The BOH needs to be honest with Washingtonians about covid, especially the ineffectiveness of masks and vaccines as barriers against a respiratory virus, and the miniscule risk of fatality for healthy people younger than, say, 60. The deceits that governments at all levels have practiced with regards to covid have harmed society in many ways. Admitting to those deceits in 2023 and working to correct them are crucial for the BOH to regain the trust of people who know what the actual data says.

The above link is a presentation made by Doctor Aseem Malhotra, an esteemed cardiologist of England. I implore any of the addresses to this message to explain why or how he could be incorrect with his assumptions there-in. He is joined by other highly credentialed medical professionals in his findings. I need to understand how these dangerous drugs are not only approved for use, but endorsed by most of the addresses on this list. I am not seeking exposure or retribution. I am wanting to understand why medical professionals endorse the use of these drugs - - - please!

'Obsolete, Misguided': Critics Call Out Pfizer's Bivalent Booster for Kids Under 5

Pfizer and BioNTech said Monday they are seeking Emergency Use Authorization for an updated COVID-19 bivalent booster vaccine for children ages 6 months to 4 years old, but critics said the vaccines are obsolete and too risky.

The bivalent vaccine is currently authorized as a "booster" dose in the U.S. and the EU, for children 5 and older

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.reuters.com%2Fbusiness%2pharmaceuticals%2Fpfizer-applies-fda-authorization-omicron-retooled-vaccine-booster-

under-5-kids-2022-12-

Bivalent boosters are 'obsolete,' come with 'very concerning side effects'

Drs. Peter McCullough, Meryl Nass and Michelle Perro were critical of Pfizer and BioNTech's bid to receive EUA for the bivalent booster for young children.

Nass told The Defender

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde

"There was never anything to recommend the bivalent boosters

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeboosters-no-human-

 $trials\%2F\&data=05\%7C01\%7Cwsboh\%40sboh.wa.gov\%7C67b917572f6f4b897a6108dadbc31014\%7C11dbefore\ they\ were\ given\ an\ EUA\ for\ adults\ on\ August\ 31.$

"It is unconscionable, given what we know about the poor performance of the existing vaccines and their very concerning side effects, that FDA [U.S. Food and Drug Administration] and CDC went along with the new 'boosters' without a single human trial — and now the manufacturers want to give these untested vaccines to children as young as 6 months of age."

Without human trials for the "boosters," said Nass

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Faunass-

md%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C11d0e0, an internist with special interests in vaccine-induced illnesses, it was "guaranteed that no one would know what their safety issues were — making the whole process of informed consent

< https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdefauci-informed-

consent%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C1 , which is legally needed for unlicensed vaccines — a charade."

Perro, a pediatrician

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdevaccines-dangerous-kids-

cola%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C11d0, pointed out that by continuing to administer the original COVID-19 vaccines to children, children are receiving a vaccine "for a virus that is no longer in circulation."

Perro told The Defender, "There are key factors to take into consideration as to why the FDA authorization for the Omicron 'retooled' vaccine would be not only misguided, but malignant for children."

She added:

"If the authorization is approved, children in the 6-month to 4-year-old age group would receive two doses of the primary series of the original Delta-variant-derived Pfizer-BioNTech vaccine.

"Any pediatric clinical provider would know that the original vaccine is no longer of any use since the variant has undergone innumerable variations since its emergence. There are now hundreds of new variant lineages

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcov-

lineages.org%2Flineage_list.html&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a61, varying in pathogenicity as well as location, with the present variants now being designated informally as 'Coldvid' due to their relatively benign nature.

"The point is the original vaccine was made for a virus that is no longer in circulation. Following up with the Omicron-adapted bivalent vaccine is equally nonsensical for the same reasoning."

Similarly, McCullough, a cardiologist

< https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdemccullough-covid-pandemic-mass-

vaccination%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014% , questioned the bivalent booster for the youngest age group, telling The Defender that they are "obsolete" and "dead on arrival":

"The bivalent booster failed to stop Omicron BA.4/BA.5 in animals, but because it was pre-purchased, HHS [U.S. Department of Health and Human Services] decided to use the vaccine and its surrogate antibody rise, irrespective of its failed efficacy or lack of demonstrated safety since there were no human trials.

"In the last several months BA.4/BA.5 has moved out, giving way to BQ.1 and BQ1.1, so the bivalent boosters are now obsolete even on theoretical grounds. With no theoretical or actual benefit and with no assurances on short or longer term safety, the bivalent boosters are dead on arrival."

