) on the evidence demonstrating reductions in deterioration.

The evidence on severe adverse events in this review was graded as low certainty, partly because there were too few events to reach statistical significance. Evidence from a recent systematic review of ivermectin use among people with parasitic infections suggests that ivermectin administered at the usual doses (0.2 or 0.4 mg/kg) is safe and could be safe at higher doses.<sup>7,116</sup> A recent World Health Organization document on ivermectin use for scabies found that adverse events with ivermectin were primarily minor and transient.<sup>22</sup>

We restricted the included studies to the highest level of evidence, that is, RCTs, as a policy. This was despite there being numerous observational but nonrandomized trials

of ivermectin, which one could argue could also be considered in an emergency. We included preprint and unpublished data from completed but not yet published trials due to the urgency related to evidence synthesis in the context of a global pandemic.<sup>117</sup> Although there is the potential for selective reporting of outcomes and publication bias, we have factored in these considerations in interpreting results and forming conclusions. We adhered to PRISMA guidelines and the WHO statement on developing global norms for sharing data and results during public health emergencies.<sup>117</sup>

There are a number of limitations with this review. Several of the studies contributing data did not provide full descriptions of methods, so assessing risk of bias was challenging. Where descriptions of study methods were sparse or unclear, we attempted to contact authors to clarify methods, but lack of information led us to downgrade findings in several instances. Overall interpretation of findings was hampered due to variability in the participants recruited, treatment regimen, and the care offered to those in control groups. We have tried to take this variation into account through subgroup and sensitivity analyses. Nevertheless, dosing and treatment regimens and the use of ivermectin with other components of “standard care” require further research. We did not include laboratory outcome measures, such as viral clearance. **The latter and other biochemical outcomes have been reported in several studies and reviews and tend to favor ivermectin.**<sup>10,47,105,108</sup> Several trials reported continuous data, such as length of hospital stay, as medians and interquartile ranges; therefore, we were unable to include these data in meta-analysis. **Because we did not undertake in our protocol to perform narrative evidence synthesis, and because these data tended to favor ivermectin, the certainty of the effects of ivermectin on these continuous outcomes may be underestimated.**

At least 5 other reviews of ivermectin use for COVID-19 have been published, including one coauthored with Nobel Laureate Professor Satoshi Ōmura, discoverer of ivermectin,<sup>9,10,118,119,120</sup> but only 3 have been peer-reviewed<sup>9,118,120</sup> and only 2 attempt full systematic review.<sup>10,119</sup> We applied AMSTAR 2,<sup>121</sup> a critical appraisal tool for systematic reviews of health care interventions, to the 2 nonpeered systematic reviews<sup>10,119</sup> and both were judged to be of low quality ([Table 5](#)). However, there was also a suggestion that ivermectin reduced the risk of death in treatment of COVID-19 in these reviews.

Table 5. - Methodological quality of other systematic reviews (AMSTAR 2).

Assessed using AMSTAR 2<sup>28</sup>; +, adequately assessed; –, inadequately assessed; ?, unclear assessment; NA, not applicable (less than 10 included studies in meta-analysis).

‡Not documented or inadequately reported.

‡Participant population, description of comparator interventions, and time frame for follow-up were not described or inadequately reported.

‡No summary of risk-of-bias assessment was given in the main text in the review, other than stating trials were of poor, fair, or high quality. There were some further details about bias in the discussion, but these were largely generic and did not follow the recommended Cochrane tool used to assess risk of bias in RCTs.

§A meta-analysis for all-cause death was presented but authors did not specify why meta-analyses were not conducted for other outcomes, which included at least 2 trials reporting the same comparison and outcome, other than in some parts of the discussion. For example, if viral clearance was reported in most trials, there would have been scope to have performed subgroup analyses and/or split the time point for each comparison to account for the varying duration of follow-up across trials. Instead, they gave a vote count-type narrative of the results, which did not follow synthesis without meta-analysis (SWiM) in systematic review reporting guidelines.<sup>44</sup>

†There was some further details about bias in the discussion, but this was largely generic and did not follow the recommended Cochrane tool used to assess risk of bias in RCTs. Similarly, in terms of certainty/quality of the evidence, the authors used terms in a summary table that included “good,” “fair,” and “limited,” without offering any explanation or justification.

‡Outcomes were reported but lacked definitions.

#A significant number of pertinent RCTs have not been included in the review. Given the adequate due diligence of review process, the comprehensive nature of the search strategy is questionable.

¶No description of risk-of-bias assessment in any domain apart from missing outcome data but attrition rates not documented to justify judgment.

††Authors did not report data from RCTs that we obtained from various sources and some conclusions were not reflective of the observed data. It was reported that in an analysis of 4 preprint retrospective studies at high risk of bias, ivermectin was not associated with reduced mortality (logRR 0.89, 95% CI 0.09–1.70,  $P = 0.04$ ). Although the caveat of studies being at high risk of bias and statistical heterogeneity should be added to any interpretation, it is incorrect to interpret these results as not demonstrating a potential association based on the observed result. Furthermore, the high risk of bias judgment is not adequately justified.

#A sensitivity analysis was performed excluding those studies without adjustment for confounding but no details are provided. Given that there was some evidence of a potential association with ivermectin treatment and survival in 4 retrospective studies (although downplayed as no association due to concerns about attrition), it is highly implausible that any sensitivity analysis would not remove any suggestion of association.

The recently updated WHO therapeutics guidelines<sup>12</sup> included 7 trials and 1419 people in the analysis of mortality. Reporting a risk reduction of 81% (odds ratio 0.19, 95% CI 0.09–0.36), the effect estimate favoring ivermectin was downgraded by 2 levels for imprecision, although the justification for this is unclear as the reported CI is precise (64%–91%).

In addition to the evidence from systematic reviews, the findings of several controlled observational studies are consistent with existing evidence and suggest improved outcomes with ivermectin treatment.<sup>55,57,59</sup> Similarly, with respect to ivermectin prophylaxis of frontline workers and those at risk, controlled observational studies from Bangladesh and Argentina (the latter which involved 1195 health care workers) have shown apparent reductions in COVID-19 transmission with ivermectin prophylaxis, including in some reports total protection (zero infections) where infection rates in the control group exceeded 50%.<sup>122,123</sup> A very large trial of ivermectin prophylaxis in health care workers in India<sup>124</sup> covered 3532 participants and reported risk ratios not significantly different from this meta-analysis (prophylaxis outcome).

Clarifying ivermectin safety in pregnancy is a key question in patient acceptability for pregnant women contracting COVID-19. A recent meta-analysis<sup>5</sup> found little evidence of increased risk of abnormal pregnancies but similarly weak evidence of absence of risk. For (pre-exposure) prophylaxis in pregnancy, where vaccines may be contraindicated, the alternative of hydroxychloroquine has been advocated.<sup>125,126</sup> In addition to safety and relative efficacy, different risk–benefit judgments may be presented for prophylaxis (pre- and post-exposure), and for treatment, with pregnancy a high-risk status for COVID-19.

RCTs in this review did not specifically examine use of ivermectin in the elderly, although this is a known high-risk group for severe COVID-19. In the setting of care homes, it is also notorious for rapid contagion. A standard indication for ivermectin in the elderly is scabies. We identified 2 recent reports suggesting that ivermectin may be efficacious as prevention and treatment of COVID-19 in this age group.<sup>50,127</sup> A letter on positive experience in 7 elder care facilities in Virginia covering 309 patients was sent to NIH<sup>127</sup> and has recently been submitted for publication.

There is also evidence emerging from countries where ivermectin has been implemented. For example, Peru had a very high death toll from COVID-19 early on in the pandemic.<sup>128</sup> Based on observational evidence, the Peruvian government approved ivermectin for use against COVID-19 in May 2020.<sup>128</sup> After implementation, death rates in

8 states were reduced between 64% and 91% over a two-month period.<sup>128</sup> Another analysis of Peruvian data from 24 states with early ivermectin deployment has reported a drop in excess deaths of 59% at 30+ days and of 75% at 45+ days.<sup>129</sup> However, factors such as change in behavior, social distancing, and face-mask use could have played a role in this reduction.

Other considerations related to the use of ivermectin treatment in the COVID-19 pandemic include people's values and preferences, equity implications, acceptability, and feasibility.<sup>130</sup> None of the identified reviews specifically discussed these criteria in relation to ivermectin. However, in health care decision making, evidence on effectiveness is seldom taken in isolation without considering these factors. Ultimately, if ivermectin is to be more widespread in its implementation, then some considerations are needed related to these decision-making criteria specified in the GRADE-DECIDE framework.<sup>130</sup>

There are numerous emerging ongoing clinical trials assessing ivermectin for COVID-19. The trade-off with policy and potential implementation based on evidence synthesis reviews and/or RCTs will vary considerably from country to country. Certain South American countries, Indian states, and, more recently, Slovakia and other countries in Europe have implemented its use for COVID-19.<sup>129,131,132,133,134</sup> A recent survey of global trends<sup>118</sup> documents usage worldwide. Despite ivermectin being a low-cost medication in many countries globally, the apparent shortage of economic evaluations indicates that economic evidence on ivermectin for treatment and prophylaxis of SARS-CoV-2 is currently lacking. This may impact more on LMICs that are potentially waiting for guidance from organizations like the WHO.

Given the evidence of efficacy, safety, low cost, and current death rates, ivermectin is likely to have an impact on health and economic outcomes of the pandemic across many countries. Ivermectin is not a new and experimental drug with an unknown safety profile. It is a WHO “Essential Medicine” already used in several different indications, in colossal cumulative volumes. **Corticosteroids have become an accepted standard of care in COVID-19, based on a single RCT of dexamethasone. If a single RCT is sufficient for the adoption of dexamethasone, then a fortiori the evidence of 2 dozen RCTs supports the adoption of ivermectin.**

**Ivermectin is likely to be an equitable, acceptable, and feasible global intervention against COVID-19. Health professionals should strongly consider its use, in both treatment and prophylaxis.**

## ACKNOWLEDGMENTS

---

This work was inspired by the prior literature review of Dr Pierre Kory.

The authors thank Information Specialist, Jo Platt, of the Cochrane Gynaecological, Neuro-oncology, and Orphan Cancer (CGNOC) group for designing the search strategy and running the search, as well as Anna Noel Storr for reviewing the strategy. The

authors also thank Isabella Rushforth for her voluntary assistance with the preparation of the reference lists.

The authors thank Gill Gyte for detailed comments, feedback, and involvement in this review, and Michael Grayling and David Tovey for useful peer review comments before submission. The authors also thank the external peer reviewers for their helpful comments and Peter Manu for the opportunity to publish our findings.

The people are not stupid we can see right through the bullshit, we are not "misinformed" by any means ..... your covid mandates and WACs are clear the fact that it's even a suggestion is insane ..... we are almost out of the pandemic and the omicron strain is way less damaging so I don't understand why all of a sudden we have to keep controlling everyone's personal lives ... what is the point of this life if your government makes its horrible to live you work for us not the other way around as shame on everyone how approves tyranny in the United States it's disgusting that we have people In Charge ruining America and it's values for what ?? It's not about public health and safety at all ..... I literally stopped watching the news for a month and stopped social media and it was amazing how everything seemed to go back to normal bc it's all bullshit over exaggeration ... I see it everyday with my own two eyes in the public ..... stop the overreach !!!!! Stop the mandates!!!! Stop the insane lack of logic !!!! And stop pulling the fucking race card enough!

Subject: Public Comment - JAN 12 WABOH Meeting - Immunization Criteria for Childcare  
and School Entry

External Email

January 7, 2022

To the Washington State Board of Health Members:

I would like to comment on any action you are considering to take regarding immunization criteria for school entry and childcare. It is apparent that medicine is not a "one-size-fits-all" application. My two children have received immunizations with no apparent reactions, while my niece has received some of the same immunizations and has experienced sickness, seizures and allergic reactions. This is why it is important for

exemptions for vaccine requirements to remain in place for school entry (and daycare). It is also fundamentally necessary to keep religious and philosophical exemptions in place because there are many families who practice holistic and natural medicinal care – we live in a free country where we can practice a religion of choice and make decisions that we believe are best for our bodies (or for our children).

I also implore you not to require COVID19 injections for ANY child in childcare or school. It is evident the COVID19 injections being administered are not stopping the spread of SARS-COV-2 (as we are seeing a surge in cases). Not to mention, no COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only “approved” COVID 19 vaccine is Comirnaty, and it is not available in the United States with no anticipated date for its availability. Also, the FDA has not been transparent on the data they have collected thus far (and we will not see full data until 2076)/there is not enough long-term testing data available for people to make an educated medical decision. The safety of the injections currently being administered should be in question as well - the number of hospital cases of myocarditis and pericarditis, at Seattle Children’s alone, should shut down any further issuance of these experimental injections in children. Requiring this injection does not protect our children!

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% which statistically speaking they have zero risk of dying. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there’s no risk, there can be no benefit.

Additionally, this injection is not meeting the criteria the WA BOH has set forth because it is not reducing the risk of person-to-person transmission. The survival rate is well over 97% in the general population. Not to mention that even long-term effects of SARS-COV-2 do not represent a significant amount. There is an extremely large number of both the medical and the general public who do NOT accept the COVID injections as an effective or safe means to combat SARS-COV-2.

Please PROTECT our children by NOT requiring a COVID19 injections to attend childcare or school.

Thank you,

Stephanie Lofquist – Washington citizen

The data on harms to children from the experimental gene therapy injections are mounting every day, including myocarditis in boys. You are well aware of the high incidence of the myocarditis and you are still driven to put this in every arm. The vaccines have failed. You are now more likely to get Covid, especially Omicron, if you are vaccinated than if you are not vaccinated. This must stop. It is no longer about Covid or injections.....this is about God given rights guaranteed in our Constitution. Stop the insanity.

Subject: NO on Unconstitutional Vaccine Agenda

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for

Washington State residents.

This disease is manageable. Moreover, more than 99 percent of the population survive. Covid vaccines have little effect on Covid, and in fact, most people who get Covid and spread it have been fully vaccinated, some have even received booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee.

These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Lynn Seulean

Dear Ms Herendeen,

I am writing to express my grave concern about the forced quarantine and counseling for members of the public using their own free will not to participate in the experimental vaccines currently offered for Covid 19 and forced vaccinations for children. My concerns about rolling out such a draconian policy that violates the fabric of this country's founding principles are many.

One of my largest concerns is that in watching the vaccines be given out over the last year, it is clear that they are not working. Almost half of the infection rate of Covid patients are already vaccinated. States with higher vaccine rates do not experience lower Covid rates. People who are fully vaccinated are not stopping the transmission of Covid

either. It is also not proven to be a safe vaccine. People suffer at a higher rate from complications from the vaccine than they do from Covid itself. Forcing people to get vaccinated is clearly about power and submission, not about preserving public health. Statistically, children have a higher chance of dying or having an adverse reaction to the experimental Covid vaccine than they do from contracting Covid itself. At this point in history, many of the children you propose to force vaccinate have already had Covid and have valuable antibodies. Allow parents to choose what is the best decision for the individual health of their children, not the state.

As a mother, I know my children more intimately and fully than any health care professional, and certainly more than the state. I have witnessed their growth and development since I first felt them in my womb. I choose to make decisions for my children's health with information and discussion from professionals, not by coercion and fear. Inform parents and respect their rights and their timing to make the decisions necessary for protecting their families. Protecting that sacred right of a parent is a paramount responsibility of an elected official and member of public education. I know this well as a former public elementary school teacher. Please protect children's health, respect the fiber of the Washington family and protect democracy by fighting against the proposal to force vaccinations on children and force quarantine on non complying families.

Our United States of America is kept strong by evidence of its strong families.

Please VOTE AGAINST proposed vaccine mandates, and any further denial of parental rights to decide all things for their minor children!

===

Current medical consensus on Covid-19 "vaccine" effectiveness is that they do not prevent the spread of SARS-CoV-2.

CDC's David Walensky, Dr. Anthony Fauci, and Moderna's Dr. Tai Zaks are all on record saying that essentially these injections are merely "treatments" that for some people may reduce symptoms.

It is my understanding that "treatments" -- and all others that do not meet the definition -- by definition are not vaccines -- and thus have no grounds for forced use.

Sincerely, very sincerely,

Penny Cowan, Bellingham, WA 98226

I would like the board of health to know I am a concerned parent and citizen. I do not think it is necessary or legal to use force to quarantine individuals or families that have Covid or choose to not get vaccinated. I also believe children should not be mandated to get a vaccine for Covid because children are not at a large risk for getting Covid and if they do get Covid, they 99.9% likely to fully recover from it. The other vaccines required under WAC 246-105 have serious negative consequences for children and children are at high risk for contracting those diseases. We also don't know the long term risk of the Covid vaccines which is another reason not to mandate the children to vaccinate for Covid.

Thank you for your time.

Where do we all live? Last time I checked, we live in America.

The United States of America. Once known as Land of the free.... Home of the Brave.

If we should have to show our personal health information to be part of the public, why stop there? Should we also have evidence of what kind of sex positions we like??? Was that question too inappropriate, out of line, or just plain wrong??? Well taking people's rights away just so YOU can feel safe is be on wrong.

Should the unvaccinated wear a white wristband with the letters NV in blue writing so we can spot them and be able to let officers know the "Unvaccinated" are out of their homes??

Where is all the data collected for citizens to see how much being vaccinated changed the

outcome on how we are living now???

Does anyone think about how one shoe does not fit all???

Think for yourself. Think for others. If you think this is ok and a good thing, what do you think the future is going to be like for our children??

In Thomas Paine words (maybe you know him, maybe not), a man who spoke about common sense and critical thinking. This sentence alone should make at least one of your eyes open to see the wrong direction we as a country are going.

"Reason obeys itself; and ignorance submits to whatever is dictated to it."

If you can't stand up for our rights and the future of our children's rights, Please get out of the way so the rest of us can.

Thank you.

Annette Lombardo (momma bear)

We the People have spoken.

From Another Momma Bear Hannah:

The purpose of this email is to outline the facts regarding mandatory Covid vaccination as they pertain to the Nuremberg Code the US Constitution and the Declaration of Independence.

The Nuremberg code was established in 1947 at the Nuremberg trials that occurred after the end of WWII and was adopted into the 1949 Geneva Convention giving it international standing. The code outlines the conditions that must be met in order to allow for experiments of novel medical procedures and or drugs on human subjects. Violation of this international law carries a penalty of death.

Section one of the Nuremberg Code clearly states that "the voluntary consent of the human subject is absolutely essential." Section one also states that " This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment."

The Covid vaccine is currently in an emergency use authorization status. The Comirnaty vaccine is the only vaccine that purportedly has full FDA approval. This vaccine however is not in use in the United States and all other Covid vaccines are an experiment in progress of a new mRNA technology never before used in human beings.

As it pertains to the US Constitution, the fourth amendment guarantees the right of the people to be secure in their person, papers, houses and effects. Forcing an experimental gene altering drug into the body of an unwilling person is not allowing them to be secure in their person.

The Declaration of Independence states that "The government derives it's just power from the consent of the governed." Let it be known that with regard to forced vaccination, we do not consent. We are a nation of law and order and we the American public expect our public officials to operate within the constraints of the law. We will hold you each personally responsible for any action or inaction that you take concerning forced vaccination or unwilling internment.

You have been apprised of your legal standing and we hereby put you on notice. Do not attempt to force vaccination on WE THE PEOPLE.

External Email

Hello. Below is my input for the Jan. 12 WA State Board of Health Public Meeting.

I am a resident of Washington State and 100% opposed to implementation of a COVID 19 vaccine requirement for our schools for the following reasons:

- Children are statistically at minuscule risk of death or injury from COVID 19.
- The current COVID 19 vaccines have not been shown to be safe. It is a documented fact that current COVID 19 vaccines have racked up verified reports of death, injury, and other adverse reactions (as tabulated on the U.S. Government's VAERS system) that dwarfs all the effects of every vaccine dose (of all types) administered over the past few

decades.

- The long-term implications of currently available COVID 19 vaccines are unknown, and we know from fiascos like Merck's Vioxx that it is very possible for poorly tested pharmaceuticals to cause the deaths of tens of thousands of people.

- The risk / benefit analysis decision should be left to parents, not the state.

Thank you for considering my comments.

I would like to express my absolute opposition to implementation of a COVID-19 vaccine (aka gene mRNA therapy) requirement for children in Washington State public schools.

To date there are zero long term safety studies for any of these vaccines....aka mRNA gene therapy...ZERO. You and anyone else mandating these are potentially putting our children at a risk you know nothing about....a risk that could be short, long term or FATAL. And who's going to pay the tab for those long term health risks or death? Being it has become clear there is zero liability at the hands of those pushing these mandates.

I have yet to understand how we got here...Our government and schools are pushing masks, which have zero effect against this or any virus and put our children at risk of countless psychological issues, sickness and disease...and now they want to enforce an inoculation that is experimental at best with little to no knowledge of what the future holds for the children exposed to it.

Can you answer any of these questions?

What are the ingredients in the inoculation?

Are there any contraindications with the ingredients in the inoculation and any medications the child may be currently taking or are there contraindications to any present ailments the child currently has?

What are the potential long and short term effects on the child and could it cause their death?

Is anyone liable if there are any long or short term effects, or if the child's life is lost?

If you cannot answer these questions, what gives you or anyone the right to take the right of the parent in making a decision that is best for their child?

And lastly...does anyone here or within this organization or the schools reap any rewards from requiring these inoculations...if there is a monetary incentive then there is a conflict of interest and not one that should be allowed at the expense of the children.

1. NONE of the COVID vaccines available in the United States have received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. ZERO! WHY ARE WE ASKING HEALTHY CHILDREN TO PUT THEMSELVES AT RISK FOR THOSE WHO ARE OLDER AND AT RISK? THIS IS NONSENSICAL AND PUTS OUR FUTURE GENERATIONS AT RISK.

Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who

are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research.

5. Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity in the future.

6. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered.

7. It is estimated that even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks.

8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com

<[https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Frumble.com%2F&data=04%7C01%](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Frumble.com%2F&data=04%7C01%2F)  
)

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website....realnotrare.com

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Frealnotrare.com%2F&data=04%7C>

10. Or visit VAERS - Vaccine Adverse Event Reporting System

These numbers are also hugely under reported.

My question to you...how can you take the decision from the parents when this could potentially injure our children...a generation of children...beyond repair. Until there is verifiable proof of little to no long term effects and death from this gene therapy I would recommend you...no I would implore you to leave this in the hands of the parents.

I cannot understand how those pushing these shots on the population sleep at night...as the days tick off more and more are being adversely affected long term and many have lost their lives.

Do you really want this hanging over your head...and what about your children and grandchildren...is this the future you want for them?

Please think beyond what you have been told...please look at the greater picture and the years to follow.

Regards,

Tawny Griffith

What is being proposed is unbelievable.

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Local health officers' use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility (if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination) is a horrific precedent. This is not the type of history WA needs to be a part of, and it's completely unfathomable that it's on the table. We the people see this playbook move right out of WWII.

In addition, I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105. These injections are still experiments, and this should be unlawful.

I will be doing everything in my power to make known this agenda, and create obstacles to this should any aspect be agreed upon.

Where do we all live? Last time I checked, we live in America.

The United States of America. Once known as Land of the free.... Home of the Brave.

If we should have to show our personal health information to be part of the public, why stop there? Should we also have evidence of what kind of sex positions we like??? Was that question too inappropriate, out of line, or just plain wrong??? Well taking people's rights away just so YOU can feel safe is be on wrong.

Should the unvaccinated wear a white wristband with the letters NV in blue writing so we can spot them and be able to let officers know the "Unvaccinated" are out of their homes??

Where is all the data collected for citizens to see how much being vaccinated changed the

outcome on how we are living now???

Does anyone think about how one shoe does not fit all???

Think for yourself. Think for others. If you think this is ok and a good thing, what do you think the future is going to be like for our children??

In Thomas Paine words (maybe you know him, maybe not), a man who spoke about common sense and critical thinking. This sentence alone should make at least one of your eyes open to see the wrong direction we as a country are going.

"Reason obeys itself; and ignorance submits to whatever is dictated to it."

If you can't stand up for our rights and the future of our children's rights, Please get out of the way so the rest of us can.

Thank you.

Annette Lombardo (momma bear)

We the People have spoken.

From Another Momma Bear Hannah:

The purpose of this email is to outline the facts regarding mandatory Covid vaccination as they pertain to the Nuremberg Code the US Constitution and the Declaration of Independence.

The Nuremberg code was established in 1947 at the Nuremberg trials that occurred after the end of WWII and was adopted into the 1949 Geneva Convention giving it international standing. The code outlines the conditions that must be met in order to allow for experiments of novel medical procedures and or drugs on human subjects. Violation of this international law carries a penalty of death.

Section one of the Nuremberg Code clearly states that "the voluntary consent of the human subject is absolutely essential." Section one also states that " This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment."

The Covid vaccine is currently in an emergency use authorization status. The Comirnaty vaccine is the only vaccine that purportedly has full FDA approval. This vaccine however is not in use in the United States and all other Covid vaccines are an experiment in progress of a new mRNA technology never before used in human beings.

As it pertains to the US Constitution, the fourth amendment guarantees the right of the people to be secure in their person, papers, houses and effects. Forcing an experimental gene altering drug into the body of an unwilling person is not allowing them to be secure in their person.

The Declaration of Independence states that "The government derives it's just power from the consent of the governed." Let it be known that with regard to forced vaccination, we do not consent. We are a nation of law and order and we the American public expect our public officials to operate within the constraints of the law. We will hold you each personally responsible for any action or inaction that you take concerning forced vaccination or unwilling internment.

You have been apprised of your legal standing and we hereby put you on notice. Do not attempt to force vaccination on WE THE PEOPLE.

Dear Ms. Herendeen,

The present situation with omicron is no longer a health emergency. People are not dying from covid anymore, not in numbers that make for a public emergency. People have always died from influenzas and pneumonias, from car wrecks and drownings, and we don't abandon our God-given rights in an effort to stamp out all of these possible deaths. The extreme measures you contemplate in dealing with what has become a minor threat would further hurt adults and children instead of helping them. Whatever power structures exist in your Codes, you don't have a moral right to trample on peoples' `...life, liberty, and the pursuit of happiness.'

You have no moral authority to impose mandatory shots into people's bodies. People own their own bodies. You do not own other people's bodies. You may not do as you see fit with other people's bodies. The people who imprisoned Martin Luther King, Jr.—did they have the legal right to do that? The bus driver who asked Rosa Parks to go to the back of the bus—did he have the right to do that? The national guard and police who blasted civil rights protestors with water hoses and set dogs on them—did they have the right to do that? Yes, they had a "right" by the laws and policies of the day, but they were in the wrong. The hindsight of history shows to all that they were wrong. The truth will out; many people already know that it is wrong of you to contemplate involuntary detention of citizens. Future people will absolutely know it, just like we absolutely know who was right in the civil rights movement led by MLK.

We also know who was morally right when Japanese American citizens were involuntarily concentrated into camps. We know who was wrong. Monetary reparations and public apology was awarded decades later to Japanese American citizens—right here in WA—who were involuntarily detained into camps at that shameful time.

There will be only shame for those who act immorally to involuntarily detain and/or bully citizens and children into camps and near-forced requirement of experimental injections. We Americans know that our legal rights to "life, liberty, and the pursuit of happiness" are solid both in Constitutional law and in the moral law which is written in our hearts.

I urge you not to overstep whatever powers you have to do whatever you want in this little day. Tomorrow morning, please remember that both yourself and your fellow citizens alike are all 'created equal' and have 'unalienable rights.' We hold these truths to be self-evident, that involuntary detainment of citizens is wrong, and mandating experimental shots for children against the will of their parents is wrong. Please maintain the public trust by respecting our unalienable rights.

Sincerely,

Deirdre Forman

WA resident

After watching the entire meeting today, I just wanted to drop you all an email thanking you for keeping your cool and remaining sensible throughout. It didn't look easy!

Keith, Thomas, Stephen, Jan... I appreciated your sensible approach during the conversation around agenda item #11. When Keith asked that hard question that everybody's thinking: about whether an EUA vaccine has ever been included as mandatory? Wow – thank you for not ignoring the elephant in the room! And then, the sensible conversation that ensued? Fantastic.

May I suggest something? We need to be making it very clear what it is that we are aiming for anymore. Different targets require very different approaches sometimes, and the lack of clear communication is creating division, confusion, and fear. (Especially fear! That's where this whole detainment camp conversation came from!) Are we still trying to flatten the curve? Keep grandma and grandpa alive? Prevent infection in anybody, even though this new variant is presenting itself as a mild cold? (Are we then supposed to fear even the common cold from here on out?)

I will be very clear, though, that I believe no matter what approach we take: children are proven to be at very low risk, so it makes no sense to mandate at their level and make them pay the price while we leave the more vulnerable struggling to get tested and treatment.

Thank you for your professionalism and real-life approach here.

To Whom It May Concern,

I am a nurse who recently had to make the decision to take a "vaccine" for covid in the next few months. I did some research to find out what I may be putting into my body.

There are so many medical professionals, government officials and opinions involved in requiring me to take this shot, whom I do not trust, therefore my research gave me pause.

Secondly, I saw that nobody in authority was talking about treatment! Why not? In the past, a new diagnosis that comes out has a flurry of studies to find treatments.

And lastly, I looked at the new technology in the shot, has it successfully run through

trial, is it approved by those in authority? No to all of those.

I have spent a day exploring the VAERS government reporting site and I am completely appalled that this much death and injury has occurred. And our government still wants to mandate it? There were so many deaths in young people just hours and days after receiving a second dose of the shot. Page after page were the same stories of severe vomiting, cerebral hemorrhage, cardiac arrest, clotting, all resulted in death. I focused my search on young people ages 17-40 because there were too many in the older population to go through.

My concern is now for what the government wants to do to our children. Wow, that was a scary sentence. There are millions of concerned parents that do not want our children and grandchildren to receive this shot. Children do not need the covid vaccine and it will kill and injure more of them than it will help as revealed in my research.

- Children only have a .02% chance of dying from this illness and the children that died had other comorbidity. Most children have only mild cold or flu like symptoms. The shot will have worse effects than covid.

- The total count of death and injury by the shot from the VAERS reporting site has, as of Jan 7, 2022 exceeded one million injured and dead.

- Hundreds of thousand that have had the shot series, even up to 3 shots have still contracted covid.

- There are effective treatments that are proven to work for covid and will work for our children. Natural immunity has not been taken into consideration by the government, which has proven to be effective.

Please consider these words and do not subject our children and grandchildren to harmful injections.

Sincerely,

Shauna Sams, now retired RN who has a new job of fighting for our future generation,

Sirs,

You have done enough damage to our state with the lockdowns, the mandates, and the destruction of small business as well as the division you have caused among our communities and places of employment! Thousands have lost our jobs because of your unconstitutional mandates. Thousands are fleeing our state! ENOUGH, STOP THIS INSANITY! We are Americans and free to live our lives according to our God-Given rights and the Constitution!

Brian

External Email

Dear Ms. Lyndsay Herendeen,

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education dollars and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

Subject: Mandatory Covid shots for children

External Email

Dear Ms. Lindsay Herendeen,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements. One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In

contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I do not doubt that as members of WA State Health Board you truly desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you,

Scott and Leigh Larsen

Good Morning,

I have major concerns!!!

I have lived in Washington over 60 years.

Worked in School districts for over 30 years.

I am writing you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following.

\* Any involuntary isolation/quarantine of the people as described in parts of WAC

246.100

\* Any mandate on COVID vaccines for children as a requirement to attend K-12 public or private school.

This reminds be of the Japan interment camps right here in the U.S.

Please have some common sense

Sincerely,

Karla Atwood

Hello my name is Douglas Minick and I'm writing you as a concerned parent and tax paying LEGAL citizen of this state. I'll cut to the FACTS and say there is NO NEED FOR MY CHILDREN TO BE VACCINATED WITH THE COVID VACCINE. They have both already had the virus and have a strong antibody count. This vaccine does not prevent a child from contracting the virus or spreading the virus. This state has already mandated that teachers get the vaccine and my wife was included in that atrocity of government overreach. You and others in your position need to look at ACTUAL SCIENCE and understand the covid virus poses very very little threat to children between the ages of 5-18. There have also been NO LONG TERM STUDIES ON THE VACCINES and what they do to a child's normal immune system. If you and the health department mandate this vaccine you will have thousands home schooled by their parents and cause irreparable harm to the next generation of this state and country. So much psychological damage and educational damage has already been done because of remote learning. Any intelligent person can see that remote learning hurt the children and families that the liberals of this state claim to care so much about; the underprivileged. For what? A virus that has killed 135 kids between 5-11? Because of remote learning thousands have turned to drugs, developed depression, been abused at home, gone without food, fallen back on education. Your health district has failed miserably and mandatory vaccines will be another failure. Think about your decision. I will not force my children nor would I want to force anyone to get a vaccine. It should be the choice of the parents with consultation of their DOCTOR on whether they get vaccinated. CHOICE about what goes into their body just like ABORTION! I'm sure you believe in CHOICE when it comes to that and ABORTION KILLS TENS OF THOUSANDS EVERY YEAR. . It's PROVEN now that these vaccines won't stop the virus and I won't submit my children to booster after booster. Why did my children get the measles vaccine? BECAUSE IT WORKED LIKE A VACCINE AND THEY ONLY NEEDED 1 SHOT. Same with POLIO and RUBELLA. And those vaccines went through years of testing and have FAR LESS SIDE AFFECTS REPORTED TO VAERS SYSTEM. Please think about your decision ( if you have any part of it) and look AT REAL SCIENCE. Remember the LIES THAT DR FAUCI AND OTHERS SSID IN THE PAST. Like " Those who get vaccinated can't spread the virus " and " this is a pandemic of the unvaccinated " . NO GOVERNMENT SHOULD FORCE ANYTHING ON ITS CITIZENS. I will FIGHT UNTIL MY LAST BREATH TO PROTECT MY CHILDREN AND THE NEXT GENERATION

FROM A OVERREACHING GOVERNMENT.

Subject: Vaccine Mandate

External Email

Dear Lindsay,

My name is Stacey Simon, I'm writing to you about the possibility of mandating the Covid-19 vaccine in our schools.

I want to advocate for my children and for the children of Washington State. This isn't about anti-vax, but for everyone's right to choose what goes into their bodies.

This vaccine is still new, and there aren't any long term studies on its effects. It should be left up to the parents and their physician whether or not to get the vaccine, not the government. No one should be forced to take anything in order to attend school, hold a job, or continue to be a member in society. Studies have shown that our kids are not at risk for serious illness, and to date, Covid-19 still has over a 99% survival rate.

Clearly the vaccine isn't working to keep this virus at bay, and those that are vaccinated are still getting sick and spreading the virus. So why at this point would mandating this for our students be necessary or make any logical sense?

I can appreciate the fact that the world's attention is currently hyper-focused on Covid 19. Health and Public Safety organizations feel the need to show some sort of response, warranted or not. Please keep in mind the flawed logic of the vaccines and our children's well-being and health when making these policy decisions.

Thank you,

Stacey Simon

NO! on mandating COVID-19 vaccines for K-12 children.

Covid is less-severe than the flu and we do not mandate flu shots.

The risk of vaccine injury for young people is GREATER than the risks associated with covid.

Follow the science! Follow the data!

If a mandate is imposed, expect THOUSANDS of students to leave the private and public school system.

NO! on mandating COVID-19 vaccines for K-12 children.

Thank you for your time.

Subject: Immunization and TAG Interested Parties Distribution List

External Email

Board and TAG,

Thank you for taking the time to hear what concerns the public today about what is currently on the books in WAC 246-100, ESHB 1551, as well as a publicly perceived "rush" to inject our children with an experimental drug as a requirement for school.

I am very interested in attending all TAG meetings as they convene so that I may listen and make comment and appreciate in advance you adding me to the list to be notified when the public TAG meetings will take place.

Also, I did notice that there were approximately 3600 pages of written comments prior to the meeting. I spent a few days reading through them, and certainly can see that it will take some time. Noted, many persons that commented by email also provided links and printed articles coming from peer reviewed medical journals, other professionals that, until recent censorship by social media, were highly esteemed and respected in their field, VAERS, and other statistics being updated daily from around the world.

I sincerely hope and urge the TAG to be sure to pull some of those more educated responses citing and sharing the research of the global medical community and really bite into what the data is showing. And I agree with one members comment today that the group should familiarize themselves with two books that can be purchased on Amazon – Dr. Robert Kennedy, "The Real Anthony Fauci" and Dr. Mercola "The Truth About Covid-19." Even if your biased against it, you should consider other information and presentations of facts that you don't automatically agree with. I have been following the work of Dr. Mercola for over a decade, everything he puts out is fact checked, and when this pandemic started, he continued to be a guiding resource to me with data updates and help with supplemental prevention protocols so my immune system can do its job naturally. And it did!!! No hospital, no treatment was needed for my family. The battle between corporate pharmaceutical giants and holistic health research (i.e. sufficient nutrients for our body to function) has been going on for decades and those of us aligned with the functional medicine community absolutely see this pandemic response for what it is. PROFIT!

For us parents that have taken the time to do our own research and actually do understand what is happening, the choice for our children is clearly a resounding NO! Really do your research outside of your echo chamber as many parents have done on behalf of the children they protect, and ask yourself why this is happening and why most of us believe our children are in danger from the vaccine more than the virus?

The information presented by your group today in the beginning seemed to be very brief, and certainly is focused on information that supports pushing the Vaccinate WA narrative (as seen in some of your Zoom backgrounds) and very little attention to real world data in other areas, such as adverse reactions and deaths from the vaccines, and as one lady pointed out today, a dramatic increase in overall non-Covid deaths as being reported by the insurance industry, just since the introduction of this Covid vaccine. With the information coming from the federal and global level changing so rapidly as each day passes, I also believe the window to have the TAG committee make a recommendation by March is much too narrow. The appropriate clinical trials won't be near done by then and it will still be only an experimental drug our children have access to at that time. Again, for a virus that has a statistically zero% risk of fatality for children who usually experience only a mild "cold".

Thank you for really considering the public feedback you are receiving. We as caretakers of our children, humanity's most precious asset, really do hope the TAG and the Board leaves their personal biases and blindfolds aside as they proceed in the upcoming months toward making a recommendation that affect our parental rights to make our own informed personal choices on what we decide is best for the body of our children.

Sincerely,

Erika Clough, Educated Mother and Concerned Citizen of Washington State

Vaccines are NOT a one size fits all solution for all people, and children should never be forced to have it in order to attend school.

It has been Proven that getting the vaccine CAN protect the individual- it does NOT protect others around you NOR stop you from Spreading it to other people - whether they are vaccinated or not. Therefore, since it only benefits the person getting the vaccine, it wouldn't even make sense to require it. It should remain a personal choice - one that comes from weighing personal risk factors (which children are still by far at the lowest risk for hospitalizations and death) and talking to your dr, but ultimately, it is - and should remain- the individual's, or parent's right to choose.

The Covid-19 vaccine had not been studied for long term effects. You should not consider requiring a vaccine that has unknown long term effects. That would be incredibly irresponsible and dangerous. Parents should be free to make the choice that is best for their children - what they have always been allowed to do.

Please vote NO to vaccine requirements in schools.

If you read all the way to the end here, and you disagree (or agree), I'd love to hear why you are considering this, and your side of the argument.

Thanks,

Anne Heath

In response to your clarification for the meeting tomorrow, January 12, 2021 and subsequent meetings regarding vaccines for children:

There is no justification to mandate the covid vaccine for children age 5 and older. Nor is there a justification or need to require parents to file for an exemption. A parents' simple "no" to having their child be given the covid vaccine should close the matter. The decision and parental right to make the decision does not require your approval of an exemption. Nor does the risk to society outweigh the risk of the adverse effects of the vaccine.

I would ask the board to again review the under-reported VAERS data, increased cases of myocarditis, lack of definitive clinical trials, hidden vaccine contents, and future data. I would also remind the board this is not a "true" vaccine and only has EUA authorization which was inappropriate to begin with. Sincerely, Mary Sizer

Subject: School student vaccination requirement

External Email

Hi,

I would like to know when you'll be discussing and deciding on whether or not to require the Covid Vaccine for student to go to school. I personally do not think a vaccine which is more closely related to a flu vaccine should be mandatory for students to be in school. It is not a vaccine at all because for one... It doesn't stop or prevent the transmission of the virus. You can still get and pass COVID even if you got it, so why force it on kids? We don't force the flu vaccine so we shouldn't be forcing this one either.

Anyways, a date for whenever you'll be discussing this would be much appreciated.

Thanks,

David

Subject: Regarding Washington State Board of Health Meeting for January 12, 2022

External Email

Dear Lindsay Herendeen,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R\\_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g)>  
where its stated that it is too soon to be requiring vaccinations for our children. Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 .

The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,

May Lindsay

Subject: Please Oppose covid 19 shots added to school age children

External Email

To Lindsay Herendeen,

I, Val Harris, Oppose the use of law enforcement to be used to detain those who are unvaccinated for covid 19 shots.

Most of us already have natural immunity. Many of us have religious opposition to taking the vaccine.

I Do Not support adding the vaccine for school age children.

Please Oppose these injections for our children.

The children are not spreading and or dying from covid. They do not pose a threat.  
According to FDA safety surveillance for covid-19 vaccine Adverse Events outcomes.  
Here is a list of side effects from receiving covid-19 vaccine:

Death,

Guillain-Barre syndrome,

Acute disseminated encephalomyelitis,

Transverse Myelitis,

Encephalitis/ Myelitis / Encephalomyelitis / Meningoencephalitis/ Meningitis,  
Encepholopathy,

Convulsions / seizures

Stroke,

Narcolepsy and Cataplexy,

Anaphylaxis,

Acute myocardial infarction,

Myocarditis/ pericarditis,

Autoimmune disease,

Pregnancy and birth outcomes,

Other acute demyelinating diseases,

Non- anaphylactic allergic reactions,

Thrombocytopenia,

Disseminated intravascular coagulation,

Venous thromboembolism,

Arthritis and Arthralgia/ joints pain,

Kawasaki disease,

Multisystem inflammatory syndrome in children,

Vaccine enhanced disease.

Just by reading these side effects. How can you mandate this on the children???

These are experimental vaccines that have never been used on humans.

They are still going through trials.

We do not have enough long term studies on fertility and overall health. They are not safe or effective!!

It goes against the Nuremberg code.

On the vaccine inserts it says, intentionally left blank, how can you give us a consent if the trials and ingredients are not listed on the vaccine insert? You are blindly enforcing something on the children that you have no idea of the outcome.

It is against the law to mandate them. You will all be held accountable when children will be having life-threatening injuries and side effects.

You will be held responsible and accountable!!!

Who will be paying for all the injuries and deaths??

These vaccines are not safe. Please, please Oppose these injections.

These are all for profit, it has nothing to do with health. Please do not play Russian Roulette with our children's health.

There has been a filing in the International Crimes Court the ICC by Dr Michael Yerdon and others for crimes against humanity by pushing this vaccine and with holding life saving treatments.

The vaccine is not the only way to combat this virus.

Kids recover so fast from this virus and some don't even have side effects.

Vaccinated still get it and spread it. These do not work, they will only harm the children.

Please Do the right thing and oppose these WACs from being added to laws.

Subject: Proposed Covid 19 policies

External Email

I am writing this e-mail to let you know my complete refusal of applying current infectious disease WAC codes to include Covid 19 for all WA State residents AND including the Covid 19 injections as part of school immunization requirements.

As a lifetime resident of WA State I find these proposals to be unconstitutional and unlawful. They do not follow scientific facts and will result in many people leaving this state, as well as many children being removed from public schools.

You well know that children are not a vector of Covid 19 and to subject them to this experimental shot could have detrimental consequences for the rest of their lives.

And you're thinking about using local law enforcement to arrest and separate families in concentration camps??!! Are you trying to start a war?

There has also been no consideration from Mr. Inslee to include religious beliefs or SCIENTIFIC FACTS of immunity of persons who have already had the virus.

Please stop and think about what you are doing here. Stand up against what many believe to be a corrupt and power hungry governor intent on using his "authority" to rip this state and it's families apart.

We will hold you accountable.

Respectfully

Rebecca Stiles

Where do we all live? Last time I checked, we live in America.

The United States of America. Once known as Land of the free.... Home of the Brave.

If we should have to show our personal health information to be part of the public, why stop there? Should we also have evidence of what kind of sex positions we like??? Was that question too inappropriate, out of line, or just plain wrong??? Well taking people's rights away just so YOU can feel safe is be on wrong.

Should the unvaccinated wear a white wristband with the letters NV in blue writing so we can spot them and be able to let officers know the "Unvaccinated" are out of their homes??

Where is all the data collected for citizens to see how much being vaccinated changed the outcome on how we are living now???

Does anyone think about how one shoe does not fit all???

Think for yourself. Think for others. If you think this is ok and a good thing, what do you think the future is going to be like for our children??

In Thomas Paine words (maybe you know him, maybe not), a man who spoke about common sense and critical thinking. This sentence alone should make at least one of your eyes open to see the wrong direction we as a country are going.

"Reason obeys itself; and ignorance submits to whatever is dictated to it."

If you can't stand up for our rights and the future of our children's rights, Please get out of the way so the rest of us can.

Thank you.

Annette Lombardo (momma bear)

We the People have spoken.

From Another Momma Bear Hannah:

The purpose of this email is to outline the facts regarding mandatory Covid vaccination as they pertain to the Nuremberg Code the US Constitution and the Declaration of Independence.

The Nuremberg code was established in 1947 at the Nuremberg trials that occurred after the end of WWII and was adopted into the 1949 Geneva Convention giving it international standing. The code outlines the conditions that must be met in order to allow for experiments of novel medical procedures and or drugs on human subjects. Violation of this international law carries a penalty of death.

Section one of the Nuremberg Code clearly states that "the voluntary consent of the human subject is absolutely essential." Section one also states that " This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment."

The Covid vaccine is currently in an emergency use authorization status. The Comirnaty vaccine is the only vaccine that purportedly has full FDA approval. This vaccine however is not in use in the United States and all other Covid vaccines are an experiment in progress of a new mRNA technology never before used in human beings.

As it pertains to the US Constitution, the fourth amendment guarantees the right of the people to be secure in their person, papers, houses and effects. Forcing an experimental gene altering drug into the body of an unwilling person is not allowing them to be secure in their person.

The Declaration of Independence states that "The government derives it's just power from the consent of the governed." Let it be known that with regard to forced vaccination, we do not consent. We are a nation of law and order and we the American public expect our public officials to operate within the constraints of the law. We will hold

you each personally responsible for any action or inaction that you take concerning forced vaccination or unwilling internment.

You have been apprised of your legal standing and we hereby put you on notice. Do not attempt to force vaccination on WE THE PEOPLE.

Ma'am,

It has come to my attention that the topic of mandating the covid-19 vaccine for school is on the table.

Due to the late notice of this and short timeline to submit an email to you I will keep this very brief.

I WILL NOT VACCINATE MY CHILD.

If you are so concerned over the welfare of children, PLEASE lets address childhood obesity, HUNGER, and CHILD ABUSE. DAILY, I hear of another child who has last their life at the hands of a caregiver. Respectfully, Sir, THIS IS WHAT SHOULD HAVE YOUR ATTENTION!!

Respectfully,

To The Board Members of the WA State Department of Health,

I am writing to you tonight out of complete desperation... I strongly and adamantly OPPOSE this proposed WAC 246-105! I am shocked and appalled that this state is seriously about to vote to impose a vaccine mandate on our children for the Covid 19 shot. A vaccine that has not withstood the test of time, that's been pushed on to people, taking away their choices. A vaccine that is shown to be more like a treatment than any sort of actual prevention. No one can tell me what the effects may be on my child in 5 years or 10 years. The lack of transparency has been extremely troubling and I don't trust, nor think it is absolutely necessary for myself or my child. The children are not at risk of death or serious illness from this virus. The deaths in US this 2 years of Covid is under 1,000 according to the CDC. Why are we doing this!?? It's not worth the risk to our children. I ask you to please not back parents into a corner. We love our children and

deserve to have choices and the ability to advocate for them since they are unable to do so for themselves.

Thank you for your time.

External Email

Thanks for offering the opportunity to respond, and for reading all these comments.

The COVID-19 vaccinations, or any medical intervention or drug for that matter, will not work the same for everyone. We're all different, and have different levels of health, genetics, and microbiome. While some people seem to do well with the vaccine, others have become permanently disabled or die (see the testimonies of the children and adults from the hearing in Washington DC from people who participated in the trials; VAERS also has a wealth of information on disabilities and death caused by the vaccines).

Since we don't know who will do well and who will not, please do not mandate vaccines, unless you're willing to sentence people to a life of permanent disability or death. It must be a choice made between a person and their doctor, without undue influence from pharmaceutical companies.

Instead, let people know how to protect and care for themselves at home. Eating whole foods, doing nasal rinses, and freely sharing the protocols of medical doctors globally who have had documented success will go a long way. The money spent on vaccines could be redirected toward communities living in whole food deserts, if your goal is truly to promote a healthy population, reduce disease, and save money on health care.

Unfortunately, the CDC, the Governor, and the DOH have lost a lot of credibility with many people. I'd like to see that relationship restored with genuine transparency, advocacy, and care instead of force.

With gratitude,  
Carrie Viens

Integrative Nutrition Health Coach

---

Please look at the facts before requiring children to have the covid vaccine. The risk to children is low and the consequences of long term effects are potentially high. The facts show that the vaccine does not stop transmission. The facts do not prove that it reduces symptoms. No long term studies have been performed. The actual FDA approved Comirnaty is not available in the U.S.

Subject: vaccines and masks

External Email

Hello

I am writing in regards to kids having to mask at school and be vaccinated. Can you please look at other states where kids are not masked at school and see how they are doing. It needs to be a parent's choice on if they want their student wearing a mask and being vaccinated. There are so many other states that students can go to school and not worry about wearing masks. Please make it a parent choice on masks and vaccines, please.

Thank you

Jennifer

1. Please what was total attendance of zoom meeting? I heard 7500 speakers.  
2. At next meeting agenda will it be discussed implementation of Covid vaccines to students. I believe it should be a parents choice. To date there isn't enough scientific studies for children to get a briefly tested vaccine. Please look at the severe consequences.  
We a hero stand up for students and you will be applauded and respected.

I'd like to also ask to be included on the immunization interested Parties distribution list.

Kindly  
Sher Faith

Hello!

I am writing concerning the upcoming State Board of Health meeting to discuss whether or not to mandate the Covid vaccine for school attendance in the 2022-2033 school year. I am deeply troubled about this and I want you to know that I vehemently oppose the vaccine for my child. I believe every person should have the right to choose for themselves and their children. I appreciate your time and I thank you for reading my email. I will be praying for each and every one of you in attendance at this upcoming meeting.

Sincerely,

Stacy Mares

I received the transcript of my attendance at Yakima Business College in the mail today per my request on 01/06/2022; however, there is no copy of my diploma and there is no list of my completion date or diploma received, etc. Can you explain to me why the other information is not available on the permanent record?

Attached is a copy of my original request form so that you can have the needed information to look into this further. Thank you.

## Washington State Transcript Request Form

**Number of Transcripts Requested – from Washington State schools ONLY (Check all that apply):**

1 official\* & 1 unofficial to student

Other (Please specify): \_\_\_\_\_

1 official to school/organization

\*Official means transcript will be sealed in an envelope and stamped. Do not open the official copy – it is not official unless sealed. The unofficial copy you receive is identical to the official, sealed copy.

### Student Information:

Name: Diane Olney \_\_\_\_\_

Diane Marez

Name used during school attendance (if different from above): \_\_\_\_\_

Current Address: 6221 Spring Street \_\_\_\_\_

City: Everett \_\_\_\_\_ State: \_\_\_\_\_ Zip: 98203

Telephone: 509-901-3391 \_\_\_\_\_ Email: dolney3391@live.com

Date of birth: 08/07/1960 \_\_\_\_\_ Last four digits of your SSN: 1024

(Required to verify your identity)

### Washington State Closed School Information:

Name of the Washington school: Yakima Business College \_\_\_\_\_ Graduated? Yes

Campus location: Yakima \_\_\_\_\_ Program: Med Secretary \_\_\_\_\_ Date Attended (mm/yy): 1978-79

### School/Organization where transcript needs to be sent:

Contact Name/Department: Remington Hamilton/Human Resources \_\_\_\_\_

School/Organization: Fairfax Behavioral Health \_\_\_\_\_

Address: 10200 NE 132nd Street \_\_\_\_\_

City: Kirkland \_\_\_\_\_ State: WA \_\_\_\_\_ Zip: 98034

### Signature/Certification:

**By signing below, I certify that the records I am requesting are my own. Further, I authorize the release of my records to the school/organization identified above.**

Student's Signature Diane Olney \_\_\_\_\_ Date 1/6/2022

**(Your request must be signed by hand in order for it to be processed)**

The Workforce Board can only accept signed requests submitted via e-mail, mail, or fax to the above address/fax number. Although we make every effort to retrieve student records of closed schools, some records were never sent to this agency, and some are incomplete. You will be provided with copies of what we have on file for you. Your request will be processed within 10 business days (excluding weekends and holidays) of our receipt. If you do not receive any communication within 10 business days, please contact us.

----- Forwarded message -----

1) I did not bother to sign up for oral public comment -- I have been too often silenced, just as most of

those attempting to make those demeaning one-minute public comments were by your suspiciously defective sound system -- one that did not allow at least 3/4 of those signed up for the hour to be heard, either by

those of us listening online, or at all, with their sound being cut off. From my own personal experience,

most of those who seemed to have left the meeting before speaking were actually there, but were being blocked from speaking, just as has so often happened to me -- both online and in person.

All of the above could be easily avoided, if the mad mandates of medical law martinet members of what is now being exposed as a "COVID cult" would allow normal in-person meetings. It is becoming increasingly obvious that such virtual meetings are not to maintain the safety of the we the people, but corporate government control over us as their supposed subservient subjects.

2) Please note that there is indeed reason for the public to be suspicious, inciting some misinformation; please find some of the evidence in the following articles, even those from the corporate mainstream media supposedly fact-checking them -- especially that of job notices, unless they are faked -- of Washington State hiring for COVID Strike Force members.

