I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons: I am an ER nurse in WA, and have yet to see a child hospitalized for SARS-CoV-2. There is no reason to force vaccinations for anyone, much less such a low risk population, unless it's to further metrics for your own glory at the expense of children. There is a God, who will judge your service on the last day.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

The vaccine is not necessary for children and science does not substantiate the vaccine preventing the spread of the virus in adults or children - which is ultimately what this mandate is "supposedly" seeking to do. This "possible" mandate is contrary to science, especially given the CDC's most recent announcements this week.

No mandate.

Best,
Jacqueline Nicolette

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgo.onelink.me%2F107872968%3F>>
am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We now know that the COVID19 vaccines do not stop the transmission of the disease nor do they ensure immunity to the recipient. Therefore, COVID19 is NOT a "vaccine-preventable disease" according to WAC 246-105-030 and no "vaccine" currently being offered should be considered to be "required" or "mandated" by WA State's own guidelines.

Additionally, it must be acknowledged that these "vaccines" ARE causing injuries. The risk/benefit ratio is deeply skewed toward higher risk vs benefit for young people. We have seen over and over again that young people (under age 30) have statistically zero risk to death or adverse long term problems from COVID recovery. This is not the same statistically for the vaccine with these age groups. Not to mention, the added benefit of herd immunity in disease-recovered individuals.

It must be noted that SARS-COV2 is a HIGHLY MUTABLE disease. You cannot "vaccinate" out of this pandemic. We are risking lives by continuing this patently misguided direction of mass vaccination during an active pandemic.

Respectfully submitted,

Gregory and Karen Sherrod

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There have been no long term studies on this new mrna vaccine. The mrna inventor, Dr. Robert Malone, claims this was never intended for use in humans. World health organization director claims it is deadly for children. The CDC VAERs indicate more adverse events related to this vaccine than all other vaccines combined. Children are more likely to suffer adverse reactions to the vaccine than they are to suffer any ill effects from COVID.

Vaccinating our children is tantamount to allowing them to play Russian roulette.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: I am the parent. It is my responsibility to make decisions regarding my children, not yours and I DO NOT trust anything regarding the vaccination.

I will pursue home teaching at the point my children are REQUIRED to get the vaccination. If enough parents pull their children out, then the school district will be losing money due to lack of attendance.

There are plenty of at home schooling programs To home school my children. I am at the point of pursuing moving out of the state of the WA to get away from the communist rule!!!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It is unethical! Children are at extremely low risk For covid and there are NO long term studies for how this will impact our children and their children. Please, consider in ten years the health ailments our children will face. We already know that the vaccine can cause infertility and irregular periods, we don't want our children facing any detrimental health risks because of this idiotic decision.

Let's think with our heads about this. The risk is far worse than the benefits to our children considering they are rarely affected severely by Covid.

Please do not force our kids to get the Covid vaccine! Do you want to be responsible for encouraging something that could cause long term health effects on our future generation? Please let us keep our freedoms to make our own choices.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

These vaccines are under Emergency Authorized use and have not been approved by the FDA. The long term studies have not been completed and we do not know the long term health effects for the vaccines. The schools are most surely not going to cover the medical costs of those with adverse effects and health issues that may and can occur over the course of their time in school or daycare. Children have been proven to fight Covid-19 with a very high success rate. This is unnecessary as the current vaccines have been failing and many people have been having breakthrough infections. So the current vaccines being used do not even provide sufficient evidence to support being mandated. Public schools and daycares will only hurt their enrollment and have many children gone sick throughout the year if they decide to push these vaccines as we currently see with many vaccinated people out sick more so than unvaccinated. Vaccines take many years to conduct thorough testing to be deemed safe and approved, especially for children. Never in history have we EVER seen a vaccine mandated that is under an Emergency Authorized use. There is a reason for that because it's not safe to do so. If these were safe and the pharmaceutical companies had enough data they would be approved by the FDA. But they can not guarantee that so they are not. Does the public school system really want to take the risk of pushing something onto children that may harm them? Do not succumb to politics or pressure.

Respectfully,
Jill Olson

I am pretty disappointed that the test to stay in school program was implemented in its current form in Our school district And equally disturbed by the lack of scientific process to begin vaccine distribution to a low risk population while our CDC discontinued The intrtracellular version of DTaP n the 1990s with a much lower risk profile of adverse events (per CDC) in exchange for the extra cellular DTaP in use today that actually allows one to contract and spread Pertussis and spread but not get sick from the disease. Is this happening again where we are ok with a vaccine that allows the spread of disease and is highly experimental?

It seems to only serve in discriminating against students whose parents have CHOSEN to not vaccinate them after assessing the risks for and against. It does not appear to have any substantive effect on limiting the spread of SARS COV2 in the vaccinated population which are well documented to be carriers of the SARS COV2 virus and entirely left out of this program thereby increasing transmission risk as vectors to other students.

Can you tell me why the screening with the BinaxNow antigen test (89% sensitivity as compared to PCR) and behavioral modifications for quarantine are not applicable to those vaccinated students?

Will they (vaccinated) be tested by RT-PCR and not antigen testing? I'm trying to get my head around this and I'm failing to see ANY benefit to the safety of the learning environment other than getting our children used to the "symbolism over substance" culture that is taking over our country in the name of "population health".

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State until they have been tested with as much rigor as our DTaP pre 1990s.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely low risk of dying from covid but the risks of the vaccine are unknown.
2. There are NO long term studies to prove these vaccines are safe. That is a reckless risk to our youth. It is up to the pharmaceutical companies to prove safety not up to the public to prove harm..
3. The vaccines are still emergency use authorized only
4. There are now studies to demonstrate that both vaccinated and unvaccinated can spread covid, therefore vaccination does not stop the spread.
5. These vaccines do not guarantee the prevention of infection (as demonstrated by the current rise in cases) and medical choices must remain with the individual not the government
6. Our public health is failing our youth by censoring science and trying to take away personal medical choice

Please see the following study titled

"Why are we vaccinating children against Covid-19?"

<https://www.sciencedirect.com/science/article/pii/S221475002100161X>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.sciencedirect.com%2Fscienc>

Children remain the lowest risk group regarding Covid, but have carried the greatest burden from the overreaching, long overdue and ineffective attempts to "protect" them. They needlessly were kept out of school for more than a year and their education and mental health suffered. This is crucial developmental time they won't get back. They continue to be required to wear masks in school which is an undue burden given the lack of evidence to support this requirement. We are one of few states still imposing such needless measures, Washington needs to figure it out, and stop doing it at the expense of children and the those you are supposed to serve and protect.

If this "shot" does not prevent getting Covid, OR transmitting Covid to another person, then these are NOT vaccines. They are only experimental gene therapies with many receiving short term/long term severe side effects.

As a teacher, and public school employee for almost 20 years, please do not subject my students to be required to get this "experimental therapy."

Respectfully,
-Jenn Thomas

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The shots are experimental. You must never require anyone to participate in a medical experiment against their will.

Many people have been harmed by the shots, including children. A TX father still mourns for the healthy teenage son he suddenly lost soon after the son took the shot. 13-yr-old Maddie DeGary was badly injured by the shot during trials. CDC people said at a meeting this fall that "we won't know how safe it is until we start giving it to the kids". That is not a comforting statement and no child should be pushed to do it.

The likelihood of injury such as heart problems from the shot exceeds the likelihood of similar problems from kids getting C19. Other countries have banned kids from getting these shots.

The flu is more dangerous to kids than C19, according to the CDC website

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. The forced participation of any citizen in a medical experiment is a violation of the Nuremberg Code. The violation is compounded by the refusal to disclose the complete makeup of the so-called vaccine. Violating this code is the moral if not legal equivalent of a war crime.
2. The preponderance of actual scientific data suggests that the known risks associated with the mRNA therapy considered to be a vaccine are much greater than the risks of COVID-19 in all of its variants to otherwise healthy children.
3. New and developing data on the Omicron variant suggests that vaccinated individuals are more likely to become infected than unvaccinated people. (Vaccine induced infectivity)
4. The EUA on these vaccines protects the manufacturer from liability but not the State of Washington if they are forced on children who are harmed now or sometime in the future by these incompletely tested and approved so-called vaccines.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

LEAVE CHILDREN ALONE !!!!!

If experimental unapproved vaccine refuse to take liability and responsibility for the injury after vaccine. What right do you have to force us voluntarily ??? This is total genocide !!! This fascism has to stop, This is not what I paid my taxes for over the years. More and more people leaving WA state each month, you have brought so much damage into people's life that its nothing compare to covid19 which most of us recovered naturally at home. I believe it is not about you care for our health its about control and power and money, If you would care for our health you would made a changes long ago at the grocery store stopped poison people and kids with the food , water and improved better health care helping people to find a cause instead of prescribing drugs.

Children is our future and we should take it very carefully and seriously what are we doing to their lives. In order to call vaccine to be safe it should be in study for 10 years. Based on scientist death reports across the globe this vaccines isn't safe. Therefore n one has right to force another human being to force a substance in their body call experimental !!!!

WA state released inmates early because concern for covid. They reduced prison populations vulnerable to the COVID-19 pandemic. Now they want to place unvaccinated in detention facilities because unvaccinated are a threat. This is absurd.

But you forgot even the vaccinated get covid and can pass it on to others.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Please do not impose a vaccination on our children that is unnecessary. The long-term side effects are uncertain at this time and it is child abuse to force chemicals into children with limited safety data. There is no evidence that the COVID shot (it is not a vaccine because it does not prevent illness) has any positive effect on youth.

If the "vaccine" does not prevent transmission in youth, why are you attempting to coerce parents to "vaccinate" their children. This is only about control and compliance. Take a minute to think about it. If you make the decision to force a risky "vaccine" onto children, history will look back and frown upon this decision. You will have on your hands, the adverse reactions that happen to any youth within the state of Washington.

In opposition,

Heidi Lauinger

- * Children are at extremely low risk for Covid
- * The vaccines are still only EUA (emergency use authorized)
- * There are no long-term studies to document any history of safety
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. The covid mRNA vaccine is a new, untested and unproven medical application that is still experimental.
2. Children have a very low risk of developing serious life threatening complications from covid.
3. Children have a very low risk from becoming seriously ill from covid.
4. The side effects of the mRNA shot may be life threatening or cause death.
5. Complications from the mRNA shot may cause a lifetime of disease and may shorten their life
6. The mRNA shot will interfere with the development of a healthy natural immune system in the child.
7. Parents should be free to decide whether to give their child the mRNA shot. Government and schools should not coerce or scare parents into doing so.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) Children are at lowest risk for Covid.
- 2) The EAU mRNA is not approved; only Comirnaty has received FDA approval and is not available in the US
- 3) The mRNA shot is much more harmful to children than the illness, which is very mild in children

If you truly care about children as you profess, this proposal shouldn't be given any credibility or consideration.

Sincerely,
Jeanette Medina

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- * Children are at extremely low risk for Covid
- * The risk for children having a severe case of Covid is extremely low
- * Children's immune systems are made stronger when exposed to viruses and get natural immunity
- * The vaccines are still only EUA (emergency use authorized) - Comirnaty is not available in the USA
- * There are no long-term studies to document any history of safety. Our children are our next generation and we really don't know whether there are long term side effects from these experimental shots
- * Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- * The vaccine apparently does not stop the spread of the disease
- * Our children are our legacy. I strongly oppose mandatory COVID-19 shots for school admission.

Caitlin,

Please note that I, Rachelle Boone a resident of Washington state am sending my disapproval for any Covid vaccine mandates for anyone and most especially anyone under the age of 18 per the reasons that follow:

Children are at extremely low risk for covid.

The vaccines are still only EUA.

There are no long-term studies to document any history of safety with the vaccines.

Studies do now document that the vaccinated and unvaccinated can both transmit Covid therefore the vaccine isn't proving effective in stopping the spread of covid.

Thank you for hearing the voice of the residents of Washington State.

Sincerely,

Rachelle Boone

I am a citizen of this country and the State of Washington and a parent.
I am opposed to making COVID-19 shots or any vaccine without independent scientific review mandatory for school admission or childcare in our State for the following Reasons:

Children have a naturally robust immune system. It is a fact their survival rate is extremely high from Covid. The statistics indicate this. It is also a fact a rush to give them a shot can have profound consequences due to this shot altering DNA and it being experimental.

This shot is very unlike vaccines of the past. And it is an poor rush to judgment to give this shot to our children without any liability for damages to them and in fact that in itself is a farce.

It is irresponsible for anyone or institution to mandate a shot like this and forcefully get in between parents, their children and their choice. I find it a very dangerous sign and an abuse of power and akin to needing a repeat of history as in the Nuremberg trials. Government overstepping its boundaries or any corporate entity who owns patents while recommending this as a mandate is a very telling and dangerous sign. That tells me the intent is to be questioned is a red flag not to be trusted. To have this as a possibility is telling that this country is headed in the wrong direction that is unsafe and operating out of the boundaries of our constitution. The parent has right to make a decision about their child with that child's doctor without government getting involved both in the doctors practice by threat of his or her loosing their license being revoked by refusing to recommend this Covid shot. I'm addition dismissing a parents judgement for their own family and their right to choosers another red flag and sign of tyranny not a republic.

This is the greatest free country in the world and we the people do not want this mandate.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children have not struggled with Covid-19, and the new strain Omicron is described as a cold or 24 hr flu. Since when do we want to protect our kids from these common germs. They need strong immune systems.

Also, the vaccines are experimental in nature and we have no idea of their long term consequences to health. Why should we expose them to harm and risk from such an innocuous disease?

I understand the vaccines no longer protect against covid-19 and neither does our natural immunity. No way but through this!

And finally, it would be against the Nuremberg and Helsinki Accords to mandate experimental vaccines to be put into anyone's body against their will. What say do kids have in all this? They're expecting us to act on their behalf and we must protect them from experimental vaccines.

Sincerely,

Elizabeth Swanson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Our children should not be required to have the Covid vaccine to attend school! There is not enough information on the vaccine that can validate the safety of it and forcing our young adults and children to be test subjects for the vaccine (which is still only listed as 'emergency use authorized') is competition wrong and unethical!

Studies that have been completed now document that vaccinated and unvaccinated can BOTH transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease!

Requiring this vaccine does not make any sense and my family, friends and I do not support it! Our child will no longer be enrolled in a public school if this becomes mandatory.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Every kid has the right to receive the benefits of education without discrimination. Setting unvaccinated kids out of the school system would violate that right. Facts have proved that both: vaccinated and unvaccinated have been transmitting the virus. Saying that, means that proof of vaccination should not be considered as a requirement for schools to accept or reject students.
Just common sense!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The human body is VERY capable of dealing with the sickness, which comes with SMALL risk as noted by low numbers BEFORE vaccination.

This completely by-passes a physician who knows individuals.

By-passes Nurumburg agreement.

It is un-wanted touch.

Increased heart problem risk with young that don't even need it.

White house admitted there is no solution.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for this reason: You absolutely cannot require the covid vaccine for minors because it is still under Emergency use Authorization. Adults in authority over childcare, requiring a child to get the vaccine is an abuse of informed consent. The child may risk getting myocarditis, but is not even old enough to research the risks and benefits for himself or herself. Adults can choose for themselves to get the vaccine, but children will have no choice.

All the promises that the vaccine would stop the spread have been futile-- both vaccinated and unvaccinated are continuing to spread covid. To require children to get vaccinated is so stupid and backward compared to educated countries such as Japan, Denmark, Norway, and Sweden. I am disgusted and disappointed in our supposedly educated leaders in Washington state that this is actually being considered. If you are continuing to pursue this, you are narrow-minded, and not following the science in any way, and have lost all respect of your supporters.

I hope you will consider the future of our children in Washington. Show us that you prioritize their safety. Show us with long-term studies that have affirmed that this is safe to be injected into their arms, especially without their informed consent. Thank you.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

This vaccine is still under EAU authorization. Comirnaty which is the only formula to receive authorization is not available in the US. There has just been a lawsuit which was won against mandates where Pfizer admitted that Comirnaty was different and distinct from the current vaccine available in the US. It is NOT the same formula. It is unlawful to require anyone to submit to an EAU authorized drug, because it is a drug trial. The law states that no one can be forced to enter a drug trial. If there should be a serious adverse reaction or death occur from these unlawful mandates, lawsuits would be filed. Children are not at serious risk from Covid and this is unnecessary. They are at greater risk from the flu.

Also, adding Covid to the WAC 246-100 is ridiculous. It is a virus just as the cold, flu, SARS 1, H1N1, and so forth. This is simply a grab for power. Now that the omicron variant is dominant the risk has further diminished and the risk to begin with was not great. Even for the most vulnerable the survival rate was above 95%. This is NOT a communicable disease and you need to stop trying to keep people in fear.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

First of all these vaccines are still an experiment, with barely a years worth of information on how they work on human. Why would we experiment on children when they have almost a zero chance of death to Covid.

We need kids to get Covid so that we can create herd immunity for everyone else.

Medical decisions need to be made between a doctor and patient. There is no one size fits all medicine...or vaccine.

I will remove my 4 children from public schools if this is mandated and when the rest of the people who are against these mandates do the same thing you'll be out a lot of funding.

Make the right choice,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There simply has not been enough time or data to back up the extremely huge risk of forcing this vaccination among so many children. This will be a colossal liability, and blood will be on your hands if you allow this to happen. Coercion is not consent. Making a health decision like this is not your responsibility, ESPECIALLY when we know for certain that the vaccination does not prevent the spread. Therefore it is not your decision whether our child receive the shot. I am both pro vax and also vaccine injured. I understand the risks, and my injury is from a vaccine that I chose confidently as an adult. We also know that there has been many reports of side effects both mild and severe from this vaccine, whether you like to admit it or not and this is a gamble that you can not afford to take. Not only will you have the wrath of furious parents and law suits but also a HUGE decline in enrollment. You just wait and see. Look at the numbers just from the mask mandate, imagine when you try to force an experimental vaccine into the bodies of our children. Washington will draw the line here. I promise you. From every political angle. Wrong is wrong.

To Whom It May Concern,

I am extremely opposed to making COVID-19 shots mandatory for school admission and/or childcare in Washington State. There are numerous reasons for this, only some of which are:

- * Children are at extremely low risk for contracting COVID-19.
- * Of those that do contract COVID-19, very few become more than mildly ill.
- * 2 of the 3 vaccines are still under EUA (Emergency Use Authorization).
- * There are no long-term studies to document the long-term safety of the vaccine, especially in children. And even more so for pre-pubescent children, where their bodies drastically change.
- * Studies now document that vaccinated and unvaccinated people alike can transmit COVID-19.
- * The vaccine apparently does not stop the spread of the disease. It may only potentially lower the severity of its symptoms. That risk should be a choice made by parents, not a government entity.

I trust that you will use this information to make a decision against mandating shots for both school admission and childcare. Thank you.

-Loreen Eng

There's a reason nurses across this country didn't get the jab. They know it takes at least 7 years to perfect a vaccine. This one is still only authorized as emergency use. We don't know the long-term effects and there has been no testing for long-term. The focus should be on treatments not ineffective vaccines that don't stop you from getting covid. Use common sense and stop these illegal mandates.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at low risk & have high survival rates

For any of these variants there are natural healthier ways to help their own immune system fight off the virus the way God created their bodies to work

The CDC should be promoting good healthy habits to improving their immune system & not some "emergency unproven vaccine"

There are no long term studies of the side affects of the vaccine

People who have been vaccinated are still spreading & infected by the virus so I do not see the benefit of getting the vaccine

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Just reading the VAERS Report is reason enough to OPPOSE THESE untested shots on children.

True Vaccines have been tested for much longer to prove their safety. They are are still only EUA (emergency use authorized) and NOT fully tested.

Our children are our FUTURE and it's wrong to use them as guinea pigs.

Children are NOT at high risk for COVID-19.

Parents should have the right to choose what is best for their children.

These shots have shown they WILL NOT PREVENT COVID TRANSMISSION!!

Mrs. Joan D Burns  
Mount Vernon, WA

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

We should have the freedom of choice to vaccinate our own children due to the above reasons. The Flu shot is a choice and COVID should be the same.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccine does not stop the spread as studies now show both vaccinated and non vaccinated are testing positive, children are at an extremely low risk of getting it, there are no long term studies to document a history of the vaccine's safety, and this vaccine is still only emergency use authorized. There is no reason to have the Covid vaccination as a requirement for school age children.

There is also another proposal being addressed at your upcoming WSBOH meeting. I would like it known I am opposed to allowing health officers to use law enforcement to force an emergency order to detain people in a quarantine facility if they refuse exams, testing, or treatment.

Thank you,  
James Hancock

To Whom it may concern:

I am opposed to making COVID-19 vaccines mandatory for school admission or childcare in our State for the following Reasons:

- Currently the vaccines available are still only EUA (emergency use authorized) and not approved by the FDA
- There are no long-term studies to document any history of safety of the COVID-19 vaccinations
- Current studies show that vaccinated and unvaccinated can both transmit COVID-19
- Current data and trends are not showing that the COVID-19 vaccine stops the spread of COVID-19
- School aged children have a 99.9998% survival rate from COVID-19

It is also important to note that in the last couple of years, Washington State has seen a decline in enrollment by 3.5%. I am a teacher in Spokane, WA and in the last couple of years, there has been a decline in enrollment by 5.5%. I personally believe that if a mandate for COVID-19 vaccination was put in place that the decline in enrollment in public school will continue and as a result hurt the public education system.

Thank you for reading my comments.

Regards,

Jamie Wopschall  
Spokane, WA

Washington State Board of Health,

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk to die from covid and if vaccinated they could still catch or spread the disease.

The vaccine requirement will mean more parents will remove their children from the public school system.

I am a parent of 4 children and I know parents should be making these choices on behalf of their children, not a state agency.

The state of Washington has already lost credibility with many parents as a result of the many exaggerations that came from the department of health regarding what was going to happen when covid arrived.

Many of the things we have been forced to do would not be happening if there was a different political majority in our state, it is wrong to take advantage of a pandemic to further the goals of a certain political party like forcing a vaccine to be taken by children so early on with no longer term results critiqued.

I would prefer to have my children get it and develop the antibodies to fight it off.

If the vaccine is forced on children whose parents disagree with it, I will make sure that my children never attend a public school and I will make sure they know the reasons why our state has gotten so far from its constitutional purpose.

The technical committee members voting on these things should be parents of the students who this will affect. When it comes to people's children I will give you some advice: parents are the experts. You can't have employees of the state voting on these things or any other person who will benefit financially from this.

It has been so painful to watch good men and women forced out of their jobs because of these forced vaccine mandates. These types of things will bring many troubles to our state and the county in the days ahead. Don't continue down this power trip where those in power continue to walk over those they do not agree with, a pandemic is not even worth that.

Respectfully,  
Jared B. North

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Dear :Washington state board of health

This is America the land of the free!

A country that's greatness is measured by the power and freedom of the individual to make choices in the interest of their own well-being!

Depriving people of their own bodily sovereignty is not health no matter how you sugar coat it. The contradictions of the CDC and other government health officials at this point is evidence enough that this mandate to take an experimental mRNA shot that isn't as effective as we were led to believe is beyond insane. The real world risk to children has also been inflated and we are done with you scaring everyone into compliance! If you want to help people through this endemic I suggest you look into researching how to treat people who have Covid! The suppression of effective treatments for sick Covid patients is an embarrassment and will not be forgotten please put yourselves on the right side of history by rejecting this mandate as other school systems around the country have. Let's get back to educating our children about real health in the classroom where they belong no matter their vax status please!!!

Sincerely  
Concerned Washington citizen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- These shots are WAY TO NEW to be injecting into anyone, especially our children who's bodies are still developing!
- The chances of our kids getting extremely sick from Covid 19 are extremely low
- Our kids have already experienced having Covid 19
- No decisions such as this should be made out of fear alone. The science and data are clear. Majority of children who get Covid 19 will be fine just as if they have a different strain of flu/cold.
- The data and science are clear. Children get the flu and colds all the time and yet are not required to get a shot for it. It's a choice! Covid is no different
- Haven't our children suffered enough!?!
- My kids as well as myself have never received a flu shot and Covid is a bad flu. We all experienced having it. We will not be forever to get a shot we do not need.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

While it is virtuous to appear to the public that you're doing something to stop the virus with facemask, EAU vaccines and lockdowns, based on what science knowing virology, or epidemiology, and the multiple studies which have now been published, do base your hubris on that anyone can actually stop the spread of this virus?

And...

Were the authorities who told us, two weeks to flatten the curve, masks are effective, vaccines will keep you from getting ill from the virus, while at the same time completely ignoring the factor of natural immunity for the 99% who survived the virus, and that minors under 18 had an extremely low risk for getting ill from COVID-19, right or wrong? If right, then why are we now in the third year of this pandemic? If wrong, then why should we believe any mandate you create at this point?

= = = = =

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

It goes against our freedom and rights as citizens of the United States.

It goes against my faith and my integrity.

It goes against the Nuremberg Treaty of human rights.

It feels like you want to come into my house and violate my child's health without my consent.

It goes against my rights as a parent

It's untested and I don't want my child used as a guinea pig

Natural immunity is much stronger

It is unnecessary in children but at the very least should be a choice

Too many Big pharma companies have too much to gain monetarily from using our kids as their guinea pigs. I don't trust the companies making them as many have shown they will falsify and hide information to keep their product on the shelves (i.e. Johnson and Johnson with baby powder). They have paid out billions for their lies and the lives they've taken but still we should be forced to trust them with ours? No thank you.

Thank you for considering this very carefully,

Katherine J Newhouse

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We now know that the COVID19 vaccines do not stop the transmission of the disease nor do they ensure immunity to the recipient. Therefore, COVID19 is NOT a "vaccine-preventable disease" according to WAC 246-105-030 and no "vaccine" currently being offered should be considered to be "required" or "mandated" by WA State's own guidelines.

Additionally, it must be acknowledged that these "vaccines" ARE causing injuries. The risk/benefit ratio is deeply skewed toward higher risk vs benefit for young people. We have seen over and over again that young people ( under age 30) have statistically zero risk to death or adverse long term problems from COVID recovery. This is not the same statistically for the vaccine with these age groups. Not to mention, the added benefit of herd immunity in disease-recovered individuals.

It must be noted that SARS-COV2 is a HIGHLY MUTABLE disease. You cannot "vaccinate" out of this pandemic. We are risking lives by continuing this patently misguided direction of mass vaccination during an active pandemic.

Respectfully submitted,

Kim Bisson (Very concerned parent of two minor-aged children who are FULLY COVID-recovered)

considering. There are known effective therapeutics and highly successful early treatment options available which should be promoted and pursued by the WA Board of Health instead.

For the above reasons, please discontinue your consideration of adding COVID-19 to the infectious disease WACs and school immunization requirements and turn your attention to early treatment and proven, highly successful therapeutics.

Thank you for your time.

Becky Helland

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- 1) Medication/Immunization mandates are illegal/unconstitutional under WA state law including, but not limited to:  
. RCW 49.60.030;  
RCW 43.06.220 (2)(g)(iii),(4)
- 2) Are unconstitutional according to the CONSTITUTION OF THE STATE OF WASHINGTON - Article I, Sections 1,2,3,4,5,7,11
- 3) Are unconstitutional according to the US Constitution, Amendments I, IV, IX, XIV  
Anyone found to be willfully disregarding these are guilty of treason.
- 4) Violate Title VII of the Civil Rights Act of 1964
- 5) Violate The Nuremberg Code (1949)
- 6) Have NO valid peer-reviewed scientific research supporting the use of either mRNA injections or "vaccinations" for COVID-19
- 7) have been shown via peer-reviewed research to cause life-threatening side effects MUCH MORE DANGEROUS than any COVID-19 infection
- 8) Statistics/research has demonstrated that the "vaccinated" are much more likely to get re- infected and transmit these infections to others than those who are "unvaccinated"
- 9) Many other reasons too numerous to list here.

The only reason for enacting illegal mandates such as these is to force governmental totalitarian control over the citizens of this state and country in order to subjugate these citizens under fascist policies by using fearmongering under the guise of a virus that has been statistically demonstrated via unbiased research to be no more dangerous than any other flu virus.

Since Washington State is determined to pass these illegal mandates regardless of any valid feedback and/or research, it is obvious that this state's goal is to permanently discard any constitutional rights. All repressive regimes have started with the lie that "this is in the best interest of all of the people".

Regards - Dr. Mike Hughes

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Cost/Benefit: Children are at extremely low risk for Covid, but the shots put them at risk. The benefits of the shot DO NOT outweigh any potential risks.
2. The shots are NOT FDA APPROVED, and are still only EUA.
3. There are no studies documenting the safe use of these shots, but there are studies documenting that the shots DO NOT STOP THE SPREAD of the virus.

Our children are our next generation, and too precious to our continued existence to be subjects of medical experimentation!

To Whom It May Concern:

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- The risk for children is incredibly low, with mortality rate for children is  $\frac{209}{2.3 \text{ million}} = .000091$  --> .009% mortality - less than one in 10,000. This is not even children in general, only children who have tested positive. This data comes directly from the Journal of American Medicine Association (JAMA).

- The vaccines are using brand new MRNA technology, which should require more testing, not less, before using on children. The long-term effects are unknown.

Thank you for requesting input into your decision.

Sincerely,

Nathaniel Freedman

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

I was born and raised in this beautiful country we call the United States of America. The land of the free, home of the brave. The country that was founded upon the firm belief that all men are created equal. Where we have personal freedoms and God-given, Constitutional rights. The vaccine mandates violate these personal freedoms and constitutional rights of all citizens of this country.

There is no concrete evidence that the vaccines are preventing the spread of Covid, but instead the studies are showing that vaccinated and unvaccinated people can spread the disease just the same. There are no long term studies to prove any guarantees in vaccine safety nor effectiveness, and children are still the lowest risk of contracting the disease. These vaccines are devastatingly unconstitutional and anyone that disagrees with the constitution is free to leave our country. Thank you for your time.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

-Long term safety studies have not been completed

-there is no evidence provided that efforts have been made to earnestly track, acknowledge, or validate adverse events in any population, and therefore informed consent requirements are unfulfilled.

-these products are still under emergency use authorization. Slapping an approval label on it does not change the fact that measures, implemented to promote safety, have been skipped.

-these policies encourage discrimination and division in our schools that we have been trying to work on for decades. I am already seeing this in our youth who are suffering from mental health issues related to the stress of being in schools in the current environment. In addition, I recently learned of school staff treating students differently based on their position on these issues AND posting about it on social media. It is causing schools to be an unsafe place mentally, physically, and emotionally. Students have been through enough. And so have their parents.

-children are at very low risk for having severe complications related to COVID. This vaccine is unnecessary for them, and there is no reason for them to incur the risks for the small possible benefit.

-Vaccinated persons can also catch and spread COVID. Evidence from my personal experience shows an equal, if not higher, rate of spread from vaccinated individuals. I realize that isn't a peer reviewed study, but neither has one been provided to the public (that I am aware of).

-COVID is a high mutable disease which means no amount of vaccination will eradicate it. Why do more harm to the children then COVID has already done?

The vaccine should be available for those who want it. It has given some people more peace of mind. However, it should not be forced on those who don't want to get it. There are many good reasons to abstain from doing so. Informed consent and choice are incredibly important pieces of medical treatment that improve health outcomes. Absence of informed consent and choice can lead to poor health outcomes.

Thank you for your thoughtful consideration of all feedback in your discussion.

Jess C

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There is not enough research and children are low risk for catastrophic side effects.

I am a parent and a public school teacher...

As the Technical Advisory Group stated during their meeting on December 29th, in order to amend Chapter 246-105 WAC "the vaccine (Covid vaccine) containing this antigen must PREVENT disease(s) that have significant morbidity and/or mortality". The surging number of cases according to Washington state's data clearly shows that Covid is NOT PREVENTABLE. Regardless of vaccination status, and/or masking.

Requiring the vaccine for children to attend school is clearly outside the authority of this WAC. This only serves to put a further strain on the education system, and to continue DIVIDING families and students. Bottom line, this is NOT your decision. This is between parents, caregivers, and their children.

Hello, here are my comments

Re: WAC 246-100-070 (1)

Your removed state board of health and want to replace with the board. What board is this? This should be left as SBOH

WAC-246-100-040 new section

Emergency detentions must go through the court system. It cannot be left up to one person to make the determination. There must be documentation of risk and assessment that must be reviewed with the affected party. If there is disagreement then the affected party must be supplied an attorney and the situation must go before a local judge before any action can be taken.

We must return to due process under law for safe guarding individual rights. A so assessed "emergency" can no longer take away our rights under the constitution. Business owners lost their due process nor were they compensated when they were forced to close. We must return and maintain due process.

Re: adding the covid immunization to childhood/school immunizations requirements. How could you add the requirement of an immunization that does not prevent the person from getting the disease or prevent that person transmitting the disease to someone else, non-sterilizing immunization?

Why require this immunization when the risk of children dying from this disease is near zero yet the risks are unknown, immediate and long term, from this new vaccine technology? If it provided absolute protection, I could see it. But it doesn't. I am not for requiring this for children.

Thank you,  
JoAnn Kauffman  
Pierce Co.

To the Board Members of the Washington State Board of Health,  
Regarding the upcoming meeting, Wednesday, January 12th, 2022:

Regarding the multiple proposed policies (WAC 246-100-070; WAC 246-100-045; WAC 246-100-040; WAC 246-105) Summarized to include:  
Use of law enforcement in the force of emergency order/s to involuntarily detain a person or group of persons to be isolated in any quarantine facility/s following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

Inclusion of the Covid-19 vaccine/s into the list of required immunizations for school attendance/enrollment etc.

I am firmly against (CON) both of these proposals. Both infringe on the natural freedoms inherent to human beings and both infringe on the recognized rights as defined in the constitution of the United States. Both proposed policies inhibit the self governance that is protected and expected by US Citizens, and replace the self governance with that of the State. The long term medical affects of the vaccines have yet to be studied in any age-group of individuals. The severity of any strain of Covid-19 is more often than not, minimal in children. The potential risk to future generations cannot even be comprehended accurately at this time. I implore you to no longer pursue these measures.

Thank You,  
Martha Sutton

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Covid vaccines have not been tested for long term side effects. Most vaccines require minimum of 13-15 years of testing before they are released to public. This did not happen.
- \* Children have 99%+ survival rate of C-19, but we do not know the safety of the vaccines. They could cause significantly more damage to children than good.
- \* IF the children have side effects from the C-19 vaccine, the schools, government, and pharmaceutical companies have total impunity. You cannot force children to take an experimental vaccine, but yet put all the risk associated with that on the children and the parents. This is very wrong.
- \* C-19 vaccines were generated using aborted fetal cells, this is a direct conflict of religion to many students.
- \* MRNA vaccine technology is new, has not been used in humans before, why would we make its first use in children without testing it? Seems highly dangerous

Thank you,

Nick Korum

Hello!

I wanted to provide comments on the consideration of requiring COVID vaccine for schools as part of the required immunization schedule for Washington State. I do not support requiring these vaccines for the reasons below. I do support Informed Choice Washingtons petition, item #11 on the agenda, as they have submitted. My reasons to not require Covid vaccines for school aged children to attend school:

\* The current available vaccines do not yet have a track record of testing and long term safety as the other required vaccines do. Many of the required vaccines had years if not decades of data to support their safety before they were put on the required list. COVID 19 vaccines do not yet have this long term data.

\* The most recent variant, Omicron, is not avoided by having the vaccine, and those who are vaccinated can transmit it. This suggests the vaccine does not stop the virus and thus any benefit is to the individual not the community and thus this should remain a private health matter

\* Staff, faculty, and other adult members of the educational community have had access to the vaccines for a long time due to their essential worker designation. If they choose to get vaccinated to protect themselves and minimize the effect of COVID on them, they have been able to make this decision for almost a year and are thus protected.

\* Finally, the RISK to children is nearly non-existent. All of the data shows that thus far children are the most resilient to this virus, and generally do very well, leading the response across all age groups. In the past 3 weeks my 4 children all had confirmed cases of COVID- and were better in 2-5 days with very mild cold symptoms. The age groups that are at higher risk have the option, and have for some time, to get vaccinated.

There is still much to learn about COVID, the vaccines, and the best way to handle this situation. Recent events have brought into question the vaccines and much of what has been done thus far. Making codified decisions based on moving data for a low-risk demographic isn't the best advised approach.

Please do not make the COVID vaccine a requirement to attend school in Washington State.

John O'Gara  
Duvall, WA

Dear BOH,

I am writing this comment for the January 12, 2022 meeting.

Ref item #8: I strongly oppose forming a tech advisory group. This is taking steps to consider adding the covid shot to the vaccine schedule for school age kids. This is still under EUA and at this point the risks far outweigh the benefits.

Ref item #11: I absolutely support this item. It is a petition filed by Informed Choice WA.

Please take the time to review this link:

I am completely against any of the proposed covid policies being voted on next week!  
They are overreaching and immoral!!

This does NOT represent American values of liberty!! I cannot believe how this country and particularly our state under Governor Inslee have devolved to overt communist tactics of censorship and control. It's truly breathtaking and sickening.

Have you forgotten that as government employees, you are employed BY THE PUBLIC???  
You answer to us.

Instead, it seems public servants think it's their job to control information, push propaganda, and shut down dissenting voices in order to maintain control and achieve their greater goals of professional and personal advancement.

I, for one, do not need the government to manage my it my children's health for me.  
There are some who may seem to need help managing their health... EVEN SO, THAT IS NOT THE JOB OF THE GOVERNMENT.

Have you forgotten that:

- 1) Children are at very low risk for complications even if they do contract COVID
- 2) The vaccines are still only emergency use authorized!!
- 3) There are no long term safety studies documenting a history of COVID vaccine safety.
- 4) There ARE studies showing that the vaccinated and unvaccinated can both spread the virus, therefore
- 5) The vaccine does not prevent the spread of the virus.

So tell me, WHY are you pushing the vaccine so hard??

Why is natural immunity not included in this conversation??

Why have effective therapeutics been banned?? [https://m.theepochtimes.com/dr-mccollough-says-outpatient-treatments-for-covid-19-have-been-suppressed\\_4189353.html](https://m.theepochtimes.com/dr-mccollough-says-outpatient-treatments-for-covid-19-have-been-suppressed_4189353.html)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Fdr-mccollough-says-outpatient-treatments-for-covid-19-have-been-suppressed\\_4189353.html&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2f873f06983e4a04c98408d9d](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Fdr-mccollough-says-outpatient-treatments-for-covid-19-have-been-suppressed_4189353.html&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2f873f06983e4a04c98408d9d)>

Where in this conversation is the emerging life insurance field information about premature NON-COVID deaths being up 40% in 2020? How do you explain this?  
[https://m.theepochtimes.com/prime-age-mortality-up-40-percent-majority-not-covid-19\\_4196936.html](https://m.theepochtimes.com/prime-age-mortality-up-40-percent-majority-not-covid-19_4196936.html)

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Fprime-age-mortality-up-40-percent-majority-not-covid-19\\_4196936.html&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2f873f06983e4a04c98408d9d211e05e](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fm.theepochtimes.com%2Fprime-age-mortality-up-40-percent-majority-not-covid-19_4196936.html&data=04%7C01%7CWSboh%40sboh.wa.gov%7C2f873f06983e4a04c98408d9d211e05e)>

What about the government's OWN early safety net of VAERS?? HOW can you ignore the statistically significant data piling up there regarding COVID vaccine injury??

I am a healthy, pregnant, 35 year old mom who would rather die of COVID at home than go to a hospital to die alone on a ventilator (proven to be not effective in COVID patients, looking at you, Cuomo!) and denied effective therapeutics with no family allowed in the room, managed by prematurely graduated resident nurses "following COVID protocol". But wait, I have already had COVID once, possibly twice and I came through it just fine with a healthy view of the body and it's God-designed immune system. WITHOUT any use of aforementioned therapeutics!! So explain to me why I would need a vaccine that is supposedly designed to do what my body has already done for me??

Just to be perfectly clear, I stand against WA 246-100-070, WA 246-100-045, WA 246-100-040, WA 246-100-030

I am writing this comment as a very concerned mother, who will/may be sending my daughter to kindergarten in the fall. I strongly disagree with the addition of the covid-19 vaccination as a requirement for children to attend school. It has been shown time and time again that children are not at risk of severe symptoms related to the covid-19 virus. In fact, both of my young children have had covid with no symptoms other than congestion. There are no long term studies on the risks related to the covid 19 vaccination however, and we already know there are risks in the short term, such as myocarditis, clotting as well as reproductive changes. I and many others will pull our children from the public school system if this becomes a requirement. My children's health is my number one priority and I will not compromise their safety to give the adults working in the public school system a false sense of security, considering that the vaccine does not prevent one from getting or spreading covid. It is irresponsible to not consider the adverse reactions this vaccine may have on a young child's body and it is not the place of the public school system to make any medical decisions for children in our communities.

I also am strongly against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

Thank you,  
Jordan Swanson

To whom this may concern,  
I am 22 years old and vaccinated and consider myself left leaning on the political scale. There are rumors going around that the Washington SBOH wants to impose a law that will take unvaccinated people in this state and send them to a detainment camp or lock them down involuntarily. If this is true, it is absolutely absurd. Again, I am vaccinated and a liberal and even I think this is insane. People will leave this state or lay down their lives before they're involuntarily taken away or locked down for not being vaccinated. I love this state but I do not want to see it turn into the way Australia is dealing with Covid.  
Thank you.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. This data suggests that children are not significant drivers of the pandemic  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpublications.aap.org%2Fpediatrics-19-Transmission-and-Children-The-Child-Is&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1efbc6b23b3c4776d96308d9d23840b6%7C11d0e2172>>
2. There is NO long term data that shows these vaccinations are actually safe.
3. If a child gets covid-19, there is almost no chance that they will have a serious case of it, unless they have a serious pre existing condition such as cancer.
4. There is evidence that the covid-19 vaccines actually suppress the immune system long term, causing and increase in all cause mortality rates among the vaccinated.

Please support our children's right to be healthy and happy. Do not mandate covid-19 shots for kids.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. In Germany, only one child has died of Covid19. Children do not respond to the VIRUS like adults, and the elderly. Children have very little reaction to Covid 19.
2. Dr. Robert Malone, the world-renowned virologist who invented the mRNA technology behind both the Pfizer and Moderna vaccines says that children should not receive the vaccine.
3. Bottom line has always been: the common cold is a virus. Coronavirus 19 is a virus. You cannot vaccinate against a virus. Every medical person I have talked to says the same thing.

What is your agenda?

Respectfully submitted,  
Julie Howe

Hi,

I am writing to provide a comment for the Jan 12th meeting discussing applying current infectious disease WAC codes to include Covid for all WA state residents. I and my family stand fully against these proposals, which are over-reaching and deeply immoral. Individuals should have full medical autonomy and decision making responsibility for their medical examinations, testing, treatment, counseling, and vaccination. These are areas of responsibility that should never fall under the government's jurisdiction. It is grievous and wrong to consider including Covid-19 injections in school immunization requirements as science has shown Covid to not be a serious threat against children. Requiring such would be a violation of parental rights.

We stand against these proposed WAC's:

WAC 246-100

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-105

Thank you, Jennifer Wolslegel

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The vaccine does not work. People have gotten both shots and the booster and still get the covid. They say that the vaccinated don't get as sick but the only way to prove that statement to be true is if we all had clones, one without and one with the vaccine

Dear Washington State Government:  
I am highly opposed to making COVID-19 vaccinations mandatory for school admission or childcare in our State for the following reasons:

\* Children have the right to build natural immunities to viruses that will continue to grow and morph throughout their lifetime (long after WE are gone).

\* If COVID vaccines become mandatory, parents will be forced to remove their kids from school and children will receive subpar homeschooling.

\* Long-term effects of subpar homeschooling will have compounding negative consequences on our State's economy.

\* School funding will be impacted by lower enrollment numbers, and the remaining [vaccinated] children will suffer the consequences of unmaintained facilities, technology, and services.

\* It's unfair to the children who will be denied a proper education and academic/school experience--more compounding negative consequences will most certainly result.

\* Children are at extremely low risk for COVID and the vaccines are still only EUA (emergency use authorized).

\* There are no long-term studies to document history, safety, or long-term health effects.

\* Current studies show that BOTH vaccinated and unvaccinated people can transmit COVID, therefore the vaccine apparently does not stop the spread of the disease.

Kind regards,

Jennifer Klein, Ed.D.  
(509) 714-3906 cell

Subject: comment regarding covid vaccine requirement for public schools

External Email

Nathaniel,

STOP! just stop what you are doing to our children.

I will pull my children from public school the minute that this or any further vaccines without full phase 3 testing is required. Do not subject them to "Test to Stay" either. Testing to prove they are healthy will have lasting psychological impacts. These children are not guilty of being unhealthy until proven innocent by a test...they are already innocent.

You have absolutely no standing to make these current vaccines a requirement.

This would be crossing a line you could never come back from. All public trust in you as an entity would be lost forever.

Using children to "save elderly" is an absolute disgrace. Subjecting young bodies to yet unknown side effects is beyond reprehensible.

Trading parental choice for education is absolutely a nonstarter.

I hope you have common sense enough to see what a slippery slope you are standing above with this decision.

Stand up for our parental choice to know what is best for our individual children and do not deprive our children of education for an untested vaccine with a small efficacy. Which side are you on? Pharma or children's education?

There are too many unanswered questions to trade my child's health for their education.

Sincerely,

Kbr Patrick

Subject: Comment on Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry

External Email

Dear Washington State Board of Health members,

I am opposed to any rule mandating COVID-19 shots for school admission or childcare in our State.

Federal Emergency Use Authorization statutes prohibit school mandates of EUA products. All COVID-19 injections being given are EUA products. The only FDA approved version is not yet available in the United States. None of these injections have gone through multiple year clinical studies to determine long term risks.

Effective health practices do not include one-size-fits-all approaches. Most children are not at high risk for COVID-19 and those who already have innate immunity by recovering from COVID-19 should not be subject to greater risks from unnecessary vaccines.

One other thing: The vaccine fact sheet for the Pfizer-Biontech jab states "The vaccine that is authorized for use in children 5 through 11 years of age includes the same mRNA and lipids but different inactive ingredients compared to the vaccine that has been used under EUA in individuals 12 years of age and older and that has been studied in clinical trials." (Underlining added)

There are just too many unknowns to even consider adding these shots to school or any mandates.

Thank you.

Linda J Fels

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at a low risk for Covid complications, a risk we know. We DO NOT have enough data on the long term risk of this vaccine. We cannot make a well thought out decision if we do not have the facts of safety and side effects.

This vaccine is not FDA approved. Only EUA approved.

We also have proof from studies that the vaccine does not stop transmission of Covid.

As parents we hold our children's future in our hands. We do everything for our children, including making the best decision we can as parents. Do not take this decision away from parents when you do not even have facts to support the long term effectiveness and safety of this vaccine.

Please allow more time to confirm that the vaccine is a safe option for our children's health!

Thank you,

Joel Jerde

- I oppose Agenda Item #8, the Board's formation of a Technical Advisor Group to review information about covid-19 shots to recommend mandating them for schools. In addition, I oppose covid-19 shot mandates, PERIOD.

- I support Agenda Item #11, Informed Choice WA Petition for Rulemaking (filed by Xavier Figueroa, PhD on behalf of ICWA) to establish a new rule that prohibits the BOH from adding any Emergency Use Authorized product, or any licensed product that lacks completed Phase III clinical trial studies, to the school required list.

Dear Sir:

I am COMPLETELY AGAINST mandating Covid gene therapy that we call "vaccines" for anyone, PARTICULARLY CHILDREN.

I already commented in your online form. However, today I encountered two articles that are particularly pertinent to this case.

I will attach copies of them to this email. They are important and I think they are informative. Please read them. Both have sources listed.

Thank you.

Sincerely,

Cynthia Choo

# Children Are Dying From COVID, Lockdowns and Overdoses

Analysis by [Dr. Joseph Mercola](#)

✓ Fact Checked

## STORY AT-A-GLANCE

- › Children have, by far, the lowest risk for serious COVID-19 infection; COVID policies have therefore had an outsized impact on children and teens
- › Suicide attempts among girls rose 51% in 2021
- › Between 2019 and 2020, adolescent overdose mortality rose from 2.35 per 100,000 to 4.58 per 100,000, a 94.3% increase
- › Fentanyl fatalities among teens nearly tripled between 2019 to 2020, and represented 76.6% of adolescent overdose deaths in 2021
- › Children’s health is also being decimated by COVID job mandates. A declaration signed by 16,000 doctors and scientists calls for the elimination of all COVID job mandates for children

As noted by CBS reporter Jan Crawford during a Face the Nation roundtable discussion<sup>1</sup> December 26, 2021, children have – by far – the lowest risk for serious COVID-19 infection and, in her view, COVID policies have therefore had an outsized impact on children and teens.

*“Even teenagers, you know, a healthy teenager, has a one in a million chance of getting and dying from COVID, which is way lower than ... dying in a car wreck on a road trip. But they have suffered and sacrificed the most,”* Crawford said.

*“And now we have the Surgeon General saying there's a mental health crisis among our kids. The risk of suicide attempts among girls [is] now up 51% this year, [and] Black kids [are] nearly twice as likely as white kids to die by suicide.*

*School closures, lockdowns, cancellation of sports. You couldn't even go on a playground in the D.C. area without cops ... shooin the kids off. [It has had a] tremendous negative impact on kids, and it's been an afterthought.*

*You know, it's hurt their dreams, their future learning ... risk of abuse, their mental health ... [If] our policies don't reflect a more measured and reasonable approach for our children, they will be paying for our generation's decisions [for] the rest of their lives. And that, to me, is the greatest underreported story of the past year.”*

## **Many Students Report Feeling Out of Control**

In related news, The New York Times on Christmas Eve published an article<sup>2</sup> by Erica Green, reviewing the impact extended school shutdowns have had on students.

“Teenagers arguably bore the social and emotional brunt of school disruptions,” she writes, noting that across the U.S., high school-aged teens have over the past two years reported “some of the most alarming mental health declines, evidenced by depression and suicide attempts.”

According to Green, “large numbers” of high school students have missed “most or all of the 2020-2021 academic year,” and as a result, failed classes that are “critical to their futures.”

Harrison Bailey, Ph.D., principal of Liberty High School in Bethlehem, Pennsylvania, described the general sentiment among students as “resignation and indignation,” with “blunt and flagrant disrespect” being “rampant.”

Bailey has had to intervene in an unusually large number of fist fights and hall brawls as students resumed classes in person. The school's wellness center has also been

“overwhelmed” with students reporting anxiety and depression. Green writes:

*“By December, referrals for the school’s Student Assistance Program – in which teams of counselors and administrators coordinate resources for troubled students – had reached 300, compared with a total of 500 for the entire 2019-20 school year.*

*At a recent meeting, where administrators sifted through their caseloads of ‘sapped’ students, they described them in blunt terms: ‘feral,’ ‘a mess’ and ‘work in progress.’ ‘I think kids are just feeling like ... the world’s out of control,’ Dr. Bailey said. ‘So, they’re like, ‘The world’s out of control, why should I be in control?’”*

## **The Other Side of Rage and Despair: Apathy**

Aside from violence, Bailey is seeing another, in many respects even more concerning trend: apathy. Many are coming to school wearing their pajamas. Overall, virtual learning has proven to be nothing short of a disaster. A total failure. What the experiment has taught us is that school is not just a place where you learn a bunch of information. It’s a place where you learn socialization skills.

**“ The No. 1 complaint has been anxiety: ‘Anxiety about being in the classroom, being in front of people, speaking to people, anyone looking at them.’ ~ Nancy Ettwein ”**

Many are now years behind in this regard, as COVID restrictions and masks have prevented interpersonal engagement and dialogue. “People don’t know how to communicate anymore,” 18-year-old Jazlyn Korpics told Green. “Everybody’s a robot now – their minds are warped.”

Nancy Ettwein, who ran the school's wellness center until November 2021, told Green the No. 1 complaint has been anxiety: "Anxiety about being in the classroom, being in front of people, speaking to people, anyone looking at them." Many of the student referrals for mental health say the student is just "sitting and crying in the bathroom."

This abnormal response to normal social encounters is undoubtedly the result of extended isolation and lack of face-to-face interactions with other humans. Sixteen-year-old Kaisyn Carswell described pandemic life as "emptiness, but the emptiness is really heavy." Another student reported spending the entire year of 2020 playing video games all day long.

## **Many Faculty Are at Wits End**

School faculty are also struggling. Green reports:<sup>3</sup>

*"Survey results<sup>4</sup> released this month by the National Association of Secondary School Principals raised alarms that the pipeline of principals might be another casualty of the pandemic, as their roles grow more amorphous and untenable.*

*In responses to the survey, which included a nationally representative sample of leaders, only 35 percent said they 'strongly agree' with being generally satisfied in their jobs, down from 63 percent in 2019.*

*Ranking among the highest on their list of challenges during the pandemic was providing mental health support to students and providing guidance and mental health support to staff. Sixty-eight percent were worried about teacher shortages and teacher burnout.*

*Only 23 percent 'strongly agree' that the size of their administrative team is adequate to support staff and students, and only 21 percent 'strongly agree' that there are adequate student services personnel like nurses and counselors."*

## **Drug Overdoses Surge Among High Schoolers**

With despair and lack of purpose and direction comes increased drug use, with recent statistics showing a shocking spike in fentanyl overdose deaths among high school-aged adolescents in the U.S. during 2020 and 2021.

The following graph, from a December 24, 2021, preprint article<sup>5</sup> posted on medRxiv and tweeted<sup>6</sup> out by Dr. John B., a scientist, illustrates the situation better than words.

**Sharp Increases in Drug Overdose Deaths Among High-School-Age Adolescents During the US COVID-19 Epidemic and Illicit Fentanyl Crisis**

Joseph Friedman, Morgan Godvin, Chelsea Shover, Joseph P. Gone, Helens Hansen, David Schriger  
doi: <https://doi.org/10.1101/2021.12.23.21268284>

According to the authors:<sup>7</sup>

*“Adolescent overdose mortality saw a sharp increase between 2019 and 2020, from 2.35 per 100,000 to 4.58 per 100,000, representing a 94.3% increase, the largest percent increase of any 5-year age group.*

*American Indian or Alaska Native (AIAN) adolescents, Latinx adolescents, and adolescents in the West census region were disproportionately affected, overdose death rates 2.15, 1.31, and 1.68 times the national average in 2021, respectively.*

*Trends were driven by fatalities involving IMFs [illicitly-manufactured-fentanyl], which nearly tripled from 2019 to 2020, and represented 76.6% of adolescent overdose deaths in 2021 ...*

*Our results should also be understood in the context of rising rates of adolescent mental illness during the COVID-19 pandemic. These findings highlight the urgent need for accurate, harm-reduction-oriented education for early adolescents about the risks of an evolving drug supply, as well as greater access to naloxone and services that check drugs for the presence of IMFs.”*

## **COVID Jab Taking a Toll Among Young Boys**

Teens are also being assaulted by health problems brought on by the COVID jabs, which may over time make the mental health decline even worse than it currently is, especially among boys. According to a report by Steve Kirsch, who's been following and investigating COVID shot side effects, one private school in California is seeing a dramatic rise in myocarditis among boys — a condition that can have lifelong consequences, severely reducing one's quality of life. He writes:<sup>8</sup>

*“For a long time, I've been on the record as saying that the rate of myocarditis is around 1 in 317 for teenage boys. That was a conservative estimate since it used a VAERS under-reporting factor of 41, which is reserved for only the most serious events ... a more 'realistic' estimate is 1 in 150.*

*Today I heard from a parent of a child who attends Monte Vista Christian school that three children were diagnosed with myocarditis after they got the vaccine. The school has 855 kids ... Let's do a little math.*

*The ratio of male to female rates of myocarditis is roughly 10:1, so it's a good bet these were all boys. Roughly half the school are boys. There has never been a vaccine mandate at the school. So I'd estimate conservatively that 2/3 of the kids could have been vaccinated by then. So,  $855/2 \times 2/3 = 285$  vaccinated boys.*

*So the rate of myocarditis at the school by my estimate is 3/285 which is 1 in 95 boys. This makes sense to me overall; it is not far from my 1 in 150 estimate. One in 95 boys with myocarditis (which is never 'mild') should cause an immediate halt to the vaccines and an examination of how the CDC could possibly miss a safety signal this large."*

The U.S. Centers for Disease Control and Prevention is also monitoring eight cases of myocarditis in 5- to 11-year-olds who got the Pfizer COVID jab.<sup>9</sup> Adding insult to injury, it's now clear the shots are not providing the protection promised.

According to Cornell University, of the 903 cases of Omicron infection reported during the week of December 7 through 13, 2021, which shut down the Ithaca, New York campus, almost all were in fully jabbed students.<sup>10</sup> Some had received three shots.

## **Sacrifice the Young to 'Protect' the Old?**

As noted by Robert F. Kennedy Jr., never before has a society demanded that children take risks that might sacrifice their health in order to protect the old.<sup>11</sup> It's immoral and irrational.

Writing in *The Defender*,<sup>12</sup> Dr. Robert Malone highlighted the second Physicians Declaration<sup>13</sup> by the International Alliance of Physicians and Medical Scientists, dated October 29, 2021, which has been signed by more than 16,000 doctors and scientists, stating that "healthy children shall not be subjected to forced vaccination" as their clinical risk from SARS-CoV-2 infection is negligible and long term safety of the shots cannot be determined prior to such policies being enacted.

Not only are children at high risk for severe adverse events, but having healthy, unvaccinated children in the population is crucial to achieving herd immunity. The declaration also demands that health agencies and institutions "cease interfering with physicians treating individual patients."

## **Three Things Parents Must Know**

Malone writes:<sup>14</sup>

*“Before you inject your child – a decision that is irreversible – I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created.*

*There are three issues parents need to understand: The first is that a viral gene will be injected into your children’s cells. This gene forces your child’s body to make toxic spike proteins. These proteins often cause permanent damage in children’s critical organs, including:*

- *Their brain and nervous system.*
- *Their heart and blood vessels, including blood clots.*
- *Their reproductive system.*
- *This vaccine can trigger fundamental changes to their immune system.*

*The most alarming point about this is that once these damages have occurred, they are irreparable:*

- *You can’t fix the lesions within their brain.*
- *You can’t repair heart tissue scarring.*
- *You can’t repair a genetically reset immune system.*
- *This vaccine can cause reproductive damage that could affect future generations of your family.*

*The second thing you need to know about is the fact that this novel technology has not been adequately tested. We need at least 5 years of testing/research before we can really understand the risks. Harms and risks from new medicines often become revealed many years later.*

*Ask yourself if you want your own child to be part of the most radical medical experiment in human history. One final point: the reason they’re giving you to vaccinate your child is a lie.*

*Your children represent no danger to their parents or grandparents. It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease.*

*In summary: There is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives. The risk/benefit analysis isn't even close. As a parent and grandparent, my recommendation to you is to resist and fight to protect your children."*

Without doubt, we have loads of work ahead of us. In all likelihood, it will take years to undo the harm these past two years have inflicted on our children, both physically and psychologically. But as a first step, we must resolve to protect children from lifelong health problems caused by these experimental jabs.

If we allow tens of thousands of children, perhaps even millions, to be permanently injured, resulting in lifelong disabilities and ill health, the psychological devastation will be unimaginable.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

Children are at very low risk for severe effects of covid.

It is mutating quickly and will be endemic soon, therefore possibly of vaccines remaining effective is lessened.

There have been no long term studies on long term effects of vaccines.

People should have a choice. Mandates cause division and conflict, spurred on by irresponsible media, which is the true virus.

Subject: Comment on The Proposed Policies for Jan 12th Meeting

External Email

Dear State Board Of Health committee,  
I am Hien Ton. I am a resident of King County.

\*\*I am writing today to voice my opinion regarding the proposed Covid19 vaccine mandate for K-12 students under WAC 246-105.  
Per my research and understanding, I am against the proposal to make this vaccine a requirement in order for students to attend public schools.

According to CDC, the survival rate of the age group 0-19 years old is 99.997%. This shows a very high chance of recovery should a child ever be infected. In addition, the current mask mandate and hand hygiene should have already reduced the chance of contracting a virus among the kids who have a strong and robust immune system.

Moreover, the current Covid vaccines are still under Emergency Use Authorization (EUA). According to the fact sheet of Pfizer Covid vaccine for 12 years of age and older, it is stated that:

- a. Both Comirnaty and Pfizer-BioNTech vaccines are authorized under EUA only (page 1-2).
  - b. It also states "The vaccine may not protect everyone" (page 3) and,
  - c. "The duration of protection against COVID-19 is currently unknown" (page 4),
  - d. "Serious and unexpected side effects may occur. The possible side effects of the vaccine are still being studied in clinical trials" (page 5),
  - e. "Under the EUA, it is your choice to receive or not receive the vaccine. Should you decide not to receive it, it will not change your standard medical care." (page 6)
- Having presented that fact from the FDA fact sheet, I do not agree that SBOH make this particular vaccine a requirement for K-12 students to attend public schools. When it comes to any drug which is still in clinical trials and is only granted EUA status, I do not think it should be required for ALL students to receive as there is no long-term data and any possible side effects are still unknown up to date. The decision should be made by the student's parents only.

For reference, please see the link for the Fact Sheet

<https://www.fda.gov/media/153716/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F153716/download>>

Our country needs a healthy and strong generation in the future.

\*\*In addition, I am strongly against the proposed policies using WAC 246-100 (including 246-100-040, WAC 246-100-045, WAC 246-100-070) to enforce procedures for isolation or quarantines following refusal to voluntarily comply with requests for any medical examination, testing, treatment, counseling and vaccination. These proposed policies, in my opinion, seriously violate a citizen's personal freedom to choose what kind of treatment they want to receive. Nobody should be detained or punished for their choices to uphold their bodily autonomy.

Thank you for reading my comment.

Sincerely,  
Hien Ton

Leave our children out of this!!! Children under 12 have a very, very small rate of effects from COVID-19. Even vaccinated individuals can spread the virus so why would this vaccine mandate be necessary for our children? I thought the goal was to protect the elderly and immunocompromised? If that was the intention as has been repeatedly stated, I believe you should focus on that instead of school vaccine mandates for a virus that has a 98% survival rate - much higher for children. The "vaccine" is still in experimental stages and I adamantly oppose mandating it for our children. We will lose all trust in you for not following your own "science" and pushing this on our kids. I have been following the numbers and trends and I suggest you take an honest look at them and leave our children alone.

I am opposed to making COVID-19 shots mandatory for school admission in our State as the intent of public education is to provide access for children to better themselves through educational learning. Making vaccine a requirement will hinder access for many children due to health reasons, family values and beliefs. I would implore the state to think hard on this matter before making this a requirement for our children. My husband and I are both vaccinated but disagree with such a mandate. We work in high demand careers and have decided as a family we will leave the state should such a mandate be imposed.

To whom it may concern;

I am writing to let you know that I completely OPPOSE agenda item #8. In fact, I oppose the Covid-19 shot mandate COMPLETELY. If a covid -19 shot is mandated for my child to attend public school, I will remove my child from public school.

I am in support of agenda item #11. I feel that there should be informed consent, and anything that is mandatory should have to be through the 3rd phase of testing before it can be mandated.

I appreciate your time and consideration in this matter.

Respectfully,  
Jennifer Cartmell

Subject: Comment for January 12th Meeting

External Email

I am strongly AGAINST forcing covid-19 injections on to children as a part of their immunization requirements. As we know, children are at extremely low risk for covid. There are no long-term studies to document any history of safety. However, studies have now documented that both vaccinated and unvaccinated can both transmit covid so the vaccine obviously does not stop the spread of the disease. There are also tens of thousands of documented adverse reactions and unexplained early injuries and death in the VAERS database. In addition, the vaccines are still in EUA. They are not approved for mandatory use in anyone by the FDA, including our children. There is no logical reason to force it on our children.

I'm looking forward to watching this WSBOH session.

Thank you,

Jessica Davidson

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

To whom it may concern,

My name is Linda E. Johnson, born and raised in pierce county, a living woman.

I HIGH OBJECT to you wanting to change the WAC codes about COVID, as well as any other infectious disease. This is a direct attack on my rights, as well as every legal American living in Washington State.

This is also a direct attack on my constitutional UNaLineable rights granting me, and, ALL LEGAL AMERICANS, the freedom to make our own lifestyle choices. I'm HIGHLY against: WAC 246-100, WAC 246-040, WAC 246-100-044, WAC 246-100-070, and WAC 246-105.

Sincerely, Linda Johnson

Children are at extremely low risk for Covid

The vaccines are still only EUA

There are no long-term studies to document any history of safety

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, The vaccine apparently does not stop the spread of the disease.

I personally have had Covid 2 times and have been fully vaccinated. I got Covid once before and once after being vaccinated. Since my own testimonial shows that the vaccine is NOT preventative, it should be a person's choice.

Lastly, I believe in free choice. And America stands for FREEDOM.

Kindly,

No child or children should be vaccinated. Reason: C19 is not a threat to children.  
Children should be protected by parents. Not Government!  
Children who have compromised conditions should only be treated by family.  
A Government mandate on this should be challenged at all levels, including legal.

External Email

Greetings BOH ~

As a parent to young school-age children who have already very easily recovered from COVID, I am deeply opposed to the idea of the board forming a Technical Advisory Group (TAG) to review information about the COVID-19 shots. These should not be considered for mandate as they are experimental and the benefit received is not primarily for the children themselves. The risks are very high especially if you consider a lifetime of boosting starting vaccination so young. It is frankly terrifying to think that a BOH would even consider requiring these for schooling. Public trust in the BOH as an institution is already at an all time low. Public trust in these vaccinations is also waning as they are shown to not have efficacy against emerging variants like Omicron. Requiring experimental childhood vaccinations will do more harm than good to public health at this time as it will destroy what little faith in public health officials is left. It's a sad day when our public institutions designed to protect public health have instead become a danger to our families and children.

Also, I support Informed Choice Washington's Petition for Rulemaking (Item 11 on the agenda). This petition, prohibiting the DOH from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list is sensible, sane, and protective of children's health.

I am far more afraid of discriminatory policies that promote pharmaceutical profits than I am of COVID, and I say that as someone who contracted COVID from a vaccinated friend. COVID vaccines don't stop COVID, and children are not at high risk for hospitalization and death.

Stick with science and ethics please: EUA products require full consent. It is unethical to require anyone to take a risk on behalf of someone else.

Subject: Comment on proposal to add covid to 246-100

External Email

Hi,

It's my understanding that on 12 January WSBOH will hold a virtual meeting, and among the topics discussed will be adding Covid-19 to the list of communicable diseases in chapter 246-100 WAC. Presumably this change would allow emergency detention orders, detailed in 246-100-45 through 246-100-070, to potentially be applied to Covid-19 cases.

I oppose this change on the basis that it will not meaningfully add to the relevant authorities' ability to improve public health outcomes. Involuntary detention should be reserved for communicable diseases that are relatively infrequent in the population and containment or extirpation is achievable. Currently Covid-19 is endemic worldwide, widely circulating in the population of Washington, and this is unlikely to change in the near future. We have more effective methods to manage the prevalence and severity of it. This rule change may have made sense early in the pandemic when containment was achievable, but is inappropriate today.

Further, if this change is enacted, it is likely to seriously erode public trust in WSBOH, which would negatively impact other important public health efforts.

Thank you,  
Joshua Hoesly

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk with covid. The regular flu is a higher risk for children, and we've never required flu vaccines in the past. The vaccines that are being given in our state for covid-19 are still under emergency use authorization and are not well researched in children under 18. The vaccine doesn't appear to be preventing infection especially with the omicron variant. Many children, especially boys have had life threatening side effects from the vaccine, mostly from myocarditis and pericarditis. We cannot mandate a non-authorized vaccine that has a higher risk of death and long term disability than covid causes on its own. (You can see healthcare workers testifying these arguments: Louisiana Health and Welfare Committee Meeting December 6, 2021 <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.house.louisiana.gov%2FH\\_V](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.house.louisiana.gov%2FH_V) )

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- there is no long-term research on how these vaccinations will affect children
- children are at low risk for covid and the dangerous side-effects
- it should be a family's choice to choose to be vaccinated, not the government.

Detaining an individual or family based on vaccination status is tyranny and the start of a very dangerous path of losing our constitutional rights and freedoms. I speak as a vaccinated adult who understands the risks and detrimental loss Covid has caused. However, I will not force other individuals to vaccinate themselves and especially their children with minimal research of the long-term effects.

Thank you for your consideration.

Kathryn Steele

Subject: Comments for discussion on shots mandates sent in before noon 1/7/22

External Email

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies.

As a Washington state mother and stepmother of 5 sons and daughters and 13 grandsons and granddaughters who live in this State, I request that you abandon the plan of forming a technical advisory group to explore COVID19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to list of school requirements.

One definition of insanity is to repeat the same mistake over and over again and expect different results.

For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now it is apparent that the virus is "gonna virus" regardless of measures attempted.

Thankfully, SARS CoV2 is acting in similar manner as all other viral pandemics and becoming more "virulent" (spreads easier) but less deadly.

Real immunity is achieved with exposure and recovery as is evidenced by fact that those infected with SARS in 2002/3 CANNOT become infected with SARS CoV2 today!

In contrast, Covid19 has managed to find a way to escape the vaccine as is evidenced by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

As Health Board members, you are ethically obligated to provide us with facts that support any and all recommendations or requirements:

- 1) what is the current rate of mortality for COVID19 infection and stratified according to age groups?
- 2) Please point me to ANY measures that have reduced the numbers of FATALITIES (cases are not fatalities).
- 3) what is the rate of all-cause mortality in WA in 2020 and 2021?.....did the measures imposed reduce the number of deaths from prior year?
- 4) Please provide evidence of asymptomatic spread of SARS CoV2.
- 5) Please provide safety studies for masking children and randomized clinical trials for masks preventing spread of lab-confirmed upper respiratory viruses (not modeling of masks on mannequins).
- 6) Please make public the accuracy of testing - what is the rate of false positives and false negatives of tests and were results determined by manufacturers of the tests or unbiased 3rd party investigators?
- 7) Please provide evidence that the vaccines prevent infection and transmission and that

they improve health of individuals who receive them compared to those who do not.  
8) Please explain why so much focus on eliminating this 1 virus when human immune systems have successfully protected our growing population since the beginning of time? Are you aware that some viruses are beneficial for humans and can protect against various forms of cancers and heart issues? Did you know that your human virome contains over 380 TRILLION viruses?

I have confidence and do not doubt, that as members of WA State Health Board, you truly desire to improve the health of Washingtonians. However, I lack trust that you have carefully investigated and logically determined adequate and measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies.

Regarding mandating shots, please know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a vaccine that the C19 shots do not fulfill as they were never part of a living microorganism, nor do they prevent transmission or infection of disease.

"Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective

<https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally,  
DO NO HARM!

You cannot possibly know or care more about the health of Washington children than do the parents of Washington children! A friend's college son's roommate suffered myocarditis shortly after his Pfizer booster, and is now unable to resume an active lifestyle for the next 6 months and possibly longer! Heart muscle doesn't regenerate and unnecessary injury to a healthy 19 yo is a travesty he will suffer with for the rest of his life.

How many others are now injured? What is the real rate of adverse effects following these EUA products?

How can you determine the real rate of adverse effects if the safety studies have yet to be completed, and there is no transparency of adverse event reporting?

Furthermore, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty. Why consider a mandate for those NOT at high risk for adverse outcome should they become infected and who carry unknown risks of ADVERSE REACTION with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,

Katherine Eames, MBA, CMB

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: The evidence and data do not support mandatory shots for our children. This is not the horrible life-threatening virus it was touted to be. The so-called vaccine hasn't had nearly the time to determine it's safety and effectiveness, especially with children. People can still get and transmit the virus even with multiple shots. My children are too valuable to me to experiment with a drug that has yet to be PROVEN safe and effective against this virus. The health and welfare of our children should always be in the hands of their parents.

Thank you for your time.  
Sincerely,  
Joe Bisom

Subject: Comments for Jan 12, 2022 WSBOH public meeting

External Email

My husband and I wish to make a public comment here to strongly OPPOSE the following:

Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

We strongly OPPOSE including the Covid-19 injections as part of school immunization requirements using WAC 246-105

We strongly OPPOSE applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

These are totally unacceptable policy proposals for WA state residents and we respectfully urge you to vote against them.

DG & BJ Dormaier

I am opposed to making COVID-19 injections mandatory for school admission or childcare in our State for the following Reasons:

1. Covid 19 gene therapy injections are still under emergency use authorization. Comirnaty is licensed but not licensed for use, as yet, because it has not met the criteria for administration. Safety studies are not complete and will not be for some time.

<https://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/comirnaty-and-pfizer-biontech-covid-19-vaccine>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Femergency-preparedness-and-response%2Fcoronavirus-disease-2019-covid-19%2Fcomirnaty-and-pfizer-biontech-covid-19-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7Cff45d607c3194bdcbfc308d9d21830ca%7C11d0e2>>

2. Because of #1, evaluation studies has not been completed, proper informed consent can therefore not be given as it is not available. Informed consent documents for EUA use for Covid 19 injections have not been released/ published and it has come to light that much has been withheld.

3. It is illegal under US Federal and International law to mandate or coerce an individual to receive an experimental treatment. Doe v. Rumsfeld, Civil Action No. 03-707, 2005 U.S. Dist. LEXIS 5573, \*2-3, 2005 WL 1124589. If mandated by the Board, they and their decision would be in direct violation of US and International law.

4. Covid 19 is not a serious problem for children. The injections are a serious problem for children. Myocarditis is not a little thing. You do not recover for myocarditis your symptoms improve and you cope but you suffer cardiac muscle fibrosis which progresses over time to heart failure. Why would it be a good idea to impose potential harm on children if the disease mortality rate age 0-19 years is 0.0027%?

4. The "vaccine" has by the FDA's admission has not been to prevent infection or transmission. What is the utility of giving to children?

Subject: Comments for Public Board of Health Meeting on January 12

External Email

Hello,

My name is Linda Cowin, and I am very concerned to the point that my well-being and the well-being of my children and grandchildren are coming under a tremendous threat. When I was made aware of this Public Board of Health Meeting this morning, I was hit with a wave of PTSD and got sick.

For the past 11 years my daughter has fought in court defending my granddaughter and herself against acts of Domestic Violence, power and control perpetrated upon them by my granddaughter's father. The wise judge that decided their final case last year saw the result of his long-term continued abuse upon my daughter, granddaughter and his harassment against me, and she saw that he was only fighting for ownership over them. He had no empathy toward the well-being of the child or her mother, he just wanted what he wanted and; to lock the girls into a permanent prison of his control and abuse and history of violating protection orders. She granted a permanent protection order – unheard of, but she saw the truth in the matter and it set the girls free.

What is being proposed for the residents of Washington State threw me back into those courtrooms facing this man who hurt two of the most beautiful people in my life. It goes against the very grain of freedom and it feels like a trap.

This type of legislation is an example of the prospect of the potential results from decisions granting an individual or individuals, based upon their interpretation of it, permission to continue to abuse and subvert another human being. My daughter and granddaughter were granted freedom from this man. My girls escaped from their physical and emotional prison due to the wise concept of respect and uphold another's rights to well-being that applies to everyone who is being abused, and applies also to anybody sick with any illness whatsoever. The sick do not deserved to be imprisoned.

Please stop the assault on the freedoms that the citizens in my Washington State over a virus that people have recovered from, is treatable and curable and will one day be seen as another pandemic that the world has recovered from and is a part of history. Please don't make this decision based upon an underlying reason of power, control, fear and subversion threatening the freedom of the people living here.

Use the facilities to house the homeless instead, and tear the fences down!

Most Sincerely,

Linda Cowin

Subject: Comment for January 12th meeting: Detaining & forcing medical testing and/or treatment is unconstitutional & unnecessary in America. No FORCED COVID shots of children!!

External Email

Forcing medical care, isolation, or treatment is totally unnecessary as COVID is getting less & less dangerous. As it mutates it is becoming more contagious but is causing less severe illness.

Because the majority of the population is vaccinated, along with natural immunity of those who have had the illness, herd immunity is happening now which will keep the illness under control.

The action of mandating a vaccine to the least impacted age group is unconscionable! There are side effects from these shots, making them much more dangerous than if the child were to contract the virus. There are also many unknown long-term effects, including possible sterilization.

This action would cripple the already failing public schools. So many parents are already about to Home School their kids and this will force this action upon them.

You cannot say you want to do this to protect the children when you speak of mandating the vaccine for a virus that is becoming more like the flu every day and impacts kids 0-19 years old the least. Follow the data!!!

Both of these proposed mandates are terrible and unnecessary and are blatantly against American's constitutional rights and God-given freedoms!!

May the right decision be instilled within you—to do no harm.

Katrina Peterson

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Please let parents and family decide if they want the COVID vaccine for themselves and their children. I believe in the vaccine and have had the two injections and booster. I would like more adults to get vaccinated. But, mandating the vaccine for anyone is wrong. Let people decide for themselves. Please do not make vaccines mandatory for children.

Thank you,  
Heidi Larsen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at an extremely low risk for Covid.
2. The vaccines are still only EUA.
3. There aren't any long term studies that show the history of the safety of the vaccine given to the children.
4. The new studies now showing that both the vaccinated and the unvaccinated both can transmit Covid and the vaccine evidently does not stop the spread of the virus.

Thank you  
John Einarson

Dear BOH,

I am writing this comment for the January 12, 2022 meeting.

Ref item #8: I strongly oppose forming a tech advisory group. This is taking steps to consider adding the covid shot to the vaccine schedule for school age kids. This is still under EUA and at this point the risks far outweigh the benefits.

Ref item #11: I absolutely support this item. It is a petition filed by Informed Choice WA.

Please take the time to review this link:

Dear State Board of Health Members,

I am opposed to Covid vaccines for children for several reasons. First, Covid holds extremely risk for them. Second, the vaccines being used are still ONLY EUA and therefore have not been rigorously tested in advance. Third, the vaccine apparently does not stem the spread of the virus making this mandate useless. Please do not recommend widespread Covid vaccination for children.

Sincerely,

Kirk Kraft

Please include my message below in the packet for the Board for next Wednesday's meeting. Thank you.

Dear BOH members,

It's a well-established fact that children are at a statistically zero risk of Covid death. You can't get lower than zero. Kids do not need Covid shots.

Please let parents make the decision whether to give this experimental product to their children, free of coercion from the State in the form of school/daycare "requirements."  
Thank you.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons: #1 it is not fda approved it is still an emergency use only. Which means it has not underwent the proper testing and evaluation to show safety and affectiveness It would appear we are the guinea pigs. #2 It is a blatant disregard for our constitutional rights to mandate any medical procedures our body our choice. #3 Go to <https://vaers.hhs.gov/data.html>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaers.hhs.gov%2Fdata.html&data>>  
and search the fda's and cdc's own database of adverse reactions to all of the manufacturers so called vaccines. Never in the history of our country has a vaccine ever been more deadly and dangerous and last but not least no one wants to take responsibility for those adverse reactions they are all hiding behind immunity from being held responsible for the damage there product creates. It seems everyone I know who is fully "vaxed" is catching and spreading covid like crazy. Which if the moderna has a 91 - 76% effectiveness rate I would say those numbers are being fudged just a bit. Or maybe it was meant as 91-76% more likely to catch and spread covid. Please understand I am not an anti vaxer but I do my research and I make mine and my family's decision based off of that research which as I stated earlier comes straight from the cdc's website. Even 1 adverse event (death) is to much. Vaccines are meant to save lives not kill hundreds of thousands of people. If you feel that I am wrong about this please email me and I will send you the complete list in pdf form and then you can make a better educated decision. Thank you for your time and God bless.

Subject: Comment 246-100 WAC, 246-105 WAC

External Email

Good Morning,

In regard to:

Rules Hearing Continuance for Communicable and Other Certain Diseases, Chapter 246-100 WAC. Considering various facts and opinions, including many of those that differ, it is not appropriate to add Covid-19, SARS-CoV-2 disease, in any capacity to this WAC. This virus and many factors surrounding it are constantly evolving and in significant ways is in itself following the expected path of becoming less severe, both in hospitalizations and disease severity.

In regard to :

Rulemaking Petition – Chapter 246-105 WAC, Immunization Criteria, Child Care and School Entry (COVID-19 vaccine specific). There are multiple concerns about this proposal and not the least being that inclusion falls short in meeting the Criteria for Reviewing Antigens for Potential Inclusion in WAC 246-105-030. Also, this is Emergency Use Authorization, not fully approved, for children and long term effects cannot be known at this time regardless of what data one chooses to use in support that the vaccines are safe and effective.

Thank you,  
Leazlee Koch

To whom it may concern,

I am opposed to giving more power to the state, the governor, and to health "authorities" under the guise of COVID-19.

Already the government has too much power in the name of "health", and children are at more risk of negative impacts from the vaccines than from COVID.

PLEASE do not put people under the yoke of unnecessary authority and the threat of force for a virus that has a 0.15% infection fatality rate, and kills fewer children in two years than are killed in one flu season.

There is no logical or medical reason to consider this overreach in Washington, even though overbearing states like New York are trying to do the same thing.

Do not let Washington become like Australia with quarantine camps and police intrusion into normal people's lives. Do not treat citizens like subjects or criminalize them for person healthcare decisions.

With the mild omicron variant, it is time for this pandemic to end.

Sincerely,

Mike Kress  
424 W. Cleveland Ave.  
Spokane, WA 99205

#### PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

\*There is absolutely no reason to force vaccinations on children who have an extremely low risk for COVID and a 99.9% survival rate for healthy children with no comorbidities.

\*There is no authorized COVID vaccine. The vaccine being administered is still under Emergency Use Authorization only. The only FDA approved drug is manufactured by BioNTech which is legally labeled COMIRNATY and currently unavailable in the United States. Therefore, it is unlawful for the WA State Board of Health to force a NON-APPROVED vaccine onto children and any Washington State residents. This attempt is a violation against our constitutional rights.

\*There is no sufficient data that the vaccines are safe because there have been no long-term studies to document the history or the safety of them.

\* I personally know many vaccinated people that are getting the virus. Studies now document that vaccinated and unvaccinated can both transmit Covid, therefore the vaccine apparently does not stop the spread of the disease. So why are you continuing to push the vaccine agenda.

I urge you to stop the madness and allow for PARENTS to make the health decisions for their children and stop the government overreach that you have inflicted upon citizens of Washington State. Your mandates for nearly two years have not worked and the states without mandates have fared significantly better than those with strict mandates.

Mary Savage

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The dangers to children of the vaccine are greater than the risks of COVID 19. A child is at very low risk of having complications of COVID. These children would need to keep getting the vaccine every 5 to 6 for the remainder of their childhood, leaving them with no natural immunity as adults. My sister is a nurse and has seen cases of young men whose health has been destroyed by the vaccine.

In the 1890's what was called the "Russian Flu" went around the world, with very similar symptoms and danger to vulnerable persons. Statistics show that it took about 5 years to go around the world several times.. It is now COVID 43, one of our common colds. From the beginning of this pandemic, we have known that what we need is herd immunity. For children, this is the time to get the disease as a mild case.. Do not burden them with a lifetime of vulnerability to the disease and the need to be vaccinated every few months. We do not know what the cumulative effects of many vaccines and boosters are, but we know the risks of COVID are very low for children.

Sincerely,  
Mary Jo Harrison  
Camas WA

That fact that anyone is even considering the ridiculous idea to detain an individual for not "following" your absurd ideas for safety surrounding Covid-19 is not only disgusting but it is DISCRIMINATION! This virus that has been present much longer than the public realizes and it's survival rates are higher than many other common illnesses. What's next? Remove a males testicles when they are tested for STD's? Ridiculous idea, I know.

Lastly, our children. CHILDREN! They are not done growing. I'm very pro choice and if anyone thinks I will be forced to inject my child with a substance that has no long term known effect just for them to attend school that they have the liberty to partake in, think again. My children will not be attending Washington state schools. On the other hand, might not be a bad idea so I can teach them common sense. Something many of you who are for these illegal policies lack.

If the board moves forward with these outlandish policies, you will be a part of why the Washington State economy will crumble. You are guaranteed to lose many WA state residents to a places where we can actually hold on to our US rights.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are at extremely low risk for Covid, so it seems like requiring Covid vaccine for school and day care admission is a proposal that is not taking truth into account.

Studies have shown that vaccinated and unvaccinated can both transmit Covid showing that the vaccine apparently does not stop the spread of the disease.

With these truths and the fact that there are no long-term studies to document any history of safety of the vaccines, mandating vaccinations for admission into school or day care is putting the next generation at risk rather than helping the current situation.

Please do not pass this proposal.

Kirsten Doehle

Here is my public comment:

Do not impose covid vaccine mandates on young children. Vaccines can cause injury. Children don't die from covid. And the vaccine has serious side effects.

Do not force a vaccine mandate on young children. Do not make a rule, or law that says children need a covid vaccine, to have access to child care, or K-12 education, or college level education.

Also, do not do involuntary containment of people who choose not to get the covid vaccine.

Do not empower the state to take away people's rights.

Subject: Comments for January 12th Agenda/Public Meeting

External Email

My comments are as follows:

1. OPPOSE: I oppose Agenda Item #8 on the January 12, 2022 meeting agenda where the Board is considering the formation of a Technical Advisory Group (TAG) to review information about COVID-19 vaccines and mandating it as required for school children. Public schools will lose thousands of tax payer dollars from property taxes allocated for schools if this is allowed. There will be a massive wave of parents taking their kids out of school. This will effectively take down our school systems in WA state. This will affect our economy and have a ripple affect into the future.
2. SUPPORT: I support Agenda Item #11 on the January 12, 2022 meeting agenda (Informed Choice Washington's Petition for Rulemaking). This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.
3. NO TRANSPARENCY: I am disturbed by the lack of media coverage of this very important and potentially life altering action that the BOH is about to consider with adding Covid-19 to the required vaccines for school children. This is changing the RCW which are laws and the Governor should have mentioned this action being considered by BOH in his Covid-19 press conference on Wednesday January 5, 2022. He does not represent all of the people of the State of WA if his own opinions (pro-vaccine) are forced upon us. He already did this to State workers and I am not supportive of this happening to our children. The lack of media coverage and transparency from our Governor to inform the citizens in the State of Washington is wrong. Furthermore, I think Chris Rykdahl, Superintendent of Public Instruction should have done the same with announcing this to the media and asked schools to send out a notice/email text to parents because we are all impacted by this decision. This utter lack of transparency makes citizens not trust government.

Thank you,  
Lindsay Marquez

I am opposed to making Covid-19 shots mandatory as a pre-requisite for school admission or childcare in our state for the following reasons:

(1) The current vaccines available to us do not prevent the transmission on the Covid-19 virus. The scientific consensus is that the available vaccines reduce hospitalizations and deaths if you contract the Covid-19 virus. The data shows that the likelihood that a child would be hospitalized or die from the Covid-19 virus is statistically insignificant and almost zero amongst children who do not have multiple co-morbidities. If the vaccines don't reduce/prevent the spread of the virus and children are highly un-likely to be hospitalized or die from the virus; what is the benefit to vaccinating a child? It may have made sense back when we thought that the vaccine prevented transmission, but now that we know that it doesn't; there doesn't appear to be a benefit to the public or to the child to vaccinate them.

(2) The current vaccines that are available to us are experimental and there are no long term studies to show the possible negative side effects to the child's health. They are approved under emergency authorization and the vaccine companies cannot be sued if there are negative long term side effects to our children. For any vaccine; statistically, there is a certain portion of the population that will have a negative side effect, which includes death. If you mandate that children take this vaccine in order to attend taxpayer funded school; will you personally pledge to take legal and moral responsibility for the inevitable health issues that will arise as a result of a side effect amongst a certain portion of the population?

I would ask you to determine what goal you're trying to achieve with this mandate. If the goal is to help slow the spread of the virus, then the current scientific consensus is that the vaccine does not help you to achieve that goal. It could actually make the situation worse because it could create a situation where children contract the Covid-19 virus, but they are asymptomatic, and they unknowingly spread the virus to their classmates. If the goal is to prevent children from being hospitalized or dying from Covid, then your goal is to prevent something that rarely happens anyway. Are we trying to protect the children with this mandate or are we trying to protect the adults? Adults can choose to be vaccinated if they wish to protect themselves against hospitalization and death. They cannot vaccinate themselves against contracting or transmitting the virus. It is immoral for you to force parents to give their children experimental vaccines in order to protect adults that have the means and ability of protecting themselves.

Please do not consider this action as a viable solution to the Covid-19 pandemic. Not only will it not work; it is potentially damaging to our children's health and well-being. Statistically, there is a certain number of children (albeit small), who will develop negative side effects from the vaccines. These side effects include serious health conditions like auto-immune conditions, myocarditis, and even death. Are you

comfortable with the idea that multiple children in our state will die as a result of your mandate? Will you chalk that up to the idea that you have to break a few eggs to make an omelet? Please think really hard before you decide to put our children's health at risk. This mandate will not help you to achieve your goals.

Thank you,

Geoff Miller

To all the human beings involved at WSBOH:

I am vehemently opposed to making COVID-19 shots mandatory for school admission or childcare in our State. To do so would be irrational, and ultimately benefit NO ONE, including yourselves.

It is accepted both as common social knowledge AND demonstrated in scientific studies that both vaccinated and unvaccinated individuals transmit covid--so vaccine benefits are negligible. There is also much evidence that the vaccines are more harmful than the condition they were designed to protect us from, again undermining their usefulness. Plus, children are the least likely group to suffer from covid.

If you fail to accept the above reasons as sound reason to avoid making the shot mandatory, I advise you to remember/consider the following:

The covid shots are ONLY Emergency Use Authorization, which means mandating them/coercing people to get it/discriminating against those who don't is in direct violation of federal law, which means you would be committing a crime and able to be brought to court and persecuted. School districts around the country are already losing in court, and that trend will continue. Please save yourself the embarrassment, bad press, and money, and provide your services to everyone free of coercion or discrimination.

If you truly value children's well being and the founding tenets of this country, then this is the time to do what is right, not what is easy. I and others will hold you to it.

Thank you,

Lili Story

Re:

The pandemic is a medical issue and not a government one. A mandate is not a law passed by a legislative group. People have the right to choose medical assistance or preferences for their personal health and that of their children. If that is lost, this is no longer a government by the people. When the rights of a person are not allowed there is not a government of a democratic state. It has lost the freedom of the people to determine their lives and that of their families. This oppression is not tolerable or appropriate in a country founded in freedom and human rights. Our forefathers are turning over in their graves as they supported a free country and the Constitution.

We the People of the United States,  
in Order to form a more perfect Union,  
establish Justice, insure domestic Tranquility,  
provide for the common defense, promote the general Welfare,  
and secure the Blessings of Liberty to ourselves and our Posterity,  
do ordain and establish this Constitution for the United States of America.

Attention People:

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

Dear Board Members,

It has come to my attention that you will be discussing immunization criteria for child care and school entry at the January 12, 2022 Board of Health meeting.

Under NO circumstances should coronavirus vaccinations be imposed on children for the following reasons:

1. No one knows the long term effects these vaccines will have on children.
2. Research shows children have a minutely low risk of being infected by coronavirus and/or becoming severely ill.
3. The risk of the vaccines is far greater than the risk of infection.
4. Studies show children don't readily spread this virus to other children or to adults.
5. Findings at Yale University showed children's innate immunity puts them in a much better position to respond to SARS-V2. They have natural protection in their nostrils.
6. By mandating vaccination for children, you run the risk of killing or causing lifelong harm or disability.

There is no data to show coronavirus vaccines are necessary for children, or a good idea, and plenty of data to show this is a horrific idea fraught with risk and unknown consequences.

Respectfully,

Lynn M. Whitmore  
WA state citizen, nurse, parent and grandparent

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are far less likely to get a deadly form of covid and they desperately need to be in school.

It would also put an undue hardship on lower income and family's that are struggling. As they seldom have time or the inclination to get their children vaccinated.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

No long term studies to determine effectiveness/adverse effects.

>99% recovery rate in children having had Covid

Quickly mutating viruses can cancel the effectiveness of the vaccine in a short time

It's a parents decision to vaccinate their children, not governmental agencies.

Respectfully from a very concerned grandparent,

Kay Doyle

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

It is medically irresponsible to add the COVID vaccines to the childhood schedule given the duration of their effectiveness, the average severity of the disease in most children, the evolutionary potential of the virus, and the still to be determined appropriate dosing schedule. Wholly premature and recklessly authoritarian. It will lead families to withdraw their children from public and potentially private schools in even greater numbers. It will have a polarizing and opposite impact to advancing the public health message.

Dear members of the board

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State .

As a parent, and a member of the community, I implore you to please stop the push to require Covid 19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Children are at an extremely low risk for Covid 19. The Covid 19 vaccines have no long-term testing on adults and they have even less testing on children. Covid 19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading C19. The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 90% and even the long term effects of C19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing C19 nor is it preventing the spread of C19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people. Even the FDA board that was approving those vaccines to they young kids did it with the impression that will be absolutely voluntary and will never be mandated which CDC guaranteed. Will you take upon you the responsibility for the health and well being on innocent children who you will be subjecting to unknown risks in order to receive education which is an ingrained right of every child? Will you create segregation and discrimination based on the medical choices made?

Please PROTECT our children by NOT requiring a C19 vaccination to attend child care or school.

Thank you,

Julia Kulyk

External Email

Hello,

I am a resident of South King County and was recently made aware of your public meeting via a zoom call this coming January 12th. I would like to comment on Agenda item 9, item 11, and make a general comment.

Item 9 – WAC chapter 246-100 was created and designed with the intent of preventing deadly outbreaks of disease within the general population. This is explained further in WAC 246-100-40 section (c). Section C states a detained person or group of persons would pose a serious and imminent risk to the health and safety of others if not detained for purposes of isolation or quarantine. The coronavirus, or as I like to call it “Influenza Type C” does not pose a serious and imminent risk to the health and safety of others. Let me provide further clarity: The risk of spreading coronavirus symptoms (diarrhea, headache, fatigue, lost of taste/smell, ect) absolutely does not warrant the involuntary confinement of our citizens to a county, city, or state run facility.

Item 11 – WAC Chapter 246-105 was created and designed with the purpose of protecting children and the public against vaccine-preventable diseases. All reasonably thinking humans understand you cannot prevent acquiring the coronavirus with a multitude of shots from Phizer, Moderna, Johnson & Johnson, and other drug companies. These shots are designed to make individuals asymptomatic and they do not prevent coronavirus.

General Comment – I would like to encourage the Board of Health to create guidance to our citizens on how to best take care of themselves if they acquire coronavirus. Pushing a narrative of fear and division does not work. This narrative of fear and division has been met with skepticism from the inner-city to the country side and everywhere in between.

Thank you.

Jared Long

I am completely against any of the proposed COVID policies. They are overreaching and immoral. I stand against these proposed WAC's: WAC-246-100-070, WAC-246-100-045, WAC-246-100-040, WAC-246-100, WAC-246-105.

It is not constitutional to force people to do as you wish in regards to quarantining into facilities, testings, treatments, and vaccinations. What you as a board deem necessary isn't always the best. What you all are proposing are overreaching in power. We are all created by God with rights and free will and the government here in WA has done everything to take that away. Forced vaccinations on our children is so wicked especially knowing that whether or not you are vaccinated, you can still get COVID and there is no long term safety data on these vaccinations to ensure the safety of our children from side effects such as myocarditis.

I wanted to reach out to all of you and let you know that the WAC's listed above are completely overreaching and disregarding our rights as human beings. Your solutions are not what is best for everyone or maybe even anyone in this state. I pray that you all have the heart to not allow these WAC's to be approved.

Thank you,  
Kristle Bautista

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Children are most likely to have few or less serious symptoms if they do get the COVID-19.

The new Omicron variant is less severe in symptoms even though it spreads easily.

Fully vaccinated people are getting and giving the new Omicron variant.

Children who have already had COVID-19 have natural immunity.

More damage is done to children by having to wear masks all day at school.

They should certainly not have to wear masks outside at recess time. When they do wear dirty masks all day they get more germs. Most folks can't afford to pay for 3 or 4 masks per child per day.

Enough time has not passed to see if there are long term problems from the vaccines or boosters.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

- \* Children are at extremely low risk for COVID.
- \* The vaccines are not fully approved by the FDA and are still only authorized for emergency use.
- \* There are no long-term studies available yet for the vaccines to show what long-term side effects there may be and how safe or unsafe they are.
- \* There are studies now showing that COVID can be transmitted by both the unvaccinated as well as the vaccinated.
- \* The vaccine does not stop the spread of COVID-19.

For the same reasons listed above, I am also opposed to including COVID-19 to the list of diseases that allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

Sincerely,

Michelle Elijah

Subject: Comments for Jan 12th meeting

External Email

To WA State Board of Health  
Jan 7th , 2021

On Jan 12, 2021 a meeting regarding COVID rules will take place. The board will discuss adding COVID mandated vaccine under RCW 28A.210. If passed it would be added to the criteria of immunizations criteria for entry to schools and day care centers. The TAG- technical advisory group met Dec 29th 2021 to discuss adding COVID related rules to existing codes.

The board used nine criteria that are encompassed in three categories. Vaccine Effectiveness, Disease Burden, and implementation. The WA State Board of Health SHOULD NOT pass any rule implementations related COVID immunizations. Based on the notes from the TAG meeting, under disease burden the first criteria states:

The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population.

The CDC states: The COVID vaccines are effective and can reduce the risk in getting and spreading the virus that causes COVID.

A vaccine is used to eradicate a disease in this case COVID vaccine(s) do not accomplish this goal. For this reason I request all board members to vote NO on adding COVID vaccines as a required vaccine for school entry. Consider rules making COVID vaccine a choice not a mandate.

In addition quarantining a person against their will should never occur. I would ask this board to bring a constitutional scholar into this discussion to advise you on the legal ramifications on continuing to have this rule in place, It is a violation of the constitution of the UNITED STATES OF AMERICA .

Sincerely  
Jennifer Aspelund

To: DOH WSBOH  
Subject: Comments for meeting on January 12th, 2022

External Email

To the Washington State Health Board in regards to the meeting agenda happening on January 12th, 2022;

Children are at extremely low risk for Covid and at this point children getting COVID is a lower risk compared to the unknown dangers of an emergency use vaccine that has not had any long term studies done. Give parents the opportunity to have data and studies done of long term affects of the COVID vaccine. Removing parents rights to choose health choices for their children is a grave mistake. There will be a mass exodus of children in public school and that will have many consequences that will far outweigh the risk of COVID. As a health board, if you truly believe in health, you have to look at the wider scope of health when it comes to children. The COVID vaccine does not prevent a child from contracting the virus so the spread will still continue. There is real data to show that vaccinating an entire school (colleges) does not prevent massive outbreaks of COVID. Mandating the COVID vaccine would not do anything positive and would only cause thousands of families to remove their children from schools. Nothing is stronger than a parent who feels that their children's safety is being threatened. Gain trust from the people by not mandating the COVID vaccine and allowing parents to make this decision on their own for THEIR child. You are making history and be wise and stand on the correct side. Thank you for your time!-parent of 4 children

In response to adding COVID 19 to the following WACs 246-100-070, 246-100-045, 246-100-040.

You can call them what they are but the proper name for these is concentration camps. When you state that the above actions will all be involuntary acted upon citizens, they are concentration camps. Again, a proposed decision that is being touted for 'health' but is the completely opposite of being put in place to protect the health of individuals. Using law enforcement to imprison individuals, removing their autonomy of their body to make health decisions and locking them in facility, is a disgusting misuse of power. You are betraying the frail trust that any Washingtonians have in their serving officials. I understand the need for a facility for certain individuals that have certain circumstances but it should only ever be used VOLUNTARILY. Again, if you were truly about health, those 'camps' would be full of unhoused individuals that die at a much higher rate than housed individuals from many different ailments and diseases. You are a health board, now is your chance to truly be about health, not just some narrow political view that will go on to severely harm the great people of this state.

Please - please DO NOT require the children in the state of Washington be required to get the Covid-19 shot in order to attend school or preschool.

Please remember that this "immunization" is still unproven for the long term. It does have the potential to harm our precious children in ways we do not know yet—and children are a very LOW RISK for Covid.

Please remember that PARENTS are the ones who should decide if their children should have the vaccine.

PLEASE DO NOT FORCE THE COVID 19 "VACCINE" on anyone- especially our children.

Thank you -

To whom it may concern,

I am writing to oppose the proposed covid-19 policies that are currently being considered on Jan 12th. These include:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040

Although I understand the rationale behind these proposed policies, I do not think they will have the intended effect. These policies will put undue pressure on our already overwhelmed police force. These health policies and mandates should not be considered law unless the people that they affect have had a chance to review them. The language of these policies leaves a lot to interpretation and opportunity for misuse and overreach.

These policies will also discourage people from seeking testing for infectious disease and may actually exasperate the problem. Would you willingly be tested for an illness if you thought it was possible that you would be involuntarily detained?

The current mandates and policies have not stopped the spread of Covid even though the majority of people have willingly followed them. Doubling down on these policies will not improve our current situation.

Thank you in advance for your time and consideration.

Kady Bowman

Hello,

I'd like to comment on the upcoming Board meeting scheduled for January 12th.

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Thank you,

Subject: Comments for Jan. 12, 2022 meeting for a concerned WA citizen

External Email

Dear BOH,

I am writing this comment for the January 12, 2022 meeting.

Ref item #8: I strongly oppose forming a tech advisory group. This is taking steps to consider adding the covid shot to the vaccine schedule for school age kids. This is still under EUA and at this point the risks far outweigh the benefits.

Ref item #11: I absolutely support this item. It is a petition filed by Informed Choice WA.

Sincerely,

Neal Bastian

To whom it may concern,

I am a long time Washingtonian, voter, and I live in Seattle. I am writing to express my opposition to making COVID-19 shorts mandatory for school admission or childcare in our state for the following reasons:

- \* Freedom of choice. Each family has the right to choose for themselves which medical interventions to pursue, and without exclusion from basic amenities in society, such as schools and daycares.
- \* Of all age groups, children are at the lowest risk of infection and adverse health events.
- \* All available vaccines remain under emergency use authorization.
- \* Long term health effects are NOT known.
- \* Vaccines apparently do not prevent transmission of disease.
- \* A relatively high rate of adverse events reported to VAERS, despite an under-reporting factor of 10-100.

If some parents are concerned for their children, let them keep their children home. For the rest of us, do not encumber access to the schools.

Instead of hastily adding Covid-19 vaccination to school and daycare requirements, promote these ideas for improving public health, generally.

- \* Universal supplementation with vitamins D3, C, magnesium, zinc, and other compounds known to be immune supporting.
- \* Discourage "mask" wearing because masks do not prevent transmission of viral illness. In fact, mask materials are substrates for growing active colonies of more dangerous pathogens. Masking also inhibits child brain development.
- \* Encourage people to reduce their number of comorbidities, for example, by losing weight, ceasing smoking, managing diabetes better, etc.

Confidence in the public health agencies is at a crossroads. I suggest you course correct - return choice to parents and promote healthy lifestyles that support individual and public health in other areas.

I am opposed to making COVID-19 injections mandatory for school admission or childcare in our State for the following Reasons:

1. Covid 19 gene therapy injections are still under emergency use authorization. Comirnaty is licensed but not licensed for use, as yet, because it has not met the criteria for administration. Safety studies are not complete and will not be for some time.

<https://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/comirnaty-and-pfizer-biontech-covid-19-vaccine>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Femergency-preparedness-and-response%2Fcoronavirus-disease-2019-covid-19%2Fcomirnaty-and-pfizer-biontech-covid-19-vaccine&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24ac036a62ed41fc96e608d9d218615a%7C11d0e>>

2. Because of #1, evaluation studies have not been completed, proper informed consent can therefore not be given as it is not available. Informed consent documents for EUA use for Covid 19 injections have not been released/ published and it has come to light that much has been withheld.

3. It is illegal under US Federal and International law to mandate or coerce an individual to receive an experimental treatment. Doe v. Rumsfeld, Civil Action No. 03-707, 2005 U.S. Dist. LEXIS 5573, \*2-3, 2005 WL 1124589. If mandated by the Board, they and their decision would be in direct violation of US and International law.

4. Covid 19 is not a serious problem for children. The injections are a serious problem for children. Myocarditis is not a little thing. You do not recover for myocarditis your symptoms improve and you cope but you suffer cardiac muscle fibrosis which progresses over time to heart failure. Why would it be a good idea to impose potential harm on children if the disease mortality rate age 0-19 years is 0.0027%?

4. The "vaccine" has by the FDA's admission has not been to prevent infection or transmission. What is the utility of giving to children?