In questioning the effectiveness — and need — for the "boosters," Nass referred to a Nov. 18 New York Times report

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nytimes.com%2F2022%2F1 boosters-

surge.html&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C11

on the "surge" in respiratory illnesses across the U.S., which stated:

"The power variants, called BO 1 and BO 1.1, are spreading quickly, and boosters seem.

"The newer variants, called BQ.1 and BQ.1.1, are spreading quickly, and boosters seem to do little to prevent infections with these viruses, as they are excellent evaders of immunity."

Addressing the increase in non-COVID-19 respiratory illnesses, Perro said this was set into motion with the introduction of the COVID-19 vaccines.

She told The Defender:

"Forcing a vaccine schedule with experimental genetic therapeutics for organisms that have morphed since their introduction begs the question as to what is the root cause motivation — whether it be monetary or other. Every illness and its subsequent therapy requires a risk-benefit ratio when evaluating children. In terms of COVID-19, we are giving an already outdated vaccine which has not been studied for a potential disease which has nearly zero risk in kids.

"The harm to children from this experimental gene-immunomodulating therapy has been demonstrated by our own CDC, documenting severe illness and death in children who have received this unnecessary vaccine. Placing this series on the vaccination schedule for children

for children <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde

schedule%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C gives Pharma

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdepharma%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C1

an indemnity pass.

"While government agencies are touting viral strains on communities from other pathogens (i.e., RSV and influenza), it should be emphasized that this viral tsunami has been triggered by the introduction of the COVID-19 vaccine which has disarmed and disabled people's innate immunity

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2 to fight off these other pathogens."

Nass said the continued expansion of the federal COVID-19 state of emergency allows the administration of EUA vaccines to continue.

"It is only by continuing to declare a pandemic emergency that these exceedingly dangerous, unlicensed EUA vaccines could be used," she said. "If the government was honest and admitted the emergency was over, by law no EUA vaccines could be given to anyone."

Instead, Nass added, the vaccines are illegally mandated, in many cases to attend college

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde vaccine-mandate-college-students-unethical-

et%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b917572f6f4b897a6108dadbc31014%7C11d0e2 , "even though college-age males are at the highest risk of myocarditis and at extremely low risk of a serious case of COVID."

"Our public health establishment, under the leadership of Tony Fauci <a href="https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.amazon.com%2FReal-https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2Fwareal-https%3 Anthony-Fauci-Democracy-

Childrens%2Fdp%2F1510766804%2Fref%3Dsr_1_1&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C67b9 , Robert Califf and Rochelle Walensky has become a criminal enterprise," Nass said.

According to Perro, "The only authorization must be no authorization and it is time for the FDA to do its job."

Updated: This article was updated on Dec. 9 with the news that the Centers for Disease Control and Prevention expanded authorization of the Pfizer-BioNTech bivalent booster vaccine for infants and children, ages 6 months to 5 years old.

Subject: Fw: Vaccine Advisory Committee Meeting, December 15, 2022

*sent to each person on this list, but addresses published online mostly bounced back. Hiding from the civilian public is treasonous at best. Public servants must be accessible. Notice to principles is notice to agents; notice to agents is notice to principles.

Intended primarily for the living men and women in their personal capacity that sometimes act as the Vaccine Advisory Committee (VAC) members, however, many others are on the TO: line as a matter of notice that helps to eliminate the problem of compartmentalization by this agency.

Tao Kwan-Gett who sometimes act as Washington Department of Health's Chief Science Officer and committee Chair

John Dunn who sometimes acts as Washington Department of Health's Managed Care committee member

Wendy Stevens who sometimes acts as Washington Department of Health's American Indian representative committee member

Christopher Chen who sometimes acts as Washington Department of Health's Agency's Healthcare Purchase and Committee member

Tara Tumulty who sometimes acts as Washington Department of Health's nurse representation committee member

Mary Alison Koehneke who sometimes acts as Washington Department of Health's representation for naturopathic medicine committee member

Kristi Riniker who sometimes acts as Washington Department of Health's representation for family physicians committee member

John Merrill-Steskal who sometimes acts as Washington Department of Health's representation for family physicians committee member

Daniel Moorman who sometimes acts as Washington Department of Health's representation of pediatrics committee member

Stephen Pearson who sometimes acts as Washington Department of Health's representation of pediatrics committee member

Amy Person who sometimes acts as Washington Department of Health's represtation of Benton Franklin Health District committee member

Mark Larson who sometimes acts as Washington Department of Health's representation of Kittitas County Public Health Department committee member