3) Thank you all for seeming to do the best you could to be civil under trying circumstances, and for BOH members voting in a fair and equitable manner in the best interests of the public -- no matter what their previous intentions may have been.

Subject: Public Comment- 1/12/22 Meeting

attachments\46E62E44B16F46BD\_WA BOH- 8-31-21- Chapter 246-100 WAC.pdf

External Email

Good afternoon!

I attended today's meeting and was one of the 7,500 who were hoping to comment.

A couple of things:

1) My comment:

I am opposed to any action by the BOH that would mandate vaccines for children of any age. On MSNBC, the Rachel Maddow program on 12/29/21, Anthony Fauci himself said on the subject of children hospitalized with COVID, "many of them are hospitalized WITH COVID, and not BECAUSE of COVID." He gave the example of a child with a broken leg coming to the ER and getting a positive COVID test. This is then recorded as a COVID hospitalization if the child is admitted. He went on to say, "It's overcounting the number of children who are 'hospitalized with COVID' as opposed to because of COVID."

Every statistic available shows us that healthy children are at zero risk of dying from COVID. However, the data available on VAERS has revealed that there is a much higher likelihood that children will sustain side effects, ranging from mild to severe and permanent, including death.

To put it quite simply, a child who is vaccinated is significantly more likely to be harmed for no health reason. I suggest that you consider that if the vaccines are added to the CDC children's vaccine schedule the manufacturers will acquire complete immunity from litigation. It is this fact that lies behind the push for children to be vaccinated. There is no honest data that supports that it is beneficial for them.

2) I understand that the next step is the Technical Advisory Group will deliberate over the issues and come back to the WABOH in March or so. Please tell me how we can share information with the TAG for their consideration in this process.

3) I was shocked and horrified at the prospect of there being internment camps being put into place for a range of "health reasons." I heard you loud and clear, Mr. Kutz and Mr. Grellner- you are not aware of any quarantine camps or the like. When I review the attached document there is a section that touches on the subject, it's highlighted for your review. If you guys would remove this from the regulation and as long as this language isn't buried somewhere else in a regulation I think that would put our concerns to rest, at least for the moment. Are you aware that Australia is actively deploying involuntary internment for people who they believe have been exposed to someone who is COVID positive? Did any of you believe that we would all be walking around in masks after almost two years? We are living in an environment where the unbelievable can become reality in a snap. Anything you can do to put this idea of involuntary detention, internment, call it what you like- to rest, would be greatly appreciated.

Lastly, I regret that some of the comments took a personal turn and while you are

probably armored up to that it isn't fun to be on the receiving end of it. I do believe that you are all doing the best that you can with what you are being given to work with. But if all you are doing is following CDC and NIH guidance you most certainly are NOT getting the information that you need.

I would be happy to fill in any of those blanks for you and I know that Informed Choice WA would gladly do so, with much greater precision than I could. Either way I encourage you to reach out beyond your normal channels, there are reams of science and data that you will find that will tell you the truth about what is going on.

All the best to you and I look forward to hearing how I can support providing information to the TAG working on the children's vaccine mandate.

# **Significant Legislative Rule Analysis**

## **Chapter 246-100 WAC Communicable and Certain Other Diseases**

**August 31, 2021**

## SECTION 1:

**Describe the proposed rule, including a brief history of the issue, and explain why the proposed rule is needed.**

The purpose of chapter 246-100 WAC, Communicable and Certain Other Diseases, is to protect the health and well-being of the public by controlling infectious and noninfectious diseases.

The rules provide authority and structure for state and local health officers, health care providers, health care facilities, and laboratories to address zoonotic diseases (e.g., rabies, psittacosis), sexually transmitted infections (e.g., syphilis, HIV), and tuberculosis. The rules include provisions and requirements for local health officers regarding case investigations, issuance of health orders, isolation and quarantine, preventing human disease, and testing of persons following exposure of disease in occupational and jail settings.

During the 2020 Legislative Session, the Legislature passed Engrossed Substitute House Bill (ESHB) 1551, Modernizing the control of certain communicable diseases (Chapter 76, Laws of 2020). This legislation modernizes the state's control of communicable disease laws by ending statutory exceptionalism for human immunodeficiency virus (HIV) and acquired immunodeficiency syndrome (AIDS), reducing HIV-related stigma, defelonizing HIV exposure, and removing barriers to HIV testing. The new law took effect June 11, 2020.

In ESHB 1551, the Legislature directed the State Board of Health (Board) to adopt rules to implement and enforce chapter 70.24 RCW, including but not limited to:

- Establishing reporting requirements for sexually transmitted infections<sup>1</sup>
- Establishing procedures for investigations of sexually transmitted infections under RCW 70.24.024
- Specifying, for purposes of RCW 70.24.024, behavior that endangers the public health, based upon generally accepted standards of medical and public health sciences
- Defining, for the purposes of RCW 70.24.120, specimens that can be obtained and tests that can be administered for sexually transmitted infections, blood-borne pathogens, and other infections
- Determining, for the purposes of RCW 70.24.340, categories of employment that are at risk of substantial exposure to a blood-borne pathogen
- Defining, for purposes of RCW 70.24.340, 70.24.360, and 70.24.370 what constitutes an exposure that presents a possible risk of transmission of a blood-

---

<sup>1</sup> Note: ESHB 1551, chapter 70.24 RCW, and prior rules under chapter 246-100 WAC use the term "sexually transmitted diseases." The Board, in rulemaking and in this analysis, uses the term "sexually transmitted infections" for medical accuracy and to reduce stigma.<sup>2</sup> Based on publicly available from salary data for open job positions for enhanced service facility administrators. Salary information was unavailable for adult family home administrators.

borne pathogen in occupational settings, jail facilities, and Department of Corrections facilities

Sections of chapter 246-100 WAC pertaining to sexually transmitted infections, including HIV/AIDS, have been updated piecemeal over the last several years:

- In 2018, certain sections of rule were revised to repeal consent and opt-out options for HIV testing and updating references of “AIDS counseling” to “HIV counseling” to provide clarity and focus on the disease (HIV) rather than the most advance stage of the infection (AIDS).
- In 2009, several sections related to HIV were revised for consistency with the Centers for Disease Control and Prevention’s most current recommendations for HIV testing.
- In 2005, certain sections of the chapter were revised to expand access to HIV testing, increase efforts to notify exposed partners of their exposure to HIV infection, and encourage services to meet the HIV transmission prevention needs of persons living with HIV.

The Board filed a CR-101, Preproposal Statement of Inquiry, on July 16, 2020 (filed as WSR 20-15-112) for Chapter 246-100 WAC, Communicable and Certain Other Diseases, and Chapter 246-101 WAC, Notifiable Conditions. The CR-101 provided notice to the Board’s interested parties that the Board is considering amending these chapters to implement changes made by ESHB 1551 to assure consistency with the bill’s requirements and protect public health and safety. As identified in the CR-101, the Board also proposed other technical and editorial changes as necessary.

This analysis considers the impact of proposed changes to chapter 246-100 WAC only. Proposed changes related to ESHB 1551 for chapter 246-101 WAC, Notifiable Conditions, were adopted under a separate rulemaking process, as revisions to the Notifiable Conditions chapter were already underway at the time of filing the CR-101 to implement ESHB 1551. Amendments to chapter 246-101 WAC were adopted by the Board at its March 2021 public meeting and are limited to minor editorial revisions consistent with the changes in ESHB 1551. These changes can be found in WSR 21-11-040.

---

## **SECTION 2:**

### **Is a Significant Analysis required for this rule?**

The Board determined a significant analysis is required for the proposed chapter revisions and is subject to the requirements of RCW 34.05.328(5). The Board evaluated the proposed rules and determined several provisions of the proposed rules are exempt from further analysis under RCW 34.05.328(5)(b). Table 1 identifies rule sections or

portions of rule sections the Board has determined are exempt from analysis based on the exemptions provided in RCW 34.05.328(5)(b).

**Table 1. Summary of sections not requiring analysis**

| WAC, Title                                                                                              | Description of Change                                                                                                                                                                                                                                                                                                            | Exemption from Significant Analysis under RCW 34.05.328(5)(b)                                                                                                                                                 |
|---------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Throughout the chapter                                                                                  | Made editorial changes to remove gendered language (e.g., he, his), and use people-first language (e.g., person living with HIV).                                                                                                                                                                                                | (iv) Revisions clarify language without changing its effect.                                                                                                                                                  |

---

### SECTION 3:

**Clearly state in detail the general goals and specific objectives of the statute that the rule implements.**

The intent of the underlying statute (chapter 70.24 RCW) is to protect the public's health through the control and treatment of sexually transmitted infections and blood-borne pathogens. It was the intent of the legislature to provide a program that is sufficiently flexible to meet emerging needs, deals efficiently and effectively with reducing the incidence of sexually transmitted infections and blood-borne pathogens, and provides patients with a secure knowledge that information they provide will remain private and confidential.

---

## **SECTION 4:**

**Explain how the Board determined that the rule is needed to achieve these general goals and specific objectives. Analyze alternatives to rulemaking and the consequences of not adopting the rule.**

Through ESHB 1551, the Legislature directed the Board to adopt rules to implement and enforce chapter 70.24 RCW. The Board also assessed alternatives to rulemaking. If the Board opted not to engage with updates to chapter 246-100 WAC, a discontinuity would exist between statute and rule, therefore causing confusion among the regulated community and general public, both whom of are impacted by this chapter of rule. Additionally, for requirements to be enforceable they must be articulated in the rule and could not be simply described in guidance documentation.

---

## **SECTION 5:**

**Explain how the Board determined that the probable benefits of the rule are greater than the probable costs, taking into account both the qualitative and quantitative benefits and costs and the specific directives of the statute being implemented.**

### *WAC 246-100-011, Definitions*

This subsection defines “health care facilities” for the purposes of the chapter. The proposed rule amends the existing definition to include adult family homes licensed under chapter 70.128 RCW and enhanced service facilities licensed under chapter 70.97 RCW. The inclusion of these two facility types in the proposed definition creates new requirements for those licensees. WAC 246-100-186 requires health care facilities, which would require enhanced service facilities and adult family homes, to “(1) Adopt written policy and procedures restricting work of employees, staff, students, and volunteers diagnosed to have a communicable disease from direct contact with patients, residents, and recipients of care during the period of communicability...”

Chapter 388-107 WAC outlines requirements that must be met in order for enhanced service facilities to be licensed in the State of Washington. WAC 388-107-1580 requires enhanced service facilities to develop, implement, and train staff on written policies and procedures for all treatment, care, and services provided in the facility. These policies and procedures include but are not limited to “preventing and limiting the spread of infections, including tuberculosis, consistent with WAC 388-107-0440”. Furthermore, WAC 388-107-0440 requires enhanced service facilities to “establish and maintain an effective infection control program designed to provide a safe, sanitary, and comfortable environment and to help prevent the development and transmission of disease and infection.”

Similarly, chapter 388-76 WAC outlines requirements that adult family homes must meet in order to be licensed in the State of Washington. WAC 388-76-10255 requires adult family homes to develop and implement an infection control system that uses nationally recognized infection control standards, and WAC 388-76-10260 requires adult family homes to implement nationally recognized infection control measures if the adult family home suspects anyone working or living in the facility has or may have a communicable disease.

While these facilities must develop and implement policies, procedures, and/or infection control standards as a requirement of licensure, it is unclear whether these policies and procedures fulfill the specific requirements of WAC 246-100-186. Therefore, this analysis analyzes the impact of this potential change for adult family homes and enhanced service facilities.

Board staff circulated a cost survey to understand the one-time costs, if any, to update existing policies and procedures to comply with WAC 246-100-186. One-time costs are defined as costs that occur only once. There are 3,186 adult family homes and six enhanced service facilities licensed in the State of Washington. Cost surveys were sent to representatives of these facilities and advocacy organizations. The cost survey returned zero responses.

Due to receiving zero cost survey responses and existing licensing requirements for adult family homes and enhanced service facilities, Board and Department of Health staff believe it likely that many of these licensees already have policy and procedures in place that comply with proposed changes to WAC 246-100-186. Still, the Board and Department of Health have considered what it may cost a facility to comply with the rule should they not currently have policy and procedures in place that comply with the proposed changes (estimated below).

### Cost

The Board and Department of Health assume that administrators of adult family homes or enhanced service facilities would develop updates to existing facility policy and procedures. The assumed hourly rate of these administrators is \$30<sup>2</sup>. To develop or update existing policies and procedures the Board and Department of Health assumed that the number of hours range from zero to ten. Therefore, the assumed one-time cost to develop or update existing policies and procedures to comply with WAC 246-100-186 would range between \$0 and \$300.

### Benefit

There are several benefits of all long-term care and residential facilities having policy and procedures in place to restrict contact with residents by staff diagnosed with a communicable disease. Infection control standards for all health care facilities, including long-term care facilities, include the fundamental components of surveillance, policy

---

<sup>2</sup> Based on publicly available from salary data for open job positions for enhanced service facility administrators. Salary information was unavailable for adult family home administrators.

development, employee health, and education<sup>3</sup>. The Agency for Healthcare Research and Quality (AHRQ) indicates that there are over 380,000 resident deaths annually in long-term care settings related to facility associated infections. Policy and procedures to restrict staff with infections from contacting residents would contribute to the greater aim of reducing potential illness and death in these settings. Consistency across all settings benefits residents and employees who may move across various settings. For example, an individual experiencing a fall may recover at an assisted living facility, with a policy, then return to their adult family home that does not have such a policy. Discontinuity also may impact staff, many of whom may work across multiple setting types and be restricted from interacting with residents at one, but not have the same restrictions at another.

A 2016 study indicates that health care associated infections in nursing home settings in the United States, cost between \$637 million and \$2 billion for hospitalizations and \$38 to \$137 million for pharmaceutical interventions annually (2013 USD)<sup>4</sup>. The study goes further to say that reducing infections should be a priority as most of these infections can be prevented.

While we are unable to discern the number of health care associated infections occurring in enhanced service facilities and adult family homes specifically from transmission from an infected staff member, it is clear a benefit exists.

#### *WAC 246-100-202, Sexually transmitted infections – Duties and authorities*

This section outlines requirements for health care providers to report each case of a notifiable sexually transmitted infection, provide education to patients, and provide specific care to pregnant persons. This section also authorizes state and local health officers to conduct case investigations for newly diagnosed sexually transmitted infections. The proposed rules update references to treatment of prenatal syphilis for health care providers and adds references to CDC guidelines for sexually transmitted infections treatment.

#### Cost

The Board determined there is no probable cost to comply with these changes to the rule. These changes align with current practice and do not result in a cost for health care insurers.

#### Benefit

Updating the rule to be in alignment with current medical practice ensures that Washington infants are provided care in alignment with best practice and that health care providers are empowered to provide that care.

#### *WAC 246-100-205, Blood-borne pathogens exposure – Occupation settings.*

This section describes occupations that are at increased risk of exposure to blood-borne pathogens in the course of their employment. Currently, the rule includes a list of six

---

<sup>3</sup> <https://academic.oup.com/cid/article/31/3/752/297815>

<sup>4</sup> <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4915220/>

categories of employment that may make a request of the local health officer to test the person who was the source of the body fluid. The proposed rule adds a new category of employment, persons licensed to perform body art, body piercing and tattooing that is at increased risk of exposure to body fluids. Adding a new employment category has the potential to increase the workload for local health officers who may receive requests for testing of the person who is the source of the body fluid. Additionally, the proposed rule newly includes in the definition of “health care facility” enhanced service facilities and adult family homes, which would newly expand the provisions of WAC 246-100-205 to the staff of those facilities. This expands the potential population able to make a request for testing of a person who is the source of an exposure in an occupational setting.

### Cost

As this proposed rule is adding a new occupation, the Board collected information on existing requests from Local Health Jurisdictions (LHJs) and used these data to understand the probable costs of the revision. The Board contacted three LHJs to inquire about the existing process of requesting a test for a blood-borne pathogen exposure, two of whom represent larger LHJs<sup>5</sup>. Larger LHJs were included aiming to understand the ceiling of probable costs. The information received was caveated with the information that both larger jurisdictions include a large trauma center and the majority of requests stem from providers and staff at those facilities.

These three LHJs each reported receiving approximately fifteen to thirty requests annually across the six categories of employment currently included in the rule. Requests are likely to be fewer in smaller jurisdictions and those without large trauma centers. Based on this information, Board staff assumed one additional request per year per LHJ by adding a new category of employment and expanding the definition of health care facility employees.

The requirement to field requests and make a determination is included in the duties and authorities of the local health officer. Therefore, staff assumed for purposes of this analysis that the local health officer would be conducting activities associated with such a request. The Board assumes local health officer salaries range from \$27 - \$108 an hour<sup>6, 7</sup>. We assume that local health officers would spend the same amount of time on the requests from a new occupation that they would on the occupations that the rule currently includes. Board staff assumes an estimate of one-business day (eight hours) to process each request. Using these assumptions, the cost for compliance would be between \$216 - \$864 per request, assuming additional request annually, dependent on the negotiated salary of the local health officer.

In addition to the cost of personnel time, there are costs associated with the tests for blood-borne pathogens a local health officer may order. The cost of an HIV antigen test

---

<sup>5</sup> Internal discussion with Asotin County Health District, Snohomish Health District, and Public Health - Seattle & King County.

<sup>6</sup><https://agency.governmentjobs.com/snohd/default.cfm?action=specbulletin&ClassSpecID=1207904&headerfooter=0>

<sup>7</sup> <https://www.masoncountywa.gov/human-resources/jobs/20job29.pdf>

is estimated at \$22 (2010 US)<sup>8</sup> and the cost of a Hepatitis B test is estimated at \$10 to \$43 (2021 US)<sup>9</sup>.

### Benefit

The new employment category added is consistent with those identified by the Centers for Disease Control and Prevention as at high risk of exposure to a blood-borne pathogen. Body artists are at risk of exposure “*during the set-up, procedure, break down, and clean-up stages. These exposures can occur through needlesticks, contact with dried blood on equipment or surfaces, or blood splashes in the eyes, nose, or mouth*”<sup>10</sup>. One study assessing the harms and benefits of testing source patients following occupational exposure in a health care setting identified numerous benefits to such practices. Benefits included reduced anxiety in the exposed person, proactive protection of partners for both source and exposed persons, ability to make decisions related to post-exposure prophylaxis, and possible improved health outcomes for the source person if connected to care<sup>11</sup>.

### *WAC 246-100-206, Blood-borne pathogen exposure – Local jail facilities*

This section describes the procedures for when the local health officer may order testing of a detainee, who is the source of an exposure in a local jail facility. To align with changes in statute, the proposed rule removes instances of *threatened* behavior from the list of allowable scenarios to retain only *actual* behavior. Additionally, the proposed rule clarifies what constitutes an “exposure presenting a possible risk” to be clear that there must be visible blood following a physical assault for the scenario to meet the criteria.

### Cost

The proposed rule eliminates certain instances when persons may request a local health officer to order testing for blood-borne pathogens, therefore no costs are expected from this rule change.

### Benefit

Similar to changes in WAC 246-100-205, the benefits of the proposed rule change in this section include reduced anxiety in the exposed person, proactive protection of partners for both source and exposed persons, ability to make decisions related to post-exposure prophylaxis, and possible improved health outcomes for the source person if connected to care<sup>12</sup>.

---

<sup>8</sup> <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4373404/>

<sup>9</sup> <https://www.mdsave.com/procedures/hepatitis-b-surface-antibody/d582facb#:~:text=How%20Much%20Does%20a%20Hepatitis,their%20procedure%20upfront%20through%20Mdsave.>

<sup>10</sup> [https://www.cdc.gov/niosh/topics/body\\_art/](https://www.cdc.gov/niosh/topics/body_art/)

<sup>11</sup> <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3473147/>

<sup>12</sup> <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3473147/>

*WAC 246-100-2061, Blood-borne pathogen exposure – Department of corrections facilities*

This new section outlines procedures for and defines what constitutes an exposure presenting a possible risk of transmission of a blood-borne pathogen when the source of the body fluid is an inmate in the care of the Department of Corrections. The Board was provided authority in RCW 70.24.130 to define what constitutes an exposure presenting possible risk in corrections facilities. Previously, the Department of Corrections established policy in consultation with the Board regarding possible exposure to blood-borne pathogens. In accordance with that policy, the Department of Corrections indicated that in 2020 they received twenty-five requests for testing based on an occupational exposure.

Cost

Therefore, while newly included in chapter 246-100 WAC, this section was previously developed in consultation with the Department of Corrections and due to lack of changes in policy is not expected to result in new costs.

Benefit

Similar to changes in WAC 246-100-205 and WAC 246-100-206, the benefits of the proposed rule change in this section include reduced anxiety in the exposed person, proactive protection of partners for both source and exposed persons, ability to make decisions related to post-exposure prophylaxis, and possible improved health outcomes for the source person if connected to care<sup>13</sup>.

*WAC 246-100-207 Blood-borne pathogen testing – Ordering – Laboratory screening – Interpretation – Reporting*

This section outlines requirements and exemptions for reporting HIV test results to state and local health authorities under chapter 246-101 WAC, Notifiable Conditions. It also outlines information that must be provided to the patient with test results. The proposed rules remove requirements for the Laboratory Quality Assurance section at the Department of Health to accept substitutes for enzyme immunoassay screening. The Department of Health currently accepts, and does not limit the use of, substitutes for enzyme immunoassay screening for HIV as approved by the Federal Drug Administration (FDA).

Cost

There are no anticipated costs associated with removal of these requirements.

Benefit

Removing these requirements reduce redundancy and improve usability of the chapter.

---

<sup>13</sup> <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3473147/>

### Cost-benefit summary:

The probable benefits described in this analysis are important to protect the health and well-being of the public by controlling infectious and noninfectious diseases. The proposed rules incorporate additional long-term residential care settings into those required to have a policy and procedure for excluding staff diagnosed with a communicable disease from direct patient contact; align employment categories at risk of a substantial exposure to a blood-borne pathogen with national standards; clarify standards for local jail and Department of Corrections facilities; and clarify the types of information the Department of Health must accept. These proposed changes provide benefit to the public as it relates to the prevention of communicable disease and streamlines the underlying processes for local health and the Departments of Health and Corrections.

While the Board believes that adult family homes and enhanced service facilities already have such policies and procedures in place that comply with the changes, the Board estimates that for a facility that needs to develop or revise policy and procedures to restrict staff diagnosed with a communicable disease from direct resident contact the cost is estimated to range between \$0 - \$300.

Proposed changes to the rule add additional occupations that can request investigation to a blood-borne pathogen exposure in an occupational setting. The estimated cost to LHJs of implementing the rule changes ranges from \$216 - \$889 (personnel time only)<sup>14</sup>.

The Board determined that the probable public health benefits of the rule outweigh the probable costs to regulated entities.

## **SECTION 6:**

**Identify alternative versions of the rule that were considered, and explain how the Board determined that the rule being adopted is the least burdensome alternative for those required to comply with it that will achieve the general goals and specific objectives state previously.**

The Board considered alternate versions of the rule that would have resulted in an expansion of certain provisions to be applicable to all blood-borne pathogens, resulting in more persons being subjected to stringent requirements without documented public health benefit.

The Board also considered a version of the rule that did not include enhanced service facilities and adult family homes in the definition of health care facility. This would have resulted in the definition of health care facility being out of alignment with the definition in chapter 246-101 WAC, Notifiable Conditions. Additionally, this inclusion ensures staff of these facilities are included in the provisions of WAC 246-100-205 and covered as categories of employment at risk for substantial exposure to a blood-borne pathogen.

---

<sup>14</sup> <https://www.cdc.gov/hiv/programresources/guidance/costeffectiveness/index.html>

The Board also considered a version of the rule that would have included “other potentially infectious material” in the definition of blood-borne pathogens. This expansion would have resulted in more persons being subjected to stringent requirements without documented public health benefit.

## **SECTION 7:**

**Determine that the rule does not require those to whom it applies to take an action that violates requirements of another federal or state law.**

The rule does not require those to whom it applies to take an action violating state or federal law.

---

## **SECTION 8:**

**Determine that the rule does not impose more stringent performance requirements on private entities than on public entities unless required to do so by federal or state law.**

The rule does not impose more stringent performance requirements on private entities than on public entities.

---

## **SECTION 9:**

**Determine if the rule differs from any federal regulation or statute applicable to the same activity or subject matter and, if so, determine that the difference is justified by an explicit state statute or by substantial evidence that the difference is necessary.**

The rule does not differ from any federal regulation or statute applicable to the same subject matter.

---

## **SECTION 10:**

**Demonstrate that the rule has been coordinated, to the maximum extent practicable, with other federal, state, and local laws applicable to the same activity or subject matter.**

There are no other applicable laws.

In regards to the public meeting being held on Wednesday, January 12th, I implore you to oppose the following proposals:

Please oppose WAC-246-100 that would expand any authority to involuntarily quarantine individuals against their will. Also, please oppose adding a C-19 vaccine to the WAC 246-105 required list of vaccines for children to attend school.

Thank you for your time. I pray God's wisdom and protection over you and your family.

Sincerely,

Beth Bower

Subject: Comments on Board Meeting

External Email

Dear Board Members,

Time ran out for comments, and I didn't finish my list.

I support Agenda item #11. That this board is putting the infrastructure in place through the tech committee to coerce uptake of experimental vaccines in our children before they complete phase three trials, especially when we already have so much evidence of injury and death is not acceptable. They do not prevent infection or transmission of a virus that is no threat to the lives or health of our children.

I am concerned that the definition of unvaccinated includes people who have been vaccinated, and may be hospitalized due to effects of the vaccine. This is the same strategy that Pfizer used in their clinical trial to hide the number of people who were impacted in the first two weeks after the first and second shot. The definition was recently changed, to include persons more than 5 months from their last shot who were not boosted, and those who are boosted within 2 weeks of the jab.

I am concerned that your presentation this morning only included benefits of the vax, with no data about risks, that provides true informed consent. No comparison of relative risk, rather than absolute risk, the more accurate descriptor of the true effectiveness of the vax.

I personally know at least 10 people who died or have disabling injuries from this vaccine. These are young people without comorbidities! In contrast with

2 people I knew who died of covid, with 4 or more comorbidities.

Recently, the FDA issued a warning for a drug used to perform ultrasounds, that elicited 11 cases of anaphylaxis and 2 deaths. How many cases of anaphylaxis and death, or other injuries will be reported before the FDA acts to stop the rollout of this medical treatment? VAERS reports more than 70 deaths in children alone.

Thank you for your time.

Deborah

To whom it may concern,

I am a parent of two bright boys that love school! Unfortunately for them I don't allow them in public school with the mandates and have homeschooled the last two years.

With the new vaccine mandate going to vote they may never get the chance to go to public school.

It is a parents choice what goes into their childrens bodies and no one else's.

Because of a flu you want to jeopardize so many young kids. Listen to the parents! Let it be a choice!!

Hello Ms. Herendeen,

I Danielle Loft oppose the use of law enforcement to be used to detain those who are unvaccinated. There are so many reasons one would choose not to get this medical procedure for their own personal reason, for instance previous injury from other vaccines (many of my friends and family have experienced, look into VAERS to see how much money has been paid out to victims) religious reasons, natural immunity, wanting more studies to be done before making that decision, all of which are legitimate reasons and shouldn't be questioned. It is our own right to refuse and to be punished and detained for those valid reasons is unacceptable on every level. This is America, we have a constitution, we have rights to choose what is best for ourselves, but seems for some that's been forgotten.

I do not support adding the C vaccine to the childrens school schedule. There have not been enough studies on it, we don't know the effects it will have on fertility and their bodies. All the science says children are not a threat and are likely to not be harmed by the virus as much as adults, so why mandate it? It doesn't make sense. Leave the children alone.

Please do what you know is right and oppose these WACs from being added as a law.

Listening to the comments today shows me there is a disconnect between government institutions and its citizens.

Might you consider visiting schools and talk to students and teachers. See for yourself in person how Government decisions are hurting students lives and effecting quality of life. Get away from bureaucrats and spend time with real life people. My sister and brother-Inlaw work in different High Schools. There are suicides happening, a lot of teachers ready to quit. Whole classes of 12th graders that will not graduate.

See the reality for yourselves.

Also go visit ER's and talk to medical staff. Get real I formation from people who are on the front. My husband works in a ER. There is so much misinformation going in many directions.

I sincerely hope you do this.

External Email

Lindsay,

I believe the covid-19 vaccines are more harmful to children than they are helpful and should never have been approved for kids. As a medical professional, you probably know or suspect this is true. At the very least, you know the trials did not have the statistical power needed to prove the vaccine is safe when compared to the miniscule risk to children from covid.

At the same time, the pressure to require the covid-19 vaccine in school is enormous, because not doing so appears to align yourself with people who are "anti-vax" and more generally with Republicans, which you may not be or may not wish to be known for.

Requiring the vaccine for school children seems inevitable in a "blue state" and taking a stand will cause damage to your reputation and career, and maybe your income and family well-being... and it won't change anything. The governor will remove you from the Board if needed to ensure this policy is put into place.

It seems likely that you will approve the school vaccine mandate knowing it will kill a few children, and hurt a few more... and I understand why.

What I ask of you, therefore, is that you insist on keeping the personal/philosophical exemption in place for the covid-19 childhood vaccine. This will allow parents who wish to protect their children from harm to do so, without forcing us to withdraw them from school.

And make no mistake... hundreds of thousands of kids will vanish from school if you do not allow the personal/philosophical exemption. No manner of pressure or threat of punishment will force us to harm our kids knowingly, and the damage to schools, families, and communities will be incalculable.

Please, do the less wrong thing that protects my kids, keeps them in school, and preserves your career as well. It's all I ask in these difficult times.

Thanks,

-David Rubino

Subject: vaccine mandate

External Email

I sent you an email last Friday but it was mostly relevant to mandates being imposed on the school age children of WA State. Today I learned that most of your discussion tomorrow is going to be on whether or not force adult citizens of WA State to take the vaccine. And if they don't, to be forced into internment camps until they do comply. This sounds like Nazi Germany, I never thought I would be hearing that my own government would even consider such a thing.

Over the last two years we have had to listen to the BLM cries of injustice done to them by a generation long past. We listened to 'My body, my choice' when it concerned abortions for unborn babies. But now, we adults seem to have no choices if it were to be left to the government - you know, the people we voted to put into office - to protect us, to work on our behalf. All I can do - all we can do - AT THIS TIME - is to present you with a few of the most important reasons why I and a majority of concerned citizens feel that

you should do all you can to uphold our rights as human beings and United States Citizens.

1. Mandated vaccines are a direct interference with families by forcing medical treatment without consent, and are thereby a violation of Article 12 of The Universal Declaration of Human Rights.

2. Article 7 of the 1966 International Covenant on Civil and Political Rights as put forth by The Geneva Convention states: No one shall be subjected without his free consent to medical or scientific experimentation. Experimental vaccine ties it directly into the Nuremberg Code, which says that we cannot be experimented on [without consent]. We always have the right to accept or refuse a medical treatment.

3. The Universal Declaration of Human Rights, put forth by The United Nations, states:

Article 12: No one shall be subjected to arbitrary interference with his privacy, family, [or] home. ... Everyone has the right to the protection of the law against such interference. Mandated vaccines are a direct interference with families by forcing medical treatment without consent, and are thereby a violation of Article 12 of The Universal Declaration of Human Rights.

Article 18: Everyone has the right to freedom of thought, conscience, and religion; this right includes freedom...either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship, and observance. Similar to The First Amendment of The US Constitution, any law that denies parents a vaccine exemption for religious reasons is a violation of the protected right of Americans to freely exercise their religious beliefs as they see fit for themselves and their family. Denying a philosophical exemption is also a violation of personal beliefs and philosophy as described by Article 18. In addition, any law mandating vaccines that calls for the quarantine or banishment of "the unvaccinated" from a public space, such as a school or market, simply for exercising their right to practice their religious or personal beliefs through use of a vaccine exemption is a violation of Article 18.

4. Mandated vaccination is a violation of medical ethics. The Hippocratic Oath states: (Traditional translation) Traditional translation: I will keep them [patients] from harm and injustice. I will neither give a deadly drug to anybody who asked for it, nor will I make a suggestion to this effect.

5. The American Medical Association's Code of Medical Ethics states: Informed Consent: The patient should make his or her own determination about treatment. ... Informed consent is a basic policy in both ethics and law that physicians must honor, unless the patient is unconscious or otherwise incapable of consenting, and harm from failure to treat is imminent. The AMA's Code of Medical Ethics specifically states that physicians must honor the patient's wishes regarding their treatment; it is not optional.

6. There is no imminent, impending, or otherwise immediate threat of bodily harm that would result from declining vaccination. The true bodily harm has been shown to come to those who have gotten the Covid Vaccine and boosters. And without imminent danger to others, there is no legitimate reason for EUA (Emergency Use Authorization) of any of the Covid vaccines. So you must ask, what then are the reasons - when the FACTS are out there - the vaccines are eminently more dangerous and lethal than any of the Corona Virus variants.

Four standards that must be fulfilled for an EUA. If any of these criteria are not met, EUA cannot be granted or maintained.

(a) First, the secretary of Health and Human Services has to declare and maintain a state of emergency. If the emergency were to go away, all EUA products would have to come off the market. And that doesn't just mean vaccines. It also includes the PCR tests and even surgical masks.

(b) The second standard is evidence of effectiveness. Historically, vaccines had to show a 70% or greater effectiveness, as measured by a fourfold increase in antibody levels, in order to qualify. For an EUA vaccine, the efficacy threshold is only 30% to 50%. In another departure from prior vaccine approvals, the COVID vaccine clinical trials relied on the RT-PCR test, not antibodies, to demonstrate effectiveness in the small "challenge phase" of the trials. (Now, you probably heard that the Pfizer shot was 95% effective when it first rolled out, but that was 'relative risk reduction', not 'absolute risk reduction'. Confounding these two parameters is a common strategy used to make a product sound far better than it actually is. The absolute risk reduction for Pfizer's shot was just 0.84%.<sup>3</sup> (For ex: if a study divided people into two groups of 1,000 and two people in the group who didn't get a fictional vaccine got infected, while only one in the vaccinated group got infected, the relative risk reduction would be reported as 100%. In terms of absolute risk reduction, the fictional vaccine only prevented 1 in 1,000 from getting the infection - a very poor absolute risk reduction.)

(c) The third standard is that the known and potential benefits of the product must outweigh the known and potential risks of the product. In the case of COVID shots, there's overwhelming evidence showing they do more harm than good.

(d) The fourth and last standard that must be met is there can be no adequate, approved and available alternative treatments (drugs or vaccines). "This is why hydroxychloroquine and ivermectin were quashed," Mayer says. This is also another reason Comirnaty is not treated as a fully approved product in the U.S., because if it were, then all the other COVID shots that are under EUA would have to be removed from the market.

7. Mandated vaccination is a violation of legal accountability and medical science. we object to being denied our right to decline a medical procedure or product in which: The manufacturer cannot be held liable for any injury or death occurring from the use of their product (The National Childhood Vaccine Act of 1986) ----- The government recognizes that the product and procedure is "unavoidably unsafe" (US Supreme Court ruling, 2011) The manufacturer admits in the package inserts that the product: 1.Has not

been tested for carcinogenic or mutagenic potential 2. Has not been tested for safety in the populations targeted for product use 3. Can cause serious permanent injury and death 4. Can cause the very illness and disease the product is designed to prevent.

Product safety and efficiency studies are funded and conducted by the product manufacturer and/or the federal government instead of by an independent and neutral third-party which has no stake in potential profits from product sales.

The product: 1. Has been "fast-tracked" for approval without undergoing basic safety and efficiency studies (HPV vaccines) 2. Has not undergone proper randomized, double-blind, placebo-controlled safety and efficiency studies 3. Has not undergone long-term safety and efficiency studies. The manufacturer is facing multiple federal charges of scientific fraud in regards to product efficiency (Merck's MMR vaccine)The Centers for Disease Control and Prevention (CDC) is facing allegations of scientific fraud in regards to product safety (Merck's MMR vaccine)

Hi there just a few comments after watching the meeting today.

Why add the covid vaccine to the child care/ school enrollment if we are being told "oh but there are exemptions" seems like a lot of red tape rather than just allowing families to choose for themselves.

Vaccine preventable diseases.... this is a virus. As we are seeing this virus is not preventable with soooo many vaccinated and unvaccinated alike catching covid.

The committee that was put together to make a recommendation "TAG" is it full of provaccers or is it a mix of both?

Thanks for the read.

You all need to back off. You need to stand up for the facts and the truth. The truth is covid was here before March lockdowns and no one gave a fuck. They only cared about impeachment. Several of my family members had covid in January 2020 before it was supposedly even here. We got the anti bodies test a year and a half later and we have the antibodies still. Plus non of us have been sick in 2 years. I personally have done my own research and everyone I know that had covid and did not get vaccinated have not been sick since. Those I know who have been vaxxed have continued to get sick or have other health issues. So if you wanna do the right thing to stop covid, stop the mandates stop trying to force the Vax because you won't win. If you keep trying to force you will have thousands that will fight back as well as you will never stop covid if you continue to try to mandate vaccines. The flu has never been stopped so what makes you think you can stop this by forcing vaccines

External Email

We, as constituents and community members of Washington state, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization and as such are experimental.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Thank you ,  
John and Carmen Mayo

Again, during the meeting the board attempted to deny that any containment facilities even exist. Keith stated after that the facilities do in fact exist but are for volunteer isolation only. If you read the actual WAC text it clearly states that it can in fact be involuntary if the state so chooses. As a citizen I am not worried about what is currently happening, but what COULD happen based on what is being proposed. I understand that there are CURRENTLY not enough staff or funding to make it easy to take anyone other than voluntary COVID patients, but funding can change quickly and police states such as China and nazi germany have proven that if you pave the way for the opportunity of government control that the greedy government will always grab for more power. Protect the citizens and cease and desist your continued "ignorance" on the subject. We aren't stupid. I am a professional engineer, and I know how to look up legal codes.

On Wednesday, January 12, 2022, Temp Account <iwantadiscout1993@gmail.com <mailto:iwantadiscout1993@gmail.com> > wrote:

Hello,

I previously sent a comment expressing my concerns about the slippery slope that even enacting a small change can make for the future. I did not appreciate the board stating how "false" our concerns are. Obviously the majority of us don't believe the unvaccinated will be thrown into concentration camps right now, and that of course it isn't being voted on at this moment in time, but the change being proposed helps open up that possibility in the future. Hitler didn't start his hate towards the Jews by telling everyone in Germany that they were going to lock up and kill the Jews. Don't downplay our concern. You work for the citizens of this state, and need to get rid of your self righteous attitudes. I don't have children in public schools, so I didn't comment on that front, but it is also incredibly rude to brush off parents concerns on that matter also saying it is "false" claims when you are in fact going to be discussing that topic of requiring vaccines at this meeting even if you do not plan to vote on it today. Grow up please and learn that just because you say how great and safe vaccines are for everyone a million times and that peoples concerns aren't warranted doesn't mean that you are correct.

-Daniel

I oppose the following proposed WAC's:

246- 100-070

246-1 00-045

246-1 00-040

246-100 and 246-105

I am completely against giving local health officers use of law enforcement and the use of emergency order to involuntarily detain a person or family if they refuse the request of medical examination, testing, treatment, counseling or vaccination.

I am absolutely against COVID-19 injections as part of the school immunization requirements using WAC 246-105.

Subject: No vaccine requirement for school

External Email

Hello,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are

interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Robin Au, DMD

Hello!

I'm writing to you to please stop forcing the mandates for the Covid virus shot. As a American we as a nation are going backwards with these mandates! As Abraham Lincoln said, That this nation, under God, shall have a new birth of FREEDOM - and that government of the people, for the people, shall not perish from the Earth. The people are standing up and saying we DO NOT WANT THE MANDATES ON OUR CHILDREN AND FOR US! Enough is enough, if a person wants to get the Covid shot, that's their CHOICE! But DON'T FORCE OR DISCRIMINATE a human for their God given personal choice for choosing not to get the Covid shot! Especially when they can lose their job!!! As a state you are discriminating many citizens and now there is segregation where many citizens can not go to places. If that doesn't show HATRED then you have no compassion. This is not the USA land of the FREE if you continue this nonsense. And now you the Board of Washington Health want to have ALL children take this Covid shot! You have no right to put your personal decision on other citizens children!! Shame on you.  
Thank you for listening from a concerned Wa citizen, Gayle Morgan

I am writing in regards to the policies listed below that are being considered by the Washington state board of health. Please see content below.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

Subject: Public comment on today's meeting January 12, 2022: was signed up to speak

External Email

To Whom It May Concern,

The Vaccines are not vaccines

I really wanted to comment today, but was not able to due to your restrictions with having 7500 people request to speak. These are the highlights with links for my concerns (and there are so many more concerns that I have).

My background: I have been an RN for 14 years, obtained my BSN in 2013, am a parent and grandparent and have never felt like moving out of the PNW until recently. The mandates have been horrible and please just read my talking points and look at the data I provided. That is all I am asking.

I understand liking and needing your paycheck, truly I do. I lost my job in public health when my RE was not accepted last year. I have family members who need my support, so I ventured out and started working from home, my own business this time. Here are my points I wanted to touch base on:

\* Dr. Jane Ruby presented new information with vaccine lot numbers and lethal dose correlations, EW0182 is the most dangerous lot number.

\* The information can also be found on other websites. See the link below as it is also on this site:

\* Howbad.info

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhowbad.info%2F&data=04%7C01>

\* Project Veritas released government documents proving Fauci

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.projectveritas.com%2Fnews-documents-about-gain-of-function-contradict-fauci-testimony-under%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C68b7a8adb74d43138fc008d9d625eca0%7C11>>  
was illegally funding and directing gain of function research in Wuhan and other sites in the U.S. This includes: concealment of documents, suppression of cures: Ivermectin and Hydroxychloroquine.

\* Hospitals receive large sums of money for COVID dx, if they're placed on vents, and if they die. – RW Malone MD

To Washington State Board of Health

I am Yukari Evins who has been living in Washington for two decades from my heritage is Japan. I am also a parent of three children who were all born and raised in Washington state. I am writing to you all to ask not to mandate mRNA technology that is still under experiment at least until the end of 2023 according to Pharmaceutical companies such as Pfizer and Moderna.

I would like to emphasize that this is not vaccine but it is Gene therapy. There have been many of my friends in Japan told me that there are many people whom they know were dead within 72 hours after being injected. Many of teens have dead within three days after being injected in Japan.

The media in Japan has not reported at all but still pushing to people. Those scientists and honored doctors and honored professors along with lawyers were all rejected to speak up the reality on media. They finally have filled law suits in Japan since last year.

Please questions yourself why is all the world gov has been pushing mRNA Gene therapy in the entire world to entire humans at the same time with this 99.9999 percent of recovery rate?

Why would they push so called Green pass or Vaccine passport in every countries to even purchase grocery?

Why would young children who are in the process of growing period should be forced to be injected? Their immune system is powerful.

Why do they categorize in between vaccinated and unvaccinated that we have never heard of before and blame on unvaccinated people?

What is the meaning of vaccine if unvaccinated people need to be blamed? Whoever have already gotten this Gene therapy should be protected because of powerful scientists have created this. If they blame on unvaccinated people, their mRNA is not working as being advertised for this past two years constantly.

We have never seen any long term effects yet and all those doctors and scientists and honored professors along with lawyers in Japan have stated that we need to see long term effects on this experimental mRNA Gene therapy. The long term effects take at least over 5 years usually.

Please seriously consider of the matter of the facts. This mandates since the closure included mask mandate and restriction of travels are all unconstitutional in the world wide. When it comes to the human health that each individuals have their different circumstances of health, and if our kids have been forced ever and pushed with this Gene therapy, this is called a part of criminal in the world according to lawyers in Japan.

Thank you for your consideration and your time to read.

Sincerely

Yukari Evins

I am opposed to making COVID-19 vaccination mandatory for school admission or childcare in our State for the following reasons:

1. Kids are at extremely low risk to COVID 19
2. Many kids have had COVID 19 and have natural immunity, this needs to be discussed as a superior immunity
3. The Constitution and Nuremberg Code stops you from making this experiment mandatory.
4. Liberty supersedes fear
5. As a parent of 3 school age kids, I will not back down on this cause. There will be no mandates for my kids.
6. Where there is RISK there has to be choice.

Thank you,

Tricia Cyr

Subject: Concerning proposed policies

External Email

Regarding the proposed policies for the upcoming meeting, I STRONGLY oppose them. To involuntarily detain people over something that has a 99% survival rate is unconstitutional and just not something that should even be considered, purr act of evil.... to mandate kids receive a vaccine that has high risks of myocarditis and teachers having to be taught signs of symptoms of cardiac arrest and yet actual Covid has less effects on them, is not right... it should be parent choice what happens to their children, they are the ones to birth them, raise them, feed them, etc.. they should be the ones to decide on vaccines...NOT THE GOVERNMENT!

NONE OF THIS IS OKAY. STOP THIS INSANITY NOW!

AGAINST THE PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully

vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Subject: Covid Vaccine School Mandate

External Email

Dear Ms. Lindsay Herendeen:

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors (americasfrontlinedoctors.org)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Patty Ballestrasse

Respectfully, Sir/Madam,

I'm writing to let you know that I am uniting with many people in Washington State to stand against the tyranny we are facing.

This letter is regarding the WSBOH meeting scheduled for Jan. 12, 2022.

According to information I have seen on the web in recent days, it appears that WSBOH will be discussing proposed policies that pertain to -WAC 246-100-070, WAC-246-100-045, and WAC 246-105.

You do not have our permission.

You need our permission.

Our kids are not your property.

Our bodies are a temple of the Holy Spirit and is not owned by the government

We are born with free will and we will retain that until death.

Thank you,

Sharlene A. Greene

Subject: Please Oppose injections added to school age children

External Email

To whom it may concern,

I Valentina Harris, oppose the use of law enforcement to be used to detain those who are unvaccinated for covid injections.

We are not second class citizens. Many of us have natural immunity. Also many of us have religious opposition to taking the vaccine.

I do not support adding the vaccine for school age children. The children are not spreading and or dying from covid. They do not pose a threat. We do not have enough long term studies on fertility and overall health. These are experimental shots. They are not safe!! It is against the law to mandate them. You will all be held accountable when children will be having life-threatening injuries and side effects. You will be held responsible. All parents will make sure of it.

These vaccines are not safe. They have never been used on humans before. There has been a filing in the International Crimes Court the ICC by Dr Michael Yerdon

and others for crimes against humanity by pushing this vaccine and with holding life saving treatments. The vaccine is not the only way to combat this virus. Vaccinated still get it and spread it. These do not work, they will only harm the children.

Please Do the right thing and oppose these WACs from being added to laws.

I, Carmen Kaler, am writing to you  
on my behalf and on behalf of many other people in our community. We oppose the  
proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100,  
WAC 246-105

You are violating Washington State Constitution article 1 section 3 and 7 if you continue  
this as it's unlawful.

We are all completely against giving local health officers use of law enforcement and the  
use of an emergency order to involuntarily detain a person or family into a quarantine  
facility if they refuse the requests of medical examination, testing, treatment, counseling,  
or vaccination.

We are all completely against covid-19 injections as part of the school immunization  
requirements using WAC 246-105.

To whom it may concern:

I cannot object strongly enough to the notion of requiring vaccinations for children.

Vaccination is proving to be no panacea for infection, especially with the Omicron variant. When you can get honest data, vaccinated people are now ahead of the unvaccinated in infections and hospitalizations.

Pfizer's CEO has just pulled the plug on boosters. They don't work, and they have significant side effects, some of which are dire. Since the vaccines are still "experimental, we still don't have a good grasp of the long-term consequences. Are you willing to let children bear this risk?

Children are at little risk with infection by Covid 19 – less than the common flu. The risks of lockdowns, school closures, and vaccinations exceeds the risk from the disease. Drug abuse, suicide, and educational abandonment are proving to be more dangerous. Requiring a vaccine for kids is clearly a violation of their health and wellness, as is all of the other ill-advised steps taken by helicopter bureaucrats and educators.

The after effects of these choices made in direct contravention of the science will be on YOU. I hope that someday you will be held accountable. I'm not holding my breath.

Hello,

Please reconsider enforcing the Covid vaccination on school age children. We do not know enough about the long-term effects of this drug to be putting it into our children's bodies. If and when a child gets covid, their recovery rate is way too high to even consider them to be vaccinated. If the teachers are already vaccinated and the vaccination works then what is the reasoning behind vaccinating the children when they are the least at risk? There isn't any. Leave the children alone and keep them in school.

Concerned Mother,

Stacey Eagle

Subject: Public Comment vaccine TAG

External Email

I am writing this to convey my concerns on discussions within health districts on Covid vaccines for our kids. I also am aware of Mead having a proposal and a rejection of the Covid vaccine requirement for their district.

As we know, Covid has shown very little percentage in severity for kids. We also know that in the younger kids the vaccines have not shown effectiveness, pausing the trials at age 5 and under with Pfizer and Moderna, does it make it better for effectiveness for age 6, 7 etc ?

Per the AAP ...week ending 1/6/22

Cumulative Hospitalizations (24 states and NYC reported)\*

\* Among states reporting, children ranged from 1.7%-4.3% of their total cumulated hospitalizations, and 0.1%-1.6% of all their child COVID-19 cases resulted in hospitalization

Cumulative Mortality (46 states, NYC, PR and GU reported)\*

\* Among states reporting, children were 0.00%-0.27% of all COVID-19 deaths, and 5 states reported zero child deaths

\* In states reporting, 0.00%-0.02% of all child COVID-19 cases resulted in death

Many children were admitted for other procedures, testing positive which then counts as a hospitalization.

"The number of young children admitted to the hospital who test positive for the coronavirus rose precipitously last week to the highest levels since the beginning of the pandemic, according to data released on Friday by the Centers for Disease Control and Prevention.

The increase was observed in children aged 4 and younger, who are not eligible for vaccination, and the data include those admitted to hospitals for reasons other than Covid and then tested positive.

The rise may at least be partly explained by the overall surge of Omicron cases, which affects all populations, as well as the spread of other respiratory infections. And officials said there was no sign of an increase in severe cases.

More than four in 100,000 children aged 4 years or younger admitted to hospitals were infected with the coronavirus as of Jan. 1 — double the rate reported a month ago, and about three times the rate this time last year. " Published Jan. 7, 2022

Updated Jan. 11, 2022, 5:12 a.m. ET NYTimes

Partly why we have higher numbers is we have less restrictions and more gatherings with higher numbers allowed to gather. Our very own governor has not canceled concerts or large venues for sports like Seahawks games, if the danger is so concerning why has he not canceled these events? I can guess revenue ...at the same time if we have the vaccines, pills for treatment isn't it time to end the pandemic and our governors emergency state? When this wave is lessened it is time, especially since the quarantine time also was cut.

Many adults chose to get vaccinated or had to for work. This is a layer of protection for kids and for the adults, elderly and workers.

This article talks about natural immunity and the studies done and even the CDC may be reconsidering natural immunity.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Foutlook%2Fimmunity-vaccine-mandate%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4321c6c4bd4a496c4ff908d9d626718a%7C1>

Natural immunity to covid is powerful. Policymakers seem afraid to say so. - The Washington Post

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.washingtonpost.com%2Foutlook%2Fimmunity-vaccine-mandate%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4321c6c4bd4a496c4ff908d9d626718a%7C1>

We see several countries allowing previous infection as an immunity card.

Michigan has allowed previous infection to count .....

"Spectrum Health workers can use natural immunity as vaccine mandate exemption"

BETH LEBLANC | THE DETROIT NEWS | 3:03 pm EDT September 12, 2021

"Spectrum Health will grant temporary exemptions from its employee vaccine mandate to individuals who can prove they have naturally acquired immunity to COVID-19. "

Having had Covid previously myself, we are 56 percent protected against omicron (about the same as vaccinated it seems) and mild symptoms if contracted in many or most cases. We also know that vaccinated are huge break through cases. We had a higher rate of protection against delta.

Pfizer CEO says two Covid vaccine doses aren't 'enough for omicron'

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cnbc.com%2Flive-tv%3Ftrknv%3Dwatchlive&particleheader&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4321c6c4bd>

KEY POINTS

- \* "The two doses, they're not enough for omicron," Pfizer CEO Albert Bourla said.
- \* Bourla said the two-dose vaccine does not provide robust protection against infection and its ability to prevent hospitalization has also declined.
- \* He said third shots are providing good protection against death, and "decent" protection against hospitalization.

Now we must create a new vaccine to help with omicron .

When do we stop and say enough is enough?

The data shows we have a large percent vaccinated, and previously infected...

"Actual Covid-19 case count could be 6 to 24 times higher than official estimates, CDC study shows"

I am not an anti vaxxer. I am a parent wanting more data long term for these vaccines. I waited on hpv vaccines for my kids per my doctor until more data was out. I also know that with a close family relative passing with heart inflammation at 17, I am not willing to have my kids get them, along with their dad having one of the blood clotting factors. I will not risk it.

We also know several countries have preferred Pfizer over moderna due to myocarditis and that some countries have said 25 years of age and younger will only receive one dose to avoid the heart inflammation. Our own cdc has recommended Pfizer over moderna for ages 5-11.

Side effects can be myocarditis, pericarditis, blood clotting, and long term we still don't have the information of what could be an issue in the coming years.

We know the risks when we make the choices. We will live with those choices.

I say this even though our family paid a very high price. Our kids lost their grandparents to Covid, they passed 3 days apart in January of 2021.

Let us make our own decisions in regards to our children, not a mandate or forced vaccination.

External Email

My family strongly opposes requiring the Covid-19 vaccine to attend school. All other required vaccines have had a MINIMUM of 10 years of studying for efficacy, and side-effects before becoming a required vaccine.

The small pox vaccine was first developed in the late 1700's, and was not mandated for almost 200 years later, in the mid 1900's.

Polio took nearly 50 years.

We simply do not know any longterm effects this vaccine will have on our children. I personally know a 14 year old girl who lives in Spokane, who days after receiving her second shot fell to her knees screaming in pain that her heart felt like it was going to explode, while she was playing basketball. She is now unable to play her favorite sport.