I oppose making COVID-19 shorts mandatory for school admission or childcare in our State for the following reasons:

According to both my personal experience of people (as a teacher, neighbor, friend, friend of many medical professionals, etc.) and various medical/news sources,

- 1) the risk of children having life-threatening effects from COVID are very minimal.
- 2) people get the disease AND die from it with and without the so-called "vaccine" (and at about an equal ratio, contrary to what many news outlets say).
- 3) the so-called "vaccine" is still listed as EUA
- 4) the so-called "vaccine" lacks long-term study/experience for validation of safety (very unlike actual vaccinations).

Thus, though intentions by proponents may be altruistic, no good, logical, scientific reason exists for forcing speculative chemicals into people, especially those who possess a very low risk of major symptoms, to protect them or the public at large.

Maintain both health and freedom for all.

As a tax paying citizen of WA state I'm opposed to making Covid 19 shots mandatory for school admission or childcare in our state for the following reasons.

- All medical and health decisions regarding our children should lie with the individual and not with the government.
- The vaccine has been shown to be ineffective in the spread of COVID-19

Please vote "NO" in making Covid vaccine shots mandatory for school admission or childcare in Washington state. Thank you.

The Fourth Amendment to the Constitution of the United States guarantees persons to be secure in their persons.

Article 1 Section 11 of the Washington State Constitution guarantees persons religious freedom.

The proposal of the WA State Board of Health to "involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination" violates both of these constitutional freedoms for the following reasons:

1. The proposal conflicts with the United States Constitution because there is no guarantee that any of the mandated or mandatory procedures would not inflict physical harm on the individual.
2. The proposal conflicts with the Washington State Constitution because health freedom is a subset of religious freedom.

In addition, the proposal is also illogical: How can someone who is being held involuntarily give voluntary compliance to anything??

This proposal needs to be rejected since it conflicts with both constitutions and because it is illogical.

The other proposal regarding adding Covid-19 injections as part of school immunization requirements should be rejected for the two reasons given above.

The foregoing is respectfully submitted.

We are opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The long term side effects of the vaccine have not been studied or researched.

Israel is reporting multiple side effects from the vaccine.

Overall, children easily recover from Covid.

The vaccine does not guarantee you won't get Covid and it does not stop anyone from transmitting the virus.

Vaccine proponents are now stating that the shot will help ameliorate the Covid symptoms; whereas before the proponents said you would not get Covid.

Proponents of the vaccine are not telling anyone about the negative health side effects that people all over the world are experiencing.

Please do not vote to poison our children needlessly.

Please wait until more research has been done in regards to children getting this vaccine and the long term side effects.

Thank you,

The McNitt family

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

We now know that the COVID19 vaccines do not stop the transmission of the disease nor do they ensure immunity to the recipient. Therefore, COVID19 is NOT a "vaccine-preventable disease" according to WAC 246-105-030 and no "vaccine" currently being offered should be considered to be "required" or "mandated" by WA State's own guidelines.

Additionally, it must be acknowledged that these "vaccines" ARE causing injuries. The risk/benefit ratio is deeply skewed toward higher risk vs benefit for young people. We have seen over and over again that young people ( under age 30) have statistically zero risk to death or adverse long term problems from COVID recovery. This is not the same statistically for the vaccine with these age groups. Not to mention, the added benefit of herd immunity in disease-recovered individuals.

It must be noted that SARS-COV2 is a HIGHLY MUTABLE disease. You cannot "vaccinate" out of this pandemic. We are risking lives by continuing this patently misguided direction of mass vaccination for a virus that is generally nothing more than the common cold (Omicron) for the vast majority of the people.

Respectfully submitted,

Todd Bisson (Very concerned parent of two minor-aged children who are FULLY COVID-recovered)

I am opposed to making COVID-19 vaccinations mandatory for school admission or childcare in our State for the following Reasons: Thousands of parents and students have voiced their concern and will not have their children vaccinated. With this in mind the long term effects could be detrimental. Such as uneducated children, mental health effects on children forced out of their right to public education, due to the vaccine mandate. Every child has the right to public education. Vac or un vac. As well as government funding for the students diminishing, as they would pursue other education options. I am strongly against this mandate and as a parent I have legal guardianship over my children, not the state of Washington.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

Every person should have a right to their own body and have a choice of what gets put into their body once you cross that line it becomes communisms.  
You will be infringing on people's right of freedom of religion.  
You will impose serious potential health risks to the general public and especially youth whose bodies may not respond appropriately to the COVID-19 shot.  
There is no evidence that the COVID-19 shot prevents someone from contracting COVID-19 and the CDC would agree that the shot is only an immune boost to help those that have contracted the virus it does not prevent the spread of the virus.

Thank you.

I am opposed to making COVID-19 Shots mandatory for work, school admission, childcare, and any other radical Stalinist decisions to violently move families into the State Sponsored Gulags or Camps for the Unvaccinated. It's our Constitutional and The Rights of Freedom to refuse to take experimental vaccines. These Experimental Vaccines shown to be a complete failure with the long term effects unknown, but the effects will be hidden from the public as we are seeing death rates of the vaccinated increase exponentially (maybe their Immune systems compromised.) The numbers for unvaccinated covid transmissions are completely inaccurate. I know of many cases where double vaccinated with covid are considered Unvaccinated because they haven't taken the 3rd booster. Complete failure and the Propaganda Machine manipulating numbers that only can be described as a purely evil agenda.

- \* Vaccines are still only EUA - (Emergency Use Authorization)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that the vaccinated and unvaccinated can both transmit Covid
  
- \* The vaccine apparently does not stop the spread of the disease
- \* The vaccines and vaccinated deaths by natural means have increase 10 fold (coincidence or caused from Vaccines unknown)
- \* Children are at extremely low risk for Covid
- \* Natural Immunity are at extremely low risk for Covid or any ill effects
- \* Natural Immunity 20x improved immunity of covid vs vaccinated, but Immune system is intact.
- \* 99% of People Survive Covid
- \* Long term risk of Cancer, autoimmune disease, infertility, and death.
- \* Medical studies take 5-10 years to come out after a trial.
- \* You Cannot have a Vaccine for a Disease that crosses multiple species causing variants. Much like the flu there is no Vaccine.
- \* Vaccines were defined to completely protect from Transmission like Polio, Mumps, Measles because they only affect humans. Political interests redefined a Vaccine to fit a narrative to mandate a mRNA experimental Vaccine.

Please stop this illegal imposition of mandates against our constitutional rights as Americans. Mandating Vaccines for a political agenda to destroy and harm the lives of Washingtonians is unconstitutional. The Concentration Camps that have been built in all of these counties must be taken down immediately. We must live our lives and provide for our families without the imposition of Stalinistic State Mandates.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

The vaccines clearly do not reduce transmissibility as overwhelming evidence has shown, so the unvaccinated are not spreading the disease any more than the vaccinated. Also, if the vaccines effectively reduce the severity of the disease once infected, then the only people still at risk are those who willfully refused the vaccine. In the case of children and minors, all available data shows that their risk of mortality or serious long-term effects from the disease is very, very low.

However, it is now well documented that in many cases the vaccine could potentially induce heart irregularities and outright failure, in addition to blood clots and brain aneurysms among other things. This is true even of those in prime physical condition, as we have seen among pilots, first responders, military personnel, and athletes. It is also vital to note that treating these side effects of the vaccine in those cases is far more complicated than treating the disease itself, so even if those side effects are relatively rare, the bottom line is that it is up to the individual to decide which risk is worth taking. In fact, in the case of children and minors, the chances of having adverse side effects from the vaccine are actually higher than that of having serious long-term effects from the disease. All of this data is easily accessible from official medical and government sources.

I implore you to acknowledge the individual right to make decisions about our own bodies, and to remember that your decision will set a precedent for years to come that less well-intentioned authorities can use for their own purposes.

Thank you for your time,

Jared Ford

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

The main reason is the vaccine does NOT prevent you from transmitting nor receiving the virus. The vaccine merrily helps those with underlying health conditions recover quicker if they do contract the virus. You should let the parents decide whether or not their child has an underlying health condition, or if they want to have their child get the shot for any reason.

Parents have the right to decide what shots are given to their children, NOT the schools and not the government.

More people have died from getting the vaccine than the children who have contracted the virus.

Also the rates for children getting infected with covid-19 and not recovering are less than .2%. Children do not need the vaccine, they have been proven to recover on their own, therefore building up their own immunity in their body.

To whom it may concern,

I was unable to leave a comment in regards to the upcoming meeting on January 12th, 2022 to discuss applying current infectious disease codes to include Covid-19 for all WA State residents.

I strongly OPPOSE this agenda!

GENEVA, Dec 20 (Reuters) - The Omicron variant of the coronavirus is spreading faster than the Delta variant and is causing infections in people already vaccinated or who have recovered from the COVID-19 disease, the head of the World Health Organization (WHO) said on Monday.

Above is a recent quote from the head of the World Health Organization indicating that the Omicron variant is affecting the vaccinated as well as the unvaccinated. To enforce what you are proposing in regards to involuntarily detaining a person or group of persons to be isolated in a quarantine facility if they do not comply with medical examination, testing, treatment, counseling or vaccination is unconstitutional. I believe that each individual should be in charge of their own individual health choices and should not be forced to comply due to government overreach. This variant is not only affecting the unvaccinated but also the vaccinated so implementing this type of mandate would not be for the protection of the people but a way to enforce the government agenda on individuals.

Thank you for your time,

M. Courson

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Children are at low risk of getting covid

The vaccines are still under EUA

There are no long term studies to show a history of safety

Studies show that the vaccinated and unvaccinated can both transmit covid.

The vaccine is not stopping the spread

The current variable, omicron, is a mild cold or flu and does present a risk

There is no informed consent.

Pfizer won't release the ingredient list for 50 years

So we don't really know what is in these vaccines.

As far as involuntary detainment/ quarantine facilities that is abhorrent.

To hold people against their will.

Sounds like Nazi Germany and a violation of the Nuremberg Code.

Please consider the facts

Subject: Comments for Jan 12th Meeting

External Email

Washington State Board of Health:

I am writing as a concerned citizen to ask you to use sound judgement and common sense as you discuss two particular issues on the 12th. One is the vaccine mandate for children and the other is the involuntary quarantining citizens via 'emergency measures'.

With almost two years under our belts, it is a well known fact that vaccines not only do NOT prevent illness, but they also allow for the vaccinated individual to spread the illness on to others. The CDC and other agencies have said so, and study after study is available to affirm this fact. Even if this were the miracle vaccine the agencies market it has, that shouldn't allow for the loss of constitutional freedoms which Americans are to have over their own bodies, and especially over those of their children. Do you desire to have a say in the raising of your children? Then you should allow each parent to make that decision in their own children's lives.

Regarding involuntary quarantines, and the quarantine sites that are known to exist in this state; while I wasn't alive in the 1940's, this reminds me of the Japanese internment camps. Are we moving along those lines, and depriving citizens of our rights, just as we did with the Japanese-American community of World War 2?

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons to isolation camps or covered medical interventions, Washington board of health is playing with medical tyranny. This is a violation of the Washington State and United States constitutions, as well as the Nuremberg code. No government can mandate or force medical treatment without individual consent.

Please let us not become another Germany, or China. People have rights to govern their body and raise their children in freedom. Stand up for this freedom.

Sincerely,

Karen Contreras

1. OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!
2. SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

These shots are NOT proven safe for children, nor are they needed!

Subject: Comment on January 12th Board of Health Meeting

External Email

Washington State Board of Health:

Please know I am opposed to vaccine mandates of any kind for adults or children. COVID-19 has now been found to be manageable with appropriate treatment. These COVID-19 vaccines are still in the experimental phase and considering that there have been numerous claims of injuries and deaths that are associated with or believed to have resulted from a COVID vaccine, their safety is highly questionable.

I support Informed Choice Washington's Petition filed by Xavier Figueroa to adopt a rule to prevent adding this vaccine to school requirements. Please do not mandate these unproven vaccines on Washington citizens and especially on our children.

I also object to involuntary detainment of a person by law enforcement or health officer, or any type of isolation or quarantine in a facility for refusal of a vaccine and other medical treatment or to stop transmission of disease. These actions are unconstitutional and an intrusion on our civil liberties.

Thank you!

Krista McGaughy

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

1. Children are at extremely  
Extremely low risk for Covid.
- 2.The vaccines are still only EUA.
- 3.There are no long term studies to document any history of safety.
- 4.Studies do not document that vaccinated and unvaccinated can both can transmit Covid therefore,
- 5.The vaccine apparently does NOT stop the spread of the disease.

I am completely against any of the proposed Covid Policies and I feel that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

I will not support or allow our medical freedoms and right to choose for myself and my children be stripped away from us.

Thank you,  
Kirsten Hansen

To Whom It Does Concern:

I am appalled and ashamed to live in a state where WACs 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105 are being proposed, or even considered.

Not only are they illegal and immoral, but they also stand against everything our Constitution and Declaration of Independence were created to uphold. These laws were formed for "We the People" to establish a new nation after escaping a land of tyranny. These laws were to ensure that our government worked on behalf of the people and not in spite of them. These laws were established so the We the People have a right to the freedom of religion, speech, press, assembly and petition. I am exercising my First Amendment rights to make you aware that these WAC codes violate them.

Not only this, but this is a violation of medical privacy promised by HIPPA, and if enacted, those who proposed and supported these WAC codes should be prosecuted to the fullest extent of the law.

In World War Two, Hitler and Nazi German were convicted and condemned for war crimes because of proposals similar to the ones in these WAC codes (not to mention the Washington State Fairgrounds was used for Japanese Internment). I instead propose that we take the opportunity to learn from history and pave a different way, rather than allow it to repeat itself.

Thank you,  
Katy Payne  
Washington State Citizen

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our state for the following reasons:

\*\* Parents/guardians, not the government, should make their own informed decisions as to the safety and effectiveness of the vaccines for their children.

\*\* Children have a very low risk for contracting Covid-19, if they do contract the virus the vast majority have very mild cases.

\*\* The safety of the vaccines has not been verified in long term tests. As a result, the vaccines are only authorized for emergency use (AEU).

\*\* The NIH (Anthony Fauci) and the CDC (Rochelle Walensky) both have stated that the unvaccinated and the fully vaccinated can contract and transmit the virus, indicating that the vaccines do not prevent the spread of the disease. Why risk the health of our children?

\*\* Many of the vaccine mandates in place are being challenged in the courts and some have been struck down. This proposed mandate is most likely illegal.

Respectfully,

Jane Matsch  
Tacoma, Washington

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

- it is NOT preventing COVID so thus is not an actual vaccine. It is a shot much like the flu shot which is optional.
- the long term side effects are NOT being released to the public for 75 years because we have NO IDEA what they will be.
- When children get COVID it is more likely a sniffle cold then deadly.
- Vaccinated and Unvaccinated people still spread COVID.

Respectfully,  
Melissa Kugler, MSW, LSWAA

External Email

Dear BOH,

I am writing this comment for the January 12, 2022 meeting.

Ref item #8: I strongly oppose forming a tech advisory group. This is taking steps to consider adding the covid shot to the vaccine schedule for school age kids. This is still under EUA and at this point the risks far outweigh the benefits.

Ref item #11: I absolutely support this item. It is a petition filed by Informed Choice WA.

Please take the time to review this link:

Let me start by saying, I am not "anti-vaccine". I am vaccinated, for example I am vaccinated against polio. If I were to go in a room filled with polio positive people, I would not get it. I am vaccinated against the measles, if I were put in a room full of measles positive people, I wouldn't catch it. This experiment though, I will not comply with. If I did let them give me the "Covid vaccine", and I use that word very loosely, then I went into a room full of Covid positive people, I would get it.

FDA's own disclaimer listed on all fact sheets for COVID-19 vaccines which states, "It is your choice to receive or not receive the [Pfizer-BioNTech, Moderna, Janssen] COVID-19 Vaccine. Should you decide not to receive it; it will not change your standard medical care." This precise language is required by Federal statute because COVID-19 vaccines are not all FDA approved but rather are Emergency Use Authorization (EUA) only. The vaccines nor "passports" can be mandated. To go even further, mandates are not law and no recourse can be taken against people who chose to ignore the ridiculous orders.

The 14th Amendment to the US Constitution gives people protection of bodily integrity and prohibits discrimination on the basis of medical or genetic status. Natural immunity is superior to manufactured immunity. In addition, the vaccines can trigger a dangerous and deadly hyper-immune response in people with immunity. It is unlawful, and unconstitutional, to administer experimental agents to individuals who cannot make an informed decision as to the true benefits and risks of the vaccines. They must be of an age or a capacity to make informed decisions and they must be provided with all of the risk/benefit information necessary to make an informed decision. emergency use products are specifically prohibited by federal law 21 U.S.C. §360bbb-3 from being mandated. We do not know the official side effects or long term reproductions of these drugs.

This has been attested to by thousands of doctors worldwide including several testifying before Congress. CDC's own numbers reveal the truth, which is that your own immune system can virtually always manage this virus. According to the CDC, even without treatment, the survival rate is 99.98% under age 50 and almost 95% over age 70. Both numbers approach 100% with early treatment. The vaccines will not protect you from delta and future variants, and have serious side effects, including death (>13,000 in the CDC database VAERS). Doctors have always known that natural immunity is far superior (more robust, longer lasting) to vaccine immunity, and the data is now accumulating that the vaccines are failing with vaccinated people being 13x more likely than unvaccinated to be diagnosed and 27x more likely to become sick. The latest research portends great harm from the vaccines.

Codes of Medical Ethics absolutely prohibits any form of coercion whatsoever to individuals to participate in a medical experiment; and consent to receive medications is black letter law (since Nuremburg), and it must not be discarded in favor of scarlet

letters of segregation. It is critical that those in positions of authority are making decisions and implementing public policy based on thorough consideration of the relevant medical data. Any mandate, or merely even implied pressure, to take a new drug that lacks long-term health and safety data is categorically reckless and unethical.”

All persons reserve the right, at all times, to determine what is in their own best medical interest without threat to their livelihood, schooling, or freedom of movement.

Under the 2005 PREP Act enacted by Congress, pharmaceutical companies that manufacture EUA vaccines are shielded from liability related to injuries and damages caused by their experimental agents. However, any employer, public school, health professional or officer or any other entity or person who mandates experimental vaccines (mandates, punishments or job security included) on any human being is not protected from liability for any resulting harm. While vaccine manufacturers may be shielded from liability, your institution is not protected, and neither are you.

You are hereby on notice that if you illegally or irresponsibly mandate EUA medical requirements, such as the experimental Covid-19 vaccines to live normal life, People may have no choice but to take legal action, and you may be personally liable for resulting harm.

I ask you,

If masks worked.... Why did we have to social distance?

If the social distance worked... why did we go into lockdown?

If lockdowns worked... why the rush for a vaccine?

If the Vaccines worked.... Why are the vaccinated still spreading?

If the vaccinated are still spreading germs and catching Covid.... Why are they being forced?

As elected officials, you entered into a social contract with the people who reside in Washington state and therefore must use your office to act on behalf of said residents as a matter of the public trust.

It is my demand as a person residing in washington state (a person with rights endowed by his creator) that this body and individuals with positions in the public trust, act in accordance with the Common Law, the Constitutions of Washington AND the united states of America and International Laws of War

The Fourteenth Amendment Section 1. states:

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

TITLE 18, U.S.C., SECTION 242 states

Whoever, under color of any law, statute, ordinance, regulation, or custom, willfully subjects any person in any State, Territory, Commonwealth, Possession, or District to the

deprivation of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States, ... shall be fined under this title or imprisoned not more than one year, or both; and if bodily injury results from the acts committed in violation of this section or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire, shall be fined under this title or imprisoned not more than ten years, or both; and if death results from the acts committed in violation of this section or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse, or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title, or imprisoned for any term of years or for life, or both, or may be sentenced to death.

42 USC 252.05 (9) Any person licensed, permitted, registered or certified under ch. 441 or 448 shall use ordinary skill in determining the presence of communicable diseases.

Please also note that despite the fact that purification is an essential (but not sufficient) step in proving the existence of a disease-causing "virus", as of today 68 institutions globally (including the U.S. CDC, Public Health Agency of Canada, Australian Department of Health, New Zealand Ministry of Health, European Centre for Disease Prevention and Control, UK Department for Health and Social Care, Indian Council of Medical Research) have all failed to provide or cite any such records, therefore to my knowledge no such records exist and if they do exist I cannot access them until I am provided a citation or URL.

Thank you,  
Miranda Pennington

Subject: Comments against the proposed covid-19 policies

External Email

Good morning,

I am writing to voice my comments and concerns regarding the upcoming voting on Jan 13th for new covid policies including adding covid vaccine to the list of required vaccinations for school aged kids, and involuntary detainment by law enforcement for covid quarantine.

As a mother of two kids - 5 and 7 years old - I am very concerned with requiring our kids to have the covid vaccine to attend school. We have seen the constant evolution of the covid virus, into a more transmittable and less severe sickness, and I have to believe that as time continues, this virus will continue to evolve and will never completely go away. That said, just like the flu evolves every year and some get their children vaccinated against the flu (which my husband and I have chosen to do for our kids - so I have no problem with vaccinations when they make sense), I can not imagine being forced to do that to my kids as a requirement for them to be in school, given what we have seen with covid over the past 2 years. We have seen that kids don't typically get severe covid, and we have seen that vaccinated persons still pass the virus. So it appears that the vaccine at this point, is a personal decision for one's self to make, to potentially lessen their own symptoms if they contract covid, not protect the greater population. Additionally, if this is put into place, the state will see a huge drop in kids attending public school, which will significantly cut funding for our school systems. I saw a number recently of total kids vaccinated which was something around 20% (that isn't an exact figure, but the point is the percentage is LOW). Clearly there are a huge number of people that do not believe it is more beneficial to vaccinate their children for covid right now, and forcing this upon them is not the answer.

Because of these and other concerns, I do not support including the covid vaccination as a requirement for school aged kids.

As for the other topic regarding forced quarantine in quarantine facilities for individuals who do not comply with the covid rules, I 100% believe the government is overstepping its bounds. This is a disgusting topic to even be discussed. We are limited on the law enforcement we have to help keep our communities safe, and now we want to use them to enforce quarantine? We have been told many times, that transmission occurs before people are symptomatic. So, transmission will continue to occur regardless of this type of quarantine measure being put into place. Covid is here to stay - rather than trying to tighten the rules and dictate how we are going to "try" to solve this problem, perhaps we should focus on how do we put measures into place to promote better health - more exercise, better quality of food, getting our vitamins. The CDC has even said that poor health, obesity, etc leads to worse outcomes from covid - oh and by the way, those same poor health habits also contribute to heart disease which kills far more people each year than covid has. We all need to reset our mindset- this has gotten (and continues to be) out of hand. I'm disappointed in our leaders and the "ideas" that are being discussed to "solve covid", when we all know it's here to stay AND has a very high survival rate, especially now that the variants are mutating and getting weaker.

For these reasons, I 100% do not agree with implementing any type of forced quarantine at quarantine facilities (how much tax payer money does that cost by the way...).

In closing, I would like to thank everyone for their time spent. However, I would also like to remind everyone to review the true facts of what we are dealing with. It's easy to get caught up in the crazy and in turn, respond in a crazy manner- but that does no one any good. I believe we need to step back, look at covid for what it really is today- a cold that is passed quickly and less severe from the original covid-19. Time to get back to living our lives without so much fear that we are implementing overarching rules that don't actually help to solve anything, accept show control. It's quite disturbing and frankly disgusting.

I do not support any of the following proposed WACs-

WAC-246-100-070

WAC-246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

Thank you for your time,  
Krystal Theis

Subject: Comment pertaining to January 12, 2022 Board Meeting: Immunization Criteria for Child Care and School Entry

External Email

6 January 2022

Dear Washington State Board of Health,

I am writing to ask that state mandated Covid-19 shots absolutely not be imposed upon children in Washington state.

Numerous medical professionals have voiced serious concerns about subjecting millions of children to forced vaccinations with no idea if the risk-benefit is favorable.

No clinical trials have been cited, or conducted presumably, despite the FDA's latest emergency approval.

The word "trial" doesn't even appear in the recent [@US\\_FDA](#) press release.

These vaccines are still only emergency use authorized, (EUA).

In the face of the low risk to children of Covid-19 and the unknown risk of these vaccinations, please move that Covid shots should absolutely not be a requirement for our children to attend school or childcare.

sincerely,

Jacqueline Dreiske

On behalf of your January 12th meeting with comments due today, January 7th:

I do NOT agree with your proposal. I do NOT support any part of this proposal.

Please remember, kids are at a very LOW risk for getting COVID and/or harsh symptoms for COVID. This vaccine is still in EUO and therefore NOT fully FDA approved. There are ZERO long-term health studies completed and therefore the risks are still unknown. Clearly the vaccine does NOT stop the spread and my kids will NOT be part of your experiment.

I have 2 young kids that will not be getting the vaccine. If you push for mandatory vaccinations for children, you are putting our children's education at risk. Those parents who are willing to give their children the vaccine, will get their kids vaccinated. Otherwise, you are looking at a HUGE public school drop-out which will result in severe drop in funding for our communities and public education system. You are creating a divide in our community. Please stop making a vaccination status public. This is private information and should NOT be mandated. STOP!

I am opposed to making COVID-19 shorts mandatory for school admission or childcare in our State for the following Reasons:

Experimental

Do not know long term affects

Kids not experiencing issues the same way older people due when they catch COVID

Testing is not accurate

Vaccine not stopping the spread-everyone WILL get it at some point and most likely wont even know

Dear BOH,

I am writing this comment for the January 12, 2022 meeting.

Ref item #8: I strongly oppose forming a tech advisory group. This is taking steps to consider adding the covid shot to the vaccine schedule for school age kids. This is still under EUA and at this point the risks far outweigh the benefits.

Ref item #11: I absolutely support this item. It is a petition filed by Informed Choice WA.

Please take the time to review this link:

<https://www.canadiancovidcarealliance.org/media-resources/the-pfizer-inoculations-for-covid-19-more-harm-than-good-2/>

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following Reasons:

There has not been adequate testing or evidence of this vaccine that makes it necessary to mandate it for our children. We need at least 5 years of testing/research before we can really understand the risks. Harms and risks from new medicines often become revealed many years later. We do not know the long term effects this will have on our children and as a parent that is alarming.

I am opposed to making COVID-19 shots mandatory for school admission or childcare in our State for the following

Reasons:

- \* Children are at extremely low risk for Covid
- \* The vaccines are still only EUA (emergency use authorized)
- \* There are no long-term studies to document any history of safety
- \* Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore,
- \* The vaccine apparently does not stop the spread of the disease

STOP the insanity! Listen to the people of WA state or you'll end up losing them to free states!

Subject: COMMENTS FOR IMMUNIZATION TECHNICAL ADVISORY GROUP

#### External Email

Let me start by saying, I am not "anti-vaccine". I am vaccinated, for example I am vaccinated against polio. If I were to go in a room filled with polio positive people, I would not get it. I am vaccinated against the measles, if I were put in a room full of measles positive people, I wouldn't catch it. This experiment though, I will not comply with. If I did let them give me the "Covid vaccine", and I use that word very loosely, then I went into a room full of Covid positive people, I would get it.

FDA's own disclaimer listed on all fact sheets for COVID-19 vaccines which states, "It is your choice to receive or not receive the [Pfizer-BioNTech, Moderna, Janssen] COVID-19 Vaccine. Should you decide not to receive it; it will not change your standard medical care." This precise language is required by Federal statute because COVID-19 vaccines are not all FDA approved but rather are Emergency Use Authorization (EUA) only. The vaccines nor "passports" can be mandated. To go even further, mandates are not law and no recourse can be taken against people who chose to ignore the ridiculous orders.

The 14th Amendment to the US Constitution gives people protection of bodily integrity and prohibits discrimination on the basis of medical or genetic status. Natural immunity is superior to manufactured immunity. In addition, the vaccines can trigger a dangerous and deadly hyper-immune response in people with immunity. It is unlawful, and unconstitutional, to administer experimental agents to individuals who cannot make an informed decision as to the true benefits and risks of the vaccines. They must be of an age or a capacity to make informed decisions and they must be provided with all of the risk/benefit information necessary to make an informed decision. emergency use products are specifically prohibited by federal law 21 U.S.C. §360bbb-3 from being mandated. We do not know the official side effects or long term reproductions of these drugs.

This has been attested to by thousands of doctors worldwide including several testifying before Congress. CDC's own numbers reveal the truth, which is that your own immune system can virtually always manage this virus. According to the CDC, even without treatment, the survival rate is 99.98% under age 50 and almost 95% over age 70. Both numbers approach 100% with early treatment. The vaccines will not protect you from delta and future variants, and have serious side effects, including death (>13,000 in the CDC database VAERS). Doctors have always known that natural immunity is far superior (more robust, longer lasting) to vaccine immunity, and the data is now accumulating that the vaccines are failing with vaccinated people being 13x more likely than unvaccinated to be diagnosed and 27x more likely to become sick. The latest research portends great harm from the vaccines.

Codes of Medical Ethics absolutely prohibits any form of coercion whatsoever to individuals to participate in a medical experiment; and consent to receive medications is

black letter law (since Nuremburg), and it must not be discarded in favor of scarlet letters of segregation. It is critical that those in positions of authority are making decisions and implementing public policy based on thorough consideration of the relevant medical data. Any mandate, or merely even implied pressure, to take a new drug that lacks long-term health and safety data is categorically reckless and unethical.”

All persons reserve the right, at all times, to determine what is in their own best medical interest without threat to their livelihood, schooling, or freedom of movement.

Under the 2005 PREP Act enacted by Congress, pharmaceutical companies that manufacture EUA vaccines are shielded from liability related to injuries and damages caused by their experimental agents. However, any employer, public school, health professional or officer or any other entity or person who mandates experimental vaccines (mandates, punishments or job security included) on any human being is not protected from liability for any resulting harm. While vaccine manufacturers may be shielded from liability, your institution is not protected, and neither are you.

You are hereby on notice that if you illegally or irresponsibly mandate EUA medical requirements, such as the experimental Covid-19 vaccines to live normal life, People may have no choice but to take legal action, and you may be personally liable for resulting harm.

I ask you,

If masks worked.... Why did we have to social distance?

If the social distance worked... why did we go into lockdown?

If lockdowns worked... why the rush for a vaccine?

If the Vaccines worked.... Why are the vaccinated still spreading?

If the vaccinated are still spreading germs and catching Covid.... Why are they being forced?

As elected officials, you entered into a social contract with the people who reside in Washington state and therefore must use your office to act on behalf of said residents as a matter of the public trust.

It is my demand as a person residing in washington state (a person with rights endowed by his creator) that this body and individuals with positions in the public trust, act in accordance with the Common Law, the Constitutions of Washington AND the united states of America and International Laws of War

The Fourteenth Amendment Section 1. states:

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

TITLE 18, U.S.C., SECTION 242 states

Whoever, under color of any law, statute, ordinance, regulation, or custom, willfully

subjects any person in any State, Territory, Commonwealth, Possession, or District to the deprivation of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States, ... shall be fined under this title or imprisoned not more than one year, or both; and if bodily injury results from the acts committed in violation of this section or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire, shall be fined under this title or imprisoned not more than ten years, or both; and if death results from the acts committed in violation of this section or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse, or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title, or imprisoned for any term of years or for life, or both, or may be sentenced to death.

42 USC 252.05 (9) Any person licensed, permitted, registered or certified under ch. 441 or 448 shall use ordinary skill in determining the presence of communicable diseases.

Please also note that despite the fact that purification is an essential (but not sufficient) step in proving the existence of a disease-causing "virus", as of today 68 institutions globally (including the U.S. CDC, Public Health Agency of Canada, Australian Department of Health, New Zealand Ministry of Health, European Centre for Disease Prevention and Control, UK Department for Health and Social Care, Indian Council of Medical Research) have all failed to provide or cite any such records, therefore to my knowledge no such records exist and if they do exist I cannot access them until I am provided a citation or URL.

LEAVE OUR CHILDREN ALONE!

Thank you,

Miranda Pennington

Good Morning,  
I am referencing the meeting regarding:  
WAC 246 100-070  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

As a voter in the state of Washington I am absolutely against all of the above WAC 246-100. I believe these codes are against our Federal and State Constitutional rights as citizens of Washington State and the United States of America. By passing these codes, we become similar to Communist Germany Detention Camps. By passing these codes, I feel those that vote in favor should be imprisoned.

Respectfully  
Keith Bell 253-350-7240

Subject: WA state vax requirements - stats

External Email

I am very concerned that you are ignoring your own statistics.

Copied: King County Public Health (KCPH) released new data on Jan. 6 showing that the County significantly under-counted positive tests for Covid-19 amongst the "fully vax'd" by about 10,000, and over-counted positive tests amongst the "unvax'd" by about 10,000 during the period from March 1 to Dec. 22, 2021.

I'm an engineer with 35-years of experience in data analysis. I've been tracking the "vax" breakthrough rate data released weekly by KCPH for months, and I noticed the unexplained 20,000 shift of positive test counts from "un-vax'd" to "vax'd" when KCPH released updated data on Thursday (1/6). What this significant accounting change means now is that the majority of positive tests in King County have been amongst the "fully vax'd" since late October of last year. State and County officials should have known this fact last fall when they were mandating the "vax", terminating non-compliant public employees, and restricting the activities of citizens who object to showing proof of being "vax'd".

The first chart attached to this post that I made using KCPH data shows the addition of 10,214 Positive tests (denoted in orange) to the daily timeline for the "fully vax'd", and the corresponding removal of 9,860 positive tests from the daily positive test timeline for the "un-vax'd" (denoted in blue) that nearly mirrors the additional positive tests added to the "fully vax'd" timeline.

The second chart attached to this post shows the "vax" breakthrough rate in heavily "vax'd" King County using the latest data from KCPH. As shown, there was a sharp rise in the breakthrough rate after May that parallels the increase in vaccination percentages in the County. Based on the newly updated data released on Jan. 6, the majority of positive tests within heavily "vax'd" King County have been amongst the "fully vax'd" since October. Currently, 60 - 70% of positive tests or "cases" in King County are amongst the "fully vax'd".

The third plot attached to this post shows the breakthrough data for positive tests that have occurred in hospitals, and the fourth plot shows the breakthrough data associated with deaths. The effectiveness of the "vax" to reduce hospitalizations and deaths associated with Covid-19 has steadily declined over time. Currently, about 50% of hospitalizations and 40% of deaths in King County are amongst the "fully vax'd".

The color coding on my plots is as follows:

- Vertical Blue Bars = Total Numbers of Positive Tests, Hospitalizations, or Deaths
- Vertical Orange Bars = Total Numbers of "Vax" breakthrough events
- Orange Line = "Vax" Breakthrough percent
- Green Lines = Percentages of "fully vax'd" and "boosted" over time
- Gray Line = Average relative "vax" effectiveness in the community

KCPH provides far more comprehensive "vax" breakthrough data than what is available from the Washington State Department of Health or the CDC. With a population of over 2.25-million, which accounts for 30% of the population of Washington State, I believe that the King County data should be representative of trends that could be observed in other counties or States if the data was made publicly available.

For reference, I've included screen shots of the KCPH data with links to where it can be found on the KCPH website. Plot 5 shows the old positive test breakthrough rate data that KCPH posted prior to the significant data shift that was posted on Jan. 6 (Plot 6).

A PDF of the plots attached to this post is available via the following link. I have no objection to this data being shared.

Original Message

On Friday, January 7th, 2022 at 10:58 AM, Lili <[realitywatcher@protonmail.com](mailto:realitywatcher@protonmail.com)> wrote:

Mandating this experimental "vaccine" (gene therapy) for school attendance is irresponsible. Children are rarely at risk from this virus and they are at a much higher risk of myocarditis (and much more) from this experimental "vaccine". Experiments should always be voluntary - Nuremburg Code.

There are numerous studies regarding efficacy and potential risks and the "benefit" (if any) simply does not outweigh the risk by any stretch of the imagination. Real world data only increasingly illustrates that these mandates, masking, vaccinating, social distancing etc aren't working. Cruise ships, the NFL, and places in the world with very high vaccination rates are still experiencing the virus.

A mandate for schools will only collapse the system further as parents will simply pull their children out of the education system or move to a more free state.

That this is even a consideration is atrocious.

WA State Board of Health,

I am writing to inform you that my wife and I are COMPLETELY against any of the proposed initiatives put forth to be considered as policy (WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105).

This is NOT 1930's Germany. We do NOT treat people with such immoral, unethical, harsh treatment. Stop ignoring the data coming out from world renown doctors and acknowledge there ARE other viable treatments for Covid-19. I understand there is a HUGE financial incentive to promote and push a EUA Vaccine.....I do, I totally get it. However, you are breaking various international law (not to mention our very own Constitution....which you don't seem to care about), including the Nuremburg Code. The people are waking up to your blatant disregard of the law and will not stand on the sideline forever.

If science is not allowed to be questioned, it is NOT science! You can deceive, cheat, lie, steal to try and convince people that you are the all and knowing but the truth is you have made such obvious mistakes along the way trying to cover up and control the narrative. Your biasness and financial motives are clear as day. Stop the madness before you go to far and vote NO on these policies.

Signed,

Matthew Carter

External Email

As a resident of the State of Washington, I am asking the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Please do what is best for our children and vote no to Covid vaccines being required to attend school. Parents should be able to make these choices for & with their kids. It should not be made mandatory.

1. COVID vaccines remain under Emergency Use Authorization. This is not a proven vaccine. We don't know what all the side effects will be in 3, 5 or 10 years. We have already witnessed some terrible reactions & deaths in adults & children.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection. Covid does not react the same way with kids. Why would you give your kids a vaccine that has unknown & harmful side effects, when they have a 99.995% survival rate from Covid.
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. Plus the unknown & already known side effects & deaths.

I am a retired teacher & I would absolutely not be part of giving this vaccine to students. This is not the schools job. I would not want to be responsible for these side effects or even deaths to our children. This decision should be made by the individual families.

Thank You for your time & please do what is best for our kids. Vote no to this mandatory vaccine rule for our kids to attend school. I'm expecting to see many home school families, if this requirement goes through. I hate for kids to miss out on learning experiences & the fun of their school days.

As an educator, I do not see the benefits of inoculating students for the COVID-19. mRNA vaccines -products have been known to trigger the body's immune system to cause inflammation for the heart muscle and the lining outside the heart. These experimental vaccines have caused myocarditis and pericarditis in children. There is no safety of efficacy data for individuals 18 years and younger. These shots wear off in 6 months and causes damage for 15 months as the body continuously produces toxic spike protein. The spike protein causes blood clots, myocarditis and pericarditis, strokes, heart attacks and neurological damage, just to name a few. Children aged 12 to 17 are five times more likely to be hospitalized with COVID jab-induced myocarditis than they are to be hospitalized for COVID-19 infection. Children have a natural immunity. That is not even being considered! Or how about early treatment if the student does become infected? Vaccine makers are immune from liability. They are not responsible for any adverse events or deaths their products cause. Will you be responsible? These vaccines don't stop transmission or infection. They don't stop the spreading of the virus. Getting vaccinated doesn't mean you won't get COVID. And then there is the issue of consent. You are completely disregarding bioethics. These mandates of an experimental vaccine are explicitly illegal and inconsistent with the Nuremberg Code. Why not build our future students with better nutritional lunches? Why not help keep their natural immunity strong? Bottom line, as a teacher, I do not want to see my students suffer or die from these vaccines. Invest in humanity---not genocide.

Linda Grover

there was in the blood or tissue of the patients taking it." I URGE YOU TO COMPARE THIS TO OUR CURRENT AVAILABLE VACCINES. While the FDA approved Comirnaty, it is not currently available in the US- the EUA version is the only available formulation. There is no existing placebo arm- the placebo arm was encouraged to get the active shot. The VAERS currently has over 1,000,000 adverse event submissions, including death, cardiovascular, neurological and reproductive, for the C19 mRNA shot which must be vetted to establish safety signals and causation vs correlation. The biodistribution of the mRNA technology has not been disclosed.

WA State Board of Health,

I am in support of Dr. Xavier Figueroa's petition requesting that the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

To require the administration of a medical procedure under an EUA is illegal and immoral. That is especially the case of a child who can never provide informed consent by the very virtue of their age.

All sitting members of the board need to view the interviews by Dr. Malone who is the inventor of the mRNA vaccine. He adamantly voices his concern about vaccinating children with this experimental product. There are many other distinguished scientists who concur.

To whom it make concern,

I am emailing to oppose the possible requirements of a child 5 & over needing the covid vaccine to attend school. I do vaccinate my children with other vaccines. However, this covid vaccine is so recent. I am vaccinated & boosted. I just feel there is too much unknown & I have an uneasy feeling about my children getting it. Please do not force parents to make this difficult decision. All children need education. This is scary times.

Thank you,

Questions:

!) Why mask mandates when they don't stop the virus and lower IQs in children?

A cluster randomised trial of cloth masks compared with medical masks in healthcare workers

NIH National Library of Medicine April 22, 2015

<https://pubmed.ncbi.nlm.nih.gov/25903751/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F25903751/>>

Results: The rates of all infection outcomes were highest in the cloth mask arm, with the rate of ILI statistically significantly higher in the cloth mask arm (relative risk (RR)=13.00, 95% CI 1.69 to 100.07) compared with the medical mask arm. Cloth masks also had significantly higher rates of ILI compared with the control arm. An analysis by mask use showed ILI (RR=6.64, 95% CI 1.45 to 28.65) and laboratory-confirmed virus (RR=1.72, 95% CI 1.01 to 2.94) were significantly higher in the cloth masks group compared with the medical masks group. Penetration of cloth masks by particles was almost 97% and medical masks 44%.

Conclusions: This study is the first RCT of cloth masks, and the results caution against the use of cloth masks. This is an important finding to inform occupational health and safety. Moisture retention, reuse of cloth masks and poor filtration may result in increased risk of infection. Further research is needed to inform the widespread use of cloth masks globally. However, as a precautionary measure, cloth masks should not be recommended for HCWs, particularly in high-risk situations, and guidelines need to be updated.

Effectiveness of N95 respirators versus surgical masks against influenza: A systematic review and meta-analysis

Pubmed PMID: 32167245 PMCID: PMC7228345 DOI: 10.1111/jebm.12381 March 3, 2020

<https://pubmed.ncbi.nlm.nih.gov/32167245/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F32167245/>>

Conclusion: The use of N95 respirators compared with surgical masks is not associated with a lower risk of laboratory-confirmed influenza. It suggests that N95 respirators should not be recommended for general public and nonhigh-risk medical staff those are not in close contact with influenza patients or suspected patients.

Lockdown Policies and Mask Mandates Linked With Lower IQ in Children: Psychiatrist

The Epoch Times By Tammy Hung Dec. 26, 2021

[https://www.theepochtimes.com/lockdown-policies-and-mask-mandates-linked-with-lower-iq-in-children\\_4177711.html](https://www.theepochtimes.com/lockdown-policies-and-mask-mandates-linked-with-lower-iq-in-children_4177711.html)

The nation's recent lockdown policies and mask mandates will create a generation of children who exhibit lower IQs and signs of social brain damage, according to a clinical psychiatrist for children and adolescents.

Dr. Mark McDonald cited an Aug. 11 study by Brown University that found that "children born during the pandemic have significantly reduced verbal, motor, and overall cognitive performance compared to children born pre-pandemic," during an interview with host Cindy Druker on a Dec. 25 episode of NTD's "The Nation Speaks." NTD is a sister media outlet of The Epoch Times.

2) Why use ventilators and Remdesivir when it causes kidney damage?

Doctor's Court Testimony: Ventilators 'Causing Harm,' Death in COVID Patients

The Epoch Times BY NANETTE HOLT January 10, 2022 Updated: January 11, 2022

The family of a dying patient at a Florida hospital has filed an emergency appeal they hope will overturn a lower court's decision and force Mayo Clinic to give their preferred treatment for COVID-19.

Judge Marianne Aho of Florida's Fourth Judicial Circuit ruled against the family during an emergency hearing on Dec. 30.

In her order, Aho wrote that attorneys for the family of Daniel Pisano "have not established that the rights of privacy, self-determination, or any other right, entitles them to" the injunction they were seeking.

But attorneys for the family insist the Florida Patient's Bill of Rights gives Daniel Pisano's family the right to choose his treatment.

The patient's son and his wife of 51 years have power of attorney giving them the legal right to make medical decisions for him while he is unconscious. And that includes the right to choose his treatment, argue their attorneys, Nick Whitney, of Jacksonville, and Jeff Childers, of Gainesville.

.....  
The use of ventilators seem to push patients on to a path of death, says Dr. Eduardo Balbona, the independent Jacksonville doctor helping the Pisano family.

“In New York, over 65 ICU ventilated patients [had] a mortality of 97 percent,” he testified before Judge Aho.

“I know in [Ascension’s] St. Vincent’s [Southside Hospital in Jacksonville, in the] ICU, Delta last summer had a mortality of 93 percent. It’s very hard to get those kind of mortality levels from the virus itself. I believe the treatment we’re using is doing harm.”

Balbona was trained at the National Naval Medical Center and was an official doctor providing care for members Congress at the U.S. Capitol. Because he is not officially associated with Mayo Clinic, he cannot provide care to Pisano there.

His hope is that a judge will order Mayo Clinic doctors to provide the treatment he’s prescribed, allowing Pisano to be weaned from the ventilator and discharged. Only then would the Pisano family be free to follow his directives. His experience treating seriously ill patients leads him to believe Pisano could improve quickly, once started on the protocol he has recommended.

Mayo Clinic has refused to treat Pisano with the medications and supplements the family believes are his only chance to survive.

The organization’s attorneys submitted an affidavit from Dr. Pablo Moreno Franco that said, “In general, it is difficult to know what the side effects would be for the medication [ivermectin] if administered at the requested level.”

More than 90 peer-reviewed studies have been published demonstrating the drug’s efficacy at treating patients suffering from COVID-19.

.....

As part of Mayo Clinic’s protocol, doctors there administered the drug Remdesivir, “which in turn damaged Dan’s kidneys, a known side-effect,” according to the family’s lawsuit.

.....

Balbona says he can’t understand why Mayo Clinic doctors aren’t treating Pisano with drugs that have been shown to work.

“He is not on dexamethasone; he should be,” Balbona testified. “Fluvoxamine has been shown to decrease mortality by about 90 percent. Again, he should be on fluvoxamine. The vitamin C, vitamin D, and zinc are ionophores that, again, stop the inflammatory process. There’s no reason he shouldn’t be on these medicines. They’re very safe. They’re not controversial.”

---

Kidney disorders as serious adverse drug reactions of remdesivir in coronavirus disease 2019: a retrospective case–noncase study

Laurent Chouchana,<sup>1</sup>□Laure-Hélène Preta,<sup>1</sup> Mylène Tisseyre,<sup>1</sup> Benjamin Terrier,<sup>2</sup> Jean-Marc Treluyer,<sup>1</sup> and François Montastruc<sup>3</sup>

PMC, US National Library of Medicine, National Institutes of Health Feb. 26, 2021

Remdesivir and Acute Renal Failure: A Potential Safety Signal From Disproportionality Analysis of the WHO Safety Database

Clin Pharmacol Ther. 2021 Apr;109(4):1021-1024. doi: 10.1002/cpt.2145. Epub 2021 Jan 16.

<https://pubmed.ncbi.nlm.nih.gov/33340409/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fpubmed.ncbi.nlm.nih.gov%2F33340409/>>

#### Abstract

Remdesivir is approved for emergency use by the US Food and Drug Administration (FDA) and authorized conditionally by the European Medicines Agency (EMA) for patients with coronavirus disease 2019 (COVID-19). Its benefit-risk ratio is still being explored because data in the field are rather scant. A decrease of the creatinine clearance associated with remdesivir has been inconstantly reported in clinical trials with unclear relevance. Despite these uncertainties, we searched for a potential signal of acute renal failure (ARF) in pharmacovigilance postmarketing data. An analysis of the international pharmacovigilance postmarketing databases (VigiBase) of the World Health Organization (WHO) was performed, using two disproportionality methods. Reporting odds ratio (ROR) compared the number of ARF cases reported with remdesivir, with those reported with other drugs prescribed in comparable situations of COVID-19 (hydroxychloroquine, tocilizumab, and lopinavir/ritonavir). The combination of the terms "acute renal failure" and "remdesivir" yielded a statistically significant disproportionality signal with 138 observed cases instead of the 9 expected. ROR of ARF with remdesivir was 20-fold (20.3; confidence interval 0.95 [15.7-26.3],  $P < 0.0001$ ) that of comparative drugs. Based on ARF cases reported in VigiBase, and despite the caveats inherent to COVID-19 circumstances, we detected a statistically significant pharmacovigilance signal of nephrotoxicity associated with remdesivir, deserving a thorough qualitative assessment of all available data. Meanwhile, as recommended in its Summary of Product Characteristics, assessment of patients with COVID-19 renal function should prevail before and during treatment with remdesivir in COVID-19.

3) Why no early treatment with the off label FDA approved Ivermectin such as the Zelenko Protocol of Hydroxychloroquine and/or Ivermectin with Vitamins C and D3, and zinc, when under the Right to Try Act, this should be available?

Ivermectin Common brand names: Stromectol

The Assault on Ivermectin

By Michelle Edwards October 21, 2021

<https://uncoverdc.com/2021/10/21/the-assault-on-ivermectin/>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Funcoverdc.com%2F2021%2F10%2Fthe-assault-on-ivermectin%2F&data=04%7C01%7CWSBOH%40sboh.wa.gov%7C9d7a3b5f23824c9853c808d9d5fb9759>>

Ivermectin has been included in the World Health Organization's list of essential medicines (EML) since 1987 and remains there today. Still, despite a two-year-old pandemic and over sixty controlled studies, dozens of clinical trials, and in-depth meta-analysis confirming that Ivermectin significantly reduces hospitalizations, death, and most importantly, the risk of contracting COVID-19, the inexpensive drug has been purposefully rejected. Undeniably, it has been heavily censored and mischaracterized by the Biden Administration and the Big Pharma-funded mainstream media relentlessly advancing the "vaccinate everyone" agenda.

The Discovery of Ivermectin

The story of Ivermectin began in 1973 with the discovery of the unique and unusual soil-dwelling microorganism that produces the avermectins (from which Ivermectin is derived). Isolated in Japan by Satoshi Ōmura, the sample was sent to Merck laboratories, where, in 1975, it was found to produce a potent anthelmintic (parasite destroying) substance. The "more effective" Ivermectin—a purified, chemically modified bioactive agent of avermectin—was confirmed powerful in human health in 1987. As time passed, Ivermectin, which won a Nobel prize in 2015, was introduced to treat other human conditions, leading many experts to label it a "wonder" drug.

Without a doubt, very few drugs have been granted the title of "wonder drug" by the scientific community. According to a 2011 study published by the National Institutes of Health (NIH) titled "Ivermectin, 'Wonder drug' from Japan: the human use perspective," penicillin and aspirin are two drugs that can earnestly lay claim to that distinction, as can Ivermectin.

.....

"After more than 25 years of use, Ivermectin continues to provide a high margin of safety for a growing number of indications based on its anti-parasitic and anti-inflammatory activities."

Highlighting its endless possibilities, a February 15, 2017, review article published in The Journal of Antibiotics titled "Ivermectin: enigmatic multifaceted "wonder" drug continues to surprise and exceed expectations," details the different disease-fighting potential that has been identified for Ivermectin, including in the treatment of asthma. The research explains that a study in mice discovered that "Ivermectin significantly curtailed recruitment of immune cells, production of cytokines in the bronchoalveolar lavage fluids and secretion of ovalbumin-specific IgE and IgG1 [antibodies] in the serum. Ivermectin also suppressed mucus hypersecretion by goblet cells, establishing that Ivermectin can effectively curb inflammation, such that it may be useful in treating allergic asthma and other inflammatory airway diseases."

Early in the pandemic, the probability of Ivermectin being a viable treatment against SARS-CoV-2 was encouraging. Medical experts like Dr. Pierre Kory have repeatedly spoken about the benefits of Ivermectin in treating COVID-19. A June 12, 2020 article in Nature titled "Ivermectin: a systematic review from antiviral effects to COVID-19 complementary regimen" points out that Ivermectin is a broad-spectrum drug with high lipid solubility, anti-cancer, and antiviral effects. The study—the first to assess the antiviral effects of Ivermectin on COVID-19—notes that Ivermectin causes immunomodulation in the host. In other words, studies have shown it stimulates the immune system by inhibiting the proliferation of cancer cells. The article reports:

"In a recent in vitro study, the Vero/hSLAM cells infected with the SARS-CoV-2 or COVID-19 virus were exposed to 5 µM Ivermectin in 48 h, and a 5000-fold reduction in viral RNA compared with control was found [15]. The results showed that treatment with Ivermectin effectively kills almost all viral particles within 48 h."

---

[The Right to Try Act, or the Trickett Wendler, Frank Mongiello, Jordan McLinn, and Matthew Bellina Right to Try Act, was signed into law May 30, 2018. This law is another way for patients who have been diagnosed with life-threatening diseases or conditions who have tried all approved treatment options and who are unable to participate in a clinical trial to access certain unapproved treatments.]

---

The Lancet published an article online May 22, 2020 titled "Hydroxychloroquine or chloroquine with or without a macrolide for treatment of COVID-19: A multinational registry analysis." It stated, "Hydroxychloroquine or chloroquine, often in combination with a second-generation macrolide, are being widely used for treatment of COVID-19, despite no conclusive evidence of their benefit."

Note: This article was retracted because they did not have the data to support it.

---

4) According to the Health Officials, a person is not considered vaccinated unless he or she is up to date with vaccines and boosters. They also do not count them as vaccinated until 2 weeks after the second dose for Pfizer-BioNTech or Moderna vaccines. This means that even vaccinated people can be counted as unvaccinated. Do you count the people in the hospitals sick with COVID-19 the same way?

5) Why vaccine mandates when they are still experimental and long term effects are not know? The VAERS website is a clear indicator that these vaccines have some severe side effects such as heart problems and death. Why aren't you targeting on the people at high risk as opposed to the rest of the population that have practically zero risk of dying.

Please do what is best for our children and vote no to Covid vaccines being required to attend school. Parents should be able to make these choices for & with their kids. It should not be made mandatory.

1. COVID vaccines remain under Emergency Use Authorization. This is not a proven vaccine. We don't know what all the side effects will be in 3, 5 or 10 years. We have already witnessed some terrible reactions & deaths in adults & children.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection. Covid does not react the same way with kids. Why would you give your kids a vaccine that has unknown & harmful side effects, when they have a 99.995% survival rate from Covid.
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. Plus the unknown & already known side effects & deaths.

I am a retired teacher & I would absolutely not be part of giving this vaccine to students. This is not the schools job. I would not want to be responsible for these side effects or even deaths to our children. This decision should be made by the individual families.

Thank You for your time & please do what is best for our kids. Vote no to this mandatory vaccine rule for our kids to attend school. I'm expecting to see many home school families, if this requirement goes through. I hate for kids to miss out on learning experiences & the fun of their school days.

All,

Segregating and confining persons for their medical choices is not what this state or country should be about. Nor should we make decisions based on limited information to inject our children with experimental vaccines. I understand we have been "sticking" people for the last 18 months, but we still have no idea the long term effects of any of this. The option should be given, but a statute should not be directed. There should be no child denied education because of a health choice. Nor should they be discriminated against for making this choice. Please VOTE NO all of these clearly hyper reactive legislations driven by fear and not solid critical thinking. We are a stronger nation than this and need to stop living in fear of something that can clearly be managed by multiple different avenues.

The CDC director just said over 75% of "covid deaths" occurred in people with at least four comorbidities. Since Biden can't shut down covid, suddenly all this data is getting shared publicly. [pic.twitter.com/NKvproy3lx](https://pic.twitter.com/NKvproy3lx)

Subject: Vax Requirement for K-12

*attachments\E7A719B5015F401A\_VAERS-Summary-12312021.pdf*

External Email

I am writing to you as a very concerned parent about the possibility of REQUIRING the experimental Covid vax.

The School Board has no business implementing a vax requirement for children that is experimental and has been causing Adverse Effects in thousands of people. You only need to take a look at VAERS:

VAERS Summary for COVID-19 Vaccines through 12/31/2021 – VAERS Analysis

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fvaersanalysis.info%2F2022%2F01-summary-for-covid-19-vaccines-through-12-31-2021%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C002e84d767034a4cf18808d9d5fde4e5%7C11d>>

This "vaccine" doesn't below anywhere near our children as YOU don't know the long term ramifications of putting the spike protein into your system. The numbers of adverse affects are off the charts for the Covid shot.

There is currently a study going on that is looking at myocarditis and pericarditis occurring in children due to the number of adverse affects.

If you end up requiring the Covid "vaccine", will you be responsible to any adverse affects, including up to death of a child? Since there is no recourse currently provided, you should bear the burden.

The Board needs to stop wasting time the taxpayers time with this issue. Stay out of our children's health decisions for an experimental "vaccine". We will be watching all of you.

-- Lynda K. Nielsen

# VAERS Summary for COVID-19 Vaccines through 12/31/2021

All charts and tables below reflect the data release on 1/7/2022 from the VAERS website, which includes U.S. and foreign data, and is updated through: **12/31/2021**.

| High-Level Summary                            | COVID19 vaccines (Dec'2020 - present) | All other vaccines 1990-present | US Data Only COVID19 vaccines (Dec'2020 - present) | US Data Only All other vaccines 1990-present |
|-----------------------------------------------|---------------------------------------|---------------------------------|----------------------------------------------------|----------------------------------------------|
| Number of Adverse Reactions                   | 1,017,001                             | 866,447                         | 715,857                                            | 754,241                                      |
| Number of Life-Threatening Events             | 24,343                                | 14,304                          | 11,066                                             | 9,895                                        |
| Number of Hospitalizations                    | 113,303                               | 82,747                          | 46,755                                             | 38,770                                       |
| Number of Deaths                              | 21,382*                               | 9,447*                          | 9,778                                              | 5,233                                        |
| # of Permanent Disabilities after vaccination | 36,758                                | 20,668                          | 11,413                                             | 12,787                                       |
| Number of Office Visits                       | 158,761                               | 49,192                          | 139,299                                            | 47,086                                       |
| # of Emergency Room/Department Visits         | 110,704                               | 212,347                         | 88,944                                             | 202,864                                      |
| # of Birth Defects after vaccination          | 786                                   | 190                             | 435                                                | 103                                          |

\*Note that the total number of deaths associated with the COVID-19 vaccines is more than double the number of deaths associated with all other vaccines combined since the year 1990.

## Deaths

### Cumulative Reported Deaths After Vaccination - 1 Year Summary

Data obtained from CDC's VAERS

[Unknowns separated from All Other Vaccines for greater clarity; in a majority of cases the Unknowns are actually Covid-19]

## Reported Deaths by Week, COVID19 Vaccines

Data Obtained from CDC's VAERS

## Reported Deaths by Year, COVID19 vs. All Other Vaccines

Data Obtained from CDC's VAERS

# Reported Deaths by Year, COVID19 vs. All Other Vaccines, Cumulatively

Data Obtained from CDC's VAERS

# Age Distribution of Reported Deaths After COVID19 Vaccination

Data obtained from CDC's VAERS

# Reported Deaths By Vaccine Type, 1990-Present

Data Obtained from CDC's VAERS

# Deaths Per Million Doses (US Only) Traditional Vaccines (2006 - 2019), Covid-19 Vaccines (2020-Present)

Data Obtained from CDC's VAERS and NVICP data & statistics report

# Number of Deaths by Days After COVID19 Vaccination

Data obtained from CDC's VAERS

# Reported Deaths Daily vs. Doses Administered for COVID19 Vaccines (US Data Only)

Data Obtained from CDC's VAERS & CDC

■ Number of Deaths ■ Number of Doses

# Adverse Events

## Cumulative Reported AEs After Vaccination - 1 Year Summary

Data obtained from CDC's VAERS

[Unknowns separated from All Other Vaccines for greater clarity; in many cases the Unknowns are actually Covid-19]

## Reported Adverse Events by Year, COVID19 vs. All Other Vaccines

Data obtained from CDC's VAERS

## Weekly Distribution of Newly Reported Adverse Events After COVID-19 Vaccines By Date of Data Drop

(2/5/21 - 1/7/22)

## Reported Adverse Events Daily, COVID19 Vaccines vs. Doses Administered (US Data Only)

Data Obtained from CDC's VAERS

■ Number of AEs ■ Number of Doses

# Symptoms

The slide below was taken from an FDA document from October 22, 2020 and provides a list of possible adverse event outcomes related to the Covid-19 vaccines.

- Source: [Vaccines and Related Biological Products Advisory Committee October 22, 2020 Meeting Presentation](#)

**FDA Safety Surveillance of COVID-19 Vaccines :**

**DRAFT Working list of possible adverse event outcomes**

**\*\*\*Subject to change\*\*\***

- Guillain-Barré syndrome
  - Acute disseminated encephalomyelitis
  - Transverse myelitis
  - Encephalitis/myelitis/encephalomyelitis/ meningoencephalitis/meningitis/ encephalopathy
  - Convulsions/seizures
  - Stroke
  - Narcolepsy and cataplexy
  - Anaphylaxis
  - Acute myocardial infarction
  - Myocarditis/pericarditis
  - Autoimmune disease
- Deaths
  - Pregnancy and birth outcomes
  - Other acute demyelinating diseases
  - Non-anaphylactic allergic reactions
  - Thrombocytopenia
  - Disseminated intravascular coagulation
  - Venous thromboembolism
  - Arthritis and arthralgia/joint pain
  - Kawasaki disease
  - Multisystem Inflammatory Syndrome in Children
  - Vaccine enhanced disease

The following table lists the number of adverse events found in the VAERS data which match the outcomes listed above:

| FDA listed symptom                          | Total (Non-Lethal) Adverse Events | Total Deaths |
|---------------------------------------------|-----------------------------------|--------------|
| Guillain-Barre                              | 2035                              | 35           |
| Acute Disseminated Encephalomyelitis        | 150                               | 4            |
| Transverse Myelitis                         | 361                               | 3            |
| Encephalitis                                | 1691                              | 166          |
| Convulsions/Seizures                        | 12917                             | 376          |
| Stroke                                      | 12205                             | 1106         |
| Narcolepsy, Cataplexy                       | 247                               | 5            |
| Anaphylaxis                                 | 42978                             | 164          |
| Acute Myocardial Infarction (Heart Attack)  | 3665                              | 1089         |
| Myocarditis/Pericarditis                    | 15200                             | 183          |
| Autoimmune Disease                          | 1198                              | 24           |
| Other Acute Demyelinating Diseases          | 274                               | 3            |
| Pregnancy and birth outcomes (Miscarriages) | 3319                              | 104          |
| Other Allergic Reactions                    | 1905                              | 3            |
| Thrombocytopenia                            | 4439                              | 325          |
| Disseminated Intravascular Coagulation      | 192                               | 60           |
| Venous Thromboembolism                      | 18935                             | 1061         |
| Arthritis and Arthralgia/Joint Pain         | 66233                             | 197          |
| Kawasaki Disease                            | 63                                | 1            |

# Average Annual Adverse Events by Symptom for Covid-19 Vaccines as a Multiple of All Other Vaccines Combined since 1990

(Data from VAERS through 12/31/21)

## Vaccination Related Risks of Covid-19 vs. Flu

These set of figures compare the COVID19 vaccine to the traditional Flu vaccines. 'Risk of Death' percentages depend on the '# of Vaccinations' data, which is only approximate, and was pulled from the [CDC's report](#) on Flu vaccination coverage for the 2019-2020 season, and from [Our World in Data](#) for the COVID19 vaccinations.

**Covid19 vaccinations through 5/31/2021 vs. Flu vaccinations 7/1/2019 - 5/31/2020 (last complete flu season)**

| Vaccine Type                                                                  | # of Vaccinations <sup>[3]</sup> | # of Deaths | Risk of Death  | Percentage | Deaths/Mill. Vaccinations <sup>[3]</sup> |
|-------------------------------------------------------------------------------|----------------------------------|-------------|----------------|------------|------------------------------------------|
| Flu                                                                           | 167,447,642 <sup>[1]</sup>       | 33          | 1 in 5,074,171 | 0.000020%  | .20                                      |
| COVID19                                                                       | 167,733,972 <sup>[2]</sup>       | 5,627       | 1 in 29,808    | 0.003355%  | 33.55                                    |
| <b>Risk of dying from COVID vaccine is 170 times greater than Flu Vaccine</b> |                                  |             |                |            |                                          |

| Vaccine Type                                                                            | # of Vaccinations <sup>[3]</sup> | # of Adverse Reactions | Risk of Adverse Reaction | Percentage | AEs/Mill. Vaccinations <sup>[3]</sup> |
|-----------------------------------------------------------------------------------------|----------------------------------|------------------------|--------------------------|------------|---------------------------------------|
| Flu                                                                                     | 167,447,642                      | 9,714                  | 1 in 17,237              | 0.005801%  | 58.01                                 |
| COVID19                                                                                 | 167,733,972                      | 539,748                | 1 in 311                 | 0.3217%    | 3,217                                 |
| <b>Risk of adverse reaction from COVID vaccine is 55 times greater than Flu Vaccine</b> |                                  |                        |                          |            |                                       |

[1] number of flu vaccinations based on estimated flu vaccine coverage data from [CDC](#) and estimated population data from [US Census](#). Yearly flu vaccination data covers a period of time from 7/1 to 5/31 of the following year.

[2] number of covid19 vaccinations based on estimates from [Our World in Data](#)

[3] Persons vaccinated with at least one dose.

### Reported Deaths by Year, COVID19 vs. Flu Vaccines

Data Obtained from CDC's VAERS

## Vaccine Data by Manufacturer

| Manufacturer    | # of Deaths | % Deaths | Average Deaths/Day | # US Deaths | # US Doses Administered | Average US Deaths/Mill. Doses | Days since EUA approval | EUA Approval Date |
|-----------------|-------------|----------|--------------------|-------------|-------------------------|-------------------------------|-------------------------|-------------------|
| Janssen (JNJ)   | 1857        | 8.68%    | 6.03               | 1203        | 17,739,932              | 67.81                         | 308                     | 2/26/21           |
| Moderna         | 5200        | 24.3%    | 13.76              | 4054        | 196,396,103             | 20.64                         | 378                     | 12/18/20          |

Subject: Vaccine opposition

External Email

As a citizen of this fine state of Washington I am vehemently expressing this email as a notice of my opposition to any of the overreaching, abusive, abhorrent, and immoral COVID vaccine mandate policies being dicussed by my "representatives" in this state of Washington. It is an egregious error to dictate over the citizens of Washington with these policies, and as representatives is immoral to ask or entertain policies, such as WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. I am opposed and alarmed at those that entertain such and similar mandates.--

Subject: Vaccine Mandates & Proposed Quarantine Guidelines

External Email

Hello,

I would like to urge you not to mandate the the proposed ideas of forced vaccinations and quarantine camps in the state of Washington. Here are my reasons why:

\*Doctors who are actually treating covid, the variants and Omricon have protocols that are effective and keep the sick out of the hospital. They worked for me when I had covid last summer, and I am in my late 60's.

\*Covid is a non-issue for the young who generally have mild cases of it.

\*Omricon is actually more prevalent in the already vaccinated, and is more like the common cold in its severity.

\*A large portion of the population has already had covid and do not need the vaccination.

\*The CDC website has many thousand reports of those who have suffered and died from these vaccinations which are really not vaccines at all. Much harm has been caused especially amongst the children and those with pre-existing health risks by not prescribing the medicines that work rather than these emergency use shots.

\*Each person has the right under our U.S. Constitution not to be subjected to the type of tyranny by our government that forces a person to make a medical choice against his will. We've seen historically how nations have fared under these types of actions, and it never ended in more freedom for people, only more erosion of people's rights.

Many other states are focusing on getting the medicines that work to the people and getting their states back open for business. Let's begin treating this as as we do other illnesses.

These are the WAC's I am referring to:

WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Sincerely,  
Mary O'Dea  
Washougal, WA 98671

Subject: Shot mandates in school

External Email

Please do not put a mandate on our students in order to go to school and receive an education. This will create Mas Mas Mas disruption and chaos and stupidity among students. These kids want to go to school and not be forced into the stupidity of getting something they might not want to get. There is literally no data on future repercussions of this shot and what it will do to the body as time goes on. And to put it on our students in order to receive an education is absolutely asinine!

You guys have single-handedly ruined our children's education system already! Stop the freaking madness! This Oma Cron variant is nothing but a cold. We are not going to make our children get a Covid vaccine, that is not even a vaccine by the way it is nothing but a flipping flu shot. I will never get my children vaccinated on this crap. You don't even know what it's gonna do to them. Many many people have had nothing but problems with it! Please allow our children to go to school and get an education like before. As it is they've already been screwed up for the last two years in school because of you people. Stop this shit now it's ridiculous. It is a cold and a flu at best. If we hyped up all of the illnesses that could potential he kill people, nobody would ever leave their goddamn houses. Stop spreading crap and making people fearful!  
Sincerely another pissed off citizen!

Washington State Board of Health.

I am writing to inform you as a voting and concerne citizen of the State of Washington that I am against any mandate that forces children and their families to vaccinate against the Covid 19 virus and any of its variants, at this time. These supposed vaccinations have been thus far ineffective.

If in futher studies, this vaccine could prove to be safe for everyone, then I would reconsider. But at this time there is not enough information and studies to prove this vaccine safe, expecially for those who are our future.

I am not someone opposed to vaccines in general. My children and I have had several. There are others we have chosen not to recieve as well because we have felt them not necessary after consulting with our PCP.

Please do your part to stop this political play that is taking place throughout our nation and do what is best for the health of all individuals.

The critical statement below is "provide immunity", which is not happening. If this were

the case then we would not be seeing all the breakthrough cases of this disease. So why give our children something that has been proven not to be effective.

Thank you for "hearing" me as a voting citizen of this state and one who cares about the health of my children, grandchildren and my neighbors.

Subject: Subject line: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. The disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are opposing this plan should be charged with treason.

I am a true believer in your body your choice. If as a whole state we can let abortions happen at full term I think the people of Washington should be able to make a choice whether or not their kids or themselves are vaccinated. We shouldn't be forced to do anything we are not comfortable with. I have had family unvaccinated get Covid & they are fine. I have had a family member pass away from Covid but he was obese, had heart issues & was diabetic. So his body wasn't strong enough to fight off the virus. If someone is perfectly healthy & chooses to not get it that's their choice. If someone is perfectly healthy & choose TO GET IT that is their choice. Illness is part of life, it is the reason why we have immune systems & why our immune systems work the way they do. You guys have announced masks don't work, that those who are vaccinated are more likely to spread Covid than those unvaccinated. So what makes you think anyone wants to get vaccinated if they are more likely to get sick with Covid. This has been going on like enough & it's time to leave everyone alone & their kids & let us live our lives again. My friend works in a nursing home where the state has visited many times & you guys have done nothing about the conditions the elderly are in. They are understaffed due to firing over vaccine status. You keep people who are vaccinated & sick with Covid but not those who are unvaccinated with our Covid. Nothing you guys say makes sense or adds up anymore. I was true believer in vaccines until I had a mal practice issue with one of my daughters round of vaccines & pregnant with my Second daughter where a nurse told me pregnant women get a different flu vaccine without pesticides. Why is there two different flu vaccines & why don't more people know about it? Why is it that if a child is diagnosed with autism is now then exempt from all vaccines & if they have a sibling why are they too excluded, if vaccines are safe? We never tested for the flu, we were never forced for vaccines with the flu. The flu "disappeared" for a whole year & is now back. All the symptoms you list are common cold symptoms, but the common cold is gone ? Illnesses just don't go away... it's apart of life it's the way our body works to fight off illnesses. The elderly, people with underlying health conditions ect ect I understand getting vaccinated but if someone is perfectly healthy & choose to not get it for them or there kids, they need to be left alone. Let people make their choices. You guys have no idea what you are doing & are going to cause riots making these choices for peoples lives. I would love to know if everyone of you are vaccinated. How many times have you went & gotten your boosters ? Why aren't you guys talking about people taking care of their health with food & exercise? Things need to change & it has nothing to do with being vaccinated. It has everything to do with people are fed up with being told what to do.

Thank you & god bless ☐☐

Hello Washington State Dept of Health,

Please explain how WAC 246-100-040 will not be or was not considered in today's (1/12/2022) or future meeting regarding covid vaccines, testing, examinations, treatment, counseling, quarantine etc?

Specifically WAC 246-100-040 numbers 1a, 1b, 1c, 2, and 3, when today's meeting time states WAC 246-100 will be discussed at 11am today?

I am very concerned that WAC 246-100-040 includes the consideration for such measures against individuals if they do not voluntarily comply with such measures. Voluntary means voluntary and not coercion. Coercion is the practice of persuading someone to do something by using force and threats.

Subject: Re:Involuntary detention of people in a quarantine facility,

External Email

To Whom It May Concern,  
In regards to the proposed policies that would include INVOLUNTARY detention of individuals in a quarantine facility regarding COVID:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040

These proposed policies are a complete violation of Bill of Rights, 14th amendment, Section 1:

Section 1.

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

This is just one of MANY laws your proposed policies would violate. I directly oppose ANY of these policies being passed and would remind you of the many WA citizens like myself who will fight with lawsuits to maintain our rights as citizens. These proposals are the same in nature that started the Holocaust, and if you know history, it's easy to see the similarities.

As a WA citizen, I do NOT support your proposals and will do everything, including lawsuits, to overturn them.

Thank you for putting the RIGHTS of citizens' freedom FIRST!

Subject: Vaccine Mandate for Children

External Email

Dear Department of Health,

As a resident of Washington I do not support a vaccine mandate for adults and especially not for children.

This is because the COVID vaccine is:

1. Not 100% effective.
2. Uses mRNA technology that has not be thoroughly tested in children for longer than a span of months - not years as it should be.
3. Treats a virus that is not life threatening. Many people have had the COVID virus and returned to health. To risk neurological side effects, fertility risks, and blood clots to ward off a virus that your immune system can likely defeat is not logical. Allow folks who are high risk to take as many vaccine shots as they wish but don't mandate anyone into a medical decision they are not comfortable doing.

To the Board of Health regarding the upcoming discussion of W246-100-040:

I write to speak against the proposed bill to place individuals as young as 5 years old in internment camps for refusing to take an EXPERIMENTAL drug that is so ineffective that multiple shots plus boosters shots ad infinitum are needed. The "experiment" has failed, but no one in authority will admit it; there's too much money involved. And not only that, many of those getting the shots are getting covid, and dying from covid. It is evident that the shots are not working, and to punish the populace who refuse the experimental, ineffective drug is not only unreasonable, it is unconscienceable. Please do not be a part of this aggression against peaceful people who want to wait till there is a PROVEN solution—even if that means letting the virus run its course, as the seasonal flu does every year.

Another reason it's unconscienceable is that NO vaccine should be used since there are drugs that readily give us immunity—drugs such as Ivermectin and hydroxychloroquin-- and even vitamin C. How is it ethical to mandate a drug with many government-documented ill results when much safer drugs are already available and effective? That is a violation of the Nuremburg Code. And it is a violation of ethics to withhold information that could save lives, and unethical to threaten doctors with loss of license if they treat patients with life-saving drugs instead of the experimental vaccines. There is a divine judgment coming, and the wrath of God will fall on those who use force and fear to compel others against their will, against their best interests.

People are not being stubborn or rebellious when they refuse the vaccines. They have heard the narrative constantly changing. First it was, "get the vaccine." Then it was "one shot isn't enough; you'll need two." And then we've been told a booster shot was needed—another vaccine. And now it's being said that we may need booster shots every 3-6 months—forever?

Some I know have had three vaccinations—and they've gotten covid anyway. It makes no sense to force people into internment camps on the basis of a constantly changing, escalating narrative. Please do not be a party to this; do not lend your support for it; do not vote for it. You are accountable to God for all the lives you affect. Do not approve this—for your own soul's sake. There is a divine judgment coming that many would avoid, if they could, but they won't be able to. God's justice will prevail over all that men can do.

The internment camp concept is reminiscent of World War II. Shall we be guilty of that again? Have we learned nothing from the past? Innocent people were driven from their homes into camps. It was unethical then, and it is unethical now. It is yet another fear tactic or control tactic to get the people to "voluntarily" accept the vax they do not want to put into their bodies—just to live somewhat ordinary lives with jobs and family. Internment camps are an extreme control move, and what is worrisome is that the camp in Washington was built in 2019. One can reasonably assume this whole pandemic was expected—and resistance expected—and punitive measures prepared against those who resist. But how can one ethically force something upon others that doesn't work well in the first place?

Questions arise: If an individual, after 10 days of internment, still refuses the vaccine, then another month of captivity can be mandated by a judge. But what if the person still refuses the vaccine after the additional month? Does the bill allow for indefinite captivity until the person finally gives in? What is the limit?

If an individual or family agrees to isolate/quarantine for 2 weeks, would that suffice? Many have already done that, for much longer than 2 weeks.

Multiple studies have shown that most people who get covid survive, just as they have survived the flu. Comorbidity increases the possibility of dying from the flu/covid, so that makes covid little more dangerous than the seasonal flu.

According to the bill, a 5-year-old little boy or girl can be put in the internment camp, along with his or her parent(s). But what if there's a 1-year-old in the family? Will that child be placed in foster care against the parents' will while the parent(s) are incarcerated? This is another aspect to this unprecedented overreach. It gives the state unconstitutional control over personal lives.

Is the purpose of the internment camps to FORCE people to get the shot? Where is that right to incarcerate, in the absence of any crime, ascribed to any governmental official? Is this not unprecedented overreach of political powers—in complete opposition to the principles of our Constitution?

I implore you to vote against this bill. It gives too much power to health workers and assumes the right of American government to confine its citizens—not for a crime, but for refusing to take an unproved substance into their bodies. God gives free will to humans; "whosoever will" was Jesus' invitation to His listeners. And now the state says, "Either you do what we say—whether you agree or not—or we will deprive you of your liberty."

Please vote against this proposed bill.

May God bless you for reading all the way to the end of this letter.

Jean Handwerk

10:15 presentation meeting Jan 12

If Omicron is rapidly spread, and vaccines do not prevent the catching or spreading of it, why focus on testing and vaccinating?

People who are dying with illness right now are showing one or more comorbidity, this is beginning to feel like chasing the literal wind.

Our almost certain future is we will fear every common cold and be indefinitely boosted.

I am aware that you are considering the vaccine requirement for school aged children next week.

I vehemently oppose this.

Children are at a VERY low risk from covid-19 and the vaccine is still too early to know the long term effects.

To make this requirement would CLEARLY be an abuse of power.

I am positive that hoards of parents would remove their children from public school if this were to move forward.

Please listen to parents and do not make this a mandatory requirement.

Thank you for your consideration,

Lindsey Rude

## PETITION FOR ADOPTION, AMENDMENT, OR REPEAL OF A STATE ADMINISTRATIVE RULE

Print Form

In accordance with [RCW 34.05.330](#), the Office of Financial Management (OFM) created this form for individuals or groups who wish to petition a state agency or institution of higher education to adopt, amend, or repeal an administrative rule. You may use this form to submit your request. You also may contact agencies using other formats, such as a letter or email.

The agency or institution will give full consideration to your petition and will respond to you within 60 days of receiving your petition. For more information on the rule petition process, see Chapter 82-05 of the Washington Administrative Code (WAC) at <http://apps.leg.wa.gov/wac/default.aspx?cite=82-05>.

### CONTACT INFORMATION *(please type or print)*

Petitioner's Name Michael Standard  
Name of Organization Concerned  
Mailing Address 7904 SE Evergreen  
City Vancouver State WA Zip Code 98664  
Telephone 360 690 5278 Email \_\_\_\_\_

### COMPLETING AND SENDING PETITION FORM

- Check all of the boxes that apply.
- Provide relevant examples.
- Include suggested language for a rule, if possible.
- Attach additional pages, if needed.
- Send your petition to the agency with authority to adopt or administer the rule. Here is a list of agencies and their rules coordinators: <http://www.leg.wa.gov/CodeReviser/Documents/RClist.htm>.

### INFORMATION ON RULE PETITION

Agency responsible for adopting or administering the rule: \_\_\_\_\_

1. NEW RULE - I am requesting the agency to adopt a new rule.

The subject (or purpose) of this rule is: \_\_\_\_\_

The rule is needed because: \_\_\_\_\_

The new rule would affect the following people or groups: \_\_\_\_\_

2. AMEND RULE - I am requesting the agency to change an existing rule.

List rule number (WAC), if known: \_\_\_\_\_

I am requesting the following change: \_\_\_\_\_

This change is needed because: \_\_\_\_\_

The effect of this rule change will be: \_\_\_\_\_

The rule is not clearly or simply stated: \_\_\_\_\_

3. REPEAL RULE - I am requesting the agency to eliminate an existing rule.

List rule number (WAC), if known: WAC 246-100-040

(Check one or more boxes)

It does not do what it was intended to do.

It is no longer needed because: Recovery rate is 99.8%

It imposes unreasonable costs: time away from work and business closes

The agency has no authority to make this rule: This is not Nazi Germany

It is applied differently to public and private parties: This is racist, profiling and unconstitutional

It conflicts with another federal, state, or local law or rule. List conflicting law or rule, if known: 1<sup>st</sup> amendment, Bill of rights 5+6

It duplicates another federal, state or local law or rule. List duplicate law or rule, if known: \_\_\_\_\_

Other (please explain): DO NOT MAKE this change or you will loose the majority of your wealthy residents.

Subject: Suggested amendments to WAC 246-100

External Email

Hello,

I am very concerned about transparency of intent to discuss amendments, additions or changes to WAC 246-100.

On Feb 13, 2003, WA legislature passed WAC 246-1400-040, Procedures for isolation and quarantine of WA state residents.

Made decisions to legally isolate and quarantine at the sole discretion of a local health officer. This was for communicable and certain other diseases. Specifically HIV/AIDS, or (STD) Sexually Transmitted disease are mentioned.

NOW, there is an attempt to add the Coronavirus COVID to the language & definitions.

In these times, do we trust government to do what is best for us? What are the chances our government will send our family or friends into forced isolation and quarantine in another part of the state (not in our homes?) This is up for debate.

TODAY! I encouraged all elected leaders and health administrators like you to vote NO on any changes, bill or legislation which will include Coronavirus, COVID-SARs 2 (or any variant of such) in the WAC 246-100 definitions. I WANT you to ACTIVELY OPPOSE additions and changes to this WAC.

No one person (at their sole discretion) should have the power to issue emergency detention for isolation and quarantine. It is rife with potential abuse. And we are watching.

Thank you!

-Kris Duncan

How are they taking into account adverse reactions and emerging health conditions caused by the vaccine in these hospitalizations. I've personally seen more people hospitalized, vaccinated who have died. Even this weekend. How do we know the contribution or impact to the immune system these injections making since we're in a real time trial/EUA? - sent to email

Jaclyn Walker (You) 10:28 AM

Are we still including people "unvaccinated" who are still within their first 60 days also booster who have taken the injection but are still contracting disease?

Also when quoting numbers like 15x higher/lower, could you be much more specific? Those number have been examples like .008 vs .0008. It occurs like a manipulation of data for supporting speaking points and an unfair representation. - sent to email

Regarding the ED and fear - this type of language, propaganda and lack of early treatment emphasis is why people run the hospitals. It occurs like its an all focus on vaccination which we know is ineffective in prevent catching or spreading any of these variants so far.

Attention Caitlin Lang,

As a member of the Washington Board of Health I'm sure you share my concern for the wellbeing of our populous. It is for this reason that I have taken the time to write to you. As a US citizen and resident of Washington State I want to express my strong objection to WAC 246-100. I understand that it will allow local health officers to use law enforcement (WAC 246-1-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination (WA 246-100-140).

I believe this is an unnecessary overreach by this State. It seems like we are heading toward a pattern of control that resembles Communism. Please reject this legislation and protect our freedoms.

PROPOSED POLICIES:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

PROPOSED POLICIES:

- Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

What is the Local Board of Health doing to maintain a Constitutionally compliant perspective regarding Washingtonians personal liberties?

Why does the Department of Health believe they are allowed to propose radical communist legislation that directly violates the Constitutionally protected rights of Washingtonians in WAC 246-100?

Washingtonians rights and liberties have been continually and more severely violated over the last two years. Yet the implemented measures have not slowed the spread of the virus and Washington continues to have high transmission. The negative affects of the lockdowns and mandates have been more harmful to Washingtonians than the virus.

What is being done to implement documented effective treatments in Florida state where hospitalizations and deaths are lowest nationwide?

How were tests so rapidly developed to tell the difference between different variants?

If Washington is considered a virus hot spot then the measures implemented for the last two years have then proven not only ineffective but detrimental?

Board members are not clarifying if hospitalizations are directly from the virus. What are the statistics showing causes of hospitalization across Washington State?

Board members haven't addressed that you're proposing the involuntary detainment of persons or their entire families for refusing to comply with the state government.

The CDC withdrew its EUA for the PCR from the FDA because the test cannot tell the difference between covid/cold/flu. So the WDOH is still using these inaccurate tests?

Board members are lying to the public by claiming unvaccinated are at higher risk. The statistics show that vaccinated individuals in Washington State are higher in death, hospitalization, and cases transmission.

So despite having a far larger amount of vaccinated persons this year then last the pandemic is worse? So the making, distancing, lockdowns, punishing of businesses, vaccinations aren't working?

Board members directed that if I feel ill during what has commonly been known as /cold/flu season my entire life, you want me to assume I have Omicron?

Your claim of higher vaccination rates is because the state and federal government has been threatening, coercing, bribing, and punishing citizens for not receiving the jab. A violation of the Nuremberg Codes.

So the initial vaccines didn't work to prevent infection or transmission? The publicly used definition of vaccine has been conveniently changed twice over the course of the last two years. So if the initial injections didn't work then what kind of side effects are being experienced by those who received the jab? How do you know that the current boosters aren't going to also fail over the next 6 months?

Before 2020 vaccines were defined as preventing the specific disease.

The CDC data shows that vaccinated persons are transmitting and spreading the virus at a much higher rate. Israel overwhelmingly proves that the vaccinated are furthering the pandemic.

Washington State has been run by majority Democrats for 30 years. You're claiming that systemic racism is causing health issues in Washington? So that would mean that the Democrat policies in Washington have revived and furthered health discrimination?

This pandemic hasn't been challenging for politicians and bureaucrats. You've all continued to have undisturbed salaries no matter what.

BECAUSE OF? What are the statistics showing people who've died directly FROM the virus as opposed to WITH the virus? The CDC statistics say that 5% of all "deaths" are from ONLY the virus. The other 95% had an average of 4 comorbidities.

Why isn't the WDOH putting out education and resources on the health benefits of proven therapeutics including hydroxychloroquine, ivermectin, quercetin, Vitamin D, Vitamin C, azithromycin?

T cells developed after recovering from the common cold are now shown to be effective in fighting against Covid. Why isn't the WDOH putting an emphasis on natural immunity and those who've Altai developed natural immunity?

Subject: Vaccines for children in WA state

External Email

January 7, 2022

To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, and teacher. I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to decide on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms and dads, as moms, we gave birth to these children that happen to reside in WA state. As parents we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs

immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified teacher in the schools and if you mandate this, I would have to consider other alternatives, if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents, educators and school staff, they didn't sign up for what you are proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022: "What are civil rights?"

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination. The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

state and local social and health services agencies, hospitals, clinics, nursing homes, insurers who are participating in the Marketplaces and receiving premium tax credits, and other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf908c99f9c7c43fcd5ce08d9d455448a%7C11d0e>>

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this. Please refer to WAC 246-105-030

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2FWAC%2Fdefa105-030&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7Cf908c99f9c7c43fcd5ce08d9d455448a%7C11d0e2>

. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is not preventable: "Vaccine-preventable diseases children must be protected against for full immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a childcare center)."

What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long-term effects that could occur in children, this is a valid concern for parents, and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision. We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

I implore you to stop the overreach into people's lives and allow parents to make informed healthcare decisions freely for their children. Please respond and let me know you received this communication and that you will consider it when you make your decision.

Sincerely,

Michelle Hutcheson

Subject: Vaccine

#### External Email

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no glue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you

Marci Rauscher

Attention Lindsay Herendeen,

As a member of the Washington Board of Health I'm sure you share my concern for the wellbeing of our populous. It is for this reason that I have taken the time to write to you. As a US citizen and resident of Washington State I want to express my strong objection to WAC 246-100. I understand that it will allow local health officers to use law enforcement (WAC 246-1-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination (WA 246-100-140).

I believe this is an unnecessary overreach by this State. It seems like we are heading toward a pattern of control that resembles Communism. Please reject this legislation and protect our freedoms.

Leslie Kerrigan RN, BS  
5807 N Bridget Court

Subject: Vaccine Requirements for School Children

External Email

Good afternoon.

I am sending this email in response to the upcoming board meeting that includes the subject of vaccinating our children with a gene therapy that is still under Emergency Use Authorization. No COVID vaccine available in the United States has received FDA approval.

It is a violation of International Law to force the involvement of unwilling individuals in any medical experiment. The consent forms that participants agree to, when getting the vaccine, stipulates that they are agreeing to participate in clinical trials.

The lack of full FDA approval and the absence of Informed consent are violations of Federal Regulations.

In addition, there is a serious question as to the necessity of such a vaccination for a subject group that has virtually 0 risk of death from the virus. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. These are CDC statistics.

No one knows the long-term risks of these vaccines! You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe their vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these

vaccinations for school age children. This is unconscionable.

I am going to expand upon these points. You have been made aware of the precedence's established by the Nuremburg Code, the needlessness of vaccinating a subject group that is not at risk, and the illegality of mandating an EAU drug treatment on our most vulnerable.

It will be my focus to hold you and fellow board members, that ignore these legal, ethical, and moral restrictions, personally accountable for your decisions.

As members of the Board of Health and a Public Official, by Statute, you are required to maintain a Surety Bond.

Your failure to uphold your responsibilities to the citizens of Washington State and reject these illegal, unethical, and immoral mandates will prompt a challenge to that Bond.

Respectfully,

KL

Kim Lord

Subject: Vaccine mandates

To whom it may concern,,

Please acknowledge natural immunity in addition to vaccines for Covid 19. I had Covid 14 months ago, tested positive at a medical facility on election day November 3, 2020, was ill 11 days, lost my sense of smell, etc. In other words a confirmed case.

Eight months later, I tested positive for antibodies against Covid. This week, 14

MONTHS LATER, I took another antibody blood test at the local laboratory here in Spokane. MY ANTIBODIES have gone up! Two medical professionals have told me I do not need the vaccine, in fact, it could be detrimental according to some studies.

I have official records to prove the above claim if anyone is interested. Please do not mandate the vaccine for children, as they would be well served to develop natural immunity rather than vaccine immunity which wanes over time.

Thank you for your consideration,  
April Fauske

Subject: STOP! Enough is enough! You are teaching children to live in fear and it must end.

External Email

STOP! ENOUGH is ENOUGH! This must end NOW. There is zero danger to children and I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State. Please do the right thing and do not require these vaccinations and do not require masks for school age children.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.  
You are teaching children to live in fear and it must end.

January 7, 2022

To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, and teacher. I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to decide on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms and dads, as moms, we gave birth to these children that happen to reside in WA state. As parents we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

Policies and decisions can have unintended consequences. Furthermore, what will be next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs

immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified teacher in the schools and if you mandate this, I would have to consider other alternatives, if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents, educators and school staff, they didn't sign up for what you are proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022: "What are civil rights?"

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination. The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

state and local social and health services agencies, hospitals, clinics, nursing homes, insurers who are participating in the Marketplaces and receiving premium tax credits, and other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C5273c7330c774ff6e17708d9d450beff%7C11d0e>>

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this. Please refer to WAC 246-105-030

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2FWAC%2Fdefa105-030&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C5273c7330c774ff6e17708d9d450beff%7C11d0e2>

. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is not preventable: "Vaccine-preventable diseases children must be protected against for full immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a childcare center)."

What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long-term effects that could occur in children, this is a valid concern for parents, and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision. We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

I implore you to stop the overreach into people's lives and allow parents to make informed healthcare decisions freely for their children. Please respond and let me know you received this communication and that you will consider it when you make your decision.

Sincerely,

Michelle Hutcheson

This is an email to strongly encourage you to vote NO on any mandate for children regarding the covid vaccine. It has not been studied enough for children and children do not need this so-called vaccine to protect them. They have done quite well if they have tested positive.

Also, I would strongly encourage a NO vote for any mandate that would quarantine against someone's will! That is blatantly against our civil rights and our constitution! It will only encourage violence and increase the distrust in the government of this state. The recovery rate for someone who has contracted covid-19 or one of its variants is almost 100%! There is no reason to be so heavy-handed against the people of this state.

Thank you,  
Kim Spain

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Kim Davey

We are opposed to the proposed WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 and or any changes made to these regarding anything to do with COVID vaccines, COVID mandates or the giving of health officers the authority to use law enforcement.

We are completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

We are completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

The language in this bill is CLEAR no matter how much you put out articles and "news" of "misinformation".

I have relatives in the State who will be moving out due to this insanely unconstitutional "bill". No American should EVER be under the scrutiny of any public "health official" or govt agency by choosing a path for their own health. There is no "greater good" and govt should NEVER feign to protect us from anything other than foreign invasion.

What a complete farce. Just as many Americans have died in ALL years prior to Covid from other viruses. The fear porn must stop and the majority of citizens are no longer buying into this clearly manipulated and intentional over reach by govt, whether State or Federal.

Trying to backtrack to diminish public outrage is futile at this point because We, the People have awakened to the insidious motive behind the attempts to "convince" us any govt agency has our best interests in mind.

Vaccine Mandate/Quarantine Facility Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate and quarantine facility propositions for Pierce County. I would like to express my extreme opposition to implementation of the UNLAWFUL COVID 19 vaccine requirement for schools in Washington State and the quarantine facility in this or any area.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org))  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C>>  
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> ) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

Furthermore, real science is showing an abundance of evidence proving that this virus and all its variance are completely treatable with proven positive results when early treatment with the correct protocols are implemented. There is absolutely no reason to INVOLUNTARY FORCE persons or groups of people/families into isolation in quarantine facilities, which will inevitably further exacerbate the problem and death tolls. This is an extreme and blatant abuse of civil liberties and will not succeed!

We stand firmly against ANY AND ALL of these proposed WAC: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105,

If the Washington State Board of Health rules in favor of these mandates you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Subject: Vaccine

External Email

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no glue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you  
Marci Rauscher

Subject: Regarding the discussion of COVID-19 vaccination requirements for children

External Email

Regarding the discussion of COVID-19 vaccination requirements for children.

What we see across the world, are that those places with lockdowns and vaccines mandates show no measurable difference in COVID rates at all. Simply put (all of this data is well researched and available – and you all know this).

There are three factors:

1. The vaccines do NOT prevent anyone from getting or transmitting COVID to others.
2. The vaccines have NO long term testing for side effects and health impacts.
3. Children have almost no risk from COVID in any rate.

So, to risk long term consequences for no appreciable benefit is beyond idiotic and misguided, it is evil. Our role as adults and parents is to protect our children, not use them as political pawns in misguided and ill conceived political stances.

If you are to put these requirements in place then our response will be to immediately withdraw from the school system and move out of this State.

This goes beyond any political decision, it is a decision point for you all as individuals that will follow you for the rest of your lives.

Praying for God's wisdom and His guidance for you all to do the right thing.

I love Washington and want to raise our family here. Kathy

Subject: Upcoming Vote regarding mandates for vaccine

External Email  
To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time, however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell

of the current tyrannical narrative. You have so many people cheering you on to stand for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Loren Fox

Greetings,

I am a healthcare provider and understand vaccines. However, mandate vaccination deviates from freedom of choice (liberty) that we should refrain from. We allow people to be homeless by choice but why can't we allow people to take the risk of non-vaccination?

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Kim Davey

Subject: State Board Of Health Meeting Questions

External Email

Good morning,

In the meeting this morning it was said that the meeting is held via zoom due to State health pro cautions. However the State allows 60,000 people at a Seahawks game. How does this make any sense?

I'm also wondering when mask mandates (specifically in schools) will be lifted in our state. In almost every other state these reactions are lifted. Our students are not at risk of covid and every adult and child who wants to be vaccinated has had a chance to be. Kids need to go back to normal, learn in schools with seeing their teachers face and their peers face. Mental health is being affected and is a much higher risk than covid. My child has to sit in a class of 15 kids in a mask but 60,000 people can go to a Seahawks game and take their mask off right next to everyone! This makes no sense.

Mask mandates and vaccine passports need to be lifted now! You can still get, pass and die of covid if you are vaccinated.

When will the mandates be lifted?

Thank you so much for your time,  
Katherine

Regarding vote on January 12th to decide to make the covid 19 jabs mandatory. They are experimental. They have not been approved by the FDA. Comiraty has been approved and it is not available in the USA. This virus has a 99.8% survival rate. More people have died from the shots than the virus. The statistics are being manipulated to suit the narrative. It is unconstitutional to force any medical treatment and according to the Nuremburg code, there has to be informed consent. The enclosed circular in the vaccine box is entirely blank. How can you receive informed consent if you do not know what is in it? The individual may not be coerced, forced or pressured to take any experimental treatment. Anyone who forces this and implements any of these shots are guilty of crimes against humanity and will be brought to justice just as they were in World War II. This includes you and if you recall, doctors, news reporters were either in prison for a very long time or were hung. Matter of fact, Nuremburg II trials are going on right now.

There are preventative and treatments effective for this entity. This virus has not been isolated. This has been hidden in order to pave the way for these shots, that do not even work. The hospitals are filled with the vaccinated related illnesses. You likely know this covid 19 is patented. How can you have a patent on a naturally occurring organism? It is a bioweapon.

The MSM say the side effects and deaths are very, very rare. Explain that to a mother of her 6 year old dead child. Explain that to the athlete who survives the heart attack or pericarditis only to never be able to compete again in the field of sport that they love?

I do not comply. I do not agree. There is no evidence anyone who has not taken the shots transmit any illness to those who have taken the jabs. Those inoculated have their immune systems destroyed allowing them to be sitting ducks for illness, immunocompromising illnesses and cancer.

Experts who have been censored including Dr Robert Malone who created the Mrna, Dr Michael Yeadon who was Vice President for Pfizer admit these are bioweapons and the only objective is depopulation and control of those who survive these shots. You had better wake up. You are on the wrong side of history.

The emergency use authorization expires Jan 15th. Please reconsider pushing this narrative and go down as being on the right side of history.

Thank you for listening,

Rebecca Irvin

Dear Health Board,

Thank you for accepting open comments. Please consider that COVID19 is a zoonotic virus that will continue to run through all animals & people alike. There will not be an end. Thankfully the virus will degrade as it has with Omicron which is not deadly to the majority.

It's is unconstitutional to use a health concern to quarantine or force vaccinate anyone. This is not a third world country where the various agencies can do whatever they want to the populous.

The best thing you can do at maximum is possible require weekly testing. Even that is excessive with unfair fraudulent contracting practices. Keep in mind that the testing has high false positive rate.

In summation, I recommend that you rule against any forced quarantine or vaccination. That is not America.

Thank you,

LMcMahon

You all need to back off. You need to stand up for the facts and the truth. The truth is covid was here before March lockdowns and no one gave a fuck. They only cared about impeachment. Several of my family members had covid in January 2020 before it was supposedly even here. We got the anti bodies test a year and a half later and we have the antibodies still. Plus non of us have been sick in 2 years. I personally have done my own research and everyone I know that had covid and did not get vaccinated have not been sick since. Those I know who have been vaxxed have continued to get sick or have other health issues. So if you wanna do the right thing to stop covid, stop the mandates stop trying to force the Vax because you won't win. If you keep trying to force you will have thousands that will fight back as well as you will never stop covid if you continue to try to mandate vaccines. The flu has never been stopped so what makes you think you can stop this by forcing vaccines

Subject: Sex change, Vaccines

External Email

I am not sure what is happening, I thought parents were in charge of their children. Forcing children who are not at risk of dying from COVID to have a vaccine to go to school! Yet regardless of vaccination status you can still get and pass on COVID. We are on the downward side of COVID. More contagious, less deadly. This is a power play. You are in charge today, but you will not be forever. One day another health board may just say to you, you are too old for medical treatment. So many drugs today the FDA has changed their mind about. The studies are not in.

Sex changes at 13-17 without parental approval. You have to be 21 to buy cigarettes, but you can make changes to your sex when there are so many changes going on in your body due to puberty. Parents have to supply the insurance, and pay the co-pay without even knowing??

How many things is the Government going to force on us

From the history books I have read I feel like I am walking into Germany in 1939.

Subject: Strike Teams & Vaccine Mandates

External Email

It is simply UN-Constitutional to mandate any vaccine or medical formulary, especially those which are experimental and are still undergoing clinical trials (until 2023). If Pfizer's FDA Approved Cominarty vax was available to Washington citizens, things might be wholly different. Also, going onto people's private property and dragging them from their homes involuntarily, to be delivered to a forced detention 'camp' sounds much like what Hitler did to those he persecuted in WWII. I am fully vaccinated and boosted, but I still uphold the rights of those who are justifiably concerned about the unknown ingredients in these experimental vaccines, which so-far are not disclosed to the public by any manufacturer. Also, there is no data to reference concerning the long-term damage they may create -- no long-term studies have been performed. Each person's Constitutional Rights and freedom of medical choice should not be overrun, especially by the government we've elected to protect those Constitutional Rights! And even more egregious, would be the rights violations of our precious children, our FUTURE. Do you have any idea how frightened a child must be, to see their parents drug away by heartless strangers, and themselves separated from them by these same oppressors? Please think long and hard before taking this cold-hearted and 'authoritarian' violence against the FREEDOM and PEACE of our great State of Washington. I am a life-long resident and very proud to be so, unless these illegal mandates will go forward. Remember, Washingtonians are well armed, unlike Australia, where they are forcing mandates upon the populace they've sworn to uphold and protect. What an ugly stain upon the Aussie's proud history! These 'strike forces' you are assembling had best be combat ready! Are you sure you want innocent blood in our streets, of a people who simply reiterate GIVE ME LIBERTY, OR GIVE ME DEATH, like our proud ancestors did in the 1700's? I think this whole Covid nightmare should be re-visited and re-assessed, long and pain-stakingly, before any such irrevocable measures be taken against We The People of this great State.

Thanks for listening and considering my viewpoint,

Linda Larsen

Subject: TAG not needed because covid isn't a "vaccine preventable disease" so the vaccines obviously fail to meet the criteria... please use resources more wisely

External Email

Hello Board Members.

I listened with interest to much of today's meeting.

Can't quite get my head around this one, but as a layperson it is abundantly clear that a TAG to study whether covid vaccines should be mandated for school kids is completely unnecessary.

These vaccines are ineligible for inclusion in the list of shots required for "vaccine preventable diseases" because they \*don't prevent disease\*, a fact acknowledged by the CDC, FDA, confirmed by numerous studies, and mentioned in your own presentations today.

You already know that they neither prevent disease nor stop transmission, so there's no need to waste time, resources, taxpayer money, and societal angst to investigate a moot point when there is so much else that needs to be done to help people right now.

These vaccines don't appear to meet a majority of the 9 criteria required to be adopted into the school immunization list:

- \* A vaccine containing this antigen is recommended by ACIP and included on its Recommended Childhood & Adolescent Immunization Schedule
- \* The vaccine containing this antigen is effective as measured by immunogenicity and population-based prevention data in Washington State
- \*

Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects

\*

The vaccine containing this antigen prevents disease(s) that has significant morbidity and/or mortality in at least some sub-set of the population

\*

Vaccinating against this disease reduces the risk of person-to-person transmission, with transmission in a school or childcare setting or activity being given the highest priority

\*

The vaccine containing this antigen is acceptable to the medical community and the public

\*

The burden of compliance for the vaccine containing this antigen is reasonable for the parent/caregiver

Public Health needs some major work to become credible again, so a lengthy investigation of whether vaccines that don't prevent disease should be included as a required "vaccine preventable disease" shot for a population that isn't at severe risk from said disease is, frankly and transparently, ridiculous.

That this is actually happening only confirms that politics --not science or common sense or the wellbeing of kids-- is guiding your decisions.

My niece in another state has had nearly two years of normal, healthy schooling, while our kids in Washington have suffered some of the most severe restrictions on in-person learning and continue to be harmed by masking requirements and other things that put stress on their mental, emotional, and physical wellbeing without demonstrable evidence that they help mitigate covid or are worth the terrible trade-offs of harming their childhoods and educations.