Tristen Lamb who sometimes acts as Washington Department of Health's representation of Kittitas County Public Health Department committee member

Stephane Stookey who sometimes acts as Washington Department of Health's representation of San Juan County Health & Community Services committee member

Jeffrey Duchin who sometimes acts as Washington Department of Health's representation of Seattle & King County committee member

Mary Anderson who sometimes acts as Washington Department of Health's representation of internal medicine committee member

Jenny Arnold who sometimes acts as Washington Department of Health's representation of pharmacy committee member

Annie Hetzel who sometimes acts as Washington Department of Health's representation of public instruction committee member

Adrian Dominquez who sometimes acts as Washington Department of Health's

representation of urban Indian health committee member

Tam Lutz who sometimes acts as Washington Department of Health's representation of tribal epidemiology committee member

Alisa Kachikis who sometimes acts as Washington Department of Health's representation of Obstetricians and Gynecologists committee member

Beth Harvey who sometimes acts as Washington Department of Health's consultant committee member

Ed Marcuse who sometimes acts as Washington Department of Health's consultant committee member

SheAnne Allen who sometimes acts as Washington Department of Health's representation of staff committee member

Kathy Bay who sometimes acts as Washington Department of Health's representation of staff committee member

Terilynn Bullock who sometimes acts as Washington Department of Health's representation of staff committee member

Jen Coiteux who sometimes acts as Washington Department of Health's representation of staff committee member

Chas DeBolt who sometimes acts as Washington Department of Health's representation of staff committee member

Greg Endler who sometimes acts as Washington Department of Health's representation of staff committee member

Hannah Febach who sometimes acts as Washington Department of Health's representation of staff committee member

Mary Huynh who sometimes acts as Washington Department of Health's representation of staff committee member

Scott Lindquist who sometimes acts as Washington Department of Health's representation of staff committee member

Michele Roberts who sometimes acts as Washington Department of Health's representation of staff committee member

and all others addressed in the To: line

U.S. Senator Johnson held a round table meeting on the covid-19 vaccine, today, December 7, 2022 and I am demanding that each of you watch this senate meeting whereas the topic and facts are 100% relevent to the agenda of Washington Department of Health's VAC December 15th scheduled meeting to vote on whether or not to add covid-19 vaccines to the childhood immunization schedule (the schedule). Watch the senate roundtable prior to the WADOH_VAC meeting, December 15, 2022. This is notice and any evidence presented herein, today on this recorded senate meeting brushed over, ignored, dismissed, not addressed, by each of you prior to voting whether or not to add this covid-19 vaccine to the childhood schedule (or any indication that it should be taken

by any people) will make you fully accountable to the harm that results. Your (each man and woman noticed here) vote to add this item to the schedule will be your claim and acquiescence to being fully liable in each of your personal capacities and commercial capacity.

Please do right by humanity

Subject: An Important Health Subject, Please do not Ignore

External Email

To Whom This May Concern,

The following link takes you to Senator Ron Johnson's site and a video from a roundtable event that was conducted by Senator Ron Johnson recently. Since January of 2021, Senator Ron Johnson has been the only Senator (that I know of) that has given a voice to the Covid vaccine injured and families that have lost loved ones. The video is covering what we know and have known, but was covered up about the Covid 19 vaccines and their side affects, the mandates and poor handling of the public.

This should not be ignored, people deserve to know the truth and let them decide on how they want to handle situations. Truth is hard to swallow sometimes, however, if we are going to move forward and learn from this, we have to hear both sides of the story. The link below shares the other side of the story.

A little background on me... I used to work as an aircraft interior Flammability Engineer for an Aerospace company. I had to ensure that all parts we built for an aircraft met the Federal Aviation Administration (FAA) Fire Safety Regulations before parts could be shipped and installed on an aircraft. Over the years, do to aircraft fires, my job became more difficult with more FAA regulations. One example; we were no longer allowed to use manufactures test data on materials/parts we bought and used in our parts from a manufacturer. It was deemed that manufacturers could not be trusted to provide honest data and would rig results in favor of a pass, so they could sell their product.

Therefore, we had to create test plans (listing all materials/parts for the product), have it approved by an FAA representative, test materials/parts in an FAA approved test lab per the regulations and have an FAA representative there to witness, create the report, have it approved by an FAA representative before parts could ship.

Also, if any one component of a material/part changed, a revision to the test plan had to be made, approved by FAA and retested and so on.