There are MANY reports of adverse reactions to the vaccine in children, including myocarditis, seizures, paralysis, etc.

More children have been harmed by the vaccine than have been by the virus itself.

If the vaccine becomes a requirement for school, we will pull all of our children out of the Peninsula School District.

Please do NOT vote to make this vaccine a requirement to attend school, and do not vote for the state to have the power to forcefully quarantine, separate families, and administer vaccinations against people's will.

Listen up Lindsay!

You people WORK FOR US, we are not your subjects! We will never allow you to require an experimental product to be FORCED on our children to attend the public schools THAT WE PAY FOR! THE PEOPLE OF THIS STATE OPPOSE AGENDA ITEM #8 AND WE ALWAYS WILL. You bastards will rot in hell if you try forcing this on our kids. The mothers WILL NOT STAND FOR IT!!!!

As for quarantine camps - SCREW YOU. Will will never comply and neither will the police force that you're trying to weaponize against American citizens. Do you really think you can pull off "Australia" on American soil? THINK AGAIN. The citizens of this country and state will NOT stand for it!!!

The Washington state has gone off the rails. We the people will not allow it any longer! You do not run our lives, you are there to SERVE US. Covid is essentially over, and we're all going to go back to normal, like it or not. You will NOT stand in our way.

We also support agenda item #11, establishing a rule the keep you bastards from requiring an EUA product for school attendance.

Lora B., mother of 3

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Greetings Public School System:

I attended the majority of the online Zoom Meeting yesterday.

My Father was a 35-year hospital administrator, and I have been in conversation with dozens of medical doctors since the beginning of Covid.

Since you represent the "Public School System" I am hopeful you will take the "Public Comments" to heart, in an effort to maintain a level of respect and support.

This is what I concluded from the Meeting and the position I support:

1. People have a choice as to whether or not to send the children to Public Schools and won't do so if you require elements that they disagree with, so if you continue to disregard the best wishes of the parents you will be contradicting your own moral code and working yourself out of a job.
2. After 2 years the Vaccine Program is far from a success. In fact, it has been a horrible failure! Yes, there have been approximately 800,000 deaths in the U.S. over the last 2 years. That number of deaths is far less than the annual deaths previously experienced on an annual basis from colds and flu prior to Covid. We didn't force vaccines or lockdowns from that and we shouldn't force them now.
3. The Vaccine Program has not been around long enough to determine its possible detrimental effects, as it takes 3-5 years to determine. The data on the Vaers website is catastrophic! WHY IN THE WORLD WOULD THIS VACCING PROGRAM BE ALLOWED TO CONTINUE? Anyone have a brain out there and objectively look at the data? Historically, it would have been discontinued after the first few deaths or bad side effects.
4. Children have a very, very, low probability of getting seriously ill from any of the Covid variants.
5. Mandating children to get the Vaccine is illogical, immoral, and is not supported by good medicine or good science.

Sincerely,

Professionally Yours, with Warmest Regards,

Thomas Wolter

Please say no to these continued tactics of fear and control. We cannot control this virus. We need health, exercise, community, nutrition and love.

Pumping children full of experimental drugs and endless boosters, masking smiles and inhibiting a child's right to breathe fresh air. These methods are not working. Please read The Real Anthony Fauci which is a #1 bestseller so you can be informed on what is going on.

Together we can end this by ensuring medical freedom, insuring community and real health - nutrition, fitness, friendship. Enough of fear, propaganda, mandates, concentration camps. Enough.

Thank you!

I am a Washington resident, tax payer and a parent of 3 children in K-12. I watched the meeting via zoom on Jan 12th. The TAG membership positions were posted on your website.

4 of these positions are listed as parent or consumer "covid19 disproportionately impacted community". I will assume this means highly populated communities with high covid hospitalizations and death rates. There are no members listed as minimally impacted communities. Such as the rural low density communities of Eastern WA. Correct me if I'm wrong.

Given the board will make recommendations impacting all of Washington's residents. Why are there not parent representatives from these less impacted communities?

Making a one size fits all policy is not only lazy, but does not follow the "science". Rural communities simply cannot be judged in the same category as urban. Seattle public school district has nearly 56,000 students. Kahlotus school district has 47 students. My children's school district has just over 300.

The DOH should gather the facts from as many representatives as possible including parents from rural districts. Based on this information gathered the board should make recommendations to the districts. Not a one size fits all policy, mandate, or law. Each district should be given the respect and trust to make their decision based on what's best for their community.

I among the vast majority of parents in my community, will not inject my children with an experimental drug. If the covid-19 vaccine is included in the current WAC there will be a mass exodus of children leaving public schools. If Washington inacts this law parents who elect to remove their children should be reimbursed for the tax dollars going to support public schools.

Thank you for your time and consideration,

Gordon Mitchell

Dear Advisory Board for the Washington State Board of Health:

I am writing to protest recommending a vaccine for Covid for school aged children who attend school in Washington State. I am against imposing this vaccine on our children. I believe this to be a horrible overreach of state government.

The Covid "vaccine" is experimental. There have been no studies on the long-term health side effects on children or even on adults. We have never required an untested drug to be used on our children. Making it required to attend public school is criminal and against our constitution.

If you decide to follow through with this abuse of state power, you will be held accountable for the consequences whether they are unintentional or not. You are taking the decision to monitor a child's health out of the hands of its parents. You must then face the repercussions that happen when this trial "vaccine" begins causing health problems way beyond the symptoms of Covid itself.

We do not need this requirement to protect our children or our communities. We need you to consider the constitutional rights we have been guaranteed by our founding fathers to stay free, to live and care for our families and our friends, and our communities based on our religious and moral beliefs.

With respect,

Ron Laycock

I am so disgusted with you and your committee right now! I took time from my life to monitor and listen in on this meeting after being alerted regarding K-12 vaccine mandate discussion and Isolation power for non vaccinated Washington residents. The very First statements made was that these subjects were not going to be discussed and were not on your agenda!!! So, I removed myself from your boring meeting and hung up. Then I find out that 3 hours into discussion, your committee did indeed discuss K -12 in length!!!

Is lying to the public a normal practice with this committee? Why would you state, twice, that you wouldn't be discussing this? Are you afraid of the opposition? Are your decisions so one sided and biased you are closed to outside views? Is truth so foreign to you that is May disrupt your narrative?

Be assured that I and many shall Now make it Our priority to Monitor your every move and let Washington residents know exactly what you say, plan and or discuss!  
You are Not our Gods!

---

I have school age children. Children are at very low risk of experiencing major symptoms, there has been Zero evidence/historical that this "vaccine" is safe for children... AND the "vaccine" doesn't do a single thing to stop, slow or contain the VIRUS strains in any shape or form. It has actually caused medical issues for adults, forcing me to potentially harm my child because "someone" had dirty money friends who want to control every aspect of the state is just morally inapprehensible.

External Email

Hello Washington Board of Health,

I wasn't able to comment publically today, so I would like to share my thoughts in this email. Please consider the following when deciding upon following the status quo and continuing to push the Covid-19 "vaccine" agenda. (I choose to call it an injection because it has not met the criteria of being labeled an official vaccine.)

In an interview two days ago with Good Morning America, Dr. Rochelle Walensky (Director of the CDC) publically announced the following:

75%+ of Covid deaths occurred in people who had four or more comorbidities (people who were unwell to begin with).

She also warned people that Covid-19 vaccinations/boosters would not necessarily prevent people from catching the Omicron variant, but would probably lessen symptoms and prevent death.

She also stated that VACCINATED PEOPLE ARE CAPABLE OF SPREADING THE DISEASE BECAUSE OF SHEDDING. SHE STRONGLY SUGGESTED THAT AFTER AN INJECTION, THE RECEIVERS SHOULD ISOLATE THEMSELVES FROM ANYONE IN THEIR HOMES WHO WERE NOT/COULD NOT BE VACCINATED.

If these things are true (and we're all being told to trust the CDC), then why force these vaccinations on everyone, even the young and healthy?

If Omicron symptoms are mild (no worse than the flu), then why risk the effects of the vaccine? Natural immunity is more protective than the vaccine.

AND IF VACCINATED PEOPLE ARE SPREADING COVID-19, IMAGINE HOW MANY MORE PEOPLE WILL CATCH IT IF EVERYONE (INCLUDING SCHOOL-AGED CHILDREN) ARE FORCED TO GET VACCINATED? CAN YOU IMAGINE THE OUTBREAKS IN THE PUBLIC SCHOOLS? (The only advantage of that would be that the unvaccinated will quit being

blamed for spreading the disease!)

Also, we are constantly being told to “trust the science”. Well, it seems that we are only allowed to trust the “pro-vaccination” scientists, but no one else who might have an opposing view, no matter his/her credentials. For instance, Dr. Robert Malone, who is the inventor of the RNA technology that is being utilized in the injections, has stated that only at-risk people should get the vaccine because tests are showing that this particular vaccine is losing its efficacy as well as mutating into other variants BECAUSE of over-vaccination. This could very well result in what he calls a “virologist’s nightmare” in which the virus mutates into a SUPERBUG (such as what happens when antibiotics are overused) and creates a variant that will not respond to ANY vaccine and will kill millions of people.

The origins of the virus are dubious at the least, and sinister at most. There is ample evidence that China (and probably even America) collaborated on the creation of this virus for global release. China’s motivation is the take-over of America (this is documented) and America’s part (through Anthony Fauci and his ilk) was most likely motivated by money and power (again, documented many times over).

The H1N1 emergency “vaccine” was pulled after only 50 deaths resulted from its use. How is it possible that the Covid-10 vaccine(s), which have caused thousands of documented deaths and injuries, not have been pulled as well? This just doesn’t make sense.

Dr. Umair Shah mentioned that other therapeutic remedies such as monoclonal antibody infusion, are a possible aid to help Covid patients, but are hard to come by because “there’s just not enough to go around”. Last I heard, it wasn’t even legal to get this infusion in Washington state and everyone I know who wanted to use that therapy had to go to Idaho to obtain it. And the same is true with Ivermectin and HDQ. These are harmless medicines, used for many years, which have helped countless people overcome Covid (including President Trump) and yet are illegal to use in Washington state hospitals or to be prescribed by doctors. Hello?

And I also want to point out that when Dr. Michele Roberts was discussing “Vaccine Equity Gap”, she mentioned that “Systemic Racism” might be a factor. Really? Is that really a card you want to play? Get rid of the “woke speech” and stick to the issue. If she has to grasp at those kinds of straws to explain why not everyone is getting the jab, it’s pretty pathetic.

Please consider the above when making your decision to keep pushing Covid-19 vaccines for every person in Washington State. Examine real evidence. Trust true science. Think for yourselves and protect the people of Washington from this insane legislation.

Thank you,

Christine Snow

To Lindsay Herendeen,

What you are discussing implementing today is in violation of our constitutional rights. I absolutely oppose the passing of mandatory vaccines for our children to attend school in this state. Forced vaccination of healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity or is there an ulterior motive? Please do the right thing and do not require these vaccinations for school age children.

I also oppose any forced quarantine for illness especially when it is based on testing that is NOT 100% reliable.

These matters are not for you alone to decide and to do so is to over step your authority and defy our constitution!

Tamera BJ Davis-Ward

I am a retired educator. I learned quite a bit listening to today's WA State Health Board Mtg. Regarding vaccinations, I would like to comment that I believe it should be left up to the parents of children to decide what is best for their health. Also, since we are discussing vaccinations - the 3 "vaccinations" that are being given to people are not truly vaccinations. I am not "anti vaccination". I have had several vaccinations in my lifetime. I have had a polio vaccination, MMR vaccination, a pneumonia vaccination, and a shingles vaccination. Once you get a vaccination, you don't get the disease. However, and in closing, for example, if I received 3 polio vaccinations in a year and still got polio, someone needs to be asking a lot of questions on why the vaccination does not work. The COVID "vaccination" is like a flu shot, not a vaccination.

Thank you for listening to my comment,  
Carmen Sawyer

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org))

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&d>  
> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org)  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&d>  
> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I would also like to denounce involuntary detainment of people at quarantine sites, a completely draconian measure, and completely unnecessary.

Asking individuals to quarantine at home with COVID is perfectly understandable, and just as effective as putting people behind fences. We all know that there is something far more diabolical behind this measure than simply keeping others from COVID. I adjure you in the strong name of Jesus Christ to NOT follow through with this, because each one of you will be answering for this to the King of Kings and Lord of Lords, both in this life and the life to come.

Thank you for your kind attention to this email.

Ernest Quinn

Hello,

As a parent of two elementary age children I am concerned that you are considering mandating Covid vaccines for children in school, and we the parents strongly oppose such a mandate. If vaccines are as effective as they say, everyone should be free to make their own decision. We now can see, after 2 years of living with many restrictions that the spread hasn't slowed, but also the kids have gotten Covid, it looked like a mild cold on them, they quickly recovered and now they have natural immunity. We ask that you would prioritize the good of the children, and their mental health, and rather lift restrictions, after such a long time, many already have immunity to the Covid virus, yet we see mental health and anxiety getting worse in young children, please consider this, and open the schools more, we advocate for local control, down to each school.

Thank you,

~Anca Rowland

Dear Sir/Madam,

I found yet another research that raises my concern around children vaccination. Analyzing recent cases of myocarditis in a California private school, a researcher found that the chance of getting myocarditis is 1 in 95 for boys. As we know myocarditis is a permanent damage to the heart. It is a deadly disease that has a mortality rate of 20% during the first 6.5 years, which only increases over the years. That is thousands times more deadly than COVID for children.

You can double-check the facts mentioned in the article.

The school name is Monte Vista Christian school.

The researcher's name is Steve Kirsch, he is Executive Director at Vaccine Safety Research Foundation.

Here is an article

<https://stevekirsch.substack.com/p/estimated-1-in-95-boys-diagnosed?token=eyJ1c2VyX2lkIjo4OTQwOTcxLCJwb3N0X2lkIjo0NjExMzg0MSwiXyI6IINsNXk5IiwiaWF0IjoxAyJI00-c6ngImS70kYDevCBjSMYA&fbclid=IwAR2bCm6dp8GYJXrijkHiwF5pw26DyzDbwTNoCr2aKOFpDmCNIVKEr0N>

My family, my daughter and son's family, are against this legislation of requiring vaccines for children when normal long term research has not been completed. We are graduate educated, high income homes and families, we are law abiding & science believing- this is the last draw- we will vacate our jobs, the taxes we pay and the state of Washington if this passed vaccine requirement for children is passed and any form of repercussions towards family are legislated. You are not listening to parents, you are not listening to science. You are forcing and causing fear. All safety measures have been followed and you are still just destroying the spirit of the people. We have stayed in Washington State. Have completed all requirements and you just demand more. You are of the people and for the people. Please stop forcing! Please stop controlling! Please represent the people, not the fear.

Subject: c-10 'vaccine' requirement for school aged children

External Email

Dear Board Member,

We have been informed that the WA Board of Health is considering adding a C-19 'vaccine' requirement for school children to the immunization chart.

We are asking that you oppose this consideration because of the following facts:

1. The illness is still 99% survivable. Covid 19, nor its variants, do NOT pose a serious threat for school aged children.
2. The C-19 'vaccine' is NOT effective in eradicating Covid, nor its variants. It is not stopping transmission of this virus and that is the reason immunizations were required in the first place. Is the medical field on the 2nd or 3rd booster now????

Thank you for your consideration in opposing this requirement. It is outrageous.

Sincerely,

Greg and Michelle Quinn

Dear Ms. Herendeen

As I understand, the BOH is considering the issue of mandatory vaccination for school age children.

I, as a parent of 4, respectfully ask that you postpone any mandates till further studies have been done.

There are many scientists and researchers that have concerns about the efficacy and

actual safety of these vaccines. The amount of VAERS data reporting is quite alarming and should be considered in any decision regarding forcibly injecting a vaccine into a population that shows such a lack of actually being at risk of serious illness.

Some of the voices asking questions include:

Dr. Peter McCullough- developed a protocol of early treatment to prevent the seriousness of Covid 19.

Dr. Judy Mikovitz- a leading researcher in the HIV/AIDS field.

Dr. Robert Malone- Chief architect of the mRNA platform technology that is being used for one of the experimental vaccines.

These researchers are highly regarded in their fields and their concerns have been silenced.

The rush to vaccinate the entire population of the United States and the silencing of dissenting opinions, causes me to question what actually is the agenda behind it.

To publicly mandate vaccination for any citizen of the US, is a violation of their civil rights. I do not intend to follow any mandate regarding these vaccines and respectfully ask the Board of Health table this mandate till there is further scientific review.

Thank you

Tony Kearns

I am a parent of a seventh grader at Pioneer Middle School in DuPont, WA. Both my husband and I are fully vaccinated. My husband serves in the US Air Force and stationed at JBLM. Our son has a seizure disorder and has regularly had seizures since he was 2 years old. His dr does not recommend the vaccine for him, and has even offered a mask exemption to avoid triggering an episode; however, I have not taken him up on it since I am deathly afraid of my son being attacked in public by a crazy person accusing him of murder, which I have personally witnessed here. So he wears masks. He follows the rules. But he is a child. He has a disability, albeit not a visible one. He is also PCR tested three times EACH WEEK at his public school.

Education is his right and you are responsible to give him that. His personal health decisions are my responsibility. Encourage the vaccine, please—I am in full support. But do not make it mandatory. It's up to him, to me, and under the guidance of his medical team.

Thank you,  
Amy Einck

Subject: Potential vaccine required for school

External Email

I find it interesting when listening to the presentation regarding the potential discussion on posing the Covid Vaccine as a requirement to attend school that the list of groups to work with to make this determination are all groups that have connection with our governor (DOH, HCA, Superintendent of Public Schools, health care industries, etc). In one form or fashion these agencies/businesses are all controlled by the government and their funding source. Based on this information, it is already clear that your minds are made up and you will require the vaccine for kids to attend school otherwise the governor will make you lose your job just like he has made so many others become unemployed. It is upsetting to see that the public will not be included as giving weight to this and what they feel would be best for their own children.

Subject: NO to mandatory vaccines for school age children

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=0>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be

enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for hearing my voice on this matter!

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. The CDC's own statistics show that children are NOT at great risk of becoming seriously ill from C-19. It has also been shown that those who have received the shot can contract C-19 as well as spread it to others. Long-term studies have not been done to determine potential side effects of the C-19 shot. Requiring that children receive the C-19 shot is unnecessary and unconscionable.

Respectfully,

Terrie Wilder

Dr Pentagrass

If these vaccines are being looked at, why are there inconsistencies between the lots, I've seen the data, Pfizer adverse reaction data ranges basically zero effect to deadly.. There were approximately 30 different mixed lots out there.. Rule # 1 is an approved or authorized vaccine is that the mixture must be consistent throughout.. Where is the transparency and why are they hiding the ingredients.

The public can't trust anything now, Fauci is a proven liar in front of congress about gain of function.. The PCR should have never been used stated by the inventor and completely miscalibrated cycles.. CDC admits just the other day 85% of deaths were other issues.

Why should we believe your science, you censor world renowned doctors, like Dr Peter McCullough, Dr Robert Malone (inventor of mRNA) Dr Zelenko, Dr Judy Mikovits, Dr Sherry Tenpenny, Dr Ardis and so many more..

There is plenty of data showing myocarditis in kids which I saw CDC say it's rare and those cases were mild, there is no mild myocarditis, it's unreparable and the kid will be lucky to live 5 yrs.. Then you have all the neurological disorders. In my eyes the vaccine will kill 100x's the rate of covid..

They are injecting a bio-weapon spike protein gene altering genocide poison.. Basically, over time the spike will multiply and soon antibody dependent enhancement will take over, it's a Gates depopulation agenda.. It is well known and the international Corona team is working with indictments and Nuremberg 2 trial in Poland.. Many of these evil criminals will be held accountable.

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I would also like to denounce involuntary detainment of people at quarantine sites, a completely draconian measure, and completely unnecessary.

Asking individuals to quarantine at home with COVID is perfectly understandable, and just as effective as putting people behind fences. We all know that there is something far more diabolical behind this measure than simply keeping others from COVID. I adjure you in the strong name of Jesus Christ to NOT follow through with this, because each one of you will be answering for this to the King of Kings and Lord of Lords, both in this life and the life to come.

Thank you for your kind attention to this email.

Gwenn Quinn

Subject: Dismissing Petition for rule making

External Email

I am very disappointed that the Board so quickly dismissed the Jan 12th Agenda Item #11, Informed Choice Washington's Petition for Rule making (filed by Xavier Figueroa, PhD, on behalf of ICWA). Protection of our children's health is essential. If the Board established a new rule that prohibits adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list then parents could feel more secure that any medical products they are asked/required to put in their children's bodies had been rigorously tested and proven safe, in the short term and over time. Unfortunately the COVID injections have had no such rigorous testing. They have already caused numerous adverse events in children (as well as adults), and have absolutely no safety data for long term effects. There should be no Technical Advisory Group researching how to implement adding this injection to the list of current immunization requirements for attending day care or school. It is outrageous that anyone is even considering mandating these injections on our children. The Supreme Court just ruled against President Biden's employment vaccine mandate because it is unconstitutional. Mandating this injection on any one is unconstitutional!

Consider the following document about problems with the Pfizer trials:

<https://www.canadiancovidcarealliance.org/wp-content/uploads/2021/12/The-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org/content%2Fuploads%2F2021%2F12%2FThe-COVID-19-Inoculations-More-Harm-Than-Good-REV-Dec-16-2021.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C7ca890e35f2d4faedb2b08d9d6e565c3%7C11d0>>

Parents and citizens are deeply concerned about these issues. While I am glad there was a public comments period during yesterday's meeting, I think that the process was extremely inefficient and needs to be improved for future meetings about these topics. The list of speakers should be ready for the zoom moderator and should also be available to those who will speak so they can be ready when their turn comes. The amount of time they have to speak should be indicated in advance so people can prepare comments that fit into that time frame and not be continuously cut-off. Less time should be spent switching between speakers and talking about how and when they can unmute so more time can be spent listening to people's comments. As you saw, there are a lot of people who want to be heard.

Thank you for your consideration,

-Tera Tagliabue

The powers that be are USING YOU AS PUPPETS. You are doing their dirty work! Do you really want to be instrumental in the United States of America becoming communistic. Do you even care about you children and grandchildren living under communism? This is what you are doing if you support these camps and mandates. You know how many people have died or permanently injured from these experimental jabs. Think for yourself. Don't let these powers think for you. You are in your employment positions to protect America from communism. Are you doing your part keeping Washingtonian free? When you face God on your judgment day will God say "Well done, good and faithful servant?"

You are in my prayers to do what is right for America.

Thank you,

Debbie Baril

External Email

Hi Samantha,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our

children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

Subject: Communicating With Board Members

attachments\6C0465089B0741D9\_image001.jpg

External Email

Good afternoon,

I have a couple of questions to follow up on today's board meeting. I submitted them to the Q&A during the meeting but for some reason I was the only one who's questions weren't answered.

1. Does the TAG get all of the public comments regarding the covid vaccination requirement? ALL 3600 that were received prior to the meeting, those that spoke during the meeting AND any that may be received after the meeting?
2. Who are the members of the TAG?
3. Is there a way to communicate further concerns directly to the TAG?
4. Listening to the meeting today...when discussing the technical advisory group (TAG) that will consider adding the covid vaccine for kids to attend school, the presenter talked about being in the "orange box" of the process. I would LOVE to know how you got past the 1st box that says "fully FDA approved immunization". You are circumventing your OWN board process to push an agenda. A TAG shouldn't have been created, nor should this even be discussed until, and if, the FDA fully approves the vaccines.

Thank you in advance for your reply,

Dena Petersen

In today's meeting we heard that there has never been a reason to use the powers of public health officials, or others, since the inception of this WAC. With that understanding, I would want to know why your board feels that this WAC be amended, wasting taxpayer dollars, from what I hear for over a 7 years time re-drafting this WAC. This seems as though it is a waste of taxpayers funds to simply justify lining the pockets of more government officials. How this WAC was ever approved without uproar is beyond me, and an amendment does not seem justified. In addition there is no trust between the Public and the department of health. Until the board of public health treats all disease efforts the same without discrimination, than this WAC should not be altered. I oppose these efforts. I feel you are using the aids as a trojan horse to manipulate the initiative. This is a waste of taxpayer dollars. Shame on all of you. I recommend that you resign your positions immediately. The language you are proposing is dangerous, and unconstitutional. Not to mention there is no information here on SOVEREIGN rights justified by LAW CONFIRMING TREATIES as in indigenous people. This is a complete overstep of your authority- this is not your role.

Subject: Please Consider the Words of Dr. Malone

External Email

Dr. Malone is perhaps the premier authority on COVID-19 and certainly so on mRNA technology. Please consider what he has to say:

Before You Inject Your Child

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct.

I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases.

Before you inject your child - a decision that is irreversible - I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created:

There are three issues parents need to understand:

- The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including

- Their brain and nervous system

- Their heart and blood vessels, including blood clots

Their reproductive system

And this vaccine can trigger fundamental changes to their immune system

• The most alarming point about this is that once these damages have occurred, they are irreparable

You can't fix the lesions within their brain

You can't repair heart tissue scarring

You can't repair a genetically reset immune system, and

This vaccine can cause reproductive damage that could affect future generations of your family

• The second thing you need to know about is the fact that this novel technology has not been adequately tested.

We need at least 5 years of testing/research before we can really understand the risks

Harms and risks from new medicines often become revealed many years later

• Ask yourself if you want your own child to be part of the most radical medical experiment in human history

• One final point: the reason they're giving you to vaccinate your child is a lie.

Your children represent no danger to their parents or grandparents

□ It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives.

The risk/benefit analysis isn't even close.

As a parent and grandparent, my recommendation to you is to resist and fight to protect your children.

## **WAC 246-100-040**

### ***Opinion Regarding Procedures for isolation or quarantine.***

I find it terrifying to see this happening in our state. It effectively removes our civil and constitutional rights. There is a name for it, a dictatorship. I see us moving toward the same horrors that are happening in Israel, Australia, Austria, and China.

This WAC allows the health department to be judge, jury and executioner based on "their" opinion and assessment? Who should have that amount of power over another individual? No one. What makes the employees of the health department so superior that they know what is best for another person?

I would not want to be the individual making decisions listed in this WAC. I would not even want to know the person who could justify taking the actions listed in this WAC. What is the moral and ethical character of the employee/enforcers? The only persons who could do such work must have a personality that is sociopathic and not with conscience. This can only lead to abuses. It has happened in the past many times.

**10 stages of Genocide-** Perhaps this will be a good reminder of the slippery slope we are on. I believe we are in stage #7 of this genocide and moving towards #8. Please review and maybe you can dismiss this in your own mind, and justify the actions listed in the WAC as just, "Protecting the population." Nothing like being the "Good German."

Dr. Gregory H. Stanton is Research Professor in Genocide Studies and Prevention at the Institute for Conflict Analysis and Resolution, George Mason University, Arlington, Virginia.

1. Classification: People divided into "Us" and "Them"
2. Symbolization: People are forced to identify themselves.
3. Discrimination: People begin to face systemic discrimination.
4. Dehumanization: People equated to disease, vermin, and animals
5. Organization: Government creates special groups to enforce the policies i.e. "Strike team" or police/military.
6. Polarization: Government broadcasts propaganda to turn the populace against the group.
7. Preparation: Official action to remove/relocate people begin.
8. Persecution: Beginnings of murder, theft of property, trials, massacres.
9. Exterminations: Wholesale elimination of the group. It is extermination and not murder because the group is not thought of as human.
10. Denial: The government denies it has created any crimes.

The verbiage of this WAC is vague. What will the criteria be for a health official to issue an emergency detention order? Will it be because the person or persons refuse to take a vaccine? Will it be because they have cold and flu symptoms? Gosh, I have had many of those. Maybe an elevated temp? Will it be because I write a letter against the CDC or FDA? What if I inform others about VEARS, that 21,000 people died because of the vaccine, which only represents 1% of the actual number reported (according to Harvard) or the 1,000,000 who have been injured? Will parents who refuse to vaccinate their children be vilified and the children taken away? There is plenty of words to describe the legal this and legal that, and we all know what a nightmare that would be. Nothing like being placed in a concentration camp or whatever nice word you wish to call it without representation, without committing a crime. Who will be helping the people who are being harassed and terrorized by these health officials? Who will be liable for damages done to people? Emotional trauma, financial loss, physical harm due to forced treatment, no one wants to be liable for the damages they cause. This will equal a crime against humanity and those who participate will be guilty.

This is a pathetic power grab and has nothing to do with public health. **Dictatorship**, form of government in which one person or a small group possesses absolute power without effective constitutional limitations. There should never, ever, be that much power given to an individual or agency based only on sole discretion.

Cynthia Arnett

I am aghast at the completely dictatorial policies that are coming out of Olympia. The fear mongering and the division being caused by unconstitutional policies surrounding this "pandemic" are surreal. Data manipulation, misinformation, and an utter lack of transparency to the people of this country is causing an internal disintegration of our country!! Who benefits from this? Certainly not the people of the USA.

The mandate on a "vaccine" that is not even a vaccine was the first 3 alarm bell going off in my head (perhaps there were others that I ignored - shame on me) but these upcoming proposals listed below are cause for much higher alarms. People will not stand idly by. This needs to stop now!

"I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. Forcing anything on free Americans protected by the Constitution is asking for strife and dissension. We will hold the line against tyrannical mandates and proposed polices that violate our civil liberties and fundamental rights as human beings. I stand with the Constitution - will you?"

If you have any say in this matter, now is the time to speak.

Thank you for your time,

--

Subject: An email from a good Wa.-state citizen 100% against gov't creating & running Emergency Covid detainment facilities in WA state

External Email

Dear Ms. Lindsay Herendeen,

I am a Washington state citizen in very good standing. My husband & I have a two thriving elementary-aged children that we homeschool. Before having children I was a teacher in both private and public schools in this state for 13 years.

I heard today that the Washington State Board of Health will be holding a meeting

on the 12th of this month to discuss and seriously consider the use of Emergency Covid Detainment facilities against state citizens who are exercising their personal rights to not vaccinate themselves and their family members. This is a complete violation of our basic civil liberties & rights. This detainment idea (and the mere consideration of it) must be stopped immediately!

If these plans move forward, we plan to move our of state, immediately.

Alarmed Washington State Resident,

Rebekah Maxwell

rebekahmaxwell74@gmail.com <mailto:rebekahmaxwell74@gmail.com>

I ask that you do NOT consider or even discuss the idea of ever using this idea as a way of treating the good citizens of this state and country, in your meeting on the 12th (or any future meetings.)

What the Board of Health is discussing with the WACs and talks of isolating individuals against their choice is horrifying. What my nightmares consist of. There are so many reasons to refuse testing and to refuse this mRNA injection. Our state leaders have lost their minds if they think taking someone out of their house is for their own good and should be allowed. Seriously, how deranged have the minds of those forcing these laws become? Your board has no right to make laws of any kind that would take someone out of their home or away from their family. Is this Nazi Germany? If you pass these kinds of laws.. people will die. Families will be torn apart. Children will be suffering trauma that is so unnecessary! Do not allow our state to take these communism actions. Stay connected to humanity and do not allow this kind of horrible actions to be taken in our state. No no no. Shame on this board of health for even considering using these laws against its people.

1. Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be

isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

2. Including the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Do not allow these WACs to be used against the people of Washington.

-Concerned citizen.

Subject: Vaccine Mandate for school age children vote on January 12, 2021

External Email

Good Afternoon,

I am sending you what I and my associates have researched and need you to take into consideration when you are making a decision based on politics and not fully looking at the big picture as it relates to the health of our children not just now but for thier future. I EMPHATICALLY VOTE NO TO A VOTE THAT WOULD PROPOSE VACCINATION TO OUR SCHOOL AGED CHILDREN

A Covid-19 vaccine mandate clearly does not pass the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030. I am not taking issue with the vaccine itself, and in fact continue to encourage vaccination in my community. My lack of support for a mandate stems from the following criteria not being met under sections II and III on the list of criteria:

II. Disease Burden Criteria

5. The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

- The vaccine has been directly available to every vulnerable sub-set of the population

for some time.

6. Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or child care setting or activity being given the highest priority. • It is widely proven that vaccinated individuals can and do continue to transmit the virus. We know this because this was the science used to justify mask mandates. Masks are mandated in schools already, regardless of vaccination status, to prevent the vaccinated from transmitting the virus.

III. Implementation of the Criteria 7. The vaccine containing this antigen is acceptable to the medical community and the public.

While the vaccine may be acceptable to the medical community (although we will note that even within the medical community, the vaccine adoption rate was not acceptable enough to preclude a forced mandate), we cannot gloss over the fact that public acceptance does not even represent a strong majority. • Under 51% of Spokane County residents are vaccinated. (srdc.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>) • Less than 40% of kids 12-17 are vaccinated. (srdc.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>) • Only 36% of the entire black community in Spokane County is vaccinated, and it is

reasonable to assume this number is far lower among ages 12-17. A vaccine mandate in schools would disproportionately affect students of color in our community. (srdc.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsrdc.org%2F&data=04%7C01%7C>)

8. The administrative burdens of delivery and tracking of vaccine containing this antigen are reasonable.

• Our administrators and nurses have already given feedback that a vaccine mandate would create an unreasonable and insurmountable administrative burden involving tracking.

9. The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver.

• As stated in the above vaccination statistics, parents are choosing not to vaccinate their children. Forcing them to do so (as with other segments of our society who were coerced under the threat of losing their jobs and livelihoods) does not fall within a reasonable burden of compliance. It does not seem logical to vaccinate a group (ages 0-19) with such a low, even insignificant, rate of hospitalization or death, while claiming that will protect a more vulnerable group (ages 50-90) with a dramatically higher rate of vaccination (between 62%-82% based on age). Thusly, our state would propose forcing vaccination on those who do not need it, to protect those who already have it and/or could easily get it.

The vaccine is widely available to any age group now. Vaccination rates reflect individual health choices that must be protected. We have to acknowledge that individuals can make their own health decisions for themselves and their families. There simply is not a case to be made for forcing someone to get vaccinated to protect someone else who can easily get vaccinated themselves.--

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Hello,

I oppose the quarantine/vaccine mandates.

My understanding is that there will be a Wednesday meeting to discuss, among other efforts, the move to involuntarily detain those who are not vaccinated in quarantine facilities that have been created here in WA state - didn't think we were Australia?

Over the past three weeks, every one of our family/extended family members have all

had the COVID virus = all vaccinated and boosted. It is beyond comprehension that there would be a move to quarantine people who've rejected the vaccines to now continue the misinformation that only the unvaccinated can get the virus.

Hoping that the truth re: vaccinated getting the virus (Whoopi anyone/numerous political figures, etc.?) who diligently followed all they've been commanded to do will put to rest the notion that the unvaccinated are the problem.

Thank you.

I am a K-12 School Psychologist in WA public schools and I strongly oppose:

1. Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
2. Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Isolation and vaccines have not been proven to be safe or effective. I have seen the impact on our children first hand in the schools. A healthy society does not take life from their children to briefly extend the life of elderly. It is time to learn to live with the virus, and focus on early treatment.

Sincerely,

Julie Apeles

To whom it may concern,

I am completely against any of the proposed Covid policies that are overreaching and immoral.

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise

(especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of washington state education is in store if this becomes mandatory.

Best regards

To Whom it may concern,

We are writing this email as citizens of the state of Washington in opposition to using WAC 246-100-070, WAS 246-100-045, and WAC 246-100-040 to force an emergency order to involuntarily detain a person or group to be isolated in a quarantine facility following refusal to comply with above stated laws regarding Covid-19.

We are also in opposition to including the Covid-19 injections as part of the school immunization requirements using WAC 246-105. These vaccinations have not met the required testing time frame, and therefore long term effects are not known. It is also known that the percentage of children seriously affected by Covid-19 is very small.

Respectfully submitted,  
Ken and Tracy White

Hello, Mr. Grellner

I was one of the many who listen with great interest today concerning your health board meeting and the possibility of mandates for covid.

I heard the board members echo that there is no quarantine center in the State of Washington. However, if you look up "Isolation & Quarantine Team Consultant DOH5814 (Dept. of Health) it does clearly state that there is a State Isolation and Quarantine facility (apparently a motel in Centralia) and three full time 24/7 staff. Although the positions due seem to be filled. However, it also states that it is for non Washington State Residents and those who are unable to quarantine at home. I like many today, missed the fine print on who it was for. My Apology.

Link: <https://tarta.ai/j/6XIsKXwBwQhUzTBVHypA-isolation-amp-quarantine-team-consultants-ps2-non-permanent-doh5814-in-lewis-county-centralia-wa-wa-at-state-of-washington>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftarta.ai%2Fj%2F6XIsKXwBwQhUzTBVHypA-isolation-amp-quarantine-team-consultants-ps2-non-permanent-doh5814-in-lewis-county-centralia-wa-wa-at-state-of-washington&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cc11f365cfb564deba39908d9d625a5e0%7C11>>

The CDC also shows a quarantine station at Sea-Tac Airport.

<https://www.cdc.gov/quarantine/quarantinestationcontactlistfull.html#seattle>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fquarantine%2Fcontactlistfull.html#seattle>>

However, more disturbing is what I found again on the Washington Department of Health website. Under Public Health and Healthcare Providers/Emergency Preparedness/Isolation and Quarantine guidelines and forms.

Link:  
<https://www.doh.wa.gov/ForPublicHealthandHealthcareProviders/EmergencyPreparedness/IsolationandQuarantine>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.doh.wa.gov%2FForPublicHealthandHealthcareProviders/EmergencyPreparedness/IsolationandQuarantine>>

According to this, you, or someone in the Washington Dept. of Health, already have policies written for covid voluntary and in-voluntary guidelines using WAC 246-100-040 authority and even have downloadable forms for commitments. If you don't currently have any plans for covid mandates, please explain this!

Respectfully,

Dale Johnson

My comment is... Although you didn't rule on the vaccine mandates and covid holding facilities, you still spoke about rewording your laws and your codes so that you could put these into place in a state of emergency.  
I felt you were dishonest, underhanded and sneaky.  
I spent hours listening to the entire thing.

And I personally know from people who are doing the hiring for these covid camps that they are real and what the intentions are of the state of Washington is.  
The state of Washington is a test spot for the rest of the United States.  
I am fully aware you intend to implement what Australia is doing.  
And though you think we are all stupid and ignorant people we are not.

It pays to know people in the right positions.

Many times during the comments of the meeting today it was spoken quite accurately about the evil of mandating vaccines. For our children or for all of us. I did note how easy it was for you to just cut off people and tell them they were out of time when they had not yet used a full minute. There are many many more of us out here. We will not put up with this tyranny . Not only are mandates evil, but promoting vaccines through propaganda is evil. There were many mentions of vaccine injuries and natural immunity which you just seem to shrug off. Who will be held liable for all the upcoming injuries and deaths caused by vaccinating children with a dangerous vaccine that has been unproven and untested. What about fertility? It was very easy for you to call us all misinformed and dismiss our concerns. But you haven't seen anything yet. You have awakened a sleeping giant. Who will be held liable for all the upcoming injuries and deaths caused by vaccinating children with a dangerous vaccine that has been unproven and untested? You people? What about fertility? It was very easy for you to call us all misinformed and dismiss our concerns. But you haven't seen anything yet. You have awakened a sleeping giant. Don't forget that you might fool some people but you won't fool God. He sees.

Subject: Oppose vaccine mandates

External Email

Good morning,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. I take very seriously the health and care of my kids. I research and analyze the risks and benefits of any medication, vaccine or treatment. This is not something I take lightly.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under

an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. I will not allow my children to be Guinea pigs. The benefits simply do not outweigh the risks.

4. The complete failure to acknowledge the roll natural immunity is another concern I have.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Christina Rulien

I need to voice my concern that it has been brought to my attention some very disturbing allegations . Is it true that there are plans in place to give the State Board of Health power to FORCE VACCINATIONS? And then power to have police arrest and detain people for observing their constitutional right to CHOOSE whether they are vaccinated or not? These allegations and plans are WAY OVER THE LINE of State government. There is so much scientific and medical evidence that Covid vaccines are harmful especially in CHILDREN. It is the Parents ,for children ,and adults individual right and responsibility to CHOOSE their health care. I am watching and holding each individual in Government responsible for their vote and position on this issue.  
Sincerely

Hello,

In so far as you touch upon the upcoming state health decisions, I am emailing to urge you to resist policies that restrict the rights of un-inoculated people or anyone due to COVID. I refer specifically to the board's scheduled discussion on the 12th, proposing to allow involuntary detention of people who refuse to get the shot (WAC 246-100) and proposing to require the shot for kids going to school. Let me refer you to our state constitution, Article I, Section I, which says that "all political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights." Consequently, an unelected board trying to dismantle the rights of people who do not consent to the shot is in violation of our Constitution, Article I, Section I. Additionally, you would be in violation of other sections, for example 2, 3, 4, 7, 10, and 11. These are in accordance with natural

law and morality. The sooner all this overreach from state leaders ends, the better. The power is with the people, and we see what you are doing.

Best,

Tova Forman

/

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will. Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Lynn Landstrom

Washington State Board of Health,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Let's restore some common sense and civility to our situation. There is no need to be using mandates and strong arm tactics on citizens of Washington.

Thank you for your consideration

A Veteran and Voting Citizen of Washington

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. Forcing anything on free Americans protected by the Constitution is asking for strife and dissension. We will hold the line against tyrannical mandates and proposed polices that violate our civil liberties and fundamental rights as human beings. I stand with the Constitution - will you? I stand with the Word of God:

"Praise the name of God forever and ever, for he has all wisdom and power. He controls the course of world events; he removes kings and sets up other kings. He gives wisdom to the wise and knowledge to the scholars. He reveals deep and mysterious things and knows what lies hidden in darkness, though he is surrounded by light."

□□Daniel 2:22□□

Whether you stand with the Word or not, It's Everlasting, Unshakable, and pierces the soul with Truth.

I call on you to represent the population of those whom you swore to be a voice for and reject all such aforementioned policies.

"Speak up for those who cannot speak for themselves; ensure justice for those being crushed."

□□Proverbs 31:8□□

"Ensure justice" - isn't that the key to the position you are in?

Kind Regards,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org))  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Attention WSBOH members,

Thank you for running the Zoom meeting today in the manner that many people could comment.

Please add this email to the comment section. There are the two topics that heavily concern me as parent and citizen of our state. Even though it wasn't considered today...

Why on earth is there a WAC 246-100-040 <tel:246-100-040> already on the books that authorizes local health officers to immediately detain and vaccinate anyone who is even suspected of being infected with any communicable disease? Is this true, in the event the "suspect" does not submit to testing/treatment/vaccination, etc.??

This smacks of the worst kind of rejection of medical and personal freedom that we cherish in our country. This is not okay at any time, including an emergency. Please use your position and influence to suggest change to this ridiculous WAC immediately.

Also with our kids being at such low risk of serious infection or illness from the covid virus, there is no scientific reason to put it on the schedule. The only reason we can see is financial.

Please protect our community and stop with the push for vaccines for the thousands who have natural immunity already.

Sincerely,

Dj Duff & family

)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Look inside your soul and do the right thing.....DO NOT require these vaccinations for school age children.

In regard to allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families)

to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040):

- This not only violates the Washington State Constitution, but the right to Religious Freedom protected by the 1st Amendment and the right to Privacy in 4th Amendment of the United States Constitution.

- Therefore 37 or 39 County Sheriff's have signed a letter, pledging not to enforce any involuntary removal of private law-abiding citizens to a quarantine facility.

Science does not support the notion that unvaccinated individuals spread the virus any more than vaccinated individuals, nor do our laws permit us to segregate and discriminate against people for refusing a medical intervention.

- Equal Protection Clause of the 14th Amendment to the U.S. Constitution and the Civil Rights Act of 1964.

Masks, in the words of an FDA physician, are little more than "facial decorations" and have no impact on the spread; yet they are mandated for adults and children. This is not American in any way and the truth will come out.

Those who are hiding their heads in the sand from the facts and science of this so-called pandemic (In the Washington State Flu Season of 2017-18 the death rate was 11%, while the Covid death rate in the State of WA thus far is 1.1% according to government sources) will be held accountable for being on the wrong side of history.

No mandate can be followed that violates human rights of conscience and autonomy.

- There is zero evidence indicating that unvaccinated individuals or free breathing individuals are a threat to the vaccinated and masked.

- And like children, when the 99% of adults who contract the virus, survive it and recover, they too have natural immunity which prevents us from contracting or transmitting the virus again.

There has been time enough to find out the truth about what is going on with Covid, and there is no excuse for these draconian measures to be inflicted on citizens anymore. Each of you have been entrusted with making important decisions about the Public Health of our state and each of your credentials qualify you to serve on this board. However, as

Government employees, you are public servants who answer to the Sovereign Citizens of this state & this country, the taxpayers who fund your department & your salaries. You work for us.

I pray for each of you to do the right thing by rejecting these Unconstitutional Mandates and respect the Individual Liberties of every Washington State resident that are guaranteed by the Bill of Rights in the United States Constitution and the Washington State Constitution.

Sincerely,

Brady LaMotte

Subject: Upcoming WA State BOH Meeting-January 12-2022

External Email

To Whom This May Concern:

It has been brought to my attention, as well as thousands of other concerned WA State citizens, that there will be a meeting with the BOH on January 12th, at 9am to discuss the following possible implementations:

\* Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families)

\* to be isolated in a quarantine facility (WAC 246-100-045)

\* following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

\* Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I not only strongly oppose this proposal, but I will die on this hill fighting it. There is NO way my family, or myself, will not put up the fight of our lives to protect ourselves from this tyranny. You are asking for a civil war.

Bullet Point #1: You do not have the manpower to detain the amount of people that you are suggesting. The unrealistic idea that local law enforcement, which is already struggling to maintain active officers, is ridiculous. You are putting law enforcement at risk for endangering their own lives, as I know civilians will not comply. It will be ugly.

Bullet Point #2 and #3: Isolating persons/families in quarantine facilities. Are you joking? Washington State's population has outgrown this state and its services YEARS ago. Do you even know the percentage of people that are unvaccinated THAT ARE NOT GOING TO GET VACCINATED? If we haven't gotten vaccinated now, we won't EVER! There are so many personal reasons to not be vaccinated. I have a plethora of health issues that put me at high risk of dying or being permanently disabled from ANY vaccine, yet alone, an MRNA experimental one. I also have religious beliefs that I strongly hold, in which this completely goes against. You have NO RIGHT to force bias examinations, testing, treatment and counselling. So, in counseling, you mean brainwash? Propaganda? Do you hear what you are proposing?

Last Bullet Point #4: CHILDREN ARE NOT AT RISK OF DYING OR BEING INJURED by this COVID virus! This virus has already mutated to hardly anything. We are at the herd immunity level in which all of this seems futile even more. If everyone has already gotten this virus, why are we having talks so late in the game? I feel there is something more nefarious going on since death rates are going down at an alarming rate.

My final thought. Be afraid. If this goes through, you will not only see the biggest mass exodus of this state's history, but you will be declaring WAR. You have been warned by the unvaccinated people of Washington State.

Sincerely,

Stacy Brebner

Good morning,

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. I take very seriously the health and care of my kids. I research and analyze the risks and benefits of any medication, vaccine or treatment. This is not something I take lightly.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under

an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. I will not allow my children to be Guinea pigs. The benefits simply do not outweigh the risks.

4. The complete failure to acknowledge the roll natural immunity is another concern I have.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Christina Rulien

I have been made to feel at every turn that I and my children are under attack. Whether it's psychological with seeing masked faces everywhere, physically with forced vax/mask mandates. I will never put your child in public school, and I am advising my entire sphere of influence to do the same.

And the government and media gaslighting me to make me feel like a crazy conspiracist when everything they've said won't happen DOES happen!

On Wed, Jan 12, 2022 at 10:51 AM Joshua, Amanda Villalobos <jandavilla1618@gmail.com <mailto:jandavilla1618@gmail.com> > wrote:

\* There are many children who have received the covid shot that are now getting myocarditis as a result from the shot. This is causing severe problems in otherwise healthy children. This is heart inflammation.

\* Even though vaccinated, even with boosters, adults and children are still contracting, and spreading Covid-19 to those both vaccinated and unvaccinated.

\* Pfizer and Moderna are messing with the menstrual cycle of many women – we are still unsure of the permanent side effects of this. I'm talking on behalf of my friend who's a school teacher when I tell you that she I received the shot as a teacher because She had the choice of getting vaxxed or losing her job (single parent, this would make a result in losing her house as well). (WHICH IS NOT A CHOICE IT IS COERCION AND GASLIGHTING!!) she is now having severe arm pain. Headaches, nausea and erratic, unpredictable, heavy non-stop menstruation as a result of the vaccine even months later!

\* It takes many years for a vaccine to be fully tested, and now they are already trying to offer boosters on a still new and unknown shot. This should not be FORCED on children. It should be a choice! I in no way want my children to have this happen and risk their fertility and future choices.

\* The covid-19 virus keeps changing and having new variants that are not phased by the shot. Therefore, we are giving children shots with severe and unknown side effects that are not even helping the children (or adults) fight off the virus. As It continues to mutate.

\* Shots SHOULD NOT BE MANDATED FOR SCHOOLS – it should be a parent's choice. Without you gaslighting us!!

\* LEAVE OUR CHILDREN ALONE!!

We will not stand for this!! We will not tolerate this!!

Subject: Re: mandatory vaccinations for children

External Email

Hello,

I am writing to say that I oppose mandatory covid-19 vaccines for children in schools on scientific and religious/philosophical grounds. To force this issue on families will cause a mass exodus of children from the public school system.

Scientific: My children were already infected with covid-19 at least once and thankfully suffered no more than a slight headache for half a day. At a recent appointment with their pediatrician he said the primary reason I should vaccinate them now is so they can participate in sports/activities without having to quarantine if exposed to covid. This, to me, is not a sufficient reason to give my child a vaccination. Nor do these restrictions seem to be grounded in the statistical reality that both vaccinated and unvaccinated are coming down with the omicron variant with little distinction between them.

Religious/philosophical: I hold a strong conviction that to purposely give my child something they don't need that has the potential to harm them is not only irresponsible, but borders on gross negligence. Furthermore, if my God convicts my spirit not to do something, then to do it is sin. In this particular case, if covid vaccines become mandatory at my child's school I will be forced to take them out and homeschool them. To do otherwise would be to compromise my sincerely-held convictions. I would much rather they stay in school, where they are thriving members of their community, than have to keep them home. But I will not give them a vaccine or medicine which has little to no potential benefit to them, and can potentially cause harm. I know many families and staff at my child's school feel the same way.

Financial hardship of families: If I am forced to homeschool my children it will mean increased financial hardship for my family as I would need to quit my job or at least cut back my hours significantly. We already rely on free school lunches and medicaid, and this would require us to seek more help from the state to make ends meet. A vaccine mandate for children means families choosing between their convictions and a stable income.

Please don't force these tough decisions on families and schools, who are already struggling for proper education of students in these trying times. Please don't force more parents out of the workforce to educate their children in a nation where the workforce is already limited. Please re-think ill-suited covid restrictions that do not meet the current challenges and realities of the omicron variant.

Side note: I had family visit recently from Massachusetts. They and their children are all vaccinated and have been extremely cautious throughout the pandemic due to immune deficiencies and other health issues. They support the CDC and follow all guidance to a "T". When they heard about the draconian covid rules here in Washington State, especially in King County, they were appalled. "No wonder you're all upset over here! I'd be upset too!" It's time for Washington State to turn toward common sense in all this, don't you agree?

Thank you for your consideration,

Alicia Caouette  
East Wenatchee resident

Our school district commented that they can not require COVID vaccination. Washington State Department of Health can. Please consider making it a Washington State rule to require COVID vaccination for all students attending in-person. Districts have options and access to remote education for those who do not want to participate. Much like polio, mumps, etc, the State can enforce a vaccine mandate for those attending school. COVID is a highly transmittable disease that can kill. Let's treat it as such and stop the spread. While youth are not likely to die, their parents and grandparents are.

Subject: Don't add more diseases to any wac!!! Stop internment plans. Respectfully requested by a long term resident of Wa State

External Email

WSBOH,

Please do not add more diseases to mandatory isolation policy to restrict and place people in any kind of quarantine camp. We need to study the options of approach for covid. Alternate therapies allow for early treatment of covid-19. Most of my family has self treated for covid. We have survived and helped each other with alternative options when the medical profession was forcing us to drink the koolaid. WE should have been assisted by our Drs to have our own choice. If a portion of the population wants to risk taking the vaccine and perpetrate that on innocent children the Constitution protects their right to do so. It should be a given that our rights, the rights of those choosing to not vaccinate are also protected. I contacted covid and am resistive to covid before the vaccinen was released and I Thank God I was given the opportunity to research other options and avoid a vaccine that has killed so many and maimed innumerable others. Hiding statistics is evil. Misleading the American citizens is disgusting. Treatment modalities that kill is criminal.

The mandates and any kind of restriction of human choice through wsboh manipulation is as with HIV a violation of the Constitution and our basic human rights. This country allows the taking of human life deliberately through abortion and then hypocritically places restrictions on human choice for medical treatment. You have been complicit in the denial of alternative choices with approved meds. When countries and Drs have been successful in saving lives you bury it in your propaganda. May God forgive you and may we all protect our Constitutional rights!!!! Government overstep is rampant in this country and propaganda is out of control. The profit margin to push to perpetrate the vaccine on all and blatant disregard of alternative successful therapy sickens me. So many blindly following the propaganda have annihilated the rights of good people. People have lost their jobs, or have been forced to move away from destructive Liberal Leftist policies. You ridicule those that wish to protect a human life in the womb and then persecute those wishing to protect their God given rights protected by the Constitution. You are destroying the Republic of "WETHE PEOPLE" Stay within your boundaries!!!