No one in leadership could've navigated the pandemic without error, but errors become damaging mistakes when you refuse to correct them. Politics is the most despicable reason to continue harming children.

There are now optional and abundant resources available for treatments, vaccines, online schooling, and personal masking for those who want them. The science is clear: leave kids alone and let them be normal.

Subject: Upcoming covid policy conversation

External Email

To whom it may concern:

I am completely against any of the proposed Covid Policies that are over reaching and immoral included in the proposed WACs: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. The proposed WACs forcefully relieve citizens of medical freedoms and general freedoms outlined in the Constitution of the United States. They also create legally binding diversity and segregation. Personally, I question if I am still living in a free country as this reeks of communism. I am COVID vaccinated by choice and believe all citizens have the right to take or refuse any vaccination, and all citizens have the right to accept or refuse any medical procedure. Please take my suggestions into consideration as you discuss the upcoming WACs. You are to represent the people of Washington state.

Thank you,  
Naomi Fanshier

Subject: The hidden dangers of VAX, not so hidden.

External Email

Looking at the ruling of the Supreme Court it is obvious that medical complications from the VAX's were hidden, and any potential dangers or risks ignored.

I would guess the enforced VAXs and new guidelines to round up and hold the non vaxed will be discarded along with the fear manipulation.

I don't think anyone will trust the rulings of this government ever again. Apparently the false and insane claims of some top doctors were in fact true, and the only science blocking them was political science. 10's of thousands of doctors and nurses fired by lawmakers need atonement for.

Subject: Vaccine Requirements for School Children

External Email

Good afternoon.

I am sending this email in response to the upcoming board meeting that includes the subject of vaccinating our children with a gene therapy that is still under Emergency Use Authorization. No COVID vaccine available in the United States has received FDA approval.

It is a violation of International Law to force the involvement of unwilling individuals in any medical experiment. The consent forms that participants agree to, when getting the vaccine, stipulates that they are agreeing to participate in clinical trials.

The lack of full FDA approval and the absence of Informed consent are violations of Federal Regulations.

In addition, there is a serious question as to the necessity of such a vaccination for a subject group that has virtually 0 risk of death from the virus. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. These are CDC statistics.

No one knows the long-term risks of these vaccines! You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe their vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these

vaccinations for school age children. This is unconscionable.

I am going to expand upon these points. You have been made aware of the precedence's established by the Nuremburg Code, the needlessness of vaccinating a subject group that is not at risk, and the illegality of mandating an EAU drug treatment on our most vulnerable.

It will be my focus to hold you and fellow board members, that ignore these legal, ethical, and moral restrictions, personally accountable for your decisions.

As members of the Board of Health and a Public Official, by Statute, you are required to maintain a Surety Bond.

Your failure to uphold your responsibilities to the citizens of Washington State and reject these illegal, unethical, and immoral mandates will prompt a challenge to that Bond.

Respectfully,

KL

External Email

Good Afternoon,

Thank you for hosting this meeting. May I politely suggest that the board members choose their words more wisely regarding these EUA-only MRNA/DNA injections? Tom Pendergrass asserted that the FDA has done "serial approvals" by age group. Authorization is not approval. Additionally, it is federally illegal to refer to an investigational intervention (and all of these shots are still under that umbrella) as "safe and effective." Please cease using those terms in meetings, literature, and advertising.

Thank you,

John Pavlik

Subject: Question

External Email

Hello, my question is for your doctors who talked about vaccines. How can you in good conscience promote this vaccine without bringing up any of the adverse events that it causes? This is your job as medical professionals, inform the public on the risk/reward. Not once did you mention a risk you only promoted it. How much did Pfizer pay you? 21,238 deaths and counting caused by the vaccine so far. Even worse how can you possibly recommend this for children??? The vaccine does not stop transmission and kids do not get seriously ill from covid. So why in any world should they get the vaccine? The vaccine has unknown long term side effects and in Pfizer's own study out of 1,500 kids left one in a wheelchair for life. Is that what you want 1 in 1,500 kids left disabled for life? By only advocating for this with no cost benefit analysis especially for kids you are condemning many to this life. Not to mention you brought up no alternatives to vaccination. Through pretreatment and ivermectin or and even a healthier lifestyle healthy food, vitamin d and vitamin c your chances of serious illness goes way down. There are numerous studies on this. When will you begin to do your job?

Subject: WA State Policies!

External Email

Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,

Joshua Seanard

Subject: Vaccine Mandates

External Email

Dear Health Board,

If the State mandates the wearing of masks indoors, then it should be enforced. Businesses refusing to make employees and customers maskup should be warned, fined and shut down if necessary. The entire Washington Fitness Alliance group should be taken to task for failing in this regard (take Anytime Fitness Center in Gig Harbor for example, who does'nt even enforce having customers wipe their sweat off machines after use, let alone wear masks).

Thanks,

RCG

Ms. Lang,

Please consider the federal law (and hear the people, the citizens of this nation) as you consider the rule that gives DOH power to involuntarily quarantine or inject citizens of the US, children on up. This rule is in direct violation of federal law under Title 21 CFR (Code of Federal Regulations), Section 50.23 & 50.24. It is illegal to coerce someone into compliance when giving an experimental medical treatment. It is a felony to do so, actually- UNLAWFUL- and constitutes an act of domestic terrorism (which, if passed, would legally make you a domestic terrorists).

That unlawful-by-definition rule will also violate the WA State Constitution, Article 1 Section 7, which speaks to the right to privacy.

This leaves only one option for your decision on this rule, and that is for you to reject it and to abolish all and any consideration of such a rule, or face criminal charges of Domestic Terrorism and/or Conspiracy to Commit Domestic Terrorism.

Thank you,

Kristen Cormick

Sorry, I forgot to include the fact that my vaccinated brother-in-law contracted covid. He had symptoms of a minor cold. He then infected my vaccinated sister and vaccinated mother. My sister had no symptoms. My mother passed away (she was on home hospice).

If you need to quarantine anyone then it should be the vaccinated. Most have no idea they are infected and/or have a false sense of security. I would like to believe that those not vaccinated are taking measures to keep themselves safe from any diseases.

I would feel safer around the unvaccinated.

Have a safe & dry week,

Mariko

Subject: Vaccine Mandate for Children

External Email

Dear Members,

I am writing as a parent of school aged children that have been burdened by the consequences of the pandemic. I am deeply concerned about a potential mandate regarding the COVID-19 vaccine that may be required for school entry. I am requesting that you do NOT mandate these vaccines for children and here is why.

The statistics are clear! Children are not affected by the virus the same way immuno-compromised adults are. The effects of the virus on children are low enough that the risk of long term side effects from a COVID-19 vaccine FAR outweigh any benefit that vaccine could offer. We MUST follow this science!

Decisions about medical choices, including vaccines, should be first faced with discernment - NOT mandated by a third-party. Based on the already low levels of enrollment in ALL school systems (both public and private), mandating the vaccine would further mark a mass exodus from these schools.

Again, follow the science and DO NOT mandate the vaccine for entry into school. The decision to do so would be extremely detrimental and profound on OUR children and our future.

Helle Anderson

Hi,

I do not approve of the covid 19 vaccine to be mandated for all WA state children to attend schools. This should be voluntarily while so much is still unknown about potential effects on our children.

Best,

Jennifer Musolf

## **WAC 246-100-040**

### ***Opinion Regarding Procedures for isolation or quarantine.***

I find it terrifying to see this happening in our state. It effectively removes our civil and constitutional rights. There is a name for it, a dictatorship. I see us moving toward the same horrors that are happening in Israel, Australia, Austria, and China.

This WAC allows the health department to be judge, jury and executioner based on "their" opinion and assessment? Who should have that amount of power over another individual? No one. What makes the employees of the health department so superior that they know what is best for another person?

I would not want to be the individual making decisions listed in this WAC. I would not even want to know the person who could justify taking the actions listed in this WAC. What is the moral and ethical character of the employee/enforcers? The only persons who could do such work must have a personality that is sociopathic and not with conscience. This can only lead to abuses. It has happened in the past many times.

**10 stages of Genocide**- Perhaps this will be a good reminder of the slippery slope we are on. I believe we are in stage #7 of this genocide and moving towards #8. Please review and maybe you can dismiss this in your own mind, and justify the actions listed in the WAC as just, "Protecting the population." Nothing like being the "Good German."

Dr. Gregory H. Stanton is Research Professor in Genocide Studies and Prevention at the Institute for Conflict Analysis and Resolution, George Mason University, Arlington, Virginia.

1. Classification: People divided into "Us" and "Them"
2. Symbolization: People are forced to identify themselves.
3. Discrimination: People begin to face systemic discrimination.
4. Dehumanization: People equated to disease, vermin, and animals
5. Organization: Government creates special groups to enforce the policies i.e. "Strike team" or police/military.
6. Polarization: Government broadcasts propaganda to turn the populace against the group.
7. Preparation: Official action to remove/relocate people begin.
8. Persecution: Beginnings of murder, theft of property, trials, massacres.
9. Exterminations: Wholesale elimination of the group. It is extermination and not murder because the group is not thought of as human.
10. Denial: The government denies it has created any crimes.

The verbiage of this WAC is vague. What will the criteria be for a health official to issue an emergency detention order? Will it be because the person or persons refuse to take a vaccine? Will it be because they have cold and flu symptoms? Gosh, I have had many of those. Maybe an elevated temp? Will it be because I write a letter against the CDC or FDA? What if I inform others about VEARS, that 21,000 people died because of the vaccine, which only represents 1% of the actual number reported (according to Harvard) or the 1,000,000 who have been injured? Will parents who refuse to vaccinate their children be vilified and the children taken away? There is plenty of words to describe the legal this and legal that, and we all know what a nightmare that would be. Nothing like being placed in a concentration camp or whatever nice word you wish to call it without representation, without committing a crime. Who will be helping the people who are being harassed and terrorized by these health officials? Who will be liable for damages done to people? Emotional trauma, financial loss, physical harm due to forced treatment, no one wants to be liable for the damages they cause. This will equal a crime against humanity and those who participate will be guilty.

This is a pathetic power grab and has nothing to do with public health. **Dictatorship**, form of government in which one person or a small group possesses absolute power without effective constitutional limitations. There should never, ever, be that much power given to an individual or agency based only on sole discretion.

Cynthia Arnett

Leave our kids alone!

The proposed rule giving DOH powers to involuntarily quarantine or inject US citizens is in violation of federal law.

Under Title 21 CFR (Code of Federal Regulations) Section 50.23 & 50.24 It is illegal to exercise coercion when administering experimental medical treatments. Coercing any US citizen to receive medical treatment against their will constitutes an act of domestic terrorism, which is a felony. Any attempted enforcement of such an unlawful rule would expose anyone enforcing it to charges of domestic terrorism. Since the proposed rule will be UNLAWFUL by definition and will also violate WA State Constitution, Article 1 Section 7 - right to privacy - there is only one option. Abolish consideration of such a rule or face criminal charges (Domestic Terrorism and/or Conspiracy to commit Domestic Terrorism).

January 7, 2022

To whomever is considering requiring COVID-19 vaccines for children in WA state to receive schooling or childcare:

Please protect children's civil rights in WA state, I implore you to say NO to mandating COVID-19 vaccines for children in order to receive schooling and childcare. I am a WA resident, citizen, parent, and teacher. I am against your proposed discrimination against children in the worst form- stopping a child's education and ability to advance in society simply based on their vaccine status.

What WA State Board of Health is proposing, is outright discrimination against children to receive education and childcare services in WA state based on their parent's informed and rightful healthcare decision. I am against discrimination of ALL kinds- including discrimination of COVID-19 vaccine status. Denying a child an education based on any kind of status is unethical treatment of people and I stand against it. Forcing children to have a vaccine to be educated would be a systemic discrimination bully tactic, to squeeze parents to decide on a vaccine that still has potential unknown risks and does not prevent the transmission of COVID-19.

We are the moms and dads, as moms, we gave birth to these children that happen to reside in WA state. As parents we are the ones that love and care for them- it is not the place of the state to force any healthcare decision upon parents for their children.

Policies and decisions can have unintended consequences. Furthermore, what will be

next? Shall a child be prevented from participating in any part of society unless they have this particular vaccine? Let's face it, WA state has a bigger problem that needs immediate attention, WA state is failing in many areas of public education in basic areas of math, science, language arts - students are graduating without basic grade level understanding of basic subjects (<https://washingtonstatereportcard.ospi.k12.wa.us/> <<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwashingtonstatereportcard.ospi.k12.wa.us/>>). WA state was failing children in their education before the pandemic, I cannot imagine how over a year of children on a computer has improved these numbers and now pushing this decision. There are teacher and substitute shortages- I am actually certified teacher in the schools and if you mandate this, I would have to consider other alternatives, if you forced this mandate. Have you thought of the implications of this decision on hiring staff for schools in the future? The staffing pipeline you will not have as a result? Parents, educators and school staff, they didn't sign up for what you are proposing. Perhaps you may want to consider the teachers and staff that will leave WA schools because of this policy, and those potential staff that will never consider teaching in your schools because of your policies.

Consider basic civil in America: Check out HHS.gov- from their website as of January 6, 2022: "What are civil rights?"

Civil rights are personal rights guaranteed and protected by the U.S. Constitution and federal laws enacted by Congress, such as the Civil Rights Act of 1964 and the Americans with Disabilities Act of 1990. Civil rights include protection from unlawful discrimination. The HHS Office for Civil Rights (OCR) enforces civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age, religion, and sex (including pregnancy, sexual orientation, and gender identity) by certain health care and human services entities:

state and local social and health services agencies, hospitals, clinics, nursing homes, insurers who are participating in the Marketplaces and receiving premium tax credits, and other entities receiving federal financial assistance from HHS.

Under these laws, all persons in the United States have a right to receive health care and human services in a nondiscriminatory manner. For example, you cannot be denied services or benefits simply because of your race, color, national origin, or disability. For more information about these laws and our authority under them, see our Civil Rights home page."

Also, "The Civil Rights Act of 1964 is the nation's benchmark civil rights legislation, and it continues to resonate in America. Passage of the Act ended the application of "Jim Crow" laws, which had been upheld by the Supreme Court in the 1896 case Plessy v. Ferguson, in which the Court held that racial segregation purported to be "separate but equal" was constitutional. The Civil Rights Act was eventually expanded by Congress to strengthen enforcement of these fundamental civil rights."

(<https://www.dol.gov/agencies/oasam/civil-rights-center/statutes/civil-rights-act-of-1964> <[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dol.gov%2Fagencies%2Foasam%2Fcivil-rights-center%2Fstatutes%2Fcivil-rights-act-of-1964)

1964&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C580c194b120b4ec1b6c008d9d38970d3%7C11d

Not only will you be segregating children due to their COVID-19 vaccine status, you will be excluding them from an education altogether. This will be a shameful stain on WA state's history should you enact this. Please refer to WAC 246-105-030

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapps.leg.wa.gov%2FWAC%2Fdefa>

105-030&data=04%7C01%7CWSBOH%40SBOH.WA.GOV%7C580c194b120b4ec1b6c008d9d38970d3%7C11d0

. Despite getting the COVID-19 vaccine, the disease will still be transmissible, it is not preventable: "Vaccine-preventable diseases children must be protected against for full immunization. In accordance with the conditions of this chapter, a child is required to be vaccinated against, or show proof of acquired immunity for, the following vaccine-preventable diseases before attending school or a childcare center)."

What happened to informed consent? Parents can make informed decisions for their children and if you disagree with it, that is okay, this is a free state in a free country, we are free people to decide what we want for ourselves and our children. We are the healthcare decision makers for our children. Parents have valid concerns to choose against the COVID-19 vaccine for their child and it is their family business what they decide. There is still little research on the long-term effects that could occur in children, this is a valid concern for parents, and they should be allowed to give pause to this decision. When I talked to a local pediatrician it is clear not much is known about the vaccine and children who have already had COVID-19. This, along with a host of other factors influence decision-making and these factors must remain private and respected. Parents do not need to give a reason why or "exemption status", it is a personal decision. We are still learning about adverse effects in adults, some parents are not willing to risk vaccine injury or adverse effects for their children- and this should be okay like any other healthcare decision a parent makes with informed consent.

I implore you to stop the overreach into people's lives and allow parents to make informed healthcare decisions freely for their children. Please respond and let me know you received this communication and that you will consider it when you make your decision.

Sincerely,

Michelle Hutcheson

Subject: School age children

External Email

You are rushing to vote for a mandate for school children on a vaccine that has harmed children. Regardless of what you know about this vaccine, it is the most fatal according to the federal database, VAERS. This vaccine is still in trials and does not have full FDA approval despite the rumors. The pharmaceutical companies are not liable for ANY injuries. So can we sue you if our children are harmed?

I expect a prompt response.

To the Washington State Board of Health:

Granting the government more power over the people of this state is not okay.

WAC 246-100-40 as it stands does in fact allow, at his or her sole discretion, a local health officer to issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine.

This alone is alarming, but let's move on.

As I am to understand, this meeting in particular is not going to vote to directly add covid 19 to the list of communicable and certain other diseases which the above WAC applies to- which is a relief for many people. That being said we do definitely need to address the fact that under the Engrossed Substitute House Bill 1551 the Definitions and Terminology is in fact being altered. The quote directly from the ESHB 1551 is "Blood-borne pathogen means a pathogenic microorganism that is present in human blood and can cause disease in humans, and includes Hepatitis B, Hepatitis C, HIV, and any other pathogen identified by the State Board of Health (Board) in rule."

Now, this is vague enough to give a pretty overwhelming amount of power to the discretion of the State Board of Health. The definition of "Pathogen" from Oxford is: "a bacterium, virus, or other microorganism that can cause disease."

It is not a huge stretch to assume that sooner rather than later the spike protein present in both the Covid 19 virus AND the Covid 19 "Vaccines" could potentially be called a "pathogenic microorganism that is present in human blood and can cause disease in humans." If not any other virus.

Assuming this cannot happen and will not be considered a "pathogenic microorganism", there are still issues present with the ESHB 1551. The suggestion to add diseases like Hepatitis C to the list of communicable and other diseases that can be applied to WAC 246-100-40 is a gross misuse of power on its own.

Many people live with hepatitis for the entirety of their lives with little or no problems. Others develop cirrhosis of liver etc.

Hepatitis C Treatment interferon alpha (IFN) is approx 60% effective- Side effects include depression, flu-like symptoms, neuropsychiatric disorders, and autoimmune syndromes.

"Neuropsychiatric side effects such as irritability, severe fatigue, and apathy are frequent"

and a great problem for many patients, which also affect family members. Severe depression can occur and even suicide has been reported."

(<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1860034/>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2F>

)  
-The National Center for Biotechnology Information-

This is just one example of why medical treatment should be entirely up to the individual and the discretion of the family. Treatments and vaccines do not come without risks. The medical freedom to receive treatment must be upheld.

As far as adding Covid 19 to the "Vaccine-preventable diseases children must be protected against for full immunization." according to WAC-246-105-030 shall not move forward due to the fact that we know Covid 19 is clearly not "vaccine preventable." It is spreading more than ever despite vaccines being readily available. Being vaccinated against Covid 19 does not prevent the transmission, therefore the choice to receive the shot shall remain a personal decision of the people.

We have been told time and time again as a society that certain things would "never happen" . We were told mandates for an experimental vaccine would never happen. The mandates have happened. We have been under "emergency orders" for almost 700 days now. We were told we needed to comply for 2 weeks to flatten the curve.

To expect the people of this state to willingly grant even more power to the government that has consistently let us down is asinine and unrealistic.

Seattle is full of needles, homeless, and human feces. The board of health, our governor and the "leaders" here in Washington have just consistently let us down.

I believe the concerns I have expressed here are not just those of my own, but also the concern of many Washingtonians. We are on a slippery slope to lose the freedoms that we still hold and it needs to stop.

I urge each and every one of you on this board to open your minds to the possibility that moving forward with any of these motions will put the people of our state in a dangerous position.

Thank you for you time,

Kristin Felice

Good morning,

I have attached two items. The first is your upcoming schedule for the 12 January 2022 meeting. The second is a video clip from TikTok. While I might have toned down the language, it serves to convey a point. I checked to ensure that this is accurate. It is. This is a top-level concern for me. I have sent an email to every legislature in Washington. Now, I am sending one to you both in the hopes that you will take under consideration, this is unethical, unconstitutional (both in the US and WA State), and not in line with both your oath of office and mission statement.

Do you remember the lady that used to say stop the insanity? I strongly oppose ANY department having the ability to arrest anyone without due process of LAW. How can you even consider this, or allow it? Are you upholding your oath of office? I request that immediate action be taken to stop this.

I have been a resident of Kitsap County for over 22 years. I first arrived here as an eighteen old Sailor and after my Naval Career, I decided to make Kitsap my permanent (not looking so permanent now) home. I decided to stay here for the mild climate, and honestly, I love the trees.

Do you realize the concern and fear you are causing? I am now considering the possibility of moving to another state. Depending on the actions you take at the January

12th meeting.

When I was in Jr. High history class, I remember thinking about how did the people of Germany allow the concertation camps to happen. Now, I am witnessing how they became a reality. Actions just like the ones you are considering taking. Do you even care? This is causing tens of thousands of people across the state great consternation.

In closing, I once again request that you take immediate action to stop this.

Thank you for your time and consideration.

Sincerely,

John Fannon

The Nuremberg Code (1947)

Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical experiments on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human experimentation justify their views on the basis that such experiments yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical, and legal concepts:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.
2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

To whom it may concern with the people of Washington State I would say the majority of us do not want to be dictated to taking receiving or messing up with our health any shots!! If you are in force to doing so that's like being an dictatorship i'm not a free country! The shots are not making any difference in fact we the people have lots of stories of people around us what's really going on.

My brother-in-law took the shot end up with the virus gave the Virus to my sister. My daughter has a physical therapist they took the shot he has blood clots in his legs and an enlarged heart now!!

Person at my work her brother-in-law had the shot and a booster. He end up getting the virus he goes to the hospital they can't get him in he goes home and he died in the shower! Another person at my work had the shot had a poster and he end up catching it to the virus! Also the stuff that's in those shots I'm a guess for religion sake on top of it!! And I probably be allergic to it I'm allergic to milk cheese a lot of the antibiotics!!

Thank you that is my input please save United States i'm not pushing the shots especially on a little kids!!

Attention Hannah Haag,

As a member of the Washington Board of Health I'm sure you share my concern for the wellbeing of our populous. It is for this reason that I have taken the time to write to you. As a US citizen and resident of Washington State I want to express my strong objection to WAC 246-100. I understand that it will allow local health officers to use law enforcement (WAC 246-1-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination (WA 246-100-140).

I believe this is an unnecessary overreach by this State. It seems like we are heading toward a pattern of control that resembles Communism. Please reject this legislation and protect our freedoms.

Hello,

Please DO NOT recommend that the current COVID-19 vaccines be required for school-aged children. The reasons are the following:

1. use of the vaccines supports the unconscionable fetal tissue industry
2. the vaccines are still experimental
3. the "vaccines" are not vaccines per se, they are gene therapy
4. children are not in danger from COVID
5. the risk of adverse effects or death from the vaccine in children outweighs the risk of serious illness from COVID in children
6. there may be as of yet unknown long-term side effects (such as infertility, heart issues etc) from the vaccine to which we don't want to expose our children

Also, please DO NOT go ahead with the proposed code on isolation and quarantine. We do NOT want expansion of the government's power over us.

Best,  
Dr. Luisa T. Buchman

Subject: Stop this vaccine in our kids

External Email

Hello,

I am writing to express my DEEP OPPOSITION to passing anything that involves forcing people to get an experimental vaccine. The Covid-19 vaccine is not proven to be safe long-term, nor short term for that matter.

I know this week it will be decided whether or not peoples rights will be completely stripped and the option of being involuntarily forced into a Covid facility is being voted on. As well as voting to force children to get it as part of school immunizations.

This is disgusting and a complete violation of our rights. Please do not destroy the state of Washington by passing laws that would put us under a dictatorship. Yes, kids are required to get other immunizations to attend school, but those immunizations have been around and tested for decades.

This vaccine should be a choice, it's my body, my children are my children (not the governments lab rats) and I get to decide whether or not an experimental drug goes into them.

Heather Glasby

I am writing about the meeting you are having next week to consider a vaccine requirement for school aged children.

I can hardly believe that you are even considering this when children are at a very low risk from covid-19.

To take the choice away from parents is not only morally wrong, it is clearly unconstitutional.

I ask you to please say no to this requirement - I fear you would alienate many many families and leave them no choice but to take their children out of public schools.

Thank you for your consideration,

Terry Rude

Subject: Vaccine

#### External Email

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no glue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you

Marci Rauscher

Subject: Vaccine requirements for school children

□

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that

one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,  
Nancy Decker

Re.: PROPOSED POLICIES:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.

2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Bottom Line: A long-time WA resident, I am adamantly opposed to official's forcing involuntary detention for responsible citizens who exercise their right to determine what they will/won't inject into their own bodies. You propose "involuntary" detention for "voluntary" noncompliance. Sadly, these two mutually-exclusive descriptors ("involuntary" and "voluntary") belie the subplot of what's being advanced. And I object to it.

As a retired educator, I am equally appalled at the thought of forcing experimental injections into the arms of children and youth. Too many questions are yet unanswered. A FDA advisor reminds us that there is no expectation that the lower dose in children will behave similarly to the higher adult dose. This, of course, begs the question: Do we really want to experiment on our children?

One of the most academically cited American epidemiologists alive today says he would pull a healthy child out of public school before he administered this vaccine. Harvard University professor of medicine, Martin Kulldorff, agrees with Dr. Harvey Risch. Data and scientific studies he's reviewed show that children are more likely to contract serious disease or die from the annual influenza, or the flu, than COVID-19.

Covid injections are experimental. Simple as that. Dr. Eric Rubin, who sits on the administration's vaccine advisory panel, said in part, "We're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines, like the rotavirus vaccine." Never mind that safety data are lacking! Rep. (and Doctor) Greg Murphy (NC) responded rightly in noting that Ruben's comment "is literally the most dangerous statement" he had ever heard in medicine." I agree.

Re.: Too many questions are yet unanswered.

The CDC openly acknowledges that for 30 years since creation of the VAERS reporting system, reporting of adverse vaccine DEATH reports remained very low and constant. However, beginning in December 2020 with the first COVID19 vaccines hitting the open market, and escalating every day since, the adverse event DEATH reports have skyrocketed to levels never before seen in 30- years of vaccine adverse event reporting. Before mass-enforcing an experimental injection, especially on children, these questions (and countless more) must be answered (with peer-reviewed science):

1. The CDC admits there are no peer-reviewed studies, yet it's okay to take these

injections deemed "safe and effective." But by what standard? There is no longitudinal history from which to draw.

2. Just what's in these injections? We know that the mRNA Moderna experimental injection contains SM-102 designated "for research use only, not for human or veterinary use" (See: Cayman Chemical Safety Data Sheet acc: OSHA HCS. Trade Name: SM-102.) What else is in these injections, and why pump them into humans (especially children)?

3. Salk researchers confirmed that the main damage from Covid is caused by the clot-generating spike protein, not the virus. It's unclear how long these potentially lethal proteins remain trapped in the lining of the blood vessels, or what damage they might eventually do, so why inject people with a substance that teaches their cells to make spike proteins?

4. Why the Covid surge (which, on a per-capita basis, was higher than the surge that devastated India) in 4 out of 5 of the most vaccinated countries (Forbes)?

5. Why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020?

6.

7. Researchers noted: "Overall, our data provide strong evidence that SARS-CoV-2 infection in humans robustly establishes the two arms of humoral immune memory: long-lived B cells and memory B cells." This is perhaps the best available evidence of long-lasting immunity. Yet natural immunity is downplayed in the media narrative. Why?

8. To encourage pharmaceutical companies to manufacture ground-breaking new medicine, governments use no-fault indemnity against lawsuits. Where's the protection for individuals injured from the vaccine?

9. Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before. Shouldn't the magnitude of side effects compared to other vaccination programs concern us? This is especially true in that adverse events are broadly known to be seriously under reported!

10. One's right to informed consent mustn't be bypassed. But the mainstream media narrative is quite silent about adverse effects. According to the CDC, Myocarditis, a rare condition, is occurring at a higher than expected rate in vaccinated individuals. Researchers used data from the Vaccine Safety Datalink, run by the CDC, to find 21 potential cases, 11 of which were confirmed, of Guillain-Barré syndrome (GBS) in people who got the shot. Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines. The Covid injection is also paired with Creutzfeldt-Jakob (prion) disease. Shouldn't the public be fully informed of these risks and, then, decide for themselves?

A local ABC News Station posted a request on Facebook for people to share their stories.

In five days, over

200K people

posted comments, all of which addressed vaccinated loved ones who died shortly after being injected, or who are permanently disabled. Shouldn't this at the very least be looked into?

The Informed Consent Action Network (ICAN) reported that a study showed that the actual number of anaphylaxis is 50 to 120 times higher than claimed by the CDC.

Re.: Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

In September, the Singapore government awarded a teen \$225K for having a heart attack following a Pfizer shot. Over in Taiwan, second doses of the Pfizer-BioNTech jab for children, aged 12 to 17, have been temporarily halted due to myocarditis concerns. Meanwhile, in America, the director of the CDC advocates approving the jab for children, aged 11 to 15 years old; and WA wants to include Covid-19 injections as part of school immunization requirements.

So why inject healthy children when their risk is statistically insignificant? Metrics among the unvaccinated rise across

age groups, but data clearly illustrate that younger, healthy people are at little risk from the disease. Fact is, unvaccinated 18- to 29-year-olds saw deaths lower than most fully-

vaccinated age groups.

Most Covid patients (70.6 percent) have one or more underlying health conditions. Nearly 36 percent infected are obese. 31 percent suffer from chronic lung disorders, and just over 14 percent suffer neurologic disorders. COVID-19- associated hospitalization rates in children were found to be overcounted when, in fact, 45 percent of the patients admitted to Lucile Packard Children's Hospital in California were not about Covid. There is no logical reason for forcing risky, untested injections on healthy children. Consider instead the youth who are vaccinated. In June, the CDC reported higher-than-expected rates of myocarditis among vaccinated (not

unvaccinated) youth. There were 117 cases among males 12 to 15 (when no more than five were expected).

Dr. Nicola Klein of the Kaiser Permanente Vaccine Study Center presented data regarding post-vaccination heart inflammation from the Vaccine Safety Datalink, a database from the CDC, and nine other healthcare groups, including five Kaiser Permanente facilities. Data also showed higher than expected cases among youth following vaccination. Yet we are expected to ignore facts and summarily dismiss legitimate concerns, as these, as misinformation perpetrated by quacks. Even if such claims ring true, who gets to decide? The answer is best found in the cliché, "Follow the money." Throughout the pandemic, nine new billionaires have been hatched. Pfizer alone estimates to profit at least 33.5 billion dollars from the Covid injections; and many medical professionals receive financial incentives to promote injections. In the United Kingdom, for example, nurses get

£10 per needle they put into a child.

Our charge is to protect children, not to use them for monetary gain. They are not guinea pigs, nor should they be treated as such.

This is complete bureaucratic over-reach! Your Detention Camp proposal is an attack on the freedom of choice. It has not been approved by the peoples Representatives, yet proposes to take away individual freedom and essentially LOCK people up with a trial.

Please read your history; this was one of the reasons for the Revolutionary War. If you don't believe me read the Declaration of Independence!

Turn this Unconstitutional proposal down, if for no other reason than you will be forced to pay for the defense of this proposal all the way to the Supreme Court! Don't waste your time and our money with this ludicrous idea.

Hello again.

When I had Covid, the Everett Clinic doc says they can't recommend any treatment - though there are many studies showing that many treatments help people stay out of the hospital. Why has treatment been pretty much completely ignored? I could tell the doc was not happy about the "rules" and said he had family members who did not live in Western WA who were treated and did well. Masks are not stopping infection, vaccines are not stopping infection, so the main focus should be treatment - are you going to change course?

Thank you,

Margaret Fast

How can this health dep person speaking ( Kwan) say that people have Ominicron? The CDC says that all PRC tests are positive? I don't understand that.

What are the negative side effects from the vaccination? Have they been tested on Animals and peer review tests conducted? What about informed consent in terms of knowing all the side effects. Lastly, what can they talk about immunity? I don't believe those not vax'ed are 15X's higher death rate.

Subject: Vaccine requirements for School Children

External Email

Good afternoon.

I am sending this email in response to the upcoming board meeting that includes the subject of vaccinating our children with a gene therapy that is still under Emergency Use Authorization. No COVID vaccine available in the United States has received FDA approval.

It is a violation of International Law to force the involvement of unwilling individuals in any medical experiment. The consent forms that participants agree to, when getting the vaccine, stipulates that they are agreeing to participate in clinical trials.

The lack of full FDA approval and the absence of Informed consent are violations of Federal Regulations.

In addition, there is a serious question as to the necessity of such a vaccination for a subject group that has virtually 0 risk of death from the virus. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. These are CDC statistics.

No one knows the long-term risks of these vaccines! You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe their vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. This is unconscionable.

I am going to expand upon these points. You have been made aware of the precedence's established by the Nuremburg Code, the needlessness of vaccinating a subject group that is not at risk, and the illegality of mandating an EAU drug treatment on our most vulnerable.

It will be my focus to hold you and fellow board members, that ignore these legal, ethical, and moral restrictions, personally accountable for your decisions.

As members of the Board of Health and a Public Official, by Statute, you are required to maintain a Surety Bond.

Your failure to uphold your responsibilities to the citizens of Washington State and reject these illegal, unethical, and immoral mandates will prompt a challenge to that Bond.

Respectfully,

KL

Hi -

I put in my name as opposing the changes to chapter 246-100 WAC, based on incorrect information I received online.

After reviewing the published meeting materials, I have no objection to the proposed changes and do not need to speak during the 1:30 public comments period.

Thanks for clarifying, and for the opportunity to speak if it was needed.

Ma'am,

It has come to my attention that the topic of mandating the covid-19 vaccine for school is on the table.

Due to the late notice of this and short timeline to submit an email to you I will keep this very brief.

I WILL NOT VACCINATE MY CHILD.

If you are so concerned over the welfare of children, PLEASE lets address childhood obesity, HUNGER, and CHILD ABUSE. DAILY, I hear of another child who has last their life at the hands of a caregiver. Respectfully, Sir, THIS IS WHAT SHOULD HAVE YOUR ATTENTION!!

Respectfully,

Ann-Maree Tedaldi, PhD, DPT, COMT

Hello,

It has come to my attention that WA Board of Health will be discussing COVID-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. As a parent and a citizen of the State of WA, I request that you abandon the plan of forming a technical advisory group to explore COVID-19 mandates and adopt a new rule of requiring products to have completed Phase 3 clinical trials before they can be added to the list of school requirements.

One definition of insanity is to repeat the same action over and over again and expect different results. For almost 2 years we have attempted to follow the health recommendations of washing, masking, distancing, testing, isolating and vaccinating. By now, it is quite apparent that the virus has mutated; as a result, SARS CoV2 has become more virulent (which is the nature of all viruses) but LESS FATAL. Real immunity is achieved with exposure and recovery as is evidenced by the fact that those infected with SARS in 2002/3 cannot become infected with SARS CoV2 today! In contrast, COVID-19 has managed to find a way to escape the vaccine per the evidence by the incredibly high numbers of vaccinated and even boosted individuals getting sick and testing positive. Surely this fact has not escaped your knowledge!

I also hope that you, being members of the WA State Health Board, are well aware of what the #1 cause of death was (aside from abortions which came in at an astonishing 43 million, globally) in 2021. Last year, the disease that killed 8.2 million people globally was cancer. Cancer killed more people last year than COVID-19 has since the beginning of the pandemic. Death is tragic, yes, but I will not stand by as mandates and overreaches of personal medical freedoms are occurring, of which should only be between doctors and their patients should be handled; politicians and elected officials like yourselves have not earned nor have any say in the privacy of what medical choices my family or any Washingtonian family makes. Can you imagine what the United States could do if local officials like yourself across the nation put this much effort into cancer research and treatment as they did in pushing for COVID-19 vaccine creation? We'd probably find a cure within the next year.

I do not doubt that you all desire to improve the health of Washingtonians. However, I do not trust that you have carefully investigated and logically determined adequate and

measurable health remedies for which you are able to provide evidence. Before doubling down on measures that seem to HARM more than they HELP the overall health of citizens, please determine and make public the evidence to justify any policies. Giving "powers of police officers, sheriffs, constables, and all other officers" is an overreach of what the State Health Departments' responsibilities, an overreach of the people's freedoms, as well an effort to over-centralize general powers within the state, which is against what our Constitution stands for throughout the land.

Regarding mandating shots, know that the clinical trials will not be completed until 2023. Know that WA State has a legal definition of a "vaccine" that the COVID-19 shots do not fulfill as they were never part of a living microorganism nor do they prevent transmission or infection of disease. "Vaccine" means a preparation of killed or attenuated living microorganisms, or fraction thereof, that upon administration stimulates immunity that protects against disease and is approved by the federal food and drug administration as safe and effective <https://app.leg.wa.gov/RCW/default.aspx?cite=70.290.010>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefau>

Finally, do no harm! You cannot possibly know or care more about the health of children than do the parents of Washington children!

Now I ask, how necessary or even safe is it to give a vaccine to a person who already has immunity to the pathogen? Most children by now have been exposed to the virus and have developed immunity without difficulty since it has now been almost 2 YEARS. Why consider a mandate for those not at high risk for adverse outcome should they become infected but who carry unknown risks of adverse reaction with getting the shot?

I look forward to hearing these concerns addressed and evidence for any and all recommendations to be presented when I tune into your meeting on January 12.

Thank you,  
Hailey Eames

I am writing in opposition to state mandates for covid vaccines for children. I believe this is an encroachment on our civil liberties. We have seen that this virus has little to no affect on young children, and the vaccine doesn't even have full FDA approval at this point. Say no!

Subject: Upcoming Proposed Policies

External Email

Hello,

I am a Washington State resident and have become aware of the proposed policies to be presented on January 12th.

I am writing to register my emphatic opposition to mandating Covid-19 vaccines for school attendance.

I am also writing to register my opposition and absolute outrage at the prospect of the involuntary detention and isolation in quarantine facilities of those who refuse to comply with requests for medical examination, testing, treatment, counseling, and vaccination. The right to refuse these things is protected by both our state and federal constitutions, and their violation brings to mind (and I do not draw this comparison lightly) the horrors of Nazi Germany.

I urge you to utterly reject these policies and stand as an inhibitor of the evil that would come of them.

Respectfully,

Maggie MacInnis

Subject: Vaccine

External Email

Please do what is best for our children and vote no to Covid vaccines being required to attend school. Parents should be able to make these choices for & with their kids. It should not be made mandatory.

1. COVID vaccines remain under Emergency Use Authorization. This is not a proven vaccine. We don't know what all the side effects will be in 3, 5 or 10 years. We have already witnessed some terrible reactions & deaths in adults & children.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection. Covid does not react the same way with kids. Why would you give your kids a vaccine that has unknown & harmful side effects, when they have a 99.995% survival rate from Covid.
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. Plus the unknown & already known side effects & deaths.

I am a retired teacher & I would absolutely not be part of giving this vaccine to students. This is not the schools job. I would not want to be responsible for these side effects or even deaths to our children. This decision should be made by the individual families.

Thank You for your time & please do what is best for our kids. Vote no to this mandatory vaccine rule for our kids to attend school. I'm expecting to see many home school families, if this requirement goes through. I hate for kids to miss out on learning experiences & the fun of their school days.

Good evening,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,

Kendahl Sipes

I am completely and utterly opposed to your TAG plan as well as any and all c19 vaxx mandates you are threatening our children with. There will be swift and accurate blame on people that don't take a stand against this tyrannical ideology and thoughts! You will face legal prosecution if you guys move forward with this in any way! Weather it be from me, a soccer mom, a mother of 4, a father of 1 or a pissed off teacher that sees his students come to school everyday wearing a diaper on their face! Sometimes, someone, somewhere will hold you accountable! Don't be someone that follows blindly, open your eyes and let the truth in! And oppose all this nonsense! Have a wonderful day! Sincerely a concerned parent!

Subject: Covid 19 Vaxx for children in school  
To: <wsboh@sboh.wa.gov <mailto:wsboh@sboh.wa.gov> >

Good evening, my name is James Hollmann and I have 6 children all that go to either wenatchee or eastmont school system. I am emailing you in regards to C19 vaxx being required to engage in school and school activities! All of my children love school, and as a parent, that's one of the main things you worry about! You worry about are they going to get bullied, are they going to be made fun of, are they going to embarrass themselves? Are they going to be safe? Are they going to like their teachers and is this going to be good for them? Well as stated, thankfully my children enjoy going to school! Then it comes to vaccine mandates in accordance with attending school. I am completely and utterly opposed! Family friend of ours is now paralyzed from the neck down due to the 2nd dose of the vaccine. No previous medical history, nothing and now completely paralyzed from the Vaccine. Me, my partner and all 6 of our children will never be getting the C19 vaccine! We have all had Covid and developed antibodies from our god given immune system! We go to church each Sunday and believe in our creator! Not to mention the lack of science when it comes to "Natural Immunity" and the in-ability to recognize the human immune system as a scientific way to combat the virus is asstounding! With our god given immune system, we have a GREAT and I repeat GREAT chance to combat this virus like all others that have come before as well as all others that will come after! The covid 19 vaccine changes the body's genome, changes your DNA! I am writing to you to oppose this unconstitutional, immoral and unethical vaccine that we cannot put into our bodies! If you guys Unfortunately pass this horrible ruling, I will have to take all 6 of our children out of school and put them into religious or private schools that do not require the vaccine in order to keep them educated! Please please please dont make my children and thousands and thousands of other children leave the schools they love because of this! Thank you

Subject: Upcoming vote related to vaccine mandates

External Email  
To All Washington State Officials who represent me,

I am writing you as a concerned citizen of Washington state. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to take into your thought process more than the current accepted binary conversation that the vaccine is the one and only way to proceed in health for our communities and states.

In years past, we as parents, families and supported by the medical community considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story on a successful way through this, and your decision is an important part of it.

There are not enough long-term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently the CDC director and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

In addition, there are thousands of deaths and adverse reactions reported, though not published through mainstream media. I will provide you links to some of these sources if you want.

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted in? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during the 2nd World War? It may have seemed like the best option at the time, however, it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of the current tyrannical narrative. You have so many people cheering you on to stand

for human rights including medical freedom of choice.

Sadly, the push for the mandate of vaccines and the proposed policies which could follow will place health officers in the possibility of managing a police state. We are not in an emergency situation that would justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. If this continues Washington board of health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, but the proposed policies are also in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

Lynn Fox

Thank you so much for making this available to the public. Though you say some of the media information was false - if anything it brought a good amount of people to you!

This just came to my inbox today while you were speaking:

A bombshell study of 145 of the world's most COVID-19-vaccinated countries found that after the vaccines were implemented, there was a significant increase in transmission and death.

Most specifically in the US, the study found that the jab has caused a whopping 38% more Covid cases per million and an even more astonishing 31% increase in deaths per million.

It was a 99-page study titled: "Worldwide Bayesian Causal Impact Analysis of Vaccine Administration on Deaths and Cases Associated with COVID-19: A BigData Analysis of 145 Countries"

The researchers who carried out the study found that almost 90% (89.84%) of the 145 countries experienced this negative effect after the COVID-19 shots were made available.

Please do NOT mandate Covid vaccine for children. Some prefer natural immunity and should be allowed the choice.

As an adult, I chose to vaccinate. I still got Covid. My son got Covid from a vaccinated child. The vaccine is NOT minimizing spread. Clearly vaccinated are spreading it, so there is NO logic in requiring it for the benefit of others.

Thank you,

Dear Kelie,

Today, I was able to sit in on the board meeting over zoom and I was generally appalled that during the open comments, not one of the questions that were asked were answered. Not one of them were even responded to. What I saw was worse than a kindergarten teacher brushing aside comments from students which were off subject. I would like to state that many of the questions that were asked, by tax paying citizens of this beautiful state, were in fact, on subject. At no point did any one of those who took time out of their busy schedules, treated with true respect. It is beyond disappointment that I feel, in regards to the Board of Health for WA state.

So... congratulations to each of you involved, on further alienating yourself from the everyday man. Congratulations on making it so that many of us have lost faith with you. I know that I, and many in my personal circle, after watching that song and dance, have little trust in what you are doing for our state. If you can even consider it for "us". Which I do not. It's unacceptable. I would go as far as calling what happened insulting and allowing for/as well as encouraging no confidence in your ability to care for the people.

Hi Lindsay,  
My name is Carol Linden,  
I want to voice my opinion about vaccines for school age children.  
I do not think they should be required to get vaccinated.  
I'm sure you are aware of Sweden's handling of the Covid-19 situation back in 2020. The children went to school, wore NO masks, played outside with their friends and NOT ONE CHILD died from age 0-15.  
You probably know that my email to you represents thousands of people living in Washington State that do not and will not email you because they no longer have the sense that anyone in power cares about what they/we think.  
I can no longer sit back hoping my voice will be heard if I don't make it heard.  
You now know my opinion, I hope you will vote accordingly.  
Thank you for your time.  
Carol Linden

To Whom It May Concern,

I OPPOSE Agenda Item #8, the Board's formation of a Technical Advisory Group to review information about COVID-19 shots for consideration of mandating the shots for school. I oppose COVID-19 shot mandates, period!

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD, on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any licensed product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Kim Davey

Washington State Board member:

Please do not vote to enforce Covid vaccines for children at school. Children have a strong immune system and very high success rate. This goes against our constitution and parents desires for their children. For those that want it for their kids it's an option now. This should  
Never be forced on anyone. You will see people pulling their kids out of school so fast if this passes.

Also please vote no for allowing local health officers to use law enforcement to force an emergency order to involuntarily a person or group of people to be isolated in quarantine facility if refuse vaccine, or testing, treatment etc. we are human beings with free will. We live in a free country. We should not be forced to put anything in our bodies.

This needs to move to endemic status as this isn't going away. Vaccines aren't stopping this as people can still get Covid if vaccinated. Many from who I have seen are having a worse Covid experience after vaccination then the unvaccinated. Vaccines are not the answer. We need to learn to live with this. Our economy is affected enough, our mental health is affected enough, and our livelihood and health. Please vote no.

Michelle

Dear Washington State Board of Health,

The following research findings are part of research data utilized by the 29OCT2021 Global Covid Summit and is pertinent for any contemplation of mandates related to SARS-CoV-2 policies.

They are being provided for your review but are not limited to United States data and may help as you view compiled international observations. If you find the link blocked from within this g-mail communication please consult the web address to quickly find your study listed under the corollary number.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fdoctorsandscientistsdeclaration.org/evidence%2F%23childre&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C024e3235a7004578b75808d9d5n>>]

Thank you kindly for first doing no harm.

Respectfully,  
Lauren Oney, RN

[ The International Alliance of Physicians and Medical Scientists after 20 months of research, millions of patients treated, hundreds of clinical trials performed and scientific data shared, considered the risks vs. benefits of major policy decisions and reached a consensus that healthy children should not be subjected to forced vaccination. Studies on which they weighed their 4 conclusional points follow....]

- Negligible clinical risks from SARS-CoV-2 infection exist for healthy children under eighteen.
- Long term safety of the current COVID vaccines in children cannot be determined prior to instituting such policies. Without high-powered, reproducible, long term safety data, risks to the long-term health status of children remain too high to support use in healthy children.
- Children risk severe, adverse events from receiving the vaccine. Permanent physical damage to the brain, heart, immune and reproductive system associated with SARS-CoV-2 spike protein-based genetic vaccines has been demonstrated in children.
- Healthy, unvaccinated children are critical to achieving herd immunity. Natural immunity is proven to tolerate infection, benefiting community protection while there is insufficient data to assess whether Covid vaccines assist herd immunity. "

We absolutely must NOT give any legal power to vaccine mandates. We must allow people the freedom to NOT take any medical treatment they do not want. The covid vaccines are dangerous and have many bad side effects. They are simply unnecessary for children as well.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

There are many devastating consequences with all of these vaccines. It is illegal, evil and unjust to harm our children in this way, to harm their life, to harm their long term health, to disable them if they were to survive the vaccines. By doing so as you are wanting plays directly into other organizations, evil, and elites agenda to wipe out generations. Cease and desist immediately and permanently. It would not be forgiven nor forgotten.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To all members of the Washington state board of health:

I am writing to voice my concerns over the proposed policies WAC 246-100 and 105. I, and many other concerned citizens, are completely against such policies and strongly believe them to be an over reach on the part of our government. The long term effects will be detrimental to the families of our state. Please consider the voices of the people you work for and do not pass these policies, which infringe on our basic human rights. It will be a terrible mistake to impose these policies on the people.

why no discussion about early treatment to help keep our citizens out of hospitals and preventing serious disease and death? I'm a stem cell transplant nurse and my patients get NO benefit from vaccines. They must wait 2 years after transplant to receive their vaccines. So, a One-size-fits all approach to decreasing death numbers and hospitalizations is not helpful!!! You are misleading the public and causing divisiveness in our communities by trying to make this a pandemic of the unvaccinated!! If you truly cared about those that cannot or choose not to be vaccinated, then you would be focusing on many other aspects of treating people....not only vaccines, vaccines, vaccines!!!

Subject: Testing for antibodies?

External Email

This question is for those who choose not to put an experimental vaccine into their bodies.

Why are you not mentioning the importance of personal health such as eating better, exercise, and supplements such as Vitamin D3, zinc, quercetin colloidal silver, elderberry and magnesium to strengthen the immune system and t cells?

Also, since testing is an alternative to the vaccines to participate in society.

Will you consider natural anti body testing to prove immunity to covid?

Thank you for your time.

To whom it may concern,

As a Washington resident I am writing to have my statement included in the upcoming board decision on requiring Covid Vaccines for children attending public school. I am in strong disapproval of the mandate for children under the age of 18 to be required to receive the Covid Vaccine. I believe children should have the right to access public education without being required to receive a vaccination that is still in emergency us standing, and does not have sufficient long term data to provide parents with adequate safety and efficacy information. Please make the moral and right decision to allow parents to decide whether or not to provide their child with a COVID-19 Vaccination.

Sincerely  
Joshua Gay

Re.: PROPOSED POLICIES:

1. Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
2. Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

Bottom Line: A long-time WA resident, I am adamantly opposed to official's forcing involuntary detention for responsible citizens who exercise their right to determine what they will/won't inject into their own bodies. You propose "involuntary" detention for "voluntary" noncompliance. Sadly, these two mutually-exclusive descriptors ("involuntary" and "voluntary") belie the subplot of what's being advanced. And I object to it.

As a retired educator, I am equally appalled at the thought of forcing experimental injections into the arms of children and youth. Too many questions are yet unanswered. A FDA advisor reminds us that there is no expectation that the lower dose in children will behave similarly to the higher adult dose. This, of course, begs the question: Do we really want to experiment on our children?

One of the most academically cited American epidemiologists alive today says he would pull a healthy child out of public school before he administered this vaccine. Harvard University professor of medicine, Martin Kulldorff, agrees with Dr. Harvey Risch. Data and scientific studies he's reviewed show that children are more likely to contract serious disease or die from the annual influenza, or the flu, than COVID-19.

Covid injections are experimental. Simple as that. Dr. Eric Rubin, who sits on the administration's vaccine advisory panel, said in part, "We're never going to learn about how safe this vaccine is unless we start giving it. That's just the way it goes. That's how we found out about rare complications of other vaccines, like the rotavirus vaccine." Never mind that safety data are lacking! Rep. (and Doctor) Greg Murphy (NC) responded rightly in noting that Ruben's comment "is literally the most dangerous statement" he had ever heard in medicine." I agree.

Re.: Too many questions are yet unanswered.

The CDC openly acknowledges that for 30 years since creation of the VAERS reporting system, reporting of adverse vaccine DEATH reports remained very low and constant. However, beginning in December 2020 with the first COVID19 vaccines hitting the open market, and escalating every day since, the adverse event DEATH reports have skyrocketed to levels never before seen in 30- years of vaccine adverse event reporting. Before mass-enforcing an experimental injection, especially on children, these questions (and countless more) must be answered (with peer-reviewed science):

1. The CDC admits there are no peer-reviewed studies, yet it's okay to take these injections deemed "safe and effective." But by what standard? There is no longitudinal history from which to draw.

2. Just what's in these injections? We know that the mRNA Moderna experimental injection contains SM-102 designated "for research use only, not for human or veterinary use" (See: Cayman Chemical Safety Data Sheet acc: OSHA HCS. Trade Name: SM-102.) What else is in these injections, and why pump them into humans (especially children)?

3. Salk researchers confirmed that the main damage from Covid is caused by the clot-generating spike protein, not the virus. It's unclear how long these potentially lethal proteins remain trapped in the lining of the blood vessels, or what damage they might eventually do, so why inject people with a substance that teaches their cells to make spike proteins?

4. Why the Covid surge (which, on a per-capita basis, was higher than the surge that devastated India) in 4 out of 5 of the most vaccinated countries (Forbes)?

5. Why did more people die in 2021 (January through August) despite the rollout of COVID shots in December 2020?

6.

7. Researchers noted: "Overall, our data provide strong evidence that SARS-CoV-2 infection in humans robustly establishes the two arms of humoral immune memory: long-lived B cells and memory B cells." This is perhaps the best available evidence of long-lasting immunity. Yet natural immunity is downplayed in the media narrative. Why?

8. To encourage pharmaceutical companies to manufacture ground-breaking new medicine, governments use no-fault indemnity against lawsuits. Where's the protection for individuals injured from the vaccine?

9. Cardiovascular, neurological and immunological adverse events are all being reported at rates never even remotely seen before. Shouldn't the magnitude of side effects compared to other vaccination programs concern us? This is especially true in that adverse events are broadly known to be seriously under reported!

10. One's right to informed consent mustn't be bypassed. But the mainstream media narrative is quite silent about adverse effects. According to the CDC, Myocarditis, a rare condition, is occurring at a higher than expected rate in vaccinated individuals.

Researchers used data from the Vaccine Safety Datalink, run by the CDC, to find 21 potential cases, 11 of which were confirmed, of Guillain-Barré syndrome (GBS) in people who got the shot. Autoimmunity and the opposing condition, metabolic syndrome, are well known adverse events caused by vaccines. The Covid injection is also paired with Creutzfeldt-Jakob (prion) disease. Shouldn't the public be fully informed of these risks and, then, decide for themselves?

A local ABC News Station posted a request on Facebook for people to share their stories. In five days, over 200K people

posted comments, all of which addressed vaccinated loved ones who died shortly after being injected, or who are permanently disabled. Shouldn't this at the very least be looked into?

The Informed Consent Action Network (ICAN) reported that a study showed that the actual number of anaphylaxis is 50 to 120 times higher than claimed by the CDC.

Re.: Include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

In September, the Singapore government awarded a teen \$225K for having a heart attack following a Pfizer shot. Over in Taiwan, second doses of the Pfizer-BioNTech jab

for children, aged 12 to 17, have been temporarily halted due to myocarditis concerns. Meanwhile, in America, the director of the CDC advocates approving the jab for children, aged 11 to 15 years old; and WA wants to include Covid-19 injections as part of school immunization requirements.

So why inject healthy children when their risk is statistically insignificant? Metrics among the unvaccinated rise across age groups, but data clearly illustrate that younger, healthy people are at little risk from the disease. Fact is, unvaccinated 18- to 29-year-olds saw deaths lower than most fully-vaccinated age groups.

Most Covid patients (70.6 percent) have one or more underlying health conditions. Nearly 36 percent infected are obese. 31 percent suffer from chronic lung disorders, and just over 14 percent suffer neurologic disorders. COVID-19- associated hospitalization rates in children were found to be overcounted when, in fact, 45 percent of the patients admitted to Lucile Packard Children's Hospital in California were not about Covid. There is no logical reason for forcing risky, untested injections on healthy children. Consider instead the youth who are vaccinated. In June, the CDC reported higher-than-expected rates of myocarditis among vaccinated (not

unvaccinated) youth. There were 117 cases among males 12 to 15 (when no more than five were expected).

Dr. Nicola Klein of the Kaiser Permanente Vaccine Study Center presented data regarding post-vaccination heart inflammation from the Vaccine Safety Datalink, a database from the CDC, and nine other healthcare groups, including five Kaiser Permanente facilities. Data also showed higher than expected cases among youth following vaccination.

Yet we are expected to ignore facts and summarily dismiss legitimate concerns, as these, as misinformation perpetrated by quacks. Even if such claims ring true, who gets to decide? The answer is best found in the cliché, "Follow the money." Throughout the pandemic, nine new billionaires have been hatched. Pfizer alone estimates to profit at least 33.5 billion dollars from the Covid injections; and many medical professionals receive financial incentives to promote injections. In the United Kingdom, for example, nurses get

£10 per needle they put into a child.

Our charge is to protect children, not to use them for monetary gain. They are not guinea pigs, nor should they be treated as such.

Dear Board, Chairman Grellner, Michelle Davis, Dr Shah and Others,

Appreciate the opportunity to comment on the misdirection presented by Big Pharmacy and medical specialists including CDC, Fauci, Biden, Fed Health Departments, etc.

To state that we will not talk about the Vaccine and Mandates is not appropriate, but will rebut with these quick notes attached.

Science has been misused in the latest monologues about imposing vaccines, masks and mandates on innocent children that will endanger them for all their shortened life spans.

As a public servant most my life, with the IHS in Alaska for three years building sanitation systems we always did the right thing for our native American citizens and 230 communities.

This trust between my clients in the Nome area, including Savoonga, Golovin and St Michael was paramount in the delivery of water and sewer systems. Logistics, temperatures, and peoples religious beliefs were all dealt with for many successful projects.

The people behind this Plandemic need to be held accountable to their lies and deceit, the promotion of the vaccines that have not been tested and have been shown unsafe.

John E Turner, PE

To all the servant members to the public of WA State, upon the WA State Board of Health:

RCW 42.56.030

Construction.

The people of this state do not yield their sovereignty to the agencies that serve them. The people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know. The people insist on remaining informed so that they may maintain control over the instruments that they have created. This chapter shall be liberally construed and its exemptions narrowly construed to promote this public policy and to assure that the public interest will be fully protected. In the event of conflict between the provisions of this chapter and any other act, the provisions of this chapter shall govern.

<https://app.leg.wa.gov/rcw/default.aspx?cite=42.56.030>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fapp.leg.wa.gov%2Frcw%2Fdefault.aspx?cite=42.56.030>>

To You, as the servants to us the People who pay for your positions to serve us, are held to abide by the constitution and the codes of WA State; we demand per RCW 42.56.030, that you actually gather data on ALL THE SCIENCE related to early treatments inclusive of HCQ and ivermectin, Quercetin, Zinc, and present information in favor or and as to why there has been no emphasis on healthy life styles and BASIC supplemental vitamins, such as vitamin D3, C and Zinc, and OTHER well documented and effective preemptive and early treatments; and further provide ALL information relating to the shots and provide to us ALL the actual information, including death and disabilities, adverse reactions etc from the shots, inclusive of all the released information thus far that the FDA was court ordered to release on the study thus far, at a rate of 55,000 pages per month, to be fully released in approximately 8 months.

FURTHER, we demand that you hold public debate and inquiry hearings regarding this. The fact that this has NEVER been provided says A LOT.

We are demanding that you set up multiple hearings so that other health care professionals can provide desenting information to what we are being spoon feed regarding this experimental gene therapy shot and ALL the science on ALL these matters and the statistics on the shots; I as a resident of WA have the right to demand this per

FURTHER:

Regarding WAC 246-100-040

not only goes against our US constitutional rights, but also WA State RCW 42.56.030 and we the people to whom you serve, demand that you remove this conflicting WAC because we did not consent to this and it goes against WA State and our US rights.

Sincerely,

Janell Hulst

Subject: Regarding Washington State Board of Health Meeting for January 12, 2022

External Email

Dear Caitlin Lang,

As a parent and a member of the community, I implore you to please stop the push to require Covid-19 vaccinations for ANY child in child care or school. Covid vaccines should absolutely NOT be a requirement for our children! Please also reference Seattle Childrens Article

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R\\_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.seattlechildrens.org%2Fresearch%2Fbioethics%2Fresearch%2Fkids-required-covid-19-vaccine-ethics-perspective%2F%3Ffbclid%3DIwAR0R_d3b4QB75FgFmEhilIzrKMuUTn9GJBqiTO352mhaExKzZeCkabObK5g)>

where its stated that it is too soon to be requiring vaccinations for our children. Children are at an extremely low risk for Covid-19. The Covid-19 vaccines have no long-term testing on adults and they have even less testing on children. Covid-19 vaccines are not stopping the virus as many with the vaccine are contracting and spreading Covid-19 . The vaccine has not been tested enough to ensure its efficacy and safety in children. Requiring this vaccine does not protect our children!

The disease burden in this case does not meet your criteria. There is NOT a significant morbidity and/or mortality in at least some sub-set of the population. The survival rate is well over 97% and even the long term effects of Covid-19 do not represent a significant amount. Additionally, this vaccine is not meeting your criteria because it is not reducing the risk of person-to-person transmission.

As for the criteria of Implementation, the vaccine is NOT acceptable to the medical community and the public. There is an extremely large amount of both the medical and the general public who do NOT accept this vaccine as safe.

And finally in regard to vaccines effectiveness, this vaccine does not work. It is not on the Recommended Childhood & Adolescent Immunization Schedule. It is not preventing Covid-19 nor is it preventing the spread of Covid-19. The vaccine is not cost effective for our nation. Perhaps it is cost effective or free or maybe even puts some money into the local schools, but as a nation, it is destroying our financial position at an alarming rate. "Experience to date with the vaccine containing this antigen demonstrates that it is safe and has an acceptable level of side effects." Yeah. Not even close. Tell that to the parents of the kids who are having heart attacks. Tell that to my friends who have had massive auto immune flare ups and other medical issues arise immediately after their second dose. This is not a safe vaccine for all people.

In addition, i want to point back to The Nuremberg Code, codified into US Federal Law which prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states "the voluntary consent of the human subject is absolutely essential." Your chapter 246 - 100 and rule making petition for 246 -105 try to confuse, coerce, intimidate, threaten and harass us. This is called retaliation and discrimination, and that is against the law.

We have the right to determine what is the best for our families. Please PROTECT our children by NOT requiring a Covid-19 vaccination to attend child care or school.

Thank you,  
May Lindsay

Members of the Washington State Board of Health,

I oppose the following proposed policies:

Allowing local health officers to use law enforcement (WAC 246-100—070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040. These specifics come from WA 246-100. Which includes the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I am concerned for these policies as they go against our God given rights and freedom.

Respectfully,

Mandy Meier

Subject: Vaccine

External Email

I am writing you all today to state my concerns about mandating kids 5 and up being required to get the COVID vaccine. Our kids are still so young and have their whole lives in front of them. We have no glue how this vaccine could affect our children long term. We have seen through the last 2 years that yes kids have contracted COVID, but it does not severely hurt them. I feel that taking the time we would normally take to test a vaccine is something we owe it to our kids.

Over the last few months in King county, we have restricted NON vaccinated people from enter Nonessential business, yet over the last month COVID has been on the rise, and our hospitals are filling up. SO, I ask is the vaccine doing what it is supposed to be doing. Are we willing to take a chance on our kids and their futures? How does this benefit them or you?

I understand that we already have vaccines in place that the kids should have to enter school, but these vaccines have been around for years. And with the proper form parents can opt out of those vaccines for their children. We also know how and what these vaccines will do to/for our children.

I plea with you to really look at the big picture of what is going on and if this vaccine should be mandated. Is this vaccine real slowing the spread of COVID? Maybe the SARS-CoV-2 strain, but it doesn't seem to slow down the spread of all the variants. It's one thing to ask adults to get the vaccine, but it is another to mandate our children to get it when we have no data to show the positives or negatives of the vaccine.

Please don't do this. Let's take all the politics out of this and look at what is really going on FOR OUR CHILDREN.

Thank you

Marci Rauscher

Subject: Vote on forced detention

#### External Email

I understand that this vote isn't happening but it is so disturbing that this even made it into official forms.

To detain law abiding citizens and dictate their health choices is unacceptable. That is between a person and their Doctor. One size fits all is not ever a plan.

Everything I have read still says recovery is 99.97%. We need to push for studies on treatment. We can't vaccinate our way out of a pandemic. Why is there no prescribed treatment for those diagnosed with COVID after 2 years? People in high risk need to be careful everyone agrees.

You are supposed to work for us.

Subject: Vaccine stats on board meeting

External Email

I'm wondering why, as the stats are being shown to us, why so many people are getting omicron and 70% of people are vaccinated?  
And as they are promoting the vaccine and its benefits, I'm wondering why the risks of the vaccine are not being shown to us! Especially for our kids!

Allow local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following a refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination.

I would very respectfully ask that you vote against the proposed legislation. The proposal is too heavy handed and counter-productive.

Subject: NO on Unconstitutional Vaccine Agenda

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable. Moreover, more than 99 percent of the population survive. Covid vaccines have little effect on Covid, and in fact, most people who get Covid and spread it have been fully vaccinated, some have even received booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state

employee.

These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Lynn Seulean

Washington State Board of Health Members and Staff,

I am writing to ask that you please drop the mask mandates as soon as possible. I write this as someone whose family has been following your mask mandates even when almost everyone in our social circles is not.

This has been very hard on my wife and me and my children. Recently, my 12 year old daughter and 10 year old son were in tears because of the difficulty of wearing masks when most people around them do not. They wear masks because our family has taken the position that we will submit to those in authority over us as long as we are not being made to sin. However, many of their peers and some adults in their lives who do not wear masks are putting pressure on them not too. This is very difficult for them and the comparable experiences that my wife and I have had are difficult too. We are tired of every interaction with people outside of our home being awkward because we are wearing a mask and others aren't. We would not be wearing the masks if it was not for your mandate, so physical health is not our concern.

I give Governor Inslee and the board of health the benefit of the doubt of having good intentions (unlike most people in our social circles) but I want you to please weigh the social and emotional and mental and physical cost that obeying your policies has brought to families like mine. I lose a lot of sleep over this issue and have lost my joy in my work and in most activities involving other people. Our social and emotional health matter too and also affect our physical health.

I understand if you want to wait a few weeks for the omicron variant to burn through but then please stop the mask mandate as soon as possible.

Thank you.

Jason Elenbaas  
Washington State Resident

Vaccine Mandate/Quarantine Facility Opposition Letter

To The Washington State Board of Health,

This letter is to inform you that I strongly oppose the proposed vaccine mandate and quarantine facility propositions for Pierce County. I would like to express my extreme opposition to implementation of the UNLAWFUL COVID 19 vaccine requirement for schools in Washington State and the quarantine facility in this or any area.

1. There is absolutely NO COVID vaccine available in the United States has received FDA approval. ALL available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. This fear monger approach by the State of Washington and the Federal Government to force American citizens to inject an experimental drug AGAINST THE LAW and is the subject of numerous lawsuits! A Federal Judge recently rejected Pfizer's claim that the two products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable'

• Children's Health Defense (childrenshealthdefense.org  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>  
) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Targeting our children is simply another tactic to accomplish the goal of 100% of vaccination. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID! I challenge the Washington State Board of Health to show medical records for even one child who has died of COVID

without co-morbidities.

3. NO ONE knows the long term risks of these vaccines. One of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM. The studies Pfizer conducted were woefully underpowered. This is an analysis of the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors. ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>) It concludes the risks DO NOT outweigh the benefits, therefore more research MUST be done before being administered to children or anyone else!

Forced vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Our hospitals have more vaccinated COVID positive patients than unvaccinated, THE VACCINES ARE NOT WORKING!

Furthermore, real science is showing an abundance of evidence proving that this virus and all its variance are completely treatable with proven positive results when early treatment with the correct protocols are implemented. There is absolutely no reason to INVOLUNTARY FORCE persons or groups of people/families into isolation in quarantine facilities, which will inevitably further exacerbate the problem and death tolls. This is an extreme and blatant abuse of civil liberties and will not succeed!

We stand firmly against ANY AND ALL of these proposed WAC: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105,

If the Washington State Board of Health rules in favor of these mandates you can be absolutely certain to face legal action immediately, as this is constitutional, against the law and will be stopped!

Thank you for your careful consideration of this matter,

Kama Bigbee, PhD.

Subject: WA State Policies!

External Email

Good morning,

I am writing this morning to voice my opposition of the proposed policies. First and foremost I oppose policy (WAC 246-100-070) which allows local health officers to use law enforcement to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040) these specifics come from WAC 246-100.

I also would like to voice my opposition to WAC 246-105 that requires Covid-19 injections as part of school immunization.

Thank you for your time.

Sincerely,  
Joshua Seanard

Subject: Pushing the Vaccines

External Email

I really think that pushing for what is still an Experimental injection, (Where are the LONG TERM STUDIES on this and the STUDIES on what it will do to the children?) is totally irresponsible of the Board of Health. Being a parent of a vaccine injured child, you need to not push the vaccines.

In The last presentation, they said that in the beginning there were no therapeutics and that was incorrect. (Umair A Shah presentation)  
Your messages are "Lip Service" at this point. The Trust of the people you are losing at a fast pace.

Also, WE want REAL numbers on ACTUAL and FACTUAL deaths from Covid and not with Covid.

We also want numbers of vaccine deaths and injuries. If you are not willing to give ALL the information, then you're doing a disservice to the people of the State.

Natalee Thurston

Please do what is best for our children and vote no to Covid vaccines being required to attend school. Parents should be able to make these choices for & with their kids. It should not be made mandatory.

1. COVID vaccines remain under Emergency Use Authorization. This is not a proven vaccine. We don't know what all the side effects will be in 3, 5 or 10 years. We have already witnessed some terrible reactions & deaths in adults & children.
2. Children under the age of 18 have a 99.995% survival rate from COVID infection. Covid does not react the same way with kids. Why would you give your kids a vaccine that has unknown & harmful side effects, when they have a 99.995% survival rate from Covid.
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19. Plus the unknown & already known side effects & deaths.

I am a retired teacher & I would absolutely not be part of giving this vaccine to students. This is not the schools job. I would not want to be responsible for these side effects or even deaths to our children. This decision should be made by the individual families.

Thank You for your time & please do what is best for our kids. Vote no to this mandatory vaccine rule for our kids to attend school. I'm expecting to see many home school families, if this requirement goes through. I hate for kids to miss out on learning experiences & the fun of their school days.

Hello,  
I am VERY STRONGLY OPPOSED to making the COVID-19 vaccine a required immunization for kids to attend school or daycare. I am very much opposed to it being required for anybody at all. It is still a very new "vaccine" and hasn't had time to be fully tested to see what any long-term effects it might have. Also it can affect different people differently and not always for good. Plus, unlike the older vaccines, the Covid one doesn't actually keep people from getting Covid or spreading it to others. Please, please do not allow this to become a requirement! I know for me, and many others I know, if it does become required we will be pulling our kids out of school altogether, rather than go against what we believe is best for our kids and inject them with the Covid vaccine.  
Most sincerely,  
Israel Dehnert

January 7, 2022

To whom it may concern;

The proposed items to be discussed at your Wednesday meeting which have to do with detainments or removal of individuals regarding being non vaccinated or a threat to public health safety and requiring school aged children to be vaccinated for Covid 19 to attend school are illegal and against State, Federal and International laws.

You cannot require someone to take a medical product that is under Emergency Use Authorization.

The Pfizer vaccine has not been authorized by the FDA (Comirnaty has had its license approved by FDA, it is not in production at this time nor has it been approved yet since it hasn't been manufactured yet.), nor any of the other Covid vaccines at this time, please see the attached letter from the FDA to Pfizer. The screenshot is of the corresponding section which states that the current vaccine by Pfizer is still under emergency use authorization. If you would like to see the entire letter it is attached in the zip file.

Us Code 21 section 360bbb, is our federal code that states that an individual cannot be coerced to take an experimental medical substance with the threat of loss of freedom or restrictions under our constitution. See screen shot attachment of the corresponding section of this code.

I urge you to consider your actions in this matter. If you vote to accept these restrictions which are in clear violation of State, Federal and international laws, you can and will be an acting accomplice in these crimes against the people of this county and state.

I am 100% oppose to the COVID-19 VACCINE being added to the list for children for public school. I will pull my children from Washington state public school and sell my home in Washington state. I would rather learn to live with the crocodiles and alligators in Florida than have my children be vaccinated. Forcing my children to exercise in a hot gym with masks on was bad enough! Let's limit oxygen to a developing mind from a mask while exercising! We have gone along and followed these asinine rules and guidelines that have prevented nothing. Infection rates are at an all time high.. Interesting that we now have flurona. Suddenly the flu is back. I will not subject my babies to a experimental vaccine that has not had enough time for anyone to know all the possible risks and side affects.

Subject: Fwd: Failure Notice

External Email

The Covid-19 vaccination, if it can actually be called a vaccination by traditional terms, should not be mandatory in any setting.

The mandates are a contributing cause of the shortage of healthcare workers. Public reporting of cases and deaths for only Covid-19 are causing unrealistic fear in the general public, which is further impacting our healthcare system.

I think all mandates should be stopped. I think all general testing requirements should be stopped. I think all contact tracing should be stopped. Public health policy cannot stop this virus and all the different variants. The virus cannot be stopped with a vaccine.

The health department should be balancing the information on Covid-19 deaths by reporting all deaths of all causes and separating the Covid-19 deaths into two categories, people who died of Covid-19 and people who died with Covid-19.

Doctors should be allowed to try any medication they think will help including medication that would be an off label purpose. I would rather see a doctor who thinks outside the box than one who just follows the "approved" treatment plans for any disease, but especially Covid-19.

I am not anti-vaccine, but I am against mandating vaccines, vaccination should be a choice based on informed consent and not coercion by any means including fear.

Sincerely,  
Michelle van der Merwe

The committee was exasperated about the number of callers concerned about involuntary quarantine centers. However, the committee's political word mincing saying that "no such places exist" and that they "don't even have the funding set up for something like that" was unconvincing. The citizens of Washington State know that those words do not mean the centers are not nearing completion and that the funding is not drafted.

NOTICABLY MISSING IN THEIR SPEECH WAS THE PROMISE THAT NO SUCH THING WOULD EVER HAPPEN IN WASHINGTON STATE or THAT THESE PLACES ARE NOT ALREADY IN THE WORKS.

What's happening in Centralia?

All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Concerned citizen,  
Jamen Green

I am a K-12 School Psychologist in WA public schools and I strongly oppose:

1. Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
2. Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Isolation and vaccines have not been proven to be safe or effective. I have seen the impact on our children first hand in the schools. A healthy society does not take life from their children to briefly extend the life of elderly. It is time to learn to live with the virus, and focus on early treatment.

Sincerely,

Julie Apeles

Dear Ms. Hoff,

I am writing in regards to your upcoming meeting which includes the following proposals:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from WAC 246-100.
- Include the Covid injections as part of school immunization requirements using WAC 246-105

I want to express my voice and concern over these proposals. To be honest, I am shocked that I even have to address these things in America, the land of the free.

I am 100% opposed to any forced Covid 19 mRNA shots on our children! This is absolute madness to even consider given that kids are at very little risk of harm from Covid and now that we have Omicron, which is proven to be mild, it shows that the pandemic is coming to an end. This is a virus that will always be around we simply need to learn to live with it. This is still an experimental shot and we have no way of knowing the long term effects on our kids. I am not willing for my kids to be an experiment and there is simply no need for this to happen. Dr. Fauci himself, stated that kids were at little risk from dying of Covid and that the hospitalizations were being overcounted because they are including kids in the hospital WITH Covid rather than BECAUSE of Covid, this is a HUGE difference and confirms there is no need to mandate this for kids.

I am also appalled at the thought that quarantine facilities would be even be considered, is this Nazi Germany?! It is complete insanity and there is absolutely no scientific basis

I respectfully ask that you vote against any mandatory requirements for children to get any COVID vaccine for school or otherwise. There is a reason vaccines and medicines are vetted an extended period of time and this vaccine should be no different. At this point in time, no one has any idea what the long term effects are from this vaccine and until that data is available, this should not be a requirement (especially for our children). I feel requiring the vaccination of children with a vaccine that has not met this rigorous vetting process is not only dangerous, but reckless and irresponsible on the part of our system that is supposed to be looking out for the welfare of our children. This vaccine should be categorized and tested the same as all other vaccine's for children.

Thank you,

Rella Grimes

Dear Miss Christy Hoff,

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education dollars and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

To my Washington State board of health member: I am writing to plea against the upcoming vote to strip away my civil liberties and mandate vaccinations which is unconstitutional. Also I do not agree with enforcing vaccines in schools or the confinement and isolation of families or groups not willing to vaccinate or quarantine. This is still America correct?? How in the world are we being so blinded to the corruption of the government and pharmaceutical companies that we don't even remember civil liberties and why America is great!?! Please do not be swayed by pressures from higher up to make these long term injustices legal. I am in health care and I do not think this is a just enforcement of power and personal rights being ignored and powers being stripped away. What's next I ask? Give an inch and the mile comes next... I would like to maintain my rights to life (unimpeded by Vaccine side effects), liberty ( free will and choice to respect my body), and the pursuit of happiness (not enforcement camps and government illegal mandates that I do not agree to).

Thank you for representing me and my rights with a vote against these proceedings and mandates on Jan 12th.

Sincerely and confidently,  
Erica Black  
Fall City, WA

Subject: Forced Measures Mandate

External Email

To Whom It May Concern:

Please do not take measures to force vaccine mandate compliance. Why?

(1) There is no medical exemption allowed for. There are many of us who have reacted badly to flu shots, myself included. Getting the covid vaccine I believe will kill me. Please don't require this.

(2) There are more politics involved in this matter than common sense. The idea of vaccination is pushed to the exclusion of other options. There is the treatment with monoclonal antibodies. There is the malaria treatment serum. There is the virus pill put out by Pfizer. These things aren't mentioned in the media that much. Just vaccinate or else. That is not a fair picture of what is available to us to survive covid.

(3) Ongoing mandates are unconstitutional. Where is the legislative process?

Thank you and Regards..... Keith Lessley

Hi Melanie,

I am writing this email regarding the potential Washington state vaccine mandate for schools. Without going into great scientific debate, there is no discernment between vaccinated and unvaccinated people regarding contracting Covid or transmitting Covid. The Covid vaccines are not effective. The vaccines are actually not true vaccines by definition.

The second fact is that mandating experimental drugs on the general public is a violation of our constitutional rights living in the United States. Now our state is looking to mandate this on children in whom these drugs are not studied or approved. Comirnaty as a brand name is actually not being dispensed in the US at this time. We continue to use emergency stock piles of Pfizer's drug as well as Moderna which is not FDA approved, yet "counts" if you want to be considered vaccinated! No approval and not enough evidence for approval. The practice of distributing drugs not approved is illegal by so many laws we don't have time to discuss. No other vaccine to date has performed like this.

I am adamantly opposed any mandate for the Covid vaccine regardless of which one. We have a right to chose what goes in our bodies and how we manage the health of our children. This mandate for vaccinations for kids to be in school will cause parents to remove their children from this school system as well as physically moving from this state. Highly educated well paid taxpayers are leaving the state of Washington in droves because of Jay Inslees mandates and rules. This will be the final straw for thousands of people because we are NOT willing to be the experiment for Inslees political agenda. I am happy to expand on the scientific data and information if you would like more information.

Thank you for you time.

Rachel Enselman

Once again, my wife and I are dumbfounded by the tyrannical considerations the WA state board of health is meeting on. The irony in the title of your board is not lost on us. Health is the last thing your department is about. Try fear and control. As Americans who knows our rights, we reject the proposition plain and simple and would have no intention of abiding by it. It's so unamerican you may have forgotten the country in which you preside. If such policies are implemented feel secure in the reality that only the weakest among us who you've continued to destroy (children) and parents who are too ignorant to know what their rights are would be the only one's you could manipulate into this perversion. What a win that must feel like for some of you. The science on the "pandemic" has been exposed for what it is. People need to make their own choices as to what's best for them and their families. Quit this albatross of demi godlike behavior you've assumed before it gets uglier, and it will whether at the ballot box (even from your own moderate left leaning constituents) or from freedom loving patriots whom you most likely despise. Respect differences of opinion and learn to validate your jobs by actually healing our state and nation. It's the least we ask since we're the one's paying your salaries.

To whom this concerns,

We have seen the enemy and it is the corrupted, bribed, coerced and complicit federal, state and city governments who have deliberately engaged in this planned-demic to create the greatest crime against humanity to date. You have destroyed our economy, social structure, abused our children who are essentially immune from this 99.9% survival rate flu. And then assaulting the population with a toxic life threatening inoculation which has permanently injured millions and outright killed hundreds of thousands, far exceeding any legitimate deaths from this flu, which has been gone for over a year now. The medical and scientific fraud is staggering, the cognizant dissonance and malice of Inslee's office and his very questionable relationship with the genocidal maniac and international despot Bill Gates is inexcusable. All the while using a fraudulent testing procedure(97% false positive and which tap water gives a positive result ) to further cripple the population is beyond reprehensible. Any further ridiculous and draconian behavior from this body will not be tolerated. This fascist agenda Inslee is engaged in is an act of terrorism and treason and along with all your names , address and email, his information and crimes will be handed over to the Nuremberg court currently in session. I pray you do the right thing and rescind any further crimes against the people by supporting this fraud but i know you, like the despotic school board, are bribed and incentivized with billions of our tax dollars by this illegit Biden admin to assault the people and our children. You will be held responsible for your complicity and your complacency. Like DC, MSM, CDC, AMA, WHO, NHS, etc.,.this governing body has become the enemy thru your treasonous crimes against our republic and our constitution. There has never been a pandemic, no excess death and which effected less than one half of one percent of the population and for this you threaten concentration camps and police intrusion into our homes and businesses. Have you no morality or conscience?

This adventure has pointed out the incompetence and fraud which is the medical industry and how our despotic politician's prey on the people. Those who have awakened will never sleep again. I, for one, will never comply with this criminal enterprise, or my children and grand children. We have seen the enemy.

Sincerely,

Stephen Joseph Strickland

Subject: January 12th quarantine facility Question

External Email

Dear Board Members,

Are you aware that the military has released irrefutable documents and evidence (in the last 36 hours) that Dr. Fauci lied/obfuscated the truth, to We The People, as did the CDC, regarding the following points of the Covid pandemic:

- a) efficacy of prophylactic therapies including HCQ and Ivermectin, against SARS-Cov-2 do indeed exist
- b) the mRNA gene therapy is not a vaccine, and is an experimental therapy for which the safety data is not presently available (as the experimental data is not anticipated to be completed until 2023 and 2025)
- c) involuntary quarantine of members of We The People, in order to force experimental therapies upon We The People, is in fact a crime against humanity and will result in the arrest and trial, of each individual member of this Board, and those complicit
- d) lastly, are the members of this Board aware that individuals that do not have co morbidity(ies) and especially children, have a survival rate against Covid strains greater than 99.9998%, therefore involuntary quarantine and/or forced gene therapies upon any members of We The People in the name of Covid strains, is scientifically unwarranted?

We The People implore each Board Member to reverse course and demonstrate to the Country and the global population, that Washington State is not bought nor commandeered by profits, nor is any other personal/organizational financial interest placed above the well being and freedom of the People; and Washington State does not follow the policies of corrupted individuals or entities such as Dr. Fauci.

Thank you,

Dr. Ingrid Fruth, Ph.D.

To whom this concerns,

We have seen the enemy and it is the corrupted, bribed, coerced and complicit federal, state and city governments who have deliberately engaged in this planned-demic to create the greatest crime against humanity to date. You have destroyed our economy, social structure, abused our children who are essentially immune from this 99.9% survival rate flu. And then assaulting the population with a toxic life threatening inoculation which has permanently injured millions and outright killed hundreds of thousands, far exceeding any legitimate deaths from this flu, which has been gone for over a year now. The medical and scientific fraud is staggering, the cognizant dissonance and malice of Inslee's office and his very questionable relationship with the genocidal maniac and international despot Bill Gates is inexcusable. All the while using a fraudulent testing procedure(97% false positive and which tap water gives a positive result ) to further cripple the population is beyond reprehensible. Any further ridiculous and draconian behavior from this body will not be tolerated. This fascist agenda Inslee is engaged in is an act of terrorism and treason and along with all your names , address and email, his information and crimes will be handed over to the Nuremberg court currently in session. I pray you do the right thing and rescind any further crimes against the people by supporting this fraud but i know you, like the despotic school board, are bribed and incentivized with billions of our tax dollars by this illegit Biden admin to assault the people and our children. You will be held responsible for your complicity and you complacency. Like DC, MSM, CDC, AMA, WHO, NHS, etc.,.this governing body has become the enemy thru your treasonous crimes against our republic and our constitution. There has never been a pandemic, no excess death and which effected less than one half of one percent of the population and for this you threaten concentration camps and police intrusion into our homes and businesses. Have you no morality or conscience?

Regarding vote on January 12th to decide to make the co vid 19 jabs mandatory. They are experimental. They have not been approved by the FDA. Comiraty has been approved and it is not available in the USA. This virus has a 99.8% survival rate. More people have died from the shots than the virus. The statistics are being manipulated to suit the narrative. It is unconstitutional to force any medical treatment and according to the Nuremburg code, there has to be informed consent. The enclosed circular in the vaccine box is entirely blank. How can you receive informed consent if you do not know what is in it? The individual may not be coerced, forced or pressured to take any experimental treatment. Anyone who forces this and implements any of these shots are guilty of crimes against humanity and will be brought to justice just as they were in World War II. This includes you and if you recall, doctors, news reporters were either in

prison for a very long time or were hung. Matter of fact, Nuremburg II trials are going on right now.

There are preventative and treatments effective for this entity. This virus has not been isolated. This has been hidden in order to pave the way for these shots, that do not even work. The hospitals are filled with the vaccinated related illnesses. You likely know this covid 19 is patented. How can you have a patent on a naturally occurring organism? It is a bioweapon.

The MSM say the side effects and deaths are very, very rare. Explain that to a mother of her 6 year old dead child. Explain that to the athlete who survives the heart attack or pericarditis only to never be able to compete again in the field of sport that they love?

I do not comply. I do not agree. There is no evidence anyone who has not taken the shots transmit any illness to those who have taken the jabs. Those inoculated have their immune systems destroyed allowing them to be sitting ducks for illness, immunocompromising illnesses and cancer. These are not vaccines. They do not produce immunity.

Experts who have been censored including Dr Robert Malone who created the Mrna, Dr Michael Yeadon who was Vice President for Pfizer admit these are bioweapons and the only objective is depopulation and control of those who survive these shots. You had better wake up. You are on the wrong side of history.

The emergency use authorization expires Jan 15th. Please reconsider pushing this narrative and go down as being on the right side of history.

Sincerely, Rebecca Irvin

Subject: COVID 19 Vaccination Requirement for School Children

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&data=04%7C>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&data=04%7C>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you for your attention on this important matter.

Dear Mr. Stuart Glasoe,

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education dollars and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this

section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

<kelie.kahler@sboh.wa.gov <mailto:kelie.kahler@sboh.wa.gov> >

Hello Christy,

This email went out this morning to several people but I misspelled your name...

I am strongly opposed to mandating the COVID injections on our children. Yet, that is exactly what they are proposing next week. Children are at extremely low risk for COVID and these medical decisions should be left in the hands of parents. Verifiable data shows that more children have been injured and have died from the injections than from the COVID virus itself.

I am a physician of 21 years in healthcare. I am extremely concerned with the idea of mandating injections for children. The reactions and injuries we are seeing, as well as several of my nursing colleagues are terrifying.

The data is overwhelming but yet being censored and hidden as to the damage and danger of the COVID injections. We are seeing heart problems, neurological problems, changes in ovarian activity/dysmenorrhea, and so much more. Our overall death rate has gone from 10% to 40% and according to epidemiologists, it does NOT coincide with COVID deaths but with the timing that the injections were rolled out much later in 2021.

My doctor and nursing colleagues have asked their chief managers about reporting these adverse events to VAERS and they HADN'T EVEN HEARD OF IT. Only 1-10% of the injection injuries/deaths are being reported. Even those numbers being reported are astoundingly higher since the COVID vaccine started being injected.

In addition, it is well-documented that there are FULLY FDA licensed and CDC approved forms of early COVID treatment that have saved thousands. Those treatments are not being used and healthcare providers are getting fired for using those protocols. THE PROTOCOLS BEING USED NOW IN OUR HOSPITALS ARE KILLING PEOPLE, when we know better.

There have been no long term studies on adults and NONE on children due to the EUA. And in fact, if it were recognized in our healthcare system that other approved, successful medications were effective, the EUA would have to be removed, rendering the EUA inapplicable. We know that the survival rate for our young children from COVID is 99.9973%

History is in the making right now with a devastating effect on our innocent children of our future and unknowing, fearful, brainwashed adults. I am writing this letter to know that I did everything I could to stop the insanity. I hope to be on the side of history that DID THE RIGHT thing based on verifiable, expertly researched undeniable data and evidence.

Thank you in Health,

Dr. K. Thomas

To whom it may concern:

I am strongly opposed to the Covid vaccine drugs being mandated for school attendees. Vaccination is not a decision for politicians, but should be decided by the individual or their parents. Should there be long-term side effects, from these vaccine drugs, or from the virus itself, it falls on the parents to carry the burden of those health issues. The government can educate parents about this decision, but should not make the decision for them, nor coerce them into choosing against what they feel is best for their children. Please do not mandate these drugs.

Sincerely,

Mary Brooks

(Citizen of WA state and parent of 6 grown children and 5 grandchildren)

Subject: January 12 State Board of Health Public Meeting Comment

External Email

Ladies and Gentlemen,

Please add the following comments to the meeting minutes for review and consideration by all board members.

Comments:

1) Regarding WAC 246-100-040, Procedures for isolation or quarantine. (1) which states, "At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section..."

As written, WAC 246-100 appears to exhibit strong potential for government overreach in that it empowers health officers to leverage law enforcement resources to impose punishment for non-compliance in the form of detention for up to 30 days (prescribed in subsection (4)), apparently without safeguard to the legal rights of the individual. While subsection (1) goes on to allow for petitioning the superior court ex parte for the issuance of a detention order, this is optional.

Hypothetical Application: A health officer confronts an individual regarding vaccination status and if not personally satisfied with the response (1(a)), employs law enforcement resources to detain the individual for up to 30 days.

ref: AGO 1970 No. 2 (1) "The provisions of the 4th Amendment to the United States Constitution are applicable to any detention of a person for investigation of suspected criminal conduct irrespective of whether or not the detention amounts to an arrest or not;..."

ref: 5th Amendment US Constitution "...nor be deprived of life, liberty, or property, without due process of law;..."

2) At ~10:37 in the meeting transcript, Michele Roberts spoke about the likelihood of infection and hospitalization for the unvaccinated versus the vaccinated. What about the likelihood of reinfection for those who have already been infected? How does the statement by the CDC "Cases of reinfection with COVID-19 have been reported, but remain rare." justify the requirement for vaccination for those who were previously infected and recovered.

ref: Reinfection with COVID-19, Updated Aug. 6,

2021<https://www.cdc.gov/coronavirus/2019-ncov/your-health/reinfection.html>  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2Fncov%2Fyour-health%2Freinfection.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C4b43bddfc1b5446a02f808d9d5>>

Thank you for your time and consideration.

Respectfully,

Greetings from a Concerned Citizen,

I listened to the Washington State Board of Health meeting today by phone and became very concerned as I listened to the first doctor that spoke (didn't get his name) that was stating "facts" that I disagree with. I will not go into detail, but I will let the below article speak for me.

Thank you for your attention to my concern.

Ken Stephenson, a Washington State Resident

SARS-COV-2 Vaccines and Neurodegenerative Disease

Subject: Do Not Vote for "Healthcare" Tyranny in Washington

External Email

Dear Washington State Board of Health Members,

Out of fear, I am writing you today.

I have listened to local Seattle radio and watched national television reports on these absurd and non-scientific "health" measures that you are voting on today.

Our nation and state have lived with Co-vid for several years. We citizens know a lot about this disease: how it originated, how it has been lied about, and who we can and cannot trust.

If Governor Inslee were truly serious about eliminating Co-Vid and its variants:

1. He would encourage President Biden to close our southern border – where 2.5 million diseased illegals from over 150 countries have entered our nation in the year since he took office.
2. He would rescind his mandates forcing these "bio-experimental shots" onto healthcare workers and other employees.
3. He would read data from other U.S. states and World Nations who are successfully managing this virus.

The latest variant, Omicron, is highly contagious with mild symptoms.

Enacting severe measures on our state is nothing but a control play by Governor Inslee. Do not vote for these measures to allow him the power that he craves.

Kindest regards,

Maggi Hoover

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents

In the United States of America, health officers do not have the right to quarantine a person or family for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

Also, there is absolutely no reason to put a vaccine mandate on our children to be able to enter school!

I am asking you to vote no on this dictator plan to control the lives of the people of Washington State!

Thank you.

Subject: COVID Vaccination-Thank you in advance for your time and attention.

External Email

To Staff and Board Members,

I've grown up in Washington and have lived here my entire life. Family values are very strong within me. When my Grandpa passed one of the last things he said was, "Family is Everything." My Kids and my Family are Everything to me. I think everyone understands the importance of family. A lot of times, whether one's family is supportive/present or not, friends can become like family too. So what it means to be part of a "family" is well understood.

Parents are the sole protectors of their children, and have a say in what can and cannot go into their bodies. This is in line with our constitutional rights and is instinctive in nature. I grew up with so much freedom and security in the world around me. I think a lot of that sense of security came from the security my parents and family felt in the world then, and their ability to protect us. Now things are seemingly drifting from our foundational constitutional rights as humans and as parents. That security I felt, gone. Now, as a parent, I feel fear and distrust in our governing bodies. This makes me grieve with so much sadness for people currently and for our children and their future.

I was in the pharmaceutical industry for nearly 10 years. Everything was highly scrutinized for safety and efficacy. People had the choice of what they put into their bodies. The goal was to treat people early to help keep them out of the hospital. Talking about the importance of early treatment and preventative measures to keep people healthy and out of the hospital was encouraged. Less hospitalization equaled better outcomes for patients and lower cost to healthcare. With Covid, early treatment and preventative measures are being suppressed, their importance is not being emphasized enough, and patients have been waiting until they are so sick that they have to go to the hospital to be treated. With Covid, there is now a fear that I as a parent could be mandated to consent to having my children vaccinated in order to attend school. Mandates are unconstitutional in themselves, especially mandates to take a vaccine without knowing the full side effect profile and long term side effects. A vaccine that could cause permanent damage to children's/human's organs. A vaccine that doesn't stop people from getting or transmitting Covid. A vaccine that doesn't make sense for low risk children. All the unvaccinated kids in my family that have had Covid have either

been asymptomatic or have had very mild symptoms and recovered quickly.

Please no Covid vaccine mandates, no mandates for children to get the Covid vaccine to attend school, and no adding Covid to the required vaccine list for school age children. These are our babies and the future of our world. A lot of people's Everything.

Thank you for your time thoughtfulness,

Heather Vaughan

Responding to Tom P. According to the definition, Covid is not a "preventable disease". With the vaccine, it is basically a 'treatment'. If you go forward with any mandates for a treatment, then why stop there? Why not continue to mandate starting us on chemotherapy to try and prevent cancer?

Will not comply.

Stop this TAG now as it is basically a waste of a process concerning Covid...

Josh

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>  
)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Concerned citizen,

External Email

We know that Covid-19 has an overall survival/recovery rate of 99.9%. Omicron is even less harmful.

We know that the young/healthy have a 99.998% survival/recovery rate.

We know that masks do more harm than good and cause deleterious health impacts, especially on children.

We know that all of the approaches proffered by CDC and local/state health authorities in WA state have been embarrassingly wrong.

We know that over 21,000 Americans have died as a result of these mRNA injections and over 1 million Americans have had serious negative side effects as a direct result of these injections. We know that the VAERS system only captures between 1% and 10% of the total mortality/morbidity numbers historically.

We know that preventative medicines such as Hydroxychloroquine, Zinc, and Ivermectin work incredibly well as compared to the injections.

We know that everything surrounding Covid from its inception to its release and the pre-planned solution (the "vaccines") has been shrouded in fear and misinformation from health "officials".

We know you are liars.

We do not trust you.

We know who you are.

We will hold you accountable.

Nuremburg Trials will commence.

I urge anyone at DOH who still possesses a conscience to get on the right side of history.

Jarod Drozdowski

Regarding proposed quarantine camps:

This is a bad idea! We the people DO NOT want quarantine camps or people authorized at their sole discretion to decide who goes to such a place. Any elected officials will NOT be re-elected and there will be a push back of legal challenges. Do not put citizens and tax payers through this treatment. The federal government is not doing this type of treatment to the illegals crossing the border so certainly there should be no intentions of locking up tax paying VOTING citizens!

It's an outrage that whoever proposed this idea lives in this free country!

Sincerely  
Janette VanMeter

Dear Kelie Kahler,

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education dollars and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

Hello,

I am writing to you to ask you to not approve the mandate for covid vaccination. This vaccine does not prevent you from getting the covid virus, it will help with lessening the severity of symptoms. I believe in medical freedom for my family. If this passes the state will lose money from the federal government as many parents will pull their kids from schools. The vaccine is not even approved by the government. It is still in the EUA stages and not enough research has been done with the vaccine to prove it is safe.

PLEASE DO NOT APPROVE THE MANDATE!!!!!!!!!!

Concerned Parent,  
Tami Saylor

Subject: Health Policy Concerns

#### External Email

No matter what the state decides on regarding public health legislation we must remember and value the Nuremberg code, namely that all medical experiments must be voluntary, and forcing involuntary detainment upon someone for a medical treatment is in direct violation of this and a basic human right, that is freedom of choice. Medical exemptions and religious exemptions must be considered as well, and with this compromise must exist against forced/required vaccinations in the form of testing and/or some other measure also due to the Nuremberg code. It is wrong to fire people over a medical treatment and personal choice, and it's extortion when you make this state policy. Furthermore, the very thought of involuntary detainment, and whatever facilities may enable and house this, only brings to mind an image of psychological terror that seems both unhealthy and unnecessary for a virus that is transitioning into becoming an endemic.

Mention has been made that "misinformation" or a "rumor" is floating around about involuntary detainment but that is clearly mentioned in WAC 206-100-40, as well as the authorization of "a local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050 <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault> (4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault> . You also mention that there is no plan to talk about child vaccination requirements when it is clearly on the agenda; your trust is being challenged when making such sneaky moves to avoid public outrage. We see what the state is potentially planning and we do not like. When I say we, I refer to those of us who do not submit to the failing covid narrative. We have been following the "rules" for almost 2 years now so why are we not making considerable progress as again we have evidence this virus is becoming less deadly? Why mention that getting a booster is effective when the CEO of Pfizer just admitted that 2 boosters is not enough? Why not mention the negative/adverse effects, which again were attempted to be confidential for almost 50 years as per request of Pfizer's CEO. We do not trust the most criminal pharmaceutical company in the history of this nation, and it's insanely irresponsible to push this toxic positive feedback while ignoring the reality of risk especially in children. I and many others do not care to risk getting myocarditis for a virus with a 99.8% survival rate.

Recent data coming out from the UK and Canada is showing that the majority of recent hospitalizations are among vaccinated persons, so I would like to see the actual numbers of cases here as well. The waning efficacy of the vaccines and boosters is becoming known, and it's frankly not smart to advise people to take a booster for a virus that was in circulation over a year ago now, unless you honestly think the masses are naive enough to not understand basic medicine. We must consider that the vaccinations and their rapid rollout has contributed to the growth of mutant strains and variants. Also of concern is that there has been seldom any mention of basic preventative measures in the early treatment of viruses, and I am mainly considering supplementation of Vitamin D, Zinc, and Quercetin, with Vitamin C and Elderberry also being common and cheap supplements for preventative care. Very little has been said on active lifestyle changes, through exercise or dietary restrictions, which also go a long way in lessening the

severity of disease. The suppression of effective medicines such as Ivermectin is also hugely irresponsible when it is and has been FDA approved; the bogus slander campaign against the drug really gives credence to the idea that there is a legitimate conspiracy between pharmaceutical companies and policy makers to favor a more profitable "cure" over something that is cheap and readily available.

Furthermore, evidence is coming out against one of the leading "experts" on covid that is Anthony Fauci and how he has suppressed information about his involvement and funding of gain of function research in Wuhan. The lab leak theory was dismissed as a conspiracy theory in early 2020, to the point where one could be banned on social media over merely suggesting it. If you really want to get people to take your vaccine then perhaps stop trying to censor any "controversial" take on the vaccine, namely adverse reactions and deaths. There are over a million adverse reaction reports on VAERS which for this timeline is higher than for all vaccines in the past, and even if some of these reports are fake (it is a crime to falsify this information and little incentive to do such a thing) there is also the high likelihood that cases are being underreported due to the culture of the medical industry, mainly considering staffing shortages and issues that would prevent reports from being filed accurately/completely.

With all this being said Aristotle once said "the mark of an educated mind is to be able to entertain a thought without accepting it" and that is all I am asking the Department of Health to consider: the risks. Stop pushing this narrative unless you want to divide the state and incite violence among certain people/populations. The fearmongering the media has done throughout the pandemic, and all the misinformation and "revising" of data and terminology to direct a narrative has been psychologically damaging, and we certainly are experiencing every symptom of mass psychosis; it's not some "right wing conspiracy theory" there is legitimately a mental health crisis this country is experiencing that is being exacerbated by the media's portrayal of the pandemic. Constant masking will have a negative impact on human psychology and the ability to communicate feelings/emotions. This is a warning to you all, the department of health and whoever ends up reading this: I understand you all are working for the public health and this abstract concept of a "greater good" (this is a highly relative/subjective ideal) but please understand that primarily selfish interests are also involved in this pandemic as it is being used not only to generate profits for some but also slowly roll out oppressive, authoritarian and outright draconian measures. This too shall come to pass, but it need not reach violence and destruction if legislators and policy makers remember that they are essentially here to serve and support the public, and not private interests or the highest bidder; even though the country has descended into oligarchy, this does not have to be its fate or future.

I speak on behalf of the human spirit and its sovereignty,  
Thank you for your time and consideration.

Regarding vote on January 12th to decide to make the covid 19 jabs mandatory. They are experimental. They have not been approved by the FDA. Comiraty has been approved and it is not available in the USA. This virus has a 99.8% survival rate. More people have died from the shots than the virus. The statistics are being manipulated to suit the narrative. It is unconstitutional to force any medical treatment and according to the Nuremburg code, there has to be informed consent. The enclosed circular in the vaccine box is entirely blank. How can you receive informed consent if you do not know what is in it? The individual may not be coerced, forced or pressured to take any experimental treatment. Anyone who forces this and implements any of these shots are guilty of crimes against humanity and will be brought to justice just as they were in World War II. This includes you and if you recall, doctors, news reporters were either in prison for a very long time or were hung. Matter of fact, Nuremburg II trials are going on right now.

There are preventative and treatments effective for this entity. This virus has not been isolated. This has been hidden in order to pave the way for these shots, that do not even work. The hospitals are filled with the vaccinated related illnesses. You likely know this covid 19 is patented. How can you have a patent on a naturally occurring organism? It is a bioweapon.

The MSM say the side effects and deaths are very, very rare. Explain that to a mother of her 6 year old dead child. Explain that to the athlete who survives the heart attack or pericarditis only to never be able to compete again in the field of sport that they love?

I do not comply. I do not agree. There is no evidence anyone who has not taken the shots transmit any illness to those who have taken the jabs. Those inoculated have their immune systems destroyed allowing them to be sitting ducks for illness, immunocompromising illnesses and cancer.

Experts who have been censored including Dr Robert Malone who created the Mrna, Dr Michael Yeadon who was Vice President for Pfizer admit these are bioweapons and the only objective is depopulation and control of those who survive these shots. You had better wake up. You are on the wrong side of history.

The emergency use authorization expires Jan 15th. Please reconsider pushing this

narrative and go down as being on the right side of history.

Sincerely, Rebecca Irvin

To Whom It May Concern,

This letter is to state our opposition to adding the experimental COVID vaccine to the list of required vaccinations for K-12 students. This vaccine is dangerous for our children and should not be required for our kids to attend school. If Washington forces this vaccine for K-12 students, they are forcing parents to either remove their children from school, leave the state of Washington, or inject a potentially harmful and even deadly experimental vaccine. Please oppose this idea of adding a COVID vaccine to the required vaccinations for K-12 students in Washington. We are not anti-vaxx, all our children are fully vaccinated, however they will not receive the COVID vaccine as we personally have friends who have died, been hospitalized, had bad reactions and side effects to the vaccine.