This has always been on my mind.... Why does the FAA (a branch of the federal government) not allow manufacturers test data for materials used on an aircraft and expect a retest if one component in the material chemistry changes, but the FDA and CDC accepts data from Pharmaceutical manufacturers or pharma funded test sites without federal oversite, and allow changes to the chemistry without retesting the product?

We were never allowed in the Aerospace industry 'emergency use authorization' to a product just to get the aircraft in flight, incase it caused a fire or crash that killed people.

Yet we allowed an unknown (novel) product into humans before trials were over, ignored the safety signals in the Government VEARS database that shows more deaths and adverse events than all products combined in the past 30 years, the product literature/report in the vials is 'Intentionally left blank", and you can still get Covid even after being fully vaccinated.

Sorry for such a long email, I wanted to give this subject context for why it is so important to me that you read this and see the video in the link below, our future depends on it.

Subject: Please Explain mRNA Drug Use Approvals

External Email

Good Day,

I am writing out of concern for the public health of Washington State and The North Olympic Peninsula Health District. Public health COVID protocols established by Federal health management have proven to be and remain complete failures. Unfortunately, those protocols appear to have been blindly followed by all subsequent health management, (State, County, Health Districts, Cities, school districts). I do not understand why we have, as examples, a Washington State Board of Health or a North Olympic Peninsula Health District, if their only function is to parrot Federal direction. Absent independent area thinking, research and control we are advocating for one person or one entity to rule our lives and the world. Further; with complete deferral to Federal direction, there is no need for local Health management authorities. I ask why COVID vaccines were approved by the WSBoH and NOPHD for kids when I can find no statistical support for that position. If there exists such justification, by all means, explain that justification to the citizens. Please explain to us non-medical professionals why our kids would want or need these experimental drugs. Particularly explain how many children might die from COVID absent these drugs and of those deaths how many might be prevented using the drugs. In the interest of informed consent please also explain any and all potential adverse reactions to the drugs. Obfuscated data such as relative risk reduction, (RRR), used by pharma for marketing purposes is unacceptable and absolute risk reduction, (ARR), must be cited. If the board or District either cannot or does not provide those explanations, why then were the drugs approved to give to Washington State kids? If there is no accountability for positions taken by the WSBoH and NOPHD, then the positions taken are meaningless. Absent accountability, board positions are then subject to politics, sway, lobbying and coercion; not public health. So I implore the board / District to explain from a professional health perspective first why the experimental drugs were approved for children and second why you promoted them for all citizens, regardless of age or personal conditions. Employers relied upon your positions to terminate employees who did not take the drugs. I am also messaging area publishers in the hope that this time I will not be ignored.

I and all State citizens look forward to learning your reasoning in promoting these experimental drugs.

Sincerely,

Garry Blankenship

The Washington fraud board of health rise and never forget to give yourselves a hand. Egotistical clot shot pushers! Be ashamed very vote everytime should all be disbarred for perpetual propaganda and fake warnings.

You know that still to this day no Sars cov 2 has ever been isolated. You know that the flu was non existent in 2020. And the fake reports of CoVid 19 during 2020 reported hourly on MSM numbers was inflated and a shame with the disappearance of the flu that year as well. You know that both years 2021, 2022 have exceeded the deaths of 2020 with no virus. The variants are a direct result of the jab fake virus and now children are dying world wide not because of CoVid 19 you can't even prove it exists other than the (S) protein which the vaccine using synthetic mRNA and CRSPR Cas9 technology changes your natural DNA to patentable synthetic DNA. To produce as it is described by the Phizer documents Moderna and B.Gates A.Fraudc1 and the WHO to now produce unnaturally the (S) protein. The rapid tests only test for 2 proteins and dosen't confirm you have CoVid 19. Tedros isn't a medical professional either he's a war criminal from Ethiopia and a puppet just like you all at our states relatively new health board but you do nothing for health. You instead are puppets of TAG and The WEF and B.GATES their is now honor amongst thieves and you all biting every line the toss at you. Aren't doctors anymore it's a scam the most fuked up thing is your heart is black your eyes blind by greed and authoritarian selfish esteem. There is no debate or discussion with the Washington state puppet board of health. You are all shifty low life's you might have money but money will weigh you down and never have the true ticket for enlightenment and honor.