Subject: Mandates in WA State

External Email

To whom this may concern,

I am concerned with the recent proposed Covid 19 policies in WA State. I believe it's unconstitutional to force vaccines on individuals and children. There hasn't been enough research on children and on how these boosters are affecting long-term health. Vaccinated individuals are still getting covid-19 and this new variant is not as deadly as the previous. Not only is this vaccine the most dangerous that has ever been on the market (per VAERs report) it doesn't stop transmission. Due to these mandates, many healthcare workers have been fired and now hospitals are understaffed and returning to work with mild Covid like symptoms. Local hospitals in the Vancouver-Portland area are allowing vaccinated employees to return to work five days after a positive covid test with mild symptoms while they fired healthy unvaccinated workers. This is placing patients at risk that are already not feeling well.

There shouldn't be a covid vaccine mandate with the health risks associated with the shots. Also, I know more people who are vaccinated that have gotten covid than unvaccinated. Most unvaccinated individuals I know are very cautious and wear their masks and avoid public gatherings. Also, WA State is completely ignoring natural immunity and how more effective it is against COVID. What happened to medical choice? We should be able to make our own medical decisions regarding our own health.

Also, how do you explain the WAC 246-100-045? In the zoom meeting, you shared that you won't be forcing people into quarantine facilities but your WAC policies, they indicate that healthcare officers can quarantine people against their will.

Thank you for your time,

Anna Maduta

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with

facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

Washington State Board of Health

RE: Public Input, WAC Rules: 246-100

Wednesday, January 12, 2022

Dear Washington State Board of Health Members and Members of WA State Health,

In lieu of not presenting in person on the matter of involuntary medical detention, funding and rules for involuntary detention camps, I am submitting this article of public input towards the premise of WAC Rules 246-100. I would like to register my formal opposition to this work.

Typical to the times, Washington State overgoverns in an area where no one has any control whatsoever, like the COVID-19 virus, and undergoverns active physical threats to personal safety, like a permissive attitude, legalizing drive by shootings or lessening sentences for attempted homicide in Seattle.

Of the issues of concern of course, is overgoverning to the point of repressing American civil liberty, guaranteed by the US Constitution, so Jay Inslee can placate Canada and aspirational Canadians and other locals who identify with modern communitarian Asian democidal despots, like Xi Jin Ping and Pol Pot, and who cast regular dispersions on US liberty, deferring to authoritarianism as an American government standard.

Locals cannot flee this State fast enough. I am seeing it in real time.

It is over excessive grabs on individual bodily medical rights where the public does not directly benefit. Medical technocrats with bad, unconstitutional policy are going down a hole of government excesses to imprison people for being unwell. Nowhere in America, has this medical distortion been so evident or been given such license to trample normalcy, as in Washington State. It makes it very very hard to care about this State or care about the fate of overtly compliant people who will become victims of government abuses the longer they choose to stay.

This is not being tolerated. The International Community is deciding the fate of their own nations based on faulty given medical information from the WHO, the PRC and Dr. Anthony Fauci for NIAID. After a certain number of dead misattributed to the COV-2 Sars coronavirus, no one is quite sure of facts and medical mandates are not appropriate

given faulty or incomplete data. I say incomplete, because this State has not completed its panel for identifying positive human immunity, naturally regenerative immunity given bone marrow memory of T-cell manufactures.

To recover from COVID, and to be fine in all ways with good health, has been discarded in exchange for abuse of the office, abuse of appropriated tax resources with ESD fraud, inflationary symptoms, subsequent unrest, price gouging and more. All of this occurs, in vain sacrifice, so this government can compete with autocratic regimes, like Canada, who repress what would be American 1st Amendment guarantees to better model a nation State that can kill its own citizenry and detain them for religious and political crimes in [Uighur] detention camps. So close to herd immunity, 3 years in, such a law is transparent. It shall not be legal.

Detention facilities are prisons. Prisons where the detained are forcibly raped, used for medical experiments and stripped of their humanity. This should not be an aspirational goal of any governing body in the United States, much less the State of Washington.

These detainment repressions are sure violations of Geneva Rules and human rights conventions. Dr. Fauci has become some sort of cause celebre in the Hague this week as health and human rights advocates filed petitions for International war crimes indictments. These would be bio-weapons war crimes against our U.S. Gain Of Function signatory, who launched this plague onto the world.

Almost 1 million Americans are dead from ego-based government where people test the limits of corporatized authoritarianism in the West. Fauci and the CDC chose cupidity, arbitrary government rules over cautious protection of the weakest and most prone in our society. They did this by not provisioning therapeutic treatments for the sick and by disinterest in who is well enough to continue in wellness after recovering from the disease.

If you need to detain someone, detain actors and policy makers from the Peoples' Republic of China, their medical advocacy delegation and CDC members who actively contribute now to bioweapons manufacture in the State of Washington. Detain the policy tank autocrats who found an author for this proposed law, because they are anathema to US law.

The federal government has made no such attempt to coordinate an involuntary and coercive element so odious as involuntary detention. I suggest that you immediately scrap all intended forward moving action on this detention and review all coordinating public policy for human rights and ethics conformance with US federal law and International law.

Thank you for you considerations at this time.

Sincerely,

Sheila Dean

Subject: Jan 12, 2022 - WA Board of Health Meeting - Question

External Email

To WA Board Members,

My name is Tamara Zenobia, and I am the owner of Inner Guidance Healing Arts Studio & Gallery located in Seattle, WA. I am writing you in regard to your research with the Corona Virus, COVID-19 and its variants. I attended the WA Board of Health meeting this morning to discuss this issue this morning regarding the mandates.

I have created a tool using principles of Sound Healing that has been proven to have an effect on the virus in terms of an alternative to Vaccine. So much research has been done on sound healing and its effect on disease within the human body. It has been said that Sound Healing and Vibrational medicine is the future for pathology and medical treatments.

As a gifted Vocal Sound Healer, I work with people globally to support their healing needs with Sound healing. I truly believe in my work and that it may be a source of help in finding a long term and complete solution to the Corona Virus and its variants. I would love to have access to a lab or to work with researchers who would be willing to investigate my work. If it is proven via the normal scientific methods that it works I would like to know how to make it more readily available to people.

I would like a recommendation to a research lab that would be willing to take on the task of testing my alternative solution using Sound Healing to cure COVID. We need to bring peace back to our communities and restore trust. Please do not ignore this plea for alternative research. I want to support solutions and alternatives to the vaccine that could bring our communities back to life and order.

Kind regards,  
Tamara Zenobia,

Subject: public comment for natural immunity verses covid 19 injection.

External Email

I was listening to the meeting. I was concerned that the speaker on the vaccine immunity stated that the covid 19 injection immunity was longer lasting and better than natural immunity. This is so untrue. I have read many studies, which have been peer reviewed, that show that natural immunity is robust and long lasting. There have been scientific studies with the SARS cov1 which show that the recovered have immunity after 17 years against the first SARs virus. You would think that this will hold true to SARS 2.

If the injections were so good at achieving longer immunity, why are boosters needed? Also, the injections only give protection against the spike protein, while natural immunity is against all the proteins on the virus.

You are losing public trust in many areas; one area of lost trust, is due to the mandates for the injection tied to losing freedoms. All this is so wrong. No one should be forced or strong armed into taking an injection or lose their freedom or job. Many people were fired during the health care and state worker mandate. Many nurses are having trouble with burn out than needed because of the stress of the mandate put on them. They were forced to choose between their job or health. Why did you guys do that to our health care workers?

Another area that you are losing trust in is when you shut down someone with an opposing opinion. What is the motive? You are shutting down well respected scientist and doctors, who are specialist in the virology and epidemiology some of them from Oxford, Harvard and Yale.

You have also blocked doctors from using Ivermectin and HCQ all which have plenty of peer reviewed studies that show their effectiveness against Covid 19. These medications are safe, cheap and have been on the market for years. Even if the medications helped a little the patient should have a right to use the medication if prescribed by their doctor.

I am also very opposed to the detainment camps and the authority given to public health care works to use law enforcement to detain people indefinitely. This is wrong. In history when people are put into detainment camps things did not turn out well for the detainee's and the public authorities became tyrannical.

Thank you for your time  
Vanessa Nichols

Subject: STOP VACCINE MANDATES

External Email

The data on harms to children from the experimental gene therapy injections are mounting every day, including myocarditis in boys. You are well aware of the high incidence of the myocarditis and you are still driven to put this in every arm. The vaccines have failed. You are now more likely to get Covid, especially Omicron, if you are vaccinated than if you are not vaccinated. This must stop. It is no longer about Covid or injections.....this is about God given rights guaranteed in our Constitution. Stop the insanity.

In the medical slides showing statistics of hospitalization among vaxxed vs unvaxxed I am curious if you are taking into consideration any underlying conditions for hospitalization? Dr Fauci himself said that children and others may be in the hospital for a broken leg or some other medical reason but if they test positive for covid they are entered into the database as a covid case.

Are you tracking and logging adverse affects in any age group to the vaccine?

Is it true that Washington state is giving the antiviral treatments to the vaccinated who test positive with Covid but not to the unvaccinated unless they can show they have underlying conditions? If so what is your reasoning for that and why should there be such a discrimination against those individuals and isn't that perhaps driving up the hospitalization and death rates for those people?

I feel our mandates have done much to prevent the spread or hospitalizations. For almost two years we have been under some kind of control and nothing we have done has prevented this from spreading . Our entire family is vaccinated and all got Covid. Sometimes twice. One member of our family has developed Myocarditis who was a very healthy individual prior to getting the vaccine and virus after. Why is WA supporting these mandates constantly that prohibits and discriminates ? It is hurting business and growth. Why is WA not acknowledging that natural immunity is real? Why are they disregarding basic human rights of individuals to choose for their families whether they vax or don't vax? Why are we promoting division and discrimination when both vaxxed and unvaxxed can get the virus and spread the virus?

I feel we are leaving out a lot of data and just listening to the government and not being responsible in giving information and making rules. I've seen hundreds of first responders out of work here in WA and I think that it is aggregious and irresponsible for us to discriminate against them for a choice . Why does WA believe this overreach is okay?

I hope all of you honestly believe that you are working for your family and friends and making decisions that you all will be proud of in the legacy you leave.

I'm worried that some of you are not willing to take all things into consideration and be a state that honors freedoms and values that our forefathers established for us. I think gut checks and mirror checks are in order when trying to move your agenda into law.

We the People of WA are getting pretty tired of all of this and most of us have had the virus and survived . Let's move on.

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

---

I am a concerned citizen that lost my job on 10\18 for not getting the experimental vaccine. Mandates and proclamations are not law. Having the BOH determine law vs going through the legislative process is not right or judicial on many levels. I don't appreciate the lies that continue to push an agenda. Today's meeting feels like another smoke screen for our fate that has already been determined in the above permanent WACs. This meeting is to TAG these WACs with Covid language. The truth is that the WACs are so loosely written that it includes anything the government wants to do to the people. It would be a breath of fresh air to see the BOH and the DOH stand up for the people.

To whom it may concern.

We do not want vaccine mandates for children. Even if a vaccine is safe, it isn't up to the state to mandate and determine what is injected into children or even adults for that matter. Families have the right to make an educated decision of what is best for them and their community.

Thank you for taking the time to read my comment.

Subject: Comments to the Board of Health

#### External Email

I am a resident of Spokane County. My professional background includes many decades of work in various public safety and emergency management roles. I am attending virtually the Board of Health meeting that is currently in recess for lunch. I was one of the nearly 7,000 who did not have an opportunity to provide comment this morning.

I appreciate the work you do as members of the board and am grateful that you bring your expertise to this endeavor. Because of my experience, I'm aware of the level of commitment required of you and I am particularly grateful during this period of COVID that you are making contributions that most of the rest of us are not qualified to make. We have to trust your knowledge, wisdom, and judgment, and I appreciate that we're able to do so. I'm as sincere in this gratitude as I am in the concerns I'll share below.

As Dr. Shah mentioned more than once this morning, COVID has presented on-going and numerous challenges to probably each of us (maybe each of us around the world). I believe that much anxiety, anger, and criticism in our society comes from what seems to me, and apparently to many others, to come from incomplete, inconsistent and conflicting messages from experts we would like to trust. These conflicts and inconsistencies occur from one statement or comment to another coming from the same person, as well as conflicting information provided at a given time by different experts.

To use a currently popular term, we're neck-deep in an "information salad", and many ingredients in this salad conflict with each other. This is, in part and in my opinion, partially due to the media's breathless efforts to keep us attentive to their product. Many in that business don't clearly articulate the point they're trying to convey (or they don't care about accuracy as much as do the rest of us, so they say what keeps our attention at the cost of accuracy and completeness).

The concern of many citizens about the Board of Health's potential work to enable forced detention in isolation/quarantine facilities through the use of superior courts and law enforcement is an example of possibly unclear information being provided by the media and perhaps by experts who certainly have the facts of the matter. Earlier this week, an NBC affiliate announced, "Washington Board of Health says they will not enact mandatory covid-19 quarantine during Wednesday meeting". (emphasis added)

[https://www.nbcrightnow.com/news/washington-board-of-health-says-they-will-not-enact-mandatory-covid-19-quarantine-during-wednesday/article\\_7fdeebca-727b-11ec-a1ad-8760e3f062f5.html](https://www.nbcrightnow.com/news/washington-board-of-health-says-they-will-not-enact-mandatory-covid-19-quarantine-during-wednesday/article_7fdeebca-727b-11ec-a1ad-8760e3f062f5.html)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbcrightnow.com%2Fnews%2Fboard-of-health-says-they-will-not-enact-mandatory-covid-19-quarantine-during-wednesday%2Farticle\\_7fdeebca-727b-11ec-a1ad-8760e3f062f5.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce607cf7cf4e04830c3c908d9d61277e3](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nbcrightnow.com%2Fnews%2Fboard-of-health-says-they-will-not-enact-mandatory-covid-19-quarantine-during-wednesday%2Farticle_7fdeebca-727b-11ec-a1ad-8760e3f062f5.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ce607cf7cf4e04830c3c908d9d61277e3)>

At the beginning of today's meeting, Mr. Grellner similarly assured attendees, with a healthy dose of repetition, that school vaccine mandates and forced isolation for positive tests or for the unvaccinated are "not on the agenda today". (emphasis added)

I was tremendously relieved to learn that forced isolation was not on the agenda today, but I'd be infinitely more relieved, impressed, and grateful to learn that this won't be on the agenda ever. Do we who are concerned about this unconstitutional overreach need to worry about it coming up again, or was this merely an unfortunate lack of specificity?

For the record, I believe forced isolation to be unconstitutional when associated with COVID because of the exceptionally low (and falling) death rate, the ability to focus transmission-controlling measures on those most likely to experience the gravest outcomes, and because measures and therapeutics likely to have significant and substantial positive influence on outcomes have yet to be utilized. Perhaps I'll elaborate on these matters another time, but for now, if y'all could kindly be careful about qualifiers in your speech, many of us would be grateful for that. On the other hand, if Mr. Grellner's intent was, indeed, to convey that today's not the day to discuss the forced isolation facility issue, then most of us will have one more challenge that will cause us stress, anxiety, and anger.

Sincerely,

Steven G. Turcott

Thank you all for taking time to read and review the letter and references which are all attached on this email as we all care so much about the children. You are all embarking on a critical mission with potential grave consequences and we, the public, are deeply troubled and getting involved. Many of us are taking a great deal of time to carefully consider this issue and respond with our voice.

# What the VAERS Data Tell Us About COVID Jab Safety

Analysis by [Dr. Joseph Mercola](#) ✓ Fact Checked

## STORY AT-A-GLANCE

- › The U.S. Vaccine Adverse Event Reporting System (VAERS) is among the best adverse event data collection systems in the world, but it's antiquated and difficult to use. Still, it's a good way to detect safety signals that weren't detected during premarket testing or clinical trials
- › There are unmistakable, unprecedented safety signals in VAERS for the COVID shots. While the U.S. Food and Drug Administration and Centers for Disease Control and Prevention claim no deaths can be attributed to the COVID jabs, it's impossible to discount 8,986 deaths in the U.S. territories alone, reported as of November 26, 2021
- › The estimated underreporting factor for COVID jab injuries in VAERS is between 31 and 100, so the actual death toll in the U.S. could be anywhere from 278,500 to 898,600
- › There's a strong safety signal for female reproductive issues and for heart inflammation (myocarditis) in young men and boys. VAERS data show an inverse relationship between myocarditis and age, with youths being more frequently affected than older men
- › VAERS data are being deleted without explanation. Each week, about 100 or so reports are routinely deleted, so there are now thousands of inexplicably missing reports

Jessica Rose, Ph.D., a research fellow at the Institute for Pure and Applied Knowledge in Israel, has taken a deep-dive into the U.S. Vaccine Adverse Events Reporting System (VAERS), and in this interview she shares the details of what she's finding.

VAERS, despite flaws and drawbacks, is one of the greatest tools we have to evaluate vaccine safety. It was implemented as a consequence of the 1986 National Childhood Vaccine Injury Act. While vaccine companies were given blanket immunity against liability for adverse reactions under this law, VAERS was created to collect injury reports in a centralized database so that the post-marketing safety of childhood vaccines could be monitored.

The system was actually launched in 1990, so we have three decades' worth of data to compare trends against. Granted, vaccine injuries are notoriously underreported. Investigations have found only 10%<sup>1</sup> to as little as 1%<sup>2,3</sup> of injuries are reported.

When it comes to the COVID jab specifically, calculations<sup>4</sup> by Steve Kirsch, executive director of the COVID-19 Early Treatment Fund, suggest injuries are underreported by a factor of 41. But despite that and other shortcomings, VAERS can still provide valuable information about a given vaccine.

Rose is a computational biologist with postdoc degrees in molecular biology and biochemistry. While a native Canadian, she did her postgraduate training in Israel, where she still lives. When her dream of surfing in Australia were dashed due to the COVID-19 outbreak, she decided to start writing code for statistics and graphics, and as the pandemic wore on, she applied those programming skills to the VAERS database.

## **No, People Are Not Filing Fake Reports**

A common attempt to explain away the VAERS data by so-called fact checkers is to say that it's unreliable because anyone can file a report. This is pure hogwash. Yes, anyone can file a report, but there are penalties for filing a false report, and the filing is time-consuming and exacting. We can be quite certain there's no over-reporting going on.

It takes on average 30 minutes to fill out a report, and the system is set up in such a way that you cannot save anything until you get to the very end. Even worse, each page will time out after an allotted period of time, forcing you to start from the beginning if you take too long to fill in the details.

“This probably frustrates enough people that they don't start again,” Rose says. Indeed, the cumbersomeness of the website itself has often been cited as a reason for why doctors don't report adverse events. Doctors don't have the time to do it, and most patients don't know they can file on their own. As noted by Rose:

*“[VAERS] is probably one of the best adverse event data collection systems in the world, but it's completely lamentable. It's antiquated ... Nonetheless ... it's a way to detect safety signals that weren't detected during premarket testing or clinical trials.*

*And it is functioning that way, because there are many, many safety signals [about the COVID jabs] being thrown out by the data. For example, everyone's heard of myocarditis ... which is one of the safety signals being thrown off in VAERS. And so, we've learned that it happens in young people, more so in boys.”*

One explanation for this gender discrepancy has to do with androgens. Testosterone has been shown to facilitate entry of the spike protein into cells by activating a specific enzyme. This could help explain why men, who have higher testosterone levels, are getting myocarditis at much higher rates than women.

## **Most Lethal ‘Vaccines’ in Medical History**

Rose continues:

*“I implore everybody to do this ... [VAERS] is very accessible. Just go to their website and download the CSV files. You can play with it in Excel, or use whatever is compatible with the CSV file. The OpenVAERS system is even easier to use.*

*There are three separate files that you can download for the domestic data set, which includes the individual's data, the symptoms or adverse events that they reported (and it can be up to 15 different types), and the injection data ...*

*You can merge them so that, as per [each] VAERS ID, you have a lot more information ... That's what I did. All you have to do is count the number of adverse events that have occurred in 2021. In the context of the COVID-19 products, exclude all the other vaccines to isolate the signal, and compare the number of adverse events to the total number of adverse events reported in every single year going back 30 years.*

*There's absolutely zero comparison. The average number of adverse event reports for the past 10 years is ~39,000, and that includes the adverse event report data for all of the vaccines combined. There are a lot of them ...*

*So we're looking at about 39,000 total adverse events per year [on average for all vaccines], as opposed to 675,942 [adverse events post COVID jab] in the domestic dataset alone [Editor's note: Please note that all data are as of the day of the interview and have not been updated prior to publication]. And this does not include the underreporting factor ...*

*We see the same trend when we isolate standalone adverse events like death. There are over 10,000 [post COVID jab] deaths reported now in the domestic dataset alone, not including the underreporting factor, and in the previous 10 years, the average was 155 deaths for the entire year for all the products combined. This is over 6,000% increase in reporting for deaths.*

*So, the question I've been posing to the FDA, the CDC and whoever wants to listen to me is, 'What's the cut-off number?' Because you kind of think of death as being the worst outcome in terms of adverse events in the context of a vaccine or a biological product.*

*I think there are worse things than death personally. But most people think death is pretty bad. So that's why I always talk about death in this context. What's the cut-off number here? How many people have to die in order for these products to be deemed unsafe? So that's basically all you have to do in VAERS. I mean, you can stop there. You don't have to look at anything else. But there's so much more."*

## Can Causation Be Established?

While the U.S. Food and Drug Administration and Centers for Disease Control and Prevention outrageously deny that a single death can be attributed to the COVID jabs, it's simply impossible to discount 19,532 deaths<sup>5</sup> (8,986 in the U.S. territories alone<sup>6</sup>) reported as of November 26, 2021. As noted by Rose:

*"It's not even statistically plausible to say that not one death out of 10,000 was caused [by the shot]. It's not scientific to say that ... Those people, not 100% of them would have died anyway? That's not how life works."*

The FDA and CDC are also ignoring standard data analyses that can shed light on causation. It's known as the Bradford Hill criteria – a set of 10 criteria that need to be satisfied in order to show strong evidence of causal relationship. One of the most important of these criteria is temporality, because one thing has to come before the other, and the shorter the duration between two events, the higher the likelihood of a causative effect.

*"So, when you're talking about percentages of people who died within 24 hours of one of these jabs, let's say you're talking 50%," Rose says. "That's kind of suspicious to me. [Yet] they completely deny the causal effect. It's just because of coincidence?"*

There's also a strong safety signal for female reproductive issues. Preliminary post-marketing data showed women who got the jab in the first 20 weeks of pregnancy had a miscarriage rate of 82%.<sup>7,8</sup> Pfizer's own data, which Rose analyzed, showed a miscarriage rate of 69% when given during the first 20 weeks. Yet no one is warning pregnant women away from these injections: Quite the contrary – women are being universally lied to.

## How to Assess Underreporting

As mentioned, Kirsch has calculated an underreporting factor for post COVID jab events of 41, which is likely quite conservative. Rose's calculation is even more conservative

than that. She explains:

*“Steve [Kirsch] and I are good friends. We've been working very closely on all of this stuff for a long time. His underreporting factor is 41. He estimated that based on a peer-reviewed publication that estimated anaphylaxis numbers, so he used anaphylaxis as a proxy for death.*

*What that means is that when you hear us say these numbers, you have to multiply them by 41, if you want to go with Steve's estimate, or 31, in the case of mine. Mine is the most conservative estimate. I took Pfizer's Phase 3 clinical trial data that they presented to the FDA.*

*There were over 18,000 participants in the drug group and the placebo groups, and there were a certain percentage of individuals in each arm that succumbed to a severe adverse event, which includes death, hospitalization, visit to the ER, a life threatening adverse event, disability or birth defect.*

*So, 0.7% of people in the drug arm succumbed to a severe adverse event according to their data. I used that rate, and multiplied it by the number of people who had been injected with one shot of Pfizer on a certain date, August 10, and that number becomes your expected number of people that would succumb to a severe adverse event based on their data.*

*So, you take that number and divide it by the number of reports of severe adverse events, and you get a multiplication factor, an underreporting factor. When you use that base dataset, the Pfizer Phase 3 clinical trial data, you get 31. Ronald Kostoff has also published a paper in Toxicology Reports, and his estimate is 100, I believe.*

*So, whenever you're talking about the underreporting factor, I think you should talk about it in terms of a range, because each adverse event is going to have their own [underreporting factor] ...*

*I think if people actually knew the reality of what was going on, they would decide very quickly, right now, never to go near these things. This isn't hearsay.*

*It's not conjecture. The clinical trials are garbage, and there's no safety data. I'm not just saying this – it's very reflective in all of these adverse event data collection systems all over the world.*

*They're all saying the same thing, the Yellow Card [system in the U.K.], the U.S. [VAERS], Australia's [system<sup>9</sup>]. They're all saying the same thing. As an example, myocarditis and young boys. You know, it's not something that you can ignore. There's a reason why this is happening. It's because the [shots] are not safe."*

## **What Are VAERS IDs and Why Are They Missing?**

VAERS IDs are the numbers assigned to individual report entries. Aside from underreporting, another oddity that strongly suggests the data are worse than we think is that VAERS IDs are going missing. In other words, case reports are being deleted from the system after they've been put in. Rose investigated this after seeing videos saying hundreds, perhaps thousands, of people had their reports deleted.

So, she set out to either confirm or deny whether reports were going missing each week, as data sets are updated weekly. She's been downloading all the data sets since January 2021, which put her in the unique position of being able to compare the different sets, because when the data set is updated, the old data is overwritten.

**“ They went through this horrifying experience, which no human should be going through, and then they got disappeared. I don't even know what the word for that is. It's appalling. ~ Jessica Rose ”**

Now, there are valid reasons for deleting a VAERS ID. One reason would be if both the doctor and the patient file a report. The two reports then need to be combined, and the ID number of one of the duplicated reports is erased. However, what Rose found is that reports are indeed being deleted that shouldn't be. She explains:

*“The way I was determining if entries, if their IDs, were disappearing was by finding out which VAERS IDs didn't show up in the next update, because you would assume that every single ID that got into the system would stay in the system. And so, the next update would have that data set and a little more, but that's not how it works.*

*There are removals every single week, and they're not explained. There's no explanation for these. So, the first thing I did when I found this – and it was over 1,000 [missing IDs] – was to check if a high proportion of these deleted reports were deaths. It wasn't anything overly suspicious, something like 18%.*

*Then I checked severe adverse events, then I checked children, because this is a big one that's happening now. A lot of babies are going missing in VAERS, and they shouldn't be there [since the COVID shots aren't being given to babies yet], which is probably why they're being removed.*

*So, there wasn't anything overtly suspicious about the nature of the [missing] IDs. But that's not even the point. These are people who trusted in these products, and listened to people who are telling them they are safe and effective. They were healthy. They went out and got the shots.*

*Some of them suffered an adverse event, some of them died. These reports got filed to VAERS, and then they got removed. That's atrocious. I'm not speculating here, either. This is what is happening. They went through this horrifying experience, which no human should be going through, and then they got disappeared. I don't even know what the word for that is. It's appalling.”*

## **Data on Children Are Being Deleted**

Rose has also delved into the VAERS data for children. Disturbingly, there are apparently thousands, likely tens of thousands of instances if you factor in underreporting, where the jabs have been given to children that were too young to receive the shot at the time they got it.

At the time she looked into this, there were approximately 5,570 reports with a metric code indicating that the product was given to a patient of inappropriate age. In fact, it was the most frequently occurring adverse event type among young children.

*“So, there were so-called medical professionals injecting children without confirming their age,” she says, “and then those children suffered adverse reactions in the thousands. And this doesn't include the underreporting factor. Some of them died. In the 5- to-11 age group, two of them died. One was 11, one was 13, and the timeframe between the death and the injection in one of the kids was five days, in the other it was one day.*

*So, this was in close temporal proximity. The part that's even more disturbing than that is that ... something like 60 children had died between the ages of zero and 18, and 38% of those children were under 2. [The next week] that percentage went down to 30%. I'm like, wait now, that was late last week. What happened to them?*

*There are these enormous inconsistencies in the data. Here's another one. I have about 100 different files that contain algorithms that run code for specific things, like I have a kid's file, a cancer file, a prion disease file. So, I run them all with the updated data.*

*Myocarditis is one of them. And there was this big chunk of data for the 50- to 75-year-olds pertaining to myocarditis reports last week, and this week, it's one-half. It's staggeringly obvious that something's very different in the data. The absolute number of reports went up, but it seems to have shifted somehow.*

*There could be a plausible explanation. But the fact is there's no reference at all as to how this data is being shifted around. There's no record. So, we as the public, have no idea what's actually going on. All we can say with absolute certainty is that something is going on.”*

## **Myocarditis Report Pulled From Publication**

Together with Dr. Peter McCullough, Rose recently wrote and submitted a paper<sup>10</sup> on myocarditis cases in VAERS following the COVID jabs to the journal Current Problems in Cardiology. Everything was set for publication when, suddenly, the journal changed its mind and took it down. You can [find the pre-proof on Rose's website](#). The data clearly show that myocarditis is inversely correlated to age, so the risk gets higher the younger you are.

*“Most of the reporting in VAERS was in young boys, aged 15. There was a sixfold difference in reporting following dose one and two, which indicates dose response and/or causal effect. The rate for myocarditis in 12- to 15-year-olds is 19 times above background reporting for the United States, so there's a lot of stuff in that paper that was really important,”* Rose says.

*“There are many other papers coming out now that are 100% supporting what we found. It's not debatable. They [pulled] this paper five days before that FDA meeting for the 5- to 11-year-olds, and I don't think that was a coincidence, because it would have informed people as to the potential risk of myocarditis in young people. So, of course, they don't want that, because they already bought 30 million doses for the 5- to 11-year-olds.”*

## **Latent Infections Reactivated**

Another common side effect of the jabs is the reactivation of latent infections such as herpes infections and shingles. Rose explains:

*“There are a bunch of papers that have come out that lend some ideas as to why this is happening,”* Rose says. *“One makes the claim that CD8+ T cell populations are becoming compromised. In the acquired branch of the immune system, you have immune cell populations called CD4+ T cells and CD8+ T cells.*

*Everyone's heard of HIV/AIDS. So, the idea there is that you have a virus that preferentially infects CD4+ T cells, which are the generals of the immune system. They kind of coordinate all the other cells to do their jobs. If you have a*

*depletion in this type of cell, then the rest of the immune system kind of collapses, because they don't have their general telling them what to do.*

*The CD8+ T cells are the killer cells. These cells are in charge of killing virally infected cells, so they're very important in the context of a viral infection. One of these studies showed that in people post injection, the gene profiles were very different for CD positive T cells.*

*If we're talking about going beyond immune dysregulation, if we're talking about immune dysfunction, if we're talking about certain immune cells being depleted, that could be a possible reason why you're seeing a reemergence of a latent viral species, possibly. We're also seeing cancer resurgences.*

*Another paper that came out shows that there might be problems in the realm of double-stranded DNA repair. There are two enzymes (BRCA and 53BP1) that have been reported to be impaired that are very important in repairing double stranded DNA breaks, and if you have an impairment of essential proteins that are meant to repair double stranded DNA breaks, you have serious problems.*

*One of those problems is proliferation of cells. So, whenever you get a certain type of exposure to a virus, say a cold or a flu virus, and it gets the better of you so your acquired immune system kicks in, you get these swollen glands. That is actual populations of T cells proliferating.*

*If you have stunted proliferative capacities, or if you have an impairment of that process, you don't have an immune system if it happens in T cell and B cell populations ...*

*So, in addition to the hyperinflammation that the spike protein seems to be inducing all over the body, there's this immune function impairment. That's really scary to me. [It's something] we need to investigate and absolutely another reason why these rollouts should stop right now."*

## **More Information**

To learn more, be sure to peruse Rose's website, [Jessica's World](#). There, you'll find links to videos in which she summarizes her various findings, and a weekly [graphic update of the latest VAERS data](#) for death, female reproductive issues, breakthrough COVID infections, cardiovascular events and immunological events.

Another excellent resource is [OpenVAERS](#), which summarizes the most pertinent VAERS data for you on a weekly basis. If you click on the COVID Vaccine Adverse Event Reports, there's a sliding bar at the top of the page where you can select to view data either for the U.S. territories only, or all VAERS reports, which includes international reports.

Subject: Comments regarding unwanted quarantine and vaccination mandates

External Email

Hi Board,

Thank you for your time and your service to our wonderful State of Washington.

I am writing to let you know that:

1. I am opposed to unwanted use of police force to quarantine those with any illness.
2. I am opposed to covid-19 vaccine mandates for K-12.
3. I am opposed to covid-19 vaccine mandates for employers/employees.

I enjoy living in Washington and the freedoms that I have here. I want to continue to enjoy freedom here in this wonderful state.

Thank you for your time.

Alison Runcie

Subject: Policing Powers for the Wa. State Dept of Health

External Email

Hello and good evening Washington State Board of Health,

Keith Grellner,  
Temple Lentz,  
Stephen Kuntz,  
Elizabeth L. Crawford,  
Vazaskia Crockrell,

Fran Bessermin,

Bob Lutz,  
Umair A. Shah, MD, MPH

My name is Corey Gauny, I am a lifelong Washington resident, a 22.5 year veteran of the Armed Forces as a firefighter, and a concerned US citizen.

As I am sure you are aware, the internet is abuzz with information about an agenda item on the Board's agenda tomorrow on the use and authority of the Board of Health as it pertains to WAC 246-105. I have also heard the comments by the State Board of Health Chair Keith Grellner, that this the application of WAC 246-105 as it pertains to addressing concerns surrounding AIDS. To say I am skeptical is an understatement as those impacted by AIDS would not warrant detainment (in my humble estimation). If the subject is those afflicted with AIDS. I sure hope that our State's leadership is more effective at addressing community health challenges that have been an issue for well over 4 decades.

The reasons I am skeptical: While you have had the opportunity to use the WAC, you have yet to apply it to the real epidemic and community health crisis, which is Drug Addiction and the Opioid Crisis, the board has remained silent. There is this issue of a job posting from DOH, for an Isolation & Quarantine Strike Team Consultant DOH5814. Am I to believe that this position is needed because the board anticipates an influx of AIDS patients into the system? I would ask that you get back to me on what you find about the job posting. I am more than happy to submit a public information request to find out more about the posting. As a professional courtesy, I wanted to give the board the opportunity to ask and answer these questions. If everything the Board Chair responded to on television is the truth, then it would appear the agency may be guiding the board more than the board is guiding the agency.

While you may have the Washington Administrative Code behind you as "legal" backing, I want to remind you that legality is not always ethical. After all, the Jewish people were "legally" given distinguishing marks, loaded onto rail cars and shipped to camps. Much can be done "legally" that is not ethical. For the record I have been vaccinated in the military for just about everything you can imagine, I was forced to as a condition of my employment and service to my country and I voluntarily accepted those inoculations. I am not against vaccinations, however I oppose the mandates. Do you know the most socialist system we have in our country is the US Armed Forces. Only 1% of our population volunteers to be a part of that system and only 3% of that 1% go on to senior positions and retire. I chose to live in that system and I now enjoy my personal freedom

and liberty. I have lived social medicine and guess what, I had to take part in removing members from the military due to addictive behaviors, obesity and fitness standards. While I understand and accept that people should make choices to positively impact their health, such as a healthy diet (to address, heart disease and diabetes) I do not believe it is the role of our government to mandate medical procedures and then to have the power to detain people based on their choice (especially when it comes to COVID-19). "With great power comes great responsibility" Spider-Man (Stan Lee). Please wield your power wisely and ethically. In the interest of transparency, if the Board chooses to move forward with using the tools provided by WAC 246-105, I would ask that the board document limit the use of to very specific and outlined cases.

Respectfully

Corey W. Gauny, MBA, PMP  
MSgt USAF (Ret.)

Subject: Covid 19 Mandates

External Email

Dear Washington State Board of Health,

I am a concerned citizen and writing to you to state my opposition to Covid 19 vaccine mandates, vaccine passports, and Covid 19 quarantine camps. Is this the United States or Nazi, Germany? We have a constitutional right to choose what goes into our bodies.

Covid 19 vaccines (gene therapy) are highly experimental and do not prevent transmission. Where is the long-term safety data and efficacy data? Every vaccinated person I know is getting break-through infections. People I know that have had Covid, have recovered naturally, and have not been re-infected. Natural immunity exists, why isn't this being discussed as an option? What is truly behind your mass push for Covid 19 vaccinations?

Covid 19 has an average recovery rate of 99.97%, so how can you justify these draconian measures? Many doctors have had great success treating Covid 19 with: Ivermectin or Hydroxychloroquine in combination with Vit C, Vit D3, and Zinc. Why aren't you pushing early treatment options?

You are public health officials and have a duty to the public to tell the truth and to provide all sides and facts of Covid 19 health arguments. You are pushing one agenda, Covid 19 vaccinations, this has to stop!

Regards,

Yvette Horn

Subject: Re: January 12 State Board of Health Public Meeting Confirmation

#### External Email

Since you have never responded to my email on this email thread. So since the meeting stated the public can submit comments to this email address and you did not even respond to my previous email. This is called censorship. So I am submitting my comments here and will cc my email as well.

#### My Comment:

RCW 34.05 seems to cover the initiation of WAC 246-100 including sections 070, 045 and 040. These codes are so generic, which by the way WAC codes were designed to address specific instructions which are supposed to support RCW's. The above-mentioned WAC's setup the option to exercise concentration camps at the discretion of a person's ideology. The discussion by this administration includes forced injection of a material that has not completed all testing for long term effects. We see our taxpayer dollars being spent on ads stating how safe and effective this vaccine is. However, we see over 700K VARES database entries for covid vaccine – more than any of the other major vaccines combined. Poor covid shot effectiveness is proven by many of the vaccinated still transmitting the virus, shutting down facilities that are 97% vaccinated due to outbreaks and the fact that approx. 3 months after vaccine was widely available and given, we started seeing booster requirement about every 3 months due to similar infections are seen. Next patients must sign a waiver not to sue manufacturer's if they experience side effect including thousands of deaths on VARES Database shortly after the vaccine. If you mandate through WAC codes, everyone of you need to sign an acceptance waiver for every single person you force to take the vaccine. This waiver needs to include person and financial responsibility agreement for any and ALL side effects a person experiences. If you feel the vaccine is safe enough to force injections on Washington State Citizens, you should easily accept liability. Accountability is a must for anyone in leadership. With all of this said, I also have not seen one stitch of action to test citizens for antibodies before requiring vaccination. I believe United States Code 18 -242 will apply to the current actions I see from DOH, OSPI, etc.

Subject: Covid vaccine mandate children

External Email

To whom this may concern,

I come to you as a concerned parent of a child who attends a Washington school in Grays Harbor county. I know there has been a lot of discussion about the mandate for the covid vaccine but I urge you to understand that as an adult with a religious exemption this has been a huge struggle for me. I am unable to get the vaccine due to my religious status and beliefs. I have been faced with the decision to stand by my beliefs or face dismissal from a sonography program. It has been the hardest decision of my life, I could have wasted 4 years of education and thousands and thousands of dollars on tuition. However, "if Jesus Christ be God and died for me, then no sacrifice can be too great for me to make for Him". Now that my exemption has been accepted and I am able to continue my clinical rotation I plead with you. Please do not make the mandate mandatory for children ages of 5 and up. Please do not make it mandatory for us to decide whether our children get an education or they be experimented on. These are stressful times enough. I don't think Washington State realizes how many parents will fight back, how many teachers will lose amazing students and how many students will lose amazing teachers. I don't want to have to quit everything I've worked for or have all theses hoops I've jumped through be wasted just to home school my children. I am going to be a well educated tax paying medical professional that can only benefit our state. I see no outcome for our future that is positive with this mandatory vaccine mandate. Let us parents decide what's best for our children. This may make no difference but I but I had to at least try. If any of you would like to reach out to me please feel free otherwise I appreciate your time and consideration.

Sincerely a loving Washington parent

MY QURESTIONS...Sherrye Calderon (You) 09:26 AM

What is the purpose of this meeting IF NOT about covid vax for children and for considering detainment? Why is this WAC being discussed?

Sherrye Calderon (You) 09:30 AM

HIV? Is that a ruse?

Sherrye Calderon (You) 09:36 AM

If the board has no access to the comments, then WHY is there a comment box?

Sherrye Calderon (You) 09:40 AM

It is NOT misinformation! Stop sending this message as it is insulting to our intelligence.

NO, it is not FALSE you are using your "language" to deceive the public.

Sherrye Calderon (You) 09:41 AM

In this state, with the MASSIVE mandates, restrictions, why would you expect anything LESS than mass fear???

Sherrye Calderon (You) 10:02 AM

If the Q&A box is not available to the board, then why are some comments being answered and others not?

Sherrye Calderon (You) 10:06 AM

How many are viewing?

Sherrye Calderon (You) 10:13 AM Dismissed by host

Vaccines are obviously NOT preventing COVID; stop the mandates!

Sherrye Calderon (You) 10:14 AM Dismissed by host

Cases are NOT as severe - please stop the fear-mongering.

Sherrye Calderon (You) 10:17 AM

Where the the map to the Monoclonal Antibody Therapies that are successful at preventing severe cases and hospitalizations. We had a terrible time finding access but we did, through no help from our Governor, BOH or the medical community. Citizens deserve much better information on successful therapeutics when early in their diagnosis.

Sherrye Calderon (You) 10:23 AM

Please define for us the numbers of hospitalizations related to ONLY COVID. We have been summarily deceived the past 2 years on the case / hospitalization / death numbers of COVID with CDC manipulating the cause of death definition. We want to know the numbers of isolated COVID cases ONLY with no co-morbidities.

Sherrye Calderon (You) 10:25 AM

Everyone I have known of late, infected with COVID, has been fully vaxxed and boosted. Does little to substantiate your concern over non-vaxxed citizens. If anyone on this feed has an answer, please chime in.

Sherrye Calderon (You) 10:27 AM

Most people who have this COVID variant have "bad colds" something we have lived with our entire lives and which have NEVER been tracked with the same diligence this variant is being tracked. If it had been, I would expect greater spread; are we being spoofed over COVID...I suspect so.

I am currently on the webinar today and listening to your presentation and citizen input.

The following article indicates the grave concerns about your group and possible actions.

<https://www.thenewstribune.com/news/local/education/article257204127.html>

Many concerns have been shared in the public comments as to citizen concerns about this vaccine and misinformation and mandates regarding our rights under the United States Constitution and our rights as children of God and the Biblical principles and promises that our nation was founded upon.

"The American people have a right to know as much as possible about the safety of the COVID vaccines," stated Judicial Watch President Tom Fitton. "The CDC needs to be more transparent about its investigations of COVID vaccine adverse events, including deaths, reported on VAERS."

Please feel free to contact me for further comment.

A concerned citizen,

Dr. AnnRené Joseph

Subject: COVID SHOT MANDATE FOR CHILDREN

External Email

To whom it may concern:

I would ask that you objectively look at not mandating Covid-19 vaccinations as part of the vaccines required to attend school.

Items to consider:

1. Current Covid vaccines are still under Emergency Use Authorization (EUA) by the FDA.

A. Pfizer-Biontech- EUA approved to permit the emergency use of the unapproved product... to prevent Covid 19 in individuals 5yrs and older. Revised 1-3-2022 source FDA Fact sheet.

B. Moderna - EUA approved to permit the emergency use of the unapproved product.....to prevent Covid 19 in individuals 18yrs and older. Revised 1-7-2022 source FDA fact sheet.

C. Janssen(JJ)- EUA approved to permit the emergency use of the unapproved product.....to prevent Covid 19 in individuals 18yrs and older. Revised 1-11-2022 source FDA fact sheet.

2. Chapter 246-105 WAC- immunisation of child care and school children against certain vaccine -preventable disease.

A. 246-105-010- Purpose: The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers.

a. The Covid vaccines do not fall into that category stated in the purpose.

B. 246-105-020 Definitions: (13) "Immunizing agent" means any vaccine or other immunologic drug licensed and approved by the United States Food and Drug Administration (FDA), or meeting World Health Organization (WHO) requirements, for immunization of persons against vaccine-preventable diseases.

b. See bullet #1. EUA's are not the same as FDA approved.

C. WAC 246-105-030- list the current vaccines required. I will disclose that my children and myself are all vaccinated against these currently and don't see how the Covid-19 vaccine falls into the same category of effectiveness as the ones mentioned. i.e: MMR, polio, chicken pox, etc.

Hopefully, we can all agree that receiving any of the Covid vaccines does not prevent infection anymore. They also do not prevent illness, transmission, or death. However, they may reduce the severity of symptoms among individuals. It is my view that the Covid vaccines closely resemble a flu shot, as far as reducing the severity of the disease, and the state doesn't mandate flu shots. Again I urge the entire board to vote against mandating the Covid 19 vaccines for child care and school age children. Thank you for your time and consideration. Please note, that if you mandate this for our children, there will be a mass exodus from our school districts, I would be one.

A concerned parent,

Adrienne Rainer

The data on harms to children from the experimental gene therapy injections are mounting every day, including myocarditis in boys. You are well aware of the high incidence of the myocarditis and you are still driven to put this in every arm. The vaccines have failed. You are now more likely to get Covid, especially Omicron, if you are vaccinated than if you are not vaccinated. This must stop. It is no longer about Covid or injections.....this is about God given rights guaranteed in our Constitution. Stop the insanity.

---

I am against the vaccines mandate because covid has and continues to present a minimum risk to children (see data on severe cases and deaths in children for proof). Two, vaccination does not prevent community spread esp with omicron (again see data on breakthrough infections and high infection rates in highly vaccinated communities/countries) thus they are NOT protecting the community. It is beyond crazy to think that with cases likely going down in spring this govt should mandate something which is so personal to each family. Also consider the risk of vaccine side effects like heart inflammation versus risk of dying or getting severely ill from covid in children. also see data on how much less severe omicron is! It is like flu so if flu vaccines are not mandated when why mandate vaccines for disease with an overall fatality rate of less than 2% overall? and even less in children! You let children live with the scare of gun violence in school doing nothing concrete to prevent school shootings but want to act with absolute disdain for feelings of parents! One feels increasingly suffocated living in Washington state now with its big authoritarian government deciding everything in secrecy or in violation of public opinion.

I hear stories of children living in panic and fear.

I will admit these are personal opinions based on data I have witnessed and researched.

As a small business owner opening in 2019 we have experienced the most difficult years of our lives. We do understand the need for continued awareness and we also see the need to protect the community. However our companies focus on local and international trade. Shut downs and shipping impacts have nearly put us into bankruptcy which will be another company adding to the unemployment issues.

The reality and what I don't understand is why we are not addressing the fact that SARS-CoV-2 was identified in humans in 1965. This virus is similar to influenza and will continue to develop. Until the general public acknowledges that this virus is back on the retreat we will continue to suffer. As a life long Washingtonian my business partners and myself are considering leaving this state due to the constant control forced and the inability to do business.

This needs to stop and we need our society back before we fail our children and watch our society fall apart.

These laws are another way to continue to enforce things that are not based on long term research. I will not vaccinate my children. When we have decades of research I may consider but to mandate anything that was rushed through all FDA processes does not make me feel safe putting it into my children.

Our reactions to the disease are based off of mis-represented information.

Please consider the public needs in other areas and all impacts the laws you place for one problem generally will exacerbate existing issues as the community loses focus. I fear we are doing more damage than protection.

re: The consideration of whether COVID vaccines be added to schedule of required vaccines for Children?

We live in the United States of America, and not in Communist China or Australia.

I Strongly oppose the addition of the new vaccines to the required school schedule.

1. The vaccines are not traditional vaccines but are new technology. Requiring the CDC to recently have altered their definition of a Vaccine. It is clear to many concerned, that this new technology SHOULD be more rigorously tested prior to its being broadly distributed or mandated anywhere, let alone for children, the elderly, or pregnant women.

<https://www.washingtontimes.com/news/2022/jan/5/covid-19-shots-are-not-vaccines/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.google.com%2Furl%3Fq%3D19-shots-are-not-vaccines%2F%26sa%3DD%26source%3Dcalendar%26usd%3D2%26usg%3DAOvVaw0eXPgIEY6xxsCVdER>>

2. And finally the effectiveness of COVID recovered is debated and potentially more robust than the admitted fading effectiveness of the vaccines, we have seen vaccinated still be able to get COVID and Spread COVID. The recent Omicron variant may well act as a natural vaccine to achieve our herd immunity and in a more effective manner than any vaccine mandates, and without the concerning side effects.

Thank you,

Ty (Robert Rogel)

I ask you to be transparent and fair in this process. Look at the data. This vaccine and its impacts have not had the same vetting that the others required for K-12. Please do not mandate this.

Also, you aren't being honest about your claims of "misinformation". You were absolutely getting a briefing on the requirement to vaccinate K-12 and you need to hear from us how much negative impact this will make.

Be honest. Your policies are making this worse.

As a resident of Washington State we will not comply with forcing our children to be vaxxed nor wear a mask. We also will not comply with The Department of Health trying to force us to inject ourselves with a poison. We should hold the right to make a choice for ourselves based on our own personal health. For the Washington State Board to choose to not address the student mandated vax is uncalled for. Regardless of there being a strict time frame it is not the public's issue with you having technical issues. Also there are issues with the "stats" that you have presented since CDC has recalled so many tests for False-Positives that are still showing to this day. The State of Washington in any department also holds no grounds whatsoever to restrict a person from living their life, you do not hold the grounds to remove any of our rights as a person endowed by our Creator. We do understand that you are "basing" this all off of science yet ignore the scientists who disagree with WHO or Dr. Fauci. We the people will not support any of your choices that infringe on our God Giving Rights and our Constitutional Rights! We do not support any of the Bills Chapter 246-90 WAC, 246-203-130 WAC, Chapter 246-100 WAC, Chapter 246-282, nor Chapter 246-105 WAC.

Subject: An Idea to Help Fight COVID

#### External Email

I was on the call today and never got a chance to voice my comments, so am including them here. I'd really like response to these concerns.

At this point, 77% of our state population have been vaccinated. The original goal of our state was 70% vaccination. We are pushing for more and more of the population when our Governor told us 70% was the number to hit. The vaccine is said to protect against serious sickness and death, but there are other things that can also protect against serious sickness and death and aren't being talked about. On the call, there was mention of the vaccines increasing immunity and protecting hospital capacity, but what about healthy bodies and preventative care? Instead of continuing to push the vaccine on people who have clearly made the choice not to receive it (for whatever reason, which is no one's business), why not instead focus on early treatment and other prevention measures that can also save lives?

As a state, for the past two years, we have been pushing for isolation, social distancing, avoidance of family and friends, masking and vaxing. Why aren't we doing anything to address the fundamental issues that could help prevent the spread of COVID more than a mask or vaccine can? Why isn't the health board focusing on promoting healthy eating habits, daily exercise, increased vitamin D and C? These are all easy, low cost, immunity boosting things that if we as a state focused on, our overall population would become less susceptible to the virus? Dr. Shah mentioned some of this, but these preventative actions should be on the top of the list on how to fight COVID. It seems we have exhausted all the other "tools in our tool belt" as the Governor has previously stated, except the tool of personal health and early prevention.

Second question is, when will enough be enough? Enough of forcing people to wear masks, threatens their livelihoods with business rules and regulations and coercion around vaccines. Those that want to take precautionary measures should have that option – wear a mask, get all the vaccines and stay home if they're feeling afraid. Those that are healthy should have the option to exercise freedom to as well. When do we stop focusing on testing and stop with the fear and mandates that have been causing more harm over the past two years than this virus ever has?

When the topic does get discussed as a meeting agenda item, which we know will be coming soon, I wanted to voice my concern about children vax requirements. I am a mother of two small children and should be able to make the choice for what I feel is best for my children and family. The state should never decide for anyone when it's right to

inject a child with an experiment.

Thank you,  
Brooke Huffman

Subject: Covid vaccine mandate children

External Email

To whom this may concern,

I come to you as a concerned parent of a child who attends a Washington school in Grays Harbor county. I know there has been a lot of discussion about the mandate for the covid vaccine but I urge you to understand that as an adult with a religious exemption this has been a huge struggle for me. I am unable to get the vaccine due to my religious status and beliefs. I have been faced with the decision to stand by my beliefs or face dismissal from a sonography program. It has been the hardest decision of my life, I could have wasted 4 years of education and thousands and thousands of dollars on tuition. However, "if Jesus Christ be God and died for me, then no sacrifice can be too great for me to make for Him". Now that my exemption has been accepted and I am able to continue my clinical rotation I plead with you. Please do not make the mandate mandatory for children ages of 5 and up. Please do not make it mandatory for us to decide whether our children get an education or they be experimented on. These are stressful times enough. I don't think Washington State realizes how many parents will fight back, how many teachers will lose amazing students and how many students will lose amazing teachers. I don't want to have to quit everything I've worked for or have all these hoops I've jumped through be wasted just to home school my children. I am going to be a well educated tax paying medical professional that can only benefit our state. I see no outcome for our future that is positive with this mandatory vaccine mandate. Let us parents decide what's best for our children. This may make no difference but I but I had to at least try. If any of you would like to reach out to me please feel free otherwise I

appreciate your time and consideration.

Sincerely a loving Washington parent

My family and I are against force experimental vaccine mandate for children attending Public School, Follow the science showing the transmission rate for children is extremely low. Over all deaths under the age of 19 is around 600 with a population of 70,000,000 under the age of 19.

Factsheet from Moderna states " Vaccine is an unapproved vaccine that may prevent Covid-19" along with the host of side effects and deaths that have occurred with the shots.

I will remove my children from Public school if you try to force Vaccinate my children.

Sincerely Greg Brewer

Re: No Mandating Covid Vaccines for children—in or out of schools

Dear Board of Health:

A recent on-line interview provided this scenario: And, well, they have to give it to kids, because, here's why – they cannot market this vaccine [the Comirnaty] without having immunity shield. I sue pharmaceutical companies for a living and I have enough criminal activity that I know about for Pfizer at this point, and Moderna. If they went ahead and marketed a vaccine where they end up killing people or injuring them, then I can sue them and they'd be through. So they're never going to market a vaccine, allow people access to a vaccine--an approved vaccine--without getting liability protection.

The emergency-use authorization vaccines have liability protection under the PREP Act and under the CARES Act. So as long as you take an emergency-use vaccine, you can't sue them. Once they get approved, now you can sue them. Unless they can get it recommended for children because all vaccines that are officially recommended for children get liability protection--even if an adult gets that vaccine. That's why they're going after the kids.