Sincerely, a concerned parent of 7 children,  
Elizabeth Vesely

I am writing with extreme concern, that our constitutionally granted free society is at severe risk of government interference. Regarding the January 12th State Board Public Meeting.

If approved, Washington Administrative code 246-100 local health officers "at his or her sole discretion" to "issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine."

We will not allow any government official to enslave or quarantine an American citizen against their will! Please reread the previous statement...

Instead of writing a lengthy email, I have listed a few quotes that summarize what the overwhelming majority of Washingtonians believe and desire. We want a free and open society. We are not Canada, Australia, New Zealand or the like, we are Americans and we are free.

"Freedom is not defined by safety. Freedom is defined by the ability of citizens to live without government interference. Government cannot create a world without risks, nor would we really wish to live in such a fictional place." Ron Paul

"The greatest DANGER to American freedom is a government that ignores the constitution." Thomas Jefferson

"I predict future happiness for Americans, if they can prevent the government from wasting the labors of the people under the pretense of taking care of them."  
— Thomas Jefferson

We reject any and all mandates, detention centers, c19 verification, vaccine requirements, masking requirements, government interference with personal medical records, tracking of private individuals, and ANY OTHER INFRINGEMENT UPON THE CITIZENS OF THIS STATE.

Respectfully,

Josh Sharp  
Clark County Washington Resident

Subject: COVID-19 VAX schools

External Email

Attention WA State Board of Health Members ~

On behalf of all five (5) adults, in our family, and the next generation of children/students, we **STRONGLY OPPOSE** any decision that even hints at including the COVID-19 VAX as part of the required vaccination schedule for students to attend public school.

NONE of the current vaxxines, for COVID-19, have completed the full process of becoming FDA approved... which means ALL of them remain EXPERIMENTAL GENE THERAPY, and not sufficiently tested for safety.

Given that there ARE adequate protocols and medical therapies that are known to lessen and prevent hospitalization/death, for COVID-19 patients, then under Federal LAW, the current vaxxines are no longer eligible for emergency authorization and CANNOT be mandated or required by anyone.

If your intentions are being pressured by the CDC, the FDA, the WHO, the NIH, the Bill & Melinda Gates Foundation, the NIAID, or any other agency... then this process is fraudulent and corrupt at its very core. Billions of dollars are being pocketed by individuals and Big Pharma companies due to the vaxxine push. You MUST stop participating in the largest vaxxine scam in our nation's history! Continuing to push vaxxines that have killed or injured more than 50,000 Americans will be counted against you as crimes against humanity, under the Nuremberg Codes.

There is nothing HEALTHY about vaxxinating children who are at the very LOWEST risk of contracting, spreading and dying from COVID-19. Less than 0.001% even catch it. Vaxxine efficacy CANNOT be established when children are the LEAST susceptible to the virus & its variants. You are required to act as scientists in this matter and question the data available. You are required to ask every question with regard to safety, in this matter. You are required to choose the SAFEST option every single time you face big decisions like this.

Your actions WILL HAVE CONSEQUENCES, should you make the wrong choice here.

Please vote NO on recommendations to add COVID-19 vaxxines to the school schedule.

Sincerely,  
Mrs. Kelley Lyday

To: DOH WSBOH  
Cc:  
Subject: Covid-19 and WAC 246-100-070

External Email

To Whom It May Concern,

I am strongly opposed to the addition of Covid-19 (to include all related variants) to the existing WAC codes, as well as required vaccination for school-aged children. I stand against these proposed WAC's: WAC 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> , WAC 246-100-040 <tel:246-100-040> , WAC 246-100, WAC 246-105.

To begin, our police are already overwhelmed. Crime in the city of Tacoma alone is up substantially compared to prior years pre-pandemic. How can it be justified to take away already limited man-power and re-direct it to individuals and private health matters? And how will these codes be enforced? How will citizens be monitored for compliance? I fear it is not far-fetched to say that our current freedoms and privacies as we know it are under severe threat.

If this addition to these codes is passed, means to enforce them will follow. I'm assuming an increase in efforts to support these codes would require a substantial amount of taxpayer dollars.

I am also strongly opposed to forced vaccination of children for school, speaking as a fully-vaccinated family. I implore you to consider the decisions you're forcing parents to make. There is no certainty yet about the potential latent and long-term side-effects of vaccinating our children against a disease that does not target children in the majority. You have to understand why some families may choose to wait. I am in full support of family who will choose to vaccinate their children, but I also stand with families who are hesitant or perhaps unwilling. While aiming to keep schools safe, families will leave to home-school or find residency outside of the state. I feel like our parental rights are being infringed upon. Again, I fear the precedent being set here is dangerous. Please, at the minimum, consider an opt-out program that allows children to attend public school.

Now, more than ever, it feels as if our country is dividing itself. This law will not unite the state as intended. Neighbors are turning against neighbors. Old friends are cutting each other out of their lives. Parents are scared to let their children explore the world and play with other children. I love this state. I love the people who live here. Please do not let the large cities speak on behalf of all Washington cities and residents. Please listen to us who feel like our voices aren't being heard.

With respect,  
Lexi Crabtree

To Whom it may concern,

I am writing to you today in order to convey my opposition to your Wednesday's meeting in order to try and pass the following Washington codes into state law: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I simply can't believe this meeting is even happening. FEMA camps? This is something that Hitler would do control those who don't support him. I don't support what is being done. You are attempting to take away my freedom and right to not get the vaccine. I recently just had a 'bout with Covid and now I am naturally protected from it. The way God designed my body...ingenuous! What an awesome God who created us so special. Dr. Robert Malone, who created the MRNA vaccine states it is not recommended to get the vaccine after having had natural immunity. Government people are not medical specialists and should not be advising our health concerns. I am opposed to what you are attempting to and how under the table you have done this.

I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank you,  
Marilyn Naylor

Full Text of Dr. Malone, creator of mRNA, Statement ( Dec. 15, 2021)

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct.

I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination. I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases.

After this, I will be posting the text of this statement so you can share it with your friends and family.

Before you inject your child - a decision that is irreversible - I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created:

There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. These proteins often cause permanent damage in children's critical organs, including

- \* Their brain and nervous system
- \* Their heart and blood vessels, including blood clots
- \* Their reproductive system, and
- \* This vaccine can trigger fundamental changes to their immune system

The most alarming point about this is that once these damages have occurred, they are irreparable

- \* You can't fix the lesions within their brain
- \* You can't repair heart tissue scarring
- \* You can't repair a genetically reset immune system, and
- \* This vaccine can cause reproductive damage that could affect future generations of your family

The second thing you need to know about is the fact that this novel technology has not been adequately tested.

- \* We need at least 5 years of testing/research before we can really understand the risks
- \* Harms and risks from new medicines often become revealed many years later

Ask yourself if you want your own child to be part of the most radical medical experiment in human history

One final point: the reason they're giving you to vaccinate your child is a lie.

- \* Your children represent no danger to their parents or grandparents
- \* It's actually the opposite. Their immunity, after getting COVID, is critical to save your family if not the world from this disease

In summary: there is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives.

The risk/benefit analysis isn't even close.

As a parent and grandparent, my recommendation to you is to resist and fight to protect your children.

To Whom It May Concern,

This letter is to state our opposition to adding the experimental COVID vaccine to the list of required vaccinations for K-12 students. This vaccine is dangerous for our children and should not be required for our kids to attend school. If Washington forces this vaccine for K-12 students, they are forcing parents to either remove their children from school, leave the state of Washington, or inject a potentially harmful and even deadly experimental vaccine. Please oppose this idea of adding a COVID vaccine to the required vaccinations for K-12 students in Washington. We are not anti-vaxx, all our children are fully vaccinated, however they will not receive the COVID vaccine as we personally have friends who have died, been hospitalized, had bad reactions and side effects to the vaccine.

Sincerely, a concerned parent of 7 children,

Elizabeth Vesely

Dear Caitlin,

To Whom It May Concern:

As you prepare to sit down with members of the Washington Board of Health members on January 12th, please consider the many words you have received from other concerned citizens of Washington State as well as my words. Please do not force people to be detained or forced into quarantine facilities if they choose, for their own health and safety, to not be vaccinated against COVID-19. What happened to the people having the freedom to make their own choices for their own bodies? By forcing something like this, you would be taking away the basic freedoms that our country is founded on and throw them down the drain. By doing this, you would force people like my parents who are in their upper 70's, who have already had COVID and fully recovered and now have antibodies and natural immunity, to forcibly be detained because they choose not to be vaccinated. THEY DON'T NEED TO BE VACCINATED. And neither does anyone who already has natural immunity. SO DON'T FORCE THEM. OR ANYONE.

And in the case of requiring kids to be vaccinated in order to go to school, well that's just utter and complete nonsense. Kids aren't dying right and left from COVID. Omicron is a cold. Kids get colds ALL THE TIME. With no studies in place AT ALL to show that vaccinating children is even helpful, why would you force parents to vaccinate their kids in order to go to school? It doesn't make any sense whatsoever. Let the kids be kids and not alter their DNA when there is ABSOLUTELY NOTHING to show that it will do them any good.

Again, I ask you as an American and a native Washingtonian, please do not force the people of Washington State to go against their given freedoms but allow them to make the best decisions that they can make for themselves and their families.

Thank you.

Sincerely,

Jacinta Rupprecht

Washington State Board of Health Members,

You should be absolutely ashamed of yourself and stop with the nonsense related to COVID-19.

If you and your colleagues are/were "Following the Science" then why does the United States have the highest COVID-19 death rate per million people in the world?

\* The answer: Our public officials failed to prevent hospitalizations by using proven early treatment protocols. This is criminal when you consider that 80% of the deaths in the US could have been avoided.

Here should be your plan going forward:

\* Develop or adopt the proven Early Treatment protocols to help people avoid hospitalization and severe disease.

\* Stop with the vaccine mandates, vaccine cards, vaccine passports and any other liberty limiting policies

\* Keep schools open for in person learning

\* Publish truthful data that identifies the true number of people that died "FROM" COVID-19 and not "WITH" it

\* Stop with the lockdowns, because they don't work and cause harm well beyond that of COVID-19

\* Stop enriching Big Pharma and The Bill and Melinda Gates Foundation and start protecting the citizens that you are charged with protecting

\* Tell the truth!

Omicron has been identified as Nature's Vaccine. You will not stop it from spreading, so protect the high risk as best you can without infringing on human rights and let the rest of us gain natural immunity.

Best Regards,

Karl Bumgarner

We will not tolerate this admin continuing these unconstitutional mask/vax mandates. Not for ourselves or children. There is no emergency. There are vax for those that choose & last I checked the constitution allows for medical autonomy for American citizens. All mandates state & federal violate the below code. There has never been a vote which is appalling & illegal. There is treatment besides vax & preventative care. We will vote you out.

To whom this concerns,

We have seen the enemy and it is the corrupted, bribed, coerced and complicit federal, state and city governments who have deliberately engaged in this planned-demic to create the greatest crime against humanity to date. You have destroyed our economy, social structure, abused our children who are essentially immune from this 99.9% survival rate flu. And then assaulting the population with a toxic life threatening inoculation which has permanently injured millions and outright killed hundreds of thousands, far exceeding any legitimate deaths from this flu, which has been gone for over a year now. The medical and scientific fraud is staggering, the cognizant dissonance and malice of Inslee's office and his very questionable relationship with the genocidal maniac and international despot Bill Gates is inexcusable. All the while using a fraudulent testing procedure(97% false positive and which tap water gives a positive result ) to further cripple the population is beyond reprehensible. Any further ridiculous and draconian behavior from this body will not be tolerated. This fascist agenda Inslee is engaged in is an act of terrorism and treason and along with all your names , address and email, his information and crimes will be handed over to the Nuremberg court currently in session. I pray you do the right thing and rescind any further crimes against the people by supporting this fraud but i know you, like the despotic school board, are bribed and incentivized with billions of our tax dollars by this illegit Biden admin to assault

the people and our children. You will be held responsible for your complicity and you complacency. Like DC, MSM, CDC, AMA, WHO, NHS, etc.,.this governing body has become the enemy thru your treasonous crimes against our republic and our constitution. There has never been a pandemic, no excess death and which effected less than one half of one percent of the population and for this you threaten concentration camps and police intrusion into our homes and businesses. Have you no morality or conscience?

This adventure has pointed out the incompetence and fraud which is the medical industry and how our despotic politician's prey on the people. Those who have awakened will never sleep again. I, for one, will never comply with this criminal enterprise, or my children and grand children. We have seen the enemy.

Sincerely,

Stephen Joseph Strickland

Hello,

I'll keep this simple so you can read all the other people's input.

NO.

Stop this right now. None of your constituents voted you to implement these draconian laws. Lawful? These are extremely vague and loose proposed policies that will only harm every single individual that are involved. You're proposing to involve law enforcement to implement this? Do you realize how short staffed the PDs are? Health officer, who hires these people to implement this? King county, one of the most vaccinated counties is raging with infections of the omicron variant and the stats make last winter look like a joke. It is clear that all the restrictions that have been in place are not working and what makes you think that this will make this any better? Are hospitals overrun? Are there mass deaths? Are the vaccinated immune from this mutating virus? If you can answer yes to any of these, then I might understand concern.

Don't become an additional issue that we do not need. We need to move forward, not backwards. This isn't China, Australia, Germany, or any other country that is using this crisis to project unnecessary control over its citizens. This is not even close to what people will accept or comply with. This is gross overreaching of policy. Honestly can't believe that you in the state board of health department had the time, thought and audacity to come up with this and then to even fathom presenting this as a proposal.

If you're on the ground and had a day to talk to people, there is absolutely no way that this is the solution. I don't think you know how frustrated people are to be practicing living their lives safely for the past 2 years as asked by the government, then to know that this virus is affecting everyone regardless. And now this is the solution?? It is dangerously laughable. It's time to move on.

I am apposed to any more emergency act being implemented. Gov. Inslee has had his executive power way to long. It has been going on two years and need to void his power NOW, I don't understand how he is able to keep his powers for this long. His Governmental OVER REACH has not made things any better, safer, or prevented any more COVID cases from happening. We have just as many cases as everyone else. Compared to some states that have less enforcement we have higher numbers(what does that mean?) I would love to know how we are being saved

Please vote no on any vaccine mandate of Covid 19. We do not know the long term effects of this vaccine. We also know that children are not at risk if they catch Covid 19. We know that the vaccine does not stop the spread of the virus (PER CDC AND FAUCI) and I may suggest that if a vaccinated person with light symptoms may not realize they have Covid and may be out in society spreading it. PLEASE DO NOT ALLOW ANY MANDATE.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

I strongly oppose the proposed adoption of the Covid related WAC's that allow a health officer to use law enforcement to possibly force Covid positive people into a detention facility.

This is utterly depraved and ridiculous.

Respectfully Submitted,

Lindsay Hubby

LtCol, USMCR (ret)

Subject: Jan 12th meeting

External Email

Dear Caitlin,

I am a Washington state citizen and a parent. I STRONGLY OPPOSE the use of police officers and health officials for taking persons to detainment facilities who do not comply with quarantine, face masks, testing, and vaccination. WE ARE UNITED STATES CITIZENS WITH A CONSTITUTION. WE HAVE INDIVIDUAL RIGHTS AND LIBERTIES. WE DO NOT LIVE IN WORLD WAR II, NAZI GERMANY. NO COVID QUARANTINE CAMPS!!! I strongly oppose adding covid to list of diseases. Please show studies where covid has been isolated.

I STRONGLY OPPOSE required covid vaccination for children and adolescents. Recent information coming out shows that these covid vaccines, are not vaccines, they are gene modification therapies. These gene modification therapies are not safe. See VAERS report: VAERS through 12/24,21: 1,000,227 adverse events reported. 21,002 deaths, 110,609 hospitalizations, 109,245 urgent care, 156,456 doctor office visits, 8,673 anaphylaxis, 12,532 Bell's palsy, 22,117 3,435 miscarriages, 10,640 heart attacks, 22,117 myocarditis/pericarditis, 35,650 permanently disabled, 5,011 Thrombocytopenia/low Platelet, 23,892 life threatening, 36,492 severe allergic reaction, and 11,462 shingles. <https://openvaers.com/covid-data>. There has not been full disclosure as to what are in these injections. The vaccine box insert is blank. The current offered covid gene modification injections are under EUA, thus they are not FDA approved.. only Cominarty is FDA approved and it is currently not being offered. Children and adolescents are at much higher risk of vaccine damage than covid.

I strongly oppose proposed WACS:

WAC 246-100-070

WAC 246-100-045

WAC 246-100-040

WAC 246-100

WAC 246-105

These proposals are violations of Nuremberg Code: "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress,

overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

Hello,

I oppose WAC-246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-29 vaccine to the WAC-246-205 schedule of required vaccines for children to attend schools.

The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion. (Nuremberg Code Rule 1 from the Nazi Trials 1947).

Please let lessons learned from the Nuremberg Trials be part of your guide.

I am writing to urge the SBOH not to mandate vaccines for children! Children are at very low risk of complications from Covid, and the data does not support forced vaccinations. This is driven by adults that fear Covid along with political issues, and not by actual data.

Also, there should be no involuntary quarantine outside the home in designated areas by Washington State. This is a violation of our civil rights!

SBOH should not have the sole discretion to enforce WAC codes, especially since you have defunded the police.

You should do a comparison on the areas where more boosters were given and the spike in positive covid case's. You will notice that the more shots taken the more positive cases. This is because this is not a vaccine. It's the cause of the illnesses. I would expect more from the board with all the data they have access to. Someone should have noticed. This will end if you stop telling folks to take booster after booster which doesn't work. You have absolutely no ground to stand on to say matter of fact that this shot will cut hospitalizations. There is no data since this was manufactured in 96 days. So please stop misinformation.

To whom it may concern,

I am extremely against mandating any of the proposed Covid Policies. These include WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Not only is it against our Charter of Rights but it is also against the Numenberg code. As sent out today, what is in the vaccine will be released within 8 months, and so, if you force this upon ANYONE, you will be liable for any side effects that will ensue.

Do the right thing and remove any talk of mandating these dangerous injections.

Signed a very concerned citizen,

Joy R. Clairmont

External Email

To whom it may concern:

I am writing you to urge you to stand up against the push for vaccine mandates (for children and adults) and to stand for medical freedom of choice. There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science.

Even the CDC and Dr. Anthony Fauci have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda.

Sadly, with the push for this and the proposed policies to allow health officers to use law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention, Washington board of health is playing with medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington.

What specific metrics are you using to determine whether such policies as mask mandates, vaccine mandates, etc., are valid? Considering that almost all other states in the country have lifted their restrictions, and are seeing virtually identical numbers, I would like to see freedoms and liberty respected once again.

Science says masks have never worked. Do you realize how dirty this has been. Wearing a face diaper then putting it in your pocket when you eat or drink....what a joke. Covid can get you when you stand but not when you sit and eat. Used masks have not been disposed of properly if they are contaminated! Think about that. Masks are all over our parking lots, wake up. Get off your dead asses and look around.

Stop the fear porn and CONTROL.

And masks for kids-----you are destroying our future. That is so dangerous....get the masks off the kids....mask the damn teachers if they are so afraid....or better yet fire them for not working.

You guys are the puppets of an idiot governor who is a control freak....you are slanted democratic....we are sick and tired of your control and the local Snohomish County Health Department lead by a Democrat....control, fear is what you are about.....

External Email  
Washington State Board of Health member,

I believe the Covid vaccine should not be a requirement for children to attend school or childcare in this state.

The science and data show that children are at very low risk for contracting or transmitting Covid or any of its variants. CDC data shows that since Jan 2020, in the state of WA 10 children (age 0-17) have died with (not from) Covid. As unfortunate as that is, it is less than the number of WA children dying of the flu on an average year.

Deciding to vaccinate a child against a virus with a 99.7% overall survival rate is the parent's responsibility, not that of the State.

A vaccine requirement would also be an infringement upon the religious freedom of people of faith in WA State. Section 11 of our state constitution states &#x26;Absolute freedom of conscience in all matters of religious sentiment, belief and worship, shall be guaranteed to every individual, and no one shall be molested or disturbed in person or property on account of religion . . .&#x26;

Thank you.

Subject: Covid Policy Updates

External Email

The existing WAC's are overreaching and immoral. Updating the language to include Covid should concern every citizen. We are a free society, our constitution exists to prevent draconian measures which we are now seeing in Australia, Italy & France.

The science is evolving and we know that Covid has tipped to become endemic. The latest and future variants are showing to be indistinguishable from a bad cold.

Washington state is proud to be home to a progressive society, where we consider the wellbeing of all citizens. We need to look forward to the end of covid and back to normalcy. The proposed updates to WAC and vaccination requirements for children are NOT progressive. Please consider our voices, our choices.

I am completely against any of the proposed Covid policies that are overreaching and immoral. WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Thank You,

Subject: Damage Control Please

Dear Washington State Board of Health,

Can you please do damage control. Nothing makes sense anymore regarding the emergency rules and potential overreaches of this State. People no matter their healthcare decision that they choose at this point need to get back to work and same with the kids getting back to school. Look to other states for guidance.

I am writing this as I have working class friends and family that are simply leaving. They have never lived in any other state, born and raised in Washington. They go to another state to check out a lower cost of living and less restrictive state and then they leave.

This is getting very sad and disappointing! We claim to be a wise/intelligent/progressive

state but the actions make no logical sense anymore.

Anyways, probably going to fall on deaf ears but feel free to have a discussion with me. I am a working class male under 30 years old and afraid the younger working class are going to continue to leave at a faster and faster pace. Amongst a high number of recent retirees from the working class. It is a culmination of issues from high cost of living, governing policies they disagree with, not being apart of the toxic tech boom \$\$\$ in Seattle..... We all know and live amongst these issues.

Joel Mansfield (Everett, WA)

Subject: COVID 19 vaccine requirement for schools in Washington State.

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>)

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require

these vaccinations for school age children.

Jeff and Vicki Allinson

Subject: Involuntary Detention in Quarantine Camps

External Email

Washington State Board of Health,

\*Note: I do not care that you are not voting on this as of the Jan 12h meeting, but after reading the paragraph below you will hear my thoughts for any future decision making.

ALLOWING LOCAL HEALTH OFFICERS TO USE ENFORCEMENT TO FORCE AN EMERGENCY ORDER TO INVOLUNTARILY DETAIN A PERSON, OR GROUP OF PERSONS, TO BE ISOLATED IN A QUARANTINE FACILITY FOLLOWING REFUSAL TO VOLUNTARILY COMPLY WITH REQUESTS FOR MEDICAL EXAMINATION, TESTING, TREATMENT, COUNSELING, VACCINATION.

I cannot believe I am having to write to public officials as to why involuntarily detaining citizens in quarantine camps is a terrible idea. Is this what we want for Washington State? A police state where anyone who does not comply with unconstitutional mandates gets sent away to a "quarantine facility"? Name another time in history when a group of people were "othered" from society by leaders telling their citizens that this particular group was dirty and diseased and that sending them to camps was "for your safety" and "the greater good." How did that end for those people sent to the camps? How were those that implemented such policies remembered throughout history? The fact that this policy can even be compared to the Holocaust should be a massive red flag.

This policy is straight out of some authoritarian dictators playbook and the sane people of Washington will not stand for it. The thought that Washington State would "involuntarily detain" tax paying, law abiding citizens make me sick. To think for even a second that this vile use of force would be allowed makes me wonder what alternate dystopian nightmare universe we've stumbled into. I never thought I'd live to see a day when I don't feel safe living in my own state. I promise that anyone who is a part of implementing this will not be remembered well.

Let me emphasize one last point: you absolutely do not have any right whatsoever to tell another person what medical treatments they must put in or on their body. The role of this board is to guide citizens into making the best decisions for their health, not police them into complying with a one-size-fits-all treatment. True consent can only be given

without threat or coercion, and if you're reduced to threatening average citizens to submit to a medical procedure that THEY DO NOT WANT then you are no better than a rapist.

Stop this madness before it's too late.

M. Poore

Project Veritas has obtained startling never-before-seen documents regarding the origins of COVID-19, gain of function research, vaccines, potential treatments which have been suppressed, and the government's effort to conceal all of this.

(Check out the documents in this link -- including the Project Defuse summary of findings)

Dr. Allison Berry was educated at Johns Hopkins University which has perfected the rollout of mass-vaccination propaganda through various 'Exercises' over the years; including Event 201, SPARS Pandemic, Dark Winter, etc.

FEMA IS 139 (Documents Attached) This answers questions about what these exercises are for and how they are implemented with and without public knowledge))

| <br>                                                         |             |
| <b>Unit 3: The Exercise Process</b>                          |             |
| Introduction .....                                           | 3.1         |
| Unit 3 Objectives .....                                      | 3.1         |
| The Big Picture.....                                         | 3.2         |
| Accomplishment 1: Establishing the Base .....                | 3.5         |
| Accomplishment 2: Exercise Development.....                  | 3.6         |
| Accomplishment 3: Exercise Conduct.....                      | 3.8         |
| Accomplishment 4: Exercise Evaluation and Critique.....      | 3.9         |
| Accomplishment 5: Exercise Followup.....                     | 3.10        |
| Reviewing the Current Plan .....                             | 3.11        |
| Assessing Capability to Conduct an Exercise.....             | 3.12        |
| Addressing Costs and Liabilities .....                       | 3.13        |
| Activity: Getting Ready for Exercise Design.....             | 3.14        |
| Gaining Support .....                                        | 3.18        |
| Assembling a Design Team .....                               | 3.21        |
| Activity: Identify Design Team Members.....                  | 3.29        |
| Exercise Documents .....                                     | 3.30        |
| Summary and Transition .....                                 | 3.33        |
| For More Information.....                                    | 3.33        |
| Knowledge Check .....                                        | 3.34        |

|                                                                 | <b>Page</b> |
|-----------------------------------------------------------------|-------------|
| <b>Unit 4: Exercise Design Steps</b>                            |             |
| Introduction .....                                              | 4.1         |
| Unit 4 Objective .....                                          | 4.1         |
| Step 1: Assess Needs .....                                      | 4.2         |
| Step 2: Define the Scope .....                                  | 4.4         |
| Step 3: Write a Statement of Purpose .....                      | 4.7         |
| Activity: Define Exercise Scope and Purpose .....               | 4.10        |
| Step 4: Define Objectives .....                                 | 4.14        |
| Activity: Analyze an Objective .....                            | 4.17        |
| Activity: Compare Good and Poor Objectives .....                | 4.21        |
| Activity: Develop Objectives .....                              | 4.24        |
| Step 5: Compose a Narrative .....                               | 4.25        |
| Activity: Outline a Narrative .....                             | 4.29        |
| Step 6: Write Major and Detailed Events .....                   | 4.30        |
| Step 7: List Expected Actions .....                             | 4.33        |
| Activity: Write Major and Detailed Events .....                 | 4.36        |
| Step 8: Prepare Messages .....                                  | 4.38        |
| Activity: Compose a Message .....                               | 4.44        |
| Pulling It Together: The Master Scenario of Events List .....   | 4.45        |
| Alternatives to Self-Developed Exercises .....                  | 4.46        |
| Summary and Transition .....                                    | 4.47        |
| For More Information .....                                      | 4.47        |
| Knowledge Check .....                                           | 4.48        |
| <b>Unit 5: The Tabletop Exercise</b>                            |             |
| Introduction .....                                              | 5.1         |
| Unit 5 Objectives .....                                         | 5.1         |
| Characteristics of the Tabletop Exercise .....                  | 5.1         |
| How a Tabletop Works .....                                      | 5.3         |
| Facilitating a Tabletop Exercise .....                          | 5.4         |
| Activity: Your Ideas for Facilitating a Tabletop Exercise ..... | 5.8         |
| Designing a Tabletop Exercise .....                             | 5.9         |
| Activity: Develop Tabletop Exercise Problem Statements .....    | 5.13        |
| Activity: Develop a Tabletop Exercise Message .....             | 5.17        |
| Summary and Transition .....                                    | 5.20        |
| For More Information .....                                      | 5.20        |
| Knowledge Check .....                                           | 5.21        |

**Unit 6: The Functional Exercise**

|                                                           |      |
|-----------------------------------------------------------|------|
| Introduction .....                                        | 6.1  |
| Unit 6 Objectives .....                                   | 6.1  |
| What Is a Functional Exercise? .....                      | 6.2  |
| Activity: Compare Tabletop and Functional Exercises ..... | 6.4  |
| Participant Roles .....                                   | 6.6  |
| How a Functional Exercise Works .....                     | 6.11 |
| Facilities and Materials .....                            | 6.18 |
| Designing a Functional Exercise .....                     | 6.22 |
| Activity: Identify Functional Exercise Roles .....        | 6.25 |
| Summary and Transition .....                              | 6.27 |
| For More Information .....                                | 6.27 |
| Knowledge Check .....                                     | 6.28 |

**Unit 7: The Full-Scale Exercise**

|                                                             |      |
|-------------------------------------------------------------|------|
| Introduction .....                                          | 7.1  |
| Unit 7 Objectives .....                                     | 7.1  |
| What Is a Full-Scale Exercise? .....                        | 7.2  |
| Activity: Know Your Regulatory Requirements .....           | 7.3  |
| Activity: Compare Functional and Full-Scale Exercises ..... | 7.6  |
| Full-Scale Exercise Roles .....                             | 7.8  |
| How the Full-Scale Exercise Works .....                     | 7.9  |
| Exercise Locations .....                                    | 7.11 |
| Designing the Full-Scale Exercise .....                     | 7.12 |
| Special Considerations .....                                | 7.14 |
| Activity: Plan Ahead for the Full-Scale Exercise .....      | 7.22 |
| Summary and Transition .....                                | 7.24 |
| For More Information .....                                  | 7.24 |
| Knowledge Check .....                                       | 7.25 |

|                                                     | <b>Page</b> |

# **Course Overview**

## About This Course

Emergencies happen. Emergencies can be limited in scope or they can reach disaster proportions, sweeping through an entire community or multiple communities. Being prepared to respond to and recover from emergencies is everyone's challenge. Whether your organization is a government agency tasked with a particular response role, a volunteer agency that responds to the community's needs, or a private sector entity that may be faced with an emergency situation, you have an important role in that preparation.

As an outcome of your community's or organization's emergency planning process, plans should be in place that specify how you prepare for emergencies, how you will respond if an emergency occurs, how you will mitigate the potential effects of emergencies, and how you will recover. Practice is an important aspect of the preparation process.

Experience and data show that exercises are a practical, efficient, and cost-effective way for organizations in the government, nonprofit, and private sectors to prepare for emergency response and recovery.

This course is based on one important premise: *Emergency exercises are worth the effort.* Exercises identify areas that are proficient and those that need improvement. Lessons learned from exercises can be used to revise operational plans and provide a basis for training to improve proficiency in executing those plans.

This course is designed to introduce you to the fundamentals of exercise design and to prepare you to design and conduct a small functional exercise for your organization. It addresses:

- The value of conducting exercises.
- The components of a comprehensive exercise program.
- The exercise development process—development tasks, organization of the design team, exercise documentation, and the steps in designing an exercise.

### **About This Course (Continued)**

This course will cover the purpose, characteristics, and requirements of three main types of exercises:

- Tabletop exercise
- Functional exercise
- Full-scale exercise

In addition this course will cover:

- Exercise evaluation.
- Exercise enhancements.
- Designing a functional exercise.

This course is one of several courses in exercise design offered through the Emergency Management Institute (EMI). To get information about other courses, check online at [www.fema.gov/emi](http://www.fema.gov/emi).

### **FEMA's Independent Study Program**

The Federal Emergency Management Agency's (FEMA's) Independent Study Program is one of the delivery channels that EMI uses to provide training to the general public and specific audiences. This course is part of FEMA's Independent Study Program. In addition to this course, the Independent Study Program includes other courses in the Professional Development Series (PDS), as well as courses in floodplain management, radiological emergency management, the role of the emergency manager, hazardous materials, disaster assistance, the role of the Emergency Operations Center (EOC), and an orientation to community disaster exercises.

FEMA's independent study courses are available at no charge and include a final examination. You may apply individually or through group enrollment. When enrolling for a course, you must include your name, mailing address, social security number, and the title of the course in which you wish to enroll.

## FEMA's Independent Study Program (Continued)

If you need assistance with enrollment, or if you have questions about how to enroll, contact the Independent Study Program Administrative Office at:

FEMA Independent Study Program  
Administrative Office  
Emergency Management Institute  
16825 South Seton Avenue  
Emmitsburg, MD 21727  
(301) 447-1200

Information about FEMA's Independent Study Program also is available on the Internet at:

<http://training.fema.gov/EMIWeb/IS>.

Each request will be reviewed and directed to the appropriate course manager or program office for assistance.

## Course Prerequisites

*Exercise Design* has no prerequisites.

## Final Examination

This course includes a written final examination, which you must complete and return to FEMA's Independent Study Office for scoring. To obtain credit for taking this course, you must successfully complete this examination with a score of 75 percent or above. You may take the final examination as many times as necessary.

When you have completed all of the units, you may complete the final examination online or use the answer sheet (if one is provided in your course packet). If you choose to use the answer sheet, you must return it to the FEMA Independent Study Office at the address listed on the previous page. EMI will score your test and notify you of the results.

## Course Completion

The course completion deadline for all FEMA Independent Study courses is one year from the date of enrollment. The date of enrollment is the date that the EMI Independent Study Office will use for completion of all required course work, including the final examination. If you do not complete this course, including the final examination, within that timeframe, your enrollment will be terminated.

## How to Take This Course

This Independent Study course is designed so that you can complete it on your own at your own pace. Take a break after each unit, and give yourself time to think about the material, particularly how it relates to your work in the exercise design function of emergency management.

On the other hand, this course may be done in a group setting guided by an instructor. This Independent Study can also be used in such groups.

*Exercise Design* has 11 units. Each of these units is described below.

- **Unit 1, Introduction to Exercise Design**, explores the benefits organizations derive from exercising and leads you through a preliminary needs assessment.
- **Unit 2, Comprehensive Exercise Program**, provides an overview of five main types of exercise activities that make up a comprehensive exercise program.
- **Unit 3, The Exercise Process**, presents an overview of the process used to plan and implement a single exercise within a comprehensive program. It also introduces four key design documents. In this unit, you will take some preliminary “groundwork” steps, including a resource self-assessment and identifying potential design team members.
- **Unit 4, Exercise Design Steps**, takes you through an eight-step process for designing an exercise and provides a variety of job aids to use in applying that process. You will practice each step in an abbreviated fashion as you progress through the unit.
- **Unit 5, The Tabletop Exercise**, takes a closer look at the tabletop exercise, including key characteristics, best uses, guidelines for facilitation, and special design considerations.
- **Unit 6, The Functional Exercise**, examines the functional exercise more closely—again focusing on key characteristics, best uses, guidelines for control, and special design considerations.
- **Unit 7, The Full-Scale Exercise**, takes a similar look at full-scale exercises and how they differ from the other types of exercises.
- **Unit 8, Exercise Evaluation**, briefly discusses key aspects of evaluation methodology and the evaluation tasks that must take place before, during, and after an exercise.

## How to Take This Course (Continued)

- **Unit 9, Exercise Enhancements**, presents ideas for enhancing an exercise through visuals, equipment, props, and people.
- **Unit 10, Designing a Functional Exercise**, walks you through applying the eight design steps—using the provided job aids—in developing a simple functional exercise.
- **Unit 11, Course Summary**, prepares you for the final exam by presenting a brief review of the key points covered in the course.

## Activities

This course will involve you actively as a learner by including activities that highlight basic concepts. These activities emphasize different learning points, so be sure to complete all of them. Compare your answers to the answers provided following each activity. If your answers are correct, continue on with the material. If any of your answers is incorrect, go back and review the material before continuing.

## Knowledge Checks

To help you know when to proceed to the next unit, Units 1 through 10 are followed by a Knowledge Check that asks you to answer questions that pertain the unit content. Answers are provided following each Knowledge Check. When you finish each Knowledge Check, compare you answers to those provided, and review the parts of the text that you do not understand. It would be to your benefit to be sure that you have mastered the current unit before proceeding to the next unit.

## Exercise Design Tool Box

A Tool Box is also included with the course materials. The Exercise Design Tool Box contains a variety of exercise examples and templates to supplement the instruction. The course materials will instruct you when to use the Tool Box. The Tool Box can be accessed at <http://training.fema.gov/EMIWeb/IS/is139lst.asp>.

## **How to Take This Course (Continued)**

### **Job Aids**

Throughout the course, you will find job aids designed to supplement the text. You can use the job aids during the course, and you will find them useful later, after you have completed the course. Copies of all job aids are assembled in Appendix A, for easy reference.

### **Appendixes**

At the back of this course are appendixes that include, in addition to the job aids, an acronym list.

### **Equipment Requirements**

To complete this course, you will need the following equipment:

- A computer with the following or greater capability:
  - Pentium processor
  - Windows 95+ or NT
  - 32 megabytes of RAM
  - SVGA monitor, displaying 16-bit color, 800 x 600 resolution
  - Microsoft or Microsoft-compatible mouse or other pointing device
  - CD-ROM Drive

Access to the internet is optional but will enable you to acquire additional relevant information.

## How to Take This Course (Continued)

### Sample Learning Schedule

Complete this course at your own pace. You should be able to finish the entire course—including pretest, units, knowledge checks, and final examination—in approximately 10 hours. The following learning schedule is only an example, intended to show relative times devoted to each unit.

| <b>Unit</b>                              | <b>Suggested Time</b> |
|------------------------------------------|-----------------------|
| Unit 1: Introduction to Exercise Design  | 20 minutes            |
| Unit 2: Comprehensive Exercise Program   | 1 hour                |
| Unit 3: The Exercise Process             | 1 hour                |
| Unit 4: Exercise Design Steps            | 2 hours               |
| Unit 5: The Tabletop Exercise            | 40 minutes            |
| Unit 6: The Functional Exercise          | 40 minutes            |
| Unit 7: The Full-Scale Exercise          | 40 minutes            |
| Unit 8: Exercise Evaluation              | 40 minutes            |
| Unit 9: Exercise Enhancements            | 40 minutes            |
| Unit 10: Designing a Functional Exercise | 2 hours               |
| Unit 11: Course Summary                  | 10 minutes            |

---

**Unit 1: Introduction to  
Exercise Design**

## **Introduction**

An **exercise** is a *focused practice activity that places the participants in a simulated situation requiring them to function in the capacity that would be expected of them in a real event*. Its purpose is to promote preparedness by testing policies and plans and training personnel. In this unit, you will explore some of the benefits that organizations derive from exercising.

## **Unit 1 Objectives**

After completing this unit, you should be able to:

- Explain the value of exercises to improve the four phases of comprehensive emergency management.
- Identify the major reasons to conduct exercises.

## **Why Exercise?**

Exercises are conducted to evaluate an organization's capability to execute one or more portions of its response plan or contingency plan. Many successful responses to emergencies over the years have demonstrated that exercising pays huge dividends when an emergency occurs.

## Why Exercise? (Continued)

### Sioux City, 1989

The 1989 plane crash in Sioux City, Iowa, provided a clear demonstration of the value of exercises. In July of that year, United Airlines Flight 232 crashed in flames after a failed emergency landing attempt. Although 109 lives were lost in this terrible disaster, 186 passengers survived. How were so many saved? Their survival was due mainly to three factors:

- Response of the flight crew before the crash
- Trained rescue units waiting on the ground
- Centralized communications among all response agencies

These factors were present because of training, and the high level of training was no coincidence. Years before the crash, a Disaster Services Center was established. Representatives from 40 local agencies met regularly to review emergency procedures and plan realistic exercises.

Two years before the crash, the community conducted a full-scale exercise based on a commercial plane crash. This simulation revealed several problems, including confusion in communications and inadequate numbers of ambulances and other equipment at the scene. An after-exercise plan was developed to address these problems.

The day after the crash of United Flight 232, the Assistant Fire Chief said, "We made mistakes [in the simulation]. The mistakes we made then did not materialize yesterday."

## Why Exercise? (Continued)

### Other Emergencies

Other emergencies and disasters before and since the 1989 crash also have demonstrated the importance of exercising.

- In 1989, FEMA coordinated a full-scale response exercise in Sacramento, California—just two months before the Loma Prieta earthquake struck Northern California. The exercise was credited with improving the response to that disaster by both California and the Federal government.
- The After-Action Report following the 1995 bombing of the Alfred P. Murrah Federal Building in Oklahoma City made the following recommendation regarding problems that were identified in integrating the response efforts of multiple agencies:

“Planning, training, and exercising are the only feasible recommendations. If an integrated emergency management system is to be utilized and effective in future disasters, all levels of government must be on the same page of the book. Effective coordination cannot be achieved during the chaos following any disaster. Relationships must be established, plans written and tested, and procedures agreed upon. Regardless of what our particular role is, our mission is the same... ‘to provide effective response and recovery through coordinated logistics, communications, and information support systems.’”

## Why Exercise? (Continued)

- In 2000, Urban Search and Rescue (US&R) Task Forces participated in two major exercises. One was an earthquake-based scenario staged at Ames/Moffett Airfield in California. The other took advantage of the planned demolition of a sports arena in Denver, Colorado, by running a building collapse scenario. Of the latter exercise, a Denver Fire Department captain said, “We’re preparing for the event we hope never happens.”

Ironically, that was exactly the case. In 2001, some of the same US&R Task Forces that participated in these exercises were sent to New York City to search for victims after the terrorist attack that resulted in the collapse of the World Trade Center towers.

Many communities across the nation have had similar experiences that show the value of previous exercise training. Research has shown that people generally respond to an emergency in the way that they have trained. It only makes sense for government, volunteer, and private organizations to exercise their plans and procedures so that they are better prepared to respond to and recover from an emergency.

## Why Exercise? (Continued)

### Reasons to Exercise

The goal in exercise design is to establish a comprehensive exercise program—one based on a long-term, carefully constructed plan. In a comprehensive program, exercises build upon one another to meet specific operational goals. The aim is to provide competence in all emergency functions.

There are two main benefits of an exercise program:

- **Individual training:** Exercising enables people to practice their roles and gain experience in those roles.
- **System improvement:** Exercising improves the organization's system for managing emergencies.

These benefits arise not just from exercising, but from evaluating the exercise and acting upon the recommendations. An exercise has value only when it leads to improvement.

To summarize, there are a number of reasons to perform exercises. Through exercises, organizations can:

- Test and evaluate plans, policies, and procedures.
- Reveal planning weaknesses.
- Reveal gaps in resources.
- Improve organizational coordination and communications.
- Clarify roles and responsibilities.
- Train personnel in roles and responsibilities.
- Improve individual performance.
- Gain program recognition and support of officials.
- Satisfy regulatory requirements.

The focus of an exercise should always be on locating and eliminating problems *before* an actual emergency occurs. Corrective actions are an important part of exercise design, evaluation, and followup.

## Regulatory Requirements

Because the human and monetary costs of emergencies and disasters are so high, governments, agencies, and many corporate entities and other governing bodies have mandated preparedness training and exercising. Several examples of mandated exercises are listed below.

- State and local governments receiving Federal funds may have to comply with certain exercise requirements. FEMA's requirements change periodically, but the program is normally structured around a four-year cycle.
- Nuclear Power Plants must exercise their plans yearly, conducting a full-scale exercise every two years. This exercise is evaluated by the Nuclear Regulatory Commission (NRC).
- Agencies or facilities falling under the coverage of the Superfund Amendment Reauthorization Act of 1986 (SARA) Title III (e.g., local emergency planning committees; facilities where chemicals are produced, used, or stored) must conduct a yearly exercise and evaluate their hazardous materials response and recovery plan.
- Airports, hospitals, and other healthcare facilities must conduct a full-scale exercise once every 2 years to maintain their certification or license to operate.
- Many employers are required by the Occupational Safety and Health Administration (OSHA) to develop an emergency action plan. OSHA recommends that such plans be exercised at least annually.

## Functions

In planning exercises, the emphasis is on functions rather than on types of emergencies, because preparedness in those functions is common to all emergencies. **Functions** are actions or operations required in emergency response or recovery.

FEMA defines 13 functions in its Emergency Management Exercise Reporting System:

- Alert Notification (Emergency Response)
- Warning (Public)
- Communications
- Coordination and Control
- Emergency Public Information
- Damage Assessment
- Health and Medical
- Individual/Family Assistance
- Public Safety
- Public Works/Engineering
- Transportation
- Resource Management
- Continuity of Government

**Functions (Continued)**

If your organization is a private or volunteer organization, you may find it practical to exercise a somewhat different or more limited set of functions. Each of the functions listed above has a set of subfunctions related to it, and your group may focus on some of those. For example, your emergency response focus may relate to efforts such as:

- The management and distribution of donations.
- The logistics of providing needed resources.
- The temporary conversion of a manufacturing process to provide emergency supplies.
- How to coordinate with other organizations to provide mass care.
- How your employees respond to an internal emergency.

The variations are, of course, endless. However your entity is organized, the point is that your exercise program should identify the applicable functions and emphasize testing the operational procedures within those functions—regardless of the type of emergency.

Activity

### Activity: Needs Assessment

*Below is a job aid to help you assess your organization’s exercise needs. Use this tool to analyze where you may wish to focus your organization’s exercise design efforts. In completing this needs assessment, you may wish to consult such resources as planning documents, demographic or corporate data, maps, and training records. (Note: This assessment form also appears as Job Aid 1 in Appendix A.)*

#### 1. Hazards

List the various hazards in your community or organization. What risks are you most likely to face? You can use the following checklist as a starting point. **Note:** If your community has already conducted a hazard analysis, that is the best resource.

- |                                                           |                                                  |
|-----------------------------------------------------------|--------------------------------------------------|
| <input type="checkbox"/> Airplane crash                   | <input type="checkbox"/> Sustained power failure |
| <input type="checkbox"/> Dam failure                      | <input type="checkbox"/> Terrorism               |
| <input type="checkbox"/> Drought                          | <input type="checkbox"/> Tornado                 |
| <input type="checkbox"/> Epidemic (biological attack)     | <input type="checkbox"/> Train derailment        |
| <input type="checkbox"/> Earthquake                       | <input type="checkbox"/> Tsunami                 |
| <input type="checkbox"/> Fire/Firestorm                   | <input type="checkbox"/> Volcanic eruption       |
| <input type="checkbox"/> Flood                            | <input type="checkbox"/> Wildfire                |
| <input type="checkbox"/> Hazardous material spill/release | <input type="checkbox"/> Winter storm            |
| <input type="checkbox"/> Hostage/Shooting                 | <input type="checkbox"/> Workplace violence      |
| <input type="checkbox"/> Hurricane                        | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Landslide/Mudslide               | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Mass fatality incident           | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Radiological release             | <input type="checkbox"/> Other _____             |

**Activity: Needs Assessment (Continued)**

**2. Secondary Hazards**

What secondary effects from those hazards are likely to impact your organization?

- Communication system breakdown
- Power outages
- Transportation blockages
- Business interruptions
- Mass evacuations/displaced population
- Overwhelmed medical/mortuary services
- Other \_\_\_\_\_

**3. Hazard Priority**

What are the highest priority hazards? Consider such factors as:

- Frequency of occurrence.
- Relative likelihood of occurrence.
- Magnitude and intensity.
- Location (affecting critical areas or infrastructure).
- Spatial extent.
- Speed of onset and availability of warning.
- Potential severity of consequences to people, critical facilities, community functions, and property.
- Potential cascading events (e.g., damage to chemical processing plant, dam failure).

**#1 Priority hazard:**

**#2 Priority hazard:**

**#3 Priority hazard:**

**Activity: Needs Assessment (Continued)****4. Area**

What geographic area(s) or facility location(s) is(are) most vulnerable to the high priority hazards?

**5. Plans and Procedures**

What plans and procedures—emergency response plan, contingency plan, operational plan, standard operating procedures (SOPs)—will guide your organization's response to an emergency?

**6. Functions**

What emergency management functions are most in need of rehearsal? (e.g., What functions have not been exercised recently? Where have difficulties occurred in the past?) You can use the following checklist as a starting point.

- |                          |                                            |                          |                                        |
|--------------------------|--------------------------------------------|--------------------------|----------------------------------------|
| <input type="checkbox"/> | Alert Notification<br>(Emergency Response) | <input type="checkbox"/> | Public Safety                          |
| <input type="checkbox"/> | Warning (Public)                           | <input type="checkbox"/> | Public Works/Engineering               |

**Activity: Needs Assessment (Continued)**

**7. Participants**

Who (agencies, departments, operational units, personnel) needs to participate in an exercise? For example:

- Have any entities updated their plans and procedures?
- Have any changed policies or staff?
- Who is designated for emergency management responsibility in your plans and procedures?
- With whom does your organization need to coordinate in an emergency?
- What do your regulatory requirements call for?
- What personnel can you reasonably expect to devote to developing an exercise?

**8. Program Areas**

Mark the status of your emergency program in these and other areas to identify those most in need of exercising.

**9. Past Exercises**

If your organization has participated in exercises before, what did you learn from them, and what do the results indicate about future exercise needs? For example, consider the following questions:

- Who participated in the exercise, and who did not?
- To what extent were the exercise objectives achieved?
- What lessons were learned?
- What problems were revealed, and what is needed to resolve them?
- What improvements were made following past exercises, and have they been tested?

### Summary and Transition

This unit provided an overview of the benefits organizations derive from exercising. Unit 2 discusses the elements of a comprehensive exercise program and the progressive activities that make up a comprehensive program.

## Knowledge Check

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer you have chosen.*

1. Research has shown that:
  - a. Exercises are the best way to teach employees new skills.
  - b. Extended lectures are an effective alternative to exercises.
  - c. When possible, it is more effective to use real (rather than simulated) emergencies to test response procedures.
  - d. People usually respond to an emergency in the way that they have trained.
2. Through exercising, organizations can reveal planning weaknesses and gaps in resources.
  - a. True
  - b. False
3. A good reason to exercise is to reduce the need for organizational coordination and communication.
  - a. True
  - b. False
4. The focus of an exercise should be on eliminating problems before an actual emergency occurs.
  - a. True
  - b. False
5. An exercise has value only when it leads to improvement.
  - a. True
  - b. False
6. In planning exercises, the main emphasis should be on the organization's:
  - a. Vulnerability to natural hazards.
  - b. Vulnerability to manmade hazards (e.g., terrorism).
  - c. Ability to effectively carry out response and recovery functions.
  - d. Ability to respond to specific types of emergencies.

**Unit 2: Comprehensive  
Exercise Program**

---

## **Introduction**

In any discussion of emergency preparedness, the emphasis is on a comprehensive exercise program, made up of progressively complex exercises, each one building on the previous one, until the exercises are as close to reality as possible. This unit provides an overview of five main types of exercise activities that make up a comprehensive exercise program.

## **Unit 2 Objectives**

After completing this unit, you should be able to:

- Identify the basic components of a comprehensive exercise program.
- Explain the importance of designing a comprehensive and progressive exercise program to meet the needs of your organization or community.

## **Progressive Exercising**

A progressive program has several important characteristics:

- The exercise program involves the efforts and participation of various entities—whether departments, organizations, or agencies. Through the involvement of multiple entities, the program allows the involved organizations to test, not only their implementation of emergency management procedures, but their coordination with each other in the process.
- The program is carefully planned to achieve identified goals.
- It is made up of a series of increasingly complex exercises.
- Each successive exercise builds upon the previous one until mastery is achieved.

## **Progressive Exercising (Continued)**

### **Broad Commitment**

When a community or an organization engages in a progressive exercise program, the program needs to be comprehensive. A community program must consider every type of responding agency and organization in the community.

Communities are composed of more than police, fire, and public works. The following entities have requirements to exercise as well:

- Hospitals
- Airports, chemical, and nuclear facilities, and other regulated organizations
- Volunteer agencies and organizations in the private sector that contribute services, materials, and personnel to the response and recovery effort
- Work sites—public or private—that may be vulnerable to significant emergency events

A progressive exercise program, therefore, requires a commitment from various agencies and organizations to participate in increasingly challenging exercises over a period of time, to address the larger emergency management system rather than a single problem.

The same is true when a single organization engages in a progressive exercise program. It must consider the role of each department and each function that will be involved in responding to and recovering from an emergency event, and it must secure the commitment of all of those elements to a sequence of progressive internal and external exercises that will build a coordinated, effective response.

### **Careful Planning**

Exercises require careful planning around clearly identified goals. Only through identifying exercise goals, then designing, developing, conducting, and analyzing the results can those who are responsible for emergency operations be sure of what works—and what does not.

## Progressive Exercising (Continued)

### Increasing Complexity

Exercises should be organized to increase in complexity—for example, from tabletop discussions to functional exercises to a full-scale exercise. Each type of exercise builds on previous exercises using more sophisticated simulation techniques and requiring more preparation time, personnel, and planning.

Rushing into a full-scale exercise too quickly can open the door to potential failure because shortfalls have not been identified through less complicated and less expensive exercises.

### Success Breeds Success

An important advantage of building incrementally to a full-scale exercise is that successful exercise experiences breed new successes:

- Officials and stakeholders are more willing to commit resources.
- Personnel are more motivated and look forward to the next exercise.
- Confidence increases.
- Operating skills improve.

### Who Participates?

For a community-wide exercise program, the jurisdiction determines what agencies, organizations, and stakeholders participate in each exercise. Participants are further determined by the nature and size of the exercise. Larger exercises would include all of the participants who would have responsibilities in a real emergency. Smaller exercises, which focus on a limited aspect of the emergency plan, would limit the number of participants.

### **Who Participates? (Continued)**

The same is true of exercises conducted by a particular organization. For example, let's look at the case of a beer or soft drink bottler that during disasters converts its production line over to bottling water for mass care. This organization might design exercises to test procedures for:

- Coordination with jurisdiction officials.
- Managerial decision making on when to convert, how much of the line to convert, and when to convert back.
- Internal notifications.
- Line personnel responsibilities.
- Temporary facility changes.
- Coordination with suppliers.
- Product distribution.
- Transitioning back to regular production.
- Documentation.

In either case—whether the exercises involve an entire community or a more limited population—the nature of the exercise somewhat determines the participants. On one end of the spectrum, a tabletop exercise might involve only key decision makers. An exercise to test particular functions would limit its participants to those functions. And a full-scale exercise might involve the entire community or the whole facility.

Some types of exercises have additional participant requirements. For example, a functional exercise involves not only players but simulators, controllers, and evaluators.

## What Activities Are Included?

There are five main types of activities in a comprehensive exercise program:

- Orientation seminar
- Drill
- Tabletop exercise
- Functional exercise
- Full-scale exercise

As we have discussed, these activities build from simple to complex, from narrow to broad, from least expensive to most costly to implement, from theoretical to realistic. When carefully planned to achieve specified objectives and goals, this progression of exercise activities provides an important element of an integrated emergency preparedness system.

### Orientation Seminar

#### Purpose

As the name suggests, the **orientation seminar** is an *overview or introduction*. *Its purpose is to familiarize participants with roles, plans, procedures, or equipment*. It can also be used to resolve questions of coordination and assignment of responsibilities.

#### Characteristics

Key characteristics of the orientation seminar are summarized in the table on the next page.

**What Activities Are Included? (Continued)**

| <b>Orientation Seminar Characteristics</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Format</b>                              | <p>The orientation seminar is a very low-stress event, usually presented as an informal discussion in a group setting. There is little or no simulation. (For this reason, orientations do not qualify as FEMA-recognized exercises.) A variety of seminar formats can be used, including:</p> <ul style="list-style-type: none"> <li>▪ Lecture.</li> <li>▪ Discussion.</li> <li>▪ Slide or video presentation.</li> <li>▪ Computer demonstration.</li> <li>▪ Panel discussion.</li> <li>▪ Guest lecturers.</li> </ul>                                                                                                                                                                             |
| <b>Applications</b>                        | <p>The orientation seminar can be used for a wide variety of purposes, including:</p> <ul style="list-style-type: none"> <li>▪ Discussing a topic or problem in a group setting.</li> <li>▪ Introducing something new (e.g., policies and plans).</li> <li>▪ Explaining existing plans to new people (e.g., newly elected officials or executives need an explanation of the EOP and their role at the EOC; new employees need an orientation to operational plans as they relate to emergencies).</li> <li>▪ Introducing a cycle of exercises or preparing participants for success in more complex exercises.</li> <li>▪ Motivating people for participation in subsequent exercises.</li> </ul> |
| <b>Leadership</b>                          | <p>Orientations are led by a facilitator, who presents information and guides discussion. The facilitator should have some leadership skills, but very little other training is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Participants</b>                        | <p>A seminar may be cross-functional—involving one or two participants for each function or service being discussed (e.g., management, policy, coordination, and operations staff). Or, it may be geared to several people from a single agency or department.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Facilities</b>                          | <p>A conference room or any other fixed facility may be used, depending on the purposes of the orientation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Time</b>                                | <p>Orientations should last a maximum of 1 to 2 hours.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Preparation</b>                         | <p>An orientation is quite simple to prepare (two weeks' preparation time is usually sufficient) and conduct. Participants need no previous training.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## What Activities Are Included? (Continued)

### Conducting an Orientation

There are no cut-and-dried rules for an effective orientation; its purpose will determine its format. Below are a few helpful guidelines for conducting a seminar.

#### **Orientation Seminar Guidelines**

- **Be creative.** You can use various discussion and presentation methods. Think of interesting classes that you have attended in other subjects, and borrow the techniques of good teachers and presenters. For example, you might call on people one by one to give ideas, plan a panel discussion, hold a brainstorming session, present case studies for problem solving, or give an illustrated lecture.
- **Get organized and plan ahead.** Even though orientation seminars are less complex than other activities, it is no time to “wing it.”
- **Be ready to facilitate a successful orientation seminar.** Discourage long tirades, keep exchanges crisp and to the point, focus on the subject at hand, and help everyone feel good about being there.

## Drills

### Purpose

A **drill** is a *coordinated, supervised exercise activity, normally used to test a single specific operation or function*. With a drill, there is no attempt to coordinate organizations or fully activate the EOC. Its role in an exercise program is to practice and perfect one small part of the response plan and help prepare for more extensive exercises, in which several functions will be coordinated and tested. The effectiveness of a drill is its focus on a single, relatively limited portion of the overall emergency management system. It makes possible a tight focus on a potential problem area.

### Characteristics

Key characteristics of drills are summarized in the table on the next page.

**What Activities Are Included? (Continued)**

| <b>Drill Characteristics</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Format</b>                | A drill involves actual field or facility response for an EOC operation. It should be as realistic as possible, employing any equipment or apparatus for the function being drilled.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Applications</b>          | <p>Drills are used to test a specific operation. They are also used to provide training with new equipment, to develop new policies or procedures, or to practice and maintain current skills. Drills are a routine part of the daily job and organizational training in the field, in a facility, or at the EOC. Some examples of drills run by different organizations are listed below:</p> <ul style="list-style-type: none"> <li>▪ EOC: Call down procedures</li> <li>▪ Public works: Locating and placing road barriers under time constraints</li> <li>▪ Public health and safety: Site assessment and sampling</li> <li>▪ Red Cross: Locating specific types of blood within a time constraint</li> <li>▪ Military: Activation and mobilization drill</li> <li>▪ Airport: Fire Department response to the furthest part of a runway within a given time</li> <li>▪ Chemical plant: Evacuation and isolation of spill area and valve system shutoff</li> <li>▪ Private sector resource provider: Warehouse readiness drill</li> </ul> |
| <b>Leadership</b>            | A drill can be led by a manager, supervisor, department head, or exercise designer. Staff must have a good understanding of the single function being tested.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Participants</b>          | The number of participants depends on the function being tested. Coordination, operations, and response personnel could be included.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Facilities</b>            | Drills can be conducted within a facility, in the field, or at the EOC or other operating center.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Time</b>                  | ½ to 2 hours is usually required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Preparation</b>           | Drills are one of the easiest kinds of exercise activities to design. Preparation may take about a month. Participants usually need a short orientation beforehand.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## What Activities Are Included? (Continued)

### Conducting a Drill

How a drill is conducted varies according to the *type* of drill—ranging from simple operational procedures to more elaborate communication and command post drills. For example, a command post drill would require participants to report to the drill site, where a “visual narrative” would be displayed in the form of a mock emergency. Equipment, such as vans, command boards, and other needed supplies would be made available.

Given the variety of functions that may be drilled, there is no set way to run a drill. However, some general guidelines are given below.

#### Drill Guidelines

- **Prepare.** If operational procedures are to be tested, review them beforehand. Review safety precautions.
- **Set the stage.** It’s always good to begin with a general briefing, which sets the scene and reviews the drill purpose and objectives. Some designers like to set the scene using films, slides, or videotapes.
- **Monitor the action.** After a drill has been started, it will usually continue under its own steam. If you find that something you wanted to happen is not happening, however, you might want to insert a message to trigger that action. (We’ll learn more about messages later on.)

### Tabletop Exercise

#### Purpose

A **tabletop exercise** is a *facilitated analysis of an emergency situation in an informal, stress-free environment*. It is designed to elicit constructive discussion as participants examine and resolve problems based on existing operational plans and identify where those plans need to be refined. The success of the exercise is largely determined by group participation in the identification of problem areas.

#### Characteristics

There is minimal attempt at simulation in a tabletop exercise. Equipment is not used, resources are not deployed, and time pressures are not introduced. Key characteristics of the tabletop exercise are summarized in the table on the next page. We will discuss how to conduct a tabletop exercise in Unit 5.

| <b>Tabletop Exercise Characteristics</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Format</b>                            | <p>The exercise begins with the reading of a short narrative, which sets the stage for the hypothetical emergency. Then, the facilitator may stimulate discussion in two ways:</p> <ul style="list-style-type: none"> <li>▪ Problem statements: Problem statements (describing major or detailed events) may be addressed either to individual participants or to participating departments or agencies. Recipients of problem statements then discuss the actions they might take in response.</li> <li>▪ Simulated messages: These messages are more specific than problem statements. Again, the recipients discuss their responses.</li> </ul> <p>In either case, the discussion generated by the problem focuses on roles (how the participants would respond in a real emergency), plans, coordination, the effect of decisions on other organizations, and similar concerns. Often maps, charts, and packets of materials are used to add to the realism of the exercise.</p> |
| <b>Applications</b>                      | <p>Tabletop exercises have several important applications. They:</p> <ul style="list-style-type: none"> <li>▪ Lend themselves to low-stress discussion of coordination and policy.</li> <li>▪ Provide a good environment for problem solving.</li> <li>▪ Provide an opportunity for key agencies and stakeholders to become acquainted with one another, their interrelated roles, and their respective responsibilities.</li> <li>▪ Provide good preparation for a functional exercise.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Leadership</b>                        | <p>A facilitator leads the tabletop discussion. This person decides who gets a message or problem statement, calls on others to participate, asks questions, and guides the participants toward sound decisions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Participants</b>                      | <p>The objectives of the exercise dictate who should participate. The exercise can involve many people and many organizations—essentially anyone who can learn from or contribute to the planned discussion items. This may include all entities that have a policy, planning, or response role.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Facilities</b>                        | <p>A tabletop exercise requires a large conference room where participants can surround a table.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Time</b>                              | <p>A tabletop exercise usually lasts from 1 to 4 hours but can be longer. Discussion times are open-ended, and participants are encouraged to take their time in arriving at in-depth decisions—without time pressure. When the time is up, the activity is concluded. Although the facilitator maintains an awareness of time allocation for each area of discussion, the group does not have to complete every item for the exercise to be a success.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Preparation</b>                       | <p>It typically takes about a month to prepare for a tabletop exercise. Preparation also usually requires at least one orientation and sometimes one or more drills.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## What Activities Are Included? (Continued)

### Functional Exercises

#### Purpose

A **functional exercise** is a *fully simulated interactive exercise that tests the capability of an organization to respond to a simulated event*. The exercise tests multiple functions of the organization's operational plan. It is a coordinated response to a situation in a time-pressured, realistic simulation.

#### Characteristics

A functional exercise focuses on the coordination, integration, and interaction of an organization's policies, procedures, roles, and responsibilities before, during, or after the simulated event. Key characteristics of a functional exercise are summarized in the following table. We will discuss how to conduct a functional exercise in Unit 6.

What Activities Are Included? (Continued)

| <b>Functional Exercise Characteristics</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Format</b>                              | <p>This is an <i>interactive</i> exercise—similar to a full-scale exercise without the equipment. It simulates an incident in the most <i>realistic</i> manner possible short of moving resources to an actual site. A functional exercise is:</p> <ul style="list-style-type: none"> <li>▪ <i>Geared for policy, coordination, and operations personnel</i>—the “players” in the exercise—who practice responding in a realistic way to carefully planned and sequenced messages given to them by “simulators.” The messages reflect ongoing events and problems that might actually occur in a real emergency.</li> <li>▪ <i>A stressful exercise</i> because players respond in real time, with on-the-spot decisions and actions. All of the participants’ decisions and actions generate real responses and consequences from other players.</li> <li>▪ <i>Complex</i>—Messages must be carefully scripted to cause participants to make decisions and act on them. This complexity makes the functional exercise difficult to design.</li> </ul> |
| <b>Applications</b>                        | <p>Functional exercises make it possible to test several functions and exercise several agencies or departments without incurring the cost of a full-scale exercise. A functional exercise is always a prerequisite to a full-scale exercise.</p> <p>In some instances, taking part in a functional exercise may serve as a full-scale exercise for a participating organization (e.g., a hospital may conduct its own full-scale exercise as part of a community-based functional exercise).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Leadership and Participants</b>         | <p>Functional exercises are complex in their organization of leadership and the assignment of roles. The following general roles are used:</p> <ul style="list-style-type: none"> <li>▪ <b>Controller:</b> Manages and directs the exercise</li> <li>▪ <b>Players:</b> Participants who respond as they would in a real emergency (Players should include policy makers; may include coordinators and operational personnel directing field activities.)</li> <li>▪ <b>Simulators:</b> Assume external roles and deliver planned messages to the players</li> <li>▪ <b>Evaluators:</b> Observers who assess performance</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Facilities</b>                          | <p>It is usually conducted in the EOC or other operating center. Ideally, people gather where they would actually operate in an emergency. Players and simulators are often seated in separate areas or rooms. Realism is achieved by the use of telephones, radios, televisions, and maps.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

**What Activities Are Included? (Continued)**

| <b>Functional Exercise Characteristics (Continued)</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Time</b>                                            | A functional exercise requires from 3 to 8 hours, although it can run a full day or even longer.                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Preparation</b>                                     | Plan on 6 to 18 months or more to prepare for a functional exercise, for several reasons: <ul style="list-style-type: none"><li>▪ Staff members need considerable experience with the functions being tested.</li><li>▪ The exercise should be preceded by lower-level exercises, as needed.</li><li>▪ The controller, evaluators, and simulators require training.</li><li>▪ The exercise may require a significant allocation of resources and a major commitment from organizational leaders.</li></ul> |

## What Activities Are Included? (Continued)

### Full-Scale Exercise

#### Purpose

A **full-scale exercise** *simulates a real event as closely as possible*. It is an exercise designed to evaluate the operational capability of emergency management systems in a highly stressful environment that simulates actual response conditions. To accomplish this realism, it requires the mobilization and actual movement of emergency personnel, equipment, and resources. Ideally, the full-scale exercise should test and evaluate most functions of the emergency management plan or operational plan.

#### Characteristics

A full-scale exercise differs from a drill in that it coordinates the actions of several entities, tests several emergency functions, and activates the EOC or other operating center. Realism is achieved through:

- On-scene actions and decisions.
- Simulated “victims.”
- Search and rescue requirements.
- Communication devices.
- Equipment deployment.
- Actual resource and personnel allocation.

Key characteristics of full-scale exercises are summarized in the table on the next page. We will discuss how to conduct a full-scale exercise in Unit 7.

**What Activities Are Included? (Continued)**

| <b>Full-Scale Exercise Characteristics</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Format</b>                              | The exercise begins with a description of the event, communicated to responders in the same manner as would occur in a real event. Personnel conducting the field component must proceed to their assigned locations, where they see a “visual narrative” in the form of a mock emergency (e.g., a plane crash with victims, a “burning” building, a simulated chemical spill on a highway, or a terrorist attack). From then on, actions taken at the scene serve as input to the simulation taking place at the EOC or operating center. |
| <b>Applications</b>                        | Full-scale exercises are the ultimate in the testing of functions—the “trial by fire.” Because they are expensive and time consuming, it is important that they be reserved for the highest priority hazards and functions.                                                                                                                                                                                                                                                                                                                |
| <b>Leadership and Participants</b>         | One or more controllers manage the exercise, and evaluators are required. All levels of personnel take part in a full-scale exercise: <ul style="list-style-type: none"> <li>▪ Policy personnel</li> <li>▪ Coordination personnel</li> <li>▪ Operations personnel</li> <li>▪ Field personnel</li> </ul>                                                                                                                                                                                                                                    |
| <b>Facilities</b>                          | The event unfolds in a realistic setting (e.g., a plane crash at an airport, a terrorist attack at a public venue). The EOC or other operating center is activated, and field command posts may be established.                                                                                                                                                                                                                                                                                                                            |
| <b>Time</b>                                | A full-scale exercise may be designed to be as short as 2 to 4 hours, or to last as long as 1 or more days.                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Preparation</b>                         | Preparation for a full-scale exercise requires an extensive investment of time, effort, and resources—1 to 1½ years to develop a complete exercise package. This timeframe includes multiple drills and preparatory tabletop and functional exercises. In addition, personnel and equipment from participating agencies must be committed for a prolonged period of time.                                                                                                                                                                  |

**Comparing the Five Activities**

Each of the five activities just described plays an important part in the overall exercise program. The following chart lists some of reasons for conducting each type of activity. Key characteristics of each type of exercise are shown in the table on the next page.

| <b>Reasons to Conduct Exercise Program Activities</b> |                                           |                                                              |                                                                             |                                                                            |
|-------------------------------------------------------|-------------------------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------------|----------------------------------------------------------------------------|
| <b>Orientation</b>                                    | <b>Drill</b>                              | <b>Tabletop Exercise</b>                                     | <b>Functional Exercise</b>                                                  | <b>Full-Scale Exercise</b>                                                 |
| No previous exercise                                  | Assess equipment capabilities             | Practice group problem solving                               | Evaluate a function                                                         | Assess and improve information analysis                                    |
| No recent operations                                  | Test response time                        | Promote executive familiarity with emergency management plan | Observe physical facilities use                                             | Assess and improve interagency cooperation                                 |
| New plan                                              | Personnel training                        | Assess plan coverage for a specific case study               | Reinforce established policies and procedures                               | Support policy formulation                                                 |
| New procedures                                        | Assess interagency cooperation            | Assess plan coverage for a specific risk area                | Assess hospital preparedness                                                | Assess negotiation procedures                                              |
| New staff, leadership                                 | Verify resource and staffing capabilities | Examine staffing contingencies                               | Test seldom-used resources                                                  | Test resource and personnel allocation                                     |
| New nuclear facility                                  |                                           | Test group message interpretation                            | Measure resource adequacy                                                   | Direct media attention                                                     |
| New industrial risk                                   |                                           | Assess interagency or interdepartmental coordination         | Assess and strengthen inter-jurisdictional or interorganizational relations | Assess and strengthen interjurisdictional or interorganizational relations |
|                                                       |                                           | Observe information sharing                                  |                                                                             | Assess personnel and equipment locations                                   |
|                                                       |                                           | Train personnel in negotiation                               |                                                                             | Test equipment capabilities                                                |

**Comparing the Five Activities (Continued)**

**Key Characteristics**

The following table briefly compares the key characteristics of the five types of exercise program activities.

| <b>Comparison of Key Activity Characteristics</b> |                                                                          |                                                                                                         |                                                                                                                         |                                                                                                                                                                                      |                                                                                                                                                                    |
|---------------------------------------------------|--------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                   | <b>Orientation</b>                                                       | <b>Drill</b>                                                                                            | <b>Tabletop Exercise</b>                                                                                                | <b>Functional Exercise</b>                                                                                                                                                           | <b>Full-Scale Exercise</b>                                                                                                                                         |
| <b>Format</b>                                     | Informal discussion in group setting<br><br>Various presentation methods | Actual field or facility response<br><br>Actual equipment                                               | Narrative presentation<br><br>Problem statements or simulated messages<br><br>Group discussion<br><br>No time pressures | Interactive, complex<br><br>Players respond to messages (events/problems) provided by simulators.<br><br>Realistic but no actual equipment.<br><br>Conducted in real time; stressful | Realistic event announcement<br><br>Personnel gather at assigned site<br><br>Visual narrative (enactment)<br><br>Actions at scene serve as input to EOC simulation |

### Building an Exercise Program

As you have seen, a progressive exercise program involves the combined efforts of many agencies, departments, or other entities in a series of activities that increase in complexity until mastery is achieved.

Building an exercise program is a little like planning a single exercise—except that the activities take place on a much larger scale. Plans are developed by a team and are based on a careful examination of the operating plan.

The development of an exercise program has many facets, including:

- Analysis of capabilities and costs.
- Scheduling of tasks.
- Public relations efforts.
- Development of a long-term plan.

Careful work on the long-term plan will carry over into the design of individual exercises.

### The Planning Team

A comprehensive exercise plan requires the combined efforts of many people. For a community program, the team should consist of representatives from every major government agency in the jurisdiction and from private and volunteer organizations large enough to have exercise mandates:

- Fire department
- Sheriff
- Public works
- Hospital
- Airport
- Schools
- Communications
- Volunteer organizations

## **Building an Exercise Program (Continued)**

In a private or volunteer organization that is planning an exercise program, the team would be similarly organized, with representatives of all major functions and departments.

The emergency manager and other emergency personnel (or the person responsible for the organization's emergency response effort) would take the lead, and the representatives would then meet to analyze what they need to do to support one another. Often organizations can meet the exercise needs of more than one agency at a time. This teamwork can help establish important relationships among participating organizations.

Later, members of the team can also serve on exercise design teams to design individual exercises.

### **Goal Setting**

Because a comprehensive exercise program usually extends over several months, it is important to set long-term goals or develop a mission statement. Without this, the program is likely to lack focus and continuity.

### **Schedule and Sequence**

When these preliminary steps (organizing the team and establishing a mission statement and goals) have been taken, the hard work of drawing up a plan can take place. Developing the exercise program plan involves:

1. Laying out a series of exercises that can meet the needs of the various participating entities.
2. Organizing them into a workable sequence and time schedule.

## **Building an Exercise Program (Continued)**

### **Plan Format**

An exercise program plan can use any format, but it should include the following elements:

- A timeframe
- A problem statement
- Long-range goal(s)
- Functional objectives
- A schedule
- Exercise descriptions, including:
  - Type of exercise.
  - Participants.
  - Purpose.
  - Rationale.

A sample plan format is shown on the next page. This is a hypothetical example of one community's exercise plan.

| <p><b>Fourth Month</b></p>  | <p>Exercise: Training course with functional exercise.</p> <p>For: Responders and incident commanders; Emergency management staff; various chiefs, captains, lieutenants from fire and police; Emergency Medical Services (EMS), mental health, Radio Amateur Civil Emergency Services (RACES), funeral directors, county coroner, county PIO</p> <p>Purpose: To provide training in field mass casualty incident response.</p> <p>Rationale: This is a training session in the FEMA Field Mass Casualty Incident Response course. This course provides an excellent overview of specific needs related to a mass fatality incident. The course culminates in a functional activity.</p> |
| <p><b>Seventh Month</b></p> | <p>Exercise: Drill</p> <p>For: Fire, police, EMS, coroner, funeral directors</p> <p>Purpose: To set up the Incident Command System (ICS) for responding to mass fatality incidents.</p> <p>Rationale: Establish ICS to support needed functions and tasks.</p>                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <p><b>Eighth Month</b></p>  | <p>Exercise: Drill</p> <p>For: PIO, fire, police, Emergency Manager</p> <p>Purpose: To set up Joint Information Center (JIC)</p> <p>Rationale: Acquaint participants with the PIO function and JIC operations, test equipment and lines of communication.</p>                                                                                                                                                                                                                                                                                                                                                                                                                            |

**Building an Exercise Program (Continued)**

| <b>Plan Format</b>      | <b>Sample Plan: Comprehensive Exercise Program</b>                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Ninth Month</b>      | <p>Exercise: Drill</p> <p>For: Mental health, funeral directors, PIO, clergy, Emergency Manager</p> <p>Purpose: To set up a family assistance center.</p> <p>Rationale: Acquaint participants with the office equipment and test role as support to the victims' families.</p>                                                                                                                                                                                               |
| <b>Eleventh Month</b>   | <p>Exercise: Tabletop exercise</p> <p>For: Incident Command, PIO, police, fire, EMS</p> <p>Purpose: To pull together the three functions tested in the previous drills in the context of a mass casualty incident as the result of a hotel fire.</p> <p>Rationale: Address and resolve potential communication and coordination problems among the Incident Command, PIO, police, fire, and EMS before the functional exercise.</p>                                          |
| <b>Fourteenth Month</b> | <p>Exercise: Functional exercise</p> <p>For: Communications, coordination and control, ICS and EOC, PIO, health and medical</p> <p>Purpose: To test additional functions for mass fatality in the context of a plane crash: Emergency public information effectiveness, health and medical mass casualty, coordination and control, ICS, and EOC operations.</p> <p>Rationale: Identify preliminary shortfalls and test overall coordination before full-scale exercise.</p> |
| <b>Fifteenth Month</b>  | <p>Exercise: Tabletop exercise</p> <p>For: Communications, coordination and control, ICS and EOC, PIO, health and medical</p> <p>Purpose: To correct and retest problems identified in preceding functional exercise.</p> <p>Rationale: Work out potential problems discovered in the previous functional exercise and make adjustments necessary before the full-scale exercise.</p>                                                                                        |

**Building an Exercise Program (Continued)**

| <b>Plan Format</b>      | <b>Sample Plan: Comprehensive Exercise Program</b>                                                                                                                                                                                                                                                                                                                                                                                        |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eighteenth Month</b> | Exercise: Full-scale exercise: Airplane crash<br>For: All agencies: heads of agencies and responders<br>Purpose: To test all functions in the context of a mass casualty airplane crash.<br>Rationale: The exercise fulfills full-scale requirements for FEMA, Federal Aviation Administration (FAA) requirements for airports, and Joint Commission on Accreditation of Healthcare Organizations (JCAHO) Certification for the hospital. |

Activity

### Activity: Develop a Comprehensive Exercise Program Plan

*Working from the needs assessment you completed for your jurisdiction or organization in the previous unit, develop a plan for a comprehensive exercise program to address those needs. Include the key elements discussed in the last section. You can use the following worksheet (which also appears as Job Aid 2 in Appendix A) in developing your plan. If this format doesn't work for you, change it to meet your needs.*

## Summary and Transition

Unit 2 provided an overview of the five main types of exercise activities that make up a comprehensive exercise program. Unit 3 provides general information on the exercise development process and illustrates how the activities in that process relate to one another.

## For More Information

- The FEMA Comprehensive Exercise Program:

[www.fema.gov/pte/section3.htm](http://www.fema.gov/pte/section3.htm).

## Knowledge Check

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer you have chosen.*

1. In a progressive exercise program, the exercises:
  - a. Have a consistent format but are conducted with increasing frequency.
  - b. Are organized to increase in complexity.
  - c. Are organized to decrease in complexity.
  - d. Are sponsored on a rotating basis by different organizations.
  
2. A likely cause of exercise failure is:
  - a. Running too many drills and functional exercises.
  - b. Conducting orientations and drills before functional exercises.
  - c. Rushing into a full-scale exercise before the organization is ready.
  - d. Basing the selection of participants on the nature of the exercise.
  
3. Which statement is true of an orientation?
  - a. It requires field sites and actual equipment.
  - b. It may be used to introduce or explain plans and policies.
  - c. It involves a controller, simulators, and evaluators.
  - d. It is used to test a specific operation.
  
4. Which statement is true of a drill?
  - a. It is best conducted in a conference room.
  - b. It involves a controller, simulators, and evaluators.
  - c. It is used to test a specific operation.
  - d. It is aimed primarily at policy makers and decision makers.
  
5. Which statement is true of a tabletop exercise?
  - a. It involves a highly realistic simulation.
  - b. It involves a controller, simulators, and evaluators.
  - c. It requires field sites and actual equipment deployment.
  - d. It is a facilitated analysis of an emergency situation.
  
6. Which statement is true of a functional exercise?
  - a. It involves a controller, simulators, and evaluators.
  - b. It is simple, informal, and stress-free.
  - c. It requires field sites and actual equipment deployment.
  - d. It may be used to introduce or explain plans and policies.

**Knowledge Check (Continued)**

7. Which statement is true of a full-scale exercise?
  - a. It involves a highly realistic simulation.
  - b. It is aimed primarily at policy makers and decision makers.
  - c. It requires field sites but actual equipment remains in the shed.
  - d. It is used to test a specific operation.
  
8. Development of an exercise program includes analysis of capabilities and costs and scheduling of tasks.
  - a. True
  - b. False
  
9. The planning for an exercise program should be done primarily by the emergency manager or whoever is responsible for the organization's emergency response effort.
  - a. True
  - b. False
  
10. Which statement is **NOT** true of progressive exercise programs?
  - a. They allow participating organizations to test both implementation of procedures and coordination with each other.
  - b. Each successive exercise builds upon the previous one until mastery is achieved.
  - c. The entire program is planned to achieve identified goals.
  - d. Very little commitment is required from participating agencies because they can opt in or out at any time.

**Unit 3: The Exercise  
Process**

---

## **Introduction**

In the previous unit, we took the broad view—the planning of an entire comprehensive exercise program. In this unit, we will take a step closer and look at what goes into planning and implementing a single exercise within that program.

When an exercise proceeds smoothly, it all looks so easy! But there is far more to it than the time spent in the exercise itself. A great deal of thought and planning preceded the exercise, and more work will follow.

An exercise is not an independent activity with clearly marked beginning and ending points. Rather, it can be seen as part of a complex process that involves a number of accomplishments and tasks. All of those tasks are interrelated; they affect not only the success of the current exercise but the design and success of future exercises.

It will be much easier to understand and visualize the individual activities if you can first see how they fit into the overall process. This unit presents an overview of the main exercise activities and their relationships to one another. It also discusses some important aspects of laying the groundwork for an exercise. In later units, we will focus more closely on particular aspects of the design process.

## **Unit 3 Objectives**

After completing this unit, you should be able to:

- Identify the five major accomplishments in designing and implementing an exercise.
- Describe the organization of an exercise design team.
- Define the purpose of the four exercise documents.

## The Big Picture

In preparation for launching an exercise program and designing individual exercises, it is important to have a clear vision of the entire exercise process. There are a number of ways to visualize the exercise process. Let's look briefly at three graphic representations of the process: Organized by task sequence, organized by task categories and phase, and organized by major accomplishments. Each of them helps clarify the overall process.

### Sequence of Main Tasks

In the following graphic, the main tasks are shown in their approximate sequence. This chart may help you get a good mental picture of the entire sequence. It's also a good place to start in creating a more detailed schedule of tasks.

## The Big Picture (Continued)

### Categories of Tasks

Another way to look at the exercise process is by organizing the tasks into two dimensions:

- Exercise phase (preexercise, exercise, and postexercise)
- Type of task (those related to design and those related to evaluation)

The following matrix illustrates this type of organization.

| Task Categories   |                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                 |                                                                                                                                                                                                                         |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                   | Preexercise Phase                                                                                                                                                                                                                                                                                | Exercise Phase                                                                                                                                                                  | Postexercise Phase                                                                                                                                                                                                      |
| <b>Design</b>     | <ul style="list-style-type: none"> <li>▪ Review plan</li> <li>▪ Assess capability</li> <li>▪ Address costs and liabilities</li> <li>▪ Gain support/issue exercise directive</li> <li>▪ Organize design team</li> <li>▪ Draw up a schedule</li> <li>▪ Design exercise (8 design steps)</li> </ul> | <ul style="list-style-type: none"> <li>▪ Prepare facility</li> <li>▪ Assemble props and other enhancements</li> <li>▪ Brief participants</li> <li>▪ Conduct exercise</li> </ul> |                                                                                                                                                                                                                         |
| <b>Evaluation</b> | <ul style="list-style-type: none"> <li>▪ Select evaluation team leader</li> <li>▪ Develop evaluation methodology</li> <li>▪ Select and organize evaluation team</li> <li>▪ Train evaluators</li> </ul>                                                                                           | <ul style="list-style-type: none"> <li>▪ Observe assigned objectives</li> <li>▪ Document actions</li> </ul>                                                                     | <ul style="list-style-type: none"> <li>▪ Assess achievement of objectives</li> <li>▪ Participate in postexercise meetings</li> <li>▪ Prepare evaluation report</li> <li>▪ Participate in followup activities</li> </ul> |

## The Big Picture (Continued)

### Major Task Accomplishments

One of the simplest ways to envision the exercise process is by major accomplishments. As shown in the graphic below, the process can be factored into five major accomplishments that make up the design cycle:

1. Establishing the base
2. Exercise development
3. Exercise conduct
4. Exercise critique and evaluation
5. Exercise followup

Each accomplishment is the outgrowth of a set of specific tasks and subtasks (similar to those listed in the earlier models), which we'll review shortly. The process is circular, with the results of one exercise providing input for the next.

## The Big Picture (Continued)

### Flexibility Is Key

The exercise process applies no matter what level of exercise is being designed and no matter what size organization is using it. Whether you are located in a large jurisdiction with extensive resources, a smaller community with meager resources, or a private or volunteer organization with a particular vested interest in emergency preparations, you can use this process.

The underlying premise is that this process must be flexible enough to meet the unique exercise needs of the organization using it. Therefore, as you consider each task, it is important to remember this:

Each task must be designed, tailored, and applied in a manner that suits your organization's specific objectives and capabilities.

### Accomplishment 1: Establishing the Base

Exercises are designed to motivate personnel to think or act as they would in a real event. Establishing the base is basically laying the groundwork for the exercise to ensure that motivation occurs. Getting ready for the exercise involves:

- 1. Reviewing the current plan:** What does it tell us about ideal performance—i.e., how are we supposed to implement policies and procedures in the event of an emergency?
- 2. Conducting a needs assessment:** What are our risks and vulnerabilities, and where do we need to focus our training efforts?
- 3. Assessing the jurisdiction's capability to conduct an exercise:** What resources can we draw from to design and implement an exercise?
- 4. Defining the exercise scope:** How should we limit this exercise?
- 5. Selecting the exercise type:** What type of exercise best meets our training needs within the available resources?
- 6. Addressing the costs and liabilities:** What will the exercise cost in terms of funding, human resources, and organizational liability?
- 7. Developing a statement of purpose:** What do we expect to gain from the exercise?

### Accomplishment 1: Establishing the Base (Continued)

8. **Gain support and announce the exercise:** How can we obtain the support of those in authority and then use that support to garner support among participants?

Additional “groundwork” tasks include organizing a design team and developing a work plan and schedule.

Establishing the base need not take a long time and can often be done largely at your desk or with the help of a few other people. We’ll revisit some of these tasks shortly.

### Accomplishment 2: Exercise Development

Exercises—particularly tabletop, functional, and full-scale exercises—are developed by following an eight-step process:

1. Assess needs.
2. Define scope.
3. Write a statement of purpose.
4. Define objectives.
5. Compose a narrative.
6. Write major and detailed events.
7. List expected actions.
8. Prepare messages.

**Accomplishment 2: Exercise Development (Continued)**

These eight steps will be the focus of Unit 4.

**Duplicate Steps?**

Performing a needs assessment, defining scope, and statement of purpose are important aspects of developing the overall exercise program. They crop up again when establishing the base for an individual exercise. And here they appear as part of exercise development. Does this mean we just keep repeating the same steps?

Certainly not. Sometimes (as in a simple exercise), the effort you put into these steps in the early stages will suffice: You'll already have done the work when you get to development. Other times (as with a more complex exercise), you may need to come back to the needs assessment (or the scope or the purpose statement) and build on it or refine it further for the particular exercise. The more complex the exercise, the more detailed the planning and development tend to be.

### Accomplishment 3: Exercise Conduct

The day of the exercise is the culmination of your planning. What can you do to help ensure that the exercise is successful? A few suggestions are listed below.

#### Conducting a Successful Exercise

- **Be clear.** The success of an exercise depends largely on the participants having a clear and consistent understanding of what is expected of them. Many exercises fail because the ground rules or simulation techniques to be used during the exercise are inadequately explained.
- **Sustain action.** Sustaining action through messages is one way to meet the key objectives of the scenario. Messages help keep all participants active throughout the entire exercise. This requires careful monitoring and control of the message flow throughout the exercise.
- **Foster realism.** Participants should be encouraged to treat the simulated emergency situations—the communications outages, damage, equipment failure, logistical limitations, personnel losses, etc.—as if they were actually occurring.
- **Establish timelines.** The establishment of valid timelines helps keep what is occurring in its proper order.
- **Review emergency call-off procedures.** To ensure that all participants understand the procedure for a real emergency call-off, they should be briefed before the exercise begins.
- **Capitalize on problem situations.** Situations that can cause stoppage in an exercise also have value because they place added stress on the system. Often they will test more effectively the organization's capability to cope in times of real emergencies.

**Accomplishment 4: Exercise Evaluation and Critique**

An important part of any exercise is evaluating how well the objectives have been achieved. The objectives might relate to such issues as:

- Needed improvements in the plan.
- Needed improvements in the emergency management system.
- Personnel training.
- Overcoming staffing deficiencies.

The extent and depth of the evaluation are determined by the participating organizations. Controllers' evaluations and observations may suffice for some exercises whereas additional analysis by objective observers may be needed for others.

Critiques and reports analyze and explain the attainment or nonattainment of the exercise objectives and provide recommendations for addressing any deficiencies. Evaluators should be thoroughly familiar with the community's EOP and the area that they are evaluating.

Strategies for evaluating an exercise will be the focus of Unit 8.

### Accomplishment 5: Exercise Followup

Followup is one of the most neglected areas of the exercise process. An exercise without evaluation and recommendations makes for an incomplete exercise. Similarly, recommendations without followup will keep you from getting the full benefit of the exercise.

How do you follow up on an exercise? Selected strategies are provided below.

#### Exercise Followup Strategies

- **Assign responsibility.** Clearly assign tasks and schedules, and designate responsibility for each recommended improvement.
- **Monitor.** Establish a monitoring plan to track the progress of implementing recommended improvements.
- **Complete the cycle.** Build the testing of improvements into the next exercise. This is perhaps the surest way to make certain that they are implemented.

It is probably not necessary to retest every objective fully. Rather, select a few recommendations that would illustrate improvements and include those in a future exercise.

This overview has presented the exercise process in a nutshell. As mentioned earlier, more detailed discussions of many aspects of this process will follow in later units. Now, let's take a closer look at some of the key tasks in establishing the base for an exercise. (Other groundwork tasks—those that also become part of the exercise development process—will be the subjects of subsequent units.)

## Reviewing the Current Plan

The EOP describes how personnel in the organization should respond in the event of an emergency. It answers the question, “What resources, personnel, and procedures will be used to resolve problems created by an emergency?”

Your plan may be called by various names—perhaps one of the following:

- EOP
- Area Contingency Plan
- Operational or operating plan

For simplicity, we will refer to all of these plans as *emergency plans*, and the plan is the place to begin.

Examining the plan will help you identify problems, select an exercise, define its purpose, and formulate objectives. While exercises test performance, it is the plan that describes the ideal performance. To use your plan properly as the base document, you must first become familiar with it.

### What to Look for in the Emergency Plan

While reviewing the plan, ask yourself key questions:

- What responses are currently planned (i.e., what are the hazards that the plan is intended to address)?
- What resources, personnel, and procedures will be used to resolve problems?
- Are they different for various types of emergencies?
- Do roles vary according to the type of emergency?
- What training have response personnel experienced?
- What training is necessary?

## Assessing Capability to Conduct an Exercise

To design an exercise that simulates a real emergency, you must know what responses are planned and assess what capabilities are needed to meet those responses. Then you must ask, “Are we at a point where we can conduct an exercise?”

Before you launch into an exercise, it’s important to find out if you have the resources—skills, funding, personnel, time, facilities, and support. Deficiencies in any of these areas will have to be considered in the design of the exercise. When sheer enthusiasm says, “Let’s do a full-scale exercise,” sometimes the capability assessment will say, “We can only do a tabletop right now.”

### Questions to Ask About Capability and Resources

The questions below, though very general, can help you assess your organization’s level of capability. For example, you may find that before you consider planning an exercise, you will need to develop support and train people.

1. When was your organization’s last exercise?
2. What exercise experience is available in your community or organization? What is your own experience? What is your staff’s experience?
3. How much preparation time can you reasonably expect to have allocated to developing an exercise?
4. How much time can people devote to developing an exercise?
5. What skills can those people provide?
6. What physical facilities do you use when you conduct an emergency operation? Will they be available for an exercise?
7. What communication facilities and systems do you use in a real emergency? Will they be available for an exercise?
8. What attitudes do you expect of the chief executive and emergency service directors or other organizational leaders toward the exercise?

## Addressing Costs and Liabilities

Costs and liabilities should be addressed early on.

### Liabilities

A problem inherent in many exercises—particularly drills and full-scale exercises—is the possibility of personal injury or damage to equipment. Before planning the exercise, check the organization’s or jurisdiction’s insurance coverage.

### Costs

Costs (both apparent costs and hidden costs) are incurred at every stage of exercise development. Plan ahead to be sure that you have the resources. Some cost considerations to look at are listed below.

#### **Cost Considerations**

- Plan for a wide variety of costs. The following are a few examples; actual cost items will depend on the exercise and your organization’s policies.
  - Staff salaries
  - Contract services
  - Equipment and materials
  - Fuel to run equipment and transport volunteers
  - Miscellaneous items (e.g., coffee, pencils)
- Ask some key questions to avoid committing more resources than are available. For example:
  - Will reimbursement for overtime be required if the exercise takes place on a weekend or evening?
  - If the exercise supports a hospital certification exercise, who will cover the costs?
- Employees should have their emergency management responsibilities reflected in their job descriptions.
- Time for participation in training, planning, and exercising should be set aside by each employee who has an emergency management responsibility.
- Costs for routine participation in exercises should be recognized by agency or organization officials.

Activity

### Activity: Getting Ready for Exercise Design

*The questions below relate to your organization's readiness for the exercise process. Write brief answers to the following questions in the spaces provided. (Note: This form also appears as Job Aid 3 in Appendix A.)*

#### Self-Assessment: Resources and Costs

1. **Plans**

How familiar are you with the emergency plans, policies, and procedures of your organization or jurisdiction?

- Very familiar
- Only general familiarity
- Familiar with only a portion
- Need to review plans, policies, and procedures thoroughly

2. **Time**

a. How far in advance would your organization realistically have to schedule to plan and design each of the following exercise activities effectively?

- Orientation \_\_\_\_\_
- Drill \_\_\_\_\_
- Tabletop exercise \_\_\_\_\_
- Functional exercise \_\_\_\_\_
- Full-scale exercise \_\_\_\_\_

b. How much preparation time can reasonably be allocated to developing an exercise?

- Actual person days:
  
- Elapsed time to exercise:

Activity: Getting Ready for Exercise Design (Continued)

Self-Assessment: Resources and Costs (Continued)

3. Experience

a. When was your organization's last exercise?

b. What is your previous experience with exercises? (Check all that apply.)

- Orientation:            Presenter            Participant
- Drill:                    Controller            Participant
- Tabletop exercise:    Facilitator            Participant
- Functional exercise:  Controller            Simulator    Player        Evaluator
- Full-scale exercise:  Controller            Responder    Evaluator    Victim
- Took part in postexercise debrief
- Helped write an evaluation report

c. What other exercise-related experience is available in your organization?

4. Facilities

What physical facilities do you use when conducting an emergency operation?

Will they be required for this exercise? Yes  No

Will they be available for this exercise? Yes  No

Activity: Getting Ready for Exercise Design (Continued)

Self-Assessment: Resources and Costs (Continued)

5. **Communications:** What communications facilities and systems do you use in a real emergency?

Will they be required for this exercise? Yes  No

Will they be available for this exercise? Yes  No

6. **Barriers:** Are there any resource barriers that need to be overcome to carry out this exercise? Yes  No

If so, what are the barriers and how can they be overcome?

**Activity: Getting Ready for Exercise Design (Continued)****Self-Assessment: Resources and Costs (Continued)****7. Costs**

- a. What types of costs might be incurred for these exercises in your organization? (Do not list exact figures—just types of expenses, such as wages and salaries, transportation, etc.)

For an orientation:

For a drill:

For a tabletop exercise:

For a functional exercise:

For a full-scale exercise:

- b. Are there ways that different organizations can reduce costs (e.g., by combining exercises, cost-sharing, resource-sharing) and still fulfill program requirements? Explain.

## Gaining Support

It is important, from the beginning, to establish authority for conducting the exercise. This means gaining the support of the highest possible official in your jurisdiction or organization.

Even if the chief executive does not participate in the exercise, his or her authority and support are essential. The top official can get nearly instant and complete cooperation from those who will participate in the exercise. It can be very difficult without that authority and support to put on an exercise involving departments, organizations, or agencies over which you personally have no authority.

Gaining support of the executive is not always easy, but the following approaches will help:

- **Gain support for the entire exercise program.** Build a comprehensive, progressive exercise program. The executive will be more receptive to an exercise that is part of a proven, consistent, and goal-oriented program than to an isolated exercise.
- **Protect the organization.** Make a conscientious effort to protect the organization or jurisdiction from lawsuits.
- **“Sell” the process.** Your needs assessment, capability analysis, purpose statement, and objectives are important building blocks for the exercise. Beyond that, they provide a valuable tool for selling the idea professionally—first to your boss and later to the chief executive of your organization.

### Presenting the Concept

Having the results of your early preparation activities in hand will add to your credibility when presenting the exercise concept to those in authority. Your presentation should include brief explanations of:

- The need for the exercise.
- Organizational capability (experience, personnel, costs).
- The type of exercise.
- The scope of the exercise.
- The purpose of the exercise.

### Gaining Support (Continued)

- **Announce the exercise.** Broad support for the exercise may be gained in some instances by sending out an announcement. The announcement—often in the form of an exercise directive—should come from the chief executive, but you should be prepared to write it. The directive serves the purpose of authorizing you to conduct the exercise and giving you the clout you need to gain support from others.

#### Writing the Exercise Directive

The exercise directive will closely resemble the purpose statement (which will be discussed in more detail in Unit 4). The directive should contain the:

- Purpose.
- List of participating agencies, organizations, or departments.
- Personnel responsible for designing the exercise.
- Exercise date (or approximate dates).
- Point of contact for additional information.

Notice that the nature of the emergency and the location of the exercise are not revealed.

Regarding dates: Totally unannounced exercises are not recommended. However, whether you specify the exact date will depend on the degree of surprise that you intend. At a minimum, a range of dates should be given. In selecting the exercise date, check the community calendar to avoid conflicting with a major event (e.g., an athletic event).

An example of an exercise directive is given on the next page. Although this example illustrates an Emergency Management Office announcement, a similar approach would be appropriate for an organization in the nonprofit or private sector.

**Gaining Support (Continued)**

**Sample Exercise Directive**

February 24, 20XX

TO: All Agency Directors  
FROM: CHARLENE W. WILLIAMS  
Chief Administrative Officer  
SUBJECT: Emergency Exercise

A simulated emergency exercise involving a terrorist incident has been scheduled for sometime during the week of May 12–18, 20xx.

The purpose of the proposed exercise is to improve the following emergency operations:

1. Rapid assessment.
2. Notification and alert.
3. Scene isolation and perimeter control.
4. Mass casualty triage.

It is important that your agency participate in this exercise. We encourage involvement at the highest level.

I believe we all realize the importance of emergency exercises as a means to community preparedness. I fully support this exercise and intend to join with you in participating.

The Emergency Management Office will be coordinating the exercise. They will be contacting you to make necessary arrangements for the development and conduct of the exercise. For purposes of realism and interest, details of the exercise situation will not be made known prior to the exercise.

For further information, call Tom Smith at EXT 1234.

## Assembling a Design Team

Planning an exercise requires a multitude of tasks, from designing the exercise to arranging detailed administrative matters. These tasks require the effort of a dedicated team and team leader.

### Exercise Design Team Leader

The exercise design team leader is responsible for the exercise throughout the entire development process—and for managing all administrative and logistical matters. In an exercise involving multiple organizations or jurisdictions, the team leader needs assistants or liaison persons from each entity to help coordinate the many details.

#### Who Should Lead?

Because the leader is so important, it is essential that this person be experienced and capable. The exercise design team leader should be someone who:

- Can devote a considerable amount of time throughout the exercise cycle.
- Is familiar with the emergency plan and has a sound understanding of the response organizations that will be participating.
- Is *not* a key operational member of one of these organizations. All key members should participate in the exercise, and they might not be able to participate fully if they are involved in the design.

#### What About the Emergency Manager?

Generally speaking, the person with chief responsibility for managing emergency events should be a player in the exercise. Therefore, instead of heading the design team, the Emergency Manager should assign someone else to develop and conduct the exercise. Prior to the exercise, the Emergency Manager should be given the same information about the scenario as other department heads—but no more.

When staffing does not permit the Emergency Manager to assign someone else, he or she will need to play a dual role:

- Assume responsibility for developing the exercise and get people from other agencies to help.

### **Assembling a Design Team (Continued)**

- Participate in the exercise, but on a limited basis. Despite being familiar with the exercise design, the Emergency Manager can still take a number of actions without compromising the realism—for example, negotiate and coordinate, support the decisions of the chief executive, and approve resource allocation.

### **Exercise Design Team**

Exercise design is a complex task that should not be done by a single individual. The exercise design team assists the team leader in developing exercise content and procedures.

### **Design Team Responsibilities**

Design team members:

- Determine the exercise objectives.
- Tailor the scenario.
- Develop the sequence of events and associated messages.
- Assist in the development and distribution of preexercise materials.
- Help conduct preexercise training sessions.

Ultimately, team members will be good candidates to act as simulators or controllers in a functional exercise.

### **Design Team Candidates**

Ideally, the team should include a representative from each of the participating jurisdictions in a multijurisdictional exercise. In a single-jurisdictional or single-organization exercise, it should include representatives from the key departments. If this results in an unwieldy team, however, select a small core team that can draw on other members as needed.

## Assembling a Design Team (Continued)

### Backgrounds

Selecting team members with varied backgrounds helps with coordination and stimulates creativity. Some additional technical and administrative support may be required for typing, printing, and other mechanics involved in materials preparation.

### Organizing the Design Team

Design teams are so varied—in number of members, team makeup (multiagency or single organization), available skills, political climate, scope of the exercise program to be developed, and many other factors—that there is no single approach to organizing a design team.

Generally, the team leader should use the kinds of teamwork strategies that make any team successful. Team leadership is too large a topic to address in this course, but there are many resources (courses, written documents, Internet resources) you can access to learn more about teamwork. A few suggestions for organizing the work of a design team are listed on the next page.

## **Assembling a Design Team (Continued)**

### **Strategies for Organizing the Team**

- Establish clear goals.
- Agree on a plan of action, with specific responsibilities and due dates, to meet the established goals.
- Reach consensus on a realistic schedule for completing milestone activities.
- Meet regularly to monitor progress.
- Work together to share expertise and resources to get the job done.
- Use the team interaction to learn more about each other's organizations. The more you know about other stakeholders, the better you will be able to work together to manage emergencies when they arise.
- Keep lines of communication open about new ideas, potential pitfalls, successes, problems, and needs. Shared information and creative problem solving are huge assets in emergency management.
- Use job aids to make the schedule, responsibilities, and progress visible and to keep everyone "on the same page."
- Some examples are provided in the following pages. Remember, these are only examples: Any job aid you use should be adapted to the needs of your team.

## Assembling a Design Team (Continued)

**Checklist.** A simple “to-do list” similar to the following can be used to provide an overview of the process and ensure that all main tasks are completed. (**Note:** This checklist appears as Job Aid 4 in Appendix A.)