Notice to principles is notice to agents; notice to agents is notice to principles

the information below is in more legible format on this website of ICAN, the non-profit that is doing the work our regulators should have been and should be doing. You, Washington health agents, are not to "take directions from" the CDC, FDA, or any other federal or world health agency. They are places for collaboration. No government has the authority to outsource civilian health directives. You have well paid scientists that SHOULD be doing science independently, reviewing ALL studies that they can find and they should look! Findings are to be reported to these agencies as a collaborative effort. Each state's agency SHOULD be making independent determinations. It's how genocide is avoided from a corrupt central agency.

TEXT of content / letter / demand below:

November 10, 2022 VIA EMAIL AND FED EX Robert Califf, MD Commissioner at FDA Office of the Commissioner Food and Drug Administration 10903 New Hampshire Ave Silver Spring, MD 20993-0002 commissioner@fda.hhs.gov Rochelle Walensky, MD Director at CDC Office of the Director Centers for Disease Control and Prevention 1600 Clifton Rd Atlanta, GA 30329 Aux7@cdc.gov Victoria Wright, MPH, Deputy Director, Division of Reproductive Health National Center for Chronic Disease Prevention and Health Promotion at CDC Mailstop F-80 Room 2239 4770 Buford Highway NE Atlanta, GA 30341-3717 Vdc4@cdc.gov Re: Reproductive harms and COVID-19 Vaccines Dear Commissioner Califf, Director Walensky, and Deputy Director Wright: On behalf of Informed Consent Action Network ("ICAN"), we write regarding COVID19 vaccines and their impact on reproduction. In its COVID-19 vaccine clinical trial, Pfizer implemented strict protocols concerning reproduction in its human participants. Specifically, "during the intervention period and for at least 28 days after the last dose" male participants were required to: • Refrain from donating sperm. PLUS either: • Be abstinent from heterosexual intercourse with a female of childbearing potential as their preferred and usual lifestyle (abstinent on a long-term and persistent basis) and agree to remain abstinent. OR • Must agree to use a male condom when engaging in any activity that allows for passage of ejaculate to another person. • In addition to male condom use, a highly effective method of contraception may be considered in WOCBP partners of male 2 participants (refer to the list of highly effective methods below in Section 10.4.4).1 Pfizer explained that these requirements applied during the intervention period [receipt of the vaccine] and for at least 28 days after the last dose of study intervention, as that time period "corresponds to the time needed to eliminate reproductive safety risk of the study

intervention(s)."2 Likewise, females who were pregnant or breastfeeding were ineligible to participate in the trial and all other females were only eligible to participate in the study if one of the following conditions applied: • Is not a WOCBP [woman of childbearing potential]. OR • Is a WOCBP and using an acceptable contraceptive method as described below during the intervention period (for a minimum of 28 days after the last dose of study intervention). The investigator should evaluate the effectiveness of the contraceptive method. 3 Pfizer plainly had a reason for implementing these eligibility requirements for its trial (to eliminate reproductive safety risk), which resulted in the COVID-19 vaccine not being studied as to its effects on reproduction or on breastfeeding babies.4 It is highly concerning that Pfizer did not study potential reproductive issues given that its own study conducted prior to the clinical trial showed that the lipids and mRNA from the COVID-19 vaccine remain in the testes for at least up to 48 hours with increasing concentration levels at 25 minutes, 1 hour, 2 hours, 4 hours, 8 hours, 24 hours, and 48 hours post-vaccination. 5 In light of this, ICAN requests an explanation as to why these same instructions and conditions concerning reproduction were not part of the use instructions when the vaccines were offered to the American public. Instead, both the FDA and CDC both strongly promote that everyone 6 months and older receive a COVID-19 vaccines as soon as he or she is eligible – including pre-pubescent children, women of childbearing potential, pregnant women, breastfeeding women, and men and women who are sexually active. There were no instructions given to Americans to abstain from intercourse post-vaccination to "eliminate reproductive safety risk of the" vaccine. An explanation is warranted, 1 https://cdn.pfizer.com/pfizercom/2020-11/C4591001_Clinical_Protocol_Nov2020.pdf at 132 (emphasis added). 2 Id. (emphasis added). 3 Id. at 132-133. 4 The one developmental toxicity study performed in female rats is inadequate. 5 See https://phmpt.org/wpcontent/uploads/2022/03/125742 S1 M4 4223 185350.pdf#page=3 at 24. 3 Moreover, post-marketing studies show: • Pregnancy and menstrual abnormalities6 • Impairment of semen concentration and total mobile count7 • Increased incidence of spontaneous abortion8 These post-marketing studies, among myriad others, reflect that there exists a real-world concern about adverse effects of COVID-19 vaccines on reproduction generally a concern that Pfizer appeared to understand when its trial was being conducted yet did not adequately assess. The FDA's role is to demand adequate testing on new vaccines and to be transparent about benefits and risks. This has not occurred. ICAN requests that you provide the following: 1. An explanation as to why the conditions concerning reproduction that were part of Pfizer's trial were not part of the use instructions when the vaccines were offered to the American public; 2. While it is no substitute for clinical trial data, please provide any and all studies that led the FDA and CDC to conclude that the vaccine would not adversely affect reproductive health when authorizing, licensing, and recommending Pfizer's COVID19 vaccine to all Americans ages 6 months and older; and 3. Any other relevant studies that have been conducted or are being conducted by Pfizer, federal health agencies, or any third parties that are looking at these reproductive issues and that have not been made public. ICAN looks forward to your prompt response to this alarming concern. Very truly yours, Aaron Siri, Esq. Elizabeth A. Brehm, Esq. 6 Thorp, J.A.; Rogers, C.; Deskevich, M.P.; Tankersley, S.; Benavides, A.; Redshaw, M.D.; McCullough, P.A. COVID-19 Vaccines: The Impact on Pregnancy Outcomes and Menstrual Function. 'Obsolete, Misguided': Critics Call Out Pfizer's Bivalent Booster for Kids Under 5