They know this is going to kill and injure a huge number of children, but they need to do it for the liability protection. And here's how they know that it's going to injure kids. During the Pfizer study, they only tested it on 1300 children, and one of those we now know was a girl called Maddy Gary. We only know about this because she and her family came forward and told us what happened.

Maddy Gary got the vaccine. She is now in a wheelchair for life, and she needs a feeding tube to eat. So Pfizer, you know, because Pfizer tested on 1300 kids, it is stuck with the extrapolation that one out of every 1300 kids is going to be injured like that. An injury worse than death.

Pfizer did not report her injury. Instead it said she had a stomach ache. So that's what they reported to the FDA. They lied.

Robert F. Kennedy Jr., Children's Health Defense, in interview:

<https://www.rokfin.com/post/65950/RFK-Jr-On-Vaccines-Liability-They-know-this-is-going-to-kill-and-injure-a-huge-number-of-children>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.rokfin.com%2Fpost%2F65950-RFK-Jr-On-Vaccines-Liability-They-know-this-is-going-to-kill-and-injure-a-huge-number-of-children&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ca6c996325a9e4037670108d9d5b386f7%7C11d0>>

Think about it. One in 1300 kids permanently disabled (that we know of). But, that's only about 20 children in Seattle's 6-12 grades, (and how many state-wide?) So, why not

mandate it, as long as it's not your child that is injured for life, or dies, right?

Isn't it about time that those in government stand up for the people instead of pharma or those who control pharma and stop submitting us, particularly the children, to this ongoing experimentation and greed?

There is a plethora of information on the harm this injection is doing--to adults, young and old, and to the children who have so far received it. You know the injection is damaging and that children are at little risk from the virus and that there are other low-cost and successful treatments that could be made readily available. There is no legitimate basis for forcing this injection on children.

I urge you, please, do not allow any mandates for children of any age, and please approve the petition that asks the Board to establish a new rule to prohibit them from adding any Emergency Use Authorization product, or any licensed product that lacks completed Phase 3 trial studies to the required school list.

Respectfully,

C. Reeder  
Seattle

P.S.

Here is another look at the situation – from UK, but equally applicable here:

Subject: Questions regarding mandates and vaccines - trying to be neutral but common sense is prevailing

External Email

1. Why are we trying to mandate vaccinations since it has been proven that they do not prevent contraction, transmission or hospitalization?

2. Why are we allowing special privilege's for vaccinated people when they can carry and transmit the virus the same as the unvaccinated?

3. If the vaccines do not prevent contraction or transmission why did we fire State Employees for refusal to take the experimental vaccine?

4. Why are we paying hospitals huge bonuses for positive Covid19 cases and for labeling Covid19 as cause of death?

5. Where is the missing \$41million of Federal Aid that was earmarked for nursing homes in Wa State in 2020?

6. If all of these lockdowns and mandates are supposedly working why do we continue to have vaccinated people contracting COVID more than once and being hospitalized?

7. What happened to the FLU and common cold?

9. Why are some reputable Doctors and Scientists being censored and canceled for their opposing opinions regarding vaccines?

10. When will the FDA release the actual data concerning the health issues caused by the vaccines?

11. All of these questions really come back to this- If all of these lockdowns and mandates were really about controlling a virus then wouldn't testing be the priority and vaccines be a choice in our State?

Dear Members of the Washington Board of Health,

I was on the Zoom meeting today and was awaiting my name to be called to make public comment. I have been in charge of zoom meetings before and found your team lacked the professionalism necessary to make it a productive meeting. Giving only one minute for public comment and cutting people off was abhorrent.

The state of Washington is becoming a communist state in more ways than I ever thought would happen in my lifetime. I have lived here for over 40 years and fell in love with this part of the country. It is becoming apparent that your power hungry and control hungry administration believes you know what is best for the general public and our children and grandchildren. By inoculating our bodies with an unproven, unsuccessful vaccine make absolutely no sense what so ever.

It will become more likely the population of this state will move out to become free citizens of the USA in a less restrictive state, which by the numbers being reported by UHaul and Allied Van Lines it has already begun. My understanding that the numbers of children who have not registered for public education is going to plummet due to your mandates. Therefore, the amount of money allotted to each school district will also go down. What exactly are you trying to accomplish here?

Taking away our right to choose, our right to promote our own health decisions will not stand with the people of this state.

God help us all,

Debra Blodgett

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Trisha Jennings

External Email

If the goal is to truly make an informed decision on Covid vaccinations, why is all the information not being reviewed? Why is there no data shared regarding dangers or deaths as a result of the vaccine? Why is there no information or data shared about adverse reactions? Everything that's being covered in this Zoom is how and why the vaccination is good. Share all the information and allow people, yourselves included, to make a sound decision.

And, what's also being shared and reiterated over and over again is the fact that vaccination does nothing to stop or slow the spread of the virus. The only thing vaccination accomplishes is reduced symptoms and hospitalizations for those infected and vaccinated. Therefore, there is no societal obligation to enforce a vaccine mandate. It should be the personal decision of each individual, to decide for themselves, what to inject into their body.

Represent all sides, not just the side you're obviously pushing for. Your presentation has zero bipartisanship to it. It is purely pushing your agenda and it's incredibly frustrating to listen to. It makes a person feel literally powerless over their own body.

Subject: Childhood Vaccinations

Dear WA State Board of Health, employees and associates and TAP:

First off, I want to tell you that some of this email is borrowed from a friend of mine as she hit so precisely and so eloquently on what I think and feel. However, some of it is me. Please, take the time to read it all...

We now know that the covid 19 injections not only do not prevent infection, transmission, hospitalization and death of covid 19, but they are also a considerable health risk. Why would anyone conceive of including such on a childhood (or any) vaccination schedule? Have you not done your due diligence in researching the data and facts around this hastily rolled out injection? To date, there is not even possibility of long term or phase 3 trials being completed. The risk of a child dying from covid 19, is less than .01 percent. This vaccine has already proven to be more dangerous to children than covid 19 itself. It is your duty to search out these facts away from vested and conflicts of interests and learn for yourselves.

Thousands of highly esteemed doctors and scientists are speaking out about what the data and science is showing and they are voicing their objections to, and abhorrence for, these forced injections. These doctors and scientists speaking facts and truth against a narrative are being censored from social and main stream media and academia. Why is that? Are you aware of the VAERS? How many deaths from this forced injection are acceptable for you? I say not even 1 is acceptable, especially for a virus with a 99.9 + % recovery rate in children! Why won't Pfizer release all their data on these injections? Are you willing to take personal responsibility for the lives of children and adults you will maim and destroy by facilitating approval for this atrocity? Are you willing to break state and federal laws, US codes and constitutional protections to push this agenda? You will also be living in the state and country you chose to destroy personal protections from the real danger of an overreaching government in.

When presented with reality and all of the facts, the only conclusion one can reach for anyone supporting this agenda is:

1. They are either ignorant to facts, science and truth because of censorship and personally held distorted beliefs.
2. They are mentally ill, compromised or unstable.
3. They know what they are doing and are benefiting in some degenerative way from pushing this agenda.

In any case, those will not escape this horrific machine being fed and will not be immune to the consequences of their actions and madness.

We know the vaccine industry is pushing this injection for it's own reasons. We also know, based on wording in the current law, an approval on the childhood vaccine schedule would mean securing the vaccine industry additional liability protection.

To all of you in positions of importance regarding this matter: We are watching you, and many more of us are becoming aware by the hour. All of the money on Earth will never supersede truth, you cannot stop or silence it. You will either be held accountable for your actions or you will reap untold reward. Get on the right side of history and do the right thing.

\*\*\*\*\*

In my lifetime, our country has never been at such a breakpoint, at such a divided level. I truly fear the repercussions of enacting a vaccine requirement for our children. I'm asking you on a very personal an individual level to step back and look at the broader view. Is this the right time to force this vaccine? This decision reaches far beyond community health. Now is not the time. To enforce a vaccine, one so young and lacking in time tested results, is like pouring gasoline on a powder keg. Please consider the larger impact to our society, our country, to what this could result in.

\*\*\*\*\*

Sincerely,

Rich Filori

And the government and media gaslighting me to make me feel like a crazy conspiracist when everything they've said won't happen DOES happen!

On Wed, Jan 12, 2022 at 10:51 AM Joshua, Amanda Villalobos <jandavilla1618@gmail.com <mailto:jandavilla1618@gmail.com> > wrote:

\* There are many children who have received the covid shot that are now getting myocarditis as a result from the shot. This is causing severe problems in otherwise healthy children. This is heart inflammation.

\* Even though vaccinated, even with boosters, adults and children are still contracting, and spreading Covid-19 to those both vaccinated and unvaccinated.

\* Pfizer and Moderna are messing with the menstrual cycle of many women – we are still unsure of the permanent side effects of this. I'm talking on behalf of my friend who's a school teacher when I tell you that she I received the shot as a teacher because She had the choice of getting vaxxed or losing her job (single parent, this would make a result in losing her house as well). (WHICH IS NOT A CHOICE IT IS COERCION AND GASLIGHTING!!) she is now having severe arm pain. Headaches, nausea and erratic, unpredictable, heavy non-stop menstruation as a result of the vaccine even

months later!

\* It takes many years for a vaccine to be fully tested, and now they are already trying to offer boosters on a still new and unknown shot. This should not be FORCED on children. It should be a choice! I in no way want my children to have this happen and risk their fertility and future choices.

\* The covid-19 virus keeps changing and having new variants that are not phased by the shot. Therefore, we are giving children shots with severe and unknown side effects that are not even helping the children (or adults) fight off the virus. As It continues to mutate.

\* Shots SHOULD NOT BE MANDATED FOR SCHOOLS – it should be a parent’s choice. Without you gaslighting us!!

\* LEAVE OUR CHILDREN ALONE!!

We will not stand for this!! We will not tolerate this!!

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an

unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

Hello,

I am a COVID recovered, tax paying, small business owner, mother of 2 & a very concerned American citizen.

What was supposed to have been a two week quarantine to flatten the curve has turned into a very scary stripping of our daily rights & livelihood. Now you are trying to force an injection that neither protects against the virus or stops the spread of the virus.

Numerous studies have shown those who have taken the shot are still susceptible to contracting & spreading the virus and in fact, are more susceptible to the variants than those with natural immunity.

If Washington was so concerned with the health of its citizens, why are we not campaigning for lifetime health? Instead of forcing an unproven vaccine on the populace & firing those who do not need or want the shot, you should be providing vitamins C, D-3, elderberry, zinc and promoting healthy eating & exercise. There should be other methods of treatment for those that have the virus. There are safe & effective medications & treatments available. Why are we not utilizing them? Why is this shot being pushed down all our throats as if it's the only option? Our state does not need a band aid. It needs a solution. The shot is not the cure-all it's pretending to be.

Those who want the shot, have gotten the shot. Those of us who have not, do not want it. Our body, our choice.

Never in a million years did I expect that our representatives would sell us down river to a bunch of pharmaceutical cartels. This is wrong and those who have not questioned this tyrannical behavior should be ashamed. You are not and have not been following "the science". Do your research.

This is turning into Nazi Germany before our eyes. The Nuremberg Code is a law in this country for a reason. It is unfathomable that Americans are being fired or being rejected at the door of different establishments for refusing to be injected with a dangerous gene therapy. Having to provide proof of a shot for entry is dehumanizing & discriminatory. It is wrong.

We have the right to our jobs without forceful injections. Children have the right to attend school and receive an education without forceful injections. Listen to your constituents. We have rights to make informed decisions with our bodies & our children. Without years of studies and proper process, there is no informed choice. No human being should be required to get an injection from a company that has no liability for its products.

Do what is right. We are a country founded on a constitution and we have rights that cannot be taken. Make our founding fathers proud and do what you know is right. Freedom of choice. Informed consent. Freedom to work. Freedom to education.

Thank you,  
Ashley Walker

To whom it may concern:

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Thanks,

Chris B Brown

Good morning Board Members,

My name is Val Stewart and I am commenting as a former teacher, parent, and grandparent. Early on, COVID-19 was indeed deadly but not for the children. An extremely small percentage of children were vulnerable to COVID-19 and needed protection, but not all of them.

From the standpoint of the three areas of consideration for evaluating whether COVID-19 vaccine should be mandated for school entry, it has failed the test on all counts in my opinion. Vaccine Effectiveness is waning especially in light of the latest variant which continues to evade even the boosters on the most part. In regards to Disease Burden, mortality and morbidity of this subset of the population is miniscule. And then Implementation which involves testing, keeps changing. How can you even tell whether tests can actually measure antibody levels from either having had COVID or the vaccine? PCR tests also have been problematic and inconsistent across our state with varying cycle thresholds for positive determination.

A parent should not be forced to vaccinate their child with these experimental vaccines. This genetic vaccine forces the child's body to make spike proteins which could cause permanent damage in children's critical organs and potentially trigger fundamental changes to the immune system. This mRNA technology has not been adequately tested. So are you really willing to continue this experiment on our kids? There is no benefit for forced vaccination of children against the small risk of the virus. Their natural immunity could actually contribute to herd immunity which would benefit us all. Mandating these vaccines could do more harm than good at this point.

In summary, I **OPPOSE** Agenda Item #8, the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for schools. And I support agenda item # 11. Please leave the ultimate choice of whether to vaccinate a child with any COVID-19 shots to the parents.

Thank you for your due diligence and consideration.

To whom this may concern,

I come to you as a concerned parent of a child who attends a Washington school in Grays Harbor county. I know there has been a lot of discussion about the mandate for the covid vaccine but I urge you to understand that as an adult with a religious exemption this has been a huge struggle for me. I am unable to get the vaccine due to my religious status and beliefs. I have been faced with the decision to stand by my beliefs or face dismissal from a sonography program. It has been the hardest decision of my life, I could have wasted 4 years of education and thousands and thousands of dollars on tuition. However, "if Jesus Christ be God and died for me, then no sacrifice can be too great for me to make for Him". Now that my exemption has been accepted and I am able to continue my clinical rotation I plead with you. Please do not make the mandate mandatory for children ages of 5 and up. Please do not make it mandatory for us to decide whether our children get an education or they be experimented on. These are stressful times enough. I don't think Washington State realizes how many parents will fight back, how many teachers will lose amazing students and how many students will lose amazing teachers. I don't want to have to quit everything I've worked for or have all these hoops I've jumped through be wasted just to home school my children. I am going to be a well educated tax paying medical professional that can only benefit our state. I see no outcome for our future that is positive with this mandatory vaccine mandate. Let us parents decide what's best for our children. This may make no difference but I but I had to at least try. If any of you would like to reach out to me please feel free otherwise I

appreciate your time and consideration.

Sincerely a loving Washington parent

I lost my job as an electrician due to Jay Inslee's vaccine mandates. Scare tactics that people are quickly wising up to. Time to fight back to your and your team/s continuing to spread fear. Enough is enough, the massive overreach of control needs to stop. You and your teams work for WE THE PEOPLE! I can go on about friends and family who are planning on moving. My family is one of them due directly from Jay Insee's hand picked team which is 10 of 11 of you.

So far your team can't even show up to the zoom meeting on time. 20 minutes late! These are basic needs we need from your team and colleges.

Very unprofessional, lets consider you as well as your team changes focus from controlling the people that employ you to actually bettering the state of WA. health practices and standards of un communistic rule you have been swayed to believe in. I do not believe in your science narrative, when science is not being able to question, it is not science, that would be propaganda.

Time for change and time to release your reins of unrealistic expectations and rule over WA.

Rick G.

Honorable Members of the Board of Health of the State of Washington,

WAC-246-100-040

The Board of Health is an appointed body of health experts, (Article XX Section 1 Board of Health and Bureau of Vital Statistics)

Please explain under what section or article of the Washington State Constitution is the following permitted under WAC-246-100-040?

Why hasn't Washington State been declared a dictatorial regime, with the abolition of the Washington State Constitution, before such heinous acts are committed? Am aware the USA has its share of genocide! Trail of Tears (1830-1850) The Long Walk (1863-66) Internment of persons of Japanese origin (1942).

Washington State to launch strike force teams to "involuntarily detain" anyone who isn't vaccinated... covid internment camps already active – NaturalNews.com  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.naturalnews.com%2F2022-01-11-washington-strike-force-teams-involuntarily-detain-unvaccinated.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C77a2eabeed674e332c0408d9d60c72c5>>

WAC-246-105-040

Why does the WA Board of Health not consider available therapeutics?

Why are therapeutics not included in the WA Board of Health presentation?

The following are military documents from DARPA:

Speaking during remarks to a J.P. Morgan healthcare conference this week, Pfizer CEO Albert Bourla openly stated current vaccines the company developed for Wuhan coronavirus offer "limited, if any" protection against contracting current variants of the disease.

Pfizer CEO on the vaccine that the U.S. government wants to mandate for the entire population:

"Two doses of the vaccine offers very limited protection, if any. 3 doses with a booster offer reasonable protection against hospitalization and deaths."

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fpic.twitter.com%2FbfIGbJWFzh&da>

(<https://townhall.com/tipsheet/katiepavlich/2022/01/11/pfizer-ceo-our-vaccines-offer-little-protection-n2601670>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftownhall.com%2Ftipsheet%2Fkatiepavlich/2022/01/11/pfizer-ceo-our-vaccines-offer-little-protection-n2601670&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C77a2eabeed674e332c0408d9d60c72c5%7C110>

)

Does repetitive booster doses of Covid-19 legally constitute 'drugging' a population?

Why are Universities in Washington State mandating Covid-19 vaccines for fully online courses?

There will be a Day of Reckoning!

Thank you for your time.

To whom it may concern,  
I am a very concerned Washington resident. We have been living through this for years now and the mandates stay the same, even though new information comes to light. Why is that? We are still in these silly cloth masks that do little to nothing. It's the definition of insanity to continue doing the same thing, expecting different results.

We need to stop the mandates and let people breathe fresh air! It really makes me sick to see children forced to wear these masks and I think it's child abuse. We all need to see faces. Everyone that wants a vaccine knows where to get one and many of us had COVID. When are you going to recognize that??? When are

It blows my mind that you are mandating vaccines to certain groups at this point. Forcing someone to put something in their body that may injure or kill them is NOT acceptable. You've forced health care workers when they were already spread thin and there was a nursing shortage. That makes zero sense. People can say "it's just a small percentage that quit or were terminate" and it doesn't matter. One is too many! It's hard to feel sorry when we hear that the hospitals are overwhelmed when we know this happened.

I think many of us are very frustrated and don't feel like you are listening! STOP THE MANDATES NOW!! Many of us have left Oregon & Washington and I don't want to. I'm born & raised in Oregon. This is my home. I'm a responsible adult. And I'm tired.... We all know what we are dealing with. If you want to get the jab, wear a mask, heck wear 2, that's fine, but stop making us all do it. We aren't sick!! Stop the madness already!

Thank you for your time.

Sincerely,

Shawna Dennis

The data on harms to children from the experimental gene therapy injections are mounting every day, including myocarditis in boys. You are well aware of the high incidence of the myocarditis and you are still driven to put this in every arm. The vaccines have failed. You are now more likely to get Covid, especially Omicron, if you are vaccinated than if you are not vaccinated. This must stop. It is no longer about Covid or injections.....this is about God given rights guaranteed in our Constitution. Stop the insanity.

BK

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&data=>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

1. Why would you engage law enforcement to move a person or group to a quarantine facility for COVID when the cases being reported at this time are of the Omicron variant, mild and non-fatal? People are recovering at home. When did we become a police state? Omicron is a "saving grace", an opportunity to receive natural immunity - even herd immunity. This proposal is nothing more than another step at removing our God-given freedoms, let alone those provided in the Constitution. You are acting as though we are ignorant and need your control and power. What about the mandate issues before the Supreme Court? What about the ruling in favor of the 35 Navy Seals? What makes you think Washington State is above all others, including God? You say there will be exemptions that people can apply for; however, we have seen how that goes (ignored and negated).

2. Are you not paying attention to the doctors who are explaining about the vaccine for children and the determinants thereof? What do you know about the future problems the children who receive the COVID vaccine will face? If children get sick, let them stay home to recover. They are much more resilient than adults - they have the opportunity for natural immunity as well. And what about "follow the money". Vaccine producers are pushing recommendations to vaccinate children so they can maintain their liability protection if the vaccine is fully approved. (Robert F. Kennedy Jr.) The choice for vaccinating children should rest on the parents and that decision based on a conversation with their family doctor and full knowledge of what the vaccine entails - not a "one size fits all".

While I cannot do anything about your position, I can do something about my vote. You say you are not making any decisions on these matters at this meeting; however, I'm sure you will continue to consider making them law. I pray you do not go ahead with any positive decision on these matters but throw out this ideology.

Thank you.

To Whom it may Concern,

As of a day ago you stated that the k-12 vaccination and the detention of non-compliant individuals by law enforcement would be discussed at today's meeting. Is it unacceptable that you conveniently have a misunderstanding of the agenda at the last minute. There are over 4,000 people watching your meeting that most likely oppose your mandates so seems like a way to hide your agenda! Are you going to let us know when you decided to discuss these issues or will it be behind closed doors? The people of Wa state do not want your mandates and the government to control our choice! Stop pushing your political agenda and start listening to the people.

Please kindly respond with answers to my questions above.

Thanks

Nicole Bishopp

I'm listening to your webinar today, January 12, 2022. You seem 100% intent on promoting vaccines for everyone, including children. I'm stunned by your bias toward vaccines and also your total misunderstanding of how mild Omicron is! I'm attaching research and data that should give you an alternative point of view. Hopefully you will read it with an open mind and realize just how dangerous to the public your policies have been and continue to be. Other states with less draconian measures have fewer reports of death and a healthier public overall. Thirty seven (37) states are fully open as of January 10, 2022. <https://www.aarp.org/politics-society/government-elections/info-2020/coronavirus-state-restrictions.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.aarp.org%2Fpolitics-society%2Fgovernment-elections%2Finfo-2020%2Fcoronavirus-state-restrictions.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Ccb94f161e1ef463ebdaa08d9d5fdbfbb%7>>

Stop with the vaccines until they can be proven to be safe! Stop with the masks! Stop with the fear mongering over Omicron. Just STOP!

Gayle Baker

Washington State Board of Health  
Comments to Public Meeting

Comments to the BOH  
Regarding Vaccine Recommendation by BOH

For the past fifty years the U.S. Government has epically failed at most everything it is in charge of and that includes: Local Boards of Health, FEMA, Illegal Immigration and Border management, Amtrak, U.S. Postal Service, losing wars in Vietnam and Afghanistan, public education, voting and election integrity, forest management and, finally, the CDC's, FDA's, and NIH's corrupt and illegal approach to the man-made pandemic. The government has failed us time and time again with its incompetence, overspending and .

The "Vaccine" is not really a vaccine, but rather an untested, unproven, DNA altering, biological, human experiment with no possibility of compensation should this "vaccine's" side effects, short and long term, prove to be as dangerous as some vaccines historically are.<sup>1</sup> In fact, the COVID "vaccines" are showing signs of serious side effects, including deaths.<sup>2</sup>

The COVID "Vaccines" DO NOT protect anyone from getting COVID or transferring COVID to anyone else.<sup>10</sup> The government downplays that fact. What the COVID "Vaccine" does appear to do is REDUCE YOUR SYPTOMS and may therefore prevent hospitalization and/or death. But, is the "Vaccine" less or more harmful than COVID? That's what we don't and won't know for years to come. The CDC reports that of 540,667 COVID patients from the period of March 2020 to March 2021, 95% had an underlying factor contributing to their death.<sup>3 4</sup> In other words, if you're fit and healthy, no matter your age, you have a very good chance of surviving COVID.

The CARES act incentivizes hospitals to report a patient as having COVID even though they may have a common flu or pneumonia related to flu but unrelated to COVID. According to the U.S. Department of Health and Human Services: *"The CARES Act created the 20% add-on to be paid for Medicare patients with COVID-19. The act further created a \$100 billion fund that is being used to financially assist hospitals — a "portion" of which will be "used to reimburse healthcare providers, at Medicare rates, for COVID-related treatment of the uninsured."*<sup>5</sup>

Why are those that have already had COVID and now have natural immunity from COVID not given the same consideration as those who are vaccinated? The authors of a recent study (September 5, 2021) out of Israel compared the outcomes of more than 800,000 people covering Mar. 1, 2020, through Aug. 14, 2021, concluded: *“This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity.”*<sup>6</sup> It should be noted that the study only addresses the Pfizer vaccine but it did echo previously published studies on the effectiveness of natural immunity over vaccines.

Note: A cheap and quick antibody test can determine if you have COVID related antibodies. That test does not differentiate between the “Vaccine” and someone who has had COVID and recovered. However, there is a T-cell test that can differentiate.<sup>7</sup>

Follow the money--What all vaccines have in common is they make the producers of vaccines very wealthy. What better way to keep that money flowing than to make vaccines mandatory? In 2020 the top twenty pharmaceutical companies worldwide made over \$680 billion in revenue. In 2019 Johnson & Johnson, a U.S. company and highest revenue earner of the top 20, made an astounding \$82.6 billion!<sup>8</sup> It should be noted, that in July 2021, Johnson & Johnson, one of the Big Pharma vaccine manufacturers, that cannot be sued now or in the future for COVID vaccine related side effects, including death, settled the “J&J Big Pharma Opioid lawsuit” for \$26 billion.<sup>9</sup>

The three biggest COVID vaccine suppliers, J&J, Pfizer and Moderna charge an average of \$20 per dose. In the US that equates to conservatively \$4.2 billion in revenue in the past 18 months. Worldwide, that figure is between \$80-\$110 billion due to the different contract pricing structures of each country.<sup>10 11</sup> There are forty newly minted billionaires worldwide in COVID related businesses since the onset of the COVID pandemic, nineteen of them Chinese.<sup>12</sup> In the first quarter of 2021, Big Pharma spent \$14 million on lobbying in the halls of the United States Congress and they have spent over \$6 billion in the last 20 years.<sup>13</sup> Of course Big Pharma wants vaccines mandated and of course they will lobby your government representatives to ensure compliance. You should ask, who amongst our politicians is taking the money and in what form? Pharma stock?

<sup>13</sup> <https://www.opensecrets.org/news/2021/07/big-pharma-largest-lobbying-spender-biden-crackdown/>

Alternatives to vaccines exist, but they are blocked by the FDA, CDC and, until recently the NIH. In a report in *The American Journal of Therapeutics* (July-August 2021), Ivermectin is just one alternative to have been found to be effective against COVID: *“A review by the Front Line COVID19 Critical Care Alliance summarized findings from twenty-seven studies on the effects of ivermectin for the prevention and treatment of COVID-19 infection, concluding that ivermectin “demonstrates a strong signal of therapeutic efficacy” against COVID-19.”*<sup>14</sup> Following extensive studies and a presentation before NIH by the physicians group, Front Line Covid-19 Critical Care Alliance (FLCCC), it was announced on January 14, 2021, that Ivermectin has been approved by NIH, making it an “option” for the treatment of COVID. In a presentation before the Department of Homeland Security, Dr. Pierre Kory, a founding member of the FLCCC, and his team testified before the U.S. Senate Homeland Security Committee in favor of authorizing ivermectin, a “Nobel Prize–winning anti-parasitic agent, for early treatment of the novel coronavirus. In his impassioned presentation, Dr. Kory explained that ivermectin **“basically obliterates transmission of this virus,” with “miraculous effectiveness.”**<sup>15</sup>

Despite these findings, the FDA<sup>16</sup> and CDC<sup>23</sup> stated in August 2021 that “there are insufficient data to recommend either for or against the use of ivermectin for the treatment of COVID-19, and the World Health Organization recommends against its use outside of clinical trials.” It seems that the FDA is focused entirely on the use of “Vaccines” to treat COVID and as late as September 3, 2021, has doubled down on its bias despite evidence of the “miraculous effectiveness of Ivermectin”.<sup>17</sup>

Could it be because the FDA gets kickbacks from pharmaceuticals in the form of “User Fees”? We are talking BIG MONEY and the more vaccines sold the more money the FDA receives to keep its bureaucracy going. *“Between FY2017 and FY2021, FDA’s enacted annual total program level (excluding amounts enacted in supplemental appropriations measures or in the American Rescue Plan Act) increased from \$4.745 billion to \$6.05 billion. Over that time period, congressionally appropriated funding increased by 18%, while user fee revenue increased by 42%.”*<sup>18</sup> From the time COVID “vaccines” became available (and now mandated) during the year 2021, user fee revenue has increased by 42%! User Fees account for over 45% of the FDA’s total budget. In other words, the more vaccines sold, the more money the FDA collects. Additionally, the CARES act added another half a billion in revenue over a nine-year period from 2017–2025. Likewise, CDC and NIH benefit from this pandemic. Budgets for all three agencies have skyrocketed in 2021 and 2022. NIH’s budget for 2022 is \$52 billion and the CDCs is \$55.1 billion.<sup>19</sup> Much of the CDC’s budget is in the form of wealth redistribution or “equity” allowances to Tribes and by “addressing disparities”.<sup>20</sup>

<sup>23</sup> [https://emergency.cdc.gov/han/2021/pdf/cdc\\_han\\_449.pdf](https://emergency.cdc.gov/han/2021/pdf/cdc_han_449.pdf)

<sup>17</sup> <https://www.fda.gov/consumers/consumer-updates/why-you-should-not-use-ivermectin-treat-or-prevent-covid-19>

<sup>18</sup> <https://www.fda.gov/about-fda/fda-basics/fact-sheet-fda-glance>

<sup>19</sup> <https://officeofbudget.od.nih.gov/br.html>

<sup>20</sup> <https://www.cdc.gov/budget/index.html>

Please Note: Merck Pharmaceutical is the original patent holder for Ivermectin; however, the patent has expired rendering the drug cheap and readily available around the world (except the US) without prescription. In other words, there is no financial incentive for Merck or the FDA (which receives “User Fees” from Big Pharma) to prescribe Ivermectin as treatment against COVID. Ponder that for a moment...the FDA DOES NOT ALLOW IVERMECTIN as treatment or prevention against COVID 19. Currently, Merck is awaiting approval from the FDA for a NEW wonder drug as an effective treatment and preventative drug against COVID 19.<sup>21</sup> If you do not see the connection between Ivermectin, Merck and the FDA then you are blindly and woefully ignorant and should not be reading this report. The FDA and BIG Pharma would rather people die than lose its cash cow “Vaccines”. It has been reported that Merck will be charging hospitals \$700 a dose for this “new” drug (forty times what it costs Merck to produce),<sup>22</sup> as compared to Ivermectin at less than \$30 for a pack of twenty tablets.

Finally, and most importantly, it is a matter of protecting our freedoms under the Constitution of the United States of America. When we abdicate our right to make medical decisions for ourselves, we abdicate all our guaranteed freedoms. It is not and should not be shameful to be patriotic. We cannot take for granted that this is a “one off” mandate by our government to protect us from COVID. This is a slippery slope downward to communist control over our daily lives and the beginning of the end to a way of life that has been, up until now, arguably, the greatest in the history of the world. Washington state is one of the most draconian in its approach to COVID with unprecedented restrictions that have not proven to be successful in reducing COVID transmission or prevention of death. I reiterate, one of the reasons for the death rate is the inaccurate reporting of death by COVID when there are many, many underlying causes for the death.

Subject: FW: Today's webinar: Vaccine Isolation & Quarantine Camps, Vaccine Mandates

External Email

To whom it may concern,

Some of the attendees expressed harsh sentiments toward the organizers of the public forum. It is my view that the WSBOH members present handled themselves in a professional manner considering some of the vitriol directed your way. It probably is not the purview of the WSBOH to write policy or author bills that are presented for legislative debate & voting on the floor of the legislature in Olympia. To that end, I believe there are a couple reasons why so many of your fellow citizens were compelled to speak candidly & passionately (though their anger is misdirected).

As a lifelong Washingtonian, born in Lynnwood & raised in Winthrop & Okanogan, I reside in Everett. My first and last concern as it relates to Covid is for the health, safety, and longevity of all Washingtonians. Of course I want people to be safe.

Following are the reasons I object to the vax camps, masking, and vaccination mandates:

1. No emergency lasts two years: medical or otherwise, the only other time in world history when a public health emergency spanned the course of two calendar years was during the dark ages when the Black Plague engulfed western Europe, killing more than half the population.
2. Any decree by an elected official, declaring a medical emergency should come with it, the full weight of merited science. But the fact is that more than half the mortality caused by SARS-Cov2 was a direct result of the NIAID, NIH, and the FDA barring the use of successful early-treatment protocols from medicines that have existed for 40 & nearly 60 years, respectively. Doctors were told to send patients home with no out-patient treatment put in place.
3. Countries like India have given their entire population IVM as the main component of a prophylaxis treatment against Corona Virus & witnessed a decline in cases, hospitalization, and death by nearly 90% within the first 2 weeks. This is a country with a vaccinated population of less than 10%.
  - a. Why does India have a lower total death toll per capita than the US? Are we not a more advanced country?
  - b. Why did El Salvador go door to door & give every person over the age of 6 two weeks' dosage of Ivermectin?

c. Why does the US govt give Ivermectin to immigrants entering the US without paperwork?

4. There is no accounting for natural immunity. The state wants everyone to get vaccinated when the efficacy of the vaccine & its ability to prevent future strains is either unproven at best or unknown (due to its being only in use just over 1 year)?

5. There are 25 scientific, peer-reviewed double-blind studies that prove cloth & KN95 masking does not prevent transmission of a virus. I have a box of N95 masks that states on its side that these are not intended to prevent viral transmission. It's on the box!

In summary, the vast majority of deaths in the United States attributed to Corona Virus were caused by a gap in early treatment protocols. Some scientific studies estimate that as high as 600,000 deaths are attributed to the govt agencies tasked with protecting & preserving human life have not, to this day, authored a comprehensive early-treatment protocol to maximize life-saving measures. Why?

If the State were to give every resident a 2 week dose of Ivermectin, our case rates would drop to the lowest in the nation within 2 weeks. There are more than 25 US-Based independent, double-blind placebo trials that validate this claim. The only justification for not administering this life-saving treatment for continuing with mandates that do not work is to maximize the profits of Big Pharma.

To those who are suppose to represent the wishes of their constituents in the state of Washington!

If you try to mandate that all students be vaccinated it will open the floodgates of parents removing their children from public schools. I am vehemently opposed to these mandates, as well as any forcible quarantining of free citizens. These mandates and actions are unconstitutional and any effort to implement these policies will be met with strenuous opposition from the free citizens of the state of Washington.

To whom this may concern,

I come to you as a concerned parent of a child who attends a Washington school in Grays Harbor county. I know there has been a lot of discussion about the mandate for the covid vaccine but I urge you to understand that as an adult with a religious exemption this has been a huge struggle for me. I am unable to get the vaccine due to my religious status and beliefs. I have been faced with the decision to stand by my beliefs or face dismissal from a sonography program. It has been the hardest decision of my life, I could have wasted 4 years of education and thousands and thousands of dollars on tuition. However, "if Jesus Christ be God and died for me, then no sacrifice can be too great for me to make for Him". Now that my exemption has been accepted and I am able to continue my clinical rotation I plead with you. Please do not make the mandate mandatory for children ages of 5 and up. Please do not make it mandatory for us to decide whether our children get an education or they be experimented on. These are stressful times enough.

I don't think Washington State realizes how many parents will fight back, how many teachers will lose amazing students and how many students will lose amazing teachers. I don't want to have to quit everything I've worked for or have all these hoops I've jumped through be wasted just to home school my children. I am going to be a well educated tax paying medical professional that can only benefit our state. I see no outcome for our future that is positive with this mandatory vaccine mandate. Let us parents decide what's best for our children. This may make no difference but I but I had to at least try. If any of you would like to reach out to me please feel free otherwise I appreciate your time and consideration.

Sincerely a loving Washington parent

Subject: DO NOT Mandate Covid 19 Vaccine

External Email

I am writing to you as a parent who believes in the public school system and the value it brings to our children. I implore you to NOT implement a COVID19 vaccine for school-aged children. The data DOES NOT support the danger of this disease to children. We have vaccines for adults to protect themselves with now. There is absolutely NO scientific reason that children should be required to receive a vaccine that does not have long-term data to back the efficacy or potential side effects that may present years down the road.

This administration has done a poor job articulating WHY this conversation is even happening. We can only assume it is strictly for control and a deep desire to "be right" and cause conflict. If you care about the people of Washington State and being a small step forward to healing our nation of the massive divide this illness has contributed to, you will allow parents to make the best medical decisions for their own children.

I ask you to please consider my position on NOT MANDATING COVID 19 VACCINES TO SCHOOL CHILDREN for 3 very simple reasons.

1. Vaccines are widely available for those that chose them and feel that is their only protection.
2. We are watching these variants lose their steam and become less lethal. This is attributed to both immunities occurring from vaccines as well as recovered infections.
3. Children are not in inherent danger of severe illness.

Thank you for your time,  
Amber Gerard

The data on harms to children from the experimental gene therapy injections are mounting every day, including myocarditis in boys. You are well aware of the high incidence of the myocarditis and you are still driven to put this in every arm. The vaccines have failed. You are now more likely to get Covid, especially Omicron, if you are vaccinated than if you are not vaccinated. This must stop. It is no longer about Covid or injections.....this is about God given rights guaranteed in our Constitution. Stop the insanity.

BK

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an

unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

To:  
Subject: NO Vaccine Mandates for Children

attachments\B933E38A4FDC4712\_Outlook-lbxvjkt.png

External Email

Do not mandate that our children be vaccinated against Covid-19. Do not add the Covid-19 vaccine to the list of required vaccines to WAC 246-105-030. The illness has negligible effects on children, but the Emergency Use (currently) vaccine has vast detrimental effects on children. Dr. Robert Malone, who is vaccinated himself, strongly discourages the use of the vaccine on children.. Dr. Robert Malone pioneered the mRNA technology and has 10 patents on RNA, DNA, and genetic vaccines, said that the vaccine "forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system
- Their heart and blood vessels, including blood clots
- Their reproductive system
- And this vaccine can trigger fundamental changes to their immune system...
- This vaccine can cause reproductive damage that could affect future generations of your family."

Vaccine mandates also violate our liberties guaranteed in the United States Constitution. Mandates are illegal based on the Nuremberg Code, the Helsinki Accord, and the Belmont Report.

To mandate a vaccine for an illness that does not affect healthy children, and which vaccine has an unprecedented risk of adverse reactions, is reckless endangerment. Here is a summary of the Covid-19 vaccine adverse reactions reported through VAERS, from [openvaers.com/covid-data](https://openvaers.com/covid-data):

A Wall Street Journal article cited a comprehensive study of children in England: "Some 99.995 percent of the 469,982 children in England who were infected (with COVID-19) during the year examined by researchers survived." Since kids don't get seriously ill from COVID-19, why is a dangerous vaccine even being considered? It makes no logical sense.

Thank you for your consideration.

Sincerely,

Trina Hottes, voter and concerned parent

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral

pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be

completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

I am writing you to let you know that I oppose the Covid vaccine mandates for children. Most children handle this virus very well (my daughter had it and it was like a cold). The vaccine has many adverse side effects and it's not worth the risk in my opinion. People should have the right to weigh risks vs benefits and make choices for themselves.

Thank you,  
Aimee Facchini

Please do not have a mandate against Washington remote worker citizens.

wsboh@sboh.wa.gov

My doctor does not recommend the vaccines or booster, that should be enough for not taking it and keep being employed and pay Washington taxes.

Washington State Board of Health-

My husband and I are writing in opposition to the vaccine mandate, which is being discussed on Jan 12. I have three children in the Cheney school district, ages 8-14, and they will ALL be pulled from school if this mandate is approved. And I do NOT want to homeschool!

These vaccines have only been approved for children this age for around 3 months. I am still not comfortable giving this vaccine to my children not knowing the long term side affects. I am fully vaccinated so I am NOT ANTI-VAX. But when it comes to my children I am a bit more hesitant.

Statistically speaking children are at a minuscule risk of dying, or even hospitalizations, when it comes to Covid. There are known vaccine side affects in children, albeit rare. What side affects are to be found in 2022? Or later down the road? Covid is not extremely deadly with our children. Otherwise I would have my children take the vaccine and risk the side affects!

This is a difficult decision for our family to make, but risking their health over something that is, currently, a harsh cold, doesn't seem worth it.

Please consider our, and others point of view on this.

Thank you  
Matt and Sharon Bridges

If people who have taken the shots can still spread and become infected with covid variants, and there are treatments available for those who become ill, and the survival rate is over 99.5% for most otherwise healthy people, why do we still have the mandates, and when will the State of Emergency be lifted?

I know many people who have tested positive, and been sent home without treatment, so why is the testing so important?

What difference is in the tests between Delta and Omicron?

How much money does Washington state receive for each covid 'case'?

Thank you.

Sini.

How can we allow countries to mandate the use of vaccines which are in all technicality still in phase 1 testing which generally takes about 2 years. According to the Nuremberg Code, those who choose to participate in experiments are required the right of choice without coercion. History must not repeat itself. So at this time with a vaccine that has been showing more and more limitations in its gain vs risk and no long term data, this is not an advantageous situation. As per the Nuremberg code, I respectfully request to be removed from your test study(experiment).

If you have any questions, my number is 13606433804

Dear Health Board,

This comment will probably not be considered in your decision about COVID vaccines for our youth, as I missed the date.

However, I decided to write anyway. I ask you to please not mandate these vaccines for children. All of the current days does not warrant it. I am not going to take the time to put the facts in here. If you are following the CDC, this is the only conclusion you can come to.

I am not an anti- vaxer, however, I do think there needs to be much more teatime on this vaccine before it's given to our youth. We have NO long term data to know if there are long term affects. This could be critical for out youth!

Thank you.

I have just listened to a lot of the public comments and some of the live stream. I really hope you guys are listening. We the people are shouting from the roof tops that we don't want mandatory, emergency use, experimental drugs/shot mrna gene therapy (not a vaccine) forced on us or our kids. We've seen the Vaers reports/under reports, we've seen videos and statements of the vaccine injured this shot is dangerously unsafe.

I also do not see a need to change compulsory school attendance. Or force an experiment on our precious children in order to be allowed to attend school, preschool, or daycare.

Following orders is no excuse. Nuremberg 2.0 is destined to happen so I hope you do the right thing. Inslee is pushing people to the brink with this stuff, and I hope all of you elected public officials hear us loud and clear. You will not be re-elected if you continue pushing these things that we do not want nor voted for. You work for us you do not work for Jay Inslee. And whether Jay Inslee believes so or not he also works for us.

We the people do not want these mandates! We the people do not want these WAC codes old or updated. Listen please!

+++++

Dear Washington State Board of Health,

WE THE PEOPLE have GOD-GIVEN rights that are protected under the United States Constitution.

We have been lied to consistently regarding the COVID-10 Plandemic – Your propaganda does not MAKE SENSE.

WE THE PEOPLE are following the money – why are HOSPITALS making money from covid deaths? Why are vaccine makers exempt from liability from adverse reaction claims?

Why are people that DIE with COVID being reported as a COVID death? Your Lies do not make sense.

We Trust Science – I DO trust in Science BUT:

COERCION is not science.

Withholding Data is not science.

Manipulating Data is not science.

Cherry-picking Studies is not science.

Social Conditioning is not science.

Fear Mongering is not science.

AND, Censorship is not science.

Our Constitution and the Nuremberg Code protect Individual Rights and Liberties.

The current Mandates VIOLATE the Constitution and the Nuremberg Code. Do not think for a moment that WE THE PEOPLE will not GO AFTER YOU for the CRIMES AGAINST HUMANITY that are currently being enforced. You will not be able to say that you did not know. YOU ARE UNDER NOTICE!!!!

WE THE PEOPLE WILL FIGHT FOR OUR CONSTITUTION RIGHTS!!! ALL OF OUR RIGHTS.

INDIVIDUALS RIGHTS MUST BE RESPECTED.

DO NOT MESS WITH US – DO NOT MESS WITH OUR CHILDREN.

STOP THE MANDATES -

There is NO emergency! We know that COVID IS A REAL THING HOWEVER, it is NOT as deadly as the propaganda claims. This is not a health thing - IT IS A CONTROL THING!

YOU ARE NOT ELECTED OFFICIALS and do not make law.

The niceness that we are presenting currently will end soon if the mandates do not stop.

Let's GO BRANDON.

Subject: No Vax Mandates!

External Email

No Vax Mandates in public schools! And No Vax mandates anywhere else!!

- The so called Covid-19 Vax in US market is NOT CDC approved, it's only EUA! The only Covid-19 Vax that was approved by CDC is NOT available in US market. So all the Covid-19 Vax in US marketing is just an experiment drug!

- The option to refuse to vax is based on Federal Law over EUAs -- you are violating Federal Law if you mandate the EUA vax.

- You will face criminal charges by knowingly mandate a EUA vax and knowingly violating Federal Law!

- This is also a directly violation of Nuremberg Code by mandating an experiment drug on people without their consent.

If you study history, you will know that you are individuals will bear the consequences if you carry out actions to knowingly harm people and commit crime against humanity. "Taking order from above" is NOT an excuse for your own actions.

History will judge you and GOD will judge you. So please think of yourself before you commit the crime!

Subject: Support for Vaccinations for school requirement

External Email

Hello. I just wanted to add my vote in support of having vaccinations for school students (and teachers). This definitely includes COVID shots, as long as we are in a pandemic situation. When we reach the stage where COVID is acting like a flu, then we should consider removing it from "required".

I will also add my opinion on the masks. I know they are unpopular with many... but as a 28 year educator... having everyone wear masks this year cut out on so many more "bad bugs" than COVID. My annual Strep Throat did not happen, two years in a row! Wiping desks down and masking has helped keep attendance up. You will never keep it up, but I'm just wishful thinking that we could.

Thanks.

Christine McKinnon

Subject: Concerned taxpayer

External Email

Hi Christy,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

Subject: The covid vaccine

External Email

Why are you guys not looking into the bad side effects of the covid vax? It has not been proven safe or effective at all. I've known of too many people who have died, or had serious damage from the vaccine. It is not FDA approved, or went through the 5 - 10 year testing period, therefore no government agency or state actor can mandate it. All the lab animals they tested it on DIED. It is also unconstitutional to force vaccinate people without their consent. This is also a violation of the Nuremberg Code. It does not prevent covid.

This discussion at the Board of Health so far is not a fair hearing from both sides addressing the safety of the vaccine, nor does this honor our constitutional rights. You have not honestly without bias studied the dangers involved, or what is really in the vaccines. It does not work.

Subject: Covid vaccine mandate children

External Email

To whom this may concern,

I come to you as a concerned parent of a child who attends a Washington school in Grays Harbor county. I know there has been a lot of discussion about the mandate for the covid vaccine but I urge you to understand that as an adult with a religious exemption this has been a huge struggle for me. I am unable to get the vaccine due to my religious status and beliefs. I have been faced with the decision to stand by my beliefs or face dismissal from a sonography program. It has been the hardest decision of my life, I could have wasted 4 years of education and thousands and thousands of dollars on tuition. However, "if Jesus Christ be God and died for me, then no sacrifice can be too great for me to make for Him". Now that my exemption has been accepted and I am able to continue my clinical rotation I plead with you. Please do not make the mandate mandatory for children ages of 5 and up. Please do not make it mandatory for us to decide whether our children get an education or they be experimented on. These are stressful times enough. I don't think Washington State realizes how many parents will fight back, how many teachers will lose amazing students and how many students will lose amazing teachers. I don't want to have to quit everything I've worked for or have all these hoops I've jumped through be wasted just to home school my children. I am going to be a well educated tax paying medical professional that can only benefit our state. I see no outcome for our future that is positive with this mandatory vaccine mandate. Let us parents decide what's best for our children. This may make no difference but I but I had to at least try. If any of you would like to reach out to me please feel free otherwise I appreciate your time and consideration.

Sincerely a loving Washington parent

The data on harms to children from the experimental gene therapy injections are mounting every day, including myocarditis in boys. You are well aware of the high incidence of the myocarditis and you are still driven to put this in every arm. The vaccines have failed. You are now more likely to get Covid, especially Omicron, if you are vaccinated than if you are not vaccinated. This must stop. It is no longer about Covid or injections.....this is about God given rights guaranteed in our Constitution. Stop the insanity.

BK

Dear Board Members,

I was waiting in line to comment with the other 7800+ about the regulatory suggestions and AWACs regarding communicable diseases. I am the PCO GOP for 2-127th. I am also an army veteran who was vaccine injured by the military. I am hoping you are listening to the constituents who commented today.

I can tell from the comments after you shut us down for commenting you basically dismissed EVERYONE's comments. Thousands were waiting to tell you what we are doing is WRONG. You simply dismissed them. That is going to be costly to you. Your dismissal of those who are angry and concerned about what you are doing is going to have more and more determined to not comply or flat out dismiss anything you put out as potentially helpful.

DO NOT FORCE THESE MANDATES. DO NOT FORCE VACCINES NOR MASKING.

Washington State Health Board,

I oppose any forced Covid-19 vaccine mandates and any further lockdowns for children. I oppose using health officers and law enforcement to force children to be detained involuntarily to be isolated or quarantined in any facility. I oppose forced medical examinations, forced testing, forced treatment, forced counseling, and forced vaccinations. Stop the Forcing of any children, these are draconian measures not based on science but fear.

Save our freedom and reject these tyrannical measures on our children and changes to the state law and codes. I DO NOT SUPPORT REQUIRING COVID-19 VACCINATIONS FOR SCHOOL AGE CHILDREN or ANYBODY.

Please respond by email, the address below is not a mailing address.

Have a nice day and I appreciate all your work, just look at all the data - thanks!

Hello, we reside in King County (Kirkland, WA), and have a 6 year old who goes to kindergarten (fully vaccinated), and 2 year old (who is not yet eligible). With the exponential growth of COVID infections due to the increased transmissibility of the Omicron variant, we are very concerned for the health and safety of our family.

Therefore, we believe schools in Washington should increase their measures of mitigation: 1. Upgrade mask requirements for schools for all school staff, teachers, and students to masks that provide increased protection, such as N95/KN95 for adults, and KF94/KN95 or at least ASTM Level 3 surgical masks for children. 2. Mandate vaccines for anyone 5 years or older that will step into a Washington school, and require a booster dose for all eligible age groups. 3. Require schools to have snack and lunchtime outdoors. Provide resources to schools to help with procurement and operation of necessary facilities, such as rain cover and heaters. 4. Implement weekly testing for all staff, teachers, and children at all schools. We strongly believe in the importance of in-person learning of our children, and don't want to jeopardize that. But in light of the Omicron variant, we believe we will need to step up our game to face the next year in all Washington schools. Thank you in advance for your consideration.

The state of WA employees - work "FOR THE PEOPLE" -

You have explained "mis-information" about what was falsely rumored.

Please begin to be cognizant of the fact that there are treatments out there for "early treatment" of Covid - which has been claimed to be false and censored from media and censored.

The vaccines are NOT vaccines - they are emergency use only - and the Nuremberg Code states that never again will humans be used as "test animals"- which we have already violated. We should NOT have our children be sacrificed to this test!!

We are AMERICA. Our First Amendment Rights are being violated if we are "required" to take this test "vaccine" - it is NOT a vaccine because it does NOT prevent the disease NOR DOES IT PREVENT transfer of the disease.

Remember who you are - you ALL work for us. Remember who we are - Americans with rights and we are not subject to the government.

STOP THE MANDATES. STOP THE VACCINATIONS FOR THOSE WHO DO NOT WANT THEM. UNDERSTAND NATURAL IMMUNITY. HEAR THE PEOPLE FOR WHOM YOU REPRESENT - THE WORKING PARTY OF WASHINGTON STATE.

Why, if scientifically speaking, we know that each variant get's weaker and weaker as they develop, are we continuing to impose mandates when reaching herd immunity with this variant that is not very deadly at all, is the key to getting over this virus? What is the purpose of the mandates but to inhibit proper herd immunity?

This is in regards to the public health meeting on 1/12/2022.

There were many statistics given by people that work for the state in some capacity or another. One of them being as of 1/9/22 12 million doses of vaccine have been given out to more than 5.5 million people, as of 1/9 200,000 kids have received at least one dose and nearly 150k being fully vaccinated with our state having a population as of 2019 7.6 million. That make is well over half of WA vaccinated, yet the mask and vaccinations are doing nothing to help the prevention, transmission, or symptoms of COVID in any of the variants, yet the only thing that any of these professionals focus on is masking and vaccinations with very little discussion about how people can keep themselves healthy and no at all of early treatment of COVID. With Michelle stating that is the only way to keep school open, yet the vaccines have done nothing, they have had more negative affects than positive. Than to have another doctor state that natural immunity is not good enough, short lived, and unpredictable is ridiculous and the exact opposite of what the CDC, epidemiologist and many other professionals saying. They state that natural immunity is far superior and longer lasting than any synthetic vaccine. Regarding people going to the ER cause they are seeking test and with the state having spent a ton of money on in home testing kits, for kids to go back to school, or people to go back to work, or for people to travel the in home test kits are not considered valid. In regards to staffing shortages at hospitals, and every single other occupations in WA and across the country, how much of that shortage is attributed to the vaccine mandate? The statics and predictions that are given make no sense and are not helping the people of WA. If legislators, the governor and all the board members and everyone involved listened and read all the comments then they will realize what they are doing is the exact opposite of helping the people of WA. The people of WA have been greatly and negatively affected by the rules, mandates and the policies that have been put in place. The people of WA are getting tired and fed up with the way things are going at some point the tension will break and it will not be good.

Sarah Abraham

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an

unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

NCAA recognizes natural immunity in latest guidance, says recovered pati...

The NCAA has announced it's winter 2022 sports COVID-19 guidelines and has determined that athletes who had COVI...

Because of this, and the below additional information WA state should take a new look at our approach at Covid19, and should NOT use isolation camps as part of their approach since evidence is showing that getting vaccinated is actually spreading Covid19 faster. So forcing vaccination is not the answer.