### Sample Exercise Development Checklist

#### Mission

- Needs Assessment
- Scope
- Statement of Purpose
- Objectives

#### Personnel

- Design Team
- Controller or Facilitator
- Players
- Simulators
- Evaluators
- Management
  - Safety
  - Observers

#### Information

- Directives
- Media
- Public Announcements
- Invitations
- Community Support
- Management Support
- Timeline Requirements

#### Training/Briefings

- Train Simulators, Evaluators, Controllers
- Players' Preexercise Briefing

#### Scenario

- Narrative
- Major/Detailed Events
- Expected Actions
- Messages

#### Logistics

- Safety
- Scheduling
- Rooms/Location
- Equipment
- Communications
  - Phones
  - Radio
  - Computers
- Enhancements
  - Maps
  - Charts
  - Other:

#### Evaluation

- Methodology
- Locations
- Evaluation Forms
- Postexercise Debrief

#### After Action Documentation/ Recommendations

- Evaluation Meeting
- Evaluation Report
- Followup Ideas for Next Exercise

**Assembling a Design Team (Continued)**

**Activities Schedule.** For relatively simple exercises, a basic schedule may be used to show major activities of the team leader and the team and completion deadlines for each. An example is shown below. Deadlines should be realistic, based on team resources. (**Note:** See Job Aid 5 in Appendix A for a blank version of this schedule form.)

| <b>Sample Activities Schedule</b> |                                                                                                                                                                                                     |                                                                                                                                                                                           |

**Assembling a Design Team (Continued)**

A more detailed plan is needed for a major exercise, which must be planned with the thoroughness of any major organizational effort. A Gantt chart, as shown in the example below, is a useful scheduling tool for such detailed planning.

A Gantt chart displays time across the top and a sequence of tasks down the left-hand side. Time can be given in days, weeks, or months. The duration of time devoted to each activity is represented by bars extending across the time lines.

The example shows task groupings (with supporting subtasks scheduled) and staff allocations indicated by initials in the left column.

### Exercise Documents

Four major documents are developed during the exercise design process:

- Exercise Plan
- Control Plan
- Evaluation Plan
- Player Handbook

These documents are basically handbooks for specific audiences and serve as useful tools during exercise development, conduct, and evaluation.

### Exercise Plan

The exercise plan contains information that everyone needs and serves many purposes. For example, it can be used:

- To provide general information about the exercise for everyone concerned, including exercise overview, parameters, and timelines.
- As a guide for developers and participants.
- To assist participants in enhancing exercise play.
- As a promotional tool by the exercise director.

### Control Plan

The control plan is for controllers and simulators. It is not made available to players. It provides information about controller and simulator requirements and explains the exercise concept as it relates to controllers and simulators. This plan:

- Establishes the basis for control and simulation of the exercise.
- Explains the procedures, responsibilities, assignments, and support for exercise control and simulation.
- Defines the communications, logistics, and administrative structure needed to support control and simulation during the exercise.

## Exercise Documents (Continued)

### Evaluation Plan

The evaluation plan provides exercise evaluators, as well as controllers and simulators, with guidance concerning exercise evaluation procedures, responsibilities, and support. This plan:

- Explains the exercise concept as it relates to the evaluation process.
- Establishes the basis for evaluation.
- Defines the communications, logistics, and administrative structure needed to support evaluation before, during, and after the exercise.

### Player Handbook

The Player Handbook provides exercise players with information needed to participate effectively in the exercise. This information is also discussed at the player briefings conducted prior to the start of the exercise.

Specific information included in each document is listed in the table on the next page. Templates of these documents are provided in the Exercise Design course Tool Box, available at <http://training.fema.gov/emiweb/IS/is139lst.asp>.

## Summary and Transition

Unit 3 presented an overview of the main exercise activities and their relationships to one another. It also discussed some important aspects of laying the groundwork for an exercise, including:

- Reviewing the current plan.
- Assessing capability to conduct an exercise.
- Addressing costs and liabilities.
- Gaining support.
- Assembling and organizing the design team.

Finally, this unit provided an overview of the four main design documents: the exercise plan, control plan, evaluation plan, and player handbook. Unit 4 explains the eight steps in the design process.

**Knowledge Check**

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.*

1. The major task accomplishments in the exercise process are:
  - a. Conducting tabletop, functional, and full-scale exercises.
  - b. Developing, conducting, and evaluating the exercise.
  - c. Establishing the base, exercise development, exercise conduct, critique and evaluation, and followup.
  - d. Conducting a needs assessment, writing objectives, and evaluating whether the objectives were achieved.
  
2. In conducting an exercise, unexpected problem situations are likely to lead to failure of the exercise.
  - a. True
  - b. False
  
3. Critiques and reports analyze how well objectives were achieved. They should also provide recommendations for addressing any deficiencies.
  - a. True
  - b. False
  
4. An important followup strategy is to implement needed improvements revealed in the exercise and to test those improvements in the next exercise.
  - a. True
  - b. False
  
5. Availability of resources:
  - a. Is irrelevant to the exercise process.
  - b. Should not affect exercise design.
  - c. Should be considered in scheduling and planning an exercise.
  - d. Is seldom an issue for exercise design because exercises require few resources.
  
6. The exercise design team leader should be:
  - a. The Emergency Manager.
  - b. Someone who is familiar with the emergency plan.
  - c. A key operational member of a participating organization.
  - d. The chief official of the jurisdiction or organization.

**Knowledge Check (Continued)**

7. The design team should consist of:
  - a. As many members as possible from all agencies or departments.
  - b. Two or three members of the chief official's key staff.
  - c. Members with varied backgrounds, representing key participating entities.
  - d. The organization's training department.
  
8. The primary audience of the Exercise Plan is:
  - a. Controllers and simulators.
  - b. Participants.
  - c. The facilitator.
  - d. Everyone involved in the exercise.
  
9. The Control Plan explains the procedures, responsibilities, assignments, and support for exercise control and simulation.
  - a. True
  - b. False
  
10. The Control Plan should not be seen by \_\_\_\_\_.
  - a. Controllers
  - b. Simulators
  - c. Evaluators
  - d. Players
  
11. The \_\_\_\_\_ can be used as a promotional tool by the exercise director.
  - a. Exercise Plan
  - b. Control Plan
  - c. Evaluation Plan
  - d. Player Handbook

9. a
10. d
11. a

**Unit 4: Exercise Design  
Steps**

## **Introduction**

Exercise design is much like scripting a play to make sure that all of the players perform the correct actions and make the right decisions at the appropriate time. Tabletop, functional, and full-scale exercises are based on a design process that includes the eight steps introduced in the previous unit:

1. Assess needs.
2. Define scope.
3. Write a statement of purpose.
4. Define objectives.
5. Compose a narrative.
6. Write major and detailed events.
7. List expected actions.
8. Prepare messages.

This unit describes what is involved in completing each of the eight steps.

## **Unit 4 Objective**

After completing this unit, you should be able to list and explain the eight exercise design steps.

**Step 1: Assess Needs**

Some organizations plan exercises as a response to pressure or a “gut feeling.” For example, someone may suddenly decide to do a full-scale exercise based on some dramatic disaster, because full-scale exercises generate a lot of excitement. Such hasty decisions usually result in failure and embarrassment. The best way to determine whether you need an exercise—and what kind of exercise is needed—is to study your situation systematically.

Conducting a needs assessment will help you define the problems, establish the reasons to do an exercise, and identify the functions to be exercised.

**Begin With Your Plan**

A needs assessment should begin with a review of the emergency plan and should address:

- Hazards—the risks that you are most likely to face and the priority levels of those hazards.
- Area(s) most vulnerable.
- Functions most in need of rehearsal.
- Potential participants (agencies, organizations, departments, personnel).
- Past exercises.
- Exercise requirements.
- Capabilities.

If you have assessed your organization’s exercise needs when planning a comprehensive exercise program, you have a good basis already. (For example, the assessment you completed in Unit 1 touched on many key issues.) Consulting and updating that assessment will be an important step whenever a new exercise is considered for development.

## Step 1: Assess Needs (Continued)

### Lessons Learned

In doing a needs assessment for a single exercise, an obvious starting point is the evaluations of past exercises:

- Who participated in the exercise and who did not?
- To what extent were the exercise objectives achieved?
- What lessons were learned?
- What problems were revealed, and what is needed to resolve them?
- What improvements were made following past exercises, and have they been tested?

### Needs Assessment Results

In summary, your needs assessment should reveal the following types of issues if they exist:

- Primary and secondary hazards that the organization faces
- Problems that need to be resolved
- Problems that recur
- Skills that need to be practiced
- Functions that are weak
- Improvements implemented after previous exercises, which now need to be tested
- New facilities, personnel, or equipment that have not been included in an exercise
- Weaknesses (such as gaps, conflicting policies, or vague procedures) in the emergency plan or the SOPs
- The need for role clarification
- The need for a certain type of exercise

### **Step 1: Assess Needs (Continued)**

A needs assessment form appears as Job Aid 1 in Appendix A. Now that you know a little more about exercising, you may wish to review your assessment from Unit 1 and update it if needed.

### **Step 2: Define the Scope**

Defining the scope of an exercise means putting realistic limits on the issues that you identified in the needs assessment.

#### **Why Define the Scope?**

A needs assessment may reveal a wide array of concerns. Clearly you can't design an exercise that effectively practices:

- All functions. . .
- In the context of all hazards. . .
- Using all agencies, organizations, or departments. . .
- In all exercise formats. . .
- Employing all resources.

You will need to set priorities and make choices. It is important that the scope be clearly and narrowly defined.

## Step 2: Define the Scope (Continued)

### How Is Scope Determined?

Many factors influence which areas of concern will be included in an exercise and which will not. Sometimes one decision will influence another (for example, the functions that are selected will determine who plays in the exercise). Other factors that help define the scope of an exercise include:

- Expense.
- Availability of personnel and other resources.
- Seriousness of the problem.
- Capability of the exercise to address the problem.
- Skills and experience of the designers.
- Length of the exercise.

### What Does Scope Include?

There are five key elements of scope: Type of emergency, location, functions, participants, and exercise type.

- **Type of emergency:** An exercise is usually limited to one major event, although others—especially secondary events—might develop as the scenario develops. Hazards may be chosen for several reasons, including:
  - The emergencies that will generate the types of actions that need to be practiced.
  - The highest priority hazards that the organization faces.
  - The hazards that haven't been exercised recently.
  - Problems that have just recently developed.
- **Location:** Identify the location (a specific address) where the simulated event will occur. For tabletop and functional exercises, select a place where the hazard could realistically occur. For a full-scale exercise, traffic problems or safety issues may make it necessary to compromise on an area similar to the ideal location.

**Step 2: Define the Scope (Continued)**

- **Functions:** List the operations that the participants will practice. Be sure that the procedures within a certain function are *clear* and *narrowly defined*.

**Example**

To exercise a community’s alert warning system, the following actions might be part of a response function:

Exercise Alert Warning System

- Notify the warning agency.
- Turn on sirens.
- Notify fire or police to use loud speakers in area.
- Notify Emergency Alert System (EAS) to interrupt programming with message.

- **Participants:** After the most important functions or needs have been identified, you can narrow the list of participating organizations and individuals to those that are *required* to carry out the actions.

**Ask yourself:**

- Which organizations need to be involved to carry out the function(s) being tested?
- Which representatives from the identified organizations should be there?

For example, in an EOC or other operations center, you would typically want policy makers, coordinators, and operations personnel. In an Incident Command Post, you would most likely want personnel who are knowledgeable in field operations and have some on-scene decision-making authority.

## Step 2: Define the Scope (Continued)

- **Exercise type:** Finally, a decision must be made on the type of exercise.

### Ask yourself:

- What exercises are most needed?
- What experience have personnel had with the various types of exercises?
- What stress level do we want?
- What types of exercises are mandated by regulatory requirements?

After these issues have been settled, it is time to formulate them into a statement of purpose.

## Step 3: Write a Statement of Purpose

The **purpose statement** is a *broad statement of the exercise goal*. It focuses and controls the whole exercise. The purpose statement:

- Governs the selection of the objectives, which in turn govern subsequent steps.
- Clarifies for the chief executive and potential participants why the exercise is being conducted.
- Is useful in communicating plans to the media and community leaders.

### Developing the Purpose Statement

A purpose statement is easily constructed. One approach is simply to incorporate the scope decisions (type of emergency, location, functions, organizations, and exercise type) into a single sentence. A date is usually added.

Two sample formats are provided on the following pages.

### Step 3: Write a Statement of Purpose (Continued)

#### Using the Purpose Statement as an Exercise Directive

##### **Statement of Purpose: Sample 1**

The purpose of the proposed emergency management exercise is to improve the following emergency **operations**:

- a. Flood stage monitoring
- b. Evacuation warning
- c. Relocation of school children
- d. Shelter management

by involving the following **agencies**:

- a. Emergency Management
- b. Fire Department
- c. Public Works
- d. Health Department
- e. Red Cross
- f. Public Schools

in a **functional exercise** simulating a **flash flood**

**at Planter's Street Bridge to Route I-740** on April 2.

**Step 3: Write a Statement of Purpose (Continued)****Statement of Purpose: Sample 2**

The purpose of the proposed emergency management exercise is to coordinate the activities of city and county government, volunteer organizations, and private industry in their response to a major incident; to provide training to staff; to test and evaluate the Alert and Warning, Evacuation and Shelter/Mass Care Annexes; and to enhance interagency coordination and cooperation by involving the following department or agency heads:

- |                                                           |                              |
|-----------------------------------------------------------|------------------------------|
| 1. County Commissioner or Chief<br>Administrative Officer | Justice County               |
| 2. Mayor                                                  | City of Liberty              |
| 3. Emergency Manager                                      | City of Liberty              |
| 4. Emergency Manager                                      | Justice County               |
| 5. Fire Chief                                             | Justice County               |
| 6. Law Enforcement                                        | Justice County Sheriff       |
| 7. PIO                                                    | Liberty City Gazette         |
| 8. HazMat Team Liaison                                    | Representative               |
| 9. Chemical Expert                                        | Justice County Team #3       |
| 10. Poison Control Center                                 | Arrow Chemical Company       |
| 11. The American Red Cross                                | Dr. Smith, Disaster Director |
| 12. Liberty City Hospital                                 | Emergency Room Director      |

These entities will be tested on July 15, in a simulated exercise involving a hazardous materials transportation accident at SW Mail Road near SW Johnston Boulevard, approximately 300 yards from the Liberty City Hospital.

The exercise directive, as discussed in Unit 3, is a memo from the chief official in your organization or jurisdiction, sent to agencies or departments whose support you need. The directive is essentially a restatement of the purpose statement.

When using the statement of purpose as the basis for the directive, the following information should be added:

- Contact person and telephone number
- Hours the exercise will be conducted
- Exercise location (may be omitted to retain an element of surprise)

**Activity: Define Exercise Scope and Purpose (Continued)**

4. Types/levels of personnel that you want to have in the exercise:
- Policy making (elected officials, chief operating officers, department heads)
  - Coordination (managers, EOC representatives, department deputies)
  - Operations (field personnel, headquarters staff level)
  - Public representatives (media, PIOs, general public)
  - Other: \_\_\_\_\_
5. Types of operations/functions that you want participants to engage in (e.g., notification, evacuation):

6. Degree of stress, complexity, time pressure that the exercise should have:

|               | <b>High</b> | <b>Medium</b> | <b>Low</b> |
|---------------|-------------|---------------|------------|
| Stress        | _____       | _____         | _____      |
| Complexity    | _____       | _____         | _____      |
| Time pressure | _____       | _____         | _____      |

**Activity: Define Exercise Scope and Purpose (Continued)**

|                                     |
|-------------------------------------|
| <b>Exercise:</b>                    |
| <b>Scope:</b>                       |
| <b>Type of Emergency:</b>           |
| <b>Location:</b>                    |
| <b>Functions:</b>                   |
| <b>Organizations and Personnel:</b> |
| <b>Exercise Type:</b>               |

**Activity: Define Exercise Scope and Purpose (Continued)**

**Statement of Purpose:**

### Step 4: Define Objectives

Early in the development of an exercise, you must decide what the exercise is intended to accomplish. These outcomes, or objectives, must be specified clearly.

An **objective** is a description of the performance you expect from participants to demonstrate competence. Objectives go hand in hand with the purpose statement but are more specific and performance based.

#### Why Define Objectives?

Objectives are essential during the four stages of the exercise process:

- **Design process:** Objectives are the pivot point in the design process:
  - The needs assessment, scope, and purpose statement lead to the formulation of objectives.
  - The success of later actions and decisions begins with carefully written objectives.
  - The narrative, the major and detailed events, expected actions, and messages are all based on the objectives. In one sense, the objectives can be thought of as general statements of expected actions.
- **Exercise conduct:** During the exercise itself, elements of the exercise should be conducted according to the objectives to make sure that it stays on track.
- **Evaluation:** Writing objectives is the beginning of the exercise evaluation process. During the exercise, observers use the objectives to evaluate performance. After the exercise, the evaluation report is based upon those objectives. The process of identifying evaluation criteria takes place at the time objectives are written.
- **Followup:** During the followup period, participants retrain, plan, and practice to address objectives that were not fulfilled.

## Step 4: Define Objectives (Continued)

### How Are Objectives Determined?

Many objectives become evident at the time of the needs assessment, when designers identify problem areas. These needs can usually be translated into a statement of objectives.

Objectives are also arrived at by breaking down a purpose statement into its logical components.

**Example:** Suppose your last exercise showed weaknesses in alert and notification—specifically a failure on the part of the EOC to analyze and implement call-down procedures. One of the resulting objectives would be to verify that the EOC is now able to notify the proper agencies according to the plan.

### How Many Objectives?

There can be as few as two or three objectives in a small exercise, or as many as 100 in a large national exercise including many Federal, State, and local jurisdictions. For an average exercise, 10 or fewer objectives are recommended.

In larger exercises, each participating organization should be responsible for developing its own specific objectives, which are then incorporated into one exercise package by the design team.

### What Makes a “Good” Objective?

The main thing to remember about objectives is that they must be clear, concise, and focused on participant performance. They should contain:

- An action, stated in observable terms.
- The conditions under which the action will be performed.
- Standards (or level) of performance.

In other words, an objective should state *who* should do *what* under *what conditions* according to *what standards*.

**Step 4: Define Objectives (Continued)**

Here's an example:

**Writing SMART Objectives**

A useful guideline for writing objectives is the SMART system, which is described below. This system is easy to use and easy to remember.

| <b>SMART Guidelines for Useful Objectives</b> |                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Simple</b>                                 | A good objective is simply and clearly phrased. It is brief and easy to understand.                                                                                                                                                                                              |
| <b>Measurable</b>                             | The objective should set the level of performance, so that results are <i>observable</i> , and you can tell when the objective has been achieved. This doesn't mean that you have to set a quantifiable standard. It just means that people can agree on whether they succeeded. |
| <b>Achievable</b>                             | The objective should not be too difficult to achieve. For example, achieving it should be within the resources that the organization is able to commit to an exercise.                                                                                                           |
| <b>Realistic</b>                              | The objective should present a realistic expectation for the situation. Even though an objective might be achievable, it might not be realistic for the exercise.                                                                                                                |
| <b>Task Oriented</b>                          | The objective should focus on a behavior or procedure. With respect to exercise design, each objective should focus on an individual emergency function.                                                                                                                         |

Activity

**Activity: Analyze an Objective**

*How good is the following objective? Use the provided rating scale to analyze the objective.*

**Objective:** To demonstrate an understanding of the procedures necessary in protecting responder health and safety.

Is this objective ...

|                |    |            |     |
|----------------|----|------------|-----|
| Simple?        | No | Needs Work | Yes |
| Measurable?    | No | Needs Work | Yes |
| Achievable?    | No | Needs Work | Yes |
| Realistic?     | No | Needs Work | Yes |
| Task Oriented? | No | Needs Work | Yes |

Is this a useful objective? Why?

**Activity: Analyze an Objective (Continued)****Suggested Response:**

The writer of this objective may have known exactly what he or she meant, but the statement doesn't work as an objective because it doesn't clearly communicate its meaning to anyone else. We are left with many unanswered questions, such as:

- What does “demonstrate” mean?
- What would the participant do to properly “demonstrate?”
- Who is the person who will demonstrate this understanding?
- What does “complete understanding” mean, and what standards would the participant have to reach to prove competence?
- What specific “procedures” does the writer have in mind?

**Step 4: Define Objectives (Continued)**

**Points of Review**

Another way to ensure that the objective will provide useful measures is to include specific points of review—very specific items to be observed by an evaluator.

For example, the objective below is a little too vague to guide an evaluation team:

**Objective:** Demonstrate the adequacy of displays and other materials to support emergency operations.

If the objective is supported by points of review similar to those shown below, it will be adequate, however:

| Display                                | Yes                      | No                       |
|----------------------------------------|--------------------------|--------------------------|
| 1. Status boards available in facility | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Status boards used                  | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Status boards kept updated by _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Maps available                      | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Maps up to date                     | <input type="checkbox"/> | <input type="checkbox"/> |

**Step 4: Define Objectives (Continued)****Helpful Hints: Word Choice**

- **Use concrete words.** One way to avoid vagueness is to use concrete words. Pay particular attention to the verb that describes participant performance.
- **Avoid vague verbs**, such as:
  - Know.
  - Understand.
  - Appreciate.
  - Show the ability to.
  - Be aware of.
- **Use action words**, such as:

|                |             |            |
|----------------|-------------|------------|
| • Assess.      | • Examine.  | • Operate. |
| • Clarify.     | • Explain.  | • Prepare. |
| • Define.      | • Identify. | • Record.  |
| • Determine.   | • Inspect.  | • Report.  |
| • Demonstrate. | • List.     | • Show.    |
| • Establish.   | • Notify.   | • Test.    |
| • Evaluate.    |             |            |

Most objectives written for exercises describe performance—that is, the actions that a person or organization will carry out. Occasionally (especially in orientation seminars and some tabletops) the objective describes the understanding of a concept or a change in attitude.

Activity

**Activity: Good or Poor Objectives**

*Some examples of objectives are listed below. Review each example. Is it a good objective that will be useful to designers, players, and evaluators? Or is it a poor objective that needs improvement? Mark your answers in the provided boxes.*

|                                                                                                                                                                                                             | <b>Good</b>              | <b>Poor</b>              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|
| 1. Responders will establish an incident command post in the lobby of the high-rise structure within 15 minutes after the initial call for service.                                                         | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. To get all of the emergency services to sit down in the same room together and talk.                                                                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Demonstrate the ability to field a nuclear response team (fully equipped and assembled) within 30 minutes following a terrorist incident.                                                                | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Identify and activate an alternate communication system to be used as a backup within 30 minutes of failure of the primary communication system.                                                         | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. To get the agencies to improve their disaster operations.                                                                                                                                                | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. The Mental Health Coordinator in the EOC will contact and deploy crisis intervention teams to the incident site after notification of request.                                                           | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. To determine the capabilities of the fire/rescue department to effectively perform fire fighting, rescue, hazardous materials containment, and similar hazard abatement duties during a major emergency. | <input type="checkbox"/> | <input type="checkbox"/> |
| 8. The warehouse manager will inventory and report to Central Processing the available stores of protective building supplies within 2 hours of notification by city officials.                             | <input type="checkbox"/> | <input type="checkbox"/> |
| 9. To identify the primary reason for slow response of ambulance units.                                                                                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. Volunteers will be utilized.                                                                                                                                                                            | <input type="checkbox"/> | <input type="checkbox"/> |
| 11. Emergency management staff will initiate and complete a callback of EOC personnel as prescribed in the emergency plan.                                                                                  | <input type="checkbox"/> | <input type="checkbox"/> |

**Activity: Good or Poor Objectives (Continued)**

|                                                                                                                                                            | <b>Good</b>              | <b>Poor</b>              |

Activity

**Activity: Develop Objectives**

*For the same tabletop or functional exercise for which you developed a statement of purpose earlier in this unit, write three objectives and identify the responsible organization. Use the SMART system, and remember to include:*

- *Action, stated in observable terms.*
- *Conditions.*
- *Standards.*

| Exercise Objectives |               |
|---------------------|---------------|
| Objective #1:       | Organization: |
| Objective #2:       | Organization: |
| Objective #3:       | Organization: |

**(Note:** A similar worksheet appears as Job Aid 9 in Appendix A.)

## Step 5: Compose a Narrative

An **exercise** is a *scenario that simulates an emergency*. Part of this scenario is the narrative, which is a brief description of the events that have occurred up to the minute the exercise begins. The narrative has two important functions.

First, it *sets the mood* for the exercise. Participants need to be motivated to participate. The narrative captures their attention and makes them want to go on.

Second, the narrative *sets the stage for later action* by providing information that the participants will need during the exercise.

### Characteristics of a Narrative

A good narrative:

- Is usually one to five paragraphs long.
- Is very specific.
- Is phrased in present tense.
- Is written in short sentences to lend immediacy and tension.
- May develop the situation chronologically (event with warning time).
- May emphasize the emergency environment.

For an emergency with warning time (e.g., a hurricane), the narrative often outlines the developing situation chronologically.

For an unexpected event (e.g., a chemical spill or terrorist bomb attack), the narrative may be shorter. Or, it may devote more detail to the environment of the emergency (e.g., a nearby school, other chemicals stored, rush hour approaching) to create intensity of feeling.

**Step 5: Compose a Narrative (Continued)****Hints: Outlining a Narrative**

You can outline a narrative by jotting down short responses (one or two words) to the following questions:

- What event?
- How fast, strong, deep, dangerous?
- How did you find out?
- What response has been made?
- What damage has been reported?
- What is the sequence of events?
- What time?
- Was there advance warning?
- Where does it take place?
- What are the relevant weather conditions?
- What other factors would influence emergency procedures?
- What is predicted for the future?

Then, when you're ready to write the text of the narrative, just take each of the key words and turn it into a brief sentence.

Two sample narratives are provided on the following pages. As you read the narratives, notice where the questions listed above are answered.

**Step 5: Compose a Narrative (Continued)****Sample Narrative: Hurricane**

The National Weather Service's National Hurricane Center issues news on the formation of a storm off the southern U.S. coast that appears to have hurricane potential. Tropical storm Anne is upgraded to Hurricane Anne and NWS issues a Hurricane Watch for a three-state area along the U.S. coast. Wind velocity and northwest movement over the last day have decreased, but an overnight change in direction to a steady northwest line calls for an immediate Hurricane Warning for five coastal counties of the state. Winds of 120 m.p.h. are predicted during the incoming tide, with high water expected to reach 12–15 feet over high tide. Low lying, newly developed resort areas and heavy influx of visiting weekend campers have been advised to evacuate the area. Access bridges to barrier islands are narrow and could become impassable with 15-foot water heights.

Hurricane Anne, considered a very dangerous hurricane with high winds and an accompanying storm surge, will hit the coastal communities along Stevens Bay and farther inland, a population area of between 5,000 and 25,000.

Following the hurricane watch, emergency service personnel notified elected officials and agency heads within the watch area. News media were also alerted and encouraged to broadcast the notice. When the warning of landfall within 24 hours was given, the Emergency Manager placed her staff on alert but did not activate the EOC. She has asked all appropriate emergency service personnel to meet at 07:30, approximately four hours after the warning was given. On its present course, the hurricane will make landfall at approximately 23:30. Flood stage from rising tides and tidal surge could, however, impact bridges by 16:00. All appropriate staff and emergency personnel are now gathered in the EOC.

**Step 5: Compose a Narrative (Continued)**

**Sample Narrative: Air Crash**

A Boeing 747, en route from Panama to San Francisco, is experiencing in-flight engine problems and will have to make an emergency landing. Plans have been made to land at a large airport 200 miles north. However, the latest communication with the pilot indicates that the plane has lost engine power and is losing altitude too quickly to reach the large airport. Even though your city airport is too small to handle a 747, you are the only hope for the 350 passengers and 10 crew members.

Conditions at your airport are clear, and the surrounding area is dry. A hot, dry wind is blowing from the north.

The main runway lies along a relatively unpopulated suburban area. However, the likelihood of the pilots being able to control the huge plane and stay within the landing space is slim. The approach passes over populated suburban housing developments.

The airport control tower alerts its own Crash/Fire Rescue units and requests that the local emergency services provide backup assistance in fire, police, medical, welfare, and search and rescue capabilities.

Activity

**Activity: Outline a Narrative**

*For the same tabletop or functional exercise as before, outline the key points of a narrative using the worksheet below (also provided as Job Aid 10 in Appendix A). Just list key words; you do not need to develop the full text at this time.*

| Narrative Outline                                        |
|----------------------------------------------------------|
| Event:                                                   |
| How fast, strong, deep, dangerous:                       |
| How you found out:                                       |
| Response made:                                           |
| Damage reported:                                         |
| Sequence of events:                                      |
| Current time:                                            |
| Advance warning:                                         |
| Location:                                                |
| Relevant weather conditions:                             |
| Other factors that would influence emergency procedures: |
| Predictions:                                             |

## **Step 6: Write Major and Detailed Events**

Developing an exercise scenario is much like writing a play. In developing a play, the playwright organizes events into acts and scenes. Similarly, an exercise designer organizes events into major and detailed events.

Major and detailed events are occurrences—large or small—that take place after and as a result of the emergency described in the narrative. It may be helpful to think of them as *problems* requiring a realistic action that will meet exercise objectives.

The goal in developing events is to provide a structure that will:

- Link the simulated event to the actions that you want people to take.
- Provide unity to the exercise. Without the overall organization provided by major events, the exercise could dissolve into random actions.

Careful scripting is very important if you are going to produce a convincing, unified scenario rather than a series of unrelated, miscellaneous occurrences. It is also necessary for creating an exercise that is governed by objectives.

### **Developing Major Events**

**Major events** are *big problems resulting from the emergency*. They should be likely events, based on case studies or operational plans, that call for realistic action.

Usually, the best way to arrive at a list of major events is to take it in two stages:

- First, identify several major occurrences—the high points in a sequence—that might follow the narrative events.
- Second, decide which of these events might generate situations that would test the objectives. Then concentrate on those that best support the objectives.

**Step 6: Write Major and Detailed Events (Continued)**

The major events in the following example were developed from the sample airplane crash narrative presented in Step 5.

**Sample Major Events Sequence for Air Crash Scenario**

1. Fuselage breaks apart and hits buildings below.
2. Jet fuel ignites several homes in the area.
3. About 60 survivors are thought to be trapped in the front section of the aircraft.
4. Several bystanders are injured on the ground.
5. A crowd convenes around the crash site.
6. Family members of victims begin to gather at the crash site.
7. Estimates of passenger casualties rise between 200 and 220 deaths and at least 70 severe burn victims.

Most events require action from one or more organizations. Because your goal is to develop an exercise that will test certain functions and organizations, the major events should be developed from your purpose statement.

**Example:**

- Event # 1 above tests damage assessment and command and control.
- Event # 2 tests deployment of fire, police, and medical services.
- Event # 3 tests search and rescue and medical personnel procedures.

**Step 6: Write Major and Detailed Events (Continued)****Developing Detailed Events**

Detailed events are specific problem situations to which personnel must respond. Each detailed event should be designed to prompt one or more expected actions for one or more organizations that are participating in the exercise. When the design task is small, it may not be necessary to distinguish between major and detailed events. For functional exercises, however, it is easier to write messages if you can base them on a list of detailed events.

There are several ways to develop detailed events. For example, you can:

- Plan the detailed events and expected actions at the same time.
- Work backwards—first identifying an action that you want players to perform, then listing a problem (a detailed event related to a major event) that would motivate the action.
- Make a list of specific problems that are likely to occur in connection with each major event, then identify actions that would be expected as a result.

Whatever method you use, the result should be a list of specific events that are closely linked with actions that you want the participants to perform.

The detailed events in the following example were developed from event # 7 in the Sample Major Events Sequence (“Estimates of passenger casualties rise between 200 and 220 deaths and at least 70 severe burn victims”).

**Sample Detailed Events**

- a. The mortuary is unable to accept the large numbers of remains resulting from the crash.
- b. Local hospitals lack specialized facilities and personnel to treat large numbers of severe burn victims.
- c. The American Red Cross has agreed to set up a family information center to link victims and their families.

## Step 7: List Expected Actions

**Expected actions** are *the actions or decisions that you want participants to carry out to demonstrate competence*. It is necessary to identify expected actions to:

- **Write messages.** Because the point of the exercise is to get the participants to think and react in certain ways, the script must be carefully developed to ensure that the messages get the planned results. Your list of expected actions will enable you to write effective messages.
- **Determine what should be evaluated.** The exercise evaluation will focus on whether the participants respond appropriately in an emergency. The list of actions will become the core of that evaluation.

### Types of Actions

There are four types of actions that the participants may carry out:

- **Verification:** Gather or verify information.
- **Consideration:** Consider information, discuss among players, negotiate, consult plan.
- **Deferral:** Defer action to later, put action on priority list.
- **Decision:** Deploy or deny resources.

How do you know what actions are appropriate in response to a given event? Refer to the emergency plan.

**Step 7: List Expected Actions (Continued)**

**Relationship to Objectives**

Expected actions are closely tied to objectives. Objectives state general desired actions. **Expected actions** are a breakdown of objectives—the actions that would be taken by an organization or an individual to meet the objective.

The following example illustrates this relationship.

| <b>Example: Objective and Expected Actions</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Function</b>                                | Coordination and communication among the airport and the jurisdiction’s emergency systems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Objective</b>                               | Upon notification that a crash is imminent, response units will stage within 3 minutes, according to SOPs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Event</b>                                   | Landing of disabled aircraft is imminent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Expected Actions</b>                        | <p><u>Airport Control Tower:</u></p> <ul style="list-style-type: none"> <li>▪ Notify police, fire, medical personnel to proceed to airport.</li> <li>▪ Alert hospitals of potential mass casualty incident.</li> </ul> <p><u>Dispatch Center:</u></p> <ul style="list-style-type: none"> <li>▪ Alert police, fire, and medical supervisors.</li> </ul> <p><u>Hospital:</u></p> <ul style="list-style-type: none"> <li>▪ Notify other medical facilities as appropriate.</li> </ul> <p><u>Crash Fire Rescue:</u></p> <ul style="list-style-type: none"> <li>▪ Initiate Incident Command System.</li> <li>▪ Notify dispatch of command post and staging locations.</li> </ul> |

**Step 7: List Expected Actions (Continued)**

Generally speaking, every detailed event results in one or more expected actions from various organizations. When you prepare a list of expected actions:

- List only those that involve the participating organizations (those identified in the exercise scope and statement of purpose).
- List expected actions for all exercise participants. (It is not necessary that each detailed event generate responses from all participants.)

Activity

**Activity: Write Major and Detailed Events**

*First, review the objectives that you developed earlier. With these objectives in mind, write two major events. Then, complete the Expected Actions Planning Sheet that follows. (This sheet is also provided as Job Aid 11.)*

| Events                                                              |
|---------------------------------------------------------------------|
| <b>Major Event #1:</b><br><br><br><br><br><br><br><br><br><br>      |
| <b>Detailed Events:</b><br><br>1.<br><br><br>2.<br><br><br><br><br> |
| <b>Major Event #2:</b><br><br><br><br><br><br><br><br><br><br>      |
| <b>Detailed Events:</b><br><br>1.<br><br><br>2.<br><br><br><br><br> |

**Note:** Leave the objectives # column blank for now.

## **Step 8: Prepare Messages**

Messages are used to communicate detailed events to exercise participants. One message may represent an event, or several messages may be needed to notify the participants of the event. Messages serve one purpose: To evoke a response—that is, to cause exercise participants to make decisions and take actions that meet the exercise objectives.

In a full-scale exercise, the controller may input prescribed messages into the action. Participants receiving the messages make decisions or take action as they would in a real emergency.

### **Transmitting Messages**

Messages can be transmitted in various ways, including:

- Landline telephone.
- Cellular telephone.
- Radio.
- In person.
- Written note.
- Fax.

When transmitting messages in functional or full-scale exercises, try to use the method of transmission that would be most likely in an actual emergency.

### **Credibility**

However messages are delivered, they must come from a credible source and be delivered through credible channels.

**Example:** If the participants are in the EOC, a message from John Q. Public to the EOC from an unlisted number would not be credible. However, the call could go to dispatch or to someone's secretary and the information could then be relayed to the EOC.

**Step 8: Prepare Messages (Continued)**

**Relationship to Expected Actions**

Messages have a direct relationship to expected actions. Each message is designed to generate one or more expected actions. The following example, begun earlier, lists some ideas for messages that could achieve the expected actions.

| <b>Example: Objective and Expected Actions</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Function</b>                                | Coordination and communication among the airport and the jurisdiction’s emergency systems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Objective</b>                               | Upon notification that a crash is imminent, response units will stage within 3 minutes, according to SOPs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Event</b>                                   | Landing of disabled aircraft is imminent.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Expected Actions</b>                        | <p><u>Airport Control Tower:</u></p> <ul style="list-style-type: none"> <li>▪ Notify police, fire, medical personnel to proceed to airport.</li> <li>▪ Alert hospitals of potential mass casualty incident.</li> </ul> <p><u>Dispatch Center:</u></p> <ul style="list-style-type: none"> <li>▪ Alert police, fire, and medical supervisors.</li> </ul> <p><u>Hospital:</u></p> <ul style="list-style-type: none"> <li>▪ Notify other medical facilities as appropriate.</li> </ul> <p><u>Crash Fire Rescue:</u></p> <ul style="list-style-type: none"> <li>▪ Initiate Incident Command System.</li> <li>▪ Notify dispatch of command post and staging locations.</li> </ul> |
| <b>Possible Messages</b>                       | <ul style="list-style-type: none"> <li>▪ Radio call from plane to tower.</li> <li>▪ Tower calls police, fire, rescue.</li> <li>▪ Plane requests runway be designated.</li> <li>▪ Call from hospital requesting information.</li> <li>▪ Calls to dispatch from media.</li> <li>▪ Degrading radio communications with plane.</li> <li>▪ Pilot feels major vibrations/noise on the plane.</li> </ul>                                                                                                                                                                                                                                                                           |

**(Note:** Job Aid 12 in Appendix A provides a worksheet for planning messages to generate expected actions.)

## Step 8: Prepare Messages (Continued)

### Message Variables

Messages—whether simple or complex—have four main variables, which are listed in the table below. Not all variables will be explicitly stated in every message, but they should be kept in mind as you write because these variables form the classic definition of communication:

*Who sends what to whom, with what effect.*

| <b>Message Variables</b>                                                              |                                                                                                                         |
|---------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>▪ <b>Message source (WHO):</b></li> </ul>      | Who sends the message (must be a credible source).                                                                      |
| <ul style="list-style-type: none"> <li>▪ <b>Transmission method (HOW):</b></li> </ul> | How the message is transmitted (must be a credible means of transmission).                                              |
| <ul style="list-style-type: none"> <li>▪ <b>Message content (WHAT):</b></li> </ul>    | Information conveyed. (Does the message contain the information needed by the recipient to make a decision?)            |
| <ul style="list-style-type: none"> <li>▪ <b>Recipient (TO WHOM):</b></li> </ul>       | Who should receive the message. (Who would credibly receive it, and who ultimately needs to receive it to take action?) |
| <p>All of these variables will influence the action taken (to what EFFECT).</p>       |                                                                                                                         |

Some message examples are given on the next page.

**Step 8: Prepare Messages (Continued)****Message Examples**

From: Police

To: EOC Police Staff

Cab door of trailer truck has been forced open and driver has been removed. Shipping papers indicate hydrochloric acid being transported. Acid flowing into sewers. Attempts to open rear trailer door ongoing.

From: Environmental Protection  
(Field)

To: EOC Environmental Staff

Resident managers of apartments in area request information concerning safety of drinking water, water in swimming pools, and dwellings after evacuees are allowed to return to homes.

From: EOC Fire Staff

To: Fire/Rescue Communications

Weather Service reports winds in an east-northeast direction at 10 to 15 mph with gusts of 20 to 25 mph. Forecast for continued rain with possible thunderstorms with strong gusting winds of up to 45 mph during the storm. Current temperature: 82 degrees.

From: Chemical Facility Safety Officer

To: Fire Dept. HazMat Team Leader

The supervisor responsible for shutting off chemical valves in a plant area near the fire has not reported in. It is unknown whether the valves have been shut off and whether the person has evacuated.

From: Betsy Ames

To: Township Fire PIO

My name is Betsy Ames. I'm a reporter for the Daily Express News. Can you give me a flood situation report for Hamilton, Jordan, Kemper, and the lakes in this area?

**Step 8: Prepare Messages (Continued)**

**Message Format**

Exercise designers often use a standardized form with spaces for the four variables: To, From, Method, and Content. A standard message form may also have spaces for message number, the time that the message is to be delivered, and the action to be taken. A sample messages format is shown below and appears as Job Aid 13 in Appendix A.

|                                 |          |          |
|---------------------------------|----------|----------|
| EMERGENCY EXERCISE<br><MESSAGE> |          |          |
| TO:                             | METHOD   | FROM:    |
| <br><br>                        | <br><br> | <br><br> |
| NO:                             | TIME:    |          |
| <br>                            | <br>     |          |
| CONTENT: _____                  |          |          |
| _____                           |          |          |
| _____                           |          |          |
| _____                           |          |          |
| ACTION TAKEN: _____             |          |          |
| _____                           |          |          |
| _____                           |          |          |
| _____                           |          |          |

## Step 8: Prepare Messages (Continued)

### Spontaneous Messages

The majority of exercise messages in a functional exercise will be prescribed. And in the course of designing a functional exercise, it is a good idea to try to anticipate things that might go wrong and to provide the controller and simulators with ideas about ways to handle those situations.

However, in an actual exercise activity, the participants don't always respond as you expect them to. Then, it becomes necessary for the controller and simulators to improvise. Usually, the controller will decide on an appropriate response. But if the action is intense, the simulators may also have to make quick decisions and ad lib. If the controller and simulators are familiar with the scenario and objectives, their spontaneous messages can still fulfill the purposes of the exercise.

### Composing a Message

- In composing a message, begin with an expected action.
- Think about who could send a message and what that person could say to motivate the expected action.
- Think about the four message variables:
  - Who would credibly send the message?
  - How will the message be transmitted?
  - Who will receive the message? If not the decision maker, where would the message be redirected?
  - Does the message provide all of the information needed to make a decision?
- Keep it realistic.
- Practice with the messages. Read them through with someone who is familiar with the organization involved. Does the message motivate the expected action? If it does, then you probably have a successful message.

Activity

### Activity: Compose a Message

Select one of the expected actions you listed in the last activity and compose a message that would generate the selected action. You can use the message form provided below. In your message, complete the following items:

- *To*
- *Method*
- *From*
- *Content*

|                                              |                                                 |                                                |
|----------------------------------------------|-------------------------------------------------|------------------------------------------------|
| <b>EMERGENCY EXERCISE</b>                    |                                                 |                                                |
| <b>&lt;MESSAGE&gt;</b>                       |                                                 |                                                |
| TO: <input style="width: 95%;" type="text"/> | METHOD <input style="width: 95%;" type="text"/> | FROM: <input style="width: 95%;" type="text"/> |
| NO: <input style="width: 95%;" type="text"/> | TIME: <input style="width: 95%;" type="text"/>  |                                                |
| CONTENT: _____                               |                                                 |                                                |
| _____                                        |                                                 |                                                |
| _____                                        |                                                 |                                                |
| _____                                        |                                                 |                                                |
| ACTION TAKEN: _____                          |                                                 |                                                |
| _____                                        |                                                 |                                                |
| _____                                        |                                                 |                                                |
| _____                                        |                                                 |                                                |

**Pulling It Together: The Master Scenario of Events List**

During a functional exercise, a Master Scenario of Events list is often used to monitor the progress of the exercise to keep it on schedule and on track. This chart (a list of events, time of occurrence, and expected actions) provides a picture of the whole exercise that is essential to the controller and helpful to simulators. The list should NOT be shown to the participants.

**(Note:** Job Aid 14 in Appendix A provides an MSEL worksheet. A partial example is shown below.)

| <b>Sample Master Scenario of Events List</b> |                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------------------------|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Time</b>                                  | <b>Message/Event</b>                                               | <b>Expected Actions</b>                                                                                                                                                                                                                                                                                                                                                                                                              |
| 07:35                                        | Plane radios tower: losing engine power and altitude.              | <ol style="list-style-type: none"> <li>1. | 08:00                                        | Media call dispatch requesting information.                        | (etc.)                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Alternatives to Self-Developed Exercises

In addition to developing exercises as described in this course, there are two other ways to prepare for an emergency management exercise:

- **Exercise-based training courses.** FEMA sponsors the *Integrated Emergency Management Course* (IEMC). Over a period of several days, this course accomplishes at least five important emergency management objectives: Agency-specific briefings; minipreparatory exercises; multiagency, real-time exercise; creation of a teamwork environment; and participant critique.
- **Prepackaged exercises.** FEMA and many State and local governments have developed a wide variety of exercise packages that may reduce the design time and effort. The available exercise incidents include natural (e.g., weather-related) emergencies, hazardous materials incidents, terrorist scenarios, and others. These materials must be tailored to fit the specific needs and characteristics of your jurisdiction or organization. Therefore, you should review them carefully and adapt them before using them in your community.

## Summary and Transition

Unit 4 explained the eight-step design process. The next three units will provide more detailed information about designing and implementing specific types of exercises: Tabletop, functional, and full-scale exercises.

## Knowledge Check

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.*

1. Which of the following is an example of a good exercise objective?
  - a. To improve the number of accurate messages transmitted by the police to the communications center.
  - b. At the time the evacuation notice is received, the EOC policy and coordination groups will examine the needs of schools and other special facilities and organize notification according to SOPs.
  - c. Proper procedures to declare a disaster or ask for outside aid will be taken.
  - d. Interaction with other jurisdictions will be demonstrated.
  
2. An objective should specify the level of performance, so that results are observable.
  - a. True
  - b. False
  
3. Which of the following verbs would be most useful in an objective?
  - a. Know
  - b. Be aware of
  - c. Appreciate
  - d. Notify
  
4. The narrative:
  - a. Sets the stage for later action.
  - b. Lists all of the events that will occur in the exercise.
  - c. Provides the master scenario of events list and expected actions.
  - d. Explains the objectives of the exercise.
  
5. The scope:
  - a. Sets the mood for the exercise.
  - b. Establishes the limits of the exercise.
  - c. States the objectives of the exercise.
  - d. Lists the financial and human resources required to run the exercise.

**Knowledge Check (Continued)**

6. A convincing, unified scenario requires:
  - a. 10 major events and approximately 100 detailed events.
  - b. Messages written in a way that will not allow unexpected responses to occur.
  - c. The players having knowledge of the events in advance.
  - d. Careful scripting of events.
7. Every major event should require an action from all participants involved in the exercise.
  - a. True
  - b. False
8. Deferring action until later might be a valid action to take in response to a message.
  - a. True
  - b. False
9. In most exercises, the best way to deliver messages is in writing, using a standard form.
  - a. True
  - b. False
10. A \_\_\_\_\_ is a useful tool to help the controller keep the exercise on track and on schedule.
  - a. Message form
  - b. Narrative
  - c. Master scenario of events list
  - d. Exercise directive

**Answers**

**Knowledge Check (Continued)**

1. b
2. a
3. d
4. a
5. b
6. d
7. b
8. a
9. b
10. c

**Unit 5: The Tabletop  
Exercise**

## **Introduction**

Now that you have the “big picture” of the exercise process and the steps in designing an exercise, you’re ready to take a closer look at specific kinds of exercises. This unit focuses on the tabletop exercise.

First, we’ll review how a tabletop exercise works and the role of the facilitator. At some point you will probably be called upon to serve in this role, so we will discuss some guidelines for successfully facilitating a tabletop exercise. Finally, we’ll examine how the design steps you learned in the previous unit are applied to this type of exercise.

## **Unit 5 Objectives**

After completing this unit, you should be able to:

- Describe the purposes and characteristics of a tabletop exercise.
- Describe the steps in facilitating a tabletop exercise.

## **Characteristics of the Tabletop Exercise**

As learned in Unit 2, a tabletop exercise simulates an emergency situation in an informal, stress-free environment. The participants—usually people on a decision-making level—gather around a table to discuss general problems and procedures in the context of an emergency scenario. The focus is on training and familiarization with roles, procedures, or responsibilities.

**Characteristics of the Tabletop Exercise (Continued)**

**Purpose**

The tabletop is largely a discussion guided by a facilitator (or sometimes two facilitators who share responsibilities). Its purpose is to solve problems as a group. There are no simulators and no attempts to arrange elaborate facilities or communications. One or two evaluators may be selected to observe proceedings and progress toward the objectives.

The success of a tabletop exercise is determined by feedback from participants and the impact this feedback has on the evaluation and revision of policies, plans, and procedures.

**Advantages and Disadvantages**

The tabletop exercise is a very useful training tool that has both advantages and disadvantages, as summarized in the following table.

| <b>Advantages and Disadvantages of Tabletop Exercises</b> |                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Advantages</b>                                         | <ul style="list-style-type: none"> <li>▪ Requires only a modest commitment in terms of time, cost, and resources.</li> <li>▪ Is an effective method for reviewing plans, procedures, and policies.</li> <li>▪ Is a good way to acquaint key personnel with emergency responsibilities, procedures, and one another.</li> </ul>      |
| <b>Disadvantages</b>                                      | <ul style="list-style-type: none"> <li>▪ Lacks realism and thus does not provide a true test of an emergency management system's capabilities.</li> <li>▪ Provides only a superficial exercise of plans, procedures, and staff capabilities.</li> <li>▪ Does not provide a practical way to demonstrate system overload.</li> </ul> |

## How a Tabletop Works

In many respects, a tabletop exercise is like a problem-solving or brainstorming session. Unlike a functional exercise, problems are tackled one at a time and talked through without stress.

### Problem Statements and Messages

A tabletop is not tightly structured, so problem statements can be handled in various ways:

- The facilitator can verbally present general problems, which are then discussed one at a time by the group.
- Problems can be verbally addressed to individuals first and then opened to the group.
- Written detailed events (problems) and related discussion questions can be given to individuals to answer from the perspective of their own organization and role, then discussed in the group.
- Another approach is to deliver prescribed messages to players. The facilitator presents them, one at a time, to individual participants. The group then discusses the issues raised by the message, using the EOP or other operating plan for guidance. The group determines what, if any, additional information is needed and requests that information. They may take some action if appropriate.
- Occasionally, players receiving messages handle them individually, making a decision for the organization they represent. Players then work together, seeking out information and coordinating decisions with each other.

Some facilitators like to combine approaches, beginning the exercise with general problems directed to key individuals and then passing out messages one at a time to the other players.

**Handling Problems:** It is usually wise to take the time to resolve problems, rather than hurry from one problem or message to the next, even though players sometimes will want to bypass the tough problems.

## **How a Tabletop Works (Continued)**

### **Facilities and Materials**

It is recommended that the EOC or other operations center be used for the tabletop exercise, for two reasons:

- It provides the most realistic setting.
- Needed plans, displays, and maps are available on the premises.

Any conference facility that will comfortably accommodate the expected number of participants in a face-to-face setting will be adequate, however.

The number of participants and the scenario will determine the number and arrangement of tables for the exercise. Some facilitators like to arrange small groups around separate tables. Others prefer a U-shaped layout.

Provided reference materials should include emergency plans, maps, and other reference materials that would normally be available in the EOC.

## **Facilitating a Tabletop Exercise**

A tabletop exercise provides a relaxed environment of team problem solving. While functional and full-scale exercises are interactive, a tabletop is managed by a facilitator. The facilitator has a number of responsibilities, including:

- Setting the stage (e.g., introducing the narrative).
- Involving everyone—stimulating discussion and drawing answers and solutions from the group (rather than supplying them).
- Facilitating in-depth problem solving.
- Controlling the pace and flow of the exercise and distributing messages.

## Facilitating a Tabletop Exercise (Continued)

The facilitator must have good communication skills and be well informed on local plans and organizational responsibilities. Although the facilitator can be thought of as a discussion leader, the role can be much more broad. The following are some guidelines for facilitating a tabletop exercise.

### Setting the Stage

The opening remarks and activities influence the whole experience. Players need to know what will happen and to feel comfortable about being there. Below are some guidelines for setting the stage for a successful tabletop exercise.

#### Guidelines for Setting the Stage

- **Welcome.** Begin by sincerely welcoming participants and putting them at ease.
- **Briefing.** Brief the participants about what will happen. This includes a clear explanation of:
  - Purposes and objectives.
  - Ground rules.
  - Procedures.
- **Narrative.** Start the exercise by reading (or having someone read) the narrative and introducing the first problem or message.
- **Ice Breaker.** Try breaking the ice by beginning with a general question directed at one or two high-ranking officials or to the group as a whole. Later, other problem statements or messages can be addressed to other individuals or organizations.

## Facilitating a Tabletop Exercise (Continued)

### Involving Everyone

It is important that everyone participates and that no one person or organization dominates the discussion. Tips for involving all of the participants are summarized below.

#### **Ways to Involve All of the Participants**

- Organize the messages so that all organizations must deal with a question or problem.
- Give extra encouragement to those who are a little reticent.
- Avoid the temptation to jump in with the right solutions when players are struggling. This will often hamper the discussion. Instead, try to draw out the answers from the players. They will be more likely to participate if they feel people are listening intently and sympathetically.
- Model and encourage the behaviors you want from the participants:
  - Give eye contact.
  - Acknowledge comments in a positive manner.

### In-Depth Problem Solving

The purpose of tabletop exercises is usually resolving problems or making plans as a group. That means going after real solutions—not superficialities.

Some facilitators make the mistake of trying to move too fast through the scenario, believing that they have to meet all of the objectives and get through all of the messages. However, that is not a good approach if nothing gets settled.

Remember: If you spend all the time on one big problem, maintain interest among players, and reach consensus, then the tabletop is a success! *Push the players past superficial solutions.* A few carefully chosen, open-ended questions can keep the discussion going to its logical conclusion.

## Facilitating a Tabletop Exercise (Continued)

### Controlling and Sustaining Action

To maintain a high level of interest and keep everyone involved, the facilitator needs to control and sustain the action. There are several ways to do this.

#### Ways to Control and Sustain Action

- **Use multiple event stages.** Develop the scenario narrative in event stages. (For example, the initial narrative may involve warning. A later one could deal with search and rescue.) Then, as discussion begins to fade on one issue, introduce the next segment.
- **Vary the pace.** Add or delete problem statements and messages to alter the speed of the action. Occasionally give two messages at the same time to increase pace and interest.
- **Maintain a balance.** Maintain a balance between overly talking about a problem to death and moving along so fast that nothing gets settled. Don't hesitate to control the exercise tightly!
- **Watch for signs of frustration or conflict.** Always remember that the tabletop is basically training, not testing. People may come with fragile egos and little exercise experience. If you see mounting frustration or conflict, stop the exercise. Reach into your experience as a discussion leader to help the players resolve conflicts and feel comfortable.
- **Keep it low-key.** Avoid a bad experience by keeping in mind the low-key nature of the tabletop.

Activity

### **Activity: Your Ideas for Facilitating a Tabletop**

*You have read about many techniques for facilitating a tabletop exercise. But group facilitation styles and techniques are as varied as the facilitators who use them, and you may have some additional ideas about group techniques that would help you facilitate a successful tabletop exercise. Jot your ideas below.*

**Setting the Stage:**

**Involving Everyone:**

**In-Depth Problem Solving:**

**Controlling and Sustaining Action:**

## Designing a Tabletop Exercise

The eight-step process outlined in Unit 4 is used to design a tabletop exercise:

1. Assess needs.
2. Define the scope.
3. Write a purpose statement.
4. Define objectives.
5. Compose a narrative.
6. Write major and detailed events.
7. List expected actions.
8. Prepare messages.

You can use the job aids provided in Unit 4. For a tabletop exercise, however, the process can be somewhat simplified. Because a tabletop is only partially simulated, it requires little scripting. The only roles are the facilitator, the participants (who respond in their real-life roles), and one or two recorders. Recorders take minutes and record decisions and usually do not need formal evaluation forms.

### Applying the Design Steps

The first four steps are handled just as described in Unit 4. The remaining steps can be simplified as follows:

- **Narrative:** The tabletop narrative is sometimes shorter. It is nearly always given to the players in printed form, although it can be presented on TV or radio. When the purpose of the tabletop is to discuss general responses, the narrative can be presented in parts, with a discussion of problems after each part.

### Designing a Tabletop Exercise (Continued)

- **Events:** The events should be closely related to the objectives of the exercise. Most tabletop exercises require only a few major or detailed events, which then can easily be turned into problem statements.
- **Expected actions:** A list of expected actions is useful for developing both problem statements and messages. It is always important to be clear about what you want people to do. However, in a tabletop, sometimes the “expected action” will be a discussion that will eventually result in consensus or ideas for change.
- **Messages:** A tabletop can succeed with just a few carefully written messages or problem statements. As always, messages should be closely tied to objectives and should be planned to give all participants the opportunity to take part.

The messages might relate to a large problem (almost like an announcement of a major event) or a smaller problem, depending on the purpose of the exercise. Usually they are directed to a single person or organization, although others may be invited to join in the discussion.

#### Message Example

**General Problem Statement:**

During a relocation process, what do you feel is needed for the support of your functions?

**Specific Message:**

A call from Southside Nursing Home: They do not have enough transportation for all of their patients.

**How many messages?** It is a good idea to write a few more messages than you think you will need. If messages are carefully thought through, however, they will create a rather lengthy discussion. It's better to have 10 or 15 good messages than 20 or 30 hastily written ones.

**(Note:** A job aid for designing and facilitating a tabletop exercise is provided on the next page and also appears as Job Aid 15 in Appendix A.)

## Designing a Tabletop Exercise (Continued)

### Tabletop Exercise Checklist

#### Design

- Needs assessment, scope, statement of purpose, and objectives developed
- Narrative:
  - May be shorter
  - Presented all at once or incrementally
- Events:
  - Limited number
  - Presented as problem statements
- Expected actions:
  - May involve identification of appropriate responses, identification of gaps in procedures, reaching group consensus, developing ideas for change, etc.
- Messages:
  - Limited number (e.g., 10-15)
  - Involve everyone
  - Tied to objectives

#### Facilitation

- Welcome participants
- Briefing:
  - Purpose and objectives
  - Ground rules and procedures
- Narrative presentation (printed, verbal, TV, radio)
- Ice breaker questions directed at high-ranking officers
- Messages organized to involve all organizations
- Strategies to encourage the reticent
- Facilitate—don't dominate
- Model positive behaviors (eye contact, positive reinforcement)
- Aim for in-depth problem solving
- Strategies for sustaining action
  - Multiple event stages
  - Varied pace
  - Balanced pace
  - Conflict resolution
  - Low-key atmosphere

## Designing a Tabletop Exercise (Continued)

### Exercise Examples

Examples of two approaches to tabletop exercises—“scenario development” and “single narrative with messages”—are provided in the activities that follow. Review the plans carefully for similarities and differences.

A third approach is illustrated in the sample tabletop exercise provided in the *Exercise Design* Tool Box in the “Samples” Directory. In this exercise program, local governments in a jurisdiction conduct concurrent tabletop exercises and report their actions via situation reports, Emergency Management Exercise Reporting System (EMERS) forms, and Participant Narrative Summary forms. The local exercises are followed by a regional exercise based on outcomes from the local exercises.

Activity

**Activity: Develop Problem Statements**

*The following example illustrates one tabletop exercise design approach—the “scenario development” approach. The goal of this exercise (based on an earthquake scenario) is to generate general solutions to problems. To accomplish this, it presents the narrative in sections, with each section followed by a few problem statements. The facilitator would have participants discuss each problem statement until reasonable solutions have been reached, then proceed to the next narrative section and its accompanying problem statements.*

*Review the sample plan. Problem statements for the third narrative section have been omitted. In the spaces provided, develop two problem statements related to the third narrative section that would help achieve the objectives of the exercise.*

**Tabletop Plan: Example 1 (Scenario Development Approach)**

**Organization:** Department of Management Services

- Objectives:**
1. Heighten awareness of city plan and standard operating procedures.
  2. Identify and prioritize response activities.
  3. Identify plans, policies, and procedures which are specific for this department and its various divisions.
  4. Identify resources available to the department team.
  5. Identify critical operations.

**Participants:** Department Level

- Department of Management Services; Department Director
- Assistant to Mayor
- City Treasurer

Division Level

- Division of Human Resources Management
- Division of Labor Relations
- Division of Accounting
- Division of Budget
- Treasurer
- Division of Purchasing
- City Recorder

**Activity: Develop Problem Statements (Continued)****Tabletop Plan: Example 1 (Continued)****Scenario Development 1 (Narrative, Part 1)**

It is 9:00 a.m. on Tuesday, January 15. You have just felt a moderate earthquake as you worked at your desk in the City Office Building. You hide under your desk as plaster and glass flew around your office. After the shaking had stopped, you left the building from the nearest exit. Everyone is shocked, but apparently there are no serious injuries. You see several cracks in the rock fascia and wonder whether it is safe to reenter the building. Your assistant comes up to you and tells you that he could not get a dial tone on his phone before exiting the building. Near panic, he asks these questions: "What do we do? How do we get help? How do we call the emergency command center? How bad do you think the quake is?"

It occurs to you that these are questions that need to be answered.

**Problem Statements:**

- A. As Division heads, what are our primary and secondary priorities and responsibilities? What are the time constraints on these activities?
- B. As a Department Command Team, what are our priorities and responsibilities?
- C. How is this department prepared to sustain division support/activity throughout a lengthy response? What about shifts for the command post members?

**Scenario Development 2 (Narrative, Part 2)**

Because of possible structural damage to the building, the group decides to relocate the Department Command Post to \_\_\_\_\_. It appears that the earthquake was not too severe; however, it will require a serious effort to keep the department services available and respond to the city's needs. Since the City Command Post is expecting the department to be located at the City Office Building in Roger Brown's office, it is necessary to discuss what to do and how to do it.

**Problem Statements:**

- A. If there is damage to this building, how do we select where we will relocate?
- B. Roger Brown, at the City EOC, has to know of your whereabouts. How do you contact him at the City EOC to let him know where you are relocating? If radios are used, where did they come from? Are they operational?
- C. During a relocation process, what do you feel as a team is needed for the support of your functions (administrative support, personnel, facilities, etc.)?

**Activity: Develop Problem Statements (Continued)****Tabletop Plan: Example 1 (Continued)****Scenario Development 3 (Narrative, Part 3)**

It is now 1½ days since the earthquake. None of you have been able to go home. Because of debris removal, all of the city response agencies, including public works, have been working almost nonstop. You hear of a street worker who was injured falling out of a tree while cutting down a broken branch. Also, last night a secretary complained that she was doing purchasing/contract procurement while only being paid as a secretary. She joked with her supervisor, but Frank was alerted to this concern by the supervisor for policy guidance.

**Problem Statements:** (Develop your problem statements in the spaces below.)

A.

B.

**Note:** The scenario may continue through two or three more problem areas. The problem statements need not be addressed in sequence.

**Activity: Develop Problem Statements (Continued)**

**Suggested Answers**

A wide variety of problem statements could be developed based on the provided narrative section. Below are two examples. Yours will probably be different, but they should reinforce the exercise objectives given at the beginning of the example.

**Examples of Problem Statements:**

- A. Does this body have the power to make policy decisions with regard to contract violation, shift problems for extended response periods, and injuries related to personnel performing functions outside their normal duties? Have liability issues been fully addressed?
- B. What plan is in place to assist city responders (this group included) with family information assistance to reduce the stress of employees not knowing how their families are?

Activity

**Activity: Develop a Tabletop Exercise Message**

*The following example illustrates another tabletop exercise design approach—a single narrative with messages. This plan focuses the participants on more specific responses to problems through the use of printed messages. The facilitator would present the entire narrative, then distribute the messages to specific players for discussion.*

*Review the plan. Imagine that your organization is included among the players. In the space provided, develop a message related to a communications issue that would affect your organization’s ability to meet the stated objectives of the exercise.*

**Tabletop Plan: Example 2 (Message Approach)**

**Objectives:** Participants will demonstrate the ability to:

1. Coordinate effective evacuation.
2. Establish and maintain shelters for evacuees.
3. Coordinate round-the-clock field operations.
4. Ascertain safety levels needed to allow reentry into affected areas.

**Players:**

- City/County Manager
- Emergency Manager
- Law Enforcement Representative
- Fire Services Representative
- Health/Environmental Representative
- Public Works Director
- Public Information Officer
- Volunteer Shelter Coordinator

**Narrative:**

Steady rain has been falling in the region due to a moisture-laden low pressure system. Early into the storm, a Flood Watch was issued by the National Weather Service (NWS). Within 10 hours after the rain began to fall, the NWS issued a Flood Warning for low-lying areas along small streams. Some roads had to be closed and a small number of residents had to be evacuated along overflowing streams located northwest of the city.

Sixteen hours have elapsed since the rain began. Based on reports from designated citizens with rain gauges, total rainfall across the jurisdiction ranges from 4.1 to 4.7 inches. The soil has reached the saturation point, causing extensive runoff. Designated river spotters, water level gauges, and/or electronic river rise warning devices indicate that the river has risen to a dangerous level.

The 24-hour forecast calls for continued rainfall, with a clearing trend possible. Based on these data, the NWS issues a Flood Warning for areas along the river basin. Police report additional road closings due to high water, and a couple dozen more residents have been evacuated. Water levels are rising steadily, as a driving rain continues to fall. It is now 3:00 p.m. The EOC has been opened and the staff has been assembled.

**Activity: Develop a Tabletop Exercise Message (Continued)**

**Tabletop Plan: Example 2 (Continued)**

**Messages:**

Message # 1 Time 4:15 pm  
 To: Public Works  
 From: Water Treatment Plant

Water continues to rise. River approaching flood stage. Debris is piling up at bridges. Water is now to top step of plant.

Message # 2 Time 5:00 pm  
 To: Police Chief  
 From: Police Officer

Motorists stranded in high water along Riverside Drive, south of bridge. They are on top of their cars in about 3 feet of water. The water is rising and moving faster.

Message # 3 Time 5:30 pm  
 To: Fire Chief  
 From: Battalion Chief

House on Nelson Drive contains 6 children under age 4, babysitter is only 11. They are in an upstairs bedroom. Water is over 2 feet deep in house. The sitter refuses to let the kids leave until the mother returns.

Message # 4 Time 6:45 pm  
 To: Public Works  
 From: Public Works Crew

Heart attack victim in River Oaks. Ambulance cannot get to him because of high water.

Message # 5 Time 7:30 pm  
 To: Dispatch  
 From: Citizen

Power line down near the Riverside City Park. One person appears dead, at least 3 others trapped in vehicles. Water is rising rapidly.

Message # 6 Time 7:30 pm  
 To: Emergency Manager  
 From: Dispatch

Switchboard and dispatch are overwhelmed. We are short of replacement personnel.

Message # 7 Time 8:45 pm  
 To: Volunteer Coordinator  
 From: Incident Coordinator

Emergency workers have been on job for many hours. They are in need of food and refreshments.

Message # 8 Time 11:00 pm  
 To: Public Information Officer  
 From: Public Utilities

Many parts of the city have lost power and telephone service, including many city agencies. Utilities do not know which agencies need repair first. Setting priorities is difficult.

### Summary and Transition

This unit provided an overview of the tabletop exercise: how it works, how to facilitate one, and how to design one using the eight design steps. Unit 6 will provide a similar overview of the functional exercise.

## Knowledge Check

Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.

1. A tabletop exercise:
  - a. Involves a controller, players, and evaluators.
  - b. Is an informal discussion guided by a facilitator.
  - c. Requires a formal evaluation to determine its success.
  - d. Must achieve all of the stated objectives to be considered a success.
  
2. A tabletop exercise:
  - a. Provides a true test of an emergency management system's capabilities.
  - b. Provides a practical way to demonstrate system overload.
  - c. Is an effective method for reviewing plans, procedures, and policies.
  - d. Is better suited for field operations personnel than planners and policy makers.
  
3. In a tabletop exercise, problems can be addressed to individuals, the group, or both.
  - a. True
  - b. False
  
4. It is more important to engage in in-depth problem solving than to meet all objectives and get through all of the problem statements.
  - a. True
  - b. False
  
5. If possible, a tabletop exercise should be run:
  - a. At several field locations to simulate a real emergency.
  - b. At a selected field location where an incident might occur.
  - c. At a central location such as an operations center.
  - d. As a teleconference.
  
6. An important part of the facilitator's job is to:
  - a. Maintain an even pace and consistent approach.
  - b. Adhere to a highly structured agenda.
  - c. Sustain action and keep everyone involved.
  - d. Make sure the entire set of problem statements is discussed.

**Knowledge Check (Continued)**

7. Most tabletop exercises:
  - a. Require 50 to 100 detailed events.
  - b. Are designed without identifying expected actions.
  - c. Use general discussion in place of problem statements and messages.
  - d. Require only a few major or detailed events.
  
8. The first four steps of the eight-step design process can be omitted when developing tabletop exercises.
  - a. True
  - b. False
  
9. Introducing multiple event stages is a good way to keep the action moving in a tabletop exercise.
  - a. True
  - b. False
  
10. A tabletop exercise should be:
  - a. Low-key.
  - b. Highly stressful.
  - c. Formal and highly structured.
  - d. Narrowly focused on field operations.

**Unit 6: The Functional  
Exercise**

## **Introduction**

This unit focuses on the functional exercise. We will look closely at the characteristics of the functional exercise—how it differs from the tabletop, who participates, how it works, and key design considerations. This unit is pivotal, because later in the course you will develop a functional exercise based on what you have learned here.

## **Unit 6 Objectives**

After completing this unit, you should be able to:

- Describe the purpose and characteristics of a functional exercise.
- Explain how designing a functional exercise differs from designing a tabletop exercise.
- Describe the physical requirements and participant roles in a functional exercise.

**What Is a Functional Exercise?**

The functional exercise simulates an emergency in the most realistic manner possible, short of moving real people and equipment to an actual site. As the name suggests, its goal is to test or evaluate the capability of one or more **functions** in the context of an emergency event.

It is important not to confuse “functional exercises” with emergency “functions.” All exercises (tabletop, functional, and full-scale) test and evaluate functions contained in the Emergency Operations Plan (EOP). In this course, “functions” refers to actions or operations required in emergency response or recovery. The thirteen functions recognized by FEMA were introduced earlier, in Unit 1, are:

- Alert Notification (Emergency Response).
- Warning (Public).
- Communications.
- Coordination and Control.
- Emergency Public Information.
- Damage Assessment.
- Health and Medical Individual/Family Assistance.
- Public Safety.
- Public Works/Engineering.
- Transportation.
- Resource Management.
- Continuity of Government.

The key characteristics of functional exercises were discussed in Unit 2. You may wish to refer back to that discussion now. Below is a brief summary of the main points.

| <b>Key Characteristics</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>▪ Interactive exercise, designed to challenge the entire emergency management system. Can test the same functions and responses as in a full-scale exercise without high costs or safety risks. Usually takes place in an EOC or other operating center.</li> <li>▪ Involves controller(s), players, simulators, and evaluators.</li> <li>▪ The atmosphere is stressful and tense because of real-time action and the realism of the problems.</li> <li>▪ Exercise is lengthy and complex; requires careful scripting, careful planning, and attention to detail.</li> <li>▪ Geared for policy, coordination, and operations personnel (the players).</li> <li>▪ Players practice their response to an emergency by responding in a realistic way to carefully planned and sequenced messages given to them by simulators.</li> <li>▪ Messages reflect a series of ongoing events and problems.</li> <li>▪ All decisions and actions by players occur in real time and generate real responses and consequences from other players. Guiding principle: Imitate reality.</li> </ul> |

## What Is a Functional Exercise? (Continued)

### Best Uses

The functional exercise makes it possible to test the same functions and responses as would be tested in a full-scale exercise, without the high costs or safety risks. The functional exercise is well-suited to assess the:

- Direction and control of emergency management.
- Adequacy of plans, policies, procedures, and roles of individual or multiple functions.
- Individual and system performance.
- Decision-making process.
- Communication and information sharing among organizations.
- Allocation of resources and personnel.
- Overall adequacy of resources to meet the emergency situation.

Activity

**Activity: Compare Tabletop and Functional Exercises**

*In the following table, compare tabletop and functional exercises by writing a brief description in each of the cells.*

|                                     | <b>Tabletop</b> | <b>Functional</b> |
|-------------------------------------|-----------------|-------------------|
| <b>Degree of Realism</b>            |                 |                   |
| <b>Format/Structure</b>             |                 |                   |
| <b>Atmosphere</b>                   |                 |                   |

### Participant Roles

As noted earlier, the functional exercise involves players, simulators, a controller, and evaluators. In a small jurisdiction or organization, one or two people may serve as controller, simulator, and evaluator. In larger jurisdictions, many more people will be necessary.

Let's take a closer look at what is involved in each role and how participants are selected.

### Players

The players in a functional exercise are people who hold key decision-making or coordinating positions and would normally function in the operations center.

By operations center, we mean the central location that is designated in a real emergency for policy decisions, coordination, control, and overall planning. For a governmental jurisdiction, it would be the EOC; for a volunteer agency or private sector entity, it would be the central location from which key decision makers operate in an emergency situation.

**Decision makers.** Key decision makers would normally include leaders in government and key responding organizations: The mayor or other chief executive, and chiefs and coordinators of emergency services such as Fire, Police, EMS, Public Information Officer (PIO), and so on. In a nongovernmental organization, the CEO and other organizational leaders would participate.

**Coordination and operations.** Serving in the coordination and operations groups are people from various departments who work with policy makers. In large exercises, a separate operations group carries out directives. In small exercises, the coordination and operations roles may be taken by the policy makers.

The best guide in selecting who should participate in an exercise is the emergency plan.

**Duties.** The only job of the players is to respond as they would in a real emergency to the messages that they receive during the exercise. All of the decisions and actions of the players take place in real time and generate real responses and consequences from other players.

## Participant Roles (Continued)

### Simulators

To create a real-life environment, simulators portray the organizations that would normally interact with the players in the operations center. They do this by delivering messages—descriptions of events or problems which require players to act.

Some messages are scripted in advance; others are spontaneous responses to player decisions. They are input into the exercise by means of radio or telephone, or by written notes simulating radio and telephone transmissions.

**Duties:** Simulators are responsible for all actions taken by organizations or individuals outside of the EOC. They:

- Send the players prescribed messages representing private citizens, agencies, or other organizations, according to scheduled times in the sequence of events.
- Simulate all actions taken by an agency or other organization.
- Ad lib spontaneous messages as needed. Examples of times when a simulator may need to respond spontaneously include:
  - When a member of the operations center issues a directive that results in events not anticipated in the scenario.
  - When a player asks for more information.
  - When a player decision is not logically linked to the next event in the scenario.
- Inform the controller of any deviations from the scenario, or special problems.

When simulators are given directives, they are required to follow through and implement the directives in a professional manner.

## Participant Roles (Continued)

**Selection:** Simulators must be able to ad lib intelligently in the situations just described, so it is important that they be familiar with the organization(s) that they are simulating and with the sequence of events and messages. It is useful, therefore, to draw simulators from the organizations that they will portray, and/or from the design team.

**Numbers:** It is difficult to give a rule of thumb concerning specific numbers of simulators needed for an exercise. The number of simulators will vary according to the:

- Number of players.
- Length of the exercise.
- Knowledge and training of the simulators.
- Communication channels available.

For best results, try to have at least one simulator per organization represented in the operations center, with extras to play the part of citizens or other private organizations.

**Organizing:** It is a good idea to group simulators according to function, to simplify the exercise and reduce the number of simulators needed. One approach is to organize them into three groups:

- Government agencies not participating in the exercise.
- Participating organizations: Field units of organizations participating in the exercise (police, fire, public works, etc.) and private medical and support organizations.
- Other private facilities and individuals: Citizens and nongovernment organizations.

The following table illustrates how this approach could be used for a community.

**Participant Roles (Continued)**

| Nonparticipating Government Entities                                                                                                                                                                                                                                                                  | Participating Organizations                                                                                                                                                                                                              | Other Private Facilities/ Individuals                                                                                                                                                |

**Controller**

The controller supervises the simulation or overall conduct of the exercise, making certain that it proceeds as planned and that objectives are reached.

The controller must be able to view the exercise as a whole and to think quickly on his or her feet. Players often make unanticipated decisions, and the controller must be able to respond to these.

**Duties:** The main duties of the controller are to:

- Ensure that the simulators and evaluators are properly trained before the exercise.
- Orient the participants to the exercise and present the narrative.
- Monitor the sequence of events and supervise the input of messages, using the Master Scenario of Events List as a guide.
- Adjust the pace of the exercise when needed—inserting more messages when it drags and discarding messages when the pace is too frantic.
- Make decisions in the event of unanticipated actions or resource requirements.
- Maintain order and professionalism throughout the exercise.

## **Participant Roles (Continued)**

**Selection:** Controllers can usually be drawn from the exercise design team. Because the team members are already familiar with the exercise, they are well suited to the task of keeping the exercise moving toward the anticipated conclusion.

**Preparation:** To properly prepare for the event, the controller should have the following items available:

- List of objectives.
- Master Scenario of Events List.
- Messages.
- List of players.
- List of resources available to the jurisdiction or organization.

It is usually helpful to hold a briefing before the exercise to orient the staff members. At the briefing, the controller should train the simulators, ensuring that they are familiar with the scenario, objectives, resources, and the messages they will be responsible for delivering. The evaluation team leader should provide similar training to the evaluators, including exercise objectives, evaluator duties, and schedule.

## **Evaluators**

The evaluators observe the actions and decisions of the players to report later what went well and what did not. To do this, evaluators need to be familiar with the objectives, the exercise scenario, and the jurisdiction or organization that is undertaking the exercise.

**Duties:** Key duties of the evaluators include the following:

- Observing exercise progress and recording observations (usually on provided evaluation forms), taking care to remain unobtrusive in the process.
- Noting how well the exercise is fulfilling objectives and trying to identify problems if objectives are not met.
- Evaluating the actions of the players, not the players themselves. Documenting both positive and negative observations.

## Participant Roles (Continued)

- Informing the controller during the exercise of any problems.
- Preparing brief written comments that can be included in the final evaluation and recommendation report that will be prepared by the emergency manager or other responsible party.

Unit 8 will provide more detailed information about the role of the evaluators.

The image shows a sample 'Functional Exercise Evaluation Form'. At the top, there are fields for 'Exercise Name' and 'Date'. Below that are 'Location' and 'Starting'. A section titled 'Evaluation Criteria' contains a table with columns for 'Criteria', 'Observed', and 'Not Observed'. The table has several rows for recording observations. Below the table is a section for 'Comments' with several lines of text for notes.

## How a Functional Exercise Works

A brief review of how a functional exercise works is given below. Keep in mind, however, that you will gain a better understanding of how a functional exercise works if you look for opportunities to observe one or—better yet—to participate in one.

### The Beginning

When a functional exercise begins will depend on its objectives. If testing the notification function is one of the objectives, then a “no-notice” exercise is useful. In this case, participants are given only the approximate timeframe scheduled for the exercise—anywhere from one day to several weeks). The exact time when it begins will be a surprise, allowing the exercise evaluators to observe how effectively notification and assembly at the command point take place.

In exercises where notification is not an objective, the exercise time is usually announced in advance.

## How a Functional Exercise Works (Continued)

### Briefing

Exercise participants may arrive on the scene of a functional exercise with only a vague notion of what is to take place. The exercise is much more likely to be successful if the participants receive a briefing that covers the following:

- Overview of objectives
- How the exercise will be carried out
- Time period to be simulated
- Ground rules and procedures

**Keep the Briefing Short.** Avoid anything that distracts from the atmosphere of a real emergency. (For example, include a written announcement in the exercise materials to cover any administrative details such as restrooms and break times.)

### Narrative

The exercise formally begins with the presentation of the narrative. It can be read aloud; presented on TV, computer, or slides; or dramatized.

### Message Delivery and Response

The action begins as simulators and players interact with one another:

- Simulators communicate messages to players, and players respond as they would in a real emergency.
- Players make requests of simulators, and simulators react convincingly.

This ongoing exchange takes place according to the carefully sequenced scenario of events that governs what takes place, when each event occurs, and the messages used to inform the players.

## How a Functional Exercise Works (Continued)

### Example: Message Delivery/Response

A message comes in from the incident site commander (a simulator) to the police chief (a player—a real police chief). The message informs the chief of a traffic accident blocking emergency evacuation routes. The chief confers with aides, quickly plans a new traffic route, and telephones the incident site commander (simulator) with the instructions. The simulator carries out the instructions and reports back.

Because the police chief might not react to the message as planned, simulators need to be prepared for a different response. They also must ensure that key events are kept active. For example, a player, not recognizing the importance of a key message, might delay action or fail to act. The simulator must then do something to cause the player to retrieve the event. If the situation reaches a point where the exercise cannot proceed until a decision has been made, the controller must force the issue.

Messages can arrive on paper, by telephone, by radio, or in person. Using telephones, when possible, increases the feeling of a real emergency, but whispered messages or written notes can also work well.

The success of the exercise depends on the extent to which the participants are able to carry out their functions as if they were in a real emergency. Exercise participants should be encouraged to think of each message as an actual event.

### Encouraging Spontaneity

The players should be able to decide among the full range of responses normally available to them during an emergency. Their ability to make decisions, communicate, or otherwise carry out their responsibilities should not be constrained by the exercise situation.

To allow the participants spontaneity, exercise controllers, and simulators must be well trained and prepared to handle the unexpected. While this provides a better exercise for participants, it does place a burden on controllers and simulators who must be ready to “go with the flow” to some degree when the situation calls for it.

## How a Functional Exercise Works (Continued)

### Controlling the Action

While simulators and players are transmitting messages and responding to them, the controller carefully monitors the interaction and progress.

**Dealing with spontaneous decisions:** The controller should be made aware of significant spontaneous decisions and make adjustments in the scenario where necessary.

#### Example

If a fire chief anticipated a later message by sending fire trucks into an area, the controller might need to stop a simulator from inputting a later message asking for fire trucks.

**Adjusting the pace:** The controller can control the pace of the exercise by adjusting the message flow—slowing things down when the pace is too frantic or speeding it up when the exercise drags. The controller can also even out the pace among participants. Remember, one inactive organization can distract others and bring down the intensity of the exercise. Avoid boredom by ensuring a smooth flow of messages.

Some specific suggestions for adjusting the pace are given on the next page.

## How a Functional Exercise Works (Continued)

### Strategies for Adjusting the Pace of Messages

- **Slow the pace** by:
  - **Rescheduling events** to allow more reaction time. Have the simulators wait before sending messages.
  - **Discarding messages** that are relatively unimportant or do not greatly impact other decisions. Throw away messages that don't contribute to the objectives.
- **Increase the pace and fill gaps** by:
  - **Speeding up the delivery pace** (varying from the planned schedule).
  - **Determining what is causing gaps** and being ready to add or alter messages spontaneously when needed. Look at organizations with gaps to see if they have been unintentionally ignored. If so, add messages. (It may be, however, that the organization simply has little to do during a particular period.)
  - **Keeping a supply of optional messages** on hand that can be added when needed.
  - **Adding side events**—routine actions a department would have to continue throughout an emergency. (For example, insert a routine traffic accident to put stress on police and fire departments. Report an unrelated heart attack to challenge medical personnel.)
  - **Adding secondary emergencies**—events that develop out of the main flow of exercise events. (For example, insert utility outages, water main breaks, gas leaks, media calls, and similar events to keep players involved between their own major events.)
  - **Adding special planning requirements** that would cause an inactive group to engage in a short-term preparedness activity. (For example, have hospitals test emergency generators.)
  - **Adding misdirected messages**—messages given to the wrong agency. Such messages can be used to gauge the agency's clarity of role definition and to test whether they forward the message properly.
- **Relieve overloads** on particular organizations by:
  - **Reassigning.** Verify that all messages are assigned to the right organizations. Then reassign any messages that could be used by another organization.
  - **Thinning.** Divide the overloaded messages into two piles: (1) Essential to the flow of the exercise and (2) Nice to have. Then get rid of some from the latter group.
- **Maintain an even message flow** by maintaining a chart similar to the following.

**How a Functional Exercise Works (Continued)**

| <b>Sample Message Flow Chart</b>                                               |                                          |     |              |     |              |        |
|--------------------------------------------------------------------------------|------------------------------------------|-----|--------------|-----|--------------|--------|
| Check the times when messages are scheduled for delivery to each organization. |                                          |     |              |     |              |        |
|                                                                                | <b>Participating Agency/Organization</b> |     |              |     |              |        |
|                                                                                | Fire                                     | EMS | Public Works | EOC | Facility CEO | School |
| Exercise Start                                                                 |                                          |     |              |     |              |        |
| 10:00                                                                          | 4                                        | 4   |              |     |              |        |
| 10:03                                                                          |                                          |     | 4            |     |              |        |
| 10:06                                                                          |                                          | 4   |              | 4   |              |        |
| 10:09                                                                          | 4                                        |     |              | 4   |              |        |
| 10:12                                                                          |                                          |     | 4            | 4   |              | 4      |
| 10:15                                                                          |                                          | 4   |              |     | 4            | 4      |
| etc.                                                                           |                                          |     |              |     |              |        |

**(Note:** A blank planning chart is provided as Job Aid 16 in Appendix A.)

**Skipping Time**

Functional exercises can depict events and situations that would actually occur over an extended time period (one or two weeks or more). In order to include multiple phases of the emergency (preparation, response, recovery, mitigation) in a two-day exercise, it would be necessary to stop the exercise periodically and advance the time by a number of hours or days.

These skip-time transitions should be kept to the minimum necessary to cover the scope of the exercise. They can usually be planned to coincide with a natural break point.

**Who handles the time skips?** The controller is responsible for managing skip-time transitions and preparing transition updates to be presented to the participants before resuming the exercise.

Simulators are responsible for updating simulation displays to reflect the results of the previous events and participant actions. Actions that would have been undertaken during the transition period will be indicated as accomplished on the transition date.

The following table illustrates a skip-time schedule for a functional exercise.

How a Functional Exercise Works (Continued)

## Facilities and Materials

### Location

**Exercise where you operate.** To the extent possible, the functional exercise should take place in the same facility and in the same operational configuration that would occur in a real emergency—usually the EOC or other operations center.

A frequent objection to exercising at the operations center is that there are not enough phones, or chairs, or restrooms. If that is the case, it is wise to find out in an exercise, not an emergency. If you can't practice there, don't expect to be able to conduct an emergency response there.

### Room Arrangement

Various room arrangements can work for a functional exercise, depending on the size of the exercise. These are the basic requirements:

- Space for players—usually a table with plenty of work space
- Area(s) set aside for simulators
- Room for evaluators to observe
- A place from which the controller can operate

**Small exercises:** In very small exercises, a single room can work. The diagram below shows a simple layout for a small functional exercise.

### Sample Arrangement for a Small Functional Exercise

Facilities and Materials (Continued)

**Complex exercises:** The following layout would be appropriate for an elaborate functional exercise. Two rooms are shown: The simulation room and the operations center, where the players are located.

Sample Arrangement for a Complex Functional Exercise

## Facilities and Materials (Continued)

**Simulation room:** If more than one or two organizations or functions are being exercised, a simulation room is highly recommended. This room should comfortably house all of the simulators so that they can send, receive, and track messages and other communications with the players. It should be equipped with telephones or radios if they are to be used in the exercise. If message traffic is to be sent by hand, the situation room must be near the players.

Any layout should be adapted to the particular exercise and your local physical facilities. Whatever the layout, participant work spaces should be predesignated and working supplies made available. (In the previous diagram, notice the work space assignments of the simulators and players.)

### What About Communications Equipment?

Communications equipment is useful when full simulation is the goal. However, often it is wise to use both electronic equipment and written messages. When working in compressed time, it is easy for problems to arise concerning:

- Development of telephone banks for the simulators.
- Telephone overload for the players.
- Equipment breakdown.

For these reasons, some managers leave extensive use of communications equipment for a drill. In any case, the use of electronic communication should be carefully—and perhaps selectively—planned.

**Equipment installation:** When telephones will be the primary means of communication during an exercise, it may be possible to use existing phones. Or, it may be necessary to install special lines and extensions to provide the necessary communication links. In some facilities, where a central switching system is used, an operator may handle all calls.

## Facilities and Materials (Continued)

### Suggestions for Successful Communication Links

- Prepare a special exercise directory of telephone numbers.
- Include communications procedures in the directory.
- If you don't have telephones, use a variety of other formats, such as:
  - Written messages.
  - Simulated calls (sender whispers message in receiver's ear).
  - Hand signals (player who wants to call a simulator raises a hand to bring the simulator over).
  - Simulated speaker phone or radio (simulator speaks loudly to the players).
- If you use written messages, provide standardized message forms.

### Displays and Materials

Displays and materials—maps, charts, message forms, lists, etc.—are important in a functional exercise. (In the room arrangement diagram for a complex exercise, notice the variety of maps available to the players.) These materials are used to provide details for the scenario and keep track of activities.

Generally speaking, it's best to use what you use every day. An exercise is no time to get new maps and message forms. Test the ones that you are currently using.

Unit 9 will provide more detailed guidance about exercise enhancements, including communications equipment, displays and materials, and other matters.

On page 6.24 is a checklist of facilities and materials suggested for a functional exercise. Depending on the scope and complexity of the exercise, specific items may or may not apply.

## Designing a Functional Exercise

### Design Process

The full eight-step design process outlined in Unit 4 is used to develop a functional exercise. While a simplified version of that process can be used to develop a tabletop exercise, a functional exercise—even a small one—requires careful attention to every step.

### Exercise Materials

The success of a functional exercise rests on a carefully scripted scenario package that includes:

- A convincing narrative.
- Major and minor events that grow out of the narrative and are carefully chosen to support the objectives.
- Arrangement of the events in a realistic and convincing sequence from the beginning to the end of the exercise.
- Expected actions that are tied closely to the objectives.
- A great number of specific messages (perhaps 100 or more in a larger exercise) that are so well conceived that players will respond with the expected actions.

#### **Expect the Unexpected**

No matter how good you are at writing convincing messages, sometimes players will respond in unexpected ways. Although you should try to limit the unexpected as much as possible, occasionally a spontaneous reaction is better than the response prescribed in the emergency plan.

- A master scenario of events list that includes all of the messages/events, delivery times, and expected actions.

When you have completed the scenario package, you will use the developed materials to create materials for the exercise participants, including the Exercise Plan, Control Plan, Evaluation Plan, and Player Handbook.

## **Designing a Functional Exercise (Continued)**

### **Job Aids and Samples**

Job Aids 7, 8, 9, 10, 11, 12, 13, and 14 are provided in Appendix A. They are the job aids introduced in Unit 4. They are well suited to the design of functional exercises. In addition, a Functional Exercise Checklist is provided on the following pages. This checklist (which also appears as Job Aid 17 in Appendix A) summarizes the special considerations for designing a functional exercise.

In Unit 10, you will have an opportunity to develop a functional exercise using similar instruments.

## Designing a Functional Exercise (Continued)

### Functional Exercise Design Checklist: Special Considerations

#### Facilities and Equipment

- Sufficient work space for simulators and players
- Simulation room (if needed) near player room
- Message center
- Control center
- Observer space
- Clear work surfaces
- Communication equipment (telephones, switchboard)
- Parking
- Adequate ventilation and lighting

#### Displays and Materials

- Displays easily visible or accessible
- Maps (regional, state, local, area, downtown, operational units)
- Major events log
- Bulletin board
- Status boards
- Simulation plotting board
- Easels, chart paper
- Message forms
- Pencils/Paper
- Name cards

#### Beginning:

- "No-notice" or scheduled (according to objectives)

#### Briefing (short):

- Objectives
- Process
- Time period portrayed
- Ground rules and procedures

#### Narrative:

- Verbal, print, TV, computer, slides, or dramatization
- Time-skips if needed

#### Messages:

- Large number (depends on scope)
- Prescribed
- Optional prescribed for adjusting flow

#### Message Delivery:

- Written
- Phone
- Other (verbal, speaker phone/radio, hand signals)
- Simulators prepared for spontaneous message development
- Standardized forms for written messages

#### Strategies for Adjusting Pace:

- Rescheduling
- Adding/Deleting messages
- Misdirecting messages
- Reassigning messages

Activity

**Activity: Identify Functional Exercise Responsibilities**

*For each of the following activities, indicate who has primary responsibility by placing a check mark in the appropriate column.*

|                                                                      | Controller | Simulator | Player | Evaluator |
|----------------------------------------------------------------------|------------|-----------|--------|-----------|
| 1. Present the briefing.                                             |            |           |        |           |
| 2. Observe and record exercise progress.                             |            |           |        |           |
| 3. Control the pace.                                                 |            |           |        |           |
| 4. Decide how to implement emergency plan procedures.                |            |           |        |           |
| 5. Track progress.                                                   |            |           |        |           |
| 6. Ad lib in response to unplanned player actions.                   |            |           |        |           |
| 7. Decide how to handle unexpected situations in the exercise.       |            |           |        |           |
| 8. Respond to events.                                                |            |           |        |           |
| 9. Ensure that simulators and evaluators are trained.                |            |           |        |           |
| 10. Coordinate with other organizations on joint responses.          |            |           |        |           |
| 11. Deliver messages.                                                |            |           |        |           |
| 12. Present the narrative.                                           |            |           |        |           |
| 13. Inform the controller of deviations from the scenario.           |            |           |        |           |
| 14. Act the part of organizations participating in the exercise.     |            |           |        |           |
| 15. Act the part of organizations not participating in the exercise. |            |           |        |           |
| 16. Ensure that activities run smoothly.                             |            |           |        |           |
| 17. Supervise message input.                                         |            |           |        |           |
| 18. Portray private citizens and facilities.                         |            |           |        |           |
| 19. Make decisions about departing from the planned event sequence.  |            |           |        |           |
| 20. Compare exercise conduct to objectives.                          |            |           |        |           |
| 21. Update the situation board during skip-time transitions.         |            |           |        |           |

**Activity: Identify Functional Exercise Responsibilities (Continued)**

**Suggested Answers:**

|                                                                      | <b>Controller</b> | <b>Simulator</b> | <b>Player</b> | <b>Evaluator</b> |
|----------------------------------------------------------------------|-------------------|------------------|---------------|------------------|
| 1. Present the briefing.                                             | 4                 |                  |               |                  |
| 2. Observe and record exercise progress.                             |                   |                  |               | 4                |
| 3. Control the pace.                                                 | 4                 |                  |               |                  |
| 4. Decide how to implement emergency plan procedures.                |                   |                  | 4             |                  |
| 5. Track progress.                                                   | 4                 |                  |               |                  |
| 6. Ad lib in response to unplanned player actions.                   |                   | 4                |               |                  |
| 7. Decide how to handle unexpected situations in the exercise.       | 4                 |                  |               |                  |
| 8. Respond to events.                                                |                   |                  | 4             |                  |
| 9. Ensure that simulators and evaluators are trained.                | 4                 |                  |               |                  |
| 10. Coordinate with other organizations on joint responses.          |                   |                  | 4             |                  |
| 11. Deliver messages.                                                |                   | 4                |               |                  |
| 12. Present the narrative.                                           | 4                 |                  |               |                  |
| 13. Inform the controller of deviations from the scenario.           |                   | 4                |               |                  |
| 14. Act the part of organizations participating in the exercise.     |                   |                  | 4             |                  |
| 15. Act the part of organizations not participating in the exercise. |                   | 4                |               |                  |
| 16. Ensure that activities run smoothly.                             | 4                 |                  |               |                  |
| 17. Supervise message input.                                         | 4                 |                  |               |                  |
| 18. Portray private citizens and facilities.                         |                   | 4                |               |                  |
| 19. Make decisions about departing from the planned event sequence.  | 4                 |                  |               |                  |
| 20. Compare exercise conduct to objectives.                          |                   |                  |               | 4                |
| 21. Update the situation board during skip-time transitions.         |                   | 4                |               |                  |

## Summary and Transition

Unit 6 was the second of three units providing in-depth information about specific types of exercises. This unit provided information about the functional exercise, including key characteristics, participants, format, strategies for conducting the exercise, and key design considerations. Unit 7 will discuss the full-scale exercise.

## For More Information

Many of the information resources cited in Units 1–4 also contain information about functional exercises.

## Knowledge Check

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.*

1. The functional exercise:
  - a. Simulates an emergency response in an actual field setting.
  - b. Simulates an emergency situation in a relaxed group discussion.
  - c. Simulates an emergency as realistically as possible without deploying people and equipment to the site.
  - d. Simulates an emergency involving all of the functions, organizations, and personnel that would respond to an actual emergency.
  
2. The goal of a functional exercise is to test or evaluate the capability of one or more functions in the context of an emergency event.
  - a. True
  - b. False
  
3. An exercise that tested only notification procedures in response to a terrorist bombing would be:
  - a. A drill.
  - b. A tabletop exercise.
  - c. A functional exercise.
  - d. A full-scale exercise.
  
4. A functional exercise can test the same functions and responses as in a full-scale exercise without high costs or safety risks.
  - a. True
  - b. False
  
5. A functional exercise is similar to a tabletop exercise except that the functional exercise requires less scripting, planning, and attention to detail.
  - a. True
  - b. False
  
6. In a functional exercise, events are presented via problem statements or messages and then discussed by the group.
  - a. True
  - b. False

**Knowledge Check (Continued)**

7. A functional exercise is a good way to assess:
  - a. Communication and information sharing among organizations.
  - b. Response time of field personnel.
  - c. Adequacy of response resources (personnel and equipment).
  - d. Hazard analysis for developing the EOP.
  
8. \_\_\_\_\_ is the best location for a functional exercise.
  - a. A field site similar to where an actual incident might occur
  - b. The Mayor's office
  - c. A 911 dispatch center
  - d. The Emergency Operations Center
  
9. Key decision makers in the jurisdiction or organization being exercised would normally assume the role of:
  - a. Players.
  - b. Simulators.
  - c. Controllers.
  - d. Evaluators.
  
10. Which of the following is NOT true of a simulator?
  - a. He or she may deliver written messages.
  - b. He or she is often called upon to rate the performance of key players.
  - c. He or she may deliver messages verbally.
  - d. He or she sometimes needs to make up a response to a player.
  
11. It may be necessary to delete planned messages if the pace of the exercise starts to drag.
  - a. True
  - b. False
  
12. When designing a functional exercise, the eight-step design process can usually be significantly shortened or simplified.
  - a. True
  - b. False

**Knowledge Check (Continued)**

1. c
2. a
3. a
4. a
5. b
6. b
7. a
8. d
9. a
10. b
11. b
12. b

**Unit 7: The Full-Scale  
Exercise**

## **Introduction**

This unit focuses on the full-scale exercise. We will look closely at the characteristics of the full-scale exercise—how it differs from the other types of exercises, who participates, the role of the EOC, and key design considerations. At the end of the unit, you will develop an action plan for later use in designing a full-scale exercise for your organization.

## **Unit 7 Objectives**

After completing this unit, you should be able to:

- Describe the purpose and characteristics of a full-scale exercise.
- Explain how designing a full-scale exercise differs from designing a functional exercise.
- Identify planning considerations for site selection and scene management for a full-scale exercise.

## What Is a Full-Scale Exercise?

A full-scale exercise is as close to the real thing as possible. It is a lengthy exercise that takes place on location, using—as far as possible—the equipment and personnel that would be called upon in a real event.

In a sense, a full-scale exercise combines the interactivity of the functional exercise with a field element. It differs from a drill in that a drill focuses on a single operation and exercises only one organization.

Eventually, every emergency response organization must hold a full-scale exercise because it is necessary at some point to test capabilities in an environment as near to the real one as possible.

However, there is more to a full-scale exercise than just practice in the field. As we discussed in Unit 1, various regulatory agencies have requirements for full-scale exercises which must be satisfied. In order to receive FEMA credit, for example, a full-scale exercise must fulfill three requirements:

- It must exercise most functions.
- It must coordinate the efforts of several agencies.
- In order to achieve full coordination, the EOC must be activated.

## What Is a Full-Scale Exercise? (Continued)

### Key Characteristics

The key characteristics of full-scale exercises were discussed in Unit 2. Below is a brief summary of the main points.

#### **Key Characteristics**

- Interactive exercise, designed to challenge the entire emergency management system in a highly realistic and stressful environment.
- Tests and evaluates most functions of the emergency management plan or operational plan.
- Takes place in an EOC or other operating center and at field sites.
- Achieves realism through:
  - On-scene actions and decisions.
  - Simulated “victims.”
  - Search and rescue requirements.
  - Communication devices.
  - Equipment deployment.
  - Actual resource and personnel allocation.
- Involves controller(s), players, simulators (different from simulators in a functional exercise), and evaluators.
- Players represent all levels of personnel, including response personnel.
- Messages may be visual (e.g., staged scenes, made-up victims, props) and scripted.
- All decisions and actions by players occur in real time and generate real responses and consequences from other players.
- Requires significant investment of time, effort, and resources (1 to 1½ years to develop a complete exercise package). Attention to detail is crucial.

## What Is a Full-Scale Exercise? (Continued)

### The Purpose of Full-Scale Exercises

There are numerous reasons for conducting a full-scale exercise. A full-scale exercise:

- Enables a jurisdiction or emergency management system to evaluate its ability to perform many functions at once.
- Is useful to test total coordination, not only among policy and coordination officials, but among field forces. At the same time, it can test interorganizational coordination.
- Can pinpoint resource and personnel capabilities and reveal shortfalls.
- Greatly expands the scope and visibility of the exercise program.
- If well-planned, can attract public attention and raise credibility. (However, to be successful, it must be the culmination of a comprehensive and progressive exercise program that has been developed as the organizational capacity has grown.)

### What Does It Take to Run a Full-Scale Exercise?

Some people wrongly believe that when a full-scale exercise is started, it can run on its own steam. In fact, a full-scale exercise requires a substantial commitment of time, money, personnel, and expertise and should not be undertaken without the necessary preparation. These are the most important requirements:

- Substantial experience with preparatory exercises of various kinds—drills, tabletops, and functional exercises.
- Total commitment of all emergency service organizations.
- Support from the chief elected and/or appointed officials.
- Adequate physical facilities, including space for the EOC and field command posts.
- Adequate communication facilities (e.g., radios and telephones).
- Plans in place to handle costs (both evident and hidden), labor, time commitment, etc.
- Carefully thought out and planned site and logistics.

Activity

**Activity: Compare Functional and Full-Scale Exercises**

*In the following table, compare functional and full-scale exercises by writing a brief description in each of the cells.*

|                                     | <b>Functional</b> | <b>Full-Scale</b> |
|-------------------------------------|-------------------|-------------------|
| <b>Degree of Realism</b>            |                   |                   |
| <b>Format/Structure</b>             |                   |                   |
| <b>Atmosphere</b>                   |                   |                   |
| <b>Who Takes Part</b>               |                   |                   |
| <b>Who Leads</b>                    |                   |                   |
| <b>Where Held</b>                   |                   |                   |
| <b>Equipment Deployed</b>           |                   |                   |
| <b>Test Coordination</b>            |                   |                   |
| <b>Test Adequacy of Resources</b>   |                   |                   |
| <b>Test Decision-Making Process</b> |                   |                   |
| <b>Relative Complexity/Cost</b>     |                   |                   |
| <b>Formal Evaluation</b>            |                   |                   |

**Activity: Compare Functional and Full-Scale Exercises (Continued)**

**Suggested Answers:**

|                                     | <b>Functional</b>                                                                | <b>Full-Scale</b>                                                |
|-------------------------------------|----------------------------------------------------------------------------------|------------------------------------------------------------------|
| <b>Degree of Realism</b>            | As realistic as possible without deploying resources                             | As realistic as possible; resources deployed                     |
| <b>Format/Structure</b>             | Interactive; simulators deliver “problem messages,” players respond in real time | Interactive; simulators play roles at the scene, players respond |
| <b>Atmosphere</b>                   | Tense, stressful                                                                 | Highly tense, stressful                                          |
| <b>Who Takes Part</b>               | Controller players (policy, coordination, operations), simulators, evaluators    | Controller(s), players (all levels), simulators, evaluators      |
| <b>Who Leads</b>                    | Controller                                                                       | Controller(s)                                                    |
| <b>Where Held</b>                   | EOC or other operations center                                                   | EOC and field site(s)                                            |
| <b>Equipment Deployed</b>           | No                                                                               | Yes                                                              |
| <b>Test Coordination</b>            | Yes                                                                              | Yes                                                              |
| <b>Test Adequacy of Resources</b>   | Yes                                                                              | Yes                                                              |
| <b>Test Decision-Making Process</b> | Yes                                                                              | Yes                                                              |
| <b>Relative Complexity/Cost</b>     | Large scale; complex format; moderate cost                                       | Very large scale; highly complex; high cost                      |
| <b>Formal Evaluation</b>            | Yes                                                                              | Yes                                                              |

### Full-Scale Exercise Roles

Full-scale exercises involve one or more controllers, the participants, simulators, evaluators, and a safety officer.