Pfizer and BioNTech said Monday they are seeking Emergency Use Authorization for an updated COVID-19 bivalent booster vaccine for children ages 6 months to 4 years old, but critics said the vaccines are obsolete and too risky.

Bivalent boosters are 'obsolete,' come with 'very concerning side effects'

Drs. Peter McCullough, Meryl Nass and Michelle Perro were critical of Pfizer and BioNTech's bid to receive EUA for the bivalent booster for young children.

Nass told The Defender

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde">https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde

"There was never anything to recommend the bivalent boosters

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdeboosters-no-human-

 $trials\%2F\&data=05\%7C01\%7Cwsboh\%40sboh.wa.gov\%7C52acd980123749a59f5808dadc7b9274\%7C11dbefore\ they\ were\ given\ an\ EUA\ for\ adults\ on\ August\ 31.$

"It is unconscionable, given what we know about the poor performance of the existing vaccines and their very concerning side effects, that FDA [U.S. Food and Drug Administration] and CDC went along with the new 'boosters' without a single human trial — and now the manufacturers want to give these untested vaccines to children as young as 6 months of age."

Without human trials for the "boosters," said Nass

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Faunass-

md%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f5808dadc7b9274%7C11d0c, an internist with special interests in vaccine-induced illnesses, it was "guaranteed that no one would know what their safety issues were — making the whole process of informed consent

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdefauci-informed-

consent % 2F&data=05% 7C01% 7Cwsboh % 40sboh. wa.gov % 7C52 acd 980123749 a 59f5808 dadc 7b9274% 7C1, which is legally needed for unlicensed vaccines — a characle. "

Perro, a pediatrician

< https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdevaccines-dangerous-kids-

cola%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f5808dadc7b9274%7C11d0, pointed out that by continuing to administer the original COVID-19 vaccines to children, children are receiving a vaccine "for a virus that is no longer in circulation."

Perro told The Defender, "There are key factors to take into consideration as to why the FDA authorization for the Omicron 'retooled' vaccine would be not only misguided, but malignant for children."

She added:

"If the authorization is approved, children in the 6-month to 4-year-old age group would receive two doses of the primary series of the original Delta-variant-derived Pfizer-BioNTech vaccine.

"Any pediatric clinical provider would know that the original vaccine is no longer of any use since the variant has undergone innumerable variations since its emergence. There are now hundreds of new variant lineages

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcov-

lineages.org%2Flineage_list.html&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f58, varying in pathogenicity as well as location, with the present variants now being designated informally as 'Coldvid' due to their relatively benign nature.

"The point is the original vaccine was made for a virus that is no longer in circulation. Following up with the Omicron-adapted bivalent vaccine is equally nonsensical for the same reasoning."

Similarly, McCullough, a cardiologist

< https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fdemccullough-covid-pandemic-mass-

vaccination%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f5808dadc7b9274%, questioned the bivalent booster for the youngest age group, telling The Defender that they are "obsolete" and "dead on arrival":

"The bivalent booster failed to stop Omicron BA.4/BA.5 in animals, but because it was pre-purchased, HHS [U.S. Department of Health and Human Services] decided to use the vaccine and its surrogate antibody rise, irrespective of its failed efficacy or lack of demonstrated safety since there were no human trials.