Report by Major James Murphy, USMC Defense Advanced Research Projects Agency (DARPA),  
Biological Technologies Office

<https://assets.ctfassets.net/syq3snmxclc9/2mVob3c1aDd8CNvVnyei6n/95af7dbfd2958d4c2b8494048b488>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fassets.ctfassets.net%2Fsyq3snmx>

In this report he concludes that the vaccinations have no benefits in fighting the virus. He also mentions alternative methods to treating the virus that are more effective than the vaccinations

In this German Study, original German study translated into English is available as a PDF here

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.skirsch.com%2F covid%2FGe>

The authors write (translated into English): "The correlation is + .31, is amazingly high and especially in an unexpected direction. Actually, it should be negative, so that one could say: The higher the vaccination rate, the lower the excess mortality. However, the opposite is the case and this urgently needs to be clarified. Excess mortality can be observed in all 16 countries..."

Harvard Study Explodes Myths About 'Vaccines' Stopping the Spread – But It's Even Worse Than That | by Kyle Becker | Becker News

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ftheplantstrongclub.org%2F2021%2Fstudy-explodes-myths-about-vaccines-stopping-the-spread-but-its-even-worse-than-that-by-kyle-becker-becker-news%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C3d9109dda0d94ab9815708d9d5ebc790%7C11>

In this article, it references a Harvard Study also noting At the country-level, there appears to be no discernable relationship between percentage of population fully vaccinated and new COVID-19 cases in the last 7 days (Fig. 1). In fact, the trend line suggests a marginally positive association such that countries with higher percentage of population fully vaccinated have higher COVID-19 cases per 1 million people.

I have also attached an additional study on 145 countries for review that shows similar results, that the vaccine isn't showing to slow Covid19. With all of this new information I can't imagine why we would force people to get the vaccination when it is showing no net benefit.

Thank you for your attention and consideration of this information.

Curtis Varney

## ***The higher the vaccination rate, the higher the excess mortality***

Prof. Dr. Rolf Steyer and Dr. Gregor Kappler, 16 November 2021

Contact:

[rolf.steyer@uni-jena.de](mailto:rolf.steyer@uni-jena.de) , [mail@g-kappler.de](mailto:mail@g-kappler.de)

### **Summary**

The correlation between the excess mortality in the federal states and their vaccination rate when weighted with the relative number of inhabitants of the federal state is .31. This number is surprisingly high and would be negative if vaccination were to reduce mortality. For the period under consideration (week 36 to week 40, 2021), the following applies: *The higher the vaccination rate, the higher the excess mortality*. In view of the forthcoming policy measures aimed at reducing the virus, this figure is worrying and needs to be explained if further policy measures are to be taken with the aim of increasing the vaccination rate.

### **To get started**

1. The overall overview of the current excess mortality in Germany as a whole can be found here: <https://www.destatis.de/DE/Themen/Querschnitt/Corona/Grafik/Interaktiv/woechentlich-e-sterbefallzahlen-jahre.html?nn=209016>
2. and also here, whereby the deviation from the median of the years 2016 -2020 can be read directly here: <https://www.destatis.de/DE/Themen/Querschnitt/Corona/Gesellschaft/kontextinformationen-gesellschaft.html>

These two graphics are interactive, i.e. the numbers are displayed directly as soon as you move the mouse pointer over them. Looking at weeks 36 to 43, the comparison between 2021 and the median 2016 to 2020 shows the excess mortality in these COGs directly in absolute figures. In some of these weeks, there are actually about 2000 deaths more than the median from 2016 to 2020.

Mortality rates and vaccination rates are recorded particularly reliably. Whether someone is vaccinated twice is as indisputable as the question of whether someone has died. If you look at more complex variables such as the cause of death, this is not the case: the determination of causes of death such as "died of Covid-19 infection" depends relatively strongly on interpretations. A positive test is by no means proof of this cause of death. Death rates and vaccination rates, on the other hand, are based only to a small extent on interpretations.

### **Our data sources**

The data we use are taken from

## What did we do?

### 1. Calculation of excess mortality

For each of the 16 federal states, we have added up the number of deaths in the KWn 36 to 40 for each year 2016 to 2021. (Newer ones are not yet available for the individual federal states to date, Nov. 16, 2021.) This results in the number of deaths for each federal state and year in the period from week 36 to week 40. For a comparative value of the number of deaths in weeks 36 to week 40 in 2021, we have averaged the death rates in week 36 to week 40 for the years 2016 to 2020. For each federal state, these average values of recent years are the basis for comparisons with 2021. For the comparison, we formed the ratio of the number of deaths in 2021 in the period from week 36 to week 40 by the averaging values just mentioned and then multiplied it by 100. The ratio 100 therefore means that there is neither excess nor under-mortality, the ratio 110 states that in the period under consideration 2021 exactly 10% more people died than in the average of the previous 5 years. The actual figures vary among the 16 states between 102.2 (Saxony) and 115.7 (Mecklenburg-Western Pomerania). The greater the deviation (from 100) upwards, the greater the excess mortality in the respective federal state.

### 2. Vaccination rate

We were able to find the vaccination rate directly from the table mentioned under Data Sources (point 2). The quota of twice vaccinated people has been chosen.

### 3. Calculation of the correlation between vaccination rate and excess mortality

The 16 countries have very different populations. The Hanseatic city of Bremen has only about 0.68 million inhabitants, the state of North Rhine-Westphalia, on the other hand, about 17.92 million. (These figures can also be found at the Federal Statistical Office.) When calculating the correlation between vaccination rate and excess mortality, we used *relative population size as weights* (as well as means and variances). In this way, distortions in favour of the situation in the small countries are avoided.

The following figure shows a scatter plot of the 16 data points (of the federal states). The vaccination-rate is on the horizontal axis and the ratio is removed on the vertical axis, where the size of the area of the points represents the relative population.

According to this figure, Saxony (SN) and Thuringia (TH) perform best in terms of current excess mortality. They also have the lowest vaccination rates.

#### 4. Interpretation of the result

The correlation is + .31, is amazingly high and especially in an unexpected direction. Actually, it should be negative, so that one could say: *The higher the vaccination rate, the lower the excess mortality.* However, the opposite is the case and this urgently needs to be clarified. Excessmortality can be observed in all 16 countries. The number of Covid deaths reported by the RKI in the period under consideration consistently represents only a relatively small part of mortality and, above all, cannot explain the critical facts:

*The higher the vaccination rate, the higher the excess mortality.*

The most direct explanation is:

1. Complete vaccination increases the likelihood of death.

Of course, more indirect explanations are possible:

2. The higher the proportion of the elderly, the higher the vaccination rate and excess mortality. Therefore, vaccination rates and excess mortality also correlate. (However, this explanation is not very plausible, as the proportion of old people would then have changed significantly between 2016-2020 on the one hand and 2021 on the other.)
3. Higher vaccination rates are achieved by increased stress and anxiety in the country concerned and the latter lead to increased numbers of deaths.

Further explanations are by no means excluded. Some of these may also be supported by figures and should be further investigated. We are very grateful for suggestions of this kind.

## ABSTRACT

This article examines issues related to COVID-19 inoculations for children. The bulk of the official COVID-19-attributed deaths per capita occur in the elderly with high comorbidities, and the COVID-19 attributed deaths per capita are negligible in children. The bulk of the normalized post-inoculation deaths also occur in the elderly with high comorbidities, while the normalized post-inoculation deaths are small, but not negligible, in children. Clinical trials for these inoculations were very short-term (a few months), had samples not representative of the total population, and for adolescents/children, had poor predictive power because of their small size. Further, the clinical trials did not address changes in biomarkers that could serve as early warning indicators of elevated predisposition to serious diseases. Most importantly, the clinical trials did not address long-term effects that, if serious, would be borne by children/adolescents for potentially decades.

A novel *best-case scenario* cost-benefit analysis showed *very conservatively* that there are five times the number of deaths attributable to each inoculation vs those attributable to COVID-19 in the most vulnerable 65+ demographic. The risk of death from COVID-19 decreases drastically as age decreases, and the longer-term effects of the inoculations on lower age groups will increase their risk-benefit ratio, perhaps substantially.

## 1. Introduction

Currently, we are in the fifteenth month of the WHO-declared global COVID-19 pandemic. Restrictions of different severity are still in effect throughout the world [1]. The global COVID-19 mass inoculation is in its eighth month. As of this writing in mid-June 2021, over 800,000,000 people globally have received at least one dose of the inoculation and roughly half that number have been fully inoculated [2]. In the USA, about 170,000,000 people have received at least one dose and roughly 80 % of that number have been fully inoculated [2].

Also, in the USA, nearly 600,000 deaths have been officially attributed to COVID-19. Almost 5,000 deaths following inoculation have been reported to VAERS by late May 2021; specifically, “Over 285 million doses of COVID-19 vaccines were administered in the United States from December 14, 2020, through May 24, 2021. During this time, VAERS received 4,863 reports of death (0.0017 %) among people who received

a COVID-19 vaccine.” [3] (the Vaccine Adverse Events Reporting System (VAERS) is a passive surveillance system managed jointly by the CDC and FDA [3]. Historically, VAERS has been shown to report about 1% of actual vaccine/inoculation adverse events [4]. See Appendix 1 for a first-principles confirmation of that result). By mid-June, deaths following COVID-19 inoculations had reached the 6000 levels.

A vaccine is legally defined as any substance designed to be administered to a human being for the prevention of one or more diseases [5]. For example, a January 2000 patent application that defined vaccines as “compositions or mixtures that when introduced into the circulatory system of an animal will evoke a protective response to a pathogen.” was rejected by the U.S. Patent Office because “The immune response produced by a vaccine must be more than merely some immune response but must be protective. As noted in the previous Office Action, the art recognizes the term ‘vaccine’ to be a compound which prevents infection” [6]. In the remainder of this article, we use the term

‘inoculated’ rather than vaccinated, because the injected material in the present COVID-19 inoculations prevents neither viral infection nor transmission. Since its main function in practice appears to be symptom suppression, it is operationally a “treatment”.

In the USA, inoculations were administered on a priority basis. Initially, first responders and frontline health workers, as well as the frailest elderly, had the highest priority. Then the campaign became more inclusive of lower age groups. Currently, approval has been granted for inoculation administration to the 12–17 years demographic, and the target for this demographic is to achieve the largest number of inoculations possible by the start of school in the Fall. The schedule for inoculation administration to the 5–11 years demographic has been accelerated to start somewhere in the second half of 2021, and there is the possibility that infants as young as six months may begin to get inoculated before the end of 2021 [7].

The remainder of this article will focus on the USA situation, and address mainly the pros and cons of inoculating children under eighteen. The article is structured as follows:

Section 1 (the present section) introduces the problem.

Section 2 (Background):

- 1) provides the background for the declared COVID-19 “pandemic” that led to the present inoculations;
- 2) describes the clinical trials that provided the justification for obtaining Emergency Use Authorization (EUA) from the FDA to administer the inoculations to the larger population;
- 3) shows why the clinical trials did not predict either the seriousness of adverse events that have occurred so far (as reported in VAERS) or the potential extent of the underlying pre-symptomatic damage that has occurred as a result of the inoculations.

Section 3 (Mass Inoculation) summarizes the adverse events that have occurred already (through reporting in VAERS) from the mass inoculation and will present biological evidence to support the potential occurrence of many more adverse effects from these inoculations in the mid-and long-term.

Section 4 (Discussion) addresses these effects further

Section 5 (Summary and Conclusions) presents the conclusions of this study.

There are four appendices to this paper.

Appendix A provides some idea of the level of under-reporting of post-inoculation adverse events to VAERS and presents estimations of the actual number of post-inoculation deaths based on extrapolating the VAERS results to real-world experiences.

Appendix B provides a detailed analysis of the major clinical trials that were used to justify EUA for the inoculants presently being administered in the USA.

Appendix C summarizes potential adverse effects shown to have resulted from past vaccines, all of which could potentially occur as a result of the present inoculations.

Appendix D presents a novel *best-case scenario* cost-benefit analysis of the COVID-19 inoculations that have been administered in the USA.

## 2. Background

### 2.1. Pandemic history

In December 2019, a viral outbreak was reported in Wuhan, China, and the responsible coronavirus was termed Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) [8,9]. The associated disease was called Coronavirus Disease 2019, or COVID-2019. The virus spread worldwide, and a global pandemic was declared by the WHO in March 2020 [10,11]. Restrictive measures of differing severity were implemented by countries globally, and included social distancing, quarantining, face masks, frequent hand sanitation, etc. [12,13]. In the USA, these measures were taken as well, differing from state-to-state [14]. At

the same time, vaccine development was initiated to control COVID-19 [15]. In the USA, non-vaccine treatments were not encouraged at the Federal level, but different treatment regimens were pursued by some healthcare practitioners on an individual level [11,16,17].

By the end of May 2021, the official CDC death count attributed to COVID-19 was approaching 600,000, as stated previously. This number has been disputed for many reasons. First, before COVID-19 testing began, or in the absence of testing, after it was available, the diagnosis of COVID-19 (in the USA) could be made by the presumption of the healthcare practitioner that COVID-19 existed [4,18]. Second, after testing began, the main diagnostic used was the RT-PCR test. This test was done at very high amplification cycles, ranging up to 45 [19–21]. In this range, very high numbers of false positives are possible [22].

Third, most deaths attributed to COVID-19 were elderly with high comorbidities [1,22]. As we showed in a previous study [22], attribution of death to one of many possible comorbidities or especially toxic exposures in combinations [23] is highly arbitrary and can be viewed as a political decision more than a medical decision. For over 5 % of these deaths, COVID-19 was the only cause mentioned on the death certificate. For deaths with conditions or causes in addition to COVID-19, on average, there were 4.0 additional conditions or causes per death [24]. These deaths with comorbidities could equally have been ascribed to any of the comorbidities [22]. Thus, the actual number of COVID-19-based deaths in the USA may have been on the order of 35,000 or less, characteristic of a mild flu season.

Even the 35,000 deaths may be an overestimate. Comorbidities were based on the clinical definition of specific diseases, using threshold biomarker levels and relevant symptoms for the disease(s) of interest [25,26]. But many people have what are known as pre-clinical conditions. The biomarkers have not reached the threshold level for official disease diagnosis, but their abnormality reflects some degree of underlying dysfunction. The immune system response (including pre-clinical conditions) to the COVID-19 viral trigger should not be expected to be the same as the response of a healthy immune system [27]. If pre-clinical conditions had been taken into account and coupled with the false positives as well, the CDC estimate of 94 % misdiagnosis would be substantially higher.

### 2.2. Clinical trials

#### 2.2.1. Clinical trials to gain FDA Emergency Use Authorization (EUA) approval

The unprecedented accelerated development of COVID-19 vaccines in the USA, dubbed Operation Warp Speed, resulted in a handful of substances available for clinical trials by mid-2020 [28]. These clinical trials were conducted to predict the safety and efficacy of the potential vaccines (which have turned out to be treatments/inoculations as stated previously), and thereby gain approval for inoculating the public at large [29]. An overview of the Pfizer clinical trials is presented in this section, and a more detailed description of the main clinical trials is shown in Appendix B.

Two types of inoculants have gained FDA EUA in the US: mRNA-based inoculants and viral vector-based inoculants, with the mRNA inoculants having the widest distribution so far. Comirnaty is the brand name of the mRNA-based inoculant developed by Pfizer/BioNTech, and Moderna COVID-19 Vaccine is the brand name of the mRNA-based inoculant developed by Moderna [30]. Both inoculants contain the genetic information needed for the production of the viral protein S (spike), which stimulates the development of a protective immune response against COVID-19 [31]. Janssen COVID-19 Vaccine is the brand name of the viral vector-based inoculant developed by Johnson and Johnson. Janssen COVID-19 vaccine uses an adenovirus to transport a gene for the coronavirus into human cells, which then produce the coronavirus spike protein. This spike protein primes the immune system to fight off potential coronavirus infection [32].

The results of these trials that allowed granting of EUA by the FDA

**Table 1**

Demographics (population for the primary efficacy endpoint). The number of participants who received vaccine and placebo, stratified by age.

| AGE GROUP                         | Pfizer-BioNTech COVID-19 Vaccine (N = 18,242) n (%) | Placebo (N = 18,379) n (%) |
|-----------------------------------|-----------------------------------------------------|----------------------------|
| ≥12 through 15 years <sup>b</sup> | 46 (0.3 %)                                          | 42 (0.2 %)                 |
| ≥16 through 17 years              | 66 (0.4 %)                                          | 68 (0.4 %)                 |
| ≥16 through 64 years              | 14,216 (77.9 %)                                     | 14,299 (77.8 %)            |
| ≥65 through 74 years              | 3176 (17.4 %)                                       | 3226 (17.6 %)              |
| ≥75 years                         | 804 (4.4 %)                                         | 812 (4.4 %)                |

**Symbols:** b: “100 participants 12 through 15 years of age with limited follow-up in the randomized population received at least one dose (49 in the vaccine group and 51 in the placebo group). Some of these participants were included in the efficacy evaluation depending on the population analyzed. They contributed to exposure information but with no confirmed COVID-19 cases, and did not affect efficacy conclusions.”; N: number of test subjects, n: number of controls.

**Fig. 1.** COVID-19 Deaths per capita by age in the United States (as of Jun 5, 2021). Population-based on U.S. CDC WONDER Bridge-Race Population Estimate 2019. Data obtained from <https://wonder.cdc.gov/bridged-race-v2019.html> on 6/15/2021. Provisional COVID-19 deaths based on CDC data provided by the National Center for Health Statistics for the period 1/1/2020 – 6/5/2021. Data obtained from <https://data.cdc.gov/NCHS/Provisional-COVID-19-Deaths-by-Sex-and-Age/9bhg-hcku> on 6/10/2021.

can be found in the inserts to the inoculation materials. For example, the Pfizer inoculation trial results are contained in the fact sheet for healthcare providers administering vaccine (vaccination providers) [33].

There were two clinical trials conducted to gain FDA EUA for Pfizer: a smaller Phase 1/2 study, and a larger Phase 1/2/3 study. The age demographics for the larger clinical study are as follows (from the Pfizer insert): “Of the total number of Pfizer-BioNTech COVID-19 Vaccine recipients in Study 2 (N = 20,033), 21.4 % (n = 4,294) were 65 years of age and older and 4.3 % (n = 860) were 75 years of age and older.” Additionally: “In an analysis of Study 2, based on data up to the cutoff date of March 13, 2021, 2,260 adolescents (1,131 Pfizer-BioNTech COVID-19 Vaccine; 1,129 placebo) were 12 through 15 years of age. Of these, 1,308 (660 Pfizer-BioNTech COVID-19 Vaccine and 648 placebo) adolescents have been followed for at least 2 months after the second dose of Pfizer-BioNTech COVID-19 Vaccine. The safety evaluation in Study 2 is ongoing.”

The relevant demographics are presented in Table 7 on p.31 of the Pfizer insert. The age component of those demographics is shown below in Table 1.

There are very minor differences between most of the data in the above table and the preceding narrative shown, and they are probably due to different time horizons. The major difference is the number of adolescents used and appears to result from a much later reporting time.

Fig. 1 uses the official large CDC numbers (coupled with USA census data estimates from CDC Wonder) to show the COVID-19 deaths per capita as a function of age, circa early June 2021. Unfortunately, the most critical range, 85+, has the least resolution. It is obvious that most of the deaths occurred in the 55 to 100+ range, and the remaining individuals in the other ranges (especially under 35) have negligible risk of dying from the disease.

The age distribution in Fig. 1 differs substantially from the age distribution in Table 1. Why is this important? When designing a trial for the efficacy and safety of a potential treatment, the focus should be on the target population who could benefit from that treatment. There is little rationale for including participants in a trial for whom the treatment would not be relevant or warranted.

For the COVID-19 Pfizer trials, based on the data from Fig. 1, the trial population should have been limited at most to the 45–100+ age segment, appropriately weighted toward the higher end where the deaths per capita are most frequent. That was almost the exact opposite of what was done in the Pfizer clinical trials. In Fig. 1, approximately 58 % of the deaths occurred in the age range 75+, whereas 4.4 % of the participants in the Pfizer clinical trial were 75+. Thus, the age range most impacted by COVID-19 deaths was minimally represented in the Pfizer clinical trials, and the age range least impacted by COVID-19 deaths was maximally represented in the Pfizer clinical trials. This skewed sampling has major implications for predicting the expected numbers of deaths for the target population from the clinical trials.

Besides age, the other metric of importance in determining COVID-19 deaths is the presence of comorbidities. The more comorbidities, and the more severe the comorbidities, the greater the chances of death or severe adverse outcomes from COVID-19. It is not clear how well the number and severity of comorbidities in the clinical trial sample matched those reflected in Fig. 1, but the insert does mention the large number of conditions that excluded participation in the trials. In sum, the results from the clinical trials could not be expected to reflect the results that could occur (and have occurred) from mass inoculation of the public, given the unaffected nature of the bulk of the trial population from SARS-CoV-2 exposure.

The prior discussion on the clinical trials has focused on the efficacy and safety of the inoculants, and the relationship of the trial test population to the total target population. We have limited the focus so far to the safety and efficacy issues since these constituted the core of what was presented to the FDA for EUA approval. We have not focused on the trials from an early warning indicator perspective.

We will address summarily the science/early warning indicator issues associated with the Pfizer trials, and how the neglect of these issues has translated into disastrous consequences during the mass inoculation rollout. Standard practice for determining and understanding the impact of new technology (such as mRNA “vaccines”) on a system involves measuring the state and flux variables of the system before the new technology intervention, measuring the state and flux variables of the system after the new technology intervention, and identifying the types and magnitudes of changes in the state and flux variables attributable to the intervention. This would be in addition to evaluating performance metrics before and after the intervention.

In Pfizer’s proposed clinical trials for the mRNA “vaccine” (Study to Describe the Safety, Tolerability, Immunogenicity, and Efficacy of RNA Vaccine Candidates Against COVID-19 in Healthy Individuals - <https://clinicaltrials.gov/ct2/show/NCT04368728>), the focus was on determining 1) adverse events/symptoms, 2) SARS-CoV-2 serum neutralizing antibody levels, 3) SARS-CoV-2 anti-S1 binding antibody levels and anti-RBD binding antibody levels, and 4) effectiveness. These metrics are all related to safety at the symptom level and performance.

However, symptoms/diseases are typically end points of processes

**Fig. 2.** Post-inoculation deaths per dose of inoculant. 7-day COVID-19 vaccine deaths per inoculation by age in the United States (as of 5/28/2021). Data shown includes the total number of all deaths up to 7 days after receiving the vaccine for both those administered 1 dose and the complete series of doses by age in the United States as of 5/28/2021 reported in VAERS (updated on 5/28/2021). COVID-19 Vaccinations (Inoculations) based on CDC data provided by ISSInfo up thru 5/28/2021. Data obtained from <https://data.cdc.gov/Vaccinations/COVID-19-Vaccination-Demographics-in-the-United-St/km4m-vcsb> on 6/10/2021. COVID-19 Vaccinations Deaths based on CDC WONDER VAERS Database as of 5/28/2021, obtained from <https://wonder.cdc.gov/controller/datarequest/D8;jsessionid=4B5522C8D1DA68F1A364646B0DA5> on 6/9/2021.

that can take months, years, or decades to surface. During that symptom/disease development period, many biomarker early warning indicators tend to exhibit increasing abnormalities that reflect an increasing predisposition to the eventual symptom/disease. Thus, serious symptoms/diseases that ordinarily take long periods to develop would be expected to be rare events if they occurred shortly following an inoculation. If the clinical trials that were performed by Pfizer and Moderna were designed to focus on efficacy and *only adverse effects at the symptom level of description* as an indicator of safety, the trial results would be limited to the identification of rare events, and the trial results would potentially under-estimate the actual pre-symptom level damage from the inoculations.

Credible safety science applied to this experiment would have required a much more expansive approach to determining effects on a wide variety of state and flux metrics that could serve as early warning indicators of potentially serious symptoms/disease, and might occur with much higher frequencies at this early stage than the rare serious symptoms. The only mention of these other metrics in the above proposal is in the Phase I trial description: “Percentage of Phase 1 participants with abnormal haematology and chemistry laboratory values”, to be generated seven days after dose 1 and dose 2.

A paper published in NEJM in December 2020 [34] summarized the Phase 1 results. The focus was on local and systemic adverse events and efficacy metrics (antibody responses). The only metrics other than these reported were transiently decreased lymphocyte counts.

We view this level of reporting as poor safety science for the following reasons. Before the clinical trials had started, many published articles were reporting serious effects associated with the presence of the SARS-CoV-2 virus such as hyperinflammation, hypercoagulation, hypoxia, etc. SARS-CoV-2 includes the S1 Subunit (spike protein), and it was not known how much of the damage was associated with the spike protein component of SARS-CoV-2. A credible high-quality safety science experiment would have required state measurements of specific biomarkers associated with each of these abnormal general biomarkers before and after the inoculations, such as d-dimers for evidence of enhanced coagulation/clotting; CRP for evidence of enhanced inflammation; troponins for evidence of cardiac damage; occludin and claudin for evidence of enhanced barrier permeability; blood oxygen levels for evidence of enhanced hypoxia; amyloid-beta and phosphorylated tau for

evidence of increased predisposition to Alzheimer’s disease; Serum HMGB1, CXCL13, Dickkopf-1 for evidence of an increased disposition to autoimmune disease, etc. A credible high-quality safety science experiment would have required flux measurements of products resulting from the mRNA interactions, from the LNP shell interactions, from dormant viruses that might have been stimulated by the mRNA-generated spike protein, etc., emitted through the sweat glands, faeces, saliva, exhalation, etc.

Most importantly, these types of measurements would have shown changes in the host that did not reach the symptom level of expression but raised the general level of host abnormality that could predispose the host to a higher probability of serious symptoms and diseases at some point in the future. Instead, in the absence of high-quality safety science reflected in these experiments, all that could be determined were short-term adverse effects and deaths. This focus on symptoms masked the true costs of the mRNA intervention, which would probably include much larger numbers of people whose health could have been degraded by the intervention as evidenced by increased abnormal values of these biomarkers. For example, the trials and VAERS reported clots that resulted in serious symptoms and deaths but gave no indication of the enhanced predisposition to forming serious clots in the future with a higher base of micro-clots formed because of the mRNA intervention. The latter is particularly relevant to children, who have a long future that could be seriously affected by having an increased predisposition to multiple clot-based (and other) serious diseases resulting from these inoculations.

### 3. Mass inoculation

#### 3.1. Adverse events reported for adults

This section describes the adverse effects that followed COVID-19 mass inoculation in the USA. The main source of adverse effects data used was VAERS. Because VAERS is used to estimate adverse event information by many other countries as well, a short overview of VAERS and its intrinsic problems is summarized in Appendix 1.

The period in the present study covered by the reported inoculations is mid-December 2020 to the end of May 2021. The population inoculated during this period is mainly adults. Child inoculations did not begin until mid-May. Because the different age groups were inoculated starting at different times based on priority, the elapsed times after inoculation will be different, and any adverse event comparisons across age groups will require some type of elapsed post-inoculation time normalization.

We examined VAERS-reported deaths by age group, normalized to:

- 1) the number of inoculations given
- 2) the period within seven days after inoculation.

This allows a credible comparison of very short-term adverse effects post-inoculation for all age groups. During this period, which is eight days post-inoculation (where day zero is the day of inoculation), sixty percent of all post-inoculation deaths are reported in VAERS.

Fig. 2 below shows the results circa late May 2021 [3]. The age band ranges are different from those in Fig. 1 because the CDC provides inoculation after-effect age bands differently from COVID-19 death age bands. In general, the inoculation deaths by age per inoculant roughly parallel the COVID-19 deaths by age per capita (the curve structures are very similar), with one exception: the 0–17 demographic. In the normalized COVID-19 death graph (Fig. 1), the deaths per capita in the 0–17 demographic are negligible, while in the normalized inoculant death graphs (Fig. 2) the normalized deaths are small, but not negligible. The members of the 65+ demographic, where the bulk of deaths are occurring in Figs. 1 and 2, have been receiving inoculations for five months, whereas the members of the youngest demographic have been receiving inoculations only for a few weeks. More time needs to pass

before more definitive conclusions can be drawn about the youngest demographic, and how its members are impacted adversely following the inoculations.

The high death rates from both COVID-19 and the inoculations in the 65+ demographic should not be surprising. In both cases, the immune system is challenged, and in both cases, a dysfunctional immune system characteristic of many elderly people with multiple comorbidities cannot respond adequately to the challenge.

### 3.1.1. Specific short-term adverse events reported in VAERS

The most comprehensive single evaluation of VAERS-reported adverse events (mainly for adult recipients of the COVID-19 “vaccines”) we have seen is a non-peer-reviewed collection of possible side effects by Dr. Ray Sahelian [35]. We recommend reading this short data-rich summary of the broad types of events reported already, in the context that these events are very short-term. Dr. Sahelian identifies five mechanisms he believes are responsible for most of these events, with research potentially uncovering other mechanisms. These five mechanisms include:

- 1 “An overreacting inflammatory response is known as systemic inflammatory response syndrome (SIRS). This SIRS reaction, perhaps a cytokine storm, can range from very mild to very severe. It can begin the very first day of the shot or begin days or weeks later as a delayed reaction.”
- 2 “Interaction of the spike proteins with ACE2 receptors on cell membranes. Such cells are found widely in the body including the skin, lungs, blood vessels, heart, mouth, gastrointestinal tract, kidneys, and brain.”
- 3 “Interaction of spike proteins with platelets and/or endothelial cells that line the inside of blood vessels. This can lead to clotting or bleeding (low number of circulating platelets in the bloodstream). Some of the clots, even if tiny, cause certain neurological symptoms if the blood supply to nerves is compromised.”
- 4 “Immediate or delayed release of histamine from mast cells and basophils (mast cell activation syndrome, MCAS).”
- 5 “Swelling of lymph nodes in various areas of the body could interfere with blood flow, put pressure on nerves causing pain, or compromise their proper function.”

These reactions can be classified as Hyperinflammation, Hypercoagulation, Allergy, and Neurological, and can contribute to many symptoms and diseases, as VAERS is showing.

An excellent review of acute and potential long-term pathologies resulting from the COVID-19 inoculations [36] showed potential relationships to blood disorders, neurodegenerative diseases and autoimmune diseases. This review discussed the relevance of prion-protein-related amino acid sequences within the spike protein.

### 3.1.2. Potential mid- and long-term events and serious illnesses for adults and children from past vaccines

A detailed description of potential mid- and long-term events and serious illnesses for adults and children from past vaccines is presented in Appendix C. Most of these events and illnesses are not predictable, and most, if not all, would be possible for the COVID-19 inoculations in the mid- and long-term for adults and children.

### 3.1.3. Potential short-, mid-, and long-term risks of mass COVID-19 inoculation for children

**3.1.3.1. Intrinsic inoculant toxicity.** Children are unique relative to COVID-19. They have negligible risks of serious effects from the disease, as shown in Fig. 1. Given that the COVID-19 inoculants were only tested for a few months, and mid-or long-term adverse effects are unknown, any mid- or long-term adverse events that emerge could impact children

adversely for decades.

We believe that mid-or long-term adverse effects are possible based on the recent emergence of evidence that would support the probability of mid-and long-term adverse effects from the COVID-19 inoculants, such as:

- 1) The spike protein itself can be a toxin/pathogenic protein:
- 2) S protein alone can damage vascular endothelial cells (ECs) by downregulating ACE2 and consequently inhibiting mitochondrial function [37].
- 3) it is concluded that ACE2 and endothelial damage is a central part of SARS-CoV2 pathology and may be induced by the spike protein alone [38].
- 4) the spike protein of SARS-CoV-1 (without the rest of the virus) reduces ACE2 expression, increases angiotensin II levels, exacerbates lung injury, and triggers cell signaling events that may promote pulmonary vascular remodeling and Pulmonary Arterial Hypertension (PAH) as well as possibly other cardiovascular complications [39].
- 5) the recombinant S protein alone elicits functional alterations in cardiac vascular pericytes (PCs) [40]. This was documented as:
- 6) increased migration
- 7) reduced ability to support EC network formation on Matrigel
- 8) secretion of pro-inflammatory molecules typically involved in the cytokine storm
- 9) production of pro-apoptotic factors responsible for EC death. Furthermore, the S protein stimulates the phosphorylation/activation of the extracellular signal-regulated kinase 1/2 (ERK1/2) through the CD147 receptor, but not ACE2, in cardiac PCs, the S protein may elicit vascular cell dysfunction, potentially amplifying, or perpetuating, the damage caused by the whole coronavirus [40].
- 10) “even in the absence of the angiotensin-converting enzyme 2 receptors, the S1 subunit from SARS-CoV-2 spike protein binding to neutral phospholipid membranes leads to their mechanical destabilization and permeabilization. A similar cytotoxic effect of the protein was seen in human lung epithelial cells.” [125].
- 11) The LNP layer encapsulating the mRNA of the inoculant is highly inflammatory in both intradermal and intranasal inoculation [41] and “Polyethylene glycol (PEG) is a cause of anaphylaxis to the Pfizer/BioNTech mRNA COVID-19 vaccine” [42]. “Humans are likely developing PEG antibodies because of exposure to everyday products containing PEG. Therefore, some of the immediate allergic responses observed with the first shot of mRNA-LNP vaccines might be related to pre-existing PEG antibodies. Since these vaccines often require a booster shot, anti-PEG antibody formation is expected after the first shot. Thus, the allergic events are likely to increase upon re-vaccination” [43].
- There is also the possibility that the components of the LNP shell could induce the ASIA Syndrome (auto-immune/inflammatory syndrome induced by adjuvants), as shown by studies on post-inoculation thyroid hyperactivity [44] and post-inoculation subacute thyroiditis [45].
- 12) The spike protein has been found in the plasma of post-inoculation individuals, implying that it could circulate to, and impact adversely, any part of the body [46].
- 13) The spike protein of SARS-CoV-2 crosses the blood-brain barrier in mice [47], and “the SARS-CoV-2 spike proteins trigger a pro-inflammatory response on brain endothelial cells that may contribute to an altered state of BBB function” [48].
- 14) The spike proteins manufactured in vivo by the present COVID-19 inoculations could potentially “precipitate the onset of autoimmunity in susceptible subgroups, and potentially exacerbate autoimmunity in subjects that have pre-existing autoimmune diseases”, based on the finding that anti-SARS-CoV-2 protein

antibodies cross-reacted with 28 of 55 diverse human tissue antigens [49].

- 15 “The biodistribution of ChaAdOx1 [Astra Zeneca’s recombinant adenovirus vaccine candidate against SARS-CoV-2] in mice confirmed the delivery of vaccine into the brain tissues [50]. The vaccine may therefore spur the brain cells to produce CoViD spike proteins that may lead to an immune response against brain cells, or it may spark a spike protein-induced thrombosis. This may explain the peculiar incidences of the fatal cerebral venous sinus thrombosis (CVST) observed with viral vector-based CoViD-19 vaccines” [51,52].

A complementary perspective to explain adenovirus-based vaccine-induced thrombocytopenia is that “transcription of wildtype and codon-optimized Spike open reading frames enables alternative splice events that lead to C-terminal truncated, soluble Spike protein variants. These soluble Spike variants may initiate severe side effects when binding to ACE2-expressing endothelial cells in blood vessels.” [100].

- 16 A Pfizer Confidential study performed in Japan showed that “modRNA encoding luciferase formulated in LNP comparable to BNT162b2” injected intramuscularly concentrated in many organs/tissues in addition to the injection site [53]. The main organs/sites identified were adrenal glands, liver, spleen, bone marrow, and ovaries. While damage to any of these organs/sites could be serious (if real for humans), adverse effects on the ovaries could be potentially catastrophic for women of child-bearing or pre-childbearing age.

The main objective of credible biodistribution studies (of inoculants for eventual human use) is to identify the spatio-temporal distribution of the actual inoculant in humans; i.e., how much of the final desired product (in this case, expressed protein antigen/spike protein) is produced in different human tissues and organs as a function of time. That’s not what was reported in the Pfizer Confidential study.

Rats were used for the *in vivo* studies; the relationship of their biodistribution to that of humans is unclear. They were injected in different locations (hindpaw/intramuscular); the relationship to human injections in the deltoid muscle is unclear. They were injected with “modRNA encoding luciferase formulated in LNP comparable to BNT162b2”; it is unclear why they weren’t injected with BNT162b2, it is unclear why spike protein expression wasn’t evaluated rather than LNP concentration, and it is unclear how well the biodistribution from the actual inoculant used in the experiments compares to the biodistribution from BNT162b2.

They were injected once per rat. Given that a second injection would not be in the same exact location as the first, and that the circulatory system might have changed due to clotting effects from the first injection and other potential vascular complications, it is unclear how the biodistribution change with the second injection would compare with the first. If a booster injection is given to counter variants, it is unclear how its biodistribution would be altered as a consequence of the preceding two injections.

Clotting will occur with the highest probability where the blood flow is reduced (and more time is available for LNP-endothelial cell interaction). It is unclear whether the clotting process would show *positive feedback* behaviour where the initial inoculation constricts the flow in low-velocity regions even further by enhanced clotting, and subsequent inoculations further amplify this reduced flow-enhanced clotting cycle.

The rats were injected under pristine conditions; how that compares with humans, who have been, are being, and will continue to be exposed to multiple toxic substances in combination, is open to question. We know these combinations can act synergistically to adversely impact myriad organs and tissues throughout the body [23]. We don’t know how these toxic exposures in humans affect the permeability of the blood/tissue barriers, and especially the ability of the injected material to diffuse into the bloodstream (and also the ability of the manufactured

spike proteins to diffuse from the bloodstream into the surrounding tissue).

Higher-level primates should have been used for these short-term experiments, to obtain a more realistic picture of the biodistribution of inoculant in human organs and tissues. In other words, these laboratory experiments may be just the tip of the iceberg of estimating the amount of inoculant that concentrates in critical organs and tissues of human beings.

The many studies referenced above indicate collectively that the mRNA-based COVID-19 inoculations (the most prolific inoculations used in the USA for COVID-19 so far) consist of (at least) two major toxins: the instructions for the spike protein (mRNA) and the mRNA-encapsulating synthetic fat LNP. The vaccine is injected into the deltoid muscle, at which time it contributes to inflammation at the injection site due in part to the LNP and potentially to anaphylaxis from the LNP PEG-2000 component. Some of the injected material stays at the injection site, where it combines with cells through endocytosis to express spike protein on the cell surface, stimulating the adaptive immune system to eventually produce antibodies to the spike protein [54].

The remainder of the injected material enters the lymphatic system and the bloodstream, and is distributed to tissues and organs throughout the body: e.g., “Drugs administered by the intramuscular (IM) route are deposited into vascular muscle tissue, which allows for rapid absorption into the circulation” [55]. The basis of this process is that the bulky muscles have good vascularity, and therefore the injected drug quickly reaches the systemic circulation and thereafter into the specific region of action, bypassing the first-pass metabolism [56]. The widespread distribution is greatly enhanced by the LNP PEG-2000 coating as follows: building from the success of PEGylating proteins to improve systemic circulation time and decrease immunogenicity [57]. PEG coatings on nanoparticles shield the surface from aggregation, opsonization, and phagocytosis, prolonging systemic circulation time. [57]. PEG coatings on nanoparticles have also been utilized for overcoming various biological barriers to efficient drug and gene delivery associated with other modes of administration. [57]

In the bloodstream, one possible outcome is that the LNPs coalesce with the endothelial cells on the inner lining of the blood vessels and transfer the mRNA to the cells through endocytosis. The endothelial cells would then express the spike protein on their surface. Platelets flowing by the spike protein express ACE2 receptors on their surface; therefore, one possible outcome would be activation of the platelets by the spike protein and initiation of clotting. Another possible outcome would be the modified endothelial cells being recognized by innate immune system cells as foreign. These immune killer cells would then destroy parts of the endothelium and weaken the blood-organ barriers. The LNPs would inflame the endothelium as well, both increasing barrier permeability and increasing the blood vessel diameter. This weakening of the blood-organ barriers would be superimposed on any inflammation due to the myriad toxic contributing factors operable [4]. The newly-formed cells with spike proteins would penetrate the blood-organ barriers and bind to tissue with expressed ACE2 receptors. Any LNPs that did not coalesce with the endothelial cells, but remained intact, could also pass through the permeable blood-organ barrier, and coalesce directly with the organ cells. This could lead to an attack by innate immune system cells, and be a precursor to autoimmunity [4].

In the preceding discussion of the Pfizer biodistribution studies, the issue of multiple inoculations on changes in biodistribution was raised. Similarly, the alteration of effects as described above by multiple inoculations must be considered. Each inoculation will have positive aspects and negative aspects. The positive aspects are the formation of antibodies in the muscle cells and lymphatic system. The negative aspects include, but are not limited to, the potential clotting effects and permeability increases for that fraction of the inoculant that enters the bloodstream. The first inoculant dose can be viewed as priming the immune system. The immune response will be relatively modest. The second inoculant dose can be expected to elicit a more vigorous immune

**Table A1**  
Expected deaths from non-COVID-19 causes for inoculees (Thousands).

| Potential covid deaths/# non-covid expected | Mean time location/five months |      |     |      |     |      |     |      |      |      |
|---------------------------------------------|--------------------------------|------|-----|------|-----|------|-----|------|------|------|
|                                             | 0                              | %REP | 1/3 | %REP | 1/2 | %REP | 2/3 | %REP | 1    | %REP |
| 0                                           | 723                            | 0.5  | 482 | 0.74 | 362 | 0.98 | 242 | 1.47 | 4.77 | 75   |

| 1                                           | 1446                           | 0.25 | 964 | 0.37 | 724 | 0.49 | 484 | 0.74 | 9.51 | 37   |

**Fig. A1.** Figure A1-1 is a plot of number of deaths from COVID-19 inoculation (reported to VAERS and obtained from the CDC search engine CDC Wonder) as a function of days from inoculation (zero reflects day of inoculation). If there were no effect from the inoculation, as claimed by the CDC and other official government agencies, the curve would be essentially a straight horizontal line, reflecting normal expected deaths in a non-COVID-19 year. The curve is stepped past the tenth day because the data after that point is provided in bands by CDC Wonder. The knee of the curve, which will denote the beginning of the transition of 1) deaths from inoculation to 2) deaths expected, appears somewhere in the range between day ten and day thirty.

response. This will enhance the desired antibody production in the muscle cells and lymphatic system, but may also enhance the immune response to both the blood vessel-lining endothelial cells displaying the spike protein and the platelets, causing more severe damage. If a booster (s) inoculation is also required, this may further enhance both the positive and negative immune responses resulting from the second inoculation. While the positive effects are reversible (antibody levels decrease with time), adverse effects may be cumulative and irreversible, and therefore injury and death rates may increase with every additional inoculation [58].

These effects can occur throughout the body in the short term, as we are seeing with the VAERS results. They can occur in the mid- and long-term as well, due to the time required for destructive processes to have full effect and the administration of further inoculations. For example, micro-clots resulting from the inoculation that were insufficient to cause observable symptoms could in effect raise the baseline for thrombotic disease [92]. Lifestyle activities that contribute to enhanced blood clotting would have less distance to travel to produce observable symptoms, and thus the serious effects of clotting would have been accelerated [59,60]. As an example: the risk of venous thrombosis is approximately 2- to 4-fold increased after air travel [61]. How much this rate would increase after the inoculations, where microthrombi have formed in some recipients, is unknown. These potential baseline-raising effects could impact the interpretation of the VAERS results, as we show at the end of Appendix 1.

**3.1.3.2. Adverse inoculant effects on children.** What are the potential mid- and long-term adverse health effects from the COVID-19 inoculation on children specifically, taking into account that they will be exposed not only to the spike protein component of the SARS-CoV-2 virus but also to the toxic LNP encapsulating-shell? This toxic combination will have bypassed many defensive safeguards (typically provided by the innate immune system) through direct injection [62]. As we have shown, the main reasons why we believe the spike protein could be harmful to children even though they don't seem to get sick from exposure to SARS-CoV-2 are 1) the bypassing of the innate immune system by inoculation, 2) the larger volume of spike protein that enters the bloodstream, and 3) the additional toxic effects of the encapsulating LNP layer.

**3.1.3.2.1. Potential mid-term adverse health effects.** Examination of the myriad post-COVID-19 inoculation symptoms/biomarker changes for the 0–17 age demographic reported to VAERS circa mid-June 2021 provides some indication of very early damage [84]. Main regions/systems affected adversely (VAERS symptoms/biomarkers shown in parentheses) include:

- Cardiovascular (blood creatine phosphokinase increased, cardiac imaging procedure abnormal, echocardiogram abnormal, electrocardiogram abnormal, heart rate increased, myocarditis, palpitations, pericarditis, tachycardia, troponin I increased, troponin increased, fibrin D-Dimer increased, platelet count decreased, blood pressure increased, bradycardia, brain natriuretic peptide increased, ejection fraction decreased, migraine)
- Gastrointestinal (abdominal pain, diarrhoea, vomiting, alanine aminotransferase increased, aspartate aminotransferase increased.)
- Neural (gait disturbance, mobility decreased, muscle spasms, muscle twitching, seizure, tremor, Bell's Palsy, dyskinesia)

- Immune (C-Reactive Protein increased, red blood cell sedimentation rate increased, white blood cell counts increased, inflammation, anaphylactic reaction, pruritis, rash, lymphadenopathy)
- Endocrine (heavy menstrual bleeding, menstrual disorder)

In addition, there were large numbers of different vision and breathing problems reported.

All the major systems of the body are impacted, and many of the major organs as well. Given the lag times in entering data into VAERS and the fact that inoculations of children started fairly recently, we would expect the emphasis to be immediate symptomatic and biomarker reactions. More time is required for organ and system damage to develop and emerge. Cardiovascular problems dominate, as our model for spike protein/LNP circulation and damage predicts, and it is unknown how reversible such problems are. Many of the VAERS symptoms listed above were also found in COVID-19 adult patients [64].

Consider the example of Multisystem Inflammatory Syndrome in Children (MIS-C). It has emerged in VAERS with modest frequency so far, and it also occurred about a month after COVID-19 infection [65]. In both cases, the presence of the spike protein was a common feature. Many of its characteristic symptoms are those listed above from VAERS. MIS-C has similarities with known disease entities like Kawasaki Disease (KD), toxic shock syndrome (TSS) and macrophage activation syndrome (MAS)/secondary hemophagocytic lymphohistiocytosis (HLH) [66]. One presentation of MIS-C is in adolescents with a high disease burden as evidenced by more organ systems involved, almost universally including cardiac and gastrointestinal systems, and with a higher incidence of shock, lymphopenia, and elevated cardiac biomarkers indicating myocarditis [67]. Since the first reports of children developing MIS-C, it was evident that others presented with some of the classic symptoms of the well-recognized childhood illness KD [68]. Further, despite KD being ordinarily incredibly rare in adults, patients with MIS-A have also been reported with KD-like features. [68] Thus, an examination of the adverse effects from COVID-19 as evidenced through these diseases might shed some light on what can be expected further down the line from the inoculations.

The following section addresses Kawasaki disease (KD) and Multi-system Inflammatory Syndrome in Children (MIS-C) [65].

KD is an acute vasculitis and inflammation that predominantly affects the coronary arteries and can cause coronary artery aneurysms. Other KD manifestations include systemic inflammation of arteries, organs, and tissues, with consequent hepatitis and abdominal pain; lung interstitial pneumonitis, aseptic meningitis due to brain membrane inflammations; myocarditis, pericarditis, and valvulitis; urinary tract pyuria, pancreatitis; and lymph-node enlargement [69]. In general, although almost all children fully recover, some of them later develop coronary artery dilation or aneurysm [70]. Etiologically and pathologically, numerous studies indicate that KD is triggered by an abnormal autoimmune response caused by an infection [71]. The infection hypothesis is supported by epidemiology data showing that an infectious disease is involved at least as a starting point. Previously proposed infectious agents include Herpesviridae, retroviruses, Parvovirus B19, bocavirus, and bacterial infections such as staphylococci, streptococci, Bartonella, and Yersinia infections [72].

SARS-CoV-2 adds to these infectious agents by eliciting autoantibodies likely via molecular mimicry and cross-reactivity with autoantigens [72,73].

Then, the formation of antigen–antibody immune complexes can lead to KD symptoms via activation of the receptors of mast cells, neutrophils, and macrophages with consequent release of pro-inflammatory cytokines and increase of blood vessel permeability; activation of the complement system, stimulation of neutrophils and macrophages to secrete proteases and more proinflammatory cytokines [74], thus merging into the “cytokine storm” that characterizes MIS-C [75]. Indeed, features of KD are raised levels of Interleukin (IL)-6, IL-8, IL-15, and IL-17, with the cytokine level predicting coronary aneurysm

formation in KD patients [76,77]

3.1.3.2.2. *Potential long-term adverse health effects.* In the long-term, SARS-CoV-2-induced KD vasculitis can lead to severe pathologies. Vasculitis has a predilection for coronary arteries with a high complication rate across the lifespan for those with medium to large coronary artery aneurysms [78]. The cytokine-induced inflammation produces endothelial dysfunction and damage to the vascular wall, leading to aneurysmal dilatation. Successively, vascular remodeling can also occur, but this does not imply resolution of the disease or reduction of risk for future complications. A rigorous follow-up to detect progressive stenosis, thrombosis and luminal occlusion that may lead to myocardial ischemia and infarction becomes mandatory [78]. Of equal importance, among other long-term outcomes, children with KD may have increased risks not only for ischemic heart disease, but also for autoimmune disorders, cancer as well as an increased all-cause mortality [71].

Additional questions regarding mass inoculation of children and adolescents include:

- a) Do children, being asymptomatic carriers of SARS-CoV-2, transmit the virus?
- b) Do recently vaccinated people, infected with SARS-CoV-2, transmit the virus?

There is evidence of children transmitting SARS-CoV-2 in community settings, but the existing literature is heterogeneous with regards to the relative rate at which they do so compared to adults [79].

Studies from South Korea and Thailand found a very limited number of secondary cases [80,81]. On the contrary, a large contact tracing study from India concluded that the highest probability of transmission was between case-contact pairs of similar age and that this pattern of enhanced transmission risk was highest among children 0–4 years of age as well as adults 65 years of age and older [80].

With regard to the second question, it was shown that household members of healthcare workers inoculated with a single dose of either Pfizer or Astra Zeneca COVID-19 inoculant were at significantly reduced risk of PCR-confirmed SARS-CoV-2 infection but at non-statistically significant reduced risk of hospitalization, compared to household members of uninoculated healthcare workers, fourteen days after inoculation [82]. This finding again underlines the association of severe disease to the characteristics of the infected person and not directly to the transmission, implying that the elderly should be inoculated and not the children.

### 3.2. *Novel best-case scenario cost-benefit analysis of COVID-19 inoculations for most vulnerable*

Traditional cost-benefit analyses are typically financial tools used to estimate the potential value of a proposed project. They involve generating cost streams over time, benefit streams over time, and then comparing the net present value of these two streams (including risk) to see whether the risk-adjusted discounted benefits outweigh the risk-adjusted discounted costs. Appendix D presents a detailed non-traditional *best-case scenario* pseudo-cost-benefit analysis of inoculating people in the 65+ demographic in the USA. In this incarnation of a cost-benefit analysis, the costs are the number of deaths resulting from the inoculations, and the benefits are the lives saved by the inoculations. The time range used was from December 2019 to end-of-May 2021. No discounting was done; an inoculation-based death occurring immediately post-inoculation was given the same importance/weighting as an inoculation-based death months after inoculation.

Why was this non-traditional approach selected for a cost-benefit analysis? In a traditional non-financial cost-benefit analysis relative to inoculations, the adverse events prevented by the inoculations would be compared with the adverse events resulting from the inoculations. Presently, in the USA, definitions, test criteria, and reporting incentives

for COVID-19 and its inoculants have shifted over time, and we believe a standard approach could not be performed credibly. Appendix Da presents some of the problems with the COVID-19 diagnostic criteria on which the above statements are based.

In contrast to the pandemic buildup phase, where many who died *with* COVID-19 were assumed to have died *from* COVID-19 by the medical community and the CDC, the post-inoculation deaths reported in VAERS are assumed by the CDC to be mostly from causes other than the inoculations. We wanted to use a modified cost-benefit analysis that would have less dependence on arbitrary criteria and subjective judgments.

The approach selected can be viewed as a *best-case scenario* pseudo-cost-benefit analysis. We assume the inoculations prevent *all* the deaths *truly* attributable to COVID-19 (these are the total deaths attributed to COVID-19 officially minus 1) the number of false positives resulting from the PCR tests run at very high amplification cycles and 2) the number of deaths that could have been attributed to one of the many comorbidities that were typical of those who succumbed, as shown in our results section) over the period December 2019 to end-of-May 2021, and relate that number to the deaths *truly* attributable to the inoculation (from January 2021 to end-of-May 2021) based on our computations in the results section. The results show *conservatively* that there are five times the number of deaths *truly* attributable to each inoculation vs those *truly* attributable to COVID-19 in the 65+ demographic. As age decreases, and the risk for COVID-19 decreases, the cost-benefit increases. Thus, if the best-case scenario looks *poor* for benefits from the inoculations, any realistic scenario will look *very poor*. For children the chances of death from COVID-19 are negligible, but the chances of serious damage over their lifetime from the toxic inoculations are not negligible.

#### 4. Discussion

Two issues arise from these results.

First, where is the data justifying inoculation for children, much less most people under forty? It's not found on Fig. 1, where the most vulnerable are almost exclusively the elderly with many comorbidities [83]. Yet, in the USA, Pfizer has been approved to inoculate children 12–17, and the goal is to accomplish this by the start of the school year in the Fall. As stated previously, there are plans to inoculate children as young as six months starting before the end of 2021.

What is the rush for a group at essentially zero risks? Given that the inoculations were tested only for a few months, only very short-term adverse effects could be obtained. It is questionable how well even these short-term effects obtained from the clinical trials reflect the short-term effects from the initial mass inoculation results reported in VAERS.

Figs. 1 and 2 reflect only these very short-term results. A number of researchers have suggested the possibility of severe longer-term autoimmune, Antibody-Dependent Enhancement, neurological, and other potentially serious effects, with lag periods ranging from months to years. If such effects do turn out to be real, the children are the ones who will have to bear the brunt of the suffering. There appear to be no benefits for the children and young adults from the inoculations and only Costs!

The second issue is why the deaths shown on Fig. 2 were not predicted by the clinical trials. We examined the Pfizer trial results (based on a few months of testing) and did not see how (potentially) hundreds of thousands of deaths could have been predicted from the trials' mortality results. Why this gap?