#### Controllers

One or more controllers manage the exercise. In some exercises, where there are multiple sites or organizations, there may be more than one controller. In this case, all of the controllers cooperate under the direction of a chief controller.

The controller (or chief controller) is responsible for ensuring that the exercise starts on schedule. The controller also designates an exercise control point from which all communications should be monitored.

#### Participants

A full-scale exercise involves all levels of personnel, including:

- **Policy makers**—those who are responsible for making broad policy decisions. They might include the chief executive and his or her staff, the Public Information Officer, the emergency manager, key department heads, and other elected officials.
- **Coordination personnel**—people from various departments who coordinate decisions of policy makers and make plans for resources.
- **Operations personnel**—those who carry out the directives. Sometimes coordination and operations are the same.
- **Field personnel**—fire, police, EMS, search and rescue, volunteer groups, representatives of private enterprises who participate in the response, and many others.

## Full-Scale Exercise Roles (Continued)

### Simulators

Simulators in a full-scale exercise are different from those in a functional exercise. In a full-scale exercise, simulators are the volunteers who pretend to be victims of the emergency event. For realism, they may wear makeup and they “act” injured, unconscious, hysterical, or dead—whatever the scene calls for.

### Evaluators

Evaluators observe the action and keep a log of all significant events. This is important because so many of the actions will not be prescribed, but rather spontaneous responses to other actions. Evaluators may videotape exercise action.

### Safety Officer

There are so many potential safety issues in a full-scale exercise that a safety officer should be designated. This person’s primary responsibility is to analyze the entire exercise from a safety perspective. We will return to safety measures a little later.

## How the Full-Scale Exercise Works

### Beginning

The full-scale exercise begins in a fashion similar to the functional exercise; whether it is announced or “no notice” depends in part on the objectives. The exercise designer will decide how and when the exercise is to begin. The trigger may simply be a call from dispatch, a radio broadcast, or a telephone call from a private citizen. The beginning for each participant should be as realistic as possible (that is, personnel should receive notification through normal channels).

Personnel from the emergency services that are taking part in the field component must then proceed to the assigned location, where a “visual narrative” is displayed before them in the form of a mock emergency to which they will respond.

Key decision makers—those who would normally operate out of the EOC or command center during an emergency—proceed to the EOC to fulfill their roles. Command posts are set up as required by the event.

## How the Full-Scale Exercise Works (Continued)

### Action

Actions in a full-scale exercise occur in the EOC, at one or more field sites, and at the related command posts. Actions taking place at the event site and command posts serve as input to the simulation taking place at the EOC.

Although medical personnel, hospitals, EMS, fire services, and other localized emergency operations do not usually require centralized command from the EOC, they do require coordination with officials at the command posts.

### Sustaining Action

Action is sustained by various means, including:

- Prescribed messages input by the controller(s).
- Messages and actions from the field that require action at the EOC.
- Spontaneous responses to the various messages and actions.

#### **Command Post Messages**

A field command post can be used as part of the message input into the EOC. Either the command post can be written into the scenario and have a set of prescribed messages to be transmitted by radio, or the command post controller can monitor the sequence of events and transmit spontaneous messages.

## Exercise Locations

**Field sites:** The main event site will depend on the exercise scenario and objectives. For example, if the central event involves a plane crash, the exercise might take place at an airport. A simulated terrorist attack could be staged in a public facility such as a convention center or shopping mall. A hurricane or flood exercise might be dispersed over many locations.

Most events will involve additional locations such as secondary event sites, hospitals, mortuaries, shelters, and other support locations, and command posts will be established near the emergency sites. In fact, one of the reasons a full-scale exercise is so complicated is that activity is taking place in various locations, and all of the sites must be coordinated.

**Emergency Operations Center:** Activation of the EOC or other operations center is central to a full-scale exercise (just as it is in a functional exercise). The purpose of the EOC is to provide a policy and coordination facility for the Chief Executive Officer (CEO) and staff to respond effectively to an emergency.

In essence, the EOC is the voice of government during an emergency. Emergencies place strains on government—the demand for service escalates, while ability to deliver diminishes. Gathering information, making decisions, and directing necessary actions require close coordination between key officials. This coordination is best obtained if officials and support staff are in a centralized location with direct lines of communications.

The central location makes it possible to accomplish a number of tasks that would be impossible (or very difficult) separately. For example:

- Information can be gathered, verified, and recorded in one spot.
- Officials can deploy resources in a timely and intelligent manner.
- Direction and control can be efficiently managed.
- Officials can coordinate actions and decisions.
- It's easier to set meaningful priorities when the key actors collaborate.

The size and makeup of the EOC differ according to the size of the jurisdiction or response system. The EOC may take up an entire floor of a building or a small room.

## **Designing the Full-Scale Exercise**

The design of a full-scale exercise can be quite difficult, often requiring the expertise of several response organizations. When developing your first full-scale exercise, it is usually advisable to start small and build to more complex exercises. Many of the potential difficulties relate to logistical problems, but others rest with the design.

The entire eight-step design process is used to design full-scale exercises, although the process is applied somewhat differently when designing tabletops and functional exercises. The differences arise from the fact that tabletop and functional exercises rely on *words* to obtain realism, while a full-scale exercise—like a real emergency—gains its reality from *things*. There is a shift from a written scenario to visual reality represented by a real site, real people (some of them simulating victims), and real equipment.

Let's take a closer look at how each of the design steps is applied to designing a full-scale exercise.

### **The First Four Steps**

As with any exercise, the first four design steps are:

1. Assess needs.
2. Define the scope.
3. Write a statement of purpose.
4. Define objectives.

For a full-scale exercise, these steps require deeper analysis and greater attention to detail. So much rests on the outcomes of these steps that you must be sure that you have created a clear picture of what is to be achieved through the exercise. If any of these areas is left at all vague, the problems will be greatly magnified later on.

## Designing the Full-Scale Exercise (Continued)

### Step 5: The Narrative

The narrative is handled differently in a full-scale exercise. Because a lengthy verbal description is not needed to set the scene, the narrative is shorter.

### Step 6: Major and Detailed Events

Major and detailed events still exist in a full-scale exercise, but many of them exist as actual occurrences rather than as verbal descriptions. For example, an earthquake scenario may have to rely on words to simulate some events. Other earthquake events can be simulated with fallen logs, bricks strewn around a building, dummies resting under beams, people acting injured or frightened, and other props.

Even when events are presented visually, they cannot be random and haphazard. Each event must be carefully planned and staged to support objectives and generate the expected actions.

### Step 7: Expected Actions

As with any exercise, expected actions must be specifically identified, based on the exercise objectives. A detailed list of expected actions is an important foundation for the exercise evaluation.

### Step 8: Messages

There are two kinds of messages in a full-scale exercise: Visual and prescribed. Much of the action grows out of the initial message and scene set-up. The scene that is set up contains a number of “visual” messages to which participants need to respond. It may also be necessary to have some prescribed messages to move the action along.

For every event, try to anticipate all possible reactions. But it is important to be flexible enough to adapt to player actions and decisions that you hadn't expected. Sometimes an unanticipated response will be an improvement over the expected action.

If your scenes (events) are well planned, the exercise will go in the general direction that you planned, even if a few of the decisions are off course.

## Designing the Full-Scale Exercise (Continued)

### Watch the Details!

Make sure that the scenes that you create are good enough to get the expected action. For example, if you have victims who don't know anything about medicine, either coach them in advance about their symptoms or tag them with symptoms and vital signs and apply makeup to simulate injuries. At the end of the exercise, you don't want players to say, "Well, I didn't know what you were getting at."

### Special Considerations

A full-scale exercise represents a huge logistical challenge, and it's easy to overlook details. One way to promote clear and creative thinking is to "walk the site"—either physically or mentally. By doing so, you may be able to identify potential problems and do more realistic planning. In mentally evaluating the scene, you should consider:

- Site selection.
- Scene management.
- Personnel and resources.
- Response capability.
- Safety and legal liability.
- Emergency call-off.
- The media.

The following are some criteria and guidelines related to each of these areas.

**Special Considerations (Continued)**

**Site Selection**

Selecting the right site for the exercise should be one of the first decisions that you make. Because the exercise requires the mobilization of personnel and resources, space and realism are key.

| <b>Site Selection Criteria</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Credibility</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Is the type of emergency one that has a real possibility of occurring? (A credible emergency can elicit greater cooperation and participation.)</li> </ul> <p><b>Realism</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Is the site as realistic as possible without interfering with normal traffic or safety?</li> </ul> <p style="padding-left: 40px;">Examples: In simulating an overturned tanker truck on a main stretch of freeway, you can't tie up rush hour traffic for hours. You'll need to find a similar location to stage the crash. For a plane crash, try a secondary airport instead of a national airport.</p> <p><b>Adequacy of Space</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Is it large enough to accommodate the number of victims, responders, and observers?</li> <li><input type="checkbox"/> Is there space for responders' and observers' vehicles?</li> </ul> |

**Scene Management**

Management of the scene refers to a number of issues, including:

- Logistics at the scene.
- Creation of a believable emergency scene.
- Number of victims.
- Management of props and materials.
- Number of controllers.

The checklist on the following page includes questions you should consider related to scene management.

**Special Considerations (Continued)**

| <b>Scene Management Checklist</b> |                                                                                                                                                                                  |
|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Logistics</b>                  |                                                                                                                                                                                  |
| 4                                 | Where will players be set up?                                                                                                                                                    |
| 4                                 | If there is a mobile EOC, where will they park?                                                                                                                                  |
| <b>Believability</b>              |                                                                                                                                                                                  |
| 4                                 | How will you simulate the emergency? (E.g., if you will simulate fire, what will you use for smoke? How will you simulate a spilled chemical, broken glass, flood damage, etc.?) |
| 4                                 | Who will serve as victims? (For greater realism, select victims from different age groups, with different body types and physical characteristics.)                              |
| 4                                 | How will you ensure that victims realistically portray their roles?                                                                                                              |
| <b>Number of Victims</b>          |                                                                                                                                                                                  |
| 4                                 | How many victims does the type of emergency call for?                                                                                                                            |
| 4                                 | What are the capability and capacity of hospitals and other resources to handle victims?                                                                                         |
| 4                                 | What does the history of past events indicate about types and numbers of injuries?                                                                                               |
| <b>Props and Materials</b>        |                                                                                                                                                                                  |
| 4                                 | What kinds of props and materials will be needed to simulate injuries, damage, and other emergency effects (e.g., victims' makeup, dummies, construction materials)?             |
| <b>Controllers</b>                |                                                                                                                                                                                  |
| 4                                 | How many controllers will be needed to manage the exercise sites? (In a multiple-site exercise, every site will require a controller.)                                           |

## Special Considerations (Continued)

### Personnel and Resources

The scenario will help determine how many people (participants and volunteers) will be involved, how many and what kinds of equipment will be needed, and the potential costs. Consider the following factors in planning for personnel and resources:

- How many participants? (Sometimes it is necessary to scale down the exercise to a half day or less to increase participation.)
- How many volunteers?
  - Scene set-up
  - Victims
  - Members of the public
- What kinds of equipment will be used?
- How many pieces of each type of equipment?
- How much fuel for vehicles and equipment?
- What kinds of materials and supplies will be needed, and how will they be obtained?
- Expenses:
  - Overtime wages
  - Vehicle and equipment fuel
  - Materials and supplies

#### **Equipment**

Keep your scenario reasonable in terms of equipment. True, you need to determine whether you have the resources to meet normal emergency demands. But don't get carried away. Hold your people to the use of **actual equipment**. Don't let them simulate use of equipment that doesn't exist.

## **Special Considerations (Continued)**

### **Response Capability**

In planning both personnel and resources, take into consideration how the exercise might deplete the actual response capability of the organizations involved. It is unwise to compromise the ability to respond to real emergencies during an exercise. Here are some suggestions:

- Be sure that there are enough personnel and resources to continue their responsibilities if a real emergency occurs. (In some cases, a call-off procedure will solve part of the problem.)
- Consider using second-shift personnel or mutual aid from other jurisdictions or organizations.
- Consider using volunteers as a smaller response shift.

### **Safety**

Total operation safety is an absolute must in a full-scale exercise. Awareness of safety issues must be carried throughout the planning and conduct of the exercise to ensure that safety problems are noted and eliminated. A safety officer should be designated whose primary responsibility is to analyze the entire exercise from a safety perspective. Suggested safety measures are on the next page.

## Special Considerations (Continued)

| <b>Suggested Safety Measures</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>▪ Include safety as one of the activities in exercise development.</li> <li>▪ Assign each exercise team member the responsibility of examining the exercise for safety within his or her discipline.</li> <li>▪ Identify all possible safety hazards and resolve each one.</li> <li>▪ Address safety as part of the preexercise briefing.</li> <li>▪ Include safety factors in simulator and evaluator information packets.</li> <li>▪ Examine each field location before the exercise to guarantee that safety precautions have been taken.</li> <li>▪ Ensure that the safety officer has the authority to terminate an activity or even the entire exercise if a safety problem arises.</li> <li>▪ Provide for call-off procedures in the event of an actual emergency.</li> </ul> |

### **Emergency Call-Off**

A real emergency may occur during any exercise—especially a lengthy one. Be sure to keep enough personnel in reserve to handle routine problems.

In some instances, it may be necessary to stop the exercise to handle the real emergency. Every exercise should have a planned call-off procedure that will result in the prompt return of personnel and equipment to full duty status. The procedure should include a code word or phrase that the controller or safety officer can use to indicate that:

- The exercise has been terminated.
- Personnel should report to their regular duty positions.
- All radio traffic will return to normal.

The procedures should be tested.

### **Legal Liability**

Legal questions of liability, including injuries during exercise conduct, must be researched by your local attorney.

## **Special Considerations (Continued)**

### **The Media**

A full-scale exercise of any magnitude will draw media attention whether you want it or not. If the exercise is well designed, favorable media reports are more likely. So, include the media in your plans. They can be very helpful in gaining support for the program, and their presence will increase realism.

Also make allowances for observers and public information people. Decide in advance where you will locate them, and give them an opportunity to observe.

### **Job Aids and Samples**

The job aids introduced in Unit 4 (and provided in Appendix A) can be used to develop full-scale exercises. In addition, the checklist provided on the next page covers special considerations for full-scale exercises. (This checklist also appears as Job Aid 18 in Appendix A.)

## Special Considerations (Continued)

### Full-Scale Exercise Planning Checklist: Special Considerations

#### Participants:

- Controller(s)—sufficient to manage all event sites
- Simulators (mock victims)—different age groups, body types, physical characteristics
- Players (most functions, all levels—policy, coordination, operation, field)
- Evaluators
- Safety Officer

#### Site Selection:

- Adequate space for number of victims, responders, and observers
- Space for vehicles and equipment
- As realistic as possible without interfering with normal traffic or safety
- Credible scenario and location

#### Scene Management:

- Logistics (who, what, where, how, when)
- Believable simulation of emergency
- Realistic victims
- Preparation of simulators to portray roles realistically
- Number of victims consistent with type of emergency, history of past events
- Types of injuries consistent with type of emergency, history of past events
- Victim load compatible with local capacity to handle
- Props and materials to simulate injuries, damage, other effects

#### Personnel and Resources:

- Number of participants
- Number of volunteers for scene setup, victims, etc.
- Types and numbers of equipment
- Communications equipment
- Fuel for vehicles and equipment
- Materials and supplies
- Expenses identified (wages, overtime, fuel, materials and supplies)

#### Response Capability

- Sufficient personnel kept in reserve to handle routine nonexercise events

#### Safety

- Safety addressed through development
- Each design team member responsible for safety in own discipline
- Hazards identified and resolved
- Safety addressed in preexercise briefing, simulator and evaluator packets
- Each field location examined for safety issues
- Safety officer designated, given authority

#### Legal Liability

- Legal questions of liability researched by local attorney

#### Emergency Call-Off

- Call-off procedure in place, including code word/phrase
- Call-off procedure tested

#### Media

- Role of media addressed in planning, used as a resource to gain favorable exposure
- Media and observers considered in logistical planning

Activity

**Activity: Plan Ahead for the Full-Scale Exercise**

*Think about your organization or jurisdiction in relation to the special design considerations just discussed. Are there special problems you may need to work around when designing a full-scale exercise? Do you have ideas about how to make use of particular situations or locations? (Remember the description in Unit 1 of the building collapse exercise that was built around the planned destruction of a sports arena in Denver.)*

*In the space below, record notes that will help you remember your ideas about planning for a full-scale exercise in the future.*

### Summary and Transition

Unit 7 was the third of three units providing in-depth information about specific types of exercises. This unit provided information about the full-scale exercise, including key characteristics and special planning considerations. The next unit will focus on exercise evaluation.

### For More Information

## Knowledge Check

Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.

1. A full-scale exercise involves:
  - a. All levels of personnel, including response personnel.
  - b. Primarily the key policy and decision makers.
  - c. Policy, coordination, and operations personnel.
  - d. The staff from one department or unit.
2. In a full-scale exercise, simulators:
  - a. Are not required.
  - b. Have a somewhat different role than in a functional exercise.
  - c. Have the same role as in a functional exercise.
  - d. Play the roles of all field personnel.
3. In a full-scale exercise the narrative is largely replaced by:
  - a. Scripted messages.
  - b. The exercise directive.
  - c. A staged scene representing the emergency.
  - d. The Player Handbook.
4. \_\_\_\_\_ is a good use of a full-scale exercise.
  - a. Testing emergency procedures and coordination of multiple agencies or organizations
  - b. Trying out a new and untested emergency plan
  - c. Training personnel in negotiation
  - d. Practicing group problem solving in a nonthreatening environment
5. A full-scale exercise:
  - a. Does not use prescribed messages.
  - b. Uses only visual and action messages.
  - c. May include visual, action, and prescribed messages.
  - d. Uses the visual narrative in place of messages.
6. In a full-scale exercise, all decisions and actions by players occur in real time and generate real responses and consequences from other players.
  - a. True
  - b. False

**Knowledge Check (Continued)**

7. The best way to begin a full-scale exercise is to gather all of the participants in a central location for a briefing that explains the objectives, roles, responsibilities, and ground rules.
  - a. True
  - b. False
  
8. \_\_\_\_\_ is a major difference between full-scale and functional exercises.
  - a. Formal evaluation
  - b. Lead role of the controller
  - c. Activation of the EOC
  - d. Field-based action
  
9. Because field actions lead to decisions and further action in a full-scale exercise, it is unnecessary to develop a list of major and detailed events.
  - a. True
  - b. False
  
10. If you want to test response to a terrorist bomb attack, a good approach would be to stage an unannounced full-scale exercise at a sports arena during a professional game attended by thousands of spectators.
  - a. True
  - b. False
  
11. In designing a full-scale exercise, it is usually advisable to exclude the media and the public.
  - a. True
  - b. False

### Knowledge Check (Continued)

1. a
2. b
3. c
4. a
5. c
6. a
7. b
8. d
9. b
10. b
11. b

**Unit 8: Exercise Evaluation**

## Introduction

**Evaluation** is the *process of observing and recording exercise activities, comparing the performance of the participants against the objectives, and identifying strengths and weaknesses.*

Evaluation is a very complex topic, and this unit provides only a very general overview. In this unit, we will briefly discuss the importance of evaluation and its relationship to exercise development, evaluation team structure and duties, key aspects of evaluation methodology, and evaluation tasks that happen after the exercise is finished.

## Unit 8 Objectives

After completing this unit, you should be able to:

- Describe the need for a systematic approach to exercise evaluation.
- Identify and explain the tasks in the exercise evaluation process.

### **Integrating Evaluation Throughout Development**

As you have seen in the previous units, exercise development is a continuous process that begins long before the exercise and continues after the exercise is over. It continues until needed changes have been made and suggestions have been incorporated into the next exercise.

Evaluation is not something that is done when all of the action is over. It begins when exercise design begins, when objectives are developed. You encountered the following chart in Unit 3. Notice again the kinds of evaluation activities that occur in the three exercise phases. In the remainder of this unit, we will take a brief look at each of the major evaluation activities listed in this chart.

| <b>Task Categories</b> |                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                 |                                                                                                                                                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        | <b>Preexercise Phase</b>                                                                                                                                                                                                                                                                                                          | <b>Exercise Phase</b>                                                                                                                                                           | <b>Postexercise Phase</b>                                                                                                                                                                                               |
| <b>Design</b>          | <ul style="list-style-type: none"> <li>▪ Review plan</li> <li>▪ Assess capability</li> <li>▪ Address costs and liabilities</li> <li>▪ Gain support/Issue exercise directive</li> <li>▪ Organize design team</li> <li>▪ Draw up a schedule</li> <li>▪ Design exercise (8 design steps, including developing objectives)</li> </ul> | <ul style="list-style-type: none"> <li>▪ Prepare facility</li> <li>▪ Assemble props and other enhancements</li> <li>▪ Brief participants</li> <li>▪ Conduct exercise</li> </ul> |                                                                                                                                                                                                                         |
| <b>Evaluation</b>      | <ul style="list-style-type: none"> <li>▪ Select evaluation team leader</li> <li>▪ Develop evaluation methodology</li> <li>▪ Select and organize evaluation team</li> <li>▪ Train evaluators</li> </ul>                                                                                                                            | <ul style="list-style-type: none"> <li>▪ Observe assigned objectives</li> <li>▪ Document actions</li> </ul>                                                                     | <ul style="list-style-type: none"> <li>▪ Assess achievement of objectives</li> <li>▪ Participate in postexercise meetings</li> <li>▪ Prepare evaluation report</li> <li>▪ Participate in followup activities</li> </ul> |

## Why Evaluate the Exercise?

For an emergency management system to be effective, it is critical that the personnel, plans, procedures, facilities, and equipment be exercised and tested on a regular basis. Yet no amount of exercising will be constructive unless each exercise is followed by a structured evaluation that enables the emergency management organization to identify successes and shortfalls.

Good evaluation can help the organization identify:

- Whether the exercise has achieved its objectives.
- Needed improvements in the EOP, procedures, or guidelines.
- Needed improvements in the emergency management system.
- Training and staffing deficiencies.
- Needed operations equipment.
- Need for continued exercising of the plan and the emergency management functions.

If these goals are to be met, the evaluation approach must be systematic—methodical in procedure, thorough, and organized.

## **The Evaluation Team**

In the early stages of exercise design, a number of people will be brought together into a design team, led by a design team leader or exercise director. One member of this team will become the evaluation team leader, or chief evaluator, and this person will in turn select the members of the evaluation team.

### **Team Structure**

The size and composition of the evaluation team will depend on the type of exercise, its complexity, and the availability of people to serve. A small exercise with limited objectives, few participating organizations, and only a few locations might need only a team leader and three to six evaluators. A group this small would report directly to the team leader.

A large full-scale exercise might require an evaluation director to supervise several team leaders at different sites—who in turn supervise several evaluators. With a team of this size, the various evaluators would be assigned to serve at selected sites and a means of coordination or communication set up among them. An organizational chart would be helpful to keep lines of authority straight.

### **Role of the Team Leader**

**What?** The evaluation team leader is primarily responsible for the evaluation methodology, for selecting and training the evaluation team, and for preparing the evaluation report.

**Who?** Ideally, the team leader should have experience in evaluation, management, exercise design or participation, and training or education. Normally, he or she should be a member of the design team. In some cases, it might be necessary to bring in someone from outside the design team, although that is usually unnecessary if a volunteer training and exercise officer is on the design team and is willing to serve. (Other design team members are likely to be too heavily involved in developing the exercise.)

**The Evaluation Team (Continued)**

**When?** Selecting the evaluation team leader as early in the design process as possible has several advantages:

- It will ensure that the evaluation becomes an integral part of the exercise development effort.
- It will maintain the integrity of the evaluation function and prevent it from overlapping with the control and simulation functions.
- It will ensure that at least one person can devote time and mental effort to the large task of evaluation.

**Selection of Team Members**

The evaluation team leader is responsible for selecting and training the evaluation team. The ideal evaluator has many skills and personal attributes. Although it may not be possible to find a person who has all of these characteristics, the team leader will be looking for the following:

| <b>Skills</b>                                                                                                                                                                                                                                                                                                                     | <b>Attributes</b>                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>▪ Appropriate technical expertise in evaluation</li> <li>▪ Communication skills, both verbal and written</li> <li>▪ Organizational ability</li> <li>▪ Ability to see the relationship between events and objectives</li> <li>▪ Ability to adjust to rapidly changing situations</li> </ul> | <ul style="list-style-type: none"> <li>▪ “People skills,” sensitivity</li> <li>▪ Objectivity</li> <li>▪ Self-motivation</li> <li>▪ Willingness to help</li> <li>▪ Honesty and integrity (reports facts truthfully, keeps information confidential)</li> <li>▪ Familiarity with the plan</li> </ul> |

Often an evaluation team can be assembled by using a little imagination and beating the bushes. Evaluators can be drawn from various sources, including:

- Neighboring jurisdictions.
- Emergency services personnel who will not be playing in the exercise.
- Professional evaluators.
- State or Federal personnel.
- College or university faculty.
- Public service organizations.

## **The Evaluation Team (Continued)**

### **Training of Team Members**

The training of an evaluation team usually can be done in an orientation meeting. The nature and length of the meeting will depend on the experience and skill of the members. Most evaluators—no matter how experienced—will need information on:

- The exercise scenario.
- Rules of play.
- The objectives.
- Evaluation requirements and procedures.
- Evaluation forms.

Inexperienced evaluators may need some practice drills. Evaluators from outside the organization/jurisdiction will need information about the organization/jurisdiction.

#### **Try to Be Unobtrusive**

It is well documented that the presence of an evaluator can affect the behavior of those being observed, possibly resulting in inaccurate data. Therefore, the evaluation team should plan ways to observe that are as unobtrusive as possible. Examples include:

- Being in position when the exercise begins so as not to attract attention.
- Postponing taking notes for a few minutes until players get involved in the play and stop noticing them.

## Evaluation Methodology

Evaluation methodology is simply the procedures and strategy used to evaluate an exercise. The methodology includes:

- How the evaluation team will be structured.
- Objectives to be measured.
- Evaluation packet.

## Defining the Team Structure

Aspects of the team structure will have a significant impact on how the evaluation proceeds. Therefore, decisions such as the following are an important part of the methodology:

- Number of evaluators and their evaluation-related experience and knowledge.
- Organization of evaluators at multiple sites (i.e., subteams).
- Lines of authority (e.g., evaluators, supervisors or team leaders, chief evaluator).
- Communication and coordination among team members.

## Evaluation Criteria

One of the first steps in developing the methodology is to determine the criteria that will be used to determine if the exercise is successful. These criteria are tied to the objectives and expected actions.

At the outset of exercise design, the general objectives are defined. Then, in developing the scenario, the general objectives are broken into smaller units—the expected actions. From the expected actions, specific points of review and other evaluation measures can be developed.

### Evaluation Methodology (Continued)

As discussed in Unit 4, the objectives must be stated clearly and precisely, describing actions that can be observed and measured. Using the SMART system will ensure that objectives are:

- Simple.
- Measurable.
- Achievable.
- Realistic.
- Task-oriented.

You may wish to review the material in Unit 4 now to refresh your memory about the important elements of good objectives.

### Evaluation Packet

The evaluation packet, or Evaluation Plan, contains all plans for the collection of data, including objectives and points of review, checklists or other evaluation forms, and observation techniques. A sample Evaluation Plan, with instructions for customizing it for a specific exercise, is provided in the *Exercise Design* Tool Box, available at <http://training.gov/emiweb/IS/is1391st.asp>.

Data can be collected by various means, such as evaluation forms, running written narrative, audiotape, or videotape. Each method has advantages and disadvantages, which should be considered in developing the methodology. Some suggestions are on the next page.

Evaluation Methodology (Continued)

Suggested Evaluation Strategies

- **Plan the observation process.** One approach is to use these four steps:
  1. Recall the specific objectives of the exercise, the detailed events, and the actions or decisions that they suggested.
  2. Identify the players expected to take the actions or make decisions as those who should be observed.
  3. Locate evaluators in a position to observe the players.
  4. Brief the evaluators on what actions or decisions are expected.
- **Provide points of review** to guide evaluators. They make it possible to be very objective in collecting data.

Example:

**Objective:** Demonstrate the adequacy of displays to support the emergency operations during the exercise.

| Points of Review:                     | YES   | NO    |
|---------------------------------------|-------|-------|
| ▪ Status boards available in facility | _____ | _____ |
| ▪ Status boards utilized              | _____ | _____ |
| ▪ Status boards kept updated          | _____ | _____ |
| ▪ Maps available                      | _____ | _____ |
| ▪ Maps up to date                     | _____ | _____ |

- **Provide evaluation forms.** They may include simple questionnaires, checklists, or rating sheets on which observations are recorded. They need not be complicated, but they must be objective, simple, and specific.

**Evaluation Methodology (Continued)**

The following table illustrates a checklist for carrying out the four observation steps. (**Note:** This checklist also appears as Job Aid 19 in Appendix A.)

| <b>Sample Observation Checklist</b>      |                                                |                                          |                    |                      |
|------------------------------------------|------------------------------------------------|------------------------------------------|--------------------|----------------------|
| <b>Objective</b>                         | <b>Action/Decision to Look For</b>             | <b>Players to Observe</b>                | <b>Where</b>       | <b>Expected Time</b> |
| Notify principals                        | Activate “call-down” procedure                 | Superintendent                           | In EOC, school     | 10:15                |
| Emergency contact of bus drivers         | “Call-down” procedure—phone                    | Transportation Supervisor                | EOC, School player | 11:05                |
| School closure announcements on TV/radio | Message preparation and distribution           | Superintendent, Emergency Manager, Media | EOC, Media player  | 11:10                |
| Open cafeteria and gym for shelter       | Notify media, opening and supplying facilities | Superintendent, Facilities               | EOC, School player | 12:20                |

**Key Event Monitoring**

Most exercise scenarios include a number of events specifically designed to put stress on selected elements of the plan. These are termed *key events*. Evaluators should pay special attention to these events.

When a key event message is input, the evaluators monitor the participants’ responses to the event. All responses should be noted on a Key Event Response Form. This form provides for multiple responses from several positions within the EOC as well as responses from outside the EOC.

**Problem Log**

The Problem Log allows participants, controllers, and simulators to document any observed action that may possibly create a problem. (While observing, it should be understood by everyone that what may seem to be a plan or procedure problem may actually be a participant or simulator error.)

These potential problems can then be analyzed after the exercise to determine which are serious enough to require corrective action and to determine their source(s)—plan, preparedness, training, or simulation.

## Evaluation Methodology (Continued)

### Sample Forms

Examples of the following forms are provided on the next few pages.  
(**Note:** These forms also appear as Job Aid 20-25 in Appendix A.)

- Evaluator Checklist
- Narrative Summary Form
- Key Event Response Form
- Problem Log
- Exercise Debriefing Log
- Exercise Critique Form

**Narrative Summary**

**Objective Number:** \_\_\_\_\_

**Criterion Number:** \_\_\_\_\_

**Evaluator:** \_\_\_\_\_

**Location:** \_\_\_\_\_

**Issue:**

A specific statement of the problem, plan, or procedure that was observed.

---

---

---

---

---

---

---

---

**Discussion:**

A discussion of the issue and its specific impact on operational capability.

---

---

---

---

---

---

---

---

**Corrective Action Recommendation:**

Recommended course(s) of action to improve performance or resolve the issue to improve operational capability.

---

---

---

---

---

---

---

---

**Narrative Summary (Continued)**

**Office of Primary Responsibility:**

The department, agency, or organization responsible for implementation of corrective actions.

**Department, Agency, or Organization:**

\_\_\_\_\_

**Individual Responsible:**

\_\_\_\_\_

**Title:** \_\_\_\_\_ **Date Assigned:** \_\_\_ / \_\_\_ / \_\_\_ **Suspense Date:** \_\_\_ / \_\_\_ / \_\_\_

## Postexercise Meetings

There are two types of postexercise meetings: The player debriefing and meetings of the evaluation team.

### Player Debriefing

A short exercise debriefing should be conducted with the players immediately after the exercise. This debriefing gives them an opportunity to have their say about how things went, what they think should be changed, and commitments that they might make.

This is how a debriefing generally goes:

- The *controller* conducts the debriefing, beginning with a review of broad objectives and commenting generally on both successes and shortfalls.
- The *controller* asks for a brief response (about 2 minutes each) from each player.
- As *participants* comment on their performance, the controller tries to maintain a balance between positive and negative comments and encourages everyone to contribute. Comments during the debriefing should be recorded for inclusion in the After Action Report. An Exercise Debriefing Log may be used for this purpose. An example is provided at the end of this section.

### Postexercise Meetings (Continued)

- The debriefing is for exercise participants. If *evaluators* wish to say a few words, they should concentrate on all the positive aspects of the exercise.
- It is a good idea to prepare a simple *questionnaire* (such as the Exercise Critique Form) for participants to fill out after the exercise. People who hesitate to enter into group discussions will often respond to a questionnaire. One possible format is a set of objective questions requiring only a check mark response, along with some open-ended questions about the performance in general (e.g., “What was good or bad about the notification procedure?”).

#### Keeping the Debriefing on Track

The purpose of the debriefing is to examine player performance. However, players will often want to critique the exercise itself: It was too long, too short, had too many or too few messages. The goal is to keep the players on track, focusing on performance insofar as possible. Explain that they will have an opportunity later to provide input into exercise design.

Briefly review the Exercise Debriefing Log and Exercise Critique Form on the following pages. **Note:** These forms also appear as Job Aids 24 and 25, respectively, in Appendix A.

Exercise Debriefing Log

| Exercise Debriefing Log |                    |                           |
|-------------------------|--------------------|---------------------------|
| Exercise _____          | Recorder _____     | Date _____                |
| Problem Summary         | Recommended Action | Responsible Agency/Person |
|                         |                    |                           |
|                         |                    |                           |
|                         |                    |                           |
|                         |                    |                           |
|                         |                    |                           |
|                         |                    |                           |
|                         |                    |                           |

**Exercise Critique Form (Continued)**

5. The following problems should be deleted or revised:

6. I suggest that you add the following problems for the next exercise.

7. Please add any other comments or suggestions.

## **Postexercise Meetings (Continued)**

### **Evaluation Team Meetings**

Evaluation team meetings are held to analyze the exercise and prepare the After Action Report. Evaluation team meetings may include:

- A meeting of the evaluation team(s) shortly after the exercise to compare notes.
- A more formal meeting of the team a week or so later to analyze the findings and develop an accurate account of what worked and what did not. The team analyzes evaluation responses and any other data, and discusses how well each of the objectives was met.
- Additional meetings as needed to analyze data and prepare the report. The exercise design team may join the evaluation team at one or more meetings to offer feedback and suggestions. The report should be prepared within one to three weeks after the exercise, while memories are still fresh.

### **After-Action Report**

The findings of the evaluation team meetings are compiled in the after-action report, which documents the effectiveness of the exercise. It serves as the basis for planning future exercises, upgrading the EOP or contingency plan, and taking corrective action.

The after-action report is the responsibility of the evaluation team leader or chief evaluator, working with the evaluation team.

### **Form**

The report may take a variety of forms. For example, a small exercise may warrant only a brief summary of the minutes of the player debriefing, followed by a few recommendations. Sometimes a memo will do the job. For large exercises—particularly functional or full-scale exercises—the report should be specific and comprehensive.

### **Format**

There is no set organizational plan for an after-action report. However, the topics listed in the following outline are usually covered.

## After-Action Report (Continued)

### Sample Report Outline

- **Introduction**  
(Main purpose of the report, why it is being submitted, preview of main topics, evaluation methodology used, and perhaps a general summary of main problems and recommendations.)
- **Statement of the Problem**  
(Purpose of the exercise)
- **Exercise Summary**  
Goals and Objectives  
Preexercise Activities  
Participants and Agencies  
Description of Exercise Scenario
- **Accomplishments and Shortfalls**  
Evaluation Group Findings  
Summary of Postexercise Debriefing
- **Recommendations**  
Training Needs  
Changes in the Emergency Plan  
Other Corrective Actions

A copy of the after-action report should go to the chief elected official of the jurisdiction (or head of the organization involved) and each participating entity.

### Other Reporting Requirements

Other types of exercise reports are often required by agencies mandating exercises. Often they are simple checklists which require less time to prepare than a full written report. Check with the appropriate regulatory agencies for specific reporting requirements.

## Implementing Change

Recommendations for the future are the whole reason for conducting the exercise. The goals of an exercise are not achieved until the recommendations that come out of the evaluation are implemented. The purpose of the evaluation is to improve the emergency management plan and the organization's performance in carrying out that plan.

This is most likely to occur if objectives relate clearly to emergency functions and the focus of the evaluation is on performance, not people. Specifically, the change effort centers around these issues:

- Are the procedures sound?
- Are resources sufficient to support the procedures?
- Are personnel adequately trained to follow the procedures and use resources?

**Remember: We test plans, but we train people.**

## Summary and Transition

Unit 8 provided a general overview of the process for evaluating exercises. The next unit discusses materials and methods for enhancing an exercise simulation.

## For More Information

FEMA exercise evaluation courses:

- Exercise Evaluation Course (G130):  
<http://training.fema.gov/emiweb/nrcrs.htm>
- Radiological Emergency Preparedness Exercise Evaluation (E304):  
<http://training.fema.gov/emiweb/rclist2002.htm>

**Knowledge Check**

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.*

1. Good evaluation can help the organization identify:
  - a. Training and staffing deficiencies.
  - b. Qualified members of the evaluation team.
  - c. Exercise objectives.
  - d. The scope of the exercise.
  
2. Evaluation begins when the exercise gets underway—usually when the narrative is presented.
  - a. True
  - b. False
  
3. It is usually best to keep the design team and the evaluation team separate and to bring in an outside evaluation team leader.
  - a. True
  - b. False
  
4. Every exercise should have an evaluation director, several teams of evaluators headed by team leaders, and a means of communicating among the teams.
  - a. True
  - b. False
  
5. The evaluation team leader is primarily responsible for the evaluation methodology, selecting evaluation team members, training the team, and preparing the evaluation report.
  - a. True
  - b. False
  
6. During the exercise, evaluators should:
  - a. Ensure that players are aware of when they are being observed.
  - b. Offer suggestions that can improve the exercise results.
  - c. Focus on the positive.
  - d. Avoid attracting players' attention.

**Knowledge Check (Continued)**

7. One thing evaluators should focus on during an exercise is:
  - a. Explaining evaluation methodology to the players being observed.
  - b. Having players explain their reasons for actions taken.
  - c. Noting what actions are taken in response to key events.
  - d. Finding as many positive points as negative ones.
  
8. A constructive evaluation strategy would be to have players, simulators, and controllers document problems they observe during the exercise.
  - a. True
  - b. False
  
9. The main purpose of the postexercise debriefing is:
  - a. To inform the participants of the evaluation results.
  - b. To give the players a chance to comment on the exercise performance.
  - c. To obtain feedback on the exercise design.
  - d. To prepare the After Action Report.
  
10. The \_\_\_\_\_ documents the effectiveness of the exercise and serves as the basis for taking corrective actions.
  - a. Evaluation Plan
  - b. Problem Log
  - c. After Action Report
  - d. Evaluator Checklist

### Knowledge Check (Continued)

1. a
2. b
3. b
4. b
5. a
6. d
7. c
8. a
9. b
10. c

**Unit 9: Exercise  
Enhancements**

## **Introduction**

Sometimes creativity is the difference between an adequate exercise design and one that really gets the participants excited and involved. This unit discusses the various ways in which you can enhance an exercise with equipment, displays, people, props, and other strategies.

## **Unit 9 Objectives**

After completing this unit, you should be able to:

- Define the purpose of exercise enhancements.
- Identify resources available for exercise enhancement.
- Describe the benefits of specific exercise enhancement techniques.

## Why Use Enhancements?

The point of an exercise is to simulate an emergency as realistically as the type of exercise warrants. The more realistic the scenario, the setting, the atmosphere, and the equipment and materials made available to the participants, the more likely it is that the players will “get into” the action and get the most out of it.

A variety of exercise enhancements can help achieve this realism. In a drill or full-scale exercise, the use of real equipment and actual locations is inherently realistic. Added touches—such as simulated victims with convincing mock injuries—can make a functional or full-scale exercise even more realistic.

A tabletop or functional exercise must rely on materials and devices that you can bring into a room to make the exercise more realistic.

It's not necessary to spend a lot of money or energy to enhance realism. Resources can include ordinary items that are currently available in the operations center or command post, or common items that can be easily obtained.

### Creativity

Creativity is the key to good enhancements. There are many low-cost creative approaches you can try. Here are some examples:

- Videotape simulated “news broadcasts” depicting the disaster and taped interviews with “victims.” Show these prerecorded clips as part of the exercise.
- Audiotape news broadcasts and play them on the radio.
- Use make-up and props to simulate injuries.
- Use computers to chart plumes and provide data on river flows.
- If the telephone system is down as part of the exercise, leave the telephones in the EOC but don't connect them.
- If power is supposed to be out, then actually run a backup generator. Turn off the lights and computers if they're not hooked up to the generator. (Of course, this can disrupt the real office work flow, but it will result in a more realistic exercise.)

These are just a few examples to get your creative juices flowing. We'll discuss more ideas in the remainder of the unit, and you will undoubtedly have ideas of your own. That's the whole idea!

## Communications Equipment

Various types of electronic equipment can be used to communicate the narrative and advance the scenario. Communications equipment can also be used to transmit some of the messages from simulators. In a highly simulated exercise, such as a complex functional exercise, try to transmit messages as you would in a real emergency—by phone, radio, and TV.

### Take Advantage of What's Available

There are always financial limitations, so plan to make use of the communications equipment that your community normally has available during an emergency. Consider the following:

- Landlines and cellular telephone
- Radio phones and portable/handheld radios
- Hotline dedicated phones
- Military phone hookups
- Citizens' Band (CB)
- Teletype systems and fax machines
- Amateur Radio Emergency Service (ARES) and Radio Amateur Civil Emergency Service (RACES)
- Monitors/scanners
- National Oceanic Atmospheric Administration (NOAA) Weather Radio
- National Warning System (NAWAS)
- Computerized Radio Packet

**Visuals**

No exercise is complete without a collection of visuals and displays: Maps, charts, status boards, black or white boards, chart paper and easels, and the like. Videotapes and slides, although more difficult to obtain, can also enhance the realism of your exercise.

**Maps**

**Uses:** Maps provide context and detail for a scenario. Because they are essential to the handling of an actual disaster, they are necessary for all types of exercises. Even in an orientation or a tabletop exercise, maps provide useful information and give players a clearer picture of the simulated event. For example, they may be used to position equipment or to determine the nearest facilities for resource deployment.

**Formats:** Maps may be reproduced on paper for individual use or displayed on a wall. Acetate overlays make it possible to mark off areas or monitoring points and to reuse the map.

**Types:** The types and number of maps required depends on the exercise type and the hazard being tested. Below is a partial list of maps that you may find useful.

| <b>Types of Maps</b>                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>▪ City street maps</li> <li>▪ County street maps</li> <li>▪ Subdivision maps</li> <li>▪ Sewer maps (mains/facilities)</li> <li>▪ Water maps (mains/facilities)</li> <li>▪ Electric maps (lines/facilities)</li> <li>▪ Gas maps (lines/facilities)</li> </ul> | <ul style="list-style-type: none"> <li>▪ Flood plain maps</li> <li>▪ Contour maps</li> <li>▪ Police and fire district maps</li> <li>▪ Center city (downtown) maps</li> <li>▪ Facility maps (plant layout, rail yards, etc.)</li> <li>▪ Weather maps</li> </ul> |

**Sources:** Good maps can be obtained from a number of agencies. Before trying your hand as a cartographer, try local municipal agencies such as the City Planning Commission, Department of Highways, Engineering Department, Public Works, etc. The U.S. Geological Survey (USGS) is another good source of maps related to earthquakes. FEMA's National Flood Insurance Program has flood maps. NOAA has weather maps, satellite weather imagery, and weather photos.

**Visuals (Continued)**

**Charts Used in Exercises**

The accumulation and sharing of information is an important operations center function. To ensure coordinated and timely emergency response, visual displays allow everyone to comprehend quickly what actions have been taken and what resources and personnel are available.

Display needs will vary with the nature and scope of the exercise, but the charts listed below should be considered. Some displays are for use of the exercise staff only.

| Type of Chart                            | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Problem and Event Log</b>             | <ul style="list-style-type: none"> <li>▪ Large events display board for posting major events</li> <li>▪ Should be available for all in the EOC to review, also useful for EOC shift-change briefings</li> <li>▪ All major problems that are reported are entered on the log as they are received</li> <li>▪ May be divided into columns: Nature of problem, problem number, assignment, response, remarks</li> </ul>                                                                                                                                                                                                                                                                                                                                             |
| <b>Damage Assessment Chart</b>           | <ul style="list-style-type: none"> <li>▪ Divided into columns: Areas reporting damage, time of report, extent of damage</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Facility Charts and Status Boards</b> | <ul style="list-style-type: none"> <li>▪ Used to track facilities involved in the exercise so participants are aware of available resources (companion maps are useful); examples of facility charts:               <ul style="list-style-type: none"> <li>• Hospitals: Beds available, blood and other supply needs, personnel</li> <li>• Congregate care facilities (e.g., those run by Red Cross or social service agencies): Space available; status of food, water, bedding, medical stocks</li> <li>• Law enforcement resources: Numbers and locations of sworn, reserve, and auxiliary personnel; status of mutual aid units</li> <li>• Fire resources: Deployment and availability of fire units, status of fire mutual aid forms</li> </ul> </li> </ul> |

| <b>Master Scenario of Events List</b>    | <ul style="list-style-type: none"> <li>▪ Mainly for controller's use, to keep exercise on schedule; should not be seen by players</li> <li>▪ Contains detailed sequence of events developed as part of scenario</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Simulation Plotting Map</b>           | <ul style="list-style-type: none"> <li>▪ Used by controller and simulators</li> <li>▪ Depicts prescribed input exercise information</li> <li>▪ Coded markers may be used to depict actions taken by various organizations (police, fire, medical/health, public works, utilities, Red Cross/voluntary agencies)</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## **Visuals (Continued)**

### **Videotapes and Slides**

Videotapes can provide a very realistic presentation of an emergency that can be used to introduce the narrative or to give updates. News reports and interviews with politicians and the public can be prerecorded to lend realism. Slides can be used for some of the same purposes.

### **Computer Resources**

Many communities have their resources on a computerized inventory list. Where available, this inventory should be used during conduct of exercises to track resources.

### **Miscellaneous Equipment and Supplies**

Sometimes exercise planners are so focused on the dramatic aspects of the exercise that they overlook common equipment and materials. Many of these items, available in most office stores at little cost, are indispensable.

#### **Equipment and Supplies to Consider**

- Projector for overhead transparencies or slides
- Copy machine
- Portable radio
- Pagers and cellular phones
- Public address system
- Pens, pencils, and markers
- Chart paper
- Telephone books and directories
- Local and state contact lists
- EOC phone directory
- List of cellular phone numbers
- Name tags
- Resource lists
- Financial cost report form

## People and Props

In a full-scale exercise, the sense of reality occurs through the use of actual equipment in the actual setting. In this setting, fire trucks and the local airport would be considered types of enhancements.

Designers of full-scale exercises also bring in real people or props to enhance the realism. For example, an exercise simulating a hotel fire could use:

- People playing the part of victims, made up to appear injured.
- Mannequins to represent the dead (or victims trapped under heavy beams).
- Fake smoke.
- Burnt boards and beams strategically placed at the event site.
- A contained fire that the fire department would be required to extinguish.

Some jurisdictions use considerable ingenuity in these matters—creating model cities to use in tabletop exercises or obtaining mannequins to substitute for humans in dangerous situations (e.g., trapped under a beam).

Such enhancements are limited only by budget, safety considerations, and the imagination. So let your creativity work to enhance the exercise you are planning!

**Enhancement Resources**

One of the problems that designers often face is how to obtain materials, people, and equipment that lend realism without breaking a very small budget. Consider soliciting volunteers and donations from other agencies in the community. Many are civic-minded and are happy to help out by lending equipment or providing volunteers to serve as victims. Below are some places to begin.

| <b>Potential Resources</b>                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>▪ Hospitals</li> <li>▪ Schools and colleges</li> <li>▪ Business and industry</li> <li>▪ Chemical Transportation Emergency Center (CHEMTREC)</li> <li>▪ Boy and Girl Scouts</li> <li>▪ Search and rescue volunteers</li> <li>▪ Agencies</li> <li>▪ Railroads</li> <li>▪ The Salvation Army</li> <li>▪ Public transportation</li> </ul> | <ul style="list-style-type: none"> <li>▪ Fire departments</li> <li>▪ Police departments</li> <li>▪ Chemical companies</li> <li>▪ Amateur radio clubs</li> <li>▪ Religious organizations</li> <li>▪ National Guard/Military</li> <li>▪ The American Red Cross</li> <li>▪ Service organizations (Elks, Lions, Rotary, etc.)</li> </ul> |

**Costs and Liability**

In obtaining resources, it is important to consider costs (both initial and hidden) and the potential for liability. For example, consider:

- Person hours expended in obtaining and returning equipment or materials.
- Potential for damage or replacement costs.
- Arrangements for timely returns when items are borrowed or volunteers are “on loan.” (Too often “victims” have been left at the scene of the emergency site or the hospital because transportation plans were not made.)
- Safety and liability concerns when using people and equipment. Be sure that provisions are in place for liability insurance and equipment replacement.

## **Enhancement Logistics**

In planning for exercises, someone needs to take responsibility for managing the logistics related to enhancements. Be sure that the following questions are answered:

- How will enhancements be used?
- Where will props be placed?
- Who will be in charge of props?
- How will people and props be picked up, transported, and returned?
- What kind of return policy can be worked out for borrowed materials and equipment?
- In what condition must equipment be returned?
- Who will clean it?
- Is normal wear a concern?

Activity

**Activity: Enhance a Scenario**

*Read the following scenario. What exercise enhancements could be used to add to the realism of this exercise? Write your ideas on the next page.*

**Functional Exercise: Potential Airplane Crash**

**Participating organizations:** Local dispatch, fire, police, search and rescue, EMS, emergency manager, mayor, airport crash/fire rescue, public works, hospital

**Location:** Your EOC or operations center

A jumbo jet that has experienced an inexplicable in-flight engine problem en route from Panama to New York will need to make an emergency landing at a large airport along the route. Though plans have been made to land at a city 200 miles north that is suitable for landing an aircraft this size, the latest communication with the pilot indicates that the plane has lost engine power and is losing altitude too quickly to reach the airport. Although the runway at your airport is too short to accommodate a jumbo jet, the only hope to save any of the 285 passengers and crew is to attempt a landing here.

Conditions at the airport are clear, but the surrounding area is very dry as a result of a continuing drought, and a hot, dry wind is blowing.

The airport is in a suburban area. The likelihood of the pilot being able to control the huge plane and land within the runway limits is slim. The glide path passes over several high-density suburban housing developments.

The airport control tower has alerted its own crash/fire rescue (CFR) units and has requested that local emergency service units provide fire, police, medical, and search and rescue assistance.

Garbled radio communication from the airliner alerts the airport control tower that the plane's hydraulic system is not functioning. The pilot's last message indicates that he will be attempting a soft-impact landing, but the plane breaks apart, crashing into the housing development and sending debris and bodies over an area of approximately one square mile. Smoke is visible in the area. A major part of the fuselage is at the beginning of the runway. CFR units are proceeding to the main crash site. All available resources are en route. Traffic is at a standstill on the only roads leading to the site, however.

**Activity: Enhance a Scenario (Continued)**

What enhancements could be used to increase the realism of this scenario? Write your ideas below.

| Possible Enhancements |
|-----------------------|
|                       |

**Activity: Enhance a Scenario (Continued)****Suggested Answers**

The following enhancements would contribute to the realism of this scenario. However, there are many ways to enhance an exercise, and you may have other ideas.

- City street maps.
- Subdivision maps for affected residential areas.
- Airport map.
- Fire district maps.
- Map/diagram of crash area, staging areas, command posts, ingress/egress routes (Acetate overlay for updating movement of equipment and personnel are suggested.)
- Resource status board showing available equipment (types, numbers) and assigned locations. (Computerized tracking if available.)
- ICS organization chart.
- Damage assessment chart.
- Communications equipment to simulate communications among all involved agencies.
- Prerecorded audiotape of pilot's transmissions to tower.
- Prerecorded background-noise audiotape of crash site (sirens, fire, voices, etc.) for atmosphere (Could be accompanied by a prerecorded video footage of firefighting, smoke.)
- Master Scenario of Events List.
- Simulation plotting map.

## Summary and Transition

Unit 9 provided information about the types of enhancements that can be added to increase the realism of an exercise, including communications equipment, maps, charts, display boards, computer resources, videotapes and slides, miscellaneous equipment and supplies, people and props. In the next unit, you will have an opportunity to develop a functional exercise using the information and job aids provided throughout the course.

**Knowledge Check**

*Carefully read each question and all of the possible answers before selecting the most appropriate response for each test item. Circle the letter corresponding to the answer that you have chosen.*

1. The purpose of exercise enhancements is to:
  - a. Increase credibility with the public and the media.
  - b. Make the exercise more fun so more personnel will participate.
  - c. Increase the realism so participants will respond as they would in a real event.
  - d. Make it easier on the controller and the simulators.
  
2. In most tabletop and functional exercises, messages can't be transmitted without sophisticated communications equipment.
  - a. True
  - b. False
  
3. Because they are essential to the handling of an actual emergency, maps are necessary for all types of exercises.
  - a. True
  - b. False
  
4. \_\_\_\_\_ are an important enhancement because they allow everyone to comprehend quickly what actions have been taken and what resources and personnel are available.
  - a. Charts
  - b. People and props
  - c. Slides
  - d. Audiotapes and videotapes
  
5. It is a good idea to seek out potential sources of materials, people, and equipment in the local community to enhance an exercise.
  - a. True
  - b. False

**Unit 10: Designing a  
Functional Exercise**

---

## Introduction

In this unit you will put together all of the skills and knowledge that you have learned from previous units and develop a functional exercise. In Unit 4, you learned the eight exercise design steps:

1. Assess needs.
2. Define scope.
3. Write a statement of purpose.
4. Define objectives.
5. Compose a narrative.
6. Write major and detailed events.
7. List expected actions.
8. Prepare messages.

You have already practiced applying each of the design steps individually. Now you will put these steps together in one coordinated process. As an option, you may also develop the four major exercise documents (templates for which are found in the Exercise Design Toolkit at <http://training.fema.gov/emiweb/IS/1391st.asp>):

- Exercise Plan
- Control Plan
- Evaluation Plan
- Player Handbook

### Unit 10 Objective

After completing this unit, you should be able to:

- Design a small functional exercise using the eight-step design process.

### Select Your Exercise

In Unit 2, you outlined a comprehensive exercise program for your organization. Review that outline now. If you wish to revise or update the outline, you may do so.

Select a small functional exercise from your comprehensive plan. The exercise that you choose should be fairly small, for the sake of the time required to complete this course activity. If necessary, you may artificially limit a functional exercise in your plan.

If you used a functional exercise as the basis of your abbreviated design activities in Unit 4, you may either use the same exercise here (and develop it now in depth) or select a new one.

When you have selected your exercise, you may proceed with the design steps, as outlined in the remainder of this unit. As you undertake each design step, feel free to go back to earlier units and review the guidelines and examples that are provided.

**Step 1: Assess Needs**

The first step in developing any exercise is to assess the needs of your emergency management program. Indicate below the most pressing problem areas in your community or organization. Base your assessment on your review of the emergency plans and procedures and what you have learned from previous exercises or emergencies.

**Exercise Needs Assessment**

**1. Hazards**

List the various hazards in your community or organization. What risks are you most likely to face? You can use the following checklist as a starting point. **Note:** If your community has already conducted a hazard analysis, that is the best resource.

- |                                                           |                                                  |
|-----------------------------------------------------------|--------------------------------------------------|
| <input type="checkbox"/> Airplane crash                   | <input type="checkbox"/> Sustained power failure |
| <input type="checkbox"/> Dam failure                      | <input type="checkbox"/> Terrorism               |
| <input type="checkbox"/> Drought                          | <input type="checkbox"/> Tornado                 |
| <input type="checkbox"/> Epidemic (biological attack)     | <input type="checkbox"/> Train derailment        |
| <input type="checkbox"/> Earthquake                       | <input type="checkbox"/> Tsunami                 |
| <input type="checkbox"/> Fire/urban conflagration         | <input type="checkbox"/> Volcanic eruption       |
| <input type="checkbox"/> Flood                            | <input type="checkbox"/> Wildfire                |
| <input type="checkbox"/> Hazardous material spill/release | <input type="checkbox"/> Winter storm            |
| <input type="checkbox"/> Hurricane                        | <input type="checkbox"/> Workplace violence      |
| <input type="checkbox"/> Landslide/mudslide               | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Mass fatality incident           | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Radiological release             | <input type="checkbox"/> Other _____             |

**Step 1: Assess Needs (Continued)**

**2. Secondary Hazards**

What secondary effects from those hazards are likely to impact your organization?

- Communication system breakdown
- Power outages
- Transportation blockages
- Business interruptions
- Mass evacuations/displaced population
- Overwhelmed medical/mortuary services
- Other \_\_\_\_\_

**3. Hazard Priority**

What are the highest priority hazards? Consider such factors as:

- Frequency of occurrence.
- Relative likelihood of occurrence.
- Magnitude and intensity.
- Location (affecting critical areas or infrastructure).
- Spatial extent.
- Speed of onset and availability of warning.
- Potential severity of consequences to people, critical facilities, community functions, and property.
- Potential cascading events (e.g., damage to chemical processing plant, dam failure).

**#1 Priority hazard:**

**#2 Priority hazard:**

**#3 Priority hazard:**

**Step 1: Assess Needs (Continued)**

**4. Area**

What geographic area(s) or facility locations are most vulnerable to the high priority hazards?

**5. Plans and Procedures**

What plans and procedures—emergency response plan, contingency plan, operational plan, Standard Operating Procedures (SOPs)—will guide your organization’s response to an emergency?

**6. Functions**

What emergency management functions are most in need of rehearsal? (E.g., what functions have not been exercised recently? Where have difficulties occurred in the past?) You can use the following checklist as a starting point.

- |                          |                                         |                          |                                        |
|--------------------------|-----------------------------------------|--------------------------|----------------------------------------|
| <input type="checkbox"/> | Alert Notification (Emergency Response) | <input type="checkbox"/> | Public Safety                          |
| <input type="checkbox"/> | Warning (Public)                        | <input type="checkbox"/> | Public Works/Engineering               |

**Step 1: Assess Needs (Continued)**

**7. Participants**

Who (agencies, departments, operational units, personnel) needs to participate in an exercise? For example:

- Have any entities updated their plans and procedures?
- Have any changed policies or staff?
- Who is designated for emergency management responsibility in your plans and procedures?
- With whom does your organization need to coordinate in an emergency?
- What do your regulatory requirements call for?
- What personnel can you reasonably expect to devote to developing an exercise?

**8. Program Areas**

Mark the status of your emergency program in these and other areas to identify those most in need of exercising.

|                                   | <b>New</b> | <b>Updated</b> | <b>Exercised</b> | <b>Used in<br/>Emergency</b> | <b>N/A</b> |
|-----------------------------------|------------|----------------|------------------|------------------------------|------------|
| Emergency Plan                    |            |                |                  |                              |            |
| Plan Annex(es)                    |            |                |                  |                              |            |
| Standard Operating Procedures     |            |                |                  |                              |            |
| Resource List                     |            |                |                  |                              |            |
| Maps, Displays                    |            |                |                  |                              |            |
| Reporting Requirements            |            |                |                  |                              |            |
| Notification Procedures           |            |                |                  |                              |            |
| Mutual Aid Pacts                  |            |                |                  |                              |            |
| Policymaking Officials            |            |                |                  |                              |            |
| Coordinating Personnel            |            |                |                  |                              |            |
| Operations Staff                  |            |                |                  |                              |            |
| Volunteer Organizations           |            |                |                  |                              |            |
| EOC/Command Center                |            |                |                  |                              |            |
| Communication Facility            |            |                |                  |                              |            |
| Warning Systems                   |            |                |                  |                              |            |
| Utility Emergency Preparedness    |            |                |                  |                              |            |
| Industrial Emergency Preparedness |            |                |                  |                              |            |
| Damage Assessment Techniques      |            |                |                  |                              |            |

**Step 1: Assess Needs (Continued)****9. Past Exercises**

If your organization has participated in exercises before, what did you learn from them, and what do the results indicate about future exercise needs? For example, consider the following questions:

- Who participated in the exercise, and who did not?
- To what extent were the exercise objectives achieved?
- What lessons were learned?
- What problems were revealed, and what is needed to resolve them?
- What improvements were made following past exercises, and have they been tested?

**Step 2: Define the Scope (Continued)**

4. Types/levels of personnel that you want to have in the exercise:

- Policy making (elected officials, chief operating officers, department heads)
- Coordination (managers, EOC representatives, department deputies)
- Operations (field personnel, headquarters staff level)
- Public representatives (media, PIOs, general public)
- Other: \_\_\_\_\_

5. Types of operations/functions that you want participants to engage in (e.g., notification, evacuation):

6. Degree of stress, complexity, time pressure that the exercise should have:

|               | <b>High</b> | <b>Medium</b> | <b>Low</b> |
|---------------|-------------|---------------|------------|
| Stress        | _____       | _____         | _____      |
| Complexity    | _____       | _____         | _____      |
| Time pressure | _____       | _____         | _____      |

**Step 2: Define the Scope (Continued)**

|                                     |
|-------------------------------------|
| <b>Scope:</b>                       |
| <b>Type of Emergency:</b>           |
| <b>Location:</b>                    |
| <b>Functions:</b>                   |
| <b>Organizations and Personnel:</b> |
| <b>Exercise Type:</b>               |

**Step 3: Write a Statement of Purpose**

Develop your statement of purpose using the following template.

**Statement of Purpose**

The purpose of the proposed emergency management exercise is to improve the following emergency **operations**:

- a. \_\_\_\_\_
- b. \_\_\_\_\_
- c. \_\_\_\_\_
- d. \_\_\_\_\_

by involving the following **agencies/organizations/departments**:

- a. \_\_\_\_\_
- b. \_\_\_\_\_
- c. \_\_\_\_\_
- d. \_\_\_\_\_
- e. \_\_\_\_\_
- f. \_\_\_\_\_
- g. \_\_\_\_\_
- h. \_\_\_\_\_

in a \_\_\_\_\_ exercise simulating a \_\_\_\_\_  
**[type of exercise]** **[type of emergency event]**

at \_\_\_\_\_ on \_\_\_\_\_  
**[location]** **[date]**

**Step 5: Compose a Narrative**

Outline the key points in your narrative using the following worksheet, then compose the script for the initial narrative in your exercise.

| <b>Narrative Outline</b>           |
|------------------------------------|
| Event:                             |
| How fast, strong, deep, dangerous: |
| How you found out:                 |
| Response made:                     |
| Damage reported:                   |
| Sequence of events:                |
| Current time:                      |
| Advance warning:                   |
| Location:                          |

**Step 5: Compose a Narrative (Continued)**

Relevant weather conditions:

Other factors that would influence emergency procedures:

Predictions:

**Step 5: Compose a Narrative (Continued)**

**Narrative Script**

A large, empty rectangular box with a thin black border, intended for the user to write the narrative script. The box occupies most of the page's vertical space below the title.

**Step 6: Write Major and Detailed Events**

In the space provided on the following pages, list events that might occur in your emergency scenario. Break down each of the major events into two or three detailed events.

**Step 7: List Expected Actions**

For each detailed event, write some actions that you would expect from participants involved in the exercise. Be sure to tie them to specific objectives. (**Note:** You may wish to number the detailed events and expected actions for later reference.)

**Step 8: Prepare Messages (Continued)**

|                                                                                                                             |                                                                                                                             |
|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |

**Step 8: Prepare Messages (Continued)**

|                                                                                                                             |                                                                                                                             |
|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |

**Step 8: Prepare Messages (Continued)**

|                                                                                                                             |                                                                                                                             |
|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |

**Step 8: Prepare Messages (Continued)**

|                                                                                                                             |                                                                                                                             |
|-----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> | <p style="text-align: center;"><b>Emergency Exercise Message</b></p> <p>To:</p> <p>Method:</p> <p>From:</p> <p>Content:</p> |

## Planning the Exercise Enhancements

Using the following form, indicate your plans for facilities, displays, materials, equipment, and other exercise enhancements.

### Exercise Enhancements

#### Communications Equipment:

- Hard-line telephone
- Radio phones
- Hot-line dedicated phones
- Portable/hand-held radios
- Cellular telephones
- Military phone hook-ups
- Citizens' Band (CB)
- Teletype systems
- Fax machines
- Amateur Radio Emergency Service (ARES)
- Radio Amateur Civil Emergency Service (RACES)
- Monitors/scanners
- NOAA Weather Radio
- National Warning System (NAWAS)
- Computerized Radio Packet

#### Maps:

- City street maps
- County street maps
- Subdivision maps
- Sewer maps (mains/facilities)
- Water maps (mains/facilities)
- Electric maps (lines/facilities)
- Gas maps (lines/facilities)
- Flood plain maps
- Contour maps
- Police and fire district maps
- Center city (downtown) maps
- Facility maps (plant layout, rail yards, etc.)
- Weather maps

**Planning the Exercise Enhancements (Continued)**

**Charts:**

- Problem and Event Log
- Damage assessment chart
- Facility charts
- Status boards (specify):

- Organization charts
- Simulation plotting map
- Other:

**Other:**

- Computer resources
- Videotapes
- Audiotapes
- Slides
- Projector
- Copy machine
- Portable radio
- Pagers and cellular phones
- Public address system
- Pens, pencils, and markers
- Chart paper
- Telephone books and directories
- Local and state contact lists
- EOC phone directory
- List of cellular phone numbers
- Name tags
- Resource lists
- Financial cost report form

**Activity****Optional Activity: Exercise Design Documents**

Using the templates provided in the Exercise Design Tool Box (see the “Templates” directory), develop the following documents for the functional exercise you have just designed:

- Exercise Plan
- Control Plan
- Evaluation Plan
- Player Handbook

### **Summary and Transition**

Unit 10 provided an opportunity for you to apply the entire exercise design process in developing a functional exercise. Unit 11 will provide a brief course review and the final exam.

**Unit 11: Course Summary**

## **Introduction**

This unit will briefly summarize the learning from the Exercise Design course. After completing this unit you should be able to summarize the key points of this course.

## **Reasons to Exercise**

Exercises are conducted in order to evaluate an organization's capability to execute one or more portions of its response plan or contingency plan. Exercises can be used to provide individual training and improve the emergency management system. Reasons to perform exercises include:

- Testing and evaluating plans, policies, and procedures.
- Revealing planning weaknesses and resource gaps.
- Improve individual performance and organizational coordination and communications.
- Train personnel and clarify roles and responsibilities.
- Gain program recognition.
- Satisfy regulatory requirements.

## **Comprehensive Exercise Program**

A comprehensive exercise program is made up of progressively complex exercises, each one building on the previous one, until the exercises are as close to reality as possible. The program must be carefully planned to achieve identified goals and should involve a wide range of organizations in its planning and execution.

## Comprehensive Exercise Program (Continued)

### Types of Exercises

There are five main types of activities in a comprehensive exercise program:

- **Orientation seminar:** This is a low-stress, informal discussion in a group setting with little or no simulation. It is used to provide information and introduce people to policies, plans, and procedures.
- **Drill:** This is a coordinated, supervised exercise used to test a single specific operation or function. It involves deployment of equipment and personnel.
- **Tabletop exercise:** This is a facilitated group analysis of an emergency situation in an informal, stress-free environment. It is designed for examination of operational plans, problem identification, and in-depth problem solving.
- **Functional exercise:** This is a fully simulated interactive exercise that tests the capability of an organization to respond to a simulated event. It takes place in the EOC and focuses on coordination of multiple functions or organizations. Strives for realism, short of actual deployment of equipment and personnel.
- **Full-scale exercise:** This is a simulated emergency event, as close to reality as possible. It involves all emergency response functions and requires full deployment of equipment and personnel.

### Building an Exercise Program

Building an exercise program is a multi-organization team effort that includes:

- Analysis of capabilities and costs.
- Goal setting.
- Development of a long-term plan.
- Scheduling of tasks.
- Public relations efforts.

## The Exercise Process

The process of creating and staging an exercise includes a lengthy sequence of tasks that occur in three phases: Before, during, and after the exercise. Some of the tasks fall under the heading of design and some are part of evaluation.

### Major Task Accomplishments

A simple way of viewing the exercise process is the sequence of five major task accomplishments:

1. Establishing the base
2. Exercise development
3. Exercise conduct
4. Exercise critique and evaluation
5. Exercise followup

### Establishing the Base

Establishing the base is the process of laying the groundwork for the exercise. Some important aspects of this preparation are:

- Reviewing the current plan.
- Assessing capability to conduct an exercise.
- Addressing costs and liabilities.
- Gaining support.
- Assembling and organizing a design team.

## The Exercise Process (Continued)

### Exercise Documents

Four major documents are developed during the exercise design process:

- Exercise Plan
- Control Plan
- Evaluation Plan
- Player Handbook

These documents are basically handbooks for particular audiences. Much of the content of these documents comes from the eight exercise design steps.

### **Exercise Design Steps**

Tabletop, functional, and full-scale exercises are based on a design process that includes eight steps:

1. Assess needs.
2. Define scope.
3. Write a statement of purpose.
4. Define objectives.
5. Compose a narrative.
6. Write major and detailed events.
7. List expected actions.
8. Prepare messages.

These are generally applicable steps regardless of the type of exercise. However, each type of exercise has some special considerations in how these steps are applied.

## Exercise Design Steps (Continued)

### Master Scenario Events List

Outputs from the design process are pulled together in the MSEL, a chart that the controller and simulators can use in keeping the exercise on track and on schedule.

## The Tabletop Exercise

### Exercise Format

The tabletop exercise is essentially a group brainstorming session centered on a scenario narrative and problem statements or messages that are presented to members of the group. The format is informal, and the exercise is self-evaluated by the participants.

### Facilitating a Tabletop

The facilitator is responsible for:

- Setting the stage.
- Distributing messages.
- Stimulating discussion and pushing participants toward in-depth problem solving.
- Involving everyone.
- Controlling and sustaining the action.

## The Tabletop Exercise (Continued)

### Designing a Tabletop

In applying the eight design steps, the first four steps (needs assessment, scope, purpose statement, objectives) are handled in the normal manner. The remaining steps can be simplified:

- The narrative can be relatively short.
- Only a few major or detailed events are required, and they are turned into problem statements.
- Expected actions must be identified, but they may involve such things as discussion or reaching consensus.
- Only a few (e.g., 10–15) carefully written messages or problem statements are needed.

## The Functional Exercise

### Exercise Format

The functional exercise usually takes place in the operating center and involves policy makers and decision makers. It uses an event scenario to test multiple functions or organizations, emphasizing coordination and communication. Participants include the:

- Controller (the manager of the exercise).
- Players (people responding to the scenario within their normal roles).
- Simulators (people playing the parts of organizations and field units outside of the operations center, who deliver messages to players).
- Evaluators (observers who record actions taken in response to messages).

Participants respond in real time, adding an element of stress to the exercise. Communications equipment, displays, and other enhancements can be used to add to the realism.

## The Functional Exercise (Continued)

### Controlling a Functional Exercise

The controller is responsible for:

- Monitoring interaction and progress.
- Keeping the exercise on track.
- Dealing with the unexpected.
- Adjusting the pace as needed. (The flow of messages can be adjusted by adding, deleting, misdirecting, or reassigning messages.)

### Designing a Functional Exercise

The full eight-step process is used to develop functional exercises.

## The Full-Scale Exercise

### Exercise Format

The full-scale exercise combines the interactivity of the functional exercise with a field element and requires the coordination of the efforts of several organizations. It differs from a drill in that a drill focuses on a single operation and exercises only one organization.

The full-scale exercise achieves realism through:

- On-scene actions and decisions.
- Simulated victims.
- Search and rescue requirements.
- Communication devices.
- Equipment deployment.
- Actual resource and personnel allocation.

## The Full-Scale Exercise (Continued)

### Participant Roles

All levels of personnel are involved, including policy makers, coordination and operations personnel, and field personnel. A controller manages the exercise; volunteers simulate victims; evaluators observe and keep a log of significant events; and a safety officer ensures that potential safety issues are addressed.

### Designing a Full-Scale Exercise

After the first four design steps, the following special considerations apply to the design process:

- The narrative is largely a staged visual scene, so the written narrative can be minimal. The visual narrative must be planned in careful detail.
- Major and minor events are often presented visually and must be carefully planned.
- Expected actions must, as always, be specifically identified.
- Both visual and prescribed messages are used.

In a full-scale exercise, details are everything.

### Site Selection

The site selected for the event must have adequate space and be as realistic as possible without interfering with normal traffic or safety.

### Scene Management

Scene management involves planning and handling:

- Logistics at the scene.
- Creation of a believable emergency scene.
- Number of victims.
- Management of props and materials.
- Number of controllers.

## The Full-Scale Exercise (Continued)

### Other Special Considerations

Other special considerations in a full-scale exercise include:

- Managing personnel and resources (many volunteers, lots of props).
- Ensuring that the emergency management system maintains response capability for routine events.
- Addressing safety issues.
- Attending to issues of legal liability.
- Having a plan for emergency call-off.
- Working with the media.

### **Exercise Evaluation**

For an exercise to be useful, it must be accompanied by an evaluation—less formal for the tabletop, structured for the function and full-scale. Good evaluations can help the organization identify:

- Whether the exercise has achieved its objectives.
- Needed improvements in plans, procedures, or guidelines or the emergency management system as a whole.
- Training and staffing deficiencies.
- Equipment needs.
- Need for additional exercising.

The evaluation team leader—usually drawn from the design team—is responsible for evaluation methodology, selection and training of the evaluation team, and report preparation.

## **Exercise Evaluation (Continued)**

### **Methodology**

The evaluation methodology includes:

- Evaluation team structure.
- Objectives to be measured.
- Evaluation packet (i.e., observation procedures and recording forms).

### **Postexercise Meetings**

Postexercise meetings include the player debriefing and meetings of the evaluation team to analyze the results and develop the after action report.

### **After Action Report**

The After Action Report should describe the purpose of the exercise and address goals, objectives, pre exercise activities, participants, scenario, accomplishments and shortfalls, and recommendations.

## **Exercise Enhancements**

Exercise enhancements are used to add to the realism of the exercise. Depending on the type of exercise and available resources, enhancements may include:

- Communications Equipment.
- Visuals.
- Other Equipment and Materials.
- People and Props.
- Resources.

## Next Steps

You have now completed IS139 and should be ready to take the Final Exam.

To submit the final exam online, go to <http://training.fema.gov> and click on FEMA Independent Study. Follow the links to the specific course. Click on the title of this course, and then click on the final exam link. Enter all requested information and click submit.

To submit the final exam by mail using the standard Opscan Answer sheet form, go to <http://training.fema.gov>, click on FEMA Independent Study and go to Opscan Request. Enter all requested information and click submit. Follow the instructions on the form and mail it to:

FEMA Independent Study Program  
16825 South Seton Avenue  
Emmitsburg, MD 21727

---

**Appendix A: Job Aids**

### Job Aid 1: Exercise Needs Assessment

Use this tool to analyze where you may wish to focus your organization's exercise design efforts. In completing this needs assessment, you may wish to consult such resources as planning documents, demographic or corporate data, maps, and training records.

#### 1. Hazards

List the various hazards in your community or organization. What risks are you most likely to face? You can use the following checklist as a starting point. **Note:** If your community has already conducted a hazard analysis, that is the best resource.

- |                                                           |                                                  |
|-----------------------------------------------------------|--------------------------------------------------|
| <input type="checkbox"/> Airplane crash                   | <input type="checkbox"/> Sustained power failure |
| <input type="checkbox"/> Dam failure                      | <input type="checkbox"/> Terrorism               |
| <input type="checkbox"/> Drought                          | <input type="checkbox"/> Tornado                 |
| <input type="checkbox"/> Epidemic (biological attack)     | <input type="checkbox"/> Train derailment        |
| <input type="checkbox"/> Earthquake                       | <input type="checkbox"/> Tsunami                 |
| <input type="checkbox"/> Fire/Firestorm                   | <input type="checkbox"/> Volcanic eruption       |
| <input type="checkbox"/> Flood                            | <input type="checkbox"/> Wildfire                |
| <input type="checkbox"/> Hazardous material spill/release | <input type="checkbox"/> Winter storm            |
| <input type="checkbox"/> Hostage/Shooting                 | <input type="checkbox"/> Workplace Violence      |
| <input type="checkbox"/> Hurricane                        | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Landslide/Mudslide               | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Mass Fatality Incident           | <input type="checkbox"/> Other _____             |
| <input type="checkbox"/> Radiological Release             | <input type="checkbox"/> Other _____             |

**Job Aid 1: Exercise Needs Assessment (Continued)**

**2. Secondary Hazards**

What secondary effects from those hazards are likely to impact your organization?

- Communication system breakdown
- Power outages
- Transportation blockages
- Business interruptions
- Mass evacuations/displaced population
- Overwhelmed medical/mortuary services
- Other \_\_\_\_\_

**3. Hazard Priority**

What are the highest priority hazards? Consider such factors as:

- Frequency of occurrence
- Relative likelihood of occurrence
- Magnitude and intensity
- Location (affecting critical areas or infrastructure)
- Spatial extent
- Speed of onset and availability of warning
- Potential severity of consequences to people, critical facilities, community functions, and property
- Potential cascading events (e.g., damage to chemical processing plant, dam failure)

**#1 Priority hazard:**

**#2 Priority hazard:**

**#3 Priority hazard:**

**Job Aid 1: Exercise Needs Assessment (Continued)**

**4. Area**

What geographic area(s) or facility location(s) is(are) most vulnerable to the high priority hazards?

**5. Plans and Procedures**

What plans and procedures—emergency response plan, contingency plan, operational plan, standard operating procedures (SOPs)—will guide your organization’s response to an emergency?

**6. Functions**

What emergency management functions are most in need of rehearsal? (e.g., What functions have not been exercised recently? Where have difficulties occurred in the past?) You can use the following checklist as a starting point.

- |                          |                                            |                          |                                        |
|--------------------------|--------------------------------------------|--------------------------|----------------------------------------|
| <input type="checkbox"/> | Alert Notification<br>(Emergency Response) | <input type="checkbox"/> | Public Safety                          |
| <input type="checkbox"/> | Warning (Public)                           | <input type="checkbox"/> | Public Works/Engineering               |
| <input type="checkbox"/> | Communications                             | <input type="checkbox"/> | Transportation                         |
| <input type="checkbox"/> | Coordination and Control                   | <input type="checkbox"/> | Resource Management                    |
| <input type="checkbox"/> | Emergency Public<br>Information            | <input type="checkbox"/> | Continuity of Government or Operations |
| <input type="checkbox"/> | Damage Assessment                          | <input type="checkbox"/> | Other _____                            |
| <input type="checkbox"/> | Health and Medical                         | <input type="checkbox"/> | Other _____                            |
| <input type="checkbox"/> | Individual/Family Assistance               | <input type="checkbox"/> | Other _____                            |

**Job Aid 1: Exercise Needs Assessment (Continued)**

**7. Participants**

Who (agencies, departments, operational units, personnel) needs to participate in an exercise? For example:

- Have any entities updated their plans and procedures?
- Have any changed policies or staff?
- Who is designated for emergency management responsibility in your plans and procedures?
- With whom does your organization need to coordinate in an emergency?
- What do your regulatory requirements call for?
- What personnel can you reasonably expect to devote to developing an exercise?

**8. Program Areas**

Mark the status of your emergency program in these and other areas to identify those most in need of exercising.

|                                   | <b>New</b> | <b>Updated</b> | <b>Exercised</b> | <b>Used in<br/>Emergency</b> | <b>N/A</b> |
|-----------------------------------|------------|----------------|------------------|------------------------------|------------|
| Emergency Plan                    |            |                |                  |                              |            |
| Plan Annex(es)                    |            |                |                  |                              |            |
| Standard Operating Procedures     |            |                |                  |                              |            |
| Resource List                     |            |                |                  |                              |            |
| Maps, Displays                    |            |                |                  |                              |            |
| Reporting Requirements            |            |                |                  |                              |            |
| Notification Procedures           |            |                |                  |                              |            |
| Mutual Aid Pacts                  |            |                |                  |                              |            |
| Policy-Making Officials           |            |                |                  |                              |            |
| Coordinating Personnel            |            |                |                  |                              |            |
| Operations Staff                  |            |                |                  |                              |            |
| Volunteer Organizations           |            |                |                  |                              |            |
| EOC/Command Center                |            |                |                  |                              |            |
| Communication Facility            |            |                |                  |                              |            |
| Warning Systems                   |            |                |                  |                              |            |
| Utility Emergency Preparedness    |            |                |                  |                              |            |
| Industrial Emergency Preparedness |            |                |                  |                              |            |
| Damage Assessment Techniques      |            |                |                  |                              |            |
| Other:                            |            |                |                  |                              |            |
|                                   |            |                |                  |                              |            |
|                                   |            |                |                  |                              |            |
|                                   |            |                |                  |                              |            |

## Job Aid 1: Exercise Needs Assessment (Continued)

### 9. Past Exercises

If your organization has participated in exercises before, what did you learn from them, and what do the results indicate about future exercise needs? For example, consider the following questions:

- Who participated in the exercise, and who did not?
- To what extent were the exercise objectives achieved?
- What lessons were learned?
- What problems were revealed, and what is needed to resolve them?
- What improvements were made following past exercises, and have they been tested?

### Job Aid 3: Self-Assessment: Resources and Costs

#### 1. Plans

How familiar are you with the emergency plans, policies, and procedures of your organization or jurisdiction?

- Very familiar
- Only general familiarity
- Familiar with only a portion
- Need to thoroughly review plans, policies, and procedures

#### 2. Time

a. How far in advance would your organization realistically have to schedule to plan and design each of the following exercise activities effectively?

- Orientation \_\_\_\_\_
- Drill \_\_\_\_\_
- Tabletop exercise \_\_\_\_\_
- Functional exercise \_\_\_\_\_
- Full-scale exercise \_\_\_\_\_

b. How much preparation time can reasonably be allocated to developing an exercise?

- Actual person days:
  
- Elapsed time to exercise:

**Job Aid 3: Self-Assessment: Resources and Costs (Continued)**

**3. Experience**

a. When was your organization's last exercise?

b. What is your previous experience with exercises? (Check all that apply.)

- Orientation:            Presenter            Participant
- Drill:                    Controller            Participant
- Tabletop exercise:    Facilitator            Participant
- Functional exercise:   Controller            Simulator    Player            Evaluator
- Full-scale exercise:   Controller            Responder    Evaluator    Victim
- Took part in postexercise debrief.
- Helped write an evaluation report.

c. What other exercise-related experience is available in your organization?

**4. Facilities**

What physical facilities do you use when conducting an emergency operation?

Will they be required for this exercise?   Yes            No

Will they be available for this exercise?   Yes            No

**Job Aid 3: Self-Assessment: Resources and Costs (Continued)**

5. **Communications**: What communication facilities and systems do you use in a real emergency?

Will they be required for this exercise? Yes  No

Will they be available for this exercise? Yes  No

6. **Barriers**: Are there any resource barriers that need to be overcome to carry out this exercise? Yes  No

If so, what are the barriers and how can they be overcome?

**Job Aid 3: Self-Assessment: Resources and Costs (Continued)**

**7. Costs**

- a. What types of costs might be incurred for these exercises in your organization? (Do not list exact figures—just types of expenses, such as wages and salaries, transportation, etc.)

For an orientation:

For a drill:

For a tabletop exercise:

For a functional exercise:

For a full-scale exercise:

- b. Are there ways that different organizations can reduce costs (e.g., by combining exercises, cost-sharing, resource-sharing) and still fulfill program requirements? Explain.

### Job Aid 4: Exercise Development Checklist

#### Mission

- Needs Assessment
- Scope
- Statement of Purpose
- Objectives

#### Personnel

- Design Team
- Controller or Facilitator
- Players
- Simulators
- Evaluators
- Management
  - Safety
  - Observers

#### Information

- Directives
- Media
- Public Announcements
- Invitations
- Community Support
- Management Support
- Timeline Requirements

#### Training/Briefings

- Train Simulators, Evaluators,
- Controllers
- Players' Preexercise Briefing

#### Scenario

- Narrative
- Major/Detailed Events
- Expected Actions
- Messages

#### Logistics

- Safety
- Scheduling
- Rooms/Location
- Equipment
- Communications
  - Phones
  - Radio
  - Computers
- Enhancements
  - Maps
  - Charts
  - Other:

#### Evaluation

- Methodology
- Locations
- Evaluation Forms
- Postexercise Debrief

#### After Action Documentation/

##### Recommendations

- Evaluation Meeting
- Evaluation Report
- Followup Ideas for Next Exercise

**Job Aid 5: Activities Schedule**

| <b>Deadline for Completion</b> | <b>Leader Activities</b> | <b>Team Activities</b> |
|--------------------------------|--------------------------|------------------------|
|                                |                          |                        |
|                                |                          |                        |
|                                |                          |                        |

|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |
|                |                    |                              |

**Job Aid 7: Scope Worksheet (Continued)**

5. Types of operations/functions that you want participants to engage in (e.g., notification, evacuation):

6. Degree of stress, complexity, time pressure that the exercise should have:

|               | <b>High</b> | <b>Medium</b> | <b>Low</b> |
|---------------|-------------|---------------|------------|
| Stress        | _____       | _____         | _____      |
| Complexity    | _____       | _____         | _____      |
| Time pressure | _____       | _____         | _____      |

**Job Aid 7: Scope Worksheet (Continued)**

|                                     |
|-------------------------------------|
| <b>Exercise:</b>                    |
| <b>Scope:</b>                       |
| <b>Type of Emergency:</b>           |
| <b>Location:</b>                    |
| <b>Functions:</b>                   |
| <b>Organizations and Personnel:</b> |
| <b>Exercise Type:</b>               |

**Job Aid 8: Statement of Purpose (Form 1)**

The purpose of the proposed emergency management exercise is to improve the following emergency **operations**:

- a. \_\_\_\_\_
- b. \_\_\_\_\_
- c. \_\_\_\_\_
- d. \_\_\_\_\_

by involving the following **agencies/organizations/departments**:

- a. \_\_\_\_\_
- b. \_\_\_\_\_
- c. \_\_\_\_\_
- d. \_\_\_\_\_
- e. \_\_\_\_\_
- f. \_\_\_\_\_
- g. \_\_\_\_\_
- h. \_\_\_\_\_

in a \_\_\_\_\_ exercise simulating a \_\_\_\_\_  
**[type of exercise]** **[type of emergency event]**

at \_\_\_\_\_ on \_\_\_\_\_.  
**[location]** **[date]**

**Job Aid 10: Narrative Outline**

|                                                          |
|----------------------------------------------------------|
| Event:                                                   |
| How fast, strong, deep, dangerous:                       |
| How you found out:                                       |
| Response made:                                           |
| Damage reported:                                         |
| Sequence of events:                                      |
| Current time:                                            |
| Advance warning:                                         |
| Location:                                                |
| Relevant weather conditions:                             |
| Other factors that would influence emergency procedures: |
| Predictions:                                             |

**Job Aid 10: Narrative Script**

A large, empty rectangular box with a thin black border, intended for writing a narrative script. The box occupies most of the page's vertical space below the title.

**Job Aid 13: Emergency Exercise**

|                                               |               |              |

**ACTION TAKEN:** \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**Job Aid 15: Tabletop Exercise Checklist****Design**

- Needs assessment, scope, statement of purpose, and objectives developed.
- Narrative:
  - May be shorter
  - Presented all at once or incrementally
- Events:
  - Limited number
  - Presented as problem statements
- Expected actions:
  - May involve identification of appropriate responses, identification of gaps in procedures, reaching group consensus, developing ideas for change, etc.
- Messages:
  - Limited number (e.g., 10-15)
  - Involve everyone
  - Tied to objectives

**Facilitation**

- Welcome participants
- Briefing:
  - Purpose and objectives
  - Ground rules and procedures
- Narrative presentation (printed, verbal, TV, radio)
- Ice breaker questions directed at high-ranking officers
- Messages organized to involve all organizations
- Strategies to encourage the reticent
- Facilitate—don't dominate
- Model positive behaviors (eye contact, positive reinforcement)
- Aim for in-depth problem solving
- Strategies for sustaining action
  - Multiple event stages
  - Varied pace
  - Balanced pace
  - Conflict resolution
  - Low-key atmosphere

**Job Aid 17: Functional Exercise Design Checklist: Special Considerations****Facilities and Equipment**

- Sufficient work space for simulators and players
- Simulation room (if needed) near player room
- Space for message center, control center, observers (as needed)
- Clear work surfaces
- Communication equipment (telephones, switchboard)
- Parking
- Adequate ventilation and lighting
- Restrooms

**Displays and Materials**

- Displays easily visible or accessible
- Maps (regional, state, local, area, downtown, operational units)
- Major events log, bulletin board, status boards, simulation plotting board
- Easels, chart paper
- Message forms
- Pencils/Paper
- Name cards

**Beginning:**

- "No-notice" or scheduled (according to objectives)

**Briefing (short):**

- Objectives
- Process
- Time period portrayed
- Ground rules and procedures

**Narrative:**

- Verbal, print, TV, computer, slides, or dramatization
- Time-skips if needed

**Messages:**

- Large number (depends on scope)
- Pre-scripted
- Optional prescribed for adjusting flow

**Message Delivery:**

- Written
- Phone
- Other (verbal, speaker phone/radio, hand signals)
- Simulators prepared for spontaneous message development
- Standardized forms for written messages

**Strategies for Adjusting Pace:**

- Rescheduling
- Adding/Deleting messages
- Misdirecting messages
- Reassigning messages

## Job Aid 18: Full-Scale Exercise Planning Checklist: Special Considerations

### Participants:

- Controller(s)—sufficient to manage all event sites
- Simulators (mock victims)—different age groups, body types, physical characteristics
- Players (most functions, all levels—policy, coordination, operation, field)
- Evaluators
- Safety Officer

### Site Selection:

- Adequate space for number of victims, responders, and observers
- Space for vehicles and equipment
- As realistic as possible without interfering with normal traffic or safety
- Credible scenario and location

### Scene Management:

- Logistics (who, what, where, how, when)
- Believable simulation of emergency
- Realistic victims
- Preparation of simulators to portray roles realistically
- Number of victims consistent with type of emergency, history of past events
- Types of injuries consistent with type of emergency, history of past events
- Victim load compatible with local capacity to handle
- Props and materials to simulate injuries, damage, other effects

### Personnel and Resources:

- Number of participants
- Number of volunteers for scene setup, victims, etc.
- Types and numbers of equipment
- Communications equipment
- Fuel for vehicles and equipment
- Materials and supplies
- Expenses identified (wages, overtime, fuel, materials and supplies)

### Response Capability

- Sufficient personnel kept in reserve to handle routine non-exercise events

### Safety

- Safety addressed through development
- Each design team member responsible for safety in own discipline
- Hazards identified and resolved
- Safety addressed in preexercise briefing, simulator and evaluator packets
- Each field location examined for safety issues
- Safety officer designated, given authority

### Legal Liability

- Legal questions of liability researched by local attorney

### Emergency Call-Off

- Call-off procedure in place, including code word/phrase
- Call-off procedure tested

### Media

- Role of media addressed in planning, used as a resource to gain favorable exposure
- Media and observers considered in logistical planning

**Job Aid 21: Narrative Summary**

**Objective Number:** \_\_\_\_\_

**Criterion Number:** \_\_\_\_\_

**Evaluator:** \_\_\_\_\_

**Location:** \_\_\_\_\_

**Issue:**

A specific statement of the problem, plan, or procedure that was observed.

---

---

---

---

---

---

---

---

**Discussion:**

A discussion of the issue and its specific impact on operational capability.

---

---

---

---

---

---

---

---

**Corrective Action Recommendation:**

Recommended course(s) of action to improve performance or resolve the issue to improve operational capability.

---

---

---

---

---

---

---

---

**Job Aid 21: Narrative Summary (Continued)**

**Office of Primary Responsibility:**

The department, agency, or organization responsible for implementation of corrective actions.

**Department, Agency, or Organization:**

\_\_\_\_\_

**Individual Responsible:**

\_\_\_\_\_

**Title:** \_\_\_\_\_ **Date Assigned:** \_\_\_ / \_\_\_ / \_\_\_ **Suspense Date:** \_\_\_ / \_\_\_ / \_\_\_

**Job Aid 24: Exercise Debriefing Log**

| <b>Exercise Debriefing Log</b> |                    |                           |  |
|--------------------------------|--------------------|---------------------------|--|
| Exercise _____                 | Recorder _____     | Date _____                |  |
| Problem Summary                | Recommended Action | Responsible Agency/Person |  |
|                                |                    |                           |  |
|                                |                    |                           |  |
|                                |                    |                           |  |
|                                |                    |                           |  |
|                                |                    |                           |  |
|                                |                    |                           |  |

**Job Aid 25: Exercise Critique Form**

Please take a few minutes to fill out this form. Your opinions and suggestions will help us prepare better exercises in the future.

1. Please rate the overall exercise on the following scale.

|           |   |   |   |   |   |   |   |   |           |
|-----------|---|---|---|---|---|---|---|---|-----------|
| 1         | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10        |
| Very Poor |   |   |   |   |   |   |   |   | Very Good |

2. Compared to previous exercises, this one was:

|           |   |   |   |   |   |   |   |   |           |
|-----------|---|---|---|---|---|---|---|---|-----------|
| 1         | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10        |
| Very Poor |   |   |   |   |   |   |   |   | Very Good |

3. Did the exercise effectively simulate the emergency environment and emergency response activities?      Yes \_\_\_\_\_ No \_\_\_\_\_

If no, briefly explain why:

4. Did the problems presented in the exercise adequately test readiness capability to implement the plan? ?      Yes \_\_\_\_\_ No \_\_\_\_\_

If no, briefly explain why:

**Job Aid 25: Exercise Critique Form (Continued)**

5. The following problems should be deleted or revised:

6. I suggest that you add the following problems for the next exercise.

7. Please add any other comments or suggestions.

---

**Appendix B: Acronym List**

---

|          |                                                               |

**Appendix C: Exercise  
Tool Box**

---

For purposes of this *Exercise Design* course, the Exercise Tool Box contains several important items that you can use:

Templates for:

Exercise Plan

Control Plan

Evaluation Plan

Player's Handbook

And Job Aids for all forms and charts used in the course are also contained in the Tool Box as "Exercise Design Job Aids."

You can access the Tool Box for the Exercise Design Independent Study IS-139 at <http://training.fema.gov/emiweb/IS/is139lst.asp>.

1. Research has shown that:
  - a. Exercises are the best way to teach employees new skills.
  - b. Extended lectures are an effective alternative to exercises.
  - c. When possible, it is more effective to use real (rather than simulated) emergencies to test response procedures.
  - d. People usually respond to an emergency in the way they have trained.
2. Which of the following is **not** a good reason to exercise?
  - a. To reveal planning weaknesses and gaps in resources.
  - b. To clarify roles and responsibilities.
  - c. To reduce the need for organizational coordination and communication.
  - d. To satisfy regulatory requirements.
3. In a progressive exercise program, the exercises:
  - a. Have a consistent format but are conducted with increasing frequency.
  - b. Are organized to increase in complexity.
  - c. Are organized to decrease in complexity.
  - d. Are sponsored on a rotating basis by different organizations.
4. Availability of resources:
  - a. Is irrelevant to the exercise process.
  - b. Should not affect exercise design.
  - c. Should be considered in scheduling and planning an exercise.
  - d. Is seldom an issue for exercise design because exercises require few resources.
5. The major task accomplishments in the exercise process are:
  - a. Establishing the base, exercise development, exercise conduct, critique and evaluation, and followup.
  - b. Conducting tabletop, functional, and full-scale exercises.
  - c. Developing, conducting, and evaluating the exercise.
  - d. Conducting a needs assessment, writing objectives, and evaluating whether the objectives were achieved.

6. The exercise design team leader should be:
  - a. The Emergency Manager.
  - b. Someone who is familiar with the emergency plan.
  - c. A key operational member of a participating organization.
  - d. The chief official of the jurisdiction or organization.
  
7. Which statement is true of an orientation?
  - a. It requires field sites and actual equipment.
  - b. It may be used to introduce or explain plans and policies.
  - c. It involves a controller, simulators, and evaluators.
  - d. It is used to test a specific operation.
  
8. Which statement is true of a drill?
  - a. It is best conducted in a conference room.
  - b. It involves a controller, simulators, and evaluators.
  - c. It is used to test a specific operation.
  - d. It is aimed primarily at policy makers and decision makers.
  
9. Which statement is true of a tabletop exercise?
  - a. It involves a highly realistic simulation.
  - b. It involves a controller, simulators, and evaluators.
  - c. It requires field sites and actual equipment deployment.
  - d. It is a facilitated analysis of an emergency situation.
  
10. Which statement is true of a functional exercise?
  - a. It involves a controller, simulators, and evaluators.
  - b. It is simple, informal, and stress-free.
  - c. It requires field sites and actual equipment deployment.
  - d. It may be used to introduce or explain plans and policies.
  
11. Which statement is true of a full-scale exercise?
  - a. It is aimed primarily at policy makers and decision makers.
  - b. It requires field sites but actual equipment remains in the shed.
  - c. It is used to test a specific operation.
  - d. It involves a highly realistic simulation.

12. The narrative:

- a. Sets the stage for later action.
- b. Lists all of the events that will occur in the exercise.
- c. Provides the master list of events and expected actions.
- d. Explains the objectives of the exercise.

13. The scope:

- a. Sets the mood for the exercise.
- b. Establishes the limits of the exercise.
- c. States the objectives of the exercise.
- d. Lists the financial and human resources required to run the exercise.

14. An example of a good exercise objective is:

- a. A sufficient number of accurate messages will be transmitted by the dispatch center to the communications center and primary response organizations in a timely and efficient manner.
- b. At the time the evacuation notice is received, the EOC policy and coordination groups will examine the needs of schools and other special facilities and organize notification according to SOPs.
- c. Proper procedures will be followed to declare a disaster or ask for outside aid.
- d. Interaction with other jurisdictions will be demonstrated.

15. A \_\_\_\_\_ is a useful tool to help the controller keep the exercise on track and on schedule.

- a. Message form
- b. Narrative
- c. Master scenario of events list
- d. Exercise directive

16. A convincing, unified scenario requires:

- a. 10 major events and approximately 100 detailed events.
- b. Messages written in a way will not allow unexpected responses to occur.
- c. The players know the events in advance.
- d. Careful scripting of events.

17. In a tabletop exercise, an important part of the facilitator's job is to:
- Maintain an even pace and consistent approach.
  - Adhere to a highly structured agenda.
  - Sustain action and keep everyone involved.
  - Make sure the entire set of problem statements is discussed.
18. Which of the following is **not** true of a simulator in a functional exercise:
- May deliver written messages.
  - Is often called upon to rate the performance of key players.
  - May deliver messages verbally.
  - Sometimes needs to make up a response to a player.
19. An exercise that tested only notification procedures in response to a terrorist bombing would be:
- A drill.
  - A tabletop exercise.
  - A functional exercise.
  - A full-scale exercise.
20. \_\_\_\_\_ is a good use of a full-scale exercise:
- Trying out a new and untested emergency plan
  - Training personnel in negotiation
  - Practicing group problem solving in a nonthreatening environment
  - Testing emergency procedures and coordination of multiple agencies or organizations
21. A full-scale exercise involves:
- All levels of personnel, including response personnel.
  - Primarily the key policy and decision makers.
  - Policy, coordination, and operations personnel.
  - The staff from one department or unit.
22. A good evaluation can help the organization identify:
- Training and staffing deficiencies.
  - Qualified members of the evaluation team.
  - Exercise objectives.
  - The scope of the exercise.

23. During the exercise, evaluators should:

- a. Ensure that players are aware when they are being observed.
- b. Offer suggestions that can improve the exercise results.
- c. Focus on the positive.
- d. Avoid attracting players' attention.

24. One thing evaluators should focus on during an exercise is:

- a. Explaining evaluation methodology to the players being observed.
- b. Having players explain their reasons for actions taken.
- c. Noting what actions are taken in response to key events.
- d. Finding as many positive points as negative ones.

25. The purpose of exercise enhancements is to:

- a. Increase credibility with the public and the media.
- b. Make the exercise more fun so more personnel will participate.
- c. Increase the realism so participants will respond as they would in a real event.
- d. Make it easier on the controller and the simulators.

January 7, 2022

To whom it may concern;

The proposed items to be discussed at your Wednesday meeting which have to do with

detainments or removal of individuals regarding being non vaccinated or a threat to public health safety and requiring school aged children to be vaccinated for Covid 19 to attend school are illegal and against State, Federal and International laws.

You cannot require someone to take a medical product that is under Emergency Use Authorization.

The Pfizer vaccine has not been authorized by the FDA (Comirnaty has had its license approved by FDA, it is not in production at this time nor has it been approved yet since it hasn't been manufactured yet.), nor any of the other Covid vaccines at this time, please see the attached letter from the FDA to Pfizer. The screenshot is of the corresponding section which states that the current vaccine by Pfizer is still under emergency use authorization. If you would like to see the entire letter it is attached in the zip file.

Us Code 21 section 360bbb, is our federal code that states that an individual cannot be coerced to take an experimental medical substance with the threat of loss of freedom or restrictions under our constitution. See screen shot attachment of the corresponding section of this code.

I urge you to consider your actions in this matter. If you vote to accept these restrictions which are in clear violation of State, Federal and international laws, you can and will be an acting accomplice in these crimes against the people of this county and state.

Thank you

I oppose I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Do not infringe on our rights by giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Subject: Damage Control Please

External Email

Dear Washington State Board of Health,

Can you please do damage control. Nothing makes sense anymore regarding the emergency rules and potential overreaches of this State. People no matter their healthcare decision that they choose at this point need to get back to work and same with the kids getting back to school. Look to other states for guidance.

I am writing this as I have working class friends and family that are simply leaving. They have never lived in any other state, born and raised in Washington. They go to another state to check out a lower cost of living and less restrictive state and then they leave.

This is getting very sad and disappointing! We claim to be a wise/intelligent/progressive state but the actions make no logical sense anymore.

Anyways, probably going to fall on deaf ears but feel free to have a discussion with me. I am a working class male under 30 years old and afraid the younger working class are going to continue to leave at a faster and faster pace. Amongst a high number of recent retirees from the working class. It is a culmination of issues from high cost of living, governing policies they disagree with, not being apart of the toxic tech boom \$\$\$ in Seattle..... We all know and live amongst these issues.

Joel Mansfield (Everett, WA)

I am trying to work my job while listening in, but my question to the BOH why don't you recommend things that work? That boost natural immunity, like zinc, d3, C, quercetin and a healthy diet!

IT works, I am 70 yrs young and NEVER got covid! The reason ppl are dying is because the drs have to use government mandated things that don't work and in fact kill! Since when does the government mandate treatment! They silence real doctors and remedies. No wonder the public doesn't trust you or you fake statistics!

My neighbors 85, and 95 never got covid using the above immune boosting remedies.

In addition, the vaccines do not work, I know many that got covid with the vaccine and landed in the hospital! You are pushing fear and experimental vaccines on the public and is immoral!

Subject: COVID

External Email

Dear Board of Health Members

I want to say with 100% certainty that I do NOT want my child masked any longer in school. Noone in my family will be taking 1 or 2 nor a booster or any vaccine.

This state and our governor in particular have gone way past its rights and has crossed the line long ago of major overreach. 377 days to be exact.

I am also 100% against adding the Covid vaccine (that has not only not been studied enough but also this vaccine that IS NOT WORKING) to the children's already way to long list of ridiculous childhood vaccines.

You are the Board of "Health" but you are missing the boat here and doing anything but keeping us healthy by pushing this vaccine. Natural immunity is always best and most of us have had Covid by now. Herd immunity is likely here. You are also not promoting at home remedies but instead scaring people and they are running to the hospitals hence the overload on the hospitals, ridiculous. YOU are killing people, not Covid. In your board meeting you stated that people 65 and older that are unvaccinated are the key demographic that is suffering from this so WHY are you pushing this vax on the rest of us. We can manage and should be allowed to manage our health.