"In the last several months BA.4/BA.5 has moved out, giving way to BQ.1 and BQ1.1, so the bivalent boosters are now obsolete even on theoretical grounds. With no theoretical or actual benefit and with no assurances on short or longer term safety, the bivalent boosters are dead on arrival."

In questioning the effectiveness — and need — for the "boosters," Nass referred to a Nov. 18 New York Times report

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.nytimes.com%2F2022%2F1 boosters-

surge.html&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f5808dadc7b9274%7C11

on the "surge" in respiratory illnesses across the U.S., which stated:

"The newer variants, called BO 1 and BO 1.1, are spreading quickly, and boosters seem.

"The newer variants, called BQ.1 and BQ.1.1, are spreading quickly, and boosters seem to do little to prevent infections with these viruses, as they are excellent evaders of immunity."

Addressing the increase in non-COVID-19 respiratory illnesses, Perro said this was set into motion with the introduction of the COVID-19 vaccines.

She told The Defender:

"Forcing a vaccine schedule with experimental genetic therapeutics for organisms that have morphed since their introduction begs the question as to what is the root cause motivation — whether it be monetary or other. Every illness and its subsequent therapy requires a risk-benefit ratio when evaluating children. In terms of COVID-19, we are giving an already outdated vaccine which has not been studied for a potential disease which has nearly zero risk in kids.

"The harm to children from this experimental gene-immunomodulating therapy has been demonstrated by our own CDC, documenting severe illness and death in children who have received this unnecessary vaccine. Placing this series on the vaccination schedule for children

for children <https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde

schedule%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f5808dadc7b9274%7Cgives Pharma

 an indemnity pass.

"While government agencies are touting viral strains on communities from other pathogens (i.e., RSV and influenza), it should be emphasized that this viral tsunami has been triggered by the introduction of the COVID-19 vaccine which has disarmed and disabled people's innate immunity

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.ncbi.nlm.nih.gov%2Fpmc%2 to fight off these other pathogens."

Nass said the continued expansion of the federal COVID-19 state of emergency allows the administration of EUA vaccines to continue.

"It is only by continuing to declare a pandemic emergency that these exceedingly dangerous, unlicensed EUA vaccines could be used," she said. "If the government was honest and admitted the emergency was over, by law no EUA vaccines could be given to anyone."

Instead, Nass added, the vaccines are illegally mandated, in many cases to attend college

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fchildrenshealthdefense.org%2Fde vaccine-mandate-college-students-unethical-

et%2F&data=05%7C01%7Cwsboh%40sboh.wa.gov%7C52acd980123749a59f5808dadc7b9274%7C11d0e , "even though college-age males are at the highest risk of myocarditis and at extremely low risk of a serious case of COVID."

"Our public health establishment, under the leadership of Tony Fauci <a href="https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.amazon.com%2FReal-https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2F%2Fwww.amazon.com%2FReal-https%3A%2Fwareal-https%3 Anthony-Fauci-Democracy-

According to Perro, "The only authorization must be no authorization and it is time for the FDA to do its job."

Updated: This article was updated on Dec. 9 with the news that the Centers for Disease Control and Prevention expanded authorization of the Pfizer-BioNTech bivalent booster vaccine for infants and children, ages 6 months to 5 years old.

What will it take for this agency to admit that masks don't work against respiratory viruses? We have all the evidence before covid, we have all the evidence during covid, and, looking overseas, we have Japan and South Korea, perhaps the most masked countries on the planet, leading the world in new covid cases.

Please stop lying to Washingtonians about masks.

Good morning and happy holidays!

I am Catalina, Physical Therapist from ATI Seattle - University District. First of all, I would like to thank you and the entire team for the immense effort dedicated to the pandemic and keeping us safe.

I work in an outpatient PT clinic, with a robust covid protocol where patients simply cannot be seeing if they have covid symptoms, and cannot come back to therapy unless they show proof of negative covid test. I would like to know the reasons why a PT clinic should continue with the mandatory use of masks, as patient do not come here to seeking medical attention and we are not a primary care facility.

I appreciate your response and time, best regards,

Catalina Nazal

Subject: Communicating With Board Members

External Email

Please do not approve health officers to use law enforcement (WAC 246-100-070) to force an emergency order to involuntarily detain a person or group of persons to be isolated in a quarantine facility (WAC 246-100-045). The government should not be making health decisions for us or forcing us into something that we don't believe in or support. People, and government, are inquiring way to much into our private affairs like never before. Never in my 65 years have I seen so much governmental control, censoring and fear factoring.