As we showed in the clinical trials section, 17.4 % of the Pfizer sample members were over 65, and 4.4 % were over 75. When the later phases of the trials started in late July 2020, the managers knew the COVID-19 age demographics affected from the July 2020 analog of Fig. 1. Rather than sampling from the age region most affected, they sampled mainly from the age region least affected! And even in the very limited sampling from the oldest groups, it is unclear whether they

selected from those with the most serious comorbidities. Our impression is that the sickest were excluded from the trials, but were first in line for the inoculants.

It is becoming clear that the central ingredient of the injection, the recipe for the spike protein, will produce a product that can have three effects. Two of the three occur with the production of antibodies to the spike protein. These antibodies could allegedly offer protection against the virus (although with all the "breakthrough" cases reported, that is questionable), or could suppress serious symptoms to some extent. They could also cross-react with human tissue antigen, leading to potential autoimmune effects. The third occurs when the injected material enters the bloodstream and circulates widely, which is enabled by the highly vascular injection site and the use of the PEG-2000 coating.

This allows spike protein to be manufactured/expressed in endothelial cells at any location in the body, both activating platelets to cause clotting and causing vascular damage. It is difficult to believe this effect is unknown to the manufacturer, and in any case, has been demonstrated in myriad locations in the body using VAERS data. There appears to be modest benefit from the inoculations to the elderly population most at risk, no benefit to the younger population not at risk, and much potential for harm from the inoculations to both populations. It is unclear why this mass inoculation for all groups is being done, being allowed, and being promoted.

#### 5. Overall conclusions

The people with myriad comorbidities in the age range where most deaths with COVID-19 occurred were in very poor health. Their deaths did not seem to increase all-cause mortality as shown in several studies. If they hadn't died with COVID-19, they probably would have died from the flu or many of the other comorbidities they had. We can't say for sure that many/most died from COVID-19 because of: 1) how the PCR tests were manipulated to give copious false positives and 2) how deaths were arbitrarily attributed to COVID-19 in the presence of myriad comorbidities.

The graphs presented in this paper indicate that the frail injection recipients receive minimal benefit from the inoculation. Their basic problem is a dysfunctional immune system, resulting in part or in whole from a lifetime of toxic exposures and toxic behaviors. They are susceptible to either the wild virus triggering the dysfunctional immune system into over-reacting or under-reacting, leading to poor outcomes or the injection doing the same.

This can be illustrated by the following analogy. A person stands in a bare metal enclosure. What happens when the person lights a match and drops it on the floor depends on what is on the floor. If the floor remains bare metal, the match burns for a few seconds until extinguished. If there is a sheet of paper on the floor under the match, the match and the paper will burn for a short time until both are extinguished. If, however, the floor is covered with ammonium nitrate and similar combustible/explosive materials, a major explosion will result! For COVID-19, the wild virus is the match. The combustible materials are the toxic exposures and toxic behaviors. If there are no biomarker 'footprints' from toxic exposures and toxic behaviors, nothing happens. If there are significant biomarker 'footprints' from toxic exposures and toxic behaviors, bad outcomes result.

Adequate safety testing of the COVID-19 inoculations would have provided a distribution of the outcomes to be expected from 'lighting the match'. Since adequate testing was not performed, we have no idea how many combustible materials are on the floor, and what the expected outcomes will be from 'lighting the match'.

The injection goes two steps further than the wild virus because 1) it contains the instructions for making the spike protein, which several experiments are showing can cause vascular and other forms of damage, and 2) it bypasses many front-line defenses of the innate immune system to enter the bloodstream directly in part. Unlike the virus example, the injection ensures there will always be some combustible materials on the

floor, even if there are no other toxic exposures or behaviors. In other words, the spike protein and the surrounding LNP are toxins with the potential to cause myriad short-, mid-, and long-term adverse health effects even in the absence of other contributing factors! Where and when these effects occur will depend on the biodistribution of the injected material. Pfizer's own biodistribution studies have shown the injected material can be found in myriad critical organs throughout the body, leading to the possibility of multi-organ failure. And these studies were from a single injection. Multiple injections and booster shots may have cumulative effects on organ distributions of inoculant!

The COVID-19 reported deaths are people who died **with** COVID-19, not necessarily **from** COVID-19. Likewise, the VAERS deaths are people who have died **following** inoculation, not necessarily **from** inoculation.

As stated before, CDC showed that 94 % of the reported deaths had multiple comorbidities, thereby reducing the CDC's numbers attributed strictly to COVID-19 to about 35,000 for all age groups. Given the number of high false positives from the high amplification cycle PCR tests, and the willingness of healthcare professionals to attribute death to COVID-19 in the absence of tests or sometimes even with negative PCR tests, this 35,000 number is probably highly inflated as well.

On the latter issue, both Virginia Stoner [85] and Jessica Rose [86] have shown independently that the deaths **following** inoculation are not coincidental and are **strongly related to** inoculation through strong clustering around the time of injection. Our independent analyses of the VAERS database reported in Appendix 1 confirmed these clustering findings.

Additionally, VAERS historically has under-reported adverse events by about two orders-of-magnitude, so COVID-19 inoculation deaths **in the short-term** could be in the hundreds of thousands for the USA for the period mid-December 2020 to the end of May 2021, potentially swamping the *real* COVID-19 deaths. Finally, the VAERS deaths reported so far are for the very short term. We have no idea what the death numbers will be in the intermediate and long-term; the clinical trials did not test for those.

The clinical trials used a non-representative younger and healthier sample to get EUA for the injection. Following EUA, the mass inoculations were administered to the very sick (and first responders) initially, and many died quite rapidly. However, because the elderly

## Appendix A

### EXPECTED DEATHS IN 65+ DEMOGRAPHIC VS COVID-19 INOCULATION DEATHS

The goal of this appendix is to estimate the number of actual deaths from the COVID-19 inoculation based on the number of deaths following inoculation reported in VAERS [93,94,101]. The approach used will:

- 1) identify the number of deaths following COVID-19 inoculation that would have been **expected** without COVID-19 inoculation (i.e., pre-COVID-19 death statistics);
- 2) relate the VAERS **expected** death data to the actual number of deaths **expected** based on historical death statistics; and
- 3) apply this ratio to scale-up the deaths attributed to COVID-19 inoculation reported in VAERS to arrive at actual deaths attributable to COVID-19 inoculation.

For example, if ten deaths could be shown in VAERS to reflect expected pre-COVID-19 deaths, and the actual number of expected pre-COVID-19 deaths from historical data was 100, the scaling factor of deaths would be ten to translate VAERS-reported deaths to actual deaths. Then, the deaths reported in VAERS that can be attributed to the COVID-19 inoculation will be multiplied by the expected deaths scaling factor, ten, to arrive at the actual number of deaths resulting from the COVID-19 inoculation. Thus, if VAERS shows fifty deaths that can be attributed to the COVID-19 inoculation, then the actual number of deaths attributed to COVID-19 will be 500 with these assumptions [3].

The basis for our approach is the following statement from the USA Federal government: "Healthcare providers are required to report to VAERS the following adverse events after COVID-19 vaccination [33] and other adverse events if later revised by FDA" [96,102,103]. "Serious AEs regardless of causality.", including death [3,95].

If there had been full compliance with this requirement in VAERS, then the VAERS-reported deaths would have equaled the sum of

- 1) actual expected deaths (based on past statistics)

who died following COVID-19 inoculation were very frail with multiple comorbidities, their deaths could easily be attributed to causes other than the injection (as should have been the case for COVID-19 deaths as well).

Now the objective is the inoculation of the total USA population. Since many of these potential serious adverse effects have built-in lag times of at least six months or more, we won't know what they are until most of the population has been inoculated, and corrective action may be too late.

2) actual deaths over and above expected deaths that could be attributed to the COVID-19 inoculations.

Based on this requirement, we will generate a rough estimate (in the simplest form possible) of the number of deaths that would have occurred in the 65+ demographic if there had been no COVID-19 “pandemic”. Then, we will relate this number to the number of deaths reported to VAERS following COVID-19 inoculations in the 65+ demographic. This would provide a “floor” for estimating the fraction of actual deaths reported to VAERS. This will be followed by parameterizing potential deaths attributable to the COVID-19 inoculations and displaying the effects on ratio of reported deaths to actual deaths. We will perform a global analysis and a local analysis, to see whether major or minor differences occur. The local analysis (Section A1-a2) may be somewhat easier to comprehend than the global analysis, but both come to similar conclusions.

#### A1-a Deaths Following COVID-19 Inoculations Reported to VAERS Compared to Expected Deaths

##### A1-a . Problems with VAERS

Before we discuss numbers of adverse events reported by VAERS, we need to identify potential shortcomings of, and problems with, VAERS, so these numbers of adverse events can be understood in their proper context. As stated previously, VAERS is a passive surveillance system managed jointly by the CDC and FDA, and historically has been shown to report about 1% of actual vaccine/inoculation adverse events (confirmed by the first principles analysis that follows in this appendix). There is no evidence that even the 1% reported have been selected randomly.

Some of this gross underreporting of adverse events reflects a major conflict-of-interest of CDC with respect to VAERS. CDC provides funding for administration of many vaccines, including the COVID-19 inoculations. Prior to COVID-19, the CDC provided about five billion dollars annually to the Vaccines for Children Program alone [102].

For COVID-19, the CDC has received many billions of dollars in supplemental funding for myriad activities, including vaccine distribution. It is difficult to separate out the CDC funding available for vaccine distribution from other CDC COVID-19 related activities, but one budget item (of many) should illustrate the magnitude of the effort: “Coronavirus Response and Relief Supplemental Appropriations Act, 2021 (P.L. 116–260): P.L. 116–260 provided \$8.75 billion to CDC to plan, prepare for, promote, distribute, administer, monitor, and track coronavirus vaccines to ensure broad-based distribution, access, and vaccine coverage.” [3]. Low reporting rates of actual adverse events in VAERS should not be surprising, since the same organization that receives multi-billions of dollars in funding annually for promoting and administering vaccines also has responsibility for monitoring the safety of these products (whose liability has been waived).

In addition, the 1% reporting rates came from a thirty-day tracking study [22], and therefore are strictly applicable to *very near-term* adverse events. For mid-term and especially long-term events, the reporting rates would be much lower, since the links between inoculation and adverse events would be less obvious. That doesn’t mean these non-very-short-term adverse events don’t exist; it just means they haven’t been tracked. Absence of evidence is not evidence of absence. Thus, the VAERS numbers should be viewed as a very low “floor” of the numbers and types of adverse events from COVID-19 inoculations that exist in the real-world.

##### A1-a2 Global analysis

We used 2019 death statistics from CDC to start the analysis. According to search results from CDC Wonder [104] obtained 11 June 2021, there were 2,117,332 deaths from all causes for people aged 65+ in the United States in 2019. Assuming uniformity throughout the year, there would have been 882,000 deaths occurring the first five months of the year, and that number will be used as the expected deaths for the first five months of 2021. From the same source, the population estimate is 54,000,000 for the 65+ age range. From CDC COVID-19 data tracker, the number of people 65+ vaccinated with at least one dose is 44,000,000 [24].

For those who were inoculated somewhere in the time frame 1 January 2021 to 31 May 2021, the number who would have been expected to die in the period from inoculation to 31 May will be a function of the duration of this period. For example, if all 44,000,000 people had been fully inoculated on 1 January 2021, then the number expected to die post-inoculation from non-COVID-19 inoculation causes would be simply  $(44,000,000/54,000,000) \times 882,000$ , or 723,000 deaths. Conversely, if all 44,000,000 people had been fully inoculated on 31 May 2021, then the number expected to die post-inoculation from non-COVID-19 inoculation causes would be extremely small [24].

For an accurate estimation of the number expected to die post-inoculation from non-COVID-19 causes, one would need to integrate the time between inoculation and 31 May over the inoculation temporal distribution function. For present purposes, we will do a very rough approximation by modeling the inoculation distribution function as a delta function occurring at a mean temporal location. In other words, we compress all inoculations an individual receives into one, identify the mean temporal location from the actual inoculation distribution function, and compute the expected deaths based on the distance from 31 May to the temporal mean point.

From a graph of inoculation trends in the CDC data tracker [101] the distribution appears to be non-symmetrical pyramidal, rising to a peak in mid-April. This is slightly over the 2/3 point in the five-month range of interest. We will approximate the mean time point as 2/3 of the distance.

Table A1 displays the mean time normalized to the five-month study window vs potential deaths from COVID-19 inoculation (not expected from prior census data) normalized to the deaths expected from prior census data. Each cell represents the percent of deaths reported in VAERS following inoculation relative to total deaths (number of deaths expected from prior census data plus number of deaths following COVID-19 inoculation not contained in the expected death group). The model on which the table is based is as follows: there are two classes of deaths for the period following COVID-19 inoculation. One is the deaths expected from prior census data, and the other is deaths attributable mainly to COVID-19 inoculation. There would be potentially substantial overlap between the two in this age group (and perhaps other age groups as well). We assume that we can tag those individuals who would be expected to die based on prior census data. The remaining deaths attributable to COVID-19 inoculation not contained within the tagged group are classified as potential COVID deaths in Table A1.

Consider the cell (2/3,0). The mean time is about mid-April 2021 and the only deaths occurring are those expected (some may have died because of the inoculation, but they were sufficiently ill that they would have died during that period without the inoculation). There were 723,000 expected deaths and 3560 reported, yielding a ratio of deaths reported in VAERS to actual deaths of ½%.

Consider the cell (1/2,1). The mean time would have been about mid-March 2021 and the inoculation distribution would have resembled an isosceles triangle. The total deaths occurring are those expected and an equal number whose deaths were attributed to COVID-19 inoculation but did not overlap with those in the tagged expected group (there still could have been some/many in the latter group that may have died because of the

inoculation, but they were sufficiently ill that they would have died during that period without the inoculation). There were 724,000 total deaths that occurred during that period and 3560 reported, yielding a ratio of deaths reported in VAERS to actual deaths of  $\frac{1}{200}$ %. [3]

So, according to Table A1, focusing on the parameter most closely reflecting the actual inoculation distribution (2/3), the reporting percentages of actual to total are about 1%. This mirrors the Harvard Pilgrim study results (referenced in our vaccine safety study) which were obtained through an entirely different empirical approach [4]. At least for deaths reporting, there appears to be an approximately two order of magnitude difference between actual and reported deaths in VAERS.

Table A1 used two parameters to examine a broad spectrum of possible results, the mean time and the number of deaths solely attributable to COVID-19 inoculation. The mean time parameter was fairly well known and constrained in interpretation, because it was based on an empirical inoculation distribution function. The number of deaths solely attributable to COVID-19 inoculation is completely unknown.

As will be shown in the next section, the numbers of deaths reported in VAERS are strongly related to the inoculation date by clustering, but those who died might also have been those who would have died anyway because they were expected to die. There were probably some of each in that group reported. But we have no idea of the total number whose death could be directly attributed to COVID-19 inoculation and who were not in the group expected to die. For all we know, there could have been ten million people in that group, and only an extremely small fraction of that total group was reported in VAERS.

Suppose, for example, that the actual number of deaths reported in VAERS came from two groups: 90 % were from the inoculation-attributable death group and 10 % were from the expected death group. Assume there is no overlap between the two groups. In that case, what VAERS shows is not that 1% of actual expected deaths were reported, but rather that 1/10 of one percent of the expected deaths were reported. If that metric is used as the standard to scale up to total deaths, then the number in the actual inoculation-attributable death group is not 100 times the VAERS reported deaths, but rather 1000 times the VAERS-reported deaths! The point is we can't "reverse-engineer" the reported VAERS death numbers to get the actual inoculation-attributable deaths because it depends on the unknown contribution of each of the two groups (expected deaths and inoculation-attributable deaths) to the VAERS reported deaths, and we can't separate those out.

All this analysis shows is that, at best, only about 1% of the number expected to die was reported, and because the number reported in VAERS included deaths from both groups, the fraction from each actual group of deaths could not be determined. Realistically, we may have to wait until mid-2022, when the 2021 total deaths for each age group are finalized, to ascertain whether we can see increases in all-cause mortality that could have come from the inoculation-attributable deaths.

#### A1-a3 Local Analysis

Another way of estimating VAERS reporting efficiency is to perform a local analysis, focused on clustering about date of COVID-19 inoculation. For the 65+ demographic, the post-inoculation deaths cluster near the vaccination date, providing evidence of a **strong link to the inoculation**.

Following the approach in the first section of this appendix, we calculate the deaths expected in any ten-day period based on 2019 pre-COVID-19 death statistics. For the inoculated group, the number of deaths expected for any ten-day period are (2,117, 332 deaths/per year) x (44,000,000/54,000,000 fraction of population in age range inoculated) x (10/365 fraction of year), or 47,270 deaths.

---

#### BEST-CASE SCENARIO

Consider the ten days following inoculation (including day of inoculation). Approximately 2,000 deaths were reported in VAERS. Assume hypothetically that all these deaths were in the expected category; this can be viewed as a *best-case scenario*. In this *best-case scenario*, where the concentration of deaths is the highest and is normalized to the expected number of non-COVID-19 inoculation deaths (excluding deaths due solely to COVID-19 inoculation), 2,000/47,270 % of actual deaths (inoculation-related or not), or 4.23%, are reported in VAERS. Thus, at best, VAERS is underreporting by a factor of 20.

---

Suppose in that ten-day interval there had been 10,000 deaths that could be directly attributed to COVID-19 inoculation in addition to the expected deaths. This would have given a ratio of 2,000/57,270 actual total deaths, or 3.5 % reported in VAERS. This latter approach requires less assumptions than the former approach, but still yields results of only a few percent actual deaths reported in VAERS.

The Harvard Pilgrim electronic tracking study of post-vaccination events reported to VAERS performed in 2010 [4] showed a 1 % reporting rate for a thirty-day period. In the present case, 2900 post-inoculation deaths were reported to VAERS within thirty days of inoculation, or 82 % of total deaths for the 65+ demographic. Substituting thirty days for ten in the above computation yields 141,810 expected non-COVID-19 post-inoculation deaths for the thirty-day period, or 2% that are reported in VAERS. The Harvard study used an electronic system that automatically tracked every event that occurred, no matter how small. Because of the effort (time and cost) required to submit event reports to VAERS, we suspect that only the more serious events, such as death, would be reported, and even in this case, the numbers reported are miniscule.

We also did an analysis for sixty days post-inoculation. In the present case, 3300 post-inoculation deaths were reported to VAERS within sixty days of inoculation, or 93 % of total deaths for the 65+ demographic. Substituting sixty days for ten in the above computation yields 283620 expected non-COVID-19 post-inoculation deaths for the thirty-day period, or 1.2 % that are reported in VAERS. Remember, this normalization is based only on expected deaths. If 100,000 deaths attributable mainly to the COVID-19 inoculation beyond those that overlapped with the expected group occurred during this period, then the denominator would have to be increased by 100,000, yielding a VAERS reporting rate of 0.86 %.

Thus, both the global and local analyses, and the Harvard Pilgrim empirical analysis, are converging on the same two orders-of-magnitude difference between the actual number of deaths that occurred in the USA and those reported in VAERS. Depending on how many people have really died as a result of the COVID-19 inoculation, this reporting rate could well be a fraction of a percent!

#### A1-a3a Local Clustering Analysis

We end this appendix with one more example from the local analysis. Some background perspective is required. In the buildup to the pandemic (putting aside the issue of high false positives from PCR tests run at high numbers of amplification cycles), almost anyone who died **with** COVID-19 was assumed to have died **from** COVID-19, irrespective of the number of potentially lethal comorbidities they had. The CDC admitted later that about

94 % of the deaths attributed to COVID-19 would ordinarily have been attributed to one of the comorbidities.

For this example, we adopt a similar philosophy for the COVID-19 inoculations. People in the 65+ demographic who have died following inoculation are divided into two groups: those who died **from** the inoculation and those who died as **expected** based on pre-COVID-19 death data. The two groups range from being entirely separate to completely overlapping. We will examine two cases: entirely separate and completely overlapping.

How are the members of each group determined? The death **from** inoculation group consists of those whose deaths cluster significantly around the date of inoculation. The deaths expected group are the number who would have died in the absence of COVID-19. We allow for overlap, where each person who died can be double-valued (a member of both groups), but not double-counted.

To obtain a relatively precise estimate of expected deaths, we would want to select a region of time where the distribution function has substantially leveled off. From Fig. A1, the thirty-sixty-day range appears reasonable. However, there is a time issue here. Given the lag time in data reported by VAERS, most of the data in this range will probably have come from inoculations in January and February, and early-mid March, approximately 35 percent of the total inoculations. Therefore, we could multiply the thirty-sixty-day average number of deaths by 3 to obtain 40 expected deaths per day. An even simpler way to estimate the expected deaths reported in VAERS is to use the 15–30-day average shown, which will represent most of the range. This value is 37, which is close to the 40 obtained with the above approximation. This analysis should be re-run in three-four months, when more of the long-range data has been filled in.

Table A2 shows the results of our analysis. As stated previously, two separate cases were analyzed: completely separate groups and completely overlapping groups. Two values of daily expected deaths were used: the 37 as described above, and 20 to account for potentially lower expected death reporting when the VAERS data has filled in more completely.

Thus, based on the deaths reported in VAERS following COVID-19 inoculation, and assuming the inoculation-related deaths are reported in the same ratio as expected deaths, the actual number of deaths strongly related to the COVID-19 inoculation should be scaled up by factors of 100–200. For the broadest definition of VAERS coverage provided by CDC Wonder, which includes the USA and all territories, protectorates, and possessions, the total deaths following COVID-19 were 5200 in early June 2021. Using our scaling factors, this translates into somewhere between one-half million and one-million deaths, and this has not taken into account the lag times associated with entering data into VAERS. Compared with the 28,000 deaths the CDC stated were due to COVID-19 and not associated morbidities for the 65+ age range, the **inoculation-based deaths are an order-of-magnitude greater than the COVID-19 deaths!** It should be remembered these are only the **very-short-term inoculation-based deaths**, and could increase dramatically if mid- and long-term adverse effects come to fruition.

We end this appendix with an even more unsettling possibility. The main assumption upon which the results in Table A2 were based is that the post-inoculation temporal distribution function shown in Fig. A1 could be divided into two regions. The strongly varying region originating from the inoculation date reflected deaths from the inoculation, and the essentially flat region that followed reflected expected deaths (that flat region also started at the inoculation date, and formed the base on which the highly varying region is positioned). This model excludes the possibility that deaths from the inoculation extend well beyond the limits of the highly varying region.

We know in general this is not true. There can be lag effects such as ADE in the Fall viral season, and longer-term effects such as autoimmune diseases. We postulate that there are other effects from the inoculation that could result in the same flat death profile as that for expected deaths.

Consider the following. Some of the damage we have seen following the inoculations in VAERS includes coagulation/clotting effects and neurological effects of all types [63]. If these effects are not lethal initially, they raise the level of dysfunction. Thus, platelet aggregation has increased to a new base level, and micro-clots have raised the probability of serious clots forming from other lifestyle factors [105]. Death of specific neurons can increase the risk of Alzheimer's disease or Parkinson's disease, and can accelerate the onset of these and many other diseases. Thus, the adverse impacts of the COVID-19 inoculations could be viewed as raising the level of expected deaths in the future. Any deaths of this nature reported in VAERS would need to be viewed as inoculation-driven, and the expected deaths used in the computations would be reduced accordingly.

Consider Table A3 below. The “expected deaths reported” have been reduced below their counterparts in Table A2 to illustrate parametrically how the total inoculation-based deaths would change from VAERS reporting if this baseline effect is operable. While Table A2 used values of 37 and 20 for expected deaths, Table A3 uses values of 10 and 15.

Thus, if the baseline of the host for coagulation/clotting, inflammation, hypoxia, neurodegeneration, etc., has been raised by the inoculations, translating into an increase in expected deaths and accelerated deaths, then it is entirely plausible that the VAERS death numbers reflect over a million deaths from COVID-19 inoculations so far. These are very short-term-effects only, and time will tell whether the large potential waves of ADE-driven deaths and autoimmune-driven deaths come to pass.

## Appendix B

### DETAILED ANALYSIS OF MAJOR COVID-19 INOCULANT CLINICAL TRIALS

#### A2-a Clinical Trials in the Mainly Adult Population

**Definitions.** *Efficacy* is the degree to which a vaccine prevents disease, and possibly also transmission, under ideal and controlled circumstances – comparing a vaccinated group with a placebo group [106].

*Effectiveness* refers to how well a vaccine performs in the real world [107]

*Relative Risk (RR)* is computed by dividing the percentage of patients that contracted disease in the vaccine arm by the percentage of patients that contracted disease in the placebo arm.

*Relative Risk Reduction (RRR)* is computed by subtracting the RR from 1.

*Absolute Risk Reduction (ARR)* is computed by subtracting the percentage that contracted disease in the vaccine arm from the percentage that contracted disease in the placebo arm.

*Absolute Risk* = probability = incidence.

*Cumulative Incidence* represents the number of new cases in a period of time / population at risk.

*Incidence Density* is the number of new cases of a given disease during a given period in specified population; also, the rate at which new events occur in a defined population.

**Immunogenicity** is the ability of a molecule or substance to provoke an immune response or the strength or magnitude of an immune response. It can be a positive (wanted) or negative (unwanted) effect, depending on the context.

**Immune Response** is an integrated systemic response to an antigen (Ag), especially one mediated by lymphocytes and involving recognition of Ags by specific antibodies (Abs) or previously sensitized lymphocytes [108]

Safety data for Pfizer and Moderna trials:

There were two major COVID-19 inoculant clinical trials: Pfizer/BioNTech and Moderna.

The Pfizer clinical trials were titled officially “a phase 1/2/3, placebo-controlled, randomized, observer-blind, dose-finding study to evaluate the safety, tolerability, immunogenicity, and efficacy of sars-cov-2 rna vaccine candidates against covid-19 in healthy individuals” [98]. The “Actual Study Start Date” was 29 April 2020, the “Estimated Primary Completion Date” was 2 November 2020, and the “Estimated Study Completion Date” is 2 May 2023. Thus, the mass inoculation rollout so far has been conducted in parallel with the Pfizer Phase III Clinical Trial. For all practical purposes, the mass global inoculation of the Pfizer inoculant recipients can be considered Phase III 2.0 of the Clinical Trials! The inclusion criteria for the official Phase III Clinical Trials incorporated (as stated in the title and in the protocol document) healthy individuals, while the criteria for mass inoculation went well beyond healthy individuals. In essence, we have an official Phase III Clinical Trial with 73,000+ healthy individuals, and an unofficial Phase III Clinical Trial with billions of individuals covering a wide spectrum of health levels [98].

The Pfizer Phase III trials were initiated July 2020, the efficacy data were submitted to the FDA for EUA approval in November 2020, and FDA approval was granted in December 2020. Six deaths occurred in the Pfizer trial, two in the inoculated group and four in the placebo group (which received saline) [33]. The two inoculated, both over the age of 55, died of cardiovascular causes. One died three days after inoculation and the other died 62 days after inoculation [109]. These two deaths were comparable (in frequency and cause) to placebo group deaths and perhaps more importantly, similar to the general population at that age. In the case of Moderna, there were 13 deaths, six in the inoculated group, seven in the placebo group (normal saline placebo, a mixture of sodium chloride in water 0.90 % w/v) at 21–57 days after the inoculation ([103]b).

In a report by the Norwegian National Medicines Association, published on 15 January 2021, there were 23 elderly people (all over the age of 75 and frail) in nursing homes, who died at various intervals from the time of inoculation with mRNA inoculant. The report then suggested that, following the assessment, 13 of the 23 deaths would have been a direct result of the side effects of inoculation. It is possible that the other 10 deaths were post-inoculation, but not directly related to side effects, so not necessarily related to the inoculant itself [109].

It is no surprise that frail elderly people can be fatally destabilized by adverse reactions associated with post-inoculation inflammation, which in a young adult would have been considered minor. It is also no surprise that frail elderly people with comorbidities can be fatally destabilized from COVID-19 infection, which in a young adult or child would have been considered minor. A frail elderly person can be fatally destabilized by a simple coughing fit! This does not mean that these deaths are not events that need to be taken very seriously; on the contrary, if confirmed, they should guide inoculation policies in this category of patients from now on. Specifically, each case should be carefully assessed and an inoculation decision made based on the risk-benefit ratio [110].

In light of these data, the question may arise as to why there were no inoculant-attributed deaths in clinical testing of inoculants. The answer is that neither Pfizer nor Moderna included frail patients and included only a small number of very elderly patients - those over 75 accounted for 4.4 % of the total tested for Pfizer and 4.1 % for Moderna. While they could not in fact determine a causal relationship between inoculation and death, they also could not rule out that the inoculations had accelerated the deterioration of the condition of those patients [33].

Effectiveness data

As defined previously, the effectiveness of a vaccine lies in its ability to prevent a particular disease. If designed, tested, and administered correctly, authorized vaccines are effective in preventing disease and protecting the population. Like medicines, vaccines are not 100 % effective in all vaccinated people. Their effectiveness in a person depends on several factors. These include: age; other possible diseases or conditions; time elapsed since vaccination; previous contact with the disease.

To be declared safe and effective, a vaccine against COVID-19 infection must pass a series of tests and must meet regulatory standards, like any other vaccine or drug approved on the pharmaceutical market [111].

Regarding Pfizer and Moderna trials:

The first important note is that maximum efficiency does not come immediately, because the immune response needs time.

In the case of Pfizer, the chance of developing COVID-19 becoming virtually the same between the inoculated and placebo groups increases up to 12 days after the first inoculation, then gradually decreases for those inoculated. The inoculum efficiency between the first and second doses is 52 % [106], but it is unclear what long-term protection a single dose provides. After the second dose, the effectiveness rises to 91 % and only beyond 7 days after the second dose is 95 % reached. However, the ARR for the latter case is only 0.7 % [112]. In other words, within 12 days after the first dose we can get COVID-19 as if we had not been inoculated. Another important aspect is that we still do not know if the Pfizer inoculant prevents severe cases. Seven days after the second dose, there were four severe cases of COVID-19, one in the inoculated group and three in the placebo group, which is far too low for us to make a statistical assessment. There are as yet no data on the inoculant’s ability to prevent community transmission. Realistically, the effectiveness of the inoculant in preventing asymptomatic cases has not been tested.

For Moderna, the effectiveness is only 50 % in the first 14 days after the first dose and reaches a maximum of 92.1 % on the edge of the second dose (ARR of 1.1 %, which is 28 days, not 21 as in the case of Pfizer) [46]. Moderna also did not test the long-term efficacy of a single dose. Then, 14 days after the second dose, the effectiveness rises to 94.1 %, with the amendment being an average. Thus, in people over 65 it was 86.4 %, compared to 95.6 % in the 18–65 age range ([103]). It is a minor difference from Pfizer, which declares equal efficiency in all age groups. An important observation is the statement by Moderna that their inoculant prevents severe cases, but only more than 14 days after both doses [126]. All 30 severe cases were in the placebo group, suggesting 100 % efficacy. After a single dose, there were two severe cases among those inoculated and four in the placebo group [33]. Last, but not least, unlike Pfizer, Moderna tested the presence of asymptomatic infection by RT-PCR before the second dose: there were 39 asymptomatic cases in the placebo group and 15 in the inoculated group. It is difficult to draw definitive conclusions due to the small number of cases. These data suggest that the inoculant reduces, but does not prevent, asymptomatic transmission [126].

#### A2-b Ongoing Clinical Trials in the Pediatric Population

In a recent Phase III study performed in the pediatric population, Comirnaty (Pfizer) was tested on a group of 2,260 children, aged 12–15, years who had no previous clinical signs of SARS-CoV-2 infection. They were divided into two groups, one placebo (978 children) and the other with Comirnaty (1005 children). In the Comirnaty group, of the 1005 children in whom the serum was administered, none developed COVID-19 disease,

compared with the placebo group in which 16 children in 978 had clinical signs of the disease. The Pfizer study showed that the children's immune response was comparable to the immune response in the 16–25 age group (measured by the level of antibodies against SARS-CoV-2). It could be concluded that in this study, Comirnaty was 100 % effective in preventing SARS-CoV-2 infection, although the actual rate could be between 75 % and 100 %. [63]. The results will be evaluated by the FDA and EMA.

The predictive value (for mass inoculation results) of the Comirnaty trial for the children aged 12–15 years is questionable. There were 1005 children who were inoculated with Comirnaty. Using the rule of three in statistics, where to obtain a predictive result of 1/x with high confidence (e.g., 1 in a thousand), 3x participants are required for the test sample. For the Comirnaty test sample of 1005, an adverse event of about 1/340 could be detected with high confidence.

What does this mean in the real world? In the USA, there are approximately 4,000,000 children in each age year for adolescents. Thus, there are 16,000,000 children in the 12–15 age band. A serious adverse event, including death, that occurred at a 1/800 rate would not be detectable with high confidence in a sample of 1005 people. Thus, the results of the trials for 1005 children would allow for 20,000 children to suffer a non-trial-detected serious adverse event, including death, when extrapolated to potential inoculation of all children in the 12–15 age group! Given that the risk of contracting COVID-19 with serious outcomes is negligible in this population, **proceeding with mass inoculation of children 12–15 years old based on the trials that were conducted cannot be justified on any cost-benefit ratio findings.**

Also, the evaluation of efficacy in children aged 6 months to 11 years has recently begun and continues [24]. Pfizer began enrolling children under 12 to evaluate the COVID-19 mRNA inoculant. Also, Comirnaty will be evaluated in a new clinical trial for children aged 6 months to 11 years. In the first phase, the study will enroll 144 people and will identify the required dose for 3 age groups (6 months - 2 years, 2–5 years and 5–11 years). After a 6-month follow-up period, the parents/guardians of children in the placebo group will have the option of allowing their children to receive the inoculation. The results are expected in the second half of 2021.

Moderna also began a study to evaluate the mRNA inoculation in children aged 6 months to 12 years. Both companies have already started testing vaccines in 14-year-olds. In the US, children make up 23 % of the population [113].

Data on the risks and benefits of possible inoculation in children and adolescents are currently insufficient and no recommendation can be made. Specifically, mass child inoculations cannot be recommended until the benefits and minimal projected risks have been demonstrated in a sufficiently large trial to provide confidence that mass inoculation will have an acceptable level of adverse effects relative to the demonstrated benefits. On the other hand, children often experience COVID-19 asymptotically, and the SARS-CoV-2 infection progresses harmlessly. Currently, in the context of limited inoculation capacities, there is no indication of urgent inoculation of children. In the context of declining incidences of SARS-CoV-2 infections and demonstrated low serious adverse effects from COVID-19 infections for children and adolescents, the issue of inoculating children and adolescents is no longer paramount. Authorized forums must calculate what prevails for children and adolescents: the benefits or risks.

#### A2-c Clinical Trial Issues for Other Categories

Although people with severe comorbidities such as obesity or oncological conditions were not initially included in the clinical trials that led to obtaining EUA, they were included in subsequent studies, some even ongoing. In their case, it seems that the efficacy was lower compared to the results obtained initially with healthy adults.

The interim analysis of data from a prospective observational study indicates the need to prioritize cancer patients for timely (respectively 21-day) booster administration in the case of administration against COVID-19 with Comirnaty. According to the study, the effectiveness of a single dose of Comirnaty among cancer patients is low, but the immunogenicity of patients with solid cancers increased at 2 weeks after receiving the second dose of inoculant 21 days after the first dose. Because the study was conducted in the UK, participants inoculated before December 29, 2020 received two doses of Comirnaty 21 days apart, and those who started the regimen after this date were scheduled to receive a second dose of Comirnaty 12 weeks apart. first administration. Thus, the study continues to collect data from participants receiving Comirnaty 12 weeks after the first dose.

Approximately 21 days after a single dose of Comirnaty, the proportion of study participants who tested positive for anti-S IgG antibodies was [114]:

- 94 % among healthy participants;
- 38 % among patients with solid cancers;
- 18 % among patients with hematological cancers.

Among participants who received the 21-day booster and for whom biological samples were available two weeks after the second dose, the following proportions of confirmation as seropositive for anti-S IgG antibodies were reported [114].

- 100 % of healthy participants, compared to 86 % of the same group of participants who did not receive the second dose;
- 95 % of patients with solid cancers, compared with 30 % of the same group of participants who did not receive the second dose;
- 60 % of patients with hematological cancers, compared with 11 % of the same group of participants who did not receive the second dose.

Two other studies suggest low immunogenicity in the context of Comirnaty administration in patients with hematological cancers. In one study, patients with chronic lymphocytic leukemia (CLL) had significantly reduced immune response rates to COVID-19 inoculation compared to healthy participants of the same age. Considerable variations in post-administration immune response have been reported among patients with CLL depending on their stage of treatment

The effectiveness of Comirnaty administration was also evaluated in elderly patients with multiple myeloma [115]. 21 days after administration of the first dose of Comirnaty inoculation (before receiving the second dose), 20.5 % of patients with multiple myeloma compared to 32.5 % of control participants had neutralizing antibodies against SARS-CoV-2. One possible explanation could be that the therapy negatively affects the production of antibodies. However, the administration of the second dose is important for the development of the immune response in these patients [115].

Preliminary data from the v-safe surveillance system, the v-safe pregnancy registry and the Vaccine Adverse Event Reporting System (VAERS) do not indicate obvious safety signals regarding pregnancy or the associated neonatal implications with mRNA injections against COVID-19 *in the third trimester of pregnancy* [3]. The study included 35,691 pregnant women [116]. Compared to non-pregnant women, pregnant women reported more frequent pain at the injection site as an adverse event associated with mRNA COVID-19 vaccination, and headache, myalgia, chills, and fever were reported less frequently. In the context where initial clinical trials of messenger RNA-based inoculants have not evaluated the efficacy and safety of innovative technology among pregnant women, these preliminary data *from the third trimester only* help to inform both pregnant women and health professionals in making the inoculation decision. However, continuous monitoring through large-scale longitudinal studies remains necessary to investigate the effects associated with maternal anti-COVID-19 inoculation on mothers, pregnancies, the neonatal period and childhood.

On the other hand, the inoculation landscape has become even more complex due to new circulating viral variants. Authorities recommend genomic surveillance and adaptation in order to be effective against new variants (different from the initial strain that was detected at the end of 2019). The efficacy data of Comirnaty against circulating viral variants are highlighted in a very recent study in Israel which showed that the protection offered by the Pfizer inoculant against variant B.1.351 (first identified in South Africa) is lower [112].

The results have not yet been submitted to the expertise of specialists. The study compared nearly 400 adults who were diagnosed with COVID-19 at least 14 days after receiving one or two doses of the inoculant to the same number of uninoculated people. It was found that B.1.351 represents approximately 1 % of the COVID-19 cases studied. But among patients who received two doses of inoculant, the prevalence rate of the variant was eight times higher than in those not inoculated - 5.4 % compared to 0.7 %. This suggests that Comirnaty is less effective against variant B.1.351, compared to the original variant and variant B.1.1.7. The limitation of the study comes from the small number of adult people studied, but it is an alarm signal for a closer study of these cases. In addition, it seems that at present, the prevalence of this variant is low. On the other hand, in early April, Pfizer announced that according to the results of the Phase III study in the adult population, Comirnaty also demonstrated 100 % efficacy in the prevention of Covid-19 disease caused by SARS-CoV-2 variant B.1.351 (9 cases of Covid-19 were recorded, all in the placebo group, and after sequencing it was found that 6 had been determined by B.1.351) [117].

## Appendix C

### MID- AND LONG-TERM ADVERSE EFFECTS FROM PRIOR VACCINES

A 2020 study emphasizing mid- and long-term adverse effects from prior vaccines [4] identified the following sixteen mid- and longer-term potential issues concerning vaccines. These include:

- 3.1. **Antibody-Dependent Enhancement** (where enhanced virus entry and replication in a number of cell types is enabled by antibodies);
  - 1a. Intrinsic Antibody-Dependent Enhancement (where non-neutralizing antibodies raised by natural infection with one virus may enhance infection with a different virus);
  - 1b. Immune Enhancement (enhancement of secondary infections via immune interactions);
  - 1c. Cross-Reactivity (an antibody raised against one specific antigen has a competing high affinity toward a different antigen.);
  - 1d. Cross-Infection Enhancement (infection enhancement of one virus by antibodies from another virus);
- 3.2. **Vaccine-Associated Virus Interference** (where vaccinated individuals may be at increased risk for other respiratory viruses because they do not receive the non-specific immunity associated with natural infection);
  3. Vaccine-Associated Imprinting Reduction (where vaccinations could also reduce the benefits of ‘imprinting’, a protection conferred upon children who experienced infection at an early age)
  4. Non-Specific Vaccine Effects on Immune System (where previous infections can alter an individual’s susceptibility to unrelated diseases);
  5. Impact of Infection Route on Immune System (where immune protection can be influenced by the route of exposure/delivery);
  6. Impact of Combinations of Toxic Stimuli (where people are exposed over their lifetime to myriad toxic stimuli that may impact the influence of any vaccine);
  7. Antigenic Distance Hypothesis (negative interference from prior season’s influenza vaccine (v1) on the current season’s vaccine (v2) protection may occur when the antigenic distance is small between v1 and v2 ( $v1 \approx v2$ ) but large between v1 and the current epidemic (e) strain ( $v1 \neq e$ ));
  8. Bystander Activation (activation of T cells specific for an antigen X during an immune response against antigen Y);
  9. Gut Microbiota (Impact of gut microbial composition on vaccine response);
  10. Homologous Challenge Infection Enhancement (the strain of challenge virus used in the testing assay is very closely related to the seed virus strain used to produce the vaccine that a subject received);
  11. Immune Evasion (evasion of host response to viral infection);
  12. Immune Interference (interference from circulating antibody to the vaccine virus);
  - 12a. Original Antigenic Sin (propensity of the body’s immune system to preferentially utilize immunological memory based on a previous infection when a second slightly different version of that foreign entity (e.g. a virus or bacterium) is encountered.);
  13. Prior Influenza Infection/Vaccination (effects of prior influenza infection/vaccination on severity of future disease symptoms);
  14. Timing between Viral Exposures (elapsed time between viral exposures);
  15. Vaccine-Associated Enhanced Respiratory Disease (where vaccination enhances respiratory disease); and
  16. Chronic Immune Activation (continuous innate immune responses).

Most of these events are not predictable, and most, if not all, would be possible for the COVID-19 inoculant in the mid- and long-term for adults and children.
- 3.3. **Mid- and Long-Term Serious Illnesses for Adults and Children from Past Vaccines**

As stated in the aforementioned 2020 study on vaccine safety: “The biomedical literature is very sparse with studies on long-term vaccine effects, especially long-term adverse effects. Large numbers of people and long periods of time are required to identify such adverse events, and draw statistically-valid connections between vaccinations and disease. These efforts would be very resource-intensive, and there appears to be little motivation among the vaccine producers and regulators to make these resources available for such studies. Thus, the following examples reflect the extremely small tip of an extremely large iceberg of long-term adverse vaccine effects.” [4]

“The two main categories of diseases reported in the biomedical literature triggered by past vaccinations are “Autoimmune (e.g., Systemic Lupus Erythematosus, Psoriasis, Arthritis, Multiple Sclerosis, Hepatitis, Uveitis, Pseudolymphoma, Guillain-Barre Syndrome, Thrombocytopenic Purpura, etc.) and Neurological (e.g., Central Demyelinating Diseases, Developmental Disability, Febrile seizures, Narcolepsy, Encephalomyelitis, Autonomic Dysfunction, etc.). Others include Diabetes, Gastrointestinal, Joint-related, Necrobiotic Granuloma, Neutropenia, Pulmonary Fibrosis, etc.”

“Vaccinations may also contribute to the mosaic of autoimmunity [118]. Infrequently reported post-vaccination autoimmune diseases include systemic lupus erythematosus, rheumatoid arthritis, inflammatory myopathies, multiple sclerosis, Guillain-Barre syndrome, and vasculitis”.

“Studies have demonstrated a latency period of years between Hib vaccination and diabetes mellitus, and between HBV vaccination and demyelinating events [118] latency periods can range from days to years for postinfection and postvaccination autoimmunity”.

“Most of the extra cases of IDDM appeared in statistically significant clusters that occurred in periods starting approximately 38 months after

immunization and lasting approximately 6–8 months. Immunization with pediatric vaccines increased the risk of insulin diabetes in NOD mice. Exposure to HiB immunization is associated with an increased risk of IDDM.” [4]

Thus, even the sparse past vaccine studies that went beyond the short-term showed latency effects of serious diseases occurring **three years or more** post-vaccination.

## Appendix D

### COST-BENEFIT ANALYSIS OF COVID-19 INOCULATIONS

This appendix presents a non-traditional *best-case scenario* pseudo-cost-benefit analysis of the COVID-19 inoculations for the 65+ demographic in the USA. In this incarnation of a cost-benefit analysis, the costs are the number of deaths resulting from the inoculations, and the benefits are the lives saved by the inoculations. The time range used was from December 2019 to end-of-May 2021.

It is assumed, in this best-case scenario, that all the deaths truly attributable to COVID-19 only could have been eliminated by the inoculations given (about half the USA population has been inoculated at this time) [88,119]. It can be conceptualized as the vaccines having been available in Summer 2019, and subsequent administration having eliminated all the deaths experienced that were truly attributable to COVID-19. If the cost-benefit ratio is **poor** for this *best-case scenario*, it will be **very poor** for any real-world scenario [120].

We will use Figs. 1 and 2 as starting points to conduct a cost-benefit analysis of COVID-19 inoculations for the most vulnerable demographic, those 65+. We start with the official government numbers for COVID-19 and post-inoculation deaths, and modify them to arrive at actual deaths resulting from COVID-19 and the inoculations. We compare the two numbers (appropriately normalized) to ascertain costs vs benefits.

As Fig. 1 shows, there are three age bands that comprise the 65+ demographic. We weight the COVID-19 deaths per capita in each band by the band's population, and divide the sum of these three products by the total 65+ population to arrive at an average COVID-19 deaths per capita of 0.0087 for the total 65+ demographic.

Fig. 2 contains two normalizations. First, the deaths were normalized by total inoculations given, not by people inoculated or people who had completed the full series of inoculations. We will retain the normalization by total inoculations given, since it will provide the **most conservative results** (largest denominator) for estimation purposes. Second, the deaths were normalized/restricted to those occurring within seven days post-inoculation. This normalization was done to compare across age bands, where the inoculations started at very different points in time. For the present cost-benefit purpose, where we are concentrating on the 65+ band, we remove this latter normalization, and include all post-inoculation deaths. Removing this normalization increases deaths per inoculation by about 40% to a value of 0.000032, and offers a more credible comparison to the numbers from Fig. 1.

Thus, based on the CDC's official numbers, there are an average COVID-19 deaths per capita of 0.0087 and an average deaths per inoculation of 0.000032 for the 65+ demographic. The chances of a person 65+ dying from an inoculation relative to their chances of dying from COVID-19 are approximately 0.0037, or about 1/270, based on these official CDC figures.

However, as we have shown previously, three corrections to these numbers are required to convert them to real-world effects. First, as the Harvard Pilgrim study has shown and as our results in Appendix 1 confirm, VAERS is underreporting actual deaths by about two orders of magnitude. Applying this correction alone to the above 1/270 ratio changes the risk benefit to about 1/3. Second, as the CDC has stated, approximately 94% of the COVID-19 deaths could have been attributed to any of the comorbidities these patients had, and only 6% of the deaths could actually be attributed to COVID-19. As we pointed out, if pre-clinical comorbidities had been included, this number of 6% would probably be decreased further. For **conservative** purposes, we will remain with the 6%. Applying this correction to the 1/3 risk-benefit ratio changes it to 5/1! Third, as a comprehensive survey of false positives from RT-PCR tests concluded: “evidence from external quality assessments and real-world data indicate enough a high enough false positive rate to make positive results highly unreliable over a broad range of scenarios” [127]. Because of the myriad RT-PCR tests performed in the USA to screen for/diagnose COVID-19 using different values for Ct and different procedures, a specific number for false positives cannot be obtained at this point in time. Again, these false positives would reduce the 6% number, perhaps substantially. And again, for **conservative** purposes, we will remain with the 6% number.

Thus, our **extremely conservative** estimate for risk-benefit ratio is about 5/1. In plain English, people in the 65+ demographic are five times as likely to die from the inoculation as from COVID-19 under the most favorable assumptions! This demographic is the most vulnerable to adverse effects from COVID-19. As the age demographics go below about 35 years old, the chances of death from COVID-19 become very small, and when they go below 18, become negligible.

It should be remembered that the deaths from the inoculations shown in VAERS are short-term only (six months for those inoculated initially), and for children, extremely short-term (one month) [3]. Intermediate and long-term deaths remain to be identified, and are possible from ADE, auto-immune effects, further clotting and vascular diseases, etc., that take time to develop. Thus, the long-term cost-benefit ratio under the *best-case scenario* could well be on the order of 10/1, 20/1, or more for all the demographics, increasing with decreasing age, and an order-of-magnitude higher under real-world scenarios! In summary, the value of these COVID-19 inoculations is not obvious from a cost-benefit perspective for the most vulnerable age demographic, and is not obvious from any perspective for the least vulnerable age demographic.

## Appendix Da

### PROBLEMS WITH TEST CRITERIA FOR DETERMINING COVID-19

Consider the criteria for determining whether an RT-PCR test result is positive for SARS-CoV-2. The CDC instruction (until 1 May 2021) specifies running the RT-PCR tests for 45 amplification cycles. Then, to interpret the data: when all controls exhibit the expected performance, a specimen is considered positive for SARS-CoV-2 if all SARS-CoV-2 marker (N1, N2) cycle threshold growth curves cross the threshold line within 40.00 cycles (< 40.00 Ct). The RNase P may or may not be positive as described above, but the SARS-CoV-2 result is still valid ([103]a).

Many false positives are possible in the upper part of this cycle threshold range, especially in areas of low prevalence. In particular, virus culture has been found to be unfeasible in cases with a Ct value exceeding 33. A prospective cohort study involving the first 100 COVID-19 patients in Singapore also showed that attempts to culture the virus failed in all PCR-positive samples with a Ct value >30” [121]. During mass testing in Germany, it was found “that more than half of individuals with positive PCR test results are unlikely to have been infectious” [122]. Another study

found that tests with low specificity (deriving from use of many cycles) cannot provide strong evidence for the presence of an infection [123]. A systematic review of PCR testing concluded “Complete live viruses are necessary for transmission, not the fragments identified by PCR. Prospective routine testing of reference and culture specimens and their relationship to symptoms, signs and patient co-factors should be used to define the reliability of PCR for assessing infectious potential. Those with high cycle threshold are unlikely to have infectious potential.” [89].

As skeptics have argued, in the buildup of the pandemic, the rapid increase in numbers of COVID-19 cases was due in part to the high values of cycle threshold used in the tests. Unfortunately, the true numbers of false positives will probably be unobtainable if an audit were performed, since these values are not reported with the test results: all currently-available nucleic acid tests for SARS-CoV-2 are FDA-authorized as qualitative tests, and Ct values from qualitative tests should never be used to direct or inform patient management decisions. Therefore, it is not good for laboratories to include Ct values on patient reports [124].

After mass inoculations started, a large number of “breakthrough” cases emerged, and a total of 10,262 SARS-CoV-2 vaccine breakthrough infections had been reported from 46 U.S. states and territories as of April 30, 2021 [18]; the number of reported COVID-19 vaccine breakthrough cases is likely a substantial undercount of all SARS-CoV-2 infections among fully vaccinated persons. The national surveillance system relies on passive and voluntary reporting, and data might not be complete or representative. Many persons with vaccine breakthrough infections, especially those who are asymptomatic or who experience mild illness, might not seek testing [18].

This negative outcome of increased “breakthrough” cases motivated the CDC to change a number of reporting and test procedures and issue new regulations for identifying and investigating hospitalized or fatal vaccine breakthrough cases starting 1 May 2021, stating: “For cases with a known RT-PCR cycle threshold (Ct) value, submit only specimens with Ct value  $\leq 28$  to CDC for sequencing. (Sequencing is not feasible with higher Ct values.)”. Thus, the Ct values for sequencing were lowered from the high false positive range allowed during the pandemic buildup to a limit that would eliminate many of these false positives in the ‘breakthrough case’ identification phase [101].

Board,

Please consider my input regarding future action concerning Covid vaccines and mandates. No matter what side of this issue you fall on, there is sound data and studies to find information supporting that stance. There is extensive data and evidence that vaccination to Covid may not prevent infection and spread. That being said, this vaccination has no place as a requirement for WA state public or private schools.

The Vaccines are unapproved, inadequately tested, experimental and dangerous biological agents that have the potential to cause substantially greater harm than the SARS-CoV-2 virus and the COVID-19 disease itself. According to data extracted from the Defendants' Vaccine Adverse Events Reporting System ("VAERS"), 99% of all deaths attributed to vaccines in the first quarter of 2021 are attributed to the COVID-19 Vaccines, and only 1% are attributed to all other vaccines. The number of vaccine deaths reported in the same period constitutes a 12,000% to 25,000% increase in vaccine deaths, year-on-year. The Vaccines appear to be linked to a range of profoundly 3 Issued December 18, 2020. See <https://www.fda.gov/emergency-preparedness-and-response/coronavirusdisease-2019-covid-19/moderna-covid-19-vaccine>. 4 Issued February 27, 2021. See <https://www.fda.gov/emergency-preparedness-and-response/coronavirusdisease-2019-covid-19/janssen-covid-19-vaccine>. 5

I. THE TEN POINTS OF THE NUREMBERG PRINCIPLES  
1. The voluntary consent of the human subject is absolutely essential.  
2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.  
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.  
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.  
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.  
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment

Didn't you all say if someone took the experimental gene therapy they would not get Covid? So are you admitting the experimental gene therapies DO NOT work? If I took 3 polio vaccines and got polio I would have questions like I do now

Seeing that you all are in lock step with the CDC and WHO who have been infamously wrong in the response to this military exercise do you all think you will be exempt from Nuremberg? In case you have not noticed these are crimes against humanity and children

Policies relating to COVID-19 are violations of the 1st, 4th, 5th, and 9th Articles of the Bill of Rights and are by definition Rape, Bodily Invasion, Abduction, Abuse, Molestation and Maltreatment at the very least.