Listen, we started by closing down schools for 2 weeks to curve the virus and here we are just shy of 2 years, and you are still pulling this crap. Masks, mandates, virtual school, and so on. This is destroying families, kids, educations, mental health and each of YOU are responsible for this circus.

Also, why do you push the tests? We never test for colds, flu, ect. When you feel sick, stay home. Not to mention the shear and utter disaster of Joe Biden's administration. Noone can even find tests. It's not rocket science and we are not fooled.

I ask that you, do the right thing. Do what is your moral obligation. Leave our rights to us and do NOT mandate and stop with the fear mongering.

PLEASE

Thanks!

Kim Bauml

Subject: COVID Vaccination for Children

External Email

I respectfully ask that you vote against any mandatory requirements for children to get any COVID vaccine for school or otherwise. There is a reason vaccines and medicines are vetted an extended period of time and this vaccine should be no different. At this point in time, no one has any idea what the long term effects are from this vaccine and until that data is available, this should not be a requirement (especially for our children). I feel requiring the vaccination of children with a vaccine that has not met this rigorous vetting process is not only dangerous, but reckless and irresponsible on the part of our system that is supposed to be looking out for the welfare of our children. This vaccine should be categorized and tested the same as all other vaccine's for children.

Thank you,

Subject: Legal considerations regarding today's meeting (1/12/22)

*attachments\AB7F2E16857E455E\_WSBOH Legal Considerations 11222.pdf*

External Email

Dear members of the Washington State Board of Health,

Please find my comments regarding some considerations regarding legal implications of today's planned discussions attached.

In light of the very recent revelation that even multiple Justices of the U.S. States Supreme Court can be found to be basing their decisions on provably and grievously false information, it behooves persons in positions of responsibility such yours who are engaged in making decisions of significant impact to do their due diligence especially in matters touching upon potential actions taken against or curtailing other people's rights.

Please, do reach out with any questions or comments you may have in this regard as I am reaching out in good faith and interested in establishing productive dialogue and assume all members of the Board of Health would be acting with good intent as well.

Sincerely,  
-Dr. Jason Utt, PhD

PS: Nothing in this message or the attached document should be construed to represent an intent to harm, threaten or otherwise injure any party.

Dear members of the Washington State Board of Health, by name:

Keith Grellner,  
Tom Pendergrass,  
Stephen Kutz,  
Elisabeth L. Crawford,  
Temple Lentz,  
Vazaskia Crockrell,  
Fran Bessermin,  
Bob Lutz, and  
Umair A. Shah:

In anticipation of today's public meeting and the fact that I expect to for one reason or another not be able to provide the following information for comment, I wanted to be sure that you are aware of some important legal considerations relevant to such decisions and actions as are likely to be discussed and weighed.

N.B. This document is not meant to intimidate, cause any duress or harm, rather simply to inform, as I do not wish any of the persons mentioned above, i.e. members of the Washington State Board of Health, our other third parties whether government officials or private parties to engage in such activity – as would be likely to occur based on numerous items on the agenda for today's meeting – and thereby run the risk of being found acting in violation of any of the following (in the case of Title 18 U.S. Code § 241 even the discussion of certain actions could itself be considered a violation of law):

- Rights recognized and guaranteed under the Washington State Constitution, Article 1:
  - Section 3 Personal Rights (especially in light of Section 1);
  - Section 4 Right of Petition and Assemblage;
  - Section 7 Invasion of Private Affairs or Home Prohibited;
  - Section 10 Administration of Justice;
  - Section 13 Habeas Corpus;
  - Section 21 Trial by Jury;
  - Section 30 Rights Reserved.
  
- Rights recognized and guaranteed under multiple Amendments to the U.S. Constitution:
  - Fourth Amendment:  
*"The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized."*
  
  - Fifth Amendment:  
*"No person shall be [...] deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation."*
  
  - Fourteenth Amendment:  
*"No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."*

- Federal statutes:
  - Title 18 U.S. Code §241 (Conspiracy against rights);
  - Title 18 U.S. Code §242 (Deprivation of rights under color of law).
- Multiple Articles of the United Nations Universal Declaration of Human Rights:
  - Article 12, specifically: the right to protection under the law against arbitrary interference with one's privacy, family and home;
  - Article 13, specifically: the right to freedom of movement (cf. also Title 49 of the United States Code);
  - Article 30.

A handwritten signature in black ink, appearing to read "J. Utt", with a stylized flourish at the end.

Dr. Jason Utt, PhD

Regarding vote on January 12th to decide to make the covid 19 jabs mandatory. They are experimental. They have not been approved by the FDA. Comiraty has been approved and it is not available in the USA. This virus has a 99.8% survival rate. More people have died from the shots than the virus. The statistics are being manipulated to suit the narrative. It is unconstitutional to force any medical treatment and according to the Nuremburg code, there has to be informed consent. The enclosed circular in the vaccine box is entirely blank. How can you receive informed consent if you do not know what is in it? The individual may not be coerced, forced or pressured to take any experimental treatment. Anyone who forces this and implements any of these shots are guilty of crimes against humanity and will be brought to justice just as they were in World War II. This includes you and if you recall, doctors, news reporters were either in prison for a very long time or were hung. Matter of fact, Nuremburg II trials are going on right now.

There are preventative and treatments effective for this entity. This virus has not been isolated. This has been hidden in order to pave the way for these shots, that do not even work. The hospitals are filled with the vaccinated related illnesses. You likely know this covid 19 is patented. How can you have a patent on a naturally occurring organism? It is a bioweapon.

The MSM say the side effects and deaths are very, very rare. Explain that to a mother of her 6 year old dead child. Explain that to the athlete who survives the heart attack or pericarditis only to never be able to compete again in the field of sport that they love?

I do not comply. I do not agree. There is no evidence anyone who has not taken the shots transmit any illness to those who have taken the jabs. Those inoculated have their immune systems destroyed allowing them to be sitting ducks for illness, immunocompromising illnesses and cancer. These are not vaccines. They do not provide immunity, hence the ongoing boosters.

Experts who have been censored including Dr Robert Malone who created the Mrna, Dr Michael Yeadon who was Vice President for Pfizer admit these are bioweapons and the only objective is depopulation and control of those who survive these shots. You had

better wake up. You are on the wrong side of history.

The emergency use authorization expires Jan 15th. Please reconsider pushing this narrative and go down as being on the right side of history.

Sincerely, Rebecca Irvin

External Email

1) any involuntary isolation/quarantine of people as described in parts of WAC 246.100; and

There's a lack of transparency here and massive overreach. How can someone think forcing isolation and forcing covid shots is by any means acceptable?

2) any mandate on COVID shots for children as a requirement to attend K-12 public schools.

I will pull my children out of public schools and so will extended members of my family. These shots are not even close to the same classification as traditional immunizations. If people want to participate in the covid shot studies that is their business and their right, as willing participants.

Subject: COVID Vaccination for Children

External Email

I respectfully ask that you vote against any mandatory requirements for children to get any COVID vaccine for school or otherwise. There is a reason vaccines and medicines are vetted an extended period of time and this vaccine should be no different. At this point in time, no one has any idea what the long term effects are from this vaccine and until that data is available, this should not be a requirement (especially for our children). I feel requiring the vaccination of children with a vaccine that has not met this rigorous vetting process is not only dangerous, but reckless and irresponsible on the part of our system that is supposed to be looking out for the welfare of our children. This vaccine should be categorized and tested the same as all other vaccine's for children.

Thank you,

Rella Grimes

I am completely opposed to the Covid mandate being forced on children when they have not been any studies to prove it is safe. It is unheard of in the history of medicine to institute a mandate on a child where the outcome or the risks are unknown and the risk is minimal.

Subject: Do Not Vote for "Healthcare" Tyranny in Washington

External Email

Dear Washington State Board of Health Members,

Out of fear, I am writing you today.

I have listened to local Seattle radio and watched national television reports on these absurd and non-scientific "health" measures that you are voting on today.

Our nation and state have lived with Co-vid for several years. We citizens know a lot about this disease: how it originated, how it has been lied about, and who we can and cannot trust.

If Governor Inslee were truly serious about eliminating Co-Vid and its variants:

1. He would encourage President Biden to close our southern border – where 2.5 million diseased illegals from over 150 countries have entered our nation in the year since he took office.
2. He would rescind his mandates forcing these "bio-experimental shots" onto healthcare workers and other employees.
3. He would read data from other U.S. states and World Nations who are successfully managing this virus.

The latest variant, Omicron, is highly contagious with mild symptoms.

Enacting severe measures on our state is nothing but a control play by Governor Inslee.  
Do not vote for these measures to allow him the power that he craves.

Kindest regards,

Maggi Hoover

To whom it may concern,

I OPPOSE Agenda item #8, the Board's formation of a Technical Advisory Group (TAG) to review information about COVID -19 shots for consideration of mandating the shots for school. I OPPOSE shot mandates, period.

I SUPPORT Agenda Item #11 Informed Choice Washington's Petition for Rulemaking. This petition (filed by Xavier Figueroa, PhD on behalf of ICWA), asks the Board to establish a new rule that prohibits them from adding any Emergency Use Authorized (EUA) product, or any license product that lacks completed Phase 3 trial studies, to the school required list.

Sincerely,

Kelsey Otto

Subject: I did not get to testify on today's BOH call--please add these comments

#### External Email

Today's meeting materials state that additional written public comments are still being compiled for presentation to the Board. Will you please add these comments to these materials, as I was not called on today to testify as I had requested:

May I respectfully request that all members of the Board turn on their cameras during public comment? This is the only indication that we have as to whether the members are listening or even in attendance.

Despite the repeated characterization of public concern as being based on "misinformation" and "false rumor," the fact remains that WAC 246-100-040 already authorizes local health officers to immediately detain and vaccinate anyone who is even suspected of being infected with any communicable disease in the event the "suspect" does not submit to testing/treatment/vaccination, etc. No amendments to the existing code are necessary in order to weaponize it under the continued guise of a "Covid pandemic."

Chair Grellner's assertion during today's meeting that a proceeding takes place in superior court prior to involuntary detention is inaccurate. WAC 246.100.040.1 states that the local health officer may obtain an ex parte (one-sided) order from the court, or simply unilaterally issue an emergency detention order without consulting a court. It is only after a detainee is taken into custody (by police force if the health officer so directs) that s/he has an opportunity to plead her case before the court, and that is only after the detainee petitions the court for relief. Imagine a person who was abruptly removed from her home and family for being suspected of having been exposed to SARS-CoV-2. The logistical and emotional burden of navigating the legal system from behind bars is very high, and the detainee must then wait in isolation for several days for a hearing (see WAC 246-100-055). This is not due process; it is legal recourse after a person has already been stripped of her liberty.

Board members' statements that they are unaware of anyone in the state being involuntarily detained for Covid-related concerns do not appease the public. Such incidents may not be happening now, but what's to prevent them, given the above WACs that are already in place, the Q&I facilities opening around the state, and the relentless escalation of coercion in all aspects of our lives at the hands of public health?

The Board's representations this morning that Covid shot requirements for children are not being considered today likewise do not placate us in light of the TAG you have convened for just such a purpose. "Exemptions are available" is not comforting, either; no one should have to get special documentation or permission to forgo an experimental, liability-free medical intervention.

Please carefully review the referenced information provided by Informed Choice Washington and others that supports the case for abandoning the Board's misguided initiative to consider adding these shots to the children's schedule, as none of the BOH's 9 own criteria is met.

Thank you,

Lisa Templeton

Subject: COVID Agenda

External Email

I am a K-12 School Psychologist in WA public schools and I strongly oppose:

1. Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
2. Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Isolation and vaccines have not been proven to be safe or effective. I have seen the impact on our children first hand in the schools. A healthy society does not take life from their children to briefly extend the life of elderly. It is time to learn to live with the virus, and focus on early treatment.

Sincerely,  
Julie Apeles

If the state can not provide peered reviewed double blind tests that masks stop the spread of COVID, and we all ready know that the vaccines do not stop the spread of COVID and does not stop us from getting COVID, you must remove the mandates. A warning to you public health officials. When forcing individuals to follow rules that do not provide any support you are open to be sued personally as well as the organization. There was nothing wrong with suggesting taking precautions but the moment you mandated those precautions you over stepped your boundaries. Mandates must be revoked immediately.

- John Thomas

Subject: COVID-19 policies and my thoughts/reasons

External Email

Greetings Ms.Lang!

I hope this email finds you healthy and well.

I know several important conversations will be happening soon. I would like to weigh in on the matter and explain why.

I strongly object to the proposed policies:  
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

Covid-19 was new and scary virus, but we've come a long way since it first appeared. Immunocompromised and those individuals strongly concerned have the option to get a vaccine. Majority have mild infections. Passing laws at this point is government overreach at best, especially since vaccines DO NOT prevent transmission, or provide much protection for the new variant.

But what is happening, is that people feel threatened by the government. I already do, when I see these proposed policies. And when Government institutions will try to pass good policies in the future, if need arises, there will be pushback because you're setting a precedent of government overreach. PICK YOUR BATTLES. The current proposed measures are unnecessary and the current situation does not warrant such strict policies. It is a serious virus, but please remember the death rate is still less than 1 percent (even that is generous). Most people are either vaccinated or have natural immunity. You want to strip away freedoms of people for the sake of what? People want to be free, and safe. But how can we feel safe knowing we can be voluntarily detained because we didn't consent to a medical procedure related to a virus with such a high survival rate?

Concerning vaccine requirements of children: Requiring children to get a vaccine that has a higher risk of an adverse reaction than the threat of the initial infection is wrong. If you must do something, then please put it in the "recommended" vaccine list, BUT NOT REQUIRED.

COVID-19 is NOT an infection that can be eradicated with vaccines like POLIO or MEASLES, then why treat them the same? Put it in the category of the flu, which is closer to reality. I'm begging you, LEAVE THE CHILDREN ALONE! They are not a threat to our society. COVID is not a large threat to the well-being of children. If someone WANTS

their child vaccinated, they know how to do it, and they will do it.

Thank you for your time,  
Liliya Smal

P.S. I was going to provide articles to support my claims (although you have access to them), but I was afraid my e-mail will get flagged for containing links.

Subject: COVID 19 Vaccine Requirement

External Email  
Hello,

You are in an incredibly difficult position where, no matter what decisions you make, there will always be someone upset with you. I hope that you can make the best decisions you can with the information available to you.

As a parent, I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools and childcare in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.
2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.
3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA

product – Commentary – America's Frontline Doctors

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Thank you,  
Julie Gasper

/

If the virus has never been properly isolated, it doesn't exist. Then the test is a fraud, the vaxx is a fraud.

It's my body, my choice ~ and children should not be vaccinated against their will.  
Do not go against science, logic and common sense, we expect sound judgment. There is zero scientific evidence that justifies vaccines or quarantines.

Do not commit a crime against the citizens of Washington state. We don't need forced

vaccination or quarantine.

Informed Consent is required by law.

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.99%

Vaccines are far away from the point of diminishing return, it's substantially more harmful to vaccinate. It is blatantly criminal to even consider forced vaccinations.

Informed Consent is required by law.

No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe the vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity.

Do not require these vaccinations for school age children.

Subject: Jan 12

External Email

I am writing to the members of The WA State Board of Health. This is concerning the upcoming meeting this Wed, Jan 12, 2022. It is concerning our rights to make our own decisions pertaining to OUR children and OUR own health choices. America is a nation, or was, a nation of freedom. America clearly includes our state of WA. When overreach threatens that freedom, we must speak up and hold the line. We have the right to choose where we stand with vaccines, and everything else related to the current pandemic. And we should be able to choose based on our own research, based on our own standards, based on our own morals, what we will and won't do with our bodies and health. We should be able to make this choice, either way, without fear of overreach or consequences that affect one's very way of life. Children should not be mandated this shot in order to attend school. And no one should be involuntarily detained because of the choice they make concerning their own health.

The government, nor the CDC, nor the Dept of Health, nor anyone else has the right to rule in such ways. We have unalienable rights that cannot be taken away. This is a core foundation of our very Constitution, which is the highest law of the land. In terms of Covid, to even think that Americans are being treated and coerced to the point of threatening their livelihoods and way of life is unconscionable.

Covid-19 has 99.9% survival rate, and has little detrimental effect on children. The vaccine has not had enough time to fully study its effects. And the effects seen thus far are beyond worrisome. The mandates, and rules need to stop. Authoritative action against those who wish not to test or get the shot need to stop and need to go absolutely no further. Too many have already lost their jobs unconstitutionally. And when jobs are lost, for many, it doesn't stop there. I implore you to not allow these WAC updates to take fruition. No shot requirements for school. No shot requirements for anyone. No detainment.

The vaccinated get sick just like everyone else. A successful vaccine stops transmission, and the vaccines for Covid are NOT doing this. Not by a long shot. Why are you further considering punishing those who do not "comply", when those that do "comply" are at the same risk, if not more?

Listen, I'm just saying give us freedom of choice. If we want the vaccine, fine. But if we don't, also fine. Let us think for ourselves. We do not need the thinking done for us. We in WA stand for Medical Freedom. We stand for Freedom. Freedom is what has made this country so desirable. We demand our freedom. And this has got to stop in its tracks!

Allow us to choose for ourselves whether we test, or vaccinate etc, without overreaching consequence. Let us have bodily autonomy over ourselves and our minor children. Let us live by the Constitution. Let us remain a free state, a free nation.

WA State does not want this! We do not consent. We are speaking up. Listen to us. Listen to those you claim to "protect". We are speaking to you and we do not stand for this. Our society is hurting enough as is with all the mandates and rules thus far. Our healthcare and educational systems are suffering staffing shortages, and so are many many other industries, as a result of unconstitutional mandates and rulings. We must stop before America is no longer America. And each state matters. WA State matters. THIS matters. This is worth speaking out against. Stop chipping away at what is left of our freedoms and liberties. This is not in the name of health or science, so stop

pretending it is. It is about control, and punishing those who do not think the same way, or listen to the demands of the "powers that be". The issues at hand on Wed, Jan 12 are anything but freedom. They are anything but constitutional. They are anything but American. WA State says no more. Let us keep our Freedom.

Sincerely,  
L. S.

Before establishing any kind of vaccine mandate, you should establish students immunity!! Violating parental rights on medical decisions or imposing undue burden for those of us who've had Covid & kids have antibodies, may end up a in long drawn out court scenario. Since exemptions can be pulled at the discretion of the school board or staff, it's mute point. It's our right to make medical decisions with Dr's. Evening the fact that the people of a vaccine is to prevent transmissibility. Covid vaccines have failed there.

Masks are unhealthy and unnecessary. They interfere with oxygen intake and are often ineffective in their supposed purpose. They interfere with communication too. If people want to wear them, fine. Requiring their use is out of line and inappropriate. Stop the nanny state.

I am concerned for my children and my grandchildren and for those who have anaphylaxis with vaccines.

1.

2. The statements from the CDC, WHO, and WH about vaccine impact on transmission and infection "neither prevent the disease nor stop transmission." The above mentioned organizations, as well as, the Biden Administration have clearly stated this. It is obvious to me that these "vaccines" fall under the classification of medical procedures or treatments, not to traditional vaccines.

3. There is no FDA approved covid vaccine available in the USA that prevents transmission of the disease. I believe, you would be violating existing International Law with this mandate.

4. According to CDC & WHO data, their could be unknown risk to children. Their data shows clearly that across all variants, CHILDREN ARE AT THE LOWEST RISK for infection, transmission and severity.

5. These mandates have and will impact student enrollment and funding for schools. Anti-public school advocates have clearly achieved advances during the pandemic by dis-enrolling children from schools, which are government controlled. Check with districts and you will find, there is a multitude of parents who are vocally and actively opposed to school and childcare mandates. You will see an excess of one-fourth enrollment in local districts. This will have a significant negative impact on school funding when schools already claim their resources are stretched past the breaking point.

6. Many parents in Washington State hold strong family values and believe parents should control what is to be done, or not done, to their children; not the local State or national government.

Sent: 1/13/2022 4:23:36 AM  
To: DOH WSBOH  
Cc:  
Subject: Covid-19 and Variants

External Email

To All Members on the Washington State Board of Health.

My name is Lonnie Eiseman. I was born on the land in Washington State and I live in Washington State.

First of all,

Per the Constitution of the United States, we govern ourselves through legislative representation by people we elect to represent us. We the People did not elect the members of the Washington State Board of Health to represent us. You have no jurisdiction over us.

Secondly,

You can NOT prove SARS-CoV-2 exists! It has never been isolated from a human culture, only in computer simulations. There are NO covid VARIANTS! A fake pandemic was created by the fraudulent use of PCR. The inventor of PCR, Kary Mullis, said on video, "PCR can NOT tell you if you're sick or that whatever illness you have is going to hurt you"! All of you so-called experts MUST listen to this video:

<https://www.youtube.com/watch?v=rXm9kAhNj-4>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv%3DrXm9kAhNj-4&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C9d56de054c344449887408d9d68f8493%7C11d0e2172>>

There is no emergency. There is no pandemic. All of the covid mandates and orders are unconstitutional and unlawful. We the People do not consent to your so-called emergency. Covid-19 does not exist. What does exist is the annual flu which is 99% recoverable.

Thirdly,

The VAERS database has over 21 thousand deaths from the covid vaccines. I personally lost a friend who got the Pfizer double jab and died from blood clots!

We the People will hold each and every one of you accountable for the murder of American people if you continue to push these unconstitutional vaccine orders on us. I remind you of the Nuremberg Code. What you are doing is what people in Nazi Germany were found guilty of after World War II in the Nuremberg trials. I hope I don't have to tell you what happened to those people.

Lastly,

Do you remember our Declaration of Independence? Here's a reminder:

We hold these truths to be self-evident, that all men and women are created equal, that they are endowed by their Creator with certain unalienable rights and among these are life, liberty, and the pursuit of happiness. That to secure these rights, governments are instituted among men and women, deriving their just powers from the consent of the

governed, that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to affect their safety and happiness.

Please don't insult our intelligence. We know you are financially incentivized to do what you are doing and you are following orders from the governor. It is evil and immoral and you all need to resign immediately.

Sincerely,

Lonnie Eiseman

Regarding vote on January 12th to decide to make the covid 19 jabs mandatory. They are experimental. They have not been approved by the FDA. Comiraty has been approved and it is not available in the USA. This virus has a 99.8% survival rate. More people have died from the shots than the virus. The statistics are being manipulated to suit the narrative. It is unconstitutional to force any medical treatment and according to the Nuremburg code, there has to be informed consent. The enclosed circular in the vaccine box is entirely blank. How can you receive informed consent if you do not know what is in it? The individual may not be coerced, forced or pressured to take any experimental treatment. Anyone who forces this and implements any of these shots are guilty of crimes against humanity and will be brought to justice just as they were in World War II. This includes you and if you recall, doctors, news reporters were either in prison for a very long time or were hung. Matter of fact, Nuremburg II trials are going on right now.

There are preventative and treatments effective for this entity. This virus has not been isolated. This has been hidden in order to pave the way for these shots, that do not even work. The hospitals are filled with the vaccinated related illnesses. You likely know this covid 19 is patented. How can you have a patent on a naturally occurring organism? It is a bioweapon.

The MSM say the side effects and deaths are very, very rare. Explain that to a mother of her 6 year old dead child. Explain that to the athlete who survives the heart attack or pericarditis only to never be able to compete again in the field of sport that they love?

I do not comply. I do not agree. There is no evidence anyone who has not taken the shots transmit any illness to those who have taken the jabs. Those inoculated have their immune systems destroyed allowing them to be sitting ducks for illness, immunocompromising illnesses and cancer.

Experts who have been censored including Dr Robert Malone who created the Mrna, Dr Michael Yeadon who was Vice President for Pfizer admit these are bioweapons and the

only objective is depopulation and control of those who survive these shots. You had better wake up. You are on the wrong side of history.

The emergency use authorization expires Jan 15th. Please reconsider pushing this narrative and go down as being on the right side of history.

Sincerely, Rebecca Irvin

Subject: Jan 12 State Board of Health Public Meeting MY PUBLIC COMMENTS

External Email

I am a U.S. citizen, as well as a resident of Washington state and am registered to vote.

Under 21 code of regulations section 50.23 and 24 It is illegal to coerce anyone to participate in an experimental program.

I am OPPOSED to implementing the WAC 246-100-070 to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility. Also I am OPPOSED to implementing WAC 246-100-045 following refusal to comply with requests for medical examination, testing, treatment, counseling, vaccination WA 246-100-040. Also I OPPOSE implementing COVID-19 injections as part of school immunization requirements using WA 246-105.

I OPPOSE the above steps, making them laws under the emergency order. The decision to vaccinate is very personal and should be thoroughly discussed with each person's doctor. This should not be mandated or become law enforced by the Government.

These potential laws are in violation of the individual's freedom, as coercion is being used, which violates the Nuremberg Code.

Below are some statements made about the Covid Vaccine by three health professionals:

CDC Director Walensky recently stated: "What the vaccines can't do anymore is prevent transmission."

Dr. Fauci says, "We know now as a fact that [vaccinated people with Covid -19] are capable of transmitting the infection to someone else."

Modernas Chief medical Officer Dr Tal Zaks agrees, "There is no hard evidence that it [the vaccine] stops [the Covid-19 vaccinated] from potentially infecting others who have not been vaccinated."

According to the individuals named above, the Vaccine CANNOT prevent transmission of infection.

Thank you for taking the time to read my Comments,

Nadia Mallit

Please know that I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105. If for no other reason, the potential risk of children being harmed by covid-19 is much less than the potential harm that may come from the "vaccine." We still have no idea what the long term risks are from such vaccination.

Thank you,

Robert O'Bannan

Subject: COVID Social Distancing Policies

External Email

It is an invasion of individual rights, freedom, and dignity for any state, local or national government to try to mandate how close people can get to each other in the conducting of living everyday life. Efforts to regulate how close people get in their private lives, at work, school, and home, while shopping or attending other civic gatherings is an unacceptable encroachment on personal freedom. Mandating "social distancing" composes a huge overreach of authority to the point seen in totalitarian governments such as communist China and is inappropriate in the United States of America as well as in Washington State or any of its counties or municipalities. Please avoid all such legislation.

I cannot tell you strongly enough that your forced Covid Compliance is a horrible, evil, and maniacal agenda that will destroy families and our country. Believe me this is cause for a revolution. I hope you are prepared for a fight as both citizens and cops will lose their lives as this has now become a fight for freedom. I work for law enforcement and I will in no way comply to a law that is straight out of history reflective of Nazi Germany. I guess I will have to wear a yellow star like the Jews for non-compliance. To even think of this plan is one that only a truly evil person would suggest. The dehumanization of America is the message you are sending. I would hope you would think about this as if this were implemented then people, as in the history of the USA would gladly die to fight for their rights while also protecting their loved ones and their country.

Perhaps this is the ongoing agenda to reduce population, dismantle law enforcement so a one world agenda, one world order, with total control can come into power.

You will get the fight of your life. We are Americans and this agenda is un-American and inhumane.

Shame on you!!!

Subject: Halt Immunization Criteria for Child Care and School Entry Comment for WSBOH members

External Email

Dear WSBOH Members:

Covid-19 Shots should absolutely NOT be a requirement for our Washington state children.

Children are at extremely low risk for Covid and have 99.995% survival rate from Covid infection. There have been ZERO deaths from ages 5 to 10 from Covid.

There are no long-term studies to document any history of safety and the vaccines are still only EUA (emergency use authorized)

Studies do now document that vaccinated and unvaccinated can both transmit Covid, therefore, the vaccine apparently does not stop the spread of the disease.

As a Washington citizen, I am asking you to NOT mandate the covid-19 vaccines for Child Care and School Entry.

Regards,  
Washington State Resident

GLOBAL ALERT: An estimated 10 million people PER DAY are set on irreversible countdown to vaccine death that could exterminate BILLIONS if not stopped in the next year

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnaturalnews.com%2F2022-01-04-10-million-people-per-day-are-set-on-irreversible-countdown-to-vaccine-death.html&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1538fb1ec3334ea7580108d9d65c61af%7C11>

This is a red alert for humanity. We have less time remaining than you might think. I've done some rough math, and it's beyond alarming. It spells the end of human civilization if we don't stop the vaccine holocaust in the next 365 days. As estimates and projections show below,  
naturalnews.com

How dare you promote this deadly cause. The people of Washington state, and everywhere are about to get REALLY angry!

## DECLARATION, CEASE AND DESIST AND NOTICE OF LIABILITY

# **WORLD COUNCIL FOR HEALTH CALLS FOR AN IMMEDIATE STOP TO THE COVID-19 EXPERIMENTAL "VACCINES"**

### **A. CONSENSUS OF WORLD'S FOREMOST EXPERTS**

Globally renowned experts, including Dr. Paul Alexander, Dr. Byram Bridle, Dr. Geert Vanden Bossche, Prof. Dolores Cahill, and Drs. Sucharit Bhakdi, Ryan Cole, Richard Fleming, Robert W. Malone, Peter McCullough, Mark Trozzi, Michael Yeadon, Wolfgang Wodarg, and Vladimir Zelenko, among many others, consistently warn the world about the adverse effects resulting from Covid-19 experimental injections; they also warn about their long-term effects, which cannot be known at this time since most clinical trials will be not completed until 2023, and some as late as 2025.

In June 2021, Dr. Tess Lawrie, co-founder of the World Council for Health and member of the Council's Steering Committee, courageously described the global crisis and called for urgent action: *"There is now more than enough evidence on the [UK] Yellow Card system to declare the COVID-19 vaccines unsafe for use in humans. Preparation should be made to scale up humanitarian efforts to assist those harmed by the COVID-19 vaccines and to anticipate and ameliorate medium to longer term effects."*

### **B. DECLARATION**

The World Council for Health declares that it is time to put an end to this humanitarian crisis. Further, the Council also declares that any direct or indirect involvement in the manufacturing, distribution, administration and promotion of these injections violates basic principles of common law, constitutional law and natural justice, as well as the Nuremberg Code, the Helsinki Declaration, and other international treaties.

### **C. UNCENSORED FACTS**

We now know that children are over one hundred times more likely to die from these experimental injections than Covid-19. Injected athletes, globally, are collapsing before our very eyes. In spite of the fact that reporting systems are limited and passive, millions of adverse effects have been recorded, which include death, paralysis, blood clots, strokes,

29th November 2021

www.worldcouncilforhealth.org

myocarditis, pericarditis, heart attacks, spontaneous miscarriage, chronic fatigue and extreme depression.

See: <https://coronavirus-yellowcard.mhra.gov.uk/>

See: <https://vaers.hhs.gov/>

See: <https://www.ema.europa.eu/en/human-regulatory/research-development/pharmacovigilance/eudravigilance>

See: <http://www.vigiaccess.org/> (search covid-19 vaccine)

#### **D. VICTIM TESTIMONIES**

The World Council for Health acknowledges and respects the experiences and testimony of the victims of this worldwide medical experiment. We also declare and confirm that safe, effective and affordable treatments for Covid-19 exist and should be made available to all who need them.

See: <https://www.wewanttobeheard.com/>

See: <https://nomoresilence.world/>

See: <https://www.vaxtestimonies.org/en/>

#### **E. NOT SAFE, NOT EFFECTIVE**

Recent studies confirm the risks associated with Covid-19 experimental injections. Emerging research establishes that the injections are neither safe nor effective, and, in fact, are toxic. While some of the known ingredients of the injections cause biological harm, it is even more concerning that the unknown and undisclosed ingredients may present an even greater threat to human health.

#### **F. CEASE AND DESIST**

The World Council for Health is ethically and lawfully bound to issue this Declaration, demanding that governments and corporations cease and desist from direct or indirect participation in the manufacturing, distribution, administration or promotion of Covid-19 experimental injections.

The Council declares that every living man and woman has a moral and legal duty to take immediate and decisive action to halt this unprecedented medical experiment, which continues to cause unnecessary and immeasurable harm.

29th November 2021

www.worldcouncilforhealth.org

**G. NOTICE OF LIABILITY**

The right of bodily integrity and the right to informed consent are inalienable and universal human rights, which have been trampled by government mandates and corporate imperatives. Thus, the World Council for Health declares that any person or organization directly or indirectly participating in the manufacturing, distribution, administration or promotion of Covid-19 experimental biologics will be held liable for the violation of principles of justice grounded in civil, criminal, constitutional and natural law, as well as international treaties.

Please do not mandate or force child or young adult vaccines. The side affects are not worth the risk. By the way, don't mandate anyone. Our bodies our choice. What next will be mandated. Go back to the source where the virus came from. Punish them not us.

To whom this concerns,

We have seen the enemy and it is the corrupted, bribed, coerced and complicit federal, state and city governments who have deliberately engaged in this planned-demic to create the greatest crime against humanity to date. You have destroyed our economy, social structure, abused our children who are essentially immune from this 99.9% survival rate flu. And then assaulting the population with a toxic life threatening inoculation which has permanently injured millions and outright killed hundreds of thousands, far exceeding any legitimate deaths from this flu, which has been gone for over a year now. The medical and scientific fraud is staggering, the cognizant dissonance and malice of Inslee's office and his very questionable relationship with the genocidal maniac and international despot Bill Gates is inexcusable. All the while using a fraudulent testing procedure(97% false positive and which tap water gives a positive result ) to further cripple the population is beyond reprehensible. Any further ridiculous and draconian behavior from this body will not be tolerated. This fascist agenda Inslee is engaged in is an act of terrorism and treason and along with all your names , address and email, his information and crimes will be handed over to the Nuremberg court currently in session. I pray you do the right thing and rescind any further crimes against the people by supporting this fraud but i know you, like the despotic school board, are bribed and incentivized with billions of our tax dollars by this illegit Biden admin to assault the people and our children. You will be held responsible for your complicity and your complacency. Like DC, MSM, CDC, AMA, WHO, NHS, etc.,.this governing body has become the enemy thru your treasonous crimes against our republic and our constitution. There has never been a pandemic, no excess death and which effected less than one half of one percent of the population and for this you threaten concentration camps and police intrusion into our homes and businesses. Have you no morality or conscience?

This adventure has pointed out the incompetence and fraud which is the medical industry and how our despotic politician's prey on the people. Those who have awakened will never sleep again. I, for one, will never comply with this criminal enterprise, or my children and grand children. We have seen the enemy.

Sincerely,

Stephen Joseph Strickland

In the event that you "take Possible Action" regarding Chapter 246-105 WAC please know that I am absolutely NOT in favor of Covid vaccine requirements for children for school and daycare. This would definitely be overreaching and immoral. If you refuse to allow unvaccinated children to attend then give them their education \$\$\$ and they can go elsewhere.

I won't lie... the following item also has me very concerned. The thought that a local health officer has sole discretion to do something like this is incredible.

WAC 246-100-040

Procedures for isolation or quarantine.

(1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she:

A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in accordance with the provisions of RCW 43.20.050

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>  
(4) and 70.05.120

<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fapp.leg.wa.gov%2FRCW%2Fdefault>

.

Where are the rights of "We The People" when it comes to this sort of action. The fact that they only have to have a "reason to believe" is crazy.

I think it's pretty obvious that these items need to be changed in light of where we find ourselves today and the massive overreach of our existing government.

Sincerely,

Mary K Geiselman

Subject: Covid round up

External Email

I can not in my wildest moments of fear over this illness imagine how any of you think you are doing the right thing rounding people up who refuse the test or the vax. Are you so sure you are doing the right thing that you will sacrifice American's constitutional rights to achieve your goal? Unfortunately you are not correct in these thoughts and are it is eerily similar to the Nazi movement . I'm sure they too believed they were perfectly justified in rounding up the Jews. Look at yourselves. When all who are vaxed come down with the numerous diseases listed by Pfizer itself and on the VAERS site, you had better hope that the unvaxed are not as self righteous as you. When everyone learns that the vaxed are spreading this because of the spike protein in the shot and thus their extremely high viral load, you better pray that others will not round all of you up in this same manner.

Where's the transparency? After this public comment section, why do the board members continue to pay themselves on the back? If you aren't listening and actively taking in concerns from the public comments, we will continue to resist against any/all 'wants' from you and the state. We are already in the process of leaving the state. 2 less enrolled in schools.

Enjoy!

Josh

To whom it may concern,

As a parent in WA state, I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children). No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended).

The government has over-reached, this is a parenting issue, not a government issue.

Thank you for your time.

Hello,

Please find the link to a very informative and timely interview, on Dec. 30, 2021, with renown Dr. Robert Malone, the inventor of mRNA that is in the Covid19 shots.

I send this in advance of the WSBOH zoom meeting on Wed. Jan. 12 for your viewing. I trust it will shed much light on the topic and will be useful information toward understanding informed public comment and the issues relevant to ch. 246-100 WAC.

I appreciate your time and attention to this.

External Email

Hello,

I am currently listening to your meeting today Jan 12th that began at 9:00am. Keith made it very clear that everything on social media was all lies, I am very curious and would very much appreciate a response back as to when this board will actually be discussing and/or approving mandatory vaccinations for K-12 students as well as any quarantine encampments for unvaccinated individuals. It also states on #11, about possible vaccination requirements for K-12 students as possible action.....so is that not true or after we all contacted and joined the meeting you all quickly decided to change your minds???

Unfortunately, the Washington State government has been so untrustworthy, therefore most do not trust you at your word, the reason why so many are watching this meeting as well as every other meeting.

Also, when is the "Emergency" over??? Most other states have removed masking and vaccine requirements and actually have lower case numbers and deaths, so when can we actually look at the science on these matters???????

I will be following all of your meetings closely to make sure that you hold true to your statements that you will not be discussing mandates and isolation and will not be implementing at a later time!

Thank you for your time,

Concerned parent of 3 school aged children

Good morning,

I am writing to let you know that I am opposed to the proposed WAC's

246-100-070

246-100-045

246-100-040

246-100

246-105

I am adamantly opposed to giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

We are the United States of America, the land of liberty and freedom. We are not Nazi Germany.

I am completely opposed to COVID-19 injections as part of the school immunization requirements using WAC 246-105.

Please be careful with the decisions you make. You will be held accountable one day.

Kathy Higbee

Listen up Caitlin!

You people WORK FOR US, we are not your subjects! We will never allow you to require an experimental product to be FORCED on our children to attend the public schools THAT WE PAY FOR! THE PEOPLE OF THIS STATE OPPOSE AGENDA ITEM #8 AND WE ALWAYS WILL. You bastards will rot in hell if you try forcing this on our kids. The mothers WILL NOT STAND FOR IT!!!!

As for quarantine camps - SCREW YOU. Will will never comply and neither will the police force that you're trying to weaponize against American citizens. Do you really think you can pull off "Australia" on American soil? THINK AGAIN. The citizens of this country and state will NOT stand for it!!!

The Washington state has gone off the rails. We the people will not allow it any longer! You do not run our lives, you are there to SERVE US. Covid is essentially over, and we're all going to go back to normal, like it or not. You will NOT stand in our way.

We also support agenda item #11, establishing a rule the keep you bastards from requiring an EUA product for school attendance.

Lora B., mother of 3

Subject: Do Not Vote for "Healthcare" Tyranny in Washington

External Email

Dear Washington State Board of Health Members,

Out of fear, I am writing you today.

I have listened to local Seattle radio and watched national television reports on these absurd and non-scientific "health" measures that you are voting on today.

Our nation and state have lived with Co-vid for several years. We citizens know a lot about this disease: how it originated, how it has been lied about, and who we can and cannot trust.

If Governor Inslee were truly serious about eliminating Co-Vid and its variants:

1. He would encourage President Biden to close our southern border – where 2.5 million diseased illegals from over 150 countries have entered our nation in the year since he took office.
2. He would rescind his mandates forcing these "bio-experimental shots" onto healthcare workers and other employees.
3. He would read data from other U.S. states and World Nations who are successfully managing this virus.

The latest variant, Omicron, is highly contagious with mild symptoms.

Enacting severe measures on our state is nothing but a control play by Governor Inslee.  
Do not vote for these measures to allow him the power that he craves.

Kindest regards,

Maggi Hoover

External Email  
Hello,

I am writing to express my sincere concerns about mandatory Covid-19 vaccines for school entry and childcare in WA. I have 2 young children, ages 6 and 4 who are currently all up to date on their vaccination schedules. My husband and I have spent hours discussing and evaluating potential risks and benefits of vaccinating our children against Covid-19 and have come to the conclusion that there are simply too many known and unknown risks to submitting our children to these experimental vaccines. It is well known that the risk of severe illness and death to children from Covid-19 is extremely low. What is more concerning to us as parents are the potential long term risks associated with a new vaccine technology. Given these facts, we believe it is in the best interest of our children's health to not vaccinate them against Covid-19.

May I also point out that the current Covid-19 vaccines available in the United States remain under emergency use authorization. These vaccines also do not stop transmission, only lessening the severity of symptoms. Mandating Covid-19 vaccines for our children, the majority of who have very mild or even asymptomatic cases, is simply unnecessary and will not "stop the spread" or protect others. If anything, it may convince parents to allow their vaccinated children to go to school while ill in a false assumption that they can't get covid, increasing the spread. Putting our most innocent at risk of suffering unknown long term side effects from a rushed vaccine for a disease that does not cause them harm is simply not rational.

I implore you to allow parents to make their own decisions for their children's health.

Thank you,

Jamie Temple

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org))  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>

) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Concerned citizen,

Jamen Green

To whom it may concern:

My name is Jessica Perez and I am a reporter for KNDO located in Yakima, Washington. I am working on a story today clarifying what the January 12 Washington Board of Health meeting will be about. I am hoping to speak with someone today over Zoom before 3pm. I think it's best if our viewers hear directly from someone on the board of health rather than a press release. You can contact me at (509) 212-0970. Thanks.

Best,

Jessica Perez

Subject: I Oppose Rule Changes Related to Covid-19 - January 12, 2022 Agenda

External Email

Dear Washington State Board of Health Members:

Re.:  
Meeting: January 12, 2022 Meeting  
Topic: Applying Current Infections Disease WAC Codes to Include Covid-19 for All WA State Residents

I am writing to oppose the following proposals:

1. To allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).
2. To include the Covid-19 injections as part of school immunization requirements using WAC 246-105.

I have been horrified by images and videos coming from countries such as Austria, France, Australia and elsewhere, of police officers patrolling shopping centers, restaurants, outdoor parks (Outdoor! Parks!) and other public places, demanding to see everyone's "papers!" And I am astonished that any American would want to import such practices here. We are a free country. Such violations of our individual God-given rights to liberty and privacy are intolerable and unthinkable.

It is worth noting that these blanket government mandates such as demanding that everyone wear masks and get vaccinated are antithetical to the most fundamental rights we all cherish, contrary to medical ethics, and unscientific.

With respect to fundamental rights, we have the right to make our own decisions as to what is best for us as individuals and families. The US Declaration of Independence states that all men were endowed by our Creator with the rights of life, liberty and the pursuit of happiness. And the Washington State Constitution recognizes that "no person shall be deprived of life, liberty, or property, without due process of law" and "no one shall be molested or disturbed in person or property on account of religion" (noting that these mandates touch on religious beliefs associated with autonomy of one's person as the Temple of the Holy Ghost).

With respect to medical ethics, these mandates amount to socialized medicine, whereby medical diagnoses and prescriptions are performed by politicians who have no medical qualifications, and imposed without any consideration or respect for an individual's unique medical and health condition. One outcome of the Nuremberg Trials was the adoption of a Universal Declaration on Bioethics and Human Rights by the United Nations Educational, Scientific and Cultural Organization (UNESCO). Article 6 of this declaration states: "Any preventive, diagnostic and therapeutic medical intervention is only to be

carried out with the prior, free and informed consent of the person concerned, based on adequate information." These blanket mandates are the complete opposite of such informed, free choice.

With respect to being unscientific, let me just point out four things:

- 1, masks do not stop the spread of respiratory viruses. We have over forty years of published scientific literature on this, in addition to the massive, global empirical evidence collected over the past 20 months.
- 2, The low lethality to the general population and the widespread availability of successful treatment options for Covid-19 symptoms makes preemptive vaccination for the majority of people non-indicated from a risk/benefit assessment.
- 3, The vaccines and so-called vaccines a) do not stop the spread of SARS-CoV-2; b) cause an unacceptable number of serious adverse events to merit widespread use; and c) are completely inappropriate for children given the extremely low risk the virus presents to them.
- And 4, the vaccination mandate is absolutely unscientific in that it takes no account of naturally acquired immunity.

On this last point, our public health officials have been woefully derelict in their duty, by not publicly recognizing natural immunity. As far as masks go, I've opposed masks from the very beginning of their implementation. Not only do they NOT prevent the spread of respiratory viruses, they also to some degree block exposure of the immune system to the innumerable antigens in our environment, thus depriving one's immune system from the daily exercise it needs to maintain optimal health. Here again, our public health officials have failed us by not talking about the importance of immune health and good lifestyle choices (diet and exercise) in fighting this pandemic. It is also obvious to all of us that those with authoritarian tendencies are getting increasingly desperate to extract the last bit of opportunity this passing pandemic provides as it is clearly fizzling out. The virus is mutating to ever more infectious but less lethal strains, as I and many other scientists predicted 2 years ago, in line with the "Law of Diminishing Virulence" postulated by Theobald Smith over a century ago.

The United States was founded in a just revolution against tyrannical government practices. This is our heritage. And these are our God-given rights. It's time to cease and desist on all Covid-related government lockdowns and mandates. It's time to end this madness.

Sincerely,  
Martin Hughes, Ph.D.  
Spokane

Dear Board of Health Members,

Though there wasn't time for me to speak, I was delighted with all who were able and agreed completely. The only thing I could have added was that VAEIRS is in contractual relationships with the manufacturers of the shots, but aren't fulfilling their legal duties. No one is making them. When people say their data is wrong, it is the legal duty of these pharmaceutical companies to fix it. Maybe you could help.

The answer I'd like to offer board member Keith about where in the world we got the crazy ideas about isolation or quarantine premises are your own WACs! Have you read them lately? I'd suggest you do, because they're not all about just the one location cited. Start with 246-100-070, telling how a local health officer's whims can be enforced by all police officers, sheriffs, etc.! If we, the governed, violate anything in the chapter we'll be guilty of a misdemeanor, and punished according to the RCW. This is just one of the items one of your callers suggested you delete. Good idea.

246-100-045 goes on to spell out the conditions and principles for isolation or quarantine for one or many. This is what they were referring to. It also needs to be deleted from the books as she said. Way too much power, totally unconstitutional both federally and by the state. We've seen what happens to others and will not tolerate it here, as you found out.

Then there's 246-100-050 regarding isolation or quarantine premises that we may be authorized to be placed in by a number of the people - to meet our needs, of course. It refers to 246-100-040 for the procedures of the above! So comforting, with other countries doing the same and a president threatening. Sole discretion of the health officer. with as little as reason to believe there is a need. Of course we know that Covid isn't a disease, but an infection. We've seen too many run with these kinds of things. Immediate emergency detention for 10 days for an individual or group by police, if so ordered. Where is HIPAA in all of these? The Nuremberg Code? Or any of our federal or state protections? Finally a mention of court... when?

And how? If there are too many of us, there's 246-100-065 so groups can be herded and dealt with legally all at once.

246-100-060's the most comforting. We'd have the right to counsel, if we like, after we're already put away somewhere!

The so-called misinformation woke the sleeping giant. We want our republic back.

Thanks,

Margo Thompson Teacher/Administrator North Country Christian School

To whom it may concern,

I am not an anti-vax parent, my children are vaccinated. On the contrary, in no way do I support the requirement for my young, developing children to be required to be vaccinated with an experimental drug that the drug company cannot be held responsible for if said drug hurts them in any way. I'm not willing to risk giving my healthy children a drug we've had very little time to understand the long term effects this could have on them, or to risk any of the complications we already know can happen from this vaccine. Please, please, do not make the vaccine a requirement to attend public school. My 1st grader would be devastated if I had to remove her from school to homeschool her, if a requirement to vaccinate school aged children was out into order. Covid has been so hard already. I have a 4yr old who doesn't get nearly get the socialization he deserves & a 7yr old who didn't get to finish pre-school & only was able to join in on Kindergarten the last semester when in-person started back up earlier last year. This would just be one more disappointment. Again, please do not require our children to be submitted to an experimental drug. Let them continue with the little bit of normal they get going to school without risking any of the complications of an experimental vaccine.

Please.

Lori Finckbone

Hello,

Please find the link to a very informative and timely interview, on Dec. 30, 2021, with renown Dr. Robert Malone, the inventor of mRNA that is in the Covid19 shots.

I send this in advance of the WSBOH zoom meeting on Wed. Jan. 12 for your viewing. I trust it will shed much light on the topic and will be useful information toward understanding informed public comment and the issues relevant to ch. 246-100 WAC.

I appreciate your time and attention to this.

I am opposed to making COVID-19 shots mandatory for school admissions or childcare in our State for the following reasons:

- \*Children are at extremely low risk for Covid.
- \*The vaccines are only EUA (emergency use authorized.
- \*There are no long term studies to document any history of safety or possible harm.
- \*Studies do now show that vaccinated and unvaccinated can both transmit Covid.
- \*the vaccine apparently does NOT stop the spread.

Sincerely,  
Michael Neiman  
WA State resident

I respectfully ask that you vote against a any mandatory requirements for children to get any COVID vaccine. This vaccine should be categorized the same as all other vaccine's for school – especially until the vaccines have undergone the same long range testing as others. There is a reason for new medications to go through the long term vetting process and not abiding by that for this vaccine, I believe, would be irresponsible and reckless.

Thank you,

Rella L. Grimes

I hate to comment on anything when I don't feel like I have all the facts. But the info I do have seems legitimate. Is it possible that you are really thinking of locking up people who have not been vaccinated? I am vaxed but I will fight for those who choose not to be. I will fight them if they chose not to wear a mask and be reasonable. But to lock people up over something like this means we will then have to lock up all the people with TB who don't get treatment and the list goes on and on. We are not thinking outside the box here. There are many options I don't think I need to list them you know the obvious. Get more testing, easier to do out there. If This is going to start taking away people rights lets think about setting up schools and a hospital that is complete run by people who do not want to vax. There are enough of them out of work we could do this. Set aside some places for the non vax people. AND above all tell the truth and give people all the facts not the ones that seem so hard to believe and later they find were used as manipulation. I used to believe we could counter things with education but then education became some false information to make the facts what we wanted them to be.

I already know so many who have left this state and are planning to leave this state and, yes, I know that you are saying "good riddance", but these are hard working, intelligent, tax paying people. the ramifications are going to hit sometime. Can we use our energies to put aside our hatred for the non vaxers and try to come up with some solutions to help. Can we be open to looking at things like the merk pill? To testing often. To possible alternative treatments To getting the Novavax here so people who have serious questions (right or wrong) about mRNA etc have an alternative? What is the hold up with some of this?

There have to be other solutions than locking people up for their beliefs.

Thank you,

Helen Bishop

Dear Washington State Board of Health Members,

Out of fear, I am writing you today.

I have listened to local Seattle radio and watched national television reports on these absurd and non-scientific "health" measures that you are voting on today.

Our nation and state have lived with Co-vid for several years. We citizens know a lot about this disease: how it originated, how it has been lied about, and who we can and cannot trust.

If Governor Inslee were truly serious about eliminating Co-Vid and its variants:

1. He would encourage President Biden to close our southern border – where 2.5 million diseased illegals from over 150 countries have entered our nation in the year since he took office.
2. He would rescind his mandates forcing these “bio-experimental shots” onto healthcare workers and other employees.
3. He would read data from other U.S. states and World Nations who are successfully managing this virus.

The latest variant, Omicron, is highly contagious with mild symptoms.

Enacting severe measures on our state is nothing but a control play by Governor Inslee. Do not vote for these measures to allow him the power that he craves.

Kindest regards,

Maggi Hoover

The effects of updating of ESHB 1551 vocabulary to ostensibly and eventually include Covid-19 along with the language specifying HIV, is an unwarranted constitutional invasion. The current "science" on Covid-19 and its variants that will continue to evolve regularly-- similar to influenza-- will make involuntary quarantine equivalent to internment of Japanese in WWII.

Stop usurping citizens' constitutional rights based on a disease that can now be effectively treated and for which symptoms are rarely life threatening for all but the most unhealthy.

Subject: Items of objection on Jan. 12, 2022 meeting

#### External Email

##### Item 1: Vaccines in schools & daycares: 246-105 WAC

I am one of the citizens of the state of Washington, your income and our public schools are funded by us, the tax payers.

1) Our children have the right to a paid for education and you are using the education system as a manner to divide groups of citizens and cause unrest. Parents are in charge of their children, not you.

2) It is unethical to require use of vaccines consisting of unproven and possibly dangerous drugs in order for the children of this state to enter/enroll in public school or in daycare. The parents have spoken and you don't like their response to the vaccine.

3) The TAG is a complete waste of tax payer money and it obviously consists of a biased panel of "Yes-people." Disband and ignore this TAG.

##### Item 2: Enforcement of Local Health Officer Orders WAC-246-100-070

1) "bloodborne pathogens and other infections" this is a non-essential change that your group is using to be allowed to cherry-pick illnesses which you will deem dangerous to public health.

2) You are trying to give public officers of varying groups the power to use (28 in recommended changes) "Their professional judgement" - to determine this need. The needs you list are vague and leave too much room for unnecessary limitation of freedom of movement to citizens, (9, 16, 23 of the Recommended Changes). You are couching it as "protecting the public."

3) As we have all seen throughout Coronavirus, The Board of Health or the government of this state or of the United States cannot protect citizens from disease. It is not your place to do other than emergency needs. Emergency needs do NOT CONSTITUTE PERMANENTLY CHANGING LAWS & CODES of this state.

3) this includes 246-90 WAC this needs to go to a vote of the people.

##### Item 3: Local Health Districts

Do not create local comprehensive health districts that try to encompass equal needs of everyone in each district. With SEBB, with OBAMACARE, and the Long Term Care insurance fiasco, we have seen that we cannot afford for government to be the creator of equal health care.

I believe in health care, but it needs to be in the commercial market and compete on the commercial stage to lower costs and to help have less bias and more room for equality. NO to this completely. you are not a savior, you are the government. Get out of this industry and let the commercial competition lower the costs and barriers to health care!

Sincerely,  
Kim Wilbur

I 100% disagree with this. No one has even isolated the covid virus yet! It's the flu. You people have ruined livelihoods, peoples health, their mental well being and killed people because of your ridiculous, unfounded in true science protocols. Remdesivir and ventilators kill. The covid vaccines have killed more people than all vaccines combined. This whole ordeal is nothing but an evil ploy that you all will pay a heavy price for. I doubt any of you sleep very well at night knowing your killing and harming all kinds of people, including children.

Washington State Board of Health,  
I do believe citizen safety is a primary responsibility of the government. I do not believe it is the responsibility of the government to control our lives. Give the public accurate politically unbiased information and let us make our own decisions about what to do and how to respond. I have concerns that health board/care officers and the Governor are being given too much power to intrude and override our person freedoms. The government and its appointees are not our caretakers, guardians or parents. Governor Inslee has skirted the intention of the law to increase his power and the power of the health board over the citizens. I have grave concerns about his proclamations and mandates related to COVID. If citizens make a decision to not get vaccinated and they get sick that is their choice. It is not the governors or health departments choice. I would like you stop invading our rights with mandated vaccinations or detentions.

Another comment, I believe the hospitals might not be so overwhelmed if the Governor had not mandated that unvaccinated staff be fired. These people who served us so selflessly during the first year of COVID outbreak were rewarded by losing their jobs. The freedoms of unvaccinated citizens should not be limited. Your mandates are divisive and destructive.

Thank you for your consideration of my thoughts,  
La Jean

Hello,

As a hard working citizen of Washington state I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070 <tel:246-100-070> , WAC 246-100-045 <tel:246-100-045> , WAC 246-100-040 <tel:246-100-040> , WAC 246-100, WAC 246-105.

What happened to the constitution? When are these overreaching policies by our state law makers going to end? This is getting ridiculous, and I'm tired of the "pandemic" excuse. It's proven the vaccines don't work. I know of many vaccinated people whom still got the covid. We need to get back to civilization as we knew it, or we are done.  
Sincerely and very concerned

Good Morning,

I have major concerns!!!

I have lived in Washington over 60 years.

Worked in School districts for over 30 years.

I am writing you about the agenda for the January 12, 2022 meeting.

I am in opposition to the following.

- \* Any involuntary isolation/quarantine of the people as described in parts of WAC 246.100
- \* Any mandate on COVID vaccines for children as a requirement to attend K-12 public or private school.

This reminds be of the Japan interment camps right here in the U.S.

Please have some common sense

Sincerely,

Karla Atwood

Thank you for taking the time to consider, my comments regarding the meeting on the upcoming WA state health board on the 12th.

I won't sugar coat this but this is an absolute disaster. The proposed changes would trample on the very people you are supposed to represent, and mark my words people will lose their lives as a result of these proposed changes. There will be citizens of this state who will not comply with the use of lawinforcment on the general public. People will stand their ground for their body autonomy and there will be chaos and you can all prevent it.

Remember there is no evidence the vaccine stops the spread of this virus. Those that have chosen to not vaccinate know the risks and do not need to be protected from themselves. This is America, and people have the right to make their own mistakes and it is not the governments business. We fought a war to end tyranny, to be properly represented.

So I ask as you meet on the 12th to think who you really represent.

Do you represent an odd party line that is curiously teamed up with big pharma? Or do you represent everyone who lives in your state.

Thank you again for your time, I hope you think about the impact of this meeting.

Once again, detaining people against their will for a virus that most people survive and we all know the risks of is absolutely madness and autocratic thought.

Ps. I am a step parent and there is no reason our kids need to be vaccinated since it does not prevent spread.

Subject: Community and love

External Email

Please say no to these continued tactics of fear and control. We cannot control this virus. We need health, exercise, community, nutrition and love.

Pumping children full of experimental drugs and endless boosters, masking smiles and inhibiting a child's right to breathe fresh air. These methods are not working. Please read The Real Anthony Fauci which is a #1 bestseller so you can be informed on what is going on.

Together we can end this by ensuring medical freedom, insuring community and real health - nutrition, fitness, friendship. Enough of fear, propaganda, mandates, concentration camps. Enough.

Thank you!

Subject: Ethical treatment of children

External Email

Regarding the discussion of covid-19 vaccination requirements for children. The fact that this is even on the table as a discussion is disturbing. There is enough data to show that vaccines for children is a terrible idea.

If you approve this, every child who is harmed will be on your conscious. The ramifications of children's health are permanent.

All of this data is well researched and available

\* The data is empirically proven that these vaccines do NOT prevent anyone from getting or transmitting covid to others.

\* The data is empirically proven that these vaccines do NOT create ANY safety for anyone else, beyond the undetermined and temporary reduction of individual symptoms.

\* The data is empirically proven that children have an almost zero statistical risk of covid symptoms.

\* The data is empirically proven that children do not have high transmission rates to pass on covid to adults, in fact the transmission rates are far lower than the flu.

\* There is ZERO long term testing on the impacts of these vaccines on children. By definition, we have no longitudinal studies on side effects or long term health impacts.

In addition, what we see across the world, are that those places with lockdowns and vaccines mandates show no measurable difference in covid rates at all.

So, what we have are three factors:

1. The vaccines do not prevent transmission.
2. The vaccines have no long term testing for side effects and health impacts.
3. Children have almost no risk from covid in any rate.

Risking long term consequences for no appreciable benefit is beyond evil. Our role as adults and parents is to protect our children, not use them as political pawns in

misguided and ill-conceived political stances.

If you are to put these requirements in place then our response will be to immediately withdraw from the school system and move out of this State.

I hope you think long and hard about this, and do the right thing.

Matt

To whom this concerns,

We have seen the enemy and it is the corrupted, bribed, coerced and complicit federal, state and city governments who have deliberately engaged in this planned-demic to create the greatest crime against humanity to date. You have destroyed our economy, social structure, abused our children who are essentially immune from this 99.9% survival rate flu. And then assaulting the population with a toxic life threatening inoculation which has permanently injured millions and outright killed hundreds of thousands, far exceeding any legitimate deaths from this flu, which has been gone for over a year now. The medical and scientific fraud is staggering, the cognizant dissonance and malice of Inslee's office and his very questionable relationship with the genocidal maniac and international despot Bill Gates is inexcusable. All the while using a fraudulent testing procedure(97% false positive and which tap water gives a positive result ) to further cripple the population is beyond reprehensible. Any further ridiculous and draconian behavior from this body will not be tolerated. This fascist agenda Inslee is engaged in is an act of terrorism and treason and along with all your names , address and email, his information and crimes will be handed over to the Nuremberg court currently in session. I pray you do the right thing and rescind any further crimes against the people by supporting this fraud but i know you, like the despotic school board, are bribed and incentivized with billions of our tax dollars by this illegit Biden admin to assault the people and our children. You will be held responsible for your complicity and your complacency. Like DC, MSM, CDC, AMA, WHO, NHS, etc.,.this governing body has become the enemy thru your treasonous crimes against our republic and our constitution. There has never been a pandemic, no excess death and which effected less than one half of one percent of the population and for this you threaten concentration camps and police intrusion into our homes and businesses. Have you no morality or conscience?

This adventure has pointed out the incompetence and fraud which is the medical industry and how our despotic politician's prey on the people. Those who have awakened will never sleep again. I, for one, will never comply with this criminal enterprise, or my children and grand children. We have seen the enemy.

Sincerely,

Stephen Joseph Strickland

Subject: COVID POLICY

External Email

To whom it concerns:

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

Born Srilankan, not a US citizen. You expect things like this in many other communist countries, i came here as there is freedom now. People here are trying to turn this country into a dictatorship.

I would be glad to have a conversation about the data about COVID and how things are not making sense, we are all learning from it but the more we learn we have to adapt from it and not keep pressing forward even if the data doesn't align.

My background work and education is testing and crunching data, with the data out there the decisions we are making are not making sense.

please do the right thing for our future generations to come

Thank You,  
Nelson Jeyarajah

Subject: January 12th Meeting - FDA COVID 19 Vaccine - Nuremberg Code (1947)

External Email

Dear State Board of Health,

1. The FDA NEVER approved the COVID 19 vaccine being used today.
2. The Nuremberg Code (1947) clearly states that humanity cannot be experimented on.
3. If you approve these POLICIES (WAC 246-100-070) (WAC 246-100-045) (WAC-246-100-040) and you are challenged in court, THESE FACTS WILL COME OUT!!

SEN. RON JOHNSON: We do not have an FDA-approved vaccine being administered in the U.S. The FDA played a bait and switch. They approved the Comirnaty version of Pfizer drugs. It's not available in the U.S. They even admit it. I sent them a letter three days later going "What are you doing?" What they did is they extended the emergency use authorization for the Pfizer drug vaccine that's available in the U.S., here that's more than 30 days later, they haven't asked that very simple question. If you're saying that the Pfizer drug is the same as the Comirnaty, why didn't you provide FDA approval on that? So, there's not an FDA-approved drug and, of course, they announced it so they could push through these mandates so that people actually think, "Oh, OK now these things are FDA approved." They are not and again, maybe they should be, but the FDA isn't telling me why.

The judgment by the war crimes tribunal at Nuremberg laid down 10 standards to which physicians must conform when carrying out experiments on human subjects in a new code that is now accepted worldwide.

This judgment established a new standard of ethical medical behavior for the post World War II human rights era. Amongst other requirements, this document enunciates the requirement of voluntary informed consent of the human subject. The principle of voluntary informed consent protects the right of the individual to control his own body. This code also recognizes that the risk must be weighed against the expected benefit, and that unnecessary pain and suffering must be avoided.

This code recognizes that doctors should avoid actions that injure human patients. The principles established by this code for medical practice now have been extended into general codes of medical ethics.

---

The Nuremberg Code (1947)  
THE NUREMBERG CODE

1. The voluntary consent of the human subject is absolutely essential.  
This means that the person involved should have legal capacity to give consent; should

be  
so situated as to be able to exercise free power of choice, without the intervention of any  
element  
of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or  
coercion; and  
should have sufficient knowledge and comprehension of the elements of the subject  
matter  
involved, as to enable him to make an understanding and enlightened decision. This  
latter  
element requires that, before the acceptance of an affirmative decision by the  
experimental  
subject, there should be made known to him the nature, duration, and purpose of the  
experiment;  
the method and means by which it is to be conducted; all inconveniences and hazards  
reasonably  
to be expected; and the effects upon his health or person, which may possibly come from  
his  
participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each  
individual who initiates, directs or engages in the experiment. It is a personal duty and  
responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society,  
unprocurable by other methods or means of study, and not random and unnecessary in  
nature.

3. The experiment should be so designed and based on the results of animal  
experimentation  
and a knowledge of the natural history of the disease or other problem under study, that  
the  
anticipated results will justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and  
mental  
suffering and injury.

5. No experiment should be conducted, where there is an a priori reason to believe that  
death or disabling injury will occur; except, perhaps, in those experiments where the  
experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the  
humanitarian  
importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the  
experimental subject against even remote possibilities of injury, disability, or death.

8. The experiment should be conducted only by scientifically qualified persons. The  
highest  
degree of skill and care should be required through all stages of the experiment of those  
who  
conduct or engage in the experiment.

9. During the course of the experiment, the human subject should be at liberty to bring  
the  
experiment to an end, if he has reached the physical or mental state, where continuation  
of the  
experiment seemed to him to be impossible.

10. During the course of the experiment, the scientist in charge must be prepared to  
terminate  
the experiment at any stage, if he has probable cause to believe, in the exercise of the  
good faith,  
superior skill and careful judgement required of him, that a continuation of the  
experiment is  
likely to result in injury, disability, or death to the experimental subject.

“Trials of War Criminals before the Nuremberg Military Tribunals under Control

Council Law  
No. 10";, Vol. 2, pp. 181-182. Washington, D.C.: U.S. Government Printing Office,

Hello,

I am calling in regards to the Agenda (item 9) of the 12th of January meeting.

Is it correct that the WA State Board of Health will discuss applying current infectious disease WAC codes to include COVID-19 for all WA State residents? Such measures could include involuntary detention and relocation / isolation in a quarantine facility.

Best,

Dean Cannon

Subject: Re: Injection-Related Question

External Email

Britain is seeing evidence of antibody-dependent enhancement of disease as more fully injected residents are dying from covid-19 than those who are uninjected. Is widely injecting a non-sterilizing inoculation really conducive to better outcomes over time? Israeli and other studies indicate that prior infection is more protective than these gene-therapy shots. Why is previous infection not taken into account in seemingly ANY public health policies?

On 01/12/2022 9:52 AM JOHN PAVLIK <pavlik.john@comcast.net> wrote:

Good Morning,

All of these MRNA/DNA injections are investigational (i.e: experimental), how are ANY requirements (public or private) to receive any of these injections not considered coercion which is illegal under the Nuremberg Code and U.S. law?

There are NO fully FDA approved injections available in the U.S. All are still under emergency use authorization.

Please be specific as simply claiming "emergency" does not validate lawlessness.

Thank you,

John Pavlik

Subject: Covid-19 vaccine mandate for k-12 school children

External Email

To whom it may concern:

I would ask that you objectively look at not mandating Covid-19 vaccinations as part of the vaccines required to attend school.

Items to consider:

1. Current Covid vaccines are still under Emergency Use Authorization (EUA) by the FDA.

A. Pfizer-Biontech- EUA approved to permit the emergency use of the unapproved product... to prevent Covid 19 in individuals 5yrs and older. Revised 1-3-2022 source FDA Fact sheet.

B. Moderna - EUA approved to permit the emergency use of the unapproved product.....to prevent Covid 19 in individuals 18yrs and older. Revised 1-7-2022 source FDA fact sheet.

C. Janssen(JJ)- EUA approved to permit the emergency use of the unapproved product.....to prevent Covid 19 in individuals 18yrs and older. Revised 1-11-2022 source FDA fact sheet.

2. Chapter 246-105 WAC- immunization of child care and school children against certain vaccine -preventable disease.

A. 246-105-010- Purpose: The purpose of this rule is to protect children and the public against certain vaccine-preventable diseases. Under the authority of the board of health, this rule describes the immunization requirements of children attending schools and child care centers.

a. The Covid vaccines do not fall into that category stated in the purpose.

B. 246-105-020 Definitions: (13) "Immunizing agent" means any vaccine or other immunologic drug licensed and approved by the United States Food and Drug Administration (FDA), or meeting World Health Organization (WHO) requirements, for immunization of persons against vaccine-preventable diseases.

b. See bullet #1. EUA's are not the same as FDA approved.

C. WAC 246-105-030- list the current vaccines required. I will disclose that my children and myself are all vaccinated against these currently and don't see how the Covid-19 vaccine falls into the same category of effectiveness as the ones mentioned. i.e: MMR, polio, chicken pox, etc.

Hopefully, we can all agree that receiving any of the Covid vaccines does not prevent infection anymore. They also do not prevent illness, transmission, or death. However, they may reduce the severity of symptoms among individuals. It is my view that the Covid vaccines closely resemble a flu shot, as far as reducing the severity of the disease, and the state doesn't mandate flu shots. Again I urge the entire board to vote against mandating the Covid 19 vaccines for child care and school age children. Thank you for your time and consideration.

Sincerely,

Jason Rainer

January 7, 2022

To whom it may concern;

The proposed items to be discussed at your Wednesday meeting which have to do with detainments or removal of individuals regarding being non vaccinated or a threat to public health safety and requiring school aged children to be vaccinated for Covid 19 to attend school are illegal and against State, Federal and International laws.

You cannot require someone to take a medical product that is under Emergency Use Authorization.

The Pfizer vaccine has not been authorized by the FDA (Comirnaty has had its license approved by FDA, it is not in production at this time nor has it been approved yet since it hasn't been manufactured yet.), nor any of the other Covid vaccines at this time, please see the attached letter from the FDA to Pfizer. The screenshot is of the corresponding section which states that the current vaccine by Pfizer is still under emergency use authorization. If you would like to see the entire letter it is attached in the zip file.

Us Code 21 section 360bbb, is our federal code that states that an individual cannot be coerced to take an experimental medical substance with the threat of loss of freedom or restrictions under our constitution. See screen shot attachment of the corresponding section of this code.

I urge you to consider your actions in this matter. If you vote to accept these restrictions

Subject: forced quarantine/isolation and forced vaccines in children

#### External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State and ANY forced vaccine requirements for any person. Additionally, forcing anyone to quarantine or isolate against their will is a direct violation of their basic human rights. Asking to use local law enforcement to conduct such vile, inhumane and illegal acts is preposterous at best.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults

feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children. Who is going to pay for any death or disabilities that arise from these mandates? Are YOU?

Hi. I strongly oppose requiring COVID vaccines for all public school students in WA State. This is a policy that should be decided district by district, not at the State level. There are many people on the East side of the State who would strongly oppose this, as do I. More people will pull their kids out of public schools and seek homeschooling as a result if this law is passed, and that will result in public schools getting less tax dollars. So, please do not require school children to get the COVID vaccine.

I could get very detailed as to why I am opposed to this.

But I will make it short.

I am opposed to mandating any experimental shots in any way for any age.

I am opposed to any quarantine issues. Way too risky. Can be used for manipulation, miss interpretation, over reactions, coercion and so easily be subject to biases. It will spread more fear, separate families and spread more distrust of government in general.

I am for Informed Choice Washingtons petition for Rulemaking item 11.

I am completely against any of the proposed Covid Policies that are over reaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

The last two years is showing vaccinated and unvaccinated individuals can and do catch covid. Forcing people into camps is unconstitutional and very reminiscent of world War two! My family and I are against this. My hope is that our voices are heard.

PROPOSED POLICIES:

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040). These specifics come from (WAC 246-100).
- Including the Covid-19 injections as part of school immunization requirements using (WAC 246-105.)

To Whom it may concern,

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Thank you,  
Jessica

Dear WSBOH,

Please do not move to make Covid 19 vaccines mandatory for all Children to attend school or daycare in Washington State. Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. This would be a mistake and potentially be more dangerous to children who have little risk of hospitalization and death from the Covid-19 virus.

Ligia Lee

Good morning,

I am completely against any of the proposed Covid Policies that are over reaching and immoral.

We the People of Washington State, stand against the following proposed WAC's:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-100-105

Thank you

I am completely against any of the proposed COVID-19 policies as they are overreaching, immoral violations of the 4th and 7th amendments enumerated in our Bill of Rights. We stand united and opposed to the proposed WACs:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

The people of the State of Washington will not take this sitting down. Indiscriminate interment of ethnic Japanese was wrong in the 1940s, just as interment of any individual remains wrong to this day. A declared state of emergency is not an excuse to rob individuals and families of their right to life and liberty.

Good day,  
A concerned citizen

I just want to tell you how frustrated it is to hear that people are pushing the vaccines on children. a vaccine that is not known what the long term effects are and a vaccine that is absolutely not not effective when it comes to preventing getting coronavirus. This this is not a vaccine it should be considered an an inoculation much like the flu.. This Anoculation only prevents further health issues related to covid 19 but it does not prevent you from getting covid 19 so oh it should not Mandated For children as it is ever changing with more and more variants As time progresses. I am against the mandating of this vaccine for children or anyone. If you have been reading and have been keeping up you would also understand that this is not something that should be mandated.

Lawrence M Eiseman II

I am 100% against the proposed COVID policies. They purposed policies are a government over reach.  
There is not enough data to support this. The Trusted News Initiative has censored and pushed one narrative to the people.  
I stand against these proposed WAC's : WAC 246-100-070, WAC 246- 100-045, WAC 246-100-040.  
This goes against my constitutional rights. My personal beliefs as an American citizen.  
If these pass, I will leave the state and relocate to a state which protect and honor our rights and freedoms.

Vaccinated people are still contracting and spreading COVID, they are filling up the hospitals. Also in fact dying of this virus after three shots.  
This is America stand up and act like it!  
Consider you're actions. We the people have the power. Government works for the people.

Forcing my kid to get a EXPERIMENTAL vaccine for something that is not a real threat to school age kids, or any age group for that matter is a over reach

Kids and healthy adults are not in danger

I'd provide a facts number, but the .gov spins the numbers often

When we start providing real statistics (like adding natural immunity, and being open about checking into the hospital with a broken bone THEN discovering the positive covid test, ....then counting that as a 'covid statistic' is purely bullshit. Spinning a three count in-the-hospital to a six count isn't a 'surge'. And 'increased 100%' shock factor .... it is three people

Mandate a vaccine that is a experiment, my kid gets pulled out of the public school system. Simple as that And the schools frankly aren't anything to brag about now days with how they are ran

Add to that, the joke of so called 'safety protocol'. At the schools are just a display of double standards and doing just is what the convent at the moment for the teachers, the teachers union, and the purchased sitting governor

Not a anti vaxxer, but we don't live in Germany the last time I looked

Kyle Thurston

We the people will NOT allow our medical freedom to be stripped away from us.

If children are required to get the covid vaccine for school you will be pushing so many parents to home school or move states. Parents are already scared sending their kids to school with all of the school shootings so this will just be one mor reason for them to decide to home school.

The covid-19 vaccination should not be forced upon children.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

**WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!**

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

To the State Board of Health:

As a parent, I ask that you do not implement a Covid vaccine requirement for Washington schools. I am concerned that a vaccine requirement for children would place more burdens on young families without providing any protection to our vulnerable populations. I am concerned that booster requirements would continue indefinitely as this virus continues to mutate towards less severe illness. And I am concerned that my children would be exposed to risks from the vaccine that are greater than risks posed to them from the virus.

First of all, we now understand that Covid vaccines do not prevent transmission of the disease, but do prevent severe illness and death — most importantly in vulnerable populations who have easy access to these vaccines. In general, children already experience a very low rate of severe Covid disease, so their benefit from the vaccines are lower than high risk populations. Implementing a vaccine requirement for children will not stop the spread of the disease and will not effect the severity of the disease in more vulnerable populations.

Second, if you were to implement a Covid vaccine requirement for Washington schools, how far would it go? How often would my children need booster shots in order to keep up with the latest variant? How many doses of an mRNA vaccine are safe for children over time?

And finally, I am concerned for my own immediate family that, because of our history of autoimmune diseases and severe food allergies, my children may experience serious side effects such as a flare-up or some other autoimmune response. The incidence of myocarditis among young men having had mRNA vaccines is alarming to me, given our medical history.

(One family member is in remission, not on medication that might prevent an autoimmune side effect caused by an mRNA vaccine.)

Thank you for the work that you do for the health of our state. I know that you care

deeply for the health of every person in Washington. Please consider my concerns. Please do not implement this vaccine requirement for schools.

Thank you,

Marissa Miley, BSN

To State Board of Health,

As a grandparent, and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully completed Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons:

- #1. The current Covid -19 vaccines have not completed Phase 3 trials.
- #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public.
- #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop.
- #4. The current vaccines are not preventing Covid-19.
- #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children! Please consider your decisions which can and will have longer term consequences that have not been thoroughly tested in accordance to long term policies of the CDC. Your intent may appear valid now, but unintended consequences to our children should be considered more carefully than your agenda indicates.

Mack DUBOSE

Dear Sir/Madam,

I wish to voice my concern about the upcoming amendments. Please do not allow such radical and intrusive policies. Our nation was founded on the premise of freedom of choice and in our choice we must bear the consequences. Please allow people the freedom to make their own choice! Please DO NOT:

- Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

Please DO NOT require covid vaccination for school age children. WAC 246-100 WAC 246-105.

Thank you,  
Katie Stockwell

wsboh@sboh.wa.gov <mailto:wsboh@sboh.wa.gov>

Please do not approve health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility (WAC 246-100-045). The government should not be making health decisions for us or forcing us into something that we don't believe in or support. People, and government, are inquiring way too much into our private affairs like never before. Never in my 58 years have I seen so much governmental control, censoring and fear factoring.

I understand that COVID is a real thing and that many people are not following what "science" calls protocols. I had COVID and heard from many medical professionals that people who are vaccinated and following the "Science" are still getting COVID, spreading it and dying. If the vaccine was so effective it would not take 4 boosters to stop the virus which hasn't happened yet. People are receiving a false sense of security with the vaccine. I have two co-workers that are fully vaccinated and have been sick for two weeks now with COVID.

There are other healthy positive interventions that should be promoted. People who take Zinc, Quercetin, ascorbic acid and Vitamin D are healthier and do not seem to be suffering side effects of COVID. There is also ivermectin that other states and countries have used to decrease COVID cases.

Again, please think of long term consequences to implementing these WAC's. I would very much love to see everyone get healthy, resilient and feel like they can make their own wise choices.

Sincerely

Melody j Hough

Dear WA Board of Health,

I'm opposed to the implementation of a covid-19 vaccine requirement for schools and any other circumstances. I'm also opposed to forced incarceration and/or separation of families of WA residents due to any communicable diseases, including covid-19 and any variants. As a concerned WA state citizen, it is of utmost importance that you uphold parental freedom in regards to children's health. The greatest advocate for a child is their parental guardian.

Thank you for your consideration,

Katie

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

I am oppose to agenda #8 and highly support agenda #11.  
Look at our situation right now..look at how many fully vaccinated and boosted people currently have Covid right now. That alone is proof that the vaccines DO NOT work!. Its just like the flu vaccine..different variants going around and the CDC just guesses which variant it may be. With a 40 to 60% effective rate for flu is not good enough...would you drive a car that only worked 40-60% of the time. My guess is no..so why are you forcing mandates on vaccines that clearly don't work!? As for the covid vaccine, what proof do you actually have that the MRNA will not effect kids hearts and brains. What proof do you have that it will not alter or DNA for future generations? Show me these studies, I will not simply accept "Oh because the CDC says it's safe" Well, this may be a shocker for you but the CDC's hands are not always clean..it has been proven that CDC has altered numbers in studies(look into the whistleblower on autism cases related to African American little boys). Tuskegee project, Agent Orange and many other government experiments over the years. This covid is nothing but another experiment! I have lost complete faith anytime the government inserts themselves into medical decisions for us citizens. Why doesn't Fauci and the CDC recommend that we build our immune systems with eating healthy and by taking Vitamins? Instead of pushing a vaccine that clearly DOES NOT work. We all know that Fauci, Bill Gates, and many others are simply in this for the money, not because they are concerned about everyone's health! Stop the mandates, our country is in shambles and it's only going to get worse if you keep imposing mandates.

I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Jennifer Coons

We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for childcare and school admission. Due to the following reasons:

1. COVID vaccines remain under Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19 Sent from my iPad

A parent of two school age children, I would also like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

Do you know who Dr Robert Malone is? He is the inventor of mRNA technology. Here's what he has to say about COVID-19 vaccines in our children,

"First, is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic spike proteins. This protein can cause permanent damage in children's critical organs, including their brain and nervous system, their heart and blood vessels including blood clots, their reproductive system, and this vaccine can trigger fundamental changes to their immune system.

The most alarming part about this is that these damages, once they occur are irreparable. You can't fix lesions within their brains. You can't repair heart tissue scarring. You can't repair a genetically reset immune system. And this vaccine could cause reproductive damage that could infect future generations of your family.

The second thing that you need to know about this is the fact that this novel technology has not been adequately tested. We typically need at least five years of testing and research before we can really understand the risks of new medicines or vaccines.

Harms and risks from new medicines often become revealed many years later. So ask if yourself if you want your own child to be part of the most radical medical experiment in human history.

One final point. The reason they are giving you to vaccinate your child is a lie. Your children represent no danger to their parents or grandparents. It's actually the opposite. Their immunity after getting COVID is critical to save your family if not the world from this disease.

In summary, there is no benefit for your children or your family to be vaccinating your children against the small risk of this virus given the known health risk of the vaccine that is apparent you and your children may have to live with for the rest of their lives. The risk benefit for this vaccine isn't even close for children.

As a parent and grandparent, my recommendation to you is to protect your children and do not give them this unproven vaccine."

1. Children are statistically at zero risk of dying from COVID. Their survival rate is in the

range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

2. NO ONE (FDA, CDC, Pfizer, Moderna, J&J) knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

3. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

4. Physicians and scientists all over the world: Dr Robert Malone, Dr Michael Yeadon (former VP of Pfizer,) Dr Sucharit Bhakdi (published microbiologist,) Dr Geert Vandon Bossche (virologist/vaccine expert) Dr Peter McCullough ( internist, cardiologist, epidemiologist,) Dr Pierre Kory (ICU Director, Pulmonologist, co-pioneer the research/treatment for sepsis,) and thousands more have spoken out against COVID vaccine mandates and future affects.

Our job as parents/society is to protect our children for they are our future. Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

-Heather Stratz

I write this in regards to the WAC 246-100 rule making that would expand authority to involuntary quarantine individuals. I strongly oppose this.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Children are extremely low risk for Covid.

The vaccines are still only EUA and have not fully been approved for anyone.

There are no long term studies to document any history of safety.

Studies document that vaccinated and unvaccinated can both transmit Covid therefore the Vaccine does NOT stop the spread of the covid disease but only helps to prevent hospitalization and death of the individual.

I write this not only as a parent and citizen of Washington state but as a healthcare provider that has worked through the last two years with the general public. Stop. We in Washington are no better off in regards to covid than other states that have no or limited restrictions. Please stop with the power grabs and serve the people you are suppose to serve.

Nichole Veach

Washington State Board of Health

We do not agree with and object to applying the current infectious disease WAC codes to include Covid-19 for Washington State residents.

This virus is manageable when treatment is started early. It is survivable by more than 99 percent of the population. It has been proven that the Covid vaccines have little effect on Covid, and most people who get Covid and spread it have been fully vaccinated, with many who have received the booster shots. Being fully vaccinated seems to be also require regular booster shots.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines. I encourage you to study VAERS to learn of the adverse effects and deaths caused by the 'vaccine'.

This is America and health officers do not have the right to quarantine a person or family in a 'facility' for refusing the Covid vaccination or any other medical intervention. They also do not have the right to force vaccines on citizens who have chosen not to have them.

We are not granted rights from the State, rather the State is required to protect our rights and not infringe on them. We question if this is truly due to the state of each individuals health; rather due to governing control.

Sincerely,

Kathleen Nordlie  
Washington State Resident

1. Omicron Covid causes tiredness and malaise but not severe illness in the vast majority of patients. It is akin to a flu.
2. Even with vaccine boosters (three shots), the Danish study shows effectivity against sickness for a week or so. And a month after the third shot, the vaccine has greater and greater NEGATIVE efficacy – meaning it puts one at GREATER risk for getting covid.
3. There continue to be side effects and even death from the vaccine. And when there is risk, there must be a CHOICE.

Given these three factors, it is hard for me to understand why anyone would yet be insisting upon a vaccine mandate. It goes AGAINST the science.

Please don't make everyone get this vaccine, one of my friends had great health but about 5 minutes after getting the vaccine he went into a seizure. 5 minutes. What would happen to people like me who have had Asmath, Open Heart Surgery, and a Concussion? I don't know. I'm not scared to do a lot of stuff, I'm scared of heights and I went repelling last summer of a 250 foot cliff. I can overcome my fears but what you are trying to force on me and my family to do? I won't stand for it. I can not let people push me around. I am a fighter and I will stand to protect what I love. If you want to come after me, fine. I can not make you do anything, but at least I can tell my future kids, when they asked what happened, that I tried to stand up against what so many people thought were good, but I had to trust my gut instincts and say "No, I'm not going to let this pass."

Please reconsider what this will do to the future of America, to its People, and to our whole world. Please don't let what other people SAY is true. Please go with your gut instinct.

Sincerely, Leah Guzek

To Whom it may concern:

As a parent in Washington state we are concerned that the board is overstepping on parental rights to make the proper decision for their children. No mandated vaccinations for children should ever happen. If the parent wants it then they will have already done so. Science does not back up mandatory vaccinations. This would be a violation of our rights and discriminatory.

Sincerely,

Jennifer Paul

Open Letter to WA Health Dept et al,

I oppose the proposed WAC's 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105 bring used or amended to include COVID19.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

This is one of the most wreckless, dangerous and overreaching unconstitutional concepts and it's appalling that it's even on an agenda for consideration other than to be abolished.

We have learned by now early intervention is possible and best for infection of covid19.

Overcoming covid since the beginning has been 99% successful.

WA has partnered with what occurs conspiratorially with prohibiting drug distribution though our pharmacies in our state since the spring of 2021.

This is wrong. All the data shows benefit and the STATE showed force in pharmacies and out local hospitals.

Legal departments of our largest health systems have had on record discussions and have acted on behalf of the STATE in prohibiting prescribing known effective early treatments. Our medical system professionals have yielded to your direction, against better judgement. This is information, I have on factual authority can be legally attested.

Our literal instruction at the patient level upon diagnosis was go home and wait until you can't breathe.

I'm gravely concerned with the Depts instruction as it would occur these systems would have partnered in the demise of the patients and constituents as know we fully know this is radically inappropriate and ill-equipping.

Law enforcement is not medical nor should they be involved with detaining, isolating any person for any reason. If you haven't seen what's happened in Australia, detainment camps, fines, loss of freedom, it would be our almost certain future. Despite their radical concentration style camp, they are still while mostly vaccinated, spreading illness.

By survival rates including my own, this is not the plague.  
You can not regulate a cold.

You can NOT prevent a cold from spreading.

At any given time there is 10x31m viral particles in any given space. That's 10x the amount of stars.

It's always been that way.

Its literally insanity to attempt to capture one viral particle or a "strain" call it "something" and create detention camps around it.

This is the absolute wrong course of action and will be met with opposition. My family and many families won't remain in WA if this type of force would be used on anyone.

I am completely against covid-19 injections as part of the school immunization requirements using WAC 246-105.

Personal health decisions are personal.

You are the Health Dept. why have you YET to publish an FLCCC type protocol for prophylactic in early intervention?

<https://covid19criticalcare.com/wp-content/uploads/2020/11/FLCCC-Alliance-I-MASKplus-Protocol-ENGLISH.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcriticalcare.com%2Fwp-content%2Fuploads%2F2020%2F11%2FFLCCC-Alliance-I-MASKplus-Protocol-ENGLISH.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24a292e67a5c47aaa2a908d9d204fc70%7C>>

Our small community lost 14 young people to suicide in the "lockdowns" last year. Why is this not alarming, and clear this course of action is detrimental?

Not one mention has been made of healthy diet, proper vitamins and minerals, movement, mental health. All communication has been the marketing arm for vaccination which is

Not effective in preventing illness

Not effective in preventing transmission

Causing adverse reaction and death

Not every kid can eat gluten, walk on grass or have a peanut without anaphylaxis, it's fully unreasonable and unscientific to think a one size fits all. It does not. Let alone that many children have antibodies just from exposure to their parents during illness.

7 adults in my family got Covid in the spring. We did not quarantine our kids away from us.

Among our family was a

- 2x cancer survivor on heart medication

- Medicated T2 diabetic with a recent history of heart attack and stroke

- Thyroid/Hashimoto issue, CPAP user

- 4 average healthy adults

All recovered with early aggressive at home treatment.

The cancer survivor recovered first among us.

Of our 6 exposed children to all our (terrible) symptoms, zero contracted covid, got sick or had illness of any kind.

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fphmppt.org%2Fwp-content%2Fuploads%2F2021%2F11%2F5.3.6-postmarketing-experience.pdf&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C24a292e67a5c47aaa2a908d9d204fc70%7>>

This is not something the state department should be creating legislation, policy, detention, requirement or mandate around.

This is an obvious failure and will continue to come to light.

Do not move forward with this.

This information alone is enough to expose harm.

To proceed with this open available disclosure of information makes the state complicit.

Taking this course of action is knowingly partnering with potentially harming WA state residents and children.

Jaclyn Walker

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

Dear Washington State Board of Health,

I urge you to consider the real science and full spectrum of medical data when considering requiring a COVID vaccine for day care and school attendance. Randomized controlled trials are the gold standard in medical research because there is a control group. Pfizer conducted a randomized control trial of 44,000 patients divided into two groups. One group gets vaccine, one group gets placebo. More people died in the Pfizer vaccine group than the placebo group. The difference wasn't statistically significant but scientifically one cannot claim these vaccines reduce death.

The Pfizer and Moderna vaccines use non-FDA-approved mRNA gene therapy, according to their filings with the US Securities and Exchange Commission. Clinical trials for the drugs conclude in 2023. The only FDA approved version of the vaccine is Comirnaty, is not currently available, and is different than the emergency use authorized Pfizer-BioNTech vaccine. 21 US Code 360BBB protects one's right to refuse any emergency use authorized medical products, therefore it is illegal to mandate an EUA vaccine.

The VAERS database is the database for vaccine injuries. A Harvard report in 2010 shows that fewer than 1% of vaccine adverse events are reported to VAERS. The CDC validates all entries and false allegations are prosecuted. Pre-COVID, VAERS shows about 158 deaths due to vaccines per year. In January 2021, over 17,000 deaths and over 70,000 hospitalizations from the Covid Vaccines were reported. This quantity of lethal reactions historically shut down other vaccine programs.

Further, the CDC says that the Covid hospitalization risk for children is about the same risk of the flu.

Tens of thousands of doctors around the world, including the creator of the mRNA technology Dr. Robert Malone, warn of the extreme dangers of this experimental Covid drug. It is not safe, responsible, or legal to require this experimental drug for children.

Thank you for your time.  
Michelle in Bellingham, WA

To whom it may concern:

I am writing to you as a concerned citizen of Washington State. I understand you have a major decision coming before you to consider vaccine mandates for children as well as adults. I urge you to look into all aspects of this issue. Currently, the only accepted solution is that the vaccine is the one and only way to proceed in health for our communities and states.

However, in years past, we as individuals and parents, supported by the medical community, considered natural immunity strong and robust. We currently have doctors who are successfully helping to keep sick patients out of the hospital, and they need more physicians to help them. There is more to this story, and a successful way through this, and your decision is an important part of it.

There are not enough long term studies regarding the use of the Covid-19 vaccine and the option of natural immunity needs to be a part of this conversation, if we are truly wanting to follow the science. The fact that the drug manufacturers have requested to wait to release their data for 75 years creates confusion and concerns on why they are not acting with transparency. Recently, CDC Director Rochelle Walensky and Dr. Anthony Fauci, have admitted that the vaccine itself does not stop transmission or infection. This is the logical disconnect between facts and political agenda. Why would push a vaccine that does not even prevent the virus it is designed for?

You will be looked on in history for the vote you are about to make. How will you choose to stand for the liberty and freedom our country is rooted on? Can you imagine what caused our state and government to place Germans and Japanese citizens in camps during World War II? It may have seemed like the best option at the time, however it is viewed correctly today as a human rights abuse. It was a decision made out of fear. I urge you to make a decision based on courage, transparency, medical facts, which come from all places, including those that are being silenced in the main media. Please do not allow fear to be part of your decision. Fear of what others think or say, fear of job loss, lack of promotion, fear of possible personal cost if you stand against the swell of current tyrannical narrative. You have so many people cheering you on to stand for human rights, including medical freedom of choice.

Sadly, the push for mandating a vaccine, and the proposed policies which could follow, could place health officers in the position of managing a police state. We are not in an emergency situation which might justify the use of law enforcement to order persons involuntarily to isolation facilities or coerced medical intervention. Continuing down this slippery slope, Washington State Board of Health is considering medical tyranny. Not only is all of this discussion in direct violation of the Washington State Constitution and the US Constitution, the proposed policies are in direct violation of the Nuremberg code article 6 section 3 that states: No government can mandate or force medical treatment without individual consent.

Please stand for medical freedom of choice for the citizens of Washington. After all, maybe that is why you have this position at such a time as this. May God give you strength to make the wise decision.

Sincerely,  
Heather Clinesmith

To Whom It May Concern,

I learned today that the Washington State Board of Health will discuss applying current infectious disease WAC codes to include Covid-19 for all WA State residents.

I am completely AGAINST any of the proposed Covid Policies that are over-reaching and immoral.

My family and I stand against these proposed WAC's:  
WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105.

I have already let all my friends and family know these are being considered and have encouraged them to speak up and to speak out!

Please do the right thing; protect our freedoms!!

Hello,

I am completely against any of the proposed Covid policies that are over-reaching and immoral. I stand against these WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am also against mandated Covid shots for kids as criteria for child care and school entry. Children are extremely low-risk for Covid and vaccines are still only EUA (emergency use authorization).

To the Washington State Board of Health:

Hello! Let me first start by stating how so very thankful I am to be back living in Washington State! I had moved away for a decade and resided in Kansas during that time. When it came time for me to decide where this next chapter of my life would take place, I was beyond thrilled to move my then 4 year old and tiny baby bump back to Washington where I grew up. I was so excited to raise my children in the same county in the same state my amazing childhood took place!

That tiny baby bump decided to make her grand entrance on March 10, 2020. Our state shut down within days of her birth. For her entire life we've stayed inside, worn masks, social distanced, gone without family, struggled financially as there was no unemployment or relief money for people like me, and other than food stamps (for which I'm extremely thankful) no financial assistance outside of my mother who has kept a roof over our heads. How could I work as a single mother with a child at home distance learning? The point? I have followed every rule the state has suggested or mandated I follow for myself and my children. This year we even all took covid tests just to go to my mom's (she and my step father are vaccinated) for Christmas dinner.

As we've moved on from the original covid, and the delta variant, the omicron variant is the current threat. A much more contagious but, per the data the state and my local county put out, is less likely to cause death. I have several friends who are home sick right now who are fully vaccinated and boosted, as required by their federal or state places of employment. Fully vaccinated and boosted, home sick, because the data shows the vaccine is not protecting from this current strain as hoped.

My 7 year old has been back to in person learning since last school year. She's ridden the bus with other children, had lunch at school with other children, and played on the playground at recess. All of whom were unvaccinated until recently. Her bus driver is even unvaccinated. No one in her class has been sick. No school days missed because of a positive test result. They are sitting close enough to share their lunches with other children, without masks, and not one has gotten sick.

But you know who did get sick? My 7 year old. When she was just 19 months old. From the Pentacel vaccine. Her reaction was severe enough that she was misdiagnosed 3 times. Each misdiagnosis equally terrifying, one requiring multiple surgeries and radiation that I'm eternally thankful didn't happen. She cannot get vaccinated again simply because they don't know which ingredient caused her reaction. Her pediatrician here in Washington cannot sign a medical exemption because of policy. Even with all my daughter's medical records, she didn't see it and the Washington State requirements can't be met this many years later.

Should my daughter be denied public education for something she has absolutely no control over? Should she lose her friends? Her ability to play soccer which she loves and intends to play for UW? What is the difference between her being excluded for something

she has absolutely no control over and someone who has no control over their skin color or gender of who they love? She has attended public school in Washington since September 2019 unvaccinated against the measles, mumps, rubella, whooping cough, etc. Without harm to herself or others. And she has several friends both from school and her soccer club that are also unvaccinated or only partially vaccinated. Should they all be left out of publicly funded education?

I'm begging you to be logical. The vaccine is not effective against the Omnicrom variant. The current threat to our population. Requiring children have an ineffective medical anything to participate in basic education is cruel. Please put your fear of the unknown to the side and really think about what you're asking of children like my daughter. Who have all already been through enough. Our children are social distancing, wearing masks, sanitizing constantly, and following the rules for safety and it's working! Please don't make it mandatory for children to be vaccinated for school!

To Whom It May Concern,  
I oppose WAC 246-100 rule making that would expand any authority to involuntarily quarantine individuals. You cannot go knocking on people's door and try to quarantine them or force the vaccine on anyone. It will get dirty and people are more than willing to go great lengths to protect their freedoms.

I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools. If you require this vaccine in schools just watch and see how fast the number of students in public schools drop. Then watch the funding for schools drop. I know multiple people personally that will remove their child from the public school system if that vaccine is required.

Any additional "laws or regulations" regarding the covid vaccine are just going to create more trouble and more distrust in government than ever before.

-Luke Miller

Sent from my iPhone

Here is the letter I sent. If you're copying this, change it to your name, copy it and email it to wsboh@sboh.wa.gov

To all the members of the Washington State Board of Health,

It has come to my attention that one of the agenda items for your January 12th, 2022 meeting is to consider "allowing law enforcement to forcibly enforce an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with request for:

medical examination,  
testing,  
treatment,  
counseling,  
vaccination."

I want to express IN THE STRONGEST POSSIBLE LANGUAGE MY ABSOLUTE OPPOSITION TO SUCH A POLICY!!!!

Here are some of my reasons for opposition to this proposed policy:

Every American has the right to determine what medical procedures he or she will or will not take. We have the right to Life, Liberty and the Pursuit of happiness. This has been a pillar of American life since the revolution of 1776!

Mandates from state executives and their subcommittees should not be allowed. The LEGISLATURE should debate such all-encompassing rules, not "health boards"!

Under HIPPA rules, my medical decisions are PRIVATE

Unvaccinated people pose no more of a danger to the public than vaccinated people. This has been proven over and over!

Supposedly, the vaccinated are safe...so leave the unvaccinated alone!

If more vaccinated people actually do end up in the hospital (doubtful), it would be the result of their own private CHOICE about their own health

The current vaccinations are not effective against the current virus strains, anyway. The original strain and Delta (and soon Omicron) will be history...but the vaccination has not changed. This is like taking the same flu shot every year, even though every year's flu variant is different!

This is AMERICA...not Communist China where women have been forced to get abortions against their will, or Saudi Arabia where women are forcefully sexually mutilated because the Muslim leaders say so. For the BOH to pass such a rule would violate everything that is good about American Freedom!

Every American has a RIGHT to choose what healthcare they will or will not take.

This policy will drive more good people to leave this state because of its liberal and extremely harmful policies regarding Covid.

It is DANGEROUS! If this policy is adopted and enforced, there will, without doubt, be violence. Both law enforcement and civilian Americans, my fellow Washingtonians will be

injured or killed.

I beseech you to NOT pass this policy. It is dangerous, unAmerican and makes no sense in terms of public health. I believe that the ONLY reason any state government would pass such policies would be to control their people for nefarious purposes.

Sincerely,  
Name kelli Palumbo \_\_\_\_  
Resident of Skagit \_\_\_\_ County, Washington

We the people will NOT allow our medical freedom to be stripped away from us.

If children are required to get the covid vaccine for school you will be pushing so many parents to home school or move states. Parents are already scared sending their kids to school with all of the school shootings so this will just be one mor reason for them to decide to home school.

The covid-19 vaccination should not be forced upon children.

I am asking you to carefully consider the repercussions. Getting a vaccine should be a choice between the citizens and our healthcare providers not the county or the state to be involved in. The state of Washington and Pierce County are trying to make medical decisions for us. What's next are you going to not let us have the choice to get an abortion if I decide that's what best for us?

You guys are over stepping and violating our constitutional rights. Many people have already moved out of the state due to your requirements these proposed changes will only make more people flee Washington.

Our state has one of the highest vaccination rates nation wide, some of the strictest protocols and rules for masks and vaccinations and yet we still have one of the highest rates of Covid so what makes you believe implementing more policies will help? Why not follow suit of other states who are letting people live their lives and have lower Covid rates.

**WE WILL NOT GIVE UP WE WILL NOT STAND QUIET WHILE YOU TRY TO STRIP US OF OUR MEDICAL FREEDOM!**

You are violating our constitutional rights

Sincerely concerned Washington state citizen,

Kirsten

Jan.7,2022

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,

Patricia Vegas

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>) )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern,  
I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their child's health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my daughter and will pull her from public school if this mandate is implemented.

Thank you for your consideration  
Michelle Lea

ATTENTION Washington State Citizens ( deadline TODAY Friday Jan 7th).

☐☐ Sharing from a post in a group! Not sure if you've been paying attention but Chris Reykdal WA State Superintendent and WA State Secretary of Health Umair A. Shah are both scheduled for media briefings this week! It's coming and they're doing it quietly...

Washington State Board of Health is making a decision to recommend the v requirement for school aged children on January 12.

Comments against this atrocious abuse of power and war on our children need to be in BY THIS FRIDAY JANUARY 7th to be considered. Please consider sending in your words opposing any v requirements for school children.

Here are the emails for everyone on the Washington State Board of Health:

Good morning please share this with all your friends and family in WA this morning!

I'm not sure if you've been hearing about the policies Washington will be discussing today.

WE NEED TO SPEAK UP in regards to these policies.

Please send and email BEFORE 12 TODAY to: [wsboh@sboh.wa.gov](mailto:wsboh@sboh.wa.gov)  
<<mailto:wsboh@sboh.wa.gov>>

PLEASE STATE:

Good morning,

I am completely against any of the proposed Covid Policies that are over reaching and immoral.

We the People of Washington State, stand against the following proposed WAC's:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-100-105

Thank you

To Whom It May Concern:

This is overreach of power. It is the right of the parents, not the Board of Health, to determine whether or not a medical procedure is right for their children. It is also worth noting that the EUA approved "vaccines" have not been fully tested, with the FDA requiring a five year study into myocarditis for juvenile recipients. Also worth noting is that Comirnaty is not currently on the market as such and judges around the country are throwing out mandates because of this technicality, citing that one cannot mandate a product that is not available.

The parents in Washington will be a squeaky wheel and we will make sure that you hear our voices. Our children deserve better. Data shows that children are less likely to suffer serious cases or side effects from Covid-19 and its variants. The biggest risk at this point is an over-stepping group of unelected bureaucrats who see it as their responsibility to usurp the sovereign right of the parent.

Thank you for your time in reading this and I hope you hear us. We want what is best for our children. Please do the right thing and do not mandate the COVID-19 vaccine until there is more solid data.

Jo-Lynn Davis

WA State Board of Health,

I am in support of Dr. Xavier Figueroa's petition requesting that the WA State Board of Health adopt a new, permanent rule prohibiting the Board from adding to the daycare or school requirements any Emergency Use Authorized (EUA) product or any licensed product formulation which has not yet completed Phase 3 clinical trials.

To require the administration of a medical procedure under an EUA is illegal and immoral. That is especially the case of a child who can never provide informed consent by the very virtue of their age.

These new WAC laws that you guys are proposing are straight unconstitutional!  
Implementing them would result in families having to make drastic decision that is ultimately no one else's decisions but our OWN!  
Washington state is the most beautiful state there is and what you are doing to it is unbelievably sad.  
You will continue to lose people that have loved it here and have worked their whole lives here.  
Who have families, job, homes... a lively hood.  
You cannot do this to people. Period.  
The science does not add up. The vaccinated are still catching and spreading this virus.  
We all know that.  
It will be an even sadder day here in Washington if these laws go into effect.  
It will be a day for many many families to cut the cord here.

Sent from my

Here is the letter I sent. If you're copying this, change it to your name, copy it and email it to wsboh@sboh.wa.gov

To all the members of the Washington State Board of Health,

It has come to my attention that one of the agenda items for your January 12th, 2022 meeting is to consider "allowing law enforcement to forcibly enforce an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility following refusal to voluntarily comply with request for:  
medical examination,  
testing,  
treatment,  
counseling,  
vaccination."