I understand that COVID is a real thing and that many people are not following what "science" calls protocols. I had COVID and heard from many medical professionals that people who are vaccinated and following the "Science" are still getting COVID, spreading it and dying. If the vaccine was so effective it would not take 4 boosters to stop the virus which hasn't happened yet. People are receiving a false sense of security with the vaccine. I have two co-workers that are fully vaccinated and have been sick for two weeks now with COVID.

As an educator, I am seeing students suffer from fear, anxiety, alienation and unnecessary tests. Many of my students have missed significant schooling because they can't come to school with cold symptoms. Students are suffering academically and socially missing so much school. Along with parents experiencing financial impacts due to not being able to work. Forcing more regulations, laws and enforcement will lead to longer, life impacting consequences.

There are other healthy positive interventions that should be promoted. People who take Zinc, Quercetin, ascorbic acid and Vitamin D are healthier and do not seem to be suffering side effects of COVID. There is also ivermectin that other states and countries have used to decrease COVID cases.

Again, please think of long term consequences to implemting these WAC's. I would very much love to see everyone get healthy, resilient and feel like they can make their own wise choices.

With appreciation,

Pat Kulp

Parent, grandparent and Special Education teacher

Subject: face masks

External Email

Hello:

The other day I read a doctor write, in regards to face masks, "Public health apparently has no interest in the ability to detect and appreciate faces, and what that means to being human."

Given the persistence of Washington's healthcare masking order, it's hard to dispute that assertion as regards the Board of Health. The order needs to end immediately.

Subject: vaccine-preventable disease

External Email

Hello:

I noticed that in the upcoming legislative session the Board is seeking to increase community "immunizations [to] reduce the incidence of vaccine-preventable disease." It is also trying to "promote vaccination against COVID-19." However, the covid vaccines do not prevent covid. There is, strictly speaking, no such thing as "vaccination against COVID-19." Vaccination can only limit covid severity. So, can the Board explain the contradictions in those passages I've quoted above?

*sent to each person on this list, but addresses published online mostly bounced back. Hiding from the civilian public is treasonous at best. Public servants must be accessible. Notice to principles is notice to agents; notice to agents is notice to principles.

Intended primarily for the living men and women in their personal capacity that sometimes act as the Vaccine Advisory Committee (VAC) members, however, many others are on the TO: line as a matter of notice that helps to eliminate the problem of compartmentalization by this agency.

Tao Kwan-Gett who sometimes act as Washington Department of Health's Chief Science Officer and committee Chair

John Dunn who sometimes acts as Washington Department of Health's Managed Care committee member

Wendy Stevens who sometimes acts as Washington Department of Health's American Indian representative committee member

Christopher Chen who sometimes acts as Washington Department of Health's Agency's Healthcare Purchase and Committee member

Tara Tumulty who sometimes acts as Washington Department of Health's nurse representation committee member

Mary Alison Koehneke who sometimes acts as Washington Department of Health's representation for naturopathic medicine committee member

Kristi Riniker who sometimes acts as Washington Department of Health's representation for family physicians committee member

John Merrill-Steskal who sometimes acts as Washington Department of Health's representation for family physicians committee member

Daniel Moorman who sometimes acts as Washington Department of Health's representation of pediatrics committee member

Stephen Pearson who sometimes acts as Washington Department of Health's representation of pediatrics committee member

Subject: Senator Ron Johnson's roundtable

External Email

Dear Members of the Board,

In case you missed this, here is a link to Senator Ron Johnson's Covid jab roundtable:

https://gcc02.safelinks.protection.outlook.com/?url=https%3A%2F%2Frumble.com%2Fv1ze4d0covid-19-vaccines-what-they-are-how-they-work-and-possible-causes-ofinjuri.html&data=05%7C01%7CWsboh%40sboh.wa.gov%7C0014cad626ce427f5c8b08dadfcd32ea%7C11d

This is the major issue of our time. As a servant of we the people, you have a responsibility to know the content of this hearing, else you cannot do your job for us.

I would like to know if each of you watched this in its entirety or not.

Thank you.

Lynn Bergeron

Subject: Please watch Senator Ron Johnson's Covid 19 Roundtable

External Email

I am a concerned citizen interested in facts related to the COVID 19 shots and injuries resulting from them. I received a link to Senator Johnson's recent roundtable discussion on these topics and I request that your agency listen and comment on the topic with regard to the facts presented.

Respectfully,

Linda Jones