What specific metrics are you using to determine whether such policies as mask mandates, vaccine mandates, etc., are valid? Considering that almost all other states in

the country have lifted their restrictions, and are seeing virtually identical numbers, I would like to see freedoms and liberty respected once again.

Where is the VAERS data in all of your statistics.

What is the basis for allowing unelected officials to determine what someone must inject into their bodies?

Vaccine companies are exempt from liabilities. What do you think gives you the authority to coerce individuals into medical tyranny by use of experimental gene therapies that according to VAERS own data is adversely affecting mass amounts of people.

Your policies are creating division and discrimination based on flawed data and it is the duty of the public to remove all powers from petty tyrants.

Dear Mr. Thai,

The present situation with omicron is no longer a health emergency. People are not dying from covid anymore, not in numbers that make for a public emergency. People have always died from influenzas and pneumonias, from car wrecks and drownings, and we don't abandon our God-given rights in an effort to stamp out all of these possible deaths. The extreme measures you contemplate in dealing with what has become a minor threat would further hurt adults and children instead of helping them. Whatever power structures exist in your Codes, you don't have a moral right to trample on peoples's '...life, liberty, and the pursuit of happiness.'

You have no moral authority to impose mandatory shots into people's bodies. People own their own bodies. You do not own other people's bodies. You may not do as you see fit with other people's bodies. The people who imprisoned Martin Luther King, Jr.—did they have the legal right to do that? The bus driver who asked Rosa Parks to go to the back of the bus—did he have the right to do that? The national guard and police who blasted civil rights protestors with water hoses and set dogs on them—did they have the right to do that? Yes, they had a "right" by the laws and policies of the day, but they were in the wrong. The hindsight of history shows to all that they were wrong. The truth will out; many people already know that it is wrong of you to contemplate involuntary detention of citizens. Future people will absolutely know it, just like we absolutely know who was right in the civil rights movement led by MLK.

We also know who was morally right when Japanese American citizens were involuntarily concentrated into camps. We know who was wrong. Monetary reparations and public apology was awarded decades later to Japanese American citizens—right here in WA—who were involuntarily detained into camps at that shameful time.

There will be only shame for those who act immorally to involuntarily detain and/or bully citizens and children into camps and near-forced requirement of experimental injections. We Americans know that our legal rights to "life, liberty, and the pursuit of happiness" are solid both in Constitutional law and in the moral law which is written in our hearts.

I urge you not to overstep whatever powers you have to do whatever you want in this little day. Tomorrow morning, please remember that both yourself and your fellow citizens alike are all 'created equal' and have 'unalienable rights.' We hold these truths to be self-evident, that involuntary detainment of citizens is wrong, and mandating experimental shots for children against the will of their parents is wrong. Please maintain the public trust by respecting our unalienable rights.

Sincerely,  
Deirdre Forman  
WA resident

Why is all the talk about vaccines? Have you ever considered that people dont want to get vaccinated in general? Your focus should be to elevated health overall, not rely on a treatment that people dont want. You're willing to mandate masks but what about other things that will help with health like maybe mandating exercise?

Hello,

As a WA state resident and taxpayer, I wanted to express my concern over what information has been circulating in regards to adding a SARS-COV-2 shot to (an already long and intensive) list of vaccines school children must take and the supposed quarantine facilities. First, let's not side step the story that the data, from all over the world, has been telling us. For most people, Sars-COV-2 is not an issue, as I have known many people personally that have all had it (most not vaccinated). The more serious symptoms have all come from those that have had the shot. Not to mention, the words that the CDC Director, Rochelle Walensky, just stated, that more than 75% of all covid deaths were of people with 4+ co-morbidities.

So with that said and to reiterate another resident:

At this time there is, in my view, a complete lack of evidence of the necessity of inclusion of a COVID vaccination requirement in WAC 246-105.

Quoting from 246-105-010: "The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers."

The facts are the current COVID vaccines do not prevent catching the disease, and therefore are ineligible for inclusion in the list of "vaccine-preventable" diseases. The current COVID "vaccines", as is demonstrated by the vast number of "breakthrough" cases, are not able to prevent COVID to a comparable level as actually effective vaccines for the section 030 listed diseases, but merely to be a pre-treatment for the disease that generally reduces the severity.

Compare and contrast the number of COVID breakthrough cases (and rates) to breakthroughs for those vaccinated against the diseases listed in 246-105-030. Who has heard of breakthrough cases of chickenpox? Diphtheria? Rubella? Measles? Mumps? Pertussis? And the rest of the list, for that matter. The simple fact is, the number of "breakthrough" cases of the -030 currently listed diseases is so small as to be negligible - it would be major local news of an outbreak of Measles or Mumps in our local schools, yet these are all but unheard of. Yet the number of COVID cases that breakthrough the current vaccines is significant. Therefore, as a matter of definition, COVID is not a vaccine preventable disease. Compare and contrast COVID to one of the listed diseases with an actually effective vaccine - Mumps. According to the CDC, there were only 139 cases in 2021.

Considering that the best available evidence as of this writing indicates that on average children suffer no worse from COVID than the normal seasonal flu, and considering the unknown potential long term side effects of the current COVID vaccines, the risk-reward profile indicates negligible benefit to the children of Washington, while imposing unquantified potential risk upon them. Compare to the current policy for seasonal flu: Flu is an equal, if not a greater risk to children (and never mind the ability of children to spread seasonal flu to adults) AND the seasonal flu vaccine risk profile is

well known and low, yet there is no mandate to vaccinate children for the seasonal flu. Yet, this Board is considering mandating a vaccine for a disease, COVID, that is equal or lower risk to children AND has a vaccine with an unknown long term risk profile? That would be illogical and would indicate other non-fact based motivations for such a mandate.

I respectfully urge the board to not add COVID to the list of diseases in WAC 24-105-030.

So neither Sars-COV-2 and thus the disease that can stem from the virus, COVID-19, is a virus or disease, that warrant quarantining citizens against their will.

As other residents and taxpayers have expressed, I urge the board to vote NO in adding COVID-19 to the list of diseases in WAC 24-105-030 and to NO in regards to any possible quarantining.

Best,  
Cassandra Frickey  
Maple Valley, WA 98038

Subject: Question/Request for Jan. 12, 2022 meeting

External Email

Good morning!

I am a 69 year old retired RN with certification in CRD and had worked 36+ years in renal replacement therapies and modalities for those patients with ESRD (End Stage Renal Disease). During my career as a RN , we treated patients with AIDS/HIV before it had a name, worked through the SARS increase, MRSA/VRE increase and now COVID. I am at high risk for several co-morbids including: age, cancer, and history of asthma. So, yes, I am immunized by my choice and CDC recommendations. This has been my choice because of these co-morbids. I do not make this choice for anyone else- not even my family. I believe this is an individual choice not a government mandate.

Question 1: Can we, as the public, expect that the State of Washington to lead the country in giving us statistics that include co-morbids of those persons infected, hospitalized and who have died? This should not be a HIPPA concern with the world of redacting. I am not interested in who, but rather what other disease processes they have as well. Without this information the public cannot make educated health care decisions for themselves or others they may be responsible for. With the current skewed information that is made public, we can not understand and decide.

Question 2: Could you please tell me what website we should request to get information and meeting dates for future addition of immunization for children especially K- 12 for school admissions?

Question 3: If you add Covid vaccine to school admissions, do you anticipate adding Influenza Vaccine as well? Statistically Influenza has had its share of complications and mortalities in the past. I realize that for the pas 2-3 years Influenza has not been tested for... only COOVID has been tested for.

Thank you.  
Laura Lindsey

Sent from my iPhone

already invalidated this lie. In fact, it's already been shown that vaccinated people are the ones taking up most hospital beds. I have known many unvaccinated people who have caught the disease and survived intact. All the stories I have heard of the death, have been people who got vaccinated or the booster and then died of a stroke, blood clot, or heart disease or got some type of heart disease. So shame on your lies.

10. The coercion and duress being put on the unvaccinated to accept this experimental product are unConstitutional, unethical, and illegal under CFR 45, Title 46. Stop encouraging it! Adopt the Great Barrington Declaration model already signed by thousands of physicians.

11. The BOH should be recommending to the Governor's office to lift the public mandates. These are not Constitutional, as they violate the IV and V Amendments. Delta is no longer the primary variant and Omicron is not deadly. Scientists have already come out and stated COVID will now become endemic. It would be a greater public service to allow people to develop superior natural immunity with omicron than keep them dependent on the experimental pharmaceutical product for life. We know what is being peddled to the public doesn't legally qualify as a "vaccine".

12. When we have government agencies creating mandates or restricting movement, association, or determining what the Citizen does with their body, this violates the Constitution. The Constitution is a legal Agreement. It is the legal Agreement between the Government and the Citizen. Within that Agreement explicitly upholds the Citizen's Natural Rights (which includes their body) and bodily autonomy.

13. When we have government bodies and officers mandating what people do or do not put in their bodies, that violates the 13th & 14th Amendments and creates a breach of the agreement. This is not appropriate in a Republic.

Sincerely,

Tedi Andrews

Hi Michelle,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda. I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

Rachel Enselman

To whom it may concern,

I oppose the Covid vaccine to be mandated upon all children. This should be a choice for each family to make for their own children.

I'm listening to your webinar today, January 12, 2022. You seem 100% intent on promoting vaccines for everyone, including children. I'm stunned by your bias toward vaccines and also your total misunderstanding of how mild Omicron is! I'm attaching research and data that should give you an alternative point of view. Hopefully you will read it with an open mind and realize just how dangerous to the public your policies have been and continue to be. Other states with less draconian measures have fewer reports of death and a healthier public overall. Thirty seven (37) states are fully open as of January 10, 2022. <https://www.aarp.org/politics-society/government-elections/info-2020/coronavirus-state-restrictions.html>

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.aarp.org%2Fpolitics-society%2Fgovernment-elections%2Finfo-2020%2Fcoronavirus-state-restrictions.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C14ed26dd0c71448dbfb508d9d604246b%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.aarp.org%2Fpolitics-society%2Fgovernment-elections%2Finfo-2020%2Fcoronavirus-state-restrictions.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C14ed26dd0c71448dbfb508d9d604246b%2F)>

Stop with the vaccines until they can be proven to be safe! Stop with the masks! Stop with the fear mongering over Omicron. Just STOP!

Washington State Board of Health  
Comments to Public Meeting

Comments to the BOH  
Regarding Vaccine Recommendation by BOH

For the past fifty years the U.S. Government has epically failed at most everything it is in charge of and that includes: Local Boards of Health, FEMA, Illegal Immigration and Border management, Amtrak, U.S. Postal Service, losing wars in Vietnam and Afghanistan, public education, voting and election integrity, forest management and, finally, the CDC's, FDA's, and NIH's corrupt and illegal approach to the man-made pandemic. The government has failed us time and time again with its incompetence, overspending and .

The "Vaccine" is not really a vaccine, but rather an untested, unproven, DNA altering, biological, human experiment with no possibility of compensation should this "vaccine's" side effects, short and long term, prove to be as dangerous as some vaccines historically are.<sup>1</sup> In fact, the COVID "vaccines" are showing signs of serious side effects, including deaths.<sup>2</sup>

The COVID "Vaccines" DO NOT protect anyone from getting COVID or transferring COVID to anyone else.<sup>10</sup> The government downplays that fact. What the COVID "Vaccine" does appear to do is REDUCE YOUR SYPTOMS and may therefore prevent hospitalization and/or death. But, is the "Vaccine" less or more harmful than COVID? That's what we don't and won't know for years to come. The CDC reports that of 540,667 COVID patients from the period of March 2020 to March 2021, 95% had an underlying factor contributing to their death.<sup>3 4</sup> In other words, if you're fit and healthy, no matter your age, you have a very good chance of surviving COVID.

The CARES act incentivizes hospitals to report a patient as having COVID even though they may have a common flu or pneumonia related to flu but unrelated to COVID. According to the U.S. Department of Health and Human Services: *"The CARES Act created the 20% add-on to be paid for Medicare patients with COVID-19. The act further created a \$100 billion fund that is being used to financially assist hospitals — a "portion" of which will be "used to reimburse healthcare providers, at Medicare rates, for COVID-related treatment of the uninsured."*<sup>5</sup>

<sup>3</sup> [https://www.cdc.gov/pcd/issues/2021/21\\_0123.htm](https://www.cdc.gov/pcd/issues/2021/21_0123.htm)

<sup>4</sup> <https://www.futurity.org/cdc-covid-19-comorbidities-2436032-2/>

<sup>5</sup> <https://www.factcheck.org/2020/04/hospital-payments-and-the-covid-19-death-count/>

Why are those that have already had COVID and now have natural immunity from COVID not given the same consideration as those who are vaccinated? The authors of a recent study (September 5, 2021) out of Israel compared the outcomes of more than 800,000 people covering Mar. 1, 2020, through Aug. 14, 2021, concluded: *“This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity.”*<sup>6</sup> It should be noted that the study only addresses the Pfizer vaccine but it did echo previously published studies on the effectiveness of natural immunity over vaccines.

Note: A cheap and quick antibody test can determine if you have COVID related antibodies. That test does not differentiate between the “Vaccine” and someone who has had COVID and recovered. However, there is a T-cell test that can differentiate.<sup>7</sup>

Follow the money--What all vaccines have in common is they make the producers of vaccines very wealthy. What better way to keep that money flowing than to make vaccines mandatory? In 2020 the top twenty pharmaceutical companies worldwide made over \$680 billion in revenue. In 2019 Johnson & Johnson, a U.S. company and highest revenue earner of the top 20, made an astounding \$82.6 billion!<sup>8</sup> It should be noted, that in July 2021, Johnson & Johnson, one of the Big Pharma vaccine manufacturers, that cannot be sued now or in the future for COVID vaccine related side effects, including death, settled the “J&J Big Pharma Opioid lawsuit” for \$26 billion.<sup>9</sup>

The three biggest COVID vaccine suppliers, J&J, Pfizer and Moderna charge an average of \$20 per dose. In the US that equates to conservatively \$4.2 billion in revenue in the past 18 months. Worldwide, that figure is between \$80-\$110 billion due to the different contract pricing structures of each country.<sup>10 11</sup> There are forty newly minted billionaires worldwide in COVID related businesses since the onset of the COVID pandemic, nineteen of them Chinese.<sup>12</sup> In the first quarter of 2021, Big Pharma spent \$14 million on lobbying in the halls of the United States Congress and they have spent over \$6 billion in the last 20 years.<sup>13</sup> Of course Big Pharma wants vaccines mandated and of course they will lobby your government representatives to ensure compliance. You should ask, who amongst our politicians is taking the money and in what form? Pharma stock?

<sup>13</sup> <https://www.opensecrets.org/news/2021/07/big-pharma-largest-lobbying-spender-biden-crackdown/>

Alternatives to vaccines exist, but they are blocked by the FDA, CDC and, until recently the NIH. In a report in *The American Journal of Therapeutics* (July-August 2021), Ivermectin is just one alternative to have been found to be effective against COVID: *“A review by the Front Line COVID19 Critical Care Alliance summarized findings from twenty-seven studies on the effects of ivermectin for the prevention and treatment of COVID-19 infection, concluding that ivermectin “demonstrates a strong signal of therapeutic efficacy” against COVID-19.”*<sup>14</sup> Following extensive studies and a presentation before NIH by the physicians group, Front Line Covid-19 Critical Care Alliance (FLCCC), it was announced on January 14, 2021, that Ivermectin has been approved by NIH, making it an “option” for the treatment of COVID. In a presentation before the Department of Homeland Security, Dr. Pierre Kory, a founding member of the FLCCC, and his team testified before the U.S. Senate Homeland Security Committee in favor of authorizing ivermectin, a “Nobel Prize–winning anti-parasitic agent, for early treatment of the novel coronavirus. In his impassioned presentation, Dr. Kory explained that ivermectin **“basically obliterates transmission of this virus,” with “miraculous effectiveness.”**<sup>15</sup>

Despite these findings, the FDA<sup>16</sup> and CDC<sup>23</sup> stated in August 2021 that “there are insufficient data to recommend either for or against the use of ivermectin for the treatment of COVID-19, and the World Health Organization recommends against its use outside of clinical trials.” It seems that the FDA is focused entirely on the use of “Vaccines” to treat COVID and as late as September 3, 2021, has doubled down on its bias despite evidence of the “miraculous effectiveness of Ivermectin”.<sup>17</sup>

Could it be because the FDA gets kickbacks from pharmaceuticals in the form of “User Fees”? We are talking BIG MONEY and the more vaccines sold the more money the FDA receives to keep its bureaucracy going. *“Between FY2017 and FY2021, FDA’s enacted annual total program level (excluding amounts enacted in supplemental appropriations measures or in the American Rescue Plan Act) increased from \$4.745 billion to \$6.05 billion. Over that time period, congressionally appropriated funding increased by 18%, while user fee revenue increased by 42%.”*<sup>18</sup> From the time COVID “vaccines” became available (and now mandated) during the year 2021, user fee revenue has increased by 42%! User Fees account for over 45% of the FDA’s total budget. In other words, the more vaccines sold, the more money the FDA collects. Additionally, the CARES act added another half a billion in revenue over a nine-year period from 2017–2025. Likewise, CDC and NIH benefit from this pandemic. Budgets for all three agencies have skyrocketed in 2021 and 2022. NIH’s budget for 2022 is \$52 billion and the CDCs is \$55.1 billion.<sup>19</sup> Much of the CDC’s budget is in the form of wealth redistribution or “equity” allowances to Tribes and by “addressing disparities”.<sup>20</sup>

<sup>23</sup> [https://emergency.cdc.gov/han/2021/pdf/cdc\\_han\\_449.pdf](https://emergency.cdc.gov/han/2021/pdf/cdc_han_449.pdf)

<sup>17</sup> <https://www.fda.gov/consumers/consumer-updates/why-you-should-not-use-ivermectin-treat-or-prevent-covid-19>

<sup>18</sup> <https://www.fda.gov/about-fda/fda-basics/fact-sheet-fda-glance>

<sup>19</sup> <https://officeofbudget.od.nih.gov/br.html>

<sup>20</sup> <https://www.cdc.gov/budget/index.html>

Please Note: Merck Pharmaceutical is the original patent holder for Ivermectin; however, the patent has expired rendering the drug cheap and readily available around the world (except the US) without prescription. In other words, there is no financial incentive for Merck or the FDA (which receives “User Fees” from Big Pharma) to prescribe Ivermectin as treatment against COVID. Ponder that for a moment...the FDA DOES NOT ALLOW IVERMECTIN as treatment or prevention against COVID 19. Currently, Merck is awaiting approval from the FDA for a NEW wonder drug as an effective treatment and preventative drug against COVID 19.<sup>21</sup> If you do not see the connection between Ivermectin, Merck and the FDA then you are blindly and woefully ignorant and should not be reading this report. The FDA and BIG Pharma would rather people die than lose its cash cow “Vaccines”. It has been reported that Merck will be charging hospitals \$700 a dose for this “new” drug (forty times what it costs Merck to produce),<sup>22</sup> as compared to Ivermectin at less than \$30 for a pack of twenty tablets.

Finally, and most importantly, it is a matter of protecting our freedoms under the Constitution of the United States of America. When we abdicate our right to make medical decisions for ourselves, we abdicate all our guaranteed freedoms. It is not and should not be shameful to be patriotic. We cannot take for granted that this is a “one off” mandate by our government to protect us from COVID. This is a slippery slope downward to communist control over our daily lives and the beginning of the end to a way of life that has been, up until now, arguably, the greatest in the history of the world. Washington state is one of the most draconian in its approach to COVID with unprecedented restrictions that have not proven to be successful in reducing COVID transmission or prevention of death. I reiterate, one of the reasons for the death rate is the inaccurate reporting of death by COVID when there are many, many underlying causes for the death.

---

robertg6725@yahoo.com

8.

Phone Number (Include Area Code):

---

509-998-2546

9.

Do you have any special expertise relevant to this topic?

1. Yes

---

I've researched the scientific positions of many professionals who oppose the current vaccinations as the Only solutions to protect the public.

10.

Are you testifying on a specific proposal under consideration by the board?

2. No

11.

Are you Pro or Con on the proposal?

2. Con

---

My position on vaccination mandates being the Only solution to protect the Public is Nay! The State Health Department has turned a blind eye to preventative therapeutics and vitamin supplements for preventative and early treatment. It's shameful that health professionals would take such a non scientific position in opposition to many highly qualified medical professionals! This I feel is an action that borders on criminal!

Hello Board Members,

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted. Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly. Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are obligated to provide us with

facts that support any and all recommendations or requirements.

1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?

2) point to ANY measures that have reduced the numbers of fatalities (cases are not fatalities).

3) what is rate of all cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?

4) provide evidence of asymptomatic spread of SARS CoV2.

5) provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).

6) make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?

7) provide evidence that the vaccines prevent infection and transmission and that they improve health of individuals who receive them compared to those who do not.

8) explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

Unfortunately, I do not trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism.

"Vaccine" means "a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective..."

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children! Myocarditis is just one of the side effects that people are reporting. Heart muscle doesn't regenerate and is an unnecessary injury to those who may suffer with for the rest of their life. How many others are now injured? What is the real rate of adverse effects following these EUA products and how can you determine if the safety studies have yet to be completed and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Many children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented on January 12.

Thank you.

RE: Urgent Notice to the Washington State Board of Health Regarding Mandating the Covid-19 mRNA Vaccines for All Students Across the State

Dear Kelie,

i: a woman; Vija Rogozina; write a Notice of Liability to you; a woman, who at times serves as a Board Member and as a community representative.

i; a woman, do not consent to your heavy-handed approach to my health and health of my child. I do not give you the authority to impose any medical procedures on me, my child, or on any human being that does not choose of their own free will your offerings of "public health" in a vaccine trial. I follow medical science closely; raw data is clear that children have close to zero risk of covid death. No risk, no benefit.

Here are three reasons for NOT mandating genetic mRNA vaccine for all Seattle Public School students:

1. Please refer to the recent German study, which concludes that for COVID-19 related symptoms in 5-11-year old children without comorbidities the risk of death is zero.

<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.medrxiv.org%2Fcontent%2F1>

2. The Pfizer mRNA vaccine causes catastrophic side effects, particularly heart inflammation (myocarditis and pericarditis) in youth. The CDC's own analysis of "Myopericarditis following COVID-19 vaccination: Updates from the Vaccine Adverse Event Reporting System (VAERS)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fadverse%2F2021-08-30%2F03-COVID-Su-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fadverse%2F2021-08-30%2F03-COVID-Su-508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%2F)

508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%2F">508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%

" showed astonishing increases particularly in children ages 12-15, 16-17, and 18-24.  
[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fadverse%2F2021-08-30%2F03-COVID-Su-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Fadverse%2F2021-08-30%2F03-COVID-Su-508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%2F)

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fvaccines%2Ffaci>  
2021-08-30%2F03-COVID-Su-508.pdf&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%

3. Please review Pfizer's 6-month data. I'm attaching the document along with the link under "breaking news" called "More Harm Than Good." Although this is from Canada, we share lots of information, because we are all using the same vaccines.  
<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.canadiancovidcarealliance.org>

I also urge you to go to the VAERS database and study statistics of adverse vaccine events and mortality. The numbers reached over one million cases in December 2021 and more than 21,000 Americans have died after becoming part of the largest human experiment in history.

The mistrust the public is experiencing is due to the extreme measures that have been taken against the people and coercive unethical measures that have not been supported by the actual data:

[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcvd.cdc.gov%2Fcvd-data-tracker%2F%23trends\\_dailycases&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcvd.cdc.gov%2Fcvd-data-tracker%2F%23trends_dailycases&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcvd.cdc.gov%2Fcvd-data-tracker%2F%23trends\\_dailycases&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcvd.cdc.gov%2Fcvd-data-tracker%2F%23trends_dailycases&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C2ab7db051c1e45fc24d908d9d5e6f41c%)

People are informed, aware, and very unhappy that medical procedures are being mandated and yet have not proven to stop the spread, stop transmission, nor stop hospitalization as was touted in the beginning of rolling out these vaccines. People are also aware of fraudulently hyperinflates numbers of unvaccinated cases due to a new definition of 'fully vaccinated' as per Jan 5th, 2022, which refers to 'Fully Vaccinated & Boosted' vs "Fully Vaccinated" & "Not Boosted, Partially Vaccinated", "Vaccine Free". Vaccine breakthrough cases increased by over 1.1 million confirmed breakthrough cases from November to December, which explains fraudulent statistics given to the American people.

With so many risks and little benefit, i, along with many others, intend to hold those responsible for bringing forth the mandate for Covid-19 vaccines to all students and any potential health damage. I ask you to consider the repercussions of force, mandates, and new laws that hurt the freedoms afforded us by God or the ones supported by the US Constitution. It is our privilege and duty to protect our children from any and all harm.

So, i urge you to vote from your innermost consciousness, with regards to data and with a Precautionary Principle in mind. Do not follow the directives and social pressure from the institutions that might be implicated in willful misconduct. Ask yourself: What Would Consciousness Do?

i, sincerely thank you for your community service. It is only because of the people on the ground, like you and i, that real change is ever possible. i, sincerely believe that this still holds true! Thank you once again for honoring the Hippocratic Oath, Nuremberg Code and Precautionary Principle by voting NO.

Sincerely,

by: Vija Rogozina

5503 30th Ave NE #G, Seattle, WA 98105

To whom it may concern.

I know that you all have good hearts and want to do what is best and most beneficial for the people of the state of Washington. I do not believe you want to do anyone any harm. That being said, I fear you may be in an echo chamber that seeks confirmation bias in favor of the dangers of COVID while excluding all opinion and/or scientific studies that indicate that societal shutdowns, and mRNA injection mandates are more harmful than the virus itself. It is now known that the mRNA shot does not stop someone from getting or transmitting COVID. I have many friends, fully "vaccinated" and boosted who have gotten sick with COVID post treatment. If people became sick with smallpox, measles, TB, or Polio after being vaccinated, there would be outrage. Those vaccines use a different technology and work, this "vaccine" does not work, and CDC Director Rochelle Walensky admitted August 6th that the mRNA injections do not stop transmission of the virus, so why are we still talking about pushing it?

When the vast majority of people at risk from this virus are over 65 years old with co-morbid conditions it doesn't seem logical that mandates are put upon the entire Washington population, and children specifically. They are under no statistical danger from dying from COVID (children are more likely to die from a dog attack, or lightning strike, or a car accident on the way to school) and there is no actual evidence of children passing COVID onto adults.

In addition, individuals are responsible for their own safety. The government should put forth good truthful information about the dangers of COVID and then let the citizens decide for themselves how to protect from that. It is no citizen's responsibility to protect me and I'm not responsible to protect anyone else, we should all be free to choose our path. It is a logical fallacy that people are vaccinated to protect other people. It is done for personal protection. Government is responsible to stop and punish crime but should not force people to do things that go against their conscience.

I have compiled links to many studies and statements that show that COVID is not as dangerous as the government and media have made it out to be. We should be free to choose our own paths and protect ourselves as we see fit.

Please, remove all government mandates for shut-downs, vaccines, and quarantine. At this point this virus is comparable to the flu. Staying at home when sick has always been the method to reduce transmission but people are smart enough on their own to know when that needs to happen. Government force is not needed.

Thanks,  
Eric Bowles

What these people said about the injections is borne out in the performance of them in application: they do not stop infection or transmission and they may even make both worse:

CDC Director, Rochelle Walensky admits the mRNA injections do not stop transmission of the virus

☐ CDC Director said today August 6th that "what they (Coronavirus vaccines) can☐do anymore is prevent transmission."

So... What's the logic of treating the people vaccinated against COVID-19 better than those who are not vaccinated such as at NYC restaurants? cc @MarkLevineNYC

To Whom it may concern,

I have lived in Washington State my entire life. I own a home and pay a ridiculous amount of Taxes and the majority goes to Schools which has always been OK with me for the good of our Children but I am objecting to your overreach in possibly making a vaccine

mandate for the Children of the State of WA. All people should have a choice on whether they get a Vaccine especially Children. I have had a vaccine and I have had Covid it was mild cold to me but to make it mandatory for Children to go to school to have a

emergency approved Covid Vaccine is unconstitutional and dangerous. The studies to the effects on children in the future is not available and you will be responsible for any deaths or future health problems the Vaccine causes if you make this mandatory, blood will

be on your hands. Especially when a high majority of children have had Covid with no future problems but immunity. If you are going to instigate this kind of ruling you must wait the full three year vaccine approval timeline. I will leave this State as I am sure many

others will As they have left California if this overreach is voted in.

Hi Caitlin,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

I am completely against any of the proposed Covid policies that are over reaching and immoral. We have had it with the mandates and government pushing us around. We have people losing jobs over it. Now you want to try stepping in the parents way of raising our children and doing what's best for them, NOT happening. It's time you step down and let us do our job.

We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank you

- 
- 

To whom it may concern:

I would ask that you objectively look at not mandating Covid-19 vaccinations as part of the vaccines required to attend school.

Items to consider:

1. Current Covid vaccines are still under Emergency Use Authorization (EUA) by the FDA.

A. Pfizer-Biontech- EUA approved to permit the emergency use of the unapproved product... to prevent Covid 19 in individuals 5yrs and older. Revised 1-3-2022 source FDA Fact sheet.

B. Moderna - EUA approved to permit the emergency use of the unapproved product.....to prevent Covid 19 in individuals 18yrs and older. Revised 1-7-2022 source FDA fact sheet.

C. Janssen(JJ)- EUA approved to permit the emergency use of the unapproved product.....to prevent Covid 19 in individuals 18yrs and older. Revised 1-11-2022 source FDA fact sheet.

2. Chapter 246-105 WAC- immunization of child care and school children against certain vaccine -preventable disease.

A. 246-105-010- Purpose: The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers.

a. The Covid vaccines do not fall into that category stated in the purpose.

B. 246-105-020 Definitions: (13) "Immunizing agent" means any vaccine or other immunologic drug licensed and approved by the United States Food and Drug Administration (FDA), or meeting World Health Organization (WHO) requirements, for immunization of persons against vaccine-preventable diseases.

b. See bullet #1. EUA's are not the same as FDA approved.

C. WAC 246-105-030- list the current vaccines required. I will disclose that my children and myself are all vaccinated against these currently and don't see how the Covid-19 vaccine falls into the same category of effectiveness as the ones mentioned. i.e: MMR, polio, chicken pox, etc.

Hopefully, we can all agree that receiving any of the Covid vaccines does not prevent infection anymore. They also do not prevent illness, transmission, or death. However, they may reduce the severity of symptoms among individuals. It is my view that the Covid vaccines closely resemble a flu shot, as far as reducing the severity of the disease, and the state doesn't mandate flu shots. Again I urge the entire board to vote against mandating the Covid 19 vaccines for child care and school age children. Thank you for your time and consideration.

Hi Stuart,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for your time.

Hello,

As a concerned tax paying Washington state resident I would ask that you not push forward on this track to involve children with mandatory Covid vaccination requirements. Many believe that so many things relating to this issue are decided first and then presented to the public as an afterthought. Two FDA board members quit over this and the feeling that politics, not science was leading the decision making. There is plenty of evidence from around the world and other states, that severe restrictions and mandates can do more harm than good. There is evidence from Sweden that schooling can be done without masks or mandated vaccines and no one is at greater risk of serious health risks than the general population (see link below). Statistics have shown over the last two years that children have never been at great risk from this ( See attach CDC graphic). These vaccines were recently hastily developed, the manufactures are still free from liability and while many say they are safe, the long term data is not there, period. We need less contentiousness now more than ever and I ask that you consider that if children had Polio, everyone knew it was serious, if anyone tests positive for Covid they are told to go home for (10 ) no scratch that ( 5 ) days to recover at home. This needs to end.

Thank you,

Why does Dr. Kwan-Gett and Michele Roberts have a propaganda banner behind their heads telling people to get vaccinated? Also why are we so concerned about a virus that has the symptoms of a common cold? It seems the only solutions you care about are getting vaccinated, getting a booster, and masking. None of those things have helped to stop the spread whatsoever. Also, in the state of WA there is a massive epidemic of very low vitamin D levels which makes the possibility of getting very sick 15% higher than any other factor. Yet NO ONE is talking about taking vitamins, exercising, or losing weight! It is cold and flu season, so shocker people are getting sick. On top of all of this the CDC website itself says that the PCR test cannot distinguish between the flu and COVID. All of this is just a power grab and trying to control people. I have not seen any safety data from any of the pharmaceutical companies that would prove to me that the vaccine is either safe or effective. Not to mention what I have seen with my own eyes. Hospitals are always at or close to maximum capacity for financial reasons. Are YOU SERIOUS? Just assume that you have the omicron. The amount of testing that jobs, hospitals, and public are requiring, because of fear mongering, has made it literally impossible to keep up with the demand of test needs. Especially for those of us who choose not to get vaccinated because of the lack of safety data and our desire to not participate in an experimental drug trial.

If you want to have health equality for ALL citizens, then you should drop all mandates and remove the state of emergency. There is no longer an emergency. Michele you should stop lying about the ability of the vaccine to reduce symptoms. Since the rollout of the vaccines last year all mortality categories have increased by 24%...ALL MORTALITY CATEGORIES. The gap is between people who are caught up in Mass Formation Psychosis and those who are not or as you would assume is between those who are more educated and less educated or of a certain ethnic group. What a foolish way of looking at your data. So basically, you mean pushing propaganda as far and as wide as you can for as long as it takes to get everyone to take an experimental drug. How about giving us the full ingredient list of the vaccine to empower us to make an informed decision? What is doing the right thing to you? Because the only "right" thing seems to be getting vaccinated according to this entire presentation.

What about natural immunity? How come not a single thing has been said about herd immunity? How come when my dad contracted COVID even though he was fully vaccinated they gave him convalescent plasma from an UNVACCINATED PERSON. Why an unvaccinated person you ask? Because they cannot use the plasma of someone who has been vaccinated. Why is that? So, us citizens who have not been vaccinated but have contracted COVID and now have natural immunity could save a patient's life, but not those who have been vaccinated. So, it would seem you need us pure bloods who have natural immunity. Mr. Shah you are lying about natural immunity and why are you doing that? Natural immunity is God given and lasts a lifetime. STOP LYING TO THE PUBLIC! Just for your information my dad still died in spite of being vaccinated. The CDC also said that no one should be tested after the isolation period because they could test positive for up to 12 weeks afterwards. This is oppressive and does not work at all. We should take a complete break from all things COVID related period. There is no longer a need to push vaccines if the death rate is so much lower and you will NEVER manage to keep the disease under control. By making people afraid you are setting them up for disease which is caused by dis-ease. People who already had social anxiety prior to this has now gone off the charts! They cannot even leave their homes anymore. YOU ARE LYING ABOUT NOT BEING ABLE TO GET INFECTED!!! The only friend I have that has not had COVID

and has been vaccinated takes hydroxychloroquine. EVERYONE ELSE WHO HAS BEEN VACCINATED STILL CAUGHT COVID! MY GOD THE AMOUNT OF LYING THAT CAME OUT OF THIS SCREEN TODAY WAS APPAULING!

Not once have I heard any of your team speak of health, and supplements we can take to keep our immune system up. Not once!

This is a big eye opener to many seeing this joke play out over zoom. Just hide and seek from corona, something that has a very low kill rate. Why don't you guys touch on the spike protein dangers for those who have already had covid and then getting a vaccine? This is horrible, people's trust is gone with your team. Wake up! Use tools not masks, use tools of promoting fitness and taking supplements proven to improve your immune system for when people do get it.

STOP FEAR AND CONTROL TACTICS!

Washington state health board,

It appears that the board is not saying anything on the adverse side effects or deaths from the vaccine. We know that over 900 thousand American citizens have had severe side effects and 30 thousand deaths have occurred in American in 2021, based on the VEARSE report from the CDC.

What gives the Washington state health board the right to circumvent the UCC, RCW, 18 USC 242, the Constitution and Peace Treaty laws, to mandate vaccines and mask wearing, that attacks the workplace and the way of life in American. Appears to be an attack on freedom and a violation of the Smith Act of 1940.

The fact is there are 240 different types of the cold virus, now since this virus appears to be based on fears how many different types of COVID 19 are going to show up, how long is the State government going to keep using fear that violates the "Separation of power doctrine" inside the Constitution and the 18 USC 242.

The fact is when the CDC came out 2yrs ago and said this covid 19 virus is just a common flu virus, what created the pandemic. Was it fear based with no truth.

Then the Senate oversight committee investigation proved that there were many lies about COVID 19 and many different types of the virus.

How many times do you have to rewrite the meaning of a vaccine?

How many boosters do you have to take before you're safe and why don't you say anything about man's own autoimmune system that has been very effective on beating COVID 19, why do you seek to divide the Washingtonian population with lack of truths.

Washington state health board promotes a safe vaccine environment, but does not reveal the adverse side effects of the vaccine, that is called deception. A violation of the 18 USC 241, 18 USC 242, 18 USC 245, Civil Rights Act, Privacy Act of 1974 and the Hierarchy of Public Law.

Hello: I did not get a chance to provide my verbal comment today due to the BOH restraint on time for commenters. I listened to the presentations and commenters up until the break for lunch. My comments now concern the wording of RCW 28A.210.060.

The board does not appear authorized to mandate a school age and day-care mandate for Covid vaccine. The wording of .060 allows this only for vaccines that prevent disease. From the presentation today, it is clear the BOH recognizes the inability of the vaccine to prevent disease or spread.

Since the ineffectiveness of the vaccine to stop transmission or spread is well known, the only question is whether it prevents disease for a period of time. It appears from news reports that it has little to no effect on Omicron and may only protect for 30 days. The number of boosters that would be required would make this whole process untenable. Additionally, there are serious concerns about vaccine safety, especially for children and even from the inventor of MRNA, Dr. Malone. Mandating something that has a 10-20% higher adverse negative outcome than any vaccine ever allowed to remain in use is frightening to parents you heard today. The high number of injuries and deaths from vaccination as reported in VAERS data was not discussed by presenters today. Neither was the long-term consequences of the vaccine which are largely unknown because of the lack of proper or robust clinical trials.

Because of these problems, lack of ability of the PCR test to differentiate between flu and Covid, lack of administrators at hospitals to differentiate between patients admitted because of covid as opposed to admissions with covid, the data on actual cases, outcomes due to lack of therapeutics, you really know nothing about case numbers, deaths or any effectiveness of vaccines at all.

If hospital capacity is the primary issue, the best solution would be to increase that capacity. Methods used in NY to increase capacity could be staffed by people who now have lost their jobs in the medical field due to mandates would provide the most appropriate response to the specific concern. Anything else is wrong-headed.

The covid 19 vaccine should not be mandated as the vaccine itself does not prevent a person from getting covid or transmitting it to others. Also the vaccine has not been studied enough to prove its safety and the long term effects are unknown. Kids should not be Science Experiments. As we seen even people that have had booster shoots are getting covid and ending up in the hospital. There has also been a lot of deaths from covid in the fully vaccinated and boosted. Let the parents decide.

Thank you.

To Dr Shah and the rest of the board of health, I am letting you know if you chose to implement WAC 246-100-070 to involuntarily detain people 245-100-045 following refusal of a mandate you will be committing a felony under 18 US Cod3 2331 subsection 802. It is illegal to coerce a population. It is also illegal and a felony, to commit civil violation of the 21 code of regulations 50.23 and 50.24, using coercion during an experiment. How much money did the Washington Department of Health get from the feds? Of that, how much did your department receive? What is your exact involvement in the WHO and CDC Dr Shah? Leave children alone. You are cherry picking your corrupt studies over the real studies you suppress just like you suppressed Ivermectin and HCQ. Why did you sign up for Remdecivir and ventilation? Hospitals all have the same protocols which means you are denying the right to try. This is a nose and throat virus, why not use iodine in nebulizer for at home treatment, it's cheap and #2 on CDC list or at least it was, things disappear as you may know. Be aware, you have been put on notice, you are and will continue to be breaking the law. All that is hidden will be revealed. I would appreciate answers. What is the death count for the jab that does not work? Thank you for your attention and answers, I smell corruption. Denice Spross.,

Thank you.

I am Gordon Haggerty, and I've previously submitted written testimony. But I want to follow up on your remarks about section 040 of WAC 246-100, regarding enforced detention / quarantining, and I'm wondering if and why this section is needed, and if it should be deleted from the WAC?

In light of recent use of the health emergency to implement draconian and abusive shutdowns and mandates, it is not unreasonable to assume that such provisions would be used, and that so-called "due process" provisions might not also be suspended for the sake of "emergency circumstances"?

History has not provided good precedent for laws like this, and I strongly urge that this be deleted.

Thank you.

Subject: Testimony on the Revised Communicable Disease Rule

External Email

Thank you for the opportunity to testify before you today. My name is Gordon Haggerty, and I am speaking in opposition to your proposed rule change.

I am sure you are aware of the fact that trust in our public health agencies has been severely eroded over the past two years. As a result, many of us have become very sensitive to the overreach we have seen regarding mandates on meetings, schools, masks, vaccines, movement and careers - all in the name of protecting public health and safety, while natural immunity is not even taken into account. Neither are practical measures, like managing our lifestyles to strengthen our immune systems and reduce comorbidity factors.

So it should not come as a surprise to you that there would be a huge pushback at an attempt to repurpose an old HIV rule that includes provisions for forcible enforcement, detention, and / or quarantining, along with other measures that are in clear violation of our constitutionally guaranteed liberties.

I am thankful to have been born and raised in this great country, which is lovingly known as the LAND OF THE FREE AND THE HOME OF THE BRAVE. I want to remind everyone here that our precious freedoms have been bought and paid for by the blood sacrifice of millions of brave men and women who have preceded us.

They will be the first to tell you that the freedoms we enjoy are neither free nor safe. Risk is always a major component of freedom, and we cannot and will not sacrifice our personal liberties and God-given rights for the sake of perceived comfort or safety.

Sacrificing our constitutionally guarantees to personal liberty, choice and privacy for a bit of perceived comfort and safety is NOT acceptable, and I urge you to be VERY CAREFUL about what kind of rules you make, as you may be letting a genie out of a bottle that you may not be able to get back in - and the kinds of civil disobedience that might result from attempts to enforce this rule.

Thank you for your time, and please know that we are praying that you will make the right decisions.  
May God save America.

\* There are many children who have received the covid shot that are now getting myocarditis as a result from the shot. This is causing severe problems in otherwise healthy children. This is heart inflammation.

\* Even though vaccinated, even with boosters, adults and children are still contracting, and spreading Covid-19 to those both vaccinated and unvaccinated.

\* Pfizer and Moderna are messing with the menstrual cycle of many women – we are still unsure of the permanent side effects of this. I’m talking on behalf of my friend who’s a school teacher when I tell you that she I received the shot as a teacher because She had the choice of getting vaxxed or losing her job (single parent, this would make a result in losing her house as well). (WHICH IS NOT A CHOICE IT IS COERCION AND GASLIGHTING!!) she is now having severe arm pain. Headaches, nausea and erratic, unpredictable, heavy non-stop menstruation as a result of the vaccine even months later!

\* It takes many years for a vaccine to be fully tested, and now they are already trying to offer boosters on a still new and unknown shot. This should not be FORCED on children. It should be a choice! I in no way want my children to have this happen and risk their fertility and future choices.

\* The covid-19 virus keeps changing and having new variants that are not phased by the shot. Therefore, we are giving children shots with severe and unknown side effects that are not even helping the children (or adults) fight off the virus. As It continues to mutate.

\* Shots SHOULD NOT BE MANDATED FOR SCHOOLS – it should be a parent’s choice. Without you gaslighting us!!

\* LEAVE OUR CHILDREN ALONE!!

We will not stand for this!! We will not tolerate this!!

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda.

I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

Rachel Enselman

Life long Washington State resident

[wsboh@sboh.wa.gov](mailto:wsboh@sboh.wa.gov)

Please make a copy for all Board members and put this on public record.

**I am quite disturbed that you would consider adding these experimental COVID19 vaccines to the school children's current vaccine schedule.** There should be NO mandates! The masks don't work! The PCR test doesn't work, too many false positives! The COVID-19 Vaccines don't work or only briefly!

1) **The COVID-19 vaccine experiment is not over.** We have yet to find out the long-term effects. It violates not only the **Nuremberg Code** but the **Constitution** as well. We are supposed to have the right to make our own medical decisions. **Coercion is a felony!**

2) **You can't prove these vaccines are safe.** Can you provide the safety data results? Doubtful since the experiment is not over. I don't believe these vaccines are safe judging by the **VAERS website**. **Most children survive the virus but the adverse effects from the COVID19 vaccines such as Myocarditis can create lifelong health problems or death.** You can't guarantee a child won't be vaccine injured, nor do you take on any liability if they are.

3) **Doctors take a Hippocratic oath to do no harm.** Your current policy of telling patients to come when they have difficulty breathing or dehydrated, then hospitalizing them putting them on a ventilator and giving Remdesivir does harm! Hospitals make a fortune with this protocol. (\$13,000 for admission and \$39,000 if placed on a ventilator for starters.)

**A serious side effect of Remdesivir is kidney disorders and can be potentially fatal.** Remdesivir was pulled from the Ebola trial shortly after because of the 4 trial drugs it had the highest death rate. Why would the FDA approve this for treatment? Was it because they could not push the EUA vaccines if there was an effective treatment?

4) Most people aren't aware that **Ivermectin is on the NIH Table 2f. Characteristics of Antiviral Agents.** It says that not approved by the FDA and not recommended by the panel for treatment of COVID-19 under investigation in clinical trials. Most people don't know about **the Right to Try Act**. **Why aren't people being treated early?** Many frontline doctors had great success using the **Zelenko Protocol**. India's cases peaked in May of 2021 and dropped significantly after administering **Ivermectin**. India has 4.2 times the population of the USA and 483,790 deaths from COVID-19 compared to the USA with 837,264 deaths. The USA has 63.27% fully vaccinated compared to India's 45.89%. Why aren't you looking at India's statistics? Different people have told me that the pharmacies won't fill Ivermectin prescriptions if it is for COVID-19. Aren't they liable if a doctor prescribes Ivermectin and the patient dies because the pharmacy refused to fill the prescription?

**The FDA, CDC, and WHO said not to use Hydroxychloroquine based on an article put in the Lancet and later retracted because they could not produce the data to support it, yet the FDA didn't give the ok to use it, why? Both Hydroxychloroquine and Ivermectin are FDA approved for other use.** Ivermectin is sold over the counter in many 3rd world countries. Its side effects are less dangerous than both aspirin

and Tylenol. Approximately 20-30% of prescription drugs are used **Off-Label** (repurposed) which is perfectly legal. People need to know their rights. **Attorney General Jeff Landry says "laws are in place that require doctors and pharmacists to fill prescriptions regardless of what they think of it. Same for doctors and nurses to treat people with COVID-19 who aren't vaccinated. It is in their Hippocratic Oath."** (Congressional Post 10/2/21)

5) **Masks don't work for the virus, why do you insist on them?** Even the doctor on CNN referred to them as facial decorations! They also deplete oxygen and increases the carbon dioxide, causing **headaches and difficulty breathing. Moisture trapped can cause bacteria to grow. This is not healthy!**

6) **CDC head Rochelle Walensky admitted the PCR test have too many false positives and can remain positive 12 weeks after an infection. She also shortened the isolation to 5 days.**

Right now, the CDC, FDA, NIH, NIAID, and HHS heads either looks like a bunch of liars or are completely incompetent. It is time to end all mandates! It is time for doctors and nurses to renew their Hippocratic Oath to do no harm! Hospitals should not be taking advantage of their patients. The more people that die from bad policies, the less income hospitals will receive in the future. It's time for the Medical Board to do what is best for the people in this state. If you don't, one day you will be held accountable. Gates, Fauci, and Big Pharma have a case against them filed before the International Criminal Court for Crimes Against Humanity.

## Remdesivir and Acute Renal Failure: A Potential Safety Signal From Disproportionality Analysis of the WHO Safety Database

Clin Pharmacol Ther. 2021 Apr;109(4):1021-1024. doi: 10.1002/cpt.2145. Epub 2021 Jan 16.

<https://pubmed.ncbi.nlm.nih.gov/33340409/>

### Abstract

Remdesivir is approved for emergency use by the US Food and Drug Administration (FDA) and authorized conditionally by the European Medicines Agency (EMA) for patients with coronavirus disease 2019 (COVID-19). Its benefit-risk ratio is still being explored because data in the field are rather scant. A decrease of the creatinine clearance associated with remdesivir has been inconstantly reported in clinical trials with unclear relevance. Despite these uncertainties, we searched for a potential signal of acute renal failure (ARF) in pharmacovigilance postmarketing data. An analysis of the international pharmacovigilance postmarketing databases (VigiBase) of **the World Health Organization (WHO) was performed, using two disproportionality methods. Reporting odds ratio (ROR) compared the number of ARF cases reported with remdesivir, with those reported with other drugs prescribed in comparable situations of COVID-19 (hydroxychloroquine, tocilizumab, and lopinavir/ritonavir). The combination of the terms "acute renal failure" and "remdesivir" yielded a statistically significant disproportionality signal with 138 observed cases instead of the 9 expected.** ROR of ARF with remdesivir was 20-fold (20.3; confidence interval 0.95 [15.7-26.3],  $P < 0.0001$ ) that of comparative drugs. Based on ARF cases reported in VigiBase, and despite the caveats inherent to COVID-19 circumstances, we detected a statistically significant pharmacovigilance signal of nephrotoxicity associated with remdesivir, deserving a thorough qualitative assessment of all available data. Meanwhile, as recommended in its Summary of Product Characteristics, assessment of patients with COVID-19 renal function should prevail before and during treatment with remdesivir in COVID-19.

### A cluster randomised trial of cloth masks compared with medical masks in healthcare workers

NIH National Library of Medicine April 22, 2015

C Raina MacIntyre 1, Holly Seale 1, Tham Chi Dung 2, Nguyen Tran Hien 2, Phan Thi Nga 2, Abrar Ahmad Chughtai 1, Bayzidur Rahman 1, Dominic E Dwyer 3, Quanyi Wang 4

<https://pubmed.ncbi.nlm.nih.gov/25903751/>

**Results:** The rates of all infection outcomes were highest in the cloth mask arm, with the rate of ILI statistically significantly higher in the cloth mask arm (relative risk (RR)=13.00, 95% CI 1.69 to 100.07) compared with the medical mask arm. Cloth masks also had significantly higher rates of ILI compared with the control arm. An analysis by mask use showed ILI (RR=6.64, 95% CI 1.45 to 28.65) and laboratory-confirmed virus (RR=1.72, 95% CI 1.01 to 2.94) were significantly higher in the cloth masks group compared with the medical masks group. Penetration of cloth masks by particles was almost 97% and medical masks 44%.

**Conclusions:** This study is the first RCT of cloth masks, and the results caution against the use of cloth masks. This is an important finding to inform occupational health and safety. Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection. Further research is needed to inform the widespread use of cloth masks globally. However, as a precautionary measure, cloth masks should not be recommended for HCWs, particularly in high-risk situations, and guidelines need to be updated.

### Effectiveness of N95 respirators versus surgical masks against influenza: A systematic review and meta-analysis

Youlin Long 1, Tengyue Hu 2, Liqin Liu 2, Rui Chen 3, Qiong Guo 1, Liu Yang 1, Yifan Cheng 1, Jin Huang 4, Liang Du 1

Pubmed PMID: 32167245 PMCID: PMC7228345 DOI: 10.1111/jebm.12381 March 3, 2020

<https://pubmed.ncbi.nlm.nih.gov/32167245/>

**Conclusion:** The use of N95 respirators compared with surgical masks is not associated with a lower risk of laboratory-confirmed influenza. It suggests that N95 respirators should not be recommended for general public and nonhigh-risk medical staff those are not in close contact with influenza patients or suspected patients.

## **CDC Head Admits PCR Tests Produce False Positives [Video]**

The Liberty Beacon Europe Reloaded by TLB Staff: Steve Watson Dec. 31, 2021

<https://www.thelibertybeacon.com/cdc-head-admits-pcr-tests-produce-false-positives-video/>

CDC head Rochelle Walensky admitted Wednesday that the agency has rejiggered its guidance, including cutting COVID isolation times in half, based on the fact that PCR tests are producing massive amounts of false positives.

Noting that PCR tests for COVID can stay positive for up to 12 weeks after infection, Walensky stated “we would have people in isolation for a very long time if we were relying on PCRs.”

## **Covid-19: Pharmaceutical giants, Gates, Fauci, UK officials accused of crimes against humanity in International Criminal Court complaint**

By The Rio Times December 19, 2021

<https://www.riotimesonline.com/brazil-news/modern-day-censorship/covid-19-pharmaceutical-giants-gates-fauci-uk-officials-accused-of-crimes-against-humanity-in-international-criminal-court-complaint/>

RIO DE JANEIRO, BRAZIL – UK officials and the most influential public health figures are accused of genocide, citing a series of statistics on the impact of “vaccines” and policies imposed under the guise of “mitigating COVID.”

A group including former Pfizer vice president Dr. Michael Yeadon filed a complaint with the International Criminal Court (ICC) (worth reading) on behalf of U.K. citizens against Boris Johnson and U.K. officials, Bill and Melinda Gates, CEOs of major pharmaceutical companies, World Economic Forum executive chairman Klaus Schwab, and others for crimes against humanity.

The ICC has acknowledged the case and has attributed the following reference number **OTP-CR-473/21.**

So, there's no vote, that's true. But, you're setting the stage and don't pretend you're not.

The citizens of this state, outside of King County will not accept vaccine mandates. The pandemic is over! Omicron is a cold. Our children haven't seen the faces of teachers and fellow students for nearly two years!

- Masks don't work
- Vaccines don't prevent the spread
- Treatments are prevented
- Vitamin D, except use, time outside, zinc are not promoted
- Children are being permanently damaged
- 6% of Covid deaths are from Covid alone
- 76% are obese with 4 or more co-morbidities on average

Elections will have consequences and our government officials have gone off the rails. The useful idiots.

Nobody will force my son and daughters to get a vaccine.

Shame on all of you.