I want to express IN THE STRONGEST POSSIBLE LANGUAGE MY ABSOLUTE OPPOSITION TO SUCH A POLICY!!!!

Here are some of my reasons for opposition to this proposed policy:

Every American has the right to determine what medical procedures he or she will or will not take. We have the right to Life, Liberty and the Pursuit of happiness. This has been a pillar of American life since the revolution of 1776!

Mandates from state executives and their subcommittees should not be allowed. The LEGISLATURE should debate such all-encompassing rules, not "health boards"!

Under HIPPA rules, my medical decisions are PRIVATE

Unvaccinated people pose no more of a danger to the public than vaccinated people. This has been proven over and over!

Supposedly, the vaccinated are safe...so leave the unvaccinated alone!

If more vaccinated people actually do end up in the hospital (doubtful), it would be the result of their own private CHOICE about their own health

The current vaccinations are not effective against the current virus strains, anyway. The original strain and Delta (and soon Omicron) will be history...but the vaccination has not changed. This is like taking the same flu shot every year, even though every year's flu variant is different!

This is AMERICA...not Communist China where women have been forced to get abortions against their will, or Saudi Arabia where women are forcefully sexually mutilated because the Muslim leaders say so. For the BOH to pass such a rule would violate everything that is good about American Freedom!

Every American has a RIGHT to choose what healthcare they will or will not take.

This policy will drive more good people to leave this state because of its liberal and extremely harmful policies regarding Covid.

It is DANGEROUS! If this policy is adopted and enforced, there will, without doubt, be violence. Both law enforcement and civilian Americans, my fellow Washingtonians will be injured or killed.

I beseech you to NOT pass this policy. It is dangerous, unAmerican and makes no sense in terms of public health. I believe that the ONLY reason any state government would pass such policies would be to control their people for nefarious purposes.

Sincerely,  
Name\_Salvatore Palumbo  
Resident of Skagit County, Washington

To Whom it may concern,

I do not believe this vaccine should be added to the state school vaccination requirements.

This shot has a high percentage of side effects including death and heart injury. It has also not been proven to prevent COVID. The shot only appears to be a huge money maker for the drug industry. It promotes suspicion as finding out real information about its side effects is difficult due to media censorship and confused information from government organizations that are supposed to protect our health and the health of our children. The Board of Health is here to protect our health, but instead seems only to be shielding drug developers and their agents from prosecution for crimes against humanity.

Please do the job you are hired to do and reject this questionable vaccine as a requirement for our children.

Thank you,

Kelsy Givogre

Regarding the Corona vaccine, please do not require it for children. It should be an individual choice, not a mandate.

Sincerely  
Julie Riveira

I've just been informed of this and only have a few minutes before the noon deadline. I think since this virus is always mutating there is no point to quarantine people except for the 14 day stay at home procedure. Like any illness you should stay home if you are sick. I also feel that anything that can affect your health should need to be studied much longer than these vaccines have been in order for them to become mandatory. There are plenty of people willing to test them without anyone needing to be fired from their jobs or kids kept out of school. We just need more time to see the outcome and risks before making the rest of the public take part. Every other medical treatment needs to be thoroughly studied prior to implementing, I feel that this new medical treatment should follow the same rules.

)  
8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com  
<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3f664FSn4IgkqD0\\_M7CQ8tpQ4j\\_U5hGiPK4RxsZSblQTEdu8nA%26\\_\\_tn\\_\\_%3D-UK-R%26c%5B0%5D%3DAT0xP4BC48KJRkRI\\_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2IAdKuUpzHVhpT-EAKJAmT\\_K4Cu3mxL2z5gXOaT3isKwavk\\_AXi27V3S7GtQR-hN\\_HMinXDMIZ2m0IwLSo6kYEJBOV66U-mjIlbVY0N0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2f5%7C1](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3f664FSn4IgkqD0_M7CQ8tpQ4j_U5hGiPK4RxsZSblQTEdu8nA%26__tn__%3D-UK-R%26c%5B0%5D%3DAT0xP4BC48KJRkRI_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2IAdKuUpzHVhpT-EAKJAmT_K4Cu3mxL2z5gXOaT3isKwavk_AXi27V3S7GtQR-hN_HMinXDMIZ2m0IwLSo6kYEJBOV66U-mjIlbVY0N0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2f5%7C1)>

)

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website. Adverse Reactions | Real Not Rare These are real people. Their stories are real. At a minimum, why are these being hidden and why isn't Pfizer investigating why people have these types of reactions? If you only have time to watch one of these, how about this one: Ernest Ramirez (17 yr old son) (realnotrare.com

<[https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3UK-R%26c%5B0%5D%3DAT0xP4BC48KJRKrI\\_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2lAdKuUpzHVhpT-EAKJAmt\\_K4Cu3mxL2z5gXOaT3isKwavk\\_AXi27V3S7GtQR-hN\\_HMinXDMIZ2m0IwLSo6kYEJBOV66U-mjIibVY0N0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2f5%7C1](https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Ffacebook.com%2F.php%3Fu%3UK-R%26c%5B0%5D%3DAT0xP4BC48KJRKrI_sFyw6Xu9IB6QaFEKCxbWtaD-wUT5FfzgoJek9zCcnh2lAdKuUpzHVhpT-EAKJAmt_K4Cu3mxL2z5gXOaT3isKwavk_AXi27V3S7GtQR-hN_HMinXDMIZ2m0IwLSo6kYEJBOV66U-mjIibVY0N0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1571e058b04246e4a23d08d9d207b2f5%7C1)

) Do you really want to force these injections on innocent children? Do you want to cause this kind of pain to parents?

I've listened to hours and hours of testimony and information from people on both sides of this issue and the only support I've heard from adults in support of COVID vaccines for children is that they will allow us to move past this pandemic and allow a return to normalcy.

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Lisa Wyant

To whom it may concern,  
I am writing as a concerned parent about the possibility of COVID vaccine mandates for school attendance. Data has consistently shown children to be at low risk for severe disease from COVID. Adults can choose to be vaccinated to protect themselves from severe disease. Current virus strains are showing to evade vaccines. And given there is no long term data on the efficacy or side effects of these vaccines in children, one has the right to weigh risks to benefits and decide what right for their childrens health. Using the comparison of currently required vaccines is not appropriate with this EUA vaccine. Again, there is no long term data or listed potential side effects.

I also would like you to think about this. Are you prepared to compensate parents of children that are vaccine injured should that prove to be the case? And is the district able to handle budget cuts should there be a reduction in student enrollment.

As a parent I don't feel comfortable giving this vaccine to my young sons and will pull them from public school if this mandate is implemented.

Thank you for your consideration

Jill Hannem

Hello,

A few days ago, during a WA State Board of Health meeting, the advisory group spoke of whether they should recommend adding Covid vaccination to the current WA vaccine schedule for school and daycare entry. Unfortunately public comments were not allowed. The advisory group would be making a recommendation for our children without hearing from the parents.

I oppose the Covid vaccine being added to the school and daycare schedule. Children have mild to no symptoms from the virus, and are thus the safest. Covid Vaccine inserts are none existent to the public, leaving us without a knowledgeable and informed choice. Pharmacists themselves do not have access to a vaccine insert. We are told to believe and take the plunge yet so many have had horrible and evenly deadly complications from these vaccines. Please urge the advisory group to be cautious and not make recommendations for the Covid vaccine to be added to the school and daycare schedule. Also, I oppose local health officers to use law enforcement (wac 246-100-070) to force an emergency order to involuntary detain a person or a group of persons to be isolated in quarantine facility (wac 246-100-045). This proposed rule (to wac 246-100 as outlined above) is unconstitutional and violates human rights and freedoms.

Thank you for taking the time to read my opposition and concerns. I look forward to reading your reply.

I am a K- 12 educator in WA State and have been instructing students for 40 years.  
I'm writing to you about the agenda for the January 12, 2022 meeting.  
I am in opposition to the following:

- 1) Any involuntary isolation/quarantine of people as described in parts of WAC 246.100;
- 2) Any mandate on COVID vaccines for children as a requirement to attend K-12 public schools.

Sincerely,

Leslie Drury

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,  
Makayla Granger

I am protesting the actions being taken regarding vaccination requirements for school-aged children. I am deeply opposed to this mandate or question of this mandate for all children. I will not go into huge detail here, and agree with the comments that will be submitted by Informed Choice of WA. But in summary, all shots are EUA ONLY.

Comirnaty is the only COVID-19 product that has ostensibly received FDA licensure for any pediatric populations—namely those 16 and up; however, that licensure is limited to manufacturing and delivery. The FDA has stated that this product is merely “ready for approval for use in individuals 16 years of age and older . . .” [emphasis added]. August 23, 2021 Approval Letter - Comirnaty, from FDA to BioNTech, p. 4,

<https://www.fda.gov/media/151710/download>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.fda.gov%2Fmedia%2F151710/download>>

.

Let me emphasize, the Comirnaty vaccine is not available anywhere in the United States, and there is debate about whether the vials of Pfizer’s EUA product are now “licensed” for those 16 and up, or if those are still EUA products. The FDA states that EUA Pfizer-BioNTech COVID-19 Vaccine and the Comirnaty (COVID-19 Vaccine, mRNA) “are legally distinct with certain differences that do not impact safety or effectiveness.” There is much debate over what “legally distinct” means, especially to consumers. If “legally distinct” means that the currently available Pfizer products in the U.S. are under EUA regulations, then there is no licensed product available for 16-18 year olds. Regardless of whether the Pfizer’s product is licensed for 16-18 year olds, the product lacks completed Phase 3 clinical trials, and the PREP Act still shields manufacturers for liability for injuries and deaths. As far as we can tell, never in history has the FDA licensed a product without completed clinical trials, nor when all the ongoing trials have been unblinded, subverting the ability to compare outcomes.

The federal code regarding emergency use authorization is clear and has longstanding history on how it came to be in place, all citizens should have informed consent and that means they have the right to refuse any EUA product including these shots.

Whereas: 1. The Nuremberg Code, codified into US Federal Law, prohibits forcing or coercing anyone, under any circumstances, to participate in a medical experiment; and the Code states “the voluntary consent of the human subject is absolutely essential.” 2. All of the treatments being marketed as COVID-19 vaccines are still in Phase III clinical trials until 2023 to 2024 and hence qualify as medical experiments. People taking these

treatments are enrolled in clinical trials; 3. None of these treatments has been approved, but only granted emergency use authorization, hence cannot be mandated nor can informed consent be dispensed with; 4. Most vaccines are trialed for at least 5-10 years and COVID-19 vaccines have been in trials for less than one year; 5. No previously attempted coronavirus vaccines (ie. MERS, SARS-1) has been approved for market, due to antibody-dependent enhancement resulting in severe illness and deaths in animal models; 6. Numerous doctors, scientists and medical experts are issuing dire warnings about the short and long-term effects of COVID-19 vaccines, including but not limited to death, infertility, miscarriages, Bell's palsy, blood clots, cancer, inflammatory conditions, autoimmune disease, early-onset dementia, convulsions, anaphylaxis, myocarditis, and antibody dependent enhancement leading to death; 7. Children and youth are at virtually no risk of dying from COVID-19 or transmitting it to others, but deaths and injuries to children and youth have already occurred in the COVID-19 injection clinical trials; 8. There have been more deaths from COVID-19 vaccines, as reported to the Vaccine Adverse Events Reporting System (VAERS), than deaths in the last 10 years from all vaccines combined; 9. Only 1% -10% of vaccine injuries are reported to VAERS. The full extent of adverse events from the COVID vaccines is unknown as there is a significant delay in uploading reports to the VAERS database; 10. Breakthrough cases of COVID-19 infections in those who have received COVID-19 vaccines is on the rise; 11. The trials have not proven that COVID-19 vaccines prevent infection or transmission; 12. Safe and effective treatments and preventive measures exist for COVID-19; AND 1. Students are at nearly zero % risk of contracting or transmitting this respiratory illness and are instead buffers which help others build their immune system. The overall survival rate is 99.997% . 2. Children have already been exposed to unprecedented amounts of fear, instability, shaming, psychological trauma, and segregation through the COVID-19 measures and are therefore even more suggestible than their developmental stage would usually entail; 3. It is the job of parents or legal guardians, not of principals, teachers, teacher assistants, school board executives or other adults with influence on children, to make medical decisions for them; 4. Schools include vaccine and COVID-19 vaccine curriculum, which is biased, prejudicial and is a form of undue influence on any minor child which excludes full disclosure of the known risks of vaccination and the emerging evidence that vaccines do not provide protection as claimed; 5. Vaccine compliance elicited from children under threat of coercion, bullying, or suspension and who are not of fully informed consent that they have the legal right to refuse vaccination, constitutes extreme bullying and coercion and could be construed as a "battery" as well as a violation of constitutionally protected rights. 6. Contrary to misinformation spread by the World Health Organization, "implied consent" is not "informed consent," and "informed consent" is mandatory by law; 7. The Mature Minor doctrine cannot override the wishes and consent of the parents outside of preventing imminent harm or death. Vaccinations do not fall under the Mature Minor doctrine. 8. The engagement of medical experimentation without informed consent further constitutes the indictable offense of crimes against humanity. The risk associated with COVID-19 vaccinations is extremely dangerous to the health and well-being of all children and this form of treatment unnecessary. Any coercion or pressure tactics used for students to be vaccinated contravenes the Nuremberg Code, the Helsinki Declaration and Federal Law. Any use of 'implied consent' by any minor child under the age of 18 is defined in law as gross, contributory, and culpable criminal negligence. Any party found to be involved in vaccination coercion when entrusted with the care of our children could be prosecuted to full extent of law.

Can you show that this is incorrect, the death rate among children? This is coming from the CDC's own data. The Washington Department of Health data supports the risk is very, very low. The risk of drowning or dying from influenza is greater than Covid for children. You can't reference the data and prove otherwise.

Furthermore, I am strongly opposed to any action towards having any type of quarantine camp.

There are many early treatments available to the public, if only our healthcare professionals would be encouraged to start prescribing. For all other illnesses including influenza early treatment is key. It is for Covid too, but our healthcare are not considering this and are in fact flying against this at all levels. There is evidence not just anecdotal that early treatments/therapeutics work.

Thank you,  
Nikki Moser  
East Wenatchee, WA resident

Dear SBOH,

Please do not force people who would be more harmed than helped to get COVID-19 vaccinations that do not even affect their age group. Having children get immunized for a disease that has virtually 0% death rate for their age group, yet an increased chance of causing myocarditis and other unknown side effects is irresponsible at best, and criminal at worst on your part if you pass this as a mandate.

This applies to all people who are immune to COVID-19 from having contracted the disease and are now immune to it. The risks of the vaccine ([www.CanadianCovidCareAlliance.org](http://www.CanadianCovidCareAlliance.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.canadiancovidcarealliance.org>> ) far outweigh any public good that the vaccine has shown to do. Please do not add covid to the list of communicable diseases that warrant such extreme measures.

Thank you for your time.  
Respectfully,  
Matthew C.

To enforce this vaccine on children is completely wrong. We have been into the pandemic long enough to know that they are not suffering. Know that if you all require this covid-19 vaccine so many will be pulling children from the school systems. Take a step back and think about the long run consequences of this? Please stop this.

To whom it may concern,

I am completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of washington state education is in store if this becomes mandatory.

Best regards,  
Heather Simmons

Good afternoon,

I am a concerned parent of WA state who does NOT believe that anyone let alone children should be mandated to be injected with the poison from these death vaccines. If I were to spoon feed the ingredients in any vaccine to my children, I would be put in PRISON. How on earth is that any different then injecting them with any vaccine??????? I will patiently wait for your response!!

I OPPOSE ANY MANDATE ON CHILDREN OR ADULTS. NO VACCINE MANDATES, NO MASK MANDATES, NO CRT MANDATES, NO MANDATES WHATSOEVER!!

NO ONE HAS THE POWER TO FORCEFULLY INJECT ANY HUMAN ESPECIALLY CHILDREN WITH THESE VACCINES.

You will see the decline in the numbers of children in public schools if you mandate this death jab. And there goes your money.

WE THE PARENTS SHOULD HAVE FULL CONTROL OF OUR KIDS NOT THE GOVERNMENT OR ANY HEALTH BOARD, period.

Sincerely,

Marissa Bollinger  
A very concerned parent

External Email

To whom it may concern:

As a citizen of this country and a resident of Washington state for the past 38 years I am deeply concerned about policies that will be considered by the Washington state board of health on January 12. Please note that I am emphatically opposed to the following policies outlined in WAC 246-100 :

- Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).
- Covid-19 injections as part of school immunization requirements using WAC 246-105.

It is my opinion that policies like this represent extremely dangerous government overreach. These policies do not reflect my values, my family's values, American constitutional values, or even the most basic human rights. To vote in favor of these policies is to vote against the will of me and my household and most assuredly against the will of the people of this state.

With gravest sincerity,  
Matt Farinella

AGAINST: WAC 246-100-040

The above proposed law is a major overreach in power given to non accountable health officials.

Under this provision the Health Official under their own determination may force people or groups of people into quarantine. This forces those people to file paperwork to the superior court if they object. There is no penalty against the state. This is a major violation of our rights.

If the state does go forward, there should be direct compensation to any and all individuals who are put into quarantine to the tune of \$5,000 per day. With this type of compensation the state health official would only act upon this provision with serious consideration of the impact the order would have on the individuals.

Hello,

My name is Jenny Tsinker, I am a WA state resident and a mom to three kids.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals.

I also oppose adding a C:19 vaccination to the WAC 246-105 schedule of required vaccines for children to attend schools.

The reason for my concerns is that the rates of Myocarditis in young boys, compared to the risk from COVID-19 do not justify the mandate, unfinished trials, short follow up window for monitoring adverse reactions, lack of evidence the kids need it, doesn't stop transmission... there are a million concerns we all have. And on addition there is evidence that the vaccine causes more risk for side effects to kids who already had Covid-19

Thank you,  
Jenny Tsinker

I am an unvaccinated person, my wife and kids will also not be vaccinated. We are all healthy and don't see the need to get a vaccine that won't even stop you from getting this so called deadly virus. I actually have omnitron rite now and have zero symptoms. I really wish everyone would leave this issue alone, if you want to get the vaccine I'm all for those people, and with that being said it should go the same for us who aren't getting the vaccine.

Subject: Adding COVID jab to school requirements

External Email

Dear Board Members,

I am earnestly asking for the Covid injection to not be added to the school requirements. I am not an anti-vaxer. I've lived long enough to benefit from a true vaccine. This COVID injection is not a true vaccine. It has not been tested and trialed long enough to understand the risks and benefits. The initial studies are not convincing me that it is a beneficial risk. In fact, it is proving to be a life costing risk.

My entire household had COVID in Nov, including non-jabbed, jabbed and children. It was nothing more than an annoying upper respiratory virus. The children were the least affected. There is absolutely zero benefit for healthy children to be jab with a substance that will compromise their natural God given immunity for the rest of their lives.

I pray you will do the right thing by not taking on the responsibility of compromising the health and future lives of the children of WA state. You will have to answer to the Lord when you die and to knowingly be responsible for compromising the children's lives, you will be held accountable for that action. It is the responsibility of parents to makes health decisions for their children....not the government!

Blessings on your decisions...  
Karen Herscowitz

Hello,

It is incredibly concerning that the DOH would even consider including COVID injections as part of school immunization requirements.

Facts, data, studies, and anecdotal reports all reveal that the virus is less dangerous for children than the drive to school; and, secondly, the vaccination is an experimental therapy with a proven record of adverse reactions in younger people, coupled with unknown long-term effects.

Do not do this. Children are not lab rats and the COVID injections should not be mandated. Doing so is akin to abuse.

Thank you for your consideration,

Jens Hatso

I am completely against any of the proposed COVID Policies that are over reaching and immoral. I stand against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. "

Washington state has become too radical in the fight against COVID. Where most states don't have a mask mandate, WE DO, and there is no difference.

The narrative in Washington is to continue to evoke fear and hatred toward the unmasked and unvaccinated, dividing us as a people. The vaccine is not stopping the virus and our cases continue to surge. Biden's vaccine mandate EO is being challenged at the Supreme Court soon, yet Washington state is trying to get these WACs passed??

The more you strip away our human rights in Washington state, the more people will move to another state that chooses freedom and the pursuit of happiness.

Thank you,  
Jennifer Lesinski

Subject: 1/12/22 Meeting Question regarding COVID antibody levels in children

External Email

To Whom It May Concern:

Why is proof of antibody levels not accepted in lieu vaccination?

I would like to express my extreme opposition to implementation of a COVID 19 "vaccine" requirement for schools in Washington State. Both of my children have had COVID twice. Both times they were very mild symptoms. We followed the guidelines and quarantined. We used common sense. Both kids have antibodies, yet they will be segregated if they are exposed to COVID, only because they do not have the "vaccine". They have the same if not more protection than a "vaccinated" person. Allow parents to provide proof of antibodies as an alternative to the "vaccine".

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>> Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long-term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product - Commentary - America's Frontline Doctors (americasfrontlinedoctors.org) <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&da>> )

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Jennifer and Robert Gould  
Puyallup, WA

Dept of Health board regarding public comment for Jan 12 2022 meeting  
WAC 246-100-040

The current shot(s) being given for Covid should under no circumstances be required of an individual against their free will decision on what is best for the body.

The shots do not protect against infection or transmission and it is ridiculous to suggest otherwise.

Quarantining is useful and may support individuals that cannot quarantine on their own in their residences ...homeless, transient individuals, etc.

If you are going to mandate anything consider preventative steps that will support early treatment of covid with the goal of keeping individuals out of the hospitals....why this strategy has alluded our health board is beyond my understanding.

see attached document for protocols that work.....had Washington aggressively supported these suggestions in 2020 1000's of unnecessary deaths could have been avoided!

As a resident of Washington, a taxpayer, retired executive and a wife and mother I have to say you let me and our community down by NOT demanding early and preventive treatments.

Subject: Against Covid19 Vaccine mandate for schools

External Email

I am writing as a parent who has kids who have already had covid-19. They shrugged it off with no problem and now have natural immunity. I do not support mandating children be forced to undergo vaccination when there are no long term safety studies on a new technology.

If the state mandates children to get this vaccine I will strongly consider homeschooling my children.

Thank you for your time,

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these

vaccinations for school age children.

My children and I had Covid back in January 2020 before it was even a big deal. We survived and I will never allow any vaccine to be put into their developing bodies. It is my right to be able to decide what is best for my children...not the governments.

We want to voice our concern and opposition to the proposals WAC-246-100-070 and WAC-246-105. We oppose using police force be used to isolate in a quarantine facility any families or group of person because they do not want to be medically examined, treated, tested or vaccinated. That sounds eerily like Nazi Germany treatment of the Jews and I am sure that we do not want to go down that road.

We ask that you listen to the people at your meeting on January 12th and oppose these two measures.

Subject: 1/12/22 Meeting Comments - No Covid Vaccination Req.

External Email

Dear Washington State Board of Health,  
I am writing to comment on the proposals that will be presented at the January 12th meeting regarding Covid-19 vaccination mandates for children to attend school and childcare in our State.

I strongly believe there should be no Covid-19 vaccination mandate for our children and if there is I will remove my children from public school. I want to remind you of the following:

- \* Studies now document that the vaccinated and unvaccinated can transmit Covid and therefore, the vaccination does not stop the spread of Covid
- \* Children are at extremely low risk from Covid
- \* Hospitalization and death rates are significantly low for children
- \* The vaccines are still in EUA approved
- \* There have been no long-term studies regarding the effects and safety of these vaccines

Thank you for your time,  
Jennifer Fierling

Dear board members:

I DO NOT support you adding Covid to the above referenced WAC.

I have reprinted a portion of the WAC.

C 246-100-040 Procedures for isolation or quarantine. (1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she: (a) Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with requests for medical examination, testing, treatment, counseling, vaccination, decontamination of persons or animals, isolation, quarantine, and inspection and closure of facilities, or has determined in his or her professional judgment that seeking voluntary compliance would create a risk of serious harm; and (b) Has reason to believe that the person or group of persons is, or is suspected to be, infected with, exposed to, or contaminated with a communicable disease or chemical, biological, or radiological agent that could spread to or contaminate others if remedial action is not taken; and (c) Has reason to believe that the person or group of persons would pose a serious and imminent risk to the health and safety of others if not detained for purposes of isolation or quarantine. (2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in a

If this is truly something that you are considering I think that it is absolutely and totally inappropriate.

Just the other day there were a series of articles published in the New England Journal of Medicine.

Here is a link to these articles - the articles I refer to are the ones on the January 6 notes.

<https://jamanetwork.com/journals/jama/newonline>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fjamanetwork.com%2Fjournals%2F>

Recently, there appears to be an emerging consensus among medical professionals in the United States that we are going to have to learn to live with Covid just like we live with the flu and other contagious diseases. These articles appear to support that position.

Recent advances in treatments after someone is infected with Covid and the dampening of the effects of Covid if you are vaccinated is moving Covid into the category of the flu.

Reasonable people can argue both sides of this last statement.

What we do not need is a draconian government enforcement action.

As a citizen of the state of Washington, I do not intend to be subject to the provisions of the WAC is reprinted above.

Covid does not rise to the level of the plague, smallpox, biologicals and radiological contamination which were the type of drastic emergencies the WAC was intended to address.

I do not live in a police state nor do I want to live in one.

I do not trust government officials with this type of power over Covid.

If you pass this type of administrative action, you are inviting civil disobedience.

One last thought, taking a step as drastic as this should require your agency to publish this January 12 meeting on the front page of every newspaper in the state of Washington and be discussed on the nightly news of our local news stations. You can't pass something like this with limited public exposure. I am sure you would be afraid to have that type of exposure regarding the purpose of this meeting.

Sincerely,

Jamie Hoskinson  
Seattle, WA

WA Board of Health members,

I am writing to ask you NOT implement any policies that utilize tyrannical actions (involuntary quarantines, treatment, testing, counseling or vaccinations) in what will be a failed attempt to "contain" COVID19. If people are healthy, it's very clear they are at a reduced risk of long term effects from this virus. Vaccinations are only good for short term, personal protection from significant symptoms, but do not stop transmission or infection. Forced vaccination is unconstitutional both at the state level and the federal level. Instead of forcing the population to take a vaccine, let's invest resources into building a healthier community through healthy diet and exercise, as i previously stated, those with a healthy lifestyle are much better off than those with ailments, who are overweight, have comorbidities, etc. Forced vaccination, forced quarantine and isolation is not the answer for WA. Leave us and our children alone and to make our own decisions about our families and our health.

Have courage to stand against the tyrannical few running this state. Stand up and speak out, you know this isn't right and you know it's not the answer to ending this pandemic.

Jilleisa Thomas

Subject: Absolute NO to quarantine facilities and other absurd policies

External Email

I am completely against Covid policies that are over reaching, immoral, and a violation of our individual human rights.

What has happened in Australia is horrendous and the thought of WA descending into a totalitarian medical state (more than it already has) is terrifying.

Please vote NO on all policies regarding emergency covid orders.

I will also note.....you are losing. People are waking up to the what's happening. It's hard to see in Seattle, but it's happening all over the country and around the world. When the tide completely turns, those who have pushed for medical tyranny will be held accountable in court for crimes against humanity.

Have a nice day.

Subject: 12 Jan questions/statement WA State Board of Health

External Email

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated would require getting boosters forever.

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Subject: Against vaccine mandates for children...

External Email

Dear SBOH,

It is unconscionable to mandate vaccinations for children. The adverse side affects are far greater risk to children than the disease.

Indeed, all mandates for requiring free civilians in a our society to take experimental drugs is illegal and unethical.

If you chose to overreach the bounds of your authority in this manner, you may see a resistance from the public that is vehement and aggressive.

The absurdity of these social and medical mandates are gradually being revealed for their totalitarian nature. History will not be kind when the truth of your complicity in crimes against the humanity become obvious.

Sincerely,

Lisa V. Sadler

The above proposed law is a MAJOR overreach in power given to non accountable health officials.

Under this provision the Health Official under their own determination may force people or groups of people into quarantine. This forces those people to file paper work to the superior court if they object. There is no penalty against the state. This is a major violation of our rights.

I am OPPOSED to this law. Our rights need to be upheld.

Sent: 1/6/2022 7:56:34 PM  
To: DOH WSBOH  
Cc:  
Subject: AGAINST covid shot requirement for school kids

External Email

To the WA State Board of Health,

I'm writing to express my extreme concern, and opposition, over the proposal to inject our school age children with the experimental covid shots, as a requirement for school admission. This is a decision that should be left to the parents. We know that the risk to children birth to 17 years is so small as to be inconsequential. The shots are harming people's immune systems. To invade children's developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage. Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after the covid shots, particularly in adolescents and young adults. WHY are we putting our kids' hearts at risk?

Health officials are telling parents that children should be vaccinated for the sake of herd immunity. What is largely ignored are the studies that show children are not driving the pandemic and, in fact, are less likely to transmit the virus than adults. We also see clearly that "vaccination" status has nothing to do with stopping transmission of the virus. Covid outbreaks on "100% vaccinated" cruise ships are a stark example. Bottom line – children are not the risk factors for covid. Leave them alone! It's WAY too early to know potential long-term side effects. They do not need to be forced guinea pigs for these shots. If the parents want that for their kids – that should be THEIR decision. Let parents decide either for - or against – the shots. NOT the government! Please – do NOT make these covid shots required. It's simply not necessary.

Sincerely,

Vicki Gillette

To whom on the Board it may concern,

My name is Kenny DuHamel, I am a Department of Defense employee and have been working for the Department of the Navy for over 8 years. Since the initial outbreak of COVID-19 or SARS COV2, I have felt the need to utilize the majority of my personal and sick leave in order to deal with the events that have transpired. This has created a level of stress and frustration unlike anything I have experienced in the past. You may likely agree that this pandemic has been extremely difficult to understand and follow. Many like myself, realize this is to be expected; the virus changes, risk then change, soon to follow are the policies and treatments used to combat the issue.

I have seen and experienced an unprecedented amount of what feels like harassment, discrimination, and favoritism surrounding the treatment of unvaccinated individuals compared to those who have chosen to receive one of the available vaccines and or booster shots. Every individual deserves the god given right to engage in Medical Freedom and decide for themselves whether or not they would like to receive medical treatment. It still seems there is a narrative out there supporting the idea that unvaccinated people are somehow prolonging the pandemic and making infections and transmissions worse. There is plenty of data and evidence to support the facts that any individual, regardless of vaccination status can still contract, and pass the virus, as well as become ill and get sick.

WHY in the world would it be necessary to require children to receive and Emergency Use Authorization (EUA) unproven vaccine, that does not provide adequate protection from infection?

With all the controversy surrounding the under reporting of adverse reactions to receiving one of the vaccinations, rushed manufacturing, the lack of clinical trials and data supporting the vaccines effectiveness, WHY would we want to consider making it required of Children in order to attend school?

These extreme measures seem severely out dated. Majority of Washington State believes and lives life as though we are almost out of this pandemic. Sporting events, concerts, dining, and gatherings have been going on for months upon months. Yet we are still trying to implement these unjustified, counter-productive, psychologically damaging, mandates and guidance that are obviously doing more harm than good.

The very thought of some organization approaching my residence in an attempt to detain me or my family in order to force a vaccination or vaccination driven agenda is a very scary thought to consider. Think about the possible ramifications and the amount of up roar that scenario will create in the community.

Do the people of the board really believe that the people of this state are going to sit by and willing let their rights be infringed upon in such an abrasive manner?

I have more questions than the few that I have presented before you today, perhaps when the board is truly ready and willing to hear from the people in this state, we can attempt to have a discussion and gain a better understanding of each other and the situation.

Respectfully Concerned,

Kenny DuHamel  
Kitsap County, Washington

Subject: Adding COVID to 246-100 WAC

External Email

Dear board members:

I understand that you are considering making COVID subject to the provisions of 246-100 WAC.

I have reprinted a portion of the WAC.

C 246-100-040 Procedures for isolation or quarantine. (1) At his or her sole discretion, a local health officer may issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine in accordance with subsection (3) of this section, or may petition the superior court ex parte for an order to take the person or group of persons into involuntary detention for purposes of isolation or quarantine in accordance with subsection (4) of this section, provided that he or she: (a) Has first made reasonable efforts, which shall be documented, to obtain voluntary compliance with requests for medical examination, testing, treatment, counseling, vaccination, decontamination of persons or animals, isolation, quarantine, and inspection and closure of facilities, or has determined in his or her professional judgment that seeking voluntary compliance would create a risk of serious harm; and (b) Has reason to believe that the person or group of persons is, or is suspected to be, infected with, exposed to, or contaminated with a communicable disease or chemical, biological, or radiological agent that could spread to or contaminate others if remedial action is not taken; and (c) Has reason to believe that the person or group of persons would pose a serious and imminent risk to the health and safety of others if not detained for purposes of isolation or quarantine. (2) A local health officer may invoke the powers of police officers, sheriffs, constables, and all other officers and employees of any political subdivisions within the jurisdiction of the health department to enforce immediately orders given to effectuate the purposes of this section in a

If this is truly something that you are considering I think that it is absolutely and totally inappropriate.

What we do not need is a draconian government enforcement action.

Covid does not rise to the level of the plague, smallpox, biologicals and radiological contamination which were the type of drastic emergencies the WAC was intended to address.

I do not live in a police state nor do I want to live in one.

If you pass this type of administrative action, you are inviting civil disobedience.

One last thought, taking a step as drastic as this should require your agency to publish this January 12 meeting on the front page of every newspaper in the state of Washington and be discussed on the nightly news of our local news stations. You can't pass something like this with limited public exposure. I am sure you would be afraid to have that type of exposure regarding the purpose of this meeting.

Sincerely,

Joel Jacobsen

Recently there is ideas of using law enforcement to detain people in the beliefs that your doing better for the state. The psychologic affect this will have on our state is way more detrimental to our health! Please do not force our state into confinement for the little data that you have! History is in the process of reacting itself in a horrific way! Please do not be apart of that! Hitler started the nazi rise by a state of emergency.

Hitler reviews an SA parade as it passes in front of the Dortmund theater. —Mahn- und Gedenkstaette Steinwache Dortmund

1933–1938

Following the appointment of Adolf Hitler as German chancellor on January 30, 1933, the Nazi state (also referred to as the Third Reich) quickly became a regime in which citizens had no guaranteed basic rights. The Nazi rise to power brought an end to the Weimar Republic, the German parliamentary democracy established after World War I. In 1933, the regime established the first concentration camps, imprisoning its political opponents, homosexuals, Jehovah's Witnesses, and others classified as "dangerous." Extensive propaganda was used to spread the Nazi Party's racist goals and ideals. During the first six years of Hitler's dictatorship, German Jews felt the effects of more than 400 decrees and regulations that restricted all aspects of their public and private lives.

Cc:  
Subject: Adding COVID to 246-100 WAC - NO!

External Email

Board of directors,

The thought of adding covid 19 to the WAC makes no sense. This virus has little to no lasting effect on the vast majority of the people that it infects. We all realize that this virus has killed people, yet well over 99% of the people that become sick, recover in short order.

Allowing our government the power to use force against it's people, like in Australia, is not the right way to manage this pandemic. We are not a police state or country. This is the land of the free. Actions such as what is being considered are draconian in nature and have no place in our state or country.

The threat of police force and internment camps for the "infected" with covid 19 is not a rational approach to manage this situation.

I hope your board does not vote to add covid 19 to the WAC.

WSBOH,  
You do not have the moral or legal authority to place free and peaceful people in quarantine camps or force a vaccination requirement to attend school.

Any attempts by the Board of Health to implement either of these will be taken as an overt act of aggression by WSBOH and thus morally justifying measures of self defense.

The fact you are even contemplating either of these is disgusting.

Go Fuck Yourself.

Subject: Against ALL proposed Covid policies

External Email

To whom it may concern,

I am completely against any of the proposed Covid policies that are overreaching and immoral. We stand against these proposed WAC's:

As a parent I am adamantly opposed to a covid vaccine requirement for school aged kids and daycares. This vaccine has not had any long term (or relatively short term) safety studies done and is only approved for emergency use. The SCIENCE shows that though this virus is becoming more transmissible it is also becoming LESS severe symptom wise (especially in children).

No parent wants their child to get sick, not even with the common cold (which is where covid is heading in mutation). However the reality is that if they don't catch it at school they will catch it at the grocery store, the library, from mom or dad who got it from work etc. DESPITE vaccination status!

It is absolute discrimination to refuse children access to public school because their parents don't feel comfortable giving them an experimental vaccine (and it's only considered a 'vaccine' because the definition of a vaccine has recently been amended). When my husband and I chose to have children we intended to raise them as a couple, the TWO of us.

It should absolutely be a CHOICE.

I'd really think hard about your decision. A collapse of washington state education is in store if this becomes mandatory.

Best regards,  
Heather Simmons

Subject: Against Proposed Covid Policies

External Email

I am against any of the proposed Covid Policies that are over reaching and immoral. I am against these proposed WAC's: WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, WAC 246-105. I am further against policies that would be made on behalf of the people without the people having any foreknowledge that it was on the agenda. Any policy that infringes on our own personal freedoms needs to be made public before the decision is made, otherwise we no longer live in a democratic society but rather a society that is controlled by a dictator. What is the difference, if the local government is able to make a ruling that could "detain" or strip the rights of its people. Are we going backward in time? This type of decision should not be allowed on a state by state basis.

Thank you,

Lori Lara

Dear WSBOH Directors:

As a legal citizen of the State of Washington, I wish to email you today, Friday, January 7, 2022 at 10:27am PST to completely oppose any of the proposed COVID-19 policies that are strictly overreaching and bio ethically immoral and against our US Constitution.

I stand against the following proposed WAC policies:

WAC 246-100-070  
WAC 246-100-045  
WAC 246-100-040  
WAC 246-100  
WAC 246-105

Thank you for including my comments in your public hearing scheduled for next week on January 12th.

Sincerely,

Jeremy D. Stubson  
WA State Citizen

The above proposed law is a major overreach in power given to non accountable health officials.

Under this provision the Health Official under their own determination may force people or groups of people into quarantine. This forces those people to file paper work to the superior court if they object. There is no penalty against the state. This is a major violation of our rights.

If the state does go forward there should be direct compensation to any all individuals who are put into quarantine to the tune of \$5,000 per day. With this type of compensation the state health official would only act upon this provision with serious consideration of the impact the order would have on the individuals.

Subject: Against COVID-19 vaccination mandates in education

External Email

To whom it may concern,

I am writing this as the mother of a vaccine injured son.

In February of 2019 my son received a vaccine-cocktail that was both injurious and detrimental. Within days he lost social skills, speech, and engagement. He broke out in a head-to-toe rash, and developed a fever. I was told this was "normal." Nothing about it was normal. In the spring of 2021, he was diagnosed with Autism.

While this vaccine cocktail works for many, it did NOT work for my son. That is why I am AGAINST mandates, and FOR choice. What works for some, does NOT work for others. Medicine is NOT "one size fits all."

For you to require a vaccine in order to receive education, that is still under Emergency Order of Use, is both irresponsible and reckless. Until there is SOLID data, and YEARS of specific vaccine trials- I am appalled that you would even consider this an option. Studies and SCIENCE have proven and showed that children/youth are NOT at high risk for COVID. So why enforce this?

To clarify- I am AGAINST the mandates for a COVID-19 vaccination to be eligible in order to receive education.

Thank you,

Kammi Lomsdalen

Dear Washington State Department of Health staff,

Until we have long term safety data on the novel covid vaccinations it is unconscionable to mandate their use in the population.

Are you willing to take responsibility for any long-term injuries your citizens incur from these novel covid vaccinations?

Are you willing to risk the health of our children for a disease that mostly impacts the elderly and those with comorbidities?

How far are you willing to let the government dictate to its citizens what health decisions they must make?

I have always been so proud to be a Washingtonian, to have a government that respects my choice and freedoms regarding my health. Why are you taking this away? What sort of totalitarian path are you leading us down?

Sincerely,

Meaghan Rader

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](https://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](https://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

Sincerely,

Washington resident

Dear WSBOH committee,

I am a WA resident who has lived in Seattle since 1996 and I oppose WAC 246-100 and WAC 246-105.

I oppose any sort of detention of anyone by health officials for Covid. This would be too close to a repeat of the forced Japanese internment camps during World War 2, since most likely this would disproportionately affect immigrants and communities of color as they statistically have the lowest vaccination uptake and most distrust of government institutions.

I oppose mandatory Covid vaccination for students. As you weigh whether or not to require these particular vaccines for school attendance, please consider:

- When the FDA met to discuss EUA approval of Covid vaccines for children, their experts specifically warned against tying them to mandates. The intent was to make vaccines available for high-risk children.
- Omicron is significantly milder than any other variant we've encountered. And these vaccines clearly do not prevent or even significantly reduce transmission of the Omicron variant.
- As Covid approaches endemicity, new variants will inevitably emerge. It is unpredictable whether or not the current Covid vaccine will reliably mitigate future variants.
- Mandatory vaccination is an extremely divisive topic. Many families will disenroll from public schools, and pivot to private education or homeschooling. Public education could suffer a tremendous loss, at a time when local levy funds are already teetering on uncertainty.

Thank you for your time,

Mariann Krizsan

To: DOH WSBOH  
Cc:  
Subject: re: adding Covid 19 vaccines to the required list of immunizations for school and day care attendance

External Email

I am very much opposed to any proposal to add Covid 19 vaccines to the WAC mandated list of vaccines required for children to attend school in the State of Washington. My opposition is based on two points:

1. Covid 19 vaccines do not meet the standard specified by the WAC for inclusion on the list. The WAC requires that the vaccine PREVENT the disease in question. Diseases such as TB, polio, scarlet fever, rubella and others have been prevented through vaccination for decades. These vaccinations were developed through a long process of R&D, and have proven to be very effective in preventing disease. On the other hand, Covid 19 vaccines have not been designed to PREVENT infection but only to MANAGE symptoms. Many thousands of breakthrough cases have been documented demonstrating that the current vaccines do not prevent infection or spread of Covid, and are least effective with the current Omicron variant.

2. Children (K-12) are at the least risk to catch Covid and almost never spread the disease to adults. There are no documented instances of outbreaks of Covid occurring in schools among children. Teachers who have been infected might bring the disease into school from outside but the source has never been children. How many children have been hospitalized and/or died from Covid in the State of Washington? Very few, when compared to the total number of cases reported statewide. As a group, children are the least at-risk. More children die from influenza each year than Covid will ever kill. Yet, there is no proposal being discussed to add influenza vaccine to the list of required vaccinations. Other vaccines currently required have eradicated disease that primarily affected children. Covid is the exception.

I am requesting that any further discussion of adding the Covid-19 vaccine to the WAC be dropped. Two years of remote learning caused enough damage to public education in our country. Adding Covid-19 vaccines to the WAC will further damage public education. Many parents will simply pull their children from public and private schools, causing further chaos and headaches for everyone. One-size-fits-all mandates coming from government are not the solution for managing Covid.

Respectfully,

James A. Bromley

Dear Board Members,

Please review the petition attached created by Rochester Community Alliance and signed by 16,308 constituents in support of:

Action: We the constituents and community members of this great State of Washington, DEMAND the Washington State Board of Health (WSBOH) REFUSE to make COVID vaccinations/shots mandatory for children of Washington State for child care and school admission.

Due to the following reasons:.

1. COVID vaccines remain Emergency Use Authorization
2. Children under the age of 18 have a 99.995% survival rate from COVID infection
3. Children have a higher chance of death or adverse reaction to COVID vaccines than COVID-19

Sincerely,

Corina Watt

Rochester Community Alliance

External Email

Dear WSBOH,  
I am against mandatory Covid-19 vaccines for children - please do not make them mandatory for all children to attend school or daycare in Washington state.

Children still have the lowest death rate for Covid-19 and these vaccines are still only approved under emergency authorization. Parents should have the right to make this decision based on their own research into the risks of covid, and the in/effectiveness of the vaccine.

Sincerely,  
Michael Wilson

AGAINST: WAC 246-100-040

The above proposed law is a major overreach in power given to non accountable health officials.

Under this provision the Health Official under their own determination may force people or groups of people into quarantine. This forces those people to file paperwork to the superior court if they object. There is no penalty against the state. This is a major violation of our rights.

If the state does go forward, there should be direct compensation to any and all individuals who are put into quarantine to the tune of \$5,000 per day. With this type of compensation the state health official would only act upon this provision with serious consideration of the impact the order would have on the individuals.

Dear Board of Health:

My understanding is that Agenda Item 8 is in regards to forming a Technical Advisory Group to review information about COVID-19 vaccinations for consideration of mandating the shots for public schools. I fully oppose mandatory COVID-19 vaccinations. Please REJECT Agenda Item 8 and protect our students.

My understanding is that Agenda Item 11 is in regards to establishing a new rule that prohibits the Board from adding any Emergency Use Authorized product or any licensed product that lacks completed Phase 3 trial studies to the list of required shots for school students. Please reject requiring experimental drugs or vaccines and SUPPORT Agenda Item 11.

The agenda for the meeting for the above items is attached for reference.

Respectfully,

Jeff Coop

Have we not learned anything from history? Nothing good has come from grouping people into different warring tribes and setting them against one another by the means of propaganda. Just look at the numerous atrocities of the 20th century to see how this could end. We need a message of unity. Moreover, the vaccine does not prevent infection or transmission according to the CDC and FDA, and looking at the data objectively coming out of the UK, Denmark, Australia, & Ontrario, those that have been vaccinated are becoming infected by Omicron at a rate much higher than unvaccinated. Additionally, with the definition of "vaccinated" being fully mutable and potentially changing in the near future, those that have 2 shots will no longer be considered vaccinated. So where does it end? Boosters forever. This is beyond sane and any critically thinking person should be able to see through the madness. For more information please see the work of Alex Berenson, Steve Kirsch, Robert Malone, and Peter McCullogh. If the goal of this is to stop covid, this will not work nor help. This will invalidate personal liberties and allow authoritarian rule, nothing else. This is not good for anybody.

Subject: Adding Covid to existing WAC code, Covid vaccine mandate for school children

External Email

To Wash. State Board of Health

I am writing to strongly object to any plan to apply current infectious disease WAC codes to include Covid-19 for our State residents.

Covid is a treatable illness. The survival rate is more than 99 percent of the population. Covid vaccines are not working for Covid. Currently, as data indicates, most people getting Covid and spreading it are fully vaccinated including boosters. To be considered "fully" vaccinated will require regular booster shots into infinity!

Including Covid vaccines as a requirement for attending public school is completely unnecessary and potentially dangerous for our children. Children have little risk from Covid-19, but they do have considerable risk from the Covid vaccines such as myocarditis. We should NEVER risk our children's future for an illness that is less threatening to them than a Covid shot.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not a health safety issue, but an issue of freedom. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not destroy them.

Sincerely,

Laurie Langley

Subject: A concerned WA Mom about mandating Covid vaccinations in schools

External Email

I would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense ([childrenshealthdefense.org](http://childrenshealthdefense.org)) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors ([americasfrontlinedoctors.org](http://americasfrontlinedoctors.org))

Force vaccinating healthy children for a disease that doesn't affect them to make adults feel safe is a new low for humanity. Please do the right thing and do not require these vaccinations for school age children.

To whom it may concern,

I believe as an American and as a parent of a young child, I should be able to use my freedom to make the choice of what vaccines I chose to give my child.

I believe that the founding fathers of our nation did not set out in hopes of having our freedoms stripped away because of fear.

Our nation has been through a lot of turmoil the last two years.  
I believe most of that would have been preventable if our leaders stepped up and fought for a change and fought for freedom.  
We have never been more divided.

When the government starts telling me what to inject not only into my body, but my kids, that is a huge overreach. You should have absolutely no say in what goes into my body or my kids body. As it states in the 14th amendment in constitution of the United States of America, "All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

I believe this speaks for itself, but I will also add: We are free to choose, you cannot deprive me or any person of life, or of Liberty, without due process of law. And as far as I'm concerned, getting a vaccine has never been a law. Good luck trying to make it one. My kids will stay home before they are ever put under the unlawful manipulation and scientific testing of the United States government. My kids are not your test dummies.

I do not and will not ever agree with being manipulated by the fear of something that you have a 99% rate of surviving. I will not raise my child to fear everything and turn to experimental drugs for an answer. Especially without studies showing the long term affects.

My answer to your question is no. Please do not force parents to do this to their children. Please do not approve of this absurdity.

Thank you,

Meghan

To: Lang, Caitlin M (SBOH) <Caitlin.Lang@sboh.wa.gov>  
Subject: AGAINST mandatory covid shots for school kids

External Email

Dear Caitlin,

I'm writing to express my extreme concern, and opposition, over the proposal to inject our school age children with the experimental covid shots, as a requirement for school admission. This is a decision that should be left to the parents. We know that the risk to children birth to 17 years is so small as to be inconsequential. The shots are harming people's immune systems. To invade children's developing immune system and inability to protect themselves create a vulnerability that opens them up to unfathomable damage. Since April 2021, increased cases of myocarditis and pericarditis have been reported in the United States after the covid shots, particularly in adolescents and young adults. WHY are we putting our kids' hearts at risk?

Health officials are telling parents that children should be vaccinated for the sake of herd immunity. What is largely ignored are the studies that show children are not driving the pandemic and, in fact, are less likely to transmit the virus than adults. We also see clearly that "vaccination" status has nothing to do with stopping transmission of the virus. Covid outbreaks on "100% vaccinated" cruise ships are a stark example. Bottom line - children are not the risk factors for covid. Leave them alone! It's WAY to early to know potential long-term side effects. They do not need to be forced guinea pigs for these shots. If the parents want that for their kids - that should be THEIR decision. Let parents decide either for - or against - the shots. NOT the government! Please - do NOT make these covid shots required. It's simply not necessary.

Sincerely,

Vicki Gillette

Subject: Adding Covid-19 Vaccine to Immunization schedule

External Email

WSBOH Members,

I completely oppose adding covid-19 disease into the Childhood immunization schedule for attending school and daycare.

1. Children at at low or no risk for this disease unless they have severe underlying illnesses. (per CDC statistics). The risk of adverse vaccine events are higher than the risk of disease.
2. Safety and efficacy data is incomplete for school age children.
3. The vaccine product is not fully approved by the FDA - it is still under EUA

Parents have the ultimate concern and care of children and they should make this decision uncoerced.

I also am against adding Covid-19 inclusion to the forced quarantine statute.

Thank for your time and service,  
Heidi Patrick

Subject: Against Covid-19 vaccinate mandate for children to attend school

External Email

Hello,

I am currently an educator and parent of two students who attend public school. I have been a resident in Lynden, WA for over 13 years. I am strongly against mandating the Covid-19 vaccination for students to attend school. There are many reasons why. Here are just a few;

1. The vaccine has not proven to stop individuals from getting Covid-19
2. Covid-19's death rate (especially in children) is .01 percent (October 2021)
3. The vaccine has not been tested long enough, so we do not know the long-term negative side effects
4. Many of the negative side effects from the Covid-19 vaccination are worse than getting Covid-19 itself
5. There is no consideration to those that have had Covid-19 and have natural immunities

I am not an anti-vaccination person and believe in vaccinations. However, this is a horrible over reach of power. Long-term health is not being considered, if this mandate is pushed through. Individuals need to be able to make the best decisions for themselves and under aged children. Every situation is different. There is also no thought or consideration given to natural immunities.

Thank you for your time,  
Jacqueline Vanderpol (a concerned parent and educator)

Subject: AGAINST proposed policy/bill

External Email

Good morning,

I am writing on behalf of the bill/policy that is trying to be past and am stating I am against it and the abuse of power. The proposed policy below is what I will not stand for:

\* Allow local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).

While we are all hurting and confused, this is not the answer to helping our society, by detaining people, isolating, and force against our own human will.

Kinzie Lunceford, M.A., CBT, RBT – WA SPKN

Subject: 1/12/2022 Washington State Board of Health Meeting.

External Email

Hello there,

I am writing to you concerning the possible vaccine mandate in Washington state public schools. COVID-19 does not pose any serious risk to children or young adults and the most recent strain of the virus, Omicron, while being more contagious than the previous strains, comes with much less severe symptoms. Furthermore, I oppose a vaccine mandate for the students in our public schools systems. This vaccine is way too new and was developed way too fast to even consider mandating it, especially for the age group that it affects the least. Recent studies from the CDC have even shown that efficacy with specific COVID vaccines may be down to 20%. If you really care about the children in our state you will not require them to take this vaccine that they do not need. This does not even talk about the dangers to children in taking this "vaccine"

Furthermore, If I am understanding correctly there is potential debate about requiring government control of quarantining individuals who test positive for Covid. ( I believe WAC 246-100) This is so beyond appalling that this would even be a serious conversation. The parents of the students in Washington state public schools can and should be able to determine when their child is safe to return to school if a child is exposed to COVID-19 just as has been the case with any other virus in our history. This is nothing more than a flu or cold, especially for children. We all know this , we all know that children are not seriously affected by this virus. We all know that the numbers of deaths due to Covid have been completely manipulated to induce fear in our society. As an example, Illinois Department of Health recently made it very clear that deaths attributed to Covid were any death for any cause as long as the person tested positive for Covid. Her words. Lets not dig a hole any deeper than has already been dug in politicizing something that should never have been political.

We are not fools, we will not be duped and we will not live in fear anymore. This overreach is appalling and anti-American. This should not even be up for debate. Do your jobs and act with integrity and a conscience and morals that are consistent with those of this great nation and those of this state that you have been appointed to represent..

Sincerely,  
Megan L Oestriech

Hello, my name is Joyce Gellerman. I'm a tax payer and home owner in Kitsap county. I am totally against having the vaccine mandate for kids and adults. It should be a personal decision & not forced upon us! I do not agree with putting an experimental drug in my body and especially not in my kid's bodies. There hasn't been enough studies for this vaccine to say it is safe. Please don't make this vaccine mandated. It's should be pro choice.

Thank you,  
Joyce Gellerman

External Email

To the State Board of Health,

I strongly oppose the board of health extending 246-105 WAC to Include Covid and it's communicable diseases, and other certain diseases. Covid does not fit in this category, and this would be unconstitutional.

I am also writing to strongly OPPOSE adding ANY and ALL covid 19 mRNA treatments to the WAC 246-105 list of required vaccines for children to attend school.

All vaccines come with some risk to children and society, be they small or great, and no vaccine should be added to this list lightly. But, these new treatments called 'vaccines' for SARS COV2 should never be considered for the reasons listed below.

1. All covid-19 'vaccines' being used are still listed under EXPERIMENTAL USE AUTHORIZATION, and therefore, by law, use MUST be voluntary. No person can legally be required to take them. And no parent can legally be required to authorize them for their children.

2. This SARS COV2 virus has been statistically proven to be benign in children. Children have less chance of serious illness or death from Covid-19 than the average cold. Statistically 0%. We have never required a vaccine for a benign illness in children with a statistical death rate of zero.

3. Children have been proven to not be carriers of this disease and therefore do not asymptotically spread it to adults.

4. The many SARS COV2 'vaccines' now in use under EUA have been proven to be dangerous and deadly by the CDC's own VAERS system, and also by many, many peer reviewed papers based on the CDC's own statistical collection data.

5. MRNA technology is new and has not been proven safe or effective, in any age group, in long term studies.

6. The cost to society from medical treatment for vaccine injury in all age groups is already mounting. It cannot be cost effective to require this treatment in healthy children who are not at risk of serious illness or death.

7. Washington State citizens have overwhelmingly demonstrated that SARS COV2 mRNA technology treatments are not wanted or acceptable, especially in children. Less than half the population of our state is considered 'fully vaccinated' despite them being widely pushed and available. The public does not want these 'treatments' nor do we want them for our children.

8. The above points make it completely clear that these treatments do not meet the 9 criteria required when Reviewing Antigens for Potential Inclusion in WAC 246-105-030 <tel:246-105-030>

<https://sboh.wa.gov/Portals/7/Doc/Publications/ImmunizationCriteria-Update2017-Final.pdf>

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fsboh.wa.gov%2FPortals%2F7%2FUpdate2017->

Be it known, that if, after review of the information above and peer reviewed studies and data collection of the vaccine injured, these treatments are approved by this board to be added to the list of required vaccines under WAC 246-105, the members of this board will be held responsible under Nuremberg codes for all maimed and injured children as a result of these EUA 'vaccines' forced without consent. The citizens of this state know and understand the freedoms and responsibilities we are afforded in our state and national Constitutions. And we stand on them.

In closing, I strongly request that no SARS COV2 EXPERIMENTAL USE AUTHORIZATION drugs be approved for inclusion in WAC 246-105.

Thank you,

Mary Craig  
Spokane, Wa

Subject: Re: 1/12/22 meeting

External Email

Senator Lovick,

I am writing to you today in regards to the proposed WAC changes involving Covid-19, specifically WAC 246-100-070, WAC 246-100-045, WAC 246-100-040, WAC 246-100, and WAC 246-105.

I am 100% against these proposed policies. They are immoral, illegal, and unconstitutional. Detaining citizens against their will without due process is illegal, not to mention the fact that it regards a personal, medical decision in which the government should have no say in.

Regardless of where you stand with the Covid-19 vaccine, mandating experimental treatment without informed consent is wrong. Forcing this experimental vaccine on our children is wrong.

What is the benefit of forcing a vaccine that does not prevent the transmission of the virus?

The logic is just not there.

Please consider my comments when making your decision. I have lived in Washington my entire life and, with the direction this state is heading, I don't recognize it anymore. Please be on the right side of history. These proposed WAC changes will turn this state into a modern-day Nazi Germany.

I appreciate your time,

Jen Holmes

Subject: Against allowing local health officers to use law enforcement.

External Email

I and the majority of WA state VEHEMENTLY OPPOSE the following policy you will vote on!

1. Allowing local health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons (families) to be isolated in a quarantine facility (WAC 246-100-045) following refusal to voluntarily comply with requests for medical examination, testing, treatment, counseling, vaccination (WAC 246-100-040).  
These specifics come from (WAC 246-100).

Please stop this madness! There is no pandemic. There is no benefit to getting vaccinated or tested. Anyone, including vaccinated and unvaccinated can get and spread COVID. Look at Whoopi Goldberg and Lloyd Austin (both fully vaccinated and boosted) and still got COVID.

-Lyudmila Ianosel-

Subject: 1/12/22 Meeting

External Email

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Thank you for your time,  
Jim & Shea Craver  
Longview/Kelso residents

In regards to the WA Covid Detainment Emergency "Special Meeting"

I'm a life time WA resident and this is absolutely ABSURD to even be a thought, YOU ARE AGAINST WA state residents. YOU are absolutely INSANE!! And should be ASHAMED of yourselves!!

WAC 246-100-040  
WAC-246-100

#1 Involuntarily detain a person or group of persons to be isolated in a quarantine facility following voluntary compliance with medical exams, testing, treatment, counseling & vaccine. \*Just try to detain a HUGE part of the population in WA, you will find yourself most sorry!\*

WAC 246-105

#2 Covid 19 injections as part of school immunization requirements  
\*this is absolutely INSANE! Requiring a vaccine that children don't even get sick from that isn't even proven long term is a HUGE issue for our children! Parents will not comply & this is a joke! Home schooling will protect our children from your horrendous agendas!\*

You can go FUCK YOURSELVES!!  
Let's GO Brandon at the way!!!

Are you Pro or Con on the proposal?

2.           Con

---

It is against the United States constitution to enact these laws. Americans have freedom of choice, and this is in direct conflict with that. Current vaccinations are causing harm to children and adults, and natural immunity is not allowed to stand as an alternative. These proposals are grossly overreaching of the Washington State government. These proposals will divide our state even more than the current situation is doing.

Detainment of Americans for refusing medical treatments is a violation of our constitution and forcing vaccinations of mrna is equal to doctor Mangala . This the very reason for Nuremberg trails took place . I object .

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.

+++++++ Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.  
+++++++

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.

+++++++ This is not about +our +health;+ +it  
+++++++is +an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.  
STOP THIS UNCONSTITUTIONAL MADNESS FOR FREEDOM IN OUR LAND!

Signed,  
Sydney Grace

I was appalled when I was made aware of this on your agenda.

All Americans were given their freedoms from God not Man and upheld but the Bill of rights and Construction.

What you are proposing is against this and you will be help accountable in the planned Nuremberg 2 trials. Quarantine camps, really?!

All free people of Washington, America and the world are again this for a virus that has many knows cures including NATURAL immunity! No we do not want to be Australia as it working badly there.

You need to justify this. Mandatory and FREEDOM don't mix.

The following survey response is submitted:

1.

State Board of Health Meeting Date:

---

1/12/2022

2.

Agenda Item or Issue:

---

Using WAC codes and law enforcement involuntarily detain citizens and adding COVID-19 to list of required school vaccines

3.

Your Name:

---

M. Fuller

4.

Do you have a professional title?

2. No

5.

Are you representing an organization?

2. No

6.

Address:

---

22329 19th Ave S

7.

Email:

---

Arcticterp@yahoo.com

8.

Phone Number (Include Area Code):

---

2068709255

9.

Do you have any special expertise relevant to this topic?

1. Yes

---

A knowledge of our constitution and familiarity with law enforcement re: unlawful imprisonment

10.

Are you testifying on a specific proposal under consideration by the board?

1. Yes

---

Use of law-enforcement to involuntarily detain people deemed a public health risk due to COVID-19. Including COVID-19 vaccinations as a requirement for public school participation.

11.

Are you Pro or Con on the proposal?

2.           Con

---

My Comment to the SBOH: RE: Policies In my opinion, based on the information I have read provided by the Main Stream Media and other sources, despite all their fear mongering, COVID-19 and its variants appear to warrant the same concern I give to seasonal flu and common cold. The official response of the past two years is totally out of proportion to the danger presented and therefore; my concern that any proposal to apply current infectious disease WAC codes to include COVID-19 may lead, due to fear and ignorance, to the abuse of the aforementioned WAC codes. That said: Local Health Officers have the same responsibility as medical professionals regarding the Hippocratic Oath to Do no Harm. It is unethical and morally wrong to mandate/compel/force any irreversible procedure upon any free man or woman, or their children. Forcing a vaccine/medication is just as irreversible as forcing an amputation. After informed consent, the choice to accept treatment must be the sole responsibility of the individual that is to receive treatment, or in the case of a minor with undeveloped or inadequate reasoning skills, the responsibility of the parent(s). Should the State, under its current authority, involuntarily detain or quarantine for any communicable disease, the State must ensure the detainee(s) suffers no irreparable physical, mental, emotional or financial harm due to the State's actions. The lack of a definition of public health risk is extremely troubling. There is no limit on such degree just behavior and no repercussions for the state. This is not a preview of law-enforcement and is not an appropriate use of already limited resources. This is entirely out of proportion to the situation and completely lacking appropriate definitions and limitations. It is a threat to the public good and everyone civil liberties. This must not happen.

Again - I urge you not to implement this proposed policy.

Bill Filed In Washington Would Authorize 'Strike

Force' To 'Involuntarily Detain' Unvaccinated Families: 'They Have Already Set Up The Internment Camps'

The Washington State Board of Health may soon amend state law to authorize the involuntary detainment of residents as young as 5 years old in Covid-19 "internment camps" for failing to comply with the state's experimental vaccine mandate.

WAC 246-100-040, a proposed revision to include Covid protocol under the state's Communicable and Certain Other Diseases act, outlines "Procedures for isolation or quarantine." The measure would allow local health officers at "his other sole discretion" to "issue an emergency detention order causing a person or group of persons to be immediately detained for purposes of isolation or quarantine."

Subject: Regarding C19 Mandate for School Children

External Email

To whom it may concern:

I wanted to voice my STRONG opposition to the WA BOH / WA State Legislature even considering this C19 shot as mandatory for our school children.

1.) Why did the FDA break its own requirements and violate its own protocol to "approve" this experimental gene therapy?

A.) Why were no animal trials were conducted for safety first?

B.) Why was only a small number of cherry-picked participants, not representative of broad population, were used for the trial sample?

Why was data insufficiently collected and documented to represent true outcome? (This includes causal harm— there is a child, Maddie de Garay, who has been wheel-chair bound and on a feeding tube since her second dose nearly a year ago, and her damage was logged as "functional abdominal pain"; and the study does not seek ANY other data, including injury, except the single question of whether or not the participant has tested positive for C19. How then, are risks being being scientifically evaluated?

Why was there no double-blind placebo group for this study (placebo group was unmasked WEEKS later, and documentation scrapped, and a portion of the former placebo group received the injection)? How is this scientific to not have a control group?

And why was the study cut short by YEARS? How can we scientifically ascertain long-term outcome if we conclude the study after a few months?

Is there a way to categorically determine the long term effects of this experimental treatment?

Why are the spikes in juvenile myocarditis and strokes being tolerated?

Why aren't you concerned about significant alteration in A MAJORITY of our girls' menstrual cycles, and the possible indications of that, post-vaccination?

Why are counts of C19 spiking UPWARDS in our children post-vaccination, compared to pre-vaccination? Is that not contrary to the goal of reducing Covid infections?

Where is the intelligence, science and common sense in this? Where is the concern for the well-being of our children's health in this?

C.) VAERS data continually demonstrates that these shots are the deadliest vaccines of all time, with tens of thousands of deaths (more DEATHS for these shots in the last 12 months than all vaccines COMBINED since VAERS was established); there are also a MILLION vaccine-related injuries.

Why are these not being included in the informed consent?

Why are you trying to eliminate our right to consent at all?

2.) Where are the peer-reviewed scientific studies showing that children are the main source of communicating this disease?

There aren't any.

Why are we subjecting OUR CHILDREN, to whom this virus poses no risk (99.9% survival rate), to a brand new, virtually untested, PERMANENT medical treatment, when there are NO studies demonstrably proving (or even vaguely indicating) that "asymptomatic spread" can occur?

Studies DO prove that if the viral load is insufficient to produce symptoms, the virus isn't being communicated.

3.) Why are we forced to take a product from a source that has refused to release the contents of that product for public viewing?

Why are we being forced to take a possibly harmless treatment, and have there be no way for us to hold pharmaceutical companies accountable for any damage or death?

(But we can, and WILL, hold YOU accountable for any damage done if you coerce us into this, and we receive any harm, OR if you force us to withdraw from our publicly-funded marketplace.)

3.) Why are no other FDA-approved, long-studied therapeutics allowed for treatment? Not only are these enormously effective, safe and inexpensive drugs being denied, but instead are being aggressively banned?

4.) Why are you forcing a "leaky vaccine" into our children as a viable option to combat C19? There are countless studies strongly showing, and CDC, NIH and FDA have all conceded this point, that these vaccines are ineffective for preventing infection from and continued transmission of this virus.

There are many studies showing the danger of using leaky vaccines in the middle of a pandemic, however; it forms the perfect environment for accelerating viral mutations and forcing the most virulent to compete with the wild type.

Leaky vaccines not only create variants, but cultivate deadlier versions of them. (In nature, it has LONG been established that variants become milder over time compared to the wild type/alpha strains.)

Isn't this a very ignorant and reckless approach, and it is not doing the OPPOSITE of protecting public health?

5.) Why isn't natural immunity being considered? Natural immunity has been documented for DECADES (and since C19 has broken out) to be long-lasting and robust.

Where are the PEER-REVIEWED, large sample scientific studies showing that natural immunity is inferior to vaccine "stimulation of the immune system"?

6.) Isn't Omicron making this a moot subject? Aren't even news and government agencies admitting that we are at/ nearing ENDEMIC, not pandemic, levels?

So how is this about public health?

Isn't the vaccine for the Alpha strain, anyway? So why would that be the mandate, when it's the variants causing case numbers (not hospitalizations and deaths) to go up?

7.) How can you mandate for Corminaty when it isn't available? The only vaccine available is the one under the EUA— which cannot be mandated.

This is illegality on top of illegality, and we will hold you responsible for the damage caused by this bait-and-switch.

8.) Is not bodily autonomy is the most basic human right (LONG-established human and Constitutional rights, and emphasized by the Nuremberg Code)?

Why would we tolerate medical fascism?

How can you all reconcile this irrational behavior, and proceed with actions identical to the NAZIS and the Communists of the 20th Century?

When in the history of civilization have the ones forcing medical procedures against another's will EVER been on the right side of history?

When have the ones forcing experiments onto (into) the children EVER been right?

How does it usually go when a minority group attempts to seize the children as property of the state?

You are violating our most basic human rights to force an unknown substance into OUR CHILDREN.

Why would we submit to an unconstitutional coercion that gives us all risk and no gain? Especially for our CHILDREN, who would have to live with the consequences for the rest of their (perhaps damaged) lives?

Why would we tolerate this "baby step" of totalitarianism, when we know it can activate the State to implement other coercive/aggressive statutes, including involuntary detainment, quarantine, separation of children from parents, removal from the marketplace and blatant segregation?

Please consider these points. As time goes on, the truth only continues to justify our concerns— and we will be seeing you in court if you proceed.

Regards,  
Sophia Wilson

Subject: NO on Unconstitutional Vaccine Agenda

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 99 percent of the population. Covid vaccines have little effect on Covid, and in fact, most people who get this Covid and spread it have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. They also do NOT have the right to force vaccines on citizens who do not choose them.

This is not about our health. This is about control and it is NOT in the purview of the Washington State Department of Health or ANY elected official or unelected state employee. These decisions are the right of every citizen and NO law, mandate, code or policy can override those rights. We are NOT granted rights from the State. The State is REQUIRED to protect our rights and not infringe on them.

Respectfully,

Wendy Misencik

Subject: Concerns regarding DOH agenda on Covid-19

External Email

To State Board of Health,

As a parent and well-informed citizen, I am writing to express my concerns in regard to items on your meeting agenda.

Agenda Item #9 – Allowing local health departments to set up quarantine facilities and in some cases, detain people against their will. This is in direct conflict with our state constitution and is completely unnecessary in the current health situation. The vaccines have proven ineffective, as people still get Covid-19 after receiving them. Medically, it is proven that people develop natural immunity after having Covid-19. What justification would there be for quarantine facilities?

Agenda Item #11- Informed Choice Washington's Petition for Rulemaking (filed by Xavier Figueroa, Ph.D. on behalf of ICWA) requests a new rule that prohibits any EUA product, or any product that has not successfully complete Phase 3 trials to be added to mandatory school health requirements. I agree with this statement for the following reasons. #1. The current Covid -19 vaccines have not completed Phase 3 trials. #2. The current vaccines for Covid-19 are still in EUA. This means that they are supposed to only be applied in an emergency – not as a broad application to the entire public. #3. The EUA no longer should be applicable in this situation as current and further studies are finding many therapies for early treatment for Covid-19, which improves opportunities for natural immunities to develop. #4. The current vaccines are not preventing Covid-19. #5. According to the CDC's website VAERS, the current Covid-19 vaccines have a terrible record of adverse events and death. There is no data on safety over 3, 5, 10 years and beyond. It is not acceptable to vaccinate every child with a vaccine with this undeniably tragic safety level. The consequences could be devastating on our children!

Respectfully,

Susana Dinges

External Email  
Hi Tracy,

I have major concerns of what is going on in our state right now. You are going to be making a big decision on Wednesday, and I pray that God will give you the strength to do the right thing and stand up to tyranny. The government has no right to decide what kinds of medical procedures we will have or not. This is the people's choice, and we the people are protected by the Constitution. We live in the United States of America, the land of the free. I think people are forgetting what that means.

I am completely against giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family into a quarantine facility if they refuse the requests of medical examination, testing, treatment, counseling, or vaccination.

I am completely against Covid-19 injections as part of the school immunization requirements using WAC 246-105.

Please do the right thing and stand up for people's liberties.

Thank you,  
Melissa White

Dear Washington State Board of Health,

Concerning the proposals being considered on January 12, 2022, I would like to share my thoughts and concerns.

The Covid19 vaccines have not proven to be effective at preventing the virus nor in the spreading of the virus. Something ineffective should NOT be mandated.

The vaccine does not have a record of long term effects, so we do not know how it will affect us in the future. Something unproven should NOT be mandated.

Children are at extremely low risk for Covid19. Why should our children (or anyone) be vaccinated when it is ineffective and unproven concerning the long run effects?

Cases around the world have proven that those countries without vaccines do much better overall than countries/states with strict mandates.

The greatest reason of all to NOT create strict mandates is that it is unconstitutional. Each of us should have the right make our personal health and medical choices for ourselves and our families.

Thank you for deciding against mandates.

Sincerely  
Rhonda Sanders

External Email

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents.

This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90 percent of the population. Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been fully vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary.  
Children have little risk from Covid-19,  
but they do have considerable risk from the unapproved Covid vaccines.

In America,  
health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention.  
This is not about our health; it  
is an  
unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed, Madeleine Raasina, Clinton WA

Subject: WAC-246-100 and -105

External Email  
Dear Ms. Schreiber,

I am a fully vaccinated (COV-19) Seattle, Washington resident.

I'm AGAINST applying WAC-246-100-040, 045, 070 and WAC 246-105 to the management of COVID-19.

I am completely AGAINST giving local health officers use of law enforcement and the use of an emergency order to involuntarily detain a person or family in a quarantine facility if they refuse requests of medical examination, testing, treatment, counseling, and vaccination.

I am completely AGAINST Covid-19 injections as part of the school immunization requirements using WAC 246-105.

As a state with tremendous resources in the tech and data space, I would LOVE to see these resources redirected to reporting accurate data on COVID cases (as well as vaccine adverse events) with comparisons between vaccinated and unvaccinated. Please include this data on our state dashboards. I know not everyone makes data-based decisions. But, the vast majority do! If clear and compelling data were presented and publicized, I believe NONE of the above would be necessary.

Thank you for your consideration and for working to keep our state safe and healthy.

With gratitude,  
Kim Wilson

I've received information about a meeting on the 12th that could bring our great to the point where we'd be locked up if we don't get vaccinated. There are other sites that say this is misinformation. I'm having a hard time trusting anyone these days. I know Covid vaccines don't prevent death from Covid. I know of people who have new heart issues after being vaccinated & I know there are people out there that think if you get vaccinated you're going to grow an extra head. Time will tell what effects the vaccinations will have. I just don't think we need to go nazi on people & force them to take the jabs. If this is any part of what you're proposing - just don't. Thank you.

While I do believe we need to do what we can to fight this pandemic, forcibly and involuntary removal of citizens from their homes is an extremely dangerous standard to set. This country already struggles with its citizens mistrusting it's government, this would cause so many to never want to comply with anything again. This only digs ourselves further into a hole.

Dear board of directors,

I would like to share my extreme opposition to the quarantine camps and authoritarian style laws of making people comply and discrimination against individuals freedom of choice and what's best for their families. Are we living in Communist china? Nazis Germany? If you implement this you will be following the footsteps of hilter, Stalin and the leaders of communist china. You will be in violation of our human rights!

Washingtonians do not want this!!!

people will leave this state. If you implement this you will not be serving the best interest of us washingtonians. We still live in the United States of America do we not? We still have freedom of choice. If your basing this in science, well here's some science for you leading experts are saying that omicron is a blessing in disguise...yes highly contagious, BUT mild in symptoms and not deadly. They also say that this is how we achieve herd immunity, which will stop this virus, and omicron is an end to this pandemic. So please do not implement a communist, dictatorship that hold people against their will

I urge all of you to put yourself in our shoes or your families shoes and how would you feel if you were treated like you lived in a place that doesn't care about your human rights, freedoms, cause I know that none of you are going to be affected by this. Let people make their own choices and they might just surprise you...mandates and forcing our hands do not have the people in your best interest.

I also would like to express my extreme opposition to implementation of a COVID 19 vaccine requirement for schools in Washington State.

1. No COVID vaccine available in the United States has received FDA approval. All available vaccines, including the Pfizer-BioNTech vaccine, are being administered under an Emergency Use Authorization. The only "approved" COVID 19 vaccine is Comirnaty, and it is not available in the United States and there is no anticipated date for its availability. (This "smoke and mirrors" approach by the FDA is the subject of numerous lawsuits and a Federal Judge recently rejected Pfizer's claim that the 2 products are interchangeable: Federal Judge Rejects DOD Claim That Pfizer EUA and Comirnaty Vaccines Are 'Interchangeable' • Children's Health Defense (childrenshealthdefense.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fchildrenshealthdefense.org%2F&da>) ) Since EUA products cannot be mandated per the Nuremberg Code, this alone should be enough to stop consideration of making vaccines mandatory.

2. Children are statistically at zero risk of dying from COVID. Their survival rate is in the range of 99.997-99.998% or, put another way, their risk of dying with COVID is less than 2 in every 1,000,000 children. The very few children who are listed as COVID deaths did not die OF COVID, but rather WITH COVID as anyone being admitted to a hospital nowadays is tested. I challenge the Washington State Board of Health to show medical records for even one child who has died OF COVID. Where there's no risk, there can be no benefit.

3. There are well documented risks associated with myocarditis in young males associated with these shots. Myocarditis is not a mild illness. Statistics show that 2 in 10 people with myocarditis will die within 2 years and 5 in 10 die within 5 years. Dead heart tissue does not regenerate itself.

4. The spike proteins associated with these shots have been shown to settle in female's reproductive organs, potentially affecting future fertility. In fact, there is currently a study focusing on changes in women's menstrual periods associated with the shots. COVID-19 Vaccines and the Menstrual Cycle | NIH COVID-19 Research

5. Natural immunity has been shown to be much more robust than any immunity imparted by the vaccine, and there has been research that has shown, after a person gets the shots, they may never be able to achieve full natural immunity in the future. Please read this for 5 studies that show children already have robust natural immunity to

this virus. Hands-off, CDC and Pfizer: Children are to be considered already COVID 'vaccinated' – Opinion – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

6. No one knows the long term risks of these vaccines. You may remember that one of the members of the FDA Advisory Committee infamously said, "We are never going to learn about how safe this vaccine is until we start giving it" Dr. Eric Ruben, Editor in Chief NEJM The studies Pfizer conducted were woefully underpowered. This is an analysis of 10 Red Flags associated with Pfizer's studies: Ten red flags in the FDA's risk-benefit analysis of Pfizer's EUA application to inject American children 5 to 11 with its mRNA product – Commentary – America's Frontline Doctors (americasfrontlinedoctors.org <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Famericasfrontlinedoctors.org%2F&> )

7. You may "enjoy" reading this analysis from a person who does risk-benefit analyses for a living. It is estimated that, even if 28 million children are vaccinated against COVID, at most 45 lives might be saved. And there are potentially huge long term risks. What is the Number Needed to Vaccinate (NNTV) to prevent a single COVID-19 fatality in kids 5 to 11 based on the Pfizer EUA application? (substack.com <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Fsubstack.com%2F&data=04%7C01> )

8. In Pfizer's initial study for older 12-17 year old kids, adverse side effects were hidden. You may or may not be familiar with the story of Maddie De Garay who volunteered to be part of the initial trial because she wanted to do her part. She is now in a wheelchair with a feeding tube and likely will be for the rest of her life. Her side effects were hidden and listed as "abdominal pain". Even if there's an infinitesimal chance of this happening to another child, why take the risk? Comcast Censors Vaccine Paralyzed 13-Year-Old Girl (rumble.com <<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Frumble.com%2F&data=04%7C01> )

9. It is impossible for someone to give informed consent when side effects from the vaccines are hidden. Perhaps before you make a decision that you'll regret, you should visit this website.

realnotrare.com  
<<https://gcc02.safelinks.protection.outlook.com/?url=http%3A%2F%2Frealnotrare.com%2F&data=04%7C01>

In history when has forced compliance have ever been on the good guys side? NEVER!!!!

Please put a stop to this if you want to stay in office! Cause I guarantee you, you will

show your true colors if you force this and show us you are only interested in power and not for the greater good of the people! And you will be voted out!

Always,

Daphne Ortiz

Very concerned Washingtonian (born and raised) and parent

To: DOH WSBOH  
Cc:  
Subject: Public comment of WAC 246-100-040

External Email  
Dear Wsboh:

Please enter these comments into the public record and I would like to request a receipt of this letter because I simply do not trust your office to enter this letter into the record and I need to establish some sort of paper trail to at least try to confirm it. I am unable to speak during the public comment period as I work nights and will need to be asleep during the comment section.

My comments pertain to the meeting being held on 1/12/22 in which a proposal to add "emergency detention orders" and mandating that kids be vaccinated against Covid in order to attend school is being discussed and is known as WAC 246-100-040.

Thank you for clarifying what the meeting being held on this date is supposed to be about as opposed to what was being said on social media. However, your decision to even discuss adding this 'addition' to Washington's Administrative Codes is reprehensible. You know, as well as I do, that you have every intention of implementing this blatant policy of discrimination despite what the public comments may say. To you and your political party, the public comment period is just a formality in order to give the illusion that the public was actually involved in its decision-making when the decision has already been made.

As I vaccinated person I want to be on record as being 100 % opposed to what is purely a communist policy at best, or a fascist policy at worse. Discriminating against people who chose not to take a vaccine, which is proving each and every day to be completely ineffective as more and more vaccinated people are coming down with Covid, is disgusting. You, Democrats, are blaming the failure of the treatment on those who did not take the treatment. It makes no logical sense and proves beyond a shadow of a doubt that this policy has nothing to do with the disease process and is only about control. Has not history taught you anything? These 'proposed' policy changes are the exact same thing that the 1930's Germans did to the Jews. There is no difference as the exact same rationale is being used to justify the policy, and you are actually calling for people to be placed in concentration camps. The Democratic party is certainly making Hitler proud, even Stalin would agree with your methods of creating a Gulag.

Therefore, I demand that this policy of "emergency detention orders" and the child abuse of mandating kids be vaccinated be rejected.

Thank you'

Subject: Covid Vaccine mandate

External Email

To whom it may concern,

I am opposed to making Covid-19 vaccines mandatory for school admission or childcare in our State. I am also opposed to local health officers using law enforcement to involuntarily detain a person or group of persons. Both are in violation of Freedom of Choice.

There are no long term studies on the Covid vaccine, which makes this experimental. We do not know the true safety of these vaccines, and anyone who says otherwise is lying without having long term data. These vaccines are still EUA (Emergency Use Authorized). There is no reason to implement this vaccine in our children when the risk for their age group is extremely low. They have a greater risk of having an adverse event, then dying from Covid-19. It is also obvious that being vaccinated does not stop the spread, and people should have the choice on whether they want to take the risk of having more serious symptoms or not, especially since there is no guarantee that an unvaccinated person will have more severe symptoms than an vaccinated person.

It is in everyone's best interest not to force these vaccines in any way. I challenge you to look at the whole picture, and not make a decision based on fear or ignorance. We do not know the long term side effects, and it is unjust to force people into an unknown risk. We also do not know the repercussions of these vaccines with natural immunity, which should also be taken into account. We don't require a chickenpox vaccine when someone already had the chickenpox. This should be no different.

Sincerely,

Tamara Mickelson

External Email

This is to all Washington State Board of Health Members:

It has come to my attention that there is a proposed bill that you will be hearing and voting on Jan. 12, 2022 which will allowThe Board of Heath to "Involuntarily Detain Unvaccinated Families". WAC-246-100-040. This is Unconstitutional and fully disregards The Bill of Rights. This also is against the Nuremberg Code. Any one who attempts to inflict these tyrannical rules against the American People will BECOME the enemy of the American People. Keep this in mind as you vote for this bill. People are outraged of the overreach of the Government and the overreach of Governor Inslee. If you vote for this to take effect, you will no longer represent the American People. The people will come for you! THIS IS NOT 1939 NAZI GERMANY! WE WILL NOT BE GETTING ON THE TRAINS! WE WILL NOT COMPLY!

Subject: No to COVID mandates and restrictions

External Email  
To whom it may concern,

I urge you to decide NOT to move forward with specific covid policies that come from WAC 246-100. This is a gross violation of human rights and should not be considered.

Also, I plead with you to say NO to mandatory Covid injections for schools regarding WAC 246-105. These injections do not stop spread, as demonstrated by this research study which in fact found that more inoculations in a community means MORE spread (not less) - <https://link.springer.com/article/10.1007/s10654-021-00808-7>.

Also given that children are at extremely low risk from COVID, mandates of these jabs make no sense. (Indeed, CDC data shows they are more at risk for drowning, car accidents, and many many other causes than COVID.)

Please be brave and do the right thing here. Please reject these bad policies.

Sincerely,  
Wendi Modarelli

Dear Board of Health Members,

Thank you for your service to the citizens of WA.

I am writing to ask you to NOT implement ANY policies that utilize tyrannical actions (involuntary quarantines, testing, treatment, counseling, and vaccinations) in what will be a failed attempt to "contain" Covid19. This virus will never be contained, it is a part of our ecosystem now. The only real defenses against it are REDUCING CO-MORBIDITIES and allowing ROBUST THERAPEUTIC TREATMENT DEVELOPMENT. Have you as a board, recommended spending any public service resources on telling people to live a healthy lifestyle as the best defense??? If people are healthy, IT IS CLEAR THEY ARE AT A MASSIVELY REDUCED RISK OF LONG TERM EFFECTS FROM THIS DISEASE.

We also know that the vaccines are ONLY GOOD FOR SHORT TERM PERSONAL PROTECTION from significant symptoms, but do not stop transmission or infection. My taking a vaccine DOES NOT save anybody else from Covid19, so forcing vaccines on people becomes nothing more than a form of medical authoritarianism, not health care. If WA's health care systems are stressed due to COVID patients, it is ONLY because hundreds of qualified health care professionals were unnecessarily terminated from their jobs (many with natural immunity), and due to that there are not enough people to provide care.

Please DO NOT implement any actions that will only hurt/divide/anger your fellow citizens and DO NOTHING to reduce the spread of this disease. HAVE COURAGE AND PLEASE TAKE A STAND AGAINST TYRANNY.

Subject: WAC proposals covid 19

External Email

Dear Board of Health Members,

I've recently become aware of the Washington Administrative Code (WAC) proposals regarding Covid-19 requirements for school age children. I am in complete OPPOSITION to this proposal, and disappointed in our state leadership for allowing this infringement of our rights to even be considered. Science proves that Covid-19 is as much a threat to our children as the common cold, and yet you've allowed fear and mob mentality to dictate your legislation. The possible side effects of this vaccine, which science shows to be ineffective at eradicating Covid-19 and has not received adequate long-term testing, outweigh the risks of the disease, but you are seeking to overturn the rightful responsibility and judgment of parents. This is NOT a childhood disease, and does not compare to the other diseases that we've largely eliminated through vaccines. While I am thankful for access to a vaccine, I fully support the CHOICE to vaccinate against Covid-19 or not. As we have equal access to a vaccine, allow each individual to assess their own assumed risks and make the necessary decisions for their own family.

The WAC proposals regarding quarantine and forced exams, testing, treatment and vaccines are unnecessary and over-reaching. The death rate for Washington state has been steadily declining for the past four months. While the cases have increased, the number of asymptomatic and low sickness vs. extreme cases have not been provided. The only data is deaths and cases, and based on these numbers, while many people have contracted the illness, not many are dying; certainly not in numbers that require you to force people to be quarantined, examined, tested, treated or vaccinated. I am OPPOSED to any forced actions and extremely disappointed that it is being considered.

Washington state residents should be able to make the choice for themselves. We have all had or seen extreme illness in our lives, this is not being taken lightly. Trust your citizens to make the decision that is right for them and their family.

I appreciate your consideration.

Teresa Nielsen

To: DOH WSBOH  
Cc:  
Subject: Please Oppose covid shots added to school age children

External Email

To whom it may concern,  
I, Val Harris, Oppose the use of law enforcement to be used to detain those who are unvaccinated for covid 19 shots.  
Most of us already have natural immunity. Many of us have religious opposition to taking the vaccine.

I Do Not support adding the vaccine for school age children.  
Please Oppose these injections for our children.  
The children are not spreading and or dying from covid. They do not pose a threat.  
According to FDA safety surveillance for covid-19 vaccine Adverse Events outcomes.  
Here is a list of side effects from receiving covid-19 vaccine:

Death,  
Guillain-Barre syndrome,  
Acute disseminated encephalomyelitis,  
Transverse Myelitis,  
Encephalitis/ Myelitis / Encephalomyelitis / Meningoencephalitis/ Meningitis,  
Encephalopathy,  
Convulsions / seizures  
Stroke,  
Narcolepsy and Cataplexy,  
Anaphylaxis,  
Acute myocardial infarction,  
Myocarditis/ pericarditis,  
Autoimmune disease,  
Pregnancy and birth outcomes,  
Other acute demyelinating diseases,  
Non- anaphylactic allergic reactions,  
Thrombocytopenia,  
Disseminated intravascular coagulation,  
Venous thromboembolism,  
Arthritis and Arthralgia/ joints pain,  
Kawasaki disease,  
Multisystem inflammatory syndrome in children,  
Vaccine enhanced disease.

Just by reading these side effects. How can you mandate this on the children???  
These are experimental vaccines that have never been used on humans.  
They are still going through trials.  
We do not have enough long term studies on fertility and overall health. They are not safe or effective!!

It is against the law to mandate them. You will all be held accountable when children will be having life-threatening injuries and side effects.  
You will be held responsible and accountable!!!  
Who will be paying for all the injuries and deaths??  
These vaccines are not safe. Please, please Oppose these injections.

There has been a filing in the International Crimes Court the ICC by Dr Michael Yerdon and others for crimes against humanity by pushing this vaccine and with holding life saving treatments.

The vaccine is not the only way to combat this virus. Vaccinated still get it and spread it. These do not work, they will only harm the children.

Please Do the right thing and oppose these WACs from being added to laws.

Ms. Pskowski,  
Please consider the federal law (and hear the people, the citizens of this nation) as you consider the rule that gives DOH power to involuntarily quarantine or inject citizens of the US, children on up. This rule is in direct violation of federal law under Title 21 CFR (Code of Federal Regulations), Section 50.23 & 50.24. It is illegal to coerce someone into compliance when giving an experimental medical treatment. It is a felony to do so, actually- UNLAWFUL- and constitutes an act of domestic terrorism (which, if passed, would legally make you a domestic terrorists).

That unlawful-by-definition rule will also violate the WA State Constitution, Article 1 Section 7, which speaks to the right to privacy.

This leaves only one option for your decision on this rule, and that is for you to reject it and to abolish all and any consideration of such a rule, or face criminal charges of Domestic Terrorism and/or Conspiracy to Commit Domestic Terrorism.

Thank you,

Kristen Cormick

---

It is my understanding that the Covid-19 related topics of quarantining, isolation and inoculation of minors as a pre-condition to attending school are being discussed in this board meeting. Id like to express my views on these three topics. All three of these proposals should be soundly rejected. First, quarantining and / or isolating the unvaccinated accomplishes nothing. It would be a policy driven by irrational fear rather than reason. Remember that these gene therapy vaccines do not provide immunity, only a reduction in severity of the disease, so a vaccinated person who catches Covid-19 would be just as contagious as an unvaccinated person. In fact studies are showing a greater viral load in vaccinated persons who catch Covid 19. Second, the Omnicron variant is proving to produce a mild illness comparable to the common cold so quarantine and isolation make even less sense. Here is a link to a medical lecture by Dr. Mobeen Syed MD, a much followed medical educator:

<https://www.youtube.com/watch?v=VfF43zt42Jw&t=178s>, In addition, we must not forget that the mRNA and Vector DNA vaccines are experimental and have proven to be high risk already. One only need to look at the VAERS reporting system to see that adverse advents from vaccines have skyrocketed since the introduction of these inoculations. I could cite numerous sources, but a very recent finding is extremely alarming and clearly indicates the true extent of the adverse impact of these vaccines is likely hidden. I speak of course of the findings of the two eminent pathologist professors from Germany, Dr. Sucharit Bhakdi and Dr. Arne Burkhardt. Here is a link to their findings.: <https://stevekirsch.substack.com/p/bhacdiburkhardt-pathology-results> Under no circumstances should education be denied to unvaccinated children. Children have a robust immune system and experience has clearly indicated that cases of Covid-19 are extremely mild. It would be the height of carelessness to coercively subject them to these inoculations in light of the known risk. A risk / benefit analysis would clearly indicate that they should not be subjected to the risk of the vaccines. The decision of whether to inoculate or not should be left solely to fully informed parents with no threat to deny their children access to education if they don't comply to vaccination for their children. Thank you for considering my concerns.

Subject: January 12th Board Meeting

External Email

It has come to my attention that WA Board of Health will be discussing Covid-19 shot mandates for schools and recommendations for forcible quarantine and/or detention of those that disagree with policies. Is this Manzanar? Is this Auschwitz? Something is very wrong here!

Absolutely no health mandates or restrictions should ever be put into place without providing evidence to justify such measures. Covid-19 injections are failing, as people with the injections are getting sick and testing positive. To isolate, mask, distance, wash, etc. is causing more harm than good. You will need to produce an abundance of evidence on how infection and fatality rates for each age group would ever justify such draconian policies. STOP the tyrannical measures and let us determine best health measures for ourselves and for our children. Be prepared to produce evidence and safety studies for these Covid-19 injections. How many adverse reactions are there? Your proposed policies are unjustifiable on their face.

In the last two years, many Washingtonians have moved away from our state to escape the proverbial boot in their throat from forcible lockdowns, job losses, school and church closures, mask mandates, etc. and are living happily and freely in other states such as Texas, Florida, Idaho, South Dakota, Oklahoma, Montana, etc. Perhaps you can look to those FREE states for guidance. They are open and flourishing!

A concerned citizen,

Shannon Larson

I commented earlier about how mandated quarantine is a violation of freedom and forgot to mention how forcing our kids to vaccinate to attend school is a violation of freedom as well. Kids are low risk and the vaccine has risk as well. It should be up to parents not government!

Thank you

It's been clear that the Pfizer and Moderna covid vaccines cause myocarditis for some time. What hasn't been clear, though, is whether the risk of myocarditis after vaccination is greater than it is after infection. If the risk after infection is even greater than it is after vaccination, then a pretty good case can be made for not worrying too much about vaccine induced myocarditis, under the assumption that almost everyone who doesn't get vaccinated is sooner or later going to get covid, and thereby be exposed to the risk of post-infection myocarditis.

If, on the other hand, the risk is greater after vaccination, then a more careful weighing of risks needs to be done. For the large segments of the population that face infinitesimal personal risk from covid-19 (basically everyone under 40 years of age who is not overweight and who doesn't have any underlying health issues), even a small risk of serious disease from the vaccines could be enough to tip the scales in favour of not vaccinating.

And myocarditis is a serious disease, make no mistake. Lately, I've been hearing this sentence a lot: "but the myocarditis caused by the covid vaccines is mild!". I'd never heard of "mild" myocarditis pre-covid. Pre-covid, myocarditis was always considered a serious disease. What the people saying this mean is that the patients admitted to hospital with myocarditis after vaccination are usually able to go home after a few days, and don't generally end up in an ICU. Which is true.

But we don't say that most heart attacks are "mild" just because they don't result in a stay in an ICU, and just because the patient is usually able to leave the hospital within a week. A heart attack is a heart attack, and is by definition serious. The same goes for myocarditis. Our heart muscles are not very good at repairing themselves, and it is impossible to know today the extent to which an episode of vaccine induced myocarditis increases the person's future risk of serious long-term complications, such as chronic heart failure or atrial fibrillation.

So, myocarditis is always serious, regardless of whether it puts you in an ICU or not, and we need to know whether the risk of myocarditis caused by the vaccines is greater than the risk caused by infection.

Thankfully, a study was recently published in Nature Medicine  
<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nature.com%2Farticles%2F021-01630-0&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fe5437d61194add750608d9d39d0215%7C11d0e2172>>  
that helps us to answer that question. What the researchers did was to gather data from everyone in the UK over the age of 16 who was vaccinated against covid-19 between December 2020 and August 2021. This works out to about 40 million people (more than half the UK population). For this massive cohort, data was then gathered on myocarditis events and on positive covid tests. 8% of the 40 million people had a positive covid test during the study period. The objective of the study was to see what the risk of myocarditis was within 28 days of vaccination vs infection, and relate that to the background rate of myocarditis.

There is one big problem with taking the numbers in this study at face value, and that is that it used a positive covid test as the indicator for covid infection. But we know that up to half of all covid-infections are asymptomatic, and on top of that there is an unknown number of people who have symptoms but don't take the test. So the true number of infections is likely to be at least twice as high as the test-confirmed infections. This creates an unfair comparison when comparing with the vaccines, because we know about everyone who gets the vaccine. There aren't lots of people who have been secretly vaccinated, and aren't included in the statistics. So whatever risk rate we get for myocarditis after infection should probably be halved, to more accurately reflect reality.

Anyway, let's get to the results.

The first thing that is important to note is that the relative risk of myocarditis after vaccination vs infection appears to vary massively depending on how old you are. Among people over the age of 40, there was no sign that the vaccines increased risk of myocarditis at all. A positive covid-19 test, on the other hand, increased the risk 12-fold in this group. So for people over the age of 40, the risk of myocarditis after infection was much higher than the risk after vaccination.

Among people between 16 and 40 years of age, however, the situation was very different. In this group, the 28 day risk of getting myocarditis after a positive covid-test was "only" increased four-fold. The risk after the first dose of the Pfizer vaccine was increased two-fold, while the risk after the first dose of the Moderna vaccine increased four-fold.

Let's remember that the the covid test is probably only catching half, at best, of all infections, so the real risk increase after infection is more like two-fold, not four-fold. In other words, in people under 40, the first dose of the Pfizer vaccine causes roughly the same number of cases of myocarditis as an actual covid infection, while the first dose of the Moderna vaccine causes roughly twice as many cases of myocarditis.

Ok, so let's get to the second dose. The second dose of the Pfizer vaccine increased the risk of myocarditis three-fold, while the risk after the second dose of the Moderna vaccine was increased 21-fold!

It's safe to conclude here that the decision, a few months back, by authorities in many European countries to put a hold on giving the Moderna vaccine to anyone under the age of 30 was wise. One thing that is clear is that the second dose, of both the Pfizer and Moderna vaccine, increases risk substantially when compared with the risk seen after the first dose. Which really begs the question how smart it is to recommend a third dose to people under the age of 40. It's reasonable to think that the third dose might increase the risk of myocarditis even further.

One thing that is clear from the data in this study is that there is a strong age gradient, with risk of myocarditis after vaccination increasing massively with decreasing age. In fact, for the youngest group (16-29 years), the risk of myocarditis after getting the second dose of the Moderna vaccine was increased 74-fold!

Considering that decreasing age also means decreasing risk of a bad outcome from covid (including decreasing risk of myocarditis after covid), it is reasonable to think that there is an inflection point at which the harms of vaccination outweigh the benefits. On top of that, there is evidence that increasing the number of doses increases the risk of myocarditis. With those two factors in mind, it's my measured opinion that giving boosters to healthy young people, and especially to children, is nuts. On top of that, many, if not most, young adults and children have already had covid, and therefore have as good immunity as it's possible to get

<<https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fbrownstone.org%2Farticles%2F9-research-studies-affirm-naturally-acquired-immunity-to-covid-19-documented-linked-and-quoted%2F&data=04%7C01%7Cwsboh%40sboh.wa.gov%7C1fe5437d61194add750608d9d39d0215%7C11d0e217>, so boosting literally exposes them to risk of harm without any possibility of benefit. When the benefits of vaccination are zero, any non-zero risk is unacceptable.

I oppose WAC 246-100 Rulemaking that would expand any authority to involuntarily quarantine individuals. I also oppose adding a C-19 vaccine to the WAC 246-105 schedule of required vaccines for children to attend schools.

**For Immediate Release**

**From:** We The People of the Republic for the United States of America

Wednesday, June 9, 2021

To the Attention of:

President of UNITED STATES CORPORATION COMPANY, Vice-President of UNITED STATES CORPORATION COMPANY, Secretaries of UNITED STATES CORPORATION COMPANY, Agency Heads and Employees of UNITED STATES CORPORATION COMPANY, Sub-corporations/Subsidiaries/Affiliates/Contractors of UNITED STATES CORPORATION COMPANY, Entities and Persons erroneously acting under authority of UNITED STATES OF AMERICA/USA/US/America, Governors, Mayors, State/Local/Municipal Government Officials and Agency Heads, Chiefs of Police, Sheriffs, Doctors, Nurses, Pharmacists, Allied Healthcare Professionals, Business Owners, Officers/Directors/Managers of Business Entities, Chancellors/Provosts/Board Members/Officers/Directors/Managers of Institutions of Higher Education, Members of Boards of Education, School Principals, Directors/Managers of Early Childhood Development and Day-care Facilities, Presidents/Officers/Directors/Managers of Non-profits, Leaders of Religious and Faith-based Organizations, Leaders of Clubs, and Leaders of Societies

**cc:** Commander-in-Chief of, United States Armed Forces

**cc:** Commander-in-Chief of, Federation Command Forces and Allied Forces

Re: Cease and desist order

Dear Sirs:

We The People, men and women of the Republic for the United States of America, bring to your immediate attention and order you to cease and desist, ALL, the Genocide and Crimes against Humanity under Natural Law, Common Law, Treaty Law, Articles 6 and 7 of the International Criminal Court Statute, the Nuremberg Code, The Geneva Convention, The United Nations Convention, The United Nations Declaration on the Rights of Indigenous Peoples, in your jurisdiction.

- 1) All Covid19/coronavirus19 vaccinations and experimentation (genetic bio-warfare) Nationally,
- 2) All PCR Testing (Nationally),
- 3) All Masking (private and public spaces, all transportations by land, water, air and sea - Nationally),
- 4) All Lockdowns (Nationally),
- 5) All Quarantines (Nationally),
- 6) All closures of Provincial/States and Territorial (boundaries),
- 7) All closures of International Borders.

This will serve as your **lawful notice** to cease and desist all further actions described above, effective immediately.

Furthermore, we declare all of the Republic for the United States of America, OPEN, upon publication of this order.

**Special notes:**

- a) Joseph (Joe) Biden is not President of US, and the US Armed Forces has been in control since January 14, 2021.
- b) An email from the Commander-in-Chief of US Armed Forces has been sent to the Armed Forces of Canada, May 27, 2021, acknowledging and confirming the Authority of, HRH Queen Lady Romana Didulo, as Head of State and Commander-in-Chief of the Republic of Canada, Head of Government of Canada, and Queen of Canada.
- c) **For Global Peace and Prosperity only.** Endorsed by, HRH Queen Lady Romana Didulo, Head of State and Commander-in-Chief of the Republic of Canada, Head of Government of Canada, Queen of Canada. **~Transitioning from Democratic Government to Republic Government~**

Govern yourselves accordingly.

Signed and sealed,

By: We The People (men and women) of the Republic for the United States of America

Washington State Board of Health

I object to the plan to apply current infectious disease WAC codes to include Covid-19 for Washington State residents. This disease is manageable if treatment is started early. Moreover, it is survivable by more than 90% of the population. These Covid vaccines have little effect on the Omicron variant, and in fact, most people who get this variant have been double vaccinated, some have even received booster shots. Being fully vaccinated will require regular booster shots, forever!

Including Covid vaccines as a requirement for attending public school is completely unnecessary. Children have little risk from Covid-19, but they do have considerable risk from the unapproved Covid vaccines.

In America, health officers do not have the right to quarantine a person or family in a prison-type facility for refusing the Covid vaccination or any other medical intervention. This is not about our health; it is an unconstitutional, criminal attempt for the government to control the population. Those who are proposing this plan should be charged with treason.

Signed,  
Kerri Fischer

Subject: DOH proposed changes to WAC to include COVID-19

External Email

I am writing this is in direct opposition to the WA state DOH proposal to modify WAC to use Law Enforcement to involuntarily detain individuals and families into quarantine for failure to comply with requests for medical exemption, testing, treatment, counseling, and/or vaccination and also I am staunchly opposed to the DOH proposal to require COVID vaccines as part of school immunization requirements.

This is an unscrupulous action by the DOH and I expect more from public officials.

As a concerned citizen, I AM NOT IN SUPPORT OF THE DOH ACTION TO MODIFY WASHINGTON LEGISLATION TO INCLUDE COVID-19 FOR ILLEGAL DETENTION AND MANDATORY VACCINATIONS. Not only is this immoral, it is a complete abuse of law enforcement action and outside the reach of the DOH.

Thank You,  
Tammy Smith

To board WA state health,

I'm very concerned about the implementation of WAC 246-100-040 in the State of Washington.

This new law is an egregious overstep of the government. These are draconian measures that come too close to Nazi Germany and the deportation of millions of people into concentration camps.

I'm very disappointed with the Democratic party and will NEVER support a Democrat again in my lifetime if this law passes. The government has lost its mind and sanity in this battle against COVID.
